SUBJECT: Streaming services: commercial advertisements

SOURCE: Author

DIGEST: This bill prohibits a music streaming service, podcast streaming service, or video streaming service that serves California consumers from transmitting the audio of commercial advertisements louder than the video content the advertisements accompany.

Assembly Amendments extend the implementation date to January 1, 2027; delete the definition of social media video service; and clarify that a video streaming service includes a user-generated video streaming service.

ANALYSIS:

Existing law:

1) Prohibits, beginning July 1, 2026, a video streaming service that serves California consumers from transmitting the audio of commercial advertisements louder than the video content the advertisements accompany, consistent with the regulations adopted by the Federal Communications Commission pursuant to the Commercial Advertisement Loudness Mitigation (CALM) Act (Public Law 111-311) for television broadcast stations, cable operators, and other multichannel video programming distributors. (Business and Professions Code (BPC) § 22776)

2) Defines "video programming" as having the same meaning as the term is defined in Section 613(h) of Title 47 of the United States Code, which is programming by, or generally considered comparable to programming provided by a television broadcast station but not including consumer-generated media. (BPC § 22775)

3) Defines "video streaming service" as an entity that makes video programming or video content the entity makes available for users to view. Specifies that "video streaming service" does not include a television broadcast station, cable operator, or other multichannel video programing distributor, or an entity that serves video programming or video content without commercial advertisements.

4) States that the prohibition in 1) above does not create a private right of action. (BPC § 22775)

5) Existing federal law establishes standards for the transmission of commercial advertisements by a television broadcast station, cable operator, or other multichannel video programming distributor by requiring, within 1 year after December 15, 2010, the Federal Communications Commission (FCC) to establish a regulation for the "Recommended Practice: Techniques for Establishing and Maintaining Audio Loudness for Digital Television" (Advanced Television Systems Committee's (ATSC) A/85 Recommended Practice ("ATSC A/85 RP") (47 U.S.C. § 621)

This bill:

1) Prohibits a music streaming service, podcast streaming service, or video streaming service that serves California consumers from transmitting the audio of commercial advertisements louder than the content the advertisements accompany.

2) Extends the implementation from July 1, 2026, to January 1, 2027.

Background

According to the FCC, Congress enacted the CALM Act to direct the FCC to establish rules to require commercials to have the same average volume as the programs they accompany. These rules went into effect on December 13, 2012. Specifically, the CALM Act directs the FCC to establish rules that require TV stations, cable operators, satellite TV providers or other multichannel video program distributors to apply the Advanced Television Systems Committee's (ATSC) A/85 Recommended Practice ("ATSC A/85 RP") to commercial advertisements they transmit to viewers. The ATSC A/85 RP is a set of methods to measure and control the audio loudness of digital programming, including commercials. This standard can be used by all broadcast television stations and pay TV providers. The ATSC practice does not set an absolute cap on loudness. Rather, it requires commercials to have the same average volume as the programming they accompany, so that the volume a consumer chooses is the one at which both the programming and the advertisements will air. The FCC relies on consumer complaints to monitor industry compliance.

In 2023, Senator Sheldon Whitehouse (D-RI) and Representative Anna G. Eshoo (D-CA) introduced legislation, S. 1127 and H.R. 2422, to extend the CALM Act's prohibitions to all ad-supported streaming services to ensure that the volume of commercials on streaming services is not louder than regular programming. It also grants the FCC the ability to investigate and enforce violations of the CALM Act by broadcast, cable, and satellite TV operators and requires a study analyzing the effectiveness of the CALM Act in moderating ad loudness. The measures were referred to their respective policy committees, but it appears no further action was taken.

Comments

This bill specifies certain prohibitions on activity by entities that serve consumers throughout the nation and world. It is unclear whether it is feasible for music streaming services, podcast streaming services or video streaming services to establish advertisement transmission standards only for California residents. This effort may be more appropriate for the federal government to address by updating the CALM Act to include all ad-supported streaming services. This bill additionally lacks any type of enforcement mechanism and does not include a pathway for consumers to report a violation of the proposed prohibition, and it is unclear if this bill will result in any meaningful change without enforcement or whether consumers will just continue to report complaints and concerns about advertising volume to the FCC as they do today.

SUBJECT: Infrastructure revitalization financing districts

SOURCE: Author

DIGEST: This bill allows infrastructure revitalization financing districts to finance entertainment and sports facilities.

Assembly Amendments deleted the contents of the bill and inserted the current provisions.

ANALYSIS:

Existing law:

1) Authorizes a city or county to create an infrastructure revitalization financing districts (IRFDs) by adopting a resolution of intention that outlines the types of facilities it will finance, that it will use tax-increment financing (TIF) to finance those facilities, and fix a time and place for a public hearing on the proposed district. The city or county must mail a copy of the resolution to each landowner and affected taxing entity. After adopting the resolution, the city or county must direct the city engineer to prepare an infrastructure financing plan (IFP) describing the proposed district as specified.

2) Requires the city or county to send each landowner and affected taxing entity a copy of the IFP and conduct a public hearing no sooner than 60 days after sending the plan. At the conclusion of the hearing, the city or county can adopt a resolution proposing formation of the district.

3) Requires, upon adopting the resolution, the city or county to receive 2/3 voter approval at the next general election to form the district. The IRFD must also receive 2/3 voter approval to issue bonds, but can consolidate the elections to form the district and issue bonds.

4) Allows IRFDs to finance the purchase, construction, expansion, improvement, seismic retrofit, or rehabilitation of any real or other tangible property with an estimated useful life of 15 years or longer, planning and design work directly related to that property and other specified costs. However, IRFDs must not finance routine maintenance, repair work, or the costs of ongoing operation or for providing services of any kind. These projects must be of communitywide significance, and can include everything from highways and public utility infrastructure to the acquisition, construction, or repair of commercial or industrial structures for private use.

This bill allows IRFDs to finance entertainment or sports facilities.

Background

From the early 1950s until their dissolution in 2011, California redevelopment agencies (RDAs) used property tax increment financing (TIF) to pay for economic development projects in blighted areas pursuant to Community Redevelopment Law. Generally, TIF involves a local government forming a TIF district to issue bonds and use the bond proceeds to pay project costs within the boundaries of a specified project area. To repay the bonds, the district captures increased property tax revenues generated when projects the bonds finance increase assessed property values within the project area. To calculate the increased property tax revenues captured by the district, the amount of property tax revenues received by any local agency participating in the district is "frozen" at the amount it received from property within a project area prior to the project area's formation. In future years, as the project area's assessed valuation grows above the frozen base, the resulting additional property tax revenues—the so-called property tax "increment" revenues—flow to the TIF district instead of other local agencies. After the district has repaid the bonds using the incremental property tax revenues, the district dissolves, ending the diversion of tax increment revenues from participating local agencies.

Following their dissolution, local officials sought other ways to use TIF to raise the capital they need to fund public works projects. In response, the Legislature enacted SB 628 (Beall, Chapter 785, Statutes of 2014) to allow local officials to create Enhanced Infrastructure Financing Districts (EIFDs), which augment the tax increment financing powers available to local agencies under existing infrastructure financing district statutes. While the Legislature has created other similar financing tools, they have seldom, or never, been used.

The Legislature authorized the creation of IRFDs in 2014 (AB 229, Pérez, Chapter 775, Statutes of 2014). In 2017, the City and County of San Francisco formed an IRFD to finance infrastructure projects on Treasure Island.

Comments

1) *Purpose of the bill.* According to the author, "The City of West Sacramento has emerged as one of the jurisdictions in California effectively using infrastructure financing districts and similar tools to drive development. When putting together large revitalization and infrastructure projects representing hundreds of millions or billions of dollars in investments, certainty matters. By making this straightforward clarification to existing law, any ambiguity would be removed, providing legal certainty to local agencies. Importantly, the major economic development opportunities utilizing IRFDs and the like, generate jobs and revitalize communities without burdening taxpayers or general fund resources."

2) *Sure, but will it work?* Proposition 13 (1978) capped property tax rates at 1% of assessed value (which only changes upon new construction or when ownership changes). If properties do not get reassessed, the Constitution caps growth at 2% per year. The general theory behind TIF is that a local agency creates a district because it expects significant property tax growth generated through reassessments when property changes hands or is improved. Otherwise, a TIF district only receives the increment that comes from the 2% growth, which may not be sufficient to generate enough revenue to finance significant infrastructure projects in a timely fashion. When the TIF district uses these resources to finance infrastructure projects, it can springboard additional property tax growth. In other words, the TIF district pays for itself. When RDAs existed, they had at least two important advantages over current TIF districts. First, they received increment from the school share of property tax revenue, which the state backfilled from the General Fund in many cases. Second, they received increment that would have otherwise gone to other local agencies without their approval. This generated billions of dollars in additional funds that cities and counties could only access through redevelopment. Even

with these key features, research has found that RDAs generally did not generate enough growth in property values to justify the property tax revenue they received. This research suggests that TIF districts, like IRFDs, won't effectively finance infrastructure projects without a subsidy.

3) *Pick me.* Since RDAs dissolved in 2012, the Legislature has created numerous TIF tools. Despite the creation of these numerous tools, local agencies so far have largely relied upon EIFDs to use TIF financing. This is for several reasons, including recent efforts to streamline their formation process and because they do not require voter approval to form or issue bonds. Instead, EIFDs rely upon a process that allows residents to protest their formation. SB 226 picks a different TIF tool, which has been used more sparingly, to give the authority to finance sports and entertainment facilities. IRFDs, unlike EIFDs, require 2/3 voter approval for formation and to issue bonds, making them more time-consuming and costly to form. However, the additional public input that IRFD law requires may be justified because IRFDs can finance any commercial facilities, but EIFDs only have the explicit authority to finance commercial facilities for small businesses. One of the critiques of original RDAs was that cities used them to finance commercial facilities that had greater private commercial benefits than public benefits. While SB 226 expands the types of commercial facilities IRFDs can finance to include entertainment and sports facilities, it preserves the 2/3 vote requirement to form IRFDs and issue bonds, which ensures the public has adequate input in decisions to use TIF to finance commercial facilities.

4) *Necessary?* Since 2014, IRFDs have had the authority to finance the acquisition, construction, or repair of commercial or industrial structures for private use. This would appear to include entertainment or sports facilities. While SB 226 would explicitly authorize entertainment or sports facilities, IRFDs may already have this authority.

SUBJECT: Crimes: criminal threats

SOURCE: Author

DIGEST: This bill authorizes the court to consider, as a factor in aggravation in sentencing a person for making criminal threats, that the defendant willfully threatened to commit a crime that would result in the death or great bodily injury of an elections official of a city, county, city and county, or public district, or an elected local agency official.

Assembly Amendments delete the prior version of this bill and amend this bill to the current version.

ANALYSIS:

Existing law:

1) States that any person who willfully threatens to commit a crime which will result in death or great bodily injury to another person, with the specific intent that the statement, made verbally, in writing, or by means of an electronic communication device, is to be taken as a threat, even if there is no intent of actually carrying it out, which, on its face and under the circumstances in which it is made, is so unequivocal, unconditional, immediate, and specific as to convey to the person threatened, a gravity of purpose and an immediate

prospect of execution of the threat, and thereby causes that person reasonably to be in sustained fear for their own safety or for their immediate family's safety, shall be punished by imprisonment in the county jail not to exceed one year, or by imprisonment in the state prison. (Penal (Pen.) Code, § 422, subd. (a).)

2) Provides that in sentencing a person convicted of making felony criminal threats, the court may consider, as a factor in aggravation, that the defendant willfully threatened to commit a crime that would result in death or great bodily injury of a person the defendant knew was a state constitutional officer, a Member of the Legislature, or a judge or court commissioner. (Pen. Code, § 422, subd. (b).)

3) Makes a felony violation of Penal Code section 422 a "serious felony," and therefore a "strike" for purposes of Three Strikes sentencing. (Pen. Code, § 1192.7, subd. (c).)

4) States that any person who, with intent to annoy, telephones another, or contacts him or her by means of an electronic device, and threatens to inflict injury on the person or the person's family, or to the person's property, is guilty of a misdemeanor. (Pen. Code, § 653m, subd. (a).)

5) Provides that every person who attempts, by means of any threat or violence, to deter or prevent an executive officer from performing any duty imposed upon the officer by law, or who knowingly resists, by the use of force or violence, the officer, in the performance of his or her duty, is punishable as an alternate felony-misdemeanor. (Pen. Code, § 69, subd. (a).)

6) States that every person who knowingly and willingly threatens the life of, or threatens serious bodily harm to, any elected public official, county public defender, county clerk, exempt appointee of the Governor, judge, or Deputy Commissioner of the Board of Prison Terms, or the staff, immediate family, or immediate family of the staff of any elected public official, county public defender, county clerk, exempt appointee of the Governor, judge, or Deputy Commissioner of the Board of Prison Terms, with the specific intent that the statement is to be taken as a threat, and the apparent ability to carry out that threat by any means, is guilty of a public offense. (Pen. Code, § 76, subd. (a).)

7) States that no person shall knowingly post the home address or telephone number of any elected or appointed official, or of the official's residing spouse or child, on the internet knowing that person is an elected or appointed official

and intending to cause imminent great bodily harm that is likely to occur or threatening to cause imminent great bodily harm to that individual. Punishes the crime as a misdemeanor, or a felony, depending on the circumstances. (Pen. Code, § 76.5.)

8) States that any person who commits assault upon specified public officials or attempts to commit murder against any of those specified officials in retaliation for or to prevent the performance of the victim's official duties, shall be punished by a felony, as specified. (Pen. Code, § 217.1.)

9) Provides that when a judgment of imprisonment is to be imposed and the statute specifies three possible terms, the court shall in its sound discretion order imposition of a sentence not to exceed the middle term, except as specified. (Pen. Code, § 1170, subd. (b)(1).)

10) Provides that the court may impose a sentence exceeding the middle term only when there are circumstances in aggravation of the crime that justify the imposition of a term of imprisonment exceeding the middle term and the facts underlying those circumstances have been stipulated to by the defendant or have been found true beyond a reasonable doubt at trial by the jury or by the judge in a court trial. (Pen. Code, § 1170, subd. (b)(2).)

11) States that notwithstanding the presumption for the middle term, and unless the court finds that the aggravating circumstances outweigh the mitigating circumstances and that imposition of the lower term would be contrary to the interests of justice, the court shall order imposition of the lower term if the defendant experienced psychological, physical, or childhood trauma, is a youth (under age 26), or is or has been a victim of domestic violence or human trafficking. (Pen. Code, § 1170, subd. (b)(6).)

12) Defines "local agency official" to mean any member of a local agency legislative body and any elected local agency official. (Gov. Code, § 53237, subd. (b).)

13) Prohibits any state or local agency from publicly posting the home address, telephone number, or the name and assessor parcel number associated with the home address of any elected or appointed official on the internet without first obtaining the written permission of that individual. (Gov. Code, § 7928.205, subd. (a).)

This bill authorizes a court to, in sentencing a person convicted of a felony criminal threat, consider as an aggravating factor that the threat was made against an elections official of a city, county, city and county, or public district, or an elected local agency official.

Background

Existing law punishes criminal threats. (Pen. Code, § 422.) A law that restricts speech has First Amendment implications. The First Amendment to the United States Constitution states: "Congress shall make no law . . . abridging the freedom of speech. . . ." This fundamental right is applicable to the states through the due process clause of the Fourteenth Amendment. (*Aguilar v. Avis Rent A Car System*, *Inc*. (1999) 21 Cal.4th 121, 133-134, citing *Gitlow v. People of New York* (1925) 268 U.S. 652, 666.) The California Constitution provides that: "Every person may freely speak, write and publish his or her sentiments on all subjects, being responsible for the abuse of this right. A law may not restrain or abridge liberty of speech or press." (Cal. Const., art. I, § 2, subd. (a).)

While these guarantees are stated in broad terms, "the right to free speech is not absolute." (*Aguilar v. Avis Rent A Car System, Inc.*, *supra*, 21 Cal.4th at p. 134, citing *Near v. Minnesota* (1931) 283 U.S. 697, 708). As the U.S. Supreme Court has acknowledged: "Many crimes can consist solely of spoken words, such as soliciting a bribe, perjury, or making a terrorist threat." (*Ibid.; See* Pen. Code, §§ 653f; 118; 422).

Content-based restrictions on speech are presumptively invalid (*R.A.V. v. St. Paul* (1992) 505 U.S. 382), however, courts have upheld restrictions on content-based speech when the speech is " 'of such slight social value as a step to truth that any benefit that may be derived from them is clearly outweighed by the social interest in order and morality.' Thus, for example, a State may punish those words 'which by their very utterance inflict injury or tend to incite an immediate breach of the peace.' " (*In re J.M.* (2019) 36 Cal.App.5th 668, 674, citing *Virginia v. Black* (2003) 538 U.S. 343, 358-359.)

True threats are not protected by the First Amendment. (*In re M.S.* (1995) 10 Cal.4th 698, 709.) Existing Penal Code section 422 has been found to be constitutional because it is narrowly tailored to apply only to true threats, which are defined as threats "to commit a crime which will result in death or great bodily injury to another person . . . which, on its face and under the circumstances in which it is made, is so unequivocal, unconditional, immediate, and specific as to

convey to the person threatened, a gravity of purpose and an immediate prospect of execution of the threat." (*People v. Toledo* (2001) 26 Cal.4th 221, 233.)

To convict a person under Penal Code section 422, the prosecutor must prove the following:

- That the defendant willfully threatened to commit a crime which will result in death or great bodily injury to another person;
- That the defendant made the threat;
- That the defendant intended that the statement be taken as a threat, even if there is no intent of actually carrying it out;
- That the threat was so unequivocal, unconditional, immediate, and specific as to convey to the person threatened a gravity of purpose and an immediate prospect of execution of the threat;
- That the threat actually caused the person threatened to be in sustained fear for his or her own safety or for his or her immediate family's safety; and
- That the threatened person's fear was reasonable under the circumstances. (Pen. Code, § 422; CALCRIM No. 1300; see also *People v. Toledo* (2001) 26 Cal.4th 221, 227-228.)

Penal Code section 422 applies to all criminal threats that will result in death or great bodily injury regardless of the person threatened, the location, or the exact type of violence that is threatened. A violation of Section 422 is punishable as either a misdemeanor or a felony. (Pen. Code, § 422.) When a criminal threats conviction is punished as a felony, it is also a serious felony for purposes of enhanced punishment under the Three Strikes Law (Pen. Code, § 1192.7, subd. (c)(38)) and the five-year prison enhancement for prior serious felony convictions (Pen. Code, § 667). Additionally, it triggers credit earning limitations. (Pen. Code, § 1170.12.)

California's sentencing scheme is, for the most part, determinate—it is referred to as the determinate sentencing law (DSL). (Pen. Code, § 1170, subd. (b)(1).) Any person convicted of a felony is sentenced to one of three sentence terms (known as a sentencing triad). For example, a person convicted of a first-degree burglary may be sentenced to two, four, or six years in the state prison. The court must consider factors in aggravation, and those factors must be proven to the trier of fact beyond a reasonable doubt before imposing the upper term. (Pen. Code, § 1170, subd. (b)(2) & (6).)

Existing law, enacted last year through AB 352 (Pacheco, Chapter 554, Statutes of 2025), added criminal threats against a state constitutional officer, a Member of the Legislature, or a judge or commissioner as a factor in aggravation that may authorize imposition of the upper term if the jury finds it true beyond a reasonable doubt. The California Rules of Court enumerate circumstances in aggravation and mitigation, relating both to the crime and to the defendant. (Cal. Rules of Court, rules 4.421, 4.423.) In addition, any other factors statutorily declared to be circumstances in aggravation or mitigation that reasonably relate to the defendant or the circumstances under which the crime was committed can be considered in aggravation.

This bill expands existing law to add criminal threats against a city, county, city and county, or public district, or a local agency official. In order to consider this a factor in aggravation, it will have to be either admitted by the defendant, or found to be true beyond a reasonable doubt by the jury, or by the judge in the case of a bench trial.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

Potential increase in state incarceration costs (General Fund) of an unknown, but potentially significant amount, to the extent the new aggravating factor results in imposition of the upper term rather than the middle term in felony criminal threats cases involving the specified officials. Potential court cost pressures (Trial Court Trust Fund) of an unknown, but likely minor amount, to the extent pleading and proving the new aggravating factor to the trier of fact marginally lengthens some trials and sentencing proceedings.

ARGUMENT IN SUPPORT:

The California Municipal Clerks Association writes:

> In recent years, the public servants who administer our elections and deliver essential local services have faced a troubling rise in threats and intimidation. These individuals carry out duties that are fundamental to democratic governance and to the daily functioning of our communities, yet they are increasingly targeted for harassment intended to coerce, silence, or endanger them.
>
> SB 239 recognizes the seriousness of this conduct and affirms that those who serve the public deserve protection from violence and the threat of violence. By allowing courts to weigh such threats as a factor in aggravation, this bill provides a measured and appropriate sentencing tool that reflects the gravity of intimidating public officials in the performance of their duties. The bill preserves judicial discretion while signaling clearly that threats against local elections officials and local agency officials will not be treated as ordinary offenses. We believe this approach will help deter future misconduct, support the recruitment and retention of dedicated public servants, and safeguard the integrity of the local functions on which our residents rely.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: California Environmental Quality Act: exemption: day care center: zoning

SOURCE: Author

DIGEST: This bill establishes a California Environmental Quality Act (CEQA) exemption for day care centers located in residential areas, while excluding projects located within 3,200 feet of a facility that actively extracts or refines oil or natural gas and projects located on natural and protected lands, as defined.

Assembly Amendments strike 'family daycare homes' from the CEQA exemption and expand the scope of the exemption to include projects that are on residential, rather than exclusively residential, parcels.

ANALYSIS:

Existing law:

1) Requires under CEQA that a lead agency determines whether a project is exempt from CEQA, or if it must do an initial study to determine if a project will have significant effects on the environment. If a project has no effect on the environment or effects that can be mitigated, the lead agency prepares a negative declaration (ND) or mitigated ND (MND). If the project will have significant impacts, the lead agency prepares an environmental impact report (EIR) to evaluate and propose mitigation measures for any effects on the environment, including impacts or likely impacts to land, air, water, minerals, flora, fauna, ambient noise, and historic or aesthetic significance. (Public Resources Code (PRC) §§21000 et seq.)

2) Establishes numerous exemptions from CEQA in statute and in the CEQA Guidelines. These include, among many others, the following exemptions:

    a) Class 32 categorical exemption for infill development projects that are consistent with a general plan and zoning, are substantially surrounded by urban uses and do not impinge on habitat or result in any significant effects relating to traffic, noise, air quality, or water quality, and can be adequately served by utilities and public services. (CEQA Guidelines §15332)

    b) Class 1 categorical exemption for existing facilities. This exemption covers the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use. (CEQA Guidelines §15301)

c) PRC 21080.69(a)(1) (SB 131 CEQA exemption for daycare facilities) establishes a CEQA exemption for daycare facilities that are not located on natural and protected lands, as defined, and are not in areas zoned residential.

d) Establishes a ministerial approval process for daycare centers co-located with multifamily housing for purposes of CEQA (Health and Safety Code HSC 1597.22). Projects approved by a ministerial process are not subject to CEQA.

This bill:

1) Creates a CEQA exemption for a daycare center on residential parcels with the guardrail that the facility is not located:

   a) On natural and protected lands, as defined.

   b) Within 3,200 feet of a facility that extracts or refines oil or natural gas.

Background

1) *The A, B, C's of CEQA*. CEQA is designed to (a) make government agencies and the public aware of the environmental impacts of a proposed project, (b) ensure the public can take part in the review process, and (c) identify and implement measures to mitigate or eliminate any negative impact the project may have on the environment. CEQA is enforced by civil lawsuits that can challenge any project's environmental review.

   Under CEQA, projects (unless they have a specific exemption) must undergo environmental analysis. This process starts with an initial study which determines what level of further environmental review is needed for a given project. If a project has no significant effects on the environment, or if those effects can be fully mitigated, the project can move forward with a ND or MND. If the initial study finds the project has potential significant effects on the environment, then a full EIR is conducted.

2) *CEQA exemptions for daycare centers*. Currently, most childcare facilities are exempt from CEQA. A search of the terms "childcare" and "preschool" and "daycare" on CEQAnet, the statewide database of CEQA documents, returns dozens of examples of Notices of Exemptions for these facilities. Common CEQA exemptions for childcare facilities include the 'existing facilities' CEQA exemption for buildings that are being repurposed, and the Class 32 'infill' exemption for projects in infill areas. Many more daycare facilities are

likely considered by-right, meaning that they are not subject to CEQA at all and may not file notices of exemption. The same search of 'childcare' and 'preschool' returned no examples of the more environmentally intensive EIR documents being prepared for daycare facilities. In other words, childcare facilities are almost always CEQA exempt under current law.

3) *CEQA lawsuits against Napa Childcare Facility.* Le Petit Elephant Nursery and Preschool in Napa faced three CEQA lawsuits while it was preparing to expand its childcare facilities at a vacant church. La Petit Elephant Nursery had filed a Notice of Exemption (NOE) under CEQA for the project using two existing relevant categorical exemptions: the Class 1 'existing facilities' exemption, and the Class 32 'infill exemption" for this. However, according to local news sources, neighbors of the proposed nursery and preschool brought a lawsuit against the project "alleging violations of CEQA and a potential impact on traffic, air quality, and safety in the neighborhood." This challenge contested the assumption that the daycare center met the eligibility criteria for the categorical exemptions it used.

   All lawsuits were eventually dropped in March 2025, following a settlement between the daycare and neighbors. According to local news coverage, the terms of the settlement required that the day care increase its enrollment gradually (reaching its maximum 250 enrollees in its third and ongoing years) and specified that parking is only allowed on-site, prohibiting "queuing of vehicles onto public streets". The settlement further required that the day care only be allowed to host "ancillary activities" if they are child-oriented and do not include weddings, anniversary and retirement parties or sports competitions etc., and requires that if the Office of Emergency Services issues an evacuation warning, the day care must close its facility.[1]

Comments

1) *Purpose of Bill.* According to the author "Last year, the Legislature enacted California Environmental Quality Act (CEQA) reform intended to streamline approval of childcare facilities. In practice, the language has limited the effectiveness of that exemption, particularly for facilities not located on parcels zoned exclusively for residential use.

   "SB 299 provides that childcare facilities are not subject to CEQA delay where no meaningful environmental impacts are at issue. Most CEQA challenges to

[1] The Press Democrat: Napa day care expansion to move forward after neighbors decide to drop lawsuit.

childcare projects in residential areas are unrelated to air, water, or natural resource protection and instead reflect local opposition to neighborhood-serving uses. SB 299 ensures families can access childcare close to home, consistent with both environmental values and community needs."

2) *Pros and Cons of a New Exemption*? While the lawsuits against Le Petit Elephant Nursery and Preschool in Napa have already been resolved through a settlement, a new CEQA exemption such as the one proposed in this bill could offer more and potentially less legally-risky pathways to skip CEQA for daycare facilities. This bill has fewer eligibility requirements than the commonly used Class 1 and Class 32 CEQA exemptions, and the requirements are more straightforward and thus less vulnerable to legal challenge. In some cases, the new CEQA exemption in this bill would thus speed up deployment of new childcare facilities and provide essential childcare facilities to communities they serve.

   The benefit to some childcare facilities, and communities, must be weighed against potential risks of unintended consequences that could result from a new CEQA exemption. Given that most daycare centers are already eligible for existing CEQA exemptions, it is worth considering the potential use cases for this new CEQA exemption. As discussed above, such a CEQA exemption could benefit daycare centers by providing a CEQA exemption that would be difficult to challenge, given that the criteria to use the exemption are fairly straightforward and could be evaluated early in siting decisions. However, a CEQA exemption for daycare facilities that does not include environmental guardrails might also result in unmitigated environmental impacts or potentially unsafe siting.

   This bill takes this into account by adding in environmental guardrails to ensure that daycare and childcare facilities are not located on natural and protected lands and are not located near oil and natural gas extraction and refineries which are harmful sources of pollution.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Alcohol and drug recovery or treatment facilities: investigations

SOURCE: League of California Cities

DIGEST: This bill requires the Department of Health Care Services (DHCS) to meet specified timeframes for assigning complaints against, and completing investigations for, licensed adult residential alcohol or other drug recovery or treatment facilities and certified alcohol and other drug (AOD) programs. Requires DHCS to post on its website an annual report of the investigations conducted in the previous year.

Assembly Amendments add DHCS-certified AOD programs to meet the investigation timeframe requirements in this bill; extend the timeframe by which investigations must be complete; and, add the website reporting requirement.

ANALYSIS:

Existing law:

1) Grants sole authority in the state to DHCS to certify AOD programs and to license adult residential alcohol or other drug recovery or treatment facilities (RTFs). [Health and Safety Code (HSC) §11832, 11834.01]

2) Requires DHCS to conduct onsite program compliance visits for AOD programs and RTFs at least once during the certification or licensure period. Permits DHCS to conduct announced or unannounced site visits to review for compliance. [HSC §11832.12, 11834.01]

3) Establishes a system whereby DHCS approves certifying organizations (COs) that administer the certification process for substance use disorder (SUD) counselors. Requires DHCS to investigate alleged violations against registered or certified SUD counselors within 90 days of receipt of a requested investigation, and to send a written order to the CO specifying what corrective action to take based on DHCS's investigation and the severity of the violation. [9 California Code of Regulations (CCR) §13040, §13065]

This bill:

1) Requires DHCS to conduct an investigation into a complaint regarding an AOD program or RTF, if it has jurisdiction over the complaint, by assigning it to an analyst for investigation within 10 days of receiving the complaint.

2) Requires DHCS, if it receives a complaint that does not fall under its jurisdiction, to notify the complainant, to the extent feasible, in writing, including through electronic means, that it does not investigate that type of complaint.

3) Requires DHCS to complete the investigation within 120 days of assigning the complaint unless it requires assistance from local or other state agencies to complete the investigation, or significant additional resources to complete the investigation, as it determines.

4) Requires DHCS to maintain a record of investigations, including those that are not complete within 120 days.

5) Requires DHCS, commencing on July 1, 2027, and each July 1 thereafter, to post on its website an annual report of the investigations conducted in the previous year that includes all of the following information:

   a) The total number of investigations conducted by DHCS;

   b) The type of investigations conducted; and,

   c) The number of investigations that were not complete within 120 days of assignment.

6) Permits DHCS to impose a single fee increase for the certification of AOD programs and the licensure of RTFs commensurate with the reasonable cost of preparing and maintaining the report required in this bill.

Background

CSA report. Issued in October 2024, the CSA report states complaints may arise from various sources, including RTF residents, neighbors, staff members, or government agencies. According to internal guidelines, DHCS prioritizes death investigations over investigations into all other types of complaints. The CSA states, in fact, DHCS aims to assign death investigations to a staff member on the day it receives the report of a death. In the course of a death investigation, it directs its staff to perform a complete review of the facility where the death occurred to determine whether the resident's death was related to deficiencies in the facility's operation. DHCS also receives and investigates complaints about facilities that operate without a license—for which generally DHCS does not have oversight. If an investigation finds, however, that an unlicensed facility is providing or advertising services that require a license, DHCS notifies the facility that it has been violating the law. If it obtains sufficient evidence the facility has not stopped providing the services in question, DHCS is authorized in current law to bring a civil action against the facility. For a licensed RTF, if during a complaint investigation or compliance inspection, DHCS finds a facility poses serious risks to the health and safety of residents, it may initiate a license suspension or revocation. Current law authorizes DHCS to immediately suspend a license when these concerns are present. A suspension stays in effect until DHCS makes a final determination, which may include revocation, following a hearing and a proposed decision by an Administrative Law Judge.

The CSA made a series of recommendations, without specifying timeframes for completion, to help DHCS improve its complaints processes—mostly through administrative means:

a) Provide management with information about the timeliness of compliance inspections;

b) Implement a mechanism in its licensing database that notifies staff of the dates for upcoming compliance inspections for their caseload so they can plan accordingly;

c) Fill its vacant positions;

d) Update its policies and staff training by April 2025 to ensure it assigns complaints to analysts for investigation within 10 days, as currently required by its regulations;

e) Implement guidelines by October 2025 that specify the length of time analysts should take to complete key steps in the investigation process for different types of investigations;

f) Conduct site visits beginning December 2024 in all instances in which there is an allegation that an unlicensed facility is advertising or providing treatment services without a license; and,

g) Develop and implement, by April 2025, a follow-up procedure, such as performing another site visit, to confirm unlicensed facilities have ceased providing services unlawfully.

The CSA notes that, except for recommendation d) above, DHCS has yet to fully implement its suggested improvements.

DHCS complaint investigations. DHCS informally outlined its process following a Committee staff inquiry that generally mirrors the timelines stated by the author of this bill and in the CSA report. If DHCS establishes jurisdiction, the complaint is logged, assigned a complaint number, and a high-, medium-, or low-level designation. When DHCS receives a complaint that does not fall under its jurisdiction, a letter is sent to the complainant informing them of this fact. DHCS regulations define deficiencies, determined during the investigation, in the following way:

a) A Class A deficiency is any presenting an imminent danger to any resident of the RTF. "Imminent danger" means that the more likely consequence of the deficiency is death or physical injury that would render a part of the body functionally useless or temporarily or permanently reduced in capacity, or inhibit any function of the body to such a degree as to shorten life or to reduce physical or mental capacity;

b) A Class B deficiency is any relating to the operation or maintenance of the RTF that has a direct or immediate relationship to the physical health, mental health, or safety of RTF residents; and,

c) A Class C deficiency is any relating to the operation or maintenance of the RTF that DHCS determines has only a minimal relationship to the health or safety of residents.

An investigation report is issued, outlining whether an allegation was substantiated, and if any additional findings were discovered. If any deficiencies are identified and substantiated, RTFs may be subject to a corrective action plan or verification of correction and civil penalties for failure to respond timely to a Notice of Deficiency. Deficiencies can also result in action to suspend or revoke the RTF's license. If no deficiencies are found, the complaint report is issued with allegations marked as "not substantiated."

Comments

According to the author of this bill:

> Good government means acting quickly and decisively to protect the health and safety of the community. If an RFT is not following state regulations and jeopardizing its residents or neighbors, the state should act promptly. This bill requires DHCS to investigate complaints in a timely fashion, which is crucial for protecting RTF residents, and ensure RTFs take appropriate corrective actions based on identified problems. DHCS has 980 licensed RTFs for which common complaints include sexual misconduct, poor management of medications for residents, insufficient detoxification checks, using unlicensed counselors, and failing to provide services advertised. Currently, DHCS's internal guidelines call for assigning complaints to staff within 10 days and for investigations to be completed and sent to a supervisor within 30 to 60 days, depending on the nature of the complaint. For complaints not assigned within 10 days, however, DHCS often takes an average of 183 days, according to a recent California State Auditor (CSA)

report. Furthermore, DHCS takes nearly a year, on average, to complete investigations into low- and medium-priority complaints, per the audit. By setting timelines for investigations in statute, this bill ensures that complaints for RTFs are methodically and expeditiously pursued.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, this bill results in minor and absorbable costs to DHCS.

ARGUMENTS IN SUPPORT: The League of California Cities, sponsor of this bill, and other supporters argue while existing law requires DHCS to investigate complaints against RTFs, it does not establish timelines for completing those investigations. This bill sets clear, reasonable deadlines—aligned with existing DHCS policy—to enhance public transparency and ensure providers are held accountable for delivering high-quality treatment and care. Supporters argue the lack of oversight, regulation, and licensing results in unsafe conditions for patients and creates significant negative impacts on local neighbors, and also state that it is time for DHCS to hire more analysts to achieve this.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Alcohol and drug programs

SOURCE: League of California Cities

DIGEST: This bill (1) requires the Department of Health Care Services (DHCS) to take specified action when it determines an entity is providing residential alcohol or other drug recovery or treatment services without a proper license, including conducting site visits, as well as initiating and completing investigations within specified timeframes; and, (2) permits county behavioral health agencies that administer the Drug Medi-Cal organized delivery system to request DHCS approval to conduct site visits to specified recovery residences (RRs).

Assembly Amendments extend the timeframe by which DHCS must complete an investigation; specify that county behavioral health agencies are permitted to visit RRs with which they contract; and, extend the date by which entities licensed or certified by DHCS must report money transfers between them and an RR.

ANALYSIS:

Existing law:

1) Grants sole authority in the state to DHCS to certify alcohol or other drug (AOD) programs and to license adult residential alcohol or other drug recovery or treatment facilities (RTFs). [Health and Safety Code (HSC) §11832, 11834.01]

2) Requires DHCS to conduct onsite program compliance visits for AOD programs and RTFs at least once during the certification or licensure period. Permits DHCS to conduct announced or unannounced site visits to review for compliance. [HSC §11832.12, 11834.01]

3) Requires all programs certified, or RTFs licensed by DHCS, to disclose if any of its agents, partners, directors, officers, or owners, including a sole proprietor and member, has either of the following:
   a) Ownership or control of, or financial interest in, a recovery residence/sober living homes (RR/SLHs); or,
   b) Any contractual relationship with an entity that regularly provides professional services or substance use disorder (SUD) treatment or recovery services to clients of programs certified or facilities licensed by DHCS, if the entity is not part of the program certified or facility licensed. [HSC §11833.05(a)]

4) Permits DHCS to suspend or revoke an AOD program certification or RTF license for failing to disclose the information required in 3) above of existing law. [HSC 11833.05(c)]

5) Prohibits a person, firm, partnership, association, corporation, or local governmental entity from operating, establishing, managing, conducting, or maintaining an RTF to provide recovery, treatment, or detoxification services within this state without first obtaining a current valid license from DHCS. [HSC §11834.30]

6) Requires a laboratory or certified outpatient treatment program that leases, manages, or owns housing units that are offered to individuals who concurrently utilize laboratory or outpatient services to maintain separate contracts for the housing. Requires a RTF to only offer an individual discounted housing following discharge from the facility if certain conditions are met, such as the RTF and the individual enter into a written contract for housing that is separate from the contract for treatment; if the individual also pursues outpatient treatment; or, the offer for housing is not dependent upon the individual's agreement to attend outpatient treatment at a program that is owned or operated by the RTF. [HSC §11831.65]

7) Requires DHCS to conduct a site visit to investigate an allegation of an entity operating without a valid RTF license. Requires DHCS to take the following actions if evidence substantiates that the entity is providing RTF services without a license:
   a) Submit the findings of the investigation;
   b) Issue a written notice to the entity stating that it is operating in violation DHCS's licensing law and inform them of the date by which it ceases providing services and notice that DHCS will assess a civil penalty of $2,000 per day for every day they continue to provide services beyond the date specified in the notice;
   c) Notice that the case will be referred for civil proceedings in the event the entity continues to provide services beyond the date specified in the notice; and,
   d) Inform the entity of the licensing requirements. [HSC §11834.31]

8) Prohibits an entity found to be in violation of DHCS's licensing law from applying for initial RTF licensure for a period of five years from the date of the notice specified. [HSC §11834.31]

9) Permits DHCS's Director to suspend or revoke certification or licensure, including other AOD program certifications or RTF licenses held by the same person or entity, or to deny an application for certification or licensure; extension of the certification or license; or, modification to certification or a license, upon specified violations and circumstances. [HSC §11832.14, 11834.36]

10) Requires DHCS to continue to implement the Drug Medi-Cal organized delivery system (DMC-ODS) program previously authorized under the California Medi-Cal 2020 Demonstration pilot. Requires election by counties to

participate in the DMC-ODS to be considered voluntary. [Welfare and Institutions Code (WIC) §14184.401]

This bill:

1) Requires DHCS, if it takes action against an RR/SLH for providing treatment services without a valid license, to conduct a site visit of a certified AOD program or licensed RTF that has disclosed an interest in that RR/SLH.

2) Requires all AOD programs and RTFs, no later than July 15, 2027, and every July 15 thereafter, to report to DHCS all money transfers between them and their affiliated RR/SLHs. Requires DHCS to analyze transfer data for compliance trends, irregularities, or fraud indicators, and to develop guidelines for permissible and impermissible transfers.

3) Requires DHCS, if a facility is alleged to be operating as an RTF without a valid license, to conduct a site visit as follows:
   a) Initiate an investigation of the allegation, if DHCS has jurisdiction, within 10 days of receiving the allegation and to conduct a site visit;
   b) Notify the complainant in writing, to the extent feasible, if DHCS does not have jurisdiction, that it does not investigate those types of complaints;
   c) Complete the investigation within 120 days of the initiation of the investigation, unless DHCS requires assistance from other state agencies, or additional resources to complete the investigation, as DHCS determines; and,
   d) Notify the complainant in writing, including through electronic means, of the reason for the delay if DHCS is unable to complete the investigation within 120 days.

4) Expands the required actions for DHCS to take, when it conducts a site visit to investigate allegations of operating without a valid RTF license, to provide the entity the notice within 10 days of the DHCS employee submitting their findings, and to conduct a follow-up site visit to determine whether the entity has ceased providing services by the date DHCS specified.

5) Permits county behavioral health agencies, if they elect to administer the DMC-ODS and provide optional recovery housing services, to request approval from DHCS to conduct a site visit of a RR/SLH, with which it contracts, that is alleged to be in violation of licensing law. Permits DHCS to approve the request if it has sufficient evidence to substantiate the allegation and it fails to

initiate or conclude the investigation in accordance with the time limits imposed by this bill.

Comments

According to the author of this bill:

> The proliferation of RR/SLHs and SUD treatment facilities, particularly in Southern California's "Rehab Riviera," has raised concerns regarding the quality of care and regulatory oversight. These concerns were confirmed by a recent State Auditor's report, which found that DHCS does not always provide timely or thorough oversight, risking the health and safety of people in recovery. This bill will ameliorate these perpetuated issues by establishing timelines for DHCS to investigate allegations of licensed treatment being offered at unlicensed RR/SLHs. If DHCS cannot meet the timelines, SB 490 would authorize cities and counties to request approval to conduct site visits and enforce compliance with existing state licensing requirements.

Background

California State Auditor (CSA) report. Issued in October 2024, the CSA Drug and Alcohol Treatment Facilities report stated complaints to DHCS may arise from various sources, including RTF residents, neighbors, staff members, or government agencies. According to internal guidelines, DHCS prioritizes death investigations over investigations into all other types of complaints. The CSA stated, in fact, DHCS aims to assign death investigations to a staff member on the day it receives the report of a death. In the course of a death investigation, it directs its staff to perform a complete review of the facility where the death occurred to determine whether the resident's death was related to deficiencies in the facility's operation. DHCS also receives and investigates complaints about facilities that operate without a license—for which generally DHCS does not have oversight. If an investigation finds, however, that an unlicensed facility is providing or advertising services that require a license, DHCS notifies the facility that it has been violating the law. If it obtains sufficient evidence the facility has not stopped providing the services in question, DHCS is authorized in current law to bring a civil action against the facility. For a licensed RTF, if during a complaint investigation or compliance inspection, DHCS finds a facility poses serious risks to the health and safety of residents, it may initiate a license suspension or revocation. Current law authorizes DHCS to immediately suspend a license when these concerns are present. A suspension stays in effect until DHCS makes a final determination,

which may include revocation, following a hearing and a proposed decision by an Administrative Law Judge.

The CSA made a series of recommendations to help DHCS improve its complaints processes—mostly through administrative means:

- Provide management with information about the timeliness of compliance inspections;
- Implement a mechanism in its licensing database that notifies staff of the dates for upcoming compliance inspections for their caseload so they can plan accordingly;
- Fill its vacant positions;
- Update its policies and staff training by April 2025 to ensure it assigns complaints to analysts for investigation within 10 days, as currently required by its regulations;
- Implement guidelines by October 2025 that specify the length of time analysts should take to complete key steps in the investigation process for different types of investigations;
- Conduct site visits beginning December 2024 in all instances in which there is an allegation that an unlicensed facility is advertising or providing treatment services without a license; and,
- Develop and implement, by April 2025, a follow-up procedure, such as performing another site visit, to confirm unlicensed facilities have ceased providing services unlawfully.

DHCS complaints investigations. DHCS informally outlined its process for RTF investigations that generally mirrors the timelines stated by the author of this bill and in the CSA report. If DHCS establishes jurisdiction, the complaint is logged, assigned a complaint number, and a high-, medium-, or low-level designation. When DHCS receives a complaint that does not fall under its jurisdiction, a letter is sent to the complainant informing them of this fact. DHCS regulations define deficiencies, determined during the investigation, in the following way:

- A Class A deficiency is any presenting an imminent danger to any resident of a RTF. “Imminent danger” means that the more likely consequence of the deficiency is death or physical injury that would render a part of the body functionally useless or temporarily or permanently reduced in capacity, or inhibit any function of the body to such a degree as to shorten life or to reduce physical or mental capacity;
- A Class B deficiency is any relating to the operation or maintenance of the RTF that has a direct or immediate relationship to the physical health, mental health, or safety of RTF residents; and,

- A Class C deficiency is any relating to the operation or maintenance of the RTF that DHCS determines has only a minimal relationship to the health or safety of residents.

An investigation report is issued, outlining whether an allegation was substantiated, and if any additional findings were discovered. If any deficiencies are identified and substantiated, RTFs may be subject to a corrective action plan or verification of correction and civil penalties for failure to respond timely to a Notice of Deficiency. Deficiencies can also result in suspension or revocation of the RTF's license. If no deficiencies are found, the complaint report is issued with allegations marked as "not substantiated."

DHCS further noted that allegations of an entity unlawfully providing treatment services is assigned a high priority. They follow the same process for these allegations as they do for other high priority complaints against the facilities under their purview. However, when it comes to conducting a site visit, the facility can technically deny them access. In these situations, DHCS requires the assistance from the California Department of Justice in obtaining an investigation warrant but only if they have enough evidence to support the allegation. If DHCS determines the facility is in violation, they issue the notices authorized in existing law regarding the violations, penalties that can be assessed, and a date by which the facility is required to cease providing treatment services. If the facility continues to operate beyond the date, DHCS goes to the Superior Court to get an injunction.

Group Home Technical Advisory (GHTA). The California Department of Housing and Community Development (HCD) Division of Housing Policy Development issued the GHTA in December 2022 and states that group homes are an especially important type of housing for persons with disabilities. By supporting their residents' individualized needs while providing flexible and affordable housing options, group homes help persons with disabilities live in deinstitutionalized settings that facilitate their integration into local communities. HCD further states in recent years, some local governments have amended their zoning ordinances to add new regulations for group homes, particularly for SLH/RRs. These amendments have raised concerns that local governments are not complying with their affirmative obligations under state planning and zoning laws to promote more inclusive communities and affirmatively further fair housing (AFFH). These amendments have also generated disputes and confusion over whether local governments are violating fair housing laws by discriminating against persons with disabilities or other protected characteristics. Among other concerns, local land use policies and practices can block new group homes from opening, force existing ones to close, and impose costs, legal fees, and administrative burdens that make it

difficult for group homes to operate. These concerns arise in the context of a shortage of adequate housing for persons with disabilities, which is a particularly acute problem within California's broader housing crisis. HCD states that with concerns, disputes, and confusion continuing to grow, the GHTA provides guidance on how state planning, zoning, and fair housing laws apply when local governments attempt to regulate group homes through land use policies and practices. It is designed to help local governments comply with their obligations under these state laws, including, for example, the Planning and Zoning Law; Housing Element Law; AFFH provisions; Anti-Discrimination in Land Use Law; and the Fair Employment and Housing Act, collectively "state housing laws." Taken from the GHTA, local governments can comply with state housing laws regarding group homes, including the following:

a) Discriminatory Purpose or Effect. Ensure that the policy or practice does not discriminate on the basis of disability or other characteristics protected by state law. Apply the GHTA's analysis on how to determine if a policy or practice has a discriminatory purpose or effect and how to implement flexible reasonable accommodation procedures that promptly and efficiently resolve accommodation requests in compliance with state housing laws and regulations. (pp. 12-20);
b) Supportive and Transitional Housing. Comply with the specific protections for group homes that fall within the definitions of supportive or transitional housing (pp. 20-22);
c) State and Federal Law Distinctions. Confirm that a policy or practice complies with state housing laws even if it complies with federal law, because California law provides broader and different protections than federal law (pp. 22-23);
d) Definition of Single-Family Residence. Avoid restrictive definitions of single housekeeping units or single-family homes that impermissibly constrain group homes from locating in single-family zones. This includes, for example, avoiding definitions that equate group homes with boardinghouses, require all residents to share a common deed or lease, overly scrutinize residents' living arrangements, or automatically exclude group homes that are owned by for-profit businesses or pay staff to help manage a home's operations (pp. 24-25);
e) Group Homes that Do Not Provide Licensable Services. Allow group homes that operate as single-family residences and that do not provide licensable services to locate in single-family neighborhoods, subject only to the generally applicable, nondiscriminatory health, safety, and zoning laws that apply to all single-family residences (pp. 25-26) (emphasis added); and,

f) Other Requirements for Group Home Operators and Residents. Avoid the other examples of special requirements for operators and residents discussed that can overly constrain group homes, conflict with the duty to affirmatively support this housing, and discriminate on the basis of disability and other protected characteristics. Examples discussed include, among other things, parking requirements, restrictions on residents or staff, neighborhood notice requirements, and local law enforcement registration requirements (pp. 30-33).

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) DHCS estimates costs of $1.2 million in fiscal year (FY) 2027-28, and $1.1 million in FY 2028-29 and ongoing (Residential Outpatient Program Licensing Fund); and,

2) DHCS notes it would need to increase licensing fees to implement the bill. DHCS was authorized to increase licensing fees up to 20% annually through FY 2026-27, to reach a cumulative fee increase of 75%. Additionally, DHCS states that no sooner than July 1, 2027, DHCS is authorized to increase licensing fees up to 5% annually and if DHCS proposes to increase fees beyond 5%, the increase would need to be approved by the Legislature. To support the additional staffing needed to implement this bill, DHCS states it would need to increase licensing fees by an additional 5% in FY 2027-28. DHCS states that, if the Legislature does not approve an increase in fees, DHCS will be unable to implement the requirements of this bill.

California Behavioral Health Planning Council
County Behavioral Health Directors Association

ARGUMENTS IN SUPPORT: The League of California Cities (Cal Cities), as sponsor, argues a recent state audit revealed DHCS has not consistently investigated allegations of unlicensed facilities providing or advertising treatment services. DHCS has often failed to conduct site visits and follow-ups to ensure illegal operations have stopped. In one example highlighted in the audit, DHCS substantiated an allegation that an unlicensed facility was unlawfully providing services but there was no indication DHCS followed up to verify the facility's claims it ceased operations, nor did it conduct a site visit to confirm compliance. Cal Cities argues the auditor recommended that DHCS improve the timeliness of inspections and complaint investigations; conduct more site visits; and establish follow-up procedures to ensure unlicensed facilities cease unlawful operations. Cal Cities states this bill empowers local governments to partner with the state to conduct site inspections and enforce licensing laws. This collaboration allows the state to leverage local capacity to respond swiftly to violations, ensure compliance, and better protect public health and safety.

ARGUMENTS IN OPPOSITION: The County Behavioral Health Directors Association (CBHDA) states that as part of their core functions they provide an array of Medi-Cal SUD treatment services, including supportive RR/SLHs, which are non-medical housing settings designed to support recovery and foster community, as a component of the SUD continuum of care. CBHDA argues this bill stems from continued negative stigma around RR/SLHs, and at its core contains a fundamental framing issue as it relates to RR/SLHs and SUD treatment. CBHDA further argues while DHCS is already tasked with these investigations, the timelines proposed in this bill would lead to DHCS potentially exceeding its

bandwidth and then delegating this function to counties, which would include conducting investigations into private entities that counties do not contract with, nor have jurisdiction over. Delegating this responsibility to counties represents a significant liability risk, and a potential unfunded workload increase for county behavioral health agencies. The California Behavioral Health Association states their concern about this bill's framing risks further stigmatizing RRs that do not provide licensable services, citing state housing guidance recognizing the importance of group homes and RRs as housing options for persons with disabilities and notes that homes not providing licensable services must be allowed to operate subject to generally applicable nondiscriminatory laws. Any policy response to bad actors should be narrowly tailored to unlawful treatment activity and financial misconduct, not structured in a way that sweeps in lawful RR arrangements or creates new barriers for RRs. The California Behavioral Health Planning Council states that the outlined mandates in the bill are outside the purview of county behavioral health departments considering counties do not have authority, oversight, or code enforcement jurisdiction over unlicensed facilities. This would require counties to provide training to designated teams without sufficient funding or guidance.

SUBJECT: Money Transmission Act: authentication

SOURCE: Author

DIGEST: This bill prohibits a money transmitter from allowing a user to log in without using two-factor or multifactor authentication.

Assembly Amendments clarify the scope of persons subject to the bill and provide greater flexibility in how a money transmitter may comply with the bill.

ANALYSIS: Existing federal law:

Pursuant to Regulation E (12 Code of Federal Regulations (CFR) Part 1005) which implements the Electronic Funds Transfer Act (15 U.S.C. 1693 et seq.):

1) Defines “unauthorized electronic fund transfer” to mean an electronic fund transfer from a consumer's account initiated by a person other than the consumer without actual authority to initiate the transfer and from which the consumer receives no benefit. (12 CFR 1005.2(m))

2) Limits a consumer’s liability related to unauthorized electronic fund transfers to $50 if the consumer notifies the financial institution within two days after learning of the loss or $500 if the consumer fails to notify within two days, as specified. (12 CFR 1005.6(b))

3) Provides procedures for resolving errors, including unauthorized electronic fund transfers, including time limits for a financial institution to investigate claims. (12 CFR 1005.11)

Existing state law:

1) Provides the Money Transmission Act, administered by the Department of Financial Protection and Innovation (DFPI), which requires licensure of persons engaged in the business of money transmission, unless the person is exempt. (Financial Code Section 2000 et seq.)

2) Defines “money transmission” as any of the following: selling or issuing payment instruments, selling or issuing stored value, or receiving money for transmission. (Financial Code Section 2003(q))

3) Defines a “payment instrument” as a check, draft, money order, traveler’s check, or other instrument for the transmission or payment of money or monetary value, whether or not negotiable and provides that a “payment instrument” does not include a credit card voucher, letter of credit, or any instrument that is redeemable by the issuer for goods or services provided by the issuer or its affiliate. (Financial Code Section 2003(s))

4) Defines “stored value” as monetary value representing a claim against the issuer that is stored on an electronic or digital medium and evidenced by an electronic or digital record, and that is intended and accepted for use as a means of redemption for money or monetary value or payment for goods or services. Provides that “stored value” does not include a credit card voucher, letter of credit, or any stored value that is redeemable by the issuer for goods or services provided by the issuer or its affiliate, except to the extent required by applicable law to be redeemable in cash for its cash value. (Financial Code Section 2003(x))

This bill:

1) Prohibits, as of January 1, 2028, a money transmitter from allowing a user login without implementing all of the following:

   a) Two-factor authentication, multifactor authentication, or other reasonably equivalent or more secure access control.

   b) A process for reverifying the identity of the user, device, or system.

   c) The ability for a user to report an error or suspected fraud, as specified.

2) Defines "two-factor authentication" to mean a security process that requires two distinct forms of verification.

3) Defines "multifactor authentication" to mean an authentication process that requires two or more forms of verification.

4) Defines "user login" to mean an action by which a user accesses an account or platform for the purpose of initiating, received, or managing money transmission for the first time or after a logout.

Comments

Background. This bill seeks to reduce the risk of fraud losses stemming from a relatively small subset of incidences – namely, losses stemming from the unauthorized access of a user's online account with a nonbank payments platform. Unauthorized access refers to an incident where someone other than the accountholder gains access to the account without authorization from the accountholder, such as when one's account is "hacked" or their payments card is stolen or forged. This bill does not cover any products provided by a bank or credit union, such as a checking account or debit card. This bill covers only state-licensed money transmitters. Examples of money transmitters include Western Union, PayPal, and Block (provider of the Square and CashApp payments platforms).

Notably, accountholders already benefit from protections from losses related to unauthorized account access under the federal Electronic Funds Transfer Act (EFTA). An accountholder who notifies their financial institution within two days of discovering a loss related to unauthorized access is liable up to $50 for the loss, with the financial institution liable for any amount exceeding $50. Despite this protection, many accountholders may be unaware of their obligation to report the loss within specified timelines, which may result in the accountholder bearing a

higher loss.[1] Additionally, the accountholder may be unable to access the stolen funds temporarily as their financial institution investigates the alleged incident. Inarguably, the accountholder would be better off if the unauthorized access never occurred in the first place, but EFTA provides a meaningful safety net for accountholders in cases of unauthorized account access.

Due to the liability associated with unauthorized account access, financial institutions employ various security methods to protect against unauthorized access. Many (if not all) financial institutions that offer online access to financial products or services require the accountholder to provide a username and password to access the online platform. In addition to a username and password, many institutions require another form of authentication, particularly when a user enters the username and password using an electronic device that is not already associated with the account. Additionally, some financial institutions require additional authentication when a user initiates certain types of higher-risk transactions within the online platform, such as person-to-person payments which have been subject to growing rates of fraud in recent years. This bill seeks to mandate that an accountholder provide at least two forms of authentication each time the accountholder logs into the online platform.

Multifactor authentication can reduce the frequency of unauthorized account access, but it does not eliminate the risk. Some forms of multifactor authentication rely on sending a one-time access code to an accountholder's phone or email address. Yet this form of authentication provides little additional security benefit if the unauthorized person has already compromised the accountholder's digital electronic device, phone number, or email account. Moreover, many types of frauds and scams do not rely on gaining access directly to a victim's account; rather, the criminal attempts to fraudulently induce the victim into initiating funds transfers under false pretenses. Multifactor authentication does little, if anything, to prevent this large and growing area of financial vulnerability.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, minor and absorbable costs to the Department of Financial Protection and Innovation (DFPI) for education and enforcement.

SUPPORT: (Verified 8/17/26)

[1] The specific contours of accountholder liability under EFTA are beyond the scope of this analysis, but suffice it to say, an accountholder may incur liability of up to $500 in cases where reporting to the financial institution does not occur within two days of the accountholder gaining knowledge of the loss(es).

ARGUMENTS IN SUPPORT: According to Rise Economy, "SB 505 strikes a thoughtful balance between innovation and consumer protection. It supports a more secure financial ecosystem while ensuring that Californians can continue to benefit from convenient digital payment options without unnecessary risk. The bill also provides ample time for implementation, giving businesses the opportunity to comply in a responsible and effective manner."

SUBJECT: Heritage schools: enrollment and notice

SOURCE: Author

DIGEST: This bill (1) authorizes heritage schools to serve children who are enrolled in transitional kindergarten (TK), effectively serving children who are at least 4 years old, instead of children who are at least 4 years and 9 months of age, and (2) requires heritage schools to provide notice to a child's parent or guardian stating that the California Department of Education (CDE) has no regulatory authority over heritage schools and does not monitor heritage school operations or instruction.

Assembly Amendments replace the contents of the version of the bill amended June 23, 2025 to instead authorize heritage schools to serve children who are 4 years old, instead of 4 years and 9 months old, and requires heritage schools to provide notice to a child's parent or guardian, as specified. The amendments also add language to avoid chaptering out issues with a section amended by this bill.

ANALYSIS:

Existing law, effective January 1, 2027:

1) Defines a "heritage school" as a school that serves children who are at least 4 years and 9 months of age and no older than 18 years of age; who attend a public or private full-time day school; that maintains membership in a state or national cultural or language association; has regular hours of operation; does not operate out of a residential home; maintains in its possession a copy of the registration form electronically filed with the Education Commissioner; and which offers all of the following:

    a) Education or academic tutoring, or both, in a world language.

    b) Education on the culture, traditions, or history of a country other than the United States (U.S.).

    c) Culturally enriching activities, including but not limited to, art, dancing, games, or singing, based on the culture or customs of a country other than the U.S. (Education Code (EC) § 33195.4)

2) Requires a person, firm, association, partnership, or corporation operating a heritage school to file an electronic registration form with the Education Commissioner annually in January, including the following information for that current year:

    a) All names, whether real or fictitious, of the person, firm, association, partnership, or corporation under which it has done or is doing business.

    b) Address and telephone number of the heritage school.

    c) Names and addresses of the directors and principal officers of the person, firm, association, partnership, or corporation.

    d) School enrollment by grade span, number of teachers, and whether the school is coeducational or limited to boys or girls.

    e) Assurances that records of the courses of study offered and the names, addresses, and qualifications of faculty members are maintained at the school and are true and accurate.

    f) A criminal record summary for every employee.

    g) An acknowledgement that the director and all employees are mandated reporters. (EC § 33195)

3) Prohibits the heritage school from expressing that the filing of the registration form represents that the State of California, the Education Commissioner, the

State Board of Education (SBE), the CDE, or an accrediting agency has made an evaluation, recognition, approval, or endorsement of the school or course, unless this is an actual fact. (EC § 33195)

4) Specifies that the filing of the registration form does not grant a heritage school a right to receive state funding. (EC § 33195)

5) Prohibits a heritage school from employing a person who would be prohibited from employment by a public school district because of their conviction for any crime. (EC § 33195.1)

6) Requires the employees of an entity that has a contract with a heritage school that may have contact with students to submit or have submitted their fingerprints to the Department of Justice (DOJ) and prohibits those employees to come in contact with students until the DOJ has ascertained that the employee has not been convicted of a felony. (EC § 33195.2)

7) Establishes the Heritage Enrichment Resource Fund in the State Treasury, funded through registration fees for heritage schools, and authorizes the Education Commissioner to expend funds, upon appropriation, to process payments for the registration of heritage schools. (EC § 33195.5)

8) Requires the director of a heritage school to undergo at least 15 hours of health and safety training, including but not limited to the following topics: pediatric first aid, prevention of infectious diseases and immunizations, prevention of childhood injuries, and pediatric cardiopulmonary resuscitation (CPR). (EC § 33195.6)

9) Requires all employees and volunteers of a heritage school to be in good health, as verified by a health screening, including a test for tuberculosis; and requires students attending a heritage school to have access to working sinks, toilets, and drinking water; and not to have access to medication or cleaning supplies. (EC § 33195.6)

10) Requires a heritage school to not be subject to licensure by the California Department of Social Services (CDSS), and requires a heritage school to notify the parent or guardian upon the enrollment of their child that the heritage school is exempt from child care licensure and that attendance at a heritage school does not satisfy California's compulsory education requirements. (EC § 33195.6)

11) Defines "transitional kindergarten" as the first year of a two-year kindergarten program that uses a modified kindergarten curriculum that is age and developmentally appropriate. (EC § 48000)

12) Requires that a child be admitted to a kindergarten maintained by the school district at the beginning of a school year if the child will have their fifth birthday by September 1 of the school year. (EC § 48000)

13) Requires a school district or charter school, as a condition of receipt of apportionment for pupils in a TK program, ensure that a child who will have their fourth birthday by September 1 to be admitted to a TK program maintained by the school district or charter school. (EC § 48000)

14) Requires, commencing with the 2025-26 school year, to maintain an average of at least one adult for every 10 pupils for TK classrooms. (EC § 48000)

15) Requires each person between the ages of 6 and 18 years old to be subject to compulsory full-time education, unless specifically exempted. (EC § 48200)

This bill:

1) Authorizes heritage schools to serve students who are enrolled in TK, in addition to children who are enrolled in kindergarten or grades 1 to 12, inclusive.

2) Requires heritage schools to provide a notice to the pupil's parent or guardian stating that CDE has no regulatory authority over heritage schools and does not monitor heritage school operations or instruction.

3) Makes technical and clarifying changes, including chaptering out changes.

Comments

Need for the bill. According to the author, "In 2021, California created universal transitional kindergarten (TK) so that all four-year-olds have access to free public TK. That commitment was pivotal in expanding access to early learning for children. Now that more four-year-olds are attending school, families must adjust their childcare plans for the gaps that may exist until a parent or guardian is available to pick them up, since the school day may not match work schedules."

The author continues, "Existing law establishes Heritage Schools as out-of-school programs that offer additional learning opportunities and activities based on a particular culture and language. However, existing law also establishes the minimum age to attend these schools at four years and nine months old. With the establishment of universal TK, this law has not been updated to recognize the need for after-school programs for TK students. This bill will allow TK students to attend Heritage Schools and benefit from their after-school programming, while giving families another option for childcare."

What are heritage schools? Existing law defines a heritage school as a school that serves children who are at least 4 years and 9 months of age and no older than 18 years of age and who also attend a public or private full-time day school. Heritage schools do not satisfy the state's compulsory education requirements and therefore operate outside of compulsory education to offer supplemental instruction in the culture, traditions, or history, and language of a country other than the U.S. Many heritage schools also offer before school or after school programs. Heritage schools must file an electronic registration form with the Education Commissioner beginning January 1, 2027 (and previously with the Superintendent of Public Instruction (SPI)), and a list of heritage schools can be found on CDE's website.

CDE's database of heritage schools include programs ranging from those run by a Greek Orthodox church and a Chinese Baptist church, a Japanese language and cultural study program, a Hebrew school, and corporations that run before school and after school programs in many locations throughout the state. According to the registration data available from CDE from 2026, there are 1,011 heritage schools registered with CDE, with a total enrollment of 133,537 students, with 95% of these students enrolled in kindergarten through 6th grade and 5% in grades 7 to 12.

Heritage schools are not subject to state oversight—not from CDE nor CDSS. Consistent with existing law, CDE's website indicates that the Education Commissioner (formerly the SPI) nor CDE evaluates, approves, recognizes, accredits, nor endorses any heritage school. CDE does not monitor heritage school operations, instruction, or the data submitted on a heritage school's annual registration form. CDE's only role with heritage schools is to maintain the heritage school registration form and process, which heritage schools are required to submit annually. Similarly, heritage schools are exempt from childcare licensing, so CDSS has no responsibility to recognize or monitor these schools or programs.

That being said, existing law outlines several requirements and expectations for heritage schools. Heritage schools must comply with numerous health and safety provisions, including:

- The director and all employees and contractors having contact with students must have background checks and would not be prohibited from employment by a public school district because of their conviction for any crime.

- The director and all employees must be mandated reporters and have received the necessary training.

- The director must receive 15 hours of training in health and safety topics, including first aid, CPR, and injury prevention.

- All employees and volunteers must be in good health as verified by a health screening, including a test for tuberculosis.

- Students must have access to working sinks, toilets, and drinking water.

In addition, a building operated by a heritage school, like any other privately owned building, must comply with the requirements imposed by the county, city, and other agencies within whose jurisdiction the building is located, and such requirements include zoning, health and safety codes, fire codes, and other local ordinances.

TK is now available to all 4-year-olds. Though a child's attendance in kindergarten is not compulsory, local educational agencies (LEAs) are required to offer kindergarten programs to age-eligible children, and existing law defines TK as the first year of a two-year kindergarten program. However, not every school site in a district is required to offer TK.

According to a report by the Learning Policy Institute (LPI) titled "California's Universal Prekindergarten Implementation, 2024-25"—which was a year before full TK implementation—94% of LEAs responding to a survey reported offering TK, and 70% of these offered TK at all applicable school sites. LEAs may offer TK as a part-day or full-day program, and the report notes that 85% of LEAs offered a full-day TK option, and 88% offered expanded learning programs for TK students to provide care for out-of-school hours.

Existing law requires that an LEA, as a condition of receipt of apportionment, ensure that a child who will have their fourth birthday by September 1 to be eligible to be admitted to a TK program. In the 2025-26 school year, a total of 213,313 children were enrolled in TK statewide, up from 177,570 in the 2024-25 school year. The LPI reports that, in 2024-25, this represented 55% of the TK-eligible population. The overall uptake of TK has declined through the period of expansion of the program in recent years, which may be due to lack of awareness of TK, differing family preferences and needs, or potential barriers to enrollment.

Supervision of 4-year-old children. The National Association for the Education of Young Children's recommended adult-to-child ratio in child care programs for 4-year-olds is 1:10. In California, existing law requires that TK classes have staffing of one adult for every 10 students as of 2025-26, and similarly, existing law requires a school offering before or after school programming through the Expanded Learning Opportunities Program to maintain a staff-to-pupil ratio of 1:10 if they are working with pupils in TK or kindergarten. Current regulations for contractors operating a California State Preschool Program serving 4-year-old children must maintain an adult-to-child ratio of 1:8. The Legislature may wish to consider the fact that heritage schools have no mandated adult-to-child ratios for serving children as young as 4 years old as proposed in this bill.

SUBJECT: Appointment of public guardians

SOURCE: California State Association of Psychiatrists

DIGEST: This bill requires the public guardian of a county to acknowledge receipt of a referral for conservatorship or guardianship, to complete their investigation within a reasonable period of time, and to provide status updates of the investigation to the referring party upon request.

Assembly Amendments gutted and amended this bill to its current form.

ANALYSIS:

Existing law:

1) Authorizes a court to appoint a conservator of the person or estate of an adult, or both, provided that the conservatorship is the least restrictive alternative necessary for the protection of the conservatee. (Probate (Prob.) Code, § 1800.3.)

2) Provides, subject to 1):

a) A conservator of the person may be appointed for a person who is unable to provide properly for their personal needs for physical health, food, clothing, or shelter, except as specified.

b) A conservator of the estate may be appointed for a person who is substantially unable to manage their own financial resources or resist fraud or undue influence, except as specified.

c) A conservator of the person and estate may be appointed if the person meets the criteria for both conservatorship types.

d) A limited conservator of the person or of the estate, or both, may be appointed for a developmentally disabled adult; a limited conservatorship may be utilized only as necessary to promote and protect the wellbeing of the individual, shall be designed to encourage the development of maximum self-reliance and independence of the individual, and shall be ordered only to the extent necessitated by the individual's proven mental and adaptive limitations.

e) The standard of proof for the appointment of a conservator for any of the conservatorship types listed herein is clear and convincing evidence. (Prob. Code, § 1801.)

3) Provides for the establishment of a temporary conservatorship of the person, or the estate, or both, pending a decision on a petition for the appointment of a conservator. (Prob. Code, §§ 2250, 2250.2.)

4) Provides that, if any person domiciled in the county requires a guardian or conservator and there is no one else who is qualified and willing to act and whose appointment as guardian or conservator would be in the best interests of the person, either of the following applies:

a) The public guardian shall apply for appointment as guardian or conservator of the person, the estate, or both, if there is an imminent threat to the person's health or safety or the person's estate.

b) In all other cases, the public guardian may apply for appointment as guardian or conservator of the person, estate, or both. (Prob. Code, § 2920(a).)

5) Requires the public guardian to apply for appointment as guardian or conservator of the person, estate, or both, if the court so orders.

a) The court may make such an order upon motion of an interested person or on the court's own motion in a pending proceeding or in a proceeding commenced for that purpose.

b) The court shall order the public guardian to apply for appointment as guardian or conservator on behalf of any person domiciled in the county who appears to require a guardian or conservator if it appears that there is no one else who is qualified and willing to act, and if that appointment is in the best interests of the person; if, however, prior to the filing of the petition, it is discovered that there is someone else who is qualified and willing to serve, the public guardian shall be relieved of the duty under the court order.

c) The court shall not make such an order except after notice to the public guardian, as specified, consideration of the alternatives, and a determination that the appointment is necessary. (Prob. Code, § 2920(b).)

6) Requires the public guardian to begin an investigation as to whether a guardianship or conservatorship is necessary within two business days of receiving a referral for conservatorship or guardianship. (Prob. Code, § 2920(c).)

This bill:

1) Requires the public guardian to acknowledge receipt of an investigation referral.

2) Requires the public guardian to conclude a referral investigation within a reasonable period of time.

3) Provides that, when the public guardian investigates a referral for a conservatorship, the investigation must include a determination of whether or not a temporary or general conservatorship is warranted, and that the public guardian must inform the referring party of the status of the investigation upon request.

Comments

In California, if an adult is unable to manage their own personal or financial affairs, a court may appoint a conservator of the person, of the estate, or both, to assist the adult in managing those needs. When there is not a family member or other trusted adult to serve as the conservator, existing law authorizes the county

office of the public guardian to do so. Currently, anybody may refer an individual to the public guardian for a conservatorship, at which point the public guardian must conduct an investigation to determine whether it is appropriate to petition the court for a conservatorship.

This bill is intended to improve the conservatorship referral and investigation process. First, this bill requires the public guardian to acknowledge receipt of a conservatorship referral. Second, this bill requires the public guardian to complete its investigation within a reasonable period of time. Third, this bill requires the public guardian to include a determination of whether a temporary or general conservatorship is warranted. Fourth, this bill requires the public guardian to inform the referring party of the status of the conservatorship investigation upon request.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

> Minor reimbursable state-mandated local costs to county public guardian offices to acknowledge receipt of referrals, make the specified determination as part of investigations, and respond to status requests from referring parties, subject to a determination by the Commission on State Mandates. These duties are administrative additions to the investigation existing law already requires, and any costs to an individual county are likely to be minor.

SUPPORT: (Verified 8/26/26)[1]

California State Association of Psychiatrists (source)

OPPOSITION: (Verified 8/26/26)

None received

ARGUMENTS IN SUPPORT: According to the California State Association of Psychiatrists:

> Under current law, a public guardian must begin an investigation within two business days of a referral, but there is no requirement that the investigation ever conclude, and no requirement to update the referring party. This can leave vulnerable adults like people with dementia, brain injury, or other cognitive impairments stuck in limbo for extended periods of time.

[1] Organizations that submitted support or opposition to the bill before it was gutted and amended are not listed.

SB 561 would require the public guardian to acknowledge receipt of a referral, begin the investigation within two business days as current law already requires, conclude that investigation within a reasonable time and reach a determination on whether conservatorship is warranted, and share status updates with the referring party upon request. These are common-sense safeguards that do not impose a rigid deadline or require disclosure of confidential records. Rather, they simply ensure cases get resolved and referring parties are not left in the dark.

SUBJECT: Short-Term Rental Facilitator Act of 2026

SOURCE: Author

DIGEST: This bill enacts the Short-Term Rental Facilitator Act of 2026, which permits Indian tribes to require short-term rental facilitators to provide specified information on short-term rentals in their jurisdiction.

Assembly Amendments deleted the contents of the bill and inserted the current provisions.

ANALYSIS:

Existing law:

1) Authorizes the legislative body of any city, county, or city and county to levy a tax on the privilege of occupying a room or rooms, or other living space, in a hotel, inn, tourist home or house, motel, or other lodging unless the occupancy is for a period of more than 30 days. The tax, when levied by the legislative body of a county, applies only to the unincorporated areas of the county.

2) Establishes the "Short-Term Rental Facilitator Act of 2025," which applies only to those local agencies that adopt an ordinance that makes these provisions applicable.

3) Requires each short-term rental facilitator to report, pursuant to a specified schedule and in the form and manner prescribed by the local agency, the physical address including nine-digit zip code of each short-term rental during the reporting period. If the information provided by the short-term rental facilitator is not sufficient for the local agency to identify a specific short-term rental at the provided address, the local agency may request the following:

   a) The assessor parcel number of the host property.

   b) The URL associated with the specific host property listing.

   c) Information exclusively related to the identification of an accessory dwelling unit, guest house, or single unit of a timeshare or multifamily housing project located at a single address, which is located at the address or assessor parcel number requested.

4) A local agency may make the failure of a short-term rental facilitator to report the information required by this section subject to an administrative fine or penalty, as specified.

5) Allows a local agency to conduct an audit or otherwise examine the records of the short-term rental facilitator documenting the receipt of the transient occupancy tax due and payable to the local agency, if the short-term rental facilitator is responsible for collecting and remitting the transient occupancy tax to the local agency pursuant to a local ordinance or collection agreement.

6) Provides that any costs associated with an audit or examination must be paid for by the local agency.

This bill enacts the Short-Term Rental (STR) Facilitator Act of 2026, which permits Indian tribes to require STR facilitators to provide the same information on STRs to tribal governments that the STR Facilitator Act of 2025 required them to provide to local agencies.

Background

Transient occupancy taxes. State law allows cities and counties to levy a tax on the privilege of occupying a room or rooms, or other living space, in a hotel, inn, tourist home, motel, or other lodging unless the occupancy is for a period of more

than 30 days. These taxes—commonly known as Transient Occupancy Taxes (TOTs)—are typically collected by lodging providers as an itemized charge based on a percentage of a customer's bill, who then remit proceeds to the local agency where the lodging was provided. In California, around 430 cities and 55 counties levy a TOT, mostly for general revenue purposes, at rates from 3% to over 15.5%. According to the State Controller's Office, TOTs generated over $3.3 billion in revenue for local agencies in the 2022-23 fiscal year. The state does not currently impose its own TOT.

Tribal sovereignty. California currently has 109 federally-recognized Indian tribes, with others petitioning for recognition. There are special rules that govern state and local jurisdiction for Indians and Indian Country, and federal and tribal laws may also apply. Like local governments, tribal governments can pass their own local ordinances to govern their members and their land. Federal courts have consistently held that tribes have the power of taxation on their members and on nonmembers doing business in their jurisdiction. As such, many tribal governments impose taxes similar to those the state and local governments impose. For example, the Agua Caliente Band of Cahuilla Indians imposes a variety of taxes including possessory interest tax, sales tax, and a TOT. Their tax department collects revenue from these taxes, which goes to support tribal government, services, and programs. When a tribe seeks to enforce their ordinances, like those allowing for the imposition of these taxes, these tribal ordinances typically get enforced through tribal courts.

Comments

1) *Purpose of the bill.* According to the author, "Short-term rentals have become an increasingly popular lodging option throughout California, including on tribal lands. Yet while cities and counties can access the information needed to collect transient occupancy taxes on these properties, federally recognized Indian tribes are currently excluded from accessing the same information. The lack of access to this information makes it significantly more difficult for tribal governments to administer and collect their own transient occupancy taxes, which are vital to funding essential government services for the reservation community, including public safety, fire and emergency response, and tourism management. SB 594 extends existing law to ensure that federally recognized Indian tribes may receive the information required to collect these taxes on rental properties located on their tribal land, advancing California's policy of cooperative intergovernmental relations."

2) *Necessary?* Tribal governments generally do not rely on state law to adopt or enforce their locally enacted ordinances. However, tribal governments, including the Agua Caliente Band of Cahuilla Indians, the sponsors of this measure, report having similar challenges to those local agencies have experienced when trying to collect information on STRs within their jurisdiction. While tribal governments have the ability to adopt an STR ordinance requiring STR facilitators to disclose this information and enforce those provisions in tribal courts, this does not allow them to compel these STR facilitators to disclose this information in state court. Tribal governments believe developing consistent reporting requirements for both local and tribal governments would improve compliance with STR disclosure requirements.

SUBJECT: Perinatal health screenings and treatment

SOURCE: California Coalition for Perinatal Mental Health & Justice
Policy Center for Maternal Mental Health
Sage Therapeutics
PSI-California
Black Women for Wellness Action Project

DIGEST: This bill revises an existing requirement on plans and insurers relating to maternal mental health (MMH) screenings to require case management, care coordination, guidelines, and the standards of care appropriate to the provider's

scope of practice, as specified. Encourages health plans and insurers to provide coverage for outpatient prescription drugs approved by the U.S. Food and Drug Administration (FDA) for MMH. Requires licensed health care practitioners who provide perinatal care for a patient to ensure the patient is screened for MMH consistent with the plan or insurer MMH program, and applicable standards of care.

Assembly Amendments return terminology back to "maternal"(instead of perinatal) mental health, replace medication and digital therapeutics with "outpatient prescription drugs," define case management and care coordination, revise the definition of MMH condition, require, if a patient or client screens positive for a MMH condition, licensed health care practitioners to ensure the patient is offered or receives a clinical evaluation, and if the practitioner diagnoses the patient, the practitioner to make or provide treatment to the patient or client. Makes clarifying changes to this bill such as replacing the term "standards" with "the standards of care" and replace "medical providers" with the term "licensed health care practitioners."

ANALYSIS:

Existing law:

1) Establishes the Department of Managed Health Care (DMHC) to regulate health plans under the Knox-Keene Health Care Services Plan Act of 1975; the California Department of Insurance (CDI) to regulate health and other insurers; and the Medi-Cal program, administered by the Department of Health Care Services (DHCS), under which low-income individuals are eligible for medical coverage. (Health and Safety Code (HSC) §1340, et seq., Insurance Code (INS) §106, et seq. and Welfare and Institutions Code (WIC) §14000, et seq.)

2) Requires a health plan, including a Medi-Cal managed care plan, or insurer to develop a MMH program designed to promote quality and cost-effective outcomes. Requires the program to consist of at least one MMH screening to be conducted during pregnancy, at least one additional screening to be conducted during the first six weeks of the postpartum period, and additional postpartum screenings, if determined to be medically necessary and clinically appropriate in the judgment of the treating provider. (HSC §1367.625 and INS §10123.867)

3) Requires the MMH program to be developed consistent with sound clinical principles and processes, and include quality measures to encourage screening, diagnosis, treatment, and referral. Requires the MMH program guidelines and criteria to be provided to relevant medical providers, including all contracting

obstetric providers. As part of a MMH program the health plan or insurer is encouraged to improve screening, treatment, and referral to MMH services, include coverage for doulas, incentivize training opportunities for contracting obstetric providers, and, educate enrollees about the program. (HSC §1367.625 and INS §10123.867)

4) Defines contracting obstetric provider to mean an individual who is certified or licensed pursuant law, as specified, or an initiative act, as specified, and who is contracted with the health plan or insurer to provide services under the contract or policy. (HSC §1367.625 and INS §10123.867)

5) Defines MMH as a mental health condition that occurs during pregnancy or during the postpartum period and includes, but is not limited to, postpartum depression. (HSC §1367.625 and INS §10123.867)

6) Requires a licensed health care practitioner who provides prenatal, postpartum, or interpregnancy care for a patient to ensure that the mother is offered screening or is appropriately screened for MMH conditions, except when providing emergency services. Defines "health care practitioner" as a physician, naturopathic doctor, nurse practitioner, physician assistant, nurse midwife, or a licensed midwife. (HSC §123640)

This bill:

1) Revises the requirements on plans and insurers to have an MMH program, to include one or more MMH screenings conducted during pregnancy and one or more during the postpartum period in accordance with applicable clinical guidelines and the standards of care appropriate to the provider's scope of practice.

2) Encourages health plans and insurers as part of their MMH programs to provide coverage for outpatient prescription drugs approved by the FDA for MMH.

3) Requires guidelines to be guidelines adopted by the American College of Obstetricians and Gynecologist (ACOG), unless those guidelines do not align with the provider's scope of practices. If there is not alignment, permits the guidelines to include, but not be limited to, guidelines adopted by other recognized professional bodies. Indicates this does not expand or alter a licensed provider's existing scope of practice.

4) Requires health plans and insurers to provide case management or care coordination for an enrollee or insured who screens positive for MMH in

accordance with the plans or insurers existing case management and care coordination programs.

5) Indicates case management and care coordination may include identification of available treatment providers and community supports, appointment scheduling, behavioral health navigation, medication access assistance when prescribed, regular patient engagement or follow up, and communication with the referring obstetric and behavioral health providers.

6) Indicates case management and care coordination may be provided by the plan or insurer, or by a delegated provider if case management or care coordination, is already provided pursuant to contract, or in the Health Care Provider Bill of Rights law.

7) Requires a plan or insurer to incorporate MMH screening, referral, care coordination and follow up activities into its existing quality improvement and population health management programs and maintain documentation demonstrating compliance that is available to regulators upon request.

8) Defines case management as a health care process in which a health care professional, acting withing their scope of practice, assists a patient by developing and implementing a coordinated plan of care that integrates the medical and psychosocial support services the patient needs to achieve optimal outcomes.

9) Requires a licensed health care practitioner who provides perinatal care for a patient to ensure the patient is screened for MMH consistent with the plan or insurer MMH program, and applicable standards of care.

10) Requires if a patient screens positive, the licensed health care practitioner to ensure that the patient is offered or receives a clinical evaluation, and if the practitioner diagnoses the MMH, to offer or provide the treatment consistent with the practitioner's scope of practice. This may be satisfied by referring the patient or client to another licensed health care practitioner who is authorized to screen, evaluate, diagnose, and treat the patient or client for MMH.

11) Defines MMH condition to include postpartum and perinatal depression, as defined by the most recent clinical guidelines adopted by ACOG on the screening and diagnosis of MMH during pregnancy and postpartum, regardless of the pregnancy outcome and inclusive of gender-diverse birthing people.

Comments

According to the author of this bill:

> MMH conditions, including depression and anxiety, are the most common complications of pregnancy and a leading cause of maternal mortality. In California, one in three birthing people are affected, yet 85% go untreated. These conditions cost the state $2.4 billion annually and increase the risk of chronic mental health issues, suicide, Sudden Infant Death Syndrome, preterm birth, impaired parent-child bonding, adverse childhood experiences, and developmental delays in children. Black, Indigenous, and people of color communities are disproportionately impacted. This bill addresses this urgent need by ensuring equitable, comprehensive mental health care for all birthing people. The bill aligns with state and federal efforts to reduce maternal mortality, including initiatives from the Administration, DHCS, California Department of Public Health, and the California Surgeon General's office. It strengthens existing law by specifying screening timelines per ACOG guidelines, addressing coverage of FDA-approved treatments for perinatal mental health, and requiring insurers and health plans to report screening rates for accountability. This bill will increase access to timely mental health care, reduce societal costs, and improve long-term outcomes, particularly in marginalized communities.

Support if amended. The Students for Patient Advocacy Nationwide request an amendment to define "perinatal period" as the time beginning with pregnancy and extending through 12 months following childbirth.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, CDI estimates costs of $6,000 in fiscal year (FY) 2025-26, $32,000 in FY 2026-27, and $15,000 in FY 2027-28 and ongoing for state administration (Insurance Fund).

DMHC anticipates minor and absorbable costs.

CalPERS does not anticipate costs associated with this bill.

Costs to DHCS, if any, are likely negligible.

OPPOSITION: (Verified 8/25/26)

Association of California Life & Health Insurance Companies
California Association of Health Plans

ARGUMENTS IN SUPPORT: Cosponsors of this bill (California Coalition for Perinatal Mental Health & Justice, Policy Center for Maternal Mental Health, Postpartum Support International-California, and Black Women for Wellness Action Project) write, "This bill offers California a scalable, affordable, and equity-driven solution to address our MMH crisis. It builds on existing law to improve unintended outcomes without expanding scope of practice or adding significant cost, providing clarity on screening requirements aligning with clinical bodies, and providing coverage for targeted treatments. In a moment of fiscal constraint, this bill is a smart, strategic investment, one that will save the state and private payers cost over time, save lives, close treatment and care coordination gaps and prevent long-term suffering for families across the state." The California Coalition for Perinatal Mental Health & Justice writes that this bill will make significant strides in improving access to mental health care for birthing families, particularly those from marginalized communities, and, by expanding coverage and ensuring accountability, this bill will help reduce health disparities, save lives, and ultimately lead to healthier, more supported families across the state. ACOG writes, "This bill takes an important step by updating terminology, better reflecting the full spectrum of mental health needs from pregnancy through the postpartum period. ACOG says most notably, the bill requires that screenings, diagnoses, and treatments be guided by clinical standards set by ACOG, ensuring that care is grounded in the most current, evidence-based practices, and, by relying on clinical guidelines rather than codifying specific practices in statute, this bill allows the

standard of care to evolve with advances in science and medicine. ACOG believes this flexibility is critical to improving outcomes and expanding access to effective mental health services for pregnant and postpartum individuals. Finally, ACOG indicates the bill also includes essential provisions for case management, care coordination, and coverage of treatment tools which together create a more comprehensive and responsive system of support for patients during the perinatal period.

ARGUMENTS IN OPPOSITION: The California Association of Health Plans and the Association of California Life and Health Insurance Companies write in opposition to health insurance mandate bills including this one. The opposition writes these bills will increase costs, reduce choice and competition and further incent some employers and individuals to avoid state regulation by seeking other coverage options. Benefit mandates impose a one-size-fits all approach to medical care and benefit design without consideration for consumer choiceThe opposition also indicates that adding new mandates at a time when the Office of Health Care Affordability (OHCA) is working to curb healthcare costs could disrupt those efforts and make it difficult for health care entities to meet the OCHA spending target. The opposition urges the Legislature to consider the cumulative impacts of these mandates on premiums and access to coverage, and they believe that benefit mandates stifle the use of innovative, evidence-based medicine.

SUBJECT: Community colleges: California College Promise

SOURCE: CFT – A Union of Educators and Classified Professionals

DIGEST: This bill reduces the minimum unit requirement for a California community college (CCC) student to qualify for a California College Promise fee waiver from 12 units, or a full-time courseload, to 9 units. This bill also requires a CCC, as a condition of receiving program funds, to provide written notification to a student, upon issuing an initial fee waiver, on (1) the period of eligibility for a California College Promise fee waiver is limited to two academic years, (2) a description of the units a student needs per semester or academic year to complete an associate degree or certificate within two academic years, and (3) information on how to access other financial aid opportunities available to a student who has exceeded their two years of eligibility for a fee waiver.

Assembly Amendments replace the contents of the version of the bill amended April 10, 2025 to instead reduce the minimum unit requirement for a CCC student to qualify for a California College Promise fee waiver from 12 units to 9 units, and to require a CCC, as a condition of receiving program funds, to provide written notification, as specified, to a student upon issuing an initial fee waiver. The amendments also add language to avoid chaptering out issues with the section amended by this bill.

ANALYSIS:

Existing law:

1) Establishes the mission and function of the CCCs, which, in part, is to:

    a) Offer academic and vocational instruction at the lower division level for both younger and older students.

    b) Authorizes the CCC to grant the associate in arts degree and the associate in science degree.

    c) Requires the CCC to offer English as a Second Language instruction, adult noncredit instruction, and support services which help students succeed at the postsecondary level.

    d) Advance California's economic growth and global competitiveness through education, training, and services that contribute to continuous workforce improvement. (Education Code (EC) § 66010.4)

2) Requires community college districts (CCDs) to charge students an enrollment fee of $46 per unit per semester. (EC § 76300)

3) Provides for a fee waiver for certain types of students, including those who meet minimum academic and progress standards adopted by the Board of Governors (BOG) and have incomes below certain thresholds established by the BOG or have demonstrated financial need pursuant to federal law. (EC § 76300)

4) Establishes the California College Promise, under the administration of the Chancellor of the CCCs, and requires the Chancellor, upon appropriation by the Legislature, to distribute funding to CCDs to fund colleges that meet specified requirements. (EC § 76396)

5) Authorizes a community college to use funding appropriated for the California College Promise to waive some or all of the fees for two academic years for first-time community college students and returning community college students, who are enrolled full time at the college, and who complete and submit either a Free Application for Federal Student Aid (FAFSA) or a California Dream Act application (CADAA). (EC § 76396.3)

6) Defines "full time" as 12 or more semester units or the equivalent. (EC § 76396.3)

7) Permits that a student enrolled in fewer than 12 units may be deemed "full time", for purposes of eligibility for the California College Promise, at the discretion of the institution if the student has been certified as "full time" by a staff person in the disabled student services program at the institution who is qualified to make such a designation. (EC § 76396.3)

This bill:

1) Requires a community college, as a condition of receiving funding for the California College Promise, to provide a written notification to a student, upon issuing the student an initial fee waiver, that states the following:

    a) A statement informing the student that the period of eligibility for a California College Promise fee waiver is limited to two academic years, as specified.

    b) A description of the number of units a student needs to complete per semester or the quarterly equivalent, or the number of semester or quarterly units the student needs to complete per academic year, to complete an associate degree or certificate program within two academic years.

    c) Information on how to access other financial aid opportunities available to a student who has exceeded their two years of eligibility for a fee waiver.

2) Reduces the minimum unit requirement for community college students to qualify for a California College Promise fee waiver from 12 units, or a full-time courseload, to 9 units.

3) Revises the definition of "full time" to be "eligible workload", which means 9 or more semester units or the equivalent, for purposes of eligibility for the California College Promise.

4) Provides that a student enrolled in fewer than 9 units—instead of 12 units—may be certified as eligible for the California College Promise, at the discretion of the institution if the student has been certified as eligible, based

on commitment by the student that is analogous to an eligible workload, by a staff person in the disabled student services program at the institution who is qualified to make such a designation.

5) Adds language to avoid chaptering out issues with the section amended by this bill.

Comments

1) *Need for the bill.* The author states, "I am proud to lead the fight to expand the California College Promise program to help our neediest students by expanding the ability of our community colleges to waive the fees for part-time students for two years. Existing law requires that a student be full time in order to receive a fee waiver through the program, which erroneously locks out our least advantaged students and perpetuates inequity and inequality at our community colleges."

2) *Statutory fees and fee waivers for the CCC system.* At $46 per unit, and with an annual average tuition of $1,380 for full-time California resident students, the CCC system offers the lowest tuition in the nation, as of February 2026. Enrollment fees are waived for CCC students demonstrating financial need, which was almost half of CCC students, or over 1 million students, in 2024-25. For decades, this waiver was known as the BOG fee waiver and has existed since CCC enrollment fees were established in 1984. The fee waiver has since been renamed the California College Promise Grant—not to be confused with the separate California College Promise Program. A CCC student meeting specified income standards may qualify and may receive the waiver, so long as they are eligible to take courses; there is no minimum unit requirement, and the fee waiver is applied to any course for which a student must pay the enrollment fee.

3) *The California College Promise was initially framed as "Free College" for first-time, full-time students.* The California College Promise was established by AB 19 (Santiago, Chapter 735, Statutes of 2017). The program, broadly marketed as providing "free college", allowed participating CCCs to waive some or all enrollment fees for one academic year for first-time, full-time community college students who completed and submitted a FAFSA or CADAA. Unlike the statutory fee waivers for CCC students demonstrating financial need, the California College Promise allowed CCCs to waive fees for students who did not demonstrate financial need but met other program

criteria. Though some have critiqued the California College Promise for not being a means-tested program, others have indicated that the "free college" marketing have created interest and enthusiasm in CCCs that exceeds the costs of the program. In addition, program eligibility for the California College Promise focused on students who are enrolled full time, with the intent to expedite the time to degree for students in exchange for paying for a student's tuition.

4) *Student eligibility for the program's fee waivers has expanded over time.* The California College Promise is a CCC categorical program and has received an appropriation of roughly $91.2 million for the last five years. Though the initial statute intended for California College Promise cohorts to be comprised of first-time, full-time community college students, subsequent legislation has gradually expanded student eligibility for the program:

- AB 2 (Santiago, Chapter 509, Statutes of 2019) authorized for a student enrolled in fewer than 12 units to be deemed as full time at the discretion of the institution if the student has been certified as full time by a staff person in the disabled student services program.

- AB 3137 (Voepel, Chapter 226, Statutes of 2020) required that a student who is a member of the Armed Forces of the United States, and is called to duty, may withdraw from participation in the California College Promise and resume program participation upon the student's return from duty without losing eligibility for the benefits of the program, including fee waivers.

- AB 183 (Committee on Budget, Chapter 54, Statutes of 2022) made returning students, defined as a student who has taken a break of one or more semesters (or the quarterly equivalent), eligible for the program.

- AB 1342 (Megan Dahle, Chapter 102, Statutes of 2023) clarified that a high school pupil who enrolls in community college as part of dual enrollment programs are required to be considered a first-time community college student for purposes of the California College Promise upon the student's enrollment in community college after high school graduation.

5) *The California College Promise incentivizes full-time enrollment, which can help students save money over time.* Since the program's inception, the California College Promise has required most students receiving fee waivers

to be enrolled full time. According to a 2014 report from the Campaign for College Opportunity called "The Real Cost of College: Time and Credits to Degree in California," a student who takes four years to earn an associate degree can spend as much as $15,200 more on fees and other expenses, and will earn $33,500 less, compared to someone who graduated in two years. As a result of these additional years, this student would incur $48,700 in extra expenses and lost wages.

According to the Legislative Analyst's Office's 2024 report called "Trends in Higher Education: Student Outcomes," CCC completion rates have ticked up over time but remain very low. It finds that the three-year completion rate has increased steadily over time, rising from 12% in 2011-12 to around 18% by 2017-18; the two-year completion rate also shows a gradual increase from roughly 5% in 2011-12 to around 9% by 2018-19. Despite improvement over time, overall completion rates remain low. It is unclear to what extent reducing the unit requirement for this specific program may have on completion rates for students.

6) *2025 report on California College Promise program.* AB 2 (Santiago, Chapter 509, Statutes of 2019) required the California Community Colleges Chancellor's Office (CCCCO) to submit a report, by July 1, 2024, to the Legislature evaluating the use of funding for the California College Promise to waive student fees, and for the report to determine whether the program was supporting the CCCs in accomplishing certain goals outlined in program statute. The CCCCO submitted the report on July 1, 2025, with the following findings:

- Use of funds. The report indicated that from 2018-19 to 2022-23, 70% of the participating CCCs used some of their program funds to waive student fees, 48% of participating CCCs used some funds on book vouchers, and 24% of participating CCCs used some funds on emergency grants.

- Completion rates. The report indicated that three-year associate's degree or career technical education certification completion rates for first-time students declined from 34% for the 2018 cohort to 28% for the 2020 cohort. This decline may be attributed to the onset of the COVID-19 pandemic in 2020, which negatively impacted retention.

- Transfer rates. The report indicated that transfer rates to the University of California and the California State University were 37% for the 2018 cohort to 36% for the 2020 cohort—essentially unchanged.

7) *Impact of reducing minimum unit requirements for a 2-year fee waiver program.* This bill is substantially similar to AB 537 (Ahrens, 2025), which was held in the Senate Appropriations Committee, and this bill revises the requirement that students must be enrolled full time—defined as 12 or more units, and instead requires students to be enrolled in at least 9 units to receive fee waivers. Current law allows, but does not require, CCCs to waive fees for full-time students for two academic years using program funds, and applicants are not required to demonstrate their financial need to qualify for a waiver.

   A primary mission of the CCCs is to award associate degrees, which are typically composed of 60 semester units. A student enrolled in 12 units per semester can complete the degree in 2.5 years, while a student taking 9 units per semester would take approximately 3.5 years. Current law limits eligibility for the California College Promise waiver program to two years. The bill's proposed change to reduce the minimum unit requirement from 12 to 9 units could potentially extend the time needed to finish an associate degree to be significantly beyond the waiver's expiration date. This gap could leave students without financial aid or needing to rely on other aid programs for additional semesters. The Legislature will need to consider the tradeoff of making changes to the California College Promise that could provide additional support services for students who are taking fewer units against encouraging students to take additional units so that they could potentially complete their programs more quickly.

Related/Prior Legislation

AB 537 (Ahrens, 2025) would have reduced the minimum unit requirement for CCC students to qualify for a California College Promise fee waiver from full time (12 or more units) to 9 units. AB 537 (Ahrens, 2025), which is substantially similar to SB 632 (Arreguín, 2026), was held in the Senate Appropriations Committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- Ongoing Proposition 98 General Fund cost pressures of an unknown, but potentially significant amount, possibly in the millions of dollars for the

CCCs, collectively statewide, to provide fee waivers to part-time students under the California College Promise Program.

- One-time Proposition 98 General Fund costs in the tens of thousands of dollars for the CCCs, collectively statewide, to develop and provide information to students regarding the benefits of full-time enrollment.

SUBJECT: Airports: financial assistance

SOURCE: Author

DIGEST: This bill transfers from the General Fund (GF), the Local Public Safety Fund (LPSF), and the Local Revenue Fund (LRF) to the Aeronautics Account in the State Transportation Account certain revenues derived from the imposition of state sales and use tax (SUT) on jet fuel and dedicates those revenues to specified airports and aviation-related purposes.

Assembly Amendments recast the fuel tax revenue allocation determination and transfer mechanism within this bill and revise the funding allocation formula.

ANALYSIS:

Existing federal law:

1) Prohibits revenues derived from local taxes on aviation fuel, except taxes in effect on December 30, 1987, and the revenues generated by an airport from being expended for any purpose other than the capital or operating costs of:

   a) The airport;

   b) The local airport system; or,

   c) Other local facilities owned or operated by the airport owner or operator directly and substantially related to the air transportation of passengers or property. (49 U.S.C. 47133(a).)

2) Requires, for the U.S. Secretary of Transportation (Secretary) to approve an airport development project grant application, that airport operators provide written assurances of compliance with the restrictions on local tax revenues derived from sales of aviation fuel and revenues generated by the airport. (49 U.S.C. Section 47107(b)(1).)

3) Provides that local taxes, including local taxes on aviation fuel at public airports, enacted not later than September 2, 1982, in a law controlling financing by the airport owner or operator, or a covenant or assurance in a debt obligation issued not later than September 2, 1982, by the owner or operator, are not subject to the above restrictions and may also support the general debt obligations or other facilities of the owner or operator. (49 U.S.C. Sections 47107(b)(2) and 47133(b)(1).)

4) Provides that state taxes on aviation fuel to support a state aviation program or the use of airport revenue on or off the airport for a noise mitigation purpose are not subject to the above restrictions. (49 U.S.C. Sections 47107(b)(3) and 47133(c).)

5) Authorizes the Secretary to withhold federal grant funding if, after notice and opportunity for a hearing, the Secretary finds a violation of the assurances concerning airport revenues described above, provided that the Secretary has allowed the airport sponsor an opportunity to take corrective action to cure such violation, and such corrective action has not been taken within the period of time set by the Secretary. (49 U.S.C. Section 47111(e).)

6) Authorizes the Secretary to apply to the corresponding United States district court in which the violation occurred for enforcement of the above provisions. (49 U.S.C. Section 47111(f).)

Existing state law:

1) Imposes, subject to specified exemptions and exclusions, a sales tax on all retailers on the retail sale of tangible personal property (TPP) in California. If the sales tax does not apply, the SUT Law imposes a complimentary use tax on the storage, use, or other consumption in this state of TPP purchased from a retailer. (R&TC Section 6001 *et seq.*)

2) Authorizes counties and cities, under the Bradley-Burns Uniform Local SUT Law (Bradley-Burns), to impose a local SUT for TPP sold at retail in the county or city, or purchased for storage, use, or other consumption in the county or city. Requires the county or city to contract with the California Department of Fee & Tax Administration (CDTFA) for the administration of the taxes and requires CDTFA, in turn, to transmit those taxes to the city or county. (R&TC Section 7202 *et seq.*)

3) Provides that, for purposes of a local Bradley-Burns sales tax, all retail sales are consummated at the place of business of the retailer, unless otherwise specified. (R&TC Section 7205.)

4) Provides that the point of delivery of jet fuel is also the point of sale when determining local taxes under Bradley-Burns, regardless of whether the retailer has more than one place of business in this state. (R&TC Section 7204.03.)

5) Exempts aviation gasoline from the imposition of SUT. (R&TC Section 6357.)

6) Imposes the aircraft jet fuel tax, which is imposed on jet fuel dealers at $0.02 per gallon sold to jet fuel users. (R&TC Section 7385 *et seq.*)

7) Defines "aircraft jet fuel" as any inflammable liquid which is used or sold for use in propelling aircraft operated by the jet or turbine type of engine. (R&TC Section 7387.)

8) Exempts fuel sold for use by a common carrier, the U.S. Armed Forces, and manufacturers and servicers of aircraft from the aircraft jet fuel tax. (R&TC Section 7389.)

9) Requires, beginning January 1, 2020, retailers of aircraft jet fuel to provide quarterly information to CDTFA regarding their sales of aircraft jet fuel by airport location and requires CDTFA to post the information from these reports online on a quarterly basis to comply with Federal Aviation Administration's (FAA) "Policy and Procedures Concerning the Use of Airport Revenue; Proceeds from Taxes on Aviation Fuel" (79 Fed. Reg. 66282 (Nov. 7, 2014)). (R&TC Section 6452.052.)

This bill:

1) Directs the State Controller, by September 1 of each year, to transfer from the GF, LPSF, and the LRF to the Aeronautics Account a dollar amount equal to 1.25% (0.25% GF, 0.50% LPSF and 0.50% LRF) of revenues derived from the imposition of state SUT, as specified, on jet fuel and dedicates the amounts transferred to airport and aviation-related purposes.

2) Requires Division of Aeronautics (Division), within the California Department of Transportation (Caltrans), to annually allocate from revenue collected from taxes on jet fuel sold at airports, after deducting administrative expenses, to eligible recipients the following percentages of available funds for airports and aviation-related purposes as follows:

   a) 75% of the revenue to be divided among each public and private airport where jet fuel is sold or consumed based on the airport's fuel flowage statistics reported for the previous calendar year. Of this total annual allocation, until December 31, 2031, the division must use $500,000 to

provide grants to rural, nonhub commercial airports and general aviation airports;

b) 15% for general aviation airports, to be divided and credited to individual airports consistent with a process established by the Division;

c) 9% to existing grant programs that serve nonhub and small hub airports; and,

d) 1% to provide grants for aviation education that includes, but is not limited to, programs that provide workforce development, flight training, traffic control training and education, and aviation-related degrees from accredited universities.

3) In the first year, up to $1 million is available for administrative costs incurred by the Division to establish a process and allocate funds pursuant to (b) above; thereafter, up to $600,000 annually is available to the Division for administrative costs.

4) Requires all public and private use airports where jet fuel is sold or consumed to report to the Division the airport's fuel flowage statistics for the previous calendar year by March 31 for purposes of calculating individual airport fuel tax allocations.

5) Specifies that "fuel flowage statistics" includes the total gallons of jet fuel sold or consumed annually at an airport.

6) Defines "jet fuel" as aircraft jet fuel which is any inflammable liquid used or sold for use in propelling aircraft operated by the jet or turbine type of engine.

Comments

1) *Purpose of the bill.* According to the author, "California's airports operate as one interconnected system, where the strength of every airport contributes to the resiliency, efficiency, and competitiveness of the entire network. When smaller airports fall behind, our statewide transportation system, economy, and connectivity suffer. SB 661 establishes a dedicated funding stream using existing jet fuel sales tax revenues to strengthen our entire airport system. By making targeted investments across our entire airport network, this bill promotes equitable economic development, creates jobs, improves mobility, and better positions California to meet the demands of a rapidly evolving

aviation industry while advancing compliance with federal aviation revenue requirements. If California intends to remain the nation's leader in transportation, innovation, and economic opportunity, we must invest in the entire airport system—not just individual airports. With SB 661 California is taking a more strategic approach to the future of aviation."

2) *SB 661 redirects approximately $39 million annually to California's airports.* In order to meet federal requirements and better fund California's airports, SB 661 requires that certain revenues derived from the imposition of sales and use taxes on purchases of jet fuel be transferred to the state Aeronautics Account for allocation to airports and aviation-related purposes. The amounts subject to allocation are to be determined by CDTFA and the funds must primarily be used to improve airport infrastructure based on a prescribed funding formula. SB 661 seeks to resolve a longstanding dispute between California and the FAA and to provide adequate funding for the state's aviation system. The current version of the bill is the final product of extensive negotiations among stakeholders, including airports and airlines.

3) *Seeking federal compliance.* In November 2014, the FAA issued a directive (Docket No. FAA-2013-0988) to confirm its longstanding policy, based on federal law, that aviation fuel taxes be used exclusively for airport purposes and state aviation programs. The directive does not apply to state and local taxes on aviation fuel in effect prior to December 30, 1987. However, in July 2012, California began transferring revenues attributable to aviation fuel taxes from the Aeronautics Account to the General Fund.

   As such, according to the FAA, California has yet to reach federal compliance. In correspondence with the FAA over the last ten years, the California Department of Finance (DOF) disagrees, arguing that California meets the FAA's requirement by funding offsetting project costs that are beneficial to the state's airport network. DOF wrote to the FAA in 2017 that "California complies with federal law by spending more on its airports than the State receives in state general tax revenue derived from aviation fuel." The FAA rejected this assertion, arguing that DOF's contention was unsubstantiated and asked for detailed financial documentation of the State's expenditures that were directly related to air transportation. The FAA has threatened to withhold federal money and "seek assistance from the U.S. Attorney's Office" if California does not comply. The dispute remains unresolved.

   According to the California Airports Council, "SB 661 represents California's most significant effort to address the longstanding issue of aviation fuel tax

revenue diversion and bring the state into compliance with federal aviation revenue use requirements…The consequences of continued noncompliance are significant. The Federal Aviation Administration has repeatedly identified California as a jurisdiction that has not aligned with federal Revenue Use requirements and has continued to seek information regarding the state's use of aviation fuel tax revenues. As federal scrutiny increases, uncertainty about California's compliance status poses risks not only to the state but also to the airports that rely on a strong partnership with the FAA to support infrastructure investments, safety initiatives, and long-term planning."

4) *A new funding formula.* The new funding formula within SB 661 includes a partial return-to-source provision, which directs 75% of the revenue collected from taxes on jet fuel to be retained by the airport at which the jet fuel was sold. The airport would be able to use the funds for purposes related to airport operations, capital improvements, maintenance, and other aviation-related infrastructure needs as determined by the airport's governing authority.

   The bill requires 15% of the revenue to be allocated to general aviation airports, to be divided and credited to individual airports consistent with a process established by the Division of Aeronautics. Nine percent of the revenues would be allocated to existing grant programs for smaller, regional airports. One percent would go towards grants for training, education, and workforce development.

   Writing in support, Airlines for America states, "A4A has consistently advocates that state sales tax revenues on jet fuel—which are almost wholly generated by commercial aviation at the state's largest airports—should return to the airport of origin as closely as possible. This carefully crafted bill achieves this important goal while balancing the interest and needs of the Caltrans Aeronautics Division, small airports and the general aviation community."

   The California Airports Council (CAC) also notes, "CAC appreciates that SB 661 recognizes the interconnected nature of California's aviation network. Commercial service airports, reliever airports, and general aviation airports each serve distinct but complementary roles that collectively support statewide mobility, economic development, emergency response, and public safety."

5) *What does this mean for airports?* SB 661 will redirect roughly $39 million annually from existing state funds, including the General Fund, to the Aeronautics Account. Seventy-five percent of that amount (just over

$29 million) will be divided among each public and private use airport where jet fuel is sold or consumed based on the airport's fuel flowage statistics reported for the previous calendar year. This means large airports, where the majority of jet fuel is sold, will receive a higher share of revenues compared to airports where less aviation fuel is sold.
However, the bill diverts additional funding to smaller airports instead of using a pure return-to-source formula. Nine percent of the revenue would go to existing grant programs that serve nonhub and small hub airports. Additionally, SB 661 earmarks $500,000 annually for rural, nonhub commercial airports and general aviation airports until 2032.

General aviation airports are publicly or privately owned airports that do not primarily serve scheduled commercial airline traffic. They accommodate a wide range of aviation activities, from private flying and flight training to business aviation, emergency services, and recreational flying. SB 661 directs fifteen percent of the funding directly to these airports.

Lastly, one percent of the funding will go to provide grants for aviation education that includes, but is not limited to, programs, projects, or initiatives that improve or enrich the aviation workforce within the California aviation community. Grants may include scholarships for flight training, traffic control training and education, and aviation-related degrees from accredited universities.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Increased annual revenue of approximately $39 million to the Aeronautics Account and a corresponding revenue loss to the GF of approximately $7.8 million and $15.6 million to each the LPSF and the LRF (based on recent annual jet fuel sales in California of $3.1 billion and the bill's transfer rate of 1.25%).

- Significant annual costs to Caltrans to allocate funds deposited into the Aeronautics Account. Caltrans estimates these costs at approximately $800,000 to fund four positions to allocate funds to over 200 airports. If Caltrans' cost estimate turns out to be accurate, the bill provides sufficient funding to cover this administrative cost in the first year of implementation—up to $1 million—but insufficient funding—up to $600,000—in each subsequent year.

SUBJECT: Railroads: safety: report

SOURCE: Author

DIGEST: This bill requires the California Public Utilities Commission (CPUC) to evaluate a list of hazardous railroad sites by July 1, 2029, and determine whether changes to railroad operations, conditions and safety data warrant modifications to the list.

Assembly Amendments delete the prior version of this bill and add language requiring the CPUC to evaluate whether changes to railroad operations, conditions and safety data warrant modifications to the CPUC's list of hazardous railroad sites.

ANALYSIS:

Existing law:

1) Defines a "public utility" as every common carrier, toll bridge corporation, pipeline corporation, gas corporation, electrical corporation, telephone corporation, telegraph corporation, water corporation, sewer system corporation, and heat corporation. Existing law provides the CPUC with authority to regulate public utilities. (Public Utilities Code §216)

2) Specifies that the definition of a "common carrier" includes every railroad corporation, street railroad corporation, and specified car corporation accepting compensation for transportation. (Public Utilities Code §211)

3) Requires approval from the CPUC before an applicant can construct a public road, highway, or street across a railroad track. (Public Utilities Code §1201)

4) Provides the CPUC with exclusive authority to prescribe standards for railroad crossings, including the location, installation, operation, maintenance, and use of crossings. (Public Utilities Code §1202)

5) Allows individuals who own land through which a railroad operates to build private crossings over the railroad when those crossings are necessary for ingress or egress. Existing law gives the CPUC the authority to determine the necessity for any crossing, the location and conditions for constructing and maintaining the private crossing, and the ability to assess costs. (Public Utilities Code §7537)

6) Requires the CPUC to annually submit a report to the Legislature by July 1, regarding railroad lines in California that the CPUC deems hazardous. Existing law specifies that this report must include specified information about railroad accidents and railroad sites that pose local safety hazards. (Public Utilities Code §916.2)

This bill requires the CPUC to evaluate its list of hazardous railroad sites by July 1, 2029, and determine whether changes to railroad operations, conditions and safety data warrant modifications to the list.

Background

The East Palestine rail derailment increased awareness of railroad safety issues. In 2020, a freight train carrying hazardous materials derailed in the town of East Palestine, Ohio. In a subsequent investigation, the National Transportation Safety Board (NTSB) determined that a rail car's defective wheel bearing overheated and failed, triggering the train derailment. At the time of the derailment, the train was approximately 9,000 feet in length, consisting of 149 cars. Of those 149 cars, 38 derailed, and 11 of the derailed cars contained toxic chemicals. While the derailment did not directly result in any fatalities or injuries, fires burning around derailed cars containing combustible toxic chemicals led to concerns about the potential for an uncontrolled explosion. Residents of East Palestine continue to express concerns about the safety of the town's air and water following the derailment.

The East Palestine derailment raised a variety of concerns about safety issues related to railroads, including concerns about the extent to which inadequate warning systems, overly long train lengths, and low train staffing ratios increase the likelihood of train crashes and derailments. These concerns have also reignited debates about the extent to which regulations should address trains blocking traffic around at-grade crossings, particularly when that traffic includes emergency response vehicles.

The CPUC's role in railroad regulation. While the CPUC has long held a role in regulating rail safety, federal law largely preempts states from regulating most rail operations. The Federal Railroad Safety Act (FRSA) and the Interstate Commerce Commission Termination Act (ICCTA) expressly exempt states from exercising regulatory action over railroads in certain circumstances. For example, the ICCTA provides the federal Surface Transportation Board with exclusive authority over the construction and operation of railroad tracks and facilities, even when those

tracks and facilities are located entirely in one state. Federal law also generally gives the Federal Railroad Administration regulatory authority over railroad tracks, vehicles, speeds, and safety inspections. Generally, if a law has not provided a federal agency with express preemption authority, the agency may claim an implied preemption power, which may depend on whether the federal agency has adopted a conflicting federal regulation. However, federal law also sets express boundaries on states' authority to adopt railroad safety regulations in the absence of federal rules. Federal statute (Title 49 United States Code (U.S.C.) §20106) states that states can only adopt rail safety rules in circumstances where there is no federal conflicting rule and all of the following conditions are also met:

- The regulation necessary to eliminate or reduce an essentially local safety or security hazard,
- The regulation is not incompatible with a law, regulation, or order of the United States Government; and
- The regulation does not unreasonably burden interstate commerce.

Federal and state courts have consistently preempted state statutes addressing rail infrastructure, train length, and blocked crossings – even in circumstances where the federal government has not implemented a conflicting regulation. In a number of cases, the courts have deferred to the federal government's broad authority over interstate commerce.

Bill modifies existing CPUC reporting on hazardous railroad sites. This bill requires the CPUC to evaluate the list of rail lines identified as local safety hazard sites (LSHSs) by the CPUC and determine the extent to which railroad operations, conditions and safety data warrant changes to this list. The CPUC annually reports the list of LSHSs to the Legislature as part of requirements developed in response to legislation and regulation regarding rail safety incidents that occurred in the 1990s. In 1991, two separate train derailments in California resulted in large toxic substance spills. A derailment near Dunsmuir, California led to thousands of gallons of pesticide components spilling into the Sacramento River. This spilled killed all fish and wildlife over a 40 mile stretch of the river. A separate derailment near Seacliff, California, also led to a release of toxic materials that necessitated evacuations, highway closures, and medical emergencies. Following these incidents, the Legislature directed the CPUC to identify local safety hazards on rail lines in California and adopt regulations addressing rail safety issues. In 1997, the CPUC finally adopted a decision (D. 97-09-045), which identified 19 LSHSs and established safety requirements for trains operating at these sites. The CPUC's rail

safety regulations were heavily litigated and courts determined that federal law preempted a number of the CPUC's train safety regulations.

Existing law requires the CPUC to annually report a list of LSHSs in the state and identify the number of derailment incidents that have occurred at LSHSs in the previous five years. Since the characteristics of LSHSs has not changed since the CPUC first developed LSHS criteria, the CPUC's reported list of these sites has not changed since 1997. The CPUC's data shows that certain LSHSs are associated with much higher derailment risks. A stretch of Union Pacific rail line near the Tehachapi Pass that serves a critical freight corridor through the Tehachapi Mountains and Mojave Desert is associated with a uniquely high number of derailments. Very few miles of this route's track are in California; however, the route has been associated with more than five percent of the state's derailments over the prior five years. While the CPUC's data shows that some LSHSs routes continue to warrant close tracking of safety concerns, the data also indicates that some routes that are not currently on the LSHS list have experienced more derailments in the past five years than many of those on the LSHS list. By requiring the CPUC to evaluate the LSHS list and determine whether updates are needed, this bill may help the state better identify those routes that currently pose the greatest local safety risk.

Prior/Related Legislation

SB 544 (Laird, Chapter 224, Statutes of 2025) allowed the CPUC to establish an expedited review and approval process for railroad crossing applications that are uncontested and do not need additional review or evidentiary hearings.

SB 757 (Archuleta, Chapter 411, Statutes of 2023) clarified licensing requirements for rail crew transportation providers, prohibits certain subcontracting for these services, and increased minimum insurance requirements for rail crew transportation operators.

SB 506 (Laird, Chapter 288, Statutes of 2023) required the CPUC to create a pilot project to test the use of color pavement markings at at-grade highway-railroad crossings, to the extent permitted by federal law.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, this bill will require additional administrative and analytical work of the CPUC, at least until it

completes its review of local safety hazard sites. Costs will likely be in the hundreds of thousands of dollars annually until that work is completed. For its part, the CPUC estimates these costs at approximately $568,000 annually (special fund): $272,000 for travel, training, and safety and testing equipment and $239,000 for a senior utilities engineer.

SUPPORT: (Verified 8/24/26)

California Professional Firefighters
California School Employees Association

OPPOSITION: (Verified 8/24/26)

None received

ARGUMENTS IN SUPPORT: In support, the California School Employees Association states:

> SB 667 will increase public safety and rail crew members' safety in California's heavy rail sector by requiring the Public Utilities Commission to evaluate a list of sites and determine whether changes in conditions, operations or safety data warrant the removal, modification or addition of any site. By ensuring that there is a regular assessment of safety for potentially hazardous sites, SB 667 would significantly enhance California's ability to detect potential equipment failures before they result in catastrophic incidents such as the East Palestine, Ohio disaster of 2023.

ASSEMBLY FLOOR: 78-0, 8/24/26 - See last page for vote

SUBJECT: Capital Programs and Climate Financing Authority Act: California Investment and Innovation Program

SOURCE: California Coalition for Community Investment

DIGEST: This bill authorizes a Small Business Assistance Fund (SBAF) established by the Capital Programs and Climate Financing Authority (CPCFA) to fund a grant program for community development financial assistance to the California Investment and Innovation Program (Cal IIP).

Assembly Amendments create a new bill.

ANALYSIS:

Existing law:

1) Establishes CPCFA which, among other things, may establish one or more SBAFs to undertake specified activities, including to fund a capital access program for small businesses. (Health and Safety Code Section 44548(a))

2) Permits CPCFA to provide financial assistance in specified forms, including interest rate subsidies, guarantees, and other forms of credit support. (Health and Safety Code Section 44548(b))

This bill:

1) Authorizes CPCFA to fund a grant program for community development financial institutions pursuant to the existing California Investment and Innovation Program.

2) Adds to the list of eligible financing assistance to include grants made to community development financial institutions in furtherance of the California Investment and Innovation Program (Cal IIP).

Background

CPCFA and small business financing. CPCFA administers financing programs intended to encourage capital investment and advance California's environmental, economic, and climate policy goals. Established in 1972 as the California Pollution Control Financing Authority, CPCFA initially focused on issuing tax-exempt bonds for private projects that reduced air and water pollution. Effective January 1, 2026, the authority was renamed the Capital Programs and Climate Financing Authority to reflect its expanded portfolio, which now includes programs supporting small businesses, community development, and climate-related investments. CPCFA's programs include its Tax-Exempt Private Activity Bond Program and the California Capital Access Program (CalCAP). CPCFA may use certain revenues generated through its financing activities to support small business assistance funds.

California Investment and Innovation Program. The Legislature established the California Investment and Innovation Program (Cal IIP) in 2022 through SB 193 (Committee on Budget and Fiscal Review, Chapter 68, Statutes of 2022) and provided a one-time $50 million General Fund appropriation. Cal IIP provides grants to federally certified community development financial institutions (CDFIs) to increase their capacity to provide technical assistance and access to capital in economically disadvantaged communities. CDFIs may use grant funds to support services and operations that further their community development missions and to strengthen their net assets, allowing them to leverage additional private and public investment. The program was originally authorized to award up to $15 million annually.

CPCFA has awarded approximately $39.2 million through the first three Cal IIP funding rounds. The program awarded approximately $14.2 million to 67 CDFIs for 2023–24, $15 million to 75 CDFIs for 2024–25, and $10 million to 73 CDFIs for 2025–26. As of June 30, 2026, approximately $24 million of those awards had been expended.

Existing law permits CPCFA to establish SBAFs and use those funds for specified financing activities, including CalCAP and other forms of small business assistance. SB 700 expands these authorized uses to expressly allow a SBAF to support grants to CDFIs through Cal IIP. The bill provides CPCFA with an additional mechanism to support Cal IIP using eligible revenues generated through its financing programs rather than relying exclusively on the program's original one-time General Fund capitalization.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations, the bill will result in cost pressures of an unknown amount, potentially in the millions of dollars, to appropriate additional money to CPCFA to support other SBAF-eligible programs, to the extent this bill results in the redirection of funds from those programs to provide Cal IIP grants. The Committee notes that the Author is requesting another one-time appropriation of $50 million in the 2026-27 state budget to renew funding for Cal IIP grants. The Budget Act of 2026 (AB 109 (Gabriel), Chapter 19, Statutes of 2026, and related budget amendments and trailer bills) does not include this appropriation. The bill will also result in likely absorbable costs to CPCFA to continue Cal IIP administration with SBAF funds.

ARGUMENTS IN SUPPORT: Supporters note that "As California families and businesses continue to face mounting pressures, from housing and childcare costs to increasing barriers to capital, CDFIs like PCV help address these challenges by providing flexible, responsible financing for small businesses, affordable housing, and community investments that create real opportunity.

Cal IIP has proven to be an effective investment in California communities by strengthening the capacity of CDFIs to deploy capital where it is needed most. The program has helped community lenders expand financing for businesses, housing, community facilities, and other projects that support economic development across the state.

As demand for affordable capital continues to grow, it is important that California maintain tools that help CDFIs meet community needs. SB 700 provides a practical solution to ensure continued support for Cal IIP and the communities that depend on CDFI financing."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Civil rights: deprivation of federal constitutional rights, privileges, and immunities

SOURCE: Inland Coalition for Immigrant Justice
Prosecutors Alliance Action
Protect Democracy United

DIGEST: This bill establishes, on an urgency basis, a cause of action for the violation of a person's constitutional rights by a government official, subject to specified immunities and defenses.

Assembly Amendments added findings and declarations regarding the Legislature's intent; removed venue provisions; clarified that the cause of action may be filed only against a natural person; clarified the availability of defenses; removed the discretionary award of expert fees to a prevailing plaintiff; prevent an action under the measure from being filed if there has already been a final judgment on the merits for a related claim; and added an urgency clause.

ANALYSIS:

Existing federal law:

1) Provides that the U.S. Constitution (Const.), and the Laws of the United States, are the supreme law of the land. (U.S. Const., art. VI, cl. 2.)

2) Provides that every person who, under color of any statute, ordinance, regulation, custom, or usage, of any State or Territory or the District of Columbia, subjects, or causes to be subjected, any citizen of the United States or other person within the jurisdiction thereof to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws, shall be liable to the party injured in an action at law, suit in equity, or other proper proceeding for redress, except as provided. (42 United States Code (U.S.C.) § 1983 ("Section 1983").)

3) Establishes the Federal Tort Claims Act (FTCA), which authorizes injured parties to bring certain tort suits against the United States, in the same manner and to the same extent as a private individual under like circumstances, except as provided. (28 U.S.C. §§ 1346, 2671 et seq.)

4) Provides that the above remedies are exclusive of any other civil action or proceeding for money damages by reason of the same subject matter against the employee whose act or omission gave rise to the claim or against the estate of such employee. Any other civil action or proceeding for money damages arising out of or relating to the same subject matter against the employee or the employee's estate is precluded without regard to when the act or omission occurred. (28 U.S.C. § 2679 ("Westfall Act").)

Existing state law establishes the Tom Bane Civil Rights Act (Tom Bane Act), which provides that if a person, whether or not acting under color of law, interferes by threat, intimidation, or coercion, or attempts to so interfere, with the exercise or enjoyment of rights secured by the Constitution or laws of the United States, or of the rights secured by the Constitution or laws of this state, the Attorney General, or any district attorney or city attorney, or the person whose exercise or enjoyment of

rights was interfered with, or attempted to be interfered with, may institute a civil action for damages. (Civil (Civ.) Code § 52.1.)

This bill:

1) Makes findings and declarations regarding the Legislature's intent regarding the cause of action established by this measure, including the following:

   a) This measure does not provide for any substantive rights, but is intended only to ensure that an individual has a cause of action for violations of the United States Constitution.

   b) The defense of absolute or qualified immunity, as added by this measure, for any defendant, is identical to the defense available to a person sued under Section 1983 under like circumstances, and the defense should reflect future developments to Section 1983 defenses so that the defenses remain identical; but nothing is intended to alter or amend current statutory or decisional law regarding the application of qualified or absolute immunity to any other provision of California law.

   c) Nothing in this measure is intended to alter or amend current statutory or decisional law regarding the Tom Bane Act.

   d) A violation of the United States Constitution is an essential element of any action brought under this measure, and therefore necessarily present questions of federal constitutional law, and nothing in the measure should be construed to limit, constrain, or weigh against the exercise of any right of removal that currently exists under federal law.

2) Establishes the No Kings Act.

3) Provides that every natural person who, under color of any law, statute, ordinance, regulation, custom, or usage, subjects, or causes to be subjected, any citizen of this state or any person within the jurisdiction thereof to the deprivation of any rights, privileges, or immunities secured by the United States Constitution, shall be liable to the party injured in an action at law, suit in equity, or other proper proceeding for redress, except as provided.

4) Provides that "color of any law, statute, ordinance, regulation, custom, or usage" includes color of any statute, ordinance, regulation, custom, or usage, of the United States and of any state or territory or the District of Columbia, and that a "natural person" does not include a federal, state, or local official who is sued in their capacity for monetary relief.

5) Provides that a defendant in an action brought under 3) may assert, and shall receive the benefit of, a defense of absolute or qualified immunity only to the same extent as a person sued under Section 1983.

   a) The measure shall not be construed to make an absolute or qualified immunity defense broader or narrower than that defense would be if asserted under like circumstances in a Section 1983 action.

   b) These provisions apply only to proceedings brought pursuant to 3) and do not later, amend, create, or support a qualified or absolute immunity defense, or any rule or decision governing such a defense, in any other action or proceeding brought under any other provision of California law.

6) Provides that nothing in the measure shall be construed to waive or abrogate any defense of sovereign immunity otherwise available to a party; this provision applies only to proceedings brought under 3) and does not alter, amend, create, or support a sovereign immunity defense in any other action or proceeding brought under any other provision of California law.

7) Applies retroactively to March 1, 2025, provided that, for any claim for a violation of the United States Constitution that occurred between March 1, 2025, and the effective date of this law, the only monetary damages that shall be available pursuant hereto for that constitutional violation are nominal and compensatory damages; except that an action may not be brought under 3) if, before the effective date of the measure, a court of competent jurisdiction entered a final judgment on the merits determining whether the conduct in question deprived the injured party of rights secured by the United States Constitution, as specified.

8) Includes a severability clause.

9) Includes an urgency clause.

Background

Under federal law, specifically Section 1983, a cause of action is provided to those whose rights are violated under color of law. However, this does not afford a cause of action where the defendants are federal officials. Historically, plaintiffs have relied on a court-made doctrine to bring such actions, however courts have recently been increasingly resistant to inferring a right of action against federal defendants. Additionally, existing statutory paths to seeking remedies, at both the state and federal levels, are onerous and provided only limited relief.

This bill establishes the "No Kings Act." It creates a state level analogue of Section 1983, allowing for a cause of action against governmental officials when their constitutional rights have been violated. It does not bestow individuals with any additional substantive rights—instead, it establishes a more explicit cause of action to vindicate their constitutional rights. This bill imports the same immunities currently afforded governmental defendants under existing law. Given the recent incidents in which federal officials are alleged to have unlawfully intruded on Californians' rights, this bill applies retroactively to March 1, 2025, as provided, except where a court has already entered a final judgment on the merits on the plaintiff's claim, as specified.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Assembly Appropriations Committee:

1) Cost pressures (Trial Court Trust Fund, General Fund) to the trial courts to adjudicate a new category of civil action. Because the bill creates a new cause of action and authorizes recovery of attorney's fees, costs, and expert fees, it may prompt filings that would not otherwise be brought and produce lengthier, more complex proceedings. It generally costs approximately $1,000 to operate a courtroom for one hour. Although courts are not funded on the basis of workload, increased pressure on the Trial Court Trust Fund may create a demand for increased funding for courts from the General Fund. The state budget provides annual General Fund backfills to the Trial Court Trust Fund to offset revenue reductions, totaling approximately $117.3 million in 2025-26.

2) Costs of an unknown but potentially significant amount for litigation defense exposure (General Fund, special funds, local funds) to state and local officials newly subject to suit under this cause of action, plus possible increases in liability insurance costs. Because 42 U.S.C. Section 1983 and the Bane Act already permit constitutional-tort actions against state and local actors, this exposure may be limited in practice, but the additional state pathway could increase filings, motion practice, and defense costs.

3) Costs of an unknown but potentially significant amount for litigation defense costs (General Fund) to the Department of Justice. To the extent the statute is challenged in court, any costs to defend its constitutionality would be borne by the Department of Justice

ARGUMENTS IN SUPPORT: The sponsors of this bill, Protect Democracy United, the Inland Coalition for Immigrant Justice, and Prosecutors Alliance Action argue:

> SB 747 is necessary to correct an imbalance in how federal, state, and local officials are held accountable to the Constitution. While a federal law, 42 U.S.C. § 1983, allows people to sue state and local officials for constitutional violations, no equivalent federal law exists for suing federal officials. Instead, people injured by federal officials have historically relied on a "*Bivens* action"—a limited, implied right to sue directly under the Constitution.

Making matters worse, the Supreme Court has sharply curtailed the availability of Bivens actions in recent years. And as *Bivens* has been narrowed, a dangerous gap has emerged: federal officers often have *de facto* immunity and cannot be sued for damages, even for willful violations of constitutional rights. This disparity—where federal officers operate without the same accountability as state and local actors—violates the longstanding and foundational legal principle that "every right, when withheld, must have a remedy, and every injury its proper redress." *Marbury v. Madison*, 5 U.S. (1 Cranch) 137, 147 (1803).

Senate Bill 747 closes that accountability gap. By providing for a clear statutory pathway to sue any official—federal, state, or local—who violates the Constitution, it affirms that the United States Constitution (and not the whims of any governmental official) is the supreme law of the United States. Most

importantly, by providing for a universal remedy for violations of the United States Constitution, SB 747 will ensure that Californians can exercise their constitutional rights knowing they are enforceable rights, not just hollow promises.

ARGUMENTS IN OPPOSITION: According to the California State Sheriffs' Association:

Existing state law already protects against and provides meaningful avenues to address alleged civil rights violations. The Tom Bane Civil Rights Act allows a civil action to be brought if a person interferes, by threats, intimidation, or coercion, with the exercise or enjoyment of a person's rights secured by federal or state Constitutions or laws. However, in attempting to fill a perceived deficiency in federal law, SB 747 creates a new state law cause of action that is not limited in scope to actions taken by federal agents and excludes the important safeguard contained in existing state law that the alleged violation of rights occurs through threat, intimidation, or coercion. This opens the door for state-level accusations of civil rights violations by California officers based on disputes that fail to include any specific intent to harm. Society asks peace officers to make split-second decisions on matters of life and liberty, a fact that must be recognized when considering a measure that will promote second-guessing of a public employee's actions made in good faith.

While the measure attempts to define the types of immunity claims that may be asserted in actions authorized by the bill, the fact remains that SB 747 opens the door to lawsuits that today generally do not meet the longstanding thresholds for these types of serious allegations to be filed under state law. Also, given the history of qualified immunity jurisprudence, it is unclear whether the bill's language will be sufficient to convey the immunity it purports to grant to peace officers.

ASSEMBLY FLOOR: 78-0, 8/25/26 - See last page for vote

SUBJECT: Public health: nitrous oxide

SOURCE: League of California Cities; California Narcotics Officers' Association

DIGEST: This bill prohibits a tobacco retailer, as defined, from selling nitrous oxide at a retail location.

Assembly Amendments specify that "a retailer" does include a convenience store and authorizes local governments to adopt an ordinance imposing greater restrictions on the retail sale of nitrous oxide than those imposed by the provisions of this bill provided that the ordinance does not restrict legitimate uses, including,

but not limited to, medical, dentistry, food preparation, industrial, manufacturing, and automotive services.

ANALYSIS:

Existing law:

1) Makes it a misdemeanor to sell, furnish, administer, distribute, give away, or offer to sell, furnish, administer, distribute, or give away a device, canister, tank, or receptacle containing nitrous oxide to a person under 18 years of age. (Penal (Pen.) Code, § 381c.)

2) Makes it a misdemeanor to dispense or distribute nitrous oxide to a person if the dispenser or distributor of the nitrous oxide knows or should know that the person is going to use the nitrous oxide for the purpose of intoxication, and that person proximately causes great bodily injury or death to himself, herself, or another person. (Pen. Code, § 381d.)

3) Requires that a person who dispenses or distributes nitrous oxide record each transaction in a written or electronic document. (Pen. Code, § 381e.)

4) Provides that the person dispensing or distributing the nitrous oxide require the purchaser to sign the document recording the transaction, provide a complete residential address, and present valid government-issued photo identification. Existing law also requires that the person dispensing or distributing the nitrous oxide sign and date the document and retain the document at the person's business address for one year from the date of the transaction for inspection. (Pen. Code, § 381e.)

5) Requires that the document signed by the purchaser include all of the following:

    a) That inhalation of nitrous oxide outside of a clinical setting may have dangerous health effects.
    b) That it is a violation of state law to possess nitrous oxide with the intent to breathe, inhale, or ingest it for the purpose of intoxication.
    c) That it is a violation of state law to knowingly distribute or dispense nitrous oxide to a person who intends to breathe, inhale, or ingest it for the purpose of intoxication.
    d) (Pen. Code, § 381e.)

6) Defines “retailer,” for purposes of the Cigarette and Tobacco Products Licensing Act of 2003, as a person who engages in this state in the sale of cigarettes or tobacco products directly to the public from a retail location. Provides that retailer includes a person who operates vending machines from which cigarettes or tobacco products are sold in this state. (Business and Professions (Bus. & Prof.) Code, § 29971, subd. (r).)

7) Defines “retail location” as both of the following: any building from which cigarettes or tobacco products are sold at retail; and vending machine. (Bus. & Prof. Code, § 29971, subd. (s).)

8) Defines “grocery department” to mean an area within a general retail merchandise store which is engaged primarily in the retail sale of packaged food, rather than food prepared for immediate consumption on or off the premises. (Civil (Civ.) Code, § 7100, subd. (c)(3).)

9) Defines “grocery store” to mean a store engaged primarily in the retail sale of packaged food, rather than food prepared for consumption on the premises. (Civ. Code, § 7100, subd. (c)(4).)

This bill:

1) Prohibits a retailer of tobacco products from selling nitrous oxide at a retail location.

2) Specifies that a retailer does not include a grocery store or a general retail merchandise store with a grocery department, as defined.

Background

Nitrous oxide is a colorless, odorless to sweet-smelling gas used to manage pain and anxiety in dentistry as well as other clinical settings. (American Dental Association, Nitrous Oxide <https://www.ada.org/resources/ada-library/oral-health-topics/nitrous-oxide .) In addition, it is used in food preparation and as an oxidizer in model rockets and motor vehicle racing.

Nitrous oxide is also misused as a recreational drug and produces short-lived euphoric and hallucinogenic effects. It is consumed in the form of whippets—balloons filled with the gas via small, pressurized canisters designed to be used in whipped cream dispensers. Nitrous oxide has become increasingly popular,

particularly among teens and young adults, due to its low cost and availability online and in grocery and convenience stores, gas stations, and shops that sell vapes and other tobacco-related products. (Centers for Disease and Control, *Notes from the Field: Recreational Nitrous Oxide Misuse—Michigan, 2019-2023* (Apr. 10, 2025) <https://www.cdc.gov/mmwr/volumes/74/wr/mm7412a3.htm .) Short-term side effects include slurred speech, dizziness, and headaches. (American Addiction Centers, *Nitrous Oxide (Whippet) Abuse, Side Effects, & Treatment* (Dec. 31. 2024) <https://americanaddictioncenters.org/inhalant-abuse/nitrous-oxide-whippets .) Although nitrous oxide use is often perceived by those using it as safe or harmless, repeated use can cause severe neurologic, cardiovascular, and psychiatric effects, including hallucinations, delusions, organ damage, nerve damage, seizures, coma, and death. (*Id*.)

This bill prohibits a retailer of tobacco products from selling nitrous oxide at a retail location, and specifies that "retailer" does not include a grocery store or grocery department but does include a convenience store.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

The California Department of Tax and Fee Administration (CDTFA) estimates costs of $159,000 in 2026-27 and $2,000 in 2027-28 and ongoing for implementation activities, including providing notifications, answering taxpayer inquiries, issuing and processing misdemeanor citations, and license suspensions or revocations after convictions, and handling appeals. (Cigarette and Tobacco Products Compliance Fund). CDTFA states it cannot estimate effects on revenues from lost license fees, court-ordered fines, or losses in sales and use taxes.

SUBJECT: The Golden State Infrastructure Corporation Act

SOURCE: California State Treasurer Fiona Ma

DIGEST: This bill establishes the Golden State Infrastructure Corporation (Corporation) within the State Treasurer's Office as a not-for-profit corporation for the purpose of financing infrastructure projects.

Assembly Amendments add coauthors, update definitions, require the Board to submit a report evaluating equitable access of all public agencies to financing from the Corporation, specify that projects financed by the Corporation are public works for which prevailing wages must be paid, limits funding extended by the Corporation to one-third of the total cost of the infrastructure project, and provides that for two years, at least 15 percent of all General Fund moneys in the Corporation Fund must be reserved for providing financing for infrastructure projects to priority governmental entities.

ANALYSIS:

Existing law:

1) Establishes the Governor's Office of Business and Economic Development (GO-Biz) within the Governor's Office for the purpose of serving as the lead state entity for economic strategy and marketing of California on issues relating to business development, private sector investment and economic growth. (Government Code (GC) §§ 12096 – 12098.5)

2) Establishes the Bergeson-Peace Infrastructure and Economic Development Bank Act and creates the California Infrastructure and Economic Development Bank (IBank). (GC § 63000 *et seq*.)

3) Establishes the GO-Biz as the administrator of the Fund. (GC § 63021)

4) Authorizes IBank to make loans, issue bonds, and provide other economic development assistance, among other things. (GC § 63050 *et seq*.)

This bill:

1) Establishes the (Corporation) within the State Treasurer's Office as a not-for-profit corporation for the purpose of financing infrastructure projects, governed by a Board of Directors (Board) comprised of various state officials or their designees and Governor's appointees with experience financing real property improvements and experience designing, developing, or constructing real property improvements. Subjects the corporation officers to the Political Reform Act of 1974. Requires the Treasurer to appoint an executive director and vests them with various powers. Authorizes the Board Chair to appoint a general counsel, a chief financial officer, and a chief operating officer. Grants

the Corporation various powers related to operations, including but not limited to making loans and borrowing money or issuing bonds and using the proceeds to finance infrastructure projects.

2) Absolves the state from being liable for any Corporation obligations and specifies that the Corporation is not required to pay taxes, other than those specified, with respect to any real or personal property the Corporation acquires or upon any Corporation income.

3) Tasks the Corporation executive director with creating a website that includes, at a minimum, a description of the past, present, and planned future activities of the Corporation, Corporation operational policies and agendas, meeting minutes, Board resolutions for the prior 12 months, and audited financial statements for the previous fiscal year. Requires the Corporation to submit a report on its activities to the Governor, the Legislature, and the Legislative Analyst's Office that is also posted on its website. Requires the Board to adopt Corporation operational policies.

4) Specifies that the Board, can meet in closed session to consider whether to approve or modify a financing in connection with an infrastructure company for an infrastructure project or to discuss the performance of any financing and requires the Board chair to announce in general terms the type, amount, and identity of the recipient of any financing to an infrastructure company for an infrastructure project approved during the closed session. Finds that in order to maintain the confidentiality of infrastructure companies' private financial information, it is necessary to exempt these records from public disclosure and to allow consideration of investments with private companies in a closed board session. Treats the Corporation as a public agency for purposes of bringing an action in Superior Court.

5) Authorizes the Corporation to extend financing to either an infrastructure company, a governmental entity, or a combination thereof, upon the affirmative vote of at least a quorum of the board. If a financing is approved by the Board, the Corporation may extend financing to the infrastructure company, or the governmental entity, or both, as applicable, from any source of available funds as determined by the executive director, including, but not limited to, the proceeds of any revenue bonds issued by the Corporation. Authorizes the Corporation to issue its revenue bonds to provide moneys for the Corporation's purposes, which may include, but shall not be limited to, providing financing to one or more governmental entities or infrastructure companies for one or more infrastructure projects. Authorizes the corporation to, out of any funds

available, purchase its bonds. Specifies that the issuance of bonds pursuant to this law does not directly or indirectly or contingently obligate the state or any political subdivision of the state to levy or to pledge any form of taxation or to make any appropriation for their payment.

6) Establishes a Golden State Infrastructure Corporation Fund (Corporation Fund) and specifies that all moneys in the Corporation Fund are continuously appropriated.

7) Requires the Board to submit a report to the Governor, the Legislature, and the Legislative Analyst's Office, and post on its website, evaluating the equitable access of all public agencies to financing from the infrastructure corporation fund. Specifies factors of the public agencies for purposes of this report and requires the report to include findings and recommendations to ensure equitable access to the infrastructure corporation fund across public agencies and local agencies of varying economic conditions, including, but not limited to, recommendations for changes in state law and to the Corporation's assessment policies, procedures, and outreach practices.

8) Specifies that projects financed by the Corporation are public works for which prevailing wages must be paid and that as a condition of receiving financing for a project from the Corporation, the project developer (unless the project is covered by a project labor agreement) must obtain an enforceable commitment from any entity undertaking construction, demolition, alteration, installation, repair, or maintenance work that the entity, and its contractors and subcontractors at every tier, will use a skilled and trained workforce to perform all work within an apprenticeable occupation in the building and construction trades. Clarifies that any reference to a "public entity" includes both a governmental entity and an infrastructure company.

9) Limits funding extended by the Corporation to one-third of the total cost of the infrastructure project, and provides that for two years, at least 15 percent of all General Fund moneys in the Corporation Fund must be reserved for providing financing for infrastructure projects to priority governmental entities

10) Makes various findings and declarations that improvements and additions to the existing infrastructure landscape are vital to supporting the growth of the California economy, businesses and governments depend on a well-conceived and functioning system of public improvements, the current pace of infrastructure development and construction in California is not sufficient to meet the needs of California's population and economy, it is a public policy necessity to support the expansion and enhancement of infrastructure,

California needs to create an entity structured with broad authority to provide financing, and to participate in the financial markets, to fund the development and improvement projects of key infrastructure projects, and that the public policies and responsibilities of California, cannot be fully obtained without the creation of the Golden State Infrastructure Corporation.

Background

GO-Biz. In February 2010, the Little Hoover Commission undertook a review of the state's economic and workforce development programs. In its final report, *Making up for Lost Ground: Creating a Governor's Office of Economic Development*, it analyzed the status and effectiveness of current programs since the 2003 demise of the Technology, Trade and Commerce Agency (TTCA) and recommended the creation of a new governmental entity to fill the void left by the dismantled agency.

The report called for a single entity that would promote greater economic development, foster job creation, serve as a policy advisor and deliver specific services (i.e., permitting, tax, regulatory, and other information) directly to the California business community. In April 2010, Governor Schwarzenegger issued Executive Order S-05-10 as a means to operationalize the report recommendations including the creation of the Governor's Office of Economic Development (GOED).

In October 2011, the Governor signed AB 29 (John A. Pérez, Chapter 475, Statutes of 2011), which effectively codified GOED and changed its name to GO-Biz. Since its inception, the office has served thousands of businesses, 95 percent of which are small businesses. The most frequent types of assistance include help with permit streamlining, starting a business, relocation and expansion of businesses, and regulatory challenges.

In March 2012, Governor Brown initiated a reorganization process to realign the state's administrative structure. Key changes include dismantling of the Business, Transportation and Housing Agency and the shifting of a number of key programs to GO-Biz including the Small Business Loan Guarantee Program, the California Travel and Tourism Commission, the California Film Commission, the Film California First Program, and the Infrastructure and Economic Development Bank (IBank). Currently, GO-Biz administers the following programs and units:

- Made In California program for the purpose of encouraging consumer product awareness and to foster the purchases of products manufactured in California.

- The California Inclusive Innovation Hub Program (iHub2) to incubate and/or accelerate technology and science-based firms, with a focus on underserved regions and communities.

- The California Competes Tax Credit Program under which "businesses who want to come to California or stay and grow in California" can receive an income tax credit.

- The California Business Investment Services Unit, which provides no-fee, tailored site selection services to employers and others who may be considering California for relocation or expansion.

- The California Business Portal, which provides information to California businesses about common questions, permitting, financial options, and more.

- The California Community Reinvestment Grants Program, which was included in Proposition 64, authorized GO-Biz to award grants to local health departments and certain nonprofit organizations to support communities disproportionately affected by the War on Drugs.

- Office of the Small Business Advocate which provides information and assistance to small businesses.

- The Zero Emission Vehicles (ZEV) Infrastructure Unit which works to accelerate the deployment of ZEV infrastructure.

- The International Affairs and Business Development Unit, which serves as California's primary point of contact for expanding international trade and investment relations. This unit focuses on foreign direct investment (services for foreign investors, foreign investment technical assistance, and the EB-5 Investor Visa Program), international trade promotion (STEP program, trade missions, export assistance, and the California-China Trade Office), and international agreements.

IBank and Infrastructure Loans. According to its website, IBank exists within GO-Biz and "was created in 1994 to finance public infrastructure and private development that promote a healthy climate for jobs, contribute to a strong

economy and improve the quality of life in California communities. IBank has broad authority to issue tax-exempt and taxable revenue bonds, provide financing to public agencies, provide credit enhancements, acquire or lease facilities, and leverage State and Federal funds. IBank's current programs include the Infrastructure State Revolving Fund (ISRF) Loan Program, California Lending for Energy and Environmental Needs (CLEEN) Center, the Climate Catalyst Revolving Loan fund, Small Business Finance Center and the Bond Financing Program."

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations, this bill will result in one-time costs of an unknown, but likely significant amount, ranging from the tens of millions to hundreds of millions of dollars, presumably General Fund, for the Fund's initial capital base to support investments and ongoing General Fund costs of approximately $1.1 million for the State Treasurer's Office to hire five additional permanent staff and support associated operating expenses and equipment to establish the Corporation.

OPPOSITION: (Verified 8/26/26)

None received for this version of the bill.

ARGUMENTS IN SUPPORT: California State Treasurer Fiona Ma writes that "Our bridges, transit systems, energy grids, and water infrastructure are aging, overburdened, and in some cases, dangerously out of date…California is preparing to host some of the world's most high-profile events in the coming years, including the 2026 World Cup, the 2028 Olympic and Paralympic Games, and multiple Super Bowls. These events will draw millions of visitors and global attention – but we do not currently have the infrastructure to support them at the scale required. If we want to showcase California at its best and ensure these events benefit our communities, we must begin investing now."

Suppoerts say this bill provides essential financial tools that will directly lead to substantial cost savings and accelerate vital infrastructure projects, ultimately benefiting local communities and the state's broader economy. According to supporters, California cannot afford to wait while critical infrastructure needs go unmet. Establishing the Golden State Infrastructure Corporation is a necessary step toward building resilient, locally controlled resources that maximize California's funding mechanisms to support projects across the state.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Infill Infrastructure Grant Program of 2019: applications: eligibility

SOURCE: Author

DIGEST: This bill makes a number of revisions to the Infill Infrastructure Grant (IIG) Program.

Assembly Amendments make updates to IIG to facilitate developments in areas eligible for streamlined, ministerial approval; authorize natural infrastructure solutions to be funded, as specified; expand the definition of "walkability"; and, make other clarifying changes.

ANALYSIS:

Existing law:

1) Establishes the IIG at the Department of Housing and Community Development (HCD).

2) Streamlines the approval process for certain housing developments along commercial corridors and in commercial zones, as specified, pursuant to AB 2011 (Wicks, Chapter 647, Statutes of 2022).

3) Streamlines the approval for certain infill housing developments, pursuant to SB 35 (Wiener, Chapter 366, Statues of 2017).

This bill:

1) Changes the definition of "qualifying infill project" areas for the purposes of the IIG program to include parcels that are adjacent to parcels that have previously been developed in addition to ones with existing development.

2) Adds to the list of priorities that HCD considers in ranking applicants for IIG funding for both "qualifying infill area" and "catalytic qualifying infill area" to include:
   a) Walkability to essential services or businesses; and
   b) On-demand transit services that provide or support new, restored, or expanded routes.

3) Adds to the definition of "qualifying infill area" a capital improvement project for which funding is requested is necessary and integral to make and are suitable for development under AB 2011 (Wicks, Chapter 647, Statutes of 20220.

4) Expands the areas where a "qualifying infill project," "qualifying infill area," or "catalytic qualifying infill area" can qualify for funding to include sites that are eligible for AB 2011 (Wicks, Chapter 647, Statutes of 2022) or SB 35 (Wiener, Chapter 366, Statues of 2017).

5) Changes the definition of capital improvement projects that may be funded under the IIG as follows:

a) Replaces "streets and roads" as a use to streets or roads that are publicly maintained and open to the use of the public for purposes of vehicular travel and that will serve as a connector within a qualifying infill project or qualifying infill area; and
b) Add the use of funds for "nature infrastructure solutions" that reduce the risk of climate change-driven natural disasters like wildfire, flooding, heat, and sea-level rise, or provide other social benefits.

6) Allows a city, county, or city and county to apply for a "qualified infill area" or a "catalyst qualifying infill area" without having a developer as a co-applicant.

7) Adds a definition of a "major transit stop" that includes existing and planned stops in the regional transportation plan.

8) Changes the definition of an "urbanized area" to an urbanized area as defined by the United States Census Bureau rather than for sites in unincorporated areas that the site is within a designated urban service area that is designated in the local general plan for urban development and is served by the public sewer and water.

9) Adds a definition of "walkability" to mean the parcels or parcel where the development will occur is within one mile of six or more of any of the following amenities:
a) A supermarket or grocery store;
b) A public park;
c) A community center;
d) A pharmacy or drugstore;
e) A medical clinic or hospital;
f) A public library; or
g) A school that maintains a kindergarten or any of grades one to 12, inclusive;
h) Food bank;
i) A licensed childcare facility as identified by the State Department of Social Services;
j) A community or recreation center accessible to the general public;
k) A bank or credit union;
l) A post office; and
m) A laundry service.

10) Adds a definition of "on-demand transit service" to include shuttles, vans, circulators, paratransit services, and private sector transit solutions commonly

referred to as microunits that are operated or contracted by a public entity. Requires the transit service to serve the general public and be demand responsible and capable of serving multiple riders simultaneously not only a single rider service. Defined "demand responsive" to mean a route or frequency of service is dispatched in real time based on customer demand.

Background

IIG. The original IIG program, now commonly known as IIG of 2007, was established pursuant to Proposition 6, the Housing and Emergency Shelter Trust Fund Act of 2006; it received additional funds through Proposition 1, the Veterans and Affordable Housing Bond Act of 2018. In 2019, the Legislature allocated $500 million General Fund moneys to IIG and updated the program; the new version of the program is commonly known as IIG of 2019.

IIG of 2019 promotes infill housing development by providing financial assistance for capital improvement projects that are an integral part of, or necessary to facilitate the development of, affordable and mixed-income housing. Under IIG of 2019, grants are available in the form of gap funding for infrastructure, factory-built housing components, and adaptive reuse necessary for specific residential or mixed-use infill developments. Eligible costs include, but are not limited to, the creation, development, or rehabilitation of parks or open space; water, sewer, or other utility service improvements (including internet and electric vehicle infrastructure); streets; roads; transit station structured parking; transit linkages or facilities; facilities that support pedestrian or bicycle transit; traffic mitigation, sidewalk, or streetscape improvements; factory-built housing components; adaptive reuse; and site preparation or demolition.

Comments

Author statement. "Many former commercial and underutilized areas have significant potential for the development of housing at scale, but lack the public infrastructure necessary to support higher-density residential development. The Bridge District is a perfect example of smart growth. It is a waterfront urban mixed-use development located along the western side of the Sacramento River. A former industrial area, it is now a vibrant community easily accessible to downtown Sacramento via the Tower Bridge, with the potential to eventually support 5,210 new homes and 7,290,000 square feet of commercial development. The Bridge District required vision and state and local investments. Reforms to the IIG Program have the potential to catalyze investment in underutilized lands, such as vacant shopping centers or strip malls, to support the development of

housing with infrastructure that has been upgraded to accommodate growth. Aiding local governments to transform cities into denser, more livable communities will also mitigate against the impacts of climate change. The bill would also authorize the IIG Program to fund green infrastructure improvements, such as landscape features that can help mitigate flooding risks."

Updating IIG of 2019. Supporters of this bill note that IIG of 2019 is a key tool in helping to address infrastructure challenges – such as upgrades to water, sewer, and transit access – that make it harder to build multifamily housing. They also note that since this program has not been significantly updated since it was established, and precludes some housing developments from accessing funds from IIG in areas that are walkable to specified services and retail centers.

Limited program funding. HCD released the Multifamily Finance Super NOFA (Notice of Funding Availability) on February 13th, announcing the availability of $382 million through Multifamily Housing Program (MHP), Joe Serna Jr. Farmworker Housing Grant Program, IIG of 2007, IIG of 2019, and the Veterans Housing and Homelessness Prevention Program.[1] Of this total, $20 million is provided for IIG of 2007 and IIG of 2019 – the total amount of remaining funds in these programs. This bill would apply to any future funds that are appropriated to IIG. SB 417 (Limon/Rivas, Chapter 16, Statutes of 2026) enacts the Veterans and Affordable Housing Bond Act of 2026, which, if adopted by the voters in the statewide election November 2, 2026, would authorize $11.25 billion in general obligation bonds to fund specified housing programs, including $500 million for IIG of 2019.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations:

- Ongoing General Fund cost pressures to provide funding to the IIG Program to accommodate the expanded allowable projects under the bill. The IIG Program is oversubscribed and the 2026 budget act does not provide an allocation for additional grants. SB 417 (Limon), Chapter 16, Statutes of 2026, the Veterans and Affordable Housing Bond Act of 2026, which includes $500 million for the IIG Program is a potential funding source, should it pass at the November 3, 2026 statewide general election.

[1] *Multifamily Finance SuperNOFA Program 2025 Notice of Funding Availability.* (HCD, February 13, 2025). Accessible here**:** https://www.hcd.ca.gov/sites/default/files/docs/grants-and-funding/supernofa/2025-mfsn-round-3-nofa.pdf

- HCD estimates minor and absorbable costs to make minor modifications to the IIG Program guidelines, application materials, and application review tools. Because program guidelines are generally updated with every funding round, HCD indicates the workload created by this bill can be absorbed by current staffing levels.

ASSEMBLY FLOOR: 78-0, 8/26/26 - See last page for vote

SUBJECT: Housing finance and development: Sacramento Regional Housing and Homelessness Joint Powers Authority Act

SOURCE: Author

DIGEST: This bill enacts the Sacramento Regional Housing and Homelessness Joint Powers Authority Act, which requires the County of Sacramento and five cities to form a joint powers authority to cover housing and homelessness.

Assembly Amendments deleted the contents of the bill and inserted the current provisions.

ANALYSIS:

Existing law:

1) Authorizes, under the Joint Exercise of Powers Act, two or more public agencies to use their powers in common if they sign a joint powers agreement. Such an agreement may create a new, separate government called a joint powers agency or joint powers authority (JPA). Agencies that may exercise joint powers include federal agencies, state departments, counties, cities, special districts, school districts, federally recognized Indian tribes, and even other JPAs.

2) Authorizes public agencies to use the JPA law and the related Marks-Roos Local Bond Pooling Act to form bond pools to finance public works, working

capital, insurance needs, and other public benefit projects. Bond pooling saves money on interest rates and finance charges, and allows smaller local agencies to enter the bond market. Because a JPA is an entity separate from its members, bonds issued by JPAs do not have to be approved by voters.

This bill:

1) Enacts the Sacramento Regional Housing and Homelessness Joint Powers Authority Act, which requires, by January 1, 2028, the County of Sacramento and the Cities of Sacramento, Elk Grove, Rancho Cordova, Citrus Heights, and Folsom to participate in and work together to establish a JPA designed to make a meaningful difference from people experiencing housing insecurity and homelessness.

2) Requires the above local agencies to do all the following to satisfy the above requirement:

   a) Bring elected officials from across the region together through the JPA that provides program and policy guidance and establishes shared goals to improve the efficacy of the region's homeless response system and affordable housing resources;

   b) Bring the oversight and functions of the Sacramento City and County Continuum of Care under the jurisdiction of the joint powers authority, while maintaining the federally required composition and integrity of the continuum of care; and

   c) Work collaboratively with Sacramento Housing and Redevelopment Authority (SHRA) to develop goals and action plans that address homelessness, affordable housing, and advance a true housing continuum regionally.

3) Requires the JPA to do all the following:

   a) Set system performance goals and, at a minimum, regularly review state and federal performance metrics to address housing and homelessness;

   b) Collaborate to update the regionally coordinated homelessness action plan as necessary and oversee implementation of the plan;

   c) Coordinate on delivery of prevention, outreach, shelter, and housing programs, with local jurisdictions retaining oversight, accountability, and

control over land use decisions and programs administered by the local jurisdictions;

d) Explore better integration with other systems working in homelessness and housing, including county-administered behavioral health, child and adult welfare, and social safety net services;

e) Align regional funding for housing and homelessness, with local jurisdictions retaining final control and approval over local, state, and federal funds eligible to be administered by local jurisdictions;

f) Comply with state laws regarding local agency meetings;

g) Provide direction to the continuum of care lead agency;

h) Provide oversight over continuum of care functions, including the Homeless Management Information System, the Coordinated Access System, and the Point-in-Time Count;

i) Develop a committee structure to ensure community voice continues to be incorporated;

j) Include the County of Sacramento, the Cities of Sacramento, Elk Grove, Rancho Cordova, Citrus Heights, and Folsom;

k) Be developed as a formal, robust joint powers authority;

l) Have a board that consists solely of the elected officials representing the County of Sacramento, the Cities of Sacramento, Elk Grove, Rancho Cordova, Citrus Heights, and Folsom;

m) Target both housing and homelessness;

n) Incorporate meaningful resources to provide services;

o) Have a governance structure that includes the lead entities, respectively, from both the Continuum of Care and the Sacramento Housing and Redevelopment Agency; and

p) Hold monthly public meetings and incorporate public participation.

4) Provides that local jurisdictions must retain oversight and accountability over funding decisions, projects and programs they administer, including contracting for prevention, outreach, sheltering, and housing.

Background

Sacramento Steps Forward (SSF) is the lead agency for the Sacramento Continuum of Care (CoC), and a non-profit organization formed to facilitate the provision of homeless services and housing in the Sacramento Region. In 2026, SSF estimates roughly 7,458 individuals experience homelessness every night in Sacramento County, 56.4% of which remain unsheltered.

In 1973, the County of Sacramento and the City of Sacramento formed a JPA called the Sacramento Housing and Redevelopment Authority (SHRA) to address housing issues in the region. The City and County originally formed SHRA to combine the Housing Authorities for both the city and county and became the redevelopment agency for the city and county before redevelopment agencies were dissolved. It serves as the successor agency to the redevelopment agency and is responsible for winding down the activities of redevelopment, including paying down any obligations of the redevelopment agency. SHRA owns and manages thousands of residential units in the county, develops new housing, and administers federal housing choice vouchers. SHRA has a seat on Sacramento's CoC.

The 2022-2023 Sacramento County Grand Jury (SCGJ) released a report investigating the strategies, programs, and working relationships between the county and the seven incorporated cities (Citrus Heights, Elk Grove, Folsom, Galt, Isleton, Rancho Cordova, and Sacramento). One of the recommendations by the SCGJ was that the County and the seven incorporated cities should implement a JPA to address homelessness by December 1, 2023.

In beginning of June 2026, the County of Sacramento and the Cities of Sacramento, Elk Grove, Folsom, Citrus Heights, Rancho Cordova, and Galt signed a letter of intent to signal their shared commitment to building a more coordinated, effective regional approach to housing and homelessness.

Comments

1) *Purpose of the bill.* According to the author, "For over a decade, multiple Sacramento County Grand Jury reports, including in 2019 and again in 2023, have warned that the absence of a regional authority and coherent organizational structure makes it virtually impossible to use valuable resources effectively. The 2023 report described Sacramento's homelessness response as 'disjointed, lacking accountability, and often reactive rather than proactive,'

highlighting how eight separate government-funded entities operate with siloed data, conflicting goals, and inconsistent planning. SB 802 responds to this long-standing call for change by establishing the Sacramento Area Housing and Homelessness Agency, a new Joint Powers Authority. This single, coordinated agency will ensure shared decision-making, strengthen accountability, and better leverage local, state, and federal resources to address homelessness and housing insecurity across Sacramento County. All cities in the county will have the opportunity to participate and weigh in through representation on the agency's governing board. Importantly, the agency will also include people with lived experience of homelessness, along with technical experts, on its Advisory Committee, ensuring that the voices of those directly impacted help guide local solutions. By creating a regional structure with clear governance, broad city participation, community representation, and oversight, SB 802 delivers the accountability, collaboration, and leadership we need to address homelessness and housing more effectively and efficiently."

2) *Necessary?* The beauty of the Joint Exercise of Powers Act is its flexibility: local agencies can come together to form an agreement of its own design to carry out any power common to each of its members. Agreements specify a JPA's mission, structure, governing board, each member's financial obligations, and provisions for members to enter and exit the JPA, among other items. As such, local agencies do not need legislative authority for a JPA unless it requires powers not common to all its members, or when statutory certainty and specificity is preferable to the agreement's details. For example, the Legislature created the series of housing trust JPAs because the member agencies lacked the ability to issue bonds repayable from funds the JPA receives from public and private financing. Unlike these previous legislative efforts that expanded the authority local agencies had to form JPAs of their choosing, SB 802 requires the County of Sacramento and five of its largest cities to form a JPA to address housing and homelessness. These local agencies have the authority to create a JPA to address housing and homelessness without legislation. Such a JPA has been in discussions for years, but local agencies have not yet created one. SB 802 would force the creation of a JPA when locals have the authority to create one on their own. Should the Legislature set the precedent of forcing local agencies to create a JPA?

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Ongoing local costs of an unknown amount, but likely in the mid-hundreds of thousands to low millions of dollars annually to Sacramento County and the cities of Sacramento, Elk Grove, Rancho Cordova, Citrus Heights, and Folsom, collectively, for staffing and other resources required to form and carry out the required duties of the JPA, pursuant to this bill.

- Because this bill mandates the formation of a JPA, and requires its members to perform certain duties, the bill creates a reimbursable state mandate. This means any costs incurred by the JPA, including costs for tasks previously performed by city or county staff at non-state expense, are potentially reimbursable by the state General Fund, subject to a determination by the Commission on State Mandates.

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Disaster and emergency preparedness

SOURCE: Author

DIGEST: This bill requires Aging and Disability Resource Connections (ADRC) programs to provide disaster and emergency preparedness community education specifically designed with the goals of informing older adults and people with disabilities about emergency preparedness and promoting their safety before, during, and after natural disasters and other emergency events.

Assembly Amendments make technical and clarifying changes.

ANALYSIS:

Existing law:

1) Establishes an Aging and Disability Resource Connection program to provide information to consumers and their families on available long-term services and supports programs and to assist older adults, caregivers, and persons with disabilities in accessing long-term services and supports programs at the local level through Aging and Disability Resource Connection programs operated jointly by area agencies on aging and independent living centers. (Welfare and Institutions Code Section (WIC) 9120)

2) Provides that area agencies on aging and independent living centers shall be the core local partners in developing Aging and Disability Resource Connection programs. Requires the California Department of Aging to assist interested and qualified area agencies on aging and independent living centers in completing an application to be designated as an Aging and Disability Resource Connection program. (WIC 9120)

3) Provides that an Aging and Disability Resource Connection program operated by an area agency on aging and an independent living center shall provide all of the following:

    a) Enhanced information and referral services and other assistance at hours that are convenient for the public.

    b) Options counseling concerning available long-term services and supports programs and public and private benefits programs.

    c) Short-term service coordination.

    d) Transition services from hospitals to home and from skilled nursing facilities to the community. (WIC 9120)

4) Provides that an Aging and Disability Resource Connection program operated by an area agency on aging and an independent living center shall do both of the following:

    a) Provide services within the geographic area served.

    b) Provide information to the public about the services provided by the program. (WIC 9120)

5) Provides that the California Department of Aging, in consultation with the Aging and Disability Resource Connection Advisory Committee within the California Department of Aging, shall develop a core model of Aging and Disability Resource Connection best practices. These best practices shall be implemented by July 1, 2022, by all Aging and Disability Resource Connection programs operated by area agencies on aging and independent living centers. To the extent feasible, the best practices shall be considered in the development and continued updating of the master plan on aging. In the development of these best practices, the department and advisory committee shall consider, at a minimum, the following practices:

    a) A person-centered counseling process.

    b) Public outreach and coordination with key referral sources, including, but not limited to, caregiver resource centers, the medical centers of the United States Department of Veteran Affairs, acute care systems, local 211 programs, local multipurpose senior service programs, Programs of All-Inclusive Care for the Elderly (PACE), adult day care services, and long-term services and supports providers.

    c) A formal follow-up procedure to ensure that services for which a person received a referral were received and methods for correcting service provision if needed.

    d) A model for the best ways for area agencies on aging and independent living centers to share necessary data and client information.

    e) A model for the collection and reporting of data to the California Department of Aging, which shall include, but not be limited to, the demographic information for each individual counseled, the number of consumers served by category of service, and the number of caregivers served. (WIC 9120)

6) Provides that the California Department of Aging shall review implementation of the Aging and Disability Resource Connection Infrastructure Grants Program described in WIC 9121 for consideration in developing and updating the best practices model. (WIC 9120)

This bill:

1) Makes legislative findings and declarations regarding individuals who are especially vulnerable during a disaster and the challenges in adequately

supporting this population during national disasters.

2) Requires ADRCs to provide disaster and emergency preparedness community education specifically designed to help older adults and people with disabilities prepare for emergencies and ensure their safety before, during, and after natural disasters and other emergency events.

3) Allows the community education to utilize existing emergency preparedness and response tools developed by the California Office of Emergency Services (Cal OES), the California Department of Aging (CDA), the Department of Rehabilitation (DOR), the State Department of Developmental Services and other relevant community partners.

4) Provides Community education to raise awareness of existing available resources and guidance, including, but not limited to local alert systems; local emergency plans; information from the local fire department; information on emergency transportation and evacuation resources; and, information related to utility services during emergencies and natural disasters.

Background

Author's Statement. According to the author, "The state has long been aware that individuals with disabilities and older adults face a disproportionate risk of death during natural disasters. A 2019 audit by the California State Auditor highlighted the critical gap in emergency management agencies' ability to support these vulnerable populations, revealing a lack of guidelines for assisting these individual in cases of emergency. Recently, wildfires in Southern California claimed the lives of several individuals with disabilities, many of whom were over the age of 70. Despite the longstanding dangers faced by this community, the state has repeatedly failed to take meaningful action.

"SB 837 (Reyes) aims to address this urgent issue and ensure that we prevent further tragedies. This bill will require Aging and Disability Resource Connection programs to provide disaster and emergency preparedness training tailored to the needs of older adults and people with disabilities, equipping them with the knowledge and resources necessary to stay safe before, during, and after an emergency. Additionally, it will prioritize funding for area agencies on aging and independent living centers that provide critical transportation and evacuation services during emergencies under the California Disaster Assistance Act."

Aging and Disability Resource Connections. In 2003, the federal Administration for Community Living and the federal Centers for Medicare and Medicaid Services

established a joint funding opportunity through the Aging and Disability Resource Connection initiative. This initiative was designed to provide visible and trusted sources of information, one-on-one counseling, and streamlined access to long-term services and supports.

In 2015, the California Department of Aging established the Aging and Disability Resource Connection and an advisory committee to engage stakeholders in identifying and implementing strategies to strengthen, sustain, and expand Aging and Disability Resource Connection services throughout the state. The committee is the primary advisor to the California Department of Aging in the ongoing development and implementation of the state's Aging and Disability Resource Connections. Committee members include representatives from the California Departments of Aging, Health Care Services, Rehabilitation, and Veterans Affairs, as well as representatives of providers and advocates in the long-term services and supports community. California's Aging and Disability Resource Connection program was codified by AB 1200 (Cervantes, Chapter 618, Statutes of 2017).

The California Department of Aging contracts with local area agencies on aging and independent living centers, which coordinate a variety of supportive services to seniors and adults with disabilities. Not all area agencies on aging provide Aging and Disability Resource Connection services. Anyone, regardless of age, income, or disability, may receive Aging and Disability Resource Connection services.

Natural Disasters and Emergencies. Natural disasters include earthquakes, floods, extreme heat and all types of severe weather. The Environmental Protection Agency classifies wildfires as natural disasters, though not all wildfires are the result of natural events. California has experienced several devastating fires in recent years, including the Palisades Fire in 2025 and the Camp Fire in 2018. Natural disasters can occur anywhere, but they do not impact all populations equally. Research shows that "the oldest adults seem more likely to be displaced due to multiple disasters, and many older adults who are displaced face health hazards and disability: such as food and water shortages, loss of electricity, and unsanitary conditions, isolation and mental health impacts, and both cognitive and physical disabilities."[1] United States Census Bureau data shows that once displaced, 21% of people with disabilities never return home. This is four times the rate for persons without disabilities. These disproportionate impacts highlight the need for increased focus on these populations in training and resources to ensure they are protected during natural disasters and emergencies.

Prior/Related Legislation

AB 1069 (Bains, Chapter 445, Statutes of 2025) requires as part of disaster planning and response, an area agency on aging, independent living center, or an Aging and Disability Resource Connection program have access to an emergency shelter in order to ensure older adults and persons with disabilities receive continuous services and necessary support.

SB 352 (Reyes, Chapter 120, Statutes of 2025), as heard by this Committee, was almost identical to this bill prior to it being amended out of this committee's jurisdiction.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) OES estimates General Fund costs of $372,000 in the first year and $247,000 ongoing thereafter to support implementation. This includes contract costs of $125,000 per year for the Office of Access and Functional Needs (OAFN) to include individuals with lived disability experience to review and develop new trainings, guidance, and other documents; and one position to collaborate with the ADRCs and OAFN, develop curriculum and online modules, and provide on-demand contract instruction for ADRCs.

2) CDA anticipates minor and absorbable costs to provide information to ADRCs on existing emergency preparedness and response tools but notes the potential creation of new tools may impose GF cost pressures on the department.

   CDA also indicates GF costs of an unknown amount for ADRC programs to provide the disaster and emergency preparedness training required by the bill. The state provides an annual $10 million GF appropriation, administered by CDA, to the nearly two dozen designated ADRCs throughout the state. This bill adds additional training requirements to the ADRCs but does not provide additional funding likely necessary to develop and provide the training.

3) DOR anticipates minor and absorbable costs, to the extent that existing emergency preparedness and response tools are utilized (GF and federal funds).

ASSEMBLY FLOOR: 78-0, 8/24/26 - See last page for vote

SUBJECT: Pupil instruction: career technical education, career education, work-based learning, work experience education, and apprenticeships.

SOURCE: California Workforce Association
NextGen California

DIGEST: This bill makes various changes to the state's framework for career technical education (CTE), work-based learning, and youth apprenticeships, including: (1) establishing definitions and common requirements for work-based learning activities; (2) expanding the authority of local educational agencies (LEAs) and state special schools to offer work-based learning through work

experience education (WEE), CTE, early college credit, and other existing programs; (3) allowing pupils beginning in grade 10 to receive credit for WEE; (4) clarifying workers' compensation, liability, and student protections for work-based learning activities; and (5) establishing requirements for school-based youth apprenticeship programs registered with the Division of Apprenticeship Standards (DAS).

Assembly Amendments recast this bill to focus on expanding and integrating work-based learning activities across existing education and workforce programs. The amendments delete the provisions relating to the periodic update of career technical education (CTE) model curriculum standards and frameworks, statewide data collection on work-based learning, changes to specified CTE course sequences and articulation requirements, and state-level coordination and policymaking for school-based youth apprenticeship programs. In their place, the amendments authorize work-based learning activities within a broader range of existing programs. The amendments also expand specified WEE and work-based learning authorities to state special schools, clarify the use of work-based learning within cooperative CTE programs and community classrooms, and revise the requirements for approval of certain preapprenticeship programs.

ANALYSIS:

Existing law:

1) Requires the Department of Education (CDE) to coordinate the development of model curriculum standards for required courses of study for grades 7 to 12, including CTE courses, and to seek the advice of classroom teachers, school administrators, parents, postsecondary educators, and representatives of business and industry in developing these standards. (Education Code (EC) § 51226)

2) Requires CDE, upon adoption of the model curriculum standards for grades 7 to 12, to develop a curriculum framework that offers a blueprint for implementing CTE and to work in consultation and coordination with an advisory group that includes CTE teachers, administrators, business and industry representatives, labor organizations, and others. (EC § 51226.1)

3) Authorizes the governing board of a school district maintaining a high school to establish work-based learning or WEE programs to provide pupils with instruction in skills, attitudes, and understanding necessary for success in employment; and to approve and supervise such placements, arrange for

appropriate credit, and provide or require liability insurance. (EC § 51760 et seq.)

4) Authorizes work-based learning opportunities to be delivered by partnership academies, regional occupational centers and programs (ROCPs), and LEAs, including WEE, community classrooms, cooperative CTE programs, and job shadowing. (EC § 51760.3)

5) Requires school district governing boards to grant credit to pupils in grade 11 or higher for completion of a WEE program that meets certain criteria, including alignment with CTE model curriculum standards. (EC § 51760.3)

6) Authorizes the governing board of a high school district, an ROCP established by joint powers agreement, or a county superintendent of schools operating an ROCP to establish cooperative CTE programs or community classrooms as part of a CTE course. (EC § 52372)

7) Requires CDE to adopt rules and regulations for cooperative CTE programs and community classrooms offered through ROCPs operated by joint powers agreements or county offices. (EC § 52372)

8) Requires school districts that choose to expend supplemental CTE grant funds or accept other funds for CTE purposes to provide a series of programs offering sequences of courses that lead to specific competencies, and to develop articulation plans with community colleges to extend course sequences through grades 13 and 14. (EC § 52376)

9) Establishes the DAS within the Department of Industrial Relations to oversee apprenticeship programs, and requires the Chief of the Division to perform various functions to promote the welfare of apprentices. (Labor Code § 3070 et seq.)

This bill:

1) Authorizes a pupil concurrently enrolled in specified community college courses to participate in work-based learning activities, subject to specified requirements.

2) Authorizes a student body organization to operate a student-led enterprise program, subject to specified requirements.

3) Expands and revises provisions governing work-based learning and WEE by:

a) Extending specified authorities currently provided to school districts maintaining high schools to county offices of education, charter schools, and state special schools;

b) Defining "work-based learning" and "work experience education" for these purposes;

c) Authorizing work-based learning activities to be delivered by state special schools, in addition to existing authorized entities;

d) Authorizing work-based learning activities to include on-the-job training in specified youth apprenticeship programs, internships, and mentorships; and

e) Authorizing work-based learning activities to be offered through WEE courses, community classrooms, cooperative CTE programs, early college credit courses, and other specified settings.

4) Expands provisions governing credit for WEE by:

a) Extending requirements currently applicable to school districts to county offices of education, charter schools, and state special schools; and

b) Requiring pupils beginning in grade 10 to be eligible to receive credit for completing a WEE program, rather than limiting that requirement to pupils in grade 11 or higher.

5) Authorizes cooperative CTE programs and community classrooms operated by high school districts, joint powers regional occupational centers or programs (ROC/Ps), or county-operated ROC/Ps to include work-based learning activities, as specified.

6) Authorizes funding for the state agricultural CTE program to support agricultural CTE programs that provide work-based learning activities, as specified.

7) Authorizes Golden State Pathways Program grants to be awarded to pathway programs that provide work-based learning activities, as specified.

8) Authorizes California Career Technical Education Incentive Grant Program funds to be awarded to pathway programs and work-based learning activities, as specified.

9) Authorizes funding for California Partnership Academies to support academies that provide work-based learning activities, as specified.

10) Authorizes transition and employment preparation services provided through Project Workability to include work-based learning activities, as specified.

11) Authorizes a College and Career Access Pathways (CCAP) partnership agreement between a community college district and a school district, county office of education, or charter school to include work-based learning activities, as specified.

12) Authorizes community college internship training programs and apprenticeship partnerships established in collaboration with DAS to include work-based learning activities, as specified.

13) Authorizes Strong Workforce Program funds to support CTE programs that provide work-based learning activities, as specified.

14) Revises requirements for approval of preapprenticeship programs by authorizing a program seeking approval from DAS to demonstrate that its preapprenticeship training activities are conducted with approval from a local building and construction trades council to use the multicraft core curriculum, as an alternative to providing documentation that the activities are conducted in partnership with a DAS-approved apprenticeship program.

Comments

1) *Need for the bill.* According to the author, "California's education and workforce frameworks are leaving many students behind, especially low-income, Black, Latino and English Learner youth who enroll in college at lower rates and face barriers to completing a four-year degree. While 62% of high school graduates enroll in college within a year, only 34% of Californians hold at least a bachelor's degree. At the same time, 30% of future jobs will require training beyond high school, but less than a four-year degree. Our career education system is not meeting the needs of students and workforce demands. California voters recognize this gap, as highlighted in a recent survey where three-quarters of voters believe it is very or extremely important for K-12 schools to provide career-connected learning and develop partnerships with colleges and employers."

2) *The current state of CTE and work-based learning in California.* California has significantly expanded support for CTE and work-based learning over the last decade, both through the Local Control Funding Formula (LCFF) and through nearly $500 million in ongoing state categorical programs. The two largest are the CTE Incentive Grant (CTEIG) and the K–12 Strong Workforce Program,

which together provide $450 million annually to support CTE programs. These programs are layered on top of LCFF funding, which already includes an adjustment to the high school base rate intended to reflect the higher costs associated with CTE.

Despite this investment, participation and outcomes remain uneven. According to the Legislative Analyst's Office, approximately 70% of graduating high school students take at least one CTE course, but only 18% complete a full CTE pathway. In 2023-24, 45% of high school graduates were deemed "prepared" on the College and Career Indicator (CCI), with substantially lower rates among students with disabilities, foster youth, homeless students, and socioeconomically disadvantaged students. The state's CTE and work-based learning landscape is also spread across numerous programs with different funding streams, eligibility requirements, and administering entities. This bill addresses one piece of that fragmentation by establishing common terminology for work-based learning and expressly incorporating these activities into a number of existing education and workforce programs.

3) *Implementing pieces of the state's evolving vision for career education.* In recent years, two major statewide efforts have examined how California could better connect education and workforce systems. The Governor's Master Plan on Career Education calls for expanding work-based learning and earn-and-learn opportunities, improving coordination across education and workforce programs, and making career pathways easier for students to navigate. Separately, the California Youth Apprenticeship Committee (CYAC), established by the Legislature in 2022, developed recommendations for expanding youth apprenticeship, including a "Career Apprenticeship Bridge" model intended to allow young people to begin career preparation in high school and continue into postsecondary education and employment.

   The bill that passed the Senate included several state-level mechanisms intended to advance these efforts, including regular updates to CTE standards, an interagency workgroup on youth apprenticeship, and statewide work-based learning data collection. Those provisions were removed in the Assembly. The bill instead takes a more program-specific approach by establishing common work-based learning terminology and expressly authorizing work-based learning activities within existing programs such as CTEIG, K-12 Strong Workforce, Golden State Pathways, Partnership Academies, Project Workability, CCAP, and agricultural CTE. The bill therefore implements a narrower piece of the state's broader career education agenda, largely by

making work-based learning easier to incorporate within programs that already exist.

4) *Building work-based learning into existing programs rather than creating another one.* California's career education system has developed through numerous programs created at different times and for different purposes. As noted above, these include CTEIG and K-12 Strong Workforce, as well as more targeted programs such as Partnership Academies, Project Workability, agricultural CTE, Golden State Pathways, and CCAP. Work-based learning may already occur within some of these programs, but the statutory treatment of these activities is not uniform.

   Rather than establishing a new statewide work-based learning program, this bill amends many of these existing programs to expressly authorize work-based learning activities within them. This approach may provide greater clarity and flexibility for schools seeking to combine classroom instruction with workplace experiences without creating another categorical program or funding stream. At the same time, because these programs retain their separate purposes, eligibility requirements, and funding structures, the bill does not resolve the broader fragmentation of California's CTE system.

5) *Work-based learning extends beyond traditional CTE programs.* One notable feature of the Assembly amendments is that the bill does not limit work-based learning to traditional CTE programs. It authorizes concurrently enrolled high school pupils to participate in work-based learning through community college coursework, allows CCAP partnerships to include work-based learning, authorizes student body organizations to operate student-led enterprise programs, and expressly incorporates work-based learning into Project Workability for students with disabilities. These provisions reflect a broader conception of career-connected learning in which workplace exposure and experience can complement CTE pathways, college coursework, transition services, and other educational programs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) One-time costs of $450,000 and $400,000 ongoing annually (CA Apprenticeship Council Training Fund) for DAS to expand establish and oversee the youth apprenticeship program.

2) Minor Proposition 98 General Fund costs to K-12 LEAs and California Community Colleges (CCCs), collectively statewide, to participate in the expanded youth apprenticeship and CTE framework. The bill authorizes the use of various existing CTE funding pathways to support its implementation, such as Golden State Pathways, CTE Incentive Grant, Agriculture CTE funding, and Partnership Academies.

NO VOTE RECORDED: Gonzalez

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Physicians and surgeons: sexual misconduct and offenses: revocation of certificate

SOURCE: Author

DIGEST: This bill clarifies the conditions under which the surrender of a physician and surgeon's license in response to allegations of sexual abuse, misconduct, or specified relations with a patient or sexual exploitation results in the permanent loss of the license.

Assembly Amendments make various conforming changes, address constitutionality issues raised by Assembly policy committee, and add a coauthor.

ANALYSIS:

Existing law:

1) Establishes various practice acts in the Business and Professions Code (BPC) governed by various boards within the Department of Consumer Affairs (DCA) which provide for the licensing and regulation of health care professionals and establishes a number of reporting requirements outlined in the BPC designed to inform health professional licensing boards about possible matters for investigation. (BPC §§ 500 *et seq.* and §§ 800 *et seq.*)

2) Specifies that cases involving certain allegations by licensees of the Medical Board of California (MBC) and the Podiatric Medical Board must be handled on a priority basis, including, but not limited to sexual misconduct with one or more patients during a course of treatment or an examination. (BPC § 2220.05)

3) Authorizes denial of an application for licensure as a physician and surgeon from any applicant who was subject to formal discipline for sexual abuse, misconduct, or relations with a patient or sexual exploitation. Allows for the automatic revocation of a physician and surgeon license if the application would have been denied for any of these causes. Requires automatic revocation of the license of any physician and surgeon who has been convicted in another state of a crime that would have required sex offender registration in California. Prohibits reinstatement of the license of a physician and surgeon if it was surrendered or revoked for committing an act of sexual abuse, misconduct, or relations with a patient, or following conviction of a crime requiring registration as a sex offender wherein the person engaged in the offense with a patient or client, with the exception of registration required following conviction of a misdemeanor for indecent exposure. (BPC §§§ 480, 2232, 2307)

This bill prohibits a physician and surgeon license from being reinstated in cases where the license was surrendered while an accusation was pending against the licensee that alleges licensee committed an act of sexual abuse, misconduct, or relations with a patient pursuant or sexual exploitation.

Background

The physician and surgeon enforcement process begins with a complaint. Complaints are received from various sources, including the public, generated

internally by MBC or the Osteopathic Medical Board of California (OMBC), or based on information MBC and OMBC receive from various entities through mandatory reports to the boards.

MBC licensee complaints are received by the Central Complaint Unit, which starts the process of determining next steps for a complaint. Complaint priorities are outlined in BPC Section 2220.05 in order to ensure that physicians representing the greatest threat of harm are identified and disciplined expeditiously. MBC must ensure that it is following this section of law when investigating complaints, including complaints alleging certain behavior, including sexual misconduct with one or more patients during a course of treatment or an examination, as being the highest priority.

For complaints about physicians and surgeons that are subsequently investigated and meet the necessary legal prerequisites, a Deputy Attorney General (DAG) in the Office of the Attorney General (OAG) drafts formal charges, known as an "Accusation". A hearing before an Administrative Law Judge (ALJ) is subsequently scheduled, at which point settlement negotiations take place between the DAG, the physician and their attorney and MBC or OMBC staff. Often times these result in a stipulated settlement, similar to a plea bargain in criminal court, where a licensee admits to having violated charges set forth in the accusation, or admits that the MBC or OMBC could establish a factual and legal basis for the charges in the Accusation at hearing, and accepts penalties for those violations. If a licensee contests charges, the case is heard before an ALJ who subsequently drafts a proposed decision. This decision is reviewed by a panel of MBC members or the OMBC Board who either adopt the decision as proposed, adopt the decision with a reduced penalty or adopt the decision with an increased penalty. If probation is ordered, a copy of the final decision is referred to MBC's Probation Unit or OMBC's probation monitor for assignment to an inspector who monitors the licensees for compliance with the terms of probation.

Certain acts and circumstances have been deemed so harmful or such a high risk of harm to patients that the MBC and OMBC are required to automatically suspend or revoke the licenses of any person who commits them. For example, the boards must automatically suspend a license after a conviction of specified felonies, including sexual abuse, misconduct, or relations with a patient. Once the conviction is final, the boards are required to automatically revoke the license. The MBC and OMBC must also automatically revoke the license of any licensee that has been required to register as a sex offender, regardless of whether the related conviction has been appealed, except when the registration resulted from a

misdemeanor for indecent exposure. Physicians subjected to automatic revocation may request a hearing within 30 days of the revocation. If the relevant conviction is overturned on appeal, the revocation ordered automatically ceases.
Except in specified cases, a former physician whose license was revoked, or who surrendered their license while under investigation or while charges were pending, is authorized to petition the MBC and OMBC for reinstatement. Petitions for reinstatement of a license surrendered or revoked for unprofessional conduct may not be filed for at least three years following the date the license was revoked or surrendered, though the MBC and OMBC may, for good cause shown, allow a petition to be submitted after only two years. Petitions include a statement of facts as required by the MBC and must be accompanied by at least two verified recommendations from licensed physicians who have personal knowledge of the activities of the petitioner since the disciplinary penalty was imposed.

Petitions for reinstatement may be heard by a panel of the MBC or OMBC or may be assigned to an administrative law judge. The panel or the administrative law judge may consider all the petitioner's activities since the disciplinary action was taken, the offense for which the petitioner was disciplined, the petitioner's activities during the time the certificate was in good standing, and the petitioner's rehabilitative efforts, general reputation for truth, and professional ability. Once the hearing is completed, the petition for reinstatement is either denied or granted, and may be granted with the imposition of certain terms and conditions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations, the bill will not result in costs to MBC or OMBC.

SUPPORT: (Verified 8/25/26)

California Medical Association
National Women's Defense League

OPPOSITION: (Verified 8/25/26)

None received

ARGUMENTS IN SUPPORT: According to the California Medical Association, "…when a physician has been found to have committed egregious sexual misconduct against patients, the state has a compelling interest in ensuring that patients are protected from future harm. This measure recognizes that certain violations of professional trust are so serious that permanent removal from medical

practice is warranted. Importantly, this bill supplements the narrowly focused law that applied to the most serious forms of physician sexual misconduct and applies only to individuals whose licenses were revoked on those grounds. This measured approach balances due process considerations with the paramount need to protect patients from repeat offenders."

National Women's Defense League writes that "This bill sends a clear message to survivors: their safety matters, their experiences are taken seriously, and the state will not permit known offenders to cycle back into positions where harm can recur. It also affirms to the public that California's medical licensing system exists to protect patients—not to rehabilitate those who have already violated fundamental ethical obligations."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Courthouses: privilege from civil arrest

SOURCE: California Public Defenders Association
California Rural Legal Assistance Foundation
Inland Coalition for Immigrant Justice
Western Center on Law and Poverty

DIGEST: This bill prohibits a person traveling to or from, or while present at, a courthouse for any lawful activity from being subject to civil arrest, as specified; specifies that a civil arrest in violation of this prohibition or the common law

privilege against civil arrest constitutes the tort of false imprisonment or false arrest if the arresting person or persons knew or reasonably should have known that the person arrested was going to, remaining at, or returning from court for any lawful activity; makes a person who violates these provisions or assists in their violation liable for actual damages and statutory damages of $10,000; requires Judicial Council to annually prepare and publish on its website a report regarding civil arrests at courthouses pursuant to Rule 10.440 of the California Rules of Court, as specified; and requires court security personnel to take specified actions when they are aware that a representative of a law enforcement agency has entered a courthouse.

Assembly Amendments remove the provision that provides that the Attorney General may bring a civil action to obtain appropriate equitable and declaratory relief for a violation, amend and add various definitions; require court security personnel to take specified actions when they are aware that a representative of a law enforcement agency has entered a courthouse; specify that a civil arrest in violation of its provisions or the common law privilege protecting persons from civil arrest constitutes the tort of false imprisonment or false arrest if the arresting person knew or reasonably should have known that the person was arrested going to, remaining at, or returning from court for any lawful activity; and provides that each person who violates or assists in violating its provisions is liable for actual damages and statutory damages of $10,000.

ANALYSIS:

Existing law:

1) Establishes a common law privilege against civil arrest, holding that "Courts of justice ought everywhere to be open, accessible, free from interruption, and to cast a perfect protection around every man who necessarily approaches them. [Individuals] should be permitted to approach them, not only without subjecting himself to evil, but even free from the fear of molestation or hindrance." (*Stewart v. Ramsey* (1916) 242 U.S. 128, 129.)

2) Makes the following acts, in respect to a court of justice, or proceedings therein, contempt of the authority of the court:
   a) unlawfully detaining a witness or party to an action while going to, remaining at, or returning from the court where the action is on the calendar for trial; and
   b) any other unlawful interference with the process or proceedings of a court. (Code of Civil Procedure (Code Civ. Proc.) § 1209.)

3) Provides that California Code of Civil Procedure section 1209 is to be liberally construed to affect its objectives and promote justice. (*Burns v. Superior Court of San Francisco* (1903) 140 Cal. 1, 9.)

4) Gives judicial officers the power to:
   a) preserve and enforce order in their immediate presence, and in proceedings before them, when they are engaged in the performance of their official duties; and
   b) compel obedience to their lawful orders as provided in the Code of Civil Procedure. (Code Civ. Proc. § 177.)

5) Holds that a court has inherent power to exercise reasonable control over all proceedings connected with the litigation before it in order to ensure the orderly administration of justice and maintain the dignity and authority of the court, and to summarily punish for acts committed in the immediate view and presence of the court when they impede, embarrass, or obstruct it in the discharge of its duties. (*Mowrer v. Superior Court of Los Angeles County* (1969) 3 Cal.App.3d 223, 230.)

6) Provides that a person shall not be subject to civil arrest in a courthouse while attending a court proceeding or having legal business in the courthouse. Specifies that this provision does not narrow, or in any way lessen, any existing common law privilege, and that this provision does not apply to arrests made pursuant to a valid judicial warrant. (Civil (Civ.) Code § 43.54.)

This bill:

1) Makes various findings and declarations regarding importance of access to the courts and protecting persons attending court from civil arrest.

2) Repeals the provisions described in 6), above.

3) Provides that a person shall not be subject to civil arrest while present at or traveling to or from a courthouse for any lawful activity. Specifies that it shall be presumed that a person traveling to or from, or present at, a courthouse is engaging in lawful activity.

4) Specifies that its provisions described in 3) do not narrow or in any way lessen any existing common law privilege.

5) Specifies that its provisions described in 3) do not apply to arrests made pursuant to a valid judicial warrant.

6) Permits a court to issue appropriate judicial orders to protect the privilege from civil arrest under the above provisions or under common law, in addition to the powers available under specified code.

7) Specifies that, except as specified, a civil arrest in violation of these provisions or the common law privilege against civil arrest constitutes the tort of false imprisonment or false arrest if the arresting person or persons knew or reasonably should have known that the person arrested was going to, remaining at, or returning from court for any lawful activity.

8) Specifies that each person who violates these provisions, or assists in a violation, is liable for civil damages for false imprisonment or false arrest, including actual damages and statutory damages of $10,000. Permits a successful party to recover court costs and reasonable attorney's fees.

9) Defines, for the purposes of the above-described provisions, the following:
   a) "arrest" to mean the taking of an individual into custody;
   b) "civil arrest" to mean the arrest of, or a communicated intent to arrest, an individual for an alleged violation of civil law;
   c) "court proceeding" to mean any matter, hearing, or other judicial business conducted by, or under the supervision of, a California superior court, Court of Appeal, or the Supreme Court, including but not limited to, trials, hearings, arraignments, case management conferences, and clerks' office transactions;
   d) "courthouse" to mean court facilities as defined in specified existing law; any sidewalk, parkway, or street surrounding the court facilities and its premises; or any public way within one thousand feet of the court facilities, including a sideway, parkway, or street; and
   e) "court security personnel" to mean peace officers and security guards, as described in specified law, who are assigned to perform court security functions under any employment, contractual, or memorandum of understanding agreement;
   f) "lawful activity" to mean any activity lawfully permitted at a courthouse, including but not limited to: observation of, attendance at, or involvement in court proceedings; any activities related to one's employment at a courthouse; accompanying, supporting, or assisting a person who is going to,

remaining at, or returning from a courthouse, as specified; the exercise of any constitutional rights at a courthouse; or otherwise being lawfully present at a courthouse.

10) Requires, when court security personnel are aware that any representative of a law enforcement agency, while acting in an official capacity, has entered a courthouse, that the court security personnel:
    a) Request that the law enforcement representative or representatives identify themselves and state their specific law enforcement purpose and intended enforcement action to be taken; and
    b) Request that the law enforcement representative or representatives provide a copy of a valid judicial warrant concerning the intended enforcement action to be taken.

11) Requires, when court security personnel is aware that there is an attorney representing a person named in the judicial warrant in any capacity, that court security personal request the law enforcement representative afford that attorney the right to review the warrant.

12) Specifies that an action or proceeding for the tort of false imprisonment or false arrest shall not be commenced against a court, a judicial officer, or any trial court employee, as defined, acting lawfully pursuant to their duty to maintain safety and order in the courts.

13) For the purposes of 10) through 12), above, defines "court security personnel" to have the same meaning as provided in Civil Code section 43.54.

14) Requires the Judicial Council to annually prepare a report compiling statistics, aggregated by county, of the information related to civil arrests reported to the Judicial Council pursuant to Rule 10.440 of the California Rules of Court.

15) Requires the Judicial Council to publicly post this report on its public internet website.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Costs of an unknown, but potentially significant amount to the Department of Justice (General Fund). The Civil Rights Enforcement Section anticipates workload costs to advise court administrators and the public on compliance and

to litigate violations, and the Police Practices Section anticipates workload costs to investigate allegations that state and local law enforcement entities have violated the bill's provisions. DOJ indicates the number of additional deputy attorneys general and support staff needed cannot be determined, in part because the range of circumstances the bill prohibits as civil arrests in or near a courthouse is not yet clear.

2) Minor and absorbable workload to the Judicial Council (Trial Court Trust Fund) to annually prepare and publish the required report on civil arrests, as the report aligns with existing reporting requirements under Rule 10.440 of the California Rules of Court. The courts expect workload impacts of an unknown, but likely minor, amount on court security personnel to inquire into the identity and purpose of law enforcement officers and to request judicial warrants as required by this bill. Individual courts may also incur absorbable costs to update memorandums of understanding with their local sheriff's office, which generally provides court security.

OPPOSITION: (Verified 8/25/26)

California State Sheriffs' Association
San Bernardino County Sheriff's Department

ARGUMENTS IN SUPPORT: According to the California Public Defenders Association, which is a co-source of SB 873:

> Since the Trump administration rescinded its longstanding sensitive-locations policy in January 2025, ICE agents have conducted arrests at and near California state superior courthouses with alarming and growing frequency. This is not a peripheral concern: it is happening at state courthouses across California and it is happening with impunity. In some instances, agents have entered courthouse buildings, in blatant violation of existing state law. In many more, they wait on courthouse steps, in parking lots, and at building exits, exploiting a gap in current law that does not protect the grounds surrounding a courthouse.
>
> The consequences for the justice system are serious and immediate. Defendants, families, and witnesses are making decisions about whether to appear in court based on fear of what will happen when they get there. Cases are being delayed. Evidence is being lost. Defendants are accepting pleas they would otherwise contest simply to minimize their time in a courthouse. Witnesses are not appearing. A courthouse that a significant portion of the community fears to enter cannot administer justice.
>
> Existing California law prohibits civil arrests inside courthouse buildings, but provides no protection for the grounds, parking lots, and approaches where the majority of these arrests are now occurring. ICE has adapted its tactics precisely to exploit this gap. SB 873 closes it by establishing a 1,000-

foot enforcement-free zone around state courthouses and by requiring a valid judicial warrant, not an administrative ICE warrant, for any civil arrest within that zone.

The distinction between a judicial warrant and an administrative immigration warrant matters enormously. An administrative warrant is issued by an immigration officer, not a judge, and is *not* based on a judicial finding of probable cause. It is not the kind of legal process that should authorize the disruption of state judicial proceedings. SB 873 restores the appropriate standard: if federal agents wish to make a civil arrest in or around a California courthouse, they must obtain authorization from a court.

The bill also requires agents to identify themselves to court personnel. This is a modest but meaningful protection; it ensures that court administrators are aware of enforcement activity in their facilities, can implement their own policies, and can protect the integrity of proceedings already underway.

For CPDA's members, these arrests have a direct and corrosive effect on the ability to represent clients. Effective representation requires that clients and witnesses appear in court. When clients, their families, and witnesses are arrested on their way in or out of a hearing, public defenders lose the ability to consult with them, present their cases, and protect their rights. When clients are too afraid to appear, the consequences are equally grave. The right to counsel guaranteed by the Sixth Amendment cannot be exercised by someone who does not feel safe entering the building.

Courthouses must be places where all Californians can participate in the justice system without fear. SB 873 is a targeted and necessary step toward restoring access to our own state court system for all Californians.

ARGUMENTS IN OPPOSITION: According to the California State Sheriff's Association, which opposes SB 873:

We are concerned that this bill places sheriffs' officials in a position of unavoidable conflict between state and federal law. Under SB 873, county sheriffs would be required to assess federal enforcement actions in the context of state law requirements, seek compliance with a state-imposed judicial warrant requirement, and likely delay or deny federal arrest activity occurring in or around courthouses. In practice, this will require sheriffs to choose between complying with federal law and disregarding state law, or

obeying state law in a manner that puts them in direct conflict with federal law.

Additionally, the bill significantly expands the prohibition of making a civil arrest in a courthouse. The definition of "courthouse" under SB 873 includes any sidewalk, parkway, or street surrounding the court facilities and its premises and any public way within 1,000 feet of the court facilities. A violation of this overly broad prohibition is subject to a private right of action for equitable and declaratory relief as well as actual damages and statutory damages of $10,000.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Missing and Murdered Indigenous Persons Justice Program

SOURCE: Yurok Tribe

DIGEST: This bill establishes The Missing and Murdered Indigenous Persons Justice Program within the Department of Justice (DOJ) which facilitates collaboration between parties in cases of missing and murdered indigenous people.

Assembly Amendments delay the requirement for DOJ to publish specified aggregated data until July 1, 2030, and limit the annual report to publication between 2030 and 2033.

ANALYSIS:

Existing federal law:

1) Defines "Indian country" as: all land within the limits of any Indian reservation under the jurisdiction of the U.S. Government, notwithstanding the issuance of any patent, and, including rights-of-way running through the reservation; all dependent Indian communities within the borders of the U.S. whether within the original or subsequently acquired territory thereof, and whether within or without the limits of a state, and all Indian allotments, the Indian titles to which have not been extinguished, including rights-of-way running through the same. (Title 18 United States Code (U.S.C.) § 1151.)

2) Provides concurrent California and Tribal jurisdiction over criminal offenses committed by or against Indians in the areas of Indian country, as specified.

3) Provides that the Indian Country affected within California includes all Indian Country within the state. (18 U.S.C. § 1162.)

Existing law:

1) Provides that murder is the unlawful killing of a human being, or a fetus, with malice aforethought. (Penal (Pen.) Code, § 187, subd. (a).)

2) Requires the Attorney General to establish and maintain the Violent Crime Information Center to assist in the identification and the apprehension of persons responsible for specific violent crimes and for the disappearance and exploitation of persons, particularly children and at-risk adults. (Pen. Code, § 14200, subd. (a).)

3) Requires all local police and sheriffs' departments to accept any report, by any party, including any telephonic report, of a missing person, including runaways, without delay and to give priority to the handling of these reports over the handling of reports relating to crimes involving property. (Pen. Code, § 14211, subd. (a).)

4) Requires the local police or sheriff's department, in cases of reports involving missing persons, including, but not limited to, runaways, to immediately take

the report and make an assessment of reasonable steps to be taken to locate the person by using the required report forms, checklists, and guidelines. (Pen. Code, § 14211, subd. (c).)

5) Establishes the "feather alert," a notification system designed to issue and coordinate alerts with respect to endangered indigenous people, specifically indigenous women or indigenous people, who are reported missing. (Government (Gov.) Code, § 8594.13, subd. (a).)

6) Provides that a law enforcement agency or Tribe of California may directly request the California Highway Patrol activate a Feather Alert. Specifies that a law enforcement agency may request that a Feather Alert be activated if that agency determines a Feather Alert would be an effective tool in the investigation of missing and murdered indigenous persons, including young women or girls. Requires the law enforcement agency to consider the following factors to make that determination:

   a) The missing person is an indigenous woman or an indigenous person.
   b) The investigating law enforcement agency has utilized available local and tribal resources.
   c) The law enforcement agency determines that the person is missing.
   d) The law enforcement agency or tribe believes that the person is in danger and is missing under circumstances that indicate that: the missing person's physical safety may be endangered; the missing person may be subject to trafficking; or the missing person suffers from a mental or physical disability, or a substance use disorder.
   e) There is information available that, if disseminated to the public, could assist in the safe recovery of the missing person. (Gov. Code, § 8594.13, subds. (c), (e).)

7) Establishes the Rural Indian Crime Prevention Program within the Office of Emergency Services. Provides that the purpose of the program is to provide financial and technical assistance for local law enforcement. Requires the program to target the relationship between law enforcement and Native American communities to encourage and to strengthen cooperative efforts and to implement crime suppression and prevention programs. (Pen. Code, § 13847, subd. (a).)

This bill:

1) Establishes the Missing and Murdered Indigenous Persons Justice Program (MMIPJP) within and under the discretion of the DOJ. Provides that the program has all the following responsibilities:

    a) Facilitate collaboration and act as a liaison between tribal victims' families, tribal governments, and federal, tribal, state, and out-of-state law enforcement agencies, where appropriate, regarding active and inactive cases involving missing and murdered indigenous persons in California, including cases involving human trafficking.
    b) Provide technical assistance to law enforcement agencies already engaged in investigating cases involving missing and murdered indigenous persons in California, including cases of human trafficking.
    c) Publish data, beginning July 1, 2030, on the number of, and facts about, cases involving missing and murdered indigenous persons in California, where appropriate.

2) Requires the DOJ to submit an annual report, beginning July 1, 2030 until January 1, 2033, to both houses of the Legislature containing all of the following:

    a) The cases the department acted as a liaison and provided technical assistance to law enforcement.
    b) The information published on the number of, and facts about, cases involving missing and murdered indigenous persons.
    c) An analysis of all appropriate data, and any recommendations to assist or improve upon necessary collaboration and coordination between local, state, and tribal governments in addressing missing and murdered indigenous persons in California.

Background

In 2018, the Urban Indian Health Institute (UIHI) published a report after conducting a study "aimed at assessing the number and dynamics of cases of missing and murdered American Indian and Alaska Native women and girls in cities across the United States." (UIHI, *Missing and Murdered Indigenous Women & Girls: A snapshot of date from 71 urban cities in the United States*, p.2 available at <https://www.uihi.org/wp-content/uploads/2018/11/Missing-and-Murdered-

Indigenous-Women-and-Girls-Report.pdf .) In its report, UIHI cited a National Crime Information Center statistic that there were 5,712 reports of missing American Indian and Alaska Native women and girls made in 2016 although the U.S. Department of Justice's federal missing persons database only had 116 cases. (*Ibid*.) That discrepancy as well as the lack of research on rates of violence among American Indian and Alaska Native women living in urban areas—where nearly three quarters of the Indigenous population lives—led UIHI to conduct its study. (*Ibid*.)

In describing its methodology to collect data on cases of missing and murdered Indigenous women and girls, the UIHI stated:

> As demonstrated by the findings of this study, reasons for the lack of quality data include underreporting, racial misclassification, poor relationships between law enforcement and American Indian and Alaska Native communities, poor record-keeping protocols, institutional racism in the media, and a lack of substantive relationships between journalists and American Indian and Alaska Native communities. In an effort to collect as much case data as possible and to be able to compare the five data sources used, UIHI collected data from Freedom of Information Act (FOIA) requests to law enforcement agencies, state and national missing persons databases, searches of local and regional news media online archives, public social media posts, and direct contact with family and community members who volunteered information on missing or murdered loved ones. (*Id*. at p. 4.)

The report concluded:

> UIHI discovered a striking level of inconsistency between community, law enforcement, and media understandings of the magnitude of this violence. If this report demonstrates one powerful conclusion, it is that if we rely solely on law enforcement or media for an awareness or understanding of the issue, we will have a deeply inaccurate picture of the realities, minimizing the extent to which our urban American Indian and Alaska Native sisters experience this violence. This inaccurate picture limits our ability to address this issue at policy, programing, and advocacy levels. (*Id*. at p. 20.)

This bill seeks to address some of the issues outlined in the report. Specifically, this bill establishes the Missing and Murdered Indigenous Persons Justice Program within DOJ, to facilitate and act as a liaison between parties in cases regarding missing and murdered indigenous people, as well as to collect data from various sources. This bill also requires the DOJ to publish an annual report of its findings beginning in 2030 and until 2033.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

Costs of up to $3 million annually (General Fund) to DOJ to establish and operate the MMIPJP. DOJ reports the department cannot absorb these costs within existing budgeted resources and that implementation is dependent upon an appropriation. DOJ's estimate spans five divisions and approximately 14 positions, including research and data staff in the California Justice Statistics Center to collect, analyze, and publish MMIP data; a crime analyst in the Missing and Unidentified Persons Section; two special agent supervisors in the Division of Law Enforcement to act as liaisons with tribal governments and law enforcement agencies, plus associated vehicle costs; a dedicated victim advocate in the Victim Services Unit; and analyst and clerical staff in the Office of Native American Affairs to coordinate the program, conduct outreach, and draft the annual report. In addition, DOJ will face one-time IT costs of about $578,000 to reprogram DOJ's missing persons database and the statewide crime reporting system so DOJ can capture and publish the tribal affiliation and foster care information the bill requires. DOJ's current estimate is somewhat higher than the department's estimate on the substantially similar SB 4 (Cervantes), of this legislative session, held on the suspense file in this committee, on which DOJ anticipated costs beginning at $1.4 million and rising to approximately $2.3 million ongoing for nine positions. The increase appears attributable to requiring additional positions, particularly in the California Justice Statistics Center, and the one-time IT modifications tied to the new publication requirements. DOJ reports that its Research Services Branch would absorb related homicide and missing persons statistical workload through June 30, 2029, using limited-term resources provided in connection with SB 108 (Budget Act of 2024), but anticipates needing permanent funding for two research positions beginning July 1, 2029, when that funding expires.

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Wildfire resiliency: financial assistance

SOURCE: Megafire Action

DIGEST: This bill establishes the California Wildfire Resilience Loan Program (CAEATFA) and requires the California Alternative Energy and Advanced Transportation Financing Authority to administer the program to provide financial assistance for projects and activities to reduce wildfire-related risks and losses, including home hardening and defensible space improvements.

Assembly Amendments establish that inspections and administrative fees shall be an eligible expense under the Loan Program; establish that ratepayer funds shall not be used to fund the Loan Program; and authorize the Department of Forestry and Fire Protection to provide technical assistance and public leadership in support of the Loan Program.

ANALYSIS:

Existing law establishes CAEATFA. (Public Resources Code § 26011.8)

This bill:

1) Adds to the purposes of CAEATFA the advancement of increasing the adoption of wildfire resilience improvements that reduce wildfire-risk related risk and losses by promoting facilities, projects, improvements, and measures intended to reduce wildfire risk, enhance structure survivability, or improve community resilience to wildfire.
2) Establishes the California Wildfire Resilience Loan Program (Loan Program) to be developed and administered by CAEATFA, upon appropriation by the Legislature or the appropriation of any federal or private funds.
3) Establishes the goals of the Loan Program as:
    a) Reducing local and statewide wildfire losses through wildfire resilience improvements to residential, multifamily, mixed-use, nonprofit, or small business property.
    b) Improving insurability and resilience of communities vulnerable to wildfire risk.
    c) Increasing the defensible space around and hardening of residential, multifamily, mixed-use, nonprofit, or small business property to mitigate wildfire risk, thereby reducing the emission of greenhouse gases from wildfires and associated air pollution.
    d) Reduce the upfront and overall cost to eligible property owners of obtaining private financing for wildfire resilience improvements and expand access of eligible property owners to private financing tools for wildfire resilience improvements.
4) Establishes that the Loan Program may include, but not be limited to, establishment of a loan loss reserve, interest rate buy-downs, and other credit enhancements.
5) Establishes eligible wildfire resilience improvements.

6) Makes financial assistance under this Loan Program available to eligible properties statewide.
7) Requires the financing of the Loan Program does not include ratepayer funds.
8) Authorizes the Department to provide technical assistance and public leadership in support of the Loan Program.
9) Authorizes CAEATFA to enter into partnerships or referral arrangements to facilitate the referral of eligible applicants, aggregating demand, or facilitating bulk purchasing or contracting agreements.
10) Authorizes CAEATFA to consult with the SFM to establish procedures for verifications of improvements financed through the program for the purposes of program integrity, evaluation, and continuous improvement.
11) Authorizes CAEATFA to enter into agreements, upon appropriation by the Legislature, to design, develop, maintain, and operate a public-facing internet website for the Loan Program.
12) Establishes findings and declarations related to the purpose of this bill.

Background

California Wildfire Resilience Loan Program. The Loan Program proposed in this bill is modeled after the GoGreen financing platform administered by CAEATFA. This bill creates a state-backed loan loss reserve that leverages public dollars to unlock private capital, lower interest rates, and finance home hardening and defensible space improvements for more Californians to protect their residential homes and small businesses.

This bill authorizes the program to fund home hardening projects that improve a structure's ability to withstand and survive a wildfire.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee analysis on an earlier version of the bill:

- CAETFA estimates ongoing costs of $3.9 million in the first year, gradually increasing to $5 million per year by the fifth year and likely continuing to grow thereafter (California Alternative Energy Authority Fund or other fund) to administer the Wildfire Resilience Loan Program, including to provide a loan loss reserve/credit enhancement funds. This cost estimate is based on CAEATFA's projection of 1,000 projects in the first year, which would increase

in each subsequent year and grow to more than 2,4000 projects by year five. Actual CAEATFA costs could be higher or lower and would depend on how many projects are ultimately undertaken.

- Unknown, potentially significant one-time costs for the Department of Forestry and Fire Protection (CalFire) to provide guidance, in consultation with the Office of Emergency Services (CalOES) and the Department of Insurance, to CAEATFA on wildfire resilience improvements eligible under the program. Unknown but likely minor costs for the Department of Insurance to consult with CalFire on the above guidance. CalOES anticipates its consulting costs would be minor and absorbable.
- Cost pressures of an unknown but likely significant amount, possibly in the tens of millions of dollars (various funds), to provide state funding for California Wildfire Resilience Loan Program projects and activities.

OPPOSITION: (Verified 8/24/26)

None received.

ARGUMENTS IN SUPPORT: According to the author, "Implementing wildfire hardening measures such as upgrading roofing and windows, replacing siding, and managing nearby vegetation can reduce a structure's fire risk by more than 35 percent. However, these home hardening and defensible space investments can be prohibitively expensive, costing tens-of-thousands of dollars for homeowners and affordable financing is not easily accessible."

SUBJECT: Resource adequacy: aggregated distributed energy resources

SOURCE: Environment California
The Climate Center

DIGEST: This bill proposes policy changes to authorize and expand the use of aggregated distributed energy resources (DERs) to satisfy resource adequacy (RA) requirements.

Assembly Amendments move the date by one year, to June 30, 2028, by when the California Public Utilities Commission (CPUC) must enhance existing market-

integrated pathways for aggregated distributed energy resources and provide recommendations to the California Independent System Operator (CAISO), as specified; provide the CPUC with discretion to address device-level telemetry, instead of prescribing related requirements; requires the CPUC to establish conditions where customer-sited DERs may receive credit for energy exported past the utility meter; and recasts the language concerning participation in Net-Energy Metering (NEM).

ANALYSIS:

Existing law:

1) Establishes and vests the CPUC with regulatory authority over public utilities, including electrical corporations. (Article XII of the California Constitution)

2) Requires the CAISO, as a nonprofit, public benefit corporation, to conduct its operations consistent with applicable state and federal laws and consistent with the interests of the people of the state. (Public Utilities Code §345.5)

3) Requires the CAISO to ensure the efficient use and reliable operation of the transmission grid, as provided. (Public Utilities Code §345)

4) Requires the CPUC, in consultation with the CAISO, to establish RA requirements for all load-serving entities (LSEs) and requires the CPUC in establishing those requirements to ensure the reliability of electrical service in California. Requires the RA program to facilitate the development of new generating, non-generating, hybrid capacity and retention of existing generating, non-generating, and hybrid capacity that is economical and needed for reliability. Requires that the RA program achieve specified objectives, including that it establish new or maintain existing demand response products and tariffs, as specified. Defines LSE, for that purpose, as an electrical corporation, electric service provider (ESP), or community choice aggregator (CCA). (Public Utilities Code §380)

5) Defines “distributed resources” to mean distributed renewable generation resources, energy efficiency, energy storage, electric vehicles, and demand response technologies. (Public Utilities Code §769)

6) Creates the Demand Side Grid Support (DSGS) Program and requires the State Energy Resources Conservation and Development Commission (California Energy Commission (CEC)) to implement and administer the program to

incentivize dispatchable customer load reduction and backup generation operation as on-call emergency supply and load reduction for the state's electrical grid during extreme events. (Public Resources Code §25792)

This bill:

1) Makes several findings and declarations concerning the role of DERs to provide capacity value to satisfy RA requirements.

2) Requires the CPUC, in coordination with the CEC and the CAISO, on or before June 30, 2028, to enhance existing market-integrated pathways for aggregated DERs, as defined, to qualify as RA capacity.

3) Requires the CPUC to establish the conditions for the use of aggregated DERs while ensuring NEM customers and net billing tariff (NBT) customers do not receive duplicate compensation, as provided.

4) Requires the CPUC to allow electrical corporations, ESPs, and CCAs to include aggregated DERs in RA filings and CPUC-ordered procurement.

5) Requires the CPUC, on or before June 30, 2028, to develop recommendations for changes to the CAISO's proxy demand resource and the DER aggregation participation models to be consistent with the CPUC's requirements for aggregated DERs pursuant to these provisions, and to communicate the recommendations to the CAISO for consideration in a new or existing initiative.

Background

Resource adequacy (RA). Following the California energy crisis of 2000-01, the California Legislature enacted legislation to prevent future incidents of widespread blackouts and rolling brownouts due to lack of electric generating capacity. Among the reforms adopted in response to the crisis was the adoption of Public Utilities Code §380 as an effort to better ensure reliability of electric supply. The statute directs the CPUC, in consultation with the CAISO, to establish RA requirements for all LSEs, including electric investor-owned utilities (IOUs), ESPs, and now includes CCAs, which did not exist at the time of the crisis.

The current RA program consists of system, local, and flexible requirements for each month of a compliance year. There are two types of filings: Annual filings (filed on or around October 31st) and Monthly filings (filed 45 calendar days prior to the compliance month). For the monthly filings, LSEs must demonstrate they

have procured 100% of their monthly System and Flexible RA obligation. For the Annual filings, in October of each year, LSEs must demonstrate that they have procured 90% of their system RA obligations for the five summer months (May-September) of the following year, as well as 100% of their local requirements, and 90% of their flexible requirements for each month of the coming compliance year. The CPUC has adopted changes to RA program in recent years, including increasing the planning reserve margin from 15% to 17% by 2024 for all LSEs and in the case of electric IOUs upwards of 20-22% effective planning reserve margin. The CPUC has required a multi-year local capacity RA requirement and adopted local capacity requirements for the upcoming three years. The CAISO conducts a *Local Capacity Technical Analysis* to identify the minimum local resource capacity required in each local area to meet energy needs used a 1-in-10 weather year and N-1-1(emergency) contingency. The CPUC also assesses penalties on the LSEs who fail to satisfy their RA obligations, including limiting the expansion of CCAs if they are deficient in their RA requirements.

Slice-of-Day Framework. The CPUC is also amid a significant change to the RA program by implementing a slice-of-day framework that assesses the hourly use of resources. The CPUC has been developing the new structure for a few years and in 2025 implemented the first year of the slice-of-day framework. The CPUC adopted a 17% planning reserve margin for the slice-of-day framework, consistent with previous planning reserve margins, to procure enough RA to meet load obligations in each hour rather than monthly. Under the slice-of-day framework, LSEs receive a 24-hour obligation for each of the 12 months of the year. The new RA framework requires that resources, including energy storage resources, demonstrate their ability to provide capacity during specific, critical hours rather than just a daily peak.

RA Compensation. Resources used to meet an LSE's RA requirement are compensated for the ability to call on the resource when needed, known as a "must-offer obligation." A resource that commits to providing RA undertakes the "must-offer obligation" to bid or self-schedule its capacity into the CAISO wholesale market, ensuring capacity is available for system reliability. When generators contract with LSEs to provide RA, they must make their capacity available or face penalties. The actual dispatch of resources to meet load in real-time is performed on an economic basis, with the lowest cost resources committed first. As such, RA resources must be offered into the wholesale market, but they may not be dispatched to serve load if there are less expensive resource bids available (including non-RA resources). The RA program provides an additional source of revenue beyond just actual energy sales. To qualify to sell RA, a resource

type must first be assigned a qualifying capacity (QC) from the CPUC, which represents a resource's maximum capacity eligible to be counted towards meeting its RA. The resource must then register with the CAISO and be tested to determine if it is "deliverable" to load when the transmission system is stressed by high demand. Following the deliverability assessment, each resource is assigned a net qualifying capacity ("NQC") value, which defines the amount of RA that it can sell. For intermittent resources like wind and solar, the NQC value is typically well below the nameplate capacity of the facility. Demand response and energy storage resources are eligible to provide RA value, while energy efficiency is generally subtracted from the load forecast. In the case of behind-the-meter energy storage resources, they do not receive value for their exports to the grid.

Comments

Need for this bill. According to the author:

> Californians are struggling with rising electricity bills, and we need to use our grid more intelligently and cost-effectively. Instead of always building expensive new infrastructure to meet just a few peak hours of demand, we should be making better use of the resources we already have in our homes. Millions of Californians already have tools like smart thermostats, home batteries, and electric vehicles that can help support the grid. SB 913 ensures we can use those resources to lower costs, reduce pollution, and improve reliability.

Supporters frustrated by the value of DERs and aggregated resources within the RA market. The supporters of this bill express frustrations that behind-the-meter DERs and aggregated resources are not able to compete fairly within the RA market. They contend that a myriad of existing rules at the CPUC and CAISO diminish the value of these resources to participate more fully in the wholesale market compared to other energy resources. They believe this bill is necessary to level the playing field and ensure these resources can provide their full benefit to the electrical system and as such help reduce costs for all customers. They point to the success of the CEC's DSGS Program which has enrolled over 1000 megawatts of DERs to participate in the program. The DSGS Program provides incentives to reduce customer net load during extreme events with upfront capacity commitments and for per-unit reductions in net load. The DSGS Program has been funded through the State Budget, however, the opportunity for future funds is less certain. The supporters contend that the continued growth of battery energy storage systems and electric vehicles, for example, presents an opportunity to aggregate these loads and help reduce consumption during peak periods, thereby reducing the

strain on the electric grid. They view these resources as untapped potential, noting that of the 2.5 million electric vehicles in California today, only around 25,000 are on managed charging programs, and that smart thermostats and smart electric panels add to the ability to reduce consumption when wholesale market prices skyrocket.

Various efforts to re-examine the value of energy storage and DERs, including aggregations, for RA. As noted above, both the CPUC and CAISO have important roles in developing the RA program and the values of the various energy resources used in the program. As DERs volume has grown and types have expanded, including solar, energy storage, electric vehicles, and others load-modifying resources (including the aggregation of thermostats) there is growing demand by stakeholders to better optimize their participation in the wholesale market by modifying load and to receive capacity value for their exported energy. The CAISO tariffs allow aggregations of DERs to participate in its markets. However, the issue of the full capacity value for behind-the-meter DERs and aggregation has continued to be pressed by stakeholders at the CPUC and CAISO for many years.

The CPUC has an open proceeding (R. 25-09-004, *Scoping Memo dated February 12, 2026*) which considers additional enhancements to demand response programs, including revisiting valuation methodologies, CAISO market integration topics, and RA valuation. Additionally, the CAISO also has a current working group, Demand and Distributed Energy Market Integration Working Group, that is actively discussing enhancements to, or development of, participation models and market rules facilitating the representation of demand and distributed energy, either independently or managed aggregation, in the CAISO wholesale markets. CAISO demand and distributed energy market integration initiative was launched in February 2025 and issued a Discussion Paper on November 26, 2025, which is now helping to shape priorities for these issues, including the value of behind-the-meter energy storage exports, value of aggregated DERs, and other related issues raised in this bill.

Bill seeks CPUC decisions on RA capacity outcomes. This bill intends to encourage the CPUC and CAISO to adopt enhancements to existing rules in order to achieve the supporters' goals to attain greater capacity value for aggregated DERs within the RA program. This bill requires the CPUC to evaluate the value for energy exports from behind-the-meter energy, aggregation of these resources, multiple devices and multiple enrollments behind the same customer meter, using device telemetry, and customer enrollments that require utility login or other barriers. This bill provides the CPUC the opportunity to address these

considerations within the CPUC proceedings and CAISO initiatives, particularly as they may need to address how such efforts may affect other program participation and compensation. The supporters of this bill support legislative direction and requirements to ensure the CPUC fully considers the use of DERs within RA program.

Related/Prior Legislation

SB 1138 (Padilla, 2026) would have required the CPUC to allow LSEs to satisfy 25% of their RA requirements by trading energy capacity with other LSEs. The bill was held by the Assembly Appropriations Committee.

AB 740 (Harabedian, 2025) would have required the CEC, in the next update to the biennial integrated energy policy report after January 1, 2027, and subject to available funding, to adopt a virtual power plant deployment plan. The bill was vetoed.

AB 44 (Schultz, 2025) would have required the CEC, on or before December 1, 2026, and in consultation with LSEs and resource aggregators, to define and publicize methodologies for load modification protocols by which a LSE may reduce or modify its electrical demand forecast upon aggregated system operation of behind-the-meter load modifying technologies and programmatic measures deemed to reliably reduce or modify the LSE's electrical demand. The bill was vetoed.

SB 541 (Becker, 2025) would have required the CEC, in consultation with specified entities, to analyze the cost-effectiveness of specific load flexibility programs and other types of load-shifting interventions and identify both the approximate amount of load shifting and the cost-effectiveness of each type of load-shifting intervention in the next update to the biennial integrated energy policy report after January 1, 2027, as provided. The bill was vetoed.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

This bill will entail considerable costs for the CPUC, likely in the millions of dollars, to establish conditions under which a DER located on the customer side of the electric utility meter may export electricity past the utility meter, revise the RA program in keeping with bill and complete other activities.

For its part, the CPUC asserts it will need $7.5 million (Public Utilities Commission Utilities Reimbursement Account), though the CPUC did not attribute these costs to specific activities or personnel, contracting or equipment needs.

Costs to the CEC to coordinate with the CPUC should be minor and absorbable.

OPPOSITION: (Verified 8/24/26)

Coalition of California Utility Employees
Independent Energy Producers Association
Two Individuals

ARGUMENTS IN SUPPORT: According to the California Solar and Storage Association:

> DERs are currently eligible to provide Resource Adequacy, but several rules prohibit them from providing their full capacity. In particular, DERs currently do not receive any credit for energy that is exported past the customer's utility meter onto the distribution system, significantly capping the potential for these resources to provide peak capacity when California's grid needs it the most. Consequently, this rule and several others have limited DERs' ability to provide Resource Adequacy as an additional resource that is available to utilities. …This bill would put DERs on equal footing with large resources and allow them to compete and be called upon when they are a cost-effective resource.

This will help put downward pressure on rates as it lowers the cost that load-serving entities pay for Resource Adequacy, and it will be a source of clean peak capacity.

ARGUMENTS IN OPPOSITION: According to the Coalition of California Utility Employees:

> …there is no guarantee that that the DERs would actually provide resource adequacy. Allowing DERs to count for full resource adequacy credit is problematic if the DERs are not operated or controlled by the IOUs. There is no way to control third-party operation of them and imposing a penalty if the capacity is not delivered is not enough. History shows that penalties are just a part of doing business. This bill would count a DER as capacity even though it might not be available to a load serving entity to benefit the grid because it's being used to benefit the private interest of the customer.

NO VOTE RECORDED: Alvarado-Gil, Gonzalez, Grove, Niello

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Civil actions: housing development projects

SOURCE: Student Homes Coalition

DIGEST: This bill provides a mechanism for a defendant in a civil action, including under the California Environmental Quality Act (CEQA), challenging a project that is a student housing project, as defined, to seek an order requiring the plaintiff to furnish an undertaking as security for costs and damages that may be incurred by the defendant if the bringing of the action by the plaintiff would result in preventing or delaying the project.

Assembly Amendments make clarifying changes and chaptering out amendments.

ANALYSIS:

Existing law:

1) Requires lead agencies with the principal responsibility for carrying out or approving a proposed discretionary project to prepare a negative declaration, mitigated declaration, or environmental impact report (EIR) for this action, unless the project is exempt from CEQA (CEQA includes various statutory exemptions, as well as categorical exemptions in the CEQA Guidelines). (Public Resources (Pub. Res.) Code § 21100 et seq.)

2) Sets requirements relating to the preparation, review, comment, approval and certification of environmental documents, as well as procedures relating to an action or proceeding to attack, review, set aside, void, or annul various actions of a public agency on the grounds of noncompliance with CEQA. (Pub. Res. Code § 21165 et seq.)

3) Authorizes judicial review of CEQA actions taken by public agencies, following the agency's decision to carry out or approve the project, and specifies certain time periods in which an action must be instituted depending on the type of claim alleged. (Pub. Res. Code § 21167.)

4) Requires the superior court and court of appeal to provide lawsuits related CEQA preference over all other civil actions therein, in the matter of setting the same for hearing or trial, and in hearing the same, to the end that the action or proceeding is to be quickly heard and determined. (Pub. Res. Code § 21167.1(a).)

5) Provides that in all civil actions, including those brought by any plaintiff to challenge a housing development project which is a development project which meets or exceeds the requirements for low- or moderate-income housing, a defendant may apply to the court by noticed motion for an order requiring the plaintiff to furnish an undertaking as security for costs and any damages that may be incurred by the defendant by the conclusion of the action or proceeding as the result of a delay in carrying out the development project if the bringing of the action has the effect of preventing or delaying the project from being carried out. (Code of Civil Procedure § 529.9(a).)

6) Provides that a defendant seeking a security in accordance with 5), above, must make a motion for that security on the grounds that the action is without merit

and was brought in bad faith, vexatiously, for the purpose of delay, or to thwart the low- or moderate-income nature of the housing development project. (*Ibid*.)

7) Authorizes the plaintiff, in response to a motion for an undertaking made under 5), above, to seek to limit the amount of the undertaking by presenting admissible evidence that filing an undertaking will cause it, and in cases where the plaintiff is an unincorporated association, its members, to suffer undue economic hardship. (*Id*. at subd. (b).)

8) Requires the court, if the court determines after a hearing that the grounds for the motion have been established, to order the plaintiff to file the undertaking in an amount specified in the court's order, taking into consideration any admitted evidence of plaintiff's economic hardship and avoiding to cause the plaintiff to suffer undue economic hardship, as security for costs and damages of the defendant.
   a) The liability of the plaintiff for the costs and damages of the defendant is not to exceed $500,000.
   b) If the court concludes, based on all of the admissible evidence presented, that a bond in any amount would cause the plaintiff undue economic hardship, the court is authorized in its discretion to decline to impose a bond.
   c) If at any time after the plaintiff has filed an undertaking the housing development plan is changed by the developer in bad faith so that it fails to meet or exceed the requirements for low- or moderate-income housing, the developer is liable to the plaintiff for the cost of obtaining the undertaking. (*Ibid*.)

9) Authorizes a defendant, in any litigation pending in any court of this state and at any time until final judgment is entered, to move the court upon a notice and a hearing for an order requiring the plaintiff to furnish security.
   a) Provides that the motion for an order requiring the plaintiff to furnish security must be based upon the ground, and supported by a showing, that the plaintiff is a vexatious litigant and that there is not a reasonable probability that they will prevail in the litigation against the moving defendant. (Code of Civ. Proc. § 391.1.)

This bill:

1) Expands existing Code of Civil Procedure Section 529.9 to also apply to actions challenging a student housing project.

2) Defines "student housing project" as one or more housing facilities to be occupied by students of one or more campuses and owned by a public university, including dining, academic, and student support service spaces, and other necessary and usual attendant and related facilities and equipment.

3) Makes chaptering out amendments.

Comments

Enacted in 1970, CEQA requires state and local agencies to follow a set protocol to disclose and evaluate the significant environmental impacts of proposed projects and to adopt feasible measures to mitigate those impacts. CEQA itself applies to projects undertaken or requiring approval by public agencies, and, if more than one agency is involved, CEQA requires one of the agencies to be designated as the "lead agency." The environmental review process required by CEQA consists of: (1) determining if the activity is a project; (2) determining if the project is exempt from CEQA; and (3) performing an initial study to identify the environmental impacts and, depending on the findings, prepare either a Negative Declaration (for projects with no significant impacts), a Mitigated Negative Declaration (for projects with significant impacts but that are revised in some form to avoid or mitigate those impacts), or an EIR (for projects with significant impacts).

An EIR must accurately describe the proposed project, identify and analyze each significant environmental impact expected to result from the proposed project, identify mitigation measures to reduce those impacts to the extent feasible, and evaluate a range of reasonable alternatives to the proposed project. Before approving any project that has received environmental review, an agency must make certain findings pertaining to the project's environmental impact and any associated mitigation measures. If mitigation measures are required or incorporated into a project, the public agency must adopt a reporting or monitoring program to ensure compliance with those measures. To enforce the requirements of CEQA, a civil action may be brought under several code sections to attack, review, set aside, void, or annul the acts or decisions of a public agency for noncompliance with the act.

Unlike other environmental laws specific to air resources, water resources, or the control of toxic substances, there is no statewide bureaucracy charged with enforcement of CEQA. Rather, it is enforced through citizen participation and litigation if necessary. Arguably, this makes the implementation of CEQA more efficient and expeditious than if a state agency were created to administer the law. Thus, CEQA litigation could more appropriately be characterized as mere enforcement.

"CEQA operates, not by dictating proenvironmental outcomes, but rather by mandating that 'decision makers and the public' study the likely environmental effects of contemplated government actions and thus make fully informed decisions regarding those actions. … In other words, CEQA does not care what decision is made as long as it is an informed one." (Citizens Coalition Los Angeles v. City of Los Angeles (2018) 26 Cal. App. 5th 561, 577.)

SB 393 (Glazer, Chapter 285, Statutes of 2024) amended an existing provision of law (Code of Civil Procedure § 529.2) that provided a mechanism for a defendant in a civil action challenging a housing project which is a development project that meets or exceeds the requirements for low- or moderate-income housing to seek an order requiring the plaintiff to furnish an undertaking as security for costs and damages that may be incurred by the defendant if the bringing of the action by the plaintiff would result in preventing or delaying the project. Prior to the enactment of SB 393, the defendant had the burden of making a showing that the posting of the undertaking would not place an undue hardship on the plaintiff. SB 393 shifted the burden to the plaintiff to demonstrate that posting a bond would place an undue economic hardship on the plaintiff, arguing that the plaintiff is the one who has the information to make such a showing and therefore it was more appropriate to place that burden on the plaintiff.

This bill seeks to enact a similar mechanism for a defendant in a civil action, including an action under CEQA, challenging a project that is a student housing project. This bill allows such a defendant to seek an order requiring the plaintiff to furnish an undertaking as security for costs and damages that may be incurred by the defendant if the bringing of the action by the plaintiff would result in preventing or delaying the project. "Student housing project" is defined as one or more housing facilities to be occupied by students of one or more campuses and owned by a public university, including dining, academic, and student support service spaces, and other necessary and usual attendant and related facilities and equipment.

In 2023, the Office of the President of the University of California (UC) reported that since 2018, seven housing projects had been challenged by CEQA litigation and that approximately 4,100 beds were affected by ongoing litigation at that time. This same report stated that the UC "provides housing opportunities that are generally at least 20 percent below market rate" and that "the supply of beds despite new inventory has not been able to keep up with the demand and increased enrollment." The report noted that "CEQA litigation creates significant delay for delivery of housing projects, while the threat of CEQA litigation and its inherent unpredictability slows the housing project entitlement process." Campus housing

plans, as of 2023, included funding for "22,000 student beds between fall 2023 and fall 2028" and future plans of an "additional 16,000 beds," which if funded, could lead to an additional 38,000 future beds. The California State University Systemwide Housing Plan states that "market demand for Fall 2030 is estimated at 15,370 beds, up from an estimated 13,250 in the 2022 plan."

ARGUMENTS IN SUPPORT: The author writes:

> While California has made meaningful progress in addressing its housing crisis, a significant shortage still persists. Students across the higher education system are among the most severely affected by the housing shortage. An estimated 417,000 students across the UC, CSU, and CCC systems lack stable housing, and more than 30,000 students are on waiting lists for housing provided by these universities.
>
> SB 916 aims to protect student housing by clarifying that courts have discretion to require a bond in lawsuits challenging student housing. While existing law

already grants courts this discretion for affordable housing projects, it does not extend the same protection to student housing. By closing this gap, SB 916 will allow much-needed student housing projects to proceed without barriers or unnecessary delays.

The Student Homes Coalition, the sponsor of this bill, writes in support stating:

> […] The need for more housing on college campuses is dire. UC[s] and CSUs are only able to house 39% and 14% of their students respectively, while just 16 out of 116 Community Colleges operate any housing at all. The student housing shortage is not due to lack of interest in development, but rather regulatory barriers that render university projects infeasible. Students pay the price both literally and figuratively for outdated housing regulations. Increased construction costs limit supply and raise rents, and the tens of thousands of students who can't keep up with rising costs end up homeless every year.
> The California Environmental Quality Act (CEQA) is a major driver of housing unaffordability on our campuses. Interest groups and community members often weaponize CEQA to block campus housing projects at the expense of California's students. According to the UC Regents, 7 UC student housing projects were sued under CEQA in just five years between 2018 and 2022.
>
> Litigation delays projects and drives up housing costs, resulting in fewer available units, increased student homelessness.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: The Gambling Control Act: regulatory fees

SOURCE: Communities for California Cardrooms

DIGEST: This bill requires the California Gambling Control Commission (Commission) and the Department of Justice (DOJ), upon the adoption or amendment of a fee that is deposited into the Gambling Control Fund (Fund), the

Commission or DOJ to post on its public internet website a detailed statement of the need for, purpose of, and authorized use of the fee, as specified.

Assembly Amendments delete the requirement that the Commission and DOJ adopt and maintain a regulate that states the authorized purpose and use of the fee.

ANALYSIS:

Existing law:

1) Establishes, under the Gambling Control Act (Act), the Commission, which is responsible for licensing and regulating various gambling activities and establishments. Under the Act, the Bureau of Gambling Control (Bureau), under DOJ, is responsible for investigating any violations of, and enforcing controlled gaming activities under the Act. (Business and Professions Code section 19800 et seq.)

2) Vests DOJ with the responsibility to investigate violations of prohibitions against specified gambling activities, as enumerated in the Penal Code, including, among others, prohibitions against lotteries, certain games played with cards, dice or any device, or money, and slot machines.

3) Establishes the Fund within the State Treasury and provides that funds shall be available, upon appropriation by the Legislature, for expenditure by DOJ and the Commission exclusively for the support of DOJ and the Commission in carrying out their duties and responsibilities under the Act.

4) Requires, with respect to fees, the regulations to include a prescribed manner and method for the collection and payment of fees and issuance of licenses.

This bill:

1) Requires the Commission and DOJ, upon the adoption or amendment of a fee that is deposited into the Fund, to post on its public internet website a detailed statement of the need for, purpose of, and authorized use of the fee, as specified.

2) Provides that the provisions of this bill do not apply to any fee adopted or amended prior to January 1, 2027

Background

Author Statement. According to the author's office, "SB 920 will ensure that all fees collected under the [Act] are clearly tied to their specified regulatory purposes and that stakeholders – including licensees, public officials, and the public – can readily understand how fee revenues are used to support the oversight responsibilities of the [Commission] and the [DOJ]. Under current law, when fees are set or adjusted, the purpose and cost basis aren't consistently laid out in regulation. This makes budgeting opaque, invites cross-subsidies, and fuels friction in rulemaking. An audit report on Fund fees completed in 2018 identified this as an issue and recommended that the Legislature take action. SB 920 implements that recommendation and ensures transparency surrounding Act fees."

California's Cardrooms. California's cardrooms have operated in some capacity since the Gold rush era. Currently, there are approximately 83 cardrooms that operate in 32 counties in California. There are approximately 2,203 tables licensed for play statewide, many of which are located in Los Angeles, the Central Coast, the Bay Area, and the Central Valley. A small percentage are large in scale, the rest are smaller operations, sometimes as small as one table, scattered throughout the state. The industry generates roughly $850 million in revenue after winnings. Cardrooms and their owners are subject to state business and income taxes. Additionally, about $24 million in fees are projected to be collected annually from the industry to support state regulatory and problem gaming costs.

The Act provides the Commission with jurisdiction over the operation of gambling establishments in California. The Act requires every owner, lessee, or employee of a gambling establishment to obtain and maintain a valid state gambling license and assigns the Commission with responsibility of assuring that gambling licenses are not issued to, or held by, unqualified or disqualified persons, or by persons whose operations are conducted in a manner that is harmful to the public health, safety, or welfare. The Act directs the Commission to issue licenses only to those persons of good character, honesty and integrity; whose prior activities, criminal record, if any, reputation, habits, and associations do not pose a threat to the public interest of this state.

The DOJ, through the Bureau, monitors the conduct of gaming operations to ensure compliance with state gambling laws and conducts extensive background investigations of applicants seeking a state gambling license. The Bureau also conducts background checks for all key employees and state gambling licensees and vendor applications. The Bureau also inspects premises where gambling is conducted, examines gambling equipment, audits papers, books, and records of the

gambling establishment, investigates suspected violations of gambling laws, and is ultimately responsible for enforcing compliance with all state laws pertaining to gambling.

Existing law establishes the Fund in the State Treasury and provides that funds should be used, upon appropriation by the Legislature, for expenditure by DOJ and the Commission exclusively for the support of DOJ and the Commission in carrying out their duties and responsibilities under the Act.

State Auditor Report. In May 2019, the California State Auditor (Auditor) released a report titled, *Bureau of Gambling Control and California Gambling Control Commission: Their Licensing Processes are Inefficient and Foster Unequal Treatment of Applicants.* The audit examined how the DOJ's and the Commission's process licenses for individuals and businesses working in California's cardroom gaming industry.

The audit concluded that both agencies have implemented fee structures that result in unequal treatment of license applicants. Although the audit did not find evidence of discrimination by either entity based on applicants' ethnicity or other protected characteristics, it determined that the DOJ's incomplete and inconsistent procedures led to disparities in the level of scrutiny applied to different applicants. Relevant to this bill, the audit also found that neither the DOJ nor the Commission has addressed the misalignment between the fees they collect and the actual costs of providing regulatory oversight. The audit noted that this misalignment has contributed to a substantial surplus in the Fund and may raise questions regarding the legality of certain fees.

In order to ensure that all fees that generate revenue for the Fund have a clear, stated purpose limiting their use, the Auditor recommends that, "the Legislature should require that when updating fee amounts, the commission and the bureau must also update their regulations to include clear statements about the need for an appropriate use of each type of fee." Based on that recommendation, this bill would require the Commission and DOJ, upon the adoption or amendment of a fee that is deposited into the Fund, the Commission or DOJ to post on its public internet website a detailed statement of the need for, purpose of, and authorized use of the fee, as specified.

Related/Prior Legislation

SB 451 (Archuleta, Chapter 584, Statutes of 2025) clarifies the DOJ's authority to investigate suspected violations of illegal gambling activities conducted outside of

licensed cardrooms, irrespective of whether the suspected violation involves licensees.

AB 553 (Ramos, Chapter 533, Statutes of 2023) requires DOJ to develop and implement a policy and procedure for employees assigned to the Bureau to formally track those house and other expenses that can be charged to the Indian Gaming Special Distribution Fund, as specified.

AB 1268 (Patterson) of 2022 would have required the Commission and DOJ, when increasing a fee amount, to include a clear statement justifying the need for the fee increase and explaining how the funds will be used in the regulation updating the fee. (Never Heard in the Assembly Governmental Organization Committee)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, costs to the Commission to update regulations to reflect the collection of new or adjusted fees and post related information on the CGCC's website (Gambling Control Fund). However, the Commission notes that this bill places regulatory burdens on the Commission beyond what other agencies face when setting fees, which may delay future annual fee adjustment rulemaking proceedings and result in a temporary overcollection or under collection of outdated fee amounts that may not align with the most recent cost and fee data. The Commission further notes that such outdated fee amounts would temporarily result in a proportionate surplus or shortall of an unknown magnitude in the Gambling Control Fund until regulations are appropriately updated through the regular rulemaking process, which includes specified public comment and review periods.

Additionally, minor absorbable costs to DOJ to similarly update regulations and post information online. However, potential impact of an unknown magnitude to the Gambling Control Fund to the extent DOJ also faces delays when adopting or adjusting fees as a result of this bill.

Communities for California Cardrooms (source)

OPPOSITION: (Verified 8/20/26)

None received

ARGUMENTS IN SUPPORT: According to the Communities for California Cardrooms, "this provision is an important step toward ensuring that all fees collected under the [Act] are clearly tied to their specified regulatory purposes and that stakeholders – including licensees, public officials, and the public – can readily understand how fee revenues are used to support the oversight responsibilities of the [Commission] and the [Bureau]. By requiring published statements of purpose and cost basis summaries, SB 920 advances good governance practices and promote greater transparency in fee adoption and expenditure and protect the integrity of regulatory funding mechanisms."

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Consumer privacy requests: deletion request records and request submission methods

SOURCE: California Privacy Protection Agency

DIGEST: This bill expands consumers' right to deletion of their personal information pursuant to the California Consumer Privacy Act (CCPA) and requires specified online businesses to provide consumers an online method for exercising rights under the CCPA.

Assembly Amendments add a series of related findings and declarations and make technical changes.

ANALYSIS:

Existing law:

1) Establishes the CCPA, which grants consumers certain rights with regard to their personal information, including enhanced notice, access, and disclosure; the right to restrict the sale or sharing of information; and protection from discrimination for exercising these rights. It places attendant obligations on businesses to respect those rights. (Civil (Civ.) Code § 1798.100 et seq.)

2) Provides a consumer the right, at any time, to request that a business delete any personal information about the consumer which the business has collected from the consumer, except as specified. Businesses must disclose this right to consumers. (Civ. Code § 1798.105.)

3) Requires a business that receives a verifiable consumer request from a consumer to delete the consumer's personal information to delete the consumer's personal information from its records, notify any service providers or contractors to delete the consumer's personal information from their records, and notify all third parties to whom the business has sold or shared the personal information to delete the consumer's personal information unless this proves impossible or involves disproportionate effort. (Civ. Code § 1798.105.)

4) Requires businesses to make available to consumers two or more designated methods for submitting requests for information required to be disclosed, or requests for deletion or correction, respectively, including, at a minimum, a toll-free telephone number. A business that operates exclusively online and has a direct relationship with a consumer from whom it collects personal information shall only be required to provide an email address for submitting such requests, as provided. If the business maintains a website, it must make the website available to consumers to submit requests for information required to be disclosed or requests for deletion or correction (Civ. Code § 1798.130(a)(1).)

5) Defines "personal information" as information that identifies, relates to, describes, is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household. The CCPA provides a nonexclusive series of categories of information deemed to be personal information, including identifiers, biometric information, and geolocation data. (Civ. Code § 1798.140(v).) The CCPA defines and provides additional protections for sensitive personal information, as defined, that reveals specified personal information about consumers. (Civ. Code § 1798.140(ae).)

6) Establishes the CPRA, which amends the CCPA and creates the California Privacy Protection Agency (CalPrivacy), which is charged with implementing these privacy laws, promulgating regulations, and carrying out enforcement actions. (Civ. Code § 798.100 et seq.; Proposition 24 (2020).)

7) Permits amendment of the CPRA by a majority vote of each house of the Legislature and the signature of the Governor, provided such amendments are consistent with and further the purpose and intent of this act as set forth therein. (Proposition 24 § 25 (2020).)

This bill:

1) Grants consumers the right to request that a business delete any personal information about the consumer which the business has collected.

2) Provides that a business that has obtained personal information about a consumer from a source other than the consumer shall be deemed in compliance with a consumer's request to delete that data by retaining a record of the deletion request and the minimum data necessary for the purpose of ensuring the consumer's personal information remains deleted from the business's records and is not being used for any other purpose.

3) Requires a business that operates exclusively online and has a direct relationship with a consumer from whom it collects personal information to make an online method, such as a web form or online portal, available for submitting requests.

4) States the finding that these changes further the purposes and intent of the CPRA.

5) Makes a series of related findings and declarations.

Background

The CCPA grants consumers certain rights with regard to their personal information, including enhanced notice, access, and disclosure; the right to deletion; and protection from discrimination for exercising these rights. (Civ. Code § 1798.100 et seq.) In the November 3, 2020, election, voters approved Proposition 24, which established the California Privacy Rights Act of 2020 (CPRA). The CPRA amends the CCPA, limits further amendment, and creates the California Privacy Protection Agency ("CalPrivacy"). Relevant here, the CCPA provides a consumer the right, at any time, to request that a business delete any personal information about the consumer which the business has collected *from* the

consumer. To provide greater protection, this bill now extends this deletion right to all information a business has about the consumer and updates the appropriate process for complying with such a request.

The CCPA requires businesses to make multiple methods available to consumers for submitting requests pursuant to that law. However, businesses that operate exclusively online are only required to make an email address available for such purposes. This bill additionally requires such online businesses to make another online method, such as a webform or portal available for such purposes. This bill is sponsored by CalPrivacy. It is supported by a number of privacy and consumer advocacy groups, including Kapor Center Advocacy and the California Initiative for Technology & Democracy. It is opposed by a coalition of industry groups, including the Association of National Advertisers. For a more thorough analysis of this bill and its provisions, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis, which is incorporated herein.

Comments

The CCPA grants a consumer the right to request that a business delete any personal information about the consumer that the business has collected from the consumer. However, a business is not required to comply with such a request to delete if it is necessary for the business to maintain the consumer's personal information in order to carry out certain obligations or other conduct.

A business that receives a verifiable consumer request from a consumer to delete the consumer's personal information must delete the consumer's personal information from its records, notify any service providers or contractors to delete the consumer's personal information from their records, and notify all third parties to whom the business has sold or shared the personal information to delete the consumer's personal information unless this proves impossible or involves disproportionate effort.

Businesses are also required, pursuant to the CCPA, to make available to consumers two or more designated methods for submitting various requests for information required to be disclosed, or requests for deletion or correction, including, at a minimum, a toll-free telephone number. However, a business that operates exclusively online and has a direct relationship with a consumer from whom it collects personal information is only required to provide an email address for submitting such requests, as provided. If the business maintains a website, it must make the website available to consumers to submit requests for information required to be disclosed or requests for deletion or correction.

According to the author:

> Businesses today routinely augment consumer records with data purchased from third parties to enhance targeting, personalization, and profiling. For example, a retail company might collect basic information directly from the consumer and then purchase detailed demographic data, purchasing histories, and other behavioral information from data brokers to create a rich profile used for marketing and pricing decisions.
>
> The CCPA's current right to deletion targets data a business collects from consumers, but not the full scope of data a company may hold and use to make decisions about individuals. Additionally, it may make businesses more vulnerable to security incidents like data breaches — even after a consumer has taken steps to protect the privacy and security of their information.
>
> Additionally, while most businesses must provide two or more methods to submit privacy requests, online-only businesses that have a direct relationship with the consumer are only required to provide an email address for consumers to submit most privacy requests under the CCPA. This single-method requirement for certain businesses creates barriers for consumers because it offers minimal support or guidance.
>
> Californians should have accessible and frictionless mechanisms to exercise their existing privacy rights, and when they do so, they should feel secure in knowing they've protected themselves from unwanted data retention.
>
> This bill would strengthen consumers' rights under the California Consumer Privacy Act (CCPA) by expanding the right to delete to cover all personal information a business holds about them, and by requiring online businesses to provide consumers with a webform, online portal, or similar method to submit requests to delete their personal information. By expanding the CCPA's right to delete personal information, and by improving how consumers can exercise that right, this bill further empowers Californians to take measures to protect their personal information should they choose.

As stated, this bill extends consumers' deletion rights by extending them to all information collected by a business *about* the consumer, regardless of where it is

collected from. Additionally, for businesses operating exclusively online that have a direct relationship with a consumer, this bill now requires they make an online method available.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The California Privacy Protection Agency (CalPrivacy) anticipates minor near term implementation and enforcement costs. CalPrivacy is responsible for enacting and enforcing the CCPA and promoting public awareness of consumers' privacy rights and businesses' obligations. Based on overall compliance with the requirements of this bill, additional resources for enforcement may be required in future years.

- The Consumer Protection Section within the Public Rights Division of the Department of Justice (DOJ) anticipates increased workload to investigate and prosecute violations of this bill's expanded consumer deletion rights and new online request requirements as well as provide technical support to review compliance with these new requirements.

According to the Assembly Appropriations Committee:

- Costs of $600,000 or less annually (Consumer Privacy Fund, General Fund) to the Department of Justice (DOJ), beginning January 1, 2027, to investigate and prosecute violations of the expanded deletion right and online-method requirement, provide technical support to review compliance, and respond to increased consumer inquiries and complaints. DOJ reports the Consumer Protection Section requires a deputy attorney general and a legal secretary, and the Public Inquiry Unit within the DOJ, which receives CCPA complaints in significant volume, requires an analyst. DOJ notes the Consumer Privacy Fund is the appropriate fund source for these activities but reports insufficient cash in that fund at this time, requiring General Fund support, and states the costs cannot be absorbed within existing budgeted resources.

- Enforcement costs to the California Privacy Protection Agency (CalPrivacy), which CalPrivacy anticipates will be absorbable in the near term (Consumer Privacy Fund). CalPrivacy reports the volume of potential investigations already vastly exceeds available resources, and that expanding the scope of the CCPA may add questions to existing investigations but is unlikely to measurably increase short-term workload given a large backlog. CalPrivacy

notes that, depending on overall compliance with the bill's requirements, enforcement may require additional resources in future years.

ARGUMENTS IN SUPPORT: CalPrivacy writes:

> [T]he existing right to delete under the CCPA only requires deletion of personal information collected from the consumer and therefore does not address the full scope of personal information held and used by a business to make decisions about the individual. It could create a false sense of protection by failing to address personal information collected from third parties. It also leaves a portion of a consumer's personal information vulnerable to security incidents like data breaches even after a consumer has taken steps to protect the privacy and security of their information by requesting deletion.

Extending the right to delete to all personal information held about a consumer provides more meaningful privacy protections and aligns better with consumer intent and expectations. When a consumer submits a request to delete, they should have confidence that all their personal information will be deleted regardless of how the business collected the information.

SB 923 also supports consumers by improving the accessibility of privacy rights under the CCPA. This bill makes it easier for consumers to exercise their rights by requiring online-only businesses to offer multiple methods to submit privacy requests, rather than only requiring an email address.

ARGUMENTS IN OPPOSITION: A coalition of industry groups, including the California Chamber of Commerce, writes:

[T]he bill fails to recognize that a business should also be deemed in compliance with a consumer's request to delete their data by opting the consumer out of processing for non-exempt purposes, in addition to retaining the minimum data necessary to honor the deletion request.

While the exemptions under Civil Code Sec. 1798.150 presumably apply, explicitly including this language provides clarity, particularly when this bill appears modeled upon other states like Virginia that have expressly adopted both limitations upon the right of deletion. From an operational and legal perspective, this language is essential to prevent confusion, to ensure technical scalability, and to allow businesses to fulfill obligations related to fraud prevention, security monitoring, and legal compliance.

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Nitrous oxide: sales

SOURCE: County of Orange; National Stewardship Action Council; Rural Counties of California; San Diego County District Attorney's Office

DIGEST: This bill creates four new infractions related to the sale or distribution of nitrous oxide, including making it unlawful to sell, offer to sell, or distribute a nitrous oxide container that is capable of holding more than eight grams of nitrous

oxide or a nitrous oxide container from which an individual may directly inhale nitrous oxide, except as specified.

Assembly Amendments prohibit a person who is engaged in the business of selling cigarettes or tobacco products from possessing, storing, owning, or selling nitrous oxide in violation of the criminal provisions in this bill at any site where cigarettes and tobacco products are stored or sold; subject a violator to civil penalties in amounts depending on the aggregate retail value of the seized nitrous oxide and the number of violations within five years of the first violation; and establish procedures for the California Department of Tax and Fee Administration to follow for a court-ordered tobacco retailer license revocation.

ANALYSIS:

Existing law:

1) Defines "nitrous oxide" to mean any of the following substances: N2O, dinitrogen monoxide, dinitrogen oxide, nitrogen oxide, or laughing gas. (Penal (Pen.) Code § 381c, subdivision (subd.) (a).)

2) Makes it a misdemeanor to sell, furnish, administer, distribute, give away, or offer to sell, furnish, administer, distribute, or give away a device, canister, tank, or receptacle containing nitrous oxide to a person under 18 years of age. (Pen. Code § 381c, subd. (b).)

3) Makes it a misdemeanor to dispense or distribute nitrous oxide to a person if the dispenser or distributor of the nitrous oxide knows or should know that the person is going to use the nitrous oxide for the purpose of intoxication, and that person proximately causes great bodily injury or death to himself, herself, or another person. (Pen. Code § 381d.)

4) Requires that a person who dispenses or distributes nitrous oxide record each transaction in a written or electronic document. (Pen. Code § 381e.)

5) Provides that the person dispensing or distributing the nitrous oxide require the purchaser to sign the document recording the transaction, provide a complete residential address, and present valid government-issued photo identification. Existing law also requires that the person dispensing or distributing the nitrous oxide sign and date the document and retain the document at the person's

business address for one year from the date of the transaction for inspection. (Pen. Code § 381e.)

6) Requires that the document signed by the purchaser include all of the following:

   a) That inhalation of nitrous oxide outside of a clinical setting may have dangerous health effects.
   b) That it is a violation of state law to possess nitrous oxide with the intent to breathe, inhale, or ingest it for the purpose of intoxication.
   c) That it is a violation of state law to knowingly distribute or dispense nitrous oxide to a person who intends to breathe, inhale, or ingest it for the purpose of intoxication. (Pen. Code § 381e.)

This bill:

1) Makes it unlawful for any person to sell, offer to sell, or distribute a nitrous oxide container that is capable of holding more than eight grams of nitrous oxide, except as provided.

2) Makes it unlawful for any person to sell, offer to sell, or distribute a nitrous oxide container which an individual may directly inhale nitrous oxide, except as provided.

3) Makes it unlawful to sell or distribute nitrous oxide that has, or is marketed as having, the taste or smell of any food, including, but not limited to, any fruit, candy, dessert, alcoholic beverage, herb, or spice, that is distinguishable by an ordinary consumer either prior to or during consumption or use of the product.

4) Makes it unlawful to sell, offer to sell, or distribute a device that allows an individual to inhale nitrous oxide from the nitrous oxide container or to hold nitrous oxide released from the nitrous oxide container for purposes of inhalation.

5) Provides that a violation of the above provisions is punishable as an infraction. Specifies that the penalties are a fine of not more than $500 for the first offense, $1,000 for a second offense, or $2,000 for a third and subsequent offense.

6) Authorizes a court to issue either of the following orders:

a) The suspension of a business license issued by the state, a city, a county, or a city and county, for a period of up to one year, of a business that knowingly violates the provisions of this bill following a prior conviction.
b) The revocation of a license issued pursuant to the Cigarette and Tobacco Products Licensing Act of 2003, of a business that knowingly violates any of the above provisions following two prior convictions.

7) Requires the court to provide a copy of any suspension order to the appropriate regulating agency.

8) Specifies that its provisions do not apply to nitrous oxide or a nitrous oxide container that meets any of the following:

a) Has been denatured or otherwise rendered unfit for human consumption for use.
b) Is intended and marketed for use by a manufacturer as part of a manufacturing process or industrial operation.
c) Is specifically designed and marketed for use in a vehicle to enhance the performance of the vehicle.
d) Is sold to a licensed medical or dental practitioner to be administered or prescribed as part of the care or treatment of a disease, condition, or injury.
e) Contains less than nine grams of nitrous oxide as a propellant in food or to be used in food preparation for restaurant, food service, or houseware products.
f) Is sold by a wholesaler for any of the above listed purposes.

9) Provides the following definitions:

a) "Distributor" means a person who sells a product to a retailer in violation of the provisions of this bill, or accepts an order for a product from a retailer in violation of the provisions of this bill.
b) "Nitrous oxide container" means "a device, canister, tank, or receptacle either exclusively containing nitrous oxide or exclusively containing a chemical compound mixed with nitrous oxide."
c) "Nitrous oxide" has the same meaning as it does in existing law.

10) Provides that a reference to a sale, offer to sell, distribution, advertisement, or provision of a product or service includes conduct that occurs in person, through the internet, or through any other electronic or digital means.

11) Specifies that the provisions of this bill do not limit the authority of a city, county, or city and county to adopt or enforce a local ordinance that further restricts the sale, furnishing, offering, or distribution of nitrous oxide.

Background

Nitrous oxide is a colorless, odorless to sweet-smelling gas used to manage pain and anxiety in dentistry as well as other clinical settings. (American Dental Association, *Nitrous Oxide* <https://www.ada.org/resources/ada-library/oral-health-topics/nitrous-oxide .) In addition, it is used in food preparation and as an oxidizer in model rockets and motor vehicle racing.

Nitrous oxide is also misused as a recreational drug and produces short-lived euphoric and hallucinogenic effects. It is consumed in the form of whippets—balloons filled with the gas via small, pressurized canisters designed to be used in whipped cream dispensers. Nitrous oxide has become increasingly popular, particularly among teens and young adults, due to its low cost and availability online and in grocery and convenience stores, gas stations, and shops that sell vapes and other tobacco-related products. (Centers for Disease and Control, *Notes from the Field: Recreational Nitrous Oxide Misuse—Michigan, 2019-2023* (Apr. 10, 2025) <https://www.cdc.gov/mmwr/volumes/74/wr/mm7412a3.htm .) Short-term side effects include slurred speech, dizziness, and headaches. (American Addiction Centers, *Nitrous Oxide (Whippet) Abuse, Side Effects, & Treatment* (Dec. 31. 2024) <https://americanaddictioncenters.org/inhalant-abuse/nitrous-oxide-whippets .) Although nitrous oxide use is often perceived by those using it as safe or harmless, repeated use can cause severe neurologic, cardiovascular, and psychiatric effects, including hallucinations, delusions, organ damage, nerve damage, seizures, coma, and death. (*Id*.)

In addition to the harmful physical effects that nitrous oxide misuse can have on users, the discarded canisters containing nitrous oxide have presented challenges for waste management and recycling companies.

This bill creates four new infractions related to the sale or distribution of nitrous oxide. A first violation carries a fine of not more than $500, a second violation carries a fine of not more than $1000, and a third or subsequent offense carries a fine of not more than $2,000. A court would also be authorized to suspend business licenses for any business that knowingly violates the infractions that this bill creates. Specifically, this bill makes it unlawful to do any of the following:

- Sell, furnish, offer, distribute, or give away a nitrous oxide container that is capable of holding more than eight grams of nitrous oxide.
- Sell, furnish, offer, distribute, or give away a nitrous oxide container which an individual may directly inhale nitrous oxide.
- Sell or distribute nitrous oxide that has, or is marketed as having, the taste or smell of any food, including, but not limited to, any fruit, candy, dessert, alcoholic beverage, herb, or spice, that is distinguishable by an ordinary consumer either prior to or during consumption or use of the product.
- Sell, offer, distribute, or otherwise provide a device that allows an individual to inhale nitrous oxide from the nitrous oxide container or to hold nitrous oxide released from the nitrous oxide container for purposes of inhalation.

This bill explicitly exempts nitrous oxide or a nitrous oxide container that meets any of the following:

- Has been denatured or otherwise rendered unfit for human consumption for use.
- Is intended and marketed for use by a manufacturer as part of a manufacturing process or industrial operation.
- Is specifically designed and marketed for use in a vehicle to enhance the performance of the vehicle.
- Is sold to a licensed medical or dental practitioner to be administered or prescribed as part of the care or treatment of a disease, condition, or injury.
- Contains less than nine grams of nitrous oxide as a propellant in food or to be used in food preparation for restaurant, food service, or houseware products.
- Is sold by a wholesaler for any of the above listed purposes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

CDTFA estimates costs of $258,000 in 2026-27 and $288,000 in 2027-28 and ongoing for administration related to license or permit suspensions, performing inspections to ensure compliance with the court-ordered suspension provisions, issuing civil or criminal citations for violations of the suspension provisions, seizing cigarettes and tobacco products for violations of the suspension provisions, and revoking the suspended license for violations during suspension (Cigarette and Tobacco Products Compliance Fund).

Cost pressures of an unknown amount to the courts to adjudicate any additional filings. Actual costs will depend on the number of cases filed and the amount of court time needed to resolve each case. It generally costs approximately $1,000 to operate a courtroom for one hour. Although courts are not funded based on workload, an increase in workload could result in delayed court services and pressure on the Trial Court Trust Fund, which put pressure for increased funding from the General Fund.

No costs to the Department of Justice.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Medi-Cal: acupuncture

SOURCE: California Acupuncture Coalition

DIGEST: This bill requires the continued coverage of acupuncture in the Medi-Cal program, even if federal matching funds are no longer available, subject to appropriation.

Assembly Amendments add the requirement that the Legislature make a specific appropriation to maintain coverage should federal matching funds no longer be available for acupuncture services.

ANALYSIS:

Existing law:

1) Establishes the Medi-Cal program, which is administered by the Department of Health Care Services, and under which qualified low-income individuals receive health care services. [Welfare and Institutions Code (WIC) §14000, et seq.]

2) Establishes a schedule of benefits under the Medi-Cal program, which includes benefits required under federal law and benefits provided at the state's option, both of which are funded with federal and state dollars. The schedule of benefits includes acupuncture, provided that federal matching funds are available. [WIC §14132]

This bill requires the continued coverage of acupuncture in the Medi-Cal program, even if federal matching funds are no longer available if the Legislature makes an appropriation for this purpose.

Background

According to the author of this bill:

> This bill removes the provision in California code that requires matching federal funds in order for acupuncture to qualify as a Medi-Cal covered benefit. This move ensures that regardless of the federal landscape, California will step up to ensure our most vulnerable communities are receiving the care they deserve. By enshrining acupuncture as a Medi-Cal covered benefit, this bill brings how Medi-Cal treats acupuncture in line with other forms of care such as occupational therapy, chiropractic care, physical therapy, optometric care, mental health services, pharmacy services, and a number of other critical benefits. By establishing acupuncture as a Medi-Cal provided benefit, this bill helps protect this critical form of care from federal funding cuts.

Federal payment for Medicaid services. The federal Medicaid program, which governs the operation of Medi-Cal in California, contains three different types of covered benefits: mandatory benefits that all states must cover; optional benefits that a state may cover by including the benefits in its Medicaid state plan; and benefits that are not on either list. For either mandatory or optional benefits, the federal rate can range from 50% to 90% of the cost of providing the service, with the state paying the remainder. For the third category of Medicaid benefits, those

that are neither mandatory nor optional, the state is required to pay the entire cost of the benefit. Currently, some Medi-Cal services, such as abortions or services to immigrants not qualified to receive federal Medicaid services, are paid for entirely by the state. Acupuncture is an optional federal benefit for which there is federal payment when a state elects to provide the service.

Medi-Cal provision of acupuncture services. According to the Medi-Cal provider manual, acupuncture services are covered when used to prevent, modify, or alleviate the perception of severe, persistent chronic pain resulting from a generally recognized medical condition. Outpatient acupuncture services (with or without electric stimulation of the needles) are limited to two services in a calendar month, although additional services can be provided based upon medical necessity through prior authorization. In order to address a state budget crisis beginning in 2008, AB X3 5 (Evans, Chapter 20, Statutes of 2009) eliminated Medi-Cal coverage of several optional benefits, including audiology, optometry, podiatry, psychology, speech therapy, acupuncture, chiropractic services, optician and optical laboratory services, incontinence creams and washes, and dental services. When the state's finances were on the rebound, the Legislature passed SB 833 (Committee on Budget and Fiscal Review, Chapter 30, Statutes of 2016) to restore acupuncture as a Medi-Cal benefit for all eligible members. As recently as last year, the Administration proposed in a trailer bill to eliminate acupuncture services as a cost-cutting measure.

Comments

Although this bill was likely prompted by previous cuts or attempts to cut acupuncture services from the Medi-Cal program, this bill's requirement of continued coverage even absent federal financial participation will not prevent future Administrations or Legislatures from attempting to cut acupuncture services in tough budget years as this service is not a mandatory federal benefit. That said, passage of this bill would signal legislative support for acupuncture services.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, General Fund (GF) cost pressures of around $27 million per year, should federal financial participation become unavailable for acupuncture services in the future. The May 2026 Medi-Cal Local Assistance Estimate projects savings of $13.6 million total funds ($5.4 million GF and $8.2 million federal funds) in 2026-27 from eliminating the Medi-Cal acupuncture benefit in January 2027. Thus, the cost of funding the benefit in

the absence of federal matching funds would be approximately $27 million per year (GF).

ARGUMENTS IN SUPPORT: The source of this bill, California Acupuncture Coalition, states that acupuncture is a critical form of care with demonstrated benefits for pain management, mental health, addiction treatment, nausea related to chemotherapy, and a range of other conditions and offers an effective low-risk treatment option when conventional approaches may be limited or carry added complications. This bill removes the statutory requirement that acupuncture coverage under Medi-Cal depend on federal matching funds. The U.S. Pain Foundation writes that evidence-informed, non-pharmacologic options such as acupuncture play an important role in multimodal pain management strategies. For individuals enrolled in Medi-Cal, access to comprehensive pain treatment options is frequently limited. When non-drug therapies are not readily available, patients may face fewer choices and reduced ability to participate in balanced treatment plans.

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Beverage containers: supermarkets: reverse vending machines

SOURCE: Circular CRV

DIGEST: This bill 1) precludes a reverse vending machine from serving a convenience zone; and 2) redefines "supermarket" to grocery stores with more than $6 million of gross annual sales regardless of the presence of a bakery or deli.

Assembly Amendments increase the annual sales to be defined as a "supermarket" from $5 million to $6 million, clarify that recycling centers currently eligible for handling fees remain eligible, and allow CalRecycle to continue to use their methodology for calculating handling fees until 2032.

ANALYSIS:

Existing law:

1) Establishes the California Beverage Container Recycling and Litter Reduction Act (Bottle Bill), which requires beverage containers, as defined, to have a California redemption value (CRV) of 5 to 10 cents. Requires beverage distributors to pay a redemption payment to CalRecycle for every beverage container sold in the state. Provides that these funds are continuously appropriated to CalRecycle for, among other things, the payment of refund values and processing payments. (Public Resources Code (PRC) § 14500 et seq.)

2) Defines convenience zones as a 1-mile radius around a supermarket (PRC § 14509.4), or a 3- to 5-mile radius in rural areas (PRC § 14571.5)

3) Requires there to be at least one certified recycling center or location within every convenience zone which pays the full refund price for all types of empty CRV containers and is open for business at least 30 hours per week, with a minimum of 5 hours and maximum of 50% of its hours of operation occurring during periods other than Monday to Friday from 9am to 5pm to be "served" (PRC § 14571 (a)). Allows recycling centers to operate fewer than 30 hours in rural areas or on an alternative schedule with approval from CalRecycle (PRC § 14571 (c)).

4) Requires beverage dealers in unserved convenience zones to redeem CRV containers at the register (PRC § 14571.6).

5) Establishes dealer cooperative program through SB 1013 (Atkins, Chapter 610, Statutes of 2022) through which beverage dealers may collectively arrange for the collection of beverage containers. Requires that dealer cooperatives redeem all beverage types and submit a redemption plan to CalRecycle for approval. (PRC § 14578 et seq.)

6) Requires CalRecycle to pay handling fees to supermarket sites, non-profit convenience zone recyclers, and rural region recyclers to provide an incentive for the redemption of empty beverage containers in a convenience zone (PRC § 14585).

7) Allows CalReycle to develop a methodology for establishing handling fees reflecting the cost of providing and maintaining recycling in convenience zones by handling fee recipients, including transportation, labor, volume, consumer convenience, and increasing recycling rates, until July 1, 2027. (PRC § 14585)

8) Requires the following for a reverse vending machine to be considered a certified recycling center, through AB 1311 (Wood, Chapter 506, Statutes of 2021):
   a) Accepts all empty beverage containers; or
   b) Provides an attendant to accept all containers that the reverse vending machine cannot accept (such as large containers or pouches); and
   c) Operates a minimum of 30 hours per week. (PRC § 14571 (f-j))

9) Defines a "supermarket" as "a full-line, self-service retail store with gross annual sales of two million dollars ($2,000,000), or more, and which sells a line of dry grocery, canned goods, or nonfood items and some perishable items. For purposes of determining which dealers are supermarkets, the department shall use the annual updates of the Progressive Grocer Marketing Guidebook and any computer printouts developed in conjunction with the guidebook." (PRC § 14526.5).

This bill:

1) Defines supermarkets as a full-line, self-service retail store which:

   a) Has at least six million dollars of gross annual sales;

   b) Sells a line of groceries, canned goods, alcoholic or nonalcoholic beverages, nonfood items, or some perishable items; and

   c) Regardless of whether the retail store operates a bakery or deli

2) Requires CalRecycle to consult the Progressive Grocer Marketing Guidebook when determining which beverage dealers are supermarkets;

3) Stipulates that a reverse vending machine:

   a) Shall not make an unserved convenience zone served;

   b) Shall not preclude a dealer cooperative (pursuant to Section 14578) or a mobile unit (pursuant to Section 2000) from operating or receiving payments in the same convenience zone; and

   c) Shall not make an existing recycling center ineligible for handling fees pursuant to Section 14585(c).

4) Stipulates that a recycling center that was eligible to receive handling fees immediately before the effective date of the bill will continue to be eligible.

5) Allows CalReycle to continue to determine handling fees using the methodology developed pursuant to PRC § 14585 until July 1, 2032.

6) Includes an urgency clause.

Background

1) *Bottle bill background.* The bottle bill was established through legislation in 1986 (AB 2020 Margolin, Chapter 1290, Statutes of 1986) with the joint goals of reducing litter and achieving an 80% recycling rate for all CRV containers in the program. In 2025, CalRecycle reported a 70% recycling rate for CRV containers in the "Biannual Report of Beverage Container Sales, Returns, Redemption, and Recycling Rates."

   The bottle bill operates by adding a 5-25 cent CRV payment to beverage containers in the program. Beverage distributors pay CRV on all new beverage containers they sell in California into the Beverage Container Recycling Fund (BCRF). Distributors then pass the cost of the CRV on to retailers, who in turn pass that 5-25 cents per bottle on to consumers at checkout. Individuals and businesses are incentivized to return bottles to recycling centers where they can redeem the value of the CRV. Once a consumer is ready to dispose of a bottle, they can return bottles to a certified recycling center and redeem their CRV, or consumers can put their bottles in residential curbside recycling collection, wherein the curbside programs, not consumers, keep the CRV on these containers. The redemption rate (the rate at which CRV containers are returned at recycling centers and supermarkets) was 60% for 2024.[1] According to a CalRecycle 2022 Fact Sheet, curbside programs collect about 12% of CRV containers.[2]

2) *Recycling center scarcity*. The Beverage Container Recycling Program (BCRP) requires CalRecycle to set convenience zones and requires that each convenience zone have at least one certified recycling center. A convenience zone is typically a 1-mile radius around a large supermarket in an urban area and a 3- to 5-mile radius in a rural area. Convenience zones without certified recycling centers are considered "unserved." Dealers, any retailer which sells CRV containers, are required to collect and provide redemption for CRV if they are in unserved zones.

---

[1] Container Recycling Institute (2025) *Bottle Bill Resource Guide: California*, https://www.bottlebill.org/index.php/current-and-proposed-laws/usa/california

[2] CalRecycle (2023) *Beverage Container Recycling in California Fact Sheet Calendar Year 2022* (DRRR-2023-1726), https://www2.calrecycle.ca.gov/Docs/Publications/Details/1726

California currently has approximately 1,200 certified recycling centers (or buy back centers) across the state.[2,3] Many rural counties have only one or two recycling centers to service large geographic areas. Alpine and Sierra County have none.[4] Between 2014 to 2024, approximately half of California's recycling centers closed.[5]

Though dealers are required to redeem CRV containers if they are in an unserved convenience zone, this does not always happen. Without proper communication to customers (and enforcement from CalRecycle), customers might not realize they can redeem beverage containers at the cash register. If recycling centers are scarce or lack capacity, not only do recycling rates decline, but consumers are left without an opportunity to recover the 5-25 cents per bottle they paid up-front at check-out.

3) *Supermarkets and beverage dealers.* A supermarket is defined as a "full-line, self-service retail store with gross annual sales of two million dollars ($2,000,000), or more, and which sells a line of dry grocery, canned goods, or nonfood items and some perishable items," in conjunction with the Progressive Grocers Guidebook (PRC § 14526, California Code of Regulations (California Code of Regulations (CCR) Tit. 14, § 17987.2). The Progressive Grocer Guidebook is a useful tool which provides estimates of gross sales of food retail locations and whether those locations carry a full line of groceries. Notably, the Progressive Grocery Guide is a proprietary, industry tool which is not openly available.

Additionally, there is an important distinction between supermarkets and dealers. All supermarkets are dealers, but not all dealers are supermarkets. Supermarkets are both beverage dealers and anchor convenience zones. Within a convenience zone, every dealer (supermarket or not) bears some responsibility for CRV container redemption. In an unserved convenience zone, every dealer is obligated to redeem CRV containers at the register. Therefore, every dealer is incentivized in the creation of a certified recycling center or dealer cooperative within their zone.

[3] CalRecycle (2025) *Beverage Container Recycling in California Fact Sheet Calendar Year 2023* (DRRR-2025-1749), https://www2.calrecycle.ca.gov/Docs/Publications/Details/1750

[4] CalRecycle (2026) *Beverage Container Recycling Centers*, https://www2.calrecycle.ca.gov/BevContainer/RecyclingCenters/

[5] Rodd, S. (2024) *Diminishing returns: California's unclaimed bottle deposits hit $820M as recycling centers close*, KPBS, **https://www.kpbs.org/news/environment/2024/06/20/californias-unclaimed-bottle-deposits-820m-recycling-centers-close**

4) *Reverse vending machines in convenience zones*. A reverse vending machine (RVM) is an automated system in which a user can insert an eligible bottle and redeem the CRV. The machine identifies the CRV container (typically by scanning the barcode) to pay out the proper amount. The machine then cleans, sorts, and stores the containers. RVMs offer consumers an accessible and easy to use system to redeem CRV containers for an immediate payout. In contrast, other recycling centers have more limited operating or are further away. However, RVMs also have disadvantages: the machines can only accept one bottle at a time, may be limited in the material or size of container accepted, and have a smaller capacity than other recycling centers. Once an RVM is full, it cannot accept more containers until it is emptied. RVMs vary in size but typically accept between 200 and 600 containers, with some accepting more than one thousand.[6,7] In contrast, recycling centers can take up to 200 containers or 1,200 pounds of containers per person per day; there is effectively no limit on what a certified recycling center can accept per day.[8]

   RVMs have different requirements for hours of operation than traditional recycling centers. A certified recycling center must be open for 30 hours per week with between 30 and 50% of those hours occurring outside of 9am to 5pm, Monday to Friday and sufficiently staffed to accept all beverage types (PRC § 14571 (a-e)). RVMs are exempted from the staffing requirement and are instead considered "open for business" as long as the equipment is functioning (PRC § 14571 (f)).

   Currently, reverse vending machines alone cannot serve a convenience zone. However, reverse vending machines operated by a certified recycling center or dealer cooperative and with a host dealer (the beverage dealer collocated with the reverse vending machine) can serve a convenience zone. Due to the limited capacity of RVMs and limited capacity for enforcement, a full or broken RVM without sufficient signage may leave customers without the ability to redeem containers within a "served" convenience zone.

Comments

1) *Purpose of Bill.* According to the author, "California's Beverage Container Recycling Program, originally enacted in 1984, significantly reduced litter and

[6] Fortune Business Insights (2026) *Reverse Vending Machine (RVM) Market Size, Share, and Industry Analysis*, https://www.fortunebusinessinsights.com/reverse-vending-machine-market-113029
[7] Recyclever, *RVM5-1200 Reverse Vending Machine*, https://www.recyclever.com/blog/articles-10/rvm5-1200-reverse-vending-machine-323
[8] CalRecycle (2023) *Beverage Container Recycling Program Fact Sheet*, https://www2.calrecycle.ca.gov/BevContainer/RecyclingCenters/

dramatically improved recycling rates. It did this by establishing a California Redemption Value (CRV) paid on beverage containers when purchased that could be collected when the containers were returned. However, outdated definitions and limited infrastructure have created recycling "dead zones" in some parts of the state where consumers have few or no practical redemption options, thereby undercutting the state's recycling efforts.

"Under current law, some high-volume beverage retailers are not required to participate due to antiquated grocery store definitions, and a single reverse vending machine can qualify as "serving" an area even when its limited capacity cannot accommodate the volume of containers sold in that area.

"SB 955 builds on reforms enacted in SB 1013 (Atkins, 2021) by requiring all high-volume beverage retailers to participate in the program and mandating that collection facilities within each community have sufficient capacity to collect all bottles and cans sold there."

2) *A Supermarket by any other name*. SB 955 aims to shift the responsibility of CRV redemption from small, full line grocers to large beverage dealers which may not be considered a supermarket under existing statute. Under existing law, some beverage dealers aren't supermarkets and therefore are not contributing to the bottle bill by anchoring a convenience zone, despite acting as a grocery store for an area. Often, these beverage dealers sell a *partial* line of groceries (such as a limited selection of fruits and vegetables) and a large volume of CRV containers. In such cases, a smaller grocer with a full line of groceries could bear more responsibility for CRV redemption in a convenience zone than a megastore with a partial line of groceries.

   Beverage dealers *outside* of a convenience zone do not have the same responsibilities. These beverage dealers could have millions in sales of CRV containers without increasing redemption opportunities for customers. Importantly, any change to statute which decreases the number of convenience zones could exacerbate this problem.

   SB 955 increases the gross annual sales threshold for a supermarket from $2 million to $6 million, to adjust for inflation and to shift the burden of CRV redemption from small, full line grocers. While increasing the gross sales to $6 million could decrease the number of eligible supermarkets, it is still less than if the value had been adjusted for inflation (which would be upward of $8 million according to the Bureau of Labor Statistics CPI Inflation Calculator between 1980 and 2026). It is unclear to what extent raising the gross sales from $2 million to $6 million will impact the number of "supermarkets."

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

"1) The Department of Resources Recycling and Recovery (CalRecycle) estimates ongoing annual costs of about $328,000 for two positions (Beverage Container Recycling Fund (BCRF)) to implement the bill. CalRecycle asserts the proposed changes to the definition of "supermarket" will alter CZs and require the department to (a) redefine the maps associated with CZs and (2) provide ongoing technical assistance to recycling centers and dealer cooperatives related to their monthly handling fees.

"The Budget Act of 2026 includes seven permanent positions and about $1 million ongoing (BCRF) for CalRecycle to perform compliance and enforcement tasks associated with the requirements related to dealers and dealer cooperatives enacted by SB 1013 (Atkins), Chapter 610, Statutes of 2023. Given these recently approved resources, it is not clear to the committee that the workload associated with implementing this bill requires two additional positions in an ongoing capacity.

"2) CalRecycle does not anticipate an increase in California Redemption Value (CRV) redemption, processing payments, or handling fees, because the department does not expect the volume of CRV containers returned to change significantly because of this bill. Dealers redeeming in-store are not reimbursed for redemption and are not eligible for program payments, such as handling fees, so even if there is a large increase in dealers required to redeem in-store, CalRecycle does not anticipate there will be a corresponding increase in expenditures from the BCRF.

"CalRecycle reports BCRF had an ending balance of about $822 million in fiscal year (FY) 2024-25 and is projected to have an ending balance of about $718 million at the end of this FY – although this figure could change based on actuals provided at the end of the FY."

SUBJECT: California Environmental Quality Act: exemption: City of San Diego: Midway Rising Specific Plan

SOURCE: Author

DIGEST: This bill, for purposes of the California Environmental Quality Act (CEQA), provides that building height is not a significant impact on the environment for specified non-industrial infill projects.

Assembly Amendments strike the specification that building height is not a significant impact under CEQA for projects greater than 40 acres and exceeded

one hundred million dollars and the requirement that projects provide jobs that pay prevailing wages.

ANALYSIS:

Existing law:

1) Requires under CEQA that a lead agency determines whether a project is exempt from CEQA, or if it must do an initial study to determine if a project will have significant effects on the environment. If a project has no effect on the environment or effects that can be mitigated, the lead agency prepares a negative declaration (ND) or mitigated ND (MND). If the project will have significant impacts, the lead agency prepares an environmental impact report (EIR) to evaluate and propose mitigation measures for any effects on the environment, including impacts or likely impacts to land, air, water, minerals, flora, fauna, ambient noise, and historic or aesthetic significance. (Public Resources Code (PRC) §§21000 et seq.)

2) Establishes over 135 statutory CEQA exemptions in the public resources code, water code, government code and other statutes.

3) Establishes 33 categorical CEQA exemptions in the California Code of Regulations. (CEQA guidelines §15260- 15285). Categorical exemptions generally do not apply if there are significant environmental effects of the project, and specific exclusions include the site being located in a sensitive environment, on a hazardous waste site, having cumulative impacts over time, significantly adversely impacting a historic resource, or it there are other unusual circumstances that would cause a project to have a reasonable possibility for a significant effect on the environment due to unusual circumstances.

This bill:

1) Prohibits the environmental impacts of a project that are associated with increased building height alone, including air circulation, noise and light refraction or reflection, shadow, or the potential to attract wildlife, from being considered significant impacts on the environment if the project meets the following conditions:
   a) The use and density of the project is otherwise analyzed in a certified Environmental Impact Report (EIR).
   b) The project is on a previously graded infill site
   c) There are no sensitive biological resources physically present on the site.

d) The project is not an industrial use project.
e) *The project is consistent with local airport land use plans*

Background

1) *The A, B, C's of CEQA*. CEQA is designed to (a) make government agencies and the public aware of the environmental impacts of a proposed project, (b) ensure the public can take part in the review process, and (c) identify and implement measures to mitigate or eliminate any negative impact the project may have on the environment. CEQA is enforced by civil lawsuits that can challenge any project's environmental review. Nonprofits, private individuals, public agencies, advocacy groups, and other organizations can all file lawsuits under CEQA: CEQA is the only state environmental protection law that allows for citizen lawsuits. In the case of a CEQA lawsuit, it is ultimately up to the courts to determine if the environmental review was sufficient to meet the requirements of CEQA.

2) *Environmental Review under CEQA*. Under CEQA, projects (unless they have a specific exemption) must undergo environmental analysis. This process starts with an initial study which determines what level of further environmental review is needed for a given project. If a project has no significant effects on the environment, or if those effects can be fully mitigated, the project can move forward with a negative declaration (ND) or mitigated negative declaration (MND). If the initial study finds that the project has potential significant effects on the environment, then a full EIR is conducted. An EIR provides thorough environmental review of a proposed project, analyzing the significant direct and indirect environmental impacts of a proposed project on water quality, transportation, air quality and greenhouse gas emissions, terrestrial and aquatic biological resources, surface and subsurface hydrology, land use and agricultural resources, aesthetics, geology and soils, recreation, public services and utilities such as water supply and wastewater disposal, and cultural resources, among other factors. The EIR also includes proposed mitigation measures for any significant effects that it identifies and considers alternatives to the proposed project.

3) *Midway Rising.* Midway Rising is a proposed development in the City of San Diego that covers 49 acres of City-owned land at the San Diego Sports Arena site in the Midway-Pacific Highway community. The project is envisioned to include a 16,000-seat sports arena, 14 acres of parks and public space, a mixed-use entertainment, arts, and cultural district, and 4,250 housing units (2,000 of

which will be affordable at 80% below area median income). The project is intended to replace an older stadium and associated parking lots. When built, Midway Rising will include one of the largest mixed-income and affordable housing projects in California. The project is also expected to generate roughly 21,900 temporary construction jobs and 3,100 permanent positions in entertainment, hospitality, and retail, and is subject to a project labor agreement with the San Diego County Building and Construction Trades Council.

The path to permitting Midway Rising has not been smooth. The project is located within an area of San Diego that is subject to San Diego's Coastal Height Limit Overlay Zone, which generally limits building heights to 30 feet. In 2018, the City completed a program environmental impact report (PEIR) for the land use plans governing the area to enable development of the project. Because aspects of the project exceeded the 30-foot height limit, the City submitted a ballot measure to voters to raise the height limit for the project area in 2020. The City relied on the PEIR as the environmental analysis for the project. However, the Fourth District Court of Appeals invalidated that ballot measure because the PEIR did not consider potential environmental impacts of removing the height limit. While that appeal was pending, in 2022 the City prepared a supplemental environmental impact report (SEIR) and approved a second ballot measure to remove the height limit from the same area. The Fourth District also invalidated the second ballot measure for similar reasons. The Court noted:

"The 2022 draft SEIR recognized removal of the Coastal Zone height limit was a changed circumstance from the 2018 PEIR. Yet, for almost every category of potential environmental impacts the initial study addressed, it said the PEIR adequately examined potential impacts because the project 'would be limited to the [Midway Rising] area footprint and land use, density, and zoning analyzed in the 2018 PEIR.'"[1]

The Court went on to identify a litany of impacts that could be related to building height that were not examined in the PEIR. The City of San Diego wants to streamline the CEQA process for the Midway Rising project.

Comments

[1] *Save Our Access v. City of San Diego*, 115 Cal. App. 5th 388

Purpose of Bill. According to the author, "The Midway Rising Project will transform nearly 50 acres of underused, blighted City-owned land into a vibrant, modern district that directly addresses our region's housing shortage while delivering lasting economic and community benefits. It will deliver more than 4,000 homes, including 2,000 affordable and income-restricted, a state-of-the-art sports and entertainment venue, and more than 14 acres of parks and open space. SB 958 is a targeted, catalytic solution to move this transformational project forward after years of planning, extensive environmental review, and voter approval through two separate ballot measures. The bill upholds environmental accountability and is explicitly contingent on the certification and adoption of the final Environmental Impact Report already completed by the City of San Diego.

"Once completed, Midway Rising is projected to generate millions in local economic impact, create thousands of permanent jobs, support new businesses, utilize a highly-skilled and trained workforce, and produce long-term economic opportunities and tax revenue for the City and County of San Diego. Proposed to be the largest affordable housing project in the western United States, Midway Rising carries significant statewide importance and promise. At a time when California faces an urgent housing crisis, SB 958 advances a meaningful solution for San Diego and the state."

'What is Environmental Impacts' for 500 points. It is fair to consider that the environmental impacts for building a project 30 feet high could be different from the impacts of building one that is 130 or 165 feet tall. However, the court's ruling that the SEIR did not adequately consider those environmental effects related to building height include the following considerations:

a) How could tall buildings in and around the Midway-Pacific Highway area influence dispersal of predicted emissions or odors?
b) Will noise reflected or refracted from taller buildings disturb sensitive species in or adjacent to the Midway-Pacific Highway area?
c) Will light from rows of buildings near the San Diego River disturb the lunar cycles of sensitive wildlife?
d) Will numerous tall buildings cause increased runoff that will impact sensitive habitats?
e) Will changed topography, noise, and light from new building heights fragment and disrupt the recognized wildlife corridor along the San Diego River?

f) If man-made structures draw [peregrine falcons] (or others) to the area for nesting, will the project otherwise impact them?

While some queries on the impacts of building height on the environment, including aesthetics, shadow, wind, and reflection, are routinely considered in applicable cases, several of the considerations in this particular ruling are unique to say the least, and as such it's not clear how Midway Rising's SEIR would have anticipated and included these specific environmental impacts.

Courts have discretion in evaluating whether or not the lead agency adequately considered the environmental impacts of the project. However, the Legislature has the capability to overturn judicial rulings related to CEQA. Most prominently in recent years was the specification in AB 1307 (Wicks Chapter 160, Statutes of 2023) that for residential projects, the effects of noise generated by project occupants and their guests on human beings is not a significant effect on the environment.

SB 958 uses a similar approach to AB 1307 by course correcting a court ruling on what constitutes environmental impacts under CEQA—and applying it broadly to all future projects.

SUBJECT: Average daily attendance: emergencies: major safety hazard

SOURCE: Author

DIGEST: This bill, an urgency measure, authorizes a local fire agency to determine the imminence of a major safety hazard for purposes of holding a local educational agency's (LEA's) average daily attendance (ADA) harmless for state funding purposes.

Assembly Amendments make technical and conforming changes to reflect amendments to the same section of law enacted through the 2026 education budget trailer bill.

ANALYSIS:

Existing Law:

1) Establishes that LEAs are funded based on ADA and defines "material decrease" as a drop of at least 10% in attendance due to qualifying emergencies. (Education Code (EC) § 46392; California Code of Regulations (CCR) Title 5 § 428)

2) Lists qualifying emergencies for ADA credit, including fire, flood, epidemic, earthquake, impassable roads, and other extraordinary conditions, including civil or military orders. (EC § 46392)

3) Allows LEAs to submit a Form J-13A to the California Department of Education (CDE) to request ADA and instructional time credit during an emergency or material attendance loss. (EC §§ 41422, 46200, 46391, 46392, 46393 and CCR, Title 5, § 428)

4) Requires LEAs to offer independent study during emergency closures or attendance disruptions to retain ADA credit, and includes audit requirements for substantiating compliance. (EC §§ 42238.023, 51745, 51747, 51749.6)

5) Requires future inclusion of instructional continuity plans in school safety plans, effective July 1, 2026. (SB 153, Senate Committee on Budget and Fiscal Review, Chapter 38, Statutes of 2024; AB 176 Assembly Committee on Budget, Chapter 998, Statutes of 2024)

This bill:

1) Authorizes a local fire agency to determine the imminence of a major safety hazard for purposes of holding an LEA's ADA harmless for state funding purposes.

2) Contains an urgency statute which would go into effect immediately.

Comments

1) *Need for this bill.* According to the author, "California has experienced an unprecedented rise in the frequency and severity of wildfires as the state faces the new reality of a year-round fire season. Recent tragedies like the Eaton and Palisades Fires in Southern California along with the Dixie and LNU Lightning Complex Fires in Northern California have led to action on several fronts to apply lessons learned from these tragic events.

In response to recent devastating wildfires, the Legislature has acted to both rebuild affected communities and bolster mitigation efforts to lower future fire risk. However, more must be done to ensure that communities have every tool available to them to respond to fire danger appropriately.

One area where there remains a gap in current law is in the Education Code section that governs the type of emergency situations that a school may cancel classes and not lose out on ADA funding.

This update to the law will assure that school districts will not lose ADA funding if they err on the side of student and community safety in the face of an imminent wildfire. Including fire agencies in this vital decision-making process has the potential to save the lives of students, teachers, and school personnel by keeping them out of harm's way when their campuses are threatened by potential wildfires."

2) *Education law protects districts from losses in ADA due to emergency situations.* Two sections of the EC empower the Superintendent of Public Instruction (SPI) to grant regular apportionment credit to districts during emergencies. Under EC Section 41422, districts can maintain apportionments when schools close due to "extraordinary conditions." When the SPI approves credit for closed school days, districts receive ADA credit and instructional time credit for the time lost during the closure, satisfying state law requirements for both the minimum 175-day year and longer day and year standards.

   EC Section 46392 allows for ADA credit whenever the ADA of educational institutions decreases significantly due to various emergencies, including fires, floods, and impassable roads. Despite differences in wording between the two sections, their purpose remains the same: to protect school districts and county offices from revenue loss resulting from reduced ADA or instructional time during emergencies.

3) *Disaster preparedness in schools.* Under existing law, CDE is required to electronically distribute disaster preparedness educational materials and lesson plans that are currently available to school districts and county offices of education. The CDE must (1) ensure that the disaster preparedness materials are available in at least the three most dominant primary languages spoken by English learners in California, and (2) coordinate with the Office of Emergency Services to make sure that all materials are reviewed and updated annually. Among the materials circulated to LEAs are information about teaching

children proper use of 9-1-1, fire safety information, emergency preparedness, and curriculum-based programs on the emotional, social, and economic effects of natural and human-caused disasters.

Further, each school district and county office of education is responsible for the overall development of all comprehensive school safety plans for its schools operating kindergarten or any of grades 1 through 12. Charter schools must include in their petitions the procedures that the charter school will follow to ensure the health and safety of pupils and staff.

4) *Allowing local fire agencies to determine the imminence of a major safety hazard.* Current law allows schools to cancel classes without financial penalty when there is an "imminence of a major safety hazard" as determined by a local law enforcement agency. However, in situations involving wildfire risk, local fire agencies are often the entities best positioned to assess conditions on the ground and determine whether a campus faces imminent danger. School administrators, law enforcement officials, and fire authorities have indicated that the existing statute does not clearly authorize fire agencies to make this determination, which may create uncertainty for districts seeking to close schools proactively out of an abundance of caution.

   Given the increasing frequency and severity of wildfires across California and the growing number of schools located in or near Fire Hazard Severity Zones, this bill seeks to align the statute with the practical realities of emergency response by allowing local fire agencies, who possess specialized expertise in wildfire behavior and risk assessment, to determine when an imminent safety hazard exists. Allowing these agencies to make such determinations may help ensure that schools can act quickly to protect students and staff without risking the loss of ADA funding.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) No General Fund administrative costs to the California Department of Education (CDE). According to the CDE, statute already empowers the Superintendent of Public Instruction (SPI) to consider threat of a major safety hazard as determined by a local fire agency when the SPI reviews a Form J-13A waiver request.

2) Minor and absorbable Proposition 98 General Fund costs to the extent more local educational agencies (LEAs) apply for a Form J-13A waiver as a result of making explicit in statute that the SPI may consider a major safety hazard determined by a local fire agency when reviewing such a waiver request. However, as noted above, existing law already authorizes the SPI to consider such an event when reviewing a waiver request.

SUBJECT: Public libraries: library cards

SOURCE: Author

DIGEST: This bill, beginning January 1, 2028, (1) prohibits a public library from requiring that a parent or guardian be present for the issuance of a public library card to a California resident who is 16 or 17 years old and (2) permits a public library to require a parent's or guardian's consent or signature for the issuance of a library card to a California resident who is 16 or 17 years of age unless the minor is emancipated.

Assembly Amendments (1) add an implementation date of January 1, 2028 for the provisions of the bill and (2) permit a public library to require a parent's or guardian's consent or signature for the issuance of a library card to a California resident who is 16 or 17 years old unless the minor is emancipated.

ANALYSIS:

Existing law:

1) Establishes the California Library Services Act for the purpose of ensuring that all people have free and convenient access to all library resources and services, regardless of where they live or of the tax base of their local government. (Education Code (EC) § 18700 and 18701)

2) Defines a jurisdiction as a county, city and county, city, or any district that is authorized by law to provide public library services and that operates a public library. (EC § 18710)

3) Defines a public library as a library, or two or more libraries, that serves its residents free of charge and that is operated by a single public jurisdiction. (EC § 18710)

4) Defines a school library as an organized collection of printed and audiovisual materials that makes these materials as well as necessary equipment and services of a staff accessible to elementary and secondary school pupils and teachers. (EC § 18710)

5) Defines a cooperative library system means a public library system that consists of two or more jurisdictions entering into a written agreement to implement a regional program under the Public Library Services Act and was designated a library system under the Public Library Services Act of 1963 or a successor to that library system. (EC § 18710)

Comments

Need for the bill. According to the author, "there are nearly 1 million residents who are 16 and 17 years old who may be subject to in-person parental consent requirements to get a library card. … Library card policies for minors vary widely by jurisdiction across the state. … These different requirements, particularly those requiring a parent or guardian to be physically present, create inconsistent access to a public resource for older teens across the state. … Parental consent in-person requirements create practical barriers for teens whose parents or guardians may not have the time, availability, or flexibility to accompany them to a library. As a result, an otherwise responsible teenager may be prevented from accessing books, study materials, and employment resources."

The author continues, "This bill would establish a clear statewide standard in California allowing 16- and 17-year-olds to independently obtain and use a public library card. … [This bill] clarifies eligibility under existing systems while preserving local control over library operations and accountability for materials. Policies regarding lost or damaged items can be addressed through existing library policies. The bill maintains the requirement for a parent or guardian signature on the application while removing the need for in-person presence to get a library card."

Public libraries are run and funded primarily by local governments. As defined in statute, a public library (also known as a local public library or a local library) is a library, or two or more libraries, that serves its residents free of charge and that is operated by a single public jurisdiction, such as a county, city, special district, or a joint powers authority. Typically, the jurisdiction of the public library designates a central library to coordinate activities among all the library branches within a jurisdiction. Preliminary 2023-24 data from the Public Libraries Survey show that 187 jurisdictions, with 1,127 sites (including central libraries and their branches), are operating in California. With regard to funding, around 94% of local library funding comes from local governments, and the remaining 6% comes from the state and federal governments.

Other initiatives provided library cards for students, but they had limited statewide impact. Multiple national, regional, and local initiatives have sought to provide library cards for students. One notable prior initiative was called the Student Success Initiative, which was developed by the Pacific Library Partnership and NorthNet Library System in 2016 to create collaborative partnerships between public libraries and schools that provided library cards for students in California. By 2018-19, this project included 70 public libraries with partnerships with schools. Some of these partnerships focused on elementary school students, and others focused on high schools. Though library card policies vary based on the memorandum of understanding between the school district and the library, most of the partnerships included provisions where library cards would be automatically provided to students without the parents' signature, but an opt-out provision would be available for parents who did not want their child to participate. This program has since been folded into the Local Public Library Partnership Program created by SB 321 (Ashby, Chapter 598, Statutes of 2023).

Age-old debate on statewide uniformity and consistency vs. reducing local flexibility. Current law is silent on how 16- and 17-year-olds obtain public library cards, which provides flexibility and discretion for public libraries to determine

what is needed for youths under 18 to obtain a library card. Though some public libraries require that parents or guardians be present in person for a child's library card application, some public libraries simply require a signature from a parent or guardian, and some do not require a signature at all, so long as the applicant has proof of identification and residency. Public libraries also do not have a uniform requirement for the age threshold for which an in-person parent is needed, or if a signature is needed. These decisions are currently made locally.

For example, the Los Angeles County Library requires that children under 18 must have a parent or guardian sign their library card application, but doesn't need them to be in person; however, the Los Angeles County Library does require a parent or guardian to be present to fill out a form for a child under 18 to access the internet at the library. Within the same county is the South Pasadena Public Library, which requires a parent or legal guardian to be in person to sign a library card application for children under 18, with the adult needing to show valid identification with verification of current address.

Though this bill prohibits public libraries from requiring that parents or guardians be present for the issuance of a public library card to a California resident who is 16- or 17-years old, this bill includes language permitting a public library to require consent or signature from a parent or guardian for a library card for a California resident who is 16- or 17- years old unless the minor is emancipated. Opponents of this bill may object to removing the ability for public libraries to make local decisions on a parent's or guardian's in-person presence for the issuance of a library card.

Related/Prior Legislation

SB 321 (Ashby, Chapter 598, Statutes of 2024) established the Local Public Library Partnership Program, under the administration of the State Librarian, to promote collaboration between public libraries and local educational agencies (LEAs) and to ensure that all pupils have access to a local public library by third grade. The bill reflects legislative intent to expand equitable access to library resources for students statewide and reduce barriers to library use through school-library partnerships.

SB 34 (Umberg, Chapter 297, Statutes of 2022) requires the California Department of Education—in an earlier version of this legislation—to administer a competitive grant program to award one-time grant funding to LEAs, library districts, and public libraries for the purpose of providing every public school student with a

student success card. SB 34 was subsequently amended to relate to public contracts.

SUBJECT: Weights and measures: electric vehicle fueling systems

SOURCE: Author

DIGEST: This bill exempts specified factory-tested and certified electric vehicle supply equipment (EVSE) from field testing and placement-in-service requirements and establishes alternative inspection requirements for EVSE.

Assembly Amendments create a new bill to exempt specified factory-tested and certified EVSE from field testing and placement-in-service requirements and establishes alternative inspection requirements for EVSE.

ANALYSIS:

Existing law:

1) Provides the California Department of Food and Agriculture (CDFA) general enforcement supervision of the laws relating to weights and measures and measuring devices and provides for the enforcement of those laws and the

inspection and testing of measuring devices in each county by the county sealer. (Business and Professions Code (BPC) §§ 12100, 12105)

2) Makes it unlawful for any person, as specified, to use for commercial purposes any weight or measure or weighting, measuring, or counting instrument, knowing it to be "incorrect", as specified. (BPC § 12020)

3) Requires each county sealer to inspect, try and test all weights, scales, beams, measures of any kind, instruments or mechanical devices for weighing and measuring, and tools, appliances and accessories connected with any or all such instruments or measures, sold or used by any proprietor, agent, lessee or employee for commercial purposes, as defined. (BPC § 12210(a))

4) Defines "EVSE" or "electric vehicle supply equipment" to mean a device that is used in connection with the sale of electricity as a motor vehicle fuel for controlling the electricity supply from an electric vehicle charging station to a vehicle during a charging session that includes a measuring instrument. (BPC § 12509.5)

5) Defines "electric vehicle charger operated by a public agency" to mean an electric vehicle charger that is available for commercial use by the public and that is either owned by a public agency or for which the public agency has entered into an agreement to have the electric vehicle charger installed, maintained, or serviced, to have the revenues from the electric vehicle charger collected, or to otherwise have electric vehicle charging services performed on behalf of the public agency. (BPC § 12209.7(a)(2))

6) Establishes the CEC, consisting of five members appointed by the Governor and approved by members of the Senate, to carry out various responsibilities, including but not limited to: serving as a central repository within the state government for the collection, storage, retrieval, and dissemination of data and information on all forms of energy supply, demand, conservation, public safety, research, and related subjects; undertaking a continuing assessment of trends in the consumption of electrical energy and other forms of energy and analyze the social, economic, and environmental consequences of these trends and; carrying out energy conservation measures, as specified. (Public Resources Code (PRC) §§ 25200, 25216, 25216.5)

This bill:

1) Requires the Secretary of CDFA, in consultation with CEC, to update EVSE regulations by July 1, 2028, including regulations authorizing a risk-based statistical sampling inspection frequency for EVSE.

2) Requires the operator of an exempt EVSE to register the installation with the county sealer within 72 hours; requires sealers to report EVSE inspection data monthly to the Division of Measurement Standards (DMS) within CDFA and; requires DMS to provide that data to the CEC no less than twice per year.

3) Establishes conditions under which a sealer must, or may, take an EVSE out of service, and requires that metrologically relevant repairs be performed only by a service agency or service agent.

Background

California's Ambitious Zero-Emission Vehicle Targets and Challenges with Electric Vehicle Supply Equipment Installations for Operation and Oversight. The CEC released a press release in January of this year announcing that California has surpassed 2.5 million zero emission vehicle (ZEV) sales. The media release noted that since the end of 2019, cumulative new ZEV sales in California have grown 300%. In September of 2020, Governor Newsom issued Executive Order N-79-20, which established goals for the State of California that 100% of in-state new passenger car and truck sales will be zero-emission by 2035, and by 2045, ZEV operations for medium-and heavy-duty vehicles, where feasible. Preceding that Executive Order, former Governor Jerry Brown issued Executive Order B-48-18 which set a target for 5 million electric vehicles by 2030 and further directed California to install 250,000 electric vehicle chargers, including 10,000 direct current fast chargers by 2025.

The CEC released its first *Electric Vehicle Charging Infrastructure Assessment* report in 2021, and a revised report in 2023 with updated figures, analysis, and projections. The revised 2023 assessment projects that California's 7.1 million light duty plug-in electric passenger vehicles will need 1.01 million chargers, including 39,000 direct-current fast chargers. By 2035, 15.2 million light-duty plug-in electric passenger vehicles will need 2.11 million chargers in California including 83,000 direct-current fast chargers.

According to a CEC press release in September 2025, California has surpassed 200,000 publicly available and shared electric vehicle charging ports in California, resulting in 68% more EV charger ports than the number of gasoline nozzles

statewide. However, that figure is below the 250,000-charger goal set by then Governor Brown in Executive Order B-48-18. Publicly accessible charging stations can be found at places such as grocery store parking lots, apartment complexes, grocery stores, and even health care offices. Because electrical vehicle supply equipment devices are used to measure electricity sold as motor vehicle fuel, they are subject to the regulation under the weights and measures laws of the state.

California Department of Food and Agriculture and the Division of Measurement Standards. The DMS under the CDFA is responsible for the implementation and enforcement of California's weights and measures laws. When consumers purchase gasoline from a gas pump, or vegetables by weight at the supermarket, the regulation of those weighing devices used in commerce is to ensure that the price paid is correct for the amount of the product purchased. Consumers rely on the accuracy of a grocery scale to ensure they are paying the accurate price for the pound of apples they intend to purchase. A weighing or measurement device that is not operating correctly can result in overpayment by consumers, or consumers receiving less quantity for which they paid. This can include the electricity that one purchases to electrically refuel an electric vehicle.

County Sealers. Enforcement of the weights and measure standards in California, are delegated to a county sealer of weights and measures. County weights and measures officials inspect and test packaged commodities and all commercially used devices. Current law authorizes a county board of supervisors, through an ordinance, to charge an annual registration fee to recover the costs associated with inspecting or testing the weighing or measuring devices. With respect to electrical vehicle charging equipment, fees are not specified for those devices and so they fall into the $26 authorized fee range. In addition to the per device fees, current law permits counties to assess a fee for each location where the device is at to be charged a location registration fee, which is also specified and capped in statute.

CDFA is required to adopt necessary regulations governing the inspection frequency of all the commercially used weights, measures, and weighing apparatus in the state, which includes EVSE. As noted by the DMS, "The EVSE regulation aids consumers by facilitating an "apple-to-apple" price comparison of electricity sold at different locations. Uniform requirements for price advertising and EVSE labeling helps eliminate inconsistent, misleading, or fraudulent business practices by retailers." As these charging stations were coming to market, there was a step approach to the regulation of EVSE. For those products installed prior to January 1, 2021, they are exempt from DMS/sealer oversight until 2031, and anything installed after January 1, 2021 is subject to current compliance requirements.

Electric Vehicle Supply Equipment (EVSE) and Relationship to the Regulation of Weighing and Measuring Devices. EVSEs that transfer electricity to a vehicle (as a retail motor vehicle fuel) and charge for those services are considered a commercial measuring device, which brings them under the jurisdiction of the DMS and the enforcement and inspection of the county sealer programs.

Proponents of efforts contained in this bill cite concerns with the regulatory structure for oversight of the electric vehicle supply equipment being subject to current standards for all other commercial weighing devices in California. Stakeholders across the EV ecosystem, including manufacturers, installers, site hosts, and local governments, report that the DMS system is difficult to implement, unevenly enforced, and not equipped to scale with the state's rapidly growing charging infrastructure needs…Counties vary widely in their level of enforcement and capacity, with some not registering or inspecting chargers at all, leading to inconsistency and uncertainty across the state. These challenges are compounded by a limited number of Registered Service Agencies (RSAs) authorized to test and certify charging stations, resulting in long wait times and high costs for operators to bring chargers online. As a result, proponents of efforts like those contained in this bill believe that the current system is hindering the timely installation of reliable charging infrastructure, affecting both industry growth and consumer confidence.

County Sealers and Registered Service Agencies (RSAs) and the Role of RSAs in Weights and Measure Regulations. As a part of the oversight of weighing devices, there is a RSA program under the jurisdiction of the CDFA which is responsible for registering service agencies and their employees. RSAs are in greater numbers than county sealers and can utilize their numbers to more swiftly inspect and verify weighing devices. However, the cost of testing devices necessary to test electric vehicle supply equipment remains an impediment for both county sealers and RSA agents to conduct initial testing of electric vehicle charging stations, especially at the initial point of entry into the market. It is reported that the testing equipment costs approximately $50,000-$100,000, which can be a barrier to entry for many RSAs. EVSEs are unique in the need for initial inspection and testing, given how quickly these stations are being installed and how many are needed.

California Energy Commission and Transitioning Oversight of Electric Vehicle Supply Equipment from Division of Measurement Standards and the County Sealers to CEC. In response to concerns with EVSE reliability, AB 2061 (Ting, Chapter 345, Statutes of 2022) required the CEC to define uptime for EV chargers, set uptime recordkeeping and reporting requirements and assess EV uptime every two years. At the same time the CEC is tasked with ensuring a robust electrical

vehicle supply market which includes increasing the availability of chargers across the state, this bill proposes to also require the CEC to oversee and regulate the private business operations of both ESVE manufacturers and equipment operators.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Committee on Appropriations, the bill will result in costs of an unknown amount, likely in the hundreds of thousands of dollars annually for a limited period, to CDFA for DMS to adopt regulations governing EVSE inspection frequency by July 1, 2028, develop the risk-based statistical sampling methodology, receive and process monthly inspection data from county sealers, and compile and transmit data to the CEC no less than biannually. Ongoing data collection and reporting workload is likely minor and absorbable within existing resources. The bill will also result in costs to the CEC for one air pollution specialist position at $191,000 annually and ongoing and costs of an unknown amount, likely minor, to county sealers to receive placed-in-service reports, submit monthly EVSE inspection data to DMS, and administer the notice-and-cure process before taking an EVSE out of service.

SUBJECT: Healthy Aging Community Partnership Program

SOURCE: California Senior Legislature

DIGEST: This bill permits local health departments, area on aging, community college, public or private college, public or private university, or other appropriate county department to establish a Healthy Aging Community Partnership Program for older individuals designed to promote health aging, social engagement, and independent living in collaboration with relevant local entities. Specifies that the program does not duplicate or supplant current adult education courses, classes,

and services provided by the California Community Colleges, including through the Adult Education Program.

Assembly Amendments of 8/5/26:

1) Add community colleges and public or private colleges or universities to the list of entities authorized to establish a Healthy Aging Community Partnership Program for older individuals;

2) Strike local school districts from the list of entities authorized to establish a Healthy Aging Community Partnership Program for older individuals;

3) Align the definition of older adult that of WIC §9018; and,

4) Specifiy that a Healthy Aging Community Partnership Program does not duplicate or supplant current adult education courses, classes, and services provided by the California Community Colleges, including through the Adult Education Program.

ANALYSIS:

Existing law:

1) Requires each county board of supervisors to appoint a local health officer (LHO). Requires LHOs to enforce and observe orders of the board pertaining to public health and sanitary matters, including regulations prescribed by the California Department of Public Health (CDPH), and statutes related to public health. [Health & Safety Code (HSC) §101000 and 101030]

2) Establishes the Mello-Granlund Older Californians Act and sets forth the state's commitment to older adults, people with disabilities, and family caregivers served by the programs administered by the California Department of Aging (CDA). [Welfare & Institutions Code (WIC) §9000]

3) Defines "older individual" or "elderly" as a person 60 years of age or older, except where this provision is inconsistent with federal requirements. [WIC §9018]

4) Defines "area agency on aging" (AAA) as a private nonprofit or public agency designated by CDA that works for the interests of Older Californians within a planning and service area, and engages in community planning, coordination, and program development, and, through contractual arrangements, provides a broad array of social and nutritional services. [WIC §9006]

5) Recognizes AAAs as the local units on aging in California that are supported from an array of sources, including federal funding largely through the Older Americans Act, state and local government assistance, the private sector, and individual contributions for services. [WIC §9400]

6) Establishes an older adult wellness program within CDA. Requires the program to have all the following functions:
   a) Focus on educating California's older adults, as well as caregivers, families, and health care professions, about the importance of living a healthy lifestyle, including, but not limited to, nutrition, exercise, injury prevention, and mental well-being;
   b) Provide information on, and help California's culturally and ethnically diverse older adults and adults with functional impairments;
   c) Provide educational information on the resources and services available for older adults from both private and public entities in communities throughout the state and the AAA;
   d) Promote education and training for professionals and caregivers who work directly with older adults to maximize wellness;
   e) Generate a cultural shift to a more positive vision and expectation with respect to how aging is viewed by all Californians;
   f) Transform perceptions of aging into a more hopeful, appreciative, and aspiring mode of being;
   g) Create a new culture that cherishes each of us;
   h) Advance the recognition of the unique status, experience, capacity, and role of older adults to become our models for guidance and inspiration;
   i) Replace the image of older adults who are "self-interested" with an image of older adults who are actively engaged and involved in their communities;
   j) Promote and mobilize older adults and adults with disabilities into emerging roles for the public benefit;
   k) Challenge the prevailing culture, to the extent that it discounts the value of age; and,
   l) Rid our culture of the negative attitudes towards adults who are aging and adults with disabilities. [WIC §9660-9661]

7) Requires the Secretary of the California Health and Human Services Agency (CalHHS), in coordination with the Director of CDA, to lead the development and implementation of the state's master plan for aging (MPA). [WIC §9850]

This bill:

1) Permits a local health department, area agency on aging, community college, public or private college, public or private university, or other appropriate county department, as determined by the county, to establish a Healthy Aging Community Partnership Program to provide community-based programs for older individuals designed to promote healthy aging, social engagement, and independent living in collaboration with relevant local entities, including school districts, libraries, faith institutions, and community organizations.

2) Permits a Healthy Aging Community Partnership Program, if a local entity establishes one, to include, but not be limited to: technology assistance, physical activity, music or arts programming, cultural programming, language learning opportunities, shared meals, and other community-based enrichment activities that support healthy aging and social connection.

3) Defines "older individual" as a person 60 years of age or older, except where this provision is inconsistent with federal requirements.

4) Prohibits requiring any local entity or department to implement a Healthy Aging Community Partnership Program.

5) Requires the implementation of a Healthy Aging Community Partnership Program to be subject to the availability of local resources and partnerships.

6) Specifies that a Healthy Aging Community Partnership Program does not duplicate or supplant current adult education courses, classes, and services provided by the California Community Colleges, including through the Adult Education Program.

Background

According to the author of this bill:

> California's older adult population is growing rapidly, yet there is no designated public system responsible for coordinating education and prevention services tailored to older adults' real-life needs. This bill will establish a statutory framework authorizing counties to deliver older adult education and technology training through local public health systems, in partnership with community-based organizations and local school districts, to improve health, independence, and quality of life for Californians aged 55 and over.

Older Americans Act. The Administration of Community Living (ACL) of the U.S. Department of Health and Human Services states that Congress passed the

Older Americans Act (OAA) in 1965 in response to concern by policymakers about a lack of community social services for older persons. The original OAA established authority for grants to states for community planning and social services, research and development projects, and personnel training in the field of aging. The OAA also established the Administration of Aging to administer the newly created grant programs and to serve as the federal focal point on matters concerning older persons.

Mello-Granlund Older Californians Act. The Older Californians Act of 1980 designated CDA as the single state agency responsible for administering the OAA; and defined the duties and functions of CDA as well as the state's 33 AAAs. The Older Californians Act was later amended by the Mello-Granlund Older Californians Act, AB 2800 (Granlund, Chapter 1097, Statutes of 1996), which also expanded upon the original act by establishing new programs and making structural changes to service delivery. The Mello-Granlund Older Californians Act sets forth California's commitment to older adults, people with disabilities, and family caregivers served by the programs administered by CDA.

CDA. According to CDA's website, the CDA operates under the umbrella of CalHHS and administers programs that serve older adults, adults with disabilities, family caregivers, and residents in long-term care facilities. These programs receive funding through the federal OAA, the Older Californians Act, and through the Medi-Cal Program. CDA contracts with the network of 33 AAAs. The ACL website defines an AAA as a public or private nonprofit agency designated by a state to address the needs and concerns of all older persons at the regional and local levels. AAAs are primarily responsible for a dedicated geographic area, also known as a planning and service area that is either a city, a single county, or a multi-county district. AAAs coordinate and offer a wide array of federal and state-funded community-based services that aim to assist older adults as well as younger adults with disabilities to live as independently as possible, promote healthy aging and community involvement, and support family members in their vital care giving role. Some of these services include, but are not limited to: in-home support services, transportation, health and wellness programs, benefits counseling, and home-delivered and congregate meals.

CDA also contracts with 38 agencies that operate the Multipurpose Senior Services Program through the Medi-Cal Home and Community-Based Services Waiver for the elderly and certifies approximately 242 Adult Day Health Care Centers for participation in its Medi-Cal Community Based Adult Services Program. CDA actively collaborates with many other State departments, among other entities, on transportation, housing and accessibility, emergency preparedness and response,

wellness and nutrition, falls and injury prevention, improving services to persons with dementia, reducing fraud and abuse, and many other issues. Currently, CDA administers the following programs: AAA; Aging and Disability Resource Connection; California Caregiver Awareness, Resources, Education & Support Program; Growing a Resilient and Outstanding Workforce; CalFresh Outreach Program; CalFresh Healthy Living; Community-Based Adult Services; Caregiver Resource Centers; Dignity At Home Fall Prevention Program; Bridging the Digital Divide; Health Insurance Counseling and Advocacy Program; Legal Services; Long-Term Care Ombudsman Program; Multipurpose Senior Services Program; the Office of Long-Term Care Patient Representative; and Senior Community Service Employment Program.

MPA. In 2019, Governor Gavin Newsom signed Executive Order N-14-19 in response to the increase of the aging population in California. The executive order, known as the MPA, calls for a comprehensive plan to address and prepare the state's aging population. MPA is a 10 year blueprint for state and local governments, the private sector, and philanthropy that prioritizes preparing the state for the demographic changes and continuing California's leadership in aging, disability, and equity. MPA outlines five goals: (1) Housing for All Ages and Stages; (2) Health Reimagined; (3) Inclusion and Equity, Not Isolation; (4) Caregiving that Works; and (5) Affording Aging.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

This bill is keyed non-fiscal.

California Senior Legislature (source)
AARP
Alzheimer's Association
California Association for Adult Day Services
California Long-Term Care Ombudsman Association
California Federation of Teachers
California PACE Association
County of Los Angeles
LeadingAge California

OPPOSITION: (Verified 8/17/26)

None received

ARGUMENTS IN SUPPORT: The sponsor of this bill, the California Senior Legislature (CSL), writes that too many seniors face barriers to essential information, social connection, and preventive health education. CSL, among other supporting organizations, state that this bill offers a community-based approach by allowing local health departments to partner with trusted local entities to deliver programs tailored to older adults' needs. They believe that this bill will strengthen local capacity to serve older adults, improve health outcomes, and foster greater community connection. The California Federation of Teachers (CFT) adds that older adult education was historically supported through Adult Education programs prior to the Great Recession, but statutory and funding changes eliminated older adult-specific education classes. As a result, many older adults now face social isolation, digital exclusion, difficulty accessing healthcare and benefits, increased vulnerability to fraud, and preventable declines in physical function. CFT states that this bill will restore older adult education as a recognized public function and reframe it as preventative public health infrastructure rather than an unfunded afterthought. CFT furthers that the framework outlined in this bill avoids creating new bureaucracy while directly supporting the goals of California's MPA. Additionally, the Alzheimer's Association states that this bill enhances care and support in the community for older adults generally, which can particularly benefit those living with Alzheimer's disease or another dementia. The programs permitted in this bill could help this vulnerable population adapt to remote caregiving with the use of new technology, navigate care, prevent falls, prepare for emergency evacuations, and support their emotional wellbeing. The Alzheimer's Association also writes that this bill supports communities invested in health aging deliver meals and educational programs that have the potential to improve outcomes for older adults, and also have the capability to address the unique challenges for those with Alzheimer's disease or dementia. ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Wildfire County Coordinator Program

SOURCE: California Fire Safe Council
Megafire Action

DIGEST: This bill requires the Department of Forestry and Fire Protection (Department) to establish the California Wildfire Preparedness Program and enter

into an agreement with the California Fire Safe Council (CFSC) to administer and deliver the Wildfire County Coordinator Program.

Assembly Amendments establish the Wildfire Preparedness Program, provide greater clarity towards its authorities, and make technical and editorial changes.

ANALYSIS:

Existing law:

1) Establishes the Department (Public Resources Code (PRC) §701).
2) Establishes the Task Force (PRC §4005).
3) Requires the Task Force to update the Action Plan every five years, beginning March 1, 2026 (PRC §4771(f)).
4) Requires the implementation strategy include specific actions:
   a) Increasing the pace and scale of wildfire and forest resilience activities (PRC §4771(c)(1));
   b) Strengthening the protection of communities and reducing their fire risk (PRC §4771(c)(2));
   c) Creating a sustainable wood products market in California (PRC §4771(c)(3);
   d) Sustaining and expanding outdoor recreation on forestland (PRC §4771(c)(4));
   e) Protecting and expanding urban canopy and forestry (PRC §4771(c)(5)); and
   f) Driving innovation and measuring progress in achieving the above goals (PRC §4771(c)(6).

This bill:

1) Requires the Department to establish the California Wildfire Preparedness Program to
   a) Establish recommended standards for wildfire risk modeling and analysis tools;
   b) Develop guidance and tools to support county-level wildfire risk assessments; the identification of high-risk communities; prioritization of mitigation activities; and evaluation of risk reduction outcomes;
   c) Coordinate with the Office of Land Use and Climate Innovation (LCI) to develop guidance and templates for county-level wildfire resilience prioritization and implementation plans.

2) Establishes the Wildfire County Coordinator Program within the Department, and requires the Department to enter into an agreement with CFSC to administer the program.
   a) Establishes the purpose of the program as to support county-level coordination of and capacity for wildfire mitigation, prevention, preparedness, and recovery activities.

3) Requires the Wildfire County Coordinator Program to:
   a) Establish capacity in participating counties to plan and execute community- and county-level wildfire prevention, preparedness, mitigation, and recovery activities in support of the Action Plan.
   b) Support the use of risk assessment tools and guidance to enhance county-level risk assessment, wildfire planning, and project prioritization.
   c) Facilitate local coordination on priority wildfire resilience planning and implementation with federal, state, tribal, local, and regional wildfire resilience partners.
   d) Facilitate coordination between county-level community wildfire preparedness efforts, regional landscape resilience efforts, and other applicable federal, state, tribal, and local planning efforts to improve information sharing, identify shared implementation opportunities, and strengthen alignment across jurisdictions and planning scales.
   e) Develop and disseminate educational materials and programming on wildfire and smoke mitigation and preparedness.
   f) Provide information on available local, state, and federal financial resources to support wildfire resilience planning and implementation.
   g) Support local capacity to access and implement state or federal wildfire resilience funding programs.
   h) Support the planning and implementation of home hardening, defensible space, and related mitigation activities.
   i) Improve access to and streamline financial assistance for home hardening and defensible space in high-risk communities.
   j) Support activities to increase community resilience to smoke.
   k) Collect data on local mitigation and preparedness activities, outcomes, and costs.

Comments

Wildfire County Coordinator Program (County Coordinators). Established in 2021, the Wildfire County Coordinator Program seeks to educate, encourage, and develop countywide community collaboration and coordination among wildfire

mitigation groups. The program, powered by a partnership between the CFSC and the Department, has provided funding to 52 of California's 58 counties to hire a Wildfire County Coordinator and establish critical local capacity to plan and implement wildfire resilience strategies on the ground.

Codifying success. According to the author's office, since 2021, the County Coordinator program has achieved the following results:

- Secured over $104 million for local mitigation and preparedness projects,
- Reached nearly 1 million residents with wildfire resilience education,
- Established 100+ new Firewise Communities and Fire Safe Councils, and
- Built a durable, statewide network to advance coordinated mitigation efforts.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee analysis, on a previous version of the bill:

- The Governor's Office of Land Use and Climate Innovation (LCI) estimates one-time costs of $870,000 spread over two years for two limited-term positions to develop the wildfire resilience guidance, templates, and implementation guidance as required by the bill.
- Unknown but potentially significant ongoing costs (General Fund) for CalFire to implement the provisions of this bill.
- Unknown but potentially significant ongoing cost pressures (General Fund and other funds) to continue providing funding for home hardening certification and the WCC Program after 2027.

None received

ARGUMENTS IN SUPPORT: According to the author, "SB 973 establishes a statewide framework to strengthen community wildfire resilience by directing [the Department] to develop guidance and recommended standards for local entities assessing wildfire risk and prioritizing wildfire mitigation activities, and to expand the Wildfire County Coordinator Program, administered in partnership with the California Fire Safe Council. The program builds county-level capacity to plan, coordinate, and implement wildfire prevention, preparedness, mitigation, and recovery activities aligned with state wildfire strategy."

NO VOTE RECORDED: Ochoa Bogh, Reyes, Wahab

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Property taxation: change in ownership: generational transfers: special needs trusts

SOURCE: Author

DIGEST: This bill modifies the definition of "transfer" in statute implementing Proposition 19 to explicitly state that other forms of trusts can qualify for the exclusion, specifically Special Needs Trusts.

Assembly Amendments restate the measure's change, add a reference for its definition of "special needs trust," and refine a cross reference.

ANALYSIS:

Existing law:

1) Provides that all property is taxable unless explicitly exempted by the Constitution or federal law (California Constitution, Article XIII, Section One).

2) Limits the maximum amount of any *ad valorem* tax on real property at 1% of full cash value, plus any locally-authorized bonded indebtedness, and caps a property's annual inflationary increase in taxable value to 2%. Provides that assessors reappraise property whenever it is purchased, newly constructed, or when ownership changes (California Constitution, Article XIIIA, as added by Proposition 13, 1978).

3) Defines "change in ownership" as "a transfer of a present interest in real property, including the beneficial use thereof, the value of which is substantially equal to the value of the fee interest."

4) Enacts change in ownership exclusions for transfers of property from one generation to the next, specifically:

   a) Transfers of property from parents to children (Proposition 58, 1986).

   b) Transfers of property to grandchildren, so long as the parents are deceased (Proposition 193, 1996).

5) Enacts the Home Protection for Seniors, Severely Disabled, Families, and Victims of Wildfire or Natural Disasters Act, which limits the above exclusions solely to the transfer of a principal residence when the property continues as the primary residence of the transferee, and requires the transferee to claim the homeowner's exemption from property tax at the time of transfer or within one year to apply the exclusion (Proposition 19, 2020).

6) Implements Proposition 19 to set forth definitions, requirements, limitations, and procedures for claiming a change in ownership exclusion for transfers of property from one generation to the next, based on similar statutes implementing Propositions 58 and 193 (SB 539, Hertzberg, Chapter 427, Statutes of 2021).

7) Defines "transfer" to include a transfer through the medium of an *inter vivos* or testamentary trust to ensure that these transfers are eligible for Prop. 19 intergenerational transfer exclusions.

8) Extends the current deadline for taxpayers to retroactively apply a Proposition 58, 193, or 19 intergenerational transfer from six months to three years under specified circumstances resulting from the 2025 Los Angeles Fires (SB 293, Perez, Chapter 539, Statutes of 2025).

This bill:

1) States that a Special Needs Trust (SNT) is considered to be an eligible means of transfer for purposes of a Proposition 19 transfer.

2) Defines "Special Needs Trust" by reference to the Probate Code.

3) Changes a reference in SB 293 to more accurately refer to specified disasters.

Background

Often used to transfer property from one generation to the next, trusts are specific legal agreements to hold and administer property, in which a trustee manages property on behalf of others. Trusts allow grantors to pass assets to future generations while avoiding lengthy and costly probate proceedings. Trusts must identify:

- The creator of the trust, known as the trustor or grantor.
- The manager of the trust, known as a trustee or fiduciary.
- The beneficiary or beneficiaries who will receive property from the trust.
- The property the trust manages.

A Special Needs Trust is a trust that allows disabled persons to maintain their eligibility for public assistance benefits, despite having assets that would otherwise make the person ineligible for those benefits, specifically Medicaid and Supplemental Security Income. Because the beneficiary does not own the trust assets, they remain eligible for benefit programs that apply asset limits.

For the most part, a trustor transferring property to a trust is treated as a change in ownership at the time of transfer, triggering a reassessment of the property held by the trust, with several exceptions. According to Board of Equalization (BOE) Rule 462.010, the transfer of real property by a trustor to a trust in which the trustor-transferor is the sole present beneficiary of the trust is not a change in ownership, but generally becomes one when persons other than the trustor-transferor are or become present beneficiaries of the trust. BOE guidance states that assessors can look through a trust to its beneficial owners to determine whether an exclusion applies, such as a Prop. 19 intergenerational transfer, so long as the trustee or trustor submits a timely exclusion claim. While SB 539 includes trusts in its definition of "transfer" it did not explicitly include SNTs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- No property tax revenue loss, as the State Board of Equalization (BOE) notes this bill clarifies a special needs trust is an eligible medium of transfer under existing law.

- Costs of approximately $15,000 in fiscal year (FY) 2026-27, $5,000 in FY 2027-28, and $2,000 in FY 2028-29 to the BOE to update and provide related guidance.

OPPOSITION: (Verified 8/12/26)

None received

ARGUMENTS IN SUPPORT: According to the author, "SB-974 provides important clarification to Proposition 19 by ensuring that Special Needs Trusts are recognized as meeting eligibility requirements for property tax protections. This will ensure that families planning for the long-term care of a severely disabled loved one are not unfairly penalized with property tax reassessment."

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: San Diego Unified Port District: job order contracting: pilot program

SOURCE: San Diego Unified Port District

DIGEST: This bill authorizes the San Diego Port District to use the Job Order Contracting (JOC) method.

Assembly Amendments

1) Excludes district maritime and longshore operations from JOC,

2) Prohibits JOC being awarded for any new construction,

3) Prohibits contract for work that is protected by any collective bargaining agreements or memoranda of understanding,

4) Provides a job order contractor and subcontractor at every tier must comply with district's project labor agreements, as specified.

ANALYSIS:

Existing law:

1) Requires, via the Local Agency Public Construction Act, local agencies to invite bids for construction projects and award contracts to the lowest responsible bidder,

2) Establishes the San Diego Unified Port District for the acquisition, construction, maintenance, operation, development, and regulation of harbor works and improvements for the harbor of San Diego and for the promotion of commerce, navigation, fisheries, and recreation,

3) Requires the San Diego Unified Port District to comply with the specific public contracting requirements for port districts,

4) Authorize multiple agencies to use JOC, some state and some local, including counties, school districts, community college districts, the California State University system, and Caltrans.

This bill:

1) Allows, until January 1, 2037, the Port District to use JOC procurement authority,

2) To use this authority, the Port District must:

   a) Not contract for work that is protected by any collective bargaining agreements or memoranda of understanding;

   b) Comply with all collective bargaining agreements or memoranda of understanding; and

   c) Competitively bid and award to bidders providing qualified responsible bids.

3) Limits JOC to repair, remodeling, or other repetitive work according to unit prices while prohibiting the use of JOC for district maritime and longshore operations.

4) No annual contracts may be awarded for any new construction.

5) Requires solicitations for a JOC must comply with the following requirements:

   a) The Port District must prepare a set of solicitation documents for JOC. Documents must include a unit price catalog or other established unit prices;

   b) An architect, engineer, consultant, or contractor retained by the district to assist in the development of the JOC solicitation documents must not be eligible to bid or participate in the preparation of the JOC bid; and

   c) The Port District may award multiple JOCs in response to a single JOC solicitation.

6) Requires Port District to develop a system for evaluating and awarding JOC bids:

   a) Port District must prepare a request for bids for JOC based on the solicitation documents and request sealed bids;

   b) Each bidder must include in its bid one or more adjustment factors to the established unit prices;

   c) Each bidder shall agree to identify any subcontractors to be used;

   d) Port district must award the JOC, if any, to a bidder that the district determines is qualified and responsive;

   e) A job order contractor and subcontractor at every tier must comply with the district's project labor agreements, as applicable; and

   f) Port District may award any job order for repair or renovation work with a value equal to or less than $250,000 to a job order contractor that is also a certified small business enterprise.

7) Provides that the maximum total dollar amount that may be awarded under a single JOC shall not exceed $5 million dollars in the initial contract term of the JOC. No single job order may exceed $1 million,

8) Provides that JOCs may be executed for an initial contract term of no more than 12 months and may be extended or renewed for two subsequent annual terms and a maximum of $10 million over the subsequent two terms of the contract,

9) Prohibits work from being split or separated into smaller job orders for the purpose of evading the cost limitation provisions of this bill,

    a) Except that district may award phased job orders when necessary to comply with environmental regulations, permitting requirements, tidal or seasonal construction windows, or other operational constraints.

10) Allows the amounts in the bill to be adjusted annually to reflect the percentage change in the California Consumer Price Index (CPI),

11) Provides that all work bid under JOCs shall comply with the Subletting and Subcontracting Fair Practices Act and is subject to all of the penalties and provisions set forth in that Act,

12) Requires, if a job order contractor chooses to use a subcontractor, the job order contractor to verify that the subcontractor possesses and maintains the appropriate licenses and credentials required,

13) Provides that, if the Port District, after conducting an administrative due process review, determines that there has been a violation of the Subletting and Subcontracting Fair Practices Act, including, but not limited to, bid shopping by the job order contractor, the Port District may terminate the job order contract, declare the contractor ineligible for future job order contracts for a period of time to be determined by the Port District, or withdraw authorization for the contractor to proceed with awarded work,

14) Requires a JOC to set forth in the general conditions of the JOC the party or parties responsible for seeing that existing law governing prevailing wages on public works projects is complied with, as specified.

15) Requires, for purposes of job order contracting, prevailing wages to apply to all work ordered under the JOC regardless of thresholds set forth in existing law governing prevailing wages on public works projects, as specified.

16) Requires the Port District to designate one individual to act as a monitor to inspect job sites for labor compliance violations at the request of the

designated labor representative in its project labor agreement,

17) Requires a JOC to be subject to a project labor agreement (PLA) between the district and the San Diego County Building and Construction Trades Council,

18) Requires, in order to prevent fraud, waste, and abuse, the Port District must prepare for each individual job order developed under a JOC an independent cost estimate. The estimate shall be prepared prior to the receipt of any job order contractor's estimate for the work and shall be compared to the job order contractor's estimate to determine the reasonableness of that estimate before issuance of any job order. If the Port District finds the job order contractor's estimate to perform work for a given job order to be unreasonable, not cost effective, or undesirable, the Port District may elect not to issue the job order to the job order contractor, and may, instead, utilize any other available procurement procedures or choose not to move forward with the work,

19) Requires the Port District to submit to the appropriate policy and fiscal committees of the Legislature, on or before January 1, 2035, a report on the use of JOC. The report must include:

    a) A description of the Port District's system for evaluating JOC bids for award of JOCs, including, but not limited to, the criteria used by the Port District to determine a qualified and responsive job order contractor;

    b) A description of each JOC the Port District awarded, and the contractor awarded the contract; and

    c) An assessment of the use of job order contracting under this bill.

Background

Job order contracting (JOC). A JOC is a competitively bid, fixed price, indefinite quantity contract for the performance of minor construction, as well as the renovation, alteration, painting and repair of existing public facilities. A JOC is generally a multi-year contract that includes a base year and multiple "option years," and is awarded before the awarding agency has identified specific work that it needs the contractor to perform. Instead of bidding each project separately, the agency awards a JOC that identifies specific tasks and covers a range of recurring work, such as roofing, electrical work, plumbing, and painting, across facilities it owns.

A JOC is a fixed price agreement in that it is based upon specified charges contained in a Unit Price Book (UPB), which is prepared by the public agency or by independent commercial sources. The UPB sets forth detailed repair and construction tasks, including task descriptions, specifications, units of measurement, and unit prices for each task ("Unit Price" means the amount paid for a single unit of an item of work). This contracting method is intended to reduce costs and accelerate completion of smaller projects.

The Legislature has authorized multiple agencies to use JOC, some state and some local, including counties, school districts, community college districts, the California State University system, and Caltrans. California counties have had the authority to use JOC since 1983.

San Diego Unified Port District. The San Diego Unified Port District (Port District) was created by the Legislature to manage San Diego Bay and surrounding waterfront land on December 18, 1962. The Port of San Diego is the fourth largest of the 11 ports in California. The Port District includes five member cities – San Diego, Chula Vista, Coronado, National City, and Imperial Beach. The Port District currently oversees two maritime cargo terminals, two cruise ship terminals, 23 public parks, the Harbor Police Department and the leases of hundreds of tenant and subtenant businesses around San Diego Bay.

Existing law establishes the Port District as the trustee of public lands within San Diego Bay. The Port District was created for the acquisition, construction, maintenance, operation, development and regulation of harbor works and improvements, including rail and water, for the development, operation, maintenance, control, regulation, and management of the harbor of San Diego upon the tidelands and lands lying under the inland navigable waters of San Diego Bay, and for the promotion of commerce, navigation, fisheries, and recreation. A seven-member Board of Port Commissioners governs the Port District: one commissioner each is appointed by the city councils of Chula Vista, Coronado, Imperial Beach and National City, and three commissioners are appointed by the San Diego City Council.

Comments

According to the author, "SB 983 authorizes the Port of San Diego to utilize job-order-contracting ("JOC") for their repair, remodeling, and repetitive work. The ability to utilize this contracting method will promote efficiency and flexibility in completing necessary maintenance projects.

Currently, when maintenance is needed on the Port's property, the Port must go out for competitive bidding for each individual project. This can result in major delays and can interrupt Port operations. This bill establishes a pilot program allowing the Port of San Diego to use the JOC procurement method, and sunsets the program in January 2037."

Special legislation. Section 16 of Article IV of the California Constitution prohibits special legislation when a general law can apply. SB 983 contains findings and declarations explaining the need for legislation that applies only to the Port of San Diego because of the unique and special circumstances surrounding the port.

SUBJECT: Community Assistance, Recovery, and Empowerment (CARE) Court Program

SOURCE: California Professional Firefighters

DIGEST: This bill permits a first responder to request the county behavioral health (CBH) agency file a petition to commence the Community Assistance, Recovery, and Empowerment Act process to investigate a person's eligibility. Requires Community Assistance, Recovery, and Empowerment to complete a review of the request within 30 days and determine whether to file a petition.

Assembly Amendments change two references of "respondent" to "individual" to accurately reflect that a person is not actually part of the CARE process yet in those instances.

ANALYSIS:

Existing law:

1) Establishes Community Assistance, Recovery, and Empowerment (CARE) to help connect an individual (known as a "respondent") with a court-ordered CARE agreement or CARE plan for up to 12 months, with the possibility to extend for an additional 12 months, that provides individualized, appropriate community-based services and supports, which include clinically appropriate behavioral health care and stabilization medications, housing, and other supportive services. [Welfare and Institutions Code (WIC) §5970, et seq.]

2) Requires an individual, to qualify as a respondent in the CARE process, to:
   a) Be 18 years of age or older;
   b) Be currently experiencing a serious mental disorder and have a diagnosis of schizophrenia spectrum or other psychotic disorder. Prohibits an individual who has a current diagnosis of substance use disorder, but who does not also meet the required criteria, from qualifying for the CARE process;
   c) Not be clinically stabilized in ongoing voluntary treatment;
   d) Be unlikely to survive safely in the community without supervision and their condition is substantially deteriorating; or, be in need of services and supports in order to prevent a relapse or deterioration that would be likely to result in grave disability or serious harm to self or others, resulting in involuntary detention;
   e) Participation in a CARE plan or CARE agreement would be the least restrictive alternative necessary to ensure the individual's recovery and stability; and,
   f) Be likely to benefit from participation in a CARE plan or CARE agreement. [WIC §5972]

3) Permits the following adult persons to file a petition to commence the CARE process:
   a) A person with whom the respondent resides;
   b) A spouse, parent, sibling, child, or grandparent or an individual who stands in loco parentis to the respondent;
   c) The director of a hospital or the director's designee, in which the respondent is hospitalized, including hospitalized pursuant to the Lanterman-Petris-Short (LPS) Act involuntary detention law;
   d) The director of a public or charitable organization, agency, or home, or their designee, who has, within the previous 30 days, provided or who is currently providing behavioral health services to the respondent or in whose institution the respondent resides;
   e) A licensed behavioral health professional, or their designee, who is, or has been within the previous 30 days, either supervising the treatment of, or treating the respondent for a mental illness;
   f) A first responder (FR), including a peace officer, firefighter, paramedic, emergency medical technician, mobile crisis response worker, or homeless outreach worker, who has had repeated interactions with the respondent in the form of multiple arrests, multiple detentions and transportation pursuant to the LPS, multiple attempts to engage the respondent in voluntary treatment, or other repeated efforts to aid the respondent in obtaining professional assistance;
   g) The public guardian or public conservator, or their designee, of the county in which the respondent resides or is found;
   h) The director of CBH, or their designee, of the county in which the respondent resides or is found;
   i) The director of county adult protective services, or their designee, of the county in which the respondent resides or is found;
   j) The director of a California Indian health services program, California tribal behavioral health department, who has, within the previous 30 days, provided or who is currently providing behavioral health services to the respondent, or the director's designee;
   k) The judge of a tribal court located in California before which the respondent has appeared within the previous 30 days, or the judge's designee; or,
   l) The respondent. [WIC §5974]

4) Requires the court to review a petition promptly, and after a series of investigations, reports, and hearings that determine if an individual meets CARE criteria, to:

a) Dismiss the matter if the court determines voluntary engagement with the respondent is effective, and they have enrolled or are likely to enroll in voluntary behavioral health treatment;
b) Order CBH to work with the respondent, the respondent's counsel, and the supporter ("the parties") to engage the respondent in behavioral health treatment and attempt to enter into a CARE agreement, approve the agreement, and set a progress hearing for 60 days, if voluntary engagement is not effective;
c) Order CBH, through a licensed behavioral health professional, to conduct a clinical evaluation of the respondent to determine if they meet CARE criteria, if the parties are not likely to enter into a CARE agreement; and,
d) Order CBH and the parties to jointly develop a CARE plan within 14 days, if the respondent does meet CARE criteria. [WIC §5977(a)(5)(A), §5977 (c)(2), §5977.1(a)(2)(A), §5977.1(b), and §5977.1(c)(3)(A)]

5) Requires the Department of Health Care Services (DHCS) to provide training and technical assistance to CBH to support CARE implementation, including training regarding the CARE process; CARE agreement and plan services and supports; supported decision making; the supporter role; trauma-informed care; elimination of bias; psychiatric advance directives' family psychoeducation; and, data collection. [WIC §5983(b)]

This bill:

1) Permits an FR, in addition to directly filing a petition to commence the CARE process, to request the CBH of the county in which the respondent resides or is found to file a petition to commence the CARE process if the FR believes that an individual meets or is likely to meet criteria to qualify for the CARE process, Requires the request to include contact information for the individual, including a telephone number and address, if available, and other information as specified by DHCS.

2) Requires CBH, within 30 business days of the request, to complete a review of the request and determine whether to file a petition.

3) Requires CBH, upon completing the review, to notify the FR about the outcome of the review of the request and whether the individual met criteria for the CARE process.

4) Requires DHCS to develop a referral form to be used by an FR and to issue guidance regarding the procedure for an FR to request CBH to file a petition to commence the CARE process for an individual, and to include data regarding FR requests made to CBH in the annual CARE Act report.

Background

According to the author of this bill:

> CARE was created to provide a structured, coordinated pathway to treatment for individuals with severe mental illness who are too often cycling through emergency rooms, jail, and repeated law enforcement encounters. Today, FRs are often the first point of contact for individuals in crisis, but current law makes it difficult for them to file a CARE petition. To do it, they must navigate a complex court filing process, obtain sensitive medical records, and appear in court. This bill creates a more practical and effective pathway by allowing FRs to request that CBH investigate and file CARE petitions on their behalf. This bill would expand access to CARE and help more Californians with untreated psychotic disorders receive the care they need.

CARE. SB 1338 (Umberg and Eggman, Chapter 319, Statutes of 2022) established CARE to help connect an individual in crisis with a court-ordered CARE plan for up to 12 months, with the possibility to extend for an additional 12 months. The framework provides these individuals (referred to as "respondents" in the CARE process) with a clinically appropriate, community-based set of services and supports that are culturally and linguistically competent, which includes short-term stabilization medications, wellness and recovery supports, connection to social services, and a housing plan. The California Health and Human Services Agency states that CARE is an upstream diversion to prevent more restrictive conservatorships or incarceration, based on evidence that demonstrates many people can stabilize, begin healing, and exit homelessness in less restrictive, community-based care settings. With advances in treatment models, new longer-acting antipsychotic treatments, and the right clinical team and housing plan, individuals who have historically suffered tremendously on the streets or during avoidable incarceration can be successfully stabilized and supported in the community. The first cohort of counties implemented CARE beginning October 1, 2023, and included Glenn, Orange, Riverside, San Diego, Stanislaus, and Tuolumne, and the City and County of San Francisco. Los Angeles County implemented early and began accepting CARE petitions on December 1, 2023. The

second cohort of counties, representing the remaining population of the state, began accepting CARE petitions as of December 1, 2024.

CARE Act 2025 first annual report. As reported by DHCS in its initial annual report, data from the first nine months of CARE implementation demonstrate that, even in its early stages, the CARE process is connecting people with schizophrenia and other psychotic disorders with evidence-based treatments and housing plans. This reflects a meaningful shift in helping the state's most vulnerable populations towards long-term recovery, lasting wellness, and housing stability. Relative to this bill, the report states that 556 CARE petitions had been received by the courts as of June 30, 2024 (the first nine months of CARE implementation). Of the filed CARE petitions, 217 (39%) were dismissed. There were 101 approved CARE agreements or ordered CARE plans. The remainder of filed CARE petitions were still in the court review process at the time of this report development and were pending disposition assignment, as reported by DHCS. Of the total 556 petitions submitted to the court, 497 CARE petitions were received by CBH during the first nine months of CARE implementation (representing 490 unique CARE respondents, given that some respondents were petitioned more than once). CBH are only aware of, and able to track, CARE petitions they file themselves or those they are ordered to investigate by the courts. Petitions may also be pending court determination at the end of the reporting period covered in the report. Of the 490 unique CARE respondents that were sent to CBH, 101 had a CARE agreement approved, or CARE plan ordered by the court as their first CARE disposition; 160 were dismissed by the court; and 229 did not yet have a court disposition assigned. Among the 160 dismissed respondents, 15 became elective clients, 55 were found to be ineligible for CARE but received CBH services, and 90 were found to be ineligible for CARE and did not receive any CBH services. The report further notes that of the 490 CARE respondents that were sent to CBHs, 334 (68%) were petitioned by someone with a personal relationship to the respondent (referred to as a personal petition); 107 (22%) by a system partner (defined as a hospital director, licensed behavioral health professional treating client, public guardian, or conservator); 34 (7%) by an FR; and 14 (3%) by the respondent themselves.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

DHCS estimates one-time costs of $500,000 in contract resources in fiscal year 2027-28 to expand the existing training and technical assistance (TTA) contract to support comprehensive revision and cataloging of statewide CARE Act training

materials and curricula, including dedicated TTA to first responders and counties on DHCS referral form requirements, implementation support, and workflow development to ensure consistent statewide adoption of the new referral pathway, local workflow development, and augmentation to CARE Act data collection and reporting tools (General Fund). DHCS notes additional, absorbable state operations costs to update claiming guidance, claim forms, and rates.

DHCS states county behavioral health agencies could submit claims for reimbursement for costs associated with this bill, such as reviewing requests from first responders within 30 days. Using the 2025 Annual CARE Act Report to analyze the number of petitions submitted by first responders to county behavioral health agencies, DHCS estimates the resulting local assistance costs likely would not exceed $1 million, all of which would be reimbursable by the state. For its part, the County Behavioral Health Directors Association (CBHDA) estimates state-reimbursable costs to counties of $691,000 to $3.1 million to conduct outreach and engagement to find an individual within the bill's timeline to initiate CARE processes (General Fund).

City of Bakersfield
City of Oceanside
County of San Diego District Attorney's Office

OPPOSITION: (Verified 8/25/26)

Cal Voices
California Association of Social Rehabilitation Agencies
California Peer Watch
Disability Rights California
Mental Health America of California

ARGUMENTS IN SUPPORT: The California Professional Firefighters (CPF) as sponsor argue California's firefighters are on the front lines of delivering emergency medical services throughout the state, including to patients who are experiencing a mental health crisis, leading in evolving the local response framework to improve patient care. For example, CPF cosponsored legislation in 2020 that established community paramedicine and triage to alternate destination

programs, including allowing a paramedic to triage a patient and take them to an appropriate behavioral health facility to get the services they need at the right time. Moreover, many jurisdictions have developed mobile mental health units, bringing together a suite of public safety and medical professionals to improve care in the field. CPF argues despite that work more needs to be done. Firefighters in the field see patients daily who are in desperate need of robust care, but gaps in the system lead to patients not receiving the right kind of care at the right time. While firefighters are well-situated to identify individuals who may be eligible for CARE given their presence and engagement in the community, barriers, such as general lack of information, training, and support for CARE still exist throughout California, leaving many firefighters unable to participate or even unaware that they are able to begin the petition process. Additionally, firefighters and other first responders are responsible for hundreds of emergency calls and may lack the local resources needed to complete petitions and appear in the court process as required. Those who are able to begin the petition process may not have access to the required medical records or other documentation required by the court.

ARGUMENTS IN OPPOSITION: Disability Rights California (DRC) and California Peer Watch argue that they share first responders' concerns, but streamlining processes for referring people into CARE is not the solution. DRC argues people with CARE agreements or plans are placed on the same waitlists for services as anyone seeking services on their own, like one respondent who was placed on a waitlist for medication services that was three months long. The CARE First Annual Report noted 56.4% of CARE participants did not receive at least one ordered behavioral health service—including peer support, medication supports, and therapy—and 82.2% of CARE participants did not receive at least one ordered social service or support. CARE is also failing to achieve its goal of preventing crises or stopping people from cycling through emergency services, and coercive treatment interferes with the therapeutic relationship and is counter to sound public health policy. The quality of the therapeutic relationship is critical for a client's engagement in treatment, adherence to a medication plan, management of symptoms, overall treatment outcomes, and quality of life. California should be working to improve, not destroy, the therapeutic relationship. DRC says the state should be investing in community-based services, including: peer-led hotlines and warmlines that answer calls and texts that would otherwise go to 911; mobile crisis response teams that respond to mental health calls that would otherwise receive a police, fire, or ambulance response; peer respites that offer a space for healing for individuals who might otherwise find themselves in an emergency room; and full-service partnerships that actually connect people with whatever they need: housing, food, case management, medical, or mental health care. Cal Voices argues this bill

complicates the CARE process and could worsen the already coercive conditions faced by respondents. Mental Health of America California argues the right to appeal is a right exclusively given to respondents in CARE. Other petitioners may refile if their petition is dismissed. FRs should not be given the power to appeal the county's decision when that decision is in favor of the respondent, particularly when the respondent is unaware of any assessment or investigation occurring, as such appeals will create further unnecessary burdens for the counties.

SUBJECT: Residential care facilities for the elderly: categorization of citations

SOURCE: California Long Term Care Ombudsman Association

DIGEST: This bill requires the California Department of Social Services (CDSS), when a Residential Care for the Elderly (RCFE) licensee is cited for a deficiency that constitutes abuse to categorize the type of abuse. This bill describes the categories of abuse. Requires CDSS to ensure that these categories of abuse are reflected in any public-facing transparency, licensing, or enforcement databases maintained by CDSS.

Assembly Amendments make technical and clarifying amendments, and delay implementation from July 1, 2027 to July 1, 2029.

ANALYSIS:

Existing law:

1) Creates the Elder Abuse and Dependent Adult Civil Protection Act. (Welfare and Institutions Code [WIC] § 15600 et seq.)

2) Creates the California RCFE Act. (Health and Safety Code [HSC] §1569 et seq.)

3) Defines RCFE as a housing arrangement chosen voluntarily by persons 60 years of age or over, or their authorized representative, where varying levels and intensities of care and supervision, protective supervision, or personal care are provided, based upon their varying needs, as determined in order to be admitted and to remain in the facility. Allows persons under 60 years of age with compatible needs to be admitted or retained if a licensee determines that person is compatible, as defined. (HSC § 1569.2)

4) Requires a person, firm, partnership, association, corporation, or state or local public agency to have a current valid license to operate, establish, manage, conduct, or maintain an RCFE. (HSC § 1569.10)

5) Requires CDSS to inspect and license RCFEs. (HSC § 1569.11)

6) Tasks the administrator of an RCFE with the responsibility to provide or ensure provision of services to residents with appropriate regard for the residents' physical and mental well-being and needs. (22 California Code of Regulation [CCR] § 87405)

7) Establishes the Resident's Bill of Rights for residents of RCFEs. (HSC § 1569.269)

8) Requires every licensed RCFE to provide at least the following basic services:

   a) Care and supervision.

   b) Assistance with instrumental activities of daily living in the combinations which meet the needs of residents.

   c) Helping residents gain access to appropriate supportive services, as defined, in the community.

   d) Being aware of the residents' general whereabouts, although the resident may travel independently in the community.

e) Monitoring the activities of the residents while they are under supervision of the facility to ensure their general health, safety, and well-being.

f) Encouraging the residents to maintain and develop their maximum functional ability through participation in planned activities. (HSC § 1569.312)

This bill:

1) Requires CDSS, when a licensee is cited for a deficiency that constitutes abuse, to categorize the citation according to the specific type of abuse established by the evidence.

2) Defines for the purposes of categorizing each citation, CDSS to categorize each citation into one of the following categories that is most applicable and relevant based on the facts and circumstances of the citation: physical abuse, sexual abuse, abandonment, financial exploitation, involuntary seclusion, mental abuse or suffering, neglect.

3) Makes the provisions of this bill operative July 1, 2029.

Background

Author Statement. According to the author, "Currently, the way that elder and dependent adult abuse, neglect, and exploitation are categorized by CDSS is very broadly as a violation of residents' rights rather than by the specific type of abuse found to have occurred. Examples could include a facility with rat infestations, residents wandering off without supervision, medications not properly administered, residents with bed sores, or facility staff fraudulently writing a $30,000 check to themselves, and it would all be cited and categorized as a violation of residents' rights (i.e., the "right" to be free from abuse and neglect). This umbrella category obscures how often specific forms of abuse (physical, financial, etc.) occur in RCFEs. This limits the usefulness of the data and doesn't give us an accurate depiction to inform our approach as a state to this vulnerable population. It also diminishes the experience of victims reporting these incidents and confuses consumers who are seeking information about which facilities have been found to abuse their residents. The need for Elder Abuse accountability is paramount, given that by 2040, the number of adults in institutional group settings is projected to increase by 51% according to a report by the Public Policy Institute of California. SB 991 will ensure that we are promoting consumer transparency and accountability in RCFEs by improving how substantiated reports of abuse and

neglect are categorized by CDSS and their public facing licensing and enforcement databases."

Residential Care Facilities for the Elderly (RCFEs) RCFEs, also known as assisted living facilities, are residential facilities that provide 24-hour nonmedical care and supervision for persons in need of personal services, supervision, or assistance essential for sustaining the activities of daily living or for the protection of the individual who is 60 years of age or older. RCFEs provide housing, housekeeping, supervision, and personal care assistance with activities of daily living to individuals who need that level of care. These are nonmedical facilities that are designed for individuals who are unable to live by themselves, but who do not need 24-hour nursing care. As such, these facilities are not required to have nurses, certified nursing assistants or doctors on staff. RCFEs centrally store and distribute medications for residents to self-administer. Residents of RCFEs may have mental, behavioral, or physical health needs or a developmental disability that results in their inability to live independently. These facilities range in size from small facilities operating out of single-family homes serving a handful of residents to larger buildings that can house over 100 residents.

As of February 2026, there are over 8,000 licensed senior care facilities with a total capacity of over 200,000. RCFEs are licensed and regulated by CDSS's Community Care Licensing Division (Division). The Division protects the health and safety of persons residing in RCFEs through its regulatory and enforcement programs. In addition to its licensing requirements, the Division conducts regular inspections of facilities to assess compliance with applicable laws and regulations. Violations can result in citations, fines and, in extreme cases, loss of a license to operate a facility.

Continuing Care Retirement Communities (CCRC) CCRCs offer people age 60 and older a full range of long-term care options that include independent living, assisted living, and skilled nursing care. This model allows senior residents to move from independence to high levels of care without leaving the community in which they reside. Typically, this is provided in a campus-like community setting, usually for a resident's lifetime, and always for at least one year. CCRCs require residents to sign a contract that sets forth the range of services, sometimes at an additional cost, depending on the type of contract, to be provided by the CCRC to the resident. CCRCs offer a broad range of contract options so that they have the flexibility to offer a range of services that meet their residents' varied needs. Each CCRC offers different options on costs of service, payment methods, services provided, and other elements, including lifestyle choices. All CCRCs must obtain

an RCFE license and if they offer skilled nursing services, must hold a Skilled Nursing Facility License issued by the California Department of Public Health.

Complaint Data Available to the Public When looking for a facility for oneself or a family member, a likely concern is how safe the facility is. The state provides public information about violations at facilities, but the specificity of such information varies by type of facility. This occurs even in facilities that are co-located, like RCFEs and Skilled Nursing Facilities in CCRCs.

For example, when researching a specific facility in Sacramento with both a RCFE and SNF, the information available on the public facing state websites varies in accessibility and detail. The California Department of Public Health website shows that the statewide average for complaints/reported incidents is 39 and the facility in question had 117. The website also shows/lists the details of these complaints, including the intake received date, allegation category (e.g., physical environment, quality of care/treatment), allegation subcategory (e.g., facility staffing, facility not clean, employee to resident), investigation findings (if deficiencies are noted or not), and intake type. This provides a clear picture for both residents and potential residents, lawmakers, and advocates to understand the types of allegations being made against the facility as well as what, if any, have been substantiated.

This contrasts with what is available for RCFEs. Looking at the same facility for the same calendar year, the CDSS website shows four complaint investigations. For each investigation it shows the number of allegations unfounded, substantiated, and unsubstantiated; the number of Type A and Type B citations; and dates of visits. Additional information is available on each complaint by clicking the most recent date of visit, which takes you to the complaint investigation report.

Related/Prior Legislation

AB 1911 (Reyes, 2024) would have modified the current procedures for complaints against RCFEs to the CDSS. The bill would have required CDSS to investigate complaints within specified timelines and to provide written notifications to complainants. The bill would have provided a process for a complainant to appeal the outcome of an investigation. AB 1911 was held on the Senate Appropriations suspense file.

AB 1387 (Chu, Chapter 486, Statutes of 2015) streamlined the appeals process for community care facility civil penalty and violation appeals and enhanced the complaint process for residential care facilities for the elderly.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee: CDSS estimates ongoing General Fund costs of approximately $1.53 million in the first year and $1.31 million annually ongoing for additional staff to meet the requirements of the bill. These positions include one manager and five analysts to oversee and support implementation and to address complaints and implement newly established procedures, including training and technical assistance to licensees, as well as one IT specialist to review and guide security for necessary system changes and one limited-term analyst to ensure implementation integrates into existing planned and current website changes.

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Board of Behavioral Sciences: licensees: notices

SOURCE: American Federation of State, County and Municipal Employees, AFL-CIO

DIGEST: This bill revises licensure disclosure requirements for Board of Behavioral Sciences (BBS) licensees or registrants, if certain requirements are met.

Assembly Amendments authorize a BBS licensee or registrant, instead of an employing entity or agency of a licensee or registrant, in specified practice settings, to exercise discretion whether to include specified information required to be included in a client notice based on individual safety concerns if the employing entity or agency authorizes the licensee or registrant to exercise discretion and

requires the specified practice setting maintain a process allowing a client to obtain sufficient identifying information to file a complaint with the BBS, that process is disclosed to the client as part of the notice, and a copy of the notice is preserved in the client's records.

ANALYSIS:

Existing law:

1) Establishes the BBS to license and regulate Marriage and Family Therapists (LMFT), Educational Psychologists (LEP), Clinical Social Workers (LCSW), and Professional Clinical Counselors (LPCC). (Business and Professions Code (BPC) § 4980 *et seq*.)

2) Defines a MFT and PCC "associate" as an unlicensed person who has earned a master's or doctoral degree qualifying the individual for licensure, as specified. (BPC § 4980.03(b) 4999.12(f))

3) Defines a MFT and PCC "trainee" as an unlicensed person who is currently enrolled in a master's or doctoral degree program that is designed to qualify the person for licensure and who has completed no less than 12 semester or 18 quarter units in any qualifying degree program. (BPC § 4980.03 (c) (4999.12(g))

4) Requires a LMFT, LEP, LCSW, and LPCC to display their license in a conspicuous place in the licensee's primary place of practice. (BPC §§ 4980.31, 4989.48, 4996.7, 4999.70)

5) Requires aLMFT, LEP, LCSW, and LPCC to provide a written notice to clients prior to initiating psychotherapy services, that informs the client that the BBS receives and reviews complaints, as specified. (BPC §§ 4980.32, 4989.17, 4996.75, 4999.71)

6) Unless specifically exempted, requires a person to obtain a valid license or registration with the Board before engaging in the practice of marriage and family therapy, clinical social work, or professional clinical counseling (BPC §§ 4980(b), 4996(b), 4999.30))

This bill:

1) Authorizes an employing entity or agency of a licensee or registrant to exercise discretion, in specific practice settings, whether to include any or all of the

following information: the licensee's or registrant's full name as filed with the board, the license or registration number, the type of license or registration and the registration expiration date in the notice required prior to initiating psychotherapy services, if the setting has an established process by which the client may request and obtain sufficient identification information to file a complaint with the board, that process is disclosed to the client as part of the notice and a copy of the notice is preserved as part of the client's records. Requires the licensee or registrant to be responsible, if exercising discretion is utilized, for ensuring the process to request and obtain identification is in place.

2) Includes the following specific practice settings: an acute psychiatric hospital, a correctional treatment center, any setting where mental health services are provided to incarcerated individuals under the jurisdiction of a local, state, or federal correctional authority, including but not limited to, a state prison, county jail, juvenile detention facility, or other correctional setting operated by or under contract with a governmental entity.

Background

The Board of Behavioral Sciences (BBS) licenses and regulates Licensed Clinical Social Workers (LCSWs), Licensed Marriage and Family Therapists (LMFTs), Licensed Educational Psychologists (LEPs), and Licensed Professional Clinical Counselors (LPCCs). Additionally, the Board registers Associate Clinical Social Workers (ASWs), Associate Marriage and Family Therapists (AMFTs), and Associate Professional Clinical Counselors (APCCs).

The Board is responsible for the regulatory oversight of over 148,000 licensees and registrants. Each profession has its own scope of practice, entry-level requirements, and professional settings with some overlap in areas. LMFTs are employed in mental health agencies, counseling centers, and private practice. LMFT's utilize counseling or therapeutic techniques to assist individuals, couples, families, and groups with a focus on marriage, family, and relationship issues. AMFTs have completed the required educational program and are in the process of obtaining the hours of supervisory experience required for licensure. LCSWs are employed in health facilities, private practice, and state and county mental health agencies. LCSWs utilize counseling and psychotherapeutic techniques to assist individuals, couples, families, and groups. ASWs have completed the required educational program and are in the process of obtaining the hours of supervisory experience required for licensure. LEPs work in schools or in private practice and provide educational counseling services such as aptitude and achievement testing or psychological testing. LEPs may not provide psychological testing or counseling

services that are unrelated to academic learning processes in the education system. LPCCs work in a variety of settings including hospitals, private practice, and community-based mental health organizations. They apply counseling interventions and psychotherapeutic techniques to identify and remediate cognitive, mental, and emotional issues, including personal growth, adjustment to disability, crisis intervention, and psychosocial and environmental problems. LPCCs work in a variety of settings including hospitals, private practice, and community-based mental health organizations. APCCs have completed the required educational program and are in the process of obtaining the hours of supervisory experience required for licensure.

Disclosure Requirements. Current law requires a licensee prominently display their license in their primary place of practice when conducting mental health services in person confirming for the patient that they are licensed with the BBS. Licensees or registrants licensed by the BBS are also required to provide a client with written notice prior to initiating mental health services, or as soon as possible, that states that the BBS receives and responds to complaints from consumers about mental health services rendered and document in a client's record. Due to the rise in telehealth services the requirements to physically display a license outside a traditional office setting became impractical. In response, SB 1024 (Ochoa Bogh, Chapter 160, Statues of 2024) updated the procedures for licensed professionals regulated by the BBS by requiring that the written notice also includes the licensee's or registrant's full name as filed with the Board, the license and registration number, the type of license or registration, and the expiration date of the license or registration, amongst other provisions. Providing this identifying information to the client receiving telehealth services was a practical solution to create transparency and allow clients to obtain sufficient information to file a complaint, if needed.

As a precautionary measure, this bill seeks to restore previous protections for licensees and registrants who work in high-risk practice settings by allowing employers, based on individual safety concerns, to limit the amount of identifying information that is disclosed to the client, if the practice setting has an established process for the client to obtain said information to file a complaint, the process is disclosed to the client and recorded in the client file.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations, the BBS anticipates minor and absorbable costs.

ARGUMENTS IN SUPPORT: AFSCME, CBHDA and The California Baptist Capitol Ministry write in support, "The challenges surrounding mental health staffing in California's state civil service are well-illustrated by recent JLAC audit findings and by the Coleman Receivership. Numerous public agencies are currently experiencing acute shortages of licensed mental health professionals, particularly those who work with incarcerated individuals. Creating and maintaining safe work environments is crucial for recruiting and retaining qualified professionals in this field. By supporting SB 993 we can take a significant step toward ensuring that mental health practitioners feel secure and supported in their roles, allowing them to focus on delivering essential services to incarcerated individuals without compromising their own safety. This bill restores longstanding protections for therapists by allowing them to withhold identifying information, allowing therapists and other professionals to continue delivery of care without risks to personal safety."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Manufactured housing: classification as real property

SOURCE: Neighborhood Partnership Housing Services
ROC USA

DIGEST: This bill 1) updates the definition of "manufactured home" to conform with federal statutes; 2) requires the Housing and Community Development Department (HCD) to promulgate regulations to achieve parity for manufactured homes not built on a permanent chassis; and, 3) requires HCD to consult with key experts and report to the Legislature on the statutory and regulatory changes necessary to regulate, finance, title, tax, and protect homeowners in divided-tenure and leasehold homeownership arrangements.

Assembly Amendments narrow the bill to conform the state definition of "manufactured housing" with a new federal definition. Amendments also change the responsibilities assigned to HCD with respect to regulating manufactured homes not built on a permanent chassis, as well as reporting on what is needed to develop a new statutory and regulatory framework for homeowners in divided-tenure and leasehold homeownership arrangements.

ANALYSIS:

Existing law:

1) Requires, pursuant to The Mobilehome Parks Act (Act), HCD to establish regulations for manufactured home, mobilehome, and commercial modular foundation systems.

2) Requires HCD to enforce the Act, unless a city, county, or city and county has assumed responsibility for enforcement.

3) Authorizes a manufactured home or mobilehome to be installed on a foundation system as either a fixture or improvement to the real property if certain conditions are met.

4) Requires a manufactured home or mobilehome owner or licensed contractor to obtain a building permit from the appropriate enforcement agency before installing the unit on a foundation system by, among other things, submitting written evidence acceptable to the enforcement agency that the manufactured homeowner or mobile homeowner owns, holds title to, or is purchasing the real property where the mobilehome is to be installed on a foundation system.

   a) Specifies that a lease held by the owner, that is transferable, for the exclusive use of the real property where the manufactured home or mobilehome is to be installed, is deemed to comply with that requirement if the lease is for a term of 35 years or more, or if fewer than 35 years, for a term mutually agreed upon by the lessor and lessee, and the term of the lease is not revocable at the discretion of the lessor except for cause, as specified.

5) Authorizes HCD's Registration and Titling Program, which provides registration and title documents for new or resold manufactured homes, including the Form 433A which is completed when a manufactured home is placed on a permanent foundation system, to be deemed as real property.

6) Instructs HCD to provide for an orderly and economic transfer of registrations and titles for manufactured homes and mobilehomes previously issued by the Department of Motor Vehicles (DMV).

7) Allows HCD to establish a schedule of fees to pay for the costs of work related to administration and enforcement over permitting and titling of manufactured housing, except where the fees are expressly stated herein.

8) Establishes, pursuant to The Manufactured Home Property Tax Law, a process governing the taxation of manufactured homes, including mobilehomes, as defined.

9) Permits manufactured homes to be titled in one of two ways: real property or personal property.

10) Recognizes, by default, manufactured homes as personal property, unless they meet certain conditions.

11) Excludes a manufactured home that has become real property by being affixed to land on a permanent foundation system pursuant to the Act and is taxed as all other real property is taxed.

This bill:

1) Defines "manufactured home" to mean a structure that was constructed on or after June 15, 1976, with or without a foundation system, and has the same meaning as defined in Section 5402 of Title 42 of the United States Code.

2) Clarifies that "manufactured home" does not mean a commercial modular, factory-built housing, a mobilehome, a multifamily manufactured home, or a recreational vehicle, as each are defined.

3) Requires HCD on or before July 1, 2027, to review, revise, and adopt regulations to permit the construction, installation, sale, and occupancy of a manufactured home built without a permanent chassis in parity with those applicable to a manufactured home built with a permanent chassis.

   a) Exempts those regulations from the Administrative Procedure Act.

4) Requires HCD on or before July 1, 2027, to report to the Legislature on the status of the regulations required by 3), as specified.

5) Requires HCD on or before July 1, 2029, to prepare and submit a report to the Legislature evaluating the statutory and administrative changes necessary to

regulate, finance, title, tax, and protect homeowners in divided-tenure and leasehold homeownership arrangements, as specified.

6) Requires HCD, in preparing the report to the Legislature required by 5), to contract with appropriate outside parties to consult with specified experts.

Background

Mobilehome parks in California. More than 1 million people live in approximately 4,500 mobilehome parks throughout California. Mobile and manufactured homes are unique in that they are one of the only remaining forms of naturally occurring affordable housing – meaning they are offered at comparatively affordable prices without public subsidy. According to the Manufactured Housing Institute, manufactured homes cost up to 50% less per square foot than conventional site-built homes.[1] Further, the Urban Institute notes that the quality and appeal of manufactured homes built to US Department of Housing and Urban Development (HUD) standards has improved dramatically, making them a viable affordable housing option.[2] While these units are often colloquially referred to as mobilehomes, the vast majority of them are not actually mobile due to prohibitive relocation costs and limited financial flexibility among homeowners. Once placed on a foundation, removing the home from it for transport can cost upwards of tens of thousands of dollars. In practice, this puts many mobile and manufactured homeowners in a unique position, where they own their unit, but lease the land their unit is on, making them both an owner and a tenant.

Comments

1) *Author's statement.* "Expanding access to homeownership is a vital step in supporting affordability and wealth building for low and moderate income households. Manufactured homes are a low cost and underutilized form of housing, but currently a legal technicality has made affordable financing on manufactured homes unnecessarily difficult. SB 996 would address this discrepancy by creating a process for owners of manufactured homes to title their home as real property. This would allow access to more favorable

[1] Manufactured Housing Institute, *2023 Manufactured Housing Facts* (June 2023), **2023-Industry-Overview.pdf (manufacturedhousing.org)**

[2] Urban Institute, The Role of Manufactured Housing in Increasing the Supply of Affordable Housing (July 2022), Accessible here: **https://www.urban.org/sites/default/files/2022-07/The%20Role%20of%20Manufactured%20Housing%20in%20Increasing%20the%20Supply%20of%20Affordable%20Housing.pdf**..

financing and make owning a manufactured home much more affordable for Californians."

2) *A manufactured solution to the affordability crisis.* Amidst the state's severe shortage of affordable housing, manufactured housing is seen as a crucial component to deliver lower-cost ownership opportunities without public subsidy. According to the Harvard Joint Center for Housing Studies, manufactured homes average $72 per square-foot, or just over half the site-built home average of $144.[3] While manufactured housing units cost far less than site-built single family homes, proponents of this bill assert that barriers to real property titling lead to higher monthly costs for these homeowners, counter to the promise of manufactured housing's affordability.

3) *When "naturally occurring affordable housing" becomes unaffordable.* For manufactured homeowners whose homes are titled as personal property, rather than real property, they cannot access traditional mortgages in California. In practice, this means many enter into contract financing agreements – which frequently have higher interest rates, abbreviated terms, and higher denial rates. With those added costs, the promise of manufactured housing to provide affordable housing stability can be derailed. The Urban Institute compiled data that illustrate these gaps between personal and real property loans.[4]

	Personal Property (Contract Financing)	*Real Property (Mortgage)*
Total Loan Volume	55,703 ($5.4 billion)	76,277 ($15.3 billion)
Landowner Share	25.3%	99.6%
Median Interest Late	8.0%	5.5%
Denial Rates	65.5%	43.0%

To put those rates in perspective, here's a breakdown of what those averages mean for manufactured homeowners, using average terms for each loan type:

	Personal Property Loan	*Real Property Mortgage*
Starting Principal	$150,000	

[3] Christopher Herbet, et al. Comparison of the Costs of Manufactured and Site-Built Housing. Accessible here: **https://www.jchs.harvard.edu/sites/default/files/research/files/harvard_jchs_pew_report_1_updated_0.pdf**. July 2023.
[4] Sarah Gerecke, et al. Manufactured Housing Personal Property Loans. Accessible here: **https://www.urban.org/sites/default/files/2023-08/Manufactured%20Housing%20Personal%20Property%20Loans.pdf**. September 2023.

Rates & Terms	8% for 15 years	5.5% for 30 years
Monthly Payment	$1433.48	$851.68

For manufactured homeowners, many of whom are on fixed incomes, monthly savings of over $580 (comparing monthly payments for personal property loans versus mortgages) could be transformative. The sponsors of the bill assert that by requiring HCD to study the statutory and regulatory conditions needed to enable greater real property titling of these units, California will be on a path to foster greater housing affordability, particularly among populations that are most in need and at higher risk of becoming homeless.

4) *Manufactured homeownership demographics.* According to the Consumer Financial Protection Bureau, the median income for households in manufactured homes is only half that of households in site-built homes. Additionally, older households, households with only a high school degree, and households with relatively low net worth are all disproportionately represented among households in manufactured homes.[5] In effect, these households are more susceptible to housing instability that can arise from more unpredictable and costly monthly payments – often characteristic of personal property loans.

5) *Federal conformity.* On July 11, 2026, the federal 21st Century ROAD to Housing Act became law, with provisions affecting a variety of federal housing statutes, including those related to mobile and manufactured homes. One of the notable changes is updating the federal definition of "manufactured home" to include homes *not* built on a permanent chassis, and requiring each state to update their regulations to ensure definitional conformity. This bill would do that by updating the definitions of "manufactured home" within both the Commercial Code and Health and Safety Code.

6) *Report back to me.* This bill requires HCD to consult with relevant experts and then identify the statutory and regulatory changes necessary to regulate, finance, title, tax, and protect homeowners in divided-tenure and leasehold homeownership arrangements, including circumstances in which the occupant owns a manufactured home, mobilehome, or commercial modular separately from the land beneath it. This bill requires HCD to share those findings in a report to the Legislature, as specified.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) One-time General Fund (GF) costs of an unknown amount, likely in the hundreds of thousands of dollars, to HCD for additional limited-term staff to consult with specified entities and prepare and submit a report to the Legislature by July 1, 2029.

2) One-time GF costs to HCD to adopt regulations and report to the Legislature are likely absorbable.

3) Costs to the California Department of Tax and Fee Administration and the State Board of Equalization of an unknown amount to consult on the report.

4) Costs to county assessors and recorders of an unknown, but potentially significant amount to consult with HCD on the report. These costs are potentially reimbursable by the state, subject to a determination by the Commission on State Mandates.

OPPOSITION: (Verified 8/24/26)

California Mobilehome Park Owners Alliance

ARGUMENTS IN SUPPORT: Those writing in support of the bill argue that it would empower manufactured homeowners to achieve greater parity with site-built housing through greater access to real property titling and the mortgage market, which could improve affordability and stability.

ARGUMENTS IN OPPOSITION: Those writing in opposition to the bill argue that it could introduce novel legal and financial disputes within mobilehome parks.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: California AI Transparency Act

SOURCE: Author

DIGEST: This bill makes a number of changes to the California AI Transparency (CAIT) Act, including eliminating the requirement to offer manifest disclosures, removing the user threshold on the definition of "covered provider," amending the requirements applicable to third-party licensees, and amending other definitions and exemptions.

Assembly Amendments refine privacy protections, specify that various disclosure verification tool requirements may be fulfilled through the use of third-party disclosure verification tools, as provided, require latent disclosures to specify whether a generative artificial intelligence system is designed to primarily function as assistive technology, prohibit making false representations, among other changes.

ANALYSIS:

Existing law:

1) Establishes the CAIT Act, which becomes operative, in part, on August 2, 2026, and requires certain "covered providers" to make an artificial intelligence (AI) detection tool available at no cost by which a person can assess whether content was created or altered by the provider's GenAI system. (Business (Bus.) & Professions (Prof.) Code § 22757 et seq.)

2) Requires a "covered provider," a person that creates, codes, or otherwise produces a GenAI system that has over 1 million monthly visitors or users and is publicly accessible within the geographic boundaries of the state, to offer users the option to include in AI-generated image, video, or audio content created by its own generative AI system a manifest disclosure that meets specified criteria, including that it identifies the content as AI-generated content. (Bus. & Prof. Code § 22757.3(a).)

3) Requires a covered provider to include in AI-generated image, audio, and video content created by its generative AI system a latent disclosure that is detectable by the tool specified above and is, to the extent technically feasible, permanent or extraordinarily difficult to remove. (Bus. & Prof. Code § 22757.3(b).)

4) Prohibits a covered provider from doing any of the following in carrying out the duties above:

    a) Collect or retain personal information when a person utilizes the covered provider's AI detection tool, except that it may collect and retain the contact information of a person who submitted feedback.

    b) Retain any content submitted to the AI detection tool for longer than is necessary to comply with this law. (Bus. & Prof. Code § 22757.2(c).)

5) Requires a large online platform, starting January 1, 2027, to do one of the following:

a) Detect whether any provenance data that is compliant with widely adopted specifications adopted by an established standards-setting body is embedded into or attached to content distributed on the large online platform.

b) Provide a user interface to disclose the availability of system provenance data that reliably indicates that the content was generated or substantially altered by a GenAI system or captured by a capture device. The user interface shall make clearly and conspicuously available to users information sufficient to identify the content's authenticity, origin, or history of modification, including specified information such as whether provenance data is available.

c) Allow a user to inspect all available system provenance data that is compliant with widely adopted specifications adopted by an established standards-setting body in an easily accessible manner by any of several specified means. (Bus. & Prof. Code § 22757.3.1.)

6) Provides that violators of the above provisions are liable for a civil penalty in the amount of $5,000 per violation to be collected in a civil action filed by the Attorney General, a city attorney, or a county counsel. Each day in violation is deemed a discrete violation. (Bus. & Prof. Code § 22757.4.)

7) Provides that the CAIT Act does not apply to any product, service, website, or application that provides exclusively non-user-generated video game, television, streaming, movie, or interactive experiences.

This bill:

1) Removes the user threshold from the definition of "covered provider."

2) Removes the requirement for covered providers to offer users the option to include a manifest disclosure in content. Amends the latent disclosure requirement only to the extent "technically feasible."

3) Redefines "provenance data" to mean information about the origin of a piece of digital content and the history of modifications to the content that is in a format that is compliant, or interoperable with, widely adopted specifications adopted by an established standards-setting body.

4) Replaces references to "AI detection tool" with "disclosure verification tool."

5) Provides that the tool need not detect altered content if only a "minor modification," which includes any of the following alterations:

a) A change to brightness, contrast, or color.

b) Sharpening.

c) Saturating.

d) File resizing.

e) Scaling.

f) Cropping.

g) File format conversions.

h) Denoising and removal of background noise in audio.

6) Authorizes covered providers to impose reasonable limitations on access to the tool to prevent misuse of the tool for malicious purposes.

7) Reworks the provisions regarding a users' personal information. A covered provider shall not make access to the covered provider's GenAI system or disclosure verification tool contingent upon providing personal information beyond what is strictly necessary for the specified purposes.

8) Reworks third-party licensing provisions. Permits covered providers to notify a noncompliant licensee instead of immediately terminating their license. If licensee fails to cure violation and report back to covered provider, requires covered provider to notify Attorney General.

9) Makes other technical and clarifying changes to the CAIT Act.

10) Includes an urgency clause.

Background

Certain forms of media – audio recordings, video recordings, and still images – can be powerful evidence of the truth. While such media have always been susceptible to some degree of manipulation, fakes were relatively easy to detect. The rapid advancement of AI technology, specifically the wide-scale introduction of GenAI models, has made it drastically cheaper and easier to produce synthetic content created, audio, images, text, and video recordings that are not real, but that are so realistic that they are virtually impossible to distinguish from authentic content.

Last session, the Legislature passed the California AI Transparency Act (CAIT), which, beginning August 2, 2026, regulates provenance data disclosure in AI-generated content. “Covered providers” are required to embed latent provenance disclosures in content generated by their GenAI systems and to offer manifest disclosures. Providers are required to make available an AI detection tool at no cost to the user that meets certain criteria, including that it allows a user to assess whether certain content was created or altered by the covered provider’s system.

This bill is a product of many stakeholder conversations that seeks to clean up the CAIT Act and ensure it accomplishes its intended goal of providing useful transparency to Californians. The bill is author-sponsored. It is supported by Transparency Coalition.AI and ForensicVB LLC. No timely opposition was received.

Comment

According to the author:

> As AI technology advances, distinguishing between human and machine-generated content becomes increasingly challenging. This ambiguity poses significant risks to Californians, exacerbating problems of disinformation, harassment, and fraud while threatening the integrity of the information environment our democracy and economy depend on. In 2024, the legislature passed SB 942, the first bill in the nation to establish disclosure requirements for synthetic content. Since then, content provenance technology has developed in such a way that the leading technologies for embedding provenance are not accurately described by the law. Additionally, some methods of marking content are still in their nascency, and aren’t yet robust enough to withstand adversarial exploitation or certain kinds of transformations (e.g., file compression, spoofing attacks, added noise to an image, or file type conversions). The original act also did not address the risk that visible labels create a binary signal implying that unlabeled content is authentic and labeled content is suspect - regardless of whether either inference is warranted. Furthermore, obligations for developers established by SB 942 do not require that the information embedded in AI generated or modified content be consistent - or interoperable with - widely adopted standards. Last year, AB 853 (Wicks) established obligations for large online platforms to read provenance data, but only if it was compliant with such standards. This gap risks establishing a fragmented ecosystem

where new methods of provenance disclosure that aren't interoperable with current standards are not read by large online platforms, and never subsequently relayed to users. In light of the low implementation cost of current provenance standards relative to costs of model development, this bill removes the user threshold from the definition of "covered provider" to expand obligations to any AI system which is publicly available within the state, and aligns the act's requirements to reflect the state of content provenance standards and international provenance disclosure regimes. This bill is critical to ensuring California's content labeling laws are effective at providing consumers with consistent information about where the content they see online comes from.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown costs to the state funded trial court system (Trial Court Trust Fund, General Fund) to adjudicate civil actions. By expanding who may be considered a covered provider and, consequently, subject to civil penalties with statutory damages, this bill may lead to additional case filings. The fiscal impact of this bill to the courts will depend on many unknowns, including the number of cases filed and the factors unique to each case. An eight-hour court day costs approximately $10,500 in staff workload. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources and to increase the amount appropriated to backfill for trial court operations.

- The Department of Justice (DOJ) does not anticipate a significant fiscal impact.

- The California Department of Technology (CDT) notes that it would not fall within the definition of covered provider under this bill; therefore, it anticipates only minor and absorbable costs to continue tracking developments in the AI space.

According to the Assembly Appropriations Committee:

- Potential minor costs to the Department of Justice (General Fund) for enforcement. The Attorney General's authority to enforce the chapter already exists under current law, which this bill does not amend: a violation is

subject to a civil penalty of $5,000 per violation, collected in a civil action filed by the Attorney General, a city attorney, or a county counsel. The bill does not create any new enforcement authority or mechanism. By removing the requirement that a covered provider have more than 1,000,000 monthly users, the bill enlarges the population of providers subject to the chapter, but any additional enforcement activity, and the associated costs, would likely be minor and would depend on whether the Attorney General elects to pursue actions under existing authority.

- The bill creates no new state program or appropriation, and the operative obligations apply to private covered providers. Enforcement by a city attorney or county counsel is permissive and would fall to local funds, so the bill imposes no reimbursable state-mandated local program. Any penalty revenue is not a significant or reliable funding source.

SUPPORT: (Verified 8/25/26)

Center for Ai and Digital Policy (CAIDP)
Forensicvb LLC
Transparency Coalition.ai

OPPOSITION: (Verified 8/25/26)

None received

ARGUMENTS IN SUPPORT: ForensicVB LLC writes:

> From an operational standpoint, manifest disclosure or visible labels introduce a significant risk of investigative de-prioritization. When content is labeled—accurately or not—as AI-generated, it can create uncertainty at the front end of an investigation, delay triage decisions, and divert limited law enforcement resources away from time-sensitive CSAM cases. Put more simply, it has been reported that pedophiles operating on the Dark Web are labeling real CSAM content as "AI-generated" in the expectation that investigators will see the label and focus their attention on other non-labeled content.
>
> For these reasons, I believe SB 1000's current reliance on latent, provenance-based disclosure frameworks reflects a more responsible and technically sound path forward, and is consistent with existing content-provenance approaches already in use, such as the Coalition for Content Provenance and Authenticity (C2PA) specifications. The

same professional experience that has led me to oppose manifest disclosure requirements has also led me to support latent disclosure approaches as a more reliable, durable, and effective trust signal for consumers of digital content. When implemented correctly, latent disclosure mechanisms can support authenticity, attribution, and accountability without creating avoidable investigative friction or opportunities for misuse.

SUBJECT: Law enforcement: masks

SOURCE: Prosecutors Alliance Action; Mexican American Legal Defense and Education Fund; Inland Coalition for Immigrant Justice; SEIU California

DIGEST: This bill extends existing law enforcement agency requirements regarding facial coverings to law enforcement agencies of the state and peace officers employed by those agencies, expands exemptions to those requirements,

and modifies the civil liability provision associated with a violation of those requirements.

Assembly Amendments revise exemption language with regard to what constitutes a facial covering and recast the civil liability provision.

ANALYSIS:

Existing federal law:

1) Provides that the U.S. Constitution (Const.), and the laws of the United States, are the supreme law of the land. (U.S. Const., art. VI, cl. 2.)

2) Provides that the federal government has the exclusive authority to regulate immigration and naturalization. (U.S. Const., art. 1, § 8.)

3) Provides that the powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people, and prohibits the federal government from "conscripting" the states to enforce federal regulatory programs. (U.S. Const., 10th Amend.)

4) Requires designated immigration officers, at the time of arrest, and as soon as it is practical and safe to do so, to identify themselves as an immigration officer who is authorized to execute an arrest and state that the person is under arrest and the reason for the arrest. (8 Code of Federal Regulations (C.F.R.) § 287.8 (c)(2)(iii).)

Existing state law:

1) Establishes the California Values Act, which prohibits specified state and local LEAs from using agency or department money or personnel to investigate, interrogate, detain, detect, or arrest persons for immigration enforcement purposes, subject to specified exemptions. (Government (Gov.) Code, §§ 7282.5, 7284.6.)

2) Defines "immigration enforcement" for purposes of the California Values Act, to mean any and all efforts to investigate, enforce, or assist in the investigation or enforcement of any federal civil immigration law, and also includes any and all efforts to investigate, enforce, or assist in the investigation or enforcement of any federal criminal immigration law that penalizes a person's presence in, entry, or reentry to, or employment in, the U.S. (Gov. Code, § 7284.4, subd. (f).)

3) Makes willfully wearing, exhibiting, or using the authorized uniform, insignia, emblem, device, label, certificate card, or writing, of a law enforcement officer (including a federal officer), a member of the fire department, deputy fire marshal or search and rescue personnel, with the intent of fraudulently impersonating them or of fraudulently inducing the belief that the defendant is one of them, or who willfully and credibly impersonates that person on an internet website or by other electronic means for the purpose of defrauding another, a misdemeanor punishable by imprisonment in county jail for up to six months, by a fine of $1,000, or both. (Penal (Pen.) Code, §§ 538d, subd. (a); 538e, subd. (a); 538h, subd. (a); Pen. Code, § 19.)

4) Requires uniformed police officers to wear a badge, nameplate, or other device which bears clearly on its face the identification number or name of the officer. (Pen. Code, § 830.10.)

5) Provides that, except as specified, a law enforcement officer, including a federal officer, operating in California that is not uniformed, and therefore not required to clearly display identification pursuant to Section 830.10, shall visibly display identification that includes their agency and either a name or badge number or both name and badge number when performing their enforcement duties, a violation of which is punishable as a misdemeanor. (Pen. Code, § 13654.)

6) Requires a law enforcement agency operating in California to maintain and publicly post a written policy on the visible identification of sworn personnel, which must include, among other elements, a requirement that all sworn personnel visibly display identification that includes their agency and either a name or badge number, or both name and badge number, when performing enforcement duties. (Gov. Code, § 7288, subd. (a).)

7) Provides that a law enforcement agency operating in California must maintain and public post a written policy regarding the use of facial coverings, and that the policy must include, but not be limited to, the following elements:

   a) A purpose statement affirming the agency's commitment to transparency, accountability, public trust; restricting the use of facial coverings to specific and limited circumstances; the principle that generalized and undifferentiated fear and apprehension about officer safety is not sufficient to justify the use of facial coverings.

   b) A requirement that all sworn personnel not use a facial covering when performing their duties.

c) A list of narrowly tailored exemptions for the following:

i. Active undercover operations or assignments authorized by supervising personnel or court order.

ii. Tactical operations where protective gear is required for physical safety.

iii. Applicable law governing occupational health and safety.

iv. Protection of identity during prosecution.

d) A provision stating that opaque facial coverings shall only be used when no other reasonable alternative exists and the necessity is documented.

e) A provision stating that a supervisor shall not knowingly allow a peace officer under their supervision to violate state law or agency policy limiting the use of a facial covering. (Gov. Code, § 7289, subds. (a), (b).)

8) Provides that a facial covering policy adopted pursuant to the above shall be deemed consistent with existing requirements regarding criminal penalties for improper use of facial coverings by law enforcement unless a verified written challenge to its legality is submitted to the head of the agency by a member of the public, an oversight body, or a local governing authority, at which time the agency shall be afforded 90 days to correct any deficiencies in the policy. (Gov. Code, § 7289, subd. (c).)

9) Provides that if, after 90 days, the agency has failed to adequately address the complaint, the complaining party may proceed to a court of competent jurisdiction for a judicial determination of the agency's exemption to the criminal prohibition against the improper use of facial coverings, and that the agency's policy and its employees' exemptions shall remain in effect unless a court rules the agency's policy is not in compliance with that prohibition and all potential appeals to higher courts have been exhausted by the agency. (Ibid.)

10) Defines "law enforcement agency," for the purposes of the above requirement regarding law enforcement facial covering policies, as any entity of a city, county, or other local agency that employs a peace officer, a law enforcement agency of another state, and any federal law enforcement agency. (Gov. Code, § 7289, subd. (d).)

11) Prohibits a law enforcement officers from wearing a facial covering that conceals or obscures their facial identity in the performance of their duties. (Pen. Code, § 185.5.)

12) Specifies that a "facial covering," for the purposes of the prohibition in number (11) does not include any of the following:

    a) A translucent face shield or clear mask that does not conceal the wearer's facial identity and is used in compliance with the employing agency's policy and procedures regarding facial coverings.

    b) An N95 medical mask or surgical mask to protect against transmission of disease or infection or any other mask, helmet, or device, including, but not limited to, air-purifying respirators, full or half masks, or self-contained breathing apparatus necessary to protect against exposure to any toxin, gas, smoke, inclement weather, or any other hazardous or harmful environmental condition.

    c) A mask, helmet, or device, including, but not limited to, a self-contained breathing apparatus, necessary for underwater use.

    d) A motorcycle helmet when worn by an officer utilizing a motorcycle or other vehicle that requires a helmet for safe operations while in the performance of their duties.

    e) Eyewear necessary to protect from the use of retinal weapons, including, but not limited to, lasers.

13) Provides that the prohibition against facial coverings does not apply to an officer subject to an exception specified in the law enforcement facial covering policy or to an officer assigned to Special Weapons and Tactics (SWAT) team units while actively performing their SWAT responsibilities. (Pen. Code, § 185.5, subd. (c).)

14) Provides that a willful and knowing violation of this prohibition is punishable as an infraction or misdemeanor, but that this criminal penalty shall not apply to any law enforcement officer if they were acting in their capacity as an employee of the agency and the agency maintains and publicly posts, no later than January 1, 2026, a written facial covering policy. (Pen. Code, § 185.5, subds. (d), (f).)

15) Provides that notwithstanding any other law, any person who is found to have committed an assault, battery, false imprisonment, false arrest, abuse of process, or malicious prosecution, while wearing a facial covering in a knowing and willful violation of this prohibition shall not be entitled to assert any privilege or immunity for their tortious conduct against a claim of civil liability, and shall be liable to that individual for the greater of actual damages

or statutory damages of not less than $10,000, whichever is greater. (Pen. Code, § 185.5, subd. (g).)

16) Defines "facial covering," for the purposes of this prohibition as well as the provisions requiring law enforcement facial covering policies, as any opaque mask, garment, helmet, headgear, or other item that conceals or obscures the facial identity of an individual, including, but not limited to, a balaclava, tactical mask, gator, ski mask, and any similar type of facial covering or face-shielding item. (Pen. Code, § 185.5, subd. (b)(1); Gov. Code, § 7289, subd. (d)(1).)

17) Defines "law enforcement officer" for the purposes of this prohibition as a peace officer employed by a city, county, or other local agency as well as any officer or agent of a federal law enforcement agency or any law enforcement agency of another state or any person acting on behalf of a federal law enforcement agency or law enforcement agency of another state. (Pen. Code, § 185.5, subd. (e).)

This bill:

1) Modifies the requirement that a law enforcement agency operating in California maintain and publicly post a written policy regarding the use of facial coverings, as follows:

   a) Extends the deadline for a law enforcement agency to maintain and post this policy from July 1, 2026, to January 1, 2027;

   b) Expands the list of narrowly tailored exemptions that the policy must contain to include surveillance operations related to enforcement of the Fish and Game Code or regulations adopted pursuant to the Fish and Game Code, or a federal agency or officer conducting surveillance operations pursuant to similar federal law;

   c) Clarifies that the existing exemption that the policy must include for protection of identity during prosecution includes protection of identity during prosecution immediately before and after appearances; and

   d) Expands the definition of a ″law enforcement agency,″ for purposes of which agencies must maintain and post this policy, to include a state entity that employs a peace officer, as defined.

2) Modifies the prohibition against a law enforcement officer wearing a facial covering that conceals or obscures their facial identity in the performance of their duties, as follows:

   a) Specifies that certain items that are exempt from the definition of a ″facial covering″ can constitute a facial covering if they are combined in a manner intended to conceal or obscure an officer's identity.

   b) Adds the following items to the list of equipment that is exempt from the definition of a ″facial covering″:

      i. A helmet with a clear face shield or visor that does not conceal the officer's face, if the equipment is worn solely for safety purposes and not for the purpose of concealing an officer's identity;

      ii. Sunglasses; and,

      iii. A helmet, protective mask, or other head or face protection required during academy or in-service training activities, only for the duration of the training activity, and provided the equipment is worn solely for safety purposes and not for the purpose of concealing identity.

   c) Specifies that the exemption from the definition of a ″facial covering″ for a helmet worn by an officer utilizing a motorcycle includes the wearing of such a helmet after the officer has dismounted the motorcycle or other vehicle, if they reasonably intend to utilize the motorcycle or other vehicle again imminently.

   d) Defines ″opaque,″ for purposes of what constitutes an opaque mask to include, but not be limited to, dark-tinted, mirrored, smoked, or reflective materials that substantially obscure or distort facial visibility.

   e) Expands the definition of ″law enforcement officer,″ for purposes of which officers are subject to this facial covering prohibition, to include a peace officer, as defined, that is employed by a state agency.

   f) Removes a provision of law stating that any person who is found to have committed an assault, battery, false imprisonment, false arrest, abuse of process, or malicious prosecution, while wearing a facial covering in a knowing and willful violation of the facial covering prohibition shall not be entitled to assert any privilege or immunity for their tortious conduct against a claim of civil liability, and shall be liable to that individual for the greater

of actual damages or statutory damages of not less than $10,000, whichever is greater.

g) Provides, instead, that any person who is found liable for false imprisonment or false arrest shall be liable for statutory damages of not less than $10,000, or actual damages, whichever is greater, if the trier of fact further finds, at the time of the conduct giving rise to liability, that the person knowingly and willfully concealed their identity through the use of a facial covering.

h) States that nothing in the facial covering prohibition statute shall be construed to abrogate any privilege, justification, or defense based on lawful authority, as specified, or a defense that an arrest was lawful because it was made in obedience to a warrant that appeared valid on its face, reasonably appeared to authorize that arrest, and reasonably appeared to identify or describe the person arrested.

i) States that neither of the two preceding paragraphs preserve or incorporate any immunity from civil liability or no cause of action provisions.

3) Includes a severability clause.

4) Makes technical and conforming changes

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

> One-time costs, minor in the aggregate, to state entities employing peace officers to develop, adopt, and publicly post the written facial covering policy required by this bill by January 1, 2027 (General Fund, various special funds). The California Highway Patrol, the largest affected entity, reports minor costs, and the Department of Justice reports no fiscal impact.
>
> Potential court cost pressures of an unknown, but potentially significant amount, to adjudicate misdemeanor prosecutions for violations of the facial covering prohibition by state peace officers (Trial Court Trust Fund, General Fund). Because a state entity may shield officers from criminal liability by adopting the required facial covering policy, criminal filings may be limited, if any. Although trial courts are not funded on the basis of workload, increased pressure on the Trial Court Trust Fund may create a need for increased General

Fund support. The 2025-26 budget includes $117.3 million General Fund to backfill the Trial Court Trust Fund.

Potential court cost pressures of an unknown, but potentially significant amount, to adjudicate civil actions against state peace officers for enumerated torts committed while wearing a facial covering in knowing and willful violation of the prohibition (Trial Court Trust Fund, General Fund).

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Pupils: foster youth: access to pupil records

SOURCE: Office of the Riverside County Superintendent of Schools

DIGEST: This bill expands the existing list of individuals to whom a school district, if requested, must provide student record access to include a pupil aged 14 or older who is a foster youth, as specified.

Assembly Amendments 1) clarify that both foster care and homeless youth must be 14 years of age or older to access their educational records and 2) add double-jointing language to ensure that the amendments made by both this bill and AB 2478 (Schultz, 2026) to Education Code Section 49076 become operative if both bills are enacted, and this bill is enacted last.

ANALYSIS:

Existing federal law:

1) The federal Family Educational Rights and Privacy Act (FERPA) prohibits federal funds from being provided to any educational agency or institution which has a policy or practice of permitting the release of a pupil's educational records to any individual, agency, or organization without the written consent of the pupil's parents. FERPA exempts from the general parental consent requirement certain kinds of disclosures, including disclosures to state and local officials for the purposes of conducting truancy proceedings, a criminal investigation, auditing or evaluating an educational program, or in relation to the application for financial aid. (United States Code (USC), Title 20, Section 1232g and Code of Federal Regulations, Title 34, Sections 99.31)

2) The federal Uninterrupted Scholars Act amended FERPA to require school districts to allow access to pupil records to an agency caseworker or other representative of a state or local child welfare agency, or tribal organization, who has the right to access a pupil's case plan, when such agency or organization is legally responsible for the care and protection of the pupil. The Uninterrupted Scholars Act prohibits the records or information from being disclosed by the agency or organization except to an individual or entity engaged in addressing the pupil's educational needs and authorized by such agency or organization to receive such disclosure and the disclosure is consistent with applicable state or tribal laws protecting the confidentiality of a pupil's education records. (20 USC § 1232g(b)(L))

Existing state law:

1) Defines "foster youth" to mean any of the following:

   a) A child who is the subject of a petition filed pursuant to Section 300 of the Welfare and Institutions Code (WIC), whether or not the child has been removed from the child's home by the juvenile court, as specified.

   b) A child who is the subject of a petition filed pursuant to Section 602 of the WIC, has been removed from the child's home by the juvenile court, as specified, and is in foster care, as specified.

   c) A nonminor under the transition jurisdiction of the juvenile court, who satisfies specified criteria.

d) A dependent child of the court of an Indian tribe, consortium of tribes, or tribal organization who is the subject of a petition filed in the tribal court pursuant to the tribal court's jurisdiction in accordance with the tribe's law.

e) A child who is the subject of a voluntary placement agreement, as specified. (Education Code (EC) § 42238.01)

2) Authorizes foster family agencies with jurisdiction over currently enrolled or former students to access records of grades and transcripts, and any individualized education program that may have been developed by school districts or private schools of those students. (EC § 49069.3)

3) Prohibits a school district from permitting access to pupil records to a person without parental consent or under judicial order, with some exceptions including a county placing agency; an agency caseworker or other representative of a child welfare agency; a pupil who is 16 years or older and has completed grade 10; or a pupil 14 years of age who is a homeless child or youth, or an unaccompanied youth, as defined. (EC § 49076)

4) Requires, when a child is placed in foster care, the case plan for each child to include a summary of the health and education information or records, and include specified information. Existing law also requires the health and education summary to be provided to the caregiver within a specified timeframe after placement. (WIC § 16010)

5) States legislative intent that caregivers who are informed of the child's educational, medical, dental, and mental health history and current needs are better able to meet those needs and address the effects of trauma, increasing placement stability and improving permanency outcomes. (WIC § 827.11)

6) Establishes a number of rights for students in foster care. Among them are rights to immediate enrollment, rights to have educational records transferred in a timely manner, rights to remain in students' schools of origin, rights to exemptions from locally adopted graduation requirements in excess of state requirements, and the right to have partial credit awarded for coursework. (WIC §16001.9)

This bill requires school districts to provide foster youth aged 14 and older access to their student records, at their request.

Comments

Need for the bill. According to the author, "Foster youth face a number of obstacles across their lives beginning at an early age. Far too often, these obstacles lead to educational disparities that impact their ability to succeed and thrive after they transition out of the system. According to the California Department of Education (CDE), only 60% of foster youth graduate from high school statewide, compared to 86% of non-foster youth. Frequent school changes compound these challenges—children in foster care move schools an average of eight times, losing up to six months of learning with each move.

"Currently, homeless students and unaccompanied youth aged 14 or older have access to their education records. This access helps mitigate disruptions caused by frequent school changes and lack of consistent adult guidance. However, that is not the case for foster students as they can only access their school records if they are 16 years or older. SB 1017 would grant foster youth the same rights provided to homeless students and unaccompanied youth, the ability to access their school records at 14 years old. Timely access to records empowers students to make informed decisions during critical transitions and reinforces the state's commitment to ensuring that foster youth are not disadvantaged by circumstances beyond their control. At the forefront of equity is protecting and advocating for our most vulnerable population, and SB 1017 is a step forward in ensuring foster youth have the resources they need to live a successful life."

Existing authorizations. Current law recognizes two special circumstances under which pupils age 14 and older should have access to their educational records—when the pupil has been identified as an unaccompanied youth or a homeless youth. This authorization originated from the concern that unaccompanied or homeless youth who do not have parents who are willing or able to consent to a school district sharing their educational records would not be able to access services such as Boys and Girls Clubs, tutoring programs, and legal services offered by non-school district agencies. Educational records are vital in these circumstances because tutors and other service providers need information such as test scores, credit progress, and special education context in order to provide specialized support.

Currently, foster youth aged 16 or younger can have educational records accessed on their behalf by authorized individuals such as foster parents or resource families. However, due to issues with school mobility and changing care placements, they may experience delays in record requests which can lead to service interruptions and uncertainty in graduation preparation.

This bill brings the education record access authorization for foster youth aged 14 and older into alignment with their peers who have been identified as unaccompanied or homeless youth.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Potentially reimbursable Proposition 98 General Fund costs, likely minor, to local education agencies to provide additional student records. These costs would be reimbursable only to the extent a local agency files a claim and the Commission on State Mandates determines it is a reimbursable cost.

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Firefighter postpartum and recovery leave

SOURCE: California Professional Firefighters

DIGEST: This bill requires a fire department to provide a paid leave of absence of up to 26 weeks to a requesting firefighter who is disabled by pregnancy, childbirth, or a related medical condition.

Assembly Amendments struck the provisions of this bill as it left the Senate which would have entitled firefighters with up to 26 weeks of fully paid postpartum and recovery leave for birth, stillbirth or miscarriage of a child to instead entitle firefighters to this time only when the leave is associated with a disability due to pregnancy, childbirth, or related medical condition.

ANALYSIS:

Existing federal law establishes the Family Medical Leave Act (FMLA) to provide employees, working for an employer with 50 or more employees, the right to take up to 12 weeks of job-protected, unpaid time off work for the birth or adoption of a child, due to a serious health condition of the employee, for an exigency arising out of the fact that the employee's close relative is a military member on active duty, and for the employee to care for a close relative with a serious health condition. (28 United States Code (U.S.C.) §2601 et seq., §2611)

Existing state law:

1) Establishes the California Family Rights Act (CFRA) making it an unlawful employment practice for an employer to refuse to grant a request from an eligible employee to take up to a total of 12 weeks off in any 12-month period for specified family care and medical leave. Defines "family care and medical leave," for purposes of CFRA, to mean taking leave to care for a new child; to care for a child, parent, grandparent, grandchild, sibling, spouse, or domestic partner who has a serious health condition; to take leave because of the employee's own serious health condition; or for a qualifying exigency related to the employee's close family's active duty as a member of the Armed Forces, as specified. Provides that CFRA provisions only apply to employers with five or more employees, and to employees who have held their job for at least a year and worked at least 1,250 hours in the previous 12-month period. (Government Code §12945.2)

2) Under Pregnancy Disability Leave (PDL) provisions, makes it an unlawful employment practice for an employer to refuse to allow an employee disabled by pregnancy, childbirth, or a related medical condition to take a leave for a reasonable period of time *not to exceed four months* and thereafter return to work. The employee is entitled to utilize any accrued vacation leave during this period of time. Also makes it an unlawful employment practice for an employer to refuse to provide reasonable accommodation for an employee for a condition related to pregnancy, childbirth, or a related medical condition, if the employee so requests, and with the advice of the employee's health care provider. (Government Code §12945)

3) Provides, through the State Disability Insurance (SDI) program, short-term wage replacement benefits to eligible workers who are unable to work due to a non-work-related illness or injury and for a maximum of 52 weeks. SDI benefits can be used for an illness or injury, either physical or mental, which

prevents an employee from performing their regular and customary work and includes elective surgery, pregnancy, childbirth, or other medical conditions. (Unemployment Insurance Code §2601-3308)

4) Provides, through the Paid Family Leave (PFL) program, a component of SDI, eligible employees up to eight weeks of wage replacement benefits within a 12-month period to workers who need to take time off work to care for a seriously ill child, spouse, parent, grandparent, grandchild, sibling, or domestic partner; to bond with a minor child within one year of the birth or placement of the child in connection with foster care or adoption; or to participate in a qualifying event because of a family member's military deployment. (Unemployment Insurance Code §3301)

5) Through the Fair Employment and Housing Act (FEHA), makes it an unlawful employment practice for an employer to refuse to grant a request by any employee to take up to five days of *reproductive loss leave* following a reproductive loss event. Defines "reproductive loss event" to mean the day or, for a multiple-day event, the final day of a failed adoption, failed surrogacy, miscarriage, stillbirth, or an unsuccessful assisted reproduction. If an employee experiences more than one reproductive loss event within a 12-month period, an employer shall not be obligated to grant a total amount of reproductive loss leave time in excess of 20 days within a 12-month period. (Government Code §12945.6)

This bill:

1) Requires a fire department to provide a paid leave of absence of up to 26 weeks to a firefighter who requests leave because the firefighter is disabled by pregnancy, childbirth, or a related medical condition.

2) Specifies that the paid leave applies to an active firefighter member who has at least 1,250 hours of service with the fire department in the 12-month period before the date on which the paid leave begins. However, clarifies that there are no eligibility requirements, including minimum hours worked or length of service, before an employee may take unpaid, job-protected leave for disability due to pregnancy, childbirth, or related medical condition as provided in existing law, as specified.

3) Authorizes a fire department, as a condition of granting or continuing the paid leave, to require the firefighter to provide written medical certification from the

firefighter's health care provider documenting that the leave is required because of a disability by pregnancy, childbirth, or a related medical condition, and stating the anticipated start date and duration of the leave.

4) For purposes of this paid leave, requires that:

   a) It be provided with full pay, except as specified, at the firefighter's regular rate of pay set forth in the applicable collective bargaining agreement and in accordance with their normal pay schedule.

   b) It run concurrently with job-protected leave under the existing Pregnancy Disability Leave provisions or the reasonable accommodation provisions of the Fair Employment and Housing Act, or both, as specified.

   c) Notwithstanding any other law, the fire department maintain group health coverage for a firefighter on leave for the duration of the leave and at the same level and under the same conditions that coverage would have been provided had the firefighter not taken the paid leave.

   d) All benefits, including retirement contributions, seniority, promotional eligibility, and step increases, to continue to accrue during the paid leave as if the firefighter were actively working.

   e) A firefighter returning from paid leave be restored to their prior position or a position of equivalent rank, pay, schedule, station assignment, and promotional trajectory.

5) Specifies that compensation during the paid leave must include retirement fund contributions by the fire department and the firefighter, and the firefighters must earn full service credit during the paid leave.

6) Prescribes the manner in which the paid leave must be calculated for part-time firefighters.

7) Prohibits a fire department from requiring a firefighter to exhaust paid sick leave, vacation, or compensatory leave time before or while taking the paid leave under this section.

8) Specifies that these provisions do not preempt or limit any collective bargaining agreement, state law or policy, or local law or policy providing greater rights or benefits.

9) Authorizes a fire department to count benefits provided to a firefighter under another law, employer-provided paid leave policy, or disability insurance plan that are payable, as provided, other than vacation, sick, or other compensated leave time, toward the requirements of this bill. Additionally, specifies that full satisfaction is met if the fire department ensures that the firefighter receives their full pay during the leave of absence, as required, without a reduction to the firefighter's vacation, sick, or other compensated leave time balances.

10) Apply the above-described provisions to active firefighting members of the following fire departments:

    a) A fire department of a city, county, city and county, district, or other public or municipal corporation or political subdivision.

    b) A fire department of the California State University.

    c) The Department of Forestry and Fire Protection.

    d) A county forestry or firefighting department or unit.

    e) A fire department of the University of California is requested to comply with the provisions of this bill.

Background

Parental leave is proven to benefit families and communities by improving long-term health outcomes for mothers and children, decreasing stress for caregivers and new parents, encouraging equitable co-parenting, and reducing income volatility. Whether or not the parental leave is paid or has some wage replacement component is often the deciding factor on whether or not, and for how long, an employee is likely to take time to care for themselves and their families while financially providing for them.

California has several medical leaves under which an employee may be able to take leave from work to care for their illness, that of specified family members or for the bonding with a new child. Below is a summary of some and their eligibility requirements.

	CA Family Rights Act (CFRA) *Job Protected*	**Paid Family Leave (PFL)** *No Job Protection*	**Pregnancy Disability Leave (PDL)** *Job Protected*	**Reproductive Loss Leave** *Job Protected*	**Family Medical Leave Act (FMLA)** *Job Protected*	**SB 1024 (This bill)**

Employers Covered	Five or more employees	One or more (employee pays, employee gets)	Five or more employees	Public employers of any size/ private employers with five or more employees	50+ employees within 75-mile radius	All specified fire departments
Employee Eligibility	Worked 1,250 hours in prior 12 months	Once employee earns $300 in base period for fund contribution	Immediate as necessary	Worked with the employer at least 30 days	Worked 1,250 in prior 12 months	Worked 1,250 hours of service in prior 12 months
Reason for Leave	Employee serious health condition; seriously ill family member care; bond with newborn or newly placed adopted or foster child	Care for seriously ill family member; bond with a child within 1 year of birth, foster care or adoption placement; qualifying event because of a family member's military deployment	Disability due to pregnancy, childbirth or related medical condition	Miscarriage, stillbirth, failed adoption, failed surrogacy, or unsuccessful assisted reproduction	Bond with a child w/in 1 year of birth, adoption or foster care placement OR due to serious pregnancy-related health condition	Disability due to pregnancy, childbirth, or related medical condition
Length of Leave	12 weeks in 12-month period	8 weeks in 12-month period	Up to 4 months	5 days, nonconsecutive, per loss event (max of 20 days w/in 12 months)	Up to 12 weeks	Up to 26 weeks pending medical certification
Paid or Unpaid	Unpaid, may run concurrent with other paid leave	Partial wage replacement (70-90%, depending on income)	Unpaid, may run concurrent with SDI for partial wage replacement	Unpaid, employee can use vacation, personal leave, paid sick leave, or comp time	Unpaid, employee can use vacation, paid sick time	Fully paid, prohibits exhausting sick leave, vacation or comp time
Continued Health Coverage	Yes	No	Yes	Unspecified	Yes	Yes

Points of note regarding these leaves:

- When both state and federal laws apply, the employee receives the benefit of the more protective law.
- PFL provides benefit payments but not job protection; however, the employee's job may be protected if taken concurrently with FMLA or CFRA.
- There is no pay associated with the FMLA and CFRA, other than what the employee has earned in other accrued leaves that may apply.

- Employees may only be eligible for the PFL program if they are covered by the SDI program. SDI is employee funded. If an employee does not pay into the SDI program, they are not eligible to receive disability benefits PFL.
- Some state employees may be able to access Nonindustrial Disability Insurance (NDI), which is a partial wage replacement benefit for state employees. NDI provides income to eligible employees when they lose wages due to a non-work-related disability. NDI is an employer paid benefit that covers excluded employees and rank-and-file employees in bargaining units 2, 5, 6, 7, 8, 9, 12, 13, 16, 18, and 19.

Need for this bill? According to the author: "Firefighters who wish to take additional leave face the impossible decision between their own health, the health of their newborn, and their family's financial stability. Unfortunately, many have faced this choice and found that they have no option but to leave a career they love. The lack of supportive pregnancy and maternity policies has significant impacts on both initial recruitment and long-term retention following childbirth, deeply impacting the ability of fire departments to sustainably build a diverse and representative fire service. Every firefighter who leaves represents a loss of the substantial time, funding, and effort invested in their training. SB 1024 promotes fair, accessible, and sustainable careers in the fire service by establishing a statewide uniform paid postpartum and recovery policy for firefighters who give birth."

[NOTE: Please see the Senate Labor, Public Employment and Retirement Committee analysis on this bill for more background information and information on prior legislation.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Cal FIRE anticipates ongoing costs (General Fund) associated with providing this expanded benefit to firefighters but asserts it is unable to quantify these costs because it cannot reliably predict how many employees will utilize this benefit in a given year. Nonetheless, the California Department of Human Resources (CalHR) estimates the bill likely results in ongoing annual costs in the hundreds of thousands of dollars for eligible Bargaining Unit 8 state employees working at Cal FIRE. However, to the extent that the extended leave provided by the bill results in more female firefighters returning to work instead of abandoning firefighting employment due to insufficient leave time the cost

savings from reduced recruitment and training of new firefighters could lower total costs.

2) Ongoing General Fund costs of $400,000 annually for the Labor Commissioner's Office (under the Department of Industrial Relations) to facilitate the creation of a parental leave program.

3) Ongoing costs in the tens of thousands to low hundreds of thousands of dollars (General Fund) for the University of California for campuses with fire departments to provide this expanded benefit.

4) No fiscal effect to the California State University (CSU) as CSU is protected by local city and county fire departments, not firefighters directly employed by the CSU.

OPPOSITION: (Verified 8/24/26)

None received

ARGUMENTS IN SUPPORT: According to the sponsors of the measure, the California Professional Firefighters:

"It is imperative that the fire service not only continue its existing work but take new strides towards expanding its ranks to all who wish to serve. Firefighters should not have to choose between starting a family and pursuing their careers or be forced to step aside in order to protect themselves and their infants from harm. Given the unique, dangerous, and physically demanding nature of the job, a unified policy ensuring that all firefighters can recover and bond with their child will protect existing personnel and provide more flexibility and security for those who are considering a career in public service."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Occupational safety: transboundary pollution

SOURCE: SEIU California

DIGEST: This bill requires the Division of Occupational Safety and Health (Cal/OSHA), on or before January 1, 2030, to propose to the Occupational Safety and Health Standards Board (Standards Board) a standard that protects the health and safety of employees who risk high or prolonged exposure to transboundary pollution in outdoor occupational environments, as specified.

Assembly Amendments 1) clarify the definition of transboundary pollution; 2) specify that Cal/OSHA shall submit a standard on transboundary pollution to the Standards Board for its *consideration and possible* adoption, rather than for its

review and adoption; 3) require Cal/OSHA's proposed standard to apply to high-risk employees who work within a 10-mile radius of specified areas; 4) authorize, rather than require, the proposed standard to include specified criteria; and 5) make technical changes.

ANALYSIS:

Existing law:

1) Requires, under the California Occupational Safety and Health Act, an employer to:

   a) Furnish employment and a place of employment that is safe and healthful.

   b) Furnish and use safety devices and safeguards, as well as adopt and use practices, means, methods, operations, and processes that are reasonably adequate to render employment and the place of employment safe and healthful.

   c) Do everything reasonably necessary to protect the life, safety, and health of employees. (Labor Code §6300 et seq.)

2) Establishes the Division of Occupational Safety and Health (Cal/OSHA) within the Department of Industrial Relations (DIR) to, among other things, propose, administer, and enforce occupational safety and health standards. (Labor Code §6300 et seq.)

3) Establishes the Occupational Safety and Health Standards Board (Standards Board), within DIR, to promote, adopt, and maintain reasonable and enforceable standards that will ensure a safe and healthful workplace for workers. (Labor Code §140-147.6)

4) Requires Cal/OSHA to enforce all occupational safety and health standards adopted by the Standards Board, as specified. (Labor Code §142 and §144.5)

5) Stipulates that in promulgating standards dealing with toxic materials or harmful physical agents, the Standards Board shall adopt standards to prevent employees from suffering adverse health effects even if these employees have regular exposure to a regulated hazard (Labor Code §144.6).

This bill:

1) Requires Cal/OSHA, on or before January 1, 2030, to propose to the Standards Board, for its consideration and possible adoption, a standard that protects the health and safety of employees who risk high or prolonged exposure to transboundary pollution in outdoor occupational environments.

2) Provides that the standard shall apply to lifeguards, park rangers, and other employees that Cal/OSHA determines are at high risk, who work within a 10-mile radius of the boundary of any of the following:

   a) The Tijuana River Valley Regional Park.

   b) The Tijuana Slough National Wildlife Refuge.

   c) The Tijuana River.

   d) The New River.

3) Provides that the standard described in 1) may include all of the following:

   a) Personal protective equipment, which may include, but not be limited to, respiratory protection and protective attire.

   b) Medical surveillance, which may include, but not be limited to, medical examination rights, medical procedures, and reporting requirements.

   c) Hazard communication, which may include, but not be limited to, notice of anticipated wet weather or other high-exposure events and any available data on pollution exposure conditions.

   d) Reporting and recordkeeping practices. In developing these practices, Cal/OSHA shall consider, at minimum, both of the following:

      i) Incident or exposure report forms for use by employees.

      ii) Maintaining data on exposure threshold exceedances, health-related symptoms developed following job duties, sick leave related to exposure incidents, and weather events exacerbating transboundary pollution.

   e) Training for employees and supervisors that includes, but is not limited to, all of the following:

      i) Information on workplace hazards relating to the regional environmental conditions.

ii) Potential health effects of exposure to transboundary pollution, including related symptoms.

iii) Use of personal protective equipment.

iv) Reporting practices.

4) Provides that 3) does not limit the authority of Cal/OSHA to develop a standard, or the authority of the Standards Board to adopt a standard, that is broader in scope or broader in application than required by these provisions.

5) Requires Cal/OSHA to consider identifying an exposure threshold for hydrogen sulfide at which acute or chronic health effects occur to reference in the standards and may consider exposure thresholds for other relevant pollutants.

6) Authorizes Cal/OSHA to develop the standards described in 1) in consultation with lifeguards, park rangers, trade and labor unions, cities, counties, private and public sector employers, air districts, local environmental and public health agencies, universities and academic institutions, the Department of Parks and Recreation, the State Air Resources Board, the State Water Resources Control Board, regional water quality control boards, and the Office of Environmental Health Hazard Assessment.

7) Authorizes the Standards Board to adopt emergency regulations to implement these provisions, as specified.

8) Defines "lifeguard" as a person actively employed as a lifeguard by a city, county, city and county, district, or other public or municipal corporation or political subdivision, or a person actively employed as a state lifeguard by the Department of Parks and Recreation.

9) Defines "park ranger" as a person that enforces park rules and regulations and is actively employed as a park ranger by a city, county, city and county, district, or other public or municipal corporation or political subdivision, or is actively employed as a state park ranger by the Department of Parks and Recreation.

10) Defines "transboundary pollution" as environmental pollutants or toxins contaminating state water or air that originate from Baja California, enter through the Tijuana River, the Pacific Ocean, or the New River, and threaten the health and safety of the public or environment.

11) Makes various findings and declarations related to the Tijuana River Valley and transboundary pollution.

Background

Occupational Safety and Health Standards Board (Standards Board). The Standards Board, within Cal/OSHA, is the only agency in the state authorized to adopt, amend, or repeal occupational safety and health standards or orders. Its mission is to promote, adopt, and maintain reasonable and enforceable standards that ensure a safe and healthful workplace. The Standards Board consists of seven members appointed by the Governor. Two members are selected from labor, two members from management, one member from occupational safety, one member from occupational health, and one member from the general public. Among other responsibilities, the Standards Board 1) adopts and maintains standards; 2) considers petitions for new or revised standards proposed by any interested person; and 3) grants permanent variances from standards. To carry out its duties, the Standards Board holds monthly meetings throughout California.

The Standards Board must adopt standards at least as effective as federal ones for all health and safety issues that have federal standards promulgated under the Occupational Safety and health Act of 1970. Additionally, the Standards Board maintains standards unique to the state, like those for amusement rides, aerial passenger tramways, and heat illness. Depending on its scope and application, standards can apply to state and local government and private sector workplace operations.

The Administrative Procedure Act governs the public hearing and adoption process. After a rulemaking action is deemed necessary, proposed standard changes are developed by either the Standard Board's staff or Cal/OSHA's staff, generally with the assistance and recommendations of an advisory committee. Advisory committees consist of representatives from industry, labor, the public, and other interested groups. If the changes are related to federal standards, the proposal is reviewed by Federal OSHA staff. The proposal is then scheduled for hearing at one of the Board's monthly meetings, so that written and oral testimony can be solicited. Following the public hearing, all testimony is returned to the originating staff (either the Standards Board staff or Cal/OSHA) for review. When all comments and testimony have been addressed by either modifying the proposal or providing a satisfactory explanation for rejection of suggested changes, the Standards Board's staff schedules the proposed standard for consideration and adoption at its next meeting. Following adoption, a copy of the rulemaking file is

sent to the Office of Administrative Law. After approval, the standards are published in Title 8 of the California Code of Regulations.

The Tijuana River Valley and Transboundary Pollution. Every day the Tijuana River carries millions of gallons of untreated sewage, industrial waste, and contaminated runoff across the U.S.-Mexico border. The river flows through Tijuana, Mexico and into the United States via the Tijuana River Valley in southern San Diego County, before emptying into the Pacific Ocean. Factories and shanty towns in Tijuana that aren't connected to the city's sewage system are primarily responsible for the pollution. Although this binational problem dates back decades, explosive population growth in Tijuana, aging wastewater treatment plants in both the U.S. and Mexico, and climate change have exacerbated pollution.

Communities near the river suffer adverse health and economic impacts. Scientists have detected high levels of hydrogen sulfide in the air, which can cause headaches, fatigue, skin infections, anxiety, and respiratory and gastrointestinal problems. All of which are symptoms that residents near the river have complained of for years. According to the U.S. Centers for Disease Control and Prevention, nearly half of the 40,900 households in the southern San Diego County region have experienced health problems most likely attributable to the pollution. The Office of the Naval Inspector General found that in 2025, more than 1,100 Navy recruits contracted gastrointestinal illnesses after training in southern San Diego waters. On top of the health issues, the contaminated ocean water and hydrogen sulfide also destabilize local economies that rely on tourism. Imperial Beach has been closed for over 1,300 consecutive days and Coronado Beach closes intermittently due to contamination.

There are no overnight solutions that will alleviate health issues and reopen beaches. Instead, officials from the U.S. and Mexico will need to work together to expand sewage treatment plants, test water quality, and survey impacted residents to understand health issues. Despite the Trump Administration's cuts to other federal programs, money has continued to flow for Tijuana River cleanup. In July of 2025, the U.S. and Mexico signed a memorandum of understanding aimed at ending the flow of raw sewage into the Tijuana River. Under the deal, Mexico agreed to complete an allocation of $93 million toward sanitation infrastructure and complete all projects by December 31, 2027, and the U.S. agreed to release funds for water infrastructure improvements on the border. A subsequent agreement, known as Minute 333, was signed in December of 2025.

SB 1046. The prior legislation section details the Legislature's long history of directing Cal/OSHA to develop and propose to the Standards Board various health and safety standards. SB 1046 would continue this practice by requiring Cal/OSHA, on or before January 1, 2030, to propose to the Standards Board a standard that protects the health and safety of employees who risk high or prolonged exposure to transboundary pollution in outdoor occupational environments, as specified. The measure would also authorize the Cal/OSHA to consider identifying an exposure threshold for hydrogen sulfide at which acute or chronic health effects occur to reference in the adopted standard and to consider exposure thresholds for other relevant pollutants.

Related/Prior Legislation

AB 1181 (Haney, Chapter 392, Statutes of 2025) required the Standards Board to consider modifying its existing safety order, by January 1, 2028, in a manner that addresses National Fire Protection Association performance standards for PPE that result in the use of perfluoroalkyl and polyfluoroalkyl substances and other hazardous substances in firefighting personal protective garments and auxiliary firefighting PPE.

AB 2975 (Gipson, Chapter 749, Statutes of 2024) required the Standards Board, by March 1, 2027, to amend the existing workplace violence prevention in health care standard to require licensed hospitals to implement a weapons detection screening policy that includes the use of weapons detection devices that automatically screen a person's body at specified entrances.

AB 1007 (Ortega, Chapter 352, Statutes of 2023) required Cal/OSHA, by December 1, 2026, to submit to the Standards Board a proposed regulation requiring a health facility to evacuate or remove plume using plume scavenging systems in all settings that employ techniques that involve the creation of plume. This bill also required the Standards Board to consider the proposed regulation for adoption by June 1, 2027.

AB 2243 (Garcia, Chapter 778, Statutes of 2022) required Cal/OSHA, before December 1, 2025, to submit to the Standards Board a proposal to consider revising the heat illness standard, as specified, and the wildfire smoke standard for farm workers to increase the protection of workers exposed to heat and smoke in outdoor settings, as specified.

SB 1167 (Mendoza, Chapter 839, Statutes of 2016) required Cal/OSHA to propose to the Standards Board for review and adoption, a standard that minimizes heat-

related illness and injury among workers working in indoor places of employment by January 1, 2019.

SB 1299 (Padilla, Chapter 842, Statutes of 2014) required the Standards Board, no later than July 1, 2016, to adopt standards that require specified hospitals to adopt a workplace violence prevention plan as part of their injury and illness prevention plan to protect health care workers and other facility personnel from aggressive and violent behavior.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Costs of approximately $1.2 million in the first year and $1.1 million each additional year of the rulemaking project to the Department of Industrial Relations (DIR), as well as one-time costs of $100,000 if DIR must conduct a Standardized Regulatory Impact Assessment as part of the process (Occupational Safety and Health Fund). Additionally, Cal/OSHA will likely incur costs of an unknown amount for enforcement once the standard is enacted.

2) One-time costs of approximately $250,000 to OEHHA for an external contract to support identification of the hydrogen sulfide exposure threshold, to study the long-term health effects of hydrogen sulfide exposure, and work with Cal/OSHA and OSHSB to incorporate these findings into the standard (General Fund). OEHHA also estimates absorbable costs to provide public information and engage with interested parties related to this work.

3) Likely minor and absorbable costs to other named state agencies (Department of Parks and Recreation, Air Resources Board (ARB), and State Water Resources Control Board) to consult with OSHSB to develop the standard.

Tribal Sacred Waters, INC
Un Mar De Colores
YMCA of San Diego County

OPPOSITION: (Verified 8/25/26)

None received

ARGUMENTS IN SUPPORT: According to SEIU California:

"Transboundary pollution contaminates the air, water, and soil of border cities and counties, including San Diego, Imperial Beach, and Calexico. Every year, the Tijuana River transports millions of gallons of untreated wastewater, including sewage and industrial waste, from Tijuana into California. This decades-old crisis has plagued the South Bay coastline, resulting in 1,300 consecutive days of beach closures as of 2025…

SEIU members working near the California–Mexico border are at a heightened risk of occupational exposure to transboundary pollution. Currently, they risk illness with little to no protection or accommodations. Unlike other workplace hazards, there is currently no guidance on reporting illnesses, tracking incidents, or providing protective communication. Lifeguards and park rangers frequently experience headaches, fatigue, nausea, abdominal pain, and even bloody noses. After performing water rescues, lifeguards often require several days to recover from symptoms before they can return to work.

SB 1046 would direct the Division of Occupational Safety and Health (Cal/OSHA) to propose a standard for review and adoption by the Occupational Safety and Health Standards Board to protect the health and safety of employees exposed to transboundary pollution. By providing employers with essential tools, such as hazard communication and respiratory protection, SB 1046 would reduce illnesses among SEIU members who work to keep our outdoor spaces safe."

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Neurodegenerative disease registry program

SOURCE: Association for Frontotemporal Degeneration
End Chronic Disease, INC.

DIGEST: This bill (1) expands data collection and reporting requirements for the California Neurodegenerative Disease Registry Program (CNDRP) to include frontotemporal degeneration; (2) extends the CNDRP to January 1, 2032.

Assembly Amendments make grammatical changes.

ANALYSIS:

Existing law:

1) Requires the California Department of Public Health (CDPH), under the CNDRP and until January 1, 2028, to collect data on the incidence and prevalence of neurodegenerative disease in California, including, but not limited to, amyotrophic lateral sclerosis (ALS). [Health and Safety Code (HSC) §103871 and §103871.2]

2) Allows CDPH to designate which neurodegenerative diseases must be reported and to prescribe the data collection method and data format. [HSC §103871]

3) Requires a hospital, facility, physician, or other health care provider diagnosing or treating a patient with a neurodegenerative disease to report all cases diagnosed or treated in the state to CDPH. [HSC §103871]

4) Specifies that neurodegenerative disease may include but is not limited to Alzheimer's disease, multiple sclerosis, and Huntington's disease. [HSC §103871]

This bill:

1) Expands data collection and reporting requirements for the CNDRP to include frontotemporal degeneration (FTD).

2) Extends the sunset date of the CNDRP to January 1, 2032.

Background

CNDRP. The CNDRP, within CDPH's Chronic Disease Surveillance and Research Branch, was established in 2021 to collect data on the incidence of neurodegenerative disease in the state to better understand its prevalence among different populations and changes over time. The CNDRP has authority to determine which diseases must be reported. Statute requires that ALS cases be reported, and CDPH separately requires reporting for Alzheimer's disease and multiple sclerosis. According to the CNDRP, the program began collecting data on multiple sclerosis on July 1, 2023, and has expanded reporting requirements to include Alzheimer's in July of 2025 and ALS in July of 2026. Parkinson's disease is reported via the Richard Paul Hemann California Parkinson's Disease Registry, a similar program that predates the CNDRP.

CNDRP data are obtained from patients' medical records and include their identifying information, demographic data, patient visit information, primary physician information, primary ICD-10 diagnosis code, and disease onset information. CDPH accepts data from registered providers through either manual data entry into a secure web portal or the automated electronic transfer of case files from electronic medical record systems. The data collected by CNDRP are confidential, meaning that detailed data may only be disclosed to researchers who have obtained approval from their institutional review board and have demonstrated their ability to maintain data security, other state neurodegenerative disease registries, federal neurodegenerative disease control agencies, and local health officers. The data can only be used for the stated purpose of their request. Patients and those legally authorized to obtain a patient's confidential information can also access their data.

FTD. According to the National Institute of Neurological Disorders and Stroke, FTD (also known as frontotemporal dementia, frontotemporal disorder, frontotemporal lobar degeneration, or Pick's disease) is caused by damage to neurons in the frontal and temporal lobes of the brain. Neuronal damage results in progressive atrophy of the lobes, disrupting the functions associated with these regions, such as planning and decision-making, emotional regulation, memory, and language. Depending on what area of the brain is affected, patients may also display difficulty with motor control. Because FTD is progressive, an individual's symptoms will change over time as more parts of the brain are affected. FTD is diagnosed by neurological and cognitive exams and behavioral evaluations, family history and genetic testing, brain imaging, and laboratory tests that exclude the possibility of Alzheimer's, but can only be confirmed postmortem.

FTD is usually diagnosed in three different categories: behavioral variant frontotemporal dementia (bvFTD); primary progressive aphasia (PPA); and movement disorders. Patients diagnosed with bvFTD display changes in personality, behavior, and judgment, with or without problems with cognition or memory. Those with PPA have difficulty with speaking, reading, writing, and understanding words. PPA patients often display cognitive symptoms of dementia as the disease progresses, and occasionally display behavioral changes as well. FTD-induced movement disorders include corticobasal syndrome, progressive supranuclear palsy, FTD with parkinsonism, and FTD-ALS. Corticobasal syndrome is characterized by difficulty using hands or arms, sometimes beginning on one side of the body before progressing to both. Those with progressive supranuclear palsy have difficulty walking, balancing, and moving facial muscles, and it is characterized by a fixed stare due to trouble with eye movements.

Individuals with FTD with parkinsonism display symptoms similar to Parkinson's disease, including slowed movement, stiffness, and balance issues. FTD-ALS is a combination of bvFTD and ALS, including ALS symptoms like progressive muscle weakness and muscle jerks or wiggling. The movement disorders may also include symptoms affecting behavior, thinking, and language. According to the Association for Frontotemporal Degeneration, an estimated 50,000-60,000 Americans have FTD. Unlike Alzheimer's and many other dementias, FTD primarily affects middle-aged individuals. About 60% of diagnoses occur between 45 and 64 years of age, when many are still working and caring for family members. The life expectancy for those with FTD ranges from two to 20 years from the onset of symptoms.

Comments

According to the author of this bill:

> This bill will direct the CNDRP to collect data on FTD and require hospitals and health care professionals to report cases. FTD is a terminal and incurable neurodegenerative disease, causing impairments to speech, personality, behavior, and movement, and constitutes a major public health concern. FTD represents an estimated 5-15% of dementia cases and is the most common form of dementia for people under 60. It is reported that 75% of physicians in California already use the necessary record-keeping system. This bill will help prioritize FTD so researchers can better identify and treat the FTD community, speeding research into the causes, treatments, and hopefully cures for FTD, as well as informing patients of clinical trials, a critical tool for those dealing with this disease. This bill also extends the sunset date to continue the work on behalf of other previously approved neurodegenerative diseases.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, CDPH estimates General Fund costs of approximately $2.7 million per year in fiscal years (FYs) 2027-28 through 2031-32 to implement provisions of this bill. CDPH states these costs include the following:

- Staff: 7.3 full-time equivalents (FTEs) to support programmatic functions, two FTEs for information technology support, and an additional FTE to incorporate FTD into data collection requirements. Staff serve as subject matter experts, perform data management system (DMS) activities and analysis, create

datasets, conduct outreach, and provide technical assistance to data providers, associations, and partners to ensure data accuracy and to meet the statutory mandate.

- Information technology: $400,000 to support the CNDR DMS, including costs associated with the California Reportable Disease Information Exchange manual entry web portal, integration and data validation tool, associated software, and maintenance and operations of the DMS.

- Promulgating regulations: $63,000.

ARGUMENTS IN SUPPORT: The co-sources of this bill, the Association for Frontotemporal Degeneration (AFTD) and End Chronic Disease, support the CNDRP, described as a vital and cost-effective resource for researchers. End Chronic Disease shares that disease registries are important medical research infrastructure, allowing researchers to recruit patients for clinical trials, evaluate treatment effectiveness, understand disease progression, and develop precision medicine approaches. They hope that expanded reporting for those with frontotemporal degeneration can help identify trends earlier, recognize clusters of disease, improve screening recommendations, and support earlier intervention. AFTD and a coalition of ALS, FTD, and Parkinson's disease organizations write

that it is their goal to ensure every person living with a neurodegenerative disease is seen, counted, and supported through data-informed public policy and research investment. The interconnectedness of many neurodegenerative diseases means improving data collection for one condition strengthens understanding across the field. Several supporters highlight that the explicit inclusion of FTD and other dementias within the definition of neurodegenerative disease reflects the current state of the science around the interconnectedness of neurodegenerative diseases and emphasize that comprehensive data collection will better inform research, care, resource allocation, and eventually, outcomes for patients. California Life Sciences writes that the existing registry infrastructure uses electronic medical records and established reporting mechanisms to collect data without creating unnecessary administrative burden.

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: State Seal of Climate Literacy

SOURCE: California State PTA
Silicon Valley Youth Climate Action
Ten Strands
UndauntedK12

DIGEST: This bill establishes the voluntary State Seal of Climate Literacy (SSCL), allowing local educational agencies (LEAs) to create pathways towards climate literacy disciplines and reward students who have demonstrated mastery. The bill also requires the Education Commissioner (Commissioner) and State Board of Education (SBE) to develop and adopt criteria for awarding the SSCL based on student coursework and experiential learning projects.

Assembly Amendments 1) extend the implementation timeline; 2) replace references to the State Superintendent of Public Instruction (SPI) with the Commissioner; 3) specify that final experiential learning projects must be completed on a voluntary basis and be independent from student coursework; 4) remove provisions related to the Seal Distinctions; 5) remove LEA reporting requirements to align with policies of existing seals; and 6) emphasize equitable implementation wherever possible to ensure participation from diverse communities throughout the state.

ANALYSIS:

Existing law:

1) Establishes the Office of Education and the Environment (OEE) in the California Department of Resources Recycling and Recovery (CalRecycle) and requires the OEE to implement a statewide environmental education program. (Public Resources Code (PRC) § 71300)

2) Requires the OEE, under the direction of CalRecycle and in cooperation with the CDE and the State Board of Education (SBE), to develop and implement a unified education strategy of the environment for elementary and secondary schools, as specified. (PRC § 71300)

3) Requires the CDE and SBE, in cooperation with CalRecycle, to develop and implement, to the extent feasible, a teacher training and implementation plan that guides the phased implementation of the unified education strategy in elementary, middle, and high school programs, for the education of pupils, faculty, and administrators on the importance of integrating environmental concepts and programs in schools. (PRC § 71300)

4) Establishes the voluntary State Seal of Civic Engagement (SSCE), affixed to the diploma or transcript of an eligible student, to encourage, and create pathways for, students in elementary and secondary schools to become civically engaged in democratic governmental institutions at the local, state, and national levels. (Education Code (EC) § 51475)

5) Requires the SPI, in developing criteria for the SSCE, to incorporate the Six Proven Practices for Effective Civic Learning, and to consult with a diverse group of credentialed, current classroom teachers who teach the subject of history-social science, including government, in secondary schools. Requires the SPI, on or before January 1, 2020, to recommend to the SBE criteria for awarding a SSCE to students, as specified. Requires the SBE, on or before

January 31, 2021, to adopt, reject, or modify the SSCE criteria recommended by the SPI. (EC § 51470 et seq.)

This bill:

1) Establishes the voluntary SSCL for the purpose of giving high school pupils personal agency to help them and their communities understand and adapt to the effects of climate change.

2) Requires the Commissioner, on or before December 31, 2027, to recommend to the SBE criteria for awarding the SSCL to pupils who have demonstrated mastery in climate literacy disciplines, green skills or technical green skills, and any and all other best practices for climate literacy. Requires the Commissioner to consider, in the development of criteria, the following:

   a) Successful completion of at least two approved courses in the area of climate literacy, as specified.

   b) Successful completion and presentation of a climate literacy final experiential learning project, as specified.

3) Requires the Commissioner to ensure, to the greatest extent feasible, that the criteria developed pursuant to #2 above adhere to all of the following:

   a) Provides all pupils in participating LEAs with an opportunity to earn the SSCL.

   b) Recognizes pupil excellence and outstanding achievement.

   c) Is not based primarily on pupil achievement that is already recognized through grades or other standard measures of pupil achievement.

   d) Results in a seal that confers a benefit to pupils beyond high school, signaling to employers and institutions of higher education the pupil's readiness to contribute to a sustainable and resilient future.

4) Requires the SBE, on or before January 31, 2029, to adopt or adopt with modifications, all SSCL criteria recommended by the Commissioner.

5) Requires the Commissioner to do all of the following:

   a) Prepare and deliver to participating LEAs an appropriate insignia to be affixed to the diploma or transcript of the pupil indicating that the pupil has been awarded an SSCL by the Commissioner.

b) Provide other information the Commissioner deems necessary for LEAs to successfully participate in awarding the SSCL to pupils.

c) Provide information to pupils who earn a SSCL about postsecondary opportunities and career pathways that leverage the knowledge and skills that pupils develop through earning the SSCL.

6) Authorizes the CDE to partner with nonprofit organizations to conduct outreach and provide technical assistance to LEAs in awarding the SSCL to ensure broad participation from diverse communities throughout the state.

7) Requires a participating LEA, on or after the date that the SBE adopts SSCL criteria, to do the following:

a) Maintain appropriate records in order to identify pupils who have earned a SSCL.

b) Affix the appropriate insignia to the diploma or transcript of each pupil who earns a SSCL.

c) Provide information to pupils about available options and supports, including, but not limited to, approved courses, experiential learning, or final projects that pupils may complete to meet the criteria to earn a SSCL.

d) Establish a process for determining if a pupil has met the criteria necessary to earn a SSCL.

8) Defines the following terms:

a) "Climate literacy" means an understanding of the essential principles of the earth's climate system, assessing scientifically credible climate information, learning to communicate about the climate in a meaningful manner, and making informed and responsible decisions regarding actions that may affect the climate.

b) "Climate literacy experiential learning provider" means a provider that facilitates a pupil's final project, including, but not limited to, a school organization or club, local media outlet, business, nonprofit organization, or industry focused on green skills or technical green skills.

c) "Green jobs" or "green career" means occupations or employment positions that reduce harmful effects on the climate, adapt processes to minimize their effect on the climate, recognize and mitigate the disproportionate social

effects of climate change, support the economic, social, and environmental sustainability of communities, or contribute to the well-being and resilience of present and future generations.

d) "Green skills" means the adaptable knowledge, abilities, values, and attitudes to live in, develop, and support an evolving, sustainable, and resource-efficient society.

e) "Local educational agency" means a school district, county office of education, or charter school.

f) "Technical green skills" means skills that fulfill the requirements of green jobs and that support the transition to a low-carbon sustainable economy.

Comments

Need for the bill. According to the author, "California has long led the nation in climate action. SB 1048 ensures we are also leading in climate education by preparing the next generation with the knowledge and real-world experience they need to meet the challenges of a changing climate."

California's Environmental Principles and Concepts. In 2003 and 2005, the Legislature passed AB 1548 (Pavley, Chapter 665, Statutes of 2003) and AB 1721 (Pavley, Chapter 581, Statutes of 2005), which ultimately established the OEE under CalRecycle to develop education principles for the environment for elementary and secondary school pupils. The resulting California Environmental Principles and Concepts (EP&Cs) are comprised of five environmental principles and 15 supporting concepts that highlight the deep relationship between humans and the natural world and serve as "big ideas" intended to inform standards-based instruction and fuel student inquiry. These EP&Cs have been integrated into several state curriculum frameworks for California public schools serving kindergarten through grade twelve, including the 2016 History and Social Science Framework, the 2016 Science Framework, and the 2019 Health Education Framework.

Equity in Access to Climate Literacy Opportunities. This bill borrows the model of SSCE to create the SSCL. Specifically, it requires the SPI to recommend to the SBE criteria that would allow LEAs to recognize students who have demonstrated mastery in climate literacy disciplines, green skills or technical green skills, and any and all other best practices for climate literacy. In the development of criteria, the bill requires the SPI to consider factors such as the completion of courses in the

area of climate literacy and the completion and presentation of a climate literacy final experiential learning project, as specified.

While the SSCL is intended to serve as a voluntary program, its implementation relies heavily on an LEA's ability to leverage partnerships with state and local climate literacy nonprofits, as well as labor and private sector entities engaged in the green economy. There are certainly areas of the state that have an abundance of local entities that are engaged with LEAs and have the capacity to partner with schools to provide learning opportunities for students; however, without careful attention to expanded access, such opportunities cannot be guaranteed for all students across the state.

This bill requires the Commissioner and the CDE to develop guidance, to the greatest extent feasible, provides all pupils with an opportunity to earn the SSCL and results in a seal that confers a benefit to the pupil beyond high school. This bill also authorizes the CDE to work with nonprofit organizations in furtherance of these priorities and others.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Minor, ongoing Proposition 98 General Fund costs to high schools to verify whether a student has demonstrated climate literacy as prescribed by the criteria to be set forth by the SBE pursuant to this bill.

2) Ongoing General Fund costs, likely minor, for CDE to send out additional seals authorized under this new designation.

NO VOTE RECORDED: Ochoa Bogh, Reyes, Wahab

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Foster care: childcare

SOURCE: Alliance for Children's Rights
Child Care Resource Center

DIGEST: This bill authorizes a child care navigator to refer a foster child to the county welfare department for eligibility and approval under the Emergency Child Care Bridge Program for Foster Children (Bridge Program) and requires a county welfare department to determine eligibility of a child referred from a child care navigator.

Assembly Amendments add double jointing language with AB 2478 to avoid chaptering out issues.

ANALYSIS:

Existing law:

1) Establishes the Bridge Program as a county opt-in program with the purpose of stabilizing foster children with families at the time of placement by providing a time-limited payment or voucher for child care following the child's placement and providing the family with a child care navigator to assist the family in accessing long-term subsidized child care. (Welfare and Institutions Code [WIC] § 11461.6)

2) Authorizes payments to be provided either directly to the family or child care provider, or through a contract with a local Alternative Payment program to distribute vouchers for child care. (WIC § 11461.6(c))

3) Requires participating county welfare departments to determine eligibility of a child for the Bridge Program using the following criteria:

   a) A family placement eligible to receive payment or a voucher for child care includes both of the following:

      i) Approved resource families and families that have a child placed with them in an emergency or for a compelling reason, as specified.

      ii) Parents under the jurisdiction of the juvenile court, including, but not limited to, nonminor dependent parents.

   b) A participating county welfare department may provide a payment or voucher if work or school responsibilities preclude resource families from providing care under certain circumstances, as specified. (WIC § 11461.6(d))

4) Provides that each child receiving a monthly child care payment or voucher shall be provided with a child care navigator who shall work directly with the child's family, social worker, and the child and family team to assist in accessing child care at the time of placement as well as long-term, subsidized child care for the child, as necessary. (WIC § 11461.6(e))

5) Provides that child care resource and referral (R&R) programs, established to serve a defined geographic area, shall provide a common set of services. Requires child care R&R programs to be provided to all persons requesting services and all types of child care providers, regardless of income level or other eligibility criteria. (WIC § 102219 and 10222)

6) Requires R&R programs to provide a common set of services, including, but not limited to, provision of a child care navigator to support children in foster care and children of parents involved in the child welfare system, among others. Provides that a child care navigator shall work with the child's family, child's social worker, and the child and family team to assess child care opportunities appropriate to the child's age and needs, assist the family in identifying potential opportunities for an ongoing child care subsidy, assist the caregiver in completing appropriate child care program applications, and develop an overall, long-term child care plan for the child. (WIC § 10219(5)(A)(i))

7) Requires each R&R program to develop and enter into a memorandum of understanding, contract, or other formal agreement with the county child welfare agency in order to facilitate interagency communication and, to the maximum extent possible, to leverage federal funding to enhance navigation support. Alternatively allows an R&R program to explain in writing, annually, why entering into a formal agreement with the county child welfare agency is not practical or feasible. (WIC § 10219(5)(A)(ii))

This bill:

1) Authorizes a child care navigator to refer foster children to the county welfare department for eligibility and approval under the Bridge Program.

2) Requires a county welfare department to determine eligibility of a child referred from a child care navigator for the Bridge Program.

3) Adds double jointing language with AB 2478 to avoid chaptering out issues.

Background

Purpose of the Bill. According to the author, "When foster families and parenting youth call Resource and Referral agencies seeking child care, they are connected with a Bridge Navigator who can direct them to available resources. While they can certainly share the information, there is no direct coordination pathway to work with the county child welfare to help streamline approval of this child care voucher. Senate Bill 1051 would empower Bridge Navigators, who are well-positioned within Resource and Referral agencies, to submit referrals to county child welfare agencies to obtain approval for a child care voucher for an eligible foster child under the Emergency Child Care Bridge Program. It will streamline and strengthen the original intent of the Bridge Program by ensuring lack of access to child care is not a barrier to keeping children in safe, stable family home."

Emergency Child Care Bridge Program for Foster Children. The 2017 Budget Act established the Bridge Program to address child care as a barrier to placing foster children with relative and nonrelative caregivers (rather than placement in group homes). The Bridge Program is funded outside of other child care programs to provide a time-limited child care voucher for resource families at the time of a child's placement. Resource families are also provided with a child care navigator (located at an R&R program) to assist the family in accessing long-term subsidized child care. These supports make it easier for caregivers to take in a child on an emergency or temporary basis. In 2024–25, 48 counties were opted into the Bridge Program, and the program received funding to serve 5,537 children.

The Bridge Program is an opt-in program administered by county welfare departments in coordination with local Alternative Payment and R&R programs, both of which are often operated by the same child care agency. Participating county welfare departments must determine eligibility of a child based on whether the family is an approved resource family with a child placed with them in an emergency or the parents are under the jurisdiction of the juvenile court. Most participating county welfare departments choose to contract with a local Alternative Payment program agency to distribute child care vouchers. Additionally, each R&R program is required to contract with its local county welfare department to facilitate interagency communication, leverage federal funding, and enhance navigation support.

Navigator Services. Navigation or navigator services are a component of many social service programs. R&R programs are required to provide navigator services to families participating in the Bridge Program to assess child care opportunities appropriate to the child's age and needs, assist the family in identifying potential opportunities for an ongoing child care subsidy, and develop a long-term child care plan for the child. R&R programs must provide navigator services to any child in foster care or involved in the child welfare system, regardless of a child's receipt of a child care voucher.

This bill would authorize a child care navigator to refer foster children to the county welfare department for eligibility and approval under the Bridge Program and require a county welfare department to determine the eligibility of a child referred by a child care navigator. According to the co-sponsors, this bill would empower navigators to connect resource families to child care resources they are eligible for when those families go to an R&R program seeking information about child care.

Comments

This bill seeks to make eligibility determinations for the Bridge Program more accessible for resource families who are already eligible but not receiving services. R&R programs are already in contact with resource families to assist with their child care needs. Resource families may not be utilizing a Bridge Program child care voucher because they were not made aware of the program or because their need for child care arose later during the foster care placement. This bill would create a "no wrong door" approach for families to gain access the Bridge Program. County welfare department social workers would still retain the authority to determine eligibility.

Recent state budget actions have reverted unspent Bridge Program funding. Between 2017 and 2022, annual funding for the program grew from $31 million to $87 million to serve more resource families and expand allowable uses for counties to serve families with compelling needs. In 2024, the budget reverted $47 million from the prior year and reappropriated it to the 2024–25 fiscal year. In 2025, the budget reverted $30 million from 2024–25 and reduced Bridge Program funding by $30 million ongoing. By improving the referral process, this bill could increase the volume of already eligible families enrolled in the Bridge Program and reduce the amount of unspent program funding.

Related/Prior Legislation

AB 2478 (Schultz) would establish a Kinship Family Approval process within CDSS as a streamlined pathway for relatives, nonrelative extended family members, and extended family members of Indian children to become approved foster care providers. AB 2478 includes double jointing language with this bill. AB 2478 is pending on the Senate Floor.

SB 187 (Committee on Budget and Fiscal Review, Chapter 50, Statutes of 2022), a budget trailer bill, authorized a county welfare department, starting September 1, 2022, to extend eligibility for the Bridge Program monthly payment or voucher beyond 12 months based on a compelling reason that may include, but is not limited to, the inability of the foster child to successfully transition to other subsidized child care, the loss of the payment or voucher would jeopardize a successful reunification or permanency plan, or other reasons authorized pursuant to guidance issued by CDSS.

SB 89 (Committee on Budget and Fiscal Review, Chapter 24, Statutes of 2017), a budget trailer bill, established the Bridge Program as a county opt-in program, effective January 1, 2018.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, "The California Department of Social Services indicates absorbable costs, if any. Because the Bridge Program is a county-optional program, any costs incurred by counties resulting from this bill are not reimbursable by the state."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Western Joshua Tree Conservation Act: fees

SOURCE: Author

DIGEST: This bill requires the California Department of Fish and Wildlife (CDFW), when adjusting the in lieu fees for the take of western Joshua trees (WJTs) under the Western Joshua Tree Conservation Act (WJTCA), to consider making the fees proportionate to the impact of the project and the use of tiered fees by project type, size, or other criteria.

Assembly Amendments add chaptering out amendments with AB 1808 (Carillo, 2026)

ANALYSIS:

Existing law:

1) Establishes the CDFW and the California Fish and Game Commission (commission) in the California Natural Resources Agency. In general, CDFW implements and enforces the regulations set by the commission and provides data and expertise to inform the commission's decision making.

2) Specifies that CDFW has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species. (Fish and Game Code (FGC) §1802).

3) Defines "take" as hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill. (FGC §86).

4) Prohibits the taking of an endangered or threatened species, except in certain situations. Provides that a candidate species receives California Endangered Species Act (CESA) protections while its status is pending. (FGC §§2070 *et seq.*).

5) Allows CDFW to authorize the taking of listed species pursuant to an incidental take permit if the taking is incidental to an otherwise lawful activity, the impacts are minimized and fully mitigated, and the issuance of the permit would not jeopardize the continued existence of the species. (FGC §§2081; 2084).

6) Establishes the WJTCA that enacts the following, among other provisions (FGC §§1927 *et seq.*):

   a) Prohibits any person or public agency from importing into the state, exporting out of the state, or taking, possessing, purchasing, or selling within the state, a WJT or any part or product of the WJT, except pursuant to the WJTCA, the California Endangered Species Act (CESA), or the Natural Community Conservation Planning Act (NCCP Act).

   b) Authorizes WJT take under CESA or by paying certain in-lieu fees specified by the WJTCA when the WJT is a candidate species under CESA.

   c) Requires the WJTCA to remain operative if the commission determines that listing the WJT under CESA is not warranted. Requires WJT take permitting under CESA or pursuant to the NCCP Act if the commission determines that

listing the WJT under CESA is warranted, which would render the WJTCA inoperative.

d) Authorizes CDFW to issue a permit for the taking of a WJT if specified conditions are met, including, that the permittee mitigates all impacts to, and taking of, the WJT. Authorizes CDFW to include in its permit conditions the requirement that the permittee relocate one or more WJTs. Requires permittees to bear responsibility for implementing measures to assist the survival of relocated WJTs.

e) Authorizes a permittee, in lieu of completing the mitigation measures on its own, to elect to satisfy the mitigation obligation by paying a fee pursuant to a specified fee schedule.

f) Requires CDFW to annually adjust the fees for inflation, and to review the fees by December 31, 2026, and every three years thereafter, to ensure the conservation of WJT.

    i) Requires CDFW to utilize total cost accounting when determining the adequacy of the fees for ensuring conservation of the species, including ensuring sufficient funds for land acquisition or conservation easement costs, monitoring costs, restoration costs, transaction costs, and the amount of endowments for land management or stewardship costs, as provided.

g) Requires all fees remitted to CDFW to be deposited into the Conservation Fund, as provided, and requires the moneys in the Conservation Fund, upon appropriation by the Legislature, to be used solely for the purposes of acquiring, conserving, and managing WJT conservation lands and completing other activities to conserve the WJT.

h) Requires CDFW to submit to the commission an update of the status review required under CESA that incorporates any new scientific information and includes an evaluation of conservation efforts under the WJTCA by January 1, 2033.

This bill requires CDFW, when adjusting the in lieu fees for WJTs, to consider making the fees proportionate to the impact of the project and the use of tiered fees by project type, size, or other criteria, and adds chaptering out amendments with AB 1808 (Carillo, 2026).

Background

The WJT is currently a candidate species under CESA as determined by the commission.

[NOTE: For additional information on this bill, please see the Senate Natural Resources and Water Committee's analysis.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

CDFW estimates General Fund costs of approximately $772,000 in fiscal year (FY) 2027-28 and $747,000 in FY 2028-29 and ongoing for three positions to implement the requirements of this bill.

As discussed in the background, CDFW is in the process of developing regulations to adjust mitigation fees to ensure fees are adequate for the conservation of the western Joshua tree (WJT) species. The department held a public meeting in January 2026 to receive initial feedback on its fees and expects to complete this process in late 2026. CDFW contends that while it is already undertaking a fee adjustment process, this bill adds additional complexity to its work by requiring the department to consider proportionate and tiered fee structures – which may require CDFW to evaluate and define project categories, establish thresholds for project sizes or impacts, and determine how fee tiers would be structured for different types of projects. CDFW would additionally need to modify project application templates and guidance documents and update tracking metrics.

CDFW anticipates receiving a high volume of applications for a broad range of projects requesting a tiered fee structure if such a structure were to go into effect. The department contends that processing these requests on a case-by-case basis would increase the complexity of and time required for permit review, particularly for larger or more complex infrastructure projects. CDFW asserts that the anticipated level of coordination, technical evaluation, and negotiation required to implement this bill would result in increased staff time per project application as well as additional resources to support consistent implementation across regions.

ARGUMENTS IN SUPPORT: According to the author, "The Western Joshua tree is a native plant species found throughout California's high desert and is protected by the WJTCA, which prohibits the taking of the species unless authorized by CDFW. While these protections serve an important conservation purpose, public agencies responsible for operating, maintaining, or constructing systems that provide life-sustaining services – such as electricity, gas, water, sewer, or telecoms – face unique challenges in complying with the existing permitting and fee structure."

SUBJECT: Heavy-Duty Vehicle Inspection and Maintenance Program: testing

SOURCE: Author

DIGEST: This bill limits the frequency of Clean Truck Check testing for all non-gasoline heavy-duty on-road motor vehicles that are considered low use, as

defined, and requires the California Air Resources Board (CARB) to adopt rules and regulations implementing the change.

Assembly Amendments clarify the low-use classification.

ANALYSIS:

Existing law:

1) Establishes the California Air Resources Board (CARB) as the air pollution control agency in California and requires CARB, among other things, to control emissions from a wide array of mobile sources and coordinate, encourage, and review the efforts of all levels of government as they affect air quality. (Health and Safety Code (HSC) §39500 et seq.)

2) Establishes the Motor Vehicle Inspection Program, commonly known as the smog check program, to help the state meet federal air quality standards, for vehicles under 14,000 pounds. (HSC §44000 et seq.)

3) Establishes the Department of Motor Vehicles (DMV) to, among other things, register vehicles for operation in the state. (Vehicle Code §1500 et seq.)

4) Establishes, pursuant to SB 210 (Leyva, Chapter 298, Statutes of 2019) the Heavy-Duty Inspection and Maintenance Program for non-gasoline, heavy-duty trucks (also known as "Clean Truck Check"). (HSC § 44150 et seq.)

This bill directs CARB to update Clean Truck Check such that no low use vehicles (defined as being driven fewer than 1,000 miles per year) will be required to be smog tested more often than annually.

Background

Heavy-duty vehicle emissions. Poor air quality contributes to a wide range of negative health impacts, including childhood asthma attacks, impaired lung function and development, lung cancer, heart attacks and strokes, and premature deaths. Many Californians, especially those in lower-income communities and communities of color, often face disproportionate impacts due to multiple, local sources of pollution.[1]

Heavy-duty vehicles are major contributors to statewide mobile air pollution even

[1] American Lung Association, State of the Air 2025.

though this sector makes up only a small portion (roughly 3%) of California's total on-road vehicle fleet. In 2020, heavy-duty vehicles emitted approximately 52% of the statewide on-road mobile source oxides of nitrogen (NOx) emissions and about 54% of the statewide on-road mobile source particulate matter (PM) 2.5 emissions.[2]

Heavy-duty vehicles' PM and NOx emissions damage human health and the environment. In 1998, CARB listed diesel PM as a toxic air contaminant (TAC) due to its contribution to increased mortality, cancer risk, and serious illness (CARB, 2021b). NOx is a precursor of ozone formation and several other air toxics including PM. Exposure to PM or ozone can lead to serious adverse health effects such as asthma, cardiopulmonary and respiratory diseases, and premature deaths.

Many densely populated areas in California, such as the South Coast and San Joaquin Valley air basins, still are not in attainment with the federal ozone and PM 2.5 standards (US Environmental Protection Agency, 2021). About 70% of Californians live in areas that exceed the federal ozone and PM 2.5 standards (CARB, 2020d). As heavy-duty freight movement continues to increase in California, it is particularly important to address the heavy-duty vehicles which substantially contribute to these pollution levels. To achieve federal air quality standards and improve public health in these regions as well as across the State, it is critical to substantially further reduce NOx and PM emissions from on-road heavy-duty vehicles.

Emissions controls and diagnosis. The purpose of smog check programs (be they for light- or heavy-duty vehicles) is to ensure that emissions controls on the vehicles' exhaust system is working as intended. This is primarily a function of the catalytic converter. Catalytic converters reduce vehicle exhaust emission levels by chemically converting engine-out emissions before the exhaust gas leaves the tailpipe. A converter contains a substrate that directs exhaust gases through narrow channels coated with precious metals that initiate the conversion of pollutants into primarily carbon dioxide and water vapor. Since their introduction in the mid-1970's, catalytic converters continue to be the single most important technology for the control of emissions from gasoline powered motor vehicles. Current catalytic converter designs are more than 95% efficient in removing the hydrocarbons (HC), carbon monoxide (CO), and oxides of nitrogen (NOx) from engine exhaust before they reach the atmosphere.

[2] CARB. Public Hearing to Consider the Proposed Heavy-Duty Inspection and Maintenance Regulation Staff Report: Initial Statement of Reasons. 10/8/2021
https://ww2.arb.ca.gov/sites/default/files/barcu/regact/2021/hdim2021/isor.pdf

Although catalytic converters can be incredibly effective at removing air pollutants before they leave the vehicle's exhaust system, they are complex devices that have multiple potential points of failure. Most modern vehicles include On-Board Diagnostic (OBD) systems, which are computer systems embedded in vehicles that allow rapid diagnosis of common problems in vehicles. Failures of emission control devices can often be detected through the OBD system and generally cause the vehicle's malfunction indicator lamp (or "check engine light") to illuminate. As part of the regulatory process to implement Clean Truck Check, CARB conducted field testing of heavy-duty vehicles.[3] They found that 11-17% of tested vehicles had their check engine light on, and stated that, "Data from heavy-duty and light-duty studies also demonstrate that often, if a malfunction does not significantly impact drivability, many vehicle owners will wait until mandated by a regulation to fix the issue."[4]

Clean Truck Check, California's heavy-duty vehicle inspection and maintenance program. Established pursuant to SB 210 (Leyva, Chapter 298, Statutes of 2019), Clean Truck Check is a regulation to test heavy-duty vehicles' emissions control systems for proper operation. Clean Truck Check applies to nearly all diesel and alternative fuel heavy-duty vehicles with a gross vehicle weight rating (GVWR) over 14,000 pounds that operate on California public roads and highways even if they are not registered in California. This includes public vehicles (federal, state, and local government); motorcoaches; transit, shuttle and school buses; hybrid vehicles; commercial vehicles; personal vehicles; California registered motorhomes; single vehicle fleets; and vehicles registered outside of California (not including motorhomes).

Clean Truck Check began its phase-in starting January 2023 and is currently being fully implemented. The program combines periodic (ranging from annually to quarterly depending on vehicle class and use) vehicle testing requirements with other emissions monitoring techniques and expanded enforcement strategies to identify vehicles in need of emissions related repairs and ensure any needed repairs are performed. According to CARB, the program provides significant reductions in smog-forming and carcinogenic toxic air pollution necessary to achieve federal air quality mandates and healthy air in California's communities. Zero-emission trucks are exempt from the Clean Truck Check program.

Comments

Purpose of Bill. According to the author, "California's air quality and climate goals are critical to public health, particularly in communities disproportionately impacted by freight movement and diesel emissions. The Heavy Duty Vehicle Inspection and Maintenance Program plays an important role in reducing nitrogen oxides and particulate matter from the trucking sector. SB 1064 does not weaken California's emissions standards or Clean Air Act authority. Instead, it refines the inspection frequency framework to ensure long term compliance, legal durability, and economic sustainability. By transitioning to a biennial testing structure while preserving emissions requirements, SB 1064 supports continued progress toward cleaner air while ensuring that compliance mechanisms remain workable and enforceable statewide and are not onerously burdensome for the businesses that make California so exceptional."

Big regs for big rigs. This bill would align heavy-duty emissions check requirements with the light-duty smog check requirements Californian drivers are already familiar with. However, the consequences to air quality of malfunctioning emissions control systems on commercial heavy-duty trucks is significantly higher than for personal use of light-duty vehicles.

Trucks make up only 6% of the state's vehicle population, but they represent almost a quarter of the state's transportation GHG emissions and nearly half the NOx emissions. Considering heavy-duty vehicles can operate upwards of 100,000 miles per year, it is critical to test these vehicles frequently to ensure they are operating properly. Even with a testing frequency of 4 times per year, these long-haul heavy-duty vehicles could be operating over 25,000 miles within this three-month period between tests, which is significantly more than many light duty passenger cars travel within a whole year.

In the three years since Clean Truck Check implementation began, inspections of heavy-duty vehicle emissions systems has become commonplace. According to CARB's Clean Truck Check website, there are currently 2,550 credentialed testers in California today.[5]

Don't make me turn this thing around. California's transportation sector is its greatest source of harmful air pollutants which are required to be reduced under the Federal Clean Air Act. The majority of Californians are exposed to unhealthy air

[5] Credentialed Tester List. CARB. Accessed 3/1/2026 at **https://cleantruckcheck.arb.ca.gov/Public/PublicTester/TesterList**

today, and without significant reductions in air pollution, they will continue to. These efforts have been stymied recently as California has lost a number of regulatory tools necessary for regulation and enforcement.

Clean Truck Check does not create or strengthen any requirements on vehicle emission standards, it only helps ensure that existing requirements are being complied with. At a time where we are losing so many tools to clean up California's air, it may go against the state's interests to substantially relax inspections of heavy-duty vehicles' emissions.

Nevertheless, given the tremendous breadth of duty cycles, geographies, and vehicles California's heavy-duty vehicle fleet represents, a one-size-fits-all regulatory approach may create unintended consequences. CARB has already considered less-frequent smog testing while developing the Clean Truck Check regulations and opted not to relax requirements, due to the outsized impact on criteria air pollutant releases that may result from unchecked vehicles driving many tens of thousands of miles per year. While this trade-off may be particularly reasonable for vehicles driving so many miles, there may be instances where low-use vehicles are spending a disproportionate amount of their on-road miles getting to and from smog testing stations. This reality has been reflected in other heavy-duty regulations, such as the In-Use Off-Road Diesel-Fueled Fleets Regulation and the Truck and Bus Regulation, in which low-use vehicles receive certain exemptions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

"Ongoing costs of an unknown, but potentially significant, amount to ARB (Truck Emissions Check (TEC) Fund) for compliance and enforcement, amending and updating the heavy-duty inspection and maintenance regulation, conducting additional outreach and education, and identifying solutions to offset excess emissions.

"The annual compliance fee assessed on vehicle owners subject to Clean Truck Check (used to fund ARB's cost of implementing the program) for 2026 is $32.13. ARB collected approximately $25 million in fee revenue last year. The fiscal year (FY) 2024-25 budget provided ARB with $1.8 million in ongoing funding (TEC Fund) for 10 permanent positions (originally supported with one-time funding in the 2022 Budget Act) to continue implementing and enforcing the Clean Truck Check program.

"Potential ongoing costs of an unknown amount (TEC Fund) to the Department of Motor Vehicles (DMV) to implement this bill. Under Clean Truck Check, DMV must verify compliance with emission requirements prior to initial registration, renewal, or transfer of ownership; collect a fee for the issuance of a temporary operating permit, as appropriate; and coordinate with ARB on system changes and program considerations. The FY 2025-26 budget provided DMV with $4.9 million in FY 2025-26 and $3.5 million in FY 2026-27 and ongoing for about 19 positions to support post-implementation information technology enhancements and ongoing workload activities associated with the Clean Truck Check program.

It is not clear to the committee whether ARB or DMV could absorb a portion of the costs to implement this bill within their existing resources."

SUBJECT: Pupil instruction: math screenings

SOURCE: EdVoice

DIGEST: This bill 1) requires the State Board of Education (SBE) to approve criteria for diagnostic assessments, considering specified factors, by July 31, 2027; 2) requires the California Department of Education (CDE) to post on its website an approved list of assessments that meet the SBE-developed criteria, from which local educational agencies (LEAs) must then select, by January 31, 2028; 3) requires LEAs to adopt one or more diagnostic assessments from the CDE published list by June 30, 2028; and 4) requires LEAs to annually assess, beginning in the 2028-29 school year, the mathematical knowledge and learning needs of kindergarten, 1st, and 2nd grade students using a diagnostic assessment

Assembly Amendments 1) replace all references to screenings and screening instruments with diagnostic assessments; 2) strike the requirement for the SBE to appoint an independent panel of experts to approve a list of mathematic diagnostic assessments and instead require the SBE to approve and post on its website, criteria and guidance for selecting specified mathematic diagnostic assessments; 3) require the CDE, on or before January 31, 2028, to publish a list of approved diagnostic assessments, and post additional guidance to assist LEAs in selecting diagnostic assessments from the approved list; 4) clarify provisions related to an LEAs use of diagnostic assessments that are not among the CDE's approved list; 5) remove requirements related to the time of year pupils must be assessed; 6) encourage LEAs to leverage existing state investments to support pupils identified through the diagnostic assessment; 7) require the SBE to develop requirements and procedures for LEAs to notify the CDE and parents and guardians of assessment use and results, as well as determine the information the CDE shall make available to the public; and 8) require the CDE to curate and maintain on its website, guidance and resources on evidence based support, as specified.

ANALYSIS:

Existing law:

1) Requires the Instructional Quality Commission (IQC), during the next revision of the mathematics curriculum framework, on or after January 1, 2025, to consider including that pupils in grade 8 be offered the opportunity to take Algebra I or Mathematics I course that is aligned to the content standards adopted by the SBE. (Education Code (EC) § 33547.5)

2) Requires the SBE, on or before January 31, 2024, to appoint an independent panel of experts for the purpose of creating an approved list of screening instruments for pupils in kindergarten and grades 1 and 2 to assess pupils for risk of reading difficulties, as specified. (EC § 53008)

3) Requires the above panel of experts to vote to approve a list of screening instruments that includes screening instruments that are developed both for English-speaking pupils and for non-English speaking pupils, in languages reflecting the primary languages of pupils in the state, to the extent assessments in those languages are available. (EC § 53008)

4) Requires the governing board or body of an LEA serving pupils in kindergarten and grades 1 and 2 to adopt one or more screening instruments from the list

approved by the panel of experts above to assess pupils for risk of reading difficulties, as specified. (EC § 53008)

5) Requires LEAs serving pupils in kindergarten, or grades 1 or 2, beginning no later than the 2025-26 school year, and annually thereafter, to assess each pupil in kindergarten and grades 1 and 2 for risk of reading difficulties using the screening instrument or instruments adopted by the governing board or body of the LEA, unless the pupil's parent or guardian opts out of the screening in writing. (EC § 53008)

6) States that results from a screening instrument shall be used as part of a broader process that further evaluates pupil needs and progress, identifies supports for classroom instruction, enables targeted individual intervention as needed, and allows for further diagnosis if concerns do not resolve. (EC § 53008)

7) Requires an LEA to provide a student who has been screened and identified as being at risk of having reading difficulties with supports and services, appropriate to the specific challenges identified by the screening instrument and other pertinent information about the pupil. (EC § 53008)

8) Defines "reading difficulties" to mean a barrier that impacts a pupil's ability to learn to read or improve reading abilities, including dyslexia. (EC § 53008)

This bill:

1) Requires the SBE, by July 31, 2027, to approve criteria and guidance for diagnostic assessments that LEAs can use to assess students in kindergarten, 1st, and 2nd grades for math knowledge.

2) Authorizes the SBE to approve grade-specific criteria for diagnostic assessments. Requires the SBE to consider multiple factors when developing assessment criteria, including the extent to which an assessment addresses the following factors:

   a) Measurement of grade-level foundational math skills, as outlined in the Mathematics Framework for California Public Schools: Kindergarten Through Grade Twelve (2023).

   b) Evidence that the tool is validated using a contemporary multicultural and multilingual sample of students, with outcome data for English learners and non-English learners;

c) Integration of relevant student demographic information, such as home language and access to prekindergarten education, to more fully understand a student's performance;

d) Guidance and resources for educators on how to administer, interpret, and respond to diagnostic assessments, as specified.

3) Requires the math diagnostic assessments to be evidence-based; to be culturally, linguistically, and developmentally appropriate; to assess a student's mathematics knowledge and learning needs; and to identify students in need of additional support.

4) Requires the CDE to post on its website the SBE criteria and guidance by July 31, 2027.

5) Requires the CDE, by January 31, 2028, to post on its website the following:

a) A list of approved diagnostic assessments that comply with the SBE criteria and guidance. Requires the list to include assessments for both English learners and non-English learners, in the primary languages of students in the state, to the extent possible. Authorizes the CDE to update the list of approved assessments periodically, as appropriate.

b) Guidance to assist LEAs in selecting diagnostic assessments from the CDE list, including but not limited to how LEAs may weigh the following factors:

i) The time it takes to complete the assessment;

ii) The time it takes for assessment results to become available to educators;

iii) The availability of digital and nondigital assessments, and for digital assessments, the data privacy protections in place; and

iv) The ability of the assessment to accommodate pupils with exceptional needs.

6) Requires LEAs serving students in grades kindergarten, 1st, and 2nd to adopt, on or before June 30, 2028, one or more diagnostic assessments from the CDE list. Requires LEAs to include assessments in the primary languages of students in the LEA, to the extent possible.

7) Authorizes LEAs to use an assessment not on the CDE list if its governing board or body self-certifies that the assessment meets all of the SBE criteria. Requires self-certification to include findings that the assessment has been

validated to assess students' math knowledge in the relevant grades and meets the SBE-developed criteria. Requires self-certification to be reported to the CDE by July 15, 2029, in a form and manner determined by the CDE.

8) Requires, beginning with the 2028-29 school year, LEAs to annually assess kindergarten, 1st, and 2nd grade students with an approved math diagnostic assessment.

9) Prohibits math assessments from being considered an evaluation or diagnostic tool pursuant to the federal Individuals with Disabilities Education Act (IDEA) or Section 504 of the federal Rehabilitation Act of 1973, and from being used to delay the IDEA child find process. Authorizes an LEA to use assessment results to recommend students for further assessment to establish special education eligibility and related services pursuant to IDEA or 504 plans.

10) Specifies procedures for students who do not have sufficient English proficiency to be assessed.

11) Authorizes an LEA to not screen a student if the LEA receives written consent of the parent or guardian, and the student has a current identification or diagnosis of dyscalculia or other disability, or is eligible or currently being assessed for special education and related services pursuant to IDEA or a 504 plan.

12) Requires an LEA to provide parents or guardians with information about the assessment. Requires assessment results be made available to parents and guardians in a timely manner, including specified information.

13) Requires assessment results be used to assess students' math knowledge and identify students who need additional support, not as a diagnosis of a disability. Requires results to be used as part of a broader process that accomplishes the following;

    a) Further evaluates student needs and progress;

    b) Identifies supports for classroom instruction;

    c) Enables targeted individual intervention as needed; and

    d) Allows for further diagnosis if concerns do not resolve.

14) Requires LEAs to provide supports and services to students whose assessment results indicate they may benefit from additional instructional support or

intervention, which may include but may not be limited to specified interventions.

15) Encourages LEAs to leverage existing state investments, including Multi-Tiered Systems of Support, mathematics coaching, professional learning opportunities, the Expanded Learning Opportunities Program, and other resources to support students identified through assessments.

16) Prohibits assessment results from being used for any high-stakes purpose, including but not limited to teacher or staff evaluation, accountability, student grade promotion or retention, identification for gifted or talented education, or identification as an individual with exceptional needs.

17) Encourages LEAs to use local assessments, statewide assessment data, and formative assessment tools, and other measures of student progress to monitor student math achievement and provide appropriate support through elementary, middle, and high school.

18) Requires the SBE, on or before July 31, 2028, to determine the information and process by which LEAs shall notify the CDE of assessment results, and the information the CDE may make available to the public.

19) Requires the CDE, by April 30, 2028, to curate and maintain on its website guidance and resources on evidence-based support and intervention and Tier 1 instructional strategies aligned with the 2023 Mathematics Framework.

20) Requires the SBE and CDE to solicit stakeholder input when developing the criteria, guidance, and list of diagnostic assessments, and allow for public comment.

21) Defines the following terms:

    a) "Assessment" or "diagnostic assessment" means a tool used to identify pupils' specific knowledge, skills, strengths, and learning gaps to inform instruction and supports, administered by an appropriately trained school employee, including, but not limited to, a certificated teacher of record, and may include a kindergarten readiness assessment.

    b) "Kindergarten" does not include transitional kindergarten, as defined in existing statute.

    c) "Local educational agency" means a school district, county office of education, or charter school.

Comment

Need for the bill. According to the author, "California is in the midst of a math achievement crisis that is limiting students' long-term academic and career opportunities and widening equity gaps across our state. As a legislator, I believe it is our shared responsibility to ensure that future generations have the foundation they need to succeed and to contribute meaningfully to sustaining California's leadership in innovation and growth. Math learning is cumulative, and when students fall behind in the early grades it becomes much harder to catch up—too often turning small gaps into lifelong barriers, with the greatest impacts on low-income students and students of color.

"SB 1067 takes a proactive, prevention-focused approach by ensuring young students are screened for early math challenges and receive timely, evidence-based support when it is most effective. At its core, this bill is about making sure every child builds a strong foundation in math, opening the door to lasting academic achievement, meaningful career pathways, and lifelong success in California's innovation economy."

The 2023 Mathematics Framework for California Public Schools: Kindergarten Through Grade Twelve (Framework). In 2023, the SBE adopted a new Framework after an extensive revision process. The Framework is important guidance designed to help educators align classroom teaching with California's rigorous math learning standards. The purpose of the revised Framework is to support excellence in math teaching and learning through curriculum and instructional approaches grounded in research and reflective of best practices across the globe. The revised Framework provides guidance for mathematics learning for all students at all levels of math, including calculus, and ensures students have a wide variety of options, including pursuing science, technology, engineering, and math (STEM) in college or seeking other careers that benefit from quantitative knowledge and reasoning. Notable highlights of the new Framework include the following:

- Guidance to help educators structure the teaching of state math standards around "Big Ideas" that integrate math concepts across grade levels and through developmental progressions and encourage students to connect with their learning through "real-world" examples and problem solving.

- Guidance to help educators make mathematics instruction culturally relevant and empowering, thus allowing students to see themselves in the curriculum and in math-related careers.

- Guidance to help educators incorporate data science into math instruction throughout grade levels and encourage students to become proficient at understanding and using data, with the goal of helping students identify misleading data and use data to make informed decisions.

- Guidance on strategies that support learning recovery for students, such as providing additional support and expanded learning time; providing personalized learning; and including one-on-one or small group tutoring.

In 2025, the IQC completed the process of adopting Framework-aligned instructional materials for three types of programs: basic grade-level for kindergarten through grade 8, Algebra I, and Integrated Mathematics I.

This bill develops a timeline and infrastructure to support schools in their efforts to provide targeted early math supports to students:

a) By July 31, 2027, requires the SBE to approve, and the CDE to publish, Framework informed criteria and guidance for selecting evidence-based, culturally, linguistically, and developmentally appropriate diagnostic assessments for pupils in kindergarten and grades 1 and 2;

b) By January 31, 2028, requires the CDE to publish an approved list of diagnostic assessments to assess pupils' mathematics knowledge and learning needs and identify pupils in need of additional support;

c) By June 30, 2028, requires the governing board or body of an LEA to adopt one or more diagnostic assessments from the approved list, or adopt a self-certified equivalent that meets specified criteria;

d) Beginning no later than the 2028-29 school year, requires LEAs serving students in kindergarten or grades 1 or 2 to assess the mathematics knowledge of each pupil in those grade levels using a locally adopted diagnostic assessment.

e) By April 30, 2028, requires the CDE to curate and maintain online guidance and resources on evidence-based support and intervention and Tier 1 instructional strategies aligned with the Mathematics Framework for California Public Schools: Kindergarten Through Grade Twelve.

Ultimately, if the results of the diagnostic assessment indicate that a student may benefit from additional instructional support or intervention, the LEA must then provide the student with supports and services that address the specific challenges

identified by the diagnostic assessment and other pertinent information about the student.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- One-time Proposition 98 General Fund costs of an unknown but likely significant amount, possibly in the hundreds of thousands to millions of dollars statewide, for LEAs to adopt an approved diagnostic assessment and update associated notifications and guidance to parents. Ongoing Proposition 98 General Fund costs potentially in the millions to tens of millions of dollars annually, to administer the assessments and provide appropriate supports to students. To the extent an LEA already administers a compliant math assessment in the early grades and dedicates resources towards targeted interventions then costs would be lower.

- The Budget Act of 2026 includes $4.4 billion in one-time Proposition 98 General Fund discretionary resources to LEAs via the Student Support and Professional Development Block Grant that could be used to support implementation of this bill by LEAs.

- One-time costs of approximately $1 million for CDE to determine, adopt, and post approved diagnostic assessments based on SBE-adopted criteria.

SUBJECT: Motor vehicle pollution control devices: aftermarket parts: approval process

SOURCE: Specialty Equipment Market Association

DIGEST: Creates a process for the California Air Resources Board (CARB) to grant conditional approval for a manufacturer to sell an add-on or modified part for on-road vehicles or engines before CARB grants them an executive order to sell the part.

Assembly Amendments recast the bill to define terms, allow for conditional approvals, and specify how CARB may respond to petitions for executive orders.

ANALYSIS:

Existing federal law:

1) The Federal Clean Air Act (FCAA) and its implementing regulations set National Ambient Air Quality Standards (NAAQS) for six criteria pollutants, designate air basins that do not achieve NAAQS as nonattainment, allow only California to set vehicular emissions standards stricter than the federal government, and allow other states to adopt either the federal or California vehicular emissions standards. (42 U.S.C. §7401 et seq.)

Existing state law:

1) Establishes the California Air Resources Board (CARB) as the air pollution control agency in California and requires the CARB, among other things, to control emissions from a wide array of mobile sources. (Health and Safety Code (HSC) §39500 et seq.)

2) Requires the CARB to promulgate and enforce rules and regulations necessary for the proper execution of its statutory mandates. (HSC §39601 et seq.)

3) Establishes the Air Pollution Control Fund in the State Treasury for CARB to carry out its duties and functions, upon appropriation by the Legislature. (HSC §43015)

4) Establishes the Motor Vehicle Inspection Program, commonly known as the smog check program, to help the state meet federal air quality standards. (HSC §44000 et seq.)

5) Prohibits a person from installing, selling, offering for sale, or advertising any device, apparatus, or mechanism intended for use with, or as a part of, a required motor vehicle pollution control device or system that alters or modifies the original design or performance of the motor vehicle pollution control device or system. (Vehicle Code (VEH) §27156)

6) Allows, to a vehicle, an alteration, modification, or modifying device, apparatus, or mechanism if CARB finds by resolution that it does not (i) reduce the effectiveness of a required motor vehicle pollution control device, and (ii) result in emissions from the modified or altered vehicle that are above levels that comply with existing state or federal standards for that model-year of the vehicle being modified or converted. (VEH §27156)

This bill:

1) Defines "applicant", "complete application", "Emissions test laboratory", "Exemption procedures", and "final determination" for the purposes of the bill.

2) States that an applicant who satisfies the following requirements may request CARB issue a conditional approval to sell an add-on or modified part before issuance of an executive order while the applicant is awaiting final determination for the add-on or modified part:

   a) An applicant may only submit a request if they have received 10 executive orders to the application pursuant to subdivision (e) of section 2222 of Title 13 of the California Code of Regulations and at least one of the executive orders was issued for an add-on or modified part within the same application category set forth in Section III(a) of the exemption procedures as the part that is the subject of the application.

3) States that CARB shall do both of the following:

   a) Determine whether the application is a complete application and the applicant is eligible to apply; and,

   b) Notify the applicant in writing whether the above requirements have been met.

4) States that if CARB determines that the application is complete and the applicant meets all requirements, CARB shall grant a conditional approval, which shall become effective on the date that CARB notifies the applicant that requirements have been met.

5) States that if CARB determines that the application is incomplete and the applicant does not meet all requirements, CARB shall submit a response to the applicant detailing the reasons why the application is incomplete and shall work with the applicant to satisfy the requirements.

6) States that if CARB does not determine whether or not the application requirements have been satisfied within 30 business days of receipt of the request, the application shall be deemed to be conditionally approved. The conditional approval shall become effective on the date that the applicant

notifies CARB in writing of its intent to sell the add-on or modified part.

a) If CARB receives more than 50 applications during any 30-business-day period, CARB may extend the determination period by 15 business days for each increment of 50 applications received during that period. CARB must notify each affected applicant in writing of the extension and the revised deadline within five business days after the threshold specified is reached. An application may be subject to no more than one extension.

7) States that upon the effective date of a conditional approval, the add-on or modified part specified in the application may be sold, offered for sale, advertised, or installed in the state. A conditional approval shall be treated as the equivalent to an executive order.

8) Provides that upon the effective date of conditional approval, the validity of a conditional approval shall not be affected by a request from the state board for additional information, clarification, supplemental documentation, supplemental testing, or other materials necessary for granting an executive order.

9) States that a conditional approval shall expire two years from the effective date of the conditional approval, unless extended by the executive officer, or upon issuance of an executive order, whichever occurs sooner.

10) States that the manufacturer shall maintain detailed records of all parts sold under the conditional approval and provide those records to the state board within 30 days of a request for those records.

a) CARB may suspend or revoke a conditional permit for any of the following reasons:

i) The applicant fails to maintain the detailed records as specified;

ii) CARB determines that the application contained materially inaccurate or misleading information at the time of submission.

11) Provides that an add-on or modified part sold, offered for sale, advertised, or installed under a conditional approval shall not be deemed a violation of Section 27156 of the Vehicle Code solely because a final determination has not been made.

12) States that upon withdrawal, revocation, or expiration of a conditional approval, the executive officer may require the manufacturer to implement a recall, corrective action, stop-sale order, or other remedy for parts sold, offered for sale, advertised, or installed in the state, as the executive officer determines necessary and appropriate.

13) States that the manufacturer shall be responsible for all costs associated with any recall and remedy required pursuant to this subdivision. CARB may require the manufacturer to submit and implement a recall or corrective action plan for parts sold, offered for sale, advertised, or installed in the state.

14) States that a manufacturer that fails to comply with a recall or corrective action plan required pursuant to this subdivision may be subject to civil penalties pursuant to Section 43008.6.

15) Provides that on or before July 1, 2028, the state board shall revise the exemption procedures and any associated forms, guidance documents, or regulations as necessary to implement the requirements of this section.

Background

Executive Orders and Aftermarket Parts. Due to the air pollution caused by vehicles, CARB requires vehicle manufacturers to develop engine and emission equipment systems that reduce the specific pollutants that cause California's severe air quality problem. These emission control systems are also required to be proven durable and reliable.

To ensure that these systems operate as designed, it is prohibited to make modifications to vehicles that increase emissions. If, however, a manufacturer and CARB prove that an aftermarket part or modification does not increase vehicle emissions, it may be installed. The certification process culminates in CARB issuing what is called an Executive Order (EO), which allows the part to be sold, and installed on vehicles, in California.

All aftermarket parts sold in California belong to one of the following four groups:

a) *Replacement Parts*. Replacement parts include things like carburetors, distributers, fuel injection systems, and fuel tanks. Typically these are parts on a vehicle that wear out with use and must be replaced during the lifetime of the vehicle. When a replacement part does not meet the original factory

specifications it requires an Executive Order to be legal for street use.

b) *Legal Add-On or Modified Parts (Executive Order Parts)*. These parts alter a vehicle from its original equipment manufacturer configuration and are typically added on for safety or performance enhancement. Safety devices include antitheft devices; performance enhancers include air intake systems that cool an engine to increase horsepower or superchargers that increase air pressure in the engine allowing it to burn more fuel to increase power.

c) *Competition or Racing Use Only Parts*. These parts may only be sold and installed on vehicles that are exclusively used for competition off public highways and roads. These parts replace or otherwise interfere with the operation of an emission control device, such as a catalytic converter or oxygen sensor.

d) *Catalytic Converters*. Catalytic converters, as their name implies, catalyze (i.e., cause or accelerate) the conversion of toxic gases created during the combustion of fuel into less harmful ones. Catalytic converters can decrease the performance of an engine so some people chose to replace the catalytic converter that comes installed on a car with a more expensive one that reduces performance less.

Comments

1) *Purpose of Bill.* According to the author, "California law prohibits the tampering with, and the sale, installation, or advertising of, emissions-related devices (aftermarket parts) unless the California Air Resources Board (CARB) determines the device complies with the state's emissions standards (VC § 27156). As such, the CARB Executive Order (EO) process is the only legal pathway for many emissions-related aftermarket parts to be legally sold or installed on vehicles in California. Because the small and medium-sized businesses that develop, manufacture, and sell these parts depend on the issuance of a CARB EO, the time it takes CARB to process and issue an EO directly affects these businesses and the consumers that rely on these parts.

   "Despite the creation of additional employment positions, a revised regulatory structure/application process, and the establishment of fees, processing times for EOs have not improved and continue to be a point of uncertainty for manufacturers which can create a sense of competitive disadvantage. Manufacturers depend on timely and predictable EO reviews to lawfully bring emissions-compliant products to market. Yet prolonged and inconsistent review

timelines continue to delay market entry, increase costs, and create uncertainty for businesses operating within the aftermarket sector. When processing times are opaque or can vary significantly, businesses may shift investment away from California or toward unregulated markets, undermining the goal of ensuring products are compliant with state emissions standards.

"In an effort to address this issue, SB 1069 would give CARB 30-days, upon receipt of an application for the issuance of an executive order to exempt an aftermarket part and any associated fees, to determine whether the application is complete. Once an application is deemed to be complete, CARB would then have 60-days to approve or deny it. The measure would further require CARB to approve or deny an amended application within 30 days of the denial of the original application. If CARB does not approve or deny an application within those timelines, it would be required to refund the applicant 50% of any fee collected for the application. The bill would also require the state board to submit a report to the Legislature on review and issuance timelines for executive orders issued to exempt aftermarket parts on or before March 1, 2028, and biennially thereafter until March 1, 2034."

2) *Longstanding problem.* Getting more aftermarket parts approved by CARB has been a long-standing request of the industry, and steps have been taken to attempt to address how long it takes. According to information provided by the author, nearly 10 years ago in 2017, SB 660 (Newman) would have provided a legislative basis for enabling industry to fund additional staff at CARB to better address the workload for EO applications. Ultimately, this legislation was set aside and instead, the Administration and the Legislature secured additional staff through the state budget process to accelerate the issuance of EOs, resulting in six additional staff in the Emissions Certification & Compliance Division at CARB.

   Recognizing that the new CARB positions required financial support, industry again worked with the Legislature, CARB, and stakeholders to provide a mechanism for funding these new positions. Consequently, additional budget action was taken to allow CARB to impose a reasonable fee on EO applications to help offset some of the costs of the staffing needed to improve processing times. In 2021, during the CARB hearing adopting the new fee on EO applications, CARB committed to reviewing the impact of the fee, and to reevaluating the processing times for EOs. However, subsequent budget constraints meant that some of the positions committed to processing EO

applications were removed. In late-2025, CARB began a stakeholder engagement process to attempt to honor these 2021 commitments.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- ARB estimates ongoing annual costs of $1.8 million (Air Pollution Control Fund and Motor Vehicle Account (MVA)) for seven positions and contract funds to make changes to its regulations (specifically the "Procedures for Exemption of Add-On and Modified Part(s) For On-Road Vehicles/Engines" and the "Mobile Source Certification and Compliance Fees" regulations); workload related to reviewing applications and providing written notices; providing guidance and outreach to manufacturers, Bureau of Automotive Repair, smog check stations, and other stakeholders to ensure consistent understanding of the law and prevent disruptions in vehicle registration at the Department of Motor Vehicles (DMV); and enforcement-related tasks, such as audit testing and field investigations. According to DMV, MVA is projected to become insolvent as early as fiscal year (FY) 2028–29.

- By subjecting a manufacturer that fails to comply with a recall or corrective action plan required pursuant to this bill to civil penalties, this bill may result in cost pressures (Trial Court Trust Fund, General Fund) of an unknown amount to the courts to adjudicate additional filings resulting from this bill. Costs will depend on the number of cases filed and the amount of court time needed to resolve each case. It generally costs approximately $1,000 to operate a courtroom for one hour. Although courts are not funded based on workload, increased pressure on the Trial Court Trust Fund may create a demand for increased funding for courts from the General Fund. The state budget provides annual General Fund backfills to the Trial Court Trust Fund to offset revenue reductions, totaling approximately $117.3 million in FY 2025-26.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Noncertificated public school employees: private school employees: egregious misconduct: statewide data system

SOURCE: AFSCME California
California Federation of Teachers
California School Employees Association
SEIU California

DIGEST: This bill 1) makes various changes to state law governing the investigation, reporting, and disclosure of egregious misconduct by noncertificated public school and private school employees; 2) revises the statewide data system and related responsibilities of the Commission on Teacher Credentialing (CTC), local educational agencies (LEAs), and private schools; 3) expands background check and misconduct-screening requirements for contractors providing services to pupils; and 4) makes related changes to mandated reporter training requirements for private schools.

Assembly Amendments: (1) broaden employment history inquiries and disclosures concerning egregious misconduct and require additional evidence preservation and information sharing with prospective employers and the CTC; (2) recast statewide data system requirements, including data fields, reporting and access procedures, confidentiality and privacy protections, and the respective responsibilities of the CTC, LEAs, and private schools; (3) revise investigation procedures and employee protections, including specified timelines and opportunities for employees to respond during investigations; (4) expanding CTC and Committee of Credentials authority relating to reports submitted through the statewide data system; (5) replace legislative intent regarding independent contractors with substantive criminal background check, misconduct disclosure, screening, and contractual requirements applicable to contractors and subcontractors providing specified services to pupils; and (6) require alternative mandated reporter training for private schools to be approved by the private school's governing authority rather than its liability insurance provider.

ANALYSIS:

Existing law:

1) Expresses legislative intent that schools be safe environments free from violence, sexual offenses, and misconduct by school employees, volunteers, and contractors, and requires adoption of policies addressing professional boundaries and safe environments. (Education Code (EC) § 32100)

2) Requires school districts and county offices of education to adopt comprehensive school safety plans that include procedures for child abuse reporting, staff training, and responses to dangerous or unlawful activity. (EC §§ 32280–32282)

3) Requires LEAs and private schools to provide annual training on child abuse reporting and prevention, and requires specified alternative mandated reporter training to meet statutory requirements. (EC § 44691)

4) Prohibits agreements that prevent reporting egregious misconduct or expunge related records, except as specified. (EC § 44939.5)

5) Establishes hiring transparency requirements for noncertificated public school and private school employees, including requirements that applicants disclose prior school employment, hiring entities contact prior school employers regarding specified complaints, investigations, or discipline involving egregious misconduct, and prior employers provide specified information in response to those inquiries. (EC § 44051)

6) Requires the CTC, contingent upon an appropriation, to develop by July 1, 2027, a statewide data system relating to investigations and substantiated reports of egregious misconduct involving noncertificated LEA employees and private school employees. (EC § 44052)

7) Requires LEAs and private schools to submit specified employment and investigation information to the statewide data system, including information regarding the initiation and disposition of investigations and employees who leave employment during an investigation. (EC § 44052)

8) Requires LEAs and private schools to review the statewide data system before hiring an individual for an applicable position to determine whether an investigation resulted in a substantiated report of egregious misconduct. (EC § 44052)

9) Authorizes the CTC's Committee of Credentials to initiate review based on specified records entered into the statewide data system, including substantiated reports and records involving an employee who leaves employment during an investigation. (EC § 44242.5)

10) Requires specified entities contracting with an LEA to ensure that employees who interact with pupils have a valid criminal records summary, subject to specified exceptions and procedures. (EC § 45125.1)

This bill:

1) Revises employment history inquiries and disclosures regarding egregious misconduct by:

   a) Requiring inquiries and disclosures to encompass any credible complaints of, substantiated investigations into, or discipline for egregious misconduct, rather than limiting the information to matters used to support a substantiated investigation;

b) Requiring prior school employers to provide relevant evidence in addition to specified information;

c) Requiring responses to include reports of egregious misconduct submitted to the statewide data system and specified related employment history submitted to the CTC;

d) Requiring LEAs and private schools to provide relevant evidence or information to the CTC upon inquiry; and

e) Requiring preservation of evidence and information relating to substantiated reports of egregious misconduct.

2) Establishes an additional basis for dismissal related to undisclosed prior misconduct by providing that a school employee may be subject to dismissal when specified egregious misconduct involving previous school employment was reported to the statewide data system and either the previous employer failed to disclose the information or the employee failed to disclose the previous education employer, as specified.

3) Revises and recasts the statewide data system, including by:

a) Specifying that the system is for investigations of egregious misconduct;

b) Revising required data fields and the information LEAs and private schools submit and update;

c) Specifying the respective responsibilities of the CTC, LEAs, private schools, and merit system school districts;

d) Requiring the CTC to develop a secure interface through which authorized entities may access the system;

e) Requiring LEAs and private schools to request access to the system by May 1, 2027, and provide a designated email address for system notifications; and

f) Requiring preservation of information and evidence associated with substantiated reports entered into the system.

4) Establishes privacy, confidentiality, and access requirements for the statewide data system by limiting access to specified CTC employees and LEA and private school employees responsible for employment, employee investigations, or hiring decisions; requiring users to maintain confidentiality; exempting system data from disclosure under the California Public Records Act; and

exempting specified personal information maintained in the system from specified provisions of the Information Practices Act.

5) Establishes investigation requirements for allegations of egregious misconduct by:

   a) Requiring an LEA or private school, upon receiving a credible complaint or other reason to believe an employee engaged in egregious misconduct, to conduct an investigation;

   b) Establishing specified investigation timelines for LEAs;

   c) Requiring an LEA to provide the employee a reasonable opportunity to provide a statement and evidence to the investigator;

   d) Requiring an LEA, within 10 calendar days after completing an investigation, to provide the employee written notice of the findings;

   e) Requiring LEAs and private schools to complete investigations regardless of whether the employee ends the employment relationship; and

   f) Requiring each private school, by July 1, 2027, to adopt a written employee investigation policy containing specified procedures, timelines, and employee and employer rights and responsibilities.

6) Revises the CTC's authority and responsibilities relating to reports in the statewide data system by:

   a) Authorizing the Committee of Credentials to commence a formal review upon receipt of a substantiated report or specified record involving an employee who changes employment status during an investigation;

   b) Authorizing the CTC to request information and records from LEAs and private schools when investigating substantiated reports submitted to the statewide data system;

   c) Establishing a four-year period for presenting specified substantiated reports that do not involve sexual misconduct with a minor or recurring conduct constituting a pattern of misconduct to the Committee of Credentials for initial review; and

   d) Authorizing the CTC to require private schools to produce specified information, records, reports, and other data for credential misconduct reviews.

7) Expands criminal background check requirements for contractors and subcontractors providing services to pupils by:

   a) Requiring, rather than authorizing, the California Department of Education (CDE) to require specified employees, prospective employees, volunteers, contractors, and subcontractors to undergo state and federal criminal history background checks;

   b) Expanding existing criminal records summary requirements to specified contractors and subcontractors who interact with pupils or provide direct services to pupils;

   c) Narrowing an existing exception by requiring contractor employees and subcontractors relying upon the exception to remain under the immediate supervision and control of a school employee;

   d) Requiring criminal records verification for specified independent study contractors and eliminating the alternative of obtaining parental consent; and

   e) Requiring LEAs and CDE to include contract termination provisions for noncompliance with applicable background check requirements.

8) Establishes additional contract requirements for entities providing specified services to pupils, operative by July 1, 2027, including requirements that:

   a) LEAs, private schools, and CDE ensure applicable contracts contain and enforce specified background check requirements;

   b) Contractors and subcontractors disclose specified credible complaints of, or discipline for, reportable conduct involving employees or subcontractors who will provide services;

   c) LEAs, private schools, and CDE check specified contractor and subcontractor identifying information against the statewide data system or through specified alternative procedures; and

   d) Specified notifications be made when a credible complaint of egregious misconduct is received involving a contractor, subcontractor, or their employees performing services.

9) Revises private school mandated reporter training requirements to require an alternative mandated reporter training module to be approved by the private school's governing authority rather than its liability insurance provider.

10) Defines specified terms and makes related technical, clarifying, and conforming changes.

Comments

1) *Need for this bill.* According to the author, "SB 1083 builds on the Safe Learning Environments Act (SB 848), which was enacted into law last year and established a statewide data system to track egregious misconduct by school employees. That law was an important step forward in improving transparency, strengthening accountability, and helping ensure that individuals with serious allegations cannot quietly move between school sites without scrutiny.

   But as implementation has moved forward, additional refinements are needed to ensure the system operates with consistency, fairness, and fully protects students. First, classified employees do not currently have a clearly defined, impartial review process comparable to what is provided to certificated employees. Existing law ensures that teachers receive due process, including a hearing and the ability to appeal to an Administrative Law Judge through the Office of Administrative Hearings. Without equivalent due process protections, investigations against them involving egregious misconduct can result in professional and personal consequences. SB 1083 addresses this by requiring an Administrative Law Judge to determine whether a classified employee should be added to the statewide data system. The bill also requires the statewide system to immediately notify a current employer when an employee leaves a local educational agency or private school before or during an investigation. This notice would inform the employer that a preliminary report has been filed, and an investigation is pending, to ensure that future employers are aware of any unresolved concerns.

   Second, while the existing framework established accountability for permanent employees, gaps remain for independent contractors and non-permanent individuals who interact directly with students. These individuals may have regular, unsupervised access to children, yet are not always subject to the same standards. SB 1083 ensures that appropriate vetting measures apply to them as well. Together, these improvements strengthen the system, promote fairness, and ensure that all individuals working with students are held to consistent standards, because student safety remains our highest priority."

2) *Follow-up to SB 848 and significant Assembly amendments.* Recent legislation from this author established a new statewide framework for identifying, reporting, and preventing egregious misconduct by school employees, particularly those in noncertificated positions. This bill represents a second

phase of that work, focused on refining how the system operates in practice. In particular, the bill addresses key implementation questions related to when and how misconduct information is reported and shared, how local investigations are conducted, and how hiring entities and the CTC use that information. These changes reflect the continuing challenge of designing a system that provides meaningful information to protect pupils while ensuring that information concerning employees is accurate, appropriately handled, and supported by a consistent investigative process.

3) *Completing investigations when an employee leaves.* A central purpose of the statewide data system is to address circumstances in which an employee accused of serious misconduct leaves one school employer before an investigation is completed and subsequently seeks employment elsewhere. Historically, an employee's departure could result in an investigation being discontinued, leaving a future school employer with limited information about the underlying allegations. This bill requires LEAs and private schools to complete investigations of egregious misconduct regardless of whether the employee ends the employment relationship. Requiring investigations to reach a conclusion strengthens the integrity of the statewide system by helping ensure that an employee's departure does not itself prevent potentially significant information from being developed and available to future school employers.

4) *Consistency and fairness in local investigations.* The usefulness of a statewide misconduct system depends in significant part on the quality of the local investigations underlying the information reported to it. This bill establishes additional requirements governing LEA investigations, including timelines, an opportunity for the employee to provide a statement and evidence to the investigator, and written notice of findings. Private schools are required to adopt written investigation policies addressing procedures, timelines, and the respective rights and responsibilities of employers and employees. Establishing clearer expectations for investigations may promote greater consistency and confidence in findings that can have significant consequences for both pupil safety and an employee's future employment.

5) *Employment history checks remain an important layer of protection.* The statewide data system is intended to provide school employers with a more consistent source of information regarding egregious misconduct, but it does not replace the role of employment history checks. This bill expands the information that school employers are required to exchange regarding credible complaints, substantiated investigations, and discipline for egregious misconduct and requires specified supporting evidence to be provided.

Maintaining both mechanisms recognizes that no single database is likely to capture all of the context relevant to a hiring decision and that direct communication between current and former school employers remains an important safeguard against employees moving between schools without appropriate scrutiny.

6) *Extending safeguards to contractors who serve pupils.* Schools increasingly rely on outside entities to provide educational, enrichment, therapeutic, and other services directly to pupils. Yet the distinction between an employee and a contractor may have little practical significance from the perspective of a pupil interacting with the adult providing the service. This bill expands criminal background check requirements for contractors and subcontractors who interact with or provide direct services to pupils and establishes additional requirements for screening specified contractor personnel for prior misconduct. These provisions seek to reduce gaps in pupil protections that can arise when services are delivered through contractual arrangements rather than by school employees.

7) *Implementation capacity at the CTC.* The statewide data system places significant new administrative responsibilities on the CTC, including development and maintenance of the system, management of access and notifications, and integration of reported information with the Commission's existing educator discipline processes. The 2026-27 Budget Act provides $1.4 million General Fund and 10 positions for CTC to implement these responsibilities. The ultimate workload associated with the system will depend on the volume and complexity of information submitted by school employers and the extent to which those reports generate additional work for the Committee of Credentials and CTC staff. Successful implementation will therefore depend not only on the statutory framework, but also on the Commission's ability to develop a secure and functional system and provide sufficient guidance to the thousands of public and private school employers expected to use it.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Committee on Appropriations, this bill would result in the following:

1) Potential ongoing Proposition 98 General Fund costs to LEAs, of an unknown but potentially significant amount, possibly in the hundreds of thousands to millions of dollars annually, cumulatively statewide, to conduct

required egregious misconduct investigations within the timelines and parameters prescribed by the bill.

2) One-time General Fund costs of $1,178,000 and ongoing costs of $1,164,000 on an annual basis for CTC to hire additional analytical and legal staff to handle the anticipated significant increase in potential litigation, records request, public and private inquiries, support to LEAs, and internal staff training necessary to implement the bill.

3) Minor and absorbable costs to the DOJ, and no costs to the CDE.

If the Commission on State Mandates determines the bill's requirements to be a reimbursable state mandate, the state would need to reimburse these costs to LEAs or provide funding through the K-12 Mandate Block Grant.

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Water supply planning: housing developments

SOURCE: East Bay Municipal Water District

DIGEST: Restores a requirement that cities and counties approving certain projects identify a water system that would supply water for that project and complete a water supply assessment (WSA).

Assembly Amendments match the definition of "project" to the definition in existing law and state a WSA is only subject to judicial review when it is being

challenged as part of a city or county's certification of an environmental impact report, or adoption of a negative declaration or mitigated negative declaration, for a housing development project or when it's being challenged as part of a non-housing development project.

ANALYSIS:

Existing law:

1) Requires cities and counties that determine a project is subject to the California Environmental Quality Act (CEQA) to comply with certain water supply planning requirements.

2) Defines, for purposes of water supply planning, a "project" as any proposed:

   a) Residential development of more than 500 dwelling units.

   b) Shopping center or business establishment employing more than 1,000 persons or having more than 500,000 square feet of floor space.

   c) Commercial office building employing more than 1,000 persons or having more than 250,000 square feet of floor space.

   d) Hotel or motel, or both, having more than 500 rooms.

   e) Industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or having more than 650,000 square feet of floor area.

   f) Mixed-use project that includes one or more of the above-described projects.

   g) Project that would demand an amount of water equal to, or greater than, the amount of water required by a 500 dwelling unit project.

   h) Residential, business, commercial, hotel or motel, industrial development or mixed use development that would – where a public water system has fewer than 5,000 service connections – increase the number of service connections by 10% percent or more.

3) Requires the city or county to identify a water system to serve a proposed project and if one isn't identifiable, the city or county must prepare a WSA.

4) Exempts from CEQA – and by extension, from the requirement to prepare a WSA – a number of development projects listed in (2) above.

This bill:

1) Requires a city or county to identify a water system that will serve a project and requires that water system – or the city or county if no water system is identified – to prepare a WSA once:

   a) An applicant submits a preliminary application for a housing development project that meets certain conditions, including that the project not be larger than 20 acres; or

   b) The county or city determines a development project application is completed and does not meet the conditions of (a).

2) Requires the city or county, within 15 days of the application, to request the public water system to determine if the water demand of the project was included in the most recent urban water management plan (UWMP).

3) Develops an expedited timeline of 45 days to complete a WSA for projects that comply with (1)(a) above or are affordable housing projects. Also allows the city or county to seek a writ of mandamus to compel the public water system to submit the WSA if it fails to do so.

4) Determines the WSA is an informational document and not a final agency action subject to judicial review except when:

   a) A challenge is made to a city or county's CEQA documentation for a housing development project that is a WSA project; or

   b) A challenge is made to a city or county's approval or disapproval of a WSA project that is not a housing development project.

5) States it does subject a project to:

   a) Discretionary review by a city or county if the project is required to be permitted ministerially; or

   b) The requirements of the CEQA if the project is exempt from CEQA.

Background\

"Show Me The ... Water." California's efforts to better align development decisions with available water resources stem largely from two statutes enacted in 2001. The laws were adopted in response to concerns that local governments were approving development projects without adequately considering whether sufficient

water supplies existed to support those projects. The two 2001 measures established new requirements to integrate water supply considerations into the land use approval process.

The trigger for a city or county to request a WSA from a water supplier (or do it themselves) is when it determines certain large-scale projects are also subject to CEQA. A WSA requires any existing water supply entitlements, water rights, or relevant water service contracts to be identified for the proposed project, and a description of the amount of water received in prior years by the public water system or the city or county through its water rights or other sources. The WSA must be completed within 90 days of the request by the city or county, though the water system may request a 30-day extension. Once completed, the WSA must be incorporated into project's CEQA analysis.

Feeling The Need For Speed, But Not Water? In an effort to speed up the permitting process, the Legislature has enacted various CEQA exemptions and converted certain projects to only require ministerial approval from a local government over the past several years. Last year, SB 131 (Committee on Budget and Fiscal Review, Chapter 24, Statutes of 2025) and AB 130 (Committee on Budget, Chapter 22, Statutes of 2025) created several new CEQA exemptions. As noted above, a city or county is required to initiate a WSA request once it determines what kind of CEQA documentation is needed for that project. The enactment of SB 131 and AB 130 exempted many projects, such as advanced manufacturing facilities, maintenance facilities for electrically powered high-speed rail, and certain larger housing development projects, from not just CEQA but also from the water planning requirements in law.

Comments

1) *Purpose of the bill:* According to the author, the bill "… restores an important, long-standing safeguard on water availability for large new developments that was inadvertently circumvented through recent legislation. For more than two decades, state law has required [WSAs] for certain large development projects to strengthen the link between land use planning and water supply planning. These assessments ensure that local governments have a clear, forward-looking understanding of whether sufficient water supplies exist to serve new development alongside existing and planned uses over a 20-year horizon.

"In recent years, the Legislature has appropriately focused on removing barriers to housing development, including through CEQA streamlining and exemptions. However, because WSAs are currently triggered by CEQA, these changes have had the unintended effect of removing this key planning tool for projects that

still meet large development thresholds. Without a WSA, cities and counties may lack critical information about water demand and long-term supply reliability.

"At a time when climate change is increasing pressure on California's water systems, [this bill] ensures that this proven planning tool remains in place to support informed decision-making and sustainable growth."

2) *Keep Your CEQA Exemption, But Not Your Water Planning Exemption*. The bill does not reverse the CEQA exemptions granted to certain projects under last year's SB 131 and AB 130. However, it does make it clear that projects benefitting from those CEQA exemptions do have to comply with the water planning laws that applied to them prior to the exemptions being created.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, the bill imposes a state-mandated local program, but these costs are not state-reimbursable.

ASSEMBLY FLOOR: 73-0, 6/29/26 (Consent) - See last page for vote

SUBJECT: Health care decisions: life-sustaining treatment

SOURCE: Coalition for Compassionate Care of California

DIGEST: This bill brings consistency in authorized signatories for requests regarding resuscitative measures, allows electronic signatures on Physician Orders for Life Sustaining Treatment forms (renames to Portable Orders Listing Scope of Treatment [POLST]), recognizes out-of-state requests regarding resuscitative measures to the same extent as a POLST executed in California, requires POLSTs to be dated, and where there are two POLSTs, the dated form to be considered

most recent. Requires requests regarding resuscitative measures to be voluntary. Allows a physician or other health care provider to assume a request regarding resuscitative measures is valid and unrevoked.

Assembly Amendments revise references to interdisciplinary teams under the definition of surrogate. Clarify that a conservator must have health care decisionmaking authority. Clarify nurse practitioners without specified authorization are acting under the supervision of the physician. Delete the requirement that a POLST form be dated and the dated form to be treated as the more updated POLST.

ANALYSIS:

Existing law:

1) Establishes POLST and authorizes a legally recognized health care decisionmaker to execute the POLST order only if the individual lacks capacity, or the individual has designated a decisionmaker, as specified. Establishes the POLST eRegistry Act administered by EMSA. [Probate Code (PROB) § 4780-4786 and Health and Safety Code (HSC) §1860-1863]

2) Defines "POLST" as a form that is a request regarding resuscitative measures that directs a health care provider regarding resuscitative and life-sustaining measures. Requires POLST to be completed by a health care provider based on patient preferences, and signed by a physician, nurse practitioner, or physician assistant acting under the supervision of the physician. [HSC §1861 and PROB §4780]

3) Defines "request regarding resuscitative measures" as a written document signed by an individual with capacity, or a legally recognized health care decisionmaker, and the individual's physician, that directs a health care provider regarding resuscitative measures. This request is not an Advanced Health Care Directive (AHCD). Indicates a request regarding resuscitative measures can be a prehospital "do not resuscitate form" (DNR) or a POLST. [PROB §4780]

4) Authorizes nurse practitioners to perform specified functions if specified requirements are met, such as passing a national nurse practitioner board certification exam, and indicates they type of settings such nurse practitioners can practice, such as health and hospice facilities. Authorizes nurse

practitioners who hold an active certification to practice outside of certain settings based on specified conditions. [BPC §2837.103 and§ 2837.104]

This bill:

1) Allows the following individuals to be signatories on a "request regarding resuscitative measures": a health care agent, conservator with health care decisionmaking authority, or surrogate, nurse practitioner practicing under specified authority, nurse practitioner or physician assistant acting under the supervision of the physician.

2) Replaces the term "legally recognized health care decisionmaker" with "health care agent, conservator, or surrogate," to describe who may execute a POLST.

3) Defines "surrogate" as the term exists in specified existing law and includes a facility's interdisciplinary team in overseeing the care of a resident, as specified.

4) Requires an electronic signature to be sufficient for any signature required for a request regarding resuscitative measures.

5) Requires a request regarding resuscitative measures in any form to be entirely voluntarily and prohibits the provision of care or admission to a facility from being conditioned on completion of or refusal to complete a POLST form or DNR order.

6) Requires a request regarding resuscitative measures or substantially similar instrument executed in another state or jurisdiction in compliance with the laws of that state or jurisdiction or of this state to be valid and enforceable in California to the same extent as a POLST form validly executed in California.

7) Allows in the absence of knowledge to the contrary, a physician or other health care provider to presume a request regarding resuscitative measures, whether executed in another state or jurisdiction or in California, to be valid and unrevoked.

Background

According to EMSA, POLST is approved by EMSA and the Commission on EMS and was developed by the Coalition for Compassionate Care of California (CCCC). POLST is a medical order that gives seriously ill patients more control

over their care by specifying the type of medical treatment a patient wishes to receive at the end of life. The EMSA approved POLST must be signed and dated by a physician, nurse practitioner, or physician assistant acting under the supervision of the physician, and the patient or legally recognized health care decisionmaker, and should be clearly posted or maintained near the patient. It is recommended that POLST be copied on bright pink paper to help ensure that the document stands out and is followed, however any color is valid. The POLST form is available for free on EMSA's website. EMSA states that the prehospital DNR is an official document developed by EMSA, in concert with the California Medical Association (CMA), and EMS providers, for the purposes of instructing EMS personnel regarding a patient's decision to forgo resuscitative measures in the event of cardiopulmonary arrest. Resuscitative measures to be withheld include chest compressions, assisted ventilation, endotracheal intubation, defibrillation, and drugs which stimulate the heart. The form does not affect the provision of life sustaining measures such as artificial nutrition or hydration or the provision of other emergency medical care, including treatment for pain, difficulty breathing, major bleeding, or other medical conditions. The DNR must be signed by the patient or by the patient's legally recognized health care decisionmaker if the patient is unable to make or communicate informed health care decisions. The patient's physician must also sign the form, affirming that the patient/legally recognized health care decisionmaker has given informed consent. The DNR should be clearly posted or maintained near the patient. The DNR form is available to order for a small cost on the CMA's website.

Comments

According to the author of this bill, "People should have control over the end of their lives and the care they receive, even if they are unconscious. This bill updates the name of POLST—from Physician Orders for Life Sustaining Treatment to Portable Orders Listing Scope of Treatment—in recognition that nurse practitioners and physician assistants can sign them. It also creates a presumption that POLST and prehospital DNRs from out-of-state are valid the same way as are out-of-state advance directives. Finally, it allows electronic signatures to help the transition to a statewide electronic POLST registry. By aligning advance care directives, POLSTs, and prehospital DNRs, this bill ensures there are no ambiguities or uncertainties about end-of-life care."

OPPOSITION: (Verified 6/30/26)

California Clinical Nurse Specialist Association

ARGUMENTS IN SUPPORT: This bill's sponsor, CCCC, intends for this bill to correct misunderstandings and misalignments with advance care planning tools such as the AHCD, prehospital DNR, and POLST. According to CCCC, this bill aligns these tools by recognizing the role of nurse practitioners and physician assistants in end-of-life and other crisis decisions making and allowing them to sign prehospital DNR orders as well as POLST. CCCC writes, "This bill renames POLST to better reflect the range of authorized signing providers and its broad purpose in specifying treatments beyond life-sustaining or end-of-life care, more clearly identifies which surrogates and authority apply when signing a POLST on behalf of an incapacitated patient, and, ensures continuity of care across state lines by creating a presumption of validity for POLST or DNR executed out of California." The California Association of Health Facilities writes, "This bill puts patients first by reducing confusion, strengthening continuity of care, and ensuring that person's medical wishes are honored when they matter most." The California Academy of Family Physicians believes this bill ensures patients wishes are honored, facilitates informed decision-making, and enables physicians, patients, and families to collaborate in providing compassionate, patient-centered care at the

end of life. Alzheimer's Los Angeles, Orange County, and San Diego write that a POLST plays an important role in ensuring that people with Alzheimer's and other dementias can get the care that they want and prevent them from getting treatments they do not want.

ARGUMENTS IN OPPOSITION: The California Association of Clinical Nurse Specialists (CACNS) is opposed unless amended and requests an amendment to include Clinical Nurse Specialists, acting within their scope of practice, to be explicitly authorized to sign POLST forms. CACNS writes that Clinical Nurse Specialists bring the same and often greater education and clinical expertise as other advanced practice roles included in this bill.

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Preventive Treatment Health Care Act

SOURCE: Author

DIGEST: This bill adds at least one glucagon-like peptide-1 (GLP-1) antiobesity weight medication approved by the federal U.S. Food and Drug Administration (FDA) to existing authority granted to the California Health and Human Services Agency under the California Affordable Drug Manufacturing Act of 2020 (also

referred to as CalRx), for purposes of entering into partnerships, if needed, to increase competition, lower prices, and address supply shortages.

Assembly Amendments delete provisions that would have required a health benefit plan contract with the California Public Employees' Retirement System to offer coverage for chronic weight disease management or to treat obesity or overweight persons, including nutritional information and at least one GLP-1 weight medication approved by the FDA, with a sunset provision of January 1, 2031. Includes in the definition of GLP-1 antiobesity weight management medication, future weight management medications in this category.

ANALYSIS:

Existing law:

1) Establishes the California Health and Human Services Agency (CHHSA), which consists of the following departments and offices: Aging, Child Support Services, Community Services and Development, Developmental Services, Health Care Access and Information (HCAI), Health Care Services, Managed Health Care (DMHC), Public Health, Rehabilitation, Social Services, State Hospitals, the Center for Data Insights and Innovation, the Emergency Medical Services Authority, the Office of Technology and Solutions Integration, the Office of Law Enforcement Support, the Office of the Surgeon General, the Office of Youth and Community Restoration, and the State Council on Developmental Disabilities. [Government Code (GOV) §12803 and §12806]

2) Requires CHHSA or its departments, under the California Affordable Drug Manufacturing Act of 2020, to enter into partnerships to increase competition, lower prices, and address shortages in the market for generic prescription drugs, to reduce the cost of prescription drugs, as specified, and to increase patient access to affordable drugs. This program is referred to as CalRx. [Health and Safety Code (HSC) §127692(a)]

3) Requires CalRx to enter into partnerships resulting in the production, procurement or distribution of generic drugs, with the intent that these drugs be made widely available to public and private purchasers, providers and suppliers, and pharmacies. Requires the generic drugs to be produced or distributed by a drug company or generic drug manufacturer that is registered with the FDA. Requires CalRx to only enter into partnerships to produce generic drugs at a price that results in savings, targets failures in the market for generic drugs, and

improves patient access to affordable medications. [HSC §127693(a) and §127693(b)]

4) Requires, in identifying generic prescription drugs to be produced, CHHSA to consider reports on prescription drug costs published by DMHC and the Department of Insurance, and pharmacy spending data from Medi-Cal and other entities for which the state pays the cost of generic prescription drugs. Requires the partnerships to include the production of at least one form of insulin, provided that a viable pathway for manufacturing a more affordable form of insulin exists. [HSC §127693(c)(1) and (2)]

5) Authorizes CalRx, subject to appropriation, to enter into partnerships to increase competition, lower prices, and address supply shortages for: over-the-counter naloxone products; generic or brand name drugs to address emerging health concerns, including reproductive health care or gender affirming health care; development, production, procurement, or distribution of vaccines, as specified; and, the manufacture, purchase, or distribution of medical supplies or medication devices. [HSC §127697]

This bill:

1) States intent to increase access to affordable glucagoin-like-peptide-1 (GLP-1) weight management medications in California.

2) Authorizes CHHSA to, subject to an appropriation by the Legislature, enter into partnerships, if needed, to increase competition, lower prices, and address supply shortages for at least one GLP-1 antiobesity medication approved by the FDA.

3) Defines GLP-1 antiobesity medication approved by the FDA includes a GLP-1, GLP-1 receptor agonist, glucose-dependent insulinotropic polypeptide plus GLP-1, GLP-1 receptor dual agonist, or tirzepatide, and future weight management medications in this category.

4) Requires CHHSA to also establish distribution partners, if needed, and make its best effort to negotiate pricing at or lower than the cost to Medi-Cal beneficiaries in 2025.

Comments

According to the author of this bill:

Chronic weight disease is a serious problem in the United States. There are approximately 24.5 million adults between the ages of 18-64 years living in California. According to UCLA's California Health Interview Survey, nearly 61% of California adults fall into the combined overweight/obese category, which is associated with 200 morbid conditions, including 13 types of cancer. Chronic weight management can be related to reduced labor participation and earnings, increased early mortality, absenteeism, disability and healthcare costs exceeding $1 billion and a 2.6% reduction in the California Gross Domestic Product. California Public Employees' Retirement System (CalPERS) health insurance covers more than 1.5 million public employees. As the largest purchaser of public employee health benefits in California, the program provides coverage for over 1,200 public agencies and schools. This bill will require CalPERS to offer GLP-1s as an optional benefit through their health plan to reduce chronic weight management and reduce overall employer costs. Federal Executive Order authorized the Most-Favored-Nation Prescription Drug Pricing. This included offering GLP-1 medications at negotiated rate of $149 - $350 per month. These lower prices will be available through the Trump Rx platform. With CalRx offering affordable cost of $245 per month, 20% of California adults will reduce costs and employees will be more productive creating workforce savings.

Background

The Medicaid Drug Rebate Program provides a rebate to states for a portion of the Medicaid payment for each drug. The rebate is shared with the federal government. In return most manufacturer's drugs are covered under state Medicaid programs. Some drugs or classes of drugs may be excluded from coverage, including drugs for weight loss. As of January 2026, 13 states covered GLP-1s for obesity treatment under Medicaid. Beginning in 2022, California consolidated pharmacy benefits under one system called Medi-Cal Rx, where the state pays for all drug claims on a fee-for-service basis, including for people in Medi-Cal managed care plans. Because of significant growth in the state's pharmacy spending including for GLP-1 Agonists, in October 2025 pursuant to the enacted 2025-26 California state budget, Medi-Cal Rx announced that it will continue to cover GLP-1 medication when used for indications approved by the FDA, such as treating type 2 diabetes, atherosclerotic cardiovascular disease, and chronic kidney disease. Three drugs for weight loss or weight-loss indications would no longer be covered effective January 1, 2026. Coverage would continue for certain FDA-approved indications and for people younger than 21 years of age pursuant to the federal Early and Periodic Screening, Diagnostic, and Treatment benefit. The Budget Act of 2025

included General Fund savings of $85 million, increasing to $680 million annually by 2028-29 from the elimination of Medi-Cal coverage of GLP-1 drugs.

CalRx program currently produces Insulin Glargine at $55 for a five-pack of 3mLpens and leverages the state's purchasing power to buy naloxone at a reduced cost (twin pack of over-the-counter naloxone nasal spray for $19). CalRx also plans to launch a centralized ordering system to supply California schools with albuterol inhalers and single-use disposable spacers at no cost over a three-year period beginning this summer. At an April 9, 2026, Senate Budget Health and Human Services Subcommittee hearing HCAI's director indicated that GLP-1 antiobesity medications are among the drugs CalRx is considering for future inclusion.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, HCAI estimates one-time costs of several million dollars to establish partnerships for development, distribution, or procurement of a GLP-1 and ongoing costs, likely several thousand dollars per year, for two staff positions (General Fund). Eventually, sales of the drug should cover the costs of manufacturing or contracting.

OPPOSITION: (Verified 8/24/26)

1 individual

ARGUMENTS IN SUPPORT: The American Diabetes Association (ADA) writes that GLP-1 and GLP-1RA medications have proven transformative in the management of type 2 diabetes and obesity, improving blood glucose control,

reducing cardiovascular risk, and contributing to meaningful weight reduction, yet access to these medications remains severely limited for many Californians due to inconsistent insurance coverage. The ADA supports efforts that bring evidence-based, life-saving diabetes therapies within reach of all who need them—particularly those in low-income and working-class populations who face the greatest barriers to consistent care. The ADA indicates this bill aligns with their mission to prevent type 2 diabetes and to improve the lives of all people affected by it. California Primary Care Association (CPCA) Advocates write this bill is particularly important for community health centers and their patients. CPCA Advocates indicates the high cost of these drugs has placed them out of reach for many patients who are uninsured or underinsured. They write that this bill will help community health clinics provide more effective, evidence-based care.

ARGUMENTS IN OPPOSITION: An individual writing on behalf of the California Small Business Association writes to express opposition to "costly health care mandates that are threatening the sustainability of employer-sponsored health care coverage" and lists four bills including this bill.

SUBJECT: Community Anti-Displacement and Preservation Program

SOURCE: California Community Land Trust Network
Enterprise Community Partners
Housing California
Public Advocates

DIGEST: This bill creates a new Department of Housing and Community Development (HCD) program, the Community Anti-Displacement and Preservation Program (CAPP), to fund the acquisition and rehabilitation of unrestricted housing units and attach long-term affordability restrictions.

Assembly Amendments make minor, clarifying changes regarding program management and funding.

ANALYSIS:

Existing law

1) Establishes several housing programs that finance housing rehabilitation, including, but not limited to:

   a) Multifamily Housing Program (MHP) – administered by HCD, finances the new construction, rehabilitation, and preservation of permanent and transitional rental housing for lower-income households.

   b) Joe Serna Jr., Farmworker Housing Grant Program – administered by HCD, finances the new construction, rehabilitation, and acquisition of owner-occupied and rental units for agricultural workers, with a priority for lower-income households.

   c) Affordable Housing and Sustainable Communities Strategies (AHSC) – administered by the Strategic Growth Council (SGC) and implemented by HCD, funds land-use, housing, transportation, and land preservation projects to support infill and compact development that reduce greenhouse gas emissions.

This bill:

1) Establishes CAPP for funding the acquisition and rehabilitation of unrestricted housing units and attaching long-term affordability restrictions, while safeguarding against the displacement of current residents.

2) Includes the following definitions:

   a) "Administering entity" means the program manager or a regional housing entity administering funds allocated by the department.

b) "Capitalized operating subsidy reserve" means funds that are set aside before a property is acquired pursuant to this chapter to cover the property's operating expenses over time.

c) "Department" means the Department of Housing and Community Development.

d) "Eligible borrower" means an entity that is at least one of the following:

   i. A nonprofit corporation that has a principal place of business in the state and whose primary mission includes the development or ownership of housing that is affordable to low-income households and that has demonstrated experience in acquiring, rehabilitating, and operating multifamily housing for the benefit of low-income households.

   ii. A community land trust, as defined in clause (ii) of subparagraph (C) of paragraph (11) of subdivision (a) of Section 402.1 of the Revenue and Taxation Code.

   iii. A limited partnership in which the managing general partner is a nonprofit corporation described in subparagraph (A) or a community land trust described in subparagraph (B) and that has a principal place of business in the state.

   iv. A limited liability company in which the managing member is a nonprofit corporation described in subparagraph (A) or a community land trust described in subparagraph (B) and that has a principal place of business in the state.

   v. A limited-equity housing cooperative as defined in Section 817 of the Civil Code.

   vi. A local public entity.

e) "Local public entity" means a public entity in the state, including a city, county, city and county, public housing authority, regional housing finance authority, and successor agency to a former redevelopment agency.

f) "Low-income households" has the same meaning as "lower income households" in Section 50079.5.

g) "Program manager" means a private sector entity or consortium selected by the department to manage the program.

h) "Regional housing entity" means any of the following:

i. The Bay Area Housing Finance Authority, as defined.

ii. The Los Angeles County Affordable Housing Solutions Agency, as defined.

iii. A regional housing finance authority created locally, including, but not limited to, those created under the Regional Housing Finance Act.

i) "Rehabilitation" means rehabilitation work necessary to meet health, safety, and quality of life needs, as determined by standards established by the department.

j) "Tenant protections under state law" means the protections specified in the Civil Code and in the California Fair Employment and Housing Act.

k) "Unrestricted housing" means a housing development, as defined, that is not currently subject to a recorded deed restriction limiting occupancy to households at specified income levels and rents to levels affordable at those income levels. Mixed-use buildings are eligible if the majority of the building square footage is used for residential purposes.

3) Requires HCD to adopt regulations for the operation of the program on or before July 1, 2028. The adoption of those regulations is exempted from the rulemaking provisions of the Administrative Procedure Act.

4) Establishes the Community Anti-Displacement and Preservation Fund in the State Treasury, with all money in the fund to be available, upon appropriation by the Legislature, to HCD; and limits administrative expenses and technical assistance expenditures to 5% of the funds' deposits for each.

5) Provides that the following moneys shall be paid into the fund:

a) Any moneys appropriated and made available by the Legislature.

b) Any moneys that the department receives in repayment of loans made from the fund, including interest therefrom.

c) Any other moneys that may be made available to the department for purposes of this chapter from any other source.

6) Requires HCD to select a program manager that is a non-profit entity or consortium to manage CAPP for a period of five years meeting specified standards, including originating and servicing loans for affordable housing, covering the state geographically, and having the ability to work on housing models including rental housing, affordable homeownership, and community land trusts.

7) Requires the program manager to make loans to eligible borrowers based on underwriting guidelines approved by HCD, and requires rental housing purchased through CAPP to be deed restricted for 55 years, and homeownership units for at least 45 years.

8) Allows HCD to issue grants and loans to local public entities to fund the acquisition and rehabilitation of unrestricted housing units and attach long-term affordability restrictions on the housing units, while safeguarding against the displacement of current residents.

9) Requires all tenant protections under state law, or a more protective local policy, other than rent stabilization, to apply to tenants of projects funded by CAPP.

10) Requires HCD to require in its regulations and regulatory agreement, standards for annual rent increases, with a goal of ensuring affordability for current and future residents.

11) Requires HCD to develop technical assistance and capacity building for the development and ongoing operation of projects funded by CAPP.

Comments

1) *Author's statement.* "As California's affordable housing crisis worsens, unsubsidized affordable housing is disappearing, and fewer low-income families can find stable housing. As rent outpaces demand, housing becomes less accessible and more unaffordable, displacing people from their homes and communities. To address this, SB 1091 will create the Community Anti-

Displacement and Preservation Program (CAPP). The purpose of CAPP is to stabilize low-income families and tenant displacement through the acquisition and rehabilitation of existing rental housing. The conversion of this housing into long-term affordable options will keep families housed and in their communities. Acquisition and preservation of unsubsidized affordable housing is a proven successful local model that prevents displacement and grows the supply of affordable housing. SB 1091 is one important step to avoid displacement, homelessness, and to stabilize families in their communities in homes they can afford."

2) *An affordable housing crisis decades in the making.* Decades of insufficient housing production – particularly that at levels which lower- and middle-income Californians can afford without burden – have created a severe strain on the state's housing supply. Further, exclusionary policies have deepened racial and class disparities in housing access and affordability. As a result, working class Californians bear the brunt of the inaction – 56% of California renting households are rent burdened (an increase of 55% since 1970), and 30% are severely rent burdened (a 65% increase over the same period).[1]

3) *Subsidized affordable housing units.* Since the 1960s, developers have constructed at least 425,000 units of affordable rental housing in California with the assistance of federal, state, and local subsidies that require owners to maintain rents at affordable levels for specified periods of time. Examples include: federal project-based Section 8 Housing Choice Vouchers (HCV), Federal Housing Administration (FHA) mortgages, low-income housing tax credits (LIHTC), state housing programs, and city and county redevelopment funds. The affordability restrictions on assisted units typically last 30 to 55 years, depending on the program. Once affordability obligations expire, owners may preserve the affordability of the units by renewing assistance or by refinancing with new public subsidies. Alternatively, they may convert the development to market rate. Under some federal programs, owners can also terminate affordability restrictions early by prepaying the underlying mortgage or opting out of the rental assistance contract. According to the California Housing Partnership, 6,800 subsidized affordable rental homes may no longer be affordable as soon as next year due to the loss of federal, state and local

[1] Natalia Vega Varela and Nancy L. Cohen. *The Origins of California's Housing Crisis*. Accessible here: **https://thegepi.org/the-origins-of-californias-housing-crisis/**. June 2024.

protections. Nearly 48,000 could lose their affordability within 10 years if nothing is done.[2]

4) *Unsubsidized affordable housing units.* These units are affordable without subsidy due to a variety of factors, including age, location and other market factors; however, as costs rise and housing supply is further constrained, an increasing number of these units will be at risk for increased rents or sale on the private market. When no public subsidy or agreement is attached to these units, they are much more susceptible to market pressures and have much greater flexibility than subsidized units to do as they please, without regard for how it will affect the housing security of the resident(s).

5) *Going, going, gone.* According to the California Housing Partnership, approximately 39,738 unsubsidized affordable homes are currently at very high risk of losing their affordability with an additional 268,693 to 333,819 homes at high or moderate risk in five years. Since mid-2020, an estimated 189,051 formerly unsubsidized affordable homes were no longer affordable to low-income households.[3] This bill seeks to curb these trends by acquiring and rehabilitating unsubsidized affordable housing stock that is at risk of conversion to market rate housing. CAPP could empower public housing agencies to make strategic investments in qualified developers who are skilled at doing the work necessary to meet health, safety, and quality of life needs, as determined by standards established by the department. New affordable housing construction is notoriously expensive, so the cost savings generated by preserving existing housing stock could be passed along to provide even more affordable units.

6) *The role of HCD.* This program would require HCD to designate a non-profit lender or consortium of lenders to oversee the distribution of bond monies to local public entities in charge of selecting eligible borrowers. These local public entities include public housing authorities, regional housing finance authorities, and successors to redevelopment agencies. Eligible borrowers would be responsible for the acquisition and rehabilitation of eligible housing units with technical assistance and capacity building provided by HCD. HCD would also be responsible for ensuring long-term affordability covenants are enforced and eligible tenants are not evicted without just cause.

7) *Third time's the charm.* Similar legislation has been introduced two other times. SB 490 (Caballero, 2021) would have provided technical assistance to

qualified program managers levying CAPP funds, if authorized in the Governor's budget. SB 225 (Caballero, 2023) was near-identical to this bill, except it would have permitted developments with 1-4 units, not just 5 and above, to be eligible for acquisition and rehabilitation.

8) *Double-referral.* This bill was also heard in the Senate Judiciary Committee on April 14, 2026, where it received a vote of 11-0.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Ongoing cost pressures (bond funds, General Fund) likely in the hundreds of millions of dollars to provide grant and loan funding for CAPP.

   SB 417 (Limon), Chapter 16, Statutes of 2026, the Veterans and Affordable Housing Bond Act of 2026, places a $11.25 billion bond on the November 3, 2026, ballot to fund veteran′s home ownership program and affordable housing programs. The bond provides $200 million for a program to be created by the Legislature, such as the program created by this bill, that funds acquisition and rehabilitation of unrestricted housing units and the attachment of long-term affordability restrictions to the units. Funding would be available for CAPP if the pending bond measure is approved by the voters.

   Absent the availability of housing bond revenues, this bill would create significant General Fund cost pressures to fund the CAPP. The Budget Act of 2026 does not provide funding for this program.

2) HCD would likely incur ongoing administrative costs (CAPP Fund, General Fund) in the low millions of dollars annually to establish and implement CAPP, based on past estimates of similar bills. The bill specifies that HCD′s administrative costs may not exceed 5% of the moneys deposited into the CAPP Fund and allows up to 5% more of the fund to be used to provide technical assistance and capacity building. HCD indicates these allowances would likely be sufficient to cover the program′s design and implementation depending on the total amount of funding made available. Any costs exceeding the allowances in the bill would necessarily be covered by the General Fund.

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Prescription drugs

SOURCE: Author

DIGEST: This bill requires a health plan or insurer to cover a lower-cost biosimilar if it covers a brand-name biological product. Authorizes health plans and insurers, upon 60 days' notice to enrollees, insureds, and prescribing providers,

to require enrollees/insureds currently prescribed a biological product to try a biosimilar when available at the same or lower cost-sharing unless the prescribing provider indicates not to substitute. Authorizes a pharmacist to substitute a reference product with a biosimilar when available to the patient at the same or lower cost-sharing unless the prescribing provider indicates not to substitute.

Assembly Amendments require plans and insurers to cover at least one lower-net-cost biosimilar if they cover a reference product, restrict the ability of a plan or insurer to require an enrollee or insured to try an alternative product in which the entity has a direct or indirect financial interest, and expand regulators' ability to implement plan and insurer reporting requirements. Assembly amendments also bolster and broaden plan and insurer notification requirements to include a detailed 60-day notice requirement before any requirement to try a biosimilar or interchangeable biological product, as specified, as well as a notice by January 15, 2027, of possible pharmacy substitutions based on current formularies.

ANALYSIS:

Existing law:

1) Establishes the Department of Managed Health Care (DMHC) to regulate health plans under the Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene Act) and the California Department of Insurance (CDI) to regulate health insurance. [Health & Safety Code (HSC) §1340, et seq. and Insurance Code (INS) §106, et seq.]

2) Prohibits a health plan contract from limiting or excluding coverage for a drug for an enrollee if the drug previously had been approved for coverage by the plan for a medical condition of the enrollee and the plan's prescribing provider continues to prescribe the drug for the medical condition, provided that the drug is appropriately prescribed and is considered safe and effective for treating the enrollee's condition. This does not preclude the prescriber from prescribing another covered drug that is medically appropriate or a generic substitution. This does not apply to off-label use of drugs. This does not prohibit a health plan from charging a subscriber or enrollee a copayment or a deductible for prescription drug benefits or from setting forth, by contract, limitations on maximum coverage of prescription drug benefits. [HSC §1367.22]

3) Establishes the Pharmacy Law which provides for the licensure and regulation of pharmacies, pharmacists, and dangerous drug or device wholesalers, and

establishes the Board of Pharmacy (the Board) to enforce the Pharmacy Law. [Business & Professions Code (BPC) §4000, et seq.]

4) Authorizes a pharmacist filling a prescription for a drug product to select a different form of medication with the same active ingredients of equivalent strength and duration of therapy as the prescribed drug when the change will improve the ability of the patient to comply with the prescribed drug therapy unless the prescriber indicates "Do not substitute." Specifies that the pharmacist assumes the same responsibility for selecting the dispensed drug product as would be incurred in filling a prescription for a drug product using the prescribed form of medication and specifies that there is no liability on the prescriber pursuant to this authority. Requires the patient to be informed that a different form of medication was used and requires the prescription label to include the name of the dispensed drug product. Prohibits substitution between long-acting and short-acting forms of a medication with the same chemical ingredients or between one drug product and two or more drug products with the same chemical ingredients. [BPC §4052.5]

5) Authorizes a pharmacist, when filling a prescription for a drug product prescribed by its trade or brand name, to select another drug product with the same active chemical ingredients of the same strength, quantity, and dosage form, and of the same generic drug name. Outlines the same "Do not substitute" specifications, pharmacist discretion specifications, prescriber liability specifications, patient communication specifications, and prescription label specifications in 4) above. Prohibits a pharmacist from substituting if the drug selected substitution costs the patient the same or more than the prescribed drug, including any professional fee charged by the pharmacist. [BPC §4073]

6) Authorizes a pharmacist filling a prescription for a prescribed biological product to select an alternative biological product if the alternative biological product is interchangeable and if the prescriber does not indicate "Do not substitute" or words of similar meaning. Requires a dispensing pharmacist or their designee to make an entry of the specific biological product provided to the patient within five days of dispensing it, including the name of the biological product and the manufacturer. [BPC §4073.5]

This bill:

1) Requires health care service plan contracts and health insurance plans that provide prescription drug benefits and maintain one or more drug formularies

that include a reference product to include at least one biosimilar or interchangeable biological product licensed for the same reference product on the formulary if the biosimilar has a lower net cost to the plan than the reference product.

2) Authorizes health plans and insurers to require enrollees who are currently on a prescribed name brand drug or reference biological product to try a therapeutically equivalent generic, biosimilar, or interchangeable biological product to the reference product unless the prescriber has not indicated "Do not substitute."

3) Restricts the authority to require patients try an alternative product to those biological products that have a lower net cost to the plan or insurer and have the same or lower cost-sharing for the enrollee/insured, which must be based on the net cost of the drug or biological product, as defined by CDI and DMHC. Prohibits a plan or insurer from requiring the patient to try a biological product in which the pharmacy benefit manager, health care service plan, insurer, or affiliated entity has a direct or indirect financial interest, if biosimilars not affiliated with these entities are also available.

4) Requires plans or insurers to provide at least 60 days' advance notice to the enrollee/insured and prescribing provider of a requirement to try an alternative product. Clarifies that enrollees/insureds may request exceptions via existing step therapy exceptions or nonformulary drug requests, that the prescription may be reissued by the prescribing provider with "do not substitute" to maintain current coverage without additional authorization, and that health plans or insurers are not issuing or altering prescriptions. Requires the notice to a prescribing provider to indicate the prescribers affected plan enrollees. Clarifies that a plan or insurer may fulfill this requirement through a formulary change notice.

5) Requires plans and insurers, by January 15 2027, to notify the plan's or insurer's prescribing providers of any reference biological product and any biosimilar or interchangeable biological product for that reference product that is already included on the plan formulary and notification that a pharmacist may substitute a biosimilar or interchangeable biological product for the prescribed reference product unless the prescriber indicates "Do not substitute." The notification shall identify any of the provider's enrollees or insureds whose prescribed reference biological product may be subject to that substitution.

6) Requires health plans and insurers, on or before October 1, 2027, as part of the data included in annual prescription drug price reporting, to provide DMHC or CDI with the proportion of prescription substitutions resulting from this bill that result in reduced cost-sharing, information about the factors affecting when an enrollee's or insured's cost-sharing is not reduced, the impact of these substitutions on premiums, and any other related information requested by the regulating department.

7) Amends Pharmacy Law to authorize a pharmacist to select an alternative biological product if the alternative product is biosimilar to or interchangeable with a prescribed reference product.

8) Requires the Board of Pharmacy to maintain a link to the Food and Drug Administration (FDA)'s Database of Licensed Biological Products (the "Purple Book") on its website.

Background

According to the author of this bill:

> A majority of Californians report health care costs rising faster than their income, causing many to delay or avoid care. One driver of rising health insurance premiums is prescription drug spending. Biologics are particularly expensive: though only 5% of prescriptions, they account for about half of all drug spending. Expanding the use of lower-cost alternatives, like biosimilars, could help reduce pharmaceutical spending and lower insurance premiums. This bill promotes biosimilar adoption by requiring health plans and insurers to include at least one lower-cost biosimilar on the formulary if they cover a reference product, allowing pharmacists to substitute a biologic with a biosimilar unless otherwise indicated, and allowing health plans to require enrollees to try a generic or biosimilar when available at the same or lower cost unless otherwise indicated. It also requires insurers to report the proportion of substitutions that reduce cost-sharing and the impact on premium growth.

California Health Benefits Review Program (CHBRP) analysis. Coverage impacts and enrollees covered. *Medical effectiveness.* There is very strong evidence of no differences in safety or efficacy between biosimilars and their reference biologic, based on FDA regulatory standards. There is also very strong evidence that there is no difference in safety or side effects when switching between reference biologics

and their biosimilar based on 31 randomized control trials and over 15 years of extensive pharmacovigilance data, derived from continuous monitoring of biosimilars after being made available to the public.

a) *Utilization*. CHBRP estimates that 24,700 Californians would be switched from a brand name reference product to a lower-cost biosimilar, and that the impact of small molecule drug switches would be negligible due to high rates of switching already.
b) *Medi-Cal.* Although Medi-Cal pharmacy benefits are carved out through Medi-CalRx, this bill still impacts nearly 9 million Medi-Cal enrollees through DMHC-regulated Medi-Cal managed care medical benefits. Medi-Cal premiums are expected to decrease by $1.5 million in a 50% market shift scenario ($0.01 per member per month).
c) *Impact on expenditures*. CHBRP performed a sensitivity analysis of three different utilization scenarios: a 10%, 50%, or 90% switch from reference products to biosimilars or interchangeable biological products. All scenarios resulted in premium savings, ranging between $17.5 million (0.01%) for a 10% market shift scenario and $175 million (0.09%) for a 90% market shift scenario. In a 50% market shift scenario, premiums are expected to decrease by $87.7 million, with a $55.5 million reduction in employer or union premiums, a $14.6 million reduction in premiums for enrollees in group insurance, and a $16 million reduction in premiums for enrollees in the individual market. For those whose prescriptions are switched to a biosimilar by a pharmacist or who are required to try a biosimilar by their health plan, average savings are much greater, saving the enrollee between $92 and $310 annually in total cost-sharing, depending on their insurance market.

Biological products and biosimilars. Biological products, like monoclonal antibodies, insulin, vaccines, and allergenic products, are large, complex molecules made from living sources. Biological products are approved by the FDA under a standalone Biologics License Application (BLA) that contains all data necessary to demonstrate the product's safety and effectiveness, including both preclinical studies and clinical trials in humans. The BLA must be approved by the FDA before the product can be legally marketed in the U.S.

The Biologics Price Competition and Innovation Act (BPCIA) of 2009 defined a biosimilar as a biological product with active components that are highly similar to a reference product that demonstrates no clinically meaningful differences in terms of safety, purity, or potency. Like generic drugs, biosimilars are approved through an abbreviated pathway that relies on the FDA's prior approval of a reference biologic. To gain approval as a biosimilar, manufacturers must perform rigorous

comparative analysis of the physicochemical and biological functional characteristics of a biosimilar to the reference product and an assessment of immunogenicity. The proposed biosimilar product must be shown to have the same mechanism of action as the reference product, the same route of administration, dosage form, and strength as the reference product, and may be licensed only for conditions that have been previously licensed for the reference product. The FDA maintains an online database of all reference products and approved biosimilars, called the Purple Book.

Biosimilar cost savings. According to a Department of Health and Human Services (HHS) fact sheet, biologics are a significant driver of prescription drug costs in the U.S., accounting for over half of total U.S. drug spending in 2024 despite comprising just 5% of prescriptions. According to a KFF report, retail prescription drug prices are the fastest growing cost in national healthcare expenditures. DMHC reports that prescription drug costs paid by California health plans have increased by 72%, or $6.2 billion, since 2017. When drug prices increase, these costs get passed on to employers and health plan enrollees via increased premiums. The 2025 California Health Benefits Survey reports that 36% of large California companies (over 200 employees) report that prescription drug prices contributed "a great deal" to higher premiums, including 63% of companies with 5,000 or more workers.

Because biosimilars are approved through an abbreviated pathway that avoids the need for as many costly and lengthy clinical trials as the reference product, biosimilars offer considerable cost savings. Since their introduction to the market, biosimilars have generated savings totaling $56.2 billion for both patients and the healthcare system, according to the Association of Accessible Medicines (AAM). Recognizing the potential for cost savings for payors, the Center for Medicare and Medicaid Services' May 2024 Final Rule for Medicare Part D plans authorized Part D sponsors to substitute, upon 30 days' notice, a biosimilar biological product for its reference product on their formularies.

Interchangeability. Under the BPCIA, an interchangeable biosimilar may be substituted for its reference product without intervention from the prescribing health care provider. Manufacturers must apply for this designation, which historically required costly switching studies. In 2024, the FDA rescinded that requirement after a decade of evidence found no meaningful differences in safety or immunogenicity between patients who switched to biosimilars and those who did not. The FDA now states that biosimilars and interchangeable biosimilars meet the same high standards for biosimilarity, and that the comparative analytical data

supporting biosimilarity can also support interchangeability. The FDA has proposed eliminating the statutory distinction by deeming all approved biosimilars interchangeable, aligning the U.S. more closely with the E.U. The bipartisan Biosimilar Red Tape Elimination Act, which would do the same, has unanimously advanced through policy committees in both chambers of Congress.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- The California Health Benefits Review Program (CHBRP) estimates savings of $1.5 million to the Medi-Cal program (General Fund, federal funds).
- CHBRP estimates costs savings of $4.1 million in reduced premiums for DMHC-regulated health plans offered through the California Public Employees Retirement System (CalPERS). About one-half of CalPERS members are associated with state employment, and a portion of premiums are paid by members, so the state's share of the savings would be around $1.7 million (General Fund). In addition, there would be smaller cost reductions in CDI-regulated insurance policies offered through CalPERS.
- Minor and absorbable costs to the Board of Pharmacy, CDI, and DMHC.
- CHBRP estimates $87.7 million (0.05%) in reduced premiums paid by all payors, including employers, enrollees, and government.

ARGUMENTS IN SUPPORT: The sponsor of the bill, the California Association of Health Plans (CAHP), states that this bill is a step towards addressing prescription drug prices, the fastest-growing driver of health plan premiums in California. CAHP writes that this bill modernizes outdated pharmacy substitution laws and permits health plans to make formulary changes that align with those already occurring in Medicare Part D plans, which can substitute coverage of a brand-name biologic with a biosimilar. Blue Shield of California and America's Physician Groups point out that the Office of Health Care Affordability places all health care industry players on a budget except pharmaceutical manufacturers, and this bill is a small but important step towards making the pharmaceutical industry part of the solution, injecting competition into drug pricing that will bring down costs to the system. CVS Health reports that they've transferred 93% of the

patients they serve to Hyrimoz, a Humira biosimilar, which has saved their members in California $33.2 million and has reduced total gross cost per prescription by almost $6,700 since 2023. CVS plans to continue transitioning patients to osteoporosis biosimilars that offer a 50% cost savings over brand-name alternatives. Sharp HealthCare saved more than $6.4 million last year through biosimilar conversions, which helped reduce overall healthcare costs and allowed Sharp to reinvest in expanded access to services, patient care programs, and critical clinical resources. California Primary Care Association (CPCA) Advocates emphasizes that the bill increases access to lower-cost biologic medication, which is critically important to the communities served by CPCA Advocates' member community health centers and clinics, who often serve as the only source of care for lower-to-middle-class families in many rural communities. Health Access California states that six in ten Californians are skipping or delaying health care due to costs, and one-third of Americans are cutting back on daily spending, even skipping meals, due to health care costs. Ensuring Californians have access to safe alternatives like biosimilars is an important method of reducing consumer costs without risks to quality of care.

Support if amended. The California Society of Health-System Pharmacists also supports the bill if amended to state that the law can't be construed to require a medical provider or pharmacy to stock, procure, dispense, or administer drugs from manufacturers or distributors that are not currently part of the pharmacy's existing contractual agreements.

ARGUMENTS IN OPPOSITION: The California Rheumatology Alliance, Osteopathic Physicians and Surgeons of California, and Lupus and Allied Diseases Association argue that biosimilars may have subtle differences in efficacy that may lead to unintended consequences for patients and insist that patients should not be switched to a different biological product without advance consultation with the prescribing physician unless the product has been deemed interchangeable by the FDA. They further argue that patients on biologics are living with complex medical conditions and have often tried multiple biologics before finding an effective therapy and oppose the ability of health plans to force a patient to try a biosimilar if they are stable on their existing therapy. The Lupus and Allied Diseases Association state that lupus is an unpredictable, individualized, heterogeneous, multi-system disease that requires access to the full array of treatments. Any disruption in continuity of care as a result of payer utilization management policies, formulary or dosage changes, or other cost containment measures has detrimental consequences on patients, possibly exacerbating the disease and augmenting costs. The Osteopathic Physicians and Surgeons of California emphasize that no other state allows substitution of biosimilars not

deemed interchangeable, claiming that this process is working for Californians and that it is not in the best interests of patients to allow a pharmacist to substitute a biosimilar.

Oppose unless amended. Amgen and Biocom oppose the bill unless amended to maintain the current pharmacy substitution law, which allows substitution only with interchangeable biosimilars. Biocom also proposes that the health and safety code changes be amended to preserve California's longstanding continuity-of-care protections by preventing mid-year, non-medical switching of patients who are stable on a prescribed therapy.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Law enforcement

SOURCE: ACLU California Action

DIGEST: This bill removes certain arrest authority and peace officer status for federal law enforcement officers operating in California and prohibits a California law enforcement agency (LEA) from entering into an interagency agreement with a federal law enforcement agency unless the agreement expressly prohibits the California agency from engaging in specified prohibited conduct.

Assembly Amendments create carveouts to the arrest authority limitations for deputized tribal law enforcement officers of the federal Bureau of Indian Affairs and authorized federal employees of the US Fish and Wildlife Service, the Forest Service, the National Park Service, and the Bureau of Land Management; strike references to the National Security Presidential Memorandum No. 7; remove the prohibition against the use of departmental resources or personnel by an LEA to assist in an operation executed by a federal or out of state agency that involves proscribed activities, as specified.

ANALYSIS:

Existing law:

1) Provides that any person who meets all standards imposed by California law on a peace officer is a peace officer and provides that sworn members of several specified law enforcement agencies and agency types are peace officers whose authority extends to any place in this state. (Penal (Pen.) Code, §§ 830, 830.2.)

2) Grants peace officers the authority to arrest a person in obedience to a judicial warrant, or pursuant to their peace officer authority, without a warrant when any of several specified circumstances occur. (Pen. Code, § 836, subd. (a).)

3) Provides that federal criminal investigators and law enforcement officers are not California peace officers, but may exercise the powers of arrest of a peace officer in any of the following circumstances:

    a) Any circumstances in which a California peace officer may arrest without a warrant and in specified circumstances related to involuntary psychiatric holds that involve violations of state or local laws.

    b) When these investigators and law enforcement officers are engaged in the enforcement of federal criminal laws and exercise the arrest powers only incidental to the performance of these duties.

    c) When requested by an LEA to be involved in a joint task force or criminal investigation.

    d) When probable cause exists to believe that a public offense that involves immediate danger to persons or property has just occurred or is being committed. (Pen. Code, § 830.8, subd. (a).)

4) Requires that federal investigators and law enforcement officers, prior to the exercise of these arrest powers, to have been certified by their agency heads as having satisfied specified training requirements. (Ibid.)

5) Provides that duly authorized federal employees who comply with specified training requirements are peace officers when they are engaged in enforcing applicable state or local laws on property owned or possessed by the United States government, or on any street, sidewalk, or property adjacent thereto, and with the written consent of the sheriff or the chief of police, respectively, in whose jurisdiction the property is situated. (Pen. Code, § 830.8, subd. (b).)

6) Specifies that during a state of war emergency or a state of emergency, as defined, federal criminal investigators and law enforcement officers who are assisting California law enforcement officers in carrying out emergency operations are not deemed California peace officers, but may exercise the powers of arrest of a peace officer, as specified. (Pen. Code, § 830.8, subd. (d).)

7) Creates, via the Tom Bane Civil Rights Act, a civil cause of action against anyone, including police, who interferes with constitutional rights by threat, intimidation or coercion. (Civil (Civ.) Code, § 52.1.)

8) Prohibits a peace officer from engaging in racial or identity profiling, as defined, and requires that the course of basic training for peace officers include adequate instruction on racial, identity, and cultural diversity, as specified. (Pen. Code, § 13519.4.)

9) Generally prohibits law enforcement agencies from using kinetic energy projectiles and chemical agents, as defined, for the purposes of crowd control. (Pen. Code, § 13652.)

10) Generally requires law enforcement agencies to obtain the approval of their governing body, as specified, prior to acquiring any military equipment, as defined. (Government (Gov.) Code, §§ 7070 et. seq.)

11) The California Values Act, generally prohibits California law enforcement agencies from using agency moneys or personnel to investigate, interrogate, detain, detect, or arrest persons for immigration enforcement purposes, as specified, from placing officers under the supervision of federal agencies for the purpose of immigration enforcement, and from cooperating in other specified ways with federal immigration authorities. (Gov. Code, § 7284.6, subd. (a).)

12) Provides that notwithstanding the above limitations, and in accordance with local laws and agency policies, California law enforcement agencies are not

prohibited from conducting enforcement or investigative duties associated with a joint law enforcement task force, including the sharing of confidential information with other law enforcement agencies for purposes of task force investigations, so long as the following conditions are met:

a) The primary purpose of the joint law enforcement task force is not immigration enforcement, as defined.

b) The enforcement or investigative duties are primarily related to a violation of state or federal law unrelated to immigration enforcement.

c) Participation in the task force by an LEA does not violate any local law or policy to which it is otherwise subject. (Gov. Code, § 7284.6, subd. (b).)

13) Requires California law enforcement agencies participating in a task force, for which the agency has agreed to dedicate personnel or resources on an ongoing basis, to submit a report annually to the Department of Justice, as specified. (Gov. Code, § 7284.6, subd. (c).)

This bill:

1) Limits the authority of federal law enforcement officers and criminal investigators (federal officers) to exercise the arrest authority of a California peace officer, as follows:

a) Removes the authority of federal officers to exercise the powers of arrest of a peace officer for violations of state or local laws in specified circumstances, including in obedience to a warrant, without a warrant if the officer has probable cause the person committed a public offense in the officer′s presence, a person has committed a felony or the officer has probable cause to believe they have committed a felony, or to take into custody a person with a specified mental health disorder.

b) Removes the authority of federal officers to make arrests when they are engaged in the enforcement of federal criminal laws and exercise arrest powers only incidental to the performance of these duties.

c) Narrows the authority of federal officers to make arrests when probable cause exists to believe that a public offense that involves immediate danger to persons or property has just occurred or is being committed, by permitting such arrests only when there is probable cause that an offense involves an immediate threat of great bodily injury.

d) Clarifies that federal officers exercising arrest authority are subject to existing provisions of law requiring a private person who has made an arrest to take the person before a magistrate or deliver them to a peace officer, and prohibiting civil liability against a peace officer or federal officer acting within the scope of their duties, as specified.

e) Removes the reference to federal officers having the powers of arrest of a peace officer, and specifies that federal officer arrest authority must be consistent with provisions of law prohibiting law enforcement officers from wearing facial coverings and requiring law enforcement officers to visibly display identification, as specified.

f) States that specified provisions of law outlining the arrest authority of federal law enforcement officers do not affect the powers of federal officers when they are engaged in the enforcement of federal criminal laws and exercising their federal arrest powers pursuant to the performance of those duties.

g) Removes the provision of law making duly authorized federal employees peace officers when they are engaged in enforcing applicable state or local laws on property owned or possessed by the United States government, or on any street, sidewalk, or property adjacent thereto, and with the written consent of the sheriff or the chief of police, respectively, in whose jurisdiction the property is situated, and if those employees comply with specified peace officer training requirements.

h) Subjects federal officers assisting California law enforcement officers in carrying out emergency operations, who have state peace officer arrest authority, as specified, to provisions of law prohibiting law enforcement officers from wearing facial coverings and requiring officers to display identification.

i) States that duly authorized federal employees of the U.S. Fish and Wildlife Service, U.S. Forest Service, National Park Service except for national park rangers, or the Bureau of Land Management who comply with specified training requirements and provisions of law prohibiting officers from wearing facial coverings and requiring officers to display identification, are peace officers if they are engaged in enforcing the Fish and Game Code on property owned or possessed by the U.S. government, or on any street, sidewalk, or property adjacent thereto, and with the written consent of the sheriff or the chief of police, as applicable, in whose jurisdiction the property is situated.

j) States that deputized tribal law enforcement officers of the federal Bureau of Indian Affairs are not California peace officers, but may exercise the powers of arrest of a peace officer, subject to provisions of law prohibiting law enforcement officers from wearing facial coverings and requiring officers to display identification, in any of the following circumstances:

   i. In obedience to a warrant, or without a warrant if the officer has probable cause the person committed a public offense in the officer′s presence, the person arrested has committed a felony, or the officer has probable cause to believe they have committed a felony, for violations of state or local law, and to take into custody a person with a mental health disorder based on probable cause, as specified.

   ii. When engaged in the enforcement of federal criminal law and exercising arrest powers only incidental to the performance of those federal duties.

   iii. When providing or attempting to provide law enforcement services in response to a request initiated by peace officers to assist in preserving the peace and protecting Indian reservations or rancherias, and other tribal lands held in trust by the federal government for which peace officers are responsible, pursuant to specified federal law.

k) Requires a deputized tribal law enforcement officer of the federal Bureau of Indian Affairs, prior to the exercise of these arrest powers, to have been certified by their agency head as having satisfactorily completed a specified Commission on Peace Officer Standards and Training (POST) course of training, or the equivalent thereof.

2) Prohibits, except as required by federal or state law, a California LEA from entering into an interagency agreement unless the agreement is in writing and expressly provides that any California LEA party to the agreement shall not engage in the following conduct:

   a) Racial or identity profiling, as defined and prohibited.

   b) Investigation, arrest, use of force, or imposition of civil or criminal liability or other penalties upon a person or entity based solely on constitutionally protected expressive conduct.

   c) Deployment of kinetic energy projectiles and chemical agents against an assembly, protest, or demonstration that does not meet the requirements of existing restrictions on the use of kinetic energy projectiles and chemical agents, including that such projectiles only be deployed by a peace officer

who has completed certain training and that de-escalation techniques or other alternatives were attempted and failed.

d) Use, deployment, or acquisition of military equipment that has not been authorized by a military equipment use policy, as specified (hereafter, prohibited interagency conduct).

3) Prohibits an interagency agreement from exceeding four years in duration and permits the agreement to be renewed upon the creation of a new written instrument.

4) States that an interagency agreement in existence on January 1, 2027, is presumptively valid and may remain in effect until July 1, 2027, and on or before July 1, 2027, the interagency agreement shall be amended to include the restrictions on prohibited interagency conduct.

5) States that an agreement that does not expressly include the limitations on prohibited interagency conduct is contrary to law and public policy, and is void and unenforceable.

6) States that this bill′s restrictions on interagency agreements shall not be construed to render an interagency agreement void and unenforceable based solely on a federal law enforcement officer or out-of-state law enforcement officer engaging in prohibited interagency conduct.

7) Makes any of the following a violation of this bill:

a) The California LEA has engaged in prohibited interagency conduct under the auspices of an interagency agreement.

b) The California LEA did not otherwise comply with the requirements of this bill.

8) Defines the following terms:

a) ″California law enforcement agency″ means a police department, including the police department of a transit agency, school district, or specified higher education institutions, a sheriff′s department, a district attorney′s office, a county probation department, and any other LEA, department, or other entity of the state or any political subdivision thereof that employs any peace officer.

b) ″Interagency agreement″ means an agreement or memorandum of understanding between a California LEA and a federal LEA or other out-of-state LEA for criminal law enforcement, including, but not limited to, a mutual aid agreement. This does not include individual or informal communications or consultations between a California LEA and a federal or out-of-state agency.

c) ″Constitutionally protected expressive conduct″ means activities protected by the First Amendment of the United States (U.S.) Constitution or provisions of the California Constitution establishing rights to life and liberty, acquiring property, pursuing safety, happiness and privacy, rights related to reproductive freedom, speech, press, assembly, and religion, including, but not limited to:1) assembly; 2) petitioning; 3) speech; 4) expression of political and religious opinions; 4) recording government officials engaged in their duties in public places; and 4) publication of opinions or recordings.

9) States that the provisions of this bill restricting federal and state LEA agreements do not prohibit or restrict any governmental entity or official from sending to, or receiving from, federal immigration authorities, information regarding the citizenship or immigration status, lawful or unlawful, of an individual, or from requesting from federal immigration authorities, immigration status information, lawful or unlawful, of an individual, or maintaining or exchanging that information with any other federal, state, or local governmental entity, as specified.

10) Includes a severability clause, makes specified findings and declarations, and makes technical clarifying changes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

> Reimbursable state-mandated costs (General Fund) to local law enforcement agencies of an unknown amount, likely minor per agency but potentially significant in the aggregate. This bill requires local LEAs to amend existing interagency agreements by July 1, 2027, and to conform new agreements to the bill′s requirements. There are 455 police departments and 58 county sheriffs′ departments in the state. These costs are likely reimbursable from the General Fund, subject to a determination by the Commission on State Mandates, to the extent a local agency files a reimbursement claim.

NO VOTE RECORDED: Ochoa Bogh, Reyes, Wahab

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: School facilities: shade structures

SOURCE: Los Angeles Unified School District

DIGEST: This bill authorizes school districts to bundle multiple comparable shade structure projects at different sites into a single design-build solicitation, subject to specified requirements, and expands an existing exemption from accessible path-of-travel requirements under the California Building Standards Code for certain freestanding shade structures to also apply to shade structures that are integrated into playground equipment.

Assembly Amendments authorize school districts, until January 1, 2032, to bundle multiple comparable shade structure projects at different sites into a single design-build solicitation when the combined value of the projects exceeds $1 million, even

if individual projects are below the $1 million threshold for use of design-build, and make related chaptering amendments.

ANALYSIS:

Existing law:

1) Defines "construction or alteration" for purposes of school facilities projects to include any construction, reconstruction, or alteration of, or addition to, any school building.

2) Requires the Department of General Services (DGS) to pass upon and approve or reject all plans for the construction or, if the estimated cost exceeds $100,000, the alteration of any school building.

3) Generally requires the governing board of each school and community college district, before adopting construction or alteration plans, to submit the plans to DGS for approval and pay all associated fees.

4) Requires construction projects over $209,208 (cost threshold) to provide "an accessible path of travel" from the building entrance to the project location.

5) Specifies that an area that has been altered without providing an accessible path of travel to that area, and subsequent alterations of that area or a different area on the same path of travel are undertaken within three years of the original alteration, the total cost of alterations for the preceding three-year period shall be considered in determining whether the cost threshold has been met.

6) Limits the cost of complying with the requirement to provide an accessible path of travel to a free-standing, open-sided shade structure project to 20% of the adjusted construction cost, as defined, of the shade structure project.

7) Authorizes a school district, with the approval of its governing board, to use the design-build procurement process for public works projects in excess of $1 million and to award a design-build contract to either the low bid or the best value, as specified.

This bill:

1) Authorizes a school district, until January 1, 2032, with the approval of its governing board, to bundle multiple comparable shade structure projects at different sites through a single design-build solicitation if the combined value of

the projects exceeds $1 million, even if an individual project is valued at less than $1 million, provided that no individual project exceeds $10 million.

2) Requires each project awarded through a bundled solicitation to be a separate contract with an individual contract value, scope of work, location, schedule, design, and construction, and authorizes a contract entered into by December 31, 2031, to be completed after that date.

3) Expands an existing exemption from accessible path-of-travel requirements under the Building Code for certain freestanding shade structures to also apply to integrated shade structures attached to playground equipment that are included on DSA's approved pre-check design list.

Comments

1) *Need for the bill.* According to the author, "Spending time outside plays a vital role in supporting children's overall health and academic achievement. Regular access to outdoor environments can reduce stress and inattentiveness while strengthening cognitive growth and emotional well-being. However, students in urban areas face greater exposure to extreme temperatures, which can undermine the benefits of outdoor play by increasing their vulnerability to heat-related illnesses and diminishing their ability to focus and learn. Proper shading structures are essential to lower surrounding temperatures and protect children from dangerous heat.

   "We are proud to continue the important work SB 515 had started by expanding its provisions to include overheard playground structure shading, further empowering our schools to quickly and cost-effectively provide schoolyard shading that keeps our children cool while they play."

2) *Plan review for construction projects.* The DSA reviews plans for public school construction and certain other state-funded building projects to ensure that plans, specifications, and construction comply with California's building codes (Title 24 of the California Code of Regulations). The majority of DSA's plan review and construction oversight focuses on new construction and alteration projects for California school and community college districts. DSA's plan review ensures the project's compliance with code requirements related to:

   a) Structural safety, ensuring that facilities meet the high standards set in the Field Act to withstand an earthquake.

b) Fire and life safety, addressing the safety of occupants in buildings, as related to fire resistive building materials, fire alarms, fire suppression equipment, safe occupant egress, and firefighting equipment access.

c) Access compliance, ensuring that public schools and state-funded construction projects meet accessibility requirements for people with disabilities.

d) Energy efficiency, including compliance with applicable California Green Building Standards Code requirements for sustainability.

3) *The Field Act.* All school facilities must be built in compliance with specified earthquake safety standards, commonly known as the "Field Act." The Field Act was enacted following a severe earthquake in Long Beach in 1933. The Field Act requires a comprehensive design specification and construction inspection process for K-12 public school educational facilities. Community college facilities may be constructed in accordance with either the Field Act or the Building Code.

   The Field Act requires the DSA (within DGS) to review the construction plans for school buildings and requires school districts to hire onsite construction inspectors to ensure compliance with the structural safety standards. School and community college construction contracts may only be awarded after DSA approval of the plans and specifications on which the contracts are based.

4) *State Architect's pre-check approval process.* The DSA maintains a pre-check design list that includes over 25 "off the shelf" shade structures that schools and community colleges can install according to an expedited review and approval process. The pre-check approval process is intended to streamline DSA plan review by providing a procedure for approving the design of commonly used structures prior to the submittal of plans to DSA for construction projects. The pre-check approval process allows designers to incorporate designs for structures that have already been "pre-checked" by DSA into their plans for actual site-specific construction projects.

5) *Bundling shade structure projects for design-build procurement.* Existing law generally authorizes a school district to use design-build procurement for public works projects exceeding $1 million. The Assembly amendments authorize a school district undertaking multiple comparable shade structure projects at different sites to bundle those projects through a single design-build solicitation if their combined value exceeds $1 million, even if individual projects are valued at less than $1 million. Each project must remain a separate contract

with its own contract value, scope of work, location, schedule, design, and construction.

This approach may be particularly useful for districts seeking to install similar shade structures across multiple campuses. Bundling comparable projects could allow districts to reduce administrative costs, achieve economies of scale, and make design-build available for shade projects that would otherwise fall below the statutory threshold. The authority sunsets at the end of 2031, providing an opportunity to assess whether this approach reduces the cost or time associated with installing shade structures before considering whether it should be continued or applied more broadly.

6) *Expanding SB 515's exemption for shade structures.* SB 515 (Stern, Chapter 489, Statutes of 2023) created a narrow exception to accessible path-of-travel requirements under the Building Code for freestanding, open-sided shade structures included DSA's pre-check design list. That measure was intended to reduce project costs and facilitate the installation of shade structures on school campuses in response to increasing concerns about extreme heat exposure for students during outdoor activity.

   Under the Building Code, alterations to existing school facilities that exceed a specified valuation threshold (currently $209,208) must also include the provision of an accessible path of travel to the area being altered. Smaller projects that fall below the valuation threshold are generally exempt from these requirements. However, if additional projects or repairs at the same campus within a three-year period cause the cumulative cost of alterations to exceed the threshold, the path-of-travel improvements may be required retroactively for the earlier project. According to the author, this framework may result in relatively small projects, such as playground shade structures, triggering broader accessibility upgrades if other campus work has occurred during the prior three years.

   This bill proposes to extend the exemption created by SB 515 to integrated shade structures attached to playground equipment, allowing these projects to remain subject to the 20% path-of-travel cap regardless of whether the valuation threshold would otherwise be exceeded.

7) *Balancing climate adaptation with accessibility improvements.* School districts and advocates increasingly view playground shade structures as an important strategy for protecting students from extreme heat during outdoor activity. For example, Los Angeles Unified School District (LAUSD) reports that approximately 380 schools lack shade over play structures. With a $40 million

budget dedicated to shade shelters, LAUSD estimates it can install structures at approximately 49 schools, prioritizing campuses using its Student Equity Need Index to target investments toward communities most vulnerable to extreme heat. According to LAUSD, reducing project costs associated with accessibility triggers allows available funding to reach a greater number of campuses.

At the same time, accessible path-of-travel requirements serve an important policy purpose: ensuring that accessibility improvements are incorporated into existing school facilities over time as campuses undergo alterations. For students, staff, and visitors who use wheelchairs or have other mobility challenges, these incremental upgrades can determine whether new or improved spaces on campus are reachable. Expanding exemptions from these requirements may allow new amenities to be installed without triggering broader accessibility improvements that might otherwise occur during facility upgrades. As the Committee considers expanding the exemption created by SB 515, it may wish to weigh the benefits of facilitating additional shade installations against the potential for fewer accessibility improvements to be made on aging school campuses.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) Ongoing General Fund costs of $1.1 million for the Labor Commissioner's Office (under the Department of Industrial Relations (DIR)) to accommodate the additional number of projects subject to enforcement of skilled and trained workforce requirements by the Division of Labor Standards Enforcement. According to DIR, under existing law, school districts are required to use a skilled and trained workforce to perform all work for design-build projects or contracts that fall within an apprenticeable occupation in the building and construction trades.

2) Minor and absorbable costs to the Division of the State Architect (DSA) within the Department of General Services (DGS).

SUBJECT: Public health

SOURCE: Author

DIGEST: This bill requires the California Department of Public Health (CDPH) to develop signage for lung cancer screening and requires licensed tobacco retailers to display the signage or be subject to a civil penalty.

Assembly Amendments (1) Allow CDPH to make signage available to raise lung cancer awareness, instead of developing the signage; (2) Permit CDPH to develop signage using existing materials, or partner with an existing program; (3) Allow CDPH to satisfy the bill's requirement by including a Quick Response code on the signage that links to information required by the bill; (4) Provide a maximum size for signage; (3) Require the signage to be available free of cost to retailers from website; (4) Direct retailers to post the signage conspicuously; (5) Provide that provisions in current law directing CDTFA to suspend or revoke a tobacco retail license do not apply to violations of the bill's provisions; (6) Direct proceeds from civil penalties imposed under the bill to the Cigarette and Tobacco Products Compliance Fund; and (6) Consolidate the measure's changes into one code section in the Cigarette and Tobacco Products Licensing Act.

ANALYSIS:

Existing law:

1) Enacts the Cigarette and Tobacco Products Licensing Act, which required the Board of Equalization (BOE) to license manufacturers, distributors, wholesalers, importers, and retailers of cigarette or tobacco products who are engaged in business in California.

2) Transfers duties, powers, and responsibilities related to the administration of taxes and fees from BOE to the California Department of Tax and Fee Administration (CDTFA).

3) Directs CDTFA to administer the Cigarette and Tobacco Products Tax Law.

4) Requires retailers, distributors, manufacturers, wholesalers, and importers to have and maintain a license, and conspicuously display the license at each retail location in a manner visible to the public or be subject to a $500 civil penalty.

5) Creates two kinds of licenses for retailers: one for those who sell tobacco products subject to the Cigarette and Tobacco Products Tax, and one for those whose products are not subject to that tax, such as retailers of electronic delivery devices not containing or sold with nicotine and certain accessories, such as zero-nicotine vaporized liquids.

6) Provides that licenses are valid for one year and must be renewed annually.

7) Sets license fees on both sets of tobacco retailers at $450, for new or renewed licenses applied for on or after July 1, 2026, while permitting CDTFA to further increase the license fee by regulation to an amount necessary to maintain the Cigarette and Tobacco Products Compliance Fund at a level that is no more than necessary to cover its reasonable costs, not to exceed $600 (AB 573, Rogers, Chapter 269, Statutes of 2025).

8) Creates the California Tobacco Control Program (CTCP) within the California Department of Public Health (CDPH) to reduce tobacco use and prevent tobacco-related diseases, and conduct health education interventions and behavior change programs at the state level, in the community, and other non-school settings, including cessation programs. Requires CDPH to conduct statewide surveillance of tobacco-related behaviors, knowledge, and attitudes, and evaluate its local and state tobacco control programs.

9) Requires retailers of tobacco products, as part of the Stop Tobacco Access to Kids Enforcement (STAKE) Act, to post conspicuously a notice stating that selling tobacco products to anyone under 21 years of age is illegal and subject to penalties, that the law requires those selling tobacco products check the identification of a purchaser, and includes a toll-free telephone number to report unlawful sales of tobacco products to any person under 21 years of age.

This bill:

1) Amends the Licensing Act to require CDPH to make available signage to raise lung cancer screening awareness, which must include, on or before July 1, 2027:

   a) Eligibility criteria for lung cancer screening.
   b) Information on the effectiveness of lung cancer screening.
   c) The toll-free telephone number of the Kick It California tobacco cessation program.
   d) A quick response code that links to the Kick It California page on the department's internet website.

2) Permits CDPH to develop the signage, use existing materials, or partner with an existing lung cancer screening public awareness or education campaign, and to satisfy the bill's requirement by including a Quick Response code on the signage that links to information required above.

3) Bars signage from exceeding 8.5 inches by 4 inches in size.

4) Requires signage to be available to order at no cost from CDPH's internet website.

5) Amends the Licensing Act to require a retailer engaged in the retail sale of cigarettes or tobacco products to conspicuously display the signage at each retail location of the retailer beginning January 1, 2028.

6) Imposes a penalty of $500 for failing to display the signage, in addition to any other applicable penalty.

7) Directs CDTFA to impose the penalty in accordance with the procedures for the civil penalty in existing law for failing to display its license, upon its discovery that a retailer failed to display the signage at a retail location.

8) Provides that provisions in current law directing CDTFA to suspend or revoke a tobacco retail license do not apply to violations of the bill's provisions.

9) Deposits proceeds from penalties imposed under the bill into the Cigarette and Tobacco Products Compliance Fund.

Background

Approximately 29,000 cigarette and tobacco product retail locations are licensed to sell cigarettes and tobacco products in California. CDTFA's compliance efforts include regular inspections of businesses selling cigarettes and tobacco products, including retailers, wholesalers, and distributors, to ensure compliance with cigarette and tobacco product tax and licensing laws. CDTFA annually conducts about 3,318 inspections of licensed cigarette and tobacco product retailers to ensure compliance with the Licensing Act and applicable tax laws. Among other requirements, CDTFA enforces the current requirement under the Licensing Act that a retailer conspicuously display the license at each retail location, as well as signage requirements under the STAKE Act.

Kick It California. The Kick It California program seeks to help Californians quit cigarettes, vaping products, smokeless tobacco, and cannabis. Funded by the First 5 Commission and the California Department of Public Health (CDPH), and operated by the University of California, San Diego, Kick It seeks to help those who consume these products by connecting them with skilled "quit coaches." Dating its commencement to 1992, Kick It states that it enrolled almost 30,000 people last year, of whom 15,824 received coaching.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- CDPH states it anticipates costs of approximately $426,000 for fiscal years (FY) 2027-28 and 2028-29, and $275,642 ongoing beginning in FY 2029-30 for one full-time staff to develop the lung cancer screening signage, manage a graphic design contract, support regulatory development, and provide relevant content information such as lung cancer eligibility criteria (General Fund). If CDPH uses existing materials or works with an existing lung cancer screening awareness campaign, costs could be significantly lower.

- Possible additional costs of an unknown amount to the University of California (UC), which administers Kick It California, to integrate new call prompts and referral pathways into existing workflows for the program's cessation activities (California Healthcare, Research and Prevention Tobacco Tax Act of 2016 Fund and Cigarette and Tobacco Products Surtax Fund).

- California Department of Tax and Fee Administration (CDTFA) estimates costs of $100,000 in 2026-27, $266,000 in 2027-28, $242,000 in 2028-29, $170,000 in 2029-30, and $141,000 in 2030-31 and ongoing for providing notifications to retail licensees, answering taxpayer inquiries, and performing related administrative functions, such as issuing and processing civil penalties and handling appeals (Cigarette and Tobacco Products Compliance Fund). CDTFA also anticipates potential revenues of an unknown amount from civil penalties.

OPPOSITION: (Verified 8/24/26)

None received

ARGUMENTS IN SUPPORT: According to the author, "Lung cancer is the leading cause of cancer death in California and nationally, yet California has the lowest lung cancer screening rate in the country (<1%). The primary barrier is awareness given that 62% of Americans don't even know lung cancer screening exists. The United States Preventive Services Task Force recommends yearly lung cancer screening (LCS) for people who have a 20 pack-year (a packyear refers to smoking an average of 1 pack of cigarettes per day for 1 year) or more smoking history, smoke now, or have quit within the past 15 years, and are between the ages of 50 and 80. Although LCS are generally covered by insurance for individuals who meet these high-risk criteria, in California, only 16.8% of this population receive LCS. SB 1124 would raise awareness around eligibility for lung cancer screenings and encourage tobacco users to access health care services already available to them. To address California's particularly low screening rates and the disparities in access across communities, SB 1124 will require signage, created by the California Department of Health, for lung cancer screening eligibility criteria at the point-of sale for tobacco products."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Elections

SOURCE: California Democracy Partnership

DIGEST: This bill revises and expands the California Voting Rights Act of 2001 (CVRA) with a state voting rights act that seeks to protect voters from voter suppression and vote dilution.

Assembly Amendments added coauthors, added specificity for CVRA challenges and remedies, and included legislative findings and declarations.

ANALYSIS:

Existing law:

1) Prohibits, pursuant to Section 2 of the federal Voting Rights Act of 1965 (VRA), voting practices or procedures that discriminate on the basis of race, color, or membership in a language minority group. This includes any voting standard, practice, or procedure that results in the denial or abridgement of the right of any citizen to vote on account of race, color, or membership in a language minority group.

2) Prohibits, pursuant to the CVRA, a political subdivision from imposing or applying an at-large method of election for members of the political subdivision's governing body in a manner that impairs the ability of a protected class to elect candidates of its choice or its ability to influence the outcome of an election, as specified. For violations of the CVRA, courts provide appropriate remedies, including the imposition of district-based elections.

This bill:

1) Defines "protected class" means any group of eligible voters who are members of any race, color, or language-minority group, including two or more such groups, as specified.

2) Prohibits a political subdivision or state agency from implementing, imposing, or enforcing any election policy or practice that results, or is likely to result, in voter suppression. A violation is established when an election policy or practice disproportionately makes it harder for protected classes to vote or participate politically, unless the government can show the policy is necessary and that a less discriminatory alternative is not reasonably available.

3) Prohibits a political subdivision from employing a method of election that has the effect, or will likely have the effect, of diluting the vote of members of a protected class of voters. A violation is established when elections in the political subdivision exhibit racially polarized voting resulting in an impairment of the equal opportunity or ability of protected class members to nominate or

elect candidates of their choice. A violation could also exist if, based on the totality of circumstances, the equal opportunity or ability of protected class members to nominate or elect candidates of their choice is impaired.

4) Establishes guidelines and rules for evaluating voter suppression and vote dilution claims. Relevant factors in evaluating a claim may include any history of discrimination against members of, and historical disparities in political and voting participation and electoral success by, members of the protected class. Ongoing civil litigation filed before this bill becomes effective is governed by the legal standards in the existing CVRA for the purpose of establishing liability.

5) Permits an action to cure a violation related to voting to be brought by an affected voter in the jurisdiction or by the Attorney General (AG). A party, other than the AG, before bringing an action against a political subdivision, must send a notice to the political subdivision explaining how the policy or procedure, or method of election, may violate this bill and propose a remedy that would address the violation, unless certain conditions are met. The political subdivision has an opportunity to address the violation in response to such a letter before an action may be filed, unless certain conditions are met.

6) Provides that actions brought under this bill to proceed expeditiously. A court may order appropriate relief tailored to remedy a violation, including remedies not otherwise allowed under existing state law.

7) Requires any political subdivision to obtain preapproval from the AG before changing its method of election, annexing or de-annexing territory affecting the jurisdiction's population, or reducing language assistance, if the subdivision was found liable in the previous 10 years for violating this bill or a law or constitutional provision related to the right to vote for members of a protected class. The AG may grant approval for a covered change only if it will not diminish the ability of protected class members to participate in the political process or elect candidates of its choice. The AG must also create a process and a timeline for political subdivisions subject to preapproval for covered practices.

8) Prohibits a political subdivision that changes its method of election under this bill or the existing CVRA from reverting to the method of election it previously used without first obtaining a court order.

9) Requires a governing body engaged in local redistricting to comply with the requirements of this bill when adopting new district boundaries. A governing

body cannot adopt district boundaries for nonpartisan offices using party affiliation data when redistricting or from relying on partisan advantage or political ideology to defend district boundaries in a legal challenge.

10) Contains legislative findings and declarations.

Background

California Voting Rights Act of 2001. SB 976 (Polanco, Chapter 129, Statutes of 2002) enacted the CVRA to address racial block voting in at-large elections for local office in California. In areas where racial block voting occurs, an at-large method of election can dilute the voting rights of minority communities if the majority typically votes to support candidates that differ from the candidates who are preferred by minority communities.

In such situations, dividing a jurisdiction up into districts can result in districts in which a minority community can elect the candidate of its choice or otherwise have the ability to influence the outcome of an election. Accordingly, the CVRA prohibits an at-large method of election from being imposed or applied in a political subdivision in a manner that impairs the ability of a protected class of voters to elect the candidate of its choice or to influence the outcome of an election, as a result of the dilution or the abridgement of the rights of voters who are members of the protected class.

Federal Voting Rights Act of 1965. The 15th Amendment to the U.S. Constitution provides, in part, that "[t]he right of citizens of the United States to vote shall not be denied or abridged by the United States or by any state on account of race, color, or previous conditions of servitude." Additionally, the 15th Amendment authorizes Congress to enact legislation to enforce its provisions. The 15th Amendment was ratified in February 1870.

In 1965, Congress determined that state officials were failing to comply with the provisions of the 15th Amendment. As a result, Congress passed and President Johnson signed the VRA. The VRA, among other provisions, prohibits any "voting qualification or prerequisite to voting or standard, practice, or procedure" from being imposed by any "[s]tate or political subdivision in a manner which results in a denial or abridgement of the right of any citizen of the United States to vote on account of race or color."

Section 2 of the VRA is a nationwide prohibition against voting practices and procedures, including redistricting plans and at-large election systems, poll worker hiring, and voting registration procedures, that discriminate on the basis of race,

color, or membership in a language minority group. In *Louisiana v. Callais*, the U.S. Supreme Court ruled in April 2026 that Louisiana's congressional map was unconstitutional because race was used too prominently in its design. The Court held that complying with Section 2 of the VRA did not justify race-based redistricting unless it met strict constitutional limits. The ramifications of this decision are not fully known, but other states are evaluating how this decision affects a jurisdiction's current boundaries.

Section 2 also allowed the U.S. Attorney General or affected private citizens to bring lawsuits in federal court to challenge practices that may violate the VRA. In 2021, in *Brnovich v. DNC*, the U.S. Supreme Court made it more difficult to bring voter suppression claims through the judicial process.

Section 4 of the VRA set the criteria for determining whether a jurisdiction is covered under certain provisions of the VRA, including the requirement for review of changes affecting voting under Section 5.

Section 5 of the VRA requires certain states and covered jurisdictions to receive approval for any changes to law and practices affecting voting from the U.S. Department of Justice or the U.S. District Court of the District of Columbia to ensure that the changes do not have the purpose or effect of "denying or abridging the right to vote on account of race or color." This is also known as a "preclearance" requirement.

The U.S. Supreme Court, in *Shelby County v. Holder* in 2013, held that a coverage formula in Section 4 of the VRA is unconstitutional and can no longer be used as a basis for subjecting jurisdictions to preclearance under Section 5 of the VRA. The Court did not directly strike down Section 5, which contains the preclearance requirements, but without Section 4, no jurisdiction will be subject to Section 5 preclearance unless Congress enacts a new coverage formula.

Comments

1) *Author's Statement.* Under the stewardship of Chief Justice John Roberts, the Supreme Court of the United States has gradually chipped away at the federal VRA, culminating with its recent horrific decision in *Louisiana v. Callais*. Because the CVRA only prohibits discriminatory at-large election systems, California law is now inadequate to provide voting rights safeguards that have protected Californian voters for generations. This bill will enshrine many of the provisions prohibiting vote dilution, voter suppression, and other forms of voter discrimination that once existed in the federal VRA into state law. This bill will also ensure that California continues to lead on voting rights by providing the

AG and individual California voters with improved means to enforce state elections laws.

2) *Remedies and the Courts.* Under the existing CVRA, a political subdivision is prohibited from imposing or applying an *at-large method* of election for members of the political subdivision's governing body in a manner that impairs the ability of a protected class to elect candidates of its choice or its ability to influence the outcome of an election. The adoption of district elections has been viewed as a typical response to CVRA violation. This bill allows challenges to *district-based methods* of election that impair a protected class' ability to elect candidates of choice or influence election outcomes.

   This bill also creates a cause of action allowing affected voters to challenge any election policies or practices that result in voter suppression, including practices unrelated to district boundaries, such as the placement of voting locations, the timing of elections, or the method of electing people to office. This provides the courts with a considerable amount of discretion in selecting a remedy should it be needed. This could include structural electoral changes, such as mandating a governing body to switch to district elections or expanding the size of the governing body. It could also include modifications to the mechanics of an election, such as changing the current election method to a "shared-based" election method (such as proportional representation) or ranked-choice voting.

Related/Prior Legislation

SB 976 (Polanco, Chapter 129, Statutes of 2002) enacted the CVRA to address racial block voting in at-large elections for local office in California.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Committee on Appropriations:

1) Costs of approximately $1.3 million in fiscal year (FY) 2026-27, $2.3 million in FY 2027-28, and $2.2 million annually thereafter to the Department of Justice (DOJ) for increased workload to develop and defend regulations, provide and defend pre-approval to certain political subdivisions, and conduct related engagement, reviews, investigations, and enforcement (General Fund (GF)). DOJ anticipates needing at least nine new positions and an external consultant for specialized workload on issues pertinent to voting rights, elections, district maps, and demographics.

2) Costs of approximately $859,000 in the first year and $574,000 annually thereafter to the SOS to promulgate regulations and examine, test, certify, or

conditionally approve voting systems, software, procedures, and voting technologies adopted to remedy a CVRA 2026 violation (GF). The SOS anticipates needing three additional positions for the increased workload while maintaining separation of duties between certification and monitoring functions and operational continuity during peak election periods.

3) By requiring a political subdivision to follow CVRA 2026 procedures and modifying the duties of local elections officials, this bill likely creates a state-mandated local program. If the Commission on State Mandates determines the provisions of this bill create a new program or impose a higher level of service for which the state must reimburse local costs, a local agency could claim reimbursement from the state (GF). The magnitude of these costs is unknown, but definitely significant.

   Additionally, a local agency may incur non-reimbursable costs to the extent the agency is subject to an action brought by the AG or an aggrieved individual or entity.

4) Ongoing cost pressures of an unknown, but potentially significant amount, to the courts in additional workload by allowing the AG or an aggrieved individual or entity to bring an action to enforce voting rights on an expedited timeline, allowing an aggrieved individual or entity to bring an action to challenge a preapproval determination granted by the AG, and requiring a court to certify certain election methods would not violate CVRA 2026 (GF or Trial Court Trust Fund (TCTF)). It is unclear how many actions may occur statewide and how much court time may be needed to resolve each case, but it generally costs approximately $1,000 to operate a courtroom for one hour. Although courts are not funded on the basis of workload, increased pressure on staff and the TCTF may create a demand for increased court funding from the GF. The state budget provides annual GF backfills to the TCTF to offset revenue reductions, totaling approximately $117.3 million in fiscal year 2025-26.

SUBJECT: Vehicles: electric bicycles

SOURCE: California Bicycle Coalition
People for Bikes
Streets are for Everyone
Streets for All

DIGEST: This bill revises the definitions of electric bicycles (e-bikes), motor-driven cycles, and mopeds, updates the labeling and disclosure requirements for manufacturers and sellers of these devices, and prohibits noncompliant vehicles from being advertised as e-bikes. This bill additionally establishes new operational and safety requirements and imposes additional reporting requirements on law enforcement, among other things.

Assembly Amendments delete certain provisions related to unfair competition and false advertising laws, clarify moped and off-highway electric motorcycle battery compliance standards, modify e-bike labeling requirements, and address chaptering out conflicts with AB 2027 and AB 1913.

ANALYSIS:

Existing law:

1) Defines an e-bike as a bicycle equipped with fully operable pedals and an electric motor that does not exceed 750 watts of power. (Vehicles Code (VEH) §312.5)

2) Defines a class 1 e-bike as a bicycle equipped with a motor that provides assistance only when the rider is pedaling, that is not capable of exclusively propelling the bicycle, that ceases to provide assistance when the bicycle reaches the speed of 20 miles per hour (mph), and is not capable of providing assistance to reach speeds greater than 20 mph. (VEH §312.5)

3) Defines a class 2 e-bike as a bicycle equipped with a motor that may be used exclusively to propel the bicycle, and that is not capable of providing assistance when the bicycle reaches the speed of 20 mph. (VEH §312.5)

4) Defines a class 3 electric bicycle as a bicycle equipped with a motor that provides assistance only when the rider is pedaling, that is not capable of exclusively propelling the bicycle, and that ceases to provide assistance when the bicycle reaches the speed of 28 mph, and equipped with a speedometer. (VEH §312.5)

5) Prohibits the following vehicles from being sold as an electric bicycle: vehicles with two or three wheels powered by an electric motor that is intended by the manufacturer to be modifiable to attain a speed greater than 20 mph on motor power alone or to attain more than 750 watts of power, a vehicle that is modified to attain a speed greater than 20 mph on motor power alone or to have

motor power of more than 750 watts, and a vehicle that is modified to have its operable pedals removed. (VEH §312.5)

6) Requires manufactures and distributors of electric bicycles to apply a label that is permanently affixed, in a prominent location, to each electric bicycle. The label shall contain the classification number, top assisted speed, and motor wattage of the electric bicycle, and shall be printed in Arial font in at least 9-point type. (VEH §312.5)

7) Defines a "motorcycle" as a motor vehicle having a seat or saddle for the use of the rider, designed to travel on not more than three wheels in contact with the ground. (VEH §400)

8) Defines a "motor-driven cycle" as any motorcycle with a motor that displaces less than 150 cubic centimeters. A motor-driven cycle does not include a motorized bicycle, as defined in Section 406. (VEH §405)

9) Defines a "motorized bicycle" or "moped" as a two-wheeled or three-wheeled device having fully operative pedals for propulsion by human power, or having no pedals if powered solely by electrical energy, and an automatic transmission and a motor that produces less than 4 gross brake horsepower and is capable of propelling the device at a maximum speed of not more than 30 mph on level ground. (VEH §406)

10) Requires manufacturers of motorized bicycles or mopeds to provide a disclosure to buyers that meets the following specifications:

    a) The disclosure shall be printed in not less than 14-point boldface type on a single sheet of paper that contains no information other than the disclosure.

    b) The disclosure shall include the following language in capital letters: "YOUR INSURANCE POLICIES MAY NOT PROVIDE COVERAGE FOR ACCIDENTS INVOLVING THE USE OF THIS BICYCLE. TO DETERMINE IF COVERAGE IS PROVIDED YOU SHOULD CONTACT YOUR INSURANCE COMPANY OR AGENT."

11) Defines a "motorized scooter" as any two-wheeled device that has handlebars, has either a floorboard that is designed to be stood upon when riding or a seat and footrests in place of the floorboard, and is powered by an electric motor.

This device may also be designed to be powered by human propulsion. (VEH §407.5)

12) Requires motorized bicycles or mopeds to display a special license plate issued by the Department of Motor Vehicles (DMV) and specifies the process to apply for and receive the license plate. (VEH §5030)

13) Requires DMV to maintain a record system that provides for identification of stolen motorized bicycles or mopeds. (VEH §5038)

14) Establishes classes of vehicle driver's licenses, including Class M1 which authorizes an applicant to drive a two-wheel motorcycle or a motor-driven cycle; and a Class M2 which allows an applicant to drive a motorized bicycle or moped, or a bicycle with an attached motor. Specifies that persons holding a class M1 license or endorsement may operate vehicles included in class M2 without further examination. (VEH §12804.9)

15) Prohibits motorized bicycles from being operated on a bicycle path or trail, bikeway, bicycle lane, as specified, equestrian trail, or hiking or recreational trail, unless it is within or adjacent to a roadway or unless the local authority or the governing body of a public agency having jurisdiction over the path or trail permits, by ordinance, that operation. (VEH §21207.5)

16) Exempts motor-driven cycles whose speed attainable in one mile is 30 mph or less from the requirement that vehicles and motorcycles be equipped with a lamp-type turn signal system. (VEH §24951)

17) Requires every motorcycle during darkness to be equipped with at least one and not more than two lighted headlamps. (VEH §25650)

18) Provides that it is unlawful for any person or business to advertise or promote goods or services using statements that are untrue or misleading. This applies to all forms of communication, including newspapers, online content, and other advertising methods, and covers claims that the advertiser knows—or should reasonably know—are false. Violations are misdemeanors punishable by up to six months in county jail, a fine of up to $2,500, or both. (Business and Professions Code (BPC) §17500)

19) Defines unfair competition to mean any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising. (BPC §17200)

20) Prohibits a person from distributing, selling, leasing, or offering for sale or lease a powered mobility device unless the battery for the powered mobility device has been tested by an accredited testing laboratory for compliance with ANSI/CAN/UL 2272. (Health and Safety Code §26302)

This bill:

1) Makes findings and declarations related to e-bikes and other electric devices and vehicles.

2) Clarifies the list of devices and vehicles that are not e-bikes and may not be advertised, sold, offered for sale, or labeled as e-bikes.

3) Adds to the definition of a "motor-driven cycle" vehicles that are propelled by an electric motor of less than 3,750 watts that produces five brake horsepower or less, are designed for highway use, and comply with all applicable federal motor safety standards and requires motor-driven cycles and mopeds to have a 17-digit vehicle identification number and a specified safety certification.

4) Deletes the term "motorized bicycle" from the Vehicle Code and replaces it with "moped" and makes numerous technical changes to the definition of a moped, including:

    a) Specifies that a moped must have an electric motor of less than 3,000 watts or an internal combustion engine that produces less than 4 gross brake horsepower;

    b) Clarifies that a moped must be designed for highway use and comply with all applicable federal motor safety standards;

    c) Specifies that an e-bike, motor-driven cycle, motorized scooter, pocket bike, or off-highway electric motorcycle is not a moped, and may not be advertised, sold, offered for sale, or labeled as a moped;

    d) Authorizes a moped to be equipped with operable pedals for propulsion by human power; and,

e) Clarifies that only mopeds powered by a liquid fuel must be equipped with an adequate muffler.

5) Requires motor-driven cycles and mopeds propelled by an electric motor and manufactured after January 1, 2027, to be equipped with a lamp-type turn signal system and requires every motor-driven cycle and moped operating during darkness to be equipped with at least one and not more than two lighted headlamps.

6) Prohibits the operation of a two-wheeled or three-wheeled device powered by an electric motor that is capable of propelling the device at a speed greater than 20 mph on level ground on a highway or public right-of-way when powered solely by the motor unless the device meets a definition of a class of motor vehicle device that is explicitly defined in the Vehicle Code, complies with all applicable requirements for that motor vehicle, and is explicitly authorized for use on a highway or public right-of-way. This bill also extends this prohibition to any device that has multiple speed modes or settings, even if one or more of the settings limit the maximum speed of the device to 20 mph, and devices that are designed or designated by the manufacturer for off-road use or for use on private land.

7) Authorizes a peace officer to remove a prohibited device described above if a person is operating the unauthorized device on a highway or public-right-of-way.

8) Requires manufacturers and distributors of electric bicycles, mopeds, and motor-driven cycles to securely affix an informational label to the frame or fork that is readily visible without inverting the electric bicycle, moped, or motor-driven cycle, and that cannot be removed without the marking or labeling being defaced or destroyed. The information shall be printed in Arial font in at least 9 point type.

9) Prohibits the sale or installation of an electric bicycle classification label unless the classification label is sold and installed in a physical retailer or bicycle repair shop.

10) Requires a retailer and bicycle repair shop of electric bicycles to verify that the classification label matches the legal electric bicycle class before installing the classification label on an electric bicycle.

11) Requires any incident report filed by a peace officer for an injury or crash involving an electric bicycle, moped, or motor-driven cycle to include all of the information provided on the device's label, including brand name, manufacturer, top speed, top wattage, and classification. If the electric bicycle, moped, or motor-driven cycle does not have the marking or label, the incident report must indicate that a marking or label was not available.

12) Requires every manufacturer, importer, or seller of a motor-driven cycle, a moped, or an off-highway electric motorcycle that is powered by an electric motor to provide a disclosure to all potential buyers in any advertising (including any online advertising) that advises buyers that the vehicle is a motor vehicle subject to registration, their existing insurance policies may not provide coverage for the vehicle, and that they should contact their insurance company or insurance agent to determine if coverage is provided.

13) Extends the definition of "off-highway motor vehicle subject to identification" to include mopeds and off-highway electric motorcycles.

14) Prohibits a person from renting or offering for rental a moped or off-highway electric motorcycle or a corresponding charging system unless the battery and charging system complies with applicable requirements within SAE J2929 or another applicable SAE, ISO, UNECE, or IEC safety standard.

Comments

Purpose of the bill. According to the author, "[t]he three class system for e-bikes can be confusing for consumers, media, healthcare providers, and law enforcement. Unscrupulous businesses have taken advantage of this confusion by selling powerful motor vehicles as 'e-bikes.' SB 1167 will improve community safety by better regulating motor vehicles that look like e-bikes so purchasers are aware of the safety risks, manufactures are held responsible for misleading advertisements, and law enforcement can collect better data."

What's an e-bike? Electric bicycles, or e-bikes, typically look similar to regular bicycles but include an electric motor and battery. In California, e-bikes must be equipped with fully operable pedals and an electric motor that does not exceed 750 watts of power. The fastest e-bikes are Class 3, with a maximum pedal-assisted speed of 28 mph. Class 2 e-bikes offer throttle assistance and can travel up to 20 mph. A device that is capable of going faster than 20 mph using a throttle alone, or

faster than 28 mph with pedal assist, is not an e-bike under California law. The primary purpose of SB 1167 is to eradicate over-powered devices that fall outside the technical definition of e-bikes but are misrepresented as e-bikes.

Current e-bike false advertising laws. Current law technically protects consumers from false advertising pertaining to misclassified or out-of-class e-bikes. Specifically, it is illegal to advertise or sell any of the following vehicles as e-bikes:

a) A vehicle with two or three wheels powered by an electric motor that is intended by the manufacturer to be modifiable to attain a speed greater than 20 mph on motor power alone or to attain more than 750 watts of power;

b) A vehicle that is modified to attain a speed greater than 20 mph on motor power alone or to have motor power of more than 750 watts; or,

c) A vehicle that is modified to have its operable pedals removed.

This statute is intended to keep illegal, overpowered devices off the street and out of the market. However, many online retailers flagrantly violate this law and advertise throttle-powered devices with maximum speeds over 20 mph as e-bikes.

Benefits of e-bikes. Shifting trips from personal vehicles to active transportation is a key strategy for achieving the state's environmental goals. E-bikes are an increasingly popular tool to reduce car travel, particularly given that more than half of all trips in the United States are under three miles. Evidence also shows that e-bikes are used by a diverse range of individuals, including children, older adults, and people with disabilities who may be unable to drive or use a conventional bicycle. In addition to expanding mobility, e-bikes present an opportunity to address persistent transportation challenges, including vehicle traffic injuries and fatalities, transportation-related emissions, and roadway congestion.

Growing concerns with e-bikes and other devices. Californians have seen a surge of news coverage in recent years about the dangers of e-bikes. Additionally, many places where conventional bicycles were common have experienced a proliferation of e-bikes, such as schools, coastal communities, and bike trails. The rapid growth in the visibility of faster devices has resulted in a swift backlash against e-bikes across the country, including calls for increased restrictions and, in some cases, bans. However, many of the reported incidents may not have involved a legal e-bike.

E-bike safety study finds illegal, over-powered devices are a key problem. The Mineta Transportation Institute (MTI) at San Jose State University released a report commissioned by the California Legislature titled: *Exploring Electric Bicycle Safety Performance Data and Policy Options for California*. The report found, "many devices marketed in California as electric bicycles have much higher motor power and/or faster motor-assisted speed than the law allows. While nobody knows how many of these illegal electric bicycles are on the road, the percentage might be quite high. Counts of electric two-wheelers parked at a dozen northern California middle and high schools found that almost 90% may not meet the standards for legal electric bicycles. Some of these devices have as much as eight times more power than legal limits." The study went on to find that many consumers unknowingly purchase illegal devices, believing them to be legal e-bikes. Misleading advertisements often list devices capable of going over 30 mph as e-bikes and displays photos or videos of these devices on public roads.

SB 1167 seeks to prevent the sale of illegal devices. Among other things, SB 1167 clarifies that any device that does not meet the legal definition of a device or vehicle in the Vehicle Code is neither an e-bike, nor is it legal to operate on public roads. It also clarifies the list of devices and vehicles that are not e-bikes and may not be advertised, sold, offered for sale, or labeled as e-bikes. This bill explicitly creates a violation for riding a two-wheeled or three-wheeled device powered by an electric motor that is capable of propelling the device at a speed greater than 20 mph unless the device meets the definitions of a class of motor vehicle explicitly defined in the Vehicle Code and complies with all applicable requirements for that motor vehicle. Under this bill, a peace officer would be able to remove (tow and impound) a prohibited device if a person is operating it on a highway or public-right-of-way.

Classifying mopeds, etc. Among numerous other technical changes to the Vehicle Code, this bill deletes the term "motorized bicycle" in the Vehicle Code and replaces it with "moped." The goal of this change is to reduce confusion between "motorized bicycles" and e-bikes. This change may create an administrative burden for DMV, but does not create a policy change as the two terms are synonymous. Mopeds legally may not achieve speeds over 30 mph on level ground and require at minimum an M2 license, or any other driver's license, to operate. Mopeds must be registered and display a license plate.

Disclosures and labels. This bill expands the current labeling requirements for manufacturers and distributors of e-bikes, mopeds, and motor-driven cycles. Specifically, this bill requires these vehicles to have informational labels that are

securely affixed to the frame or fork of the e-bike, moped, or motor-driven cycle. The label must be readily visible without inverting the device and cannot be removed without the marking or labeling being defaced or destroyed. Currently, e-bikes must have a prominent, permanently affixed label. The label must contain the classification number, top assisted speed, and motor wattage of the e-bike, and must also be printed in Arial font in at least 9-point type. Under this bill, the label would also need to include the name of the brand and the manufacturer, importer, or distributor of the e-bike, in addition to the existing information required. This bill requires a retailer or bicycle repair shop to verify that the classification label matches the e-bike class, before installing the label.

This bill also specifies that manufacturers and distributors of mopeds and motor-driven cycles affix labels compliant with federal regulations, mandating, among other things, the name of the manufacturer, month and year of manufacture, gross vehicle weight rating, vehicle identification number, and the classification of the vehicle.

This bill additionally imposes disclosure requirements on manufacturers, importers, and sellers of motor-driven cycles, mopeds, or off-highway electric motorcycles. The disclosure would need to advise buyers that the vehicle is a motor vehicle subject to registration and applicable motor vehicle laws.

Law enforcement reporting. This bill requires law enforcement to include in any incident report for an injury or crash involving an e-bike, moped, or motor-driven cycle all the information on the device or vehicle's label. If the e-bike, moped, or motor-driven cycle does not have a label, the incident report must indicate that a marking or label was not available.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Cost pressures (Trial Court Trust Fund, General Fund) of an unknown, but potentially significant amount to the courts to adjudicate any additional filings resulting from violations of the requirements and prohibitions in this bill. Actual costs will depend on the number of cases filed and the amount of court time needed to resolve each case. It generally costs approximately $1,000 to operate a courtroom for one hour. Although courts are not funded on the basis of workload, increased pressure on the Trial Court Trust Fund may create a demand for increased funding for courts from the General Fund. The state

budget provides annual General Fund backfills to the Trial Court Trust Fund to offset revenue reductions, totaling approximately $117.3 million in 2025-26.

- DMV anticipates minor costs associated with forms and publication updates, including revisions to the Motorcycle Handbook.

- The California Highway Patrol (CHP) anticipates minor, absorbable costs for policy and training updates and to collect additional crash data.

- Costs to local law enforcement to collect additional crash data. The committee does not know the magnitude of these local costs but notes CHP expects such costs to be minor and absorbable, as described above. Nonetheless, these local costs may be significant in the aggregate, statewide. The state would need to reimburse these local costs, likely from the General Fund, if locals file a claim with the Commission on State Mandates and the commission determines the costs to be a reimbursable state mandate.

SUBJECT: Subdivision Map Act: tentative maps: expiration dates

SOURCE: Bay Area Council

DIGEST: This bill extends the life of tentative maps under the Subdivision Map Act.

Assembly Amendments shorten the extension provided by the bill to three years instead of four and restore the ability to use phased maps to extend a tentative map's life.

ANALYSIS:

Existing law:

1) Allows, under the California Constitution, cities and counties to "make and enforce within its limits, all local, police, sanitary and other ordinances and regulations not in conflict with general laws."

2) Requires every county and city to adopt a general plan that sets out planned uses for all of the area covered by the plan. A general plan must include specified mandatory "elements," including a housing element that establishes the locations and densities of housing, among other requirements.

3) Requires cities' and counties' major land use decisions—including zoning ordinances and other aspects of development permitting—must be consistent with their general plans.

4) Governs, pursuant to the Subdivision Map Act, how local officials regulate the division of real property into smaller parcels for sale, lease, or financing.

5) Authorizes local governments to impose a wide variety of conditions on subdivision maps.

6) Provides that a tentative map expires 24 months after its approval, but if a subdivider expends $236,790 on public improvements, then filing of a final map extends the validity of the map by 48 months.

7) Allows additional extensions for a tentative map of up to a total life of 16 years, absent extensions granted in other laws.

This bill:

1) Extends the initial life of a map to four years, instead of two.

2) Allows local ordinances to extend subdivision maps by three years, instead of two.

3) States that the extensions apply to an approved or conditionally approved tentative map that is not expired as of December 31, 2026.

4) Makes technical and conforming changes.

Background

Validity of tentative maps. The initial life of a tentative map is two years. At the option of the city or county, a map's initial life can be extended to four years. However, tentative maps can be valid for up to 16 years absent special extensions granted by the Legislature, through a combination of extensions that a local

government must grant and voluntary extensions. Specifically, if the subdivider spends substantial funds and files phased final maps, the remaining tentative map is automatically extended by four years or more, up to a maximum of ten years. A local government can further extend this 10 years by another six years, at its discretion. These deadlines don't apply during development moratoria (up to five years) or during pending litigation (up to five years).

The Legislature has periodically allowed local governments to offer, or explicitly granted, additional extensions to unexpired maps that meet specified conditions or are located in specific areas. These measures often responded to economic conditions or natural disasters that affected the ability of subdividers to complete improvements and finalize them.

While many of these extensions are granted at the discretion of cities and counties, they may not impose new conditions other than the life of those maps at the time they extend them, except in limited cases where the Legislature has specifically authorized new conditions.

In good economic times, an experienced subdivider can comply with a tentative map's conditions in a few years. Scarce financing, complex settings, and inexperience can drag out the time between a tentative map's approval and the filing of a final map. If a tentative map expires, the subdivider must start over, complying with any new required conditions. The Bay Area Council wants to extend the life of subdivision maps.

Comments

Purpose of the bill. According to the author, "The Subdivision Map Act (SMA) governs how land is divided into parcels for development, sale, or financing. Under the SMA, there are three main tiers of subdivision maps: parcel maps, tentative maps, and final maps. Tentative Vesting Maps are valid for 24 months, although, certain local jurisdictions may allow these maps to be valid for longer periods of time. The mapping process under the Subdivision Map Act can further constrain the state's already limited housing supply. Tentative vesting maps require discretionary approvals, that have additional requirements, leading to longer timelines and increasing costs. These longer timelines may also require projects to seek re-entitlement even if the project remains consistent with adopted plans and zoning, only further increases project costs, delays housing, and puts financing at risk. To help prevent construction delays and unlock housing faster, SB 1169 would increase the length of an entitlement under the Subdivision Map Act. By aligning tentative vesting maps with local planning cycles, SB 1169 will help

provide greater project certainty and reduce overall costs for housing development, making homeownership much more feasible for all."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- No state costs. Local costs resulting from this bill are not reimbursable by the state because local agencies have general authority to levy fees or charges to cover the administrative costs of new planning mandates.

NO VOTE RECORDED: Cervantes, Dahle, Gonzalez, Hurtado, Umberg

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Jury instructions: lesser related offenses

SOURCE: California Attorneys for Criminal Justice; Californians for Safety and Justice

DIGEST: This bill restores a criminal defendant's right to a jury instruction on lesser related offenses to the offense charged, and permits a jury, or a judge if a jury trial is waived, to find the defendant guilty of the lesser offense if certain conditions are met.

Assembly Amendments require that the defendant provide notice to the prosecution of the intent to seek the above-described jury instruction, and strike a statement of legislative intent regarding a related court case.

ANALYSIS:

Existing law:

1) Provides that after closing arguments in a criminal trial, the judge may then charge the jury, and shall do so on any points of law pertinent to the issue, if requested by either party. (Penal (Pen.) Code, § 1093, subd. (f).)

2) Provides that at the beginning of the trial or from time to time during the trial, and without any request from either party, the trial judge may give the jury such instructions on the law applicable to the case as the judge may deem necessary for their guidance on hearing the case. (Ibid.)

3) Provides that in any criminal case which is being tried before the court with a jury, all requests for instructions on points of law must be made to the court and all proposed instructions must be delivered to the court before commencement of argument. (Pen. Code, § 1093.5)

4) Provides that before the commencement of the argument, the court, on request of counsel, must:

   a) Decide whether to give, refuse, or modify the proposed instructions.'

   b) Decide which instructions shall be given in addition to those proposed, if any.

   c) Advise counsel of all instructions to be given. (Ibid.)

5) Provides that if, during the argument, issues are raised which have not been covered by instructions given or refused, the court may, on request of counsel, give additional instructions on the subject matter thereof. (Ibid.)

6) Provides that when it appears that the defendant has committed a public offense, or attempted to commit a public offense, and there is reasonable ground of doubt in which of two or more degrees of the crime or attempted crime he is guilty, he can be convicted of the lowest of such degrees only. (Pen. Code, § 1097.)

7) Defines a special verdict as that by which the jury finds the facts only, leaving judgment to the court, as specified. (Pen. Code § 1152.)

8) Provides that the court must give judgment upon the special verdict as follows:

a) If the plea is not guilty, and the facts prove the defendant guilty of the offense charged in the indictment or information, or of any other offense of which he could be convicted under that indictment or information, judgment must be given accordingly. But if otherwise, judgment of acquittal must be given.

b) If the plea is a former conviction or acquittal or once in jeopardy of the same offense, the court must give judgment of acquittal or conviction, as the facts prove or fail to prove the former conviction or acquittal or jeopardy. (Pen. Code, § 1155.)

9) Provides that whenever a defendant is convicted of a crime or attempt to commit a crime which is distinguished into degrees, the jury, or the court if a jury trial is waived, must find the degree of the crime or attempted crime of which he is guilty. Upon the failure of the jury or the court to so determine, the degree of the crime or attempted crime of which the defendant is guilty, shall be deemed to be of the lesser degree. (Pen. Code, § 1157.)

10) Provides that the jury, or the judge if a jury trial is waived, may find the defendant guilty of any offense, the commission of which is necessarily included in that with which he is charged, or of an attempt to commit the offense. (Pen. Code, § 1159.)

This bill:

1) Provides that a jury, or a judge if a trial is waived, upon request of a defendant, may find the defendant guilty of a lesser offense, the commission of which is closely related to the offense with which the defendant is charged, if the court determines that all of the following conditions are met:

a) The defendant relies on a theory of defense that is consistent with a conviction for the lesser offense.

b) The evidence of the lesser offense is relevant to and admitted for the purpose of establishing whether the defendant is guilty of the charged offense.

c) A basis exists, other than an unexplainable rejection of prosecution evidence, on which the jury could find the offense to be less than that charged.

2) Provides that a defendant seeking lesser related offense instruction in a jury trial shall provide notice of intent to seek this instruction to the prosecution no later

than the commencement of jury selection. If a jury is waived, notice shall be given before the presentation of evidence.

3) Specifies that the notice provisions above shall be waived only with the consent of the prosecution or upon a showing of good cause.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Assembly Appropriations Committee:

- Court cost pressures of $540,000 to $4.86 million annually (Trial Court Trust Fund) due to increased workload and trial time at both the superior court and appellate court levels. The courts derived this range from trial data in the most recent Court Statistics Report, which reflects approximately 7,000 misdemeanor and felony trials annually, and applied an assumed 25% to 75% share of trials in which a defendant may request a lesser related offense instruction. Additional trial time reflects explaining jury instructions and allowing additional argument. It generally costs approximately $1,000 to operate a courtroom for one hour. Although trial courts are not funded on the basis of workload, increased pressure on the Trial Court Trust Fund may create a need for increased General Fund support. The 2025-26 budget includes $117.3 million General Fund to backfill the Trial Court Trust Fund.

- Minor and absorbable workload to the Judicial Council to adopt or modify jury instructions and develop supplemental hearing materials for judicial officers and court staff.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Child welfare: transport escort services

SOURCE: 11:11 Media Impact

DIGEST: This bill 1) revises California's regulation of transport escort services, and 2) establishes conditions of operation and prohibits specified restraint practices and nighttime pickups.

Assembly Amendments: revise and recast the provisions of the bill.

ANALYSIS:

Existing law:

1) Establishes the "California Community Care Facilities Act" (CCFA) and requires CDSS to administer and license community care facilities providing nonmedical services, including adult residential facilities and short term residential therapeutic programs (STRTPs), among others. (Health and Safety Code Section [HSC] 1500 et seq.)

2) Provides that it is the policy of the state to facilitate the proper placement of every child in residential care facilities where the placement is in the best interests of the child. A county may require placement or licensing agencies, or both placement and licensing agencies, to actively seek out-of-home care facilities capable of meeting the varied needs of the child. Provides that in placing children in out-of-home care, particular attention should be given to the individual child's needs, the ability of the facility to meet those needs, the needs of other children in the facility, the licensing requirements of the facility as determined by the licensing agency, and the impact of the placement on the family reunification plan. (HSC 1501.1(a))

3) Defines "behavioral restraint" to mean a "mechanical restraint" or "physical restraint" used as an intervention when a person presents an immediate danger to self or to others. It does not include restraints used for medical purposes. (HSC 11801.1(a))

4) Defines "mechanical restraint" as the use of a mechanical device, material, or equipment attached or adjacent to the person's body that he or she cannot easily remove and that restricts the freedom of movement of all or part of a person's body or restricts normal access to the person's body, and that is used as a behavioral restraint. (HSC 11801.1(d))

5) Defines "physical restraint" as the use of a manual hold to restrict freedom of movement of all or part of a person's body, or to restrict normal access to the person's body, and that is used as a behavioral restraint. "Physical restraint" is staff-to-person physical contact in which the person unwillingly participates. "Physical restraint" does not include briefly holding a person without undue force in order to calm or comfort, or physical contact intended to gently assist a person in performing tasks or to guide or assist a person from one area to another. (HSC 11801.11(d))

6) Requires the development of technical assistance and training programs for specified health facilities to reduce or eliminate the use of seclusion and behavioral restraints in those facilities that utilize them. (HSC 1180.3)

7) Provides that the Secretary of California Health and Human Services (Secretary) or their designee shall take steps to establish a system of mandatory, consistent, timely, and publicly accessible data collection regarding the use of seclusion and behavioral restraints in all specified facilities that utilize seclusion and behavioral restraints. The Secretary shall develop a mechanism for making this information, as it becomes available, publicly available on the internet. For data currently being collected, implementation shall be done as soon as it reasonably can be achieved within existing resources. As new reporting requirements are developed and result in additional data becoming available, this additional data shall be included in the data publicly available on the internet. (HSC 1180.3)

This bill:

1) Expands the legislative intent to protect the well-being of California children by regulating private individuals and companies that transport or accompany minors, to apply to all minors regardless of where they are being transported.

2) Revises the definition of a "transport escort service" to apply to the transportation of minors to a residential facility, institution, or "youth residential program" located in this state, instead of applying to the transport of minors who are residents of California to any residential facility or institution located out of the state.

3) Includes a "youth residential program" in the requirement for every transport escort service that accompanies or transports a minor who is a resident of California to a residential facility, or institution located outside the state to first provide the minor's parents, custodial parent, or legal guardian (parent) with specified information. Requires the transport escort service to verify in writing that the minor's parent has received this information.

4) Strikes the requirement for an explanation of the minor's right to make a complaint to a child protective agency concerning abusive treatment by the transport escort service to be provided to the minor's parent.

5) Prohibits a transport escort service from accompanying or transporting a minor unless every person employed or contracted by the transport escort service to accompany or transport the minor is a TrustLine-registered childcare provider.

6) Specifies that violations of these provisions may be prosecuted as a misdemeanor punishable by a fine of not less $500 or more than $5,000 as to each person with respect to whom a violation occurs, or imprisonment in a county jail for not more than six months do not apply to the following:

   a) Transportation network companies;

   b) The transport of minors in their care by a community care facility, as defined; or,

   c) The transport of minors by an individual providing private childcare, casual babysitting, or domestic nanny services, if specified criteria are satisfied:

7) Requires a transport escort service to do all of the following:

   a) Possess authorization to operate as a charter-party carrier of passengers, as defined.

   b) Ensure that all individuals involved in transporting minors complete training that addresses specified elements.

   c) Obtain written consent from the parent of the child prior to transporting a minor, and maintain documentation that written consent was obtained, including a signed acknowledgment that all provider safety, supervision, and program protections apply exclusively within the state of California. Requires the documentation to include authorization for transportation, identification of the destination, and contact information for the transport escort service.

   d) Maintain written policies governing the safety and welfare of minors during transport. Requires the policies to address, at a minimum, access to food and water, access to restroom facilities, lodging when overnight transport occurs, and procedures for delays or itinerary changes.

8) Prohibits a transport escort service, from doing either of the following:

   a) Use any of the following during transport: blindfolds, hoods, a device to obstruct a minor's vision, and except as described, behavioral restraints, as defined. Behavioral restraints may be used while transporting a minor if it is necessary to prevent imminent, serious physical harm and less restrictive alternatives are not available. Restraints shall not be used as a punishment, for staff convenience, or as a substitute for supervision of minors, and shall comply with the established human rights and safety criteria

b) Pick up a minor for transport between the hours of 9:00 p.m. and 6:00 a.m.

9) Specifies that a private investigator license or registration does not constitute or confer a permit to operate as a transport escort service. Provides that nothing in these provisions shall be construed to require a transport escort service, as defined, to hold a private investigator license or registration solely by reason of transporting or accompanying a minor.

10) Requires a transport escort service that performs investigative functions subject to licensure to obtain a private investigator license or registration as required for those functions.

11) Authorizes the Attorney General (AG) to bring an action in superior court to enforce these provisions if a transport escort service engages in repeated or egregious violations of the conduct standards.

12) Requires transportation services incidental to operation of a youth camp that are provided by either a nonprofit organization or an organization that operates an organized camp, as defined, serving youth 18 years of age or younger to register as a private carrier with the Department of Motor Vehicles.

Background

Author Statement. According to the author, "SB 1190 addresses a gap in California law by establishing oversight for private companies that transport minors to residential treatment and behavioral programs. These companies often serve vulnerable youth but currently operate with little to no statewide regulation, leading to reports of traumatic and, in some cases, cruel practices during transport. SB 1190 creates a commonsense framework requiring licensing, background checks, training, and clear safety standards. This bill ensures that when a child is being transported to receive care, that process is safe, accountable, and not a source of further harm."

The Troubled Teen Industry The so-called "troubled teen industry" includes a range of youth residential programs designed to address emotional, behavioral, or substance abuse issues. These programs include such things as boot camps, secured group homes, therapeutic boarding schools, conversion therapy, and wilderness therapy. These programs are estimated to have between 120,00–200,00 youth residing in them and many are located in Utah. In 2021, California prohibited sending youth, including foster children, to out-of-state for-profit treatment centers after reports of rampant abuse. However, families who private pay are still able to

send their children to these out-of-state facilities, which are a billion-dollar industry.

This bill focuses on how youth are transported to these facilities, which often uses the tactic of "gooning" where men show up under cover of darkness, forcing youth into a vehicle, and taking them to facilities against their will. Parents often hire transport services to stage kidnappings of their children, violently extracting them from their homes, often in the middle of the night, to take them to facilities. Two states have passed laws regulating this practice.

In 2021, Oregon passed Senate Bill 710 . The bill establishes regulations and clarifications about types of restraints and holds that can be used on children at residential facilities as well as regulations regarding the use of involuntary seclusion. It also contains provisions regarding secure transportation service providers. Specifically, the bill provided that a person or organization that makes a referral or recommendation related to the use of a secure transportation services provider to transport a child to a school, agency, organization or program must provide a specified written referral disclosure if the child to be transferred is a resident of this state or if the school, agency, organization or program to which the secure transportation services provider will deliver the child is located in this state. The bill further provides that the referral disclosure must state "ORS 418.215 requires a secure transportation services provider that transports children to or from a school, agency, organization or program along a route that begins or ends in Oregon to be licensed by the Department of Human Services."

In 2025, Maryland passed HB 497 , the Preventing Abduction in Youth Transport Act of 2025. This law provides that when a youth is transported to a residential child care program, the youth transportation company may not use specified restraints. These include visual impairment, such as blindfolds and hoods; mechanical restraints, such as handcuffs, chains, irons, straitjackets, cloth restraints, leather restraints, plastic restraints, or other similar items; or physical restraints, including holds, or other use of physical force to restrict free movement. Such physical restraints are only allowed to prevent imminent serious physical harm to a child or others as long as there are no less restrictive alternatives. The law further provides that physical restraints may not be used as punishment, for convenience, or as a substitute for staff supervision. For youth transportation companies not under contact with the Department of Human Services, when the final intended destination is a residential child care program, a youth transportation company may not pick up a child for transport to a residential child care program between the hours of 9 p.m. and 6 a.m.

This bill seeks to follow in the lead of these states and provide rules to ensure proper treatment of young people who are transported to residential treatment facilities.

Related/Prior Legislation

SB 1043 (Grove, Chapter 628, Statutes of 2024) requires facilities operating STRTPs to provide specified information to a child subject to seclusion or behavioral restraints, their parent, foster parent, guardian, or tribal representative, and CDSS. Requires CDSS to review all reported incidents involving the use of seclusion or behavioral restraints and investigate any incidents that indicate a potential health and safety concern or licensing violation. Requires CDSS to display data that is specific to STRTPs on its website regarding the use of seclusion or behavioral restraints.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) The CPUC estimates total costs of $1.8 million (PUC Transportation Reimbursement Account) including $403,000 in ongoing costs for two additional analysts and $1.4 million in one-time contracting and IT system modification costs. The CPUC would be responsible for issuing a charter-party carrier permit with a new transport escort service designation and identifying companies it already regulates that would now become subject to this new designation. The CPUC would also be required to conduct a rulemaking to define the application process, permit designation, documentation standards, and enforcement and compliance framework left unspecified in the bill.

2) CDSS estimates ongoing General Fund costs of approximately $80 million annually for additional staff to administer the anticipated significant influx of trustline registry applications due to the broad scope of transit providers, including Transportation Network Companies, included in the bill, and to receive incident reports from transit escort services and make determinations regarding referrals to the AG for civil enforcement, based on criteria unspecified in the bill.

3) Cost pressures (Trial Court Trust Fund, General Fund) of an unknown, potentially significant amount to the courts to adjudicate any additional filings by the AG for violations of the bill's provisions. Actual costs will depend on the number of cases filed and the amount of court time needed to resolve each case.

It generally costs approximately $1,000 to operate a courtroom for one hour. Although courts are not funded on the basis of workload, increased pressure on the Trial Court Trust Fund may create a demand for increased funding for courts from the General Fund. The state budget provides annual General Fund backfills to the Trial Court Trust Fund to offset revenue reductions. This backfill was $117.3 million in 2025-26.

4) The Department of Justice indicates minor costs for enforcement activities.

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Tied-house exceptions: advertising: Counties of Los Angeles, San Bernardino, and San Diego

SOURCE: Author

DIGEST: This bill authorizes specified alcoholic beverage licensees to purchase advertising space and time from, or on behalf of, an on-sale licensee that is the owner, manager, or major tenant at four specified facilities in southern California, as specified.

Assembly Amendments reduce the number of covered facilities from 11 to four and clarify that an on-sale licensee is prohibited from soliciting specified licensees to

enter into an agreement that containing a provision that requires the prioritization of the sale or promotion of a specific alcoholic beverage product or brand.

ANALYSIS:

Existing law:

1) Establishes the Department of Alcoholic Beverage Control (ABC) and grants it exclusive authority to administer the provisions of the ABC Act in accordance with laws enacted by the Legislature. This involves licensing individuals and businesses associated with the manufacture, importation, and sale of alcoholic beverages and the collection of license fees for this purpose.

2) Separates the alcoholic beverage industry into three component parts, or tiers, of the manufacturer (including breweries, wineries, and distilleries), wholesaler, and retailer (both on-sale and off-sale). This is referred to as the "tied-house" law or "three-tier" system. Generally, other than exceptions granted by the Legislature, the holder of one type of license is not permitted to do business as another type of licensee within the "three-tier" system.

3) Prohibits, in general, a manufacturer, winegrower, manufacturer's agent, rectifier, distiller, bottler, importer, or wholesaler, or any officer, director or agent of any such person from owning, directly or indirectly, any interest in any on-sale license.

4) Prohibits, in general, a manufacturer, winegrower, distiller, bottler, or wholesaler, among other licensees, or agents of these licensees, from paying a retailer for advertising.

5) Provides a variety of exceptions from the advertising prohibition, including permitting specified licensees to purchase advertising space and time from, or on behalf of, an on-sale retail licensee that is an owner, manager, or major tenant of certain stadiums, parks, entertainment complexes, and arenas, subject to specified conditions.

This bill:

1) Authorizes a beer manufacturer, the holder of a winegrower's license, a rectifier, a craft distiller, a distilled spirits manufacturer's agency to purchase advertising space and time from, or on behalf of, an on-sale retail licensee subject to various conditions at the following locations:

a) An indoor convention center complex and arena that is at least 390,000 square feet and used for conventions, trade shows, concerts, and sporting events located in the City of Long Beach in the County of Los Angeles (Long Beach Convention Center Complex).

b) An outdoor amphitheater, which is at least 9.500 seats, that is used for live performances and owned by the City of Long Beach in the County of Los Angeles (Long Beach Bowl Amphitheater).

c) An indoor arena with at least 15,000 seats that is used for concerts, sporting events, and other shows located in Midway District neighborhoods of the City of San Diego in the County of San Diego (Pechanga Arena).

d) An arena with at least 10,000 seats that is used for concerts, other shows, and sporting competitions, including ice hockey league and soccer league located in the City of Ontario in the County of San Bernardino (Toyota Arena).

2) Prohibits an on-sale licensee from soliciting specified licensees to enter into an agreement, that, among other things, includes a provision requiring the prioritization of the sale or promotion of a specific alcoholic beverage product or brand.

3) Makes legislative findings and declarations as to the necessity of a special statute, as specified.

Background

Author Statement. According to the author's office, "currently, the Legislature has recognized that certain venues, such as stadiums, arenas, and entertainment complexes operate under unique business models that rely on sponsorship and advertising partnerships to support operations and events. For that reason, California law already includes numerous statutory exceptions allowing specified venues to enter into these types of arrangements. SB 1195 continues that well-established approach by authorizing alcoholic beverage licensees to purchase advertising space and time from, or on behalf of, an on-sale licensee that is the owner, manager, or major tenant at specified facilities in Los Angeles, San Bernardino, and San Diego."

Further, "this bill does not create a new policy concept. Rather, it extends an existing and familiar exception to additional venues that are similarly situated to

many others already granted this authority under state law. SB 1195 promotes consistency, fairness, and economic opportunity for these facilities while preserving the core protections of California's Tied-House laws. This bill will grant additional opportunities for local economic development in SD 22 as well as other key locations across the state."

Tied-House Laws. Tied-house laws generally prohibit suppliers and retailers from sharing common owners and legally restrict alcohol beverage suppliers' ability to gain control over retailers through indirect means. The original policy rationale for this body of law was to: (1) promote the state's interest in an orderly market; (2) prohibit the vertical integration and dominance by a single producer in the marketplace; (3) prohibit commercial bribery and to protect the public from predatory marketing practices; and (4) discourage and/or prevent the intemperate use of alcoholic beverages.

These provisions prohibit a manufacturer from paying for advertising space at any facility where the facility is licensed to sell alcoholic beverages. Over the years, numerous exceptions to this prohibition have been added to a number of stadiums, parks, entertainment complexes, and arenas. Some examples are Levi's Stadium in Santa Clara, Oakland Coliseum in Oakland, Honda Center in Anaheim, Kern County Arena in Bakersfield, the National Orange Show Events Center in San Bernardino, Auto Club Speedway, (formerly California Speedway) in Fontana, Grizzly Stadium in Fresno, Sutter Health Park in West Sacramento, SAP Center in San Jose, Dignity Health in Carson, and numerous other venues.

Current Safeguards. Tied-house advertising exception bills – such as this bill – generally include a consistent set of safeguards designed to prevent alcohol manufacturers and wholesalers from exerting undue influence over retailers. These bills typically limit any exception to narrowly defined, venue-specific, such as stadiums, arenas, or fairgrounds. A core safeguard is that any permitted advertising must be tied directly to events occurring at the venue, rather than general promotion of the retailer, and is frequently restricted to certain types of events like sports or entertainment. Placement of restrictions are also common ensuring that advertising does not appear inside unrelated licensed premises – such as bars or restaurants within a larger complex – and is instead confined to approved areas like the venue itself.

In addition, these bills usually require that retailers continue to offer competing brands, preventing exclusive arrangements that could distort market competition. Advertising agreements must be conducted in accordance with written contracts,

promoting transparency and enabling regulatory oversight. Anti-coercion provisions are another key feature, making clear that retailers cannot require or pressure suppliers to purchase advertising, with violations subject to criminal penalties. Overall, these safeguards reflect an effort to allow for modern advertising practices while maintaining the core protections of California's tied-house laws.

Related/Prior Legislation

SB 392 (Bradford, Chapter 604, Statutes of 2023) authorizes specified licensees to purchase advertising space and time from, or on behalf of, an on-sale licensee that is the owner, manager, or major tenant of a fully enclosed arena with a seating capacity of at least 18,000 seats located in the City of Inglewood (Intuit Dome), as specified.

AB 840 (Addis, Chapter 346, Statutes of 2023) authorizes specified licensees to purchase advertising space and time from, or on behalf of, an on-sale licensee that is the owner, manager, or major tenants at various facilities that are situated on California State University campuses located in the Counties of San Luis Obispo, Fresno, Monterey, Orange, Santa Clara, and Los Angeles, as specified.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, minor and absorbable costs to ABC for related enforcement.

This committee sees a wide array of bills that propose to modify the scope of alcohol laws. Taken together, these proposals could lead to significant new costs and future budget requests. In this case, however, similar tied-house exceptions previously granted to other venues have not resulted in significant workload for ABC.

California Travel Association
City of Ontario
Greater Stockton Chamber of Commerce
Ontario Convention Center
ONT Field
Toyota Arena

OPPOSITION: (Verified 8/24/26)

Alcohol Justice
California Alcohol Policy Alliance
California Craft Brewers Association
California Council on Alcohol Problems

ARGUMENTS IN SUPPORT: According to the City of Ontario, "this measure is especially important for the City of Ontario. The city is home to a growing cluster of regional destinations, including a large-scale arena, convention center, and newly developed minor league ballpark. These venues collectively serve hundreds of thousands of visitors each year and play a central role in driving tourism, economic activity, and job creation throughout the Inland Empire. However, current restrictions limit their ability to fully participate in sponsorship markets that are commonly available to comparable facilities elsewhere in the state. By modernizing these restrictions in a limited and thoughtful way, SB 1195 will support local economic development, enhance regional entertainment infrastructure, and provide Ontario's publicly supported venues with tools already available to their counterparts across California."

ARGUMENTS IN OPPOSITION: According to Alcohol Justice, "knowing how vulnerable young Californians are to the most cynical of advertising strategies, efforts to prop up venues by selling alcohol ads are essentially auctioning off kids' lifelong health outcomes. In light of that, and the outsized alcohol harm currently threatening the state, there needs to be a moratorium on ad hoc exemptions, including the ones sought in this bill. In fact, it would provide extensive benefits were the ones already granted to be, cautiously and with advanced warning for the operators affected, reversed."

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Public contracts: retention: architecture or engineering services

SOURCE: American Institute of Architects, California

DIGEST: This bill prohibits any retention payments for contracts under design-bid-build directly between a public entity and an individual or legal entity permitted by law to practice the profession of architecture or engineering from

exceeding five percent of the payment, except for specific projects where, among other things, a finding has been made that the project is substantially complex and requires a higher retention amount.

Assembly Amendments allow for the retention proceeds to exceed five percent on specific projects where the governing body of the public entity has approved a finding that, among other things, finds that the project is substantially complex and therefore requires a retention amount higher than five percent.

ANALYSIS:

Existing law:

1) Prohibits the retention proceeds withheld from any payment by a public entity from the original contractor, by the original contractor from any subcontractor, and by a subcontractor from any subcontractor, from exceeding five percent of the payment for all contracts between a public agency and a contractor relating to the construction of any public works project. (Public Contract Code § 7201)

2) Defines "public works" to mean the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement of any kind.

3) Prohibits a retention payment withheld from a payment by an owner from the direct contractor, by the direct contractor from any subcontractor, and by a subcontractor from any subcontractor thereunder, for a private work of improvement, from exceeding five percent of the payment. (Civil Code § 8811)

This bill:

1) Provides that any retention payments for contracts under design-bid-build directly between a public entity and an individual or legal entity permitted by law to practice the profession of architecture or engineering shall not exceed five percent of the payment. The bill exempts specific projects where, among other things, a finding has been made that the project is substantially complex and requires a higher retention amount, as specified.

2) Requires that any retention withheld shall be released no later than 60 days upon completion of the firm's design services under contract, regardless of whether the project for which the services were provided has been completed.

3) Defines "firm" to mean an individual, firm, partnership, corporation, association, or other legal entity permitted by law to practice the profession of architecture or engineering.

4) Defines "public entity" to mean the state, including every state agency, office, department, division, bureau, board, or commission, the California State University, the University of California, a city, county, city and county, including charter cities and charter counties, district, special district, public authority, political subdivision, public corporation, or nonprofit transit corporation wholly owned by a public agency and formed to carry out the purposes of the public agency.

Background

Author's Statement. According to the author's office, "California relies on architects to design safe, resilient, and innovative public infrastructure. Yet under current practice, many architects are forced to wait years to receive full payment for work they completed long before construction is finished. SB 1205 ensures that payment practices reflect the realities of professional services, not construction risk. This bill supports small businesses, improves cash flow, and promotes a more efficient and equitable public contracting system."

Five-Percent Retention Cap. The five percent retention cap represents a critical policy for the construction industry, particularly in supporting small and emerging contractors. By limiting the amount of payment withheld, the cap helps ensure these businesses maintain sufficient cash flow to meet ongoing obligations, including payroll, employee benefits, material costs, and applicable taxes. Given the typically low profit margins in construction, timely and predictable payments are essential to sustaining operations. This financial stability enables contractors to continue bidding on future public works projects without relying on costly lines of credit or operating under uncertain financial conditions. Absent the retention cap, contractors may face constrained cash flow and heightened financial risk, limiting their ability to compete and remain viable.

In California and many other states, a public agency is entitled to withhold a percentage of a contract which allows the public agency to maintain some control over the project and ensure that the contractor performs the work, on time, and within a budget. Prior to 2011, state law allowed a public agency to retain no less than five percent from the contractor until the project was completed; the usual standard for public entities was 10%, although this was not set by statute. In 2011,

SB 293 (Padilla, Chapter 700, Statutes of 2011) was enacted which capped the percentage that could be withheld to five percent.

The only identified exception to the five percent retention limit is when a public entity deems that a project is substantially complex during a properly noticed and regularly scheduled public meeting prior to bidding the project. In that case, retention proceeds may exceed the five percent retention cap.

Determining whether a project is substantially complex for purposes of requiring retention in excess of five percent must be analyzed and approved on a project-by-project basis. The finding and the designated retention amount must be included in the project's bid documents. Existing law establishing the general five percent retention limit but allowing higher retention for substantially complex. Last year, Governor Newsom signed SB 61 (Cortese, Chapter 49, Statutes of 2025) which established a five percent cap on retention on most private construction projects – bringing private sector rules in line with existing public works law.

However, while a five percent retention cap is an established policy standard for construction projects, no equivalent statutory limitation exists for professional services contracts, including those for architects and engineers. According to the author's office, public entities often apply construction-style retention provisions to architectural contracts, withholding up to 10% of payments. Unlike contractors, architects typically complete their scope of work well before construction is finished; however, retained funds are frequently not released until overall project completion, which may occur years after design services are rendered. The author's office contends that, for smaller and mid-sized firms, these delayed payments can significantly affect business operations and hiring decisions.

This bill establishes a five percent retention cap for all contracts between a public entity and a licensed architect or engineer. It would also require that any retention withheld be released no later than 60 days after completion of the firm's design services, regardless of whether the broader construction project has been completed. The bill exempts specific projects where, among other things, a finding has been made that the project is substantially complex and requires a higher retention amount, as specified.

According to the author's office, this approach "will ensure that architects are paid in a timely manner upon completion of their scope of work, rather than being tied to construction completion." In doing so, the bill seeks to align payment practices with the actual risk profile of professional services, modernize public contracting, and promote fair and timely compensation for design professionals.

Design-Bid-Build. Design–bid–build (DBB) is a construction project delivery method in which the work is completed in three distinct, sequential phases: design, bidding, and construction. In California this is a "traditional" method that is frequently used for public infrastructure projects. First, the project owner hires a designer—typically an architect or engineer—to develop complete plans and specifications for the project. Once the design is finalized, the project moves into the bidding phase, where contractors submit competitive bids based on those plans, and the owner usually selects the lowest responsible bidder. After a contractor is chosen, the project enters the construction phase, during which the contractor builds the project according to the completed design. This method is widely used because it provides a clear structure, defined roles, and a transparent bidding process that can help control costs.

Related/Prior Legislation

SB 61 (Cortese, Chapter 49, Statutes of 2025) prohibits an owner, direct contractor, or a subcontractor of a private work of improvement from withholding a retention payment from a direct contractor or subcontractor of more than five percent, except as specified.

AB 1885 (Carillo, 2026) reduces that amount of retention proceeds state agencies may withhold, from 5% to 3.5% from a progress payment to certain contractors on a public works project. (Pending in the Assembly Appropriations Committee)

AB 2173 (Petrie-Norris, Chapter 121, Statutes of 2022) removed the sunset clause on the five percent retention cap policy related to public works.

AB 92 (Bonta, Chapter 37, Statutes of 2017) extended, from January 1, 2018, to January 1, 2023, the sunset date on existing statutes governing the amount of money a public agency can retain from a contractor or subcontractor prior to completion of a public works project.

AB 1705 (Williams, Chapter 670, Statutes of 2014) limited the circumstances under which public agencies may withhold more than five percent of total payment amounts for time and materials on substantially complex public works projects and extended the repeal date of the provisions governing retention proceeds from January 1, 2016, to January 1, 2018.

SB 293 (Padilla, Chapter 700, Statutes of 2011) capped the amount of money that public agencies can withhold from a contractor prior to completion of a public

works project at five percent of the total contract, with specified exceptions, with a sunset of January 1, 2016.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations, likely absorbable costs to impacted state and local entities to adjust retention payment rules.

SUPPORT: (Verified 8/24/26)

American Institute of Architects, California (Source)
American Council of Engineering Companies of California

OPPOSITION: (Verified 8/24/26)

None received

ARGUMENTS IN SUPPORT: According to the American Council of Engineering Companies of California, "SB 1205 aligns with this policy by reinforcing a 5% on retention for contracts involving design professionals working with public agencies. It also supports timely release of any retained funds, ensuring payments are issued within 60 days after completion of services."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Money laundering: digital assets

SOURCE: Department of Justice

DIGEST: This bill, until January 1, 2032, expands the crime of money laundering to include digital assets, and establishes a process by which a law enforcement officer or prosecuting agency may seize digital assets that contain proceeds of a crime, are traceable to a crime, or have been used to facilitate a crime, as specified, for the purpose of returning those assets to a victim.

Assembly Amendments applies this bill's provisions to "digital assets," as defined, rather than "digital financial assets"; limit the crimes for which related digital assets may be seized; require the prosecution to meet an initial evidentiary burden; establish a limited appeals process for resolved claims; require seized funds to

revert to the Restitution Fund after a specified period; strikes an intent statement regarding jurisdiction; creates reporting requirements for local law enforcement and prosecuting agencies; sunsets this bill's provisions in 2032.

ANALYSIS:

Existing law:

1) The Digital Financial Assets Law (DFAW), generally governs the digital financial asset business activity of a person doing business in California or, wherever located, who engages in or holds itself out as engaging in the activity with, or on behalf of a resident, except for activity by several specified entities. (Financial (Fin.) Code, §§ 3101 et. seq.)

2) Defines "digital financial asset" and "digital financial asset business activity" for the purposes of DFAW. (Fin. Code, § 3102, subds. (g), (i).)

3) Provides that, beginning July 1, 2025, a person shall not engage in digital financial asset business activity, or hold itself out as being able to engage in digital financial asset business activity, with or on behalf of a resident of the state unless any of several specified conditions are true. (Fin. Code, § 3201; see id., §§ 3201-3225.)

4) Defines "criminal profiteering" as an act committed or attempted or a threat made for financial gain or advantage, which act or threat may be charged as a crime under several specified criminal statutes, including as embezzlement, extortion, receiving stolen property, violation of laws governing corporate securities, money laundering, offenses relating to unauthorized access to computers, computers systems, or computer data, and several others. (Penal (Pen.) Code, §186.2)

5) Provides that in any case in which a person is alleged to have been engaged in a pattern of criminal profiteering activity, as defined, upon a conviction of the underlying offense, the assets specified assets shall be subject to forfeiture upon proof of the profiteering activity. (Pen. Code, §186.3, subd. (a).)

6) Sets forth requirements and procedures regarding a forfeiture action filed by the prosecution resulting from criminal profiteering crimes. (Pen. Code, §§ 186.4 – 186.8.)

7) Provides that any person who conducts or attempts to conduct a transaction or more than one transaction within a seven-day period involving a monetary instrument or instruments of a total value exceeding $5,000, or a total value

exceeding $25,000 within a 30-day period, through one or more financial institutions (1) with the specific intent to promote, manage, establish, carry on, or facilitate the promotion, management, establishment, or carrying on of any criminal activity, or (2) knowing that the monetary instrument represents the proceeds of, or is derived directly or indirectly from the proceeds of, criminal activity, is guilty of the crime of money laundering. (Pen. Code, § 186.10, subd. (a).)

8) Provides that the aggregation periods do not create an obligation for financial institutions to record, report, create, or implement tracking systems or otherwise monitor transactions involving monetary instruments in any time period. (*Ibid.*)

9) Provides that in consideration of the constitutional right to counsel afforded by the Sixth Amendment to the United States Constitution and Section 15 of Article I of the California Constitution, when a case involves an attorney who accepts a fee for representing a client in a criminal investigation or proceeding, the prosecution shall additionally be required to prove that the monetary instrument was accepted by the attorney with the intent to disguise or aid in disguising the source of the funds or the nature of the criminal activity. (*Ibid.*)

10) Provides that a violation of this statute shall be punished by imprisonment in a county jail for not more than one year or as a realigned felony, by a fine of not more than $ 250,000 or twice the value of the property transacted, whichever is greater, or by both that imprisonment and fine. However, for a second or subsequent conviction for a violation of this section, the maximum fine that may be imposed is $500,000 or five times the value of the property transacted, whichever is greater. (*Ibid.*)

11) Provides that, for the purposes of this statute, each individual transaction conducted in excess of $5,000, each series of transactions conducted within a seven-day period that total in excess of $5,000, or each series of transactions conducted within a 30-day period that total in excess of $25,000, shall constitute a separate, punishable offense. (Pen. Code, § 186.10, subd. (b).)

12) Provides that in any instance where money laundering is punished as a felony, the defendant shall be subject to additional terms of imprisonment depending on the value of the transaction or transactions. (Pen. Code, § 186.10, subd. (c)(1).)

13) Specifies that any additional term of imprisonment shall not be imposed unless the facts of a transaction or transactions, or attempted transaction or transactions,

of the alleged value, are charged in the accusatory pleading, and are either admitted to by the defendant or are found to be true by the trier of fact. (Pen. Code, § 186.10, subd. (c)(2).

14) Creates the Restitution Fund to facilitate the restitution of victims of crime who incur an economic loss as a result of the commission of a crime. (Pen. Code, § 1202.4; Gov. Code, §§ 13950 et. seq.)

This bill:

1) Expands the crime of money laundering to include digital assets, but only until January 1, 2032.

2) Defines “digital asset” as any digital representation of value which is recorded on a cryptographically secured distributed ledger or similar technology.

3) Authorizes a law enforcement officer or public prosecutor to obtain a search warrant to seize digital assets or wallets, accounts, or similar things containing digital assets (collectively "digital assets") upon a showing of probable cause that the assets meet either of the following:

   a) Contain or have contained the proceeds of a crime or proceeds traceable to a specified crime.

   b) Have been used to facilitate a specified crime.

   c) Contain or have contained digital assets involved in money laundering or traceable to such property.

4) States that the warrant application shall specify any centralized exchanges, custodians of digital assets, addresses, or other locations assets from which digital assets will be seized, and that the affidavit shall describe how the warrant will be served, such as delivery to a known law enforcement portal of a person engaged in business activity related to digital assets.

5) Provides that the search warrant shall specify the amount of digital assets to be seized from each location, and that the search warrant may authorize seizure of either:

   a) All digital assets where money laundering can be shown or digital assets traceable to such property, or

   b) The amount of digital assets traceable to crime.

6) Specifies that the search warrant may authorize seizure of digital assets related to crimes and victims in other jurisdictions so long as jurisdiction relating to a California crime is established.

7) Authorizes a law enforcement officer to send a written request to freeze digital assets to allow time to pursue a search warrant pursuant to this bill, and requires a person or group of persons receiving such a request to freeze the relevant digital assets for ten calendar days from receipt of the request, if the person or group is capable of complying.

8) Authorizes the centralized exchange, digital assets issuer, or other party to notify the possessor of the digital assets that they have been frozen at the request of a California law enforcement agency.

9) Provides that the court shall issue a warrant where jurisdiction is established and probable cause appears in the affidavit.

10) Requires law enforcement, upon issuance of the warrant, to execute the warrant by taking the digital assets into law enforcement custody for safekeeping or taking such other actions as are necessary to prevent the property from being transferred or dissipated.

11) States that within 180 days of any seizure of digital assets conducted pursuant to a warrant, a public prosecutor may initiate a special proceeding of a criminal nature by applying to the court on behalf of the People of the State of California to forfeit the seized digital assets, but if no such proceeding is initiated, and no other law prohibits the return, the seized digital assets shall be returned to the party from whom they were seized, unless prohibited by law. The prosecuting agency shall have the initial burden of establishing by a preponderance of the evidence as shown in a declaration attached to the application, that the seized property falls within the crimes defined by the amended search warrant statute. The court shall summarily dismiss the application if it does not establish that the property falls within the crimes defined by the amended search warrant statute.

12) Provides that if a special proceeding is initiated, the public prosecutor must make efforts reasonably calculated to provide notice to all readily ascertainable potential owners of such property, and anyone with a known security interest. Each person noticed has thirty days to file a verified claim. The thirty-day period begins on the date of service. The court shall not extend the time for filing a claim unless a potential claimant files a request for extension of time, including a declaration showing good cause for the extension. For a special proceeding,

the court shall be required to make a finding on the record that establishes by a preponderance of the evidence the court's jurisdiction over the property at issue.

13) States that a verified claim must be filed under penalty of perjury and supported by admissible evidence, and that the claimant bears the burden by a preponderance of the evidence to show that the seized digital assets belong to the claimant and were obtained by legitimate means.

14) Establishes that if the claimant is a natural person the claim must include specified identifying information regarding the claimant, including a photograph of the claimant and of an identity document, as specified, and must respond to all allegations in the petition for forfeiture and be supported by the evidence upon which the claimant intends to rely. If the claimant is a legal entity recognized by California law, the verified claim shall set forth the legal entity's registered name and business address, as well as the telephone number and email address of its authorized representative.

15) Specifies that upon filing of a claim, unless it is denied as plainly without merit, the court shall give the prosecuting agency time to file a response with any additional evidence and argument related to the claim, and considering all relevant evidence, shall decide the claim and file an order resolving the claim or setting a hearing.

16) States that any resolution of disputed issues related to a claim shall be at a court hearing, and that the court may halt proceedings at any time if it determines that it has sufficient information to resolve the claim and issue an ordering resolving the validity of the claim, as specified.

17) Provides after all claims are resolved, the court shall issue a final judgement forfeiting the remaining digital assets. The judgment may be reviewed only by a writ of mandate from the court of appeal. Unless the court of appeal issues a stay, after 30 days ownership the forfeited digital assets shall immediately transfer to the prosecuting agency for distribution to the victims, as specified.

18) Requires the seized funds to be used to compensate victims of the crimes or fraud schemes underlying an action pursuant to this bill, up to the value of their actual loss, and authorizes the prosecuting agency to establish a claims procedure to include victims whose cases were not used to establish the underlying crimes or fraud schemes, subject to specified requirements.

19) States that if a prosecuting agency determines that a claims procedure to identify additional victims is inappropriate or impractical, the agency shall still be

required to return funds to all victims whose cases were used as part of this action on a pro rata basis up to the amount of the actual loss.

20) Establishes that any digital assets not distributed to victims as set forth above shall be kept in the custody of the law enforcement or prosecuting agency for a maximum of three years, upon which time the assets shall be deposited into the Restitution Fund exclusively for the purpose of providing victim services.

21) Provides that a special proceeding to recover digital assets may be filed in any county where any victim of the underlying crimes or fraud schemes resides or in any county where any portion of the crimes or underlying fraud schemes occurred, and may be prosecuted by a City Attorney, District Attorney, or the Attorney General.

22) Specifies the manner in which service of process may be made.

23) Sunsets the forfeiture process outlined above on January 1, 2032.

24) Requires, beginning July 1, 2028, and annually thereafter until 2032, a prosecuting agency or the law enforcement agency of a law enforcement officer that seeks a search warrant to seize property pursuant to this section to report to the Department of Justice specified information related to search warrants and property seized:

25) Provides that on or before January 1, 2029, and annually thereafter until 2032, the Department of Justice shall report the information provided to the Legislature and publish it on its internet website.

26) Includes legislative findings and declarations.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Court cost pressures of an unknown, but potentially significant amount (Trial Court Trust Fund, General Fund). The Judicial Council identifies four sources of workload:
    - Expanding the crime of money laundering would generate additional hearings, in a volume dependent on how often filings are brought.
    - The bill's search warrant requirements would likely lead to additional warrants being submitted for judicial determination and would require

additional time to review the jurisdictional questions the bill poses; the Judicial Council characterizes this as an unknown, potentially significant impact on judicial officer workload.

- The new civil asset forfeiture procedure would generate new hearings involving an unknown number of claimants.

- The Judicial Council states that under existing case law, each claimant could request a jury trial to establish a claim and recover the assets, and the Judicial Council states that depending on the total number of filings and the mix of bench and jury trials, the new forfeiture process could create significant impacts on court calendars at both the trial and appellate levels.

- Actual cost pressures will depend on the number of proceedings prosecuting agencies elect to bring and the complexity of each. Although courts are not funded on the basis of workload, increased pressure on the Trial Court Trust Fund (TCTF) may create a demand for increased funding for courts from the General Fund (GF). The state budget provides annual GF backfills to the TCTF to offset revenue reductions, totaling approximately $117.3 million in 2025-26.

- Costs of an unknown amount (GF) to the Department of Justice (DOJ) to develop the reporting manner and format, receive and compile submissions from prosecuting agencies and law enforcement agencies statewide beginning July 1, 2028, and prepare and publish an annual report to the Legislature on or before January 1, 2029, and annually thereafter through the repeal

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Zero- and near-zero-emission medium- and heavy-duty vehicles: incentives: transparency

SOURCE: Author

DIGEST: Makes the inclusion of any medium- and heavy-duty vehicle in specified incentive programs that the California Air Resources Board (CARB) and

the California Energy Commission (CEC) administer conditioned on the original equipment manufacturer (OEM) complying with certain transparency requirements around vehicle pricing.

Assembly Amendments expand CARB's considerations and requirements in administering grant programs and make other technical and conforming changes.

ANALYSIS:

Existing law:

1) Establishes the Air Resources Board (CARB) as the air pollution control agency in California and requires CARB, among other things, to control emissions from a wide array of mobile sources and coordinate, encourage, and review the efforts of all levels of government as they affect air quality. (Health and Safety Code (HSC) §39500 et seq.)

2) Establishes the Greenhouse Gas Reduction Fund (GGRF) in the State Treasury, requires all monies, except for fines and penalties, collected pursuant to a market-based mechanism be deposited in the fund. (Government Code §16428.8)

3) Establishes the Clean Truck, Bus, and Off-Road Vehicle and Equipment Technology Program to be administered by CARB in conjunction with the California Energy Commission (CEC) to fund development, demonstration, precommercial pilot, and early commercial deployment of zero- and near-zero-emission truck, bus, and off-road vehicle and equipment technologies through a number of incentive programs. (HSC §39719.2)

4) Establishes the Alternative and Renewable Fuels and Vehicle Technology Program (known as the Clean Transportation Program, or CTP), administered by the California Energy Commission (CEC), to develop and deploy technologies and alternative and renewable fuels to help attain the state's climate change policies, and provides funding for the CTP from miscellaneous vehicle-related charges including vehicle registration fees, boat registration fees, and special license identification fees. **(**HSC § 44272)

This bill:

1) Makes findings and declarations regarding the value and importance of competition and transparency in California's ZEV fleet.

2) Establishes transparency requirements for ZEV incentives, including requiring the original equipment manufacturer (OEM) to provide the manufacturer's suggested retail price (MSRP) for all ZEVs that may be funded by California ZEV incentives; a final purchase order for each vehicle that contains specified information; and any data needed to effectively track vehicle pricing behavior, as specified, to the administering agency quarterly.

3) Requires all medium- and heavy-duty vehicle incentive programs that receive funding from GGRF, the California Clean Fuel Reward (funded through the Low-Carbon Fuel Standard), or the Clean Transportation Program to comply with the above transparency requirements.

4) Requires CARB to, in coordination with the CEC, every 6 months, compile and make available publicly the above data, as specified.

5) Establishes penalties for noncompliance, including immediate suspension of eligibility for state incentive programs, recovery of previously dispersed funds found to be based on false data or through anticompetitive pricing or sales behavior, and allowing CARB to coordinate with the Attorney General to investigate.

6) Directs CARB to annually reevaluate the cap on the purchase of unredeemed state vouchers under HVIP with the goal of increasing the cap (to a maximum of 90% of the total purchase price) to maximize the benefits of ZEVs deployed, and to increase the cap on vehicles that provide a direct and meaningful benefit, as determined by CARB, to DACs.

7) Requires CARB, on or before January 1, 2028, in coordination with the Governor's Office of Business and Economic Development (GO-Biz) and the Infrastructure and Economic Development Bank (IBank) to explore alternative financing opportunities to encourage the deployment of medium- and heavy-duty ZEVs, and report those findings to the Legislature, as specified.

Background

California's transportation emissions. The transportation sector has long relied on liquid petroleum fuels as the primary energy source for internal combustion engine (ICE) vehicles, including cars, trucks, locomotives, marine equipment, and aircraft.

Combustion of fossil fuels in vehicles emits significant amounts of GHGs, criteria pollutants, and toxic air contaminants. In 2019, the transportation sector accounted for approximately 50% of statewide GHG emissions and thus was by far the single largest source of carbon pollution in the state. In addition, the transportation sector accounted for over 80% of statewide NOx emissions and 30% of fine particulate matter emissions, including toxic diesel particulate matter.

While we have made substantial progress over the past few decades, it is clear California must transition away from fossil fuels to zero-emission technologies with all possible speed and pursue policies that result in less driving, to meet its GHG and air quality targets.

The Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project. HVIP accelerates the deployment of zero-emission and plug-in hybrid trucks and buses, and trucks equipped with electric power take off systems, in California. HVIP stimulates deployment of advanced clean commercial vehicles, with the goal of improving community health with immediate air pollution emission reductions, as well as reducing greenhouse gas emissions to help meet State climate goals, and yielding substantial economic benefits. In addition, HVIP provides increased incentives for small fleets domiciled in disadvantaged communities and meeting other requirements.

The complicated relationship between California and truck manufacturers. California occupies a unique position as the state with both the most ambitious vehicle emission standards and the state with the largest vehicle fleet. This has been particularly fraught in recent years, as actions taken by the federal government have repeatedly and significantly eroded California's longstanding authority to set and enforce stricter-than-required vehicle emission standards.

a) *The Clean Truck Partnership and ensuing legal difficulties.* Signed by manufacturers and CARB in July 2023, the Clean Truck Partnership was designed to align state and federal emissions standards while ensuring manufacturers continue advancing zero-emission vehicle technology. In the agreement, the manufacturers pledged to meet California's Advanced Clean Trucks and Omnibus regulations regardless of federal legal outcomes, and to refrain from challenging California's authority to set stricter emissions rules. CARB, in turn, agreed to revise certain heavy-duty engine standards and provide manufacturers with regulatory flexibility and longer lead times to comply with emissions rules.

However, after the Partnership had been established, the federal government changed and subsequently intervened. Under the current administration, the U.S. Department of Justice advised manufacturers that the Clean Truck Partnership was preempted by federal law, and the Federal Trade Commission asserted that the Clean Truck Partnership ran afoul of antitrust laws.

In August of 2025, plaintiffs Daimler Truck North America, International Motors, PACCAR, and Volvo Group North America filed a lawsuit against CARB alleging that California was attempting to require compliance with heavy-duty truck emissions standards that Congress recently preempted under the federal Clean Air Act.[1] In October of 2025, CARB filed a suit against the above plaintiffs, alleging that they violated the terms of the Clean Truck Partnership, and sought to compel companies to either uphold their commitments or compensate the state accordingly.[2] In November of 2025, a federal judge temporarily block California from enforcing the Clean Truck Partnership while the case proceeds.[3]

b) *Truck Availability Analysis.* After the Clean Truck Partnership was established but still under the Biden presidency, a separate dispute was unfolding. Based on consistent feedback CARB had been receiving in developing and amending regulations involving heavy-duty trucks, an investigation was launched into how OEMs were responding to said regulations. A report published by CARB in September of 2024 found that certain provisions intended to allow flexibility in OEMs' compliance were instead being used to mislead dealers.[4] Specifically, CARB found that, "Through discussions with manufacturers, dealers, and fleets, it appears numerous manufacturers have begun to inform their customers they will be applying future requirements to purchase ZEVs before they can acquire combustion vehicles to each of their dealer or upfitters regardless of the types of vehicles they sell as ZEVs." CARB emphasized that this was not required in the regulations, and that flexibility was in fact provided to avoid such situations.

[1] Truck OEMs Challenge Clean Truck Partnership in Federal Court. August 11, 2025. **https://www.act-news.com/news/truck-oems-file-federal-lawsuit-against-carb-over-clean-truck-partnership/**
[2] CARB Takes Legal Action Against Truck OEMs in Clean Truck Dispute. October 29, 2025. **https://www.act-news.com/news/carb-takes-legal-action-against-truck-oems-in-clean-truck-dispute/**
[3] Federal Court Pauses Enforcement of California's Clean Truck Partnership. November 4, 2025 **https://www.act-news.com/news/federal-court-pauses-enforcement-of-ctp/**
[4] **https://ww2.arb.ca.gov/sites/default/files/2024-09/240925_actmemo_ADA_0.pdf**

Moreover (and most germanely to SB 1213), CARB reported investigations into pricing discrepancies between ZEV and ICE trucks between California and Europe. Despite largely the same major manufacturers operating in both jurisdictions, CARB found that ZEV heavy-duty tractors cost on average $88,828 more in California versus Europe (or $51,784 when accounting for all other incremental price differences).[5] Furthermore, in the 2021-2022 range CARB assessed, they found that California's ZEV trucks increased by $86,512 at the same time that Europe's ZEV trucks decreased by $12,641. Ultimately, CARB stated that, "There appear to be no clear reasons for this disparity between regions."[6]

Comments

1) *Purpose of Bill.* According to the author, "California is a leader in the deployment of clean medium and heavy-duty vehicles, both to meet our clean transportation goals and mitigate the detrimental public health impacts that pollutants such as PM2.5 and NOX have on our most vulnerable communities. To deploy these vehicles as quickly as possible, the state has invested in programs such as California's Clean Truck and Bus Voucher Incentive Project (HVIP), which delivered more than $1 billion in funding to fleets statewide since its inception, supporting more than 11,600 clean vehicles statewide.

   "Though these incentives were structured to reduce the cost of transitioning to cleaner transportation, recent research from the International Council on Clean Transportation found that the average price of electric trucks in the US has increased by 32% even as battery costs have declined and electric truck prices in the European Union have fallen by 27% over the same period. The rise in the sticker price of these trucks indicates that more needs to be done to ensure our state's incentives to transition to cleaner fleets are transparent and competitive.

   "SB 1213 maintains California's leadership in the deployment of clean medium and heavy-duty vehicles (MHDV) by placing price transparency requirements on incentive programs. In addition, it increases the cap on the number of vehicles that can be covered through vouchers, and directs the state to explore alternative financing models by 2028. These alternative funding models are intended to help bring in more private capital to the space as well, decreasing the ultimate need for state funding, and moving the market to a time when

[5] Ibid
[6] Ibid

financing for a zero emission truck will be as affordable and easy to get as any other loan."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) CARB estimates costs of about $3.8 million in the first year and $2.5 million annually thereafter (GGRF and Cost of Implementation Account) for about 1,210 positions and contract funding to annually reevaluate the cap on the purchase of unredeemed state vouchers issued through HVIP and associated requirements; include transparency requirements for programs that receive GGRF funding (like HVIP, the Sustainable Heavy-Duty Initiatives for Future Technology program, the Innovative Small e-Fleet pilot program, the Zero-Emission School Bus and Infrastructure Program, and others); make necessary implementation manual revisions to include new data to be collected; conduct public engagement and coordinate with stakeholders; coordinate with third-party administrators to collect additional information from OEMs and, in cases where manufacturer suggested retail prices (MSRPs) are unavailable, identify and collect surrogate information; evaluate and anonymize data from OEMs and update vehicle model eligibility on an ongoing basis; and coordinate with GO-Biz and IBank on reporting requirements.

2) GO-Biz estimates a one-time cost of approximately $78,000 annually (General Fund or special fund) to coordinate across agencies, perform research, collaborate with private sector stakeholders; and support other ad hoc report needs.

3) IBank anticipates that consulting with ARB and GO-Biz on possible alternative funding opportunities for a report would result in minor and absorbable costs. However, if IBank is to perform more extensive work and research on the required report, IBank anticipates a one-time cost of approximately $68,000 (General Fund or special fund).

4) CEC anticipates any costs would be minor and absorbable.

NO VOTE RECORDED: Niello

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Fairs: contracting

SOURCE: Author

DIGEST: This bill would prohibit a fair from issuing any invitation to bid or request for proposal, in connection with the awarding of a contract, for services to any person or entity, in a manner that limits the bidding directly or indirectly to any one bidder. The bill would make any contract awarded in violation of this prohibition void.

Assembly Amendments Clarify exemptions for emergencies, as defined in Section 1102 of the Public Contract Code, when a contract is necessary for the immediate preservation of public health, welfare, or safety, or the protection of property, as well as contracts with musicians or musical groups for live performance events.

ANALYSIS:

Existing law:

1) Establishes the California Department of Food and Agriculture (CDFA) Fairs & Expositions (F&E) Branch. The F&E provides fiscal and policy oversight of the network of California fairs (Food and Agricultural (FAC) Code Section 3001-4703).

2) Defines "fair," or "state-designated fairground," to mean:

   a) The California Exposition and State Fair in the City of Sacramento and those fairs specified in Sections 3102, 3103, and 3104 that may receive financial support or are otherwise governed pursuant to this chapter. These fairs may also be referred to as part of the "network of California fairs."

   b) A nonprofit organization that holds an annual fair pursuant to Section 4163 may elect to be a member of the network of California fairs on terms and conditions mutually agreed upon by the department and the nonprofit organization.

   c) A joint powers agency that holds an annual fair pursuant to Section 4171 may elect to be a member of the network of California fairs on terms and conditions mutually agreed upon by the department and the joint powers agency (FAC Section 3101).

3) Defines the district agricultural associations and their locations (FAC Section 3102).

4) Defines the county fairs and their locations (FAC Section 3103).

5) Defines the citrus fruit fairs and their locations (FAC Section 3104).

6) States the board must establish and publish competitive bidding procedures for the award of a procurement or contract involving an expenditure of more than $100,000.

7) States the competitive bidding procedures shall include, but not be limited to:

   a) Requirements for submission of bids and accompanying documentation

   b) Guidelines for the use of requests for proposals (RFP), invitations to bid, or other methods of bidding

c) A bid protest procedure (FAC Section 4051(b)(1)).

8) Mandates that any change of the RFP rules must be communicated to all vendors (California Public Contract Code Section 12104.5).

9) Prohibits a state agency from drafting an RFP on a public contract for services to be rendered to the state in a way that directly or indirectly limits bidding to any one bidder. Any contract awarded in violation of subdivision (a) shall be void (Public Contract Code Section 10339(a) and (b)).

10) The Department of General Services (DGS) shall prescribe the following:

a) The conditions under which a contract may be awarded without competition, and the methods and criteria which shall be used in determining the reasonableness of contract costs when a contract is awarded without competition.

b) Any special requirements for evaluating multiple-year contracts which the department deems necessary to protect the financial interest of the state.

c) For contracts of less than twenty thousand dollars ($20,000), the conditions under which some or all of the provisions of this article may be waived in order to assist agencies in obtaining services and consultant services in a efficient and timely manner (Public Contract Code Section 10348).

d) The California Department of General Services State Administrative Manual (SAM) exempts from competitive bidding public entertainment contracts for state-sponsored fairs and expositions (SAM Section 1233, Management Memo 03-10).

This bill:

1) Adds Section 3107 to the Food and Agricultural Code to state:

a) A fair shall not issue any invitation to bid or request for proposal, in connection with the awarding of a contract, for services to any person or entity, in a manner that limits the bidding directly or indirectly to any one bidder.

b) Any contract awarded in violation of subdivision (a) shall be void.

c) Provides exemptions to this code emergencies, as defined in Section 1102 of the Public Contract Code, when a contract is necessary for the immediate

preservation of public health, welfare, or safety, or the protection of property, as well as contracts with musicians or musical groups for live performance events.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

This bill passed out of the Senate Committee on Appropriations via Senate Rule 28.8.

SUPPORT: (Verified 8/26/26)

None received

OPPOSITION: (Verified 8/26/26)

None received

ARGUMENTS IN SUPPORT: According to the author:
According to the author:

"California's fairs are a tradition that brings communities together each year to celebrate and enjoy local agriculture, food, and entertainment. In order for these fairs to operate, they manage millions of dollars in contracts each year to provide rides, food vendors, and other services. Recent investigations have revealed that competitive bidding requirements do not apply to state fairs. Bids are being written in a way that applies only to a single contractor, opening the door to favoritism and corruption. SB 1223 would prohibit a fair from issuing a request for proposal or invitation to bid that is written in a way that applies only to one party, helping to protect competitive bidding in fair contracts."

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Department of Industrial Relations: apprenticeship pilot program

SOURCE: Author

DIGEST: This bill requires the Department of Industrial Relations (DIR) and the Department of Human Resources (CalHR) to partner with their respective bargaining units to design and develop an apprenticeship program, as specified, addressing DIR's staffing challenges for filling civil service classification positions.

Assembly Amendments place the bill's provisions in the Government Code instead of the Labor Code and make corresponding changes to code section and chapter numbers.

ANALYSIS:

Existing law:

1) Establishes the Division of Apprenticeship Standards (DAS) within the Department of Industrial Relations to oversee apprenticeship programs and requires the Chief of the Division (Chief) to perform various functions to promote the welfare of apprentices. (Labor Code §3070 et seq.)

2) Creates, within DAS, the Interagency Advisory Committee on Apprenticeship (IACA), which provides advice and guidance to the Administrator of Apprenticeship and Chief on the development and administration of standards governing preapprenticeship, certification, and on-the-job training and retraining programs outside the building and construction trades and firefighters. (Labor Code §3071.5)

3) Requires DAS to evaluate apprenticeship programs to ensure compliance with specified standards, including that all on-the-job training is properly supervised, that classroom instruction is provided, and that funds were properly obtained and expended. (Labor Code §3073.1)

4) Authorizes a joint apprenticeship committee, unilateral management or labor apprenticeship committee, or an individual employer to administer an apprenticeship program. The Chief may approve programs in any trade in the state or in a city or trade area, whenever the apprentice training needs justify the establishment. Where a collective bargaining agreement exists, a program shall be jointly sponsored unless either party to the agreement waives its right to representation in writing. (Labor Code §3075(a))

5) Defines "apprentice" to mean a person at least 16 years of age who has entered into a written agreement, or apprentice agreement, with an employer or program sponsor. The Chief shall approve the term of apprenticeship for each apprenticeable occupation, as specified. (Labor Code §3077)

6) Provides that the term of apprenticeship may be measured either through the completion of the industry standard for hours of on-the-job learning and related and supplemental instruction, attainment of competency, or a hybrid blend of the time-based and competency-based approaches, as specified, but that programs in the building and construction trades and for firefighters shall use the time-based approach. (Labor Code §3078.5)

7) Requires the local joint apprenticeship committee or the parties to a collective bargaining agreement, or the administrator where there is no collective bargaining agreement or joint committee to approve apprentice agreements. Every apprentice agreement shall be signed by the employer, or his or her agent, or by a program sponsor, as specified, and by the apprentice. (Labor Code §3079)

8) Provides that neither existing law nor approved apprentice agreements can operate to invalidate any apprenticeship provision in any collective bargaining agreement between employers and employees setting up higher apprenticeship standards. (Labor Code §3086)

9) Provides that acceptance of an application for entrance into an apprenticeship program shall not be predicated on the payment of any fee, but that reasonable costs for expense incurred may be charged after an applicant has been accepted into the program. (Labor Code §3091)

10) Allows apprenticeship sponsors to include local educational agencies (LEAs), institutions of higher education (IHEs), labor organizations, and nonprofits, and encourages alignment of apprenticeship programs with affirmative action and public sector workforce needs. (Labor Code §§3075, 3075.1)

11) Creates the state civil service that includes every officer and employee of the state except a limited number of specified, exempted officers and employees. Existing law also requires that the state make "permanent appointment and promotion in the civil service under a general system based on merit ascertained by competitive examination." Case law and custom refer to this provision as the merit principle and it governs the administration of the state's civil service system. (California Constitution (CA CONST.) art. VII, §1 and §4)

12) Creates the State Personnel Board (SPB) to enforce the civil service statutes and prescribe probationary periods and classifications, adopt other rules authorized by statute, and review disciplinary actions. (CA CONST. art. VII, §2 and §3)

13) Establishes the State Civil Service Act to facilitate the operation of the Constitution's merit principle for the state civil service. (Government Code §18500).

14) Creates the California Department of Human Resources (CalHR) and vests it with the powers, duties, and authorities necessary to operate the state civil

service system pursuant to Article VII of the California Constitution, the Government Code, the merit principle, and applicable rules duly adopted by the State Personnel Board (SPB). (Government Code (GC) § 18502)

15) Requires SPB to establish minimum qualifications for determining the fitness and qualifications of employees for each class of position, including education, experience, knowledge, and abilities that each applicant is required to have to be considered eligible for a classification. CalHR may require applicants for examination or appointment to provide documentation as it deems necessary to establish the applicants' qualifications. (GC §18931)

16) Requires that an employee serve a probationary period under the following circumstances: (a) when the employee enters or is promoted in the state civil service by permanent appointment from an employment list, (b) upon reinstatement after a break in continuity of service resulting from a permanent separation, or (c) after any other type of appointment situation not specifically excepted from the probationary period requirement by statute or by board rule. (GC § 19171)

17) Requires SPB to establish for each class the length of the probationary period but also provides that the probationary period that shall be served upon appointment shall be six months unless the board establishes a longer period of not more than one year. (GC § 19170)

This bill:

1) Makes legislative findings and declarations, as specified.

2) Establishes the Department of Industrial Relations Apprenticeship Pilot Program within the Government Code.

3) Defines the following terms:

   a) "Apprenticeship program" or "program" means the apprenticeship pilot program or programs established pursuant to this bill.

   b) "Constitutional merit principle" means the merit principle contained in subdivision (b) of Section 1 of Article VII of the California Constitution.

   c) "Department" means the Department of Industrial Relations.

4) Requires DIR and CalHR on or before January 1, 2029, to partner with the bargaining units representing DIR employees to design and develop an apprenticeship program that addresses the DIR's staffing challenges for filling positions in civil service classifications.

5) Requires the apprenticeship program's design, development, and administration to meet the following requirements:

   a) Use the meet and confer process, collective bargaining, and joint apprenticeship committees in a manner that is consistent with the Ralph C. Dills Act, the Shelley-Maloney Apprenticeship Labor Standards Act of 1939, and provisions of the Labor Code governing apprenticeship.

   b) Be consistent with the constitutional merit principle, including, but not limited to, both of the following:
      i) Selection for participation in an apprenticeship, which shall be in accordance with court interpretations of the constitutional merit principle.
      ii) Completion of an apprenticeship under the program, which shall be merit-based in accordance with court interpretation of the constitutional merit principle.

   c) Only be implemented subject to an agreement between DIR and its employees' unions despite Government Code provisions that would otherwise permit DIR to impose its version of the program as its Last Best Final Offer.

6) Grants a joint apprenticeship committee operating under this bill's provisions all powers afforded to it by the Labor Code and the regulations pertaining to joint apprenticeship committees arising from the Labor Code notwithstanding any other law or regulation.

7) Permits the apprenticeship program candidates to include incumbent state employees and prospective state employees not yet employed in the civil service consistent with the bill's selection requirements regarding compliance with the merit principle.

8) Requires the apprenticeship program to do the following:

   a) Determine apprenticeship program classification pay scales through the collective bargaining process.

b) Provide for the accrual by participants of state service for purposes of seniority credit pursuant to applicable bargaining agreements and of service credit for retirement benefits pursuant to the Public Employees' Retirement Law for time employed in a civil service apprenticeship classification.

c) Consider participants who successfully complete an apprenticeship program as qualified and eligible for appointment to the journey classification by way of an apprentice transfer.

9) Declares that the apprenticeship program is intended to augment state capacity and improve recruitment and retention efforts for hard-to-fill job classifications and shall not displace incumbent workers employed in state service.

10) Prohibits anyone from construing the bill's provisions as limiting SPB's jurisdiction or authority with respect to the powers and authorities granted to it under the California Constitution.

Related/Prior Legislation

SB 75 (Smallwood-Cuevas, 2025) would have required the Department of Corrections and Rehabilitation (CDCR), in partnership with the Department of Industrial Relations (DIR) and recognized building and construction trades councils to establish the Pre-apprenticeship Pathways to Employment Pilot Program to provide incarcerated individuals with access to pre-apprenticeship training aligned with state-registered apprenticeships in the building and construction trades, no later than January 1, 2028. Governor Newsom vetoed the bill stating in part, "I encourage the Legislature to revisit this issue as part of next year's budget process, so that targeted investments in CDCR's rehabilitative programming can be considered in the context of ongoing work to assist the incarcerated population with reentry into the community."

AB 291 (Gipson, 2025) would have established the Credentialed Educator Apprenticeships Act to require the Commission on Teacher Credentialing (CTC) and the Division of Apprenticeship Standards (DAS) to disseminate, approve, and monitor credentialed educator apprenticeship programs in California. The bill was held in the Senate Appropriations Committee.

AB 694 (Gipson, 2024) would have authorized the establishment of a Teacher Residency Apprenticeship Program to address shortages in the educator workforce,

expand the pipeline into the teaching profession, and grow a diverse, local pathway into teaching. The bill was held in the Senate Appropriations Committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) "One-time General Fund costs of $950,000 and $900,000 ongoing annually for DIR to hire the additional staff necessary to implement and oversee expanded apprenticeship classifications.

2) One-time General Fund costs of $173,000 and $166,000 ongoing annually for CalHR to hire one additional staff member to oversee creation and monitoring of the new apprenticeship classification.

ARGUMENTS IN SUPPORT:

According to a coalition of worker advocacy organizations and labor unions, including the California Rural Legal Assistance Foundation and the United Steelworkers:

"California's system of labor law enforcement is foundational to protecting workers' wages, health, and safety, and to ensuring a level playing field for responsible employers. Yet, as recognized in SB 1227, persistent staffing shortages-exceeding 25 percent vacancy rates in recent years-have significantly undermined DIR's ability to fulfill its mission.

The crisis at the Division of Occupational Safety and Health (Cal/OSHA) underscores the urgency of action. As of November 1, 2025, 100 field inspector positions remain vacant–a 33 percent vacancy rate–and nine district offices report vacancy rates of 50 percent or higher. California has just one field inspector for every 99,000 workers, far fewer than peer states. These shortages delay enforcement: investigations into workplace complaints and accidents can take weeks or even months to initiate, leaving workers exposed to unsafe conditions. The consequences are clear–most complaints are handled through "letter investigations" rather than on-site inspections, citations in high-hazard industries are declining, and deterrence of unsafe practices is weakening.

The staffing crisis extends across DIR's enforcement agencies. At the Division of Labor Standards Enforcement (DLSE), chronic understaffing has produced a backlog of tens of thousands of wage claims, with workers often waiting two years or longer for resolution. DLSE does not have adequate staff to process its rapidly growing caseload and needs hundreds of additional positions to address both existing backlogs and new claims. High vacancy rates across field offices, combined with low salaries and inefficient hiring processes, continue to hinder recruitment and retention. As a result, wage theft too often goes unremedied, weakening enforcement of core labor standards and denying workers timely justice.

SB 1227 offers a forward-looking, proven solution by leveraging registered apprenticeship to build a strong, qualified pipeline into these essential enforcement roles. Apprenticeship is a time-tested, skills-based training model that combines hands-on, on-the-job learning with structured instruction. It allows workers to progressively demonstrate competency through real world application–an approach that aligns squarely with California's merit based civil service system."

UNFINISHED BUSINESS

Bill No: SB 1235
Author: Rubio (D), et al.
Amended: 8/18/26
Vote: 27 - Urgency

PRIOR SENATE VOTE NOT RELEVANT

NOTE: On August 11, 2026, the Senate Governmental Organization Committee held an informational hearing on the tribal-state gaming compact between the Fort Mojave Indian Tribe, and amendments to the tribal-state gaming compact between the State of California and the Pechanga Band of Indians, and amendments to the tribal state gaming compact between the State of California and the Picayune Rancheria of Chukchansi Indians of California.

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Tribal gaming: compact ratification

SOURCE: Author

DIGEST: This bill ratifies the Tribal-State Gaming Compact between the State of California and the Fort Mojave Indian Tribe. This bill also ratifies two separate amendments to the tribal-state gaming compacts entered into between the State of California and the Pechanga Band of Indians, and the Picayune Rancheria of Chukchansi Indians of California

Assembly Amendments delete the contents of this bill and instead ratify the Tribal-State Gaming Compact between the State of California and the Fort Mojave Indian Tribe and two separate amendments to the tribal-state gaming compacts between the State of California and the Pechanga Band of Indians, and the Picayune Rancheria of Chukchansi Indians of California.

ANALYSIS:

Existing law:

1) Provides, under the Indian Gaming Regulatory Act (IGRA), for the negotiation and conclusion of compacts between federally recognized Indian tribes and the State for the purpose of conducting Class III gaming activities on Indian lands within a State as a means of promoting tribal economic development, self-sufficiency, and strong tribal governments.

2) Authorizes expressly a number of tribal-state gaming compacts between the State of California and specified Indian tribes.

3) Authorizes the conduct of Class III gaming activities to the extent such activities are permitted by state law, a gaming compact has been concluded by a federally recognized tribe and the State, and the compact has been approved by the Secretary of the Interior.

4) Limits the operation of Class III gaming activities to Indian lands acquired on or before October 17, 1988. Provides, for certain exceptions to conduct gaming activities on Indian lands acquired after October 17, 1988.

5) Defines "Indian lands" to mean all lands within the limits of any Indian reservation, and any lands title to which is either held in trust by the United States for the benefit of any Indian tribe, or individual, or held by any Indian tribe or individual subject to restriction by the U.S. against alienation and over which an Indian tribe exercises governmental power.

6) Requires the State to negotiate to conclude a compact in good faith with an Indian tribe having jurisdiction over the Indian lands upon which the Class III gaming activity is to be conducted. Provides the U.S. district courts with jurisdiction over any cause of action initiated by a tribal government alleging that the State failed to negotiate in good faith to conclude a compact. Prescribes the remedy, mediation supervised by the courts, if it is found that the State failed to negotiate in good faith to conclude a compact.

7) Authorizes the Governor, under the California Constitution, to negotiate and conclude compacts, subject to ratification by the Legislature.

This bill:

1) Ratifies the tribal-state gaming compact between the State of California and the Fort Mojave Indian Tribe, execute on July 20, 2026.

2) Ratifies two separate amendments to the tribal-state gaming compacts entered into between the State of California and the Pechanga Band of India, and the Picayune Rancheria of Chuckchansi Indians of California

3) Provides that, in deference to tribal sovereignty, certain actions are not deemed projects for purposes of the California Environmental Quality Act (CEQA); and, stipulate, except as expressly provided, that none of the provisions shall be construed to exempt a city, county, or city and county, or the Department of Transportation from CEQA requirements.

4) Contains an urgency clause.

Background

Fort Mojave Indian Tribe Compact. The Tribal-State Gaming Compact between the Fort Mojave Indian Tribe was executed on July 20, 2026. The Compact authorizes the Tribe to operate a maximum of 1,200 slot machines at no more than two gaming facilities located on eligible Indian lands held in trust for the Tribe. The Tribe has agreed to pay the State its pro rata share of costs the State incurs for the performance of its duties under the Compact. The Compact does not require the Tribe to pay into the Revenue Sharing Trust Fund (RSTF) or the Tribal Nation Grant Fund (TNGF).

If the Tribe operates 350 slot machines the Compact requires the Tribe to pay 0.5% of Net Win to an Impact Mitigation Fund and distribute those funds to non-tribal law enforcement, emergency services, and service agencies with demonstrated impacts from the gaming facilities, as specified.

Certain terms of the Compact related to licensing, regulatory, patron protection, and public health provisions are substantially the same as recent compacts. Specifically, the Compact includes a Tribal Labor Relations Ordinance (TLRO), which provides that gaming may commence only after the Tribe has adopted a TLRO that allows for a secret ballot election and union neutrality.

The Compact's preamble notes that the Tribe and the State have concluded that this compact protects the interests of the Tribe and its members, the surrounding community, and the California public, and will promote and secure long-term stability, mutual respect, and mutual benefit.

The Fort Mojave Indian Tribe is a federally recognized tribe located along the Colorado River in the vicinity of Needles, California. The Tribe's reservation covers nearly 42,000 acres in the tri-state area of Arizona, California, and Nevada. The Tribe currently operates the Avi Resort and Casino in Laughing, Nevada, and the Spirit Mountain Casino in Arizona. While the Tribe entered into a tribal-state

gaming compact with the State of California in 2004 which authorized the Tribe to operate up to 1,500 slot machines, the Tribe does not operate a casino in California.

First Amendment to the Tribal-State Compact Between the State of California and the Pechanga Band of Indians. The First Amendment to the Tribal-State Gaming Compact between the State of California and Pechanga Band of Indians was executed on August 05, 2026. The Amended Compact amends an existing 2016 compact, to avoid potential litigation after the Ninth Circuit's decision in Chicken Ranch (See below). The Amended Compact allows the Tribe to operate an additional 1,000 machines. The Amended Compact also includes an approximate 20-year extension in exchange for the Tribe agreeing not to challenge the revenue terms during the life of the compact.

The Tribe's 2016 Compact requires the Tribe to pay $21 million to "Local Community Credit Fund (Fund)" which was established to provide funding to local jurisdictions for such things as improved fire, law enforcement, public transit, education, tourism, or other services. Rather than payments into the California Native American Education and Scholarship Fund, the Amended Compact requires the Tribe to pay an additional $3 million into the Fund beginning on January 1, 2027. Every year thereafter, the Tribe is required to pay an additional $2 million per year until reaching $32 million per year. The Amended Compact provides that the Tribe, in its sole discretion, can decrease the annual amount payable into the Fund, provided that the annual amount shall never be reduced by $21 million. The Amended Compact makes it clear that the Tribe "makes this decision in the exercise of its sovereignty and in furtherance of its longstanding commitment to the beneficial projects and purposed served by the Fund."

In 2016, the Tribe entered into a new tribal-state compact [ratified by AB 2358 (Gonzalez), Chapter 285, Statutes of 2016] that authorized the Tribe to operate up to 5,500 slot machines at no more than two gaming facilities located on those Indian lands held in trust for the Tribe. Under the terms of the 2016 Compact, the Tribe has agreed to pay into the Special Distribution Fund (SDF) its pro rata share of costs the State incurs for the performance of its duties.

The Tribe currently operates the Pechanga Resort and Casino, which was first opened in 2002 and currently employes approximately 5,000 employees. According to the Tribe's website, the Pechanga Resort and Casino has one of the largest casino floors in the country with 200,000 square feet of gaming space that

features, 5,500 slot machines, 152 table games, a High Limit Salon and private rooms.

First Amendment to the Tribal-State Compact Between the State of California and the Picayune Rancheria of Chuckchansi Indians of California. On June 11, 2026, the State of California agreed to a one-year extension with the Picayune Rancheria of Chukchansi Indians of California which is still operating under their original 1999 compact, to allow the Tribe to operate under the terms of their 1999 compact until December 31, 2027.

The State of California in 1999 and 2000 entered into over 60 tribal-state gaming compacts with tribes in California pursuant to the IGRA. These compacts are collectively referred to as the 1999 Compacts. The 1999 Compacts were for an initial 20-year term, with a termination date of December 31, 2020. However, the 1999 Compacts included an automatic 18-month extension to June 30, 2022. Four years ago, the State of California agreed to an additional 18-month compact extension with approximately 26 tribes that allowed them to operate under the terms of their 1999 compact until December 31, 2023. Three years ago, the State of California agreed once again to a one-year compact extension with 22 tribes who are still operating under their original 1999 compacts to allow them to operate under the terms of their 1999 compacts until December 31, 2024. Two years ago, the State of California once again agreed to a one-year compact extension with three tribes, including the Picayune Rancheria of Chukchansi Indians of California, which allowed these tribes to operate under the terms of their 1999 compacts until December 31, 2025. Last year, the State once again agreed to a one-year extension with the Picayune Rancheria of Chukchansi Indians of California, which allowed the tribe to continue to operate under the terms of their 1999 compact until December 31. 2026. A majority of the tribes with 1999 Compacts now have new compacts, but there are a handful of tribes that are still operating under the 1999 Compacts.

The 1999 Compacts allow, but do not require, the State and a tribe to amend the term of the Tribe's 1999 Compact by mutual and written agreement. To be effective, an amendment solely to extend the term of a 1999 Compact requires ratification by the California Legislature, but it does not require approval by the Secretary pursuant to 25 Code of Federal Regulations section 293.5.
The amendment to extend the 1999 Compacts until December 31, 2027, would not preclude the State and the 1999 Compact tribes from agreeing to further extensions should both agree it is appropriate.

The Picayune Rancheria of Chukchansi Indians of California are a federally recognized Indian tribe established by executive order in 1988 by the United States Government. The Picayune Rancheria, founded in 1912 and located in Coarsegold, California, covers 160 acres in Madera County and serves as the tribal land.

Today the Tribe operates the Chukchansi Gold Resort and Casino in Coarsegold, California. According to the casino's internet website, patrons can immerse themselves "in the dynamic atmosphere of our Firehouse Lounge and directly in front of California Market Buffet, where high-energy gaming awaits in a smoke-free haven." The casino boasts a 73,000 square-foot gaming floor and features 2,000 slot machines as well as a selection of 40 table games. Additionally, the facilities include 20 electric vehicle charging stations on the first and fourth floors of the parking garage.

Indian Gaming Regulatory Act. In 1988, Congress enacted IGRA to provide a statutory basis for the operation and regulation of gaming on Indian lands. IGRA provides that an Indian tribe may conduct gaming activity on Indian lands if the activity "is not specifically prohibited by federal law and is conducted within a State which does not prohibit such gaming activity."

IGRA distinguishes between three classes of gaming (Class I, Class II, and Class III) and provides for different forms of regulation for each class. Class I gaming includes "social games" for minor prizes or "traditional forms of Indian gaming." Class II gaming is defined to include bingo and card games that are explicitly authorized by the laws of the state, or that are not explicitly prohibited by the laws of the state and are played at any location in the State, so long as the card games are played in conformity with those laws and regulations. Class III gaming includes such things as slot machines, casino games, and banked card games such as black jack and baccarat. Class III gaming may only be conducted under terms of a compact negotiated between an Indian tribe and a State.

IGRA was enacted against a legal background in which Indian tribes and individuals generally are exempt from state taxation within their own territory. IGRA provides that with the exception of assessments permitted under the statute, to defray the State's costs of regulating gaming activity, IGRA shall not be interpreted as conferring upon a State authority to impose any tax, fee, charge, or other assessment upon an Indian tribe to engage in Class III activity. Nor may a State refuse to enter into negotiations based on the lack of authority to impose such a tax, fee, charge, or other assessment.

When a tribe requests negotiations for a Class III compact, IGRA requires the State to negotiate with the Indian tribe in good faith. IGRA provides a comprehensive process to prevent an impasse in compact negotiations, which is triggered when a tribe files suit alleging that the State has refused to negotiate or has failed to negotiate in good faith.

Before 2000, the California Constitution prohibited Class III gaming. In 2000, California voters approved Proposition 1A, which had been proposed by the Governor and passed by the Legislature. Proposition 1A amended the California Constitution to permit the State to negotiate compacts with federally recognized Indian tribes for certain Class III gaming activities. Because non-Indian parties were still forbidden from operating gaming facilities, Proposition 1A granted Indian tribes a "constitutionally protected monopoly on most types of Class III games in California."

Chicken Ranch Rancheria Decisions. In 2021, the Chicken Ranch Rancheria of Me-Wuk Indians, along with four other tribes—the Blue Lake Rancheria, Chemehuevi Indian Tribe, Hopland Band of Pomo Indians, and Robinson Rancheria—filed suit against the State of California and Governor Gavin Newsom. The tribes alleged that the state violated IGRA by failing to negotiate new Class III gaming compacts in good faith.

According to the complaint, California insisted on compact terms covering family law, environmental regulation, and tort liability—subjects that the tribes argued were outside IGRA's limited scope, which allows negotiation only on matters directly related to the operation of gaming activities. In July 2022, the Ninth Circuit Court of Appeals upheld the district court's finding that California's demands exceeded IGRA's bounds and therefore constituted bad-faith negotiations. The court ordered the parties to move forward under IGRA's remedial process. Under that process, if the parties are ultimately not able to agree on a compact, a mediator reviews each side's "last best offer" and selects the proposal that best aligns with federal law, and the U.S. Department of the Interior (through the Assistant Secretary for Indian Affairs) issues Secretarial Procedures regulating the tribe's gaming operation without state involvement.

This outcome was viewed by Indian tribes as a significant affirmation of tribal sovereignty and a rejection of state overreach in tribal gaming regulation. The Governor's office believes the terms of this Compact are consistent with this court decision

Revenue Sharing Trust Fund (RSTF). Existing law creates in the State Treasury the RSTF for the receipt and deposit of moneys derived from gaming device license fees that are paid into the RSTF pursuant to the terms of specified tribal-state gaming compacts for the purpose of making distributions to non-compacted California tribes (e.g., federally-recognized non-gaming tribes and tribes that operate casinos with fewer than 350 slot machines).

Revenue in the RSTF is available to the California Gambling Control Commission, upon appropriation by the Legislature, for making distributions of $1.1 million annually to non-compact tribes. The RSTF was created as part of the 1999 compacts, which, in conjunction with the passage of Proposition 1A, created gaming compacts with approximately 60 California tribes. Non-compact tribes are considered third-party beneficiaries of the 1999 compacts.

Tribal Nation Grant Fund. This particular fund was created to complement the RSTF and provides for the distribution of funds to non-gaming tribes, upon application of such tribes for purposes related to effective self-governance, self-determined community, and economic development. Payments from this fund are intended to be made to non-gaming tribes on a "need" basis, upon application.

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Common interest developments: management

SOURCE: California Association of Realtors

DIGEST: This bill 1) provides that a duty of care for any managing agent, including its employees, that facilitates activities under the Davis-Stirling Common Interest Development Act (the Act) is owed to the homeowners' association (HOA) and its members; 2) requires disclosure of specified information related to exterior elevated elements (EEEs) to a prospective purchaser of a separate interest in the common interest development (CID); and 3) makes other changes to the Act related to financial and capital planning documents.

Assembly Amendments add a copy of the master insurance policy for an HOA to the list of required disclosures prior to the sale of a separate interest in an HOA, recast provisions of the bill to clarify that EEEs identified in the nine-year EEE inspection report are considered “major components” for the purposes of the three-year reserve study, and addresses chaptering conflicts with AB 739 (Jackson), and AB 2050 (Laird).

ANALYSIS:

Existing law:

1) Establishes, within the Davis-Stirling CID Act, rules and regulations governing the operation of CIDs and the respective rights and duties of a HOA and its members. Requires the governing documents of a CID, and any amendments to the governing documents, to be adopted through HOA elections in accordance with specified procedures.

2) Establishes, within the Davis-Stirling CID Act, rules and regulations governing the operation of CIDs and the respective rights and duties of a HOA and its members. Requires the governing documents of a CID, and any amendments to the governing documents, to be adopted through HOA elections in accordance with specified procedures.

3) Requires the HOA board of a CID with buildings containing three or more multifamily units to cause a reasonably competent and diligent visual inspection to be conducted of EEEs for which the HOA has maintenance or repair responsibility, as specified.

4) Requires the inspection to determine whether the EEEs are in a generally safe condition and performing in accordance with applicable standards.

5) Requires the first inspection to be completed by January 1, 2025, and every nine years thereafter in coordination with the HOA reserve study inspection pursuant to existing law.

6) Requires the owner of a separate interest (housing unit) in a CID to provide the following documents to a prospective buyer prior, to transfer of title or the execution of a real property sales contract, as specified:

   a) A copy of all governing documents for the HOA, or a written statement that the HOA is not incorporated, as specified.
   b) If applicable, a statement that a restriction in the governing documents limiting the occupancy, residency, or use of a unit on the basis of age is only enforceable as specified.
   c) A copy of the most recent HOA annual budget report and policy statements, as specified.
   d) A written statement regarding the amount of the HOA's current regular and special assessments and fees, any unpaid assessments on the unit, and any unpaid fines or penalties on the unit, as specified.
   e) A copy or summary of any notice previously sent to the seller setting forth any alleged violation of the governing documents that is unresolved, as specified.
   f) A copy of the initial list of defects provided to each HOA member, unless the HOA and the builder subsequently enter into a settlement agreement or otherwise resolve the matter, as specified.
   g) A copy of the latest information on construction defect litigation affecting the HOA, as specified.
   h) Any change in the HOA's current regular and special assessments and fees approved by the board that have not yet become due and payable.
   i) If applicable, a statement describing any prohibition on renting or leasing any individual units in the CID.
   j) If requested by the buyer, a copy of the minutes of HOA board meetings conducted over the previous 12 months, as specified.
   k) A copy of the most recent EEE inspection conducted of the CID.

7) Specifies the format and contents for the disclosure form given to the prospective buyer of a unit in a CID.

This bill:

1) Provides that any managing agent, including its employees, that facilitates specified management activities under the Act, or other activities under the Act that are authorized by the HOA, owes a duty of care that is prudent and provides the highest good faith effort to the HOA and its members.

2) Requires an owner of a separate interest to provide a copy of the master insurance policy for the HOA that covers the property, general liability,

earthquake, flood, and fidelity coverage upon request of the property owner or prospective purchaser.

3) Requires an owner of a separate interest to provide the following information to a prospective purchaser of the separate interest, if requested by the prospective purchaser:

   a) The location on the first page of the nine-year exterior elevated elements (EEEs) inspection report where the following information may be found:

      i) The number of EEEs, and the number of units identified as impacted by the EEEs inspected and posing an immediate threat to the safety of the occupants;
      ii) The number of EEEs recommended to be included in the next reasonably competent and diligent visual inspection of major components or recommended for reinspection within the next three years; and,
      iii) The number of EEEs recommended for reinspection in the next nine-year EEE inspection.

   b) Any EEE identified in the nine-year EEE inspection report as needing repairs that exceed $10,000.

4) Requires an owner of a separate interest to provide to a prospective purchaser of the separate interest the following information indicating whether:

   a) The covenants, restrictions, and conditions require an owner of a separate interest, with an exclusive right to use an EEE, to individually maintain that EEE;
   b) The HOA's reserve study includes a minimum annual budgeted replacement reserve allocation of 10% for repairs of the exterior structures; and
   c) The HOA's reserve study has been updated to include identified repairs contained within the nine-year EEE inspection report.

5) Expands the definition of "association records" to include three-year reserve studies.

6) Prohibits an HOA from expending funds designated as reserve funds for other litigation or legal services, except for litigation involving the repair, restoration, replacement, or maintenance of major components for which the HOA is responsible.

7) Adds EEEs identified in the nine-year EEE inspection report to the list of major components included in the three-year reserve study report.

8) Adds the following repair urgency categories to the first page of the nine-year EEE inspection report for the total number of inspected EEEs identified in the report and the number of units impacted:

   a) EEEs recommended to be included in the next reasonably competent and diligent visual inspection conducted pursuant to the three-year reserve study or recommended for reinspection within the next three years;
   b) EEEs recommended for reinspection in the next nine-year EEE inspection report; and
   c) EEEs demonstrating no need for repair at the time of inspection.

9) Requires an HOA's reserve funding plan to include the costs necessary to account for the repairs identified in the nine-year EEE inspection report.

10) Requires the summary of the HOA's reserves to include repairs identified in the nine-year EEE inspection report.

11) Incorporates nonsubstantive chaptering amendments.

Background

CIDs and HOAs. CIDs are a type of housing with separate ownership of housing units that also share common areas and amenities. There are a variety of different types of CIDs, including condominium complexes, planned unit developments, and resident-owned mobile home parks. In recent years CIDs have represented a growing share of California's housing stock. Data from 2019 indicates that there are an estimated 54,065 CIDs in the state that are made up of 5 million housing units, or about 35% of the state's total housing stock.

CIDs are regulated under the Davis-Stirling Act as well as the governing documents of the HOA, including the bylaws, declaration, and operating rules. CIDs can also have CC&Rs that are filed with the county and recorded at the time they are established. Owners in a CID are contractually obligated to abide by the CC&Rs and the governing documents of a CID, which specify rules such as parking policies, allowable modifications to homes, and rental restrictions. Additionally, HOAs are governed by a board of directors elected by the membership in elections that closely resemble California's vote-by-mail process. In addition, many HOAs use a managing agent to assist with finances, logistics, and other services provided to homeowners.

HOA boards have a number of duties and powers. The board determines the annual assessments that members must pay to cover communal expenses, including maintenance obligations. The board enforces the community rules and can propose as well as make changes to those rules. If members do not pay their assessments in full or on time, or if members violate the community rules, the board has the power to fine the members and, if necessary, the power to foreclose upon the offending member's property.

Comments

Author statement. "SB 1238 will protect homeowners who reside in communities with a HOA by requiring additional disclosures to the homeowner and ensuring HOAs act in the homeowners' best interest by requiring a fiduciary duty be provided by HOA managers to the HOA board and the HOA members. Under current law HOA managers have no licensing requirements or duties to the homeowner. This bill will establish a minimum standard by requiring HOA managers to provide a fiduciary duty to the homeowner while also prohibiting HOAs from using HOA reserve funds to sue homeowners seeking to hold boards and managers accountable for property maintenance required under CA law."

Balcony safety. In 2015, a wooden balcony collapsed at the Library Gardens apartment complex in the City of Berkeley, near the University of California, Berkeley campus. The balcony collapse killed six young adults and injured seven others. Investigations later revealed that the balcony had decayed wooden joists caused by wood dry rot left untreated due to poor building maintenance.

Ultimately, the Contractor's State License Board revoked the license of Segue Construction, Inc., the general contractor responsible for building the apartment complex where the collapse occurred, as it was alleged that the contractor company "willfully departed from or disregarded building plans or specifications, and willfully departed from accepted trade standards for good and workmanlike construction."

As a result of that collapse, the Legislature passed SB 465 (Hill, Chapter 372, Statutes of 2016), which, in addition to requiring additional oversight for contractors, also required the California Building Standards Commission (CBSC) to establish a working group to study the failure of EEEs. The bill directed the CBSC to submit a report to the Legislature containing findings and possible recommendations for statutory or other changes to the California Building Standards Code. In 2017, the CBSC approved emergency regulations to accelerate the adoption of higher construction standards.

The following year, SB 721 (Hill, Chapter 445, Statutes of 2018) established a requirement to perform regular inspections of EEEs of certain multi-unit residential buildings. The bill required building owners to have those elements and other load-bearing components and waterproofing elements inspected at least every six years by certain licensed persons, to determine that the EEEs and their associated waterproofing elements are in a generally safe condition, adequate working order, and free from any hazardous conditions. It also required any identified repairs be made within a designated timeframe and provided penalties for building owners who do not complete the required repairs.

Notably, SB 721 specifically excluded CIDs from its provisions. In 2019, SB 326 (Hill, Chapter 207, Statutes of 2019) extended similar inspection requirements to CIDs. SB 326 requires HOA boards to arrange an inspection every nine years, as specified, of the CID's balconies over which the HOA has maintenance or repair responsibility. The inspector must provide a report for the board, which must be incorporated into the HOA's reserve study.

The deadline for the initial inspection under both SB 721 and SB 326 was January 1, 2025. However, recent legislation (AB 2579, Chapter 835, 2024) generally extended this deadline to January 1, 2026—but did not explicitly extend the deadline for CIDs.

Ensuring accountability for inspections. The original EEE inspection legislation included a mechanism for follow-up from any inspection that results in a finding that repairs are needed. If an inspector advises that the condition of an EEE poses an immediate threat to the safety of the occupants, the inspector must provide a copy of the inspection report to the local code enforcement agency and the building owner must immediately undertake preventive measures. For less urgent repairs, the law requires building owners to apply for a permit to make the repairs within 120 days and imposes fines on building owners who do not commence repairs in a timely fashion.

However, the legislation imposing EEE inspection requirements on CIDs did not include a follow-up mechanism and does not impose any consequences if an HOA does not take action in response to an inspection report that finds an EEE in need of repair. Instead, the law deems EEE inspections to be part of an HOA's ongoing maintenance responsibility.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Senate Appropriations Committee: The Department of Real Estate (DRE) estimates minor one-time costs, likely in the tens of thousands of

dollars, to conduct stakeholder and consumer education and to conduct training for Subdivisions Division staff. DRE would also incur one-time contract costs of approximately $50,000 to update Subdivision forms, the Operating Costs Manual, and Reserve Study Guidelines related to HOA budgets. (Real Estate Fund)

SUPPORT: (Verified 8/25/2026)

California Association of Realtors (Source)
Center for Homeowner Association Law

OPPOSITION: (Verified 8/25/2026)

Community Associations Institute of California

ARGUMENTS IN SUPPORT: The California Association of Realtors, the sponsor of the bill, argues that this bill creates accountability for HOA managers, improves disclosure requirements and strengthens access to essential HOA documents.

ARGUMENTS IN OPPOSITION: The Community Associations Institute of California is opposed to the bill. They argue that extending the duty of care that HOA managers owe to the association, to individual members of the association, could complicate a manager's ability to fulfill their contractual obligations to its client (the association) where it already has a duty of care.

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Office of Nonprofit Empowerment

SOURCE: California Association of Nonprofits

DIGEST: This bill establishes the Office of Nonprofit Empowerment (ONE), upon appropriation by the Legislature, to coordinate state-level policies and strategies that support California's nonprofit organizations and establishes the Nonprofit Empowerment Fund, upon appropriation by the Legislature, to carry out the purposes of the office, as specified.

Assembly Amendments place ONE within the Government Operations Agency (GovOps), remove the authorization that ONE be able to update the State Administrative Manual and the State Contracting Manual, and establish – upon appropriation by the Legislature – the Nonprofit Empowerment Fund in the State Treasury to carry out the purposes of this bill, as specified.

ANALYSIS:

Existing law establishes the Department of General Services (DGS) to provide centralized services, including, but not limited to, planning, acquisition, construction, and maintenance of state buildings and property, purchasing, printing, architectural services, administrative hearings, and accounting services.

This bill:

1) Establishes, upon appropriation of the Legislature, ONE with the primary responsibility of overseeing and coordinating state-level policies and strategies that support California's nonprofit organizations.

2) Establishes the Director of ONE, appointed by, and serving at the pleasure of the Governor, as specified, and requires the Director to be responsible for managing the affairs of the office and performing all duties, exercising all powers and jurisdiction, and assuming and discharging all responsibilities to carry out the purposes of this bill, as specified.

3) Specifies the duties and functions of ONE, as specified.

4) Requires the Director to hire staff to assist in the fulfillment of the duties and responsibilities of ONE.

5) Authorizes ONE, subject to available resources and consistent with applicable laws and regulations, contract and consult with nonprofit organizations, external entities, and vendors to develop training, curricula, and other resources as determined by the office.

6) Requires ONE, on or before July 1, 2028, to post on its internet website opportunities to improve the ways nonprofits and the state partner together while maintaining accountability to Californians and public resources. After the initial posting, the office shall review and update the information on the internet website regularly to ensure the contents remain current and reflective of evolving best practices. This internet website shall include, but not be limited

to, policy recommendations, and potential statutory and regulatory changes, as specified.

7) Establishes the Nonprofit Empowerment Fund in the State Treasury and makes moneys in the fund available, upon appropriation by the Legislature, to carry out the purposes of the bill, as specified.

8) Authorizes ONE, or GovOps on behalf of ONE, to collect and receive any gifts, bequests, grants, or donations from private, foundation, or nonstate sources to carry out the purposes of this bill in support of ONE, as specified.

9) Includes a sunset date for ONE of January 1, 2037, and of that date is repealed.

10) Includes relevant definitions and related Legislative findings and declarations, as specified.

Background

Author Statement. According to the author's office, "California nonprofits play a vital role in our economy, providing essential services and programs in education, health care, social services, the arts, the environment, public safety, and more. But with significant cuts coming from the federal government, nonprofits are fighting for their survival. SB 1240 will provide a much-needed tool to ensure that nonprofit organizations thrive in our State."

California Department of General Services. DGS serves as the business manager for the State, with nearly 4,500 employees and a budget of $1.3 billion. DGS serves the public by providing a variety of services to state agencies through procurement and acquisition solutions; real estate management and design; environmentally friendly transportation; professional printing, design and web services; administrative hearings; legal services; building standards; oversight of structural safety, fire/life safety and accessibility for the design and construction of K-12 public schools and community colleges; funding for school construction; and disability access.

California Government Operations Agency. According to the GovOps' internet website, the agency leads implementation of strategic initiatives focused on accelerating innovation in state operations. GovOps is one of 11 cabinet-level agencies that report to the Governor. The agency oversees and supports the work of 14 departments, boards, and offices with more than 23,000 employees.

California's Nonprofit Organizations. According to California Association of Nonprofits (CalNonprofits), an association of nonprofits in the state, one in every 14 California jobs is at a nonprofit, and nonprofits generate 15% of California's Gross State Product. Further, CalNonprofits notes that California's state, county, and city governments rely heavily on nonprofits to deliver services.

California is home to a wide range of nonprofit organizations that serve various community needs. Many of these organizations focus on social services, healthcare, housing, and disaster relief – and play a vital role in providing immediate and long-term assistance during emergencies. Wildfires and other emergencies (such as earthquakes or floods) often trigger a rapid response from both local and national nonprofit organizations. In California, nonprofits adapt their operations quickly to meet the urgent needs of affected communities. Some of the roles they play include: immediate relief efforts; long-term recovery programs; volunteer coordination; and advocacy and policy work.

Shared Priorities, Strained Systems. In January of this year, the Little Hoover Commission (Commission) released a report titled "Shared Priorities, Strained Systems: Modernizing State Grants and Contracts with Nonprofits." The report notes that California relies on nonprofit organizations to deliver public services, ranging from healthcare to environmental protection programs with more than 109,000 nonprofits employing 1.7 million Californians. However, after the Commission surveyed the California Association of Nonprofits, participated in hearings, and conducted research, the commission found that the state's grant and contract administration has not kept up with the environment in which the state's nonprofits operate.

Specifically, the Commissions found "that cash flow instability is one of the most persistent strains on the state's nonprofit partners. Because state awards often rely on reimbursement rather than advance payment of grant funds, nonprofits must front operational costs before receiving their grant funding. Less-resourced organizations serving disadvantaged communities, which recent legislation has mandated state agencies to prioritize, are the least-equipped to carry these financial burdens." Among the 12 recommendations of the Commission in the report, is a recommendation that the Legislature establish a nonprofit liaison office within the Office of the Governor.

Office of Nonprofit Empowerment. This bill establishes ONE, within an unspecified entity, with the primary responsibility of overseeing and coordinating state policy in support of California's nonprofit organizations. This bill specifies various duties and functions of the office, including providing guidance, resources,

and technical assistance to nonprofits organizations on procurement and grantmaking laws, regulations, and best practices. This bill also requires ONE to develop and administer training and materials to state entities on advance payment and other strategies to reduce hurdles for nonprofit organizations to access state funding and implement state projects, as specified.

Additionally, this bill establishes the Nonprofit Empowerment Fund within the State Treasury to be made available to ONE, upon appropriation by the Legislature, to carry out the purposes of the bill. This bill includes a sunset date of January 1, 2037, and as of that date will be repealed.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations analysis, "Ongoing cost pressures, likely in the low millions of dollars annually, to staff and operate ONE, including office space, equipment, travel and meeting resources, and external contracts (General Fund). The author requested state budget funding of $1.7 million in fiscal year 2026-27 and $1.66 million annually thereafter to support approximately six permanent positions (director, staff services manager, attorney, two program analysts, and executive assistant) and associated operating costs for ONE. The Budget Act of 2026 did not appropriate funds for this purpose."

OPPOSITION: (Verified 8/25/26)

None received

ARGUMENTS IN SUPPORT: In support of the bill, the California Association of Nonprofits write, in part, the "success of New York's Mayor's Office of Nonprofit Services (MONS) provides a verified blueprint for California's proposed [ONE], proving that a centralized hub can transform the nonprofit sector from a bureaucratic afterthought into a strategic priority. MONS operationalized systemic solutions that transformed New York's contract management: it slashed a staggering $11 billion contract backlog to under $3 billion, unlocked $4.2 billion in delayed, retroactive funds for 451 stalled providers, and eliminated 11 months of delays by cutting contract processing times by nearly 90%. Furthermore, MONS doubled advance payment standards to 50% and eliminated 13 tedious bureaucratic steps to deliver 100% upfront funding for smaller discretionary grants. These metrics demonstrate that a dedicated nonprofit office is not an added layer of bureaucracy, but a powerful efficiency engine that actively protects public funding and optimizes service delivery."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Community Assistance, Recovery, and Empowerment (CARE) Court Program

SOURCE: Author

DIGEST: This bill permits an original petitioner to provide specified information regarding a respondent to the respondent's CARE team and court, and requires the CARE team to receive, review, document, and consider useful information, as specified.

Assembly Amendments specify the categories of information which an original petitioner may provide to a respondent's CARE team; require the CARE team to receive, review, and document information received from the original petitioner that is relevant to the respondent's CARE plan, as specified; and removes the

provision permitting an original petitioner to participate in the CARE proceedings absent a court determination that such participation would be detrimental to the respondent's treatment or wellbeing.

ANALYSIS:

Existing law:

1) Establishes the CARE Act. (Welfare (Welf.) & Institutions (Inst.) Code, div. 5, pt. 8, §§ 5970 et seq.)

2) Defines the following relevant terms:

   a) "CARE agreement" is a voluntary settlement agreement entered into by the parties, and includes the same elements as a CARE plan to support the respondent in accessing community-based services and supports.

   b) "CARE plan" is an individualized, appropriate range of community-based services and supports, which include clinically appropriate behavioral health care and stabilization medications, housing, and other supportive services, as appropriate.

   c) "CARE process" is the court and related proceedings to implement the CARE Act.

   d) "Department" is the DHCS.

   e) "Petitioner" is the entity who files a CARE Act petition with the court; if the petitioner is a person other than the director of a county behavioral health agency (CBHA), or their designee, the court shall substitute the director or their designee for the county in which the proceedings are filed as the petitioner at the first hearing.

   f) "Respondent" is the person who is subject to the petition for the CARE process. (Welf. & Inst. Code, § 5971.)

3) Establishes criteria for a person to qualify for the CARE process, including that the person is 18 years of age or older; the person is experiencing a serious mental disorder, as defined, and has a diagnosis in the disorder class of schizophrenia spectrum and other psychotic disorders, or bipolar I disorder, as specified; the person is not clinically stabilized in ongoing voluntary treatment; and participation in a CARE plan or agreement would be the least restrictive

alternative necessary to ensure the person's recovery and stability. (Welf. & Inst. Code, § 5972.)

4) Provides that the following adult persons may file a petition to commence the CARE process, including:

   a) A person with whom the respondent resides.

   b) A spouse, parent, sibling, child, or grandparent, or an individual who stands in loco parentis to the respondent.

   c) Various persons who have provided care to the respondent within the previous 30 days, or the directors of programs where care was provided to the respondent.

   d) A first responder, as defined, who has repeated interactions with the respondent, as defined.

   e) The directors of specified public agencies and service providers, including a county behavioral health agency (CBHA).

   f) The judge of a tribal court located in California before which the respondent has appeared within the previous 30 days.

   g) The respondent. (Welf. & Inst. Code, § 5974.)

5) Requires the CARE court, upon receipt of a petition, to promptly review the petition to determine if the petitioner has made a prima facie showing that the respondent is, or may be, a person who meets the CARE criteria. (Welf. & Inst. Code, § 5977(a)(1).)

6) Establishes, following a determination that the petition makes a prima facie case that the respondent is eligible for the CARE process, different procedures depending on whether the petitioner is the director of a CBHA or one of the other authorized persons, set forth in 7) and 8). (Welf. & Inst. Code, § 5977(a).)

7) Provides, pursuant to 6), if the original petitioner is the director of a CBHA, the court must set the matter for an initial appearance on the petition, appoint counsel for the respondent and, if the petition does not include specified information, instruct the CBHA to submit a written report with the requisite information within 14 court days. (Welf. & Inst. Code, § 5977(a)(3)(A).)

8) Provides, pursuant to 6), if the original petitioner is someone other than the director of the CBHA:

   a) The court must order the CBHA to investigate and file a written report with the court regarding whether the respondent meets the CARE criteria, the outcome of efforts to involuntarily engage the respondent, and the respondent's ability to engage in services.

   b) After receiving the report, if the court determines that the evidence supports a prima facie case that the respondent is eligible for the CARE process and engagement with the county agency was not effective, the court must set an initial appearance on the petition within 14 days; appoint counsel for the respondent; and order the CBHA to provide notice of the initial appearance to the petitioner, the respondent, and the respondent's appointed counsel. (Welf. & Inst. Code, § 5977(a)(3)(B), (4), & (5).)

9) Requires the court, at the initial appearance hearing, to determine whether there is reason to believe that the facts of the petition are true; if the court makes such a finding, and the original petitioner was not the CBHA, the court must issue an order relieving the original petitioner and appointing the director of the CBHA or their designee as the successor petitioner. (Welf. & Inst. Code, § 5977(b)(6)(A).)

10) Provides that, when an original petitioner is a person described in 4)(a) or (b), above, they retain all of the following rights after being relieved as a petitioner under 9):

   a) The right to be present and make a statement at the initial hearing on the merits of the CARE petition.

   b) The right to receive ongoing notice of proceedings throughout the CARE proceedings, including notice of a continuance or dismissal, unless the court determines, upon its own motion or a motion of the respondent, that it would likely be detrimental to the respondent's treatment or wellbeing.

   c) The right to participate in the respondent's CARE proceedings to the extent the respondent consents. (Welf. & Inst. Code, § 5977(b)(6)(B).)

This bill:

1) Permits an original petitioner to provide to the respondent's CARE team, as allowed by applicable state and federal confidentiality and privacy laws, throughout the CARE proceedings, information about any of the following:

a) The respondent's condition.

b) The respondent's functioning.

c) The respondent's treatment history.

d) The respondent's housing status.

e) Safety concerns about the respondent.

f) The respondent's need for services and supports.

g) The respondent's engagement in services.

h) The respondent's compliance with a CARE agreement or CARE plan.

i) Other matters relevant to the respondent's care, recovery, stability, or implementation of the CARE process.

2) Requires the respondent's CARE team to receive, review, and document information received from the original pursuant to 1) that is relevant to the respondent's care, treatment, need for services and supports, housing stability, safety, engagement in services, or implementation of a CARE agreement or CARE plan.

3) Provides that the CARE team's receipt of information pursuant to 1) shall not require the respondent's consent.

4) Permits the court to consider information provided pursuant to 2) in evaluating the respondent's progress, engagement, changed circumstances, needs for services and supports, or compliance with a CARE agreement or CARE plan.

5) Provides that information submitted by an original respondent pursuant to 1) does not confer party status on the original petitioner and shall not create a right to direct treatment decisions, obtain discovery, access confidential records, receive protected health information subject to specified state and federal law, attend confidential proceedings, or otherwise participate in the CARE proceedings without the respondent's consent, except as expressly provided by law.

Comments

In 2022, the Legislature enacted the CARE Act. The CARE Act is intended to provide essential mental health and substance use disorder services to severely

mentally ill Californians—many of whom are homeless or incarcerated—while also preserving these individuals' self-determination to the greatest extent possible. The first counties implemented the CARE Act in October 2023; all counties in the state were required to begin accepting CARE petitions as of December 1, 2024, unless they received an implementation extension from the Department of Health Care Services (DHCS). As the CARE Act has been implemented across the state, stakeholders have figured out what works well and what needs improvement; according to the author and sponsor, one ongoing concern is that a family member who filed the original petition for a CARE respondent is not able to continue participating in the CARE proceedings without the respondent's consent, depriving the participants in the process of potentially helpful information about the respondent's history and condition.

This bill clarifies that an original petitioner can provide information to the CARE team, as allowed by applicable privacy laws, throughout the proceedings regarding the respondent. For example, the bill specifies that an original petitioner can provide information regarding the respondent's condition, functioning, treatment history, or housing status, among other things. The bill requires the CARE team to receive, review and document the information that is relevant to the respondent's care, treatment, need for services and supports, housing stability, safety, engagement in services, or implementation of a CARE agreement or CARE plan. The court may also consider the information considered by the CARE team in evaluating the respondent's engagement, changed circumstances, needs for services and supports, or compliance with a CARE agreement or CARE plan.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Assembly Appropriations Committee:

1) Potential cost pressures (Trial Court Trust Fund (TCTF), General Fund (GF)) of up to $600,000 to the courts to review and consider information submitted by original petitioners in CARE Act proceedings. The Judicial Council reports the impact reflects added judicial time for review of submitted information rather than additional hearing time. Because the courts are not funded on a workload basis, any increase in workload creates cost pressures on the TCTF. The 2025-26 Budget Act includes a $117.3 million GF backfill to the TCTF.

2) Estimated costs of $1.4 million to $2.9 million annually (GF) for county behavioral health agencies for time spent reviewing material submitted by original petitioners, integrating that material into court reports, and engaging with respondents regarding the submitted material. The California Behavioral Health Directors Association (CBHDA) estimates counties would spend an

additional five to 10 hours per case at the outreach and engagement rate of $89 per hour established by the state, assuming 3,210 petitions filed by family members in 2027. The state reimburses counties for specified non-Medi-Cal billable CARE Act activities through a quarterly claiming process administered by the Department of Health Care Services (DHCS), and CBHDA indicates the activities added by this bill fall within the approved activity types.

3) Potential costs of $2.4 million to $7.2 million annually (GF) for county behavioral health agencies to serve additional CARE Act participants, reflecting an anticipated decrease in early dismissals and a corresponding increase in county staff time spent attending hearings, preparing reports to the court, and providing outreach and engagement services. CBHDA assumes 5% to 10% of the petitions filed by family members that would otherwise be dismissed — 109 to 326 cases — instead result in an approved CARE plan or CARE agreement because of information the petitioner supplies during the proceeding. These costs would be payable through the quarterly claiming process described above. Staff notes this component does not measure the cost of the review duty this bill imposes. The amount instead reflects an assumption about how courts will rule once additional information is before the court, and the cost of serving the additional participants that assumption produces. The range is therefore sensitive to a projected change in case outcomes rather than to a countable increment of workload, and the actual amount could fall outside the range in either direction.

4) Significant one-time costs to the Department of Health Care Services (DHCS) to update its existing training and technical assistance (TTA) regarding contractor's scope of work. DHCS estimates $1 million in fiscal year 2027-28 to expand the existing contract.

SUPPORT: (Verified 8/24/26)

California Conference of Bar Associations (source)
California State Association of Psychiatrists
Families Advocating for the Seriously Mentally Ill
Family Advocates of Individuals with Serious Mental Illness
Treatment Advocacy Center
Two individuals

OPPOSITION: (Verified 8/24/26)

Cal Voices
California Peer Watch

Mental Health America of California

ARGUMENTS IN SUPPORT: According to the California Conference of Bar Associations:

> This legislation reflects a deliberate and necessary evolution of the CARE Act. When the CARE Court was enacted in 2022, the Legislature intentionally limited the role of the original petitioners after filing, unless the respondent provided affirmative consent. However, early implementation revealed a critical gap: families who initiated CARE petitions were often excluded from the process, siloed, and lacked the ability to support their loved one, undermining engagement, continuity of care, and the effectiveness of the program. Additionally, respondents lacked insight into their condition, misunderstood the court proceedings, and intentionally declined to allow family participation due to their underlying condition including paranoia and lack of insight.
>
> In response, the Legislature amended Welfare & Institutions Code section 5977 to require ongoing notice to original petitioners effective July 1, 2025, ensuring that families were notified about court proceedings while maintaining confidentiality and judicial discretion. SB 1242 represents the next logical step in this legislative progression. The bill ensures that families remain partners in the recovery of the individual, provide ongoing support, and are involved in community-based care coordination. Confidentiality protections remain intact and participation may be limited by the court.

ARGUMENTS IN OPPOSITION: According to Mental Health America of California:

> CARE Court is a legal mechanism where petitioners can ask the court to force an individual, the respondent, into court-ordered, thus involuntary, behavioral health care. Under current law, if a CARE respondent consents, the court may allow the petitioner to participate in the respondent's CARE proceedings. The respondent's consent is the primary basis for this allowance. This bill provides a pathway for a family member petitioner to circumvent a respondent's consent. This would violate a respondent's right to health care privacy..

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Social media platforms: child influencers

SOURCE: Author

DIGEST: This bill requires a social media platform to provide a clear and conspicuous mechanism by which a child influencer who is at least 18 years of age can request a vlogger to delete or edit certain paid content that features the child influencer as a minor.

Assembly Amendments relocate this bill's provision from the Business and Professions Code to the Family Code.

ANALYSIS:

Existing law:

1) Provides that a minor is an individual who is under 18 years of age. (Family (Fam.) Code, § 6500.)

2) Provides that a minor's parent or guardian is entitled to the earnings of the minor, except as provided in 3), 4), and 6). (Fam. Code, § 7500.)

3) Provides that the parent or guardian of a minor who is emancipated—through marriage, serving on active duty with the Armed Forces of the United States, or a declaration of emancipation—is not entitled to the minor's earnings. (Fam. Code, §§ 7002, 7050.)

4) Provides, under "Coogan's Law," that the parent or guardian of a minor who enters into a contract for artistic or creative services, including online content creation, or for participating in or playing a sport, is not entitled to the minor's earnings when specified conditions are met. (Fam. Code, §§ 6750-6753.)

5) Defines the following relevant terms:
   a) "Content" means statements or comments made by users and media that are created, posted, shared, or otherwise interacted with by users on an internet-based service or application, but does not include media put on a service or application exclusively for the purpose of cloud storage, transmitting files, or file collaboration.
   b) "Family" means a group of persons related by blood or marriage, including civil partnerships, or whose close relationship with each other is considered equivalent to a family relationship by the individuals.
   c) "Online platform" means any public-facing internet website, web application, or digital application, including a mobile application, and includes a social media platform, advertising network, mobile operating system, search engine, email service, or internet access service.
   d) "Vlog" means content shared on an online platform in exchange for compensation.
   e) "Vlogger" means a parent, legal guardian, or family residing in California that creates image or video content that is performed in California in exchange for compensation, but does not include any person under 18 years of age who produces their own content.

f) "Vlogging" means the act of sharing content on an online platform in exchange for compensation. (Fam. Code, § 6650.)

6) Provides that, when at least 30 percent of a vlogger's compensated content includes the likeness, name, or photograph of a minor, the vlogger must compensate the minor for their appearance in the content pursuant to a prescribed compensation formula, and the moneys must be held in trust for the minor until they reach the age of majority or are emancipated. (Fam. Code, § 6651-6653.)

7) Provides that, if a vlogger knows or should have known that they violated the provisions of 6), the minor appearing in the content may commence an action to enforce the requirements of 6) and may obtain actual damages, punitive damages, and attorney's fees and costs. (Fam. Code, § 6654.)

8) Provides that 6) does not apply to a contract for vlogging services between a parent or guardian and a minor if the court has approved the contract pursuant to Coogan's law. (Fam. Code, § 6656.)

9) Defines "social media platform" as a public or semipublic internet-based service or application that has users in California and that meets both of the following criteria:

   a) A substantial function of the service or application is to connect users in order to allow users to interact socially with each other within the service or application; email or direct messaging services alone are insufficient to satisfy this criterion.
   b) The service or application allows users to do all of the following: (1) construct a public or semipublic profile for purposes of signing into and using the service or application; (2) populate a list of other users with whom an individual shares a social connection within the system; and (3) create or post content viewable by other users, including, but not limited to, on message boards, in chat rooms, or through a landing page or main feed that presents the user with content generated by other users. (Business (Bus.) & Professions (Prof.) Code, § 22675(f).)

This bill:

1) Defines the following terms:
   a) "Child influencer" means a person who is at least 18 years of age who is featured as a minor in paid content on a social media platform.

b) "Paid content" means image or video content shared on a social media platform by a vlogger for which the vlogger receives compensation.
c) "Social media platform" has the same meaning as in section 22675 of the Business and Professions Code.
d) "Vlogger" means a person who meets both of the following criteria:
    i. The person is a parent, legal guardian, or family member of a child influencer who shared images or video content featuring that child influencer constituting at least 30 percent of the person's content shared on social media platforms.
    ii. The person received compensation for sharing the content featuring the child influencer.

2) Requires a social media platform to provide a clear and conspicuous mechanism by which a child influencer can request a vlogger to delete or edit paid content, pursuant to 4), that meets both of the following criteria:
    a) The paid content is adequately identified by the child influencer so that the social media platform is able to notify the vlogger who is able to remove the paid content from the social media platform.
    b) The paid content features the child influencer as a minor.

3) Requires a social media platform to notify the vlogger of the request within three business days of receipt if the mechanism provided does not enable the child influencer to submit a request directly to the vlogger.

4) Requires a vlogger, within 10 business days of receipt of a notice or direct request, to delete the identified paid content or edit the identified paid content in such a way that the child influencer is no longer featured in the paid content.

5) Provides that a child influencer may bring a civil action against a vlogger who violates the above for all of the following relief:
    a) Actual damages.
    b) Statutory damages in the amount of $3,000 for each day that the vlogger is in violation of 4).
    c) Injunctive relief.
    d) Reasonable attorney's fees and costs.

6) Requires a court to consider all of the following when considering whether to grant injunctive relief:
    a) Emotional harm or substantial embarrassment the paid content causes the child influencer.
    b) Increased risk to the child influencer of harassment or compromised safety.

c) Loss of control of personal information.
d) Harm to future opportunities.

Comments

Previous legislation established financial protections for minors whose images are used by vloggers to receive compensation. Under this bill, a child influencer, upon reaching the age of 18, may take control of content featuring images and videos of them as a minor by requesting they be edited or removed. The bill requires social media platforms to provide a clear and conspicuous mechanism for child influencers to request such action, and if certain criteria is met, the platforms must notify the relevant vlogger of the request. The vlogger is thereafter required to delete or edit the paid content, as provided. Vloggers who fail to carry this obligation are subject to civil actions for specified remedies.

Measures to protect children. The dramatic rise of content created and monetized by social media influencers, and specifically content heavily featuring minors, has drawn attention to a gap in these laws. A series of infamous examples of family members exploiting minors appearing in their content has raised calls for legislation to protect the interests of these children. Mirroring a law enacted in Illinois, SB 764 (Padilla, Ch. 611, Stats. 2024) responded to this gap. That law places obligations on adult "vloggers," creators of online content for compensation, whose online content features minors "engaging in vlogging" to set aside a certain amount of gross earnings in a trust account to be established in a California financial institution. A child is "engaged in vlogging" when a certain percentage of the content includes the minor and the related compensation reaches a certain threshold. Such vloggers are also required to maintain and share records related to the amount of relevant content produced and the compensation received therefrom.

Establishing control and privacy rights. Under this bill, a child influencer, upon reaching the age of 18, may take control of paid content featuring images and videos of them as a minor by requesting they be edited or removed. Current law allows for the financial protection of child influencers but does not give control of their images and videos to those child influencers upon reaching adulthood. The author seeks to establish a process whereby child influencers can take control of their online paid content and secure privacy rights as adults.

This process requires a social media platform to provide a "clear and conspicuous mechanism" for a child influencer to request edits or deletion of vloggers' paid content featuring them. This provision establishes unambiguous communication

between the parties to ensure any child influencer can easily access this mechanism to make a privacy request.

Once the paid content that features the child influencer as a minor has been adequately identified, the child influencer may use the communication mechanism to make a request. Upon receiving this request, the social media platform must inform the vlogger of the request if the mechanism does not enable the child influencer to submit a request directly to the vlogger. Within ten business days of receiving the privacy request, the vlogger must delete or edit the paid content in such a way that the child influencer is no longer featured in the paid content.

Violations are subject to a civil action, to be brought by the child influencer, as specified. For a more thorough analysis of this bill and its provisions, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis.

According to the author:

> Children featured in family videos lose the ability to control their image at a young age and face privacy and security concerns growing up in the public eye. SB 1247 would give children who were monetized online the ability to exert privacy rights by giving child influencers the ability to delete content featuring them as minors once they reach adulthood.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Senate Appropriations Committee:

Costs are unknown, with potentially significant cost pressure to the courts to the extent there are additional civil filings for new violations created by this bill. Actual costs would depend on the number of child influencers seeking to edit or remove content and subsequent civil actions and injunctive relief. Although courts are not funded based on workload, increased pressure on the Trial Court Trust Fund may create a demand for increased funding for courts. The proposed FY 2026-07 Governor's budget would provide $70 million General Fund support (Trial Court Trust Fund, General Fund).

No Affiliation

Oakland Privacy
Quit Clicking Kids

OPPOSITION: (Verified 8/25/2026)

Civil Justice Association of California

ARGUMENTS IN SUPPORT: The American Academy of Pediatrics, California, writes:

> SB 1247 strikes a thoughtful balance between family expression and a young adult's right to privacy and dignity. Importantly, the bill does not impose liability on social media platforms for the content itself; rather, it creates a practical process for handling removal requests and places responsibility on the compensated content creator. The measure also appropriately limits its scope to monetized family content where the child influencer appeared in a substantial portion of the material.
>
> California has often led the nation in recognizing emerging harms facing children in digital environments. SB 1247 continues that leadership by ensuring that children who grow up online are afforded basic autonomy over their own image, identity, and personal history.

ARGUMENTS IN OPPOSITION: The Civil Justice Association of California (CJAC) writes:

> The bill would impose penalties of a set $3,000 per day for each day of noncompliance. CJAC is concerned about the creation of a private right of action in this manner, as such claims can be readily brought and, when paired with significant statutory penalties, may invite abusive litigation and further burden already strained courts without providing a commensurate public benefit.
> CJAC respects the author's intent to protect minors and to provide individuals with control over content featuring them online. However, for the reasons stated above, we remain concerned with the bill's penalty structure and the creation of an additional private right of action in this context.

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Postsecondary education: Designation of California Hispanic-Serving Institutions

SOURCE: Hispanic Association of Colleges and Universities

DIGEST: This bill establishes, upon appropriation, criteria and procedures for postsecondary educational institutions in California to receive a designation as a

California Hispanic-Serving Institution (HSI) for the purposes of recognizing institutions that excel at providing academic resources to Latino students.

Assembly Amendments 1) remove the requirement that at least 25% of an institution's enrollment consists of Hispanic and Latino students to qualify for the state designation, 2) modify the application timeline, 3) require the governing board to meet at least annually, instead of twice annually, while allowing additional meetings as needed, and 4) makes other minor technical and clarifying changes.

ANALYSIS:

Existing law:

1) Establishes the California State University (CSU), under the administration of the Trustees of the CSU, the University of California (UC), under the administration of the UC Regents, the California Community Colleges (CCC), under the administration the Board of Governors of the CCC, and independent institutions of higher education, as defined, as 4 segments of postsecondary education in the state. (Education Code (EC) §66600, §70901, § 66010.4 et al, and Article IX, § (9)(a) of the California Constitution)

2) Establishes criteria and procedures for postsecondary education institutions in California to receive a designation as a California Black-Serving Institution (BSI). It designates the CSU Central Office for Advancement of Black Excellence to serve as the managing entity and authorizes the office to process applications for the designation. An eight-person governing board is established to determine through a 2/3 vote whether a college or university is qualified for the BSI designation. (EC § 66076 et al.)

This bill:

1) Establishes, upon appropriation, the Designation of California HSI for purposes of recognizing colleges and universities that excel at providing academic resources to Latino students enrolled in degree or certification programs offered by colleges and universities. The designation is to be only awarded to qualifying applicants by a 2/3 vote of approval from the governing board.

2) Authorizes the designation for a period of five academic years and permits a recipient to apply for renewal after five years.

3) Specifies that an applicant is eligible for the designation if the applicant meets all of the following requirements:

   a) Meets the application deadline established by the managing entity.

   b) Has either submitted an initial or renewal application that meets specified criteria.

   c) Posts the initial or renewal application on the applicant's website.

4) Requires that the initial application include, at a minimum, all of the following:

   a) A certification by the institution's chief administrator of their commitment to address Latino student success that is consistent with the institution's mission.

   b) Academic goals for the institution to achieve within the five-year period for which the initial designation is valid. The goals described in the application are to improve retention, time-to-degree or time-to-certificate completion, and graduation rates of Latino students and the overall student population based on data submitted by the applicant, as applicable.

   c) Academic equity goals for the applicant to achieve within the five-year period for which the initial designation is valid. The goals described by the applicant are to reduce the academic equity gaps in the retention, time-to-degree or time-to-certificate completion, and graduation rates between the applicant's Latino students and the overall student population based on data submitted by the applicant, as applicable.

   d) A strategic plan for the five-year period for which the initial designation is valid. The strategic plan is to describe how the applicant intends to meet their stated academic goals and academic equity goals. The strategic plan is to include at a minimum all of the following:

      i) A mission statement that addresses the applicant's commitment to serve Latino students.

      ii) Outreach services to Latino students to encourage them to enroll.

iii) Academic and basic needs support services to assist in the success of Latino students, which may include affinity centers, corequisite coursework, or concurrent support activities.

iv) An outline of the planned allocation of resources during the five-year period for which the initial designation is valid to ensure that the strategic plan can be implemented.

v) An outline of how the applicant will use existing resources to provide culturally relevant professional development to the applicant's faculty and staff.

vi) Academic curriculum, including incorporating and expanding curriculum and course offerings in ethnic studies and other culturally responsive coursework, to reflect the diverse backgrounds of Latino students and support their academic engagement and retention.

vii) Research initiatives, including institutional research to address the needs of lived experiences of Latino populations, both on campus and in the broader community.

viii) Data disaggregation collection and analysis to identify and address the distinct needs and achievement gaps of diverse Latino ethnic subgroups.

ix) Intersegmental collaboration between the UC the CSU, the CCC, and independent institutions of higher education to strengthen the educational pipeline for Latino students, including support for transfer and completion of undergraduate, graduate, and professional degrees.

e) A four-year college or university applicant is to include graduation rates for the previous three academic years for all students, and for Latino students, within the normal time and up to 150% of the normal time to degree completion, yield, retention, and graduation rate.

f) A community college applicant is to include for the previous five academic years:

i) The number of degree and certificate programs completed by all students, as well as by Latino students.

ii) The number of all students and of Latino students who completed degree and certificate programs within the normal time and up to 300% of the normal time to degree completion yield, retention, and graduation rate.

iii) The student transfer rates for all students and for Latino students, to four-year colleges and universities.

5) Establishes a renewal application process that takes effect upon expiration of an application and specifies the requirements for renewal, which include demonstration of the applicant's progress toward achieving academic and academic equity goals and implementing a strategic plan, and outlining new academic goals to be achieved within the new five-year period, as specified.

6) Provides that if a renewal application is denied by the governing board, the applicant is only authorized to apply to receive an initial designation.

7) Makes CSU the managing entity for the designation and requires CSU to act as a neutral administrative body charged with duties related to accepting applications, establishing annual deadlines, processing applications biannually, notifying applicants of approval or denial of their application by the governing board, preparing, and delivering the appropriate insignia to approved applicants.

8) Establishes the governing board of the Designation of California HSI for the purpose of awarding colleges and universities with the designation based on applications presented by CSU.

9) Requires that the governing board be subject to the Bagley-Keene Open Meeting Act and specifies the composition of the eight member board.

10) Deems any designee of an appointed governing board member qualified to make decisions on behalf of that appointed position.

11) Limits board service of a public member appointed by either the Assembly Speaker or the Senate President pro Tempore to a two-year term. The bill further requires that the appointing authority of a public member make every effort to ensure that the board membership includes persons who have a strong interest in the further development and improvement of the academic success of Latino students.

12) Requires, for purposes of the first two years of the governing board's operations, the chair to be the Lieutenant Governor or their designee. Thereafter, the governing board is authorized to select a chairperson from within its membership by a two-thirds vote, as specified.

13) Requires the governing board to convene at least once a year to vote on the approval or denial of applications, as described and by a two-thirds vote by those present for the vote.

14) Defines various terms for the purposes of this bill.

15) States various legislative findings and declarations relating to the importance of supporting Latino students in higher education, historic barriers faced by Mexican American and other Latino students in California public schools, and the uncertainty surrounding the federal HSI program.

Comments

Need for this bill. According to the author, "Since the federal designation was established, Hispanic Serving Institutions (HSIs) have played a critical role in California's higher education system. California is home to the most HSI in the country, with 171 colleges and universities holding this designation.

"These HSIs, spanning both public and private colleges and universities, not only build the capacity to better serve Latino and low-income students, but leverage the resources they receive to develop programming that helps all students on campuses. HSI funding has helped institutions provide tutoring, mental health services, career counseling, and modern learning facilities that directly improve persistence and graduation rates. Data shows that these institutions provide large economic returns for all the students they enroll, and in turn fuel local economies and the workforce. Despite this work, many HSIs are currently in jeopardy due to political and legal battles, which threaten their ability to sustain the equity strides they have made for students.

"California's strength comes from the success of our diverse students. By formally recognizing Hispanic-Serving Institutions in state law, we are acknowledging the campuses that are doing the hard work to close opportunity gaps and help Latino students thrive in college and beyond. This designation will shine a light on what works and encourage continued investment in student success.

"We cannot allow our students to become collateral damage in political and legal battles. SB 1255 sends a clear message: we will defend college access, protect educational quality, and stand firmly behind the students who represent the future of our state."

*Federal Minority-Serving Institutions program uncertainty***.** Federally, the Minority-Serving Institutions program supports higher education institutions that serve high concentrations of minority and low-income populations by assisting these institutions in strengthening their academic, administrative, and fiscal capacity The Minority-Serving Institution Program consist of several types of programs, including the HSI Program. Eligible institutions may apply for competitive grants. To qualify for a federal HSI designation, a qualifying institution must have an enrollment of undergraduate students that is at least 25% Hispanic. The Hispanic Association of Colleges and Universities reports that nationally 171 of the 615 institutions meeting the federal HSI enrollment criterion in 2023 are located in California. At the federal level, Minority-Serving Institutions programs, including HSIs, face uncertainty regarding ongoing funding and program structure, which has prompted consideration of state-level recognition.

Creates California HSI designation. This bill aims to establish an independent HSI designation for California institutions defined as CCC, CSU, UC, and independent higher education institutions. When applying for the designation, institutions are required to provide information on the outcomes of Latino students, as well as a detailed description of academic resources available to support their academic success. Applicants must fulfill several additional criteria. The designation is valid for a period of five years, after which a campus may apply for renewal. Unlike the federal program, the proposed state designation does not offer financial assistance to successful applicants.

Modeled after BSI designation. This bill's provisions appear to be modeled after SB 1348 (Bradford, Chapter 627, Statutes of 2024), which created California's BSI designation, the first of its kind, to recognize colleges and universities that excel at providing academic resources to Black and African American students. CSU's Statewide Central Office for Advancement of Black Excellence serves as its managing entity, with determinations made by a separate governing board. The BSI governing board convened its inaugural meeting in December of 2025 and approved an initial cohort of 31 campuses for the designation, including two UC campuses, three CSU campuses, 25 CCCs, and one independent institution of higher education. Information regarding subsequent meetings is not available on the BSI's governing board website. Similar to SB 1348, this bill creates a statewide

designation, establishes a managing entity (CSU) and governing board, and requires institutions to apply and demonstrate efforts to improve student success, including for a historically underserved student populations, such as Latino students.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee analysis, this bill could have the following fiscal impact:

- While the bill's implementation is subject to an appropriation by the Legislature, the CSU cites ongoing General Fund costs in the mid-to-high hundreds of thousands of dollars annually to serve as the managing entity for initial and renewal designations and oversee the application and designation process.
- Potential minor one-time Proposition 98 General Fund cost pressures for a community college district (CCD) applying for designation as a CHSI. The California Community College's Chancellor's Office (CCCCO) reports a total of 96 designated HSI community colleges under the pre-existing federal designation.
- Minor General Fund state operations costs for the CCCCO to participate in the CHSI designation governing board.
- Minor and absorbable costs to the University of California (UC).

SUBJECT: Outdoor public recreation spaces: equitable access

SOURCE: Author

DIGEST: This bill establishes the Outdoors for All initiative, to be administered by the California Natural Resources Agency (CNRA).

Assembly Amendments change the frequency of the reporting required by this bill.

ANALYSIS:

Existing law:

1) Establishes CNRA and vests it with the responsibility to restore, protect, and manage the state's natural, historical, and cultural resources for current and future generations (Government Code (GOV) § 12805).

2) Establishes a goal to conserve 30 percent of California's land and coastal waters by 2030 ("30x30") (Public Resources Code (PRC) § 71450 and Executive Order No. N-82-20).

3) Requires relevant state agencies, including CNRA and its departments, boards, offices, conservancies, and commissions, and the Department of Transportation to consider and incorporate state policy regarding equitable outdoor access when revising, adopting, or establishing policies, regulations, or grant criteria, or making expenditures (PRC § 1002).

4) Establishes the Equitable Outdoor Access Act, and sets forth the state's commitment to ensuring all Californians can benefit from, and have meaningful and sustainable access to, the state's rich cultural and natural resources (PRC § 1000).

5) Requires CNRA to submit a report to the Legislature regarding the implementation of the Equitable Outdoor Access Act by January 1, 2024 (PRC § 1003).

6) Requires meetings of state bodies be open and public, and all person permitted to attend any meeting, except as provided (GOV § 11123).

This bill:

1) Establishes common definitions for relevant terms in the bill, including:
   a) "30x30 goal."
   b) "Agency."
   c) "Outdoors for All initiative."
   d) "Outdoor public recreation spaces."

2) Establishes the Outdoors for All initiative to be administered by CNRA in consultation with the Department of Parks and Recreations (State Parks) and other relevant state agencies.

3) Requires CNRA to implement the priorities in the Outdoors for All Strategy published on November 15, 2023.

4) Requires CNRA to maintain the position of Deputy Secretary for Access to coordinate the initiative's implementation.

5) Requires CNRA to update the Outdoors for All Strategy on or before December 31, 2031, and every eight years thereafter. The update shall:
   a) Align with relevant goals of the statute, including the state's outdoor equity goals and the 30x30 goal
   b) Ensure conservation strategies enhance public access and benefits for disadvantaged and low-income communities.

6) Requires CNRA, in implementing updates to the Strategy, to:
   a) Consult with diverse stakeholders, including community-based organizations, local governments, and environmental justice advocates, to ensure inclusive decisionmaking and prevent loopholes.
   b) host at least three public meetings during the update process. These meetings may be in-person, virtual, or hybrid.
   c) provide at least one 30-day public comment period on the update.
   d) post the final update on its internet website in a publicly accessible location.

7) Requires CNRA to submit a report to the relevant policy and fiscal committees of the Legislature detailing the progress made to achieve the initiative's goals on or before January 1, 2028, and annually thereafter.

8) Makes relevant findings and declarations.

Comments

Outdoors for All Initiative. The CNRA administers the Outdoors for All initiative championed by Governor Gavin Newsom and First Partner Jennifer Siebel Newsom. CNRA published a strategy (Strategy) for the initiative in November 2023 identifying six priorities:

1. Establish Spaces for People and Nature to Thrive.
2. Foster Belonging.
3. Connect People and the Outdoors.
4. Co-Create with Communities.
5. Build Equitable Career Pathways and a Representative Workforce.
6. Align Funding to Achieve Outdoors for All.

Equitable Outdoor Access Act. The Equitable Outdoor Access Act (AB 30, Kalra, Chapter 939, Statutes of 2022) established that it is the policy of the state to 1) ensure all Californians have equitable opportunities to the benefits of nature; 2) maximize public access to public lands; and 3) prevent and minimize the intentional and unwarranted limitation of sustainable public access to public lands.

The Outdoors for All initiative is championed by Governor Gavin Newsom and First Partner Jennifer Siebel Newsom to implement the Equitable Outdoor Access Act.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee analysis of a previous version, CNRA estimates ongoing costs of $250,000 annually (General Fund) for staff support and potential consulting costs to develop and produce strategy updates and progress reports as required by this bill.

OPPOSITION: (Verified 8/24/26)

None received

ARGUMENTS IN SUPPORT: According to the author, "California is one of the world's premier destinations for outdoor recreation, home to hundreds of national and state parks along with countless regional, county[,] and city parks and open spaces. Outdoor recreation has clear benefits not only for California's economy, but also for public health – research shows that people who visit outdoor spaces for 30 minutes or more during a week have lower rates of depression and high blood pressure, and higher rates of community connection."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Midwifery: workforce data: availability to be a clinical preceptorship

SOURCE: Reproductive Health Rights and Justice Team from the Women's Foundation California Solis Policy Institute

DIGEST: This bill requires the Medical Board of California (MBC), in complying with workforce data collection, to request licensed midwives (LMs) to

provide MBC with information about the LM's ability to serve as a clinical preceptor and requires MBC to provide the information quarterly to the Department of Health Care Access and Information (HCAI).

Assembly Amendments add a coauthor, resolve chaptering conflicts, delay implementation to April 1, 2027 for MBC to begin collecting data, delay the due date for HCAI's report to the Legislature, and sunset the provisions of this bill on June 30, 2029.

ANALYSIS:

Existing law:

1) Requires health care professional licensing boards to request specified data from licensees at least biennially for future workforce planning. (Business and Professions Code (BPC) § 502)

2) Establishes HCAI and requires HCAI to collect, analyze, and publish data about health care workforce and health professional training; identify areas of health workforce shortages; and provide scholarships, loan repayments, and grants to students, graduates, and institutions providing direct patient care in areas of unmet need. Establishes the Health Professions Education Foundation (HPEF) within HCAI to, among other functions, develop criteria for evaluating applicants for various scholarships and loans. (Health and Safety Code (HSC) §127000, et seq. and §127750, et seq.)

3) Requires HCAI, as part of the Midwifery Workforce Training Act, to establish a program for training certified nurse-midwives (CNMs) and LMs in accordance with the global standards for midwifery education and the international definition of "midwife" as established by the International Confederation of Midwives, in order to increase the number of students receiving quality education and training as a CNM or as a LM. (HSC §128298(b)(1))

4) Requires HCAI, upon appropriation from the Legislature, to administer funding for a statewide study on midwifery education conducted by an outside consultant familiar with the health care and midwifery landscapes and workforce in California.

5) Establishes the Licensed Midwifery Practice Act of 1993, which provides for the regulation and licensure of LMs by the MBC. (BPC § 2505)

6) Requires the MBC to create and appoint a Midwifery Advisory Council (MAC) consisting of licensees of the board and members of the public who have an interest in midwifery practice, as specified. (BPC § 2509)

7) Specifies that a person is qualified for licensure as a LM when they either complete a three-year postsecondary midwifery education program accredited by an accrediting organization approved by MBC and pass a licensing examination adopted by MBC or successfully complete an educational program MBC determines satisfies specified criteria. (BPC § 2512)

This bill:

1) Requires MBC, by April 1, 2027, in complying with data collection efforts for licensees pursuant to BPC § 502, to request LMs to provide MBC with the following and provide the information quarterly to HCAI:

   a) The LM's eligibility to serve as a clinical preceptor for student midwives enrolled in a midwifery education program approved by MBC, including whether they have met the minimum requirements to become a clinical preceptor, as well as whether the LM is currently available, or anticipates becoming available within the next two years, to serve as a clinical preceptor for student midwives and the primary practice setting or settings the LM would offer to serve as a clinical preceptor, including, but not limited to, home births, freestanding birth centers, hospital-based or integrated maternity settings, rural or frontier community settings, or federally qualified health centers.

   b) The maximum number of student midwives the LM is currently able to supervise concurrently and the county or counties in which the LM practices and would be available for clinical preceptorship.

   c) The primary reason or reasons a LM is not available if they tell MBC they are not available to serve as a clinical preceptor.

2) Requires HCAI, on or before June 30, 2029, to submit a report to the Legislature detailing the findings from this information.

3) Specifies that a LM is not required to provide the information as a condition for license renewal nor subject to discipline for not providing the information.

4) Sunsets the provisions of this bill on June 30, 2029.

5) Incorporates provisions from AB 1811 (Rogers), which is pending in the current legislative session, to resolve chaptering conflicts.

Background

Licensed Midwives. MBC regulates LMs under the Licensed Midwifery Practice Act of 1993, which became effective January 1, 1994, at a time that MBC also had oversight for a multitude of allied health professions. A LM is an individual who has been issued a license by MBC to practice midwifery. LMs who have achieved the required educational and clinical experience in midwifery (including completing a three-year postsecondary education program in an accredited midwifery school approved by the MBC) or met the challenge requirements (obtaining credit by examination for previous education and clinical experience – as of January 1, 2015, new LMs may not substitute clinical experience for formal didactic education), must pass the North American Registry of Midwives' comprehensive examination. After successful completion of this examination, prospective applicants are designated as a "certified professional midwife" and are eligible to apply for licensure as a LM.

LMs are authorized to attend cases of normal pregnancy and childbirth, as defined in statute, and to provide prenatal, intrapartum, and postpartum care, including family-planning care for the mother and immediate care for the newborn. They are also authorized to directly obtain supplies and devices, obtain and administer drugs and diagnostic tests, order testing, and receive reports that are necessary to the practice of midwifery and consistent with their scope of practice. LMs can practice in a home, birthing clinic or hospital environment.

When the Licensed Midwifery Practice Act of 1993 was first enacted, LMs were required to practice under the supervision of physicians. AB 1308 (Bonilla, Chapter 665, Statutes 2013) removed the statutory physician-supervision requirement, but LMs remain subject to statutory limits requiring consultation, referral, or transfer when a client's condition falls outside normal pregnancy and childbirth. AB 1308 specified that a midwife may assist in "normal" pregnancy and birth, defined through regulations. SB 407 (Morrell, Chapter 313, Statutes of 2015) authorized a health care provider to employ or contract with LMs for providing comprehensive perinatal services in the CPSP.

Midwifery Workforce. According to a February 2025 issue brief from the California Health Care Foundation (CHCF) *Midwives Speak: Integration Challenges in California's Health System*, midwives play a critical role in the maternity care workforce by providing comprehensive care during pregnancy, labor, birth, and postpartum period, often serving as the primary birth attendant for low-risk pregnancies. The midwifery model of care emphasizes respectful, relationship-based, and person-centered care, supporting the physiologic process of labor and birth with minimal intervention unless clinically indicated. CHCF also notes that effective midwifery care includes appropriate consultation with obstetrician/gynecologists and timely transfer to physician care when complications arise or surgical intervention is required.

In California, two categories of midwives provide this care: LMs and certified nurse-midwives (CNMs), who are regulated by the California Board of Registered Nursing who practice primarily in clinics and hospitals. Although their training pathways and typical practice settings differ, both provide care centered on pregnancy, childbirth, postpartum care, family planning, and newborn care, while CNMs also provide broader sexual and reproductive health services. Nationally, CNMs are legally recognized in all 50 states and the District of Columbia.

Recent CHCF workforce data published in October 2024, *California's Midwife Workforce: Demographics*, highlights both the importance of midwives and ongoing capacity challenges in California. In 2023, California had 1,160 CNMs and 458 licensed midwives with active California licenses and California addresses; however, only 30 practicing midwives per 10,000 births statewide, with significant regional variation. The report showed that midwife-attended births have increased over time, rising from 8.4% of California births in 2012 to 12.8% in 2022.

While California law continues to require completion of a MBC-approved midwifery education program for licensure as a LM, the number of such programs is limited, and most are out-of-state or distance-learning programs with California-based clinical training. Many previously approved schools are no longer in operation, and as of recent workforce analyses, California has had little to no in-state accredited LM programs. Recent publications also highlight these training-capacity challenges. CHCF reported in 2024 that, in addition to LM program availability limitations, the state has only two accredited LM education programs, one of which was not admitting students.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

The Assembly Committee on Appropriations notes costs to HCAI of approximately $195,000 per year until 2028-29 for one staff position to conduct the analysis, develop findings, and produce the required report and MBC anticipates minor and absorbable costs.

ARGUMENTS IN SUPPORT: Supporters note generally, "California is currently facing a significant maternity care labor shortage, particularly in rural and underserved communities which has left us in a full maternal mortality crisis. Licensed midwives play a vital role in providing prenatal, birth, and postpartum care, as well as community-based services like lactation support. Studies have demonstrated how effective midwives are in reducing unnecessary intervention during labor, and in some cases saving lives. Midwife preceptors are experienced maternity providers who play a critical role in training and mentoring incoming LMs- bridging their academic learning with hands on clinical experience."

NO VOTE RECORDED: Cabaldon, Dahle, Jones, Niello

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Local ordinances: administrative fines or penalties

SOURCE: Author

DIGEST: This bill specifies that the reasonable period of time to correct or otherwise remedy a violation of building or zoning codes, as specified, to be no less than 6 months if certain conditions are met.

Assembly Amendments exclude certain types of violations from this bill's requirements.

ANALYSIS:

Existing law:

1) Prohibits, under the United States and California Constitutions, governments from impairing property rights without due process of law.

2) Allows counties and cities to adopt and enforce ordinances that regulate local health, safety, peace, and welfare.

3) Defines a nuisance as anything that is injurious to health, indecent or offensive to the senses, obstructs the free use of property, or unlawfully obstructs free passage.

4) Allows counties and cities to adopt ordinances that establish local procedures for abating nuisances (AB 2593, Veysey, 1965) and to recover abatement costs, including administrative costs, by using a special assessment, abatement lien, or both.

5) Allows, as an alternative to civil and criminal enforcement mechanisms, a local agency's legislative body to make any violation of any of its ordinances subject to an administrative fine or penalty (SB 814 (Alquist, Chapter 898, Statutes of 1995)).

6) Provides that a violation of a local ordinance is a misdemeanor, unless by ordinance it is made an infraction. In general, an ordinance violation that a local agency makes an infraction is punishable by:

   a) A fine not more than $100 for a first violation;

   b) A fine not more than $200 for a second violation of the same ordinance within one year; and

   c) A fine not more than $500 for each additional violation of the same ordinance within one year.

7) Allows higher fines for violations of building and safety codes:

   a) A fine not more than $130 for a first violation;

   b) A fine not more than $700 for a second violation of the same ordinance within one year;

   c) A fine not more than $1,300 for each additional violation of the same ordinance within one year; and

d) A fine not exceeding $2,500 for each additional violation of the same ordinance within two years of the first violation if the property is a commercial property that has an existing building at the time of the violation, and the violation is due to failure by the owner to remove visible refuse or failure to prohibit unauthorized use of the property.

8) Allows cities and counties to also impose fines and penalties through civil or criminal proceedings. These fines and penalties are limited to $1,000 per violation and six months in prison.

9) Requires a local agency that imposes administrative fines or penalties to adopt an ordinance specifying the administrative procedures that govern the imposition, enforcement, collection, and administrative review of those fines or penalties.

10) Requires the administrative procedures to grant a reasonable time to remedy a continuing violation before the imposition of administrative fines or penalties when the violation pertains to building, plumbing, electrical, or other similar structural and zoning issues that do not create an immediate danger to health or safety.

This bill:

1) Provides that for any violation pertaining to building, plumbing, electrical, or other similar structural or zoning issues, that do not create an immediate danger to health or safety, of any ordinance enacted by the local agency, the reasonable period of time to correct or otherwise remedy the violation shall be no less than six months if all of the following conditions are met:

   a) The property involved in the violation is an owner-occupied residential property containing only four units or fewer.

   b) The current owner of the property submits a sworn affidavit that the current owner was not responsible for any action that caused the violation and that the current owner had no knowledge of the violation at the time the owner took title to the property.

   c) The current owner of the property provides evidence that the violation was not disclosed in a transfer disclosure statement (TDS), as defined in existing law

2) Requires a local agency to extend the reasonable period of by an additional six months upon a showing by the current owner of a good faith effort to correct or

otherwise remedy the violation, and allows the local agency to extend the reasonable period of time further at its discretion.

3) Prohibits a local agency from imposing an administrative fee associated with a request for an extension pursuant to this bill.

4) Provides that this bill does not apply to an administrative fine or penalty that is imposed for a violation of any of the following:

   a) Cannabis laws;

   b) State Housing Law, as specified;

   c) Any law that regulates or ensures that habitability of rental housing, as specified;

   d) Specified state or local laws or regulations related to fire hazards;

5) Applies this bill to charter cities and includes findings and declarations to support its purposes.

Background

Real estate transactions. When an owner sells a single-family residential property, they generally must provide the buyer with certain disclosures that outline the conditions and issues with the property of which the seller is aware. Many of these disclosures are made on the Real Estate Transfer Disclosure Statement (TDS), including any known significant defects in the insulation, roof, foundation, plumbing, and electrical systems, among others. The TDS also includes an extensive questionnaire relating to specific dangers or issues known about the property.

In addition to the disclosures included in the TDS, state law requires other disclosures and notices. A seller must disclose to a potential buyer whether the property is located in a designated high or very high fire hazard severity zone and must provide a natural hazard disclosure statement disclosing whether the property is located in various disaster areas.

Buyers may conduct additional due diligence measures, such as hiring a home inspector, scouring property records, and purchasing title insurance, to ensure that they fully understand the condition of the property that they are purchasing—and the liabilities that might come with it.

However, issues are not always discovered through this process. This means that sometimes buyers of property find out later that unpermitted work occurred on a property when code enforcement knocks on their door. In one circumstance, the County of Humboldt fined a couple $1 million for an unpermitted structure constructed by a prior owner that the county alleged was used for cannabis cultivation.[1] The author wants to help property owners that unwittingly purchased properties with building or zoning code violations.

Comments

Purpose of this bill. According to the author, "Keeping costs predictable for homeowners to address the state's growing affordability challenges is a matter of statewide concern. Homeowners are currently being unfairly penalized for actions taken by the previous homeowner on their property that do not pose an immediate danger to anyone's health or safety. And on top of this, even when the homeowner wants to do the right thing and fix the violation, they face additional financial pressure from the administrative fees and penalties imposed by localities. SB 1272, Curbing Abusive Sanctions on Homeowners (CASH) Act, seeks to provide some relief to homeowners."

Caveat emptor. The process of buying a home involves many steps to ensure that they are not saddled with unexpected property conditions. Because local governments can prosecute the current property owners for previous violations, the current structure adds an incentive to thoroughly vet properties for building and zoning code violations. This serves a broader public purpose: local officials enact these laws for the benefit of the community. For example, a recent San Francisco Chronicle article highlighted a circumstance where a buyer purchased a single family home that had been illegally converted from a fourplex by a previous owner, resulting in the loss of three relatively affordable housing units.[2] The City of San Francisco required the current owner to fix the violations. SB 1272 grants a longer period of time to homeowners who unknowingly purchase a property with a zoning code violation additional time to bring their property into compliance than they might otherwise have, and waives fees for extensions. However, this bill may not address the root problem, which is unscrupulous sellers failing to disclose illegal construction. A better remedy may be to strengthen disclosure requirements

[1] Billy Binion, *Reason Magazine.* "They Face $1 Million in Fines—for Someone Else's Code Violations." 31 October 2025.

[2] Alyce McFadden, *San Francisco Chronicle*. "They bought their North Beach dream home. The city says it must become four apartments." 10 March 2026.

for sellers or remedies for buyers who find out that they purchased a property with an undisclosed condition.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- No state costs. One-time and ongoing administrative and legal costs, as well as foregone penalty revenue, to impacted cities and counties of an unknown but potentially significant amount depending on the jurisdiction. Because it is optional for a local agency to make a violation of a local ordinance subject to an administrative fine or penalty, any associated costs or revenue losses are not reimbursable by the state.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Alcoholic beverages: tied-house restrictions: wine instructional events and promotional lectures: video advertisements

SOURCE: Napa Valley Vintners

DIGEST: This bill expands existing provisions of the Alcoholic Beverage Control Act governing advertisements by authorized licensees for instructional events held on a retailer's premises. Specifically, the bill permits advertisements for authorized instructional events to include videos of up to 60 seconds when published in advance of the event as described.

Assembly Amendments clarify the provisions of this bill and make conforming changes other provisions in the Alcoholic Beverage Control (ABC) Act.

ANALYSIS:

Existing law:

1) Establishes the Department of ABC and grants it the exclusive authority to administer the provisions of the ABC Act in accordance with laws enacted by the Legislature. This involves licensing individuals and businesses associated with the manufacture, importation, and sale of alcoholic beverages in this state and the collection of license fees for this purpose.

2) Separates the alcoholic beverage industry into three component parts, or tiers, (referred to as the "tied-house" law or "three-tier" system), of manufacturer (including breweries, wineries and distilleries), wholesaler, and retailer (both on-sale and off-sale). The original policy rationale for this body of law was to: (a) promote the state's interest in an orderly market; (b) prohibit the vertical integration and dominance by a single producer in the marketplace; (c) prohibit commercial bribery and to protect the public from predatory marketing practices; and, (d) discourage and/or prevent the intemperate use of alcoholic beverages. Generally, other than exceptions granted by the Legislature, the holder of one type of license is not permitted to do business as another type of licensee within the three-tier system.

3) Permits a winegrower, a winegrower's agent, wine importer, or other specified parties to conduct or participate in, and serve wine at, an instructional event for consumers held at a retailer's premises featuring wines produced by or for the winegrower or, imported by the wine importer if specified conditions are met. In this regard, these licensees may list certain information in advertisements for the event, but those advertisements are prohibited from including any video.

4) Prohibits a premium, gift, free goods, or anything of value from being given away in connection with the instructional event by the winegrower, California winegrower's agent, wine importer, or retailer, except as authorized.

5) Provides that no alcoholic beverages may be sold at the instructional event, except that orders for the sale of wine may be accepted by the winegrower if the sales transaction is completed at the winegrower's premises.

6) Provides that the name, address, telephone number, email address, internet website address, and any other electronic media of a winegrower, wine importer, or winegrower's agent licensee, the brand names of wine being featured, and the time, date, location, and other identifying information of a wine promotional lecture at a retail premises may be listed in advance of the event in an advertisement of the off-sale or on-sale retail licensee.

This bill:

1) Expands on current provisions in the ABC Act related to advertisements by a winegrower, winegrower's agent, or wine importer for instructional events for consumers held at a retailer's premises by allowing that advertisement to contain videos that are up to 60 seconds long.

2) Removes the requirement that the specified information and any pictures, illustrations, or depictions in that advertisement be relatively inconspicuous in relation to the advertisement as a whole.

3) Provides that the advertisement may contain pictures, illustrations, videos, or depictions of the winegrower, wine importer, or winegrowers' agent and would authorize the advertisement to contain or consist of pictures, illustrations, videos, or graphical depictions.

Background

Author Statement. According to the author's office, "SB 1273 provides a targeted modernization to California's tied-house laws, building on the Legislature's prior work in AB 2452 (2018) and SB 788 (2019) by allowing winegrowers and wine importers to use short-term video in advertisements promoting legally permitted consumer events like winemaker dinners and tastings. Social media has changed dramatically since the Legislature last addressed this issue, and platforms like Instagram, TikTok, and Facebook now overwhelmingly favor video content, leaving California vintners at a growing disadvantage in reaching their own customers. At a time when the industry is facing serious headwinds, with well-known wineries downsizing or closing in recent months, this bill gives vintners a more authentic way to meet consumers where they are, at no cost to the state."

Tied-House Laws/Three-Tier System. Existing law, known as the "tied-house" law or "three-tier" system, separates the alcoholic beverage industry into three component parts: manufacturer/supplier (the first tier), wholesaler (the second tier),

and retailer (the third tier). The original policy rationale for this body of law was to: (1) promote the state's interest in an orderly market; (2) prohibit the vertical integration and dominance by a single producer in the marketplace; (3) prohibit commercial bribery and to protect the public from predatory marketing practices; and (4) discourage and/or prevent the intemperate use of alcoholic beverages. Tied-house laws generally prohibit suppliers and retailers from sharing common owners and legally restrict alcohol beverage suppliers' ability to gain control over retailers through indirect means. Generally, other than exemptions granted by the Legislature, the holder of one type of license is not permitted to do business as another type of licensee within the three-tier system.

Current authorizations. Winegrowers, their agents, and wine importers may hold instructional consumer tastings at a retailer's location, but only under specific legal conditions. They may provide small, free samples, since giveaways are otherwise prohibited. Alcohol cannot be sold at the tasting, though they may take orders as long as the actual sale is completed later at their own licensed premises. Current law also allows limited advertising of the event by the licensee, including basic identifying information and still images, but prohibits listing retail prices, making laudatory references to the retailer, using video, or making the retailer's information overly prominent.

This bill expands on provisions in the Act related to advertisements by the wine industry for instructional events for consumers at a retailer's premises. This bill allows for the advertisements to contain videos that are up to 60 seconds long and removes the requirement that the specified information and any pictures, illustrations, or depictions in that advertisement be relatively inconspicuous in relation to the advertisement as a whole.

Existing law authorizes certain licensees, or their representatives, to conduct or participate in defined instructional activities at a retailer's premises under specified conditions. Current law permits advertisements for these events to include limited information, pictures, illustrations, and depictions of the retailer's premises, personnel, and customers only if those visuals are relatively inconspicuous within the overall advertisement, and it prohibits the use of video. This bill expands this authority by allowing advertisements to include pictures, illustrations, videos, and depictions of the retailer's premises, personnel, and customers, subject to specified limitations.

Current statute limits how designated and on-sale retail licensees may advertise instructional tasting events to the general public, restricting them to specific mediums like flyers, newspapers, and interior signage. This bill eliminates these

channel restrictions, broadly authorizing licensees to advertise these events across various mediums. This bill seeks to modernize provisions governing how specified licensees advertise instructional events held at a retailer's premises, as specified. Major platforms including Instagram, Facebook, and TikTok have shifted their algorithms to prioritize video content, particularly short-form videos. Proponents contend that this update offers a sensible modernization of tied-house rules by permitting video in supplier advertising without weakening protections against undue retailer influence.

Related/Prior Legislation

AB 2452 (Aguiar-Curry, Chapter 705, Statutes of 2018) revised various advertising prohibitions for alcohol licensees when conducting instructional events at a retailer's location to, among other things, allow for pictures, illustrations, and depictions of the retailer's premises and for the name, address, telephone number, email address, Internet Web site address, and any other electronic media of the licensee upon whose licensed premises the event will be held.

AB 1891 (Levine, Chapter 273, Statutes of 2018) allows a licensed craft distiller to instruct consumers and conduct tastings on the premises of an on-sale and off-sale retailer, as long as certain specified conditions are met.

AB 780 (Williams, Chapter 408, Statutes of 2015) made clarifying and conforming changes relating to the listing of on-sale and off-sale retailers as a thing of value in order to enable licensees to connect with each other for normal commercial purposes.

AB 636 (Hall, Chapter 329, Statutes of 2013) permitted a winegrower, California winegrower's agent, importer, or other specified parties appearing at an instructional event, as specified, to provide autographs to consumers or consumer advertising specialties given by the person to a consumer or on any item provided by a consumer; and prohibited a requirement of the purchase of any alcoholic beverage in connection with such autographing.

SB 1101 (Wolk, Chapter 177, Statutes of 2010) clarified that winemakers who participate in instructional events or "meet the winemaker dinners," held at a retailer's licensed premises for consumers, may offer minimal samples, no more than three one-ounce tastes, of wine from "bottles."

AB 605 (Portantino, Chapter 230, Statutes of 2010) added new provisions to the Act authorizing the Department of ABC to issue to the holder of an "off-sale"

retail license an “instructional tasting license” for the purpose of furnishing tastings of alcoholic beverages to consumers, subject to certain limitations.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, minor and absorbable costs to ABC to provide education and enforcement of the revised advertising rules. This committee sees a wide array of bills that propose to modify the scope of alcohol laws. Generally, the majority of proposals do not generate significant new workload for ABC, but taken together, these proposals could lead to significant new costs and future budget requests. In this case, however, the proposed expansion of advertising privileges is relatively minor in scope and maintains safeguards against undue promotion of a retailer."

SUPPORT: (Verified 8/25/26)

Napa Valley Vintners (Source)

OPPOSITION: (Verified 8/25/26)

None received

ARGUMENTS IN SUPPORT: According to the Napa Valley Vintners, “SB 1273 further updates the changes to the Business & Professions Code that were made in 2018 through AB 2452 to allow for a winery event promotion using social media. The 2018 amendments represented a good-faith effort to align California’s tied-house advertising rules with the realities of social media promotion at that time by allowing for photos and social media handles to be used in promotions. However, the digital landscape has shifted dramatically in the intervening seven years in ways that the Legislature could not have fully anticipated. SB 1273 is a common-sense fix that modernizes tied-house restrictions to allow video content in supplier advertisements, while maintaining protections against undue retailer promotion.”

SUBJECT: Crimes: sexual exploitation of a child

SOURCE: Los Angeles City Attorney Hydee Feldstein Soto

DIGEST: This bill expands the crime of sexual exploitation of a child to include downloading, streaming, or accessing through electronic or digital media specified depictions of a minor engaged in an act of sexual conduct.

Assembly Amendments require that the person knew that the matter depicted a person under 18 years of age in an act of sexual conduct.

ANALYSIS:

Existing law:

1) Prohibits, except as provided, the act of knowingly sending or causing to sent, or bringing or causing to be brought, into this state for sale or distribution, or possessing, preparing, publishing, producing, developing, duplicating, or printing in this state any representation of information, data, or image, including, but not limited to specified media, or computer-generated equipment or any other computer-generated image that contains or incorporates in any manner, any film, filmstrip, or any digitally altered or artificial-intelligence-generated matter, with intent to distribute or to exhibit to, or to exchange with, others, or offering to distribute, distributing, or exhibiting to, or exchanging with, others, any obscene matter, knowing that the matter depicts a person under 18 years of age, or contains digitally altered or artificial-intelligence-generated data depicting what appears to be a person under 18 years of age, engaging in or simulating sexual conduct, as defined, punishable as a wobbler. (Penal (Pen.) Code, § 311.1, subd. (a).)

2) Prohibits the act of knowingly sending or causing to be sent, or bringing or causing to be brought, into this state for sale or distribution, or possessing, preparing, publishing, producing, developing, duplicating, or printing in this state, with intent to distribute or exhibit to others, or offering to distribute, distributing, exhibiting to others any obscene matter, punishable as a misdemeanor. (Pen. Code, § 311.2, subd. (a).)

3) Provides that every person who knowingly sends or causes to be sent, or brings or causes to be brought, into this state for sale or distribution, or in this state possesses, prepares, publishes, produces, develops, duplicates, or prints any representation of information, data, or image, including specified media or computer-generated equipment or any other computer-generated image that contains or incorporates in any manner, any film, filmstrip, or any digitally altered or artificial-intelligence-generated matter, with intent to distribute or exhibit to, or to exchange with, a person 18 years of age or older, or who offers to distribute, distributes, or exhibits to, or exchanges with, a person 18 years of age or older any matter, knowing that the matter depicts a person under 18 years of age personally engaging in or personally simulating sexual conduct, or any obscene matter that contains a digitally altered or artificial-intelligence-generated depiction of what appears to be a person under 18 years

of age engaging in such conduct, shall be guilty of a crime, punishable as a wobbler. (Pen. Code, § 311.2, subd. (c).)

4) Provides that every person who, with knowledge that a person is a minor under 18 years of age, or who, while in possession of any facts on the basis of which they should reasonably know that the person is a minor under 18 years of age, knowingly promotes, employs, uses, persuades, induces, or coerces a minor under 18 years of age, or any parent or guardian of a minor under 18 years of age who is under their control who knowingly permits the minor, to engage in or assist others to engage in either posing or modeling alone or with others for purposes of preparing any representation of information, data, or image, including specified media or computer-generated equipment or any other computer-generated image that contains or incorporates in any manner, any film, filmstrip, digitally altered or artificial-intelligence-generated matter, or live performance, involving sexual conduct by a minor under 18 years of age alone or with other persons or animals, is guilty of a felony. (Pen. Code, § 311.4, subd. (c).)

5) Provides that a person is guilty of sexual exploitation of a child if that person knowingly develops, duplicates, prints, or exchanges any representation of information, data, or image, including, but not limited to, any film, filmstrip, photograph, negative, slide, photocopy, videotape, video laser disc, computer hardware, computer software, computer floppy disc, data storage media, CD-ROM, or computer-generated equipment or any other computer-generated image that contains or incorporates in any manner, any film, filmstrip, or any digitally altered or artificial-intelligence-generated matter that depicts a person under 18 years of age engaged in an act of sexual conduct, punishable as a misdemeanor for a first offense and as a felony for any second or subsequent offense. (Pen. Code, § 311.3, subd. (a).)

6) Specifies that it is not necessary to prove that the matter is obscene in order to establish the violation above. (Pen. Code, § 311.3, subd. (b).)

7) Provides that the crime of sexual exploitation of a child does not apply to law enforcement and prosecution agencies, to legitimate medical, scientific, or education activities, or to lawful conduct between spouses. (Pen. Code, § 311.3, subd. (d).)

8) Defines. for the purposes of the crime of sexual exploitation of a child, "sexual conduct" as any of several enumerated sexual acts. (Pen. Code, § 311.3, subd. (c).)

9) Establishes the Child Abuse and Neglect Reporting Act (CANRA) which is generally intended to protect children from abuse and neglect with a focus on the needs of the victim. (Pen. Code, § 11164.)

10) Defines "neglect" under CANRA as the negligent treatment or the maltreatment of a child by a person responsible for the child's welfare under circumstances indicating harm or threatened harm to the child's health or welfare. The term includes both acts and omissions on the part of the responsible person. (Pen. Code, § 11165.2.)

11) Defines "child abuse or neglect" under CANRA to include physical injury or death inflicted by other than accidental means upon a child by another person, sexual abuse as defined, neglect as defined, the willful harming or injuring of a child or the endangering of the person or health of a child as defined, and unlawful corporal punishment or injury. "Child abuse or neglect" does not include a mutual affair between minors. "Child abuse or neglect" does not include an injury caused by reasonable and necessary force used by a peace officer acting within the course and scope of his or her employment as a peace officer. (Pen. Code, § 11165.6.)

12) Requires any mandated reporter who has knowledge of or observes a child, their professional capacity or within the scope of their employment whom they know or reasonably suspect has been the victim of child abuse or neglect, to report it as specified, to any police or sheriff's department, a county probation department if designated by the county to receive mandated reports, or the county welfare department. (Pen. Code, §§ 11166, subd. (a), 11165.9.)

13) For the purposes of CANRA, specifies that "sexual abuse" means sexual assault or sexual exploitation as defined by the following:

    a) "Sexual assault" means illegal sexual conduct as defined in several specified sections of the Penal Code, including provisions criminalizing rape, statutory rape, rape in concert, incest, sodomy, oral copulation, lewd or lascivious acts upon a child, sexual penetration, or child molestation, as specified.

    b) "Sexual exploitation" refers to the following:

        i. Conduct involving matter depicting a minor engaged in obscene acts in violation of the existing prohibition against preparing, selling or distributing obscene matter (Section 311.2) or against the employment of a minor to perform obscene acts (Section 311.4).

ii. A person who knowingly promotes, aids, or assists, employs, uses, persuades, induces, or coerces a child, or a person responsible for a child's welfare, who knowingly permits or encourages a child to engage in, or assist others to engage in, prostitution or a live performance involving obscene sexual conduct, or to either pose or model alone or with others for purposes of preparing a film, photograph, negative, slide, drawing, painting, or other pictorial depiction, involving obscene sexual conduct. For the purpose of this provision, "person responsible for a child's welfare" means a parent, guardian, foster parent, or a licensed administrator or employee of a public or private residential home, residential school, or other residential institution.

iii. A person who depicts a child in, or who knowingly develops, duplicates, prints, downloads, streams, accesses through any electronic or digital media, or exchanges, a film, photograph, videotape, video recording, negative, or slide in which a child is engaged in an act of obscene sexual conduct, except as provided. (Pen. Code, § 11165.1.)

This bill:

1) Expands the crime of sexual exploitation of a child to apply to anyone who downloads, streams, or accesses through electronic or digital media any representation of information, data, or image, as specified above, that depicts a person under 18 years of age engaged in an act of sexual conduct knowing that the matter depicts a person under the age of 18 engaged in an act of sexual conduct.

2) Specifies that the crime of sexual exploitation of a child does not apply to a child under 18 years of age alleged to have solely engaged in viewing sexual conduct through a video stream.

3) Expands the definition of "sexual exploitation" for the purposes of CANRA to include a person who depicts a child in, or who knowingly develops, duplicates, prints, downloads, streams, accesses through any electronic or digital media, or exchanges digitally altered or artificial-intelligence- generated matter that depicts a person under 18 years of age engaged in an act of sexual

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Non-reimbursable local incarceration costs of an unknown amount for additional convictions. A first violation is punishable by a fine of not more than $2,000, by imprisonment in a county jail for not more than one year, or both. A person previously convicted of a violation of that subdivision or any section of the same chapter is punishable by imprisonment in the state prison. Actual costs will depend on the number of convictions and the length of each sentence. The average annual cost to incarcerate one person in county jail is approximately $29,000, though costs are higher in larger counties. County incarceration costs are not subject to reimbursement by the state. However, overcrowding in county jails creates cost pressure on the General Fund (GF) because the state has historically granted new funding to counties to offset overcrowding resulting from public safety realignment.

- Increased state incarceration costs of an unknown amount (GF) to the California Department of Corrections and Rehabilitation (CDCR) to the extent additional persons with qualifying prior convictions are committed to state prison. The Legislative Analyst's Office estimates the average annual cost to incarcerate one person in state prison at $128,000; CDCR estimates $135,921. If two people are incarcerated in state prison as a result of this crime's expansion, the resulting incarceration costs to CDCR would exceed this committee's suspense threshold.

- Potential court cost pressures of an unknown amount (Trial Court Trust Fund (TCTF), GF) to adjudicate additional charges. The conduct reached by this bill — downloading, streaming, and accessing — is substantially more common than the development, duplication, printing, and exchange the statute currently reaches, so the number of chargeable violations could increase. Actual costs will depend on the number of charges filed and the time needed to adjudicate each case. Although courts are not funded on the basis of workload, increased pressure on the TCTF may create a demand for increased funding for courts from the GF. The state budget provides annual GF backfills to the TCTF to offset revenue reductions, totaling approximately $117.3 million in 2025-26.

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Nursing

SOURCE: Author

DIGEST: This bill makes various changes to the regulation of registered nurses (RNs) and advanced practice registered nurses (APRNs) recommended as part of the joint sunset review oversight of the Board of Registered Nursing (BRN).

Assembly Amendments revise the timeframe for a RN to petition for reinstatement of a license when the license was revoked by default for failure to submit a notice of defense; require the attestation for verification of Transition To Practice (TTP) requirements to be signed by a California-licensee; require the BRN to identify

states where practice experience meets or exceeds California's TTP requirements, as specified; require a licensee to submit proof of continuing education (CE) at the time of renewal; require the BRN to review comparable TTP requirements of other states; requires an Intervention Committee (IC) to determine, as part of a rehabilitation program, whether a participant would be required to practice nursing prior to completion of the program; and clarifies the authority of RNs to practice pursuant to direction of APRNs; and makes other technical changes.

ANALYSIS:

Existing law:

1) Establishes the BRN under the jurisdiction of the Department of Consumer Affairs to license and regulate registered nurses (RNs), advanced practice registered nurses (APRN), pre-licensure nursing programs and continuing education (CE) providers until January 1, 2027. (Business and Professions Code (BPC) § 2701, *et. seq.)*

2) Requires, until January 1, 2027, the BRN to appoint an executive officer (EO) who must be a current, licensed RN in this state. (BPC § 2708)

This bill:

1) Requires the BRN to make a list of approved schools of nursing available on its website and revises the requirement for the BRN to meet in northern and southern California and allows the BRN to meet in appropriate locations that are necessary to transact its business.

2) Requires the BRN's inspection criteria to be consistent with the 2020 Nursing Education Approved Guidelines established by the National Council of State Boards of Nursing (NCSBN) or its successor as approved by the BRN.

3) Deletes the requirement for licensure examinations to be written and the authorization for the BRN to offer a supplemental oral or practical examination.

4) Combines the renewal and furnishing application for Certified Nurse Midwives (CNMs), and Nurse Practitioners (NPs).

5) Replaces the percentage requirement for clinical experience with an hourly requirement during a declared state of emergency, as specified.

6) Requires any clinical practice hours that are not required to be in direct patient care and are provided using simulation experience to be based on the best practices published by the International Nursing Association for Clinical Simulation and Learning, the National Council of State Boards of Nursing, the Society for Simulation in Healthcare, or equivalent standards approved by the BRN.

7) Allows the transition to practice (TTP) for NPs to be completed in another state, in addition to California; requires the BRN to review out-of-state experience requirements by January 1, 2028; and require an attestation of completion of the TTP to be signed by a California licensee, as specified.

8) Permits a licensee whose license was suspended by default, to petition for reinstatement in a timeframe determined by the BRN.

9) Requires an IC to determine whether a participant is required to practice nursing prior to completing the program.

10) Repeals outdated references to fee floors, as specified.

11) Extends the operations of the BRN and its authority to appoint an EO by four years, until January 1, 2031.

12) Establishes a remediation pathway for directors and assistant program directors of prelicensure nursing education programs.

13) Makes additional technical and clarifying changes.

Background

Board of Registered Nursing and Sunset Review Oversight of the BRN. The BRN licenses and regulates over 500,000 nurse-licensees in California. In addition to licensing RNs, the BRN issues certificates to APRNs which include NPs, Certified Registered Nurse Anesthetists (CRNAs), Certified Nurse Midwives (CNMs), and Clinical Nurse Specialists (CNSs). The BRN is responsible for determining educational standards for all prelicensure nursing programs, approving such programs, approving CE providers, evaluating and licensing applicants, administering discipline, managing an intervention program for licensees with

substance use disorders or mental illness, and providing stakeholder information and outreach.

Geographic Meeting Requirements. Current law requires the BRN to meet at least once every three months in both Northern and Southern California. The BRN reports that meetings outside of Sacramento cost approximately $38,000 per meeting for travel, lodging, and hotel contracts. Eliminating the traveling requirement for meetings may reduce BRN expenditures. This bill modifies the BRN's existing mandate to allow the BRN flexibility to determine when and where it is appropriate to meet to help ensure the greatest amount of public participation.

Transition to Practice Acceptance: Experience Gained in Another State. Assembly Bill (AB) 890 (Wood, Chapter 256, Statutes of 2020) created a multi-tiered framework for NPs to practice in California. Under current law, NPs may practice independent of physician supervision in a defined health care setting (i.e. general acute care hospital, intermediate care facility, nursing facility), outside of one of those defined settings (a private practice), or NPs may practice in any healthcare facility under established protocols and procedures with physician supervision.

AB 890 specified education and experience requirements for an NP to be eligible to practice independent of physician supervision. NPs who seek independent practice in a defined healthcare setting are referred to as "103 NPs". Applicants for a 103 NP designation are required to pass a national NP examination, obtain certification as an NP from an accredited national certifying body, and complete a TTP. Notably, the law limits these individuals to having to complete the TTP in California. The TTP consists of a minimum of three full-time equivalent years of practice or 4,600 hours. NPs who want to practice independently outside of a defined healthcare setting, are referred to as "104 NPs." 104 NPs are required to meet additional requirements and provide proof of practice for three-years as a 103 NP in good standing, in addition to satisfying the TTP requirement. This bill authorizes TTP to be completed in California or another state but requires that experience to be verified by a California licensed provider as authorized in current law. Further, this bill requires the BRN to review TTP requirements in other states that require a TTP to verify consistency in training.

Furnishing Number and Streamlining the renewal process for NPs and CNMs. In California, CNMs and NPs may prescribe or furnish certain drugs and substances. CNMs and NPs may prescribe according to specified protocols and procedures while 103 and 104 NPs are authorized to prescribe independently. Both CNMs and NPs are restricted to only furnish those drugs or substances which fall within the

scope of practice of their respective certification level. Furthermore, for an NP whose furnishing is subject to standardized procedures and protocols, they must be supervised by a physician and surgeon.

AB 2684 (Berman, Chapter 413, Statutes of 2022) authorized the BRN to combine the application for a furnishing number into the same application for BRN-certification as an NP and CNM. Pursuant to BPC §§ 2746.51 and 2836.3, the BRN may issue a furnishing number upon initial application and, if approved by the BRN, the applicant is not required to make a separate application. However, the change does not affect renewal applications. This bill permits the BRN to combine the renewal application for both furnishing and licensing into one application, similar to what is permitted for initial authorization. This bill also removes unnecessary fees.

Uniform Standards for Clinical Practice Hours and Simulation-based Learning Guidelines. AB 2288 (Low, Chapter 282, Statutes of 2020), authorized the director of an approved nursing program, during a state of emergency, to make requests to the BRN to revise the number of required clinical experience needed and allow greater flexibility to use clinical simulation. The following year, during the BRN's sunset review discussions, the issue of simulation learning was once again raised. As a result, AB 2684 (Berman, Chapter 413, Statutes of 2022) revised the acceptance of simulation learning by replacing the percentage requirement of direct patient care clinical hours with a new 500-hour minimum number of direct patient care clinical hours that an approved nursing school or nursing program must meet with a minimum of 30 hours of supervised direct patient care clinical hours dedicated to each nursing area.

The changes from AB 2684 have made the emergency provisions specified in statute inconsistent with existing practice. The BRN no longer has a "percentage based" mechanism for direct clinical care requirements and instead relies on hours. This bill removes any references to percentages for simulation learning and instead replaces those numbers with the corresponding hours necessary to meet the BRN's requirements. In addition, this bill requires that anytime simulation is used for clinical experience, simulated learning meets the best practices published by the International Nursing Association for Clinical Simulation and Learning, the NCSBN, the Society for Simulation in Healthcare, or equivalent standards approved by the BRN.

School Approval Standards and Conformance with National Council of State Boards of Nursing (NCSBN) Guidelines. To help establish more consistency and

efficiency in the program approval process, the BRN seeks to revise some of its current standards and replace them with evidence-based standards that are recognized at the national level developed through the NCBSN. This bill requires the BRN, in its inspection and oversight authority of prelicensure nursing programs, to be sure any inspections are consistent with the national guidelines established by the NCSBN.

Nursing Program Directors. The BRN sponsored AB 2015 (Schiavo, Chapter 370, Statutes of 2023) with the goal of additionally streamlining the BRN's approval process for faculty and program directors. AB 2015 did two things: it provided a pathway for an RN to proactively be approved by the BRN as a faculty, director, or assistant director and established a temporary approval process for a RN seeking approval to be a faculty member (education) that they would be able to meet within a year, allowing them to fill the vacant role while remedying any deficiencies as laid out in a remediation plan accepted by the BRN.

Registered nurse practice conformity. RNs are required to operate pursuant to standardized procedures, which permits RNs and APRNs to delegate certain tasks, including the ordering of nursing services, as determined through the standardized procedures both at a facility and the standardized procedures between some NPs and supervising physicians. However, as recent legislative changes have granted authority for APRNs, including NPs, CRNAs, and CNMs to operate independent of standardized procedures, BRN believes there is ambiguity related to independently practicing APRNs and their authority to delegate or order tasks to other RNs. This bill adds clarifying language to ensure that RNs may continue to complete authorizes RN-related tasks as necessary.

Among other changes to update the BRN's operations, this bill requires a licensee to submit proof of completion of mandatory CE during the renewal process reducing the BRN's need to audit a licensee's CE history. This bill will also provide the BRN with flexibility to determine whether a licensee who is participating in an IP program will need to work as an RN in direct patient care prior to completing the IP.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations, this bill will result in costs of approximately $67.3 million to support the continued operation of the BRN's licensing and enforcement activities. The bill will result in additional costs of $218,000 in fiscal year (FY) 2026-27 and $210,000 in FY 2027-28 and ongoing for one staff position to interpret scope-of-practice implications, compare

transition-to-practice requirements to California standards, draft policy and guidance, validate vendor provided data, and both maintain Board specific historical analysis and a contract for a multi-state legislative tracking subscription service (BRN Fund). The bill will also result in minor and absorbable costs to the Department of Consumer Affairs' (DCA) Office of Information Services.

SUPPORT: (Verified 8/25/26)

Board of Registered Nursing
California Association for Nurse Practitioners
California Association of Nurse Anesthesiology

OPPOSITION: (Verified 8/25/26)

California Medical Association (04/23/2026 version)

ARGUMENTS IN SUPPORT: Supporters note general support for extending the operations of the Board of Registered Nursing.

ARGUMENTS IN OPPOSITION: California Medical Association writes in opposition to the April 23, 2026 version and notes "This bill lacks a sufficient clinical experience verification mechanism. An individual nurse practitioner attesting to completion of the transition period is not required to verify competence, clinical expertise, or other professional standards and is only attesting that the required three years of experience was completed. Time in practice alone should not be viewed as a substitute for meaningful evaluation of clinical competency. Additionally, this bill may encourage applicants to obtain qualifying experience in states with less rigorous oversight and then use that experience to obtain broader authority in California. This could create inconsistencies in preparation and training among practitioners exercising the same authority."

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Respiratory Care Practice Act

SOURCE: Author

DIGEST: This bill is the sunset bill for the Respiratory Care Board (RCB or Board) which makes various changes to the regulation of licensed respiratory care practitioners (RCPs) by RCB stemming from the comprehensive sunset review oversight of the RCB.

Assembly Amendments clarify in the Licensed Vocational Practice Act that basic respiratory tasks and services apply to all settings except the exempt settings, which are intended to have separate regulations that are not limited to basic

functions; authorize licensed vocational nurses (LVNs) to perform certain suctioning tasks, as specified; exempt clerical documentation and tasks that are not specifically identified by the Board and do not require a respiratory assessment, as specified; clarify whenever a task requires a respiratory assessment, it must be performed by an appropriately licensed practitioner, regardless of the patient's underlying diagnosis or the primary reason they are receiving care; define intermediate care facilities for the purpose of designating all qualified intermediate care facilities as exempt settings; define respiratory assessment; and make various technical changes to the Act.

ANALYSIS:

Existing law establishes, until January 1, 2027, the RCB responsible for the licensing and enforcement of the respiratory care profession in California. (Business & Professions Code (BPC) § 3700 et seq.)

This bill makes various changes to the RCB in response to issues raised during the RCB sunset review oversight process including:

1) Extends the operations of RCB and its authority for RCB to appoint an executive officer from January 1, 2027, to January 1, 2031.

2) Clarifies in the Licensed Vocational Practice Act that basic respiratory tasks and services apply to all settings except the exempt settings, as specified.

3) Authorizes an LVN to perform certain suctioning tasks including oral suctioning performed within the oral cavity that does not enter the oropharynx or beyond; nasal suctioning performed within the nasal cavity that does not enter the nasopharynx or beyond; tracheostomy tube suctioning when the suctioning device remains within the tracheostomy tube and does not pass beyond the distal end of the tube; removal and replacement of an external speaking valve for purposes of suctioning the tracheostomy tube.

4) Provides a technical name change to the national examination title to consolidate both the National Board for Respiratory Care's multiple-choice exam and the clinical exam.

5) Provides the RCB with authorization to grant automatic license suspension upon felony conviction for specified offenses and automatic license revocation for licensees convicted of specified felonies involving sexual misconduct or serious violence.

6) Clarifies that the following are not considered the practice of respiratory care: documenting observations and gathering and reporting data to another health care provider, without analysis, interpretation, or independent clinical decision making; any tasks or services that are not specifically identified by the Board and do not require respiratory assessment.

7) Defines respiratory assessment to mean conducting analysis to make recommendations concerning the respiratory management, diagnosis, treatment, or care of a patient or as a means to perform any task in regard to the care of a patient.

8) Adds additional exempt practice settings LVNs may perform respiratory care services, as specified; requires LVNs to complete patient-specific training satisfactory to their employer on or before January 1, 2028 and before the provision of care; and on or after January 1, 2028 requires LVNs, in accordance with guidelines that shall be promulgated by the RCB and in collaboration with the Board of Vocational Nurses and Psychiatric Technicians (BVNPT), to complete task-specific training on each respiratory task or service the LVN will perform; specifies that training may be provided by the employer directly or through the California Association of Medical Suppliers, the California Society for Respiratory Care, or another organization identified by the Board; and requires LVNs complete patient-specific training provided by their employer.

9) Defines intermediate care facilities to include an intermediate care facility for the developmentally disabled that provides habilitative care, nursing care, or continuous nursing care.

10) Increases the renewal fee to $330, increases the renewal ceiling fee to $375 and permanently eliminates the license fee for applicants applying for licensure.

Background

The RCB licenses and regulates RCPs. RCPs work under the direction of a medical director and specialize in evaluating and treating patients with breathing difficulties as a result of heart, lung, and other disorders, as well as providing diagnostic, educational, and rehabilitation services. RCPs are utilized in virtually all health care settings.

RCPs provide services to patients ranging from premature infants to older adults. RCPs provide treatments for patients who have breathing difficulties and care for those who are dependent upon life support and cannot breathe on their own. RCPs

treat patients with acute and chronic diseases including chronic obstructive pulmonary disease (COPD), trauma victims, and surgery patients.

The Board currently issues over 1,200 new licenses and renews over 10,000 licenses each year. As of June 30, 2025, the Board had 21,390 active licensees, 2,799 delinquent licensees, and 891 current but inactive licensees. Of these licensees, 1,536 live out of the state or country. An additional 1,474 licenses have been placed in retirement status as of June 30, 2025.

Current law, (BPC § 3710.1), states that the protection of the public shall be the highest priority for the Board in exercising its licensing, regulatory, and disciplinary functions.

Oversight Hearings and Sunset Review of Licensing Boards and Programs. In March 2026, the Senate Business, Professions and Economic Development Committee and the Assembly Committee on Business and Professions (Committees) began their comprehensive sunset review oversight of 10 regulatory entities including the RCB. The Committees conducted three oversight hearings. This bill and the accompanying sunset bills are intended to implement legislative changes as recommended by the staff of the Committees, and which are reflected in the Background Papers prepared by the Committee staff for each agency and program reviewed this year. The following are selected issues pertaining to the Board along with background information concerning the issue.

Clarification for Individuals in Specified Settings and Under Certain Circumstances to be Authorized to Provide Limited Respiratory Care Services. For over 20 years, the Board and BVNPT have differed in their view of whether LVNs are legally authorized to provide certain respiratory services, including mechanical ventilator care, and have long discussed the difference in education and training between LVNs and RCPs. At one point, BVNPT issued guidance to its licensees saying that according to that board, they were authorized to adjust ventilator settings and do various related respiratory tasks, despite not having any statutory or regulatory authority to support that administrative guidance. The RCB has remained concerned about the patient safety implications of this messaging, noting that BVNPT has failed to revoke the policy even though there is no accompanying legal justification for it. The Board notes that LVNs performing services beyond the basic care they are authorized to engage in has led to adverse incidents resulting in death or serious harm that the Board is made aware of via requirements to take enforcement action for unlicensed practice.

In 2022, SB 1436 (Roth, Chapter 624, Statutes of 2022), amended the Vocational Nursing Practice Act to reiterate that LVN's do not possess independent authority to perform respiratory care services or treatments that are not specifically identified by the RCB. SB 1436 authorized LVNs with appropriate training, to perform only those basic respiratory tasks expressly identified by the Board. The Board-authorized tasks must be manual or technical in nature or involve data collection and must not require any form of respiratory assessment. This was intended to ensure that LVN involvement in respiratory care is restricted to narrowly defined, non-clinical activities that do not overlap with the specialized judgement and skills of RCPs. This bill recognized the unique care needs in home settings and provided clarifications to ensure LVNs performing certain tasks pursuant to employer training would not be considered the practice of respiratory care, ensuring that the LVN would not face unlicensed activity enforcement under narrow circumstances.

Since the passage of SB 1436, the Board became aware of other licensed home and community-based facilities and patients not covered in the exemptions outlined by that bill. Settings with only one or a few patients requiring respiratory services make it unfeasible to hire a full-time RCP and the Board sought to find balance to ensure patients would not be re-institutionalized or lose access to daily living services. In response to stakeholder concerns, the Board conducted extensive research to identify additional types of facilities, like small facilities outside of acute care facilities and independent providers who provide for transport and/or overseeing care of patients during daily activities, such as an outing, attending school, or providing a few hours of relief for parents' in-home care.

SB 1451 (Ashby, Chapter 480, Statutes of 2024) further amended the Act to add new exemptions for LVNs working in additional community-based settings to clarify that those individuals would not be considered to be practicing respiratory care and subject to RCB oversight.

In March 2024, the Board initiated the first of several new regulatory packages to define Board-approved basic respiratory tasks and services that LVNs may lawfully perform, in accordance with requirements for the Board to undertake this work. The regulatory language, discussed extensively at public meetings, explicitly listed the tasks that could be considered "basic", while also clarifying the limits of LVN practice.

While the basic respiratory tasks and services regulation provided clarity for licensed health care facilities, it erroneously did not include the additional exempt settings as added by SB 1451. This oversight prompted questions and concerns

regarding the level of care permitted in home health and community-based settings where LVNs have historically provided respiratory care beyond respiratory care services. To address these concerns, on January 12, 2026, the Office of Administrative Law approved an emergency amendment that clarified that the LVNs performing respiratory care services identified by the RCB while working in the specified home and community based exempt settings are not engaging in respiratory care.

The Board continued to receive questions from stakeholders specifically related to how its regulatory definition of basic respiratory services impacts suctioning-related tasks involving oral, nasal and tracheostomy-related care. According to the Board, the questions generally related to tasks that were typically viewed as basic nursing or caregiving functions and were not intended to be regulated as respiratory care services by RCB. To address this concern, on January 23, 2026, the Board held a Professional Qualifications Committee (PQC) meeting to discuss stakeholder feedback, examine how certain suctioning tasks are described and categorized under CCR, Title 16, §1399.365 and consider whether additional clarification is necessary. As discussed during the PQC meeting, the Board's regulatory concerns were focused on suctioning that involves *entry into the airway* and carries associated respiratory risks, such as bronchospasm, hypoxemia, mucosal trauma, or hemodynamic instability. The Board states that the regulation was structured to address suctioning procedures that rise to the level of respiratory care because they involve airway entry and require clinical respiratory assessment.

The PQC has determined that superficial nasal suctioning, within the nasal cavity only, is commonly treated as a basic nursing or caregiver task and does not involve airway entry, and therefore, does not rise to the level of requiring a clinical respiratory assessment. Nasal suctioning becomes a respiratory task when it enters the pharynx or airway therefore requiring a clinical respiratory assessment.

The PQC has determined that suctioning that remains confined to the interior of the tracheostomy tube and does not pass beyond the distal end of the tube is commonly treated as a basic nursing or caregiver task and does not involve airway entry, and therefore, does not rise to the level of requiring a clinical respiratory assessment.

The regulation does not address oral suctioning. Currently, oral suctioning is permissible when it is limited to the visible oral cavity and does not enter the airway or the oropharynx The PQC has determined that oral suctioning becomes a respiratory task when it enters beyond the oral cavity into the oropharynx or airway therefore requiring a clinical respiratory assessment.

At the March 2025 Board meeting, initial conceptual regulatory language was presented for three proposed sections to CCR Title 16, §§ 1399.361, 1399.362 and 1399.363, implementing the statutory framework created by SB 1451. The Board was provided with detailed feedback from board members and stakeholders to help refine the draft language. The clarified task lists aligned the terminology with national respiratory care standards. The RCB reports that board staff have initiated coordination with training providers and will continue working closely with the BVNPT and other stakeholders to refine the regulatory language establishing corresponding training standards. The final regulatory package is expected to be completed and adopted by or prior to the existing January 1, 2028, implementation date, barring any unforeseen obstacles.

This bill updates the Licensed Vocational Practice Act to clarify that basic respiratory tasks and services apply to all settings except exempt settings which are intended to have separate regulations that will be promulgated by the RCB on January 1, 2028. To address further concerns shared by stakeholders, this bill updates the exempt settings in which LVN's may perform respiratory care. This bill recognizes suctioning as a basic nursing or care giving task and authorizes an LVN to perform oral, nasal and tracheal suctioning tasks that do not permeate the airway, as specified. To dispel any further ambiguity for LVNs, this bill clarifies that clerical documentation and tasks that are not specifically identified by the Board and do not require a respiratory assessment are not considered a respiratory task or service and whenever a task requires a respiratory assessment, defined in the bill, it must be performed by an appropriately licensed practitioner, regardless of the patients underlying diagnosis or the primary reason that they are receiving care.

Automatic license suspension and revocation for certain felony convictions. Currently, licensees may still practice while the administrative enforcement process plays out, putting vulnerable patients at risk. Allowing licensees convicted of serious felony offenses to continue practicing during extended administrative proceedings undermines public trust and jeopardizes patient safety. To bridge this gap in enforcement, the Board recommended amendments similar to authority the Medical Board of California has to authorize automatic license suspension upon felony conviction for specified offenses and automatic license revocation for licensees convicted of specified felony offenses involving sexual misconduct or serious violence. This bill allows the RCB to automatically suspend and revoke licenses for certain felony convictions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations, the bill will result in costs of approximately $4.4 million per year to extend the operation of RCB. The Board of Vocational Nursing and Psychiatric Technicians anticipates potential costs of an unknown amount due to an increase in the number of complaints received and consequent workload and costs.

SUPPORT: (Verified 8/24/26)

California Assisted Living Association
California Association of Medical Product Suppliers
California Society for Respiratory Care
Pediatric Day Health Care Coalition
Respiratory Care Board of California

OPPOSITION: (Verified 8/24/26)

American Nurses Association/California
Association of California Healthcare Districts
California Association of Health Facilities
California Hospital Association
Leading Age California
One individual

ARGUMENTS IN SUPPORT: The California Assisted Living Association, The California Respiratory Care Board, the California Association of Medical Product Suppliers, and the Pediatric Day Health Care Coalition write in support stating that this bill streamlines and simplify the process whereby LVNs working for employers in exempted settings may perform specific respiratory care tasks and services, and ensures that there are adequate respiratory care services and providers in all care settings so that individuals with complex medical needs will continue to have the choice to safely reside in their homes or community based settings, maintain their independence and quality of life, and stay connected with their loved ones and communities.

ARGUMENTS IN OPPOSITION: Opposition to this bill states that establishing a different scope of practice for LVN's based on the setting in which they are practicing is inconsistent with how scope of practice has been historically determined for other licensed health professionals. They request this bill be amended to either delete the setting-specific framework in the existing SB 1304 or include additional settings where an LVN may perform respiratory care tasks to include skilled nursing facilities (SNFs), intermediate care facilities for the developmentally disable, and pediatric and adult subacute facilities and hospitals;

allow employers that operate both exempt and non-exempt settings, such as continuing care retirement communities that operate senior living, assisted living and SNF's on the same campus, to train LVNs that work in all the settings to provide respiratory care tasks to residents that move between settings as their care needs change; clarify that LVNs' may perform respiratory tasks as part of their formal training and education program and under the supervision of the training program in any setting; specify the basic respiratory tasks that are within the data collection and observation roles of their scope and can be performed by LVNs in any setting based on their existing licensure and without additional training.

SOURCE: Author

DIGEST: This urgency bill makes various conforming changes to existing requirements for unlicensed dental assistants (DAs) to complete an infection control course and makes technical changes to the Licensed Physicians from Mexico Program, board appointments under the Veterinary Medicine Practice Act, and contract requirements under the Private Investigator Act.

Assembly Amendments make a conforming change to require physician participants in the Physicians from Mexico program to satisfactorily complete the Test of

English as a Foreign Language (TOEFL) by scoring a minimum of 85 rather than 85 percent.

ANALYSIS:

Existing law:

1) Regulates the practice of dentistry and establishes the Dental Board of California (DBC) to administer and enforce the Dental Practice Act. (Business and Professions Code (BPC) §§ 1600-1976)

2) Defines a Dental Assistant (DA) as an individual without a license who may perform basic supportive dental procedures under the supervision of a licensed dentist that has technically elementary characteristics, are completely reversible and are unlikely to cause potentially hazardous conditions for the patient being treated. (BPC § 1750 (a))

3) Requires the supervising licensed dentist to be directly responsible for determining the competency of the DA to perform the basic supportive dental procedures, and responsible for ensuring the DA has successfully completed a board-approved eight-hour course in infection control prior to performing any basic supportive dental procedures involving potential exposure to blood, saliva, or other potentially infectious materials. (BPC § 1750 (b-c))

4) Defines "direct supervision" to mean the supervision of dental procedures based on instructions given by a licensed dentist who shall be physically present in the treatment facility during the performance of those procedures. (BPC § 1741 (k))

5) Defines "general supervision" to mean supervision of dental procedures based on instructions given by a licensed dentist but not requiring the physical presence of the supervising dentist during the performance of those procedures. (BPC § 1741 (l))

6) Authorizes a DA to perform specified duties under the direct supervision and pursuant to the order, control, and full professional responsibility of a licensed dentist. (BPC § 1750.1 (b) (1-18))

7) Defines an infection control course as providing theory and clinical application in infection control practices and principles where the protection of the public is its primary focus. An unlicensed DA not enrolled in a board-approved program for registered dental assisting or an alternative dental assisting program shall complete either a board-approved eight-hour course, with six

hours being didactic instruction and two hours being laboratory instruction or a board-approved eight-hour course, with six hours of didactic instruction and at least two hours of laboratory instruction using video or a series of video training tools, all of which may be delivered using asynchronous, synchronous, or online learning mechanisms. (BPC § 1755)

8) Establishes the Medical Practice Act to regulate the practice of medicine by the Medical Board of California (MBC) within the Department of Consumer Affairs (DCA). (BPC §§ 2000-2529.8.1)

9) Establishes the Licensed Physicians from Mexico Program, which authorizes up to 30 licensed physicians from Mexico to practice medicine in California for a period not to exceed three years and requires applicants to submit an applicant to the MBC between October 1, 20205, and December 1, 2025, except that the MBC may accept up to 15 applications after December 31, 2025, and before January 1, 2028. (BPC § 2125 (g)(1)(C))

10) Establishes the Veterinary Medicine Practice Act to be administered by the Veterinary Medical Board (VMB) within DCA and specifies the VMB be comprised of nine members – four licensed veterinarians, two registered veterinary technicians, and three public members. (BPC §§ 4800-4920.8)

11) Requires a veterinary technician to furnish satisfactory evidence of minimum education, as specified. (BPC § 4841.5(a)(4)(B))

12) Establishes the Private Investigator Act (Act), which vests with the director of the DCA, and by delegation, the Bureau of Security and Investigative Services (BSIS), the responsibility to administer and enforce the provisions of the Act. (BPC §§ 7512-7573.5)

13) Requires every agreement to provide a service regulated by the Act, including, but not limited to, contract agreements and investigative agreements, to be in writing and include specified information, including the approximate state and completion dates of the work to be provided. (BPC § 7254 (a)(3))

This bill:

1) Authorizes unlicensed DAs, in order to comply with infection control course completion requirements, to complete either the Dental Assisting National Board's Infection Control examination or:

   a) a Dental Board-approved infection control course provided by a board-approved registered dental assisting education program

b) a Dental Board-approved infection control course that complies with existing Dental Board regulations

c) an asynchronous, synchronous, or online learning mechanism course offered by either the California Dental Association or a provider approved by the California Dental Association; the American Dental Association's Continuing Education Recognition Program or; the Academy of General Dentistry's Program Approval for Continuing Education

2) Specifies that laboratory instruction means, for purposes of laboratory learning via an asynchronous, synchronous, or online learning mechanism course, instruction in which students perform procedures using study models, mannequins, or other simulation methods.

3) Extends the application period for the Licensed Physicians from Mexico program to between October 1, 2025, and July 1, 2026, except that 15 applications may be accepted after July 1, 2026, and before January 1, 2028.

4) Makes technical changes to the VMB composition and appointing authorities.

5) Adds education provided by a California public school as acceptable evidence of minimum education competency for registration as a veterinary technician.

6) Clarifies that a private investigator master agreement for frequently contracted services over a specified period of time shall be exempt from including beginning and termination dates of the work to be performed.

7) States that this bill is urgent and necessary to take effect immediately to allow the MBC to timely accept applications from eligible participants for the Licensed Physicians from Mexico Program pursuant to AB 2860 (Garcia, Chapter 246, Statutes of 2024), to provide clarity for licensing enforcement and services required to be rendered only through a written contract under the Act pursuant to SB 1454 (Ashby, Chapter 484, Statutes of 2024), to ensure the CVMB has a complete composition pursuant to AB 1502 (Berman, Chapter 195, Statutes of 2025), and to further ensure the CVMB has timely and complete requirements to evaluate applicants to become a registered veterinary technician, it is necessary that this bill go into immediate effect. Unlicensed DAs are currently required to take an eight-hour course prior to performing any basic supportive dental procedures that would have potential exposure to infectious materials. There have been issues preventing the establishment of the eight-hour course virtually and the eight-hour course is not readily available in many parts of the state, especially remote and rural areas already

experiencing access and workforce shortage issues. To mitigate these outcomes, it is necessary that this act take effect immediately.

Background

The DBC licenses an estimated 112,000 dental professionals, of which 43,000 are fully licensed dentists; 46,000 are registered DAs; and 2,300 are registered dental assistants in extended functions. The DBC is also responsible for setting the duties and functions of an estimated 50,000 unlicensed DAs.

DAs are unlicensed, thus not registered with the DBC or directly regulated by the DBC. These individuals work under the direct supervision of a licensed dentist and assist that dentist with basic supportive procedures that are reversible and not likely to cause hazardous conditions for the patient being treated. Although unlicensed, these individuals are required to complete training and courses aimed at ensuring patient safety.

In 2024, DBC was subject to the Legislature's sunset review oversight process, which culminated in the passage of SB 1453 (Ashby, Chapter 483, Statutes of 2024), the DBC sunset bill. SB 1453 made significant changes to unlicensed DA practice. In response to concerns about dental workforce shortages, AB 481 (Carrillo of 2023) would have created new licensure pathways and expanded the duties of DAs. Proponents cited data from DBC showing that half of the state's 58 counties are experiencing a shortage of dental assistants and noted a 2021 survey that found 44% of providers indicated that trouble filling vacant positions limited their practice's ability to treat more patients. SB 1453 incorporated provisions of AB 481 that DBC could effectively implement, including various changes to the education, scope of practice, and regulation of dental auxiliaries, including DAs.

SB 1453 established the requirement that all unlicensed DAs who are not enrolled in a DBC-approved or alternative dental assisting program must complete an infection control course prior to the unlicensed DA performing any basic supportive dental procedures involving potential exposure to blood, saliva, or other potentially infectious materials. The bill specified that the course must be comprised of six hours of didactic instruction and two hours of laboratory instruction and authorized the course to be offered either in-person or using a video or a series of video training tools, all of which may be delivered using asynchronous, synchronous, or online learning mechanisms. SB 1453 took effect on January 1, 2025.

In the months before SB 1453 took effect, despite being involved in every single aspect of the bill and having opportunities to weigh in about barriers to effective

implementation of the measure, including language surrounding the infection-control course, DBC began to publicly discuss issues that DBC staff said prevented key provisions of SB 1453 from taking effect. While the statute clearly and intentionally outlined a separate set of standards for the unlicensed DA infection control course, DBC staff expressed concerns at DBC meetings that this course would not meet the same standards as other courses required for DBC licensees and registrants. It should be noted, unlicensed DAs only perform basic supportive dental procedures, defined as those procedures that have technically elementary characteristics, are completely reversible, and are unlikely to precipitate potentially hazardous conditions for the patient being treated. Despite this fact, DBC cited additional concerns.

DBC staff said that the hours in the infection control course could not be met by existing DBC-approved course providers, despite the likely ability for course providers to update content to comply with the statutory requirements and receive updated approval to offer this specific course.

DBC also took umbrage with the fact that DBC was not provided authority to approve, deny, or withdraw approval for the SB 1453-created course, authority DBC has in regulations for oversight of programs created for registered DAs. Rather than explore alternatives to ensure program integrity for this one specific, statutorily prescribed course, DBC said it could not be implemented because DBC didn't have a process the same as its process for other courses.

SB 1453 authorized two hours of instruction to be delivered using asynchronous, synchronous, or online learning mechanisms or a combination thereof, but DBC said that is not enough and said it needed to meet requirements for the existing infection control course that requires hands-on laboratory activities like hand washing and glove use, despite the statute clearly establishing a different course and different course pathway for unlicensed DAs.

DBC also noted that there are no examination requirements, despite the intended course participants being unlicensed DAs who are not required to demonstrate competency through formal examination prior to performing their duties, as their competency is determined at the discretion of the supervising dentist.

This bill is intended to respond to DBC's determination that provisions of SB 1453 are not implementable, and among other changes, codify DBC regulations related to course approval, instruction, oversight, examinations, and more. The bill also updates current law to specify that a DA must complete the infection control course on or before 60 days from the first day of employment and specifies that,

prior to the DAs exposure to any potentially infectious materials, a bloodborne pathogen training is required to be provided by the employer.

MBC, CVMB, and BSIS Amendments. The amendments to various additional practice acts: 1) extend the timeframe for the MBC to accept applications from participants in the Mexico Pilot Program for a few months in case anything goes awry with the visa process or to allow for other contingencies and also make a conforming change related to the necessary TOEFL score; 2) make necessary and technical changes to the CVMB's composition and appointing authorities; and 3) clarify provisions for private investigators to provide contracts in the event of an investigation, while technical in nature, are time-sensitive and critical to the effective operations of each program and thus, are appropriate and necessary for inclusion in this urgency measure.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

No state costs.

SUPPORT: (Verified 8/24/26)

California Association of Licensed Investigators
California Association of Oral and Maxillofacial Surgeons
California Association of Orthodontists
California Dental Association
Dental Board of California
Medical Board of California

OPPOSITION: (Verified 8/24/26)

California Dental Assisting Alliance
California Dental Hygienist Association
Dental Hygiene Board of California

ARGUMENTS IN SUPPORT: The California Dental Association (CDA) notes that, "The limited availability of in-person courses, especially in rural and underserved areas, already struggling with workforce shortages, creates significant hiring delays. As a result, some candidates pursue jobs in other industries, further reducing the dental workforce. This challenge not only worsens staffing shortages in dental practices but also limits patient access to care."

The California Association of Licensed Investigators writes, "The California Association of Licensed Investigators [CALI] appreciates the provision added to SB 1311 on March 26 to clarify Business and Professions Code Section 7524 and

we support the measure as amended. SB 1311 would acknowledge and address the master agreements licensed private investigators have with many of their clients for frequently contracted services over extended periods of time."

The California Association of Oral and Maxillofacial Surgeons writes, "This bill provides a reasonable and balanced update to existing law by allowing dental assistants to meet infection control requirements through either a board-approved course or by successfully completing the Dental Assisting National Board's Infection Control examination. It also introduces flexibility in course delivery by permitting a portion of required instruction to be completed through video-based training tools, while preserving hands-on laboratory components."
The California Association of Orthodontists writes that, "At a time when dental practices continue to face workforce challenges, SB 1311 provides sensible flexibility without compromising patient safety or professional standards. Supporting multiple pathways to demonstrate infection control competency will help maintain a well-trained dental workforce that continues to meet California's high standards of patient care."

ARGUMENTS IN OPPOSITION: The California Dental Assisting Alliance believes the bill conflicts with and undermines the Dental Board's mission. They say that the bill removes DBC from the regulatory process; replaces course requirements with examination only; eliminates hands-on training and creates inconsistency between pathway options.

The California Dental Hygienist Association and Dental Hygiene Board of California believes that this bill should be amended to require the dentist, or another licensed member of the dental team with infection control education and training, "to provide on-the-job training to the unlicensed dental assistant to ensure she/he is able to demonstrate how to carry out the safety protocols and duties in CCR Title 16, section 1005 (gloves, mask, sterilization) prior to working with the potentially infectious materials and patients." The group believes the bill, to have proof of training, should "require the [dentist] to certify that the hands-on training was successfully completed and keep a record of the certification available upon request."

SUBJECT: Cemeteries

SOURCE: Author

DIGEST: This bill 1) establishes a process for an endowment care cemetery to be declared abandoned and have its title transferred to the county in which the cemetery is located; and 2) permits the county to transfer the care and maintenance of the cemetery to a California nonprofit public benefit corporation, as specified.

Assembly Amendments delete the current version of the bill and create a new bill; establish a process for a county to declare an endowment care cemetery abandoned; create a process for a county to take ownership of an abandoned endowment care cemetery and obtain the endowment care funds for purposes of care of the cemetery; alleviate the county from any taxes or other liabilities from the prior owner; permit a county, city and county, or a city to transfer the care and maintenance of an abandoned endowment care cemetery to a nonprofit benefit corporation to manage the cemetery and permits the nonprofit public benefit corporation to seek reimbursement from the Cemetery and Funeral Bureau

(Bureau) for expenditure of endowment care funds by the nonprofit public benefit corporation for maintenance, care and embellishment of the cemetery.

ANALYSIS:

Existing law:

1) Establishes the Bureau within the Department of Consumer Affairs (DCA) to administer and enforce the Cemetery and Funeral Act (Act), subject to review by the Legislature as though it were scheduled to be repealed on January 1, 2029. (Business and Professions Code (BPC) § 7602)

2) Defines a "cemetery manager" as a person who engages in or conducts those activities involved in, or incidental to, the maintaining, operating, or improving a cemetery licensed under the Act, the interring of human remains, and the care, preservation, and embellishment of cemetery property. (BPC § 7611.4(a))

3) Exempts the following from the provisions of the Act: 1) a religious corporation, church, religious society or denomination, a corporation sole administering temporalities of any church or religious society or denomination, or any cemetery organized, controlled, and operated by any of them; 2) a public cemetery; and 3) any private or fraternal burial park not exceeding 10 acres in area, established prior to September 19, 1939; however, those cemeteries are subject to the cemetery brokerage provisions of the Act, and any cemetery is subject to all of the provisions of the Act, if it collects a care, maintenance, or embellishment deposit or sets up a trust for burial purposes, as specified, including funeral services such as mortuary, cremation, or other commodities or services furnished at the time of and in connection with that funeral or cremation. (BPC § 7612.2)

4) Requires the Bureau, to protect consumers, to adopt regulations that establish minimum standards of maintenance for endowment care cemeteries under the jurisdiction of the Bureau. The regulations must consider differences in cemetery size, location, topography, and type of interments, along with the extent to which funds are available from the cemetery's endowment care funds to perform maintenance. (BPC § 7612.4(a))

5) Clarifies that maintenance standards adopted by the Bureau cannot supersede any standards of a higher level of care established by a local ordinance, as specified. (BPC § 7612(b))

This bill:

1) Exempts from the cemetery and funeral act any California nonprofit public benefit corporation that manages the continued care and maintenance of an abandoned endowment care cemetery that oversees or performs interments pursuant to prepaid burial contracts and does not enter into any new contracts for the sale of new burial spaces to consumers.

2) Defines "abandoned endowment care cemetery" to mean a cemetery that was formally licensed by the Bureau that meets the following criteria:

   a) The certificate of authority has been canceled, surrendered, or revoked and ownership has not been transferred in accordance with current law within one year of the cancellation, suspension, or revocation.

   b) The Bureau has conserved the endowment care fund, as specified.

   c) The cemetery property is negatively impacting the public health, safety, or welfare as identified by the county in which the cemetery is located.

3) States that if a county determines that a cemetery has been abandoned as specified in 2) above, the county must provide the owner of the property with 90 days' written notice to correct the public health, safety, or welfare concerns identified by the county, as specified.

4) Requires a county upon the expiration of the 90-day notice period where the county's concerns have not been addressed to declare the property an abandoned endowment care cemetery.

5) Authorizes a county upon declaring a cemetery property abandoned, the ownership of the abandoned endowment care cemetery real property may transfer to the county in which the cemetery is located by operation of law and county must record the transfer in the real property records of the county.

6) Requires a written notice be provided to the local agency formation commission 90 days prior to and upon declaration of abandonment and requires the written notice to at a minimum identify the record owner or possessor of the property, last known address of the record owner or possessor, the date the city, county, or city and county began the process to declare the property abandoned and a description of the real property subject to abandonment.

7) Requires a county that acquires title to the real property of an abandoned endowment care cemetery to keep a record of and honor all remaining contracts for burial entered into by the prior cemetery authority.

8) Provides a county that acquires title to real property of an abandoned endowment care cemetery is not liable for the debts, obligations, taxes, fines or judgement of the previous owner, with the exception of contracts for burials, as specified in 7) above.

9) Makes the property owner, whose cemetery has been subject to abandonment to remain responsible for satisfying any outstanding property taxes due at the time of transfer, as well as any other debts secured by the real property.

10) Requires a county within three years of the transfer of title to any remaining endowment care funds of the prior cemetery authority held by the Bureau and take possession of all necessary books, records, property, real and personal, and assets of the funds, and the assets of the funds must be placed in a special fund within the country treasury and may only be spent on care, maintenance, embellishment of the cemetery.

11) Authorizes a city, county, or city and county to transfer the care and management of an abandoned endowment care cemetery to a California nonprofit public benefit corporation in good standing to oversee burials, care, maintenance, and embellishment of the cemetery.

12) States that if the Bureau controls the endowment care fund, the nonprofit public benefit corporation that manages an abandoned endowment care cemetery may request reimbursement from available income in the endowment care fund for care, maintenance, or embellishment performed.

13) Requires the request from the nonprofit public benefit corporation to include a description and proof thereof, the total costs incurred, any other information required by the Bureau and further requires that all records be maintained for at least four from their creation and the Bureau may inspect those records upon request to the nonprofit benefit corporation and the Bureau must remain in control of the endowment care fund until a certificate of authority is issued for the cemetery or the county resumes management and requests the funds.

14) Requires a nonprofit public benefit corporation that manages an abandoned endowment care cemetery must keep a record of and honor all prior and outstanding contracts for burials entered into by the prior cemetery authority.

15) Relieves a nonprofit public benefit corporation that manages an abandoned endowment care cemetery from liability from any debts, obligations, taxes, fins, or judgements of the abandoned care cemetery's previous owner.

Background

Cemetery and Funeral Bureau. The Bureau licenses, regulates, and investigates complaints against California funeral establishments, funeral directors, embalmers, apprentice embalmers, cemetery brokers, cemetery salespersons, cremated remains disposers, crematories, crematory managers, cemetery managers, cemetery brokers and privately-owned cemeteries in the state. The Bureau does not have authority over cemeteries operated by religious organizations, cities, counties, or cemetery districts, and the military or Native American tribal governments.

The Bureau has oversight responsibility for both the fiduciary and operational activities of its licensing population. The Bureau has statutory authority to enforce the licensing and practice acts in the BPC along with jurisdiction over specified provisions of the HSC dealing specifically with human remains, cemetery and crematory provisions. With respect to the financial aspect of the industry, the Bureau is responsible for the oversight and regulation of preneed funeral trust funds, cemetery endowment care trust funds, and cemetery special care trust funds.

A Bureau-licensed cemetery is any private, non-religious cemetery established after 1939. Any cemetery established after September 7, 1955, is required to be an endowment care cemetery (Health and Safety Code (HSC) § 8739.1). An endowment care cemetery is one in which a portion of the purchase price is contributed to an endowment care fund. Income generated from the fund provides for the regular care of the cemetery, including routine maintenance such as cutting grass, grave upkeep, caring for trees, maintenance of water supply systems, roads, drainage, etc. The minimum amount to be contributed to the endowment care fund is provided in HSC § 8738. The endowment care funds are collected no later than at completion of the initial sale. The intent of endowment care is to ensure that the maintenance and care of cemetery grounds are continuous to help prevent cemeteries from falling into disrepair. The Bureau has the authority to inspect and audit endowment care funds and cemeteries are required to report annually the status and conditions of such funds (BPC § 7612.6).

The Bureau's 2024 sunset background paper noted growing concerns regarding abandoned cemeteries and posed the question as to what steps could be taken to ensure that older cemeteries are appropriately and respectfully maintained by another entity after they have been abandoned by a licensee. Currently, when a private cemetery that has not interred more than 10 human bodies in the preceding

five years threatens or endangers the health, safety, comfort, or welfare of the public, statute allows (but does not require) a city or county to declare that cemetery abandoned.

Pursuant to BPC § 7613.11, 90 days following the cancellation, revocation, or suspension of a cemetery license, the Bureau is required to take title of the endowment care funds, and take possession of all the books, records, property, or assets, and act as the conservator over the management of the cemetery. The goal is to ensure the cemetery can be maintained for the time being while there is no licensee. The Bureau is to appoint a trustee to manage the funds. However, if the ownership is transferred to another licensee, then the Bureau does not need to intervene.

This bill would create a statutory definition of "abandoned cemetery" under the HSC. Upon a county's determination that the cemetery meets the criteria to be considered "abandoned" this bill will permit the subsequent transfer of the cemetery real property to the county. A cemetery is considered abandoned if the license has been canceled, suspended, or revoked by the Bureau and within a year a new licensee has not assumed responsibility, the Bureau has conserved the endowment care fund as authorized under existing law and the cemetery is negatively impacting public safety and welfare.

As part of the transfer process, the county will be required to honor any outstanding contracts for burial that were sold or executed by the previous cemetery licensee. Under the ownership transfer of the abandoned cemetery this bill exempts the county that takes title of the property from any debts, obligations, taxes, fines, or judgements of the previous owner. Any outstanding endowment care funds must be transferred to the county and placed in a special county fund which the county may only be expended on the care, maintenance and embellishment of the abandoned endowment care cemetery. A county must give the property owner 90 days' written notice to correct and health and welfare deficiencies of the property before the transfer of the property occurs. The owner of the property has 90 days to correct. If not, then the transfer to the county may proceed.

While a county may choose to take ownership of the property, it may not want to provide the care and maintenance of the cemetery. To that end, this bill would permit a county to transfer the responsibility for only the care and maintenance of that cemetery to a California nonprofit public benefit corporation in good standing to oversee the burials, care, maintenance, and embellishment of the cemetery.

Cemeteries licensed by the Bureau are required to abide by current regulations however, when a cemetery authority license is abandoned, there is no licensee to abide by those requirements and cemeteries may fall into disrepair. While this bill aims to help in those circumstances by creating a pathway for an entity to take over the care and maintenance, guardrails are necessary to ensure that any expenditures of endowment care funds are consistent with the care and maintenance of a cemetery that current licensees are required to abide by so there is assurance that funds remain to take care of the cemetery property in perpetuity.

This bill will allow a nonprofit benefit corporation to manage an abandoned endowment care cemetery and expend money from the endowment care fund but exempts the nonprofit from having to become licensed and from being subject to oversight by the Bureau. Although the bill requires the designated nonprofit to submit a reimbursement request to the Bureau, this bill does not provide the Bureau with any discretion to deny reimbursement requests for endowment care funds, including reimbursement for using the funds on projects or efforts that fall outside of what is considered care and maintenance under current Bureau regulations. In addition, this bill will allow either a county who manages a property or a nonprofit public benefit corporation to use endowment care funds for "embellishments" of the cemetery property. However, without being subject to Bureau oversight or regulations, "embellishment" can be broadly applicable, and those expenditures may go beyond what should be an appropriate expenditure for an embellishment. Future clarification as to the acceptable maintenance and care or embellishment expenditures from an endowment care fund may be necessary. Additionally, the Bureau should also be provided with authority to deny reimbursement for inappropriate expenditures.

It is further unclear whether the nonprofit responsible for maintenance and care of the cemetery will be subject to similar prohibitions as current cemetery license holders who are only permitted to expend the income from the endowment care fund. This bill may benefit from clarity in how a nonprofit is able to expend endowment care funds.

This bill does not specify a pathway for a county to transfer the cemetery title to a Bureau licensee in the event that another licensed cemetery or a new licensee is interested in taking over an abandoned cemetery. The law may benefit from additional updates to authorize a county to transfer the cemetery to a Bureau licensee, with language ensuring that a new Bureau licensee owner is not subject to the previous owner's liabilities.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations, the Bureau estimates the ongoing costs of $1.193 million in fiscal year (FY) 2026-27 and $1.145 million in FY 2027-28 and annually ongoing to support an additional five associate management auditor positions and one supervising management auditor to oversee the audit staff; ongoing costs of $15,000 annually for the Attorney General (AG) to conserve endowment care funds, and $4,900 annually for additional Advisory Committee meetings and; ongoing minor and absorbable ongoing costs for processing additional citations, advisory committee meeting prep, and oversight of ongoing AG cases, and one-time costs to review and approve new procedures and write regulations. The bill will also result in potential court costs of an unknown amount for expanded mandatory judicial obligations upon a finding that a certificate of authority of a cemetery has lapsed or has been suspended, surrendered, abandoned, or revoked, including requiring the court to, among other things, name the Bureau conservator to conserve the endowment care fund, take actions as it deems appropriate to ensure the continued care, maintenance, and embellishment of the property, and pursue the transfer of the property ownership to one or more nonprofit, business, or governmental entities. Although the number of cases impacting the courts is unknown, the judicial obligations in this bill present a potentially significant court workload for each case. The bill will also result in ongoing costs of an unknown, but likely significant amount to public cemetery districts to the extent a city or county or court transfers to a district the care and management of an abandoned endowment care cemetery. The bill does not require a public cemetery district to be willing to accept responsibility for the transferred abandoned cemetery nor does the bill guarantee funding. Public cemetery districts are subject to the limits of Proposition 218, and their revenues closely match their operating expenses. To the extent an abandoned cemetery is transferred without the consent of the receiving district, the financial burden to the public cemetery district could be untenable. The district's costs are not reimbursable by the state.

SUBJECT: Small business liaison: contract information

SOURCE: Author

DIGEST: This bill 1) requires state agency small business liaisons to annually report to the Office of Small Business Advocate (OSBA) and post online information about state contracts and subcontracts involving small businesses. The report must include current contracts with small businesses, contracts with small businesses subcontractors, and the total amount paid to small businesses under those agreements; Additionally, and 2) requires an awarding department, upon completion of an awarded contract for which a commitment to achieve a small business goal was made, to require the prime contractor that entered into a subcontract with a small business to certify specified information related to the awarded contract.

Assembly Amendments require an awarding department, upon completion of an awarded contract for which a commitment to achieve a small business goal was made, to require the prime contractor that entered into a subcontract with a small business to certify specified information related to the awarded contract.

ANALYSIS:

Existing law:

1) Requires, under the Small Business Procurement and Contract Act (Act), state agencies to take certain actions in order to facilitate the participation of small businesses and microbusinesses in the provisions of goods, information technology, and services to the state, and in the construction of state facilities.

2) Defines a "small business" to mean an independently owned and operated business that is not dominant in its field of operation, the principal office of which is located in California, the officers of which are domiciled in California, and which, together with affiliates, has 100 or fewer employees, and average annual gross receipts of $10 million or less over the previous three years, or is a manufacturer, as defined, and has 100 or fewer employees.

3) Requires a state agency that significantly regulates small business or that significantly impacts small business to designate at least one person to serve as a small business liaison.

4) Requires the small business liaison to be responsible for specified duties relating to interactions between the state agency and small businesses, including assisting the head of the agency in ensuring that the procurement and contracting processes of the state agency are administered in order to meet or exceed the 25% small business participation goal, and developing and sharing

innovative procurement and contracting practices from the public and private sectors to increase small businesses.

5) Establishes the Office within the Governor's Office of Business and Economic Development (GOBiz) to advocate for causes of small businesses and to provide small businesses with information they need to survive in the marketplace.

6) Establishes, under the California Disabled Veteran Business Enterprise Program, a statewide participation goal of three-percent of total contract value expended each year for contracts awarded by any state agency, department, officer, or other state governmental entity, as specified.

This bill:

1) Requires the small business liaison of every awarding department, to make available a report on payment activity during the previous fiscal year related to all contracts awarded to a small business that includes specified information, and requires the small business liaison to submit the report to OSBA.

2) Requires a department, upon completion of an awarded contract for which a commitment to achieve a small business goal was made, to require the prime contractor that entered into a subcontract with a small business to certify all of the following to the awarding department:

   a) The total amount that the prime contractor received under the contract.
   b) The contract number and description.
   c) The name, address, and certification identification number of the small business that participated in the performance of the contract.
   d) The amount and percentage of work the prime contractor committed to provide to one or more small businesses under the requirements of the contract and the total payment amount of each small business received from the prime contractor.
   e) That all payments under the contract have been made to the small business.
   f) The actual percentage of small business participation that was achieved.

3) Requires a prime contract to use the small business or microbusiness subcontractors proposed on its bid unless a substitution is requested in writing by the prime contractor and approved by the awarding department in writing.

Background

Author's Statement. According to the author's office, "small businesses are significant contributors to California's economy, accounting for 42.3% ($70.1) billion of the state's exports annually. These businesses drive economic growth and mobility, creating 7.6 million jobs in 2025 alone. In order to fully leverage the goal established by AB 2019 (Petrie-Norris), California must have a standard reporting requirement to ensure state agencies are meeting and/or exceeding the required 25% participation goal for small businesses. SB 1430 will help and identify participation gaps and strengthen accountability by evaluating whether small businesses are receiving meaningful access to state contracting requirements."

Small Business Liaison. Current law requires a state agency that significantly regulates small businesses or that significantly impacts small businesses to designate at least one person to serve as a small business liaison utilizing existing personnel and resources. State agencies are required to widely publicize the position of small business liaison on the agency's website. The Office is also required to establish a web portal that includes the name, telephone number, internet website, and email of the small business liaison.

The small business liaison is responsible for specified duties relating to interactions between the state agency and small businesses. This includes assisting the head of the state agency in ensuring that the procurement and contracting processes of the state agency are administered in order to meet or exceed the 25% small businesses participation goal, and developing and sharing innovative procurement and contracting practices from the public and private sectors to increase small business participation in state contracting and procurement.

Other responsibilities include receiving and responding to complaints received by the agency from small businesses, providing technical advice and assisting small businesses resolving problems and questions regarding compliance with the agency's regulations and statutes, reporting small business concerns, and if appropriate, reporting recommendations to the agency secretary or to the agency head.

This bill would require the small business liaison for each state agency to annually submit contract information to the Office including, among other things, a list of all contracts of the state agency that include a subcontract with a small business.

The bill would require the Office to post that contract information on its internet website.

Office of Small Business Advocate. Housed within GOBiz, the OSBAwas created by AB 29 (John A. Perez, Chapter 475, Statutes of 2011) "in order to advocate for the causes of small business and to provide small businesses with the information they need to survive in the marketplace."

The Office is responsible for serving as the principal advocate in the state on behalf of small business. This includes advisory participation in the consideration of all legislation and administrative regulations that affect small businesses, advocacy on state policy and programs related to small businesses, and representing the views and interest of small businesses before other state agencies whose policies and activities may affect small businesses. The Office is also required to seek the assistance and cooperation of all state agencies and departments providing services to, or affecting, small business, including the small business liaison, to ensure coordination of state efforts.

*Small Business Eligibility Requirement*s. In order for a small business to be eligible for certification, the small business must be independently owned and operated; not dominant in its field of operation; and, its principal office must be located in California. In addition, the business must be either a business with 100 or fewer employees and an average annual gross receipts of $15 million or less over the last three tax years; a manufacturer, as defined, with 100 or fewer employees; or, a microbusiness. A small business will automatically be designated as microbusiness, if gross annual receipts are less than $3.5 million; or the small business is a manufacturer with 25 or fewer employees.

Upon meeting eligibility requirements, certified small businesses and microbusinesses are entitled, to among other things, a 5% bid preference. The goal of the preference is to help small and micro businesses to be more competitive in the bid process, thereby enhancing state contract awards directly or indirectly to these types of businesses. The preference is only used for computation purposes to determine the winning bidder, the contract is awarded at the actual bid amount.

In addition, certified small businesses are eligible for the State's Business Participation Program, which sets a goal for the use of small businesses in at least 25% of the state's overall annual contract dollars.

Related/ Prior Legislation

SB 656 (Richardson, 2025) would have required all state agencies to designate at least one person to serve as a small business liaison, as specified. Additionally, the bill would have required the small business liaison to annually submit specified information to the Office. (Held in the Senate Appropriations Committee Suspense File)

SB 2019 (Petrie-Norris, Chapter 730, Statutes of 2022) codified, among other things, a 25% small business goal for state procurement and proposes a number of actions to enhance the ability and commitment of state agencies to include small business, including microbusinesses in state contracting, as specified.

AB 29 (John A. Perez, Chapter 475, Statutes of 2011) created GO-Biz and established specific tasks and duties for the office, including reorganizing such entities as the Advocate into this new office. Additionally, the bill required state agencies to furnish the Office the reports, document, and information that are public records and that the Office deems necessary to carry out the Office's functions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, Assembly Appropriations Committee, Ongoing General Fund costs of $137,000 annually to OSBA for one analyst and, potentially, an additional $25,000 to $75,000 annual IT, web, and data support workload (General Fund) to implement and maintain the annual reporting and publication process. OSBA also reports that if it is required to verify agency submissions independently, then costs would be higher.

It is unknown how much it will cost state agencies with designated small business liaisons, cumulatively statewide, to comply with the bill's expanded reporting mandates. However, according to the OSBA, significant costs, to awarding departments or the Department of General Services, might result from monitoring listed small business and disabled veteran business enterprise (DVBE) subcontractor utilization, reviewing and approving substitutions, requiring completion certifications, reviewing proof of payment upon request, and providing standardized data for OSBA publication.

ARGUMENTS IN SUPPORT: According to the California Black Chamber of Commerce, "by requiring state agencies, departments, boards, and commission to report not only contract awards but also the actual payments made to small businesses, this measure will provide critical data needed to evaluate whether participation goals are being meaningfully achieved. This level of transparency is essential to ensuring that small businesses – particularly those in historically underserved communities – are not awarded contracts, but are fully and fairly compensated."

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Beverage containers: wine and distilled spirits: processing fees

SOURCE: Wine Institute

DIGEST: This bill establishes a processing fee of no more than 12 cents per bag-in-box container until January 1, 2031.

Assembly Amendments rewrite this bill to establish a processing fee of no more than 12 cents per bag-in-box container until January 1, 2031.

ANALYSIS:

Existing law:

1) Establishes the California Beverage Container Recycling and Litter Reduction Act (Bottle Bill), which requires beverage containers, as defined, to have a California redemption value (CRV) of 5 cents for containers that hold fewer than 24 ounces and 10 cents for containers that hold 24 ounces or more. Requires beverage distributors to pay a redemption payment to CalRecycle for every beverage container sold in the state. Provides that these funds are continuously appropriated to CalRecycle for, among other things, the payment of refund values and processing payments. (Public Resources Code (PRC) § 14500 *et seq*.)

2) Requires distilled spirits, wine, and nonalcoholic wine manufacturers to participate in the Beverage Container Recycling Program (BCRP) through SB 1013 (Atkins, Chapter 610, Statutes of 2022) with a CRV of 25 cents regardless of the material type of the beverage container. (PRC § 14504)

3) Requires CalRecycle to establish a processing payment for a beverage container covered under the program that has a scrap value less than the cost of recycling, to be determined as specified, that is at least equal to the difference between the scrap value of the material and the sum of the cost of recycling and a reasonable financial return. (PRC §14575(b))

4) Requires beverage manufacturers to pay a processing fee that is equal to 65% of the processing payment. Reduces, or offsets, the processing fee for a container type with money from the Beverage Container Recycling Fund (BCRF) a specified percentage based on the recycling rate for that container type. This percentage ranges from 65% of the processing payment for a container type with a recycling rate of 30% or less to 10% of the processing payment for a container type with a recycling rate of greater than 75%. (PRC §14575(d))

This bill:

1) Stipulates that the processing fee for bag-in-box beverage containers shall be no more than 12 centers per container sold;

2) Allows CalRecycle to provide a credit on 2027 processing fees amounting to the difference between the initial 2026 processing fee ($0.32503) and the processing fee set by this bill (no more than $0.12);

3) States that if the funds needed to make processing payments to recyclers exceeds funds collected as processing fees, that CalRecycle shall expend

necessary funds to pay the processing payments in full, consistent with PRC § 14581;

4) States that this section does not remove CalRecycle's responsibility to calculate the cost of recycling and processing payments pursuant to PRC § 14575;

5) Defines a bag-in-box as a rigid box composed primarily of cardboard of corrugated paper containing an interior, flexible bag with a valve; and

6) States that the section will be repealed on January 1, 2031.

Background

Bottle bill background. The bottle bill was established through legislation in 1986 (AB 2020 Margolin, Chapter 1290, Statutes of 1986) with the joint goals of reducing litter and achieving an 80% recycling rate for all CRV containers in the program. In 2025, CalRecycle reported a 70% recycling rate for CRV containers in the "Biannual Report of Beverage Container Sales, Returns, Redemption, and Recycling Rates." While the program does not encompass all containers, it does encompass most beverage containers made from glass, plastic, aluminum, and bimetal (consisting of one or more metals).

The bottle bill operates by adding a 5 to 25 cent CRV payment to beverage containers in the program. Beverage distributors pay CRV on all new beverage containers they sell in California into the Beverage Container Recycling Fund (BCRF). Distributors then pass the cost of the CRV on to retailers, who in turn pass that 5-25 cents per bottle on to consumers at checkout. Individuals and businesses are incentivized to return bottles to recycling centers where they can redeem the value of the CRV. Once a consumer is ready to dispose of a bottle, they can return bottles to a certified recycling center and redeem their CRV, or consumers can put their bottles in residential curbside recycling collection, wherein the curbside programs, not consumers, keep the CRV on these containers. The redemption rate (the rate at which CRV containers are returned at recycling centers and supermarkets) was 60% for 2024.[1] According to a CalRecycle 2022 Fact Sheet, curbside programs collect about 12% of CRV containers.[2]

Processing payments. CalRecycle calculates a processing payment as the difference between the cost to recycle and the scrap value of the beverage

[1] Container Recycling Institute (2025) *Bottle Bill Resource Guide: California*, https://www.bottlebill.org/index.php/current-and-proposed-laws/usa/california
[2] CalRecycle (2023) *Beverage Container Recycling in California Fact Sheet Calendar Year 2022* (DRRR-2023-1726), https://www2.calrecycle.ca.gov/Docs/Publications/Details/1726

containing. Materials which are more recyclable and with higher scrap values have lower processing payments. Polyethylene Terephthalate (PET) for example had a processing payment of $0.00091 per bottle in 2025. In contrast, harder-to-recycle Polyvinyl Chloride (PVC) has a processing payment of $0.05447 (approximately 60 times higher than PET).[3] CalRecycle must update the processing payment annually based on measured, actual costs of recycling, but may update the processing payment quarterly at their discretion.

CalRecycle collects 10 to 65% of the processing payment (called the processing fee) from beverage manufactures, called the processing fee. Manufacturers pay a processing fee which is a smaller percentage of the processing payment for products where the recycling rate is higher (PRC §14575(e)). The processing payment is then paid to recyclers. The portion of the processing payment not covered by the processing fee is paid from unredeemed bottle and can deposits. By passing along the cost of recycling from recyclers to manufacturers, the processing payment/fee achieves two goals: the processing payments incentivize recyclers to collect hard-to-recycle materials while disincentivizing manufacturers from using hard-to-recycle materials.

Wine and spirits in the bottle bill. SB 1013 (Atkins) added wine and spirits contained in a glass bottle, box, bladder, or pouch to the bottle bill with a CRV of 25 cents, regardless of the beverage container material. While glass is highly recyclable, boxes, bladders, and pouches are not.

a) *Boxes and cartons*. While some boxes could be made from coated cardboard (which is highly recyclable through curbside recycling), some are cartons. Cartons contain layers of fiber products, plastics, and thin layers of aluminum for waterproofing and shelf stability. Very few facilities accept cartons as it is laborious to separate the layers into separate, raw materials.[4]

b) *Bag-in-a-box*. The box of a bag-in-a-box doesn't require the same layers as a carton, since the bag is waterproof. However, the bag must be removed from the box, which is an additional labor cost. The box, though it is otherwise recyclable or compostable through curbside programs, is typically discarded. The bag can be made from a variety of materials, including #7 plastic or a combination of plastic laminate with PET, low density polyethylene (LDPE) or ethylene vinyl acetate. Neither option is

[3] CalReycle (2026) California Redemption Value and Processing Fee Reporting Rates 2026.
[4] Georgiopoulou, I, et al. (2021) *Recycling of post-consumer multilayer Tetra Pak® packaging with the Selective Dissolution-Precipitation process, Resources*, Conservation and Recycling. https://www.sciencedirect.com/science/article/abs/pii/S0921344920305838

easy to recycle.[5] #7 plastic (categorized as "other" by CalRecycle) had a processing payment of $0.14789, 162 times the cost of PET. LDPE had a processing payment of $0.01907, 20 times higher than PET.[3] A product made with several layers of different plastics adds additional complexity to the recycling process.

c) *Pouches*. Similar to cartons and bags-in-boxes, pouches are made with several layers. The packaging manufacturer MTPAK makes wine pouches with layers of Polyethylene (PE), nylon or PET, and aluminum.[6] As with cartons and bags-in-boxes, separating the layers to be recycled is difficult (if possible at all). Therefore, these pouches are difficult to recycle, regardless of how recyclable each constituent part is.

Without data on the cost of recycling, CalRecycle gave boxes, bladders, and pouches a placeholder processing payment, equivalent to the processing payment for HDPE ($0.00654 per bottle), until data became available. For 2026, CalRecycle released actual processing payments for bags-in-boxes (BIB), multilayered pouches (MLP), and paperboard cartons (PC) based on real recycling data.

Material	2026	2025	Increase
BIB	$0.32503	$0.00654	50x
MLP	$0.02802	$0.00654	4x
PC	$0.02851	$0.00654	4x

Therefore, the manufacturers of BIB, MLP, PC would have to pay processing fees 4 to 50 times higher than the previous year. While manufacturers could anticipate this processing fee increase, they might not have anticipated such a large increase.

Comments

Purpose of Bill. According to the author, "SB 1341 creates a mechanism to recalibrate the processing fee for beverage containers for situations in which the amount of fees expected to be collected is significantly higher than the amount needed to make the associated processing payments. This situation is occurring presently with certain wine and spirits container types that first entered the Bottle Bill program in 2024. Specifically, on December 15, 2025, CalRecycle announced an increase in the processing fee for bag-in-box containers of nearly 5000% that took effect on January 1, 2026. Information provided by CalRecycle made it apparent that the amount of fees expected to be collected would be several orders of magnitude more than necessary to meet anticipated processing payments for those containers. Unfortunately, there is no mechanism to adjust processing fees in these instances. SB 1341 empowers CalRecycle to adjust the processing fee to account for these discrepancies."

Recycling rate incentives. Processing fees are collected when a beverage container is manufactured, but the processing payment only goes out when a beverage container is redeemed. Currently, manufacturers only pay up to 65% of the processing payment, which accounts for some number of unredeemed bottles. However, it is entirely possible that a container with a low redemption rate could lead to a surplus of processing fees beyond what is necessary to pay to recyclers.

Currently, the only mechanism CalRecycle has for reducing processing fees below 65% is when the recycling rate increases, creating an incentive structure for increasing recycling rates. By creating a mechanism for CalRecycle to reduce the processing fees on containers with *low* recycling rates, a perverse incentive is created for manufacturers: to maintain low recycling rates and to delay switching to a more recyclable alternative.

A compromise fee. The 2026 processing fee for bag-in-box containers was set at more than 30 cents per container which is 50 times the fee paid in 2025. The processing fee ceiling set by SB 1341 (12 cents) is a middle ground: less than true processing fee but still 20 times greater than the 2025 processing fee. Understanding that bag-in-box containers have a low recycling rate and therefore low processing payment costs for CalRecycle, the processing fee set by SB 1341 may strike the balance of paying out recyclers while allowing wine manufacturers to remain solvent. Additionally, SB 1341 maintains the true processing fee for multilayered pouches (MLP), and paperboard cartons (PC). Finally, the bill sunsets the bag-in-box provisions by 2031, providing adequate time for bag-in-box manufacturers to switch to more recyclable alternatives.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

"1) Annual forgone revenue of an unknown, but potentially significant, amount resulting from the requirement that CalRecycle exclude from the processing fee (currently $0.32503 per container) the box of a bag-in-box container (Beverage Container Recycling Fund (BCRF)).

"2) Possible cost pressure on the BCRF to make up for reduced processing fee revenue from bag-in-box containers, since the fund must still cover the gap between fees collected and what is needed to provide processing payments to processors and recycling centers. See background for more information.

"3) CalRecycle will incur some one-time and ongoing costs to establish the new processing fee methodology. For its part, the department estimates ongoing annual costs of $166,000 for one permanent position as well as $500,000 in contract funding every two years (BCRF). CalRecycle may incur additional costs to revise its recently approved regulations implementing SB 1013 (Atkins), Chapter 610, Statutes of 2022. See background for more information."

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Civil actions: housing development projects

SOURCE: Author

DIGEST: This bill provides a mechanism for a defendant in a civil action, including under the California Environmental Quality Act (CEQA), challenging a project that is a priority care development project, as defined, to seek an order requiring the plaintiff to furnish an undertaking as security for costs and damages that may be incurred by the defendant if the bringing of the action by the plaintiff would result in preventing or delaying the project, and raises the amount the undertaking can be to no more than $1,000,0000. This bill also creates a special

motion to strike a challenge to the approval or permitting of a priority care development project modeled after California's anti-Strategic Lawsuit against Public Participation (anti-SLAPP) statute.

Assembly Amendments remove the requirement that a motion is to be scheduled by the clerk of the court for a hearing not more than 30 days after the service of the motion, authorizes the special motion to be filed within 60 days of service instead of requiring it to be filed, and a makes chaptering out amendments.

ANALYSIS:

Existing law:

1) Requires lead agencies with the principal responsibility for carrying out or approving a proposed discretionary project to prepare a negative declaration, mitigated declaration, or environmental impact report (EIR) for this action, unless the project is exempt from CEQA (CEQA includes various statutory exemptions, as well as categorical exemptions in the CEQA Guidelines). (Public Resources (Pub. Res.) Code § 21100 et seq.)

2) Sets requirements relating to the preparation, review, comment, approval and certification of environmental documents, as well as procedures relating to an action or proceeding to attack, review, set aside, void, or annul various actions of a public agency on the grounds of noncompliance with CEQA. (Pub. Res. Code § 21165 et seq.)

3) Authorizes judicial review of CEQA actions taken by public agencies, following the agency's decision to carry out or approve the project, and specifies certain time periods in which an action must be instituted depending on the type of claim alleged. (Pub. Res. Code § 21167.)

4) Requires the superior court and court of appeal to provide lawsuits related CEQA preference over all other civil actions therein, in the matter of setting the same for hearing or trial, and in hearing the same, to the end that the action or proceeding is to be quickly heard and determined. (Pub. Res. Code § 21167.1(a).)

5) Provides that in all civil actions, including those brought by any plaintiff to challenge a housing development project which is a development project which meets or exceeds the requirements for low- or moderate-income housing, a defendant may apply to the court by noticed motion for an order requiring the plaintiff to furnish an undertaking as security for costs and any damages that may be incurred by the defendant by the conclusion of the action or proceeding

as the result of a delay in carrying out the development project if the bringing of the action has the effect of preventing or delaying the project from being carried out. (Code of Civil Procedure (Code Civ. Proc.) § 529.9(a).)

a) Provides that a defendant seeking a security must make a motion for that security on the grounds that the action is without merit and was brought in bad faith, vexatiously, for the purpose of delay, or to thwart the low- or moderate-income nature of the housing development project. (*Ibid*.)
b) Authorizes the plaintiff, in response to a motion for an undertaking, to seek to limit the amount of the undertaking by presenting admissible evidence that filing an undertaking will cause it, and in cases where the plaintiff is an unincorporated association, its members, to suffer undue economic hardship. (*Id* at subd. (b).)

6) Requires the court, if the court determines after a hearing that the grounds for the motion have been established, to order the plaintiff to file the undertaking in an amount specified in the court's order, taking into consideration any admitted evidence of plaintiff's economic hardship and avoiding to cause the plaintiff to suffer undue economic hardship, as security for costs and damages of the defendant.
   a) The liability of the plaintiff for the costs and damages of the defendant is not to exceed $500,000.
   b) If the court concludes, based on all of the admissible evidence presented, that a bond in any amount would cause the plaintiff undue economic hardship, the court is authorized in its discretion to decline to impose a bond.
   c) If at any time after the plaintiff has filed an undertaking the housing development plan is changed by the developer in bad faith so that it fails to meet or exceed the requirements for low- or moderate-income housing, the developer is liable to the plaintiff for the cost of obtaining the undertaking. (*Ibid*.)

7) Establishes anti-SLAPP procedures, including for all civil actions brought to challenge a priority housing development project. (Code Civ. Proc. § 425.19(b).)
   a) A "priority housing development" means a development in which 100 percent of the units, exclusive of any manager's unit or units, will be reserved for lower income households, as defined in Section 50079.5 of the Health and Safety Code, for at least 55 years. (Code Civ. Proc. § 425.19(c).)
   b) Entitles a prevailing defendant, with certain exceptions, to attorney's fees and costs; likewise for a prevailing plaintiff, provided the court finds the

motion was frivolous or solely intended to cause unnecessary delay pursuant to Section 128.5 of the Code of Civil Procedure. (Code Civ. Proc. § 425.19(b)(2).)

c) Stays discovery proceedings upon filing of notice of a SLAPP motion. (Code Civ. Proc. § 425.19(b)(5).)
d) Provides that these provisions do not apply any enforcement action brought in the name of the people of the State of California by the Attorney General, district attorney, or city attorney, acting as a public prosecutor.

This bill:

1) Defines "priority care development" to mean any projects funded, in whole or in part, pursuant to Sections 5892 (Mental Health Services Fund) or 5965.04 (Behavioral Health Infrastructure Bond Act of 2024), or subdivision (c) of Section 18999.97 (grants under the Community Care Expansion Program), of the Welfare Institutions Code. A "priority care development" does not include a "detention facility" as defined in subdivision (a) of Section 9500 of the Penal Code.

2) Establishes an anti-SLAPP motion statute similar to the one for a priority housing development, described in 5) above.

3) Authorizes a defendant in a civil action, including under CEQA, challenging a project that is a priority care development project, as defined, to seek an order requiring the plaintiff to furnish an undertaking as security for costs and damages that may be incurred by the defendant if the bringing of the action by the plaintiff would result in preventing or delaying the project

4) Raises the maximum of the undertaking to $1,000,0000. This amount is to be adjusted annually for inflation, beginning on January 1, 2028, based on the change in the annual California Consumer Price Index for All Urban Consumers, published by the Department of Industrial Relations, for the most recent one-year period ending on December 31 preceding each adjustment, with each adjusted amount rounded to the nearest $25.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

Comments

This bill is intended to apply to "priority care developments," which are projects funded in whole or in part through the Community Care Expansion program, the

Behavioral Health Services Act, and the Behavioral Health Infrastructure Bond Act, including Homekey+.

California's anti-SLAPP statute provides that a cause of action against a person arising from any act of that person in furtherance of the person's right of petition or free speech under the United States Constitution or the California Constitution in connection with a public issue shall be subject to a special motion to strike. (Civ. Proc. Code § 425.16.) The Legislature asserted that the law was justified because "it is in the public interest to encourage continued participation in matters of public significance, and that this participation should not be chilled through abuse of the judicial process."

In 1992, Code of Civil Procedure section 425.16 was added by SB 1264 (Lockyer, Chapter 726, Statutes of 1992) to provide a "special motion to strike" for use by defendants in SLAPP suits to obtain an early judicial ruling and termination of a meritless claim arising from a person's exercise of their constitutional rights of petition and free speech in connection with a public issue. In passing the anti-SLAPP law, the Legislature found "that there has been a disturbing increase in lawsuits brought primarily to chill the valid exercise of the constitutional rights of freedom of speech and petition for the redress of grievances." (Code Civ. Proc. § 425.16(a).)

In 2023, the Legislature enacted SB 439 (Skinner, Chapter 779, Statutes of 2023) and created a special motion to strike that is nearly identical to the anti-SLAPP statute with regard to challenges to certain housing developments. SB 439 allows for this motion to strike to be filed in a case that challenges the approval or permitting of a "priority housing development" project, explicitly including actions brought pursuant to CEQA. The procedures and guidelines mirror those in Section 425.16. As such, the court is required to deny the motion if it determines that the plaintiff has established that there is a probability that the plaintiff will prevail on the claim. This bill applies only to developments in which 100 percent of the units, excluding manager's units, are reserved for lower income households for at least 55 years. "Lower income households" means persons and families whose income does not exceed the qualifying limits for lower income families as established and amended from time to time pursuant to Section 8 of the United States Housing Act of 1937. This includes very low income households and extremely low income households. (Health & Saf. Code § 50079.5.)

This bill seeks to establish a motion to strike that is nearly identical to SB 439 with regard to challenges to of a priority care development project. The biggest deviation under this bill from SB 439, is that SB 439 does not apply in an

enforcement action brought in the name of the people of the State of California by the Attorney General, district attorney, or city attorney, acting as a public prosecutor. This bill would apply in such an action.

SB 393 (Glazer, Chapter 285, Statutes of 2024) amended an existing provision of law (Code of Civ. Proc. § 529.2) that provided a mechanism for a defendant in a civil action challenging a housing project which is a development project that meets or exceeds the requirements for low- or moderate-income housing to seek an order requiring the plaintiff to furnish an undertaking as security for costs and damages that may be incurred by the defendant if the bringing of the action by the plaintiff would result in preventing or delaying the project. Prior to the enactment of SB 393, the defendant had the burden of making a showing that the posting of the undertaking would not place an undue hardship on the plaintiff. SB 393 shifted the burden to the plaintiff to demonstrate that posting a bond would place an undue economic hardship on the plaintiff, arguing that the plaintiff is the one who has the information to make such a showing and therefore it was more appropriate to place that burden on the plaintiff. The liability for the plaintiff cannot exceed $500,000.

This bill seeks to enact a similar mechanism for a defendant in a civil action, including an action under CEQA, challenging a priority care development. This bill allows such a defendant to seek an order requiring the plaintiff to furnish an undertaking as security for costs and damages that may be incurred by the defendant if the bringing of the action by the plaintiff would result in preventing or delaying the project.

The bill also raises the amount of liability that the court can set for the undertaking to not exceed $1,000,0000 from the existing maximum of $500,000. The bill provides that this amount is to be adjusted annually for inflation, beginning on January 1, 2028, based on the change in the annual California Consumer Price Index for All Urban Consumers, published by the Department of Industrial Relations, for the most recent one-year period ending on December 31 preceding each adjustment, with each adjusted amount rounded to the nearest $25. Lastly, the bill provides that a “plaintiff” includes a ”petitioner,” “cross-petitioner,” and “cross-plaintiff,” and “defendant” includes “respondent,” “cross-respondent,” “cross-defendant,” and “real party in interest.”

ARGUMENTS IN SUPPORT: The author writes:

> As of the most recent point-in-time count in 2025, approximately 187,000 Californians were experiencing homelessness on any given night. Local governments across the state are doing the right thing, approving permits for emergency shelters, interim housing, and supportive housing for people experiencing homelessness, as well as residential facilities for unhoused individuals seeking treatment for behavioral health issues or substance use disorder. Those efforts are regularly met with frivolous lawsuits from groups whose only goal is delay.
>
> The Legislature has already passed laws to protect affordable housing projects from these kinds of lawsuits, allowing courts to quickly dispose of meritless challenges and requiring plaintiffs to post financial security when their lawsuit lacks merit and is brought in bad faith or to delay or thwart construction. SB 1344 applies that policy to housing projects that are funded through the Community Care Expansion program, the Behavioral Health Services Act, and the Behavioral Health Infrastructure Bond Act, including Homekey+. This bill extends both tools to these priority care developments and doubles the liability cap on the bond requirement, which has not been updated since 1981, from $500,000 to $1,000,000, indexed to inflation going forward.
>
> SB 1344 would help protect local governments that are doing their part to address homelessness, ensure these important projects are not unnecessarily delayed or blocked through abuse of the judicial system, and protect the public's investment in infrastructure to bring every Californian inside.

The Attorney General, Rob Bonta, source of the bill, writes:

> […] California supports local efforts to address homelessness through funding programs and by supporting local planning efforts. Unfortunately, local governments that are following the law and attempting to do the right

thing by approving permits for shelters, care facilities, and supportive housing are regularly met with meritless lawsuits from NIMBY groups endeavoring to block projects.

The California State Legislature has created two procedural tools to protect local governments from meritless challenges to affordable housing projects – the motion to strike under SB 439 (Skinner, 2023) and the bond requirement strengthened by SB 393 (Glazer, 2024). Unfortunately, these provisions do not protect local governments from meritless lawsuits challenging the approval of other projects that are essential to tackling California's intertwined housing and homelessness crisis, and delay can interfere with public funding windows and jeopardize projects.

SB 1344 would expand these procedural tools to also apply to projects funded by the Community Care Expansion Program (CCE), the Behavioral Health Services Act, and the Behavioral Health Infrastructure Bond Act, including Homekey+. These programs fund interim housing for people experiencing homelessness or at risk of homelessness, adult and senior care facilities that serve elderly adults and people with disabilities who are experiencing or at risk of homelessness, and other residential care facilities, including more than $1 billion in housing investments for veterans who have behavioral health challenges. ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Barbering and cosmetology

SOURCE: Author

DIGEST: This bill makes technical changes, statutory improvements, and policy reforms to the Barbering and Cosmetology Act (Act) in response to issues raised during the Legislature's sunset review of the Board of Barbering and Cosmetology (Board or BBC), including changes to the apprenticeship program, authority to issue establishment licenses to partnerships and limited liability companies, and extends the Board's sunset date by four years to January 1, 2031.

Assembly Amendments make various updates to facilitate implementation; specify that a cosmetology student may provide transcripts as evidence of completion of a course in cosmetology; clarify information that shall be included on a copy of an agreement between an apprentice program sponsor and local education agency; clarify that the remedial education program that is imposed in lieu of a first offense is in lieu of the fine for the first offense; and make other technical and conforming amendments.

ANALYSIS:

Existing law:

1) Establishes the Act to regulate and license cosmetologists, barbers, estheticians, electrologists, manicurists, and establishments. (Business and Professions Code (BPC) §§ 7301-7315)

2) Establishes the Board within the Department of Consumer Affairs (Department or DCA) to administer the Act through January 1, 2027. (BPC § 7303)

3) Requires a Board apprenticeship program to be conducted in compliance with the Shelley-Maloney Apprentice Labor Standards Act of 1939 according to apprenticeship standards approved by the administrator of apprenticeship. (BPC § 7333)

4) Authorizes the Board to license an apprentice in barbering, cosmetology, skin care, or nail care, or electrolysis, any person who has made application to the Board upon the proper form, has paid the required fee, and who meets the license qualifications, as specified. (BPC § 7334(a)(1), (b))

5) Authorizes any person, firm, or corporation desiring to operate an establishment to make an application to the Board for a license. (BPC § 7347)

6) Requires the Board to establish by regulation a schedule of administrative fines for violations that directly impact consumer safety. (BPC § 7407)

7) Requires the Board to establish by regulation a board-offered remedial education program, in lieu of a first offense of a health and safety violation. (7407.1(b)(1))

This bill:

1) Extends the Board's authority to administer the Act through January 1, 2031.

2) Specifies that it is unlawful for a partnership or limited liability company (LLC) to engage in the Board's regulated professions without a valid unexpired license issued by the Board.

3) Specify that a cosmetology student may provide transcripts as evidence of completion of a course in cosmetology.

4) Clarifies that an apprentice must be employed by the owner of a license establishment.

5) Defines who shall be known as an apprenticeship program sponsor, states the license types for which an apprenticeship program sponsor may administer an apprenticeship, and establishes applications requirements to be approved by the Board to administer an apprenticeship.

6) Requires an apprentice program sponsor to be approved by the Division of Apprenticeship Standards before being approved by the Board.

7) Establishes acts that are cause for revocation, suspension, or denial of Board approval to administer an apprenticeship.

8) Establishes violations that shall be considered egregious for the purpose of issuing citations and fines, including charging fees to participate in an apprenticeship, franchising approval status, improper wage payment practices, and other serious violations.

9) Requires an applicant for an apprenticeship in barbering, cosmetology, skin care, nail care, or electrolysis to submit a copy of the apprentice agreement that was entered into between the approved program sponsor and the apprentice to the Board for approval.

10) Establishes responsibilities that must be met by a Board approved apprentice trainer to maintain that approval.

11) Establishes responsibilities that must be met by an establishment that is approved by the Board to employ apprentice trainers to maintain that approval.

12) Provides that failure to comply with the Act and all laws and regulations applicable to apprenticeships by a trainer or the establishment owner is grounds for disciplinary action, citation and fines, and prohibition from hiring future apprentices.

13) Authorizes a partnership and LLC desiring to operate an establishment to make an application to the board for a license.

14) Specifies that failure of an establishment licensed to do business as a corporation or LLC state to be registered and in good standing with the Secretary of State after notice from the board shall result in the automatic suspension of the license by operation of law and creates a pathway to reinstate the license after providing proof of good standing with the Secretary of State to the Board.

15) Defines "federally recognized tribe," and “participating tribe,” for purposes of licensing under the Act.

16) Exempts tribes that apply for a license from remaining in good standing with the Secretary of State if the tribe's business is chartered under tribal or federal law.

17) Specifies that the Act does not infringe upon or diminish existing rights of federally recognized tribes as set forth in federal, state, or tribal law.

18) Declares that the state shall not regulate any activity within the jurisdiction of a federally recognized tribe.

19) Requires an establishment to be under the charge of a person licensed as a barber, cosmetologist, electrologist, esthetician, hairstylist, manicurist, or establishment at all times during which barbering, cosmetology, electrology, esthetics, hairstyling services, or manicuring are being performed in the establishment.

20) Clarifies that the remedial education program to be established by regulation in lieu of a first offense health and safety violation is a Board-approved program.

Background

Oversight Hearings and Sunset Review of the Board of Barbering and Cosmetology. The Board is responsible for licensing and regulating barbers, cosmetologists, estheticians, electrologists, manicurists, apprentices, hairstylists, and establishments through its authority vested in the Act. Each profession has its own scope of practice with some overlap in areas. Title protection is provided for the use of the terms “cosmetologist” and “barber” (BPC §§ 7320.3, 7320.4). The Act also regulates the specialty branches within the practice of cosmetology, including skin and nail care.

In March 2026, the Senate Business, Professions and Economic Development Committee and the Assembly Committee on Business and Professions (Committees) began their comprehensive sunset review oversight of ten regulatory entities including the CBNM. The Committees conducted three oversight hearings. This bill and the accompanying sunset bills are intended to implement legislative changes as recommended by staff of the Committees, and which are reflected in the Background Papers prepared by Committee staff for each agency and program reviewed this year.

Clean up and revision of BBC business requirements. The Board has historically issued establishment licenses to LLCs, but current statute is not clear if this business structure is allowed under the Act. SB 323 (Vargas, Chapter 419, Statutes of 2012) enacted the California Revised Uniform Limited Liability Company Act, which allows a business that is required to be licensed under the BPC to form as an LLC so long as the practice act specifically authorizes its licensees to form as an LLC (Corporations Code (CORP) § 17701.04 (b)). However, the Act does not authorize an establishment to form as an LLC.

Prior to the revisions to the limited liability company requirements, the Beverly-Killea Limited Liability Company Act prohibited domestic and foreign LLCs from rendering professional services in California. Professional services were defined as "any type of professional services which may be lawfully rendered only pursuant to a license, certification, or registration authorized by the Business and Professions Code, the Chiropractic Act, or the Osteopathic Act."

In 2004, Attorney General (AG) Opinion No. 04-103 concluded that, "A business that provides services requiring a license, certification, or registration pursuant to the BPC may conduct its activities as a limited liability company if the services rendered require only a nonprofessional, occupational license." Following the AG opinion, numerous DCA boards and bureaus that issued occupational licenses began issuing licenses to LLCs, including the BBC.

However, now that the question of whether "professional services" are being rendered is no longer a trigger and specific authority must be granted by the practice act regardless, DCA programs have systematically requested authority to issue licenses to LLCs through amendments to their practice acts, most recently, the Home Furnishings and Thermal Insulation Act and Household Movers Act by SB 814 (Roth, Chapter 508, Statutes of 2023).

Separately, many of the programs within DCA that issue licenses to corporations require the corporation to provide some form of information to demonstrate the corporation is in good standing with the SOS, whether it's the SOS identification

number, the statement of information, or a copy of the articles of incorporation as a condition precedent to licensure. Additionally, most of these programs automatically suspend a license when a licensee fails to remain in good standing with the SOS. It is unclear why the Board's corporations do not follow suit. This bill amends the Act to authorize the Board to continue issuing licenses to LLCs and partnerships. This bill also establishes that failure of an establishment licensed as a corporation or limited liability company to be registered and in good standing with the SOS shall result in automatic license suspension; creates a mechanism to reinstate a suspended license; authorizes the Board to issue an establishment license to federally recognized tribes; and exempts those tribes from meeting the SOS registration requirement when their business is chartered under tribal or federal law.

Apprenticeships. The Board offers apprenticeships as an alternative pathway to licensure outside the traditional classroom education and training, which can be cost prohibitive for many students. The Legislature has evaluated multiple issues stemming from the apprenticeship program over previous sunset reviews, such as the quality of training received, the low examination pass rates of apprentices, and whether apprentices should be paid for their services while learning. The number of apprenticeship programs has increased significantly in the past number of years. A contributing factor is thought to be that apprenticeship programs do not have to be approved as schools and therefore, are not required to undergo the Bureau for Private Post-Secondary Education approval process.

LAB § 3075.1 states the position of the Legislature as a matter of a practical form of training when it serves public interest, "It is the public policy of this state to encourage the utilization of apprenticeship as a form of on-the-job training, when such training is cost-effective in developing skills needed to perform public services." However, the Board has concerns about the current state of apprenticeships and the barriers that they are currently presenting.

The Board issued a *Report on the Status of the Apprenticeship Program*, which identifies several areas of concern, which demonstrate opportunities for improvement to the current apprentice program. The Board submitted multiple legislative requests to implement significant reforms to the apprenticeship program focused on enhancing enforcement to improve the learning experience for apprentices, decrease costs to apprentices, increase the likelihood of successful outcomes, and increase compliance with the Act and Labor Code. This bill makes significant reforms to the Board's apprenticeship program by requiring trainers and apprenticeship program sponsors to apply for approval, establishing responsibilities for trainers and establishments, and authorizing the Board to take

disciplinary action or cite and fine when appropriate. These amendments provide guardrails that are intended to protect apprentices from exploitation, improve outcomes, and increase compliance with the Act and the Labor Code.

Continued regulation by the Board. As an organization, the Board functions well, meets performance metrics used to evaluate regulatory agency effectiveness, and lacks many of the structural problems that other boards face, such as issues regarding fiscal solvency. This bill extends Board operations by four years to January 1, 2031.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

Ongoing annual costs of approximately $22 million (Barbering and Cosmetology Contingent Fund) to support 93 positions for the continued operation of the Board's licensing and enforcement activities beyond the January 1, 2027, sunset date. This fund is fully self-supporting with fee revenue. The Board anticipates ongoing, absorbable annual costs of approximately $130,000 (special fund). These costs include $85,000 to administer the Remedial Education Program and track enrollment, completion, and compliance, and $45,000 related to Attorney General usage. The Board will be able to initiate and process revocations involving high-level enforcement support, including investigation and case prep, Attorney General handling, and post-hearing compliance. The Board anticipates additional absorbable costs related to regulatory updates which the Board cannot yet quantify. The Board estimates ongoing revenue of $8,000 (special fund) from a new license type, "Apprenticeship Program Sponsor." The Board indicates the fee amount for the new license type has not been identified but estimates a fee of $250 and anticipates receiving 32 applications. Renewal will occur every two years. The Department of Consumer Affair's Office of Information Services estimates one-time, absorbable costs of $70,000 to build a new "apprenticeship program sponsor" license type for the Board.

SUBJECT: Speech-language pathologists, audiologists, and hearing aid dispensers

SOURCE: Author

DIGEST: This bill extends the operations of the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (Board) until January 1, 2031, and makes various conforming changes to the regulation of licensed and registered professionals by the Board stemming from the joint sunset review oversight process for the Board.

Assembly Amendments make various technical changes to improve Board operations and the enforcement of the Act.

ANALYSIS:

Existing law establishes the Speech-Language Pathologists and Audiologists and Hearing Aid Dispensers Licensure Act (Act) for the purposes of regulating speech-language pathologists, audiologists, and hearing aid dispensers. (Business and Professions Code (BPC) §§ 2530 et.seq.)

This bill:

1) Makes various changes to the Act in response to issues raised during the SLPAHAD's sunset review oversight process including:

   a) Provides the Board with statutory authority to establish a retired license category.
   b) Makes statutory clarifications to enhance Board oversight of continuing education providers and continuing professional development providers.
   c) Makes technical changes that improve the Board operations and the enforcement of the Act.
   d) Extends the Board operations to January 1, 2031.

Background

The SPLAB (formerly a committee) was created in 1973 and enacted in 1974 under the jurisdiction of the MBC. SPLAB was restored to a board with the passage of AB 124 (Ackerman, Chapter 436, Statutes of 1999) in 1999, effective January 1, 2000. In 2009, (AB 1535, Chapter 309, Statues of 2009) merged the Hearing Aid Dispensers Bureau into the SPLAB to create the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SLPAHADB or Board) effective January 1, 2010.

The Board's mandate is to protect the public by licensing and regulating the Speech-Language Pathologist, Audiologists, and Hearing Aid Dispensers, which are three separate professions, each with individual scopes of practice, entry-level requirements, and professional settings. The Board sets entry level licensing standards, examination requirements, ensures consumer protection, and enforces standards of professional conduct by investigating applicant backgrounds, and complaints against licensed and unlicensed practitioners, while taking disciplinary action whenever appropriate.

The Board licenses and regulates more than 44,800 individuals and entities. According to the U.S. Department of Labor's Bureau of Labor Statistics, the Speech Language Pathologist profession is expected to grow by 15 percent, the Audiologist profession by 9 percent and the Hearing Aid Dispenser profession by 18 percent from 2024-2034.

The Board is responsible for regulating the following licensing types and categories:

- Speech-Language Pathologist - provide assessment and therapy for individuals who have speech, language, swallowing, and voice disorders.

- Audiologist - identify hearing, auditory system, and balance disorders, and provide rehabilitative services, including hearing aids and other assistive listening devices.

- Dispensing Audiologist – licensed to perform the duties of an Audiologist as described above and authorized to sell hearing aids.

- Speech-Language Pathology Assistant (SLPA) – registered paraprofessionals who complete formal education and training and serve under the direction of a licensed Speech-Language Pathologist.

- Required Professional Experience Temporary License - speech-language pathology and audiology applicants completing required professional experience to qualify for full licensure, practicing under the supervision of a licensed practitioner.

- Speech-Language Pathology Aide – support personnel approved to work directly under the supervision of a Speech-Language Pathologist. No requirement for formal education and training, but on-the-job training must be provided.

- Audiology Aide - support personnel approved to work under the supervision of a licensed Audiologist. No requirement for formal education and training, but on-the-job training must be provided.

- Speech-Language Pathology or Audiology Temporary License – Speech-Language Pathologist or Audiologist, licensed in another state, who qualifies for a six-month license while seeking permanent licensure.

- Hearing Aid Dispenser – licensed to fit and sell hearing aids, take ear mold impressions, postfitting procedures, and directly observe the ear and test hearing in connection with the fitting and selling hearing aids.

- Hearing Aid Dispenser Temporary License – Hearing Aid Dispenser, licensed in another state, who qualifies for a 12-month temporary license while seeking permanent licensure.

- Hearing Aid Dispenser Trainee License – allows a Hearing Aid Dispenser trainee applicant to work under the supervision of a licensed Hearing Aid Dispenser for up to 18 months.

- Branch License – licenses issued to Hearing Aid Dispensers authorizing the dispenser to work at additional branch locations.

Business and Professions Code (BPC) § 2531.02 states that the protection of the public shall be the highest priority for the Board in exercising its licensing, regulatory, and disciplinary functions

Oversight Hearings and Sunset Review of Licensing Boards and Programs. In March 2026, the Senate Business, Professions and Economic Development Committee and the Assembly Committee on Business and Professions (Committees) began their comprehensive sunset review oversight of 10 regulatory entities including the Board. The Committees conducted three oversight hearings. This bill and the accompanying sunset bills are intended to implement legislative changes as recommended by staff of the Committees, and which are reflected in the Background Papers prepared by the Committee staff for each agency and program reviewed this year. The following are selected issues pertaining to the Board along with background information concerning the issue.

Retired License. In 2016, the Legislature passed, and the Governor signed AB 2859 (Low, Chapter 473, Statutes of 2016) which permitted any of the boards within DCA to establish a retired category of licensure for people not actively engaged in their practice. Each board would need to do this through the regulatory process. BPC § 464 prohibits a retired license holder from practicing unless the board specifies, through regulation, the criteria for a retired license to practice.

Current law does not authorize the Board to issue a retired license which it requests authority to do. According to the Board, licensees have requested to be placed in a retired status instead of having to renew their license or have their license expire at a specified time before it can be cancelled. Licensees were failing their CPD audits because they had professionally retired and should have been in an inactive status but continued to renew, either because they were unaware of the inactive status or made a mistake on their renewal form.

The Board states that creation of this license would require a one-time fee and would provide a means for a retired licensee to return to active status under certain circumstances. The Board would also like to ensure that any retired license creation covers the following:

- A retired license cannot be issued if the licensee is currently holding a license that is restricted or if they have outstanding citations and fines or if they are currently under investigation for an active complaint or conviction

- The license cannot be reinstated to active if the individual has been out of practice for a specified number of years

- The licensee is limited to a certain number of times that a license can be reinstated from retired to active

This bill will provide the Board statutory authority to establish a retired license category.

Oversight of Continuing Education Providers and Continuing Professional Development Providers. The Board highlighted the need for statutory clarifications to ensure robust oversight of CE, CPD, and CE/CPD providers. Specifically, the Board would like to:

- Clarify that both the national and California chapters of professional organizations qualify as approved and exempt CE providers

- Allow mandatory training courses be either state, federal, or local government entities that cover professional issues that impact the provision of services to qualify as CE

- Allow Speech-Language Pathology Assistants to meet their CPD requirements through the same course providers as their supervisors are allowed

- Prohibit Speech-Languge Pathology Assistants from using coursework required by a master's degree for licensure as a Speech-Language Pathologist towards their CPD requirement, as a master's level course is intended to prepare an individual for a different professional role, not expand the knowledge of practicing as a Speech-Language Pathology Assistant.

CE courses and CPD providers are reviewed and approved by the Board for compliance under the regulations governing CE course content and CPD provider applications. Subject matter experts may provide guidance, if needed, with course content. The American Speech-Language Hearing Association, the American Academy of Audiology, or the California Medical Association's Institute for Medical Quality Continuing Medical Education are accepted by the Board through statutory authority as CPD providers. The Board suggests that licensees are not often paying close attention to the CPD approval status of course providers and clarification could benefit those taking coursework.

This bill will make statutory clarifications to enhance Board oversight of CE providers and CPD providers.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Committee on Appropriations, it costs approximately $3.4 million per year to continue the operation of the Board. The Board also identified an increase in revenue as follows: $7,200 from 96 applications in 2026-27, $16,650 from 222 applications in 2027-28, and $30,225 from 403 applications annually thereafter. The Department of Consumer Affairs (DCA) Office of Information Services anticipates absorbable costs to perform Americans with Disabilities Act compliance checks; post retired-status paper applications for speech-language pathologists, audiologists, hearing aid dispensers, and dispensing audiologists to the board's website and to create a new "retired" license status for these license types; develop functionality to allow a licensee to restore a retired license back to active status; and update DCA Search to display the new status.

California Speech Language Hearing Association
Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board

OPPOSITION: (Verified 8/24/26)

None received

ARGUMENTS IN SUPPORT: The Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board writes in support, "This bill will ensure that the Board is able to continue its important consumer protection work for the four years. This bill would clarify and expand the types of acceptable continuing professional development for speech-language pathologists, speech-language pathology assistants, and audiologists for purposes of licensure renewal. This bill would provide new guardrails preventing aides, assistants, and trainees from independently operating businesses, thus enhancing public safety by ensuring only fully licensed professionals provide clinical services. This bill would also provide a clear pathway for experienced professionals to exit or re-enter their practice responsibly with the addition of retired license provisions. Together, these changes promote public protection while aligning the Board's Practice Act with current technology, education, and service-delivery models."

The California Speech Language Hearing Association (CSHA) notes support stating, "CHSA supports the continued licensing and regulation by the Speech Language Pathology and Audiology and Hearing Aid Dispensers Board and appreciates the outreach and communication of the Board and the ongoing efforts by Board leadership and staff to engage with the important work of regulating the profession and protecting consumers."

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Restraining orders: educational institutions

SOURCE: California State University, Office of the Chancellor

DIGEST: This bill authorizes a chief administrative officer of a postsecondary educational institution, or a designated officer or employee, to seek a temporary restraining order and an order after hearing on behalf of the institution in order to maintain order on the school campus or facility which is subject to unlawful

violence or a credible threat of violence directed towards the postsecondary educational institution.

Assembly Amendments requires the Judicial Council, on or before January 1, 2028, to adopt or modify forms, as specified, make the provisions of the bill operative on July 1, 2029, and make chaptering out amendments.

ANALYSIS:

Existing law:

1) Defines the following relevant terms:
   a) "Chief administrative officer" means the principal, president, or highest-ranking official of a postsecondary educational institution.
   b) "Course of conduct" means a pattern of conduct composed of a series of acts over a period of time, however short, evidencing a continuity of purpose, including (1) following or stalking to or from school; (2) entering the school campus or facility; (3) following a student during school hours; (4) making telephone calls to a student; and (5) sending correspondence to a student by any means.
   c) "Credible threat of violence" means a knowing and willful statement or course of conduct that would place a reasonable person in fear for their safety, or the safety of their immediate family, and that serves no legitimate purpose.
   d) "Petitioner" means the chief administrative officer, or their designee, who files a petition under 2).
   e) "Postsecondary educational institution" means an institution of vocational, professional, or postsecondary education.
   f) "Respondent" means the person against whom the temporary restraining order and order after hearing are sought and, if the petition is granted, the restrained person.
   g) "Student" means an adult currently enrolled in or applying for admission to a postsecondary educational institution.
   h) "Temporary restraining order" and "order after hearing" mean orders that include any of the following restraining orders, whether issued ex parte, or after notice and hearing:
      i. An order enjoining a party from harassing, intimidating, molesting, attacking, striking, stalking, threatening, sexually assaulting, battering, abusing, telephoning, including making annoying telephones as defined, destroying personal property, contacting (directly or

indirectly), or coming within a specified distance of, or disturbing the peace of, the student.

ii. An order enjoining a party from specified behavior that the court determines is necessary to effectuate orders described in (g)(i).

i) "Unlawful violence" means any assault or battery, or stalking as defined, but does not include lawful acts of self-defense or defense of others. (Code of Civil Procedure (Code Civ. Proc.) § 527.85(b).)

2) Permits a chief executive officer of a postsecondary educational institution, or an officer or employee designated by the chief executive officer, to seek a temporary restraining order and an order after hearing on behalf of the student, as follows:
   a) The student must have suffered a credible threat of violence made off the school campus or facility from any individual which can reasonably be construed to be carried out or to have been carried out at the school campus or facility.
   b) The chief executive officer or their designee must obtain the written consent of the student.
   c) The chief executive officer or their designee may, at the discretion of the court, seek a temporary order or order after hearing on behalf of any other students at the campus or facility who are similarly situated.
   d) The court may not issue a temporary restraining order or order after hearing prohibiting speech or other activities that are constitutionally protected.
   e) In the discretion of the court, for good cause shown, a temporary restraining order or order after hearing may include other named family or household members of the student, or other students at the campus or facility. (Code Civ. Proc., § 527.85(a), (c), (d).)

3) Establishes procedures and timelines for obtaining a temporary restraining order or order after hearing under 2), as provided. (Code Civ. Proc., § 527.85(e)-(k), (m), (o), (p).)

4) Provides that a person who is subject to a protective order issued under 3) cannot own, possess, receive, purchase, receive, or attempt to purchase or receive a firearm or ammunition while the protective order is in effect. (Code Civ. Proc., § 527.9.)
   a) The court shall order a person subject to a protective order to relinquish any firearms or ammunition they own or possess pursuant to the provisions set forth in Code of Civil Procedure Section 527.9.

b) Any person who owns, possesses, purchases, or receives, or attempts to purchase or receive, a firearm or ammunition while the protective order is in effect is punishable as a crime. (Penal Code § 29825.)

5) Provides that nothing in 2) through 4) prevents either party from representation by private counsel or from appearing on their own behalf. (Code Civ. Proc., § 527.85(l).)

This bill:

1) Permits a chief executive officer of a postsecondary educational institution, or an officer or employee designated by the chief executive officer, to seek a temporary restraining order and an order after hearing on behalf of the institution, and at the discretion of the court, any property of the campus or facility which are owned by the institution.

2) Expands the definition of "course of conduct" to include making telephone calls to the school campus or facility and sending correspondence to a chief administrative officer by any means, including, but not limited to, the use of public or private mails, interoffice mail, facsimile, or computer email.

3) Provides that a "temporary restraining order" and "order after hearing" may include an order enjoining a party from: harassing; intimidating; attacking; striking; stalking; threatening; telephoning, including, but not limited to, making annoying telephone calls as defined; destroying property; contacting, either directly or indirectly, by mail or otherwise; or coming within a specified distance of a school campus or facility.

4) Requires the Judicial Council, on or before January 1, 2028, to adopt or modify forms, as specified.

5) Make the provisions of the bill operative on July 1, 2029.

6) Makes clarifying changes and chaptering out amendments.

Comments

A 2025 report from the Homeland Security Operational Analysis Center (HSOAC) shows campus crime at institutions of higher education across the U.S. has returned to pre- COVID-19 pandemic levels. The sponsor and author of this bill note that threats can cause disruptions during key academic deadlines, such as

during finals or midterm exams. For example, in 2018 California State University, Northridge (CSUN) received alleged threats to campus during finals week in December, which resulted in alternative arrangements needing to be made that did not require students to be on campus during finals week.[1] In February of this year, California State University, Bakersfield (CSUB) received an anonymous call alleging that someone was going to shoot people at the school and blow themselves up, which led to fear and panic for the campus community and a campus-wide lockdown that asked staff and students to shelter in place.[2] According to the author and sponsor, a troubling incident that occurred at San Diego State University (SDSU) highlights why this bill is needed. They report:

> In March 2024, Student A began posting on SDSU-restricted online platforms. These posts contained violent, sexual, and concerning content and were forwarded to University Police Department (UPD) by a student. UPD's Threat Management Team (TMT) was notified, and monitoring began. Additionally, coordination with local law enforcement for monitoring began. In 2025, SDSU worked with the FBI on the case, as the student was serving in the U.S. Marine Corps Reserve. Since the threats were not specifically directed at an individual student or employee at SDSU, [SDSU] did not have the ability to have a long-term restraining order issued against the student. The student was suspended from SDSU, and the suspension was upheld. And in SDSU's experience, the District Attorney and City Attorney do not always request a criminal restraining order even when specifically asked to include it as part of the prosecution.

In the example above no specific student or employee was targeted—but the campus generally— and therefore SDSU was unable to use existing Code of Civil Procedure Sections 527.8 or 527.85 to obtain a restraining order against the former student from entering campus.

In 2009, the Legislature enacted SB 188 (Runner, Chapter 566, Statutes of 2009), which allowed the chief executive officer of a private postsecondary educational institution to seek a protective order---including a temporary restraining order or an order after hearing—on behalf of a student who has experienced an off-campus threat of on-campus violence.[3] The bill originated from a school at which a former student was harassing current students; the school was told that there was no way for the school to obtain a protective order for the campus as a whole, and that it instead would have to seek 375 separate protective orders to prevent the former

---

student from entering the campus.[4] The bill was modeled after existing provisions allowing an employer to seek a protective order on behalf of an employee who suffered a credible threat of violence that could be construed to be carried out at the workplace.[5]

The protective order provision established in SB 188 is more limited in scope than protective order regimes that allow the victim themselves to seek an order. A chief executive officer may file a petition on behalf of a student only if the student suffered a credible threat of violence made off-campus and the threat can be reasonably construed to be carried out, or to have been carried out, on campus.[6] In other words, an officer cannot seek a protective order on behalf of a student for any harassment the student might be suffering; the officer is limited to seeking a protective order in response to a credible threat of violence that could occur on the campus or facility. Additionally, an officer may not seek an order on behalf of an unwilling student—the officer must obtain the written consent of the student before seeking a protective order.[7] A person subject to a temporary restraining order or injunction under these provisions is required to relinquish firearms and ammunition under Code of Civil Procedure Section 527.9.

In 2024, these provisions were expanded to include public institutions in AB 2096 (Petrie-Norris, Chapter 947, Statutes of 2024). AB 2096 also expanded the conduct under which a restraining order can be sought to include unlawful violence.

The procedure for obtaining a protective order under this provision is also slightly more permissive towards the respondent than, say, the Domestic Violence Prevention Act (DVPA). A respondent may obtain a continuance of the hearing for a reasonable time to respond to the petition as a matter of course.[8] A protective order issued after hearing may run for only three years initially, rather than the five years permitted under the DVPA.[9] The scope of a protective order, however, is similar to those permitted under other regimes; a respondent may be prohibited from engaging in a range of activity to harass or intimidate the subject of the order, and, consistent with other protective order regimes, a respondent is prohibited from possessing firearms or ammunition for the duration of the order.[10]

This bill, effective January 1, 2029, expands the existing provisions of Code of Civil Procedure Section 527.85 to authorize a chief administrative officer of a postsecondary educational institution, or a designated officer or employee, to seek a temporary restraining order and an order after a hearing on behalf of the institution itself in order to maintain order on the school campus or facility when it is subject to unlawful violence or a credible threat of violence towards the campus.

ARGUMENTS IN SUPPORT: The author writes:

> SB 1374 empowers higher education institutions to provide safer communities by providing an additional preemptive measure to deter threats by permitting restraining orders on behalf of the institution itself when threats are made towards a campus. This bill will provide a crucial tool to ensure institutions are able to maintain safe learning environments.
>
> When institutions are targeted with threats, the resulting lockdowns, disruptions, and fear undermine students' ability to learn and faculty's ability to teach. SB 1374 will help campuses maintain a safe, stable environment by allowing them to seek timely court orders that can deter or restrict dangerous conduct before it reaches the classroom, residence hall, or campus event.
>
> Campus leaders are responsible for safeguarding thousands of students, faculty, and staff, yet under existing law they lack clear standing to obtain civil protective orders when the institution itself is the target. SB 1374 provides a clear, court supervised mechanism to intervene early, before threats escalate into acts of violence on campus.

The California State University, Office of the Chancellor, source of this bill, writes:

> The California State University (CSU) is pleased to sponsor and support Senate Bill 1374 […] While current law allows institutions to seek restraining orders on behalf of students or an employee who receives threats, it does not clearly authorize institutions to seek similar protection when threats are directed at the institution itself.

In a time of increasing threats and harassment aimed at universities and other institutions, the gap in current law limits CSU's ability to respond swiftly and effectively. By authorizing chief administrative officers to seek restraining orders on behalf of the institution, SB 1374 ensures that institutions and the courts can intervene when unlawful violence or credible threats target the broader campus community. This bill serves as a critical preemptive measure by allowing institutions to intervene at the point of credible threats or escalating harassment before conduct turns into physical violence, unlawful acts, or irreversible harm to students, staff, or campus operations.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Commercial fishing: steelhead trout: Dungeness crab

SOURCE: Author

DIGEST: This bill makes multiple changes to the commercial Dungeness crab fishery, revises and extends the sunset on the steelhead trout fishing report-restoration card (steelhead report card) until January 1, 2032, as provided.

Assembly Amendments retain existing law for the steelhead report card fee, set the base fee for the steelhead report card nonreturn fee to $20 for the 2028 license year, revise the information required in the steelhead trout report card legislative report, change the sunsets for the Dungeness crab fishery provisions to January 1, 2037, revise the process for providing funding from the Dungeness Crab Account

to the Pacific States Marine Fisheries Commission, revise the requirements for the transiting of closed waters with Dungeness crab onboard, and make various minor and conforming changes.

ANALYSIS:

Existing law:

1) Establishes the California Department of Fish and Wildlife (department) and the California Fish and Game Commission (commission) in the California Natural Resources Agency. In general, the department implements and enforces the regulations set by the commission, as well as providing biological data and expertise to inform the commission's decision-making process.

2) Authorizes a commercial fisher participating in eviscerated crab fishery authorized by the department director in an otherwise closed area due to public health risks to transit closed waters if the vessel adheres to electronic monitoring requirements specified by the department (Fish and Game Code (FGC) §5523(a)(3)).

3) Establishes the risk assessment and management program (RAMP) for the Dungeness crab fishery (FGC §8276.1), authorizes the department director to delay the start of the Dungeness crab fishery for specified reasons (FGC §8276.2), and creates the Dungeness crab task force (DCTF) to review, evaluate and make recommendations about the fishery, among other provisions applicable to the commercial Dungeness crab fishery, as provided. Sunsets the RAMP on January 1, 2030. Makes inoperative the department director's authority to delay the start of the fishery and the DCTF on April 1, 2029 and sunsets them on January 1, 2030.

4) Authorizes a vessel to transit state waters with Dungeness crab traps that are not tagged with California tags if the traps contain either a valid Oregon or Washington trap tag, no crab species are onboard the vessel, and the traps are not deployed in state waters (FGC §8276.5(a)(4)).

5) Authorizes the department director to open waters that are otherwise restricted for the commercial take of Dungeness crab or rock crab for public health reasons during a time period that the Department of Public Health authorizes the manufacture and sale of eviscerated Dungeness crab or rock crab, as provided, in accordance with the following requirements:
   a) The vessel is required to submit to electronic monitoring of the vessel when engaged in take of the crab species in order to verify location.

b) Prohibits a person from taking, possessing, or landing Dungeness crab or rock crab under an evisceration order on the same trip in which the Dungeness crab or rock crab are taken, possessed, or landed from waters outside where the evisceration order is in effect.
c) Authorizes a person taking Dungeness crab or rock crab to sell or provide the crab only to a licensed processor, as provided.
d) Requires the processor to identify on the fish ticket that the crabs were taken from an area under an evisceration order (FGC §8285).

6) Requires the department director, when the evisceration order is lifted, to lift restrictions in a manner to promote a fair and orderly fishery (FGC §8285).

7) Requires a person taking steelhead in inland waters to have a valid California sportfishing license and a valid nontransferable steelhead trout fishing report-restoration card. Requires the cardholder to record certain fishing information on the card, as specified, and return it to the department, as provided. Authorizes the commission to adopt necessary regulations to implement this section. Specifies the report card fee is $5 for the 2004 year. Authorizes annual adjustments via indexing to the fee, as specified (FGC §7380).

8) Authorizes revenue raised by the report card, upon legislative appropriation, to be expended to monitor, restore, or enhance steelhead trout resources, and to administer the program, as provided. Requires a legislative report providing information about the steelhead report card program on or before July 1, 2025, as specified. (FGC §7381).

9) Sunsets the steelhead report card provisions on January 1, 2027. (FGC §7382).

This bill:

1) Extends the sunset on various commercial Dungeness crab fishery sections, including the RAMP, 10 years to January 1, 2037. Extends the inoperative date and the sunset on various other commercial Dungeness crab fishery sections, including the authorization for the department director to delay the opening and the DCTF, 7-2/3s years to January 1, 2037, and 8 years to January 1, 2038, respectively.

2) Authorizes crab species to be on board a vessel transiting state waters when the vessel contains crab traps without a California tag and with a Washington or Oregon tag on them and the traps are not deployed in state waters, and when all the requirements of 5) below are met.

3) Requires the department, upon appropriation by the Legislature, to provide the Pacific States Marine Fisheries Commission (PSFMC) with funding from the Dungeness Crab Account (Account), as provided. Requires the DCTF, on or before December 31, 2027, and by December 31 annually thereafter, to develop and submit a spending plan for the moneys provided to the PSMFC. Makes these provisions inoperative on January 1, 2037, and repeals them on January 1, 2038.

4) Requires the amount remaining in the Account after certain allocations are made and if there is a prudent reserve to be made available to the Legislature for appropriation to the PSFMC per 3) above, as provided.

5) Authorizes a vessel to transit certain closed waters with Dungeness crab traps and Dungeness crab onboard if all of the following conditions are met:
   a) Requires the vessel to submit a notice of intent to the department at least 72 hours before entering the closed area. Requires the notice to include the vessel's name and permit number, the name and phone number of the vessel operator and owner, the port of landing and fish business to deliver to, the requested start and end time and date of closed area transit, and any other information prescribed by the department, as provided.
   b) Requires the vessel to maintain continuous transit through the closed waters and to possess and operate a fully operational electronic monitoring system during the closed area transit. Requires all gear to be secured so no traps are rendered unusable.
   c) Requires the department to provide a notification procedure for a vessel experiencing mechanical issues during transit.
   d) Defines continuous transit to mean transiting through a closed area as close to a direct route without stopping or delaying and maintaining at least a speed of 3 knots at all times.
   e) Sunsets this provision on January 1, 2037 and repeals it on January 1, 2038.

6) Requires the department to assess a late or non-return fee of someone who does not return a steelhead report card by the date established by the department. Prohibits the department from selling a steelhead report card for a subsequent year until the late non-return fee is paid in full.
   a) The base fee for the late or non-return fee is $20 for the 2028 license year and is authorized to be adjusted annually, as provided.
   b) Revenues from the late or non-return fee shall be treated the same as steelhead report card fees, as provided.
   c) The department or commission is prohibited from waiving the late or non-return fee.

7) Adds a legislative report providing information about the steelhead report card program on or before July 1, 2030, as specified.

8) Extends the sunset on the steelhead report card program five years to January 1, 2032.

9) Makes various minor technical and conforming changes, and provides that no reimbursement is required for local agencies and school districts for certain costs mandated by the state, as specified.

[NOTE: Additional background and information about this bill may be found in the Senate Natural Resources and Water Committee analysis.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

Ongoing costs and revenue impacts [General Fund, Fish and Game Preservation Fund (FGPF)] of an unknown amount for CDFW to continue administering the steelhead report card program, implement and administer a late or nonreturn fee, update required legislative reporting, grant surplus funds from the Dungeness Crab Account to PSMFC, process vessel transit notices, and continue Dungeness crab fishery management activities, as described below.

Steelhead Report Card. A $20 late or nonreturn fee may increase revenue if anglers choose to pay the fee; however, if anglers opt out of paying the fee, revenue may not increase and may impact overall report card sales for the following season due to reduced sales from those opting out of the program.

Dungeness Crab Fishery. CDFW′s annual cost of administering the Dungeness crab fishery is about $1.1 million. Extending various sunsets dates related to this program means these costs will continue through 2037.

The provision in the bill allowing a vessel to transit waters closed to Dungeness crab fishing would result in additional workload for CDFW′s law enforcement division, as CDFW would need to monitor notices of intent as vessels transit through closed areas and develop a notification procedure for a vessel experiencing mechanical issues during transit. However, CDFW anticipates these costs to be absorbable within existing resources.

The bill will also result in the transfer of an unknown amount, potentially in the hundreds of thousands of dollars, of surplus funds in the Dungeness Crab Account to the PSMFC every two years. The Fish and Game Code establishes the Dungeness Crab Trap Limit Program (DCTLP). Revenues collected through the DCTLP are deposited in the Dungeness Crab Account, and the use of these funds is restricted to administration and enforcement of the DCTLP and supporting the administration and facilitation of the Task Force. As of FY 2023–24, the Dungeness Crab Account had an end-of-year balance of approximately $3 million. [Department of Finance] requires the account to maintain a reserve sufficient to cover CDFW′s two-year spending authority of $1.1 million. The surplus in the account was approximately $300,000, $1.3 million, and $800,000 at the end of FY 2021–22, FY 2022–23, and FY 2023–24, respectively. The Task Force, in its 2025 annual report, recommends surplus funds in the Dungeness Crab Account in excess of CDFW and the Task Force′s expenditures be provided to the PSMFC biannually for, among other things, gear retrieval programs, vessel surveys, applied research, and the testing or adoption of new technologies that enhance fishery operations and sustainability

OPPOSITION: (Verified 8/18/26)

California Department of Finance

ARGUMENTS IN SUPPORT: According to the author, "California's steelhead trout and Dungeness crab fisheries are cornerstones of California's natural heritage and economic lifelines for communities throughout the state. SB 1393 preserves the state management frameworks that have been essential to sustainably overseeing these fisheries and protecting marine ecosystems from entanglement risk. The bill also ensures that reliable data — not guesswork — drives decision-

making and determines how we allocate access and enforce laws. Fishermen, processors, and resource managers need clear and predictable rules around which they build their lives and livelihoods."

ARGUMENTS IN OPPOSITION: The California Department of Finance writing in opposition states "Finance is opposed to this bill, because it may be duplicative of regulations that the Fish and Game Commission is considering for the Steelhead Report Card Program and because it may limit CDFW's flexibility to spend the balance of the Dungeness Crab Account on state priorities."

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Criminal procedure: competence to stand trial

SOURCE: Family Advocates for Individuals with Serious Mental Illness of Sacramento

DIGEST: This bill 1) specifies timeframes for the dismissal of felony charges for a defendant who is incompetent to stand trial (IST) and referred to one of several specified programs; 2) authorizes a county behavioral health agency to share confidential medical records and other relevant information with the court for the purpose of determining eligibility for behavioral health services; and 3) allows the court to refer a misdemeanor IST defendant to the county conservatorship

investigator in the county of commitment for possible conservatorship proceedings if in its opinion the defendant appears to be gravely disabled.

Assembly Amendments apply the following changes to both the felony and misdemeanor IST statutes: (1) remove jail medical providers from the entities authorized to share confidential medical records with the court; and (2) prohibit the confidential information shared by a county behavioral health agency with the court from being used for any purpose other than determining eligibility for services and require the information to be placed under seal after the disposition of the case.

ANALYSIS:

Existing law:

1) Requires, if during the pendency of an action and prior to judgment, a doubt arises in the mind of the judge as to the mental competence of the defendant, the judge to state that doubt in the record and inquire of the attorney for the defendant whether, in the opinion of the attorney, the defendant is mentally competent. Requires the court, at the request of the defendant or defendant's counsel or upon its own motion, to recess the proceedings for as long as may be reasonably necessary to permit counsel to confer with the defendant and to form an opinion as to the mental competence of the defendant at that point in time. (Penal (Pen.) Code, § 1368, subd. (a).)

2) Requires the court, if counsel informs the court that they believe the defendant is or may be mentally incompetent, to order that the question of the defendant's mental competence is to be determined. Authorizes the court, if counsel informs the court that they believe the defendant is mentally competent, to order a determination by the court of the defendant's mental competence. (Pen. Code, § 1368, subd. (b).)

3) Requires all proceedings in the criminal prosecution to be suspended when an inquiry into the present mental competence of the defendant has been commenced by the court until the question of the present mental competence of the defendant has been determined, except as provided. (Pen. Code, § 1368, subd. (c).)

4) Outlines the process by which the question of mental competence must proceed. (Pen. Code, § 1369.)

5) Provides that Section 1370 applies to a person who is charged with a felony or alleged to have violated the terms of probation for a felony or mandatory supervision and is incompetent as a result of a mental health disorder. Provides that Section 1370.01 applies to a person who is charged with a misdemeanor or misdemeanors only, or a violation of formal or informal probation for a misdemeanor, and the judge finds reason to believe that the defendant has a mental health disorder, and may, as a result of the mental health disorder, be incompetent to stand trial. (Pen. Code, § 1367, subd. (b).)

6) Requires the criminal process to resume, the trial on the offense charged or hearing on the alleged violation to proceed, and judgment to be pronounced if the defendant is found mentally competent. (Pen. Code, § 1370, (a)(1)(A).)

7) Requires the trial, the hearing on the alleged violation, or the judgment to be suspended, if the defendant is found mentally incompetent (and is not charged with an offense that would make the defendant ineligible for mental health diversion). Requires the court to do all of the following:

   a) Determine whether restoring the person to mental competence is in the interests of justice.

   b) If restoring the person to mental competence is in the interests of justice, the court must state its reasons orally on the record and the case shall proceed, as provided.

   c) If restoring the person to mental competence is not in the interests of justice, the court must conduct a mental health diversion hearing, and, if the court deems the defendant eligible, grant diversion for a period not to exceed two years from the date the individual is accepted into diversion or the maximum term of imprisonment provided by law for the most serious offense charged in the complaint, whichever is shorter. (Pen. Code, § 1370.01, subd. (a)(1)(B)(i)-(iii).)

8) Defines "gravely disabled" to mean any of the following:

   a) A condition in which a person, as a result of a mental health disorder, a severe substance use disorder, or a co-occurring mental health disorder and a severe substance use disorder, is unable to provide for their basic personal needs for food, clothing, shelter, personal safety, or necessary medical care.

   b) A condition in which a person has been found IST under Penal Code section 1370 and all of the following facts exist: the complaint, indictment, or

information pending against the person at the time of commitment charges a felony involving death, great bodily harm, or a serious threat to the physical well-being of another person; there has been a finding of probable cause on a complaint, a preliminary examination, or a grand jury indictment, and the complaint, indictment, or information has not been dismissed; as a result of a mental health disorder, the person is unable to understand the nature and purpose of the proceedings taken against them and to assist counsel in the conduct of their defense in a rational manner; and the person represents a substantial danger of physical harm to others by reason of a mental disease, defect, or disorder. (Welf. & Inst. Code, § 5008, subd. (h)(1).)

9) Requires the criminal process to resume, and the trial on the offense charged or hearing on the alleged violation to proceed if the defendant charged with a misdemeanor is found mentally competent. (Pen. Code, § 1370.01, subd. (a)(1)(A).)

10) Requires, if the defendant is found mentally incompetent, the trial, judgment, or hearing on the alleged violation to be suspended and the court to, after notice to the defendant, defense counsel, and the prosecution, hold a hearing to determine whether to do one or more of the following:

    a) Conduct a hearing, and, if the court deems the defendant eligible and suitable, grant mental health diversion for a period not to exceed one year from the date the individual is accepted into diversion or the maximum term of imprisonment provided by law for the most serious offense charged in the misdemeanor complaint, whichever is shorter.

    b) Refer the defendant to the Community Assistance, Recovery and Empowerment (CARE) Act court, if the defendant or counsel for the defendant agrees to the referral and the court has reason to believe that the defendant may be eligible for the CARE program. If the defendant is accepted into the CARE program, the CARE Act court must notify the criminal court of the acceptance, and the charges must be dismissed six months after the date of the referral to the CARE program, unless the defendant's case has been referred back to the court prior to the expiration of that six-month time period. If the defendant is not accepted into the CARE program or if the CARE Act court refers the defendant back to criminal court before the expiration of the six-month time period, the court shall grant mental health diversion is the defendant eligible and suitable. (Pen. Code, § 1370.01, subd. (b).)

11) Requires the court, if it finds the defendant ineligible or unsuitable for mental health diversion after notice to the defendant, defense counsel, and the prosecution, to hold a hearing to determine which one of the following actions the court will take:

    a) Order modification of an existing mental health diversion treatment plan in accordance with a recommendation from the treatment provider.

    b) Refer the defendant to assisted outpatient treatment.

    c) Refer the defendant to the county conservatorship investigator in the county of commitment for possible conservatorship proceedings. Provides that a defendant shall only be referred to the conservatorship investigator if, based on the opinion of a qualified mental health expert, the defendant appears to be gravely disabled, as defined.

    d) Refer the defendant to the CARE Act court.

    e) If the defendant does not qualify for any of the above services, dismiss the charges. (Pen. Code, § 1370.01, subd. (c).)

12) States that it is the intent of the Legislature that a misdemeanor IST defendant receive mental health treatment in a treatment facility and not a jail. (Pen. Code, § 1370.01, subd. (d).)

13) Authorizes the county behavioral health agency and jail medical providers to share confidential medical records and other relevant information with the court, including, but not limited to, prior interactions with and treatment of the defendant, for the purpose of determining likelihood of eligibility for behavioral health services and programs pursuant to this section. Specifies that the disclosure of information is subject to applicable state and federal privacy laws. (Pen. Code, § 1370.01, subd. (e).)

14) States it is the intent of the Legislature that the court consider all treatment options as provided in this section prior to dismissing criminal charges. Specifies that nothing in Section 1370.01 limits a court's discretion to dismiss charges pursuant to Section 1385. (Pen. Code, § 1370.01, subd. (g).)

This bill:

1) Makes changes to the provisions of law that pertain to felony defendants who are IST and ineligible for mental health diversion.

2) Requires, for a defendant referred to assisted outpatient treatment, that the charges are dismissed six months after the date of the referral to assisted outpatient treatment, unless the defendant's case is referred back to the court before the expiration of that time period. Specifies that this does not alter the confidential nature of assisted outpatient treatment.

3) Requires, for a defendant referred to the county conservatorship investigator, that if the conservatorship proceedings result in the filing of a petition for the establishment of a temporary or permanent conservatorship, the charges are dismissed 90 days after the date of the filing of the petition, unless the case is referred back to the court before the expiration of that time period. Specifies that this does not alter the confidential nature of conservatorship proceedings.

4) Requires, for a defendant referred to CARE court and accepted into the CARE program, the CARE Act court must notify the criminal court of the acceptance, and the charges are dismissed six months after the date of the referral to the CARE program, unless the case is referred back to the court before the expiration of that time period. Specifies that this does not alter the confidential nature of CARE program proceedings, except as otherwise provided.

5) Authorizes a county behavioral health agency to share confidential medical records and other relevant information with the court, including, but not limited to, prior interactions with and treatment of the defendant, for the purpose of determining eligibility for behavioral health services. Provides that the disclosure of information is subject to applicable state and federal privacy laws.

6) Allows for a misdemeanor IST defendant, the court to refer the defendant to the county conservatorship investigator in the county of commitment for possible conservatorship proceedings if in its opinion the defendant appears to be gravely disabled, as defined.

Background

Both Penal Code sections 1370 (felony IST) and 1370.01 (misdemeanor IST) require the dismissal of charges if the defendant is referred and accepted to assisted outpatient treatment (AOT) or CARE court, or placed under conservatorship. While Penal Code section 1370.01 specifies the timeframe for the dismissal of

charges to occur (e.g., 6 months after the date of referral to AOT, 90 days after the date of the filing of the petition for the establishment of conservatorship, etc.), Penal Code section 1370 does not explicitly state the timelines for the dismissal of charges. This bill addresses that by amending Penal Code section 1370 to include the same timelines for dismissals as contained in Section 1307.01.

This bill also amends Penal Code section 1370 to allow a county behavioral health agency to share confidential medical records and other relevant information with the court, including, but not limited to, prior treatment interactions with the defendant, for the purpose of determining eligibility for behavioral health services. This language is codified in Penal Code section 1370.01.

Finally, this bill allows the court to refer a misdemeanor IST defendant to the county conservatorship investigator in the county of commitment for possible conservatorship proceedings if in its opinion the defendant appears to be gravely disabled. This language mirrors language in Penal Code section 1370 that authorizes the court to make the referral.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

Trial court cost pressures of up to $600,000 annually (Trial Court Trust Fund (TCTF), General Fund (GF)), according to the Judicial Council, for additional hearings resulting from cases referred back to the criminal court before dismissal. Replacing dismissal at the point of acceptance or petition filing with dismissal after a six-month or 90-day waiting period keeps felony criminal cases open on court calendars during those periods and creates a category of cases that may be referred back to the criminal court for further proceedings. A case referred back requires additional appearances and may require reinstatement of competency proceedings, appointment of experts, and a further competency determination. The Judicial Council notes that the estimate depends heavily on how often cases are actually referred back, because the referral provision is permissive. A comparable mechanism exists for misdemeanor cases, and referrals back to court are not common in that context; the Judicial Council observes that referrals may occur more regularly under this bill given the focus on felonies. Although courts are not funded on the basis of workload, increased pressure on the TCTF may create a demand for increased funding for courts from the GF. The state budget provides annual GF backfills to the TCTF to offset revenue reductions, totaling approximately $117.3 million in 2025-26.

SUBJECT: Adult community care facilities: email address of record

SOURCE: Author

DIGEST: Requires an applicant or licensee of an adult community care facility to provide written notification to the California Department of Social Services (CDSS) of an email address of record or of any change to the email address of record within 12 business days, rather than 10 business days.

Assembly Amendments of 6/17/26 make conforming changes to impose the same 12-day written notification requirement upon an applicant or licensee of a residential care facility and an applicant or licensee of a residential care facility for the elderly.

ANALYSIS:

Existing Law:

1) Establishes the California Community Care Facilities Act. Defines "community care facility" as a facility providing nonmedical residential care, day treatment, adult daycare, and foster family agency services, among others. (Health and Safety Code (HSC) § 1500 et seq.)

2) Prohibits a person, firm, partnership, association, or corporation within the state, and a state or local public agency from operating, establishing, managing, conducting, or maintaining a community care facility without a current valid license. (HSC § 1508)

3) Requires CDSS to inspect and license community care facilities. (HSC § 1509)

4) Requires an applicant or licensee of an adult community care facility to maintain an email address of record with CDSS. Requires the applicant or licensee to provide written notification to CDSS of the email address and of any change to the email address within 10 business days of the change. (HSC § 1509.56; HSC § 1509.6)

5) Defines "adult community care facility" as an adult residential facility. Defines an adult residential facility as any facility of any capacity that provides 24-hour-a-day nonmedical care and supervision to the following:

   a) Persons 18 years of age through 59 years of age; and

   b) Persons 60 years of age and older only in accordance with acceptance and retention limitations regulations. (22 California Code of Regulations [CCR] § 80001(a)(4); 22 CCR § 80001(a)(5))

6) Provides that an adult residential facility licensee shall not accept or retain the following:

   a) Persons with prohibited health conditions, as specified.

   b) Persons who require inpatient care in a health facility.

   c) Persons who have needs that are in conflict with the needs of other clients or the program of services offered.

   d) Persons who require more care and supervision than is provided by the facility.

e) Any person whose primary need is acute psychiatric care due to a mental disorder. (22 CCR § 85068.4(a))

7) Requires an adult residential facility licensee to notify CDSS, in writing, within 30 days of a change of administrator. (22 CCR § 85061)

This bill revises the requirement for an applicant or licensee of an adult community care facility, residential care facility, or residential care facility for the elderly to provide written notification to CDSS of the email address of record and of any change to the email address of record within 12 business days of the change.

Background

Purpose of this Bill. The author notes that licensees are appropriately required to update contact information when facilities change ownership or management. Current law requires those updates at varying intervals, from 10 to 30 days. For a new email address, which may be tied to personnel changes or administrative structural changes within an organization, identifying the correct contact may take more than 10 days. For that reason, the author proposes allowing two additional days to update this information. The author notes that state licensing officials still may contact the facility by telephone or in person if an email is invalid during the short transitional window.

Community Care Licensing. Established within CDSS, the Community Care Licensing Division's mission is to promote the health, safety, and quality of life of each person in community care through effective and collaborative regulatory enforcement. This mission is accomplished by: promoting strategies to increase voluntary compliance; providing technical assistance to and consulting with care providers; working collaboratively with clients, their families, advocates, care providers, placement agencies, and regulatory agencies; training staff in the licensing process; educating the public about licensing and community care options; and promoting continuous improvement and efficiency throughout the community care licensing system. In fiscal year 2025-26, the Community Care Licensing Division oversaw a total of 73,847 community care facilities.

Adult Community Care Facilities. An adult community care facility refers to an adult residential facility, which is a licensing category under the CDSS Community Care Licensing Division. Adult residential facilities provide 24-hour, non-medical care and varying levels of supervision for clients ages 18-59 or any person 60 years of age or older if they require the same level of care and supervision as other clients in the facility. Clients may have a mental, physical, or developmental

disability. Care and supervision can mean any of the following activities provided to meet the needs of clients:

- Assistance in dressing, grooming, bathing, and other personal hygiene.
- Assistance with taking medication.
- Central storing and distribution of medications.
- Arrangement of and assistance with medical and dental care.
- Maintenance of house rules for the protection of clients.
- Supervision of client schedules and activities.
- Maintenance and supervision of client cash resources or property.
- Monitoring food intake or special diets.

While an adult residential facility is a non-medical facility, incidental medical services may be provided to clients through a third-party home health agency when certain conditions are met. As of June 2025, the Community Care Licensing Division oversees 6,161 adult residential facilities across the state, with a total licensed capacity of 40,296.

Some facilities specialize in providing comprehensive and individualized care or rehabilitation services to promote an individual's functional status and independence. These facilities offer supports such as a lower number of residents, additional staffing, and trauma-informed care. In addition to CDSS licensing requirements, these facilities require a special certification or vendorization process to operate. As of June 2025, the Community Care Licensing Division oversees 98 adult residential facilities for Persons with Special Health Care Needs with a total licensed capacity of 468; 25 Community Crisis Homes with a total licensed capacity of 103; and 83 Enhanced Behavioral Supports Homes with a total licensed capacity of 313.

Residential Care Facilities for the Elderly (RCFE). RCFEs provide 24-hour, non-medical care and supervision for clients 60 years of age or older. This level of care and supervision is for people who are unable to live by themselves but who do not need 24-hour nursing care. Assistance with activities of daily living may include, but is not limited to: assistance with hygiene, dressing, eating, and walking. As of June 2025, the Community Care Licensing Division oversees 7,889 RCFEs across the state, with a total licensed capacity of 174,458.

Requirement to Update Email Address. Licensees are required to routinely update certain information when a change of status occurs. For example, an adult residential facility must update the Community Care Licensing Division within 30 days of a change in administrator, within 15 days of a declared contagious disease emergency with a completed Emergency Infection Control Plan, and by the next business day for each use of manual restraint or seclusion. Current statute allows licensees 10 days to notify Community Care Licensing Division of a change of email address. This bill allows licensees an additional two days to notify the state of a change of email address.

Comments

This bill extends the window for an applicant or licensee of an adult community care facility to notify the CDSS Community Care Licensing Division of the email address of record or of any change to the email address of record from 10 business days to 12 business days. In doing so, this bill provides more flexibility for licensees. According to the author, an email address change could be related to administrative or personnel changes within an organization. Increasing the email notification requirement to 12 days provides more time to identify a successor contact and email account. The extended reporting window remains shorter than the requirement to update Community Care Licensing Division of a change in administrator, which must be communicated within 30 days.

Related/Prior Legislation

AB 1766 (Bloom, Chapter 139, Statutes of 2020), signed into law after AB 2377, required an applicant or licensee of an adult community care facility to maintain an email address of record with CDSS, and to provide written notification of the email address and of any change within 10 business days.

AB 2377 (Chiu, Chapter 146, Statutes of 2020) required an applicant or licensee of an adult community care facility to maintain an email address of record with CDSS, and to notify CDSS in writing of the email address and any change within 10 business days. The bill separately imposed the same requirement for an applicant or licensee for a residential care facility for persons with chronic, life-threatening illness.

AB 737 (Eggman, Chapter 180, Statutes of 2019) requires a person or entity seeking a license for a Residential Care Facility for the Elderly to file an application form with CDSS. The bill required an applicant or licensee of a Residential Care Facility for the Elderly to maintain an email address of record

with CDSS, and to provide written notification of the email address and any change within 10 business days.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUBJECT: Preservation of election materials

SOURCE: Attorney General Rob Bonta

DIGEST: This bill makes it a crime to take specified election materials or voting technology from the custody of election officials. This bill also expands the types of materials required for preservation if an election contest or criminal proceeding is ongoing.

Assembly Amendments replaced this bill's original contents with the current language.

ANALYSIS:

Existing law:

1) Prohibits packages containing voted ballots from an election from being destroyed if an election contest or criminal prosecution related to those ballots is ongoing. The packages of voted ballots from an election cannot be taken from the custody of the elections official.

2) Requires the elections official to preserve all rosters or combined rosters and voter lists from an election until five years after the date of the election. The elections official may destroy those materials after that five-year period.

3) Requires the elections official to keep ballots, paper cast vote records, and ballot identification envelopes in packages that remain unopened and unaltered for 22 months from the date of the election where candidates for one or more of the following federal offices are voted upon: President, Vice President, United States Senator, and United States Representative. For any other election, these materials must be retained for six months. The elections official must destroy or recycle these unopened items at the end of the retention period unless an election contest or criminal prosecution commences during that period.

4) Requires the elections official to keep any tally sheets used for manually tallying ballots, lists of challenged voters, and lists of assisted voters from an election in packages for 22 months from the date of a federal election and for six months from the date of any other election. The elections official may destroy or recycle the packages at the end of the retention period unless an election contest or criminal prosecution commences during that period. Voters are permitted to inspect the contents of the packages if certain conditions are met.

5) Prohibits any person from permitting an agent of a law enforcement agency to access, disrupt, modify, or take possession of rosters, combined rosters, voter lists, or certified voting technology unless authorized by a court order or to investigate a violation of state law prohibiting fraudulent voting.

6) Makes it a felony for a person to tamper with voting devices, or to interfere with the secrecy of election equipment source codes, including knowingly breaking the chain of custody for certified voting technology without authorization.

7) Permits the Secretary of State (SOS), the Attorney General (AG), or a county elections official to bring a civil action against any person who tampers with voting technology.

8) Defines "certified voting technology" as any certified voting technologies certified by the SOS, including voting systems, ballot on demand printing systems, electronic poll book systems, or adjudication systems, and the hardware, firmware, software, proprietary intellectual property they contain,

any components, and any products they generate, including ballots, ballot images, reports, logs, cast vote records, or electronic data.

9) Defines "electronic data" to include voting technology software, operating systems, databases, firmware, drivers, and logs.

This bill:

1) Prohibits specified election materials required to be retained after an election, certified voting technology, or electronic data from being taken from the custody of the elections official.

2) Permits the SOS, the AG, or a county elections official to bring a civil action against any person who takes materials in 1) of this bill from the custody of the elections official.

3) Makes it a crime, punishable by a $1,000 fine, imprisonment for up to three years, or by both, for a person to knowingly take materials in 1) of this bill from the custody of the elections official.

4) Prohibits the destruction of specified materials, certified voting technology, or electronic data from an election while a contest, criminal investigation, or criminal prosecution related to that election is pending.

5) Requires electronic media that contains election data to be secured during the retention period for that data.

6) Requires the provisions of this bill be construed and applied in a manner that is consistent with the requirements of the California Constitution and the U.S. Constitution.

7) Contains an urgency clause.

Background

Riverside County. In early 2026, a local election watchdog group raised concerns that the number of ballots cast in the November 2025 statewide special election differed from the official total reported by the Riverside County Registrar of Voters (ROV) by nearly 46,000 ballots. Taking these concerns into consideration, the Riverside County Sheriff's Department applied to the Superior Court and

sought a warrant to seize the ballots "in order to prove or disprove any criminal conduct." The court issued a judicial warrant on February 9, 2026.

At a presentation to the Riverside County Board of Supervisors on February 10, 2026, the ROV addressed the alleged discrepancies and disputed the watchdog group's figures. The ROV noted the difference between ballots cast and ballots counted, based on official results, was 103 ballots.

On February 26, 2026, the Sheriff's Department seized about 1,000 boxes of ballots and ballot materials.

The Sheriff's Department also obtained two additional search warrants: one to seize additional election materials (beyond ballots) and another to appoint a special master to oversee the Sheriff Department's counting of ballots.

As this process unfolded, the AG issued multiple letters directing the Riverside County Sheriff to preserve all seized ballots and pause further action. The AG further questioned whether the warrants were supported by probable cause and whether the Riverside County Sheriff's Department presented the magistrate with all the material evidence required by law.

On April 8, 2026, the California Supreme Court ordered the Riverside County Sheriff to halt his investigation into alleged fraud in the November 2025 special election and preserve all seized items. Proceedings remain ongoing, and the California Supreme Court indicated that this matter will be considered on an expedited basis.

Connecting SB 73, AB 1664, and SB 851. SB 73 (Cervantes, Chapter 10, Statutes of 2026), which took effect on May 27, 2026, restricted law enforcement agencies and officers from interfering or engaging in specific conduct related to elections. Among other provisions, the measure required the AG to provide guidance for county election officials and managers of election sites regarding how to respond to requests for access by law enforcement agencies for election-related materials and locations. The bill also prohibited a peace officer from interfering in any manner with the administration of any election in this state, including the seizure of specified voter data and voting technology, unless certain conditions are met.

AB 1664 (Jackson) of 2026 is related to SB 73 and would require a local agency, political subdivision, or elections official to provide notice to the SOS and the AG immediately, but no later than one calendar day, after becoming aware of any

warrant, subpoena, or active law enforcement investigation pertaining to the search, seizure, or retention of any election records or certified voting technology.

Both these bills stem from SB 851 (Cervantes, Chapter 238, Statutes of 2025) which, among other provisions, expanded the prohibition for a person in possession of a firearm or any uniformed peace officer, private guard, or security personnel or any person who is wearing a uniform of a peace officer, guard, or security personnel, to be stationed in the immediate vicinity of, or posted at, a polling location to include an officer or agent of a federal law enforcement agency, unless certain conditions are met. The author sought to "ensure that federal agents are treated the same way as state and local law enforcement so that it is a crime to hire or arrange for law enforcement to be posted at or near a voting location or county registrar's office without authorization."

Comments

1) *Author's Statement.* Democracy in California is under attack, not only by the Trump Administration but also by some officials in our state, including Riverside County Sheriff Chad Bianco. In March, Sheriff Bianco seized more than 600,000 voted ballots from the 2025 statewide special election on Proposition 50 from the Riverside County Registrar of Voters as part of a sham investigation driven by conservative extremist groups. This seizure was in violation of state law, which required that voted ballots remain in the custody of county registrars. In response, SB 73 provided additional guardrails against the seizure of ballots from the custody of county registrars. Then, in April, a group of press organizations including *CalMatters* successfully petitioned a court to unseal the warrants Bianco obtained. They found that, in addition to voted ballots, those warrants authorized the seizure of other election records from the Riverside County Registrar of Voters. This bill is a follow-up to SB 73 that will extend the protections in that bill to other kinds of election records, including voting machines and voting software, and protect the chain of custody of those materials.

Related/Prior Legislation

SB 73 (Cervantes, Chapter 10, Statutes of 2026) restricts law enforcement agencies and officers from engaging in specified conduct related to elections.

SB 259 (Wahab) of 2026 makes it a misdemeanor for any person in charge of a vote by mail ballot to interfere with its delivery to a voter. The bill also makes it a

felony for any person with authority to direct other people under their supervision to interfere in either the delivery or return of a vote by mail ballot.

SB 884 (Umberg) of 2026 extends the time vote by mail drop off locations are open and modifies the type and range of prohibited activities near a polling location for elections held or proclaimed in 2026, 2027, 2028, and 2029.

AB 282 (Pellerin) of 2026 makes it a felony for any person to seize ballots, election records, or voting technology before the certification of an election from the custody of the elections official. The bill also makes it a felony for any person with authority who directs other people under their supervision to seize ballots, election records, or voting technology.

AB 1664 (Jackson) of 2026 requires a local agency, political subdivision, or elections official to provide written notice to the SOS and the AG no later than one calendar day after becoming aware of any warrant, subpoena, or active law enforcement investigation pertaining to the search, seizure, or retention of any election records or certified voting technology.

SB 851 (Cervantes, Chapter 238, Statutes of 2025) among other provisions, required state agencies and local governments to provide written notice to the AG and the SOS within three court days after the agency or jurisdiction files or is served with a court action that contains a claim relating to elections arising under federal law.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Committee on Appropriations:

1) Ongoing cost pressures of an unknown amount, potentially in excess of $150,000, to the courts in additional workload by allowing the AG, SOS, or a county elections official to file a civil action against a person who takes certain elections materials from the custody of an elections official, and by making such an act a felony, for which a defendant is entitled to no-cost legal representation and a jury trial (General Fund (GF) or Trial Court Trust Fund (TCTF)). It is unclear how many actions or prosecutions may commence statewide and how much court time may be needed to resolve each case, but it generally costs approximately $1,000 to operate a courtroom for one hour. Although courts are not funded on the basis of workload, increased pressure on staff and the TCTF may create a demand for increased court funding from the GF. The state budget provides annual

GF backfills to the TCTF to offset revenue reductions, totaling approximately $117.3 million in fiscal year 2025-26.

2) Potential incarceration costs of an unknown amount, likely to the counties instead of the state, to the extent prosecutions of the crime expanded by this bill result in imprisonment (local funds, GF cost pressures). Actual incarceration costs will depend on the number of convictions and the length and location of each county jail sentence. The average annual cost to incarcerate one person in county jail is approximately $29,000, with higher costs in larger counties. Although county incarceration costs are generally not considered reimbursable state mandates pursuant to Proposition 30 (2012), overcrowding in county jails creates GF cost pressures because the state has historically granted new funding to counties to offset overcrowding resulting from 2011 public safety realignment.

3) The SOS and DOJ report no significant costs, indicating that neither entity is likely to pursue the civil action allowed by this bill. However, in light of heightened political distrust and speculation about elections security across the nation and state, it is possible that the SOS or DOJ may undertake such an enforcement measure, with actual costs depending on how often the SOS or DOJ pursue an action and the level of additional staffing needed to handle the related workload.

SUPPORT: (Verified 8/26/26)

Attorney General Rob Bonta (source)

OPPOSITION: (Verified 8/26/26)

None received

ARGUMENTS IN SUPPORT: In a letter sponsoring this bill, Attorney General Rob Bonta states the following:

> [Election] administration increasingly relies on a broader range of records (including electronic records), equipment, and certified voting technologies that may be necessary to investigate allegations of election misconduct, resolve election contests, or preserve evidence during criminal prosecution of an election crime.
> […]

With state and federal law enforcement actors becoming more emboldened to meddle in election administration, [this bill] seeks to protect our most important election materials by keeping them in the custody of elections officials, even when subject to a search warrant.

SUBJECT: Vote by mail ballots and early voting

SOURCE: California Voter Foundation
Protect Democracy United

DIGEST: This bill 1) requires the Secretary of State (SOS) to promulgate regulations establishing uniform procedures for election officials that allow a voter to vote their vote by mail (VBM) ballot at a polling location without the VBM ballot's identification envelope; and 2) requires information to be included in the state voter information guide (VIG) about early in-person voting opportunities.

Assembly Amendments of 6/18/26 make technical and clarifying changes.

ANALYSIS:

Existing law:

1) Requires every active registered voter to receive a VBM ballot for any election. Election officials must begin mailing a VBM ballot no later than 29 days before Election Day.

2) Authorizes any county, pursuant to the Voter's Choice Act (VCA), to conduct elections where polling locations, called vote centers, and a required number of VBM ballot drop-off locations are available prior to and on Election Day.

3) Requires non-VCA counties to provide at least one early voting location on the Saturday before Election Day. Non-VCA counties must also provide a required number of VBM ballot drop-off locations available prior to and on Election Day.

4) Permits a voter to vote their VBM ballot in person, without the identification envelope, if the polling location has real-time access to the county's election management system, verifies the voter has not returned their VBM ballot, and changes the status of the voter to an in-person voter. The voter must provide their name, their address, and sign the roster for the voting location. The county elections official must establish procedures to ensure that a voter who casts a ballot does not submit more than one VBM ballot without the identification envelope, and the precinct board or vote center election board must comply with those procedures.

5) Requires the state VIG to provide voters with information about an upcoming statewide election, such as information regarding each state ballot measure, specified candidate information, and the rights of voters.

This bill:

1) Requires the SOS to promulgate regulations establishing uniform procedures for election officials that allow a voter to vote their VBM ballot in person at a polling location without the VBM ballot's identification envelope. Among other specific procedures, the SOS must also consider different voting technologies and systems used in other counties and consult county election officials and election stakeholders when promulgating these regulations. These regulations must also be posted online.

2) Requires the SOS to include information about early voting opportunities, voting, and casting a VBM ballot in person when preparing voter education and outreach plans and templates for county voter education and outreach plans.

3) Require the state VIG to include information about in-person voting opportunities on the Saturday before Election Day and the process by which a voter may vote their VBM ballot in person at a voting location.

4) Contains an urgency clause to take effect immediately.

Background

Assembly Bill 626 (Pellerin). AB 626 (Pellerin, Chapter 661, Statutes of 2023) responded to the high volume of VBM ballots arriving in the final days before an election and the desire to have faster election results. AB 626 allowed voters to vote using their VBM ballot at a polling location if the poll worker is able to determine the voter has not already submitted a VBM ballot and changes the voter's status from a VBM voter to an in-person voter. If the voter has not already voted, then the voter provides their name and address, signs the roster, and uses their VBM ballot to vote at the polling location.

Placer County, a VCA county, provides this service at all of its vote centers. Known as "Sign, Scan, and Go," the service was offered during the statewide elections in 2024. This process allows voters to have their VBM ballots scanned and counted at vote centers instead of waiting until after the VBM ballot has been processed and counted. This resulted in Placer County lowering its processing time by about three to four days in 2024 compared to previous elections. According to the Placer County Registrar of Voters, elections conducted in 2025 had similar processing times to elections conducted in 2024.

Comments

Author's Statement. Long delays in calling the results of elections in California leave candidates and voters unsure of important outcomes and opens our state up to bad-faith attacks by election deniers. Recent legislation meant to address these delays created several new voting options that will help speed up how long it takes to process ballots. While counties that have already adopted these new methods have shown improvements in post-election processing time, such as with Placer County's adoption of accepting mail-in ballots at physical voting locations, widespread adoption remains slow and fragmented due to counties' elections officials lack of confidence in how to securely and efficiently implement the new methods. By directing the Secretary of State to share information with officials on how to implement these options and promote them through voter education and outreach plans, California can make full use of the voting methods crafted to improve our elections system.

Related/Prior Legislation

AB 626 (Pellerin, Chapter 661, Statutes of 2023) allowed voters to vote their VBM ballot at a polling location if the poll worker has the ability to determine if the voter has already submitted a VBM ballot and changes the voter from a VBM voter to an in-person voter.

SB 1249 (Wilson, Chapter 296, Statutes of 2025) allowed voters to vote their VBM ballot at the county elections office or at a satellite location prior to the close of the polls on Election Day. The bill also required counties who do not conduct their elections pursuant to the VCA to provide at least one early voting location on the Saturday before Election Day.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Committee on Appropriations:

1) One-time costs of approximately $55,000 to the SOS to consult with specified stakeholders and promulgate VBM regulations (General Fund). The SOS notes that the procedures required by this bill are already addressed through existing Elections Code provisions, constitutional ballot secrecy requirements, county election administration practices, and SOS guidance documents, resulting in a "definite redundancy to these regulations." Additionally, minor and absorbable costs to the SOS to post the regulations online and update the VIG.

2) By requiring a county elections official to follow certain in-person VBM procedures, this bill may create a state-mandated local program. If the Commission on State Mandates determines the provisions of this bill create a new program or impose a higher level of service for which the state must reimburse local costs, the county may seek reimbursement from the state (General Fund). However, any such costs would likely be minor and absorbable, as the specified procedures generally follow existing law.

SUBJECT: Political Reform Act of 1974

SOURCE: Author

DIGEST: This bill authorizes the Fair Political Practices Commission (FFPC) to have greater flexibility in classifying nonclerical positions, expands the state offices for which a candidate must file their statement of intention online or electronically with the Secretary of State (SOS) to include judicial offices, and increases the minimum text size of a required statement to 10-point Roman boldface type.

Assembly Amendments removed a provision of this bill that made a technical amendment to the Political Reform Act (PRA) and placed that provision into SB 1175 (Rubio) of 2026.

ANALYSIS:

Existing Law:

1) Prohibits the FPPC from including a nonclerical position in the same class in the civil service classification plan with any position of any other department or agency.

2) Requires, before becoming a candidate for a specific office, an individual to file a statement of intention to be a candidate, signed under penalty of perjury. An individual who intends to be a candidate for elective state office must file the statement of intention online or electronically with the SOS.

3) Requires, specified individuals who have to report activity expenses, when sending any written or printed invitation to an elected state officer, candidate for elective state office, legislative official, or agency official, to include on the invitation or on a letter attached to the invitation a printed or handwritten statement that is at least as large and readable as 8-point Roman boldface type, in a color or print that contrasts with the background so as to be easily legible. The statement shall read:

   "Attendance at this event by a public official will constitute acceptance of a reportable gift."

This bill:

1) Allows the FPPC to include a nonclerical position in a class in the civil service classification plan that is separate and distinct from any other position of any other department or agency.

2) Expands the state offices for which candidates must file their statement of intention online or electronically with the SOS to include judicial offices.

3) Increases the font size on required statements, described in 3) of existing law, to 10-point Roman boldface type.

Background

Political Reform Act. Proposition 9, which appeared on the June 1974 ballot, created the PRA and established California's campaign finance and disclosure laws for state and local campaigns, candidates, officeholders, and ballot measures. Proposition 9 created the FPPC to implement, administer, and enforce the PRA.

Under the PRA individuals who intend to be candidates for elective state office must file a statement of intention, Form 501, online or electronically with the SOS. Under the PRA, an "elective state office" includes office of Governor, Lieutenant Governor, Attorney General, Insurance Commissioner, Controller, SOS, Treasurer, Superintendent of Public Instruction, Member of the Legislature, member elected to the Board of Administration of the Public Employees' Retirement System, member elected to the Teachers' Retirement Board, and member of the State Board of Equalization.

Separately, all candidates, and elected officers and their controlled committees, as specified, must file campaign statements with the SOS.

Comments

Committee Bill. This bill is one of the Senate Committee on Elections and Constitutional Amendments' committee bills. This bill contains changes requested by the FPPC and by committee staff.

Personnel Classification Plan. The California Personnel Classification Plan, which is administered by CALHR and the State Personnel Board, is a framework that groups state civil service positions into classes. The allocation of the position into a class is based on the duties and responsibilities of the position. Positions are included in the same class if the positions are sufficiently similar so the duties and responsibilities can use the same descriptive title, the positions have the same requirements for education, experience, knowledge, and the current position holder has the ability to perform the duties, the positions require the same tests of fitness, and the same schedule of compensation can be made to apply with equity.

According to FPPC staff, current law prevents them from using any statewide classifications for nonclerical positions. The proposed language would give the FPPC the option to use statewide classifications that align with the duties and responsibilities of FPPC specific positions, to support a more efficient hiring process and cost-effective exam administration.

Most of the FPPC's positions can be standardized with other positions in the state classification system, but some specialized positions, such as Political Reform Consultant II, require flexibility allowing the FPPC to mandate knowledge and expertise of the PRA for that position.

Current Form 501. Under the PRA, judicial candidates are not included in the definition of an "elective state officer." Therefore, no statute requires judicial candidates to file their Form 501 with the SOS. Judicial candidates, however, are

required to file campaign reports with the SOS. Currently, judicial candidates already file with the SOS, as the Form 501 mandates every candidate to do so. This bill would make it explicit in statute that judicial candidates must file their Form 501 with the SOS.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Committee on Appropriations:

1) Minor and absorbable costs to the Department of Human Resources, which oversees civil service job classifications.

2) Minor and absorbable costs to the FPPC to conform positions with statewide classifications and update event invitation disclaimer requirements.

3) Minor and absorbable costs to the SOS to continue receiving statements of intention from judicial candidates online or electronically.

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Personal Income Tax Law and Corporation Tax Law: federal conformity

SOURCE: Author

DIGEST: This bill makes technical and conforming changes to several provisions of the Revenue & Taxation Code pertaining to date-change conformity to federal tax law as of specified date, January 1, 2025.

Assembly Amendments (1) Decouple state conformity to Section 1446(f) of the Internal Revenue Code (IRC); and (2) Make other technical changes.

ANALYSIS:

Existing law:

1) Does not automatically conform to changes made by Congress to the IRC except for changes to pension and retirement programs; instead, the Legislature must affirmatively conform state law to federal to ensure consistent treatment for the same items.

2) Conforms to the IRC as of January 1, 2025, with modifications (SB 711, McNerney, Chapter 231, Statutes of 2025).

3) Conforms under the Personal Income Tax (PIT) law to Section 13301(a) of the Tax Cuts and Jobs Act (P.L. 115-97, "TCJA"), which limits the deductibility of interest paid by a trade or business, but explicitly decouples from this change in the Corporation Tax.

4) Does not conform under the Corporation Tax to Section 13301(a).

5) Conforms with modification to IRC 1446, relating to the withholding of tax by a partnership with foreign partners.

6) Contains references to various IRC "deadwood" provisions.

This bill:

1) Provides that for taxable years beginning on or after January 1, 2025, the limit on deductibility for business interest under federal income tax law does not apply for purposes of the PIT Law.

2) Removes references in state law to IRC "deadwood" provisions; and makes several technical amendments.

3) Decouples state conformity to IRC 1446(f), relating to special rules for tax withholdings on dispositions of partnership interests by persons in a partnership with foreign partners.

4) Apply to taxable years beginning on or after January 1, 2025, unless otherwise specified.

Background

SB 711 Clean-up. Between 2015 and 2025, there were more than 1,000 substantive changes to the Internal Revenue Code, for which California had not yet

determined whether the Revenue and Tax Code (RTC) would conform, not conform, or conform with modifications. When the Legislature enacted SB 711, it conformed to the changes for the first time in ten years by updating the "specified date" in RTC Section 17024.5. Advancing the specified date incorporates select changes made to the IRC where the RTC applies by reference. The bill then enacts statutes to either decouple or conform with modifications to specific changes made by Congress to the IRC, where state conformity is not desired. Through this "date-change" process, SB 711 updates the RTC to align with the IRC, thereby reducing differences between a taxpayer's state and federal tax obligations and easing compliance burdens for taxpayers. Examples include the treatment of alimony payments, catch-up IRA contributions, and first-responder retirement and disability payments.

However, SB 711 inadvertently conformed the state PIT law to Section 13301(a) of the TCJA, which limits the deductibility of interest paid by a trade or business. SB 711 explicitly decouples from this change under Section 89 of the Corporation Tax. SB 711's PIT omission was identified past the deadline to amend the measure. SB 711's estimated General Fund revenue gains were approximately $336.4 million in fiscal year 2025-26, $246.7 million in 2026-27, and $172.1 million in 2027-28 *assumed* the decoupling, which, as noted above, was inadvertently not included in SB 711. Additionally, the Franchise Tax Board identified several "deadwood" provisions, and helpful conforming changes have been identified since SB 711's enactment.

Additionally, prior to SB 711, California conformed to the withholding of tax by a partnership with foreign partners under IRC section 1446, as of the "specified date" of January 1, 2015, with modifications for the rates of tax, but did not conform to the federal requirement to withhold 10% of the amount realized on the sale or exchange of a partnership interest unless the transferor certifies that the transferor is not a nonresident alien individual or foreign corporation. SB 711 updated the state's conformity to IRC 1446(f) under RTC 18666 in three ways:

- Amends RTC 18666(a) to make a technical amendment clarifying that IRC 1446, relates to withholding of tax on foreign partners' share of effectively connected income.

- Amends RTC 18666(b)(1) by stating that IRC 17043, in addition to 17041, are applicable to the tax referred to in IRC 1446(b)(2)(A).

- Adds RTC 18666(b)(3) stating that the rate of tax referred to in IRC 1446(f)(1), relating to disposition of partnership interests, shall be the rate

specified in Sections 17041 and 17043, as applicable, rather than the rate specified in IRC 1 or IRC 11, relating to tax imposed.

Following the enactment of SB 711, tax practitioners raised concerns that conformity to IRC 1446(f) was ambiguous and difficult to comply with, including that the federal definition of effectively connected income did not align with the treatment of California-source income. This misalignment makes it difficult for taxpayers to comply with the provisions' withholding requirements. SB 1435 repeals conformity to IRC 1446(f), which only affects the withholding requirement, not the amount of tax due.

History of "date-change" conformity. "Date change" commenced in 1982, when California's income and corporation taxes were not linked to the Internal Revenue Code. In that year, the Legislature made wholesale changes to the RTC, replacing more than 300 stand-alone provisions and linking them to the Internal Revenue Code. For example, instead of California law defining "income" to include wages, salaries, and capital gains, among others, it says, "Section 61 of the Internal Revenue Code, relating to gross income defined, applies except as otherwise provided." These changes significantly reduced the differences between state and federal tax systems, simplifying compliance for taxpayers, practitioners, and tax enforcement agencies. One part of the 1982 changes was to enact a section of law in the RTC that provides that, as of January 1st of a specified year, the IRC applies for California purposes. The Legislature could then enact a bill to update the specified year to incorporate any subsequent changes that Congress made to the IRC, while at the same time providing in the bill the specific changes that they did not want to apply for California purposes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- General Fund revenue loss of approximately $240 million in fiscal year (FY) 2025-26, $550 million in FY 2026-27, $360 million in FY 2027-28, and $370 million in FY 2028-29, related to decoupling from the federal limitation on the business interest expense deduction under PIT Law. However, this bill is a clean-up measure to last year's conformity measure, SB 711 (McNerney), Chapter 231, Statutes of 2025, which was estimated to result in hundreds of millions of dollars of GF revenue gain. As noted in the Assembly Revenue and Taxation Committee's analysis of this bill, the revenue loss attributable to this bill was already accounted for as revenue loss in SB 711, but the actual provision was inadvertently omitted from the

enacted measure. The FTB notes that this bill's other provisions would not impact PIT or Corporation Tax Law revenues.

- Absorbable costs to the FTB to update guidance and other materials and process amended tax returns filed by taxpayers impacted by the limitation on business interest revision.

California Society of Enrolled Agents
California Taxpayers Association

OPPOSITION: (Verified 8/24/26)

None received

ARGUMENTS IN SUPPORT: According to the California Taxpayers Association, "SB 1435… [updates] California tax laws to ensure federal conformity for personal income and corporation taxes. California takes a selective approach to conforming to federal tax changes one provision at a time, allowing lawmakers to evaluate each amendment for its fiscal impact, equity implications, and alignment with the state's economic priorities before deciding whether to adopt it. For the nation's most populous and economically diverse state, this tailored approach preserves the flexibility to support key industries, protect low-income taxpayers, and maintain a stable revenue base rather than importing federal rules that may not suit California's unique housing, labor, and environmental policies and the state's economic growth needs. SB 1435… [ensures] that California safeguards both its budget and its policy goals while giving taxpayers more consistency with federal rules."

ASSEMBLY FLOOR: Passed, 8/24/26

SUBJECT: Qualified ABLE Program

SOURCE: Author & California State Treasurer

DIGEST: This bill revises the definition of "good standing" under the accelerated remittance program exemption and authorizes the California Department of Tax and Fee Administration (CDTFA) to reinstate a revoked exemption; conforms state law to recent changes to IRC 529A pertaining to increased contributions to an Achieving and Better Life Experience (ABLE) account.

Assembly Amendments resolve a conflict with SB 180 (Committee on Budget and Fiscal Review, Chapter 85, Statutes of 2026) to prevent chaptering-out.

ANALYSIS:

Existing law:

1) Imposes the sales tax on every retailer "engaged in business in this state" that sells tangible personal property, and requires them to register with the CDTFA, as well as remit taxes collected from purchasers to CDTFA.

2) Applies the sales tax whenever a retail sale occurs, which is generally any sale other than one for resale in the regular course of business.

3) Provides that unless the purchaser pays the sales tax to the retailer, they are liable for the use tax, which is imposed on any person consuming tangible personal property in the state, and requires the purchaser to remit use tax to CDTFA.

4) Sets the state sales and use tax rate at 7.25% of the sales price of the property sold or used, of which 3.9375% flows to the state General Fund.

5) Requires used-car dealers to generally remit applicable sales or use tax to the Department of Motor Vehicles (DMV) within 30 days of each sale (also known as "the accelerated remittance program") (AB 85, Committee on Budget, Chapter 8, Statutes of 2020).

6) Authorizes CDTFA, in consultation with DMV, to exempt from the accelerated remittance program any used car dealer that sold 1,000 or more vehicles at retail in the previous calendar year or in the current calendar year, provided that the dealer's account is in good standing with CDTFA (SB 132, Committee on Budget & Fiscal Review, Chapter 17, Statutes of 2025).

7) Defines "good standing" as a dealer that has timely:

   a) Filed all required sales and use tax returns for the 12 quarterly reporting periods immediately preceding issuance of the exemption; and

   b) Remitted all payments applicable to those returns, including any required sales and use tax prepayments.

8) Authorizes CDTFA to revoke the exemption after 30 days from the date CDTFA provides notice to the dealer that they are no longer in good standing or when vehicle sales have decreased to below 1,000 in a calendar year.

9) Restricts CDTFA to look only to the 12 quarterly periods immediately preceding issuance of the exemption to determine good standing.

10) Does not authorize CDTFA to reinstate a revoked exemption.

11) Conforms to the federal tax treatment of Internal Revenue Code (IRC) 529, Achieving a Better Life Experience (ABLE) accounts, as of January 1st, 2015 (AB 449, Irwin, Chapter 774, Statutes of 2015; and SB 324, Pavley, Chapter 793, Statutes of 2015).

12) Has conformed to subsequent changes in federal law, including:

    a) Eliminating differences in qualification criteria, increasing contribution limits made by designated beneficiaries to up to the federal poverty level, and allowing taxpayers to roll over IRC 529 plans to ABLE accounts (AB 91, Burke, Chapter 39, Statutes of 2019).

    b) Federal ABLE account definitions (AB 2216, Irwin, Chapter 896, Statutes of 2022).

    c) Increases the age, from 26 to 46, at which an individual's blindness or disability must have begun to qualify for the program (AB 339, Irwin, Chapter 324, Statutes of 2023).

    d) Authorizing tax-free rollovers from "Trump Accounts," established pursuant to IRC 530A, to a beneficiary's ABLE account (SB 180, Committee on Budget and Fiscal Review, Chapter 85, Statutes of 2026).

13) Has a specified date of conformity to the IRC of January 1, 2025.

14) Does not conform to changes to federal law made by Sections 70115(a)(1) and 70115(a)(2) of H.R. 1 (Public Law 119-21, One Big Beautiful Bill Act), pertaining to inflation-indexing contribution limits of ABLE accounts.

This bill:

1) Revises the definition of "good standing" to look at the 12 quarterly reporting periods preceding reinstatement of the dealer's exemption to the accelerated remittance program.

2) Allows CDTFA to reinstate a revoked exemption.

3) Conforms state law to H.R. 1's change to inflation-indexing contribution limits in the Personal Income and Corporation Taxes.

4) Makes conforming changes to a provision in the Welfare and Institutions Code relating to ABLE accounts.

Background

SB 132 clean-up. Under SB 132, once CDTFA grants an exemption, a follow-up good standing determination must still be based on the periods immediately preceding issuance of the exemption. Accordingly, a taxpayer that receives an exemption but later fails to comply with the requirement to timely file and remit all applicable payments may argue that they cannot be subject to revocation because they were in good standing during the period immediately preceding issuance of the exemption. This bill remedies this by revising the definition of "good standing" to mean that the dealer has timely filed and remitted applicable payments, including applicable prepayments, for all required sales and use tax returns for the most recent 12 quarterly reporting periods.

Further, SB 132 did not authorize CDTFA to reinstate a revoked exemption after a dealer returns to good standing or reaches 1,000 or more vehicle sales in a calendar year following the revocation. Since the exemption enhances administrative efficiency and reduces compliance burdens, allowing CDTFA to reinstate a revoked exemption once the conditions for exemption are met should better accomplish the program's intent.

ABLE Account Conformity. For calendar year 2026, federal law authorizes individual contributions up to $20,000 to an ABLE account in the name of a specified beneficiary, and the designated beneficiary may also make a contribution that exceeds that limit, subject to annual inflation indexing. State law does not generally automatically conform to changes in federal tax law. As a result, under current state law, for calendar year 2026, individual contributions would be limited to $19,000, and beneficiaries would not be allowed to make higher contributions. The bill will conform the state personal and corporate income tax laws to H.R. 1's recent changes to contribution limits for ABLE accounts. This bill also makes conforming changes to the Welfare and Institutions Code, removing the sunset date of the higher contribution rule.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- Minor and absorbable costs to CDTFA to reinstate revoked Accelerated Remittance Program exemptions and notify affected licensed dealers.

- General Fund revenue loss of approximately $40,000 in fiscal year (FY) 2026-27, $20,000 in FY 2027-28, and $30,000 in FY 2028-29 by conforming state Personal Income Tax and Corporation Tax Law to recent

federal ABLE Program changes. Additionally, minor and absorbable costs to the Franchise Tax Board to implement conformity provisions.

NO VOTE RECORDED: Arreguín, Caballero, Valladares, Wahab

SUBJECT: Local government: investments and deposits

SOURCE: Author

DIGEST: This bill makes various changes to local government investment laws.

Assembly Amendments of 6/1/26 make technical changes.

ANALYSIS:

Existing law:

1) Limits the percentage that local agencies can invest in many types of investments.

2) Allows local agencies to invest in commercial paper programs offer notes of varying short-term maturities not to exceed 270 days, but typically between one to 90 days. In addition to the maximum maturity of 270 days, state law includes additional safeguards to ensure that commercial paper programs operate effectively. Commercial paper must have the highest ranking or the

highest letter and number rate as provided by a nationally recognized statistical rating organization. Entities issuing commercial paper must either be (1) general corporations with total assets in excess of $500 million and have debt, other than commercial paper, that is rated "A" or equivalent; or (2) special purpose corporations, trusts, or limited liability companies that have program-wide credit enhancements, such as overcollateralization, letters of credit, or surety bonds, and have commercial paper rated "A-1" or higher.

3) Allows local agencies to invest in medium-term notes are securities with a maximum remaining maturity of five years or less. Local agencies may invest up to 30% of their surplus funds in medium term notes, which must be issued by corporations or depository institutions licensed in the United States, with at least an "A" rating. Medium-term investments provide greater liquidity compared to longer-term investments, which may not mature for decades.

This bill:

1) Makes various changes to local government investment laws to recast and reorganize provisions authorizing local agencies to invest their surplus funds, among other changes.

2) Clarifies that cities, counties, and local agencies may purchase commercial paper issued by a federally or state-licensed branch of a foreign bank and a federally or state-chartered bank.

3) Allows local agencies to invest in obligations issued by the Inter-American Development Bank (IDB) Invest, allowing agencies to invest in the full range of issuances offered by the Inter-American Development Bank Group.

4) Allows counties and the City of Los Angeles to accept letters of credit that are drawn on accept letters of credit from a bank's own regional Federal Home Loan Banks (FHLB).

5) Removes the January 1, 2031, sunset date on some of the provisions authorizing additional local agency investments.

Background

Since 1913, state law has authorized local officials to invest a portion of local agencies' temporarily idle funds in a variety of financial instruments. Originally, state law limited the instruments to government bonds, but over time the laws governing local agency investments have been amended to keep pace with changing investment opportunities and current market offerings. California law

allows local officials to deposit money in state or national banks, savings associations, federal associations, credit unions, or federally insured industrial loan companies in the State of California.

When investing, reinvesting, purchasing, acquiring, exchanging, selling, or managing public funds, state law outlines local agencies' investment objectives, also known as the prudent investor standard. The primary objective is to safeguard the principal of the funds under its control. The secondary objective is to meet the liquidity needs of the depositor. The final objective is to achieve a return on the funds under its control.

State law limits the percentage that local agencies can invest in many types of investments. This encourages local agencies to diversify their investment portfolios, which limits the risk to the local agency if any investment does not have the expected return. Local agencies make investments with different maturity dates, which refer to the date when the borrower must make the final payment due on an investment. To limit risk, the Government Code places limitations on the types and terms of investments that local governments can make, including to limit the term to maturity for certain types of investments.

Comments

Purpose of this bill. Local agencies' ability to invest their temporarily idle funds helps local agencies manage their cash flow, maintain liquidity necessary to pay their bills, and make sound investments that provide a return but protect taxpayer funds. Many of the statutes authorizing local agencies to invest their surplus funds have been in place since at least 1949, some were updated in 1995, but many remain untouched. They reflect outdated drafting practices that comingled definitions, powers, and procedures. This can lead to confusion over local government investment powers and procedures and can lead to local agency investment portfolios falling out of compliance, which can put taxpayer dollars at risk. The only substantive policy changes reflected in the measure are also included in the Committee on Local Government's Annual Omnibus bill, SB 1439 of the current legislative session. To the extent both measures move forward, these changes will remain only in SB 1438 to avoid chaptering issues. To avoid confusion associated with provisions having multiple operative dates, the measure also removes a January 1, 2031, sunset on certain local agency investment tools. This measure is not intended to expand, contract, or change investment tools. It is intended to make investment practices clearer so that taxpayer dollars remain protected.

DIGEST: This bill proposes minor changes to state laws governing local governments' powers and duties.

Assembly Amendments make additional minor, noncontroversial changes.

ANALYSIS:

Each year, local officials discover problems with state statutes affecting counties, cities, special districts, and redevelopment agencies, as well as the laws on land use planning and development. These minor problems do not warrant separate (and expensive) bills. According to the Legislative Analyst, the cost of producing a bill in 2001-02 was $17,890.

The Senate Local Government Committee responds by combining several of these minor topics into an annual "omnibus bill." In 2025, for example, the Committee's

omnibus bill was SB 858, which contained seven proposals to change state law, avoiding approximately $108,000 in legislative costs. Although this practice may violate a strict interpretation of the single-subject and germaneness rules as presented in Californians for an *Open Primary v. McPherson* 43 Cal.Rptr.3d 315 (2006), nevertheless it is an expeditious and relatively inexpensive way to respond to multiple requests.

This bill, the "Local Government Omnibus Act of 2026," proposes the following changes to the state laws affecting local agencies' powers and duties:

1) *Joint Powers Agency (JPA) advisory committees*. The Joint Exercise of Powers Act allows two or more public agencies to use their powers in common if they sign a joint powers agreement. Sometimes an agreement creates a new, separate government called a joint powers authority (JPA). State law generally limits membership in JPAs to public agencies: federal, state, and local governments. Federally-recognized Indian tribes may also be members. The joint powers agreement specifies the membership of the JPA's governing body, which must be composed exclusively of officials elected to one or more of the governing bodies of the parties to the agreement. The governing body may delegate its functions to an advisory body or administrative entity for the purposes of program development, policy formulation, or program implementation, as long as the governing body of the JPA approves any annual budget of the agency to which the delegation is made. The Sites JPA notes that the terms regarding this delegation of authority are ambiguous and raise questions regarding what entities may participate in advisory bodies and the scope of activity that the bodies may perform. **SB 1439** provides that an advisory body can include any entity selected by the governing body and add definitions for "policy formulation," "program development," and "program implementation." [See SEC. 2 of the bill.]

2) *Mandate claim submission timeline*. The California Constitution requires the state to reimburse local governments for the costs of new or expanded state mandated local programs. Current law establishes procedures for local governments to make reimbursement claims for mandated costs. After the Commission on State Mandates identifies a state-mandated program from a test claim submitted by a local agency, the Commission adopts parameters and guidelines, defines what activities will be reimbursed, and adopts statewide cost estimates. The State Controller's Office (SCO) receives, reviews, and pays those claims, and issues claiming instructions based on a reasonable methodology provided by the Commission. Currently, a local government may file an annual reimbursement claim by February 15th following the fiscal year in

which costs are incurred. However, if the SCO revises claiming instructions between November 15th and February 15th, claimants have 120 days from the issuance of the revised claiming instructions. The SCO notes that this timeline means that local governments have fewer than 120 days for claims submitted between October 19th and November 15th, but the full 120 days for claims submitted on or after November 15th. **SB 1439** extends the window for submitting claims with the full 120 days to October 19th, so that local governments never have fewer than 120 days to submit a claim. [See SEC. 3.]

3) *Merced County public administrator.* State law establishes various county offices, including the public administrator, who is responsible for administering the estate of a county resident who dies. Public administrators are elected positions, but the Board of Supervisors may put a measure before voters to convert it into an appointed position. County boards can also consolidate the public administrator with the district attorney. Additionally, in 17 counties are authorized under law to appoint a public administrator, and boards in 7 counties can have a joint public guardian, veteran service officer, and public administrator. Finally, 11 counties may separate the public guardian and district attorney offices. In Merced County, the District Attorney serves as the public administrator, with deputy public administrators who handle cases working for the Merced County Behavioral Health and Recovery Services Department. Merced County notes that appointing a public administrator housed with the public conservator/public guardian's office would achieve efficiency by consolidating and aligning the activities with the organization undertaking the work. **SB 1439** allows Merced County to appoint the public administrator, consolidate it with the office of public administrator, veteran service officer, and public guardian, and separate the office of public administrator from the office of district attorney. [See SEC. 4 and 24.]

4) *County clerk gender references*. State law establishes various county offices, including the county clerk. The responsibilities of the county clerk varies from county to county but generally includes maintaining records filed with the clerk, issuing marriage licenses, and acting as the administrative recordkeeper of the board of supervisors. A county clerk must sign and affix a seal to documents when performing their official duties. Senate Local Government Committee staff notes that the county clerk statutes use outdated references to gendered pronouns. **SB 1439** updates the statutes describing the county clerk's duties to use gender-neutral terminology. [See SEC. 5, 6, 7, 8, 9, 10, and 11.]

5) *County recorder notification program.* County recorders are responsible for examining and recording all documents dealing with the ownership of land in

counties. These documents include payments of taxes or fees, filings of fictitious business names, deeds, mortgage documents, easements, power of attorney documents, liens, and any documents that affect the ownership of any given property. Current law requires a county board of supervisors to establish a recorder notification program for the purpose of reducing home title fraud (SB 255, Seyarto, 2025). Under the program, the county recorder must, within 30 days of recordation of a deed, quitclaim deed, mortgage, or deed of trust, notify by mail the parties executing that document. The County Recorders Association of California notes that in cases of fraud, the person executing the document may be someone other than the current owner, resulting in the notification being misdirected to another party. **SB 1439** instead requires notification of the owner of record. [See SEC. 12.]

6) *County recorder archive program fee*. Existing law allows county recorders to charge a filing fee for recording and indexing every instrument, paper, or notice required or permitted by law to be recorded. The board of supervisors of a county may levy a $1 fee for filing every instrument, paper, or notice for record, in order to defray the cost of converting the county recorder's document storage system to micrographics. However, from 2020 to the end of 2025, this fee could be used to fund alternative archiving methods, as determined by the recorder. The County Recorder's Association of California notes that technology has advanced significantly, such that micrographics are no longer the mechanism of choice for maintaining archival documents. The Association also notes that there is only one manufacturer of microfilm, and microfilm printing machines are becoming hard to acquire. **SB 1439** restores the ability of the county recorder to use the existing $1 fee for alternative means of archiving, as determined by the county recorder, restrict the use of the fee to the purposes outlined in the law, and make technical changes. [See SEC. 13.]

7) *Mayor signatures for state funding programs*. Current law requires mayors to sign agreements, warrants, and other instruments, unless the city's legislative body provides by ordinance that these instruments can be signed by an officer other than the mayor. To be valid, ordinances must comply with numerous provisions of law, including requirements that ordinances be introduced and adopted at separate meetings, and that they take effect 30 days after passage, as well as publication and posting requirements. The Department of Housing and Community Development (HCD) notes that these procedures can delay HCD's and city grantees' ability to sign standard agreements and process payments in a timely manner. These requirements can be particularly challenging for smaller cities that have limited capacity, don't meet at frequent intervals, or don't have a full-time legislative body. **SB 1439** allows a city council to adopt a resolution

to allow officers other than the mayor to sign agreements, warrants, and other instruments for the purpose of participating in a state-administered or state-approved funding or regulatory program. [See SEC. 14.]

8) *Local government investments*. State law regulates the investments into which any local agency may place its surplus funds. Current law allows the State Treasurer to accept letters of credit from any of the 11 regional Federal Home Loan Banks (FHLB) to secure state deposits held in banks headquartered outside of California. State law allows counties and the City of Los Angeles to accept letters of credit, but restricts eligible letters of credit to those issued solely by the FHLB of San Francisco. The California Association of County Treasurers and Tax Collectors notes that 57 of California's 58 counties maintain primary banking relationships with large national institutions headquartered outside the San Francisco FHLB district. They note that the current restriction forces these banks into more expensive collateralization methods, ultimately reducing the interest yields available to local agencies. **SB 1439** allows counties and the City of Los Angeles to accept letters of credit that are drawn on accept letters of credit from a bank's own FHLB. **SB 1439** also makes nonsubstantive changes to reorganize the section. [See SEC. 15.]

9) *Surplus Land Act (SLA) large dispositions.* The SLA spells out the steps local agencies must follow when they want to dispose of land. It requires local governments to give a "first right of refusal" to other governments and nonprofit housing developers, and to negotiate in good faith with them to try to come to agreement. The SLA designates certain types of land as "exempt surplus land." Statute provides that the entirety of the SLA does not apply to disposals of exempt surplus land. In 2023, the Legislature revised certain provisions of the SLA to address implementation issues, including to create an exemption for disposition of 10 or more acres of surplus land (SB 747, Caballero and AB 480, Ting) if certain conditions are met, in order to address disposition challenges that are unique to large areas. The Legislature also defined "disposition" of surplus land to include sales or leases with a term of 15 years or greater. Assembly Local Government Committee staff notes that the exemption for 10 or more acres refers to disposition to "buyers," which may unintentionally exclude leases of surplus land from the exemption. **SB 1439** corrects "buyers" to "persons or entities." [See SEC. 16.]

10) *Local agency meetings*. Current law, under the Ralph M. Brown Act (Brown Act), establishes requirements for how local agencies must hold public meetings. Among other provisions, the Brown Act requires meetings of the legislative body of a local agency be open and pubic. SB 707 (Durazo, 2025)

expanded various provisions of the Brown Act in numerous ways. Various parties have noted technical errors in several provisions of SB 707, including:

a) SB 707 allows, until January 1, 2030, "eligible subsidiary bodies" to use teleconferencing without meeting the otherwise applicable teleconferencing requirements, such as participating from a publicly-accessible location, as long as certain conditions are met. One condition includes that the legislative body that established the eligible subsidiary body must make findings every six months to authorize the use of teleconferencing. SB 707 also requires discussion of the recommendations of the subsidiary body at a meeting of the legislative body, which may be consolidated with the meeting at which findings authorizing teleconferencing are adopted. The California State Association of Counties notes the provision that allows the consolidation of the discussion of recommendations with the findings incorrectly states that the findings apply for twelve months, instead of six. **SB 1439** corrects that reference to six months to match the requirement for authorizing teleconferencing. [See SEC. 17.]

b) SB 707 authorizes, until January 1, 2030, members of "eligible multijurisdictional bodies" to teleconference without meeting the requirements otherwise applicable to teleconferenced meetings for a specified number of meetings per year. An eligible multijurisdictional body is defined as a multijurisdictional board, commission, or advisory body of a multijurisdictional, cross-county agency, the membership of which board, commission, or advisory body is appointed, and the board, commission, or advisory body is otherwise subject to this chapter. Some local agency attorneys note that the term cross-county agency could be interpreted to mean either an agency that spans an entire county or an agency that spans multiple counties. **SB 1439** clarifies that a multijurisdictional body is an inter-county or intra-county agency. [See SEC. 18.]

11) *Subdivision map findings internal cross-reference*. Current law, the Subdivision Map Act, regulates how city and county officials approve the conversion of larger parcels into marketable lots. Among other requirements, the Map Act directs a county that approves a subdivision map in the very high fire hazard severity zone or the State Responsibility Area to make findings that the subdivision is consistent with state standards for subdivisions, or locally adopted ordinances, and fire suppression services will be available for the subdivision, as specified. The county must also send these findings to the State Board of Forestry and Fire Protection. However, this requirement does not apply to specified subdivision maps that would subdivide land identified in the

general plan for the managed production of resources that meets specified conditions. Senate Local Government Committee staff note that this section contains an incorrect internal cross-reference within the section. **SB 1439** corrects that cross-reference. [See SEC. 19.]

12) *Imperial LAFCO report on Imperial Valley Healthcare District (IVHD).* Current law creates the IVHD to provide healthcare services across Imperial County, essentially consolidating Pioneers Memorial Healthcare District and Heffernan Memorial Healthcare District (AB 918, Garcia, 2023). That measure required the Imperial County LAFCO to conduct a municipal service review (MSR) of the new district by December 31, 2026. Subsequently, SB 1070 (Padilla, 2024) extended the deadline for Imperial Valley Healthcare District to place a permanent funding mechanism for the new district on the ballot from 2024 to November 2026. The California Association of LAFCOs notes that the delay to November 2026 of the ballot measure for the funding mechanism makes it difficult for the Imperial County LAFCO to prepare an accurate and complete MSR by the end of 2026, as currently required. **SB 1439** delays the MSR requirement by one year, until December 31st, 2027. [See SEC. 20.]

Comments

Purpose of the bill. This bill compiles, into a single bill, noncontroversial statutory changes to six parts of state laws that affect local agencies and land use. Moving a bill through the legislative process costs the state around $18,000. By avoiding five other bills, the Committee's measure avoids approximately $72,000 in legislative costs. Although the practice may violate a strict interpretation of the single-subject and germaneness rules, the Committee insists on a very public review of each item. More than 150 public officials, trade groups, lobbyists, and legislative staffers see each proposal before it goes into the Committee's bill. Should any item in this bill attract opposition, the Committee will delete it. In this transparent process, there is no hidden agenda. If it's not consensus, it's not omnibus.

NO VOTE RECORDED: Alvarado-Gil, Gonzalez, Grove, Niello

ASSEMBLY FLOOR: Passed, 8/26/26

SUBJECT: Elementary and secondary education: omnibus

SOURCE: Author

DIGEST: This bill, the annual K-12 omnibus bill, makes numerous technical, clarifying, conforming, and other non-controversial revisions to a number of provisions related to education throughout statute.

Assembly Amendments add language to avoid chaptering conflicts with AB 2206 (Fong, 2026) and AB 126 (Committee on Budget, 2026).

ANALYSIS:

Existing law:

1) Requires the Superintendent of Public Instruction (SPI) to establish and implement a system of complaint processing, known as the Uniform Complaint Procedures (UCP), for specified educational programs. (Education Code (EC) § 33315)

2) Defines "nonnutritious beverages" to mean any beverage that is not any of the following: drinking water; milk, including, but not limited to, chocolate milk, soy milk, rice milk, almond milk, and other similar dairy or nondairy milk; an electrolyte replacement beverage that contains 42 grams or less of added sweetener per 20 ounce serving; or a 100% fruit juice, or fruit-based drink that is composed of 50% or more fruit juice and that has no added sweeteners. (EC § 35182.5)

3) Defines "nonnutritious food" to mean food that is not sold as part of the school breakfast or lunch program as a full meal, and that meets any of the following standards: more than 35% of its total calories are from fat; more than 10% of its total calories are from saturated fat; more than 35% of its total weight is composed of sugar. (EC § 35182.5)

4) Establishes the California Teacher Commission (CTC) in state government, consisting of 15 voting members, 14 of whom are to be appointed by the Governor with the advice and consent of the Senate. (EC § 44210)

5) Requires the CTC to, among other things, establish professional standards for entry and advancement in the education profession, and establish standards for the issuance and renewal of credentials. (EC § 44225)

6) Requires the CTC to issue district intern credentials authorizing persons employed by a school district that maintains kindergarten and grades 1 to 12, inclusive, or that maintains classes in bilingual education to provide classroom instruction to pupils in those grades and classes, as specified. (EC § 44325)

7) Authorizes persons holding district intern credentials issued by the CTC to teach in grades 9 to 12, inclusive, or in grades 6 to 8, inclusive, in a departmentalized program, or in departmentalized bilingual classes, to teach in the subject area in which they have met the subject matter requirement. (EC § 44326)

8) Authorizes persons holding district intern credentials issued by the CTC to teach in kindergarten and grades 1 to 8, inclusive, in a self-contained program or in self-contained bilingual classes and who have met the subject matter requirement to teach in those grades or classes. (EC § 44326)

9) Authorizes higher education institutions to establish and maintain child development programs on or near their respective campuses. Subjects these higher education institutions under contract with the California Department of Education (CDE) for child care and development services, as specified, to the rules and regulations adopted by the SPI. (EC § 66060)

10) Requires the SPI, in cooperation with higher educational institutions, to establish rules and regulations governing child care and development programs. (EC § 66060)

11) Defines "California State Preschool Program" to mean those programs that offer part-day and/or full-day educational programs for eligible two-, three-, and four-year-old children and those enrolled in kindergarten. These programs may be offered by a public, private, or proprietary agency, and operated in childcare centers or family childcare homes operating through a family childcare home education network. (EC § 8205)

12) Requires the governing board of the district that orders any change or alteration to specified contracts to specify the change or alteration, as well as the cost agreed upon between the governing board and the contractor, in writing. Authorizes the contractor to proceed with the performance of the change or alteration, without the formality of securing bids if the cost agreed upon does not exceed the greater of two specified thresholds. (Public Contracts Code (PCC) § 20118.4)

13) Authorizes the governing board of any school district, or of two or more school districts government by governing boards of identical personnel, having an average daily attendance (ADA) of 400,000 or more as shown by the report of the county superintendent of schools for the preceding year, to authorize any change or alteration of a contract for reconstruction or rehabilitation work, other than for the construction of new buildings or other new structures, if the cost of the change is or alteration in excess of specified limitations but does not exceed 25% of the original contract price, without the formality of securing bids, and the change or alteration is a necessary and an integral part of the work under the contract and the taking of bids would delay the completion of the contract. (PCC § 20118.4)

This bill makes technical, clarifying, conforming, and other non-controversial revisions to several provisions in the Education Code. Specifically, this bill:

1) Strikes references to childcare and developments that are now under the purview of the California Department of Social Services (CDSS) and instead references preschool programs that are under the CDE's purview.

2) Updates and recasts the definitions of "nonnutritious beverages" and "nonnutritious foods" to align with federal requirements for competitive foods and beverages.

3) Removes obsolete references to the state basic skills proficiency test relative to multiple subject, single subject, and education specialist credentials.

4) Aligns the minimum requirements for the special education specialist with that of the multiple and single subject teaching credentials.

5) Clarifies eligibility criteria for early program completion within a district intern program.

6) Aligns the authorizations between district intern programs to ensure consistent assignment flexibility for interns regardless of program type.

7) Updates references to the CSSP and childcare programs at postsecondary education institutions to reflect the distinction between programs administered by the CDE and CDSS.

8) Revises the ADA threshold for school districts to issue change orders for construction contracts from 400,000 to 250,000 to reflect declining enrollment.

9) Incorporates double-jointing language to ensure that the amendments made by both this bill and AB 2206 (Fong, 2026) to Education Code Sections 44252, 44259, and 44325 become operative if both bills are enacted, and this bill is enacted last.

Comment

Purpose of the elementary and secondary education omnibus bill. Each year, there is typically a K-12 education omnibus bill that makes various technical, conforming, clarifying, and non-controversial revisions to the Education Code and other areas of statute related to education. Typically, staff with the Senate and Assembly education policy, fiscal and budget committees (and their minority consultants), the Department of Finance, the CDE, the Legislative Analyst's Office, and other similarly situated state government offices, identify statutes in existing law which need updating or correcting and propose corrections. Customs and practice provide that if offices or entities object to a proposed provision in the

omnibus bill, that particular provision is prohibited from inclusion.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, this bill would have no fiscal effect.

ASSEMBLY FLOOR: Passed, 8/25/26

SUBJECT: Healing arts

SOURCE: Author

DIGEST: This bill makes numerous technical and clarifying statutory updates related to programs within the Department of Consumer Affairs (DCA), and updates the information required from an individual who signs a fictitious business name statement, as specified.

Assembly Amendments make technical changes and address a chaptering conflict.

ANALYSIS:

Existing law:

1) Establishes, until January 1, 2026, the Board of Behavioral Sciences (BBS) to administer the Licensed Marriage and Family Therapist (LMFT) Act, the Licensed Educational Psychologist (LEP) Practice Act, the Licensed Clinical Social Worker (LCSW) Practice Act, and the Licensed Professional Clinical Counselor (LPCC) Act. (Business & Professions Code (BPC) § 4990)

2) Requires a coroner to file a report with the Medical Board of California (MBC), the Osteopathic Medical Board of California (OMBC), the Podiatric Medical Board of California (PBC), or the Physician Assistant Board of California (PAB), when they receive information that is based on the findings reached by a board-certified or board-eligible pathologist indicating that a death may be the result of a physician and surgeon, podiatrist, or physician assistant's gross negligence or incompetence, as specified. (BPC § 802.5)

3) Establishes the Dental Board of California (DBC) to license and regulate dentists; registered dental assistants and registered dental assistants in extended functions (BPC § 1601.1).

4) Authorizes the California State Board of Optometry to charge fees prescribed in connection with the registration of nonresident ophthalmic lens dispensers according to an established schedule. (BPC § 2564.79)

5) Establishes the Contractors State License Board (CSLB) to implement and enforce the License Law, which includes the licensing and regulation of contractors and home improvement salespersons. (BPC) § 7000 et seq.)

6) Requires a qualified manager certificate (for private security services) to be prominently displayed below the branch office license at the principal place of business, and if the principal place of business is outside of this state, then the certificate of the qualified manager must be posted below the branch office certificate at each branch office. (BPC § 7582.22)

7) Provides for the regulation of automotive repair under the Automotive Repair Act, which outlines the licensure requirements, scope of practice, and responsibilities of individuals who, for compensation, engage in the business of repairing or diagnosing malfunctions of motor vehicles. (BPC §§ 9880 *et seq.*)

8) Requires a registrant signature on a fictitious business name statement to declare that all the information in the fictitious business name statement is true and correct, and a registrant who declares the information is true and the registrant knows it to be false is guilty of a misdemeanor, as specified. (BPC § 17913(c))

This bill:

1) Requires a county medical examiner, in addition to a county coroner, to provide a report to the MBC, the OMBC, the PMBC, or the PAB when a death may be the result of gross negligence or incompetence of a respective licensee of that regulatory entity.

2) Repeals outdated references to a portfolio examination that is no longer offered by the DBC.

3) Reduces the application and registration fee by $150 and the renewal fee by $100 for a nonresident ophthalmic lens dispenser applicant.

4) Clarifies the requirement for supervision assessment via two-way video conferencing is only necessary when supervision is conducted via two-way real time video conferencing for gaining experience, as specified, for LPCC, LMFT and LCSW.

5) Defines terms and makes minor and clarifying changes to provisions of law requiring boards within the DCA and the DRE to register applicants who are licensed in another state and have relocated to California because of military orders.

6) Repeals the requirement for the director of the DCA to furnish one copy of the licensing laws and rules and regulations to any applicant or licensee of the Bureau of Security and Investigative Services without charge, and the requirement to charge a fee equivalent to the cost of producing such laws, rules, and regulations, manuals, or guides plus sales tax for any additional copy requested.

7) Deletes an outdated statutory requirement for the CSLB to conduct a study of judgments, arbitration awards, and settlements that were the result of claims for construction defects for rental residential units and submit the results to the

Legislature, as specified.

8) Reduces the number of members on the Construction Management Education Account Advisory Committee from 11 to 10 and updates references to two previously separate entities, Engineering and Utility Contractors Association and the Engineering Contractors Association which is now a single entity, *the Engineering and Utility Contractors Association d.b.a. United Contractors*.

9) Requires the registrant who signs a fictitious business name statement to include the signer's printed name and the title which authorizes them to sign the statement.

10) Makes numerous additional technical, conforming, and clarifying changes.

Background

This bill makes various changes to acts administered and enforced by boards and bureaus under the DCA, for example, updates include the following noted below.

Dental Board of California (DBC). The DBC is responsible for the licensure and regulation of dentists and dental assistants. This bill removes outdated references to the licensure by portfolio pathway which is no longer available.

Reporting Requirements to the Medical Board of California (MBC). Because not every county utilizes the services of a "coroner", this bill includes a "county medical examiner" to make the required reports when they receive information that a death may be the result of a licensee, to the appropriate regulatory board.

Board of Behavioral Sciences (BBS). In 2022, the BBS sponsored AB 1758 (Aguiar-Curry, Chapter 204, Statutes of 2022), which permitted supervision to take place via videoconferencing in all settings, not just in exempt settings. This bill updates current law to clarify that the assessment for the appropriateness of video-conferencing supervision is only necessary if the supervision is conducted via videoconferencing.

Contractors State License Board (CSLB). This bill deletes an obsolete reference to a study conducted by the CSLB. The CSLB is required to establish an advisory committee whose purpose is to recommend grant awards for qualified public postsecondary education institutions. There are currently 11 members on the committee. Two association members have merged into one organization. This bill

reduces the committee membership to 10 and reflects the new name of the merged association.

Bureau of Security and Investigative Services (BSIS). This bill revises current law to clarify that a qualified manager license is to be posted below the private patrol operator's license, which is required to be posted in any principal place of business, including a branch office. Existing law requires the BSIS to furnish copies of licensing laws, rules, and regulations to its licensing population. This bill removes the unnecessary requirement to furnish a hard copy of the rules, regulations, and laws.

Bureau of Household Goods and Services (BHGS). BHGS is responsible for oversight of the Electronic and Appliance Repair Law, the Home Furnishings and Thermal Insulation Act, and the Household Movers Act. This bill replaces additional outdated references to copartnership and replaces them with the correct term, "partnership".

Bureau of Automotive Repair (BAR). The Automotive Repair Act requires that automotive repair dealers provide customers with written estimates that must be authorized by the customer prior to performing any work on the vehicle and invoices for the repairs performed. This bill updates current law to clarify that written estimates may be delivered electronically, as well.

Board of Optometry (BOO). SB 776 (Ashby, Chapter 788, Statutes of 2025) combined the registration and application fee for a non-resident ophthalmic lens dispenser and increased the statutory minimum and maximum fee for that registration. However, when the fees were combined, the established fee floors were inadvertently increased. This bill revises the initial registration fee to be set at $350 (which is the total combined application and registration fee charged prior to SB 776) and reduces the renewal fee to $200.

Veterinary Medical Board. The VMB oversees veterinarians and registered veterinary technicians. This bill repeals obsolete language related to the VMB's registration and oversight of veterinary technicians.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Committee on Appropriations, the bill will not result in costs to the Contractors State License Board, Dental Board of California, State Board of Optometry, Veterinary Medical Board and the Bureau of Household Goods and Services. The bill will result in minor and absorbable costs to the Board

of Behavioral Sciences, Bureau of Automotive Repair and Bureau of Security and Investigative Services and minor and absorbable costs to the DCA Office of Information Services to make changes to the military affidavit and various website updates.

SUBJECT: Health omnibus

SOURCE: Author

DIGEST: This bill makes non-controversial changes to a number of provisions of existing law contained in the Health and Safety Code.

Assembly Amendments:

1) Strike the provision that removes entamoeba histolytica from the list of infectious agents required to report to the person in charge in a retail food facility;

2) Require the California Department of Aging (CDA) and the California Department of Public Health (CDPH) Office of AIDS to meet annually to collaborate on issues of mutual interest, including supporting seniors with chronic care conditions and comorbidities and the impacts of HIV, AIDS, and sexually transmitted infections on the aging population in California; and,

3) Extend the deadline from July 1, 2027, to December 31, 2028, or within one year of official notification by CDPH, for specified entities to collect and report data to CDPH for the California Syndromic Surveillance Program.

ANALYSIS:

Existing law:

1) Establishes the California Retail Food Code (CalCode) to provide for the regulation of retail food facilities. Health and sanitation standards are established at the state level through the CalCode, while enforcement is charged to local agencies, carried out by the 58 county environmental health departments, and four city environmental health departments (Berkeley, Long Beach, Pasadena, and Vernon). [Health and Safety Code [HSC] §113700, et seq.]

2) Requires a person proposing to build or remodel a food facility to submit complete, easily readable plans drawn to scale, and specifications to the enforcement agency for review. Requires plan approval before starting any new construction or remodeling of a facility for use as a retail food facility. Requires limited service charitable feeding operation facilities to be deemed to be in compliance with specified structural requirements, pending replacement or renovation, unless a determination is made by the enforcement agency that the nonconforming structural conditions pose a public health hazard. [HSC §114380]

3) Authorizes CDPH to develop and administer a syndromic surveillance program to collect public health and medical data in near real time to detect and investigate changes in the occurrence of disease in the population, especially as a result of a disease outbreak or other public health emergency, disaster, or special event and to support responses to emerging public health threats and conditions impacting the health of California residents. Authorizes CDPH to designate an existing syndromic surveillance system or create a new system to facilitate the reporting of electronic health data by specified entities. Requires the syndromic surveillance system created or designated by CDPH to, at a

minimum, provide local health departments (LHDs) access to and use of a secure, integrated electronic health system with standardized analytic tools and processes to rapidly collect, evaluate, share, and store syndromic surveillance data. Requires all data collected under the syndromic surveillance program to be confidential. [HSC §131365(a)-(c) and §13180]

4) Authorizes CDPH to modify the list of data elements, electronic transmission standards, data transmission schedule, and instructions pertaining to the program at any time in collaboration with LHDs. Exempts these modifications from specified administrative regulation and rulemaking requirements and requires them to be implemented without being adopted as a regulation. [HSC §131365(d)]

5) Requires specified entities to submit the required data electronically to the syndromic surveillance system in accordance with the schedule, standards, and requirements established by CDPH. Requires reporting entities to submit the required data electronically to an LHD that participates in a syndromic surveillance system or maintains its own system. Requires reporting entities to collect and report data to CDPH or local syndromic system as near as possible to real-time. [HSC §13170(a)]

6) Requires the data elements, electronic transmission standards, data transmission schedule, and instructions for the data collection pursuant to the syndromic surveillance program to include, but not be limited to, any element or requirement adopted for use by the Centers for Disease Control and Prevention's (CDC) Public Health Information Network (PHIN) Messaging Guide for Syndromic Surveillance: Emergency Department, Urgent Care, Inpatient and Ambulatory Care Settings, Release 2.0, or any subsequent versions. [HSC §13170(c)]

7) Requires CDPH to provide each LHD as near as possible to real-time access to its jurisdiction's data entered into the state syndromic surveillance system; and authorizes CDPH, at its discretion, the sharing of data collected with all of the following entities: state governmental entities, LHDs, and specified entities if access is limited to the specified entity's own data. [HSC §13175(a) and (b)]

This bill:

1) Revises the definition of "catering operation" to mean a permanent food facility approved for food preparation where food is served at a location other than its permitted location in specified circumstances.

2) Requires the complete removal of reduced oxygen packaged fish with a label indicating that it is to be kept frozen until time of use from the reduced oxygen environment and package prior to thawing.

3) Defines the terms "egg product," "intact meat," and "mechanically tenderized."

4) Deletes the term "limited service charitable feeding operation facilities" for the purposes of the CalCode and replaces it with the term "existing nonprofit charitable feeding organization facilities whose food service is solely for providing charity."

5) Authorizes CDPH to implement and modify the list of data elements, standards, schedules, and instructions pertaining to the syndromic surveillance program at any time. Requires CDPH to collaborate with LHDs to determine necessary implementations and modifications.

6) Requires that the data elements, standards, schedule, and instructions for data collection to the syndromic surveillance system to include any element or requirement approved by CDPH.

7) Requires entities to report to the syndromic surveillance system no later than December 31, 2028, or within one year of official notification by CDPH. Authorizes entities to decline to report if the LHD's own system has the capacity to transmit data to CDPH in a specified manner by no later than December 31, 2028, or within one year of official notification by CDPH.

8) Requires CDA and the CDPH Office of AIDS to meet annually to collaborate on issues of mutual interest, including supporting seniors with chronic care conditions and comorbities and the impacts of HIV, AIDS, and sexually transmitted infections on the aging population in California.

9) Make other technical, clarifying changes to existing HSC provisions.

Background

According to the author of this bill:

The 2026 Health Committee Bill is an omnibus measure that implements non-controversial, non-substantive changes to various statutes in the HSC. Specifically, these amendments aim to fix a number of typographical errors in the HSC and align definitions throughout the CalCode to reflect those of the U.S. Food and Drug Administration (FDA) Food Code. This bill will also remove a statutory contradiction in the California Syndromic Surveillance Program within the HSC, and provide clarity on CDPH's authority to implement and modify syndromic data elements that healthcare facilities and LHDs are required to submit to CDPH.

Typographical errors. AB 3161 (Bonta, Chapter 757, Statutes of 2024) amended HSC §1279.6 and referred to the incorrect subdivision within the added provisions. Specifically, HSC §1279.6(b)(1)(B) erroneously cross references subdivision (c) rather than subdivision (e). This bill fixes the typographical error.

CalCode. SB 144 (Runner, Chapter 23, Statutes of 2006) repealed the California Uniform Retail Food Facilities Law that provided for the regulation of the health and sanitation standards for retail food facilities at the time, and replaced the law with CalCode to modernize safety standards, incorporate science-based regulations, and align state laws with the FDA Food Code. The CalCode is located in HSC §113700-114437, and contains the structural, equipment, and operational requirements for all California retail food facilities. According to the Food and Drug Branch of CDPH, provisions of the CalCode are primarily enforced by 62 local environmental health regulatory agencies. The Food and Drug Branch plays a supporting role in the enforcement of the CalCode by providing technical expertise to evaluate processes and procedures, as well as to answer technical and legal inquiries for local agencies, industry, and consumers. This bill aligns various definitions and requirements within the CalCode with the most current FDA Food Code.

Structural requirements for charitable feeding organizations. Existing law establishes structural requirements for the building or remodeling (including submission of plans) of retail food facilities, except for schools and churches. Local enforcement agencies have flexibility for plan check requirements for limited service charitable feeding organizations. This flexibility is necessary since most of these charitable organizations are run out of facilities like schools or churches that are not necessarily designed primarily to be food facilities. Since these charitable organizations are only permitted to prepare limited food preparation, local enforcement agencies would be able to allow some structural

requirements necessary in a full-service food facility to be waived without compromising food safety of charitable operations that do not engage in full food preparation. This bill proposes to delete the term, "limited service charitable feeding operation facilities," and instead add, "existing nonprofit charitable feeding organization facilities whose food service is solely for providing charity," to ensure that programs that conduct full meal preparation are captured within the list of entities given flexibility for plan check requirements, as originally intended.

California Syndromic Surveillance. According to the CDC, the National Syndromic Surveillance Program (NSSP) provides public health officials with a timely system for detecting, understanding, and monitoring health threats. NSSP tracks symptoms of patients in Emergency Departments (EDs) and other settings – before and after a diagnosis is confirmed, all in near real-time. This data tracking can help detect unusual levels of illness to determine whether a response is needed, and can monitor disease trends across the nation. Syndromic data serves as an early warning system to protect Americans from respiratory viruses, environmental threats, avoidable injuries, emerging diseases, and more. NSSP unites federal partners, local and state health departments, and academic and private sector partners. NSSP provides the infrastructure for data sharing and improves the nation's responsiveness to health threats.

The Office of Infectious Disease Preparedness and Response in CDPH's Center for Infectious Diseases is working towards establishing a coordinated, centralized statewide syndromic surveillance program, known as the California Syndromic Surveillance (CalSyS), with standardized data across the state using the NSSP BioSense Platform. As of 2024, HSC §131360-131380 authorizes the implementation of the statewide CalSyS program and grants CDPH legal authority to collect and require syndromic data submissions from hospitals with EDs. This bill removes existing statutory contradictions in the California Syndromic Surveillance Program, as well as extend the current deadline from July 1, 2027, to December 31, 2028, or within one year of official notification by CDPH, for specified entities to collect and report data to CDPH for the California Syndromic Surveillance Program.

Impacts of HIV, AIDS, and sexually transmitted infections on older adults. The Centers for Disease Control and Prevention (CDC) states that, as of 2022, approximately 42% of those living with diagnosed HIV in the United States were aged 55 and older. Despite the sizeable population of older adults with HIV, according to the National HIV Curriculum, an AIDS Education and Training Center Program led by the University of Washington, the impact of HIV on the aging process is not entirely clear. Additionally, multiple factors can complicate

HIV treatment for older adults, including additional conditions such as heart disease or cancer; increased frequency of side effects; increased risk of drug interactions between HIV medications and medications for other conditions; and cognitive impairment, which makes it more difficult to stick to an HIV treatment regimen. This bill requires CDA and the CDPH Office of AIDS to collaborate on issues regarding supporting seniors with chronic care conditions and comorbities and the impacts of HIV, AIDS, and sexually transmitted infections on the aging population in California.

Related/Prior Legislation

SB 862 (Committee on Health, Chapter 243, Statutes of 2025), among other provisions, made technical amendments related to CalSyS.

SB 159 (Committee on Budget and Fiscal Review, Chapter 40, Statutes of 2024) authorized CDPH to either designate an existing system or to create a new system for syndromic surveillance.

AB 831 (Committee on Health, Chapter 155, Statutes of 2021) requires limited service charitable feeding operation facilities to be deemed to be in compliance with specified structural requirements, pending replacement or renovation, unless a determination is made by the enforcement agency that the nonconforming structural conditions pose a public health hazard, for the purposes of the CalCode, among other provisions.

AB 1252 (Committee on Health, Chapter 556, Statutes of 2013) and SB 241 (Runner, Chapter 571, Statutes of 2009) amended various provisions within the CalCode.

SB 144 (Runner, Chapter 23, Statutes of 2006) created CalCode.

Bill No: SCR 145
Author: Weber Pierson (D)
Introduced: 3/11/26
Vote: 21

SUBJECT: Mental Health Peer Appreciation Week

SOURCE: Author

DIGEST: This resolution recognizes the 3rd week of May 2026 as Mental Health Peer Appreciation Week in California.

ANALYSIS: This resolution makes the following legislative findings:

1) Peers, who are individuals with lived experiences of mental health or substance uses challenges, have unique perspectives on navigating the public behavioral health care system and can encourage, engage, and support other peers on their journey to recovery, health, and wellness.

2) Peers can provide voluntary support services that are cost-effective and Medi-Cal billable in a variety of settings that can help reduce and prevent incarceration, hospitalization, and institutionalization while uplifting people's health care autonomy.

3) Peer support is an evidence-based practice that is integrated into the delivery of mental health services provided by counties, including Assertive Community Treatment, Forensic Assertive Community Treatment, Coordinated Specialty Care for First Episode Psychosis, and Individual Placement and Support Supported Employment.

4) Peer services help reduce health disparities in underserved communities by empowering peers to work in the behavioral health industry, creating a workforce that is reflective of a community's diversity and health needs.

This resolution recognizes the third week of May 2026, during National Mental Health Awareness Month, as Mental Health Peer Appreciation Week in California.

SUBJECT: County Welfare Directors Association of California's Centennial Anniversary

SOURCE: Author

DIGEST: This resolution honors the California Welfare Directors Association for its Centennial Anniversary.

ANALYSIS: This resolution makes the following legislative findings:

1) The County Welfare Directors Association, known as CWDA, has, for 100 years, represented county human services agencies throughout California. CWDA has worked at the local, state, and federal level advocating for the social safety net and the Californians served by its programs.

2) In 2010, CWDA cosponsored legislation that expanded foster care from 18 years of age to 21 years of age so that young adults in the foster care system would have access to housing, education, and employment supports to improve their outcomes as they moved into adulthood.

3) CWDA played an integral role in implementing the federal Affordable Care Act in 2013, and ensured that millions of new clients could enroll and access health care through the state Medi-Cal program.

This resolution honors the California Welfare Directors Association for its Centennial Anniversary.

SUBJECT: California Wildlife Day

SOURCE: KFI AM640

DIGEST: This resolution proclaims September 4, 2026, to be California Wildlife Day in remembrance of Jackie the bald eagle, and that the Senate encourages Californians across the state to celebrate in her memory and in recognition of the importance of protecting California's extraordinary wildlife for generations to come.

ANALYSIS: This resolution makes the following legislative findings:

1) California is one of the most ecologically diverse states in the nation and boasts the greatest diversity in climate, terrain, and geology of the contiguous United States, all of which provide the wide range of habitats that support what may be the most diverse selection of fauna in the country.

2) National Wildlife Day was first celebrated in September 2005 serves as an opportunity to raise awareness and encourage conservation of different animal species around the world.

3) In 2015, Friends of Big Bear Valley installed a webcam in a bald eagle nest, through which the public got their first glimpse of a female bald eagle named Jackie, who became an internet sensation as millions of viewers watched Jackie find a mate, lay eggs, protect her family, nurture her children, and successfully raise several eaglets over the last eight years, including eaglets Sandy and Luna, who fledged just this summer.

4) Earlier this July, after successfully raising her final two eaglets, Jackie was seriously injured, and despite the best efforts of the Ojai Raptor Center, ultimately passed away on August 10. During her life, Jackie touched the hearts

of people around the world as a fierce symbol of strength, freedom, motherhood, and the wild.

5) As the United States celebrated its 250th anniversary in 2026, the bald eagle carries a particularly meaningful place in the American story as our nation's enduring symbol of freedom, strength, and resilience. Jackie's life and legacy offer Californians an opportunity to reflect on those ideals while celebrating our responsibility to protect the wildlife and natural heritage entrusted to us.

This resolution proclaims September 4, 2026, to be California Wildlife Day in remembrance of Jackie the bald eagle, and that the Senate encourages Californians across the state to celebrate in her memory and in recognition of the importance of protecting California's extraordinary wildlife for generations to come.

SUBJECT: Injuries to children: civil penalties

SOURCE: Author

DIGEST: This bill, until January 1, 2035, increases the penalties that can be sought against a social media platform, as defined, if the platform fails to exercise ordinary care or skill and injures a child.

ANALYSIS:

Existing federal law:

1) Provides, in federal law, that a provider or user of an interactive computer service shall not be treated as the publisher or speaker of any information

provided by another information content provider. (47 United States Code (U.S.C.) § 230(c)(1).)

2) Provides that a provider or user of an interactive computer service shall not be held liable on account of:

   a) any action voluntarily taken in good faith to restrict access to or availability of material that the provider or user considers to be obscene, lewd, lascivious, filthy, excessively violent, harassing, or otherwise objectionable, whether or not such material is constitutionally protected; or

   b) any action taken to enable or make available to information content providers or others the technical means to restrict access to such material. (47 U.S.C. § 230(c)(2).)

Existing state law:

1) Provides that every person is responsible, not only for the result of their willful acts, but also for an injury occasioned to another by the person's want of ordinary care or skill in the management of their property or person, except so far as the latter has, willfully or by want of ordinary care, brought the injury upon themselves. (Civ. Code § 1714(a) ("Section 1714(a)").)

2) Defines "social media platform" as a public or semipublic internet-based service or application that has users in California and that meets both of the following criteria:

   a) A substantial function of the service or application is to connect users in order to allow users to interact socially with each other within the service or application. A service or application that provides email or direct messaging services shall not be considered to meet this criterion on the basis of that function alone.
   b) The service or application allows users to do all of the following:
      i. Construct a public or semipublic profile for purposes of signing into and using the service or application.
      ii. Populate a list of other users with whom an individual shares a social connection within the system.
      iii. Create or post content viewable by other users, including, but not limited to, on message boards, in chat rooms, or through a landing page or main feed that presents the user with content generated by other users. (Bus. & Prof. Code § 22675(e).)

This bill:

1) Provides that a social media platform that violates Section 1714(a) by causing injury to a child shall, in addition to any other remedy, be liable for statutory damages for the larger of the following:

    a) $5,000 per violation up to a maximum, per child, of $1,000,000.
    b) Three times the amount of the child's actual damages.

2) Aligns the definition of "social media platform" with that in Section 22675 of the Business and Professions Code, and limits application of this bill to those platforms that generate more than $100 million per year in gross revenues.

3) Provides that the duties, remedies, and obligations it imposes are cumulative to the duties, remedies, or obligations imposed under other law and shall not be construed to relieve a social media platform from any duties, remedies, or obligations imposed under any other law.

4) Provides that the above provisions shall remain in effect only until January 1, 2035, and will be repealed on that date.

5) Includes a severability clause and applies prospectively.

6) Provides that any attempted waiver is void and unenforceable.

7) States specified findings and declarations.

Background

Today, over 70% of adults use at least one social media platform. Facebook alone is used by 69% of adults, and 70% of those adults say they use the platform on a daily basis. However, this explosion is not limited to adults. Survey data found that overall screen use among teens and tweens increased by 17% from 2019 to 2021, with the number of hours spent online spiking sharply during the pandemic. A recent survey found almost 40% of tweens stated that they use social media and estimates from 2018 put the number of teens on the sites at over 70 percent. Given the reach of social media and the increasing role they play in many children's lives, concerns have arisen over the connection between social media usage and mental health, drug use, and other self-harming conduct.

This bill seeks to address these issues by simply enhancing the remedies that can be sought against a social media platform that breaches its existing duty of ordinary care and skill to a child. Based on existing causes of action under

negligence law, this bill provides for statutory damages of $5,000 to $1 million per violation or three times the amount of the child's actual damages, whichever is larger. Lastly, this bill provides that its provisions shall only remain in effect until January 1, 2035.

This bill is supported by various groups, including the Los Angeles County Office of Education and Common Sense Media. It is opposed by a number of industry associations, including Technet and the Computer and Communications Industry Association. For a more thorough analysis, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis.

Comments

Research has shown that amongst American teenagers, YouTube, Instagram, and Snapchat are the most popular social media sites, and 45% of teenagers stated that they are "online almost constantly."[1] A meta-analysis of research on social networking site (SNS) use concluded the studies supported an association between problematic SNS use and psychiatric disorder symptoms, particularly in adolescents.[2] The study found most associations were with depression and anxiety.

There are various features of social media that are believed to contribute to excessive social media use and preoccupation and attendant mental health issues in children and that are repeatedly highlighted as the most problematic for users, especially children. They are pinpointed by academic research,[3] and lawsuits brought by most states' Attorneys General,[4] as the core of the problem. These include the display of "likes" and other feedback on posted media that drive minors' unhealthy comparisons to others and their obsessive usage.

In addition, the constant notifications that are sent to users nudge them back onto a platform throughout the day and night to seek the next hit of dopamine. The biggest and most central of them all is the algorithmic feeds that are fueled by a user's own information and inferences drawn from their past behavior and data

collected from other sources. While these features can effectively serve up content curated for a user's personal tastes and create social connections among users, it is these types of features that are most concerning to advocates for reform.

Existing negligence law imposes a responsibility on everyone, including social media platforms, for injuries occasioned to others by their want of ordinary care or skill in the management of their property or person. This bill does not alter any existing duty. Rather, it seeks to acknowledge the unique impacts that social media platforms are shown to have on a particularly vulnerable population, California's children.

The bill does this by increasing the remedies that children may seek when social media platforms break this existing duty to refrain from causing them injury. The bill provides for statutory damages from $5,000 to $1 million per violation, per child or three times the child's actual damages, whichever is more.

According to the author:

> AB 2 amends Section 1714 of the Civil Code by adding statutory damages against platforms that are found in court to be liable under current law for negligently causing harm to children under the age of 18. Under the bill, if a company is proven to have failed to exercise its already established duty of operating with ordinary care, the company becomes financially liable for a set amount of $5,000 per violation, up to a maximum penalty of $1 million per child, or three times the amount of the child's actual damages, whichever is applicable. This financial liability aims to incentivize platforms who count their profits in the tens of billions to proactively safeguard children against potential harm by changing how they operate their platforms.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Senate Appropriations Committee:

Unknown, potentially significant court cost pressure if the Attorney General (AG) brings civil actions for violations against any person who engages in a deceptive act or practice. Actual costs will depend on the number of actions filed and the amount of time needed to adjudicate each case.

Unknown, likely significant court cost pressure as the UCL permits private plaintiffs to bring a cause of action. Although courts are not funded based on workload, increased pressure on the Trial Court Trust Fund may create a demand for increased funding for courts. The proposed FY 2026-07 Governor's budget

would provide $70 million General Fund support (Trial Court Trust Fund, General Fund).

OPPOSITION: (Verified 8/13/26)

California Chamber of Commerce
Chamber of Progress
Civil Justice Association of California
Computer and Communications Industry Association
Electronic Frontier Foundation
Technet

ARGUMENTS IN SUPPORT: A coalition of organizations, including Common Sense Media, writes in support:

> This bill establishes statutory damages under California's existing negligence law for harms to minors related to social media that can be proven in court. That is the only change to California law that this bill makes. These financial penalties are needed and intended to motivate large social media companies to do what they currently refuse to do - ensure that the way they design and operate their platforms does not

injure young users. There is mounting evidence, including from internal company communications, that social media platforms contribute to our youth mental health crisis and to other direct harms to kids and teens, including accessing fentanyl and other illegal drugs.

As the use of social media continues to climb among children and adolescents, so too does the urgency for legislative action. AB 2 offers a path to mitigate the risks faced by our youth in an increasingly connected world, ensuring that social media companies operate with the due care our children deserve.

ARGUMENTS IN OPPOSITION: A group of industry associations, including Technet, write in opposition:

Section 230 of the Communications Decency Act (47 U.S.C. §230) generally protects platforms from liability for content that users generate with limited exceptions. This protection enables platforms to host third party content and moderate third-party content on their platforms without fear of liability.

Without the protections of Section 230, the internet ecosystem would be dramatically different with a limited ability for users to post, share, read, view, and discover the content of others.

Fortunately, Section 230 explicitly preempts state laws such as AB 2 that would conflict with this protection. This bill creates liability for platforms based on third party content by applying to any feature that allows users to encounter content. It effectively assumes that all features are harmful and imposes liability on a site for offering any of those features to children. Platforms' algorithms and features that allow users to encounter or share content from other users are inextricably linked to the underlying content. Therefore, by imposing liability on platforms for these features, AB 2 conflicts with Section 230 and is likely preempted.

SUBJECT: Access to Safe Abortion Care Act

SOURCE: All Above All
Attorney General Rob Bonta
Black Women for Wellness Action Project
California Commission on Status of Women and Girls
California Latinas for Reproductive Justice
Essential Health Access
National Health Law Program
Planned Parenthood Affiliates of California
Reproductive Freedom for All California

DIGEST: This bill prohibits a manufacturer, distributor, authorized health care provider, pharmacist, or individual from being subject to civil or criminal liability, or professional disciplinary action, for accessing, mailing, shipping, receiving,

transporting, distributing, dispensing, or administering brand name or generic mifepristone or any drug used for medication abortion that is lawful under the laws of the state after January 1, 2020.

ANALYSIS:

Existing law:

1) Establishes the Reproductive Privacy Act (RPA), which prohibits the state from denying or interfering with a woman's right to choose or obtain an abortion prior to viability of the fetus, or when the abortion is necessary to protect the life or health of the woman. [Health and Safety Code (HSC) §123460, et seq.]

2) Prohibits a person who aids or assists a pregnant person in exercising their rights under RPA from being subject to civil or criminal liability or penalty, or otherwise being deprived of their rights, based solely on their actions to aid or assist a pregnant person in exercising their rights under RPA with the pregnant person's voluntary consent. [HSC §123467]

3) Provides that a law of another state that authorizes a person to bring a civil action against a person or entity who does any of the following is contrary to the public policy of this state: receives or seeks an abortion; performs or induces an abortion; knowingly engages in conduct that aids or abets the performance or inducement of an abortion; or, attempts or intends to engage in the aforementioned conduct. [HSC §123467.5]

This bill:

1) Prohibits a manufacturer, distributor, authorized health care provider, pharmacist, or individual from being subject to civil or criminal liability, or professional disciplinary action, for accessing, mailing, shipping, receiving, transporting, distributing, dispensing, or administering mifepristone or misoprostol after January 1, 2020, in accordance with state laws, applicable and accepted standards of care, and good faith compliance with this bill. Requires this bill to be applied retroactively to January 1, 2020.

2) States that, consistent with the public policy and constitutional guarantees of California, and to avoid any confusion or misinformation on the matter, the Legislature reaffirms that it has been, and shall continue to be, lawful to cause the delivery of, or mail, ship, take, receive, or otherwise transport, into California from out of state or within the boundaries of California, any drug,

medicine, or instrument that can be designed or adapted to produce an abortion that is lawful in the State of California.

3) Makes this bill's provisions severable: if any provision or its application is held invalid, that invalidity is prohibited from affecting other provisions or applications that can be given effect without the invalid provision or application.

Comments

According to the author of this bill:

> In 2022, California voters overwhelmingly passed Proposition 1 to enshrine the right to abortion in our state's constitution. As California remains a national leader in protecting reproductive rights, attacks on bodily autonomy continue throughout the country. Californians are not on an island, our patients and healthcare providers could be harmed by hostile actions from the federal government and other states. As former Chief Legal Counsel to Planned Parenthood, I fought federal efforts to eliminate access to reproductive care in the first Trump Administration. It is essential to ensure that the supply chain process from manufacturing, to distribution of medication abortion to a patient is protected in California. This bill shields manufacturers, distributers, and health care providers from liability for providing medication abortion to Californians.

Background

Abortion. According to the Center for Diseases Control and Prevention (CDC), a legal induced abortion is defined as an intervention performed by a licensed clinician that is intended to terminate an ongoing pregnancy. Ending a pregnancy with medications is an option for women who are less than ten weeks pregnant and would like to have an abortion at home with a less invasive procedure. The CDC reports that 613,383 abortions were reported nationally from 48 reporting areas in 2022. From 2021 to 2022, the total number of abortions decreased 2%, and the number decreased 5% between 2013 and 2022. In 2022, women in their 20s accounted for more than half of abortions (56.5%). By contrast, adolescents under 15 years (0.2%) and women over 40 (3.6%) years accounted for the lowest percentages of abortions. In 2022, nearly all abortions (92.8%) were performed at or less than 13 weeks gestation. That year, the highest proportion of abortions were performed by early medication abortion at or less than nine weeks' gestation (53.3%), followed by surgical abortion at or less than 13 weeks gestation (35.5%), surgical abortion at more than 13 weeks gestation (6.9%), and medication abortion

at more than nine weeks gestation (4.3%). In 2021, the most recent year for which data was reviewed for pregnancy-related deaths, five women died as a result of complications from legal induced abortion.

California data. According to the Guttmacher Institute, 182,170 abortions were provided by clinicians in California in 2024, though not all those abortions were provided to state residents. In January 2025, there were an estimated 17,020 clinician-provided abortions, and that number was consistent with the previous six-month period (average of 15,000 abortions per month). Data for 2023, the first full year after the U.S. Supreme Court overturned *Roe v. Wade*, show that an estimated total of 179,120 clinician-provided abortions took place in California (an increase of 1.7%).

Medication abortion. According to a March 2024 Kaiser Family Foundation factsheet, medication abortion is a pregnancy termination protocol that involves taking two different drugs approved for use up to the first 10 weeks of pregnancy by the U.S. Food and Drug Administration (FDA). The World Health Organization has authorized use up to 12 weeks of pregnancy. Since the FDA first approved the drug in 2000, its use in the U.S. has grown. In 2023, 63% of abortions in the U.S. were medication abortions. The most common medication abortion regimen involves the use of two different medications: mifepristone and misoprostol. Mifepristone, also known as the abortion pill or RU-486, is sold under the brand name Mifeprex and through a generic manufactured by GenBioPro. Mifepristone works by blocking progesterone, a hormone essential to the development of a pregnancy, and prevents an existing pregnancy from progressing. Misoprostol, taken 24 to 48 hours after mifepristone, works to empty the uterus by causing cramping and bleeding, similar to an early miscarriage. A follow-up visit can be scheduled a week or two later to confirm that the pregnancy was terminated via ultrasound or blood test. The FDA has found that medication abortion is a safe and highly effective method of pregnancy termination. Medication abortion successfully terminates the pregnancy 99.6% of the time, with a 0.4% risk of major complications, and a mortality rate of 0.00064%. Telehealth can be used to expand access to abortion services in areas where the number of clinicians who provide that care is limited. Many patients, particularly those who live in rural communities, must travel long distances to obtain abortion services even in states where abortion is still permitted. Because the updated FDA label now allows for telehealth, mifepristone has emerged as an option for patients who are either unable to travel to clinic or for other reasons wish to have an abortion in the privacy of their own home. As part of efforts to limit abortion access, some states have taken action to block the use of telehealth for abortion. Among the states that

have not banned abortion, 13 states have at least one restriction that requires at least one trip to the clinic, and effectively ban telehealth for medication abortion.

Post-Dobbs v. Jackson Women's Health Organization (2022). According to the Guttmacher Institute website (and as of June 11, 2025), since the Supreme Court overturned *Roe v. Wade*, 13 states are enforcing a near-total ban on abortion with very limited exceptions (Alabama, Arkansas, Idaho, Indiana, Kentucky, Louisiana, Mississippi, Missouri, Oklahoma, South Dakota, Tennessee, Texas, and West Virginia). In other states, less restrictive rules are in place and include: abortion being banned after six weeks (Florida, Georgia, Iowa, and South Carolina); a 12-week ban (Nebraska and North Carolina); and, an 18-23 week ban (Kansas, Ohio, Utah, and Wisconsin). In Arizona, Florida, Oklahoma, and Texas mailing abortion pills is also banned. In Louisiana, medication abortion can only be provided after in-person visit because state requires pills to be dispensed in person.

According to a February 16, 2023 story in the *New York Times*, one commonality among many of the bans is that enforcement is enhanced through the targeting of medical providers. For example, in Texas it is a felony to perform an abortion, unless it is needed to save the life of the patient, and provides for civil liability and licensure revocation. The Texas law also provides that any person, other than an officer or employee of a state or local governmental entity in Texas, and regardless if they suffered any actual harm, may bring a civil action to enforce its provisions, which includes liability of $10,000 plus costs and fees if a plaintiff prevails while a defendant is prohibited from recovering their own costs and fees if they prevail. Idaho enacted a similar law, which provides for liability of $20,000 plus costs and fees if a plaintiff prevails. Oklahoma also enacted a similar law to Texas' and enacted criminal penalties for the performance of an abortion, except when performed to save the life of a pregnant person, with punishment of up to ten years in prison or fines of up to $100,000.

In January 2025, a New York physician was indicted in Louisiana for providing medication abortion across state lines. According to a March 19, 2025 NPR report, Dr. Margaret Carpenter was charged alongside a Louisiana mother who allegedly received the mailed package and gave the pills prescribed by Carpenter to her minor daughter. The teen wanted to keep the pregnancy and called 911 after taking the pills, according to an NPR interview with the Louisiana district attorney prosecuting the case. The charges carry a possible five-year prison sentence. On February 11, Louisiana's governor signed an extradition warrant for Carpenter. He later posted a video arguing she "must face extradition to Louisiana, where she can stand trial and justice will be served." New York's governor countered by releasing

her own video, confirming she was refusing to extradite Carpenter. According to a March 27, 2025 AP story, in a separate case involving Dr. Carpenter, a Texas judge ordered her to pay a penalty for allegedly breaking that state's law by prescribing abortion medication via telemedicine. The Texas attorney general's office followed up by asking a New York court to enforce the default civil judgment, which is $113,000 with attorney and filing fees. The acting Ulster County clerk refused, stating, “In accordance with the New York State Shield Law, I have refused this filing and will refuse any similar filings that may come to our office.” According to the March 2025 NPR report, eight states (New York, Maine, California, Colorado, Massachusetts, Rhode Island, Vermont, and Washington) have passed laws since 2022 to protect doctors who mail abortion pills out of state, and thereby block them from extradition in such cases. But the Louisiana case is the first criminal test of these relatively new "shield laws."

ARGUMENTS IN SUPPORT: The sponsors of this bill write that with over 20 years of available data, medication abortion has proven to be remarkably safe and effective. It plays an important role in reducing barriers and promoting equitable access to healthcare, particularly for those who live in rural and underserved communities. This bill will preserve the constitutional and statutory right to choose and obtain abortions in the state of California by ensuring there is sufficient access to medication abortion and the ability to facilitate access. Additionally, this bill shields manufacturers, distributors, authorized health care providers, or individuals from civil or criminal liability or professional disciplinary action, for accessing, mailing, shipping, receiving, transporting, distributing, or administering medication abortion in accordance with the law of this state, applicable and accepted standards of care, and good faith compliance. Sponsors further state that providers and researchers estimate that over 60% of all abortions in the U.S. are done using medication abortion. With over twenty years of available data, medication abortion has proven to be remarkably safe and effective. Medication abortion has only a 0.4% risk of major complications, and a mortality rate of only .00064%. To put these figures in perspective, this is lower than the mortality rate associated with Viagra, which carries a .0049% mortality rate. Using medication abortion is also far safer than carrying a pregnancy to term, as the U.S. has an overall maternal mortality rate of .0329%. Medication abortion allows people to get reproductive care as early as possible when it is safest, least expensive, and least invasive. It plays an important role in reducing barriers and promoting equitable access to healthcare, particularly for those who live in rural and underserved communities.

ARGUMENTS IN OPPOSITION: California Family Council writes that this bill is working off of the pretense that Mifepristone is "safe and effective", yet the Ethics and Public Policy Center (EPPC) reports that 11% of women experience Serious Adverse Events within 45 days, 22 times higher than the drug label's

claim. This includes 3,062 ectopic pregnancies, 11,707 infections, 24,563 repeated surgical abortions, and 28,658 hemorrhages, alongside 1,445 FDA-reported adverse events. Reducing oversight in the face of such data is reckless, not compassionate. Pacific Justice Institute – Center for Public Policy states that this bill's expansion of legal protections for mailing and distributing abortion drugs would likely increase their use through channels like telehealth and pharmacies, further reducing critical medical oversight. The FDA has already weakened safety protocols by eliminating requirements for in-person physician visits, mandatory adverse event reporting, and limiting prescriptions to physicians. These changes have coincided with higher complication rates, as the EPPC study confirms. By facilitating broader distribution, this bill risks exacerbating these harms, leaving women vulnerable to severe complications like hemorrhaging or incomplete abortions, which often require urgent surgical intervention.

SUBJECT: FAIR Plan policy notices and renewals

SOURCE: Author

DIGEST: This bill enacts various provisions to assist California Fair Access to Insurance Requirements Plan Association (FAIR Plan) policyholders in securing coverage outside of the FAIR Plan. These provisions include providing policyholder information to interested insurers and agents or brokers of record simultaneously, while also making policyholders aware of additional coverage options.

Senate Floor Amendments of 8/17/26 address chaptering concerns, add coauthors and make minor technical changes.

ANALYSIS:

Existing law:

1) Establishes the FAIR Plan to assure the stability of the property insurance market, to assure the availability of basic property insurance, as defined, to encourage maximum use of the normal insurance market in obtaining basic property insurance provided by admitted insurers and licensed surplus line brokers.

2) Provides, as part of the FAIR Plan, for the equitable distribution among admitted insurers of the responsibility for insuring qualified property for which basic property insurance cannot be obtained through the normal insurance market.

3) Specifies that rates for the FAIR Plan shall not be excessive, inadequate, or unfairly discriminatory, shall be actuarially sound so that premiums are adequate to cover expected losses, expenses and taxes, and shall reflect investment income of the plan.

4) Requires the FAIR Plan to develop and implement a residential clearinghouse program and a commercial clearinghouse program.

This bill:

1) Allows, commencing January 1, 2028, the FAIR Plan to share its policyholder information with insurers participating in its clearinghouse programs, with the goal of allowing such an insurer to offer their policies to FAIR Plan policyholders, enabling them to find insurance in the admitted market.

2) Requires under the provisions above, that if there is an agent or broker of record listed on a FAIR Plan policy, the interested insurer must make such a coverage offer simultaneously to both the FAIR Plan policyholder as well as the affiliated agent or broker of record.

3) Requires, beginning May 1, 2027, every admitted and non-admitted insurer that participates in the FAIR Plan clearinghouse programs to report to the FAIR Plan on a quarterly basis the number of policies the insurer has issued to its policyholders. The FAIR Plan must then report aggregated numbers within 30 days to the Insurance Commissioner, the Assembly Committee on Insurance, and the Senate Committee on Insurance, and post the aggregated numbers on its website.

4) States the FAIR Plan must provide its policyholders with annual notice, as specified, that policyholders should consider contacting their broker to determine if other coverage is available.

5) Specifies that the FAIR Plan must require registered agents and brokers to complete its Brokers and FAIR Plan course, which provides training on the FAIR Plan's and the broker's responsibility to advise policyholders on the voluntary market options.

6) Adds the requirement that an agent or broker must assist a person seeking their help in obtaining basic property insurance coverage by providing information on the FAIR Plan's clearinghouse programs.

7) Requires that the FAIR Plan must post a list of admitted and nonadmitted insurers that participate in its clearinghouse programs on its website, and update that list quarterly.

8) Includes provisions to address chaptering issues with AB 1680 (Calderon, 2026) and AB 2061 (Chen, 2026).

Related/Prior Legislation

AB 1680 (Calderon, 2026). Creates greater ability for the California Department of Insurance to ensure accountability and coverage options in the FAIR Plan. Pending on the Senate Floor.

AB 226 (Calderon, Chapter 473, Statutes of 2025). Authorized the California Infrastructure and Economic Development Bank (IBank), upon the request of the California Fair Access to Insurance Requirements Plan Association (FAIR Plan) to issue bonds to finance the costs of claims, to increase liquidity, and claims-paying capacity of the FAIR Plan, and to refund bonds previously issued for that purpose. Required the FAIR Plan, with the approval of the Insurance Commissioner, to assess all members to pay all loan payments and the costs and expenses relating to a loan agreement with IBank, as well as to assess all members to repay a line of credit and its related costs and expenses.

AB 2260 (Calderon, 2024). Would have required the FAIR Plan, until December 31, 2027, to quarterly provide specified information about policies and clearinghouse program progress to the Insurance Commissioner, the Assembly Committee on Insurance, and the Senate Committee on Insurance, and to post the information on the association's public internet website. The bill would have also required the broker of record of an insurance policy that has been placed in the FAIR Plan to determine, prior to the renewal of the policy, whether the policy can be moved to a voluntary market insurance company. Not heard in Senate Insurance Committee.

SB 505 (Rubio, Chapter 180, Statutes of 2023). Required, by July 1, 2024, the FAIR Plan to establish a clearinghouse program for commercial insurance policies.

AB 3012 (Wood and Daly, Chapter 258, Statutes of 2020). Directed the Fair Plan to implement a clearinghouse program whereby property insurers will be provided

information about FAIR Plan policies, for the purpose of encouraging those insurers to offer regular private insurance to FAIR Plan policyholders.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

Insurance Commissioner Ricardo Lara / California Department of Insurance
California Apartment Association
California Building Industry Association
California FAIR Plan Association
Community Associations Institute - California Legislative Action Committee
Emeryville; City of
Orange County Business Council
Surplus Line Association of California

OPPOSITION: (Verified 8/13/26)

None received

ARGUMENTS IN SUPPORT:

The California Apartment Association states:

"The California FAIR Plan was created in 1968, with the purpose to be the "insurer of last resort" for "basic" property insurance in the event of a market failure. At its inception, it was essentially for urban commercial property. Ultimately, it has expanded to include residential insurance anywhere in the state, provided that the insurance "cannot be obtained" in the normal manner in the market. At origination, the FAIR Plan was not intended to compete with the market. Under the current climate of the California insurance market, the FAIR Plan is under pressure as the "take-all" insurer of last resort. AB 69's goal is to make sure that once policies are part of the FAIR Plan they don't stay there if, and only and if, they can transition to a market plan. This will help maintain the solvency of the FAIR Plan – which is a critical step to stabilizes the state's insurance market."

PRIOR SENATE FLOOR VOTE NOT RELEVANT

ASSEMBLY FLOOR: 70-0, 5/29/25 - See last page for vote

SUBJECT: Medi-Cal: subacute care services

SOURCE: Totally Kids Rehabilitation Hospital

DIGEST: This bill requires a provider seeking authorization for subacute care services to submit a specified form with the treatment authorization request. Prohibits Medi-Cal managed care plans from developing or using their own criteria to substantiate medical necessity for subacute care services or from requiring subsequent treatment authorization requests for subacute care services after a patient returns from a bed hold for acute hospitalization.

Senate Floor Amendments of 8/25/26 remove the requirement that Medi-Cal managed care plans use specified Department of Health Care Services (DHCS) forms to authorize subacute care services and instead require plans to authorize such services should a provider substantiate that a patient meets the specified criteria for subacute care services; require plans to use only a standard form developed by DHCS for the authorization of subacute care services if DHCS develops such a form; and make additional organizational changes to more clearly delineate the criteria for these services.

ANALYSIS:

Existing law:

1) Establishes the Medi-Cal program, which is administered by the DHCS, and under which qualified low-income individuals receive health care services. [Welfare and Institutions Code [WIC] §14000, et seq.]

2) Establishes a schedule of benefits under the Medi-Cal program, which includes benefits required under federal law and benefits provided at the state's option, both of which are funded with federal and state dollars. [WIC §14132]

3) Establishes that a health care service is medically necessary when it is reasonable and necessary to protect life, prevent significant illness or significant disability, or to alleviate severe pain, as well as all services covered under the federal early and periodic screening, diagnosis, and treatment for individuals under 21 years of age. [WIC §14059.5]

4) Requires DHCS to establish a subacute care program in health facilities to patients who meet subacute care criteria. [WIC §14132.25]

5) Requires medical necessity for pediatric subacute care services to be substantiated in one of five specific ways that specify the combinations of treatment upon which a patient is dependent. [WIC §14132.25]

6) Specifies that the pediatric medical necessity determination is intended solely for the evaluation of a patient who is potentially eligible and meets the criteria to be transferred from an acute care setting to a subacute level of care. [WIC §14132.25]

7) Allows bed holds of up to seven days for patients in skilled nursing and intermediate care facilities who are ordered by the attending physician into acute hospitalization. [Title 22 California Code of Regulations (CCR) §51535.1]

8) Allows the DHCS director to terminate contracts with or impose sanctions on Medi-Cal managed care plans for failing to comply with contract requirements, federal or state law or regulations, the state plan or approved waivers or for other good cause. Sanctions include temporary or permanent suspension orders of enrollment, marketing, personnel, or subcontractors, and monetary sanctions

of up to $25,000 for first violations, up to $50,000 for second violations, and up to $100,000 for subsequent violations. [WIC §14197.7]

9) Establishes the California Advancing and Innovating Medi-Cal (CalAIM) initiative effective from January 1, 2022 until December 31, 2026, which includes new requirements on Medi-Cal plans, new Medi-Cal populations subject to mandatory Medi-Cal plan enrollment, and new mandatory plan benefits, including subacute care services. [WIC §14184.100 et seq., WIC]

This bill:

1) Prohibits a Medi-Cal plan from imposing additional criteria for subacute care services if a provider substantiates that a patient meets any of the criteria specified in state law.

2) Requires a Medi-Cal plan to deem as sufficient a standardized form developed by DHCS for purposes of authorization and reauthorization of subacute care services, should DHCS develop such a form. Also prohibits Medi-Cal plans from developing their own subacute care services authorization or reauthorization form if a DHCS form exists.

3) Prohibits a Medi-Cal plan from requiring a subsequent treatment authorization request for subacute care services when a patient returns from a bed hold for acute hospitalization as described in existing regulation.

4) Specifies that DHCS may impose sanctions on Medi-Cal plans for violations of 2) and 3) above, in accordance with existing law.

Background

According to the author of this bill:

> This bill is crucial for enhancing the care and support provided to patients who require subacute medical services. The bill aims to optimize the use of limited Medi-Cal funds while ensuring that patients receive the necessary medical attention tailored to their specific needs. Furthermore, it addresses the unique needs of pediatric patients relying on complex medical technologies, underscoring the commitment to provide comprehensive and equitable health care services. Overall, this legislation is a vital step toward improving patient outcomes by ensuring patients receive services aligned with their medical needs within an appropriate facility.

Medi-Cal subacute care program. According to DHCS, subacute care facility services include those provided to both adult and pediatric populations that are provided by a licensed general acute care hospital with distinct-part skilled nursing beds, or by a freestanding certified nursing facility. In each case, the facility must have the necessary contract with DHCS. Subacute care patients are medically fragile and require special services, such as inhalation therapy, tracheotomy care, intravenous tube feeding, and complex wound management care. Adult subacute care is defined as a level of care needed by a patient who does not require hospital acute care but who requires more intensive licensed skilled nursing care than is provided to the majority of patients in a skilled nursing facility. Pediatric subacute care is a level of care needed by a person less than 21 years of age who uses a medical technology that compensates for the loss of a vital bodily function.

Recently, as part of the CalAIM initiative, DHCS moved many populations into mandatory managed care who were previously receiving services through the Medi-Cal fee-for-service delivery system, including some pediatric or adult subacute care services, depending on the county the individual lived in, that were not already part of Medi-Cal managed care. As of January 1, 2024, many individuals who were previously receiving subacute care services through the fee-for-service system were moved into managed care plans. According to the DHCS All Plan Letter 24-010, as part of the transition, Medi-Cal plans were required to offer contracts to all subacute care facilities within their service area that had a contract with DHCS. They were also required to develop sufficient network capacity to enable member placement in subacute care facilities within five working days, seven working days, or 14 calendar days depending on the county of residence. The letter also outlined requirements to allow Medi-Cal recipients to return to a facility after a leave of absence or a bed hold, which generally occurs when a patient temporarily needs a higher level of care in a hospital. While the guidance required Medi-Cal plans to honor DHCS treatment approvals for either six months or the duration of approval of services, whichever is shorter, Medi-Cal plans are now responsible for treatment authorization. The guidance also required all prior authorization requests to be expedited for Medi-Cal recipients transitioning from an acute care hospital to a subacute care facility and all decisions to be made within 72 hours after the Medi-Cal plan receives relevant information from the plan.

When subacute care services were part of the fee-for-service delivery system, providers used either form DHCS 6200, "Information For Authorization/Reauthorization of Subacute Care Services—Pediatric Subacute Program" or form DHCS 6200A, "Information For Authorization/Reauthorization

of Subacute Care Services—Adult Subacute Program" to establish whether the services were medically necessary in order to receive authorization for the services. The forms specified the services that a patient needed that necessitated subacute care services. Now that the program is part of Medi-Cal managed care, each plan has its own forms and methods of documenting medical necessity. Providers report these forms and processes are leading to delays in moving patients from acute care settings to subacute care settings.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, this bill has unknown ongoing costs, potentially low hundreds of thousands, for DHCS for state administration for oversight of Medi-Cal plans (General Fund and federal funds).

ARGUMENTS IN SUPPORT: Sponsor, Totally Kids Rehabilitation, a pediatric subacute facility, writes that this bill closes loopholes used by Medi-Cal plans to delay and deny care to children and adults who utilize Medi-Cal for payment. Totally Kids Rehabilitation was involved in determining the original criteria for 'medical necessity' when their program was implemented. However, in January 2024, CalAIM transitioned subacute care services and Medi-Cal plans have redefined 'medical necessity' for subacute care, as complex and some cases now require stacks of paperwork to resolve. These demands mean that people in need of

care must wait in acute care hospitals for weeks waiting for transfer to the appropriate facility. Additionally, when they finally did establish medical necessity for care, they only authorized this for two weeks rather than a year as had been done previously.

SUBJECT: Nevaeh Youth Sports Safety Act

SOURCE: Author

DIGEST: This bill revises the requirement that a youth sports organization ensure its athletes have access to an Automated External Defibrillator (AED) during any official practice or match, starting January 1, 2028, by allowing a public or private local facility with a permanent sports infrastructure to procure and maintain an AED, in which case the public or private local facility would be responsible for ensuring access to the AED.

Senate Floor Amendments of 8/21/26 clarify that a public or private local facility or its employees are not required to procure or install an AED or to operate or administer an AED in the event of a cardiac emergency, and that this bill does not affect the availability of any otherwise applicable immunity.

ANALYSIS:

Existing law:

1) Defines a "youth sports organization" as an organization, business, nonprofit entity, or a local governmental agency that sponsors or conducts amateur sports competitions, training, camps, or clubs in which persons 17 years of age or younger participate. [Health and Safety Code (HSC) §124235(b)(4)]

2) Requires a youth sports organization, beginning January 1, 2028, to ensure that its athletes have access to an AED during any official practice or match, defined as a sport session in which live action or one or more drills are conducted, or a match, as scheduled by the youth sports organization, the coach, or other designee of the organization. [HSC §124238 and §124238.5]

3) Requires, beginning January 1, 2027, a youth sports organization to ensure that its coaches are certified, and recertified every two years, to perform cardiopulmonary resuscitation (CPR) and operate an AED and that there is a written cardiac emergency response plan, as specified. [HSC §124238.5(b)]

4) Requires a youth sports organization to comply with certain requirements related to athletes suspected of sustaining a concussion or head injury, or who has passed out or fainted, including removal from the athletic activity and a prohibition on returning until he or she is evaluated by a licensed health care provider. Requires youth sports organizations to give both a concussion and head injury information sheet, and a sudden cardiac arrest (SCA) information sheet, to each athlete on an annual basis. [HSC §124235]

5) Requires each coach, administrator, and referee, umpire, or other game official of the youth sports organization to successfully complete concussion and head injury and SCA prevention education at least once, either online or in person, before supervising an athlete in an activity of the youth sports organization. [HSC §124235(a)(5)]

6) Requires "SCA prevention education and educational materials" and a "SCA information sheet" to include, at a minimum, information relating to cardiac conditions and their potential consequences, the signs and symptoms of SCA, best practices for removal of an athlete from an athletic activity after fainting or a suspected cardiac condition is observed, steps for returning an athlete to activity, and what to do in the event of a cardiac emergency, which includes calling 911, performing hands-only CPR, and using an AED if available. [HSC §124235(b)(3)]

7) Establishes the California Youth Football Act, which establishes additional requirements on youth sports organizations that conduct a tackle football program, including requiring a minimum of one certified emergency medical technician, state-licensed paramedic, or higher-level medical professional to be present during all games, and requiring coaches to annually receive first aid, CPR, and AED certification. [HSC §124240, et seq. and §124241(h) and (i)]

8) Requires, as part of the California Youth Football Act, that at least one independent nonrostered individual, appointed by the youth sports organization, to be present at all practice locations, and requires the individual to hold current certifications in first aid, CPR, AED, and concussion protocols. [HSC §124241(j)]

9) Requires a school district or charter school that offers any interscholastic athletic program to acquire at least one AED for each school that participates in the program, and encourages the school district or charter school to ensure that the AED is available for the purpose of rendering emergency care or treatment within a recommended three to five minutes of SCA to pupils, spectators, and any other individuals in attendance at the program's on-campus activities or events, and to ensure that the AED is available to athletic trainers and coaches and authorized persons at these activities or events. [Education Code [EDC] §35179.6]

10) Requires a person or entity that acquires an AED to comply with all regulations governing its placement, notify an agent of the local emergency medical services agency of the existence, location, and type of AED acquired, ensure that the AED is maintained and tested according to the operation and maintenance guidelines of the manufacturer, ensure that it is tested at least biannually and after each use, ensure that an inspection is made of all AEDs on the premises at least every 90 days for potential issues related to operability, and ensure that maintenance and testing records are maintained. [HSC §1797.196]

11) Exempts a person or entity that acquires an AED for emergency use from liability for any civil damages resulting from the use of the AED if the person or entity has complied with the requirements in 8) above. [Civil Code [CIV] §1714.21(d)]

12) Exempts any person who, in good faith and not for compensation, renders emergency care or treatment by use of an AED at the scene of an emergency

from liability for any civil damages resulting from any acts or omissions in rendering the emergency care. [CIV §1714.21(b)]

This bill:

1) Revises the requirement that a youth sports organization ensure its athletes have access to an AED during any official practice or match, by assigning responsibility for ensuring access to an AED as follows:

   a) Permits a public or private local facility with a permanent sports infrastructure, as defined by this bill, to procure and maintain an AED for use during an official practice or match permitted by the facility, and in these cases, requires the facility to ensure that the youth sports organization as access to the AED; or,

   b) If an AED is not available at a public or private local facility, requires the youth sports organization to ensure there is access to an AED.

2) Defines "permanent sports infrastructure," as a fixed, nontemporary facility or structure designed and maintained for the purpose of hosting organized sports activities that is regularly permitted, rented, leased, or otherwise granted permission of use for youth sports programs.

3) Clarifies that a public or private local facility with a permanent sports infrastructure, in addition to a youth sports organization, is required to ensure that its AED is maintained and tested.

4) Requires a public or private local facility to work in collaboration with the youth sports organization to ensure that any AED that is installed at the public or private local facility is accessible to youth sports organizations at the time of official practices or matches permitted by the facility.

5) Requires a public or private local facility that has installed an AED at the facility to work with the youth sports organization to identify means to share the financial costs associated with ensuring that the AED is maintained and accessible at the facility.

6) Prohibits this bill from being construed to require a public or private local facility or its employees from being required to procure or install an AED or to operate or administer an AED in the event of a cardiac emergency.

7) Prohibits this bill from being construed to impose a mandatory duty pursuant to a provision of law that specifies that where a public entity is under a mandatory duty designed to protect against the risk of a particular kind of injury, the public entity is liable for an injury of that kind proximately caused by its failure to discharge the duty.

8) Prohibits this bill from being construed to affect the availability of any immunity otherwise applicable to the public or private local facility or its employees.

Background

According to the author:

> This bill would require public or private local facilities with a permanent sports infrastructure, that have installed an AED, ensure youth sports organizations have access to those AEDs. SCA is the number one killer of student athletes. Having an AED present during official practices or matches can be the difference between life and death for youth athletes. Timely intervention of SCA remains critical for the safety of youth athletes. This bill would continue to require youth sports organizations to be responsible for ensuring athletes have access to AEDs during official practices or matches if the facility has not installed an AED.

Background on SCA. According to the National Heart, Blood, and Lung Institute, SCA is a condition in which the heart suddenly and unexpectedly stops beating, and usually causes death if not treated within minutes. SCA is not the same as a heart attack. A heart attack is when blood flow to the heart is blocked (a "circulation" problem), and SCA is when the heart malfunctions and suddenly stops beating unexpectedly (an "electrical" problem). However, SCA can happen after or during recovery from a heart attack. Ventricular fibrillation (v-fib), a type of arrhythmia, causes most SCAs. During v-fib, the heart's lower chambers do not beat normally, and instead quiver very rapidly and irregularly and little or no blood is pumped to the body. Other problems with the heart's electrical system can also cause SCA. For example, SCA can occur if the rate of the heart's electrical signals becomes very slow and stops. SCA also can occur if the heart muscle does not respond to the heart's electrical signals. Coronary heart disease; severe physical stress; certain inherited disorders; and structural changes in the heart can also cause SCA.

According to the American College of Cardiology (ACC), when playing sports, an athlete's heart is working faster and pumping harder. Adrenaline is pumped throughout the body, and the heart needs more oxygen than normal. Dehydration, fever, or changes in electrolytes can also play a part. In people whose hearts are not normal to begin with, these extra stresses can sometimes trigger the electrical system of the heart and cause SCA. While rare, SCA is the leading medical cause of death in young athletes. ACC states that warning signs during exercise include passing out, dizziness, chest pain, shortness of breath, and seizures. The Centers for Disease Control and Prevention estimates that every year in the U.S., approximately 2,000 patients younger than 25 years will die of SCA. The likelihood of child and young adult SCA for those with underlying cardiovascular disease is increased by athletic participation. According to a study published in December 2017, a loss of consciousness in athletes during sports activity is usually not immediately recognized as SCA and time is wasted by checking breathing and body movement. Immediate CPR and defibrillation with an AED should be initiated if an athlete is experiencing SCA. Without defibrillation, the probability of surviving declines by 10% per minute.

Background on AEDs. According to the American Heart Association (AHA), an AED is a lightweight, portable device that delivers an electric shock through the chest to the heart. The shock can stop an irregular rhythm and allow a normal rhythm to resume in a heart in SCA. The AED has a built-in computer, which assesses the patient's heart rhythm, determines whether the person is in cardiac arrest, and signals whether to administer the shock. Inside the AED box are pads and a diagram that shows where to place them on the bare skin. Once the device is turned on, a voice tells the person using it exactly what to do. The AHA states that more than 15% of out-of-hospital cardiac arrests occur in a public location, and therefore public access to AEDs and community training have a large role to play in early defibrillation. However, the number of patients who have an AED applied by a bystander remains low, occurring after only 10.2% of public cardiac arrests. According to the AHA, nine in ten cardiac arrest victims who receive a shock from an AED in the first minute live. The AHA states that children over age eight can be treated with a standard AED, and for children ages one through eight, the AHA recommends the pediatric attenuated pads that are purchased separately.

Related/Prior Legislation

AB 310 (Alanis, Chapter 254, Statutes of 2025) delayed the implementation of the requirement, from January 1, 2027 to January 1, 2028, that youth sports organizations ensure their athletes have access to an AED during any official

practice or match. AB 310 requires youth sports organizations to ensure their coaches are certified to perform CPR and operate an AED, and have a written cardiac emergency response plan, beginning January 1, 2028.

AB 1467 (Alanis, Chapter 24, Statutes of 2023) requires a youth sports organization that elects to offer an athletic program to ensure that by January 1, 2027, its athletes have access to an AED during any official practice or match.

OPPOSITION: (Verified 8/26/26)

All prior opposition was to a previous version of this bill.

ARGUMENTS IN SUPPORT: This bill is supported by AYSO, which states that this bill represents a thoughtful, practical approach to improving athlete safety without placing undue burdens on the volunteer-driven programs that form the backbone of youth sports. This bill allows organizations to continue delivering safe, inclusive, and accessible opportunities for children to play, grow, and thrive. AYSO states that passing this bill is vital to ensuring youth sports remain a positive and sustainable part of California's communities.

The Eric Paredes Save a Life Foundation supports this bill, stating that this bill builds upon California's existing youth sports safety standards by closing a loophole requiring public and private local facilities with permanent sports infrastructure to procure, maintain, and provide access to AEDs during youth sports activities. According to the Eric Paredes Save a Life Foundation, SCA is the leading cause of death on school campuses and number one killer of student athletes, and that an estimated 23,000 youth are stricken annually by cardiac conditions across the country. Fragmented youth leagues often travel across various fields and lack the financial capability or permanent authority to manage

physical hardware at the facilities they rent. This bill ensures life-saving equipment remains reliably on-site, fully functional, and accessible precisely when a cardiac emergency happens.

SUBJECT: Motions: filing and service requirements

SOURCE: Author

DIGEST: This bill removes the two-day extension to procedural timelines where service is effectuated by electronic service.

ANALYSIS:

Existing law:

1) Defines the following relevant terms:

   a) "Electronic service" means service of a document, on a person, by either electronic transmission of electronic notification; electronic service may be performed directly by a person, including a party or a person's attorney, or through an electronic service provider, and by a court.
   b) "Electronic transmission" means the transmission of a document by electronic means to the electronic service address at or through which a person receives electronic service.
   c) "Electronic notification" means the notification of the person that a document is served by sending an electronic message to the electronic address at or through which the person receives electronic service,

specifying the exact name of the document served, and providing a hyperlink at which the served document may be viewed and downloaded. (Code of Civil Procedure (Code Civ. Proc.) § 1010.6(a)(1).)

2) Permits electronic service of documents in a civil action, consistent with specified requirements, except that a document is required to be served by certified or registered mail, electronic service of the document is not authorized. (Code Civ. Proc.) § 1010.6(a).)

3) Provides for mandatory electronic service in a civil action as follows:

   a) The court may order electronic service on a person represented by counsel who has appeared in an action or proceeding.
   b) A person represented by counsel, who has appeared in an action or proceeding, shall accept electronic service of a notice or document that may be served by mail, express mail, overnight delivery, or facsimile transmission.
   c) Before first serving a represented person electronically, the person effecting service shall confirm the appropriate electronic service address for the counsel being served.
   d) A person represented by counsel shall, upon request of any person who has appeared in an action or proceeding and who provides an electronic service address, electronically serve the requesting person with any notice or document that may be served by mail, express mail, overnight delivery, or facsimile transmission. (Code Civ. Proc. § 1010.6(b).)

4) Provides that an unrepresented person may consent to electronic service in a civil action, provided that the person gave express consent; the unrepresented person may withdraw consent at any time by filing the appropriate Judicial Council form with the court. (Code Civ. Proc. § 1010.6(c).)

5) Provides that, on or after July 1, 2025, in any action in which a party or other person is subject to mandatory electronic service or has consented to electronic service, the court shall electronically transmit to such persons any document issued by the court that the court is required to transmit, deliver, or serve. This service shall have the same legal effect as service by mail except as provided. (Code Civ. Proc. § 1010.6(d).)

6) Provides that if a document may be served by mail, express mail, overnight delivery, or facsimile transmission, electronic service of that document is deemed complete at the time of the electronic transmission of the document or

at the time that the electronic notification of service of the document is sent. Any period of notice, or any right or duty to do any act or make any response within any period or on a date certain after the service of the document, which time period or date is prescribed by statute or rule of court, shall be extended after service by electronic means by two court days, but the extension shall not apply to extend the time for filing any of the following:

a) A notice of intention to move for new trial.
b) A notice of intention to move to vacate judgment under Section 663a.
c) A notice of appeal.

7) Provides that notice and a motion for summary judgment must be served on all parties at least 81 days before the scheduled hearing, and that if the notice is served by facsimile transmission, express mail, or another method of delivery providing for overnight delivery the required 81-day notice period is increased by two court days. (Code Civ. Proc. § 437c(a)(2).)

8) Provides that all moving and supporting papers for certain motions must be served and filed at least 16 court days before the hearing, and that if the notice of motion is served by facsimile transmission, express mail, or another method of delivery providing for overnight delivery the required 16-day notice period is increased by two court days. (Code Civ. Proc. § 1005(b).)

This bill removes the two-day extension to procedural timelines where service is effectuated by electronic service.

Background

The Code of Civil Procedure establishes various timelines for serving and filing notices and motions and supporting or responsive documentation. The relevant statutes extend these timelines in certain situations. For instance, if the notice is served by facsimile transmission, express mail, or another method of delivery providing for overnight delivery, the relevant period is generally extended by two days.

Current law establishes rules and procedures for the electronic service of documents in civil cases, including providing which parties must make and accept, and which parties may elect to make and accept, service through electronic means. The relevant statute provides that any period of notice, which time period or date is prescribed by statute or rule of court, shall be extended after service by electronic means by two court days, except as specified. This bill clarifies that these two-day

extensions do not apply to electronic service. This bill is supported by the Child Support Directors Association of California. No timely opposition has been received.

Comments

Electronic service—which can be service by email or through an electronic filing service[1]—has come a long way in the past quarter of a century. Code of Civil Procedure section 1010.6 (Section 1010.6), which governs electronic service in civil actions, was enacted in 1999 as a modest provision allowing trial courts to adopt local rules for electronic filing and service of documents and giving the Judicial Council until January 1, 2003, to adopt uniform rules of electronic filing and service.[2] As the internet became more ubiquitous and electronically transmitting documents became easier to do, Section 1010.6 grew to accommodate an increasing interest in electronic service.
Most of Section 1010.6 is directed at when parties may serve each other electronically. As a general rule, represented parties must accept electronic service, and serve any party electronically who requests it, whereas unrepresented parties cannot be served electronically unless they affirmatively consent to such service.[3]

Until 2021, Section 1010.6 stated only that courts may elect to electronically serve parties who had consented, or were required, to accept electronic service; there was no requirement that courts electronically serve anyone. Then in 2021, the Legislature enacted SB 241 (Umberg, Ch. 214, Stats. 2021) which, among other things, set a deadline for the courts to transmit documents electronically to parties who are required or have requested to accept electronic service. Specifically, SB 241 required courts to begin electronically transmitting, to parties required or consenting to accept electronic service, documents that the court is required to transmit, deliver, or serve, beginning July 1, 2024.[4] AB 2283 (Pacheco, Ch. 151, Stats. 2024) later extended this timeline by a year to July 1, 2025, and changed "transmit" to "serve."

Section 1010.6 further provides that any period of notice, or any right or duty to do any act or make any response within any period or on a date certain after the service of the document, which time period or date is prescribed by statute or rule of court, shall be extended after service by electronic means by two court days, except as specified.

---

[1] Code Civ. Proc. § 1010.6(a).
[2] SB 367 (Dunn, Ch. 514, Stats. 1999).
[3] Code Civ. Proc. § 1010.6(b), (c).)
[4] *See id.*, § 1010.6(d).

This bill removes this two-day extension.

Procedural timelines for service in civil actions. After the filing of a lawsuit, either party to an action may move for summary judgment by contending that the action has no merit or that there is no defense thereto. Essentially, the party filing the motion is claiming that all necessary factual issues are resolved and need not be tried by the court because they are so one-sided. A motion for summary judgment must be supported or opposed by admissible evidence such as affidavits, declarations, admissions, answers to interrogatories, depositions, and requests for judicial notice, as appropriate.

The law sets out specific timelines for filing and responding to motions for summary judgment. Currently, the motion may be filed anytime after 60 days have elapsed since the general appearance of the responding party. The motion must be served with supporting papers at least 81 days before the hearing. This timeline is increased by two court days if the notice is served by facsimile transmission, express mail, or another method of delivery providing for overnight delivery.

This bill clarifies that this two-day extension does not apply to electronic service.

Existing law governing civil procedure establishes various timelines for serving and filing other notices and motions and supporting or responsive documentation. The relevant statutes extend these timelines in certain situations. Unless otherwise ordered or specifically provided by law, all moving and supporting papers shall be served and filed at least 16 court days before the hearing. If the notice is served by facsimile transmission, express mail, or another method of delivery providing for overnight delivery, that period is extended by two calendar days.

This bill clarifies that this two-day extension does not apply to electronic service.

According to the author:

> The purpose of AB 540 is to eliminate inconsistencies in civil procedure laws regarding electronic service deadlines. By explicitly stating that electronic service does not require an extension of the notice period, AB 540 streamlines litigation procedures, reduces confusion, and ensures fairness among parties using different service methods. The bill amends the Code of Civil Procedure to make these clarifications and conform procedural rules accordingly.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

SUPPORT: (Verified 7/3/25)

Child Support Directors Association of California

OPPOSITION: (Verified 7/3/25)

None received

ARGUMENTS IN SUPPORT: The Child Support Directors Association of California writes:

[This] bill removes ambiguity by confirming that electronic service of motions does not trigger additional notice periods—an update that not only reflects current practice but also reduces unnecessary delays in proceedings that deeply impact the families we serve.

By authoring AB 540, you have helped ensure that child support cases can move forward without the risk of procedural confusion over filing timelines. This bill will make a real and positive difference in the lives of parents and children across the state.

SUBJECT: Employment: refineries: task force

SOURCE: United Steelworkers District 12

DIGEST: This bill establishes the Refinery Safe Staffing Task Force (Task Force) to develop potential methods and strategies for ensuring maximum employee retention at refineries, during, and especially in the time period preceding, a refinery closure, and for addressing employment dislocations associated with oil, gas, and related industries, as specified.

Senate Floor Amendments of 8/21/26 1) shift two of the fourteen appointments on the Task Force from legislative to gubernatorial appointments, specifically the amendments task the Governor with appointing all three refinery employer representatives; and 2) provide that the Task Force's recommendations may be considered in collective bargaining but are not binding.

ANALYSIS:

Existing law:

1) Requires, under the California Occupational Safety and Health Act, an employer to:

   a) Furnish employment and a place of employment that is safe and healthful.

   b) Furnish and use safety devices and safeguards, as well as adopt and use practices, means, methods, operations, and processes that are reasonably adequate to render employment and the place of employment safe and healthful.

   c) Do everything reasonably necessary to protect the life, safety, and health of employees.(Labor Code §6300 et seq.)

2) Establishes the Division of Occupational Safety and Health (Cal/OSHA) within the Department of Industrial Relations (DIR) to, among other things, propose, administer, and enforce occupational safety and health standards. (Labor Code §6300 et seq.)

3) Directs the Standards Board and Cal/OSHA, in accordance with the California Refinery and Health Standards Board Act of 1990, to promote worker safety through implementation of training and process safety management (PSM) practices in refineries and chemical plants and other facilities deemed appropriate. (Labor Code §7852(a))

4) Defines "refinery" as an establishment that produces gasoline, diesel fuel, aviation fuel, or biofuel through the processing of crude oil or alternative feedstock. (Labor Code §7853(c))

5) Defines "process safety management" as the application of management programs, which are not limited to engineering guidelines, when dealing with the risks associated with handling or working near hazardous chemicals. PSM is intended to prevent or minimize the consequences of catastrophic releases of acutely hazardous, flammable, or explosive chemicals. (Labor Code §7853(b))

This bill:

1) Establishes the Refinery Safe Staffing Task Force (Task Force) consisting of the following members:

a) Three representatives of unions representing proprietary employees at refineries, as specified, one each appointed by the Governor or their appointed DIR PSM Unit regional manager, the Speaker of the Assembly, and the Senate Committee on Rules, respectively.

b) Three representatives of unions representing building trades whose members serve as contractors at refineries, one each appointed by the Governor or their appointed DIR PSM Unit regional manager, the Speaker of the Assembly, and the Senate Committee on Rules, respectively.

c) Three representatives of refinery employers appointed by the Governor or their appointed DIR PSM Unit regional manager.

d) Three representatives of nongovernmental organizations whose mission relates to the well-being of workers and refinery communities, one each appointed by the Governor, the Speaker of the Assembly, and the Senate Committee on Rules, respectively.

e) Two members of the public with expertise in refinery process safety, to be appointed by the Governor or their appointed DIR PSM Unit regional manager.

2) Requires all members of the Task Force to be appointed and begin serving no later than January 1, 2028.

3) Provides that the members of the Task Force shall serve without compensation, except that they shall receive, upon appropriation of funds for this purpose, their actual and necessary expenses incurred in the performance of their duties and responsibilities, including traveling expenses.

4) Requires the Task Force to select one of its members to be its chair. Provides that the Task Force shall have all of the responsibilities, powers, and duties set forth in these provisions.

5) Provides that the Task Force shall consult with, and may utilize, the staff of the DIR PSM Unit.

6) Provides that the purpose of the Task Force shall be to develop potential methods and strategies for ensuring maximum employee retention at refineries, during, and especially in the time period preceding, a refinery closure or long-

term idling of a refinery, and for addressing employment dislocations associated with oil, gas, and related industries.

7) Requires, no later than June 1, 2029, the Task Force to present to the Legislature, and make available online to the public, a report documenting a wide range of potential methods and strategies for ensuring maximum employee retention in the time period preceding refinery closure or long-term idling of a refinery, including, without limitation, any of the following:

   a) Extended severance periods.

   b) Paid job training.

   c) Extended job placement assistance.

   d) Priority transfer to other refineries.

   e) Financial and logistical assistance.

8) Requires the report in 7) to consider a wide range of methods and strategies for ensuring safe operation in the event of understaffing and include potential methods and strategies for transitioning oil and gas workers into sectors that match their skills and experience.

9) Provides that the recommendations of the Task Force may be considered in collective bargaining but are not binding.

10) Provides that the above provisions shall be inoperative on July 1, 2029, and shall be repealed as of January 1, 2030.

11) Makes various findings and declarations related to California's refinery industry and refinery workers.

Background

Refinery Safety. The PSM Unit within Cal/OSHA is responsible for inspecting refineries and chemical plants that handle large quantities of toxic and flammable materials. Generally, refinery safety rules are built around the concept of process safety, which requires refineries to identify and fix hazards before accidents occur and involve workers directly in investigations when they do. The first safety standard enforced by the PSM Unit was adopted in 1990 under the California

Refinery and Health Act and was substantially similar to the federal one. Following a 2012 chemical release and fire at the Chevron U.S.A. Inc. Refinery in Richmond, however Cal/OSHA and the Legislature moved to strengthen safety standards. An interagency working group, consisting of Cal/OSHA, CalEPA, and the U.S. Environmental Protection Agency, among others, identified serious concerns with Chevron's PSM procedures and expressed the need for stronger preventative safeguards. On May 18, 2017, the Standards Board unanimously adopted an updated PSM standard that requires refinery employers to conduct damage mechanism reviews, apply rigorous safeguard protection analyses, integrate human factors and culture assessments into safety planning, involve front-line employees in decision-making, and perform comprehensive process hazard analyses.

Specifically, refinery employers are required to include an analysis of human factors, where relevant, in major changes, incident investigations, process hazard analyses, and management of organizational change (MOOC) assessments. Human factor analysis must evaluate the following: staffing levels; the complexity of tasks; the length of time needed to complete tasks; the level of training, experience and expertise of employees; the human-machine and human-system interface; the physical challenges of the work environment in which the task is performed; employee fatigue and other effects of shiftwork and overtime; communication systems; and the understandability and clarity of operating and maintenance procedures. Before an employer can reduce staffing levels or change shift duration, they must conduct a MOOC assessment. The MOOC assessment is required for changes with a duration exceeding 90 calendar days affecting operations, engineering, maintenance, health and safety, or emergency response. All MOOC assessments must include an analysis of human factors.

In 2024, the Legislature expanded the definition of "refinery" to include an establishment that produces gasoline, diesel fuel, aviation fuel, or biofuel through the processing of crude oil or alternative feedstock. The current PSM standard covers approximately 1,500 facilities in the state that handle or process certain hazardous chemicals, including 11 refineries which produce approximately two million barrels of crude oil per day into gasoline, diesel fuel, jet fuel, and chemical feedstocks.[1]

Ongoing Changes to the PSM Standard. In 2019, Western States Petroleum Association (WSPA) filed two lawsuits regarding the 2017 PSM safety standard

[1] OSHSB, Process Safety Management for Petroleum Refineries. "**Initial Statement of Reasons**" 2025.

(CCR §5789.1).[2] In a complaint filed in Sacramento Superior Court, WSPA alleged that the standard 1) did not meet requirements under the California Administrative Procedure Act; 2) was invalid; 3) was unenforceable because it was inconsistent with governing statues; and 4) was neither reasonably necessary nor sufficiently clear.[3] Additionally, in a complaint filed in the Eastern District of California, WSPA alleged that the standard was preempted by the National Labor Relations Act.[4]

As part of a 2024 settlement to resolve these lawsuits, Cal/OSHA and the Standards board agreed to engage in rulemaking to amend the PSM safety standard to address WSPA's concerns. Specifically, Cal/OSHA agreed to propose and to support amendments to the PSM standard that would:

- Amend and clarify the definitions of highly hazardous material, major change, and employee representative;
- Amend and clarify the requirements pertaining to the Hierarchy of Hazard Control Analysis; and
- Amend and clarify, with respect to employee participation in PSM activities, how employers will allow for effective participation by employees engaged in such activities.

The revised standard must be adopted in accordance with the California Administrative Procedure Act. On November 28, 2025, the Standards Board published its notice of proposed rulemaking to amend the PSM standard. The first public hearing was held on January 15, 2026. The Standards Board is in the process of soliciting and responding to stakeholder feedback. It's unclear when the updated PSM standard will be adopted by the Standards Board and filed with the Secretary of State.

Over the last several years, California has experienced a wave of petroleum refinery closures and conversions. In turn, the in-state refining sector has significantly consolidated, with in-state refining capacity declining since at least 1982.[5] California's remaining refineries are located primarily in populated urban areas, including four in Los Angeles County and three in the Bay Area. Several of these refineries were built over one hundred years ago.[6]

This bill. This bill establishes the Task Force to develop potential methods and strategies for ensuring maximum employee retention at refineries, during, and especially in the time period preceding, a refinery closure or long-term idling of a refinery, and for addressing employment dislocations associated with oil, gas, and related industries. The Task Force would, no later than June 1, 2029, present to the Legislature, and make available online, a report documenting its findings.

Related/Prior Legislation

SB 966 (Gonzalez, 2026) would codify specified provisions of Cal/OSHA's PSM safety standard related to employee participation in PSM activities. Specifically, the bill would require an employer, in consultation with employees and employee representatives, to develop, implement, and maintain a written plan providing for employee participation in all PSM elements, as specified. The bill is pending on the Assembly Floor.

AB 2157 (Connolly, 2026) would remove the July 1, 2027, sunset date for the Displaced Oil and Gas Worker Pilot Program, making the program permanent. The bill is pending on the Senate Floor.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

"DIR would potentially incur costs in the hundreds of thousands of dollars annually to convene the Task Force."

ARGUMENTS IN SUPPORT: According to the United Steelworkers District 12:

"AB 605 also creates a Refinery Safe Staffing Task Force that brings together labor representatives, refinery employers, process safety experts, regulators, and community stakeholders to develop evidence-based standards and best practices. This collaborative approach will help ensure that future requirements are informed by those with direct experience operating refineries safely and by those most affected by refinery incidents…

"AB 605 also creates a Refinery Safe Staffing Task Force that brings together labor representatives, refinery employers, process safety experts, regulators, and community stakeholders to develop evidence-based standards and best practices. This collaborative approach will help ensure that future requirements are informed by those with direct experience operating refineries safely and by those most affected by refinery incidents."

ARGUMENTS IN OPPOSITION: According to a coalition of opponents, including the Western States Petroleum Association:

"AB 605 Creates More Uncertainty for California's Remaining Refineries California's refining industry is under unprecedented pressure, with refinery closures and production reductions already limiting in-state fuel production. AB 605 adds new mandates and uncertainty when the Legislature should be focused on preserving refining capacity and reliable, affordable fuel supplies.

"AB 605 Creates a Politically Appointed Task Force

The task force would address severance, job training, placement, worker assistance, refinery transfers, and strategies for transitioning oil and gas employees into other industries issues traditionally addressed through collective bargaining, employer workforce planning, and existing workforce programs. Creating a politically appointed body to direct these workforce decisions adds unnecessary government involvement and uncertainty for employers and workers…

"AB 605 Undermines Existing Workforce and Labor Processes
The bill inserts a new government task force into matters that are already addressed through collective bargaining, employer workforce planning, and established workforce development programs. This duplicative approach risks creating conflicting requirements and further complicating workforce decisions at a time when refinery operators are already facing unprecedented economic and regulatory pressure."

SUBJECT: Mobilehome Residency Law Protection Program: Attorney General

SOURCE: Golden State Manufactured-home Owners League, INC.

DIGEST: This bill requires the Department of Housing and Community Development (HCD) to refer alleged violations of the Mobilehome Residency Law (MRL) to specified nonprofit legal service providers (LSPs), requires HCD to make specified conforming changes to the Mobilehome Residency Law Prevention Program (MRLPP), and extends the sunset date of the MRLPP from 2027 to June 30, 2033.

ANALYSIS:

Existing law:

1) Establishes the MRLPP at HCD to intake complaints regarding alleged violations of the MRL and refer complaints to LSPs.

2) Requires HCD to refer allegations of violations of law or regulations within HCD's jurisdiction to the Division of Codes and Standards within HCD. Prohibits HCD from arbitrating, mediating, negotiating, or providing legal advice in connection with mobilehome park rent disputes, leas or rental disputes arising from lease or rental agreements, but authorizes HCD to provide information on those issues to the complaining party, management, or other responsible party.

3) Authorizes HCD to refer any alleged violations of law or regulations that are not within HCD's jurisdiction to the appropriate enforcement agency.

4) Sunsets the MRLPP on January 1, 2027.

This bill:

1) Requires HCD, under the MRLPP, to refer alleged violations of the MRL or related local ordinances, including rent stabilization ordinances, to an LSP, as specified, within five days of receipt.

2) Authorizes HCD to make multiple referrals and to aggregate multiple complaints of violations of law or regulations within HCD's jurisdiction. HCD shall avoid duplication of effort in any complaints that are referred more than once.

3) Provides that if HCD refers the complaint to a LSP pursuant to (1), HCD shall communicate that referral to the complaining party in a letter.

4) Requires HCD, until June 30, 2029, to contract with one more qualified and experienced LSP and refer complaints for selected evaluation and which are not resolved by HCD to those LSPs for possible enforcement action. Specifies which LSPs HCD may contract with.

5) Provides that a LSP shall have the sole authority to determine which referred complaints will be addressed or pursued, based on the resources provided to it by, and contract entered into with, HCD.

6) Requires an LSP to inform HCD of any complaints not handled due to a shortage of resources.

7) Prohibits a LSP from charging fees to any homeowner for services performed in connection with a complaint referred to it by HCD.

8) Requires HCD to develop a grant process to distribute funds to one or more qualified LSPs and refer any complaints to those LSPs for possible enforcement action. The grant process shall be fully operational for all complaints by July 1, 2029, and begin referring complaints by July 1, 2030.

9) Prohibits an LSP that receives a grant from HCD from doing either of the following:

   a) Charge any fees to a homeowner for any services performed in connection with a complaint referred to it by HCD.
   b) Deny services based on income limits or other financial data of the complainant.

10) Extends the sunset date of the MRLPP from January 1, 2027 to June 30, 2033.

11) Requires HCD's annual MRLPP reports to include additional information on the number of complaints referred to an LSP or other appropriate enforcement agency.

Background

Mobilehomes and the MRL generally. More than 1 million people live in California's approximately 4,500 mobilehome parks. Mobilehomes are not truly mobile, in that it is often cost prohibitive to relocate them or the home cannot retain its structural integrity if dismantled and reinstalled elsewhere. A mobilehome owner whose home is located in a mobilehome park does not own the land the unit sits on, and must pay rent and fees for the land and any community spaces.

The MRL extensively regulates the relationship between landlords and homeowners who occupy a mobilehome park. A limited number of provisions also apply to residents who rent, as opposed to own, their mobilehome. The MRL has two parts: Articles 1 through 8 apply to most mobilehome parks and Article 9 applies to resident-owned parks or parks which are established as a subdivision, cooperative, or condominium. The provisions cover many issues, including: 1) the rental and lease contract terms and specific conditions of receipt and delivery of written leases, park rules and regulations, and other mandatory notices; 2) mandatory notice and amendment procedures for mobilehome park rules and regulations; 3) mandatory notice of fees and charges, and increases or changes in them; and 4) specified conditions governing mobilehome park evictions. A dispute that arises pursuant to the application of the MRL generally must be resolved in a civil court of competent jurisdiction.

Comments

HCD and mobilehomes. HCD oversees several areas of mobilehome law, including health and safety standards, registration and titling of mobilehomes and parks, and, through the Mobilehome Ombudsman, assists the public with questions or problems associated with various aspects of mobilehome law. The Mobilehome Ombudsman provides assistance by taking complaints and helping to resolve and coordinate the resolution of those complaints. However, the Ombudsman does not have enforcement authority for the MRL, and cannot arbitrate, mediate, negotiate, or provide legal advice on mobilehome park rent disputes, lease or rental agreements, but may provide general information on these issues.

HCD also inspects parks and mobilehomes for health and safety issues. Under the Mobilehome Park Maintenance (MPM) program, HCD annually inspects a selection of parks each year for compliance with specified health and safety requirements. The program is funded through a $4 fee, of which the property owner may charge half ($2) to the homeowners. In addition to the MPM program, HCD also responds to health and safety complaints under the Mobilehome Parks Act.

Mobilehome Residency Law Protection Program. AB 3066 (Stone, Chapter 744, Statutes of 2018), established the MRLPP as a five-year pilot program at HCD to intake complaints regarding alleged violations of the MRL and refer complaints to legal service providers (LSPs). LSPs have the sole authority under the law to determine which referred complaints will be addressed or pursued. LSPs are prohibited by program rules from charging fees to any homeowner, as the program

is funded via a $10-per-lot fee paid by homeowners and deposited into the Mobilehome Dispute Resolution Fund for program administration. The MRLPP was originally scheduled to sunset on January 1, 2024. In 2023, AB 318 (Addis, Chapter 736, Statutes of 2023) extended the sunset date of the MRLPP to January 1, 2027, and made additional changes to the program rules, some of which had been recommended in HCD's evaluation of the pilot program. These changes included removing the requirement for HCD to select only the most severe, deleterious, and materially and economically impactful alleged violations for referral to LSPs, and removing the requirement for parties to spend the first 25 days attempting to negotiate a resolution to the alleged violation in good faith.

The MRLPP now has an annual reporting requirement and HCD recently published program information on March 14, 2025, covering the cumulative time period from July 2020-December 2024. The report notes total revenue collected of $17 million and total expenditures, including estimated expenses for fiscal year 2024-25, of $9.4 million, leaving a balance in the Fund of approximately $8.4 million at the conclusion of the fiscal year. In addition, the report described the cumulative number of allegations received, processed, and referred to an LSP or another enforcement agency, the type of complaint allegations received broken down by section of the MRL, and a geographic distribution of complaints by county. To date, HCD reports having received a total of 7,002 complaints, of which 6,300 were processed and 1,580 were referred to another enforcement agency or to an LSP for further action.

MRLPP Audit. The California State Auditor performed an audit of the MRLPP, and its findings were released on December 19, 2023, in Audit 2023-112. An excerpt of the Auditor's letter to the Legislature announcing the audit findings is below:

"Although LSPs are responsible for providing services to complainants, attorney-related privileges limit HCD's ability to effectively oversee the work done by these contractors. The privileges prevent the LSPs from providing information—such as the number of hours they work on a complaint or investigations they perform to assist complainants—that HCD needs to determine if the LSPs are serving referred complainants. We also found that HCD did not take immediate action when LSPs notified it that they were denying services to complainants based on incorrect eligibility criteria and that HCD's program data are not of good enough quality to allow HCD to report accurately or efficiently to the Legislature as required.

> "The program is funded by an annual $10 per lot fee paid by mobilehome park owners. Although we determined that HCD generally spent program funding appropriately, it has spent less than 40% of the program's revenue it has collected and has consequently accumulated $8.3 million in unspent funds. Even if HCD's annual costs grow, the amount of unspent funds will likely continue to grow if the Legislature does not reduce the fee. To assess the appropriateness of the program's fee, we modeled different scenarios and determined that suspending the fee from fiscal year 2024–25 through the program's sunset date in January 2027 would reduce the unspent fund balance and still allow HCD sufficient funding to address complaints."

HCD agreed to implement a number of the Auditor's recommendations but expressed significant concern with the recommendation to the Legislature to implement a fee collection freeze. A handful of bills were proposed in 2024 that would have implemented some of the Auditor's recommendations relating to improving HCD's oversight of LSP contractors, though none reached the Governor's desk.

More oversight and dispute resolution. This bill requires HCD to refer alleged MRL violations, including local related local ordinances, to an LSP within five days of receipt. In other words, HCD would continue to review complaints over health and safety code violations, but now would be required to refer alleged violations of the MRL to LSPs. This bill also requires HCD to update the MRLPP requirements specific to contracting and reporting requirements for LSPs that are eligible to receive grants from the program. These changes attempt to address multiple challenges with the current complaints process and the implementation and utilization of funds available through the MRLPP. First, this bill would ensure that specific allegations are referred to LSPs, and done so within five days. Second, it would ensure HCD has greater oversight over the LSPs that are receiving specific complaints to ensure they have adequate resources to review and investigate MRL violation allegations. Finally, these changes attempt to utilize existing funds in the MRLPP, as well as ensure legal assistance continues to be available to those who need it the most.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The Department of Housing and Community Development (HCD) indicates that it would only incur "minor and absorbable" costs to implement this bill. However, staff notes that, according to budget documents and the MRLPP's

fund condition statements, HCD's State Operations costs associated with the current program are projected to be $4.05 million in 2026-27 (for both staffing and contract costs), so it appears safe to assume that a similar amount will be incurred to continue to operation of the program, at least through the 2029-30 fiscal year, when the MRLPP will be restructured as a grant program. HCD was unable to provide an estimate of any projected changes to staffing and resource needs from July 1, 2030 through the bill's sunset date of January 1, 2033, so it is unclear whether costs to continue the program as a grant program will result in higher or lower costs than the current level of State Operations expenditures. Funding required for contracts through 2029-30 and grants through January 1, 2033 would depend upon the number of complaints received and referred to LSPs, which may be higher since the bill expands complaints to alleged violations of local ordinances and HCD's expectations that a broader portion of the state will be served. (Mobilehome Dispute Resolution Fund)

- Ongoing annual fee revenue gains of approximately $3.52 million annually until January 1, 2033 from the continued collection of an annual registration fee of $10 for each mobilehome lot located within a park that is subject to the MRL. (Mobilehome Dispute Resolution Fund)

SUPPORT: (Verified 8/13/26)

Golden State Manufactured-home Owners League, INC. (Source)
City of Citrus Heights

OPPOSITION: (Verified 8/13/26)

California Mobilehome Parkowners Alliance
Western Manufactured Housing Communities Association

ARGUMENTS IN SUPPORT: According to the author, "Recognizing the significant increase in housing costs and the ongoing instability that many people face, I am committed to ensuring that residents of mobile home parks feel secure and at ease in their living situations. Through the Mobilehome Residency Law Act, we aim to establish comprehensive protections that shield residents from unfair practices, such as arbitrary rent hikes, unjust evictions, and exploitation by park owners. By creating a more equitable framework, we strive to foster a supportive and stable community for all mobile home park residents."

ARGUMENTS IN OPPOSITION: Park owners oppose extending the sunset of the MRLLP, stating that the program "has not been a successful experiment and is

simply costing residents and parkowners money." They argue that although the program is underutilized, it continues to collect a $10 lot fee from residents. Park owners are also concerned that this bill requires HCD to refer to the AG what it in good faith selects as the most severe and impactful allegation, as they feel this requirement could enable complaints that are not legitimate to be referred.

ASSEMBLY FLOOR: 69-1, 1/26/26 - See last page for vote

SUBJECT: Community colleges: baccalaureate degree program: Southwestern Community College District

SOURCE: Southwestern Community College District

DIGEST: This bill authorizes the California Community Colleges (CCC) Chancellor to allow Southwestern Community College District to offer four workforce-aligned baccalaureate degree programs, outside of the existing CCC baccalaureate degree approval process. It further requires an interim and final report from the Legislative Analyst's Office (LAO), and sunsets the provisions of the bill on January 1, 2037.

Senate Floor Amendments of 8/21/26 make the provisions of the bill inoperative if AB 2694 (Alvarez, 2026), SB 960 (Cabaldon, 2026), or both bills are enacted and take effect by January 1, 2027.

ANALYSIS:

Existing law:

1) Differentiates the missions and functions of public and independent institutions of higher education. Under these provisions:

   a) The primary mission of the California State University (CSU) is to offer undergraduate and graduate instruction through the master's degree in the liberal arts and sciences and professional education, including teacher education. The CSU is authorized to establish two-year programs only when mutually agreed upon by the Trustees and the CCC Board of Governors. The CSU is also authorized to jointly award the doctoral degree with the University of California (UC) and with one or more independent institutions of higher education.

   b) The UC provides undergraduate and graduate instruction and has exclusive jurisdiction in public higher education over graduate instruction in the professions of law, medicine, dentistry, and veterinary medicine. The UC is also the primary state-supported academic agency for research.

   c) The independent institutions of higher education provide undergraduate and graduate instruction and research in accordance with its respective mission.

   d) The mission and function of the CCCs are to offer academic and vocational instruction at the lower division level, and the CCCs are authorized to grant the associate degrees. The CCCs are also required to offer learning supports to close learning gaps, English as a Second Language instruction, and adult noncredit instruction, and support services which help students succeed at the postsecondary level. (Education Code (EC) § 66010.4)

2) Authorizes the CCC Board of Governors, in consultation with the CSU and the UC, to establish baccalaureate degree programs that do not duplicate a baccalaureate degree program offered by the CSU or UC. Allows for the approval of 30 CCC baccalaureate degree programs per academic year. Current law further requires the CCC Chancellor to consult with and seek feedback from the CSU Chancellor, the UC President, and the President of the Association of Independent California Colleges and Universities on proposed baccalaureate degree programs, as specified, and establishes a mechanism for the assessment, consultation, and approval of programs where duplication is identified, as specified. (EC § 78040 et seq.)

3) Requires the CSU Trustees to ensure that any changes in the admission criteria for campus admission comply with specified consultation, public meeting,

notification, and disclosure requirements, and prohibits any change from becoming effective until one year has elapsed, or six months, if the change is based upon the resources of the local service area of the affected campus. Applies these requirements to all changes in the admission criteria that affect eligibility of local service area applicants, including changes to transfer requirements and determinations regarding impaction of majors. (EC § 89030.5)

This bill:

1) Authorizes the CCC Chancellor to authorize the Southwestern Community College District to offer no more than four workforce-aligned baccalaureate degree programs, one in each of the following fields:

   a) Forensic Studies.

   b) Allied Health Education and Leadership.

   c) Interaction Design.

   d) Teaching English to Speakers of Other Languages (TESOL).

2) Requires that the CCC Chancellor ensure that the application and review procedures and requirements related to the application period and timelines are met for any authorized program.

3) Requires the Southwestern Community College District to submit proposals for baccalaureate degree programs to be authorized pursuant to the bill's provisions to the CCC Chancellor and requires that the proposals include all of the following:

   a) Data supporting the regional labor market demand for the proposed degree program.

   b) Data demonstrating the lack of availability of the proposed degree program at the regional public universities or the inability of a degree program offered at a regional public university to meet the demand for the skilled degree workforce in the region.

   c) Evidence of collaboration that prioritizes structured partnerships

between the Southwestern Community College District and regional public universities to avoid unnecessary duplication and to expand access to baccalaureate degrees. The structure of partnerships may include, but not be limited to, any of the following:

i) Guaranteed transfer agreements.

ii) 2 + 2 articulation agreements.

iii) Dual enrollment pathways with high school and public university partners such as 1+1+2 models.

iv) Credit for prior learning.

v) Shared use of facilities to support co-location or cross-location delivery models.

d) Evidence of program approval through the appropriate accreditation body, if necessary.

4) Specifies that full-time equivalent students enrolled in a baccalaureate program authorized by this bill's provisions will be included in the existing funding model developed and adopted consistent with the fee provisions for community college baccalaureate degree programs, as specified.

5) Requires the LAO to conduct and present to the Legislature and to the Governor an interim evaluation by July 1, 2031, and a final evaluation by July 1, 2035, of any baccalaureate degree programs offered under this bill that includes information about completion rates and program impact on underserved and underprepared students, among other things.

6) Requires the Southwestern Community College District to provide the information necessary to conduct the evaluations, as determined by the LAO, to the CCC Chancellor and requires the Chancellor to provide that information to the LAO upon request.

7) Sunsets this bill's provisions on January 1, 2037.

8) Makes the provisions of the bill inoperative if AB 2694 (Alvarez, 2026), SB 960 (Cabaldon, 2026), or both bills are enacted and take effect by January 1, 2027.

9) States that a special statute is necessary and that a general statute cannot be made applicable because of the unique position of the Southwestern Community College service area, being in an underserved college desert area.

Comments

Need for the bill. According to the author, "South County San Diego is one of the largest regions in California without a public university offering bachelor's degrees, leaving many residents, particularly working adults, place bound students, and transit dependent families, without realistic access to the credentials required by today's regional economy. While Southwestern College has long standing partnerships with UC San Diego, San Diego State University, CSU San Marcos, and the City of Chula Vista, existing public university capacity and proximity are not sufficient to meet local bachelor's level workforce demand.

"AB 664 is a targeted, place based pilot grounded in years of faculty led, regionally driven research and intersegmental collaboration. The workforce aligned bachelor's degree programs contemplated by the bill were identified through sustained academic planning, labor market analysis, and program mapping conducted by faculty in coordination with regional UC and CSU partners. These efforts were undertaken to ensure that any proposed programs respond to documented workforce needs while avoiding unnecessary duplication.

"The bill authorizes Southwestern College to offer a limited number of bachelor's degree programs in fields not adequately served by regional universities, requires collaboration with UC, CSU, and local partners, and includes evaluation and sunset provisions to ensure accountability. AB 664 is not intended to predetermine future university governance or siting decisions. Instead, it serves as a near term, collaborative step within the broader intersegmental strategy already endorsed by the Legislature and Governor to expand higher education access in South County.

"By allowing the region to address immediate access and workforce gaps while generating data on demand, program viability, and intersegmental coordination, AB 664 supports informed, evidence based planning for the future of higher education in South County San Diego."

Mission differentiation. The state has four segments of higher education: three public and one private. Each plays a vital and unique role for the state and its students. Their mission statements are outlined in state statute. The CCCs are to have an open admission policy and bear the most extensive responsibility for lower-division undergraduate instruction. Its primary area of mission includes academic and vocational instruction leading to associate degrees and university transfer, career technical education, and remedial education. The primary mission of the CSU is undergraduate and graduate instruction through the master's degree. The UC was granted the sole authority to offer doctoral degree programs and is the state's primary research institution. Despite the differentiation of mission, the Legislature has authorized the CSU and CCCs to go beyond their original mission to offer doctoral degrees and baccalaureate degree programs, respectively, so long as programs do not duplicate those offered by the other segments with primary jurisdiction. Further expansion of CCC baccalaureate degree authority, as proposed in this bill, would signal the Legislature's willingness to allow CCCs to potentially deviate further from their core mission, duplicate programs offered by a segment with primary jurisdiction, and bypass the existing CCC baccalaureate approval process.

Existing CCC Baccalaureate degree program. SB 850 (Block, Chapter 747, Statutes of 2014) authorized the Board of Governors, in consultation with the CSU and the UC, to establish a CCC baccalaureate degree pilot program. The pilot program included 15 participating CCC Districts to offer one baccalaureate degree program each to meet local workforce needs, as long as it did not duplicate a baccalaureate degree program already offered by the CSU or the UC. The original pilot led to the statewide authorization established by AB 927 (Medina, Chapter 565, Statutes of 2021), which allows the CCC Board of Governors to approve qualifying programs twice a year on an ongoing basis. Today, as reported on the CCC Chancellor's website, there are more than 50 approved CCC baccalaureate programs statewide, primarily in applied and workforce-related fields such as health care, industrial technology, and public safety. Specific degree offerings include respiratory care, mortuary science, industrial automation, and public safety management. These programs are intended to address unmet regional workforce needs rather than broad expansion into traditional academic fields of study. Since 2017, approximately 1,893 students have attained a CCC bachelor's degree, with 293 completed in the 2023-2024 academic year. Rather than expanding access through that existing statewide process, this bill establishes a separate statutory pathway applicable only to Southwestern Community College District.

District specific authorizations could result in a patchwork of district specific statutes. As mentioned, existing law establishes a uniform process for approving community college baccalaureate degree programs that applies equally to all community college districts. This bill instead creates a district-specific exception authorizing Southwestern Community College District to seek approval from the CCC Chancellor for four specified programs under separate statutory authority. The District would be required to demonstrate regional workforce demand, show that existing public universities cannot adequately meet that demand, and provide evidence of collaboration with regional public universities before programs could be authorized. This bill also requires interim and final evaluation by the LAO before the authority sunsets in 2037. While this bill attempts to address the higher education needs of South San Diego County, creating regional exceptions based on the circumstances of a single community college district could encourage similar requests from other regions and result in a patchwork of district-specific statutes rather than a consistent statewide policy. Targeting underserved regions, workforce shortages, or limited access to nearby public university programs may warrant additional flexibility for community college baccalaureate degrees. However, those policy questions may be better addressed through statewide changes that establish objective criteria applicable to all community college districts, rather than through legislation tailored to a single community college district.

TESOL degree. Under this measure, Southwestern Community College District may seek approval to offer baccalaureate degree programs in Forensic Studies, Allied Health Education and Leadership, Interaction Design, and TESOL. According to the Southwestern Community College District, the proposed bachelor's degree in TESOL is intended to prepare graduates for careers in adult education, workforce English training, instructional coordination, and other settings that do not require a California teaching credential. The Southwestern Community College District further states that the program is not intended to serve as a K-12 teacher preparation program or satisfy California's credentialing requirements. Rather, graduates interested in becoming K-12 teachers would pursue a post-baccalaureate credential program offered through the applicable four-year university. While this explanation provides helpful context, this bill does not specify the intended scope or purpose of the proposed TESOL degree. Because "Teaching English to Speakers of Other Languages" could reasonably be interpreted by prospective students as preparation to teach in California public schools, the absence of clarifying language may create uncertainty regarding the careers for which the degree is designed.

Alternative solutions include intersegmental collaboration. This bill requires the Southwestern Community College District to demonstrate that it has explored partnership opportunities with the CSU and the UC before seeking approval to offer a baccalaureate degree program. This requirement recognizes the state's goals for intersegmental collaboration where feasible. If it is the desire of the Legislature to expand access to baccalaureate degree programs, arguably, more effective and efficient alternatives do not require a departure from the CCC's mission but instead could focus on expanding and streamlining bachelor's degree pathways between CCCs and public or nonprofit universities. There are numerous examples of successful CCC/CSU pathway partnerships across the state, including Sonoma State University's (SSU) liberal studies bachelor's degree completion program, which provides upper-division instruction to transfer students taught by SSU faculty on the Mendocino Community College campus. This model brings the university to CCC students, building on the strengths of each segment. Further, in its recommendation for alternatives to the original CCC baccalaureate degree pilot program, the LAO's evaluation of the original pilot notes that improving alignment between CCC and the universities could increase the number of CCC students who ultimately obtain a bachelor's degree and reduce the amount of time students take to obtain a bachelor's degree. The LAO report asserts that CCCs and university pathways could not only be more cost-effective but also benefit more students (including place-bound students), thereby having a more widespread impact. Additional state efforts to strengthen intersegmental partnerships could provide another pathway for expanding bachelor's degree access without having to expand independent CCC programs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee analysis, this bill would have the following fiscal impact:

- The Chancellor's Office indicates that the estimated one-time Proposition 98 General Fund costs of $80,000 to $138,000 for the Southwestern Community College District to implement up to four new workforce-aligned baccalaureate degree programs could be absorbed within existing resources, while the ongoing costs of providing these programs would be offset by state apportionments and student fee revenues. These costs would include the design of academic standards and student learning outcomes, updates to existing curriculum, and implementation of new courses.

- The Chancellor's office estimates one-time General Fund workload costs of up to $33,000 to develop the application for the college, issue guidance, and provide technical assistance.

- This bill could result in one-time General Fund costs, potentially in the high tens of thousands to low hundreds of thousands of dollars, for the Legislative Analyst Office (LAO) to complete the report and submit it to the Legislature each year. It may also impact the ability of the LAO to fulfill other existing or future legislative mandates and requests, as the LAO's budget is subject to the Legislature's constitutional spending cap.

OPPOSITION: (Verified 8/24/26)

California Faculty Association
California State University, Office of the Chancellor
University of California

ARGUMENTS IN SUPPORT: The Southwestern Community College District argues, in part, "AB 664 addresses only the bachelor's-level workforce gaps that remain even with University Center partnerships in place; programs where no local public university offers a pathway to placebound students in South San Diego County, even with co-located university partners on campus. No more than four programs may be authorized, collaboration with university partners is required first, and every authorization runs through the Chancellor's established review process. AB 664 does something a broader access bill cannot: it generates documented, independently assessed evidence of what regional intersegmental

collaboration looks like when it works. We built this pilot to be evaluated; not just the programs, but the entire collaboration model. We want the LAO's findings to give the Legislature an honest picture of what this model produced and what it would take to build on it."

ARGUMENTS IN OPPOSITION: The CSU argues, in part, that "The CSU supports the author's intent to expand access to higher education in South San Diego County and the City of Chula Vista. In the past year, San Diego State University and California State University San Marcos have worked to address the region's workforce needs as identified by Southwestern College through the development of various "2+2" programs. This has included work toward establishing in-person baccalaureate degree programs in nursing, psychology, business administration, computer information systems and cyber security at Southwestern College's campus in Chula Vista. However, AB 664 would undermine the collaboration at the heart of these partnerships. We encourage Southwestern Community College District to pursue their baccalaureate degree proposals through the AB 927 process that is prescribed in state law. As noted earlier, there have been 52 baccalaureate degree programs created at community colleges throughout the state. If there are problems with the AB 927 process, we welcome conversations on how to improve, rather than circumvent, the process. The CSU is willing to engage in conversations that improve the AB 927 process to provide better outcomes for the students we serve."

SUBJECT: Criminal procedure: indigent defense compensation

SOURCE: California Attorneys for Criminal Justice; California Public Defenders Association; Silicon Valley De-Bug; Smart Justice

DIGEST: This bill, beginning January 1, 2028, establishes requirements for contracts or other memorandum of understanding for indigent services between a county or court and a law firm, and prohibits a county or court from entering into a flat fee or per case compensation contract for indigent defense services for any case in which a special circumstances murder is charged, or any other cases with charges carrying a potential sentence of death or life without the possibility of parole.

ANALYSIS:

Existing law:

1) States that a defendant in a criminal case has the right to, among other things, the assistance of counsel for their defense and to be personally present with

counsel. (California Constitution (Cal. Const.), art. I, § 15; U.S. Const., Amend. VI.)

2) Provides that any case in which a person desires but is unable to employ counsel, and in which counsel is assigned in the superior court to represent the person in a criminal trial, proceeding, or appeal, the following assigned counsel shall receive a reasonable sum for compensation and for necessary expenses, in an amount determined by the court, to be paid out of the general fund of the county:
   a) In a county or city and county in which there is no public defender;
   b) In a county of the first, second, or third class where there is no contract for criminal defense services between the county and one or more responsible attorneys;
   c) In a case in which the court finds that, because of a conflict of interest or other reasons, the public defender has properly refused; and,
   d) In a county of the first, second, or third class where attorneys contracted by the county are unable to represent the person accused. (Penal (Pen.) Code, § 987.2, subd. (a).)

3) Allows the sum of compensation to be paid to assigned counsel to be determined by a contract between the court and one or more responsible attorneys after consultation with the board of supervisors as to the total amount of compensation and expenses to be paid. Provides that the amount of compensation awarded be within the amount of funds allocated by the board of supervisors for the cost of assigned counsel in those cases. (Pen. Code, § 987.2, subd. (b).)

4) Provides that whenever a court-appointed attorney is entitled to reasonable compensation and necessary expenses, the judge of the court shall consider the following factors, no one of which alone shall be controlling:
   a) Customary fee in the community for similar services rendered by privately retained counsel to a non-indigent client;
   b) The time and labor required to be spent by the attorney;
   c) The difficulty of the defense;
   d) The novelty or uncertainty of the law upon which the decision depended;
   e) The degree of professional ability, skill, and experience called for and exercised in the performance of the services; and,
   f) The professional character, qualification, and standing of the attorney. (Pen. Code, § 987.3.)

5) Encourages counties that utilize an assigned private counsel system to do all of the following:
   a) Establish panels that shall be open to members of the State Bar of California;
   b) Categorize attorneys for panel placement on the basis of experience;
   c) Refer cases to panel members on a rotational basis within the level of experience of each panel, except as specified; and,
   d) Seek to educate those panel members through an approved training program. (Pen. Code, § 987.2, subds. (c).)

6) Provides that in specified counties, the court shall first utilize the services of the public defender to provide criminal defense services for indigent defendants. In the event that the public defender is unavailable and the county and the courts have contracted with one or more responsible attorneys or with a panel of attorneys to provide criminal defense services for indigent defendants, the court shall utilize the services of the county-contracted attorneys prior to assigning any other private counsel. (Pen. Code, § 987.2, subd. (d).)

7) Provides that in the specified counties, if the public defender is unavailable and the county has created a second public defender and contracted with one or more responsible attorneys or with a panel of attorneys to provide criminal defense services for indigent defendants, and if the quality of representation provided by the second public defender is comparable to the quality of representation provided by the public defender, the court shall next utilize the services of the second public defender and then the services of the county-contracted attorneys prior to assigning any other private counsel. (Pen. Code, § 987.2, subd. (e).)

8) Requires counsel be appointed in a misdemeanor case, if a person desires but is unable to employ counsel, and it appears that the appointment is necessary to provide an adequate and effective defense for the defendant. (Pen. Code, § 987.2, subd. (i).)

9) Provides that in capital cases or cases with indigent defendants, counsel may request the court for funds for the specific payment of investigators, experts, and others for the preparation or presentation of the defense. (Pen. Code, § 987.9, subd. (a).)

10) States that in assigning defense counsel in felony cases, whether it is the public defender or private counsel, the court shall only assign counsel who represents, on the record, that they will be ready to proceed with the preliminary hearing or

trial within the time periods prescribed for these hearings, except in unusual cases, as specified. (Pen. Code, § 987.05.)

This bill:

1) Requires, as of January 1, 2027, a contract or memorandum of understanding between a county or court and a law firm, individual attorney, or other legal entity for the provision or administration of indigent defense services to comply with the following:
   a) The county or court must consider the following when preparing a contract or memorandum of understanding for indigent defense services:
      i) California Standards for Contract and Panel Defense Systems.
      ii) The full workload and professional responsibilities of the attorney or firm, including time for work in other cases in addition to work performed pursuant to the indigent services contract.
      iii) The National Public Defense Workload Study by the RAND Corporation published in 2023, or a later workload study identified by the Office of the State Public Defender (OSPD) and agreed upon by the California Public Defenders Association and California Attorneys for Criminal Justice.
   b) Requires attorneys to comply with ethical rules of representation and make reasonable efforts to meet with their clients outside of court appearances.
   c) Requires, if the contract is with a private entity or law firm to manage indigent defense services, there must be a provision requiring the contractor to maintain a website with contact information, as specified. Requires attorneys to have a phone number that accepts jail and prison calls and a functional voicemail.
   d) Requires the contract amount and structure to ensure that attorneys have the resources and time necessary to consult with clients, assess discovery, conduct fact investigations, file motions, and perform any other relevant tasks to ensure competent legal representation.
   e) Requires all contracts to identify the amount of funds allocated for attorney's fees and separately specify the amount of any allocation for any case-related defense services, including, but not limited to, investigators, social workers, and immigration counsel. Requires these ancillary service funds to be separate and in addition to funds allocated for attorney compensation, and states there is not a penalty for contracted attorneys accessing those funds.

2) Prohibits a county or court from entering into flat fee or per case compensation contracts for the administration or provision of indigent defense services for any

case in which a special circumstances murder is charged, or any other cases with charges carrying a potential sentence of death or life without the possibility of parole. Specifies that "flat fee" means a compensation structure that provides a fixed dollar amount for each case, or for an unlimited number of cases, without regard to the actual time and resources required to provide competent and zealous representation in each case.

3) Requires the contract to include a provision that affords the contractor a process to seek a modification of the contract amount if the number of cases handled or the costs of providing competent legal representation exceed the amount reasonably contemplated at the beginning of the contract period.

4) Requires that counties that contract with a private entity or law firm to provide indigent defense services for that county shall provide these contracts for indigent defense services to the OSPD every two years, beginning on January 1, 2028.

5) Makes these provisions applicable to any memorandum of understanding, contract, contract amendment, or contract extension for the provision or administration of indigent defense services entered into or elected by any county or court in California on or after January 1, 2028.

Background

The U.S. and California constitutions provide every criminal defendant a right to legal representation, regardless of their ability to pay for an attorney. (Cal. Const. art. I, § 15; U.S. Const., Amend. VI.) In California, there is no statewide governance of how indigent defense services are provided. Instead, each county has established its own system for providing attorneys to indigent defendants. (https://www.ppic.org/blog/californias-leading-role-in-providing-criminal-defense-to-the-poor/.) According to a 2023 report by the OSPD, 33 counties use a county public defender's office as the primary way to provide indigent defense services, meaning the attorneys representing most indigent defendants are county employees. Twenty-one counties use a contract model, meaning the county has a contract with a law firm or with individual attorneys who are paid by the county to represent criminal defendants. Most counties contract for some level of services, including for "conflict counsel" – attorneys who can represent a defendant when a conflict of interest prevents another attorney from providing representation. There are currently no statewide standards for contracts for indigent defense services.

This bill establishes uniform requirements for contracts for indigent defense services. This bill requires each county to submit its contracts to OSPD but does not provide OSPD with direct oversight over the contracts. Perhaps most significantly, the bill prohibits a county or court from entering into a flat fee contract for indigent defense services for any case in which a special circumstances murder is charged, or any other cases with charges carrying a potential sentence of death or life without the possibility of parole.

By banning flat fee contracts and revising the process and requirements when contracting for or otherwise entering into agreements for indigent defense services, this bill is directed at providing better compensation for these services, and, as a result, better representation for indigent defendants.

FISAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Costs (local funds, General Fund) of an unknown but potentially significant amount to counties affected by the contracting requirements in this bill. Counties with contracts that already comply will likely not incur any costs. However, counties with non-complying contracts may incur potentially significant workload costs to ensure new contracts meet the bill's requirements. General Fund costs will depend on whether each of the duties imposed by this bill constitute a reimbursable state mandate, as determined by the Commission on State Mandates.

Unknown, potentially minor and absorbable costs to Judicial Council (Trial Court Trust Fund, General Fund) to ensure contracts comply with this bill's requirements. The Judicial Council notes that the courts are responsible for providing indigent defense counsel at the appellate level. While the courts may be involved in the decision at the trial court level of who is provided an indigent defense counsel contract, it is ultimately the counties who enter into the contract and pay for this service. The Judicial Council does not anticipate this bill to impact the appellate contracts as they already meet the requirements of the bill. At the trial court level, some rural courts have noted concerns about the ability to contract with qualified attorneys under these new provisions and flagged general concerns about the references to the RAND study and the Office of the State Public Defender (OSPD) standards being overly broad. While the trial courts' budgets will not be directly impacted by these changes, there may be some operational and workload aspects as courts work with their county partners to approve and enter into these contracts.

Minor and absorbable costs (General Fund) to the OSPD. OSPD does not anticipate this bill to have a meaningful fiscal impact on its operations. OSPD reports that collecting contracts on a biannual basis can be absorbed by current staff. If an evaluation of the contracts to determine whether flat fees were utilized, that could also be conducted on a biannual basis with current staffing levels. The only anticipated costs would be minor increases to data storage and online publication costs that are unlikely to be realized prior to 2029.

UC Student Association

DIGEST: This bill prohibits California public universities, beginning January 6, 2027, from disqualifying a student for employment due to their failure to provide proof of federal employment authorization.

ANALYSIS:

Existing federal law:

1) Makes it unlawful for a person or other entity to:
   a) hire, recruit, or refer for a fee for employment in the United States an individual without authorization to work in the United States when the person or other entity knows the individual is not authorized to work in the United States; and
   b) hire for employment in the United States an individual without complying with specified employment authorization verification processes, or, if the person or other entity is an agricultural association or employer or farm labor contractor, to hire, recruit, or refer for a fee an individual for employment without complying with specified employment authorization verification processes. (8 United States Code (U.S.C.) § 1324a(a).)

2) Establishes the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) and specifies that certain immigrants shall not be eligible for any state or local public benefit, except as provided.
   a) Defines "state or local public benefit" to mean the following:
      i. any grant, contract, loan, professional license, or commercial license provided by an agency of a state or local government, or by appropriated funds of a state or local government; and
      ii. any retirement, welfare, health, disability, public or assisted housing, postsecondary education, food assistance, unemployment benefit, or any other similar benefit for which payments or assistance are provided to an individual, household, or family eligibility unit by an agency of a state or local government or by appropriated funds of a state or local government.
   b) Provides specified state or local public benefits that are exempt from the prohibition in (1). (8 U.S.C. § 1621.)
   c) Specifies that a state may provide that undocumented immigrants who are not lawfully present in the United States are eligible for a state or local public benefit for which the individual would otherwise be ineligible under this Act only through the enactment of a state law after August 22, 1996, that affirmatively provides for that eligibility. (8 U.S.C. § 1621(d).)

Existing state law:

1) Establishes the University of California (UC) as a public trust to be administered by the Regents of the UC; and grants the Regents full powers of

organization and government, subject only to such legislative control as may be necessary to insure security of its funds, compliance with the terms of its endowments, statutory requirements around competitive bidding and contracts, sales of property and the purchase of materials, goods, and services. (Art. IX, Sec. (9)(a), California Constitution.)

2) Confers upon the California State University (CSU) Trustees the powers, duties, and functions with respect to the management, administration, and control of the CSU system and provides that the Trustees are responsible for the rule of government of their appointees and employees. (Education (Edu.) Code §§ 66606, 89500, et seq.)

3) Establishes the California Community Colleges (CCCs) under the administration of the Board of Governors of the CCC, as one of the segments of public postsecondary education in this state, and specifies that the CCC is comprised of community college districts. (Edu. Code § 70900.)

4) Makes it unlawful for an employer to discriminate against an employee or applicant because of their immigration status, unless the employer can show by clear and convincing evidence that it is required to do so in order to comply with federal immigration law. (2 California Code of Regulations (C.C.R.) § 11028(f)(3).)

This bill:

1) Prohibits the UC, the CSU, and the CCC from disqualifying a student from being hired for an employment position due to their failure to provide proof of federal work authorization, except where:
   a) proof is required by federal law;
   b) proof is required as a condition of a grant that funds the particular employment position for which the student applied.

2) Specifies that, for the purposes of its provisions, the UC, CSU, and CCC must treat the prohibition on hiring undocumented noncitizens in the Immigration Reform and Control Act of 1986 as inapplicable because that provision does not apply to any branch of state government.

3) Specifies that, to the extent that any employment is considered a "benefit" for the purposes of federal law, the bill constitutes authorization by the state to

provide that benefit to undocumented individuals pursuant to the exception in the PRWORA, as described above.

4) Requires that the UC, CSU, and CCC must implement its provisions by January 6, 2027.

5) Specifies that this bill applies to the UC, unless it is found to be inapplicable to the UC, in which case the bill shall apply only to the extent that the UC Regents make it applicable by an appropriate resolution.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The University of California estimates unknown but potentially significant litigation costs, to the extent this bill results in litigation and a legal judgment implicating federal work authorization requirements. There would also be one-time General Fund implementation costs in the mid-hundreds of thousands of dollars to develop systemwide regulations, update internal HR policies, and retrain hiring personnel.

- The Chancellor's Office estimates one-time Proposition 98 General Fund costs of between $936,000 and $1.6 million for the 72 community college districts to update policies and procedures regarding the hiring of undocumented workers and ensure compliance with other state and federal laws (such as income taxes). The Chancellor's Office also estimates one-time General Fund costs of $25,000 to $65,000 to develop Title 5 regulations and issue guidance.

- The California State University (CSU) estimates General Fund costs in the hundreds of thousands of dollars to update CSU policies and provide guidance to campuses. Additionally, the CSU anticipates the bill is likely to be challenged in court which could result in significant but unknown legal costs.

- The Department of Justice does not anticipate significant costs resulting from this bill.

ARGUMENTS IN SUPPORT:

According to the California Immigrant Policy Center, which is a co-source of this bill:

> Currently, many students are not eligible for student employment opportunities solely due to their immigration status. This prevents these students from filling vacancies on campuses, and enriching both themselves and our public higher education institutions. We believe that this legislation is consistent with the state's commitment to advance access, affordability, equity, and success for all students. However, despite that commitment, undocumented students continue to be blocked from essential opportunities. Currently, thousands of students in California are unjustly barred from obtaining paying jobs on campus—including experiential jobs and jobs needed to complete their degrees.
>
> Legal scholars have identified that the federal prohibition on hiring undocumented people (the Immigration Reform and Control Act of 1986 (IRCA)) does not apply to state governments when they act as employers, like California's higher education systems. This means that the University of California, California State University, and California Community Colleges can authorize the hiring of all their undocumented students.
>
> Moreover, in August 2025, a California Court of Appeals unanimously ruled that the University of California's policy denying educational employment opportunities to undocumented students is discriminatory. In October 2025, the California Supreme Court affirmed the lower court's ruling. This ruling clearly opens the door for California to pass AB 713 and remedy this discriminatory practice.
>
> Amidst ongoing federal attacks on our immigrant communities, including students, California must remain steadfast in its commitment to advance dignity and justice for all Californians. By passing AB 713, California will once again

serve as a model for the rest of the nation in our ability to truly provide support to our undocumented students. We strongly urge your support on AB 713.

SUBJECT: Sexually violent predators: schools

SOURCE: Author

DIGEST: This bill prohibits a sexually violent predator (SVP) from residing within one-quarter mile of a day care center and provides that home schools are included within the definition of a private school for purposes of SVP residency restrictions.

ANALYSIS:

Existing law:

1) Provides for the civil commitment for psychiatric and psychological treatment of a prison inmate found to be an SVP after the person has served their prison commitment. This is known as the Sexually Violent Predator Act ("SVPA"). (Welfare & Institutions (Welf. & Inst.) Code, § 6600, et seq.)

2) Defines a "sexually violent predator" as "a person who has been convicted of a sexually violent offense against at least one victim, and who has a diagnosed mental disorder that makes the person a danger to the health and safety of

others in that it is likely that he or she will engage in sexually violent criminal behavior." (Welf. & Inst. Code, § 6600, subd. (a)(1).)

3) Permits a person committed as an SVP to be held for an indeterminate term upon commitment. (Welf. & Inst. Code, §§ 6604 & 6604.1.)

4) Establishes a process whereby a person committed as an SVP can petition for conditional release or an unconditional discharge with or without the recommendation or concurrence of the Department of State Hospitals (DSH). Provides that a hearing upon the petition cannot be held until the person who is committed has been under commitment for one year from the date of the order for commitment. (Welf. & Inst. Code, § 6608, subds. (a) & (f).)

5) Requires the court to hold a hearing to determine whether the person would be a danger to the health and safety of others in that it is likely that the person will engage in sexually violent criminal behavior due to the person's diagnosed mental disorder if under supervision and treatment in the community. (Welf. & Inst. Code, § 6608, subd. (g).)

6) Provides that before placing a person on conditional release, the community program director designated by DSH must submit a written recommendation to the court stating which forensic conditional release program is most appropriate for supervising and treating the person. (Welf. & Inst. Code, § 6608, subd. (h).)

7) Requires, after a judicial determination that a person should be conditionally released, the person to be placed in the county of domicile of the person prior to the person's incarceration, unless both of the following conditions are satisfied: the court finds that extraordinary circumstances require placement outside the county of domicile and the designated county of placement was given prior notice and an opportunity to comment on the proposed placement of the committed person in the county. (Welf. & Inst. Code, § 6608.5, subd. (a).)

8) Defines "county of domicile" as "the county where the person has their true, fixed, and permanent home and principal residence and to which the person has manifested the intention of returning whenever the person is absent." Specifies the information the court must consider when determining the county of domicile. Provides that if no information can be identified or verified, the county of domicile of the individual is considered to be the county in which the person was arrested for the crime for which the person was last incarcerated in

the state prison or from which the person was last returned from parole. (Welf. & Inst. Code, § 6608.5, subd. (b).)

9) Defines "extraordinary circumstances" to mean "circumstances that would inordinately limit the department's ability to effect conditional release of the person in the county of domicile." (Welf. & Inst. Code, § 6608.5, subd. (c).)

10) Requires specified government officials from the county of domicile to provide assistance and consultation in the process of locating and securing housing within the county for persons committed as SVPs who are about to be conditionally released. (Welf. & Inst. Code, § 6608.5, subd. (d).)

11) Requires DSH or its designee to consider the following in recommending a specific placement for community outpatient treatment: the concerns and proximity of the victim or the victim's next of kin and the age and profile of the victim or victims in the sexually violent offenses committed by the person subject to placement. Provides that the "profile" of a victim includes, but is not limited to, gender, physical appearance, economic background, profession, and other social or personal characteristics. (Welf. & Inst. Code, § 6608.5, subd. (e).)

12) Prohibits a conditionally-released person from being placed within a quarter-mile of any public or private school providing instruction in kindergarten through twelfth grade if the court finds that the person has "a history of improper sexual conduct with children" or has previously been convicted of specified sex offenses. (Welf. & Inst. Code, § 6608.5, subd. (f).)

13) Requires the court, if the committed person is ordered to be conditionally released in a county other than the county of commitment due to extraordinary circumstances, to order that jurisdiction of the person and all records related to the case be transferred to the court of the county of placement. (Welf. & Inst. Code, § 6608.5, subd. (g).)

This bill:

1) Prohibits an SVP from residing within one-quarter mile of a day care center if the person has been convicted of child molestation or continuous sexual abuse of a child. Prohibits the subsequent establishment of a day care center from rendering an existing placement of an SVP noncompliant. Specifies that an existing placement includes, but is not limited to, any placement location where

a person is placed, or where a person was placed before the revocation of their conditional release and that person is later returned to that placement location. Defines at the time of placement to mean when the location was recommended or proposed, as specified, or was identified and is being considered, whichever comes first.

2) Defines "private school" as a facility or home that has filed a private school affidavit with the State Department of Education (CDE), that provides private school instruction to any student between 6 to 18 years of age, inclusive, and is publicly listed on the directory maintained by CDE.

3) Provides that a home school is only considered a private school, as defined, if it was operating as a home school at the time of the SVP's placement. Prohibits the subsequent establishment of a private school, including a private school that is a home, from rendering an existing placement of an SVP noncompliant. Specifies that an existing placement includes, but is not limited to, any placement location where a person is placed, or where a person was placed before the revocation of their conditional release and that person is later returned to that placement location. Defines at the time of placement to mean when the location was recommended or proposed, as specified, or was identified and is being considered, whichever comes first.

Background

The Sexually Violent Predator Act (SVPA) established an extended civil commitment scheme for sex offenders who are about to be released from prison but are referred to DSH for treatment in a state hospital because they have suffered from a mental illness which causes them to be a danger to the safety of others. The initial screening is conducted by the California Department of Corrections and Rehabilitation (CDCR) and the Board of Parole Hearings. (Welf. & Inst. Code, § 6601, subd. (b).) If a determination is made that the person is likely a sexually violent predator, CDCR is required to refer to the person to DSH for a full evaluation. (*Ibid*.)

Under existing law, a person may be deemed an SVP if: the person has been convicted of specified sex offenses against one or more victims; the person has been diagnosed with a mental disorder that makes the person a danger to the health and safety of others in that it is likely that the person will engage in sexually violent criminal behavior; and, two licensed psychiatrists or psychologists concur in the diagnosis. (Welf. & Inst. Code, §§ 6600, subd. (a), 6601, subd. (d).) If DSH

finds that the person meets the criteria to be considered an SVP, the case is referred to the county's designated counsel who may file a petition for civil commitment. (Welf. & Inst. Code, § 6601, subd. (i).)

Once a petition has been filed, a judge holds a probable cause hearing. (Welf. & Inst. Code, § 6602.) If probable cause is found, the case proceeds to a trial at which the prosecutor must prove beyond a reasonable doubt that the person meets the statutory criteria to be considered an SVP. (Welf. & Inst. Code, § 6604.) If the prosecutor meets this burden, the person can be civilly committed to a DSH facility for treatment.

DSH must conduct an examination of an SVP's mental condition at least annually and submit an annual report to the court. (Welf. & Inst. Code, § 6604.9, subd. (a).) This annual review is prepared by a professionally qualified person. (*Ibid*.) In addition, DSH has an obligation to seek judicial review any time it believes a person committed as an SVP no longer meets the criteria. **(**Welf. & Inst. Code, § 6607.)

Release. Two types of release exist for SVPs—unconditional discharge and conditional release. Both types of release require a petition for release. The petition can be filed with or without the concurrence of the Director of State Hospitals, and the Director's concurrence or lack thereof determines which is process used.

An SVP can, with the concurrence of the Director of State Hospitals, petition for unconditional discharge if the patient "no longer meets the definition of a sexually violent predator," or for conditional release. (Welf. & Inst. Code, § 6604.9, subd. (d).) When the petition is filed for unconditional discharge (i.e., with the concurrence of the DSH), the court must order a show cause hearing. (Welf. & Inst. Code, § 6604.9, subd. (f).) If the court at the show cause hearing determines that probable cause exists to believe that the committed person's diagnosed mental disorder has so changed that he or she is not a danger to the health and safety of others and is not likely to engage in sexually violent criminal behavior if discharged, then the court must hold a hearing on the issue. (Welf. & Inst. Code, § 6605, subd. (a)(2).) At the hearing, the committed person has a right to a jury trial and is entitled to relief unless the prosecuting attorney proves "beyond a reasonable doubt that the committed person's diagnosed mental disorder remains such that he or she is a danger to the health and safety of others and is likely to engage in sexually violent behavior if discharged." (Welf. & Inst. Code, § 6605, subd. (a)(3).)

A person committed as an SVP may also petition the court for conditional release, with or without the recommendation or concurrence of the Director of State Hospitals. (Welf. & Inst. Code, § 6608, subd. (a).) A hearing on the petition cannot be held until the SVP has been under commitment for at least one year. (Welf. & Inst. Code, § 6608, subd. (f).) Upon receipt of a first or subsequent petition from a committed person without the concurrence of the Director, the court is required whenever possible to review the petition and determine if it is based upon frivolous grounds and, if so, to deny the petition without a hearing. (Welf. & Inst. Code, § 6608, subd. (a).) If the petition is not found to be frivolous, the court is required to hold a hearing. (*People v. Smith* (2013) 216 Cal.App.4th 947.)

Once the court sets the hearing on the petition, the petitioner is entitled to both the assistance of counsel and the appointment of experts. (Welf. & Inst. Code, § 6608, subds. (c), (g); *People v. McKee*, *supra*, 47 Cal.4th 1172, 1193.) At the hearing, the court must determine whether the petitioner would be a danger to the health and safety of others which is defined to mean "that it is likely that the person will engage in sexually violent criminal behavior due to the person's diagnosed mental disorder if under supervision and treatment in the community." (Welf. & Inst. Code, § 6608, subd. (h).) At the hearing, the person petitioning for release has the burden of proof by a preponderance of the evidence. (Welf. & Inst. Code, § 6608, subd. (i); *People v. Rasmuson* (2006) 145 Cal.App.4th 1487, 1503.) If the petition is denied, the SVP may not file a subsequent petition until one year from the date of the denial. (Welf. & Inst. Code, § 6608, subd. (j).)

If a person is approved for conditional release, DSH is required to find a suitable housing placement for the person in the community. Existing law requires that the person be placed in the county of domicile prior to the person's incarceration unless the court finds that extraordinary circumstances require placement outside the county of domicile and the designated county of placement was given prior notice and an opportunity to comment on the proposed placement of the committed person in the county. (Welf. & Inst. Code, § 6608.5, subd. (a).) For purposes of determining the county of domicile, the court may consider information found on a California's driver's license, California identification card, recent rent or utilities receipt, printed personalized checks or other recent banking documents, or any arrest record. If no information can be verified, the county of domicile is considered to be the county in which the person was arrested and convicted or last returned on parole. (Welf. & Inst. Code, § 6608.5, subd. (b)(1).) If that county is not suitable, the court, DSH, and CDCR may choose an alternative county for placement.

DSH must consider a number of factors when locating housing. Specifically, a conditionally-released person is prohibited from being placed within a quarter-mile of any public or private school providing instruction in kindergarten through twelfth grade if the court finds that the person has "a history of improper sexual conduct with children" or has previously been convicted of specified sex offenses. (Welf. & Inst. Code, § 6608.5, subd. (f).) DSH must additionally consider the concerns and proximity to the victim or victim's next of kin, and the age and profile of the victim or victims of the sexually violent offenses committed by the person subject to placement. (Welf. & Inst. Code, § 6608.5, subds. (e) & (f).)

A court may approve, modify, or reject the recommended or proposed specific address within a community. The city and the address must be approved by the court. (Welf. & Inst. Code, 6609.1, subd. (a)(5)(A).) Welfare and Institutions Code section 6609.1 requires that a community be given 30 days' notice if an SVP is pending conditional release in that community. (Welf. & Inst. Code, § 6609.1, subd. (a)(4).) Agencies receiving notice of an SVP's placement in a specific county may comment on the placement or location of release and may suggest alternative locations for placement within a community. (Welf. & Inst. Code, § 6609.1, subd. (a)(5)(A), (b).) Notably, if no housing placement has been found and the court has ordered the person to conditional release, the person can be released as a transient. (*Karsai*, *supra*, at p. 788-89.)

Residency restrictions. Existing law prohibits a conditionally-released person from being placed within a quarter-mile of any public or private school providing instruction in kindergarten through twelfth grade if the court finds that the person has "a history of improper sexual conduct with children" or has previously been convicted of specified sex offenses. (Welf. & Inst. Code, § 6608.5, subd. (f).) A private school includes a home school. (*People v. Superior Court (Cheek)*, 87 Cal. App. 5th 373, 380-381.) A school need not be planned or in existence prior to an SVP's placement or notice of an SVP's placement is given to the community. (*Id*. at p. 379.)

Under current law, any person who wants to establish a private school, either in their home or elsewhere, must file an affidavit annually with the Superintendent of Public Instruction stating the business name, the business address, the address of the custodian of records, the name of the directors and officers of the business, the school enrollment, number of teachers, and whether it is co-educational and if not, whether it is for boys or girls, that records are properly maintained, and that all required criminal background checks have been completed. (Ed. Code, § 33190.)

This bill adds day care centers to the existing residency restriction. "Day care center" is defined as "a child day care facility other than a family day care home, and includes infant centers, preschools, extended day care facilities, and schoolage child care centers." (Health & Saf. Code, § 1596.76.) This bill defines "private school" as a facility or home that has filed a private school affidavit with the CDE, that provides private school instruction to any student between 6 to 18 years of age, inclusive, and is publicly listed on the directory maintained by CDE. However, this bill provides that a home school is only considered a private school if it was operating as a home school at the time of the SVP's placement.

This bill prohibits the subsequent establishment of a day care center or a private school, including a private school in a home, from rendering an existing placement of an SVP noncompliant. This bill specifies that an existing placement includes, but is not limited to, any placement location where a person is placed, or where a person was placed before the revocation of their conditional release and that person is later returned to that placement location. This bill defines "at the time of placement" to mean when the location was recommended or proposed, as specified, or was identified and is being considered, whichever comes first.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Major annual costs, likely in the $2 million range to the Department of State Hospitals (DSH) for significantly increase workload to operate the DSH Conditional Release Program for Sexually Violent Predators (CONREP-SVP) and for increased placement-related litigation, including the Department of Justice. Further restricting CONREP-SVP potential housing placements will lengthen the placement process with associated costs though more certainty from defining day care centers and private schools may reduce some placement related costs. Significant ongoing workload to search and assess prospective properties in coordination with county stakeholders via housing committee meetings (General Fund).

Unknown, potentially significant annual costs to house CONREP-SVPs in state facilities due to fewer prospective properties.

Unknown, potentially significant annual sunk costs when a potential housing placement becomes unavailable due to a later licensing of a day care center or private school (General Fund).

SUBJECT: Behested payments: reporting

SOURCE: California Fair Political Practices Commission

DIGEST: This bill requires officials to report behested payments on a quarterly basis directly to the Fair Political Practices Commission (FPPC) using its online system or to a local filing officer, under specified circumstances.

Senate Floor Amendments of 8/20/26 update the language of this bill to ensure that it will not chapter out SB 760 (Allen, Chapter 551, Statutes of 2025).

ANALYSIS:

Existing law:

1) Defines a behested payment as a payment made at the behest of an elected officer or member of the Public Utilities Commission (PUC), among others, that is neither a campaign contribution nor a gift; that is principally for a legislative, governmental, or charitable purpose; and for which elected officer or PUC member does not provide full and adequate consideration in exchange.

2) Requires an elected officer or member of the PUC to report to their agency behested payments made at the behest of that officer or member within 30 days

following the date on which the payment or payments equal or exceed $5,000 in the aggregate from the same source in the same calendar year.

3) Requires that a behested payment report include:

   a) The name and address of the payer;

   b) The amount of the payment;

   c) The date or dates that the payment or payments were made;

   d) The name and address of the payee;

   e) A brief description of the goods or services provided or purchased, if any; and

   f) A description of the specific purpose or event for which the payment or payments were made.

4) Requires that within 30 days of receiving a behested payment report, the state agency must forward the report to the FPPC and the local agency must forward it to the officer with whom elected officers of that agency file their campaign reports.

This bill:

1) Deletes the timelines to report described in 2) of existing law and instead requires that an elected officer or member of the PUC report a payment made at the behest of that officer or member within 30 days following the end of the calendar quarter in which the aggregate amount of payments from the same source in the same calendar year equal or exceed $5,000.

2) Deletes the requirement that behested payment reports be made to the official's agency and instead specifies that elected officers or PUC members making quarterly behested reports file them with:

   a) The FPPC using its electronic behested payment filing system, which shall provide the filer with immediate confirmation of the date and time the report was received.

   b) A local filing officer, if an elected official of that local agency makes the report and if the local government posts all behested payment reports filed within 10 days of receipt.

3) Expands what is statutorily required in a behested payment report as described in 3) of existing law, when known, to include:

   a) If the payee is a nonprofit, a brief description of whether the officer, member of the PUC, member of their family, officeholder staff, or political staff is a board member, executive officer, salaried employee, founding member, or on an honorary or advisory board of the nonprofit organization.

   b) A brief description of any proceeding before the agency of the elected officer or member of the PUC in which the payer of the behest is the named party or subject of a decision and which occurs at the time or in the previous 12 months of the payment.

4) Allows in statute an elected officer or PUC member to estimate payment amounts and dates on behested payment reports under specified circumstances, including when despite good faith efforts by the filer the payer has not provided the information.

5) Requires that once the $5,000 aggregate threshold from a single source has been reported for a calendar year, then an official must file another report within 30 days of the end of any subsequent quarter in which behested payments from that same source equal or exceed $1,000.

Background

Proposition 9, which appeared on the June 1974 ballot, created the Political Reform Act (PRA) and established California's campaign finance and disclosure laws for state and local campaigns, candidates, officeholders, and ballot measures. Proposition 9 further created the FPPC to implement, administer, and enforce the PRA.

The PRA seeks to end corruption by eliminating secret or anonymous contributions. The PRA subjects the campaign activities, personal financial affairs, and the solicitation of charitable or governmental contributions of state and local officials to public review and scrutiny.

In 1996, the FPPC amended its regulatory definition of the term "contribution" to include any payment made "at the behest" of a candidate, regardless of whether that payment was for a political purpose. As a result, any payments made by a third party, even for a governmental or charitable purpose, had to be reported as campaign contributions.

The change in the FPPC regulations, along with a number of advice letters issued by the FPPC interpreting the new definition of "contribution," limited the ability of elected officers to co-sponsor governmental and charitable events. In one advice letter, the FPPC concluded that a member of the Legislature would be deemed to have accepted a campaign contribution if, at his behest, a third party paid for the airfare and lodging for witnesses to testify at a legislative hearing.

In response to the FPPC's modified definition of "contribution," the Legislature enacted SB 124 (Karnette, Chapter 450, Statutes of 1997) which provided that a payment made at the behest of a candidate principally for a legislative, governmental, or charitable purpose is not considered a contribution nor a gift. SB 124 also required that such payments made at the behest of a candidate, who is also an elected officer, when aggregating to $5,000 or more in a calendar year from a single source, be reported to the elected officer's agency. The elected officer must report such a payment within 30 days. Examples of payments made at the behest of an elected officer that have to be reported under this provision of law include charitable donations made in response to a solicitation sent out by an elected officer or donations of supplies and refreshments made by a third party for a health fair that was sponsored by an elected officer.

Comments

1) *Author's Statement.* Behested payments are those made at the request of a public official regardless of whether the payment was for a political purpose. Transparency of and public access to these types of payments are vital to good governance. To increase compliance with reporting requirements, this bill provides more reasonable timeframes, allows direct electronic reporting, and simplifies rules around subsequent payments from the same source. By updating the process and deadline for filing behested payment reports, this bill will provide more flexibility for state and local officials to ensure compliance, while also increasing transparency on both the state and local level.

2) *Codificaton of FPPC Regulations.* In 2021, the FPPC adopted regulations that imposed additional disclosure requirements for behested payment reports in two circumstances:

   - The official at whose behest the payment was made has a specified relationship with a nonprofit organization that is the recipient of the payment; and

- The entity making the behested payment is involved in a proceeding before the official's agency at the time the behested payment is made or within the past 12 months.

The FPPC at that time also adopted a regulation permitting officials to use a "good faith estimate" on a behested payment report when the official makes reasonable efforts but is unable to obtain the exact payment amounts or dates within the time period for filing the behested payment report. This bill codifies these FPPC regulations.

3) *Support if Amended.* California Common Cause recognizes that the proposed reforms in this bill, including default electronic filing with the FFPC, codification of important relationship disclosures, and a clear quarterly filing schedule, will likely improve filer efficiency and public accessibility. Common Cause supports these changes to help improve compliance and, subsequently, public trust in the integrity of government fundraising and charitable solicitation practices. It, however, cannot support this bill without an amendment to remove or significantly lower the proposed $1,000 incremental reporting threshold that applies after the initial $5,000 threshold is reached.

Common Cause writes that limiting subsequent reporting to only those contributions that exceed $1,000 from sources that have already met the $5,000 threshold weakens transparency and accountability. Behested payments can occur at sensitive times, such as when a matter involving the donor is pending before the behesting official, and the public has a legitimate interest in knowing about any payments, regardless of amount, once a donor has reached the $5,000 threshold.

Related/Prior Legislation

AB 867(Cooley, Chapter 749, Statutes of 2017) recast the behested payments law.

SB 124 (Karnette, Chapter 450, Statutes of 1997) differentiated behested payments from contributions and established the process by which they are reported.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Committee on Appropriations:

FPPC would incur first-year costs of $177,000, and $170,000 annually thereafter, to expand the electronic behested payment filing system to cover local officials (General Fund). Specifically, FPPC anticipates (1) increased annual software costs

of $5,000, and (2) personnel costs of $172,000 in the first year and $165,000 ongoing for one additional information technology position.

SUPPORT: (Verified 8/20/26)

California Fair Political Practices Commission (source)
City and County of San Francisco
League of Women Voters of California

OPPOSITION: (Verified 8/20/26)

None received

ARGUMENTS IN SUPPORT: According to the sponsor, by altering the deadline for filing behested payment reports, this bill will make behested payment reports significantly easier to find, thus improving transparency. The change to quarterly behested payment removes uncertain deadlines and creates a set schedule for behested payment reports, similar to the semi-annual and pre-election campaign finance reporting schedules. This change will enable watchdogs, the public, the media, and enforcement to proactively review

SUBJECT: Prisons: facilities for female offenders

SOURCE: Board of Equalization Vice Chair, Sally Lieber

DIGEST: This bill 1) establishes the Division of Female Programs and Services within the California Department of Corrections and Rehabilitation (CDCR); 2) makes changes to the Female Offender Reform Master Plan and associated training; and 3) creates an ombudsperson position solely assigned to adult female institutions.

Senate Floor Amendments of 8/20/26 require that the Gender Responsive Strategies Commission created by this bill consist of 19 members who serve two-year terms and specifies the commission's membership; require the commission to develop formal recommendations and submit them to the Director for Female Programs and Services; and change the deadlines for the required reports to 2027.

ANALYSIS:

Existing law:

1) Establishes the Division of Adult Institutions, the Division of Adult Parole Operations, and the Division of Rehabilitative Programs, all with Directors appointed by the Governor and confirmed by the Senate, under the Undersecretary for Operations within CDCR. (Government (Gov.) Code, § 12838.1, subds. (c)(1)-(2).)

2) Requires the Governor to appoint four subordinate officers, subject to Senate confirmation, to the Division of Adult Institutions, who oversee an identified category of adult institutions, one of which shall be female offender facilities. (Gov. Code, § 12838.1, subd. (d).)

3) Requires CDCR to create a Female Offender Reform Master Plan. Requires CDCR to create policies and operational practices designed to ensure a safe and productive institutional environment for female offenders. (Penal (Pen.) Code, § 3430, subds. (a) & (b).)

4) Requires CDCR to contract with nationally recognized gender responsive experts in prison operational practices staffing, classification, substance abuse, trauma treatment services, mental health services, transitional services, and community corrections to do both of the following:

    a) Conduct a staffing analysis of all current job classifications assigned to each prison that houses only females.
    b) Develop programs and training for department staff in correctional facilities. (Pen. Code, § 3430, subd. (c).)

5) Requires CDCR to create a gender responsive female classification system and a gender responsive staffing pattern for female institutions and community-based offender beds. (Pen. Code, § 3430, subds. (d) & (e).)

6) Requires CDCR to create a needs-based case and risk management tool designed specifically for female offenders, build and strengthen systems of family support and family involvement during the period of the female's incarceration, establish a family service coordinator at each prison that houses only females, and design and implement evidence-based, gender-specific rehabilitative programs, including wraparound educational, health care, mental

health, vocational, substance abuse and trauma treatment programs that are designed to reduce female offender recidivism. (Pen. Code, § 3430, subds. (f)-(i).)

7) Requires CDCR to expand the existing prison ombudsman program to ensure comprehensive deployment of ombudsmen throughout the state prison system with a specific focus on maximum-security institutions. (Pen. Code, § 5066.)

This bill:

1) Establishes the Division of Female Programs and Services within CDCR.

2) Provides, upon an appropriation, that the Director for Female Programs and Services is responsible solely for female adult institutions and community facilities housing female offenders. Requires the director to report to the undersecretary and to have a minimum of five years of experience serving a female correctional population in a custody setting. Requires this position to have policy- and fiscal-level responsibility and decision making authority and to utilize existing departmental functions for services to avoid duplication of functions and responsibilities.

3) Reorganizes gubernatorial appointees within CDCR so that three appointees oversee male adult institutions and one oversees female adult institutions. Specifies that these appointees are subject to Senate confirmation.

4) Requires that CDCR prepare and submit a report on the implementation of the Female Offender Reform Master Plan to the Legislature beginning March 1, 2027, and every three years thereafter.

5) Requires CDCR maintain the plan, including all subsequent updates and reports, in consultation with the Gender Responsive Strategies Commission and with nationally recognized experts in gender responsive prison operational practices, staffing, classification, substance abuse, trauma treatment services, mental health services, transitional services, community corrections, legal advocacy, and incarceration reform.

6) Requires CDCR to post the plan, any reports, and any updates to the plan to the department's website.

7) Requires CDCR to create programs that are designed to ensure a safe and productive institutional environment for female offenders.

8) Requires CDCR to prepare and submit to the Legislature an updated staffing analysis of all current job classifications assigned to each prison that houses women no later than March 1, 2027, and every three years thereafter.

9) Requires CDCR to include in its existing gender-responsive programs and training for staff in correctional facilities training at the academy. Requires 40 hours of initial training with a curriculum specifically focused on working with the population within female institutions and an 8-hour annual training thereafter for those working in a female prison.

10) Requires CDCR to perform a comprehensive review of office's policies and practices and other aspects of women-centered corrections developed to enhance safety and rehabilitative efforts. Provides that the review should engage collaboratively with internal experts, community-based organizations, medical and mental health experts, labor, incarceration reform advocates, and national consultants on best practices to improve all aspects of operational practice and treatment, with an emphasis on sexual safety and gender-responsive, trauma-informed principles.

11) Requires that the Division of Female Programs and Services do both of the following:

    a) Manage and provide oversight of adult female programs, including prisons, conservation camps, and parole and community programs.
    b) Develop gender-responsive, trauma-informed, culturally sensitive approaches to program and policy development that will improve recidivism outcomes for the adult incarcerated and paroled female offenders under the supervision of the department.

12) Requires that the Division of Female Programs and Services is headed by a person who has relevant professional experience in planning and implementing recidivism reduction programs and services that are gender responsive and trauma informed.

13) Requires CDCR to establish the Gender Responsive Strategies Commission to develop active partnerships, involving the community, treatment experts, and related agencies in its efforts toward gender-responsive practice.

14) Requires the commission to be composed of representatives of community-based organizations, expert researchers, policy experts, legislators, union representatives, formerly incarcerated women, legal advocates, and incarceration reform advocates.

15) Requires the commission to meet quarterly and publish minutes for each meeting on the department's internet website.

16) Requires the Undersecretary for Operations to appoint an ombudsperson solely assigned to adult female institutions.

17) Contains other technical and conforming changes.

Background

AB 76 (Lieber, Chapter 706, Statutes of 2007) codified CDCR's then-existing Female Offender Gender Reform Strategy. Penal Code section 3430 requires CDCR to create a Female Offender Reform Master Plan; create policies and operational practices that are designed to ensure a safe and productive environment for incarcerated women; conduct a staffing analysis of all current job classifications assigned to the women's prisons; develop programs and training for department staff in correctional facilities; create a gender-responsive female classification system; create a gender-responsive staffing pattern for women's prisons and community-based offender beds; create a needs-based case and risk management tool designed specifically for women; design and implement evidence-based gender-specific rehabilitative programs; build and strengthen systems of family support and family involvement; and establish a family service coordinator at each women's prison.

CDCR's reform and AB 76 were enacted and implemented during the height of the state's prison overcrowding crisis when the state housed over 173,000 individuals in its prisons, including over 11,000 women, violent incidents were common, and CDCR had not yet made substantial progress toward remedying the deficiencies of its mental health care system.

Since that time, women housed in CDCR facilities have continued to face unique challenges. For example, incarcerated women are more vulnerable to sexual assault than their male counterparts in a carceral setting, and are also more likely to have experienced childhood abuse as well as sexual violence prior to incarceration.

(Wolff et al., *Patterns of Victimization Among Male and Female Inmates: Evidence of an Enduring Legacy*, Violence and Victims (Aug. 2009) available at <https://pmc.ncbi.nlm.nih.gov/articles/PMC3793850/ .) Women are also more likely to be the parent of a minor child. (Leah Wang, *Both sides of the bars: How mass incarceration punishes families* (Aug. 2022) available at <https://www.prisonpolicy.org/blog/2022/08/11/parental_incarceration/ .) And, a 2017 State Auditor report additionally found that women made up a disproportionate percentage of suicides that occurred in the state's prisons. (California State Auditor, *California Department of Corrections and Rehabilitation: It Must Increase Its Efforts to Prevent and Respond to Inmate Suicides*, Report 2016-131 (Aug. 2017), p. 1 available at <https://information.auditor.ca.gov/pdfs/reports/2016-131.pdf .)

The proponents of this bill seek to build on existing law designed to increase safety and improve conditions of confinement for women incarcerated in the state's prisons. To do so, this bill makes a number changes. First, this bill revises the mandates on CDCR related to the Female Offender Reform Master Plan. Specifically, this bill requires the training that is mandated under current law to include training at the correctional officer academy and 40 hours of initial training with a curriculum specifically focused on working with the population housed in female institutions along with subsequent annual training for those working in a women's prison. This bill requires CDCR to perform a comprehensive review of policies and practices as they pertain to women-centered corrections developed to enhance safety and rehabilitative efforts. This bill also requires CDCR to submit regular reports on the implementation of the Female Offender Reform Master Plan.

This bill additionally creates an ombudsperson who is solely assigned to adult female institutions. Finally, this bill establishes the Division of Female Programs and Services which is responsible solely for female adult institutions and community facilities housing female offenders, includes minimum qualifications for the Director of the Division, and requires CDCR to establish the Gender Responsive Strategies Commission composed of a variety of stakeholders to work on gender-responsive practices.

FISCAL EFFECT: Appropriation: No Fiscal Com.:Yes Local:No

According to the Senate Appropriations Committee:

CDCR anticipates this bill would result in ongoing General Fund costs in the range of $5-8 million, as well as one-time costs of $5-7 million. AB 788 would require

CDCR to create a new Director for Female Programs and Services, as well as a separate associate director for women's institutions. The bill articulates that this director shall utilize existing department functions to avoid duplication. While the department would seek to reduce as much duplication as possible, for example by using existing business services, the creation of a new director with policy- and fiscal-decision making responsibility would require significant staff to support that responsibility.

In addition, the bill requires the new Division of Female Programs and Services to have management and oversight of the women on state parole. Currently, Division of Parole Operations (DAPO) parole agents typically manage mixed-gender caseloads, with approximately 94 percent of supervised persons identified as male and 6 percent identified as female. If mixed gender caseloads are divided moving forward, such changes would likely reduce operational efficiency, increase costs for supervision of women on parole, and result in cost pressures in the millions of dollars for DAPO. The bill also expands academy training for staff working in women's facilities. The language currently is not precise about whether staff currently assigned to the women's institutions would be required to receive the 40 hours of training. Assuming current staff are required to receive the training, CDCR would anticipate one-time costs of approximately $5-7 million. Ongoing, the department anticipates training costs of hundreds of thousands of dollars to $1 million.

Finally, CDCR also anticipates significant costs, potentially in the hundreds of thousands of dollars, associated with establishing and administering the Gender Responsive Strategies Commission, which is required to meet quarterly; updating and maintaining the Female Offender Reform Master Plan by March 1, 2026, and triennially thereafter; and performing a comprehensive review of policies, practices, and other aspects of women-centered corrections mandates.

SUBJECT: Carpet recycling

SOURCE: Author

DIGEST: This bill makes numerous substantive changes to the carpet extended producer responsibility program, including adding reporting requirements to grants allocated to apprenticeship programs, requiring $1million be allocated, and requiring that the carpet assessment be external.

Senate floor amendments of 8/21/2026 push back the deadline by which CalRecycle must finalize the regulations for this program January 1, 2028 to January 1, 2029; allows CalRecycle to deem a PRO ineligible to operate the program if they submit a plan that CalRecycle disapproves three times; and specifies that 'knowing and intentional' violations of the act include a violation

that has not been corrected between reporting periods, among other technical changes.

ANALYSIS:

Existing law:

1) Establishes the Carpet Producer Responsibility Program (PRP) (Public Resources Code (PRC) §42968 et seq.) and the Product Stewardship for Carpets Program (PRC §42970 et seq.) to promote the collection and recycling of carpet. The program's provisions:

    a) Establish the Carpet America Recovery Effort (CARE) as the producer responsibility organization (PRO) used in California (PRC §42971).
    b) Require carpet manufacturers and distributors to publish on their internet websites an environmental product declaration identifying the components and the percentage of each component used in the carpet (PRC §42968.4).
    c) Require the PRO to create a funding mechanism that equitably distributes the PRO's costs among participating producers, based proportionally on their California sales volumes (PRC §42968.23).
    d) Require that by January 1, 2029, anyone who removes carpet from a home or business as part of a carpet installation project to have that old carpet taken to an approved collection site (PRC §42968.40).
    e) Require the PRO to submit an annual report to the Department of Resources Recycling and Recovery (CalRecycle) and make it available on the PRO's internet website by July 1 of each year (PRC §42968.62).
    f) Require a PRO organization formed under (a) above to include nonvoting board members with representatives.
    g) Allow CalRecycle to impose a civil penalty of up to $25,000 per day for any violation that is intentional, knowing, or negligent or a civil penalty of up to $10,000 for other violations (PRC §42978).
    h) Beginning July 1, 2025, requires that the program allocate 8 percent of assessments on covered products per year, as determined by CalRecycle, to grants for apprenticeship programs.

This bill:

1) Pushes back the timeline requiring CalRecycle to finalize regulations from January 1, 2028, to January 1, 2029.

2) Expands the definition of an approved carpet collection site to include a carpet recycling center, a municipal facility that accepts carpet, a retailer that sells carpet, and a producer's regional distribution center.

3) Eliminates the requirement for carpet manufacturers and distributors to publish on their internet websites an environmental product declaration identifying all of the components and the percentage of each component used in the carpet. Instead, this bill requires them to only publish the components that constitute more than 1% of the carpet by weight and any intentionally added component listed by the Department of Toxic Substances Control as a Candidate Chemical pursuant to Section 69502.2 of Title 22 of the California Code of Regulations.

4) Replaces the current PRO funding mechanism based proportionally on the California sales volumes of participating producers with one that leaves it up to the PRO to decide how to fund the organization.

5) Eliminates the requirement for the PRO to submit amendments to its PRP to conform the plan to California law by July 1, 2026, and eliminates a requirement that the PRP include an explanation of how the PRO will be funded based on an assessment tied to each participating producer's California sales volume.

6) Replaces the requirement that a PRP explain how carpet makers will provide a visual mark on the back of carpet that is a synthetic material to allow carpet to be sorted quickly with a requirement to provide the name of the carpet maker, the date of manufacture, and a listing of the carpet's face fibers and backing materials.

7) Replaces the requirement that 8% of assessments go to grants for apprenticeship programs and instead specifies that $1 million annually shall go to grants for apprenticeship programs, with funding allocated between apprenticeship programs in northern and southern California.

8) Specifies reporting requirements for the apprenticeship grants, including among other provisions
   a) The amount of each grant and incentive payment, with grant amounts broken down by category and by recipient.
   b) The number of applicants and recipients of a grant broken down by category.
   c) A detailed description of the criteria used to evaluate applications and to award the grants.

9) Replaces the governing board composed of non-voting members in existing law with a governing board of voting members, and specifies the makeup of the governing board.

10) Establishes certain exemption for the requirement that, on and after January 1, 2029, any person who removed a covered product from a residence of business transport the products to an approved collection site.

11) Changes the due date for the PRO's annual report from July 1 of each year to September 1 of each year.

12) Revises the types of violations that are subject to a civil penalty of up to $25,000 per day to only include those that are intentional or knowing, rather than intentional, knowing, or negligent, and specifies what can count as intentional or knowing for the PRO.

13) Authorizes CalRecycle to determine the PRO ineligible to act as the PRO if the CalRecycle disapproves the PRO's annual report 3 or more times.

Background

How The Carpet Stewardship Program Is Organized. Generally speaking, California's carpet stewardship program operates in the following manner:

a) State law requires California – through CalRecycle – to contract with Carpet America Recovery Effort (CARE), a third-party nonprofit PRO in Georgia.
b) CARE has a board of directors, which is made up primarily of representatives from carpet mills.
c) CARE's board of directors created a stewardship planning committee consisting of some members of the CARE board of directors and non-board of director members. This committee – which also includes some non-voting members – makes all the decisions about what to do with and how to spend the money collected from California consumers. The committee shares its decisions with the board of directors, but it appears from CARE's annual reports that only some of that information is made public.

Where Does The Money Go? According to CARE's 2023 annual report, it spent $30.4 million collected from California carpet buyers in the following fashion:

a) $23.2 million in subsidies:

i. $10 million to seven Tier 1 Processors that essentially take apart collected carpets so the materials can be used to make other products;
ii. $9.8 million to ten Tier 2 Manufacturers that take the recycled output generated by Tier 1 Processors and turn it into other projects; and
iii. $3.4 million to 10 carpet collectors and sorters that provide the materials to Tier 1 Processors.

b) $4 million in expenses, which includes collecting carpet ($2.1 million), education & outreach ($1.1 million) and grants ($601,000); and
c) $3.1 million in administrative costs, which includes $2.4 million to CARE and $688,000 in fees paid to CalRecycle.

CARE's new assessments fees – which were increased by 37%-54% on February 1, 2025 – are:

a) Broadloom carpet: $1.05/square yard (sy) (up from $0.70/sy) for carpet with less than 10% recycled content, and $0.96/sy (up from $0.62/sy) for carpet with 10% or more recycled content.
b) Carpet tile: $1.49/sy (up from $0.99) for carpet with less than 10% recycled content, and $1.40/sy (up from $0.91) for carpet with 10% or more recycled content.

Comments

Purpose of Bill. According to the author, "While AB 863 (Aguiar-Curry, 2024) strengthened accountability requirements for the statewide consumer-funded carpet recycling program, CARE continues to lack a representative model of governance, and perfectly recyclable carpet is currently being landfilled due to a lack of convenient collection sites and proper sorting. This bill improves accountability and representation within CARE's governance structure by adding additional nonvoting members across different manufacturers to the governing board. To improve recyclability, this bill increases collection site density, heightens product composition and backstamping standards, and ensures effective implementation in AB 863 to encourage more sustainable production practices."

Starting Over…again. In 2024, the state's original carpet stewardship program was overhauled by AB 863 (Aguiar-Curry, Chapter 675, Statutes of 2024), but for reasons explained below, the changes will likely not take effect until January 1, 2027, at the earliest. Among other provisions, AB 863:

a) Set explicit goals that must be accomplished in the PRP;
b) Required 8% of all assessments collected be spent on union apprenticeship programs;
c) Increased penalties for program violations from up to $5,000 per day to up to $10,000 per day for most violations, and from up to $10,000 per day to up to $25,000 per day for knowing, intentional, and negligent violations; and

Overhauling the 2010 carpet stewardship law was intended to create a fresh start for a program that has somewhat of a checkered history. However, it's important to note the changes mandated by AB 863 – even though the bill became law on January 1, 2025 – will not take effect until CalRecycle:

a) Adopts new regulations, which AB 863 required CalRecycle to complete by December 31, 2026;
b) Approves a new PRP submitted by the PRO;
c) Notifies the PRO 90 days before notifying the Legislature that it is prepared to implement the new requirements of AB 863; and
d) Submits to the relevant committees of the Legislature a letter indicating the conditions in a), b), and c) above have been met, that CalRecycle is prepared to implement the new law, and that the PRO is prepared to implement the new PRP.

In 2025, AB 80 (Aguiar Curry) was introduced to make further significant changes to the carpet program. AB 80 was held on the Senate Appropriations Suspense file. AB 904 picks up where AB 80 left off, including most of the changes proposed in AB 80. However, AB 904 differs from AB 80 in some ways:

a) *Allocations for grants to apprenticeship programs.* Instead of dedicating 8% of assessments for grants to apprenticeship program, AB 904 allocates $1 million annually for these grants. It also establishes reporting requirements, where the grant awardees must report on how the money is being spent and how it is advancing the goals of the carpet stewardship program.
b) *Governing board member allocation.* Changes the composition of the voting board, and specifically reduces the apprenticeship representation from two members (one northern and one southern) to just one apprenticeship representative, with the position changing every two years between a northern and southern representative.
c) *External vs. internal fees.* Reverts to existing law's external fee, when an internal fee had been contemplated under AB 80.

d) *Prescribing collection site criteria.* Establishes collection requirements, to be met through the stewardship program, for carpets. This includes requirements that at least a quarter of collection facilities be open on Saturdays in areas with populations of 25,000 people or more.
e) *Other*. Makes technical changes to the definition of non-profit (a PRO must be a nonprofit) and 'carpet', strikes provision that CalRecycle's adjustment of performance standards be subject to the APA, and clarifies that violations and fines apply to knowing and intentional, not negligent, violations of the program, among others.

Some of these changes add transparency (reporting on allocation of funding to apprenticeship programs; keeping the fee external), and others address nuts-and-bolts issues with the program that were not contemplated in AB 80 (adding concrete requirements to collection site requirements, changing the exact composition of the governing board). Altogether, AB 904 makes changes to a program that was heftily amended in 2024: those 2024 changes have not yet been implemented, making it unclear how this will change existing law in practice.

Pushing paper. In 2021, prior to AB 863 and updates to the carpet stewardship program, the carpet stewardship program PRO reported that they budgeted $100,000 per year for incentives and grants to support state-approved apprenticeship programs for training apprentice and journey-level carpet installers in proper carpet recycling practices. AB 904, like AB 80 and existing law through AB 863, provides significantly more funding for apprenticeship programs ($1 million per year, which is a change from the 8% allocated in existing law).

Unlike existing law and attempts to update the carpet stewardship program, AB 904 requires that apprenticeship programs provide detailed reports on how they are spending that grant funding; however, AB 904 does not authorize these reports to be used to inform subsequent grants, meaning that if the gains to the program were miniscule or a grantee spent funds inefficiently, that information would be known, but not considered when allocating them another grant.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

The Department of Resources Recycling and Recovery (CalRecycle) estimates ongoing costs of $439,000 in 2027-28 and $575,0000 annually thereafter (special fund) to develop and promulgate regulations, provide ongoing legal technical expertise, conduct investigations, inspections, and verify compliance with requirements regarding product composition, and conduct audits of the producer's return process.

SUBJECT: County offices of education: school districts: average daily attendance of less than 250 pupils: permanent status

SOURCE: California Teachers Association

DIGEST: This bill changes when some certificated employees earn permanent status by eliminating distinctions based on a district's size and allowing service in any regional occupational center or program (ROCP), not just those operated by a single school district, to count toward permanent status.

ANALYSIS:

Existing law:

1) Requires most certificated employees in school districts with an average daily attendance (ADA) of 250 or more to be classified as permanent after two years of satisfactory service and reelection for a third year. (Education Code (EC) § 44929.21)

2) Permits, but does not require, school districts with fewer than 250 ADA to grant permanent status after three years of service and reelection for a fourth year. (EC § 44929.23)

3) Applies a two-year probationary period for permanent status to county office of education (COE) teachers only if the COE has ADA of 250 or more. (EC § 1296)

4) Prohibits service as an instructor in classes conducted at a ROCP from counting toward permanent status in a school district, but provides an exception allowing such service to count if the ROCP is operated by a single school district. (EC § 44910)

5) Includes a number of employment and dismissal provisions that apply differently to certificated employees whose probationary period began before the 1983–84 fiscal year or to those employed in small school districts or COEs. (EC § 44948)

This bill:

1) Requires certificated employees in school districts and COEs with fewer than 250 ADA to be granted permanent status after two years of employment and reelection for a third year, consistent with the probationary period applicable to larger local educational agencies (LEAs).

2) Repeals Education Code Section 44910, which currently prohibits service as an instructor in an ROCP from counting toward permanent status in a school district, except when the ROCP is operated by a single school district.

3) Adds a new version of Section 44910 that affirms service in any ROCP counts toward permanent status in the employing school district or COE, without distinguishing the ROCP's operator.

4) Repeals or amends various Education Code sections that apply only to employees whose probationary period began before the 1983–84 fiscal year, including provisions that establish alternative dismissal procedures or longer probationary timelines in small school districts.

5) Makes conforming changes to provisions governing dismissal, suspension, reassignment, and employment contracts to align with the bill's permanent status requirements and apply due process protections uniformly across all LEAs.

Comments

1) *Need for the bill.* According to the author, "California is a diverse state with a diverse student body. Having a teaching staff that reflects the diversity of its students is essential for creating an inclusive and supportive learning environment.

   "When students see teachers who share their cultural, racial, or linguistic backgrounds, it fosters a sense of belonging and shows them that their identities are valued. Diverse teachers bring varied perspectives and experiences, enriching classroom discussions and helping address biases or gaps in traditional curricula. Representation also encourages greater understanding and connection, as teachers can draw on their own experiences to build meaningful relationships with students. A diverse teaching body not only promotes inclusivity, but also prepares all students to thrive in a multicultural society by modeling empathy, understanding, and respect for differences.

   "AB 917 will ensure that deserving educators and school employees in all school districts and county offices of education have an opportunity to achieve permanent employment status— providing career stability, workforce retention, and increasing the diversity of California's education workforce."

2) *What does permanent status mean?* Permanent status provides certificated employees with due process protections against dismissal or non-reelection. A permanent employee may only be dismissed for statutorily defined causes and is entitled to a hearing before a Commission on Professional Competence if dismissal is challenged. Permanent status also affects how employees are treated during reductions in force, including rights related to seniority, bumping, and notice. These protections are intended to promote stability in the workforce, discourage arbitrary employment decisions, and support the retention of qualified staff. At the same time, they can limit an employer's flexibility to reassign or reduce staff based on shifting programmatic needs.

3) *Why have certain employees historically been excluded from permanent status?* California law has long varied permanent status eligibility based on school size, probationary start date, and program type. For example, until recently, adult education teachers were excluded from attaining permanent status. AB 897 (McCarty, Chapter 548, Statutes of 2023) removed this exclusion for adult education teachers employed by school districts, provided they serve at least 75% of full-time equivalent hours. Legislative discussion around AB 897 noted that adult education programs have historically been categorically funded and often operated outside traditional TK–12 staffing and accountability structures, contributing to their exclusion from permanent status provisions.

   Similarly, instructors in ROCPs have long been excluded from the permanent status pathway unless the ROCP was operated by a single school district. AB 2245 (Juan Carrillo, Chapter 956, Statutes of 2024) amended this framework by requiring, commencing July 1, 2025, that service as an instructor in classes conducted at an ROCP operated by a single school district be included in computing the service required to attain permanent employee status at that school district, ensuring that employment relationships are recognized when the operator and employer are the same.

   The ongoing expansion, first via AB 897 for adult education and then AB 2245 for single-district ROCP instructors, suggests a broader legislative interest in eliminating carve-outs that were historically justified by funding instability, part-time staffing patterns, or the specialized governance of certain programs. This bill continues this trend by eliminating distinctions based on district size and removing operator-based limitations on which ROCP instructors may accrue service credit toward permanent status.

4) *Arguments for expanding permanent status eligibility.* Proponents of expanding eligibility argue that permanent status offers basic job protections that should apply to all certificated employees, regardless of the size of their employing agency or the structure of the program in which they teach. They note that temporary or probationary employment can discourage retention, particularly in hard-to-staff positions. Supporters also contend that distinctions based on ADA thresholds or employment start dates are outdated and arbitrary, and that funding instability should be addressed through budget and program reforms rather than limiting employee rights. In the context of ROCPs, they argue that as funding has shifted into the Local Control Funding Formula (LCFF), instructors should be treated like other high school educators.

5) *Arguments for maintaining some exclusions.* Opponents of expanding permanent status argue that in small districts and specialized programs like ROCPs, staffing needs are more variable and sensitive to funding changes, making rigid employment protections harder to manage. In the case of ROCPs, industry alignment is critical, and course offerings may need to change rapidly in response to labor market trends. Critics argue that permanent status can reduce a program's ability to phase out outdated courses and replace instructors whose skillsets are no longer aligned with evolving needs. Additionally, some joint powers authority (JPA) operated ROCPs do not receive direct state funding, relying instead on competitive grants like the Career Technical Education Incentive Grant (CTEIG) and the K–12 Strong Workforce Program, which can vary significantly year to year.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Senate Appropriations Committee:

To the extent that additional permanent employees seek due process related to dismissal, this bill could result in unknown, but potentially significant Proposition 98 General Fund costs to school districts and county offices of education (COEs). A precise amount would depend on the number of dismissal proceedings which could increase because an estimated 1,000 employees in small school districts would now be eligible for permanent status as a result of this measure. This bill also extends due process rights to ROC/P instructors. The costs associated with due process hearings or other dismissal proceedings can range from $10,000 to over $100,000 per case, depending on the scope.

SUBJECT: Automated decision systems

SOURCE: Service Employees International Union California
TechEquity Action

DIGEST: This bill regulates the use of "automated decision systems" (ADS). It places obligations on developers and deployers of such systems designed or used to make or facilitate "consequential decisions."

Senate Floor amendments of 9/5/25 narrow the scope of this bill by, in part, carving out certain generative artificial intelligence (AI) systems and adding several exemptions. The amendments also reduce the burden on developers and deployers by, in part, reducing the document retention timeline and including factors for courts to consider in assessing civil penalties.

Senate Floor amendments of 8/21/26 add various exemptions and significantly narrow the bill by, among other things, removing requirements to conduct risk assessments and audits, and limiting certain rights to "adverse outcomes."

ANALYSIS:

Existing law:

1) Establishes the California Consumer Privacy Act (CCPA), which grants consumers certain rights with regard to their personal information, including enhanced notice, access, and disclosure; the right to deletion; the right to restrict the sale of information; and protection from discrimination for exercising these rights. It places attendant obligations on businesses to respect those rights. (Civil (Civ.) Code § 1798.100 et seq.)

2) Establishes the Consumer Privacy Rights Act (CPRA), which amends the CCPA and creates the California Privacy Protection Agency (PPA), which is charged with implementing these laws, promulgating regulations, and carrying out enforcement actions. (Civ. Code § 1798.100 et seq.; Proposition 24 (2020).)

3) Establishes the Civil Rights Department, and sets forth its statutory functions, duties, and powers. (Government (Gov.) Code § 12930.)

4) Establishes the Fair Employment and Housing Act (FEHA). (Gov. Code § 12900 et seq.)

5) Establishes the Unruh Civil Rights Act. (Civ. Code § 51.)

6) Defines "trade secret" under the Uniform Trade Secrets Act as information, including a formula, pattern, compilation, program, device, method, technique, or process, that meets specified criteria. (Civ. Code § 3426.1(d).)

7) Requires the California Department of Technology (CDT) to conduct a comprehensive inventory of all high-risk ADS that have been proposed for use, development, or procurement by, or are being used, developed, or procured by, any state agency. It defines the relevant terms. (Gov. Code § 11546.45.5.)

This bill:

1) Requires a developer that sells, licenses, or otherwise transfers a covered ADS to a potential deployer to provide the deployer with specified information.

2) Dictates the process and form that any documentation required to be provided to a deployer by a developer must take.

3) Provides that the above do not apply to a developer subject to the federal Gramm-Leach-Bliley Act who uses a covered ADS to make or facilitate a consequential decision related to financial services, as described.

4) Requires a deployer, before it finalizes a consequential decision made or facilitated by a covered ADS, and after it finalizes such a decision that results in an adverse outcome, to provide any subject of that decision with specified information. A deployer must also provide the subject with an opportunity to correct any incorrect personal information used and to appeal the adverse consequential decision according to specified processes. Dictates the process and form that documentation required to be provided to a subject by a deployer must take.

5) Provides certain exemptions from the above requirements for deployers subject to the federal Family Educational Rights and Privacy Act, the federal Equal Credit Opportunity Act, and the federal Fair Credit Reporting Act.

6) Provides that a deployer's collection, use, retention, and sharing of personal information from a subject of a consequential decision shall be reasonably necessary and proportionate to achieve the purposes for which the personal information was collected and processed, or for another disclosed purpose that is compatible with the context in which the personal information was collected, and not further processed in a manner that is incompatible with those purposes.

7) Provides the conditions under which a deployer assumes the responsibilities of a developer.

8) Imposes retention requirements on developers and deployers with respect to specified documentation.

9) Allows for the redaction of certain information revealing trade secrets, as provided, but requires disclosure of such withholding and the basis for it.

10) Authorizes enforcement actions against developers or deployers to be brought by specified public entities.

11) Authorizes a court to award a prevailing plaintiff in such actions specified remedies, including a civil penalty of up to $25,000 per violation. It provides courts with relevant circumstances to be considered in assessing the civil penalty.

12) Exempts specified ADS, entities regulated by HIPAA, and certain medical devices.

13) Clarifies the relevance of compliance, or the failure to comply, with these provisions in actions pursuant to the Unruh Civil Rights Act and FEHA.

14) Defines AI, ADS, trade secret, adverse outcome, and personal information in accordance with existing law and defines other relevant terms.

Background

ADS, especially those powered by AI, are being increasingly deployed in a multitude of contexts, including employment, housing, education, and health care. Major transparency and fairness concerns have been raised about the use of ADS to make consequential decisions, essentially determinations with significant legal or other material effect on people's lives.

This bill seeks to regulate the development and deployment, by both public and private actors, of "covered ADS." Developers are required to provide deployers certain information, and deployers are required to provide certain notices to subjects of consequential decisions and afford certain rights to them.

This bill is sponsored by TechEquity Action and the Service Employees International Union (SEIU) California. It is supported by a variety of labor, consumer, privacy, and other advocacy groups, including Common Sense Media and Consumer Reports. It is opposed by a number of industry associations, including the Consumer Technology Association and the American Staffing Association. For a more thorough discussion, please see the Senate Judiciary Committee analysis of this bill, which is incorporated by reference herein.

Comments

According to the author:

> The use of automated decision systems (ADS) has become prevalent among Californian's daily lives and used within various sectors – including, housing, employment, and even in criminal justice sentencing and probation decisions. However, the algorithms that power ADS are often vulnerable to issues such as unrepresentative data, faulty classifications, and flawed design. These shortcomings can result in biased, discriminatory, or unfair outcomes. Rather than solving systemic problems, poorly designed ADS can

worsen the very harms they aim to address—ultimately hurting the people they are meant to help. AB 1018 provides the necessary guardrails by regulating the development and deployment of an ADS used to make consequential decisions. Additionally, the current role that an ADS plays in a consequential decision is hidden from consumers. Fundamentally, consumers should have the right to be well informed of how these ADS are used in life altering decisions. AB 1018 calls for transparency on the usage of ADS by requiring notice to consumers by deployers before and after a consequential decision. It is crucial that we take the necessary steps to ensure the technology is used responsibly and can be trusted. Well-intentioned but flawed technology is a matter of state concern. Guardrails and accountability are needed to ensure that technology does not further marginalize communities or broaden inequities.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown, potentially significant costs (local funds, General Fund) to local agencies that deploy ADS to make consequential decisions and must comply with the above-described requirements, possibly in the hundreds of millions of dollars annually statewide. For example, counties will be required to review all of their systems for compliance—including tools used for online testing, hiring, permitting, case management, risk assessments, and property management. They will also incur costs of audits, training, staffing, disclosures, appeals process, data retention, sending out notices, and potential legal exposure. If developers raise their cost as a result of this bill, these costs will be passed onto the counties. Counties may claim reimbursement of those costs if the Commission on State Mandates determines that this bill creates a new program or imposes a higher level of service on local agencies.

- The State Controller's Office (SCO) reports that it, and all other state governmental entities would be considered a "deployer," of an ADS, as defined in the bill. If SCO implemented one or multiple ADS systems that meet the criteria for oversight in AB 1018, SCO would anticipate needing the following General Fund Resources:

    - 2025-26: $1,408,000 for 7.0 two-year limited-term positions and one-time costs;

    - 2026-27: $1,384,000 for 7.0 two-year limited-term positions; and,

- 2027-28 and ongoing: $761,000 for 4.0 permanent positions.

SCO indicates that these estimates reflect the requirements for a large, complex agency such as the SCO managing sensitive personal and financial data across automated systems. Actual staffing may be adjusted depending on the complexity and scale of the deployed ADS. Some functions may overlap or be handled by existing staff with appropriate upskilling, while external contractors could augment capacity for short-term surges, such as during initial implementation or major audits. If AB 1018 becomes law, the SCO would need 5–7 information security staff—including a dedicated supervisor—for the initial implementation of AB 1018, with 3–4 (including the supervisor) required for ongoing security and compliance operations related to automated decision systems.

- Costs (special fund) of an unknown but potentially significant amount to the Labor Commissioner to enforce Labor Code violations, possibly in the millions of dollars, annually. Actual costs will depend on the number of enforcement actions and the amount of workload associated with each action.

- The Department of Justice (DOJ) estimates a fiscal impact of $2.5 million or less (General Fund, Unfair Competition Law Fund). The DOJ notes that implementation of this bill will be dependent upon the appropriation of funds. The DOJ will be unable to absorb the costs to comply with or implement the requirements of the bill within existing budgeted resources. The Consumer Protection Section (CPS), Civil Rights Enforcement Section (CRES) and Healthcare Rights & Access Section (HRA) within the Public Rights Division of the DOJ anticipate increased workloads in enforcing this bill beginning on January 1, 2026, and ongoing. The workload includes investigating and prosecuting violations. The Sections will require the following additional resources:

  - CPS: 1.0 Deputy Attorney General (DAG); 1.0 Associate Governmental Program Analyst (AGPA); 1.0 Legal Secretary (LS); and, $250,000 for External Consultant for expert witness services to support investigation and prosecution;

  - CRES: 1.0 Deputy Attorney General (DAG); 1.0 Associate Governmental Program Analyst (AGPA); 1.0 Legal Secretary (LS); and, $250,000 for External Consultant for expert witness services to support investigation and prosecution; and,

  - HRA: 1.0 Deputy Attorney General (DAG); 1.0 Associate Governmental Program Analyst (AGPA); 1.0 Legal Secretary (LS); and, $250,000 for External Consultant for expert witness services to support investigation and prosecution.

- The Civil Rights Department (CRD) estimates a fiscal impact over $2 million (General Fund). CRD notes that this bill places requirements on ADS developers and deployers. It also provides the CRD with the authority to bring a civil action to enforce compliance with this bill. CRD anticipates requesting eight positions, including researchers/ research data specialists, associate governmental program analysts, and attorneys, approximately $2.2 million for FY 26-27, and $2.1 million for FY 27-28 and ongoing. In addition to covering the costs of the new positions, these resources would also fund an ongoing contract with an expert consultant, IT and other administrative costs, and a one-time job analysis that would be required for one of the research positions. These resources would be necessary to support the complex legal and technological analysis required to enforce the components of this bill.

- The State Water Board estimates a significant fiscal impact (General Fund, special funds) likely in the millions of dollars per year. The State Water Board reports, as written, this bill's definition of automated decision system is vague, ambiguous, and could encompass many current tools used, like excel workbooks. These tools are used broadly across Water Boards programs, and many are used to inform actions that could be considered consequential actions under the bill. To meet the bill's provision, the State Water Board estimates significant cost pressures, likely in the millions of dollars per year. Costs would allow the State Water Board to fulfill several requirements regarding each of these covered systems. This would include facilitating and conducting a performance evaluation, contracting with an independent third party to perform audits on any systems the Water Boards develops, notifying those impacted by the consequential decision about the use of the ADS, and providing an appeal process. Taking these steps for each covered system, if feasible at all, would require significant additional staff and contract resources in the millions of dollars annually, impacting all Water Boards' fund sources. Alternatively, State Water Board programs would need to find ways to store, process, and analyze data to make decisions without using any tool which would qualify as an automated decision system. Costs would be incurred from all eligible State Water Board fund sources.

- UC Health estimates a fiscal impact of $42 million in one-time costs and approximately $24 million in ongoing costs to implement AB 1018. Compliance costs for the University's health systems include expenses related to implementing required audits, administrative processes, staff training, and system modifications.

- The California Department of Health and Human Services (CalHHS) reports a significant fiscal impact (General Fund, special funds). The Office of Technology and Solutions Integration (OTSI) estimates costs, across the 12 CalHHS departments, in the low millions up to low tens of millions (Total Fund) annually as solutions applicable under the bill are expected to grow in use over the coming years. These costs are estimated and attributable due to legal and security resources for monitoring and enforcement, compliance oversight, IT development and staffing necessary for governance and appeals management. This bill could impact many of the Agency's information systems and data solutions as Generative AI solutions are being built into many of the tools used. Evaluation and governance will become ongoing cost-pressure as it becomes necessary to review not just risk/compliance related to AI components of solutions, but applicability to the requirements of this bill. This bill would require programming and processing revisions, stakeholder engagement, development and operation of an appeal process in all cases, along with a third-party audit (beginning in 2030). The costs to implement this bill depends on the number of solutions and complexity of developing and resourcing the appeals processes that are yet to be determined. This estimate does not include potential increased contracting costs due to vendors including costs for conducting the assessment and other requirements.

- The California Department of Corrections and Rehabilitation (CDCR) reports that it does not currently use platforms it considers to be Automated Decision Systems (ADS). As a result, CDCR does not anticipate immediate costs associated with the requirements in AB 1018. However, should the department choose to implement or develop systems in the future that meet the bill's definition of an ADS, there could be costs associated with compliance. These may include but are not limited to performance evaluations, third-party audits, disclosure and documentation requirements, and staff oversight responsibilities outlined in the bill. It should be noted that CDCR uses several risk assessment tools, including, but not limited to, the Static-99R to assess every eligible sex offender prior to release on parole, the California Static Risk Assessment tool to assess the risk of reoffending, the Correctional Offender Management Profiling for Alternative Sanctions

(COMPAS) to assess an incarcerated individuals needs and target those needs, and the Automated Reentry Management System (ARMS). If this bill is interpreted to apply to these tools, CDCR, and other correctional agencies, could potentially incur a significant fiscal impact.

- The Department of Finance (DOF) reports potential unknown costs (General Fund) and indicates that that this bill may apply to its ongoing pilot using generative artificial intelligence to assist with bill analyses.

- Unknown, potentially significant costs to the Judicial Council, likely in the hundreds of millions annually. This bill could hamper the ability of trial courts and their justice partners to use several tools, including SARATSO for sex offenders, and many others, such as pretrial risk assessment tools minimize bias in pretrial detention situations. Developers of these tools, including nonprofits, universities, and even the state of Virginia, are unlikely to make any adjustments as would be required under this bill. As such, the entire judicial branch could potentially lose the use of all pretrial risk assessment tools, as their developers do not necessarily have a strong financial incentive to adhere to this bill's stringent requirements. Courts also use tools such as MyCitation, which would also be affected. MyCitation is a tool created by the Judicial Council pursuant to AB 143 (Committee on Budget) Stats. 2021, ch. 79, designed as an easy-to-use option for defendants to provide relevant financial information for the court to consider reductions in infraction fines and fees owed.

- Unknown, potentially significant costs to the state funded trial court system (Trial Court Trust Fund, General Fund). By authorizing a new civil penalty with statutory damages, this bill will likely lead to additional case filings that otherwise would not have been commenced, with attendant workload and resource costs to the court. This bill may result in additional trial court costs to the extent that cases are brought to litigate its constitutionality. The fiscal impact of this bill to the courts will depend on many unknowns, including the number of cases filed and the factors unique to each case. An eight-hour court day costs approximately $10,500 in staff in workload. This is a conservative estimate, based on the hourly rate of court personnel including at minimum the judge, clerk, bailiff, court reporter, jury administrator, administrative staff, and jury per-diems. If court days exceed 10, costs to the trial courts could reach hundreds of thousands of dollars. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund

additional staff and resources and to increase the amount appropriated to backfill for trial court operations.

- Costs (General Fund, special funds) of an unknown but significant amount to each state agency that deploys ADS to make or contribute to consequential decisions and must comply with this bill's notice, opt-out, correction, appeal, and, if applicable, audit requirements. In the aggregate, for all affected state agencies, costs may be in the hundreds of millions of dollars annually ongoing.

ARGUMENTS IN SUPPORT: A broad coalition, including the sponsors, SEIU California and TechEquity Action, write: While the advent of generative AI and large language models has been a new piece of the puzzle, ADS have long existed

in our communities. ADS have been woven into the daily lives of our community members—increasingly these tools are dictating access to and the quality of housing, healthcare, employment, credit, and many other critical services Californians need. The potential harms and biases of these systems have been well documented—from banks using lending models that were twice as likely to deny Black applicants compared to White applicants with the same financial profile,[1] to healthcare providers using ADS that significantly underestimated the healthcare needs of Black patients compared to White ones.[2] Technology should not be a pass to violate our civil and labor rights, this legislation regulates the misuse of automated systems.

AB 1018 would enact common-sense guardrails to help ensure that developers and deployers of these tools are testing for discriminatory outcomes prior to utilizing the tool and ensuring that consumers have the information they need to understand the role that an ADS is playing in critical decisions and what rights they have when these systems impact critical areas of their lives.

ARGUMENTS IN OPPOSITION: A coalition of financial industry groups, including the California Credit Union League, writes:

While Section 22756.2(b)(1) provides the authority to a financial institution to deny an opt-out request for financial services providers regulated under the Gramm Leach Bliley Act, the nation's most robust law governing how financial information is used, it is unclear to us why there is not a similar exemption from the entirety of the bill. As written today, financial institutions could choose to categorically deny any consumer's opt-out request. This will ultimately frustrate and confuse consumers, which is the opposite of the state intention of AB 1018 – which is to bring more transparency.

The Equal Credit Opportunities Act (ECOA) and Fair Credit Reporting Act (FCRA) already require creditors to provide a notice to consumers when they are denied credit detailing the reason for the denial and a method to dispute the accuracy or completeness of any information that led to the denial. Yet, financial services must still provide an opportunity to correct information, which is duplicative of FCRA, and an opportunity to appeal, which can impact the lending process. Establishing a consumer appeal provision would require a type of manual underwriting that has not been regularly used in the mortgage industry for nearly three decades. The current mortgage origination process relies on automated

[2] **https://www.theguardian.com/society/2019/oct/25/healthcare-algorithm-racial-biases-optum**.

systems such as AUSs and Credit Scoring Models (CSMs) that do not have usable or scalable alternative manual processes.

SUBJECT: State-funded assistance grants and contracts: advance payments

SOURCE: California Association of Nonprofits

DIGEST: This bill requires, rather than authorizes, an administering state agency to advance a payment to a recipient entity, as defined, in accordance with specified requirements for all grants and contracts entered into after January 1, 2026, and requires the solicitation for the grant or contract to state the percentage of funds that may be distributed as an advance payment, as specified.

Senate Floor Amendments of 8/21/26 are technical and clarifying in nature.

ANALYSIS:

Existing law:

1) Authorizes a state agency administering a grant program or contract to advance a payment to a recipient entity, subject to specified requirements.

2) Requires the administering state agency, among other things, to prioritize recipient entities and projects serving disadvantaged, low-income, and under-resourced communities, to stipulate an advanced payment structure and request process within the grant agreement or contract, and to ensure an advance payment to the recipient entity does not exceed 25% of the total grant or contract amount, except as specified.

This bill:

1) Requires, rather than authorizes, an administering state agency to advance a payment to a recipient entity, as specified, for all grants and contracts advertised on or after January 1, 2026. The solicitation of the grant or contract shall state the percentage of the grant or contract funds that may be distributed as an advance payment.

2) Limits the existing requirement an administering state agency prioritize recipient entities and projects, as specified, to grants and contracts advertised prior to January 1, 2026.

3) Eliminates the requirement to stipulate an advanced payment structure and request process, as specified.

4) Limits the requirement that recipient entities deposit funds received as an advance payment into a federally insured account to apply only to grants and contracts in excess of $10,000.

5) Provides that recipient entities that receive advanced payments may advance funds from the advance payment to any sub-recipients in accordance with their grant program requirements or contract.

6) Requires the Strategic Growth Council (SGC), in consultation with the Department of Finance (DOF) and the Department of General Services (DGS) to develop a Statewide Advance Funds and Reconciliation Guide (Master Guide), as specified.

7) Requires every state agency to adopt the Master Guide as its standard operating procedure for the disbursement, tracking, and reconciliation of advance payments, as specified.

8) Requires the SGC to provide an annual training webinar for state agency staff to ensure uniform application of the Master Guide and dedicated technical assistance and guidance to community organizations and nonprofit entities.

Background

Author Statement. According to the author's office, "AB 1039 is necessary to address a key barrier that prevents under-resourced communities from applying for and implementing state-funded projects: inconsistent application of the state's advance pay policy for contracts and grants administered by state agencies across government. By ensuring nonprofits can secure a percentage of contracted funds up front for all new funding opportunities, effective January 1, 2026, AB 1039 will improve the nonprofit sector's capacity to provide quality services to communities and carry out state-funded priorities. The bill also supports stronger transparency about a funding opportunity's terms, including clearer indication of the available percentage of advance pay."

Nonprofits and the State. The state of California relies heavily on nonprofits to implement critical policies and provide essential services to its communities. These organizations play a pivotal role in addressing homelessness, building affordable housing, responding to climate change impacts, supporting victims of domestic violence, community infrastructure, and improving the lives of vulnerable community members in myriad ways. The eligibility criteria can vary depending on the specific grant. Generally, grants are categorized by applicant type, such as nonprofits, individuals, businesses, public agencies, or tribal governments. Each grant listing provides detailed eligibility requirements, which can be found on the California Grants Portal.

Action by Assembly and Senate Select Committees. On February 17, 2022, the Assembly and Senate Select Committees on the Nonprofit Sector held a joint hearing featuring panelists and public comment from nonprofit leaders across the state. The hearing, entitled, "A Blueprint to Ensure Nonprofits are Supported and Thrive during Future Emergencies," focused on the challenges nonprofits faced in implementing programs during the height of the COVID-19 Pandemic. The committees concluded that, "government contracting challenges remain a key barrier for nonprofits providing needed services. Strong government-nonprofit partnerships are vital to ensure Californians have access to quality services and programs, to support the nonprofit sector as key employers in the state, and to bolster economic recovery, particularly in historically underserved communities."

Advanced Payment Pilot. As part of 2022-23 fiscal year (FY) state budget, AB 156 (Chapter 569, Statutes of 2022) authorized, until July 1, 2025, state agencies administering specified programs to advance payments to local agencies, nongovernmental entities, and other state agencies if certain criteria are met, including requiring advance payment recipients to provide an itemized budget, spending timeline, and work plan. The bill limited the advance payment to a local agency or nongovernmental entity to 25% of the total grant amount awarded to that recipient, unless the administering state agency determines that the project requires a larger advance.

The pilot program required the recipient or any sub-recipients to cooperate with audits by the DOF related to the advanced payments. It also required the administering state agency to prioritize local agency or nongovernmental entity recipients and projects serving disadvantaged, low-income, and under-resourced communities or organizations with modest reserves and potential cash flow problems. The program requires the local agency and nongovernmental entity recipients to submit additional documentation and progress reports on the spend-down of funds, and to demonstrate good standing with the federal Internal Revenue Service. Finally, the bill required the DOF, by January 10, 2025, to report to the Legislature on this program.

Advanced Payment Pilot Program Report. The report submitted by DOF in January of this year, evaluated the outcomes of the pilot project's effort to improve the state's ability to issue advance payments for state-funded local assistance grants. The program authorized six state agencies to provide upfront funding to eligible local agencies, nonprofit organizations, and other governmental entities, particularly those serving disadvantaged communities or experiencing cash flow constraints. Key criteria for eligibility included a cap on the advance amount (25% of the total grant) unless otherwise justified.

As of November 30, 2024, four of the six authorized agencies – Employment Development Department (EDD), Department of Toxic Substances Control (DTSC), Strategic Growth Council (SGC), and the Wildlife Conservation Board (WCB) – issued a total of 26 advance payments under the pilot program. These payments supported a variety of initiatives, including the Community Economic Resilience Fund, Transformative Climate Communities Program, and ecological restoration efforts.

Prior/Related Legislation

AB 880 (Bennett, 2025) revises the California Prompt Payment Act by requiring state agencies to reimburse a nonprofit grantee's indirect costs at specified rates and removes the $500,000 cap that previously exempted certain Medi-Cal-related payments from penalty provisions. Additionally, the bill narrows the circumstances under which the state can dispute an invoice and expands the definition of "grant" to include agreements with nonprofit organizations, as specified. (Pending on the Senate Floor)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown, potentially significant costs for the SGC to develop the Master Guide and to create and implement training for agency staff.

Unknown costs for DGS to promote the Master Guide, incorporate its processes into the State Administrative Manual (SAM) and State Contracting Manual (SCM), and provide guidance to state agencies.

Unknown, potentially significant costs for state agencies to adopt the Master Guide and provide advance payments to recipient entities for grants and contracts. Actual costs will range from absorbable to hundreds of thousands of dollars per agency, depending on the contract type and whether the agency has existing advance payment processes in place in its grant disbursement or contracting practices.

The California State Library anticipates absorbable costs to modify its Grants Portal to track the percentage of grant or contract funds distributed in advance payments.

ARGUMENTS IN SUPPORT: In support of this bill, CalNonprofits writes that, "[a]dvanced pay provisions are currently authorized but not mandated under state law via enactment of Assembly Bill 590 (Hart, Chapter 535, Statutes of 2023). By requiring advance pay under AB 1039 for new grant and contract opportunities, the state can continue to address hurdles that dissuade under-resourced communities from applying for and implementing state-funded projects. Many state grants and contracts remain reimbursement-based two years after enactment of AB 590."

Further, the "lack of equitable access to advance payments is an unnecessary barrier to the nonprofit sector's effective partnership with the state at a time when new threats are emerging every day from both the federal government and environmental challenges like devastating wildfires. Now more than ever we must prioritize stronger partnerships between nonprofits and the state. Under 1039, nonprofits that may be best equipped to deliver timely and effective projects (but short on up-front capital) would no longer be forced to pass on numerous grants and contracts to support vulnerable Californians."

And finally, this bill is "part of the California Nonprofit Equity Initiative that our organizations, along with more than 500 other nonprofit and community leaders, is supporting to level the playing field for nonprofits. Improving how state government contracts with nonprofits is a question of equity for our most vulnerable communities and for the nonprofits that serve them. AB 1039 will strengthen the essential partnership between the state and nonprofits and our mutual efforts to deliver the highest quality services to the people of California."

Disability Rights California
Public Counsel

DIGEST: This bill (1) requires a regional center to facilitate a case conference within 15 working days following an initial request for assistance for intakes involving a child welfare involved child or youth; (2) prohibits a determination not to provide additional assessment from being solely based on the age of the person when they received a diagnosis of a qualifying condition; and (3) requires the Department of Developmental Services (DDS) to annually post on its website specified data related to initial intakes and assessment and eligibility determinations.

Senate Floor Amendments of 8/21/26 make clarifying changes regarding interagency coordination.

ANALYSIS:

Existing law:

1) Establishes the Lanterman Developmental Disabilities Services Act (Lanterman Act), which states that California is responsible for providing a range of services and supports sufficiently complete to meet the needs and choices of each person with developmental disabilities, regardless of age or degree of disability, and at each stage of life, and to support their integration into the mainstream life of the community. (Welfare and Institutions Code Section (WIC §4500 et seq.)

2) Establishes a system of nonprofit regional centers, overseen by DDS, to provide fixed points of contact in the community for all persons with developmental disabilities and their families, to coordinate services and supports best suited to them throughout their lifetime. (WIC §4620)

3) Defines "developmental disability" to mean a disability that originates before an individual attains 18 years of age, continues, or can be expected to continue, indefinitely, and constitutes a substantial disability for that individual. As defined by the Director of DDS, in consultation with the Superintendent of Public Instruction, provides that this term shall include intellectual disability, cerebral palsy, epilepsy, and autism. Provides that this term shall also include disabling conditions found to be closely related to intellectual disability or to require treatment similar to that required for individuals with an intellectual disability, but shall not include other handicapping conditions that are solely physical in nature. (WIC §4512(a))

4) Makes any person believed to have a developmental disability, and any person believed to have a high risk of parenting a developmentally disabled infant, eligible for initial intake and assessment services in the regional centers. In addition, provides that any infant having a high risk, as defined, of becoming developmentally disabled may be eligible for intake and assessment services in the regional centers. (WIC §4642(a)(1))

5) Requires initial intake to be performed within 15 working days following request for assistance. Requires initial intake to include, but not be limited to, information and advice about the nature and availability of services provided by the regional center and by other agencies in the community, including guardianship, conservatorship, income maintenance, mental health, housing, education, work activity and vocational training, medical, dental, recreational, and other services or programs that may be useful to persons with developmental disabilities or their families. Requires intake to also include a decision to provide assessment. (WIC §4642(a)(2))

6) Requires, commencing on January 1, 2025, the regional center to take the following actions by the end of the 15-day initial intake period:

   a) Either of the following actions:

      i) Determine if the individual is eligible for regional center services.

      ii) Determine if the regional center will initiate the assessment specified in (7) below.

   b) Inform the individual requesting intake of the regional center's action.

   c) If the regional center determines that the individual is not eligible for regional center services, or that the regional center is not initiating the assessment specified in (7) below, provide the individual requesting intake and, if appropriate, the individuals' parents, legal guardian or conservator, or authorized representative, with adequate notice, as specified. (WIC §4642(a)(3))

7) Requires, if assessment is needed, the assessment to be performed within 120 days following initial intake. Requires assessment to be performed as soon as possible and in no event more than 60 days following initial intake where any delay would expose the client to unnecessary risk to their health and safety or to significant further delay in mental or physical development, or the client would be at imminent risk of placement in a more restrictive environment. Provides that assessment may include collection and review of available historical diagnostic data, provision or procurement of necessary tests and evaluations, and summarization of developmental levels and service needs and is conditional upon receipt of the release of information specified in (8) below. (WIC §4643(a))

8) Authorizes the regional center, in determining if an individual meets the definition of developmental disability, the regional center may consider evaluations and tests, including, but not limited to, intelligence tests, adaptive functioning tests, neurological and neuropsychological tests, diagnostic tests performed by a physician, psychiatric tests, and other tests or evaluations that have been performed by, and are available from, other sources. (WIC §4643(b))

9) Requires at the time of assessment, the individual, or, where appropriate, the parents, legal guardian, or conservator, to provide copies of any health benefit cards under which the consumer is eligible to receive health benefits, including, but not limited to, private health insurance, a health care service plan, Medi-Cal, Medicare, and TRICARE. If the individual, or, where appropriate, the

parents, legal guardians, or conservators, have no such benefits, prohibits the regional center from using that fact to negatively impact the services that the individual may or may not receive from the regional center. (WIC 4643(c))

10) Provides that a juvenile case file may be inspected only by certain personnel, as specified. (WIC §827)

This bill:

1) Authorizes a county welfare or probation department to disseminate information from the juvenile case file about a child who may be eligible for regional center services to a regional center as necessary for the regional center to complete the case conference required by 4) below and the intake assessment, including to determine whether any of the circumstances that require an expedited are present. Provides that any information provided to the regional center may only be further disseminated to the extent permitted by WIC §827.

2) Requires initial intake to include a decision to provide an eligibility assessment.

3) Prohibits a decision not to provide assessment from being based solely on the age of the person when they received diagnosis of a qualifying condition, as long as the qualifying condition originated before the person was 18 years of age.

4) Requires a regional center, for an initial intake involving a child welfare involved child or youth, to facilitate a case conference within 15 working days following the initial request for assistance to include the county child welfare services agency, probation department, or tribal consortium, as applicable, and, if appropriate, the person's parents, legal guardian or conservator, Indian custodian, or authorized representative.

5) Requires the case conference to clarify the consents, legal and judicial determinations, and documentation required, whether any of the circumstances necessitating an expedited assessment are present, and review the roles and requirements of each party based on the person-centered needs of the child welfare involved child or youth.

6) Specifies the case conference requirement shall not result in any delay to the child welfare involved child's or youth's right to a timely intake, assessment, or eligibility determination.

7) Requires DDS and the California Department of Social Services, by March 31, 2027, to issue joint guidance to operationalize the case conference requirement.

8) Requires a regional center, for a child welfare involved child or youth, when there is a lack of documentation provided, to work with the county child welfare services agency, probation department, or tribal consortium, as applicable, and, if appropriate, the person's parents, legal guardian or conservator, Indian custodian, or authorized representative to facilitate obtaining appropriate consents to release information and conduct necessary assessments, identify the sources and location of documents, and coordinate access to needed documentation, or directly procure other records which may be available and accessible and within the regional center's authority. Specifies documentation may include, but is not limited to, school, medical, or court records.

9) Requires DDS to consult with the California Department of Social Services and other Children and Youth System of Care partners and other community and representative organizations, as applicable, to develop joint guidance to align existing intake processes, roles, and responsibilities for child welfare involved child or youth.

10) Requires DDS, by January 30, 2027, to consult with the California Department of Social Services and obtain input from tribes, individuals with lived experience, and child welfare stakeholders to ensure consideration of child welfare involved children or youth in the development of the standardized intake processes, including, but not limited to, circumstances for which expedited intake processes would be required.

11) Requires a regional center to determine if the individual is provisionally eligible for regional center services by the end of the 15-day initial intake period.

12) Defines the following terms for purposes of this bill:

    a) "Child welfare involved child or youth" means any of the following:

        i) A child who has been removed from their home by a county child welfare services agency.

        ii) A child who is the subject of a juvenile court petition, as specified, whether or not the child has been removed from their home.

iii) A dependent child of the court of an Indian tribe, consortium of tribes, or tribal organization who is the subject of a petition filed in the tribal court pursuant to the tribal court's jurisdiction in accordance with the tribe's law.

iv) A child who is the subject of a voluntary placement agreement.

v) A nonminor dependent.

b) "Request for assistance" means any inquiry from an individual, or a person acting on their behalf, on the individual's possible eligibility to receive services or supports available or provided by the regional center based on a potential developmental concern or disability.

13) Provides that assessment may include collection and review of available historical diagnostic data, provision or procurement of necessary tests and evaluations, and summarization of developmental levels and service needs and is conditional upon receipt of the release of information and consents for assessments.

14) Prohibits a regional center from requiring an individual to use their health benefits before it conducts an assessment.

15) Requires regional centers to report any additional data metrics developed pursuant to this bill. Requires DDS to annually post on its internet website annual statewide intake data collected, by regional center and on a statewide-aggregate basis, inclusive of intake data regarding child welfare involved children or youth pursuant to this bill.

16) Requires DDS, commencing January 31, 2028, to annually post on its internet website statewide intake data pursuant to these provisions, to the extent allowed by current data systems, by regional center, and on a statewide-aggregate basis inclusive of intake data regarding child welfare involved children or youth.

17) Requires the public reporting requirements to be developed in consultation with the community and representative organizations, including the California Department of Social Services and other Children and Youth System of Care partners, as applicable. Requires the public reporting requirements to include, but not be limited to, the number of intakes, the timeliness of assessment and eligibility determinations, and the percentage of assessments resulting in eligibility by program, disaggregated by demographic groups, including age, geography, and race.

18) Provides that the extent and specificity of the required data reporting under this bill shall keep pace with the capacity of DDS' data systems as they evolve.

Background

Purpose of the Bill. According to the author, "For children with intellectual and developmental disabilities and their families, getting the supports and training provided by the state's regional centers in a timely manner is critical to reducing child maltreatment, family disruption, and unnecessary institutionalization. Yet, foster youth routinely face significant delay in accessing these services due to the regional center's overly burdensome application process. AB 1099 removes administrative barriers from the process by ensuring that applicants are not denied purely on the basis of a lack of formal diagnosis or documentation, which many system-involved youth lack for reasons beyond their control."

Child Welfare Services. The child welfare services system is an essential component of the state's safety net. When a report of abuse or neglect is substantiated, a family is either provided with services to ensure the child's well-being and avoid court involvement, or the child is removed and placed into foster care. After the county child welfare department becomes involved with families, approximately 12 months of services are provided to children who are able to remain safely in their home while the family receives services. This is considered family preservation services and the child does not come under the jurisdiction of the juvenile dependency court during this time. If it is determined that a child cannot remain in the home, even with family preservation and support services, the child comes under the jurisdiction of the county's juvenile dependency court while the family is served by a child welfare services system social worker.

Studies have shown that while the child welfare system tends to err on the side of removal, removal itself can cause irreparable harm. According to research by the American Academy of Pediatrics, removal from parents can disrupt a child's brain architecture and negatively impact their health. The research goes on to note that not only are there psychological traumas at the time of removal; those can occur long after reunification. These children can experience post-traumatic stress disorder, anxiety, depression, suicidal ideation, and developmental delays.

Lanterman Act. In 1969, the Lanterman Act established that individuals with developmental disabilities and their families have a right to receive the necessary supports and services required to live independently in the community. The Lanterman Act enumerates the rights of individuals with developmental disabilities, as well as the rights of their families, what services and supports are

available to these individuals, and how regional centers and service providers work together to provide these supports and services. The term "developmental disability" is defined as a disability that originates before a person reaches 18 years of age, is expected to continue indefinitely, and is a significant disability for the individual; such disabilities include, among others: epilepsy, autism spectrum disorder, intellectual disability, and cerebral palsy. As there are no income-related eligibility criteria, Lanterman Act services are considered an entitlement program. The Department of Finance estimates that approximately 487,114 individuals will receive developmental services in 2025–26, increasing to 526,848 in 2026–27.

Regional Centers. Direct responsibility for implementation of the Lanterman Act's service system is shared by DDS and a statewide network of 21 regional centers, which are private, community-based nonprofit entities that contract with DDS to carry out many of the state's responsibilities. Regional center services may include diagnosis, evaluation, treatment, and care coordination of services such as personal care, day care, special living arrangements, and physical, occupational, and speech therapy. Regional center services are not consistent across the state. One often-cited strength of the regional center system is each regional center's local control and flexibility, while one challenge is the system's lack of uniformity.

Two-Step Eligibility Process. State law establishes a two-step process to determine whether an individual is eligible for regional center services. The first step is the initial 15-day intake period, where the individual with a suspected diagnosis first gets in touch with a regional center. Regional centers are required to provide information and advice about services provided by the regional center and other community agencies. Regional centers are also required to make a decision on whether they will provide assessment of the individual requesting services. If the regional center determines the individual is not eligible for regional center services, it must provide a notice of action regarding the denial.

If a regional center decides to move on to assessment, the second of the two-step eligibility process, it must perform an assessment within 120 days following the initial intake. For more vulnerable individuals at risk of harm to their health and safety or further developmental delays, or individuals at imminent risk of placement in a more restrictive environment, the regional center must perform an assessment within 60 days following the initial intake. All assessments may utilize available data and information, including medical evaluations, contingent upon release of such information.

Comments

The two-step intake and eligibility determination process disproportionately impacts foster children, who often do not have a formal medical diagnosis readily available and who experience frequent placement changes across city and county lines. According to the sponsors of this bill, it can take many months, or even years, to get an assessment, and even longer to establish eligibility, simply based on their status as a foster child. These delays commonly lead to placement instability and increased risk of institutionalization.

This bill seeks to ensure children in the foster care system receive a timely assessment for regional center services by requiring a regional center to facilitate a case conference within 15 working days for intakes involving a child welfare involved child or youth. This bill also requires DDS and the California Department of Social Services, in consultation with other community organizations, to develop joint guidance to align existing intake processes for child welfare involved children or youth. This bill seeks to streamline and expedite the delivery of regional center services for children with an eligible diagnosis. Access to these services and supports can provide stability to both the foster child and caregivers.

[Note: See the Senate Human Services Committee analysis for additional background on this bill.]

Related/Prior Legislation

AB 1220 (Arambula) would have required DDS to compile and report data on denials of services and required a regional center to document in each consumer's individual program plan all of the consumer's denials of services, notices of actions, and appeals. The bill was held on the Senate Appropriations Committee suspense file.

AB 1208 (Addis) would have required DDS, by July 1, 2026, to review and assess all established and pending regional center and vendored service provider quality, performance and outcome measures, and required DDS to consult with stakeholders and subject matter experts to develop a uniform set of measures, a mechanism to track measures over time, and performance indicators and benchmarks for regional centers. The bill was held on the Senate Appropriations Committee suspense file.

SB 138 (Committee on Budget and Fiscal Review, Chapter 192, Statutes of 2023), a budget trailer bill, among other things, required DDS to establish a standardized intake process for individuals to learn if they are eligible for regional center

services, and required regional centers to report how many individuals went through the intake process and how long the process took.

AB 2083 (Cooley, Chapter 815, Statutes of 2018) required each county to develop an MOU to describe the roles and responsibilities of certain entities that serve foster youth who have experienced severe trauma and instructs the secretary of CalHHS and the Superintendent of Public Instruction to implement and review aspects of the MOUs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown ongoing General Fund costs, likely hundreds of thousands, for the Department of Developmental Services (DDS) for state administration.
- Unknown ongoing General Fund costs for increased workload for regional centers.

SUBJECT: Birth conditions monitoring

SOURCE: County of Los Angeles
March of Dimes

DIGEST: This bill permits a local health officer to maintain a system for the collection of information on birth conditions necessary to accomplish a local-level monitoring and reporting program similar to, but independent of, the state-level birth defects monitoring program, subject to adequate funding. Makes conforming changes in existing law to facilitate a local-level monitoring and reporting program.

Senate Floor Amendments of 8/21/26 incorporate the California Department of Public Health's (CDPH) technical assistance to refine provisions in this bill as follows:

1) Remove provisions of this bill from, and any mention of, CDPH's statewide Birth Defects Monitoring Program (BDMP)

2) Create new sections in law that permit local health jurisdictions to monitor and report birth conditions within their jurisdictions with similar privacy and health information protections, as well as program administration provisions, as those provided in the BDMP.

3) Clarify that local health jurisdictions' birth conditions monitoring and reporting programs are separate from the state's BDMP and Genetic Prevention Services (GPS).

ANALYSIS:

Existing law:

1) Establishes the California Department of Public Health (CDPH) to be vested with all the specified duties, powers, purposes, functions, responsibilities, and jurisdiction as they relate to public health. [Health and Safety Code (HSC) § 131050]

2) States Legislative intent to accomplish all of the following in relation to birth defects, stillbirths, and miscarriages that represent problems of public health importance; the severe mental anguish they have on parents and relatives; associated high medical care costs; and, how more information about these conditions could result in preventive measures to decrease their incidence:
   a) Maintain an ongoing program of "birth defects" monitoring (BDMP) statewide. "Birth defect" means any medical problem of organ structure, function, or chemistry of possible genetic or prenatal origin;
   b) Provide information on the incidence, prevalence, and trends of birth defects, stillbirths, and miscarriages, and information on whether they are associated with environmental hazards, or other possible causes;
   c) Develop prevention strategies for reducing the incidence;
   d) Conduct interview studies about the causes of birth defects; and,
   e) Affirm CDPH's authority to contract with a qualified entity to operate the BDMP statewide. [HSC §103825]

3) Requires CDPH's Director to maintain a system to collect information necessary to accomplish statewide monitoring through the BDMP, including requiring specified health facilities to make available medical records of children suspected or diagnosed as having birth defects, including the medical records of their mothers; and, to make available medical records of mothers suspected or diagnosed with stillbirths or miscarriages, and other records of

persons who may serve as controls for interview studies about the causes of birth defects. [HSC §103830]

4) Requires the BDMP to operate statewide. States Legislative intent to assess annually the adequacy of program resources, and that the annual assessment include a consideration of at least the numbers of births in the state; the scope of program activities; and, any urgent situation requiring extraordinary commitment of present or planned program staff or resources. [HSC §103835]

5) Requires CDPH's Director to use the information collected through the system it maintains and information available from other reporting systems and health providers to conduct studies to investigate the causes of birth defects, stillbirths, and miscarriages and to determine and evaluate measures designed to prevent their occurrence. [HSC §103840]

6) Requires CDPH's Director to appoint an advisory committee to advise on the implementation of the BDMP. Requires that representatives from epidemiology, hospital administration, biostatistics, maternal and child health, and public health be on the committee and at least one representative to be from the manufacturing industry. [HSC §103845]

7) Requires all information collected to be confidential and used solely for the BDMP. Limits access to this information to authorized program staff and persons with a valid scientific interest, who have specified qualifications; are engaged in demographic, epidemiological, or other similar studies related to health; and, agree in writing to maintain confidentiality. Requires, among other things, CDPH to maintain accurate records of all persons given access to this information; processes for when research is conducted other than by program staff; and, requirements before this information is disclosed. [HSC §103850]

8) Permits CDPH to enter into a contract for the establishment and implementation of the BDMP, with the authority to establish criteria for the contract. [HSC §103855]

9) Requires CDPH to charge a fee to all payers for any test or activity for genetic prevention services. Creates the BDMP Fund as a special fund in the State Treasury. Requires the fee revenues that are collected to be deposited into the fund to support BDMP activities. [HSC §124977]

10) Requires the BDMP to collect and store any umbilical cord blood samples received from hospitals for storage and research. Requires the BDMP, for purposes of ensuring financial stability, to ensure: fees paid by researchers be used for, and be sufficient to cover the cost of, collecting and storing blood samples; a researcher provides satisfactory evidence that adequate funding will be provided to CDPH from the fees paid by the researcher for the request; and, CDPH receives federal grant moneys to pay for initial startup costs for the collection and storage of umbilical cord blood samples. [HSC §124991(a)]

This bill:

1) Permits a local health officer to maintain a system for the collection of information within the local health jurisdiction, and to require reporting institutions within their jurisdictions to participate, that is necessary to accomplish a local-level monitoring and reporting program similar to, but independent of, the state-level BDMP, subject to adequate funding.

2) Permits information about birth conditions to be reported using either of the following systems at the discretion of the public health director or the local health officer:
   a) A system that requires reporting institutions within the local health jurisdiction to make their records available for review and information collection by designated staff of the local program to monitor birth conditions; or,
   b) A system that requires reporting institutions within the local health jurisdiction, including, but not limited to, providers and laboratories, to transmit specified data manually or electronically to the local health officer.

3) Permits a local health officer to use the required reporting of birth conditions to conduct studies to investigate the causes of conditions and determine and evaluate measures designed to prevent their occurrence. Permits the granting of reported information to authorized program staff and persons with valid scientific interest in the data if the staff or other persons are engaged in demographic, epidemiological, or other similar studies related to health and who agree, in writing, to maintain confidentiality.

4) Permits a local health officer to issue a written order to reporting institutions within the local health jurisdiction that requires them to make their related records available to authorized local program staff; report selected information about birth conditions to the local public health program; or, implement a

hybrid of the two systems. Prohibits a local health officer from impeding or contradicting activities of the state-level BDMP in their jurisdiction.

5) Requires birth conditions reported in a local health jurisdiction to be at the direction and discretion of the local health officer, subject to adequate funding. Requires a local health jurisdiction to consider implementing the same reporting requirements and workflows currently used by the reporting institutions and to consider less costly alternative methods if current requirements and workflows would impose additional costs compared to the alternatives.

6) Permits a local health officer only to collect information if it is a unique demographic, diagnostic, or health data directly related to a birth condition, unless the patient or their parent or guardian gives consent to the reporting institution to collect additional data to report to the local health officer.

7) Permits a local health officer to require reporting institutions within the local health jurisdiction to report birth conditions, as needed, to assess and address the needs of the local health jurisdiction; to supplement the state BDMP in jurisdictions where it is conducted, if needed; or, for reporting of birth conditions in a local health jurisdiction where there is no state BDMP.

8) Prohibits genetic disease testing program funds to be used to support the provisions in this bill. Specifies that the provisions in this bill do not apply to the CDPH's BDMP or GSP.

9) Specifies that the state is not responsible for any aspect of birth condition monitoring and reporting conducted by locals.

Background

According to the author of this bill:

> Achieving healthy communities is a multifaceted approach. Medical and public health professionals play a vital role in making sure our communities are healthy, protected, and have access to care. Whenever possible, we must expand resources to support their roles in achieving healthy communities. Making improvements to our health care needs and ensuring our communities are safe from environmental hazards entail evaluating the health data we collect and making sure we identify gaps. One way CDPH is doing so is by monitoring birth defects in the state through the BDMP. However, this program is restricted

to just ten counties. This bill expands on this program, specifically, by giving local health jurisdictions the ability to implement a local birth conditions reporting program should they choose to do so. This allows a local health jurisdiction to collect their own data and improve services for families facing health care challenges. It builds upon the work that CDPH is doing and allows all counties to have the option to do monitoring.

Birth defects. According to the Centers for Disease Control and Prevention (CDC) website, every 4.5 minutes a baby is born with a condition that affects the structure or function of their body, affecting one in every 33 babies born in the United States each year. They are also the leading cause of infant deaths, accounting for one in five (20%) of all infant deaths. Birth defects can occur during any stage of pregnancy with most occurring in the first three months of pregnancy, when the organs of the baby are forming. However, some birth defects do occur later in pregnancy as tissues and organs continue to develop. While medical advancements have greatly improved health and survival, many of these conditions are lifelong and require lifelong care. Birth defects can vary from mild to severe, and health outcomes and life expectancy depend on which body part is involved and how it is affected.

Exposures and risk factors. CDPH's website states when discussing exposures and risk factors in regards to birth defects it means anything the fetus is exposed to, as well as anything that may alter conditions within the womb, which includes everything the mother may come into contact with during pregnancy. Because most structural development of the fetus occurs during early pregnancy, CDPH focuses on the "periconceptional" period—the month before and first three months after conception. Studies cannot always provide a definitive answer about whether a particular exposure or risk factor, or both, caused a birth defect. Instead, results are reported as changes in birth defects risk for exposed pregnancies compared to unexposed. The following are general guidelines BDMP uses:

- *Exposures* – anything that comes into direct contact with the mother or fetus;
- *Risk factors* – such as social or economic conditions, may provide clues that can help pinpoint causes;
- *Higher risks* – a doubling or more, suggests an association between the exposure and the condition in question. This may mean the studied exposure/risk factor contributes to the birth defect;
- *Decreased risks* – one-half or less, indicates a protective effect. The exposure appears to prevent the birth defect from occurring; and,
- *No change in risk* – implies that the exposure and the defect are not closely related.

Studies that are conducted in order to discover the role of exposures and risk factors on birth defects must validate biologically plausible pathways of exposure—meaning ways the mother could have been exposed. Proximity is not enough. If a pregnant woman lives near a source of environmental concern, for example, things like whether she could have inhaled, ingested or otherwise been exposed to harmful conditions must also be considered. The following exposures and risk factors may have some impact on a fetus if the mother was exposed during pregnancy: air pollution; alcohol; chemicals, pesticides, and solvents; diet and nutrition; drinking water; drugs; folic acid/vitamins; and, medications.

BDMP. According to CDPH's website, the California BDMP is a population-based registry that has been an active ascertainment registry since 1982 when the California State Legislature authorized it to collect data on birth defects, stillbirths, and miscarriages. BDMP currently monitors over 150,000 births in 10 counties (Fresno, Kern, Kings, Madera, Merced, Orange, San Diego, San Joaquin, Stanislaus, and Tulare)—approximately 30% of the births in California, representative of the state's population. BDMP registry data provide ongoing tracking (also called surveillance) to monitor rates and trends of select birth defects. The data also provides pregnancy outcome data for the pregnancy blood samples included in the California Biobank Program. BDMP's objectives are to: increase the quality and quantity of California-based birth defect data available for purposes of public health monitoring and investigator-led research; increase communication of birth defects information; and, monitor public health and safety concerns relating to birth defects.

Information is collected on specific congenital and inherited disorders to provide the public, researchers, and the medical community with accurate data on birth defects. BDMP sets procedures for identifying children with birth defects, reviews medical records, and links cases with state and national agencies. Data collection focuses on structural malformations including major heart defects, oral clefts, neural tube defects, hypospadias, abdominal wall defects, Down syndrome and other chromosomal defects. BDMP monitors the rates of birth defects by geographic and demographic attributes, and focuses on common birth defects with substantial public health impact. BDMP responds to inquiries from the public, and research and medical communities. It provides data for public health reports, needs assessments, and program evaluation, and also works to communicate relevant information and identify appropriate resources specifically for California families concerned about birth defects.

The author's office provided information stating that current law does not authorize local health jurisdictions to implement birth defects reporting in their

respective jurisdictions, and limits their reporting programs to infectious/communicable diseases and/or food- or vector-borne conditions. Likewise, some of the largest and most diverse counties (Alameda, Los Angeles, Sacramento, San Francisco, and San Jose) are not represented in the statewide BDMP.

ARGUMENTS IN SUPPORT: Los Angeles County (LAC) and the March of Dimes, as cosponsors, and other supporters of this bill state that monitoring birth anomalies can be an indispensable tool for local health programs to identify newborns and infants with select health conditions and connect them with necessary care (case finding); determine the best prevention strategies and allocate resources more effectively; highlight areas for further research, address care gaps or quality issues, and evaluate underperforming practices or products; and, respond to environmental or public health emergencies that may pose risks. For instance, if this authority were currently available in LAC, it could be utilized to monitor the effects of the recent fires on births in the coming years to identify possible impacts of exposure to after-fire toxicity in air, water, or soil. Likewise, LAC states it could track birth-related incidents of cerebral palsy, an area of particular concern to their Board of Supervisors. Finally, they could monitor the incidence of Sickle Cell Disease (SCD) to ensure that families of infants diagnosed with SCD are enrolling in appropriate specialty care.

SUBJECT: Student personal information

SOURCE: Privacy Rights Clearinghouse

DIGEST: This bill establishes, commencing July 1, 2027, the Higher Education Student Information Protection Act governing the collection, use, disclosure, retention, and protection of postsecondary student data by educational technology operators. It further modifies the K-12 Pupil Online Personal Information Protection Act (KOPIPA) and the Early Learning Personal Information Protection Act (ELPIPA) to regulate the use of pupil data in artificial intelligence (AI) systems, applies their respective provisions to entities acting on behalf of an operator, and makes other changes related to protecting pupil information. It further creates a private right of action for specified violations of pupil and student privacy protection.

Senate floor amendments of 8/21/26 1) revise the standards and institutional review process for operators' deidentification of student information, 2) require operators to apply deidentification measures consistent with Family Educational Rights and Privacy Act (FERPA) requirements, as determined by educational institutions, 3) clarify that the bill does not require educational institutions to review or approve an operator's deidentification practices, 4) revise permitted sales and disclosures by national assessment providers and nonprofit enrollment-data reporting entities, subject to contractual restrictions, 5) allow specified communications to students concerning course materials, payments, rentals, returns, and order fulfillment 6) and extend the prelitigation notice and cure periods to 60 days.

ANALYSIS:

Existing law:

1) Establishes the Children's Online Privacy Protection Act of 1998, which imposes certain requirements on operators of websites or online services directed to children under 13 years of age, and on operators of other websites or online services that have actual knowledge that they are collecting personal information online from a child under 13 years of age. (15 United States Code (USC) § 6501; 16 Code of Federal Regulations (CFR) Part 312)

2) Establishes FERPA, which protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education. (20 USC § 1232g; 34 CFR Part 99)

3) Establishes the California Consumer Privacy Act (CCPA), which grants consumers certain rights with regard to their personal information, including enhanced notice, access, and disclosure; the right to deletion; the right to restrict the sale of information; and protection from discrimination for exercising these rights. It places attendant obligations on businesses to respect those rights. (Civil Code (CIV) § 1798.100 et seq.)

4) Defines "personal information" under the CCPA as information that identifies, relates to, describes, is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household. The CCPA provides a nonexclusive series of categories of information deemed to be personal information, including biometric information, geolocation data, and "sensitive personal information." (CIV § 1798.140(v)(1))

5) Establishes KOPIPA to restrict the use and disclosure of students' "covered information," which means personally identifiable information or materials, in any media or format that meets the definition. (Business and Professions Code (BPC) § 22584)

6) Prohibits, pursuant to KOPIPA, operators from knowingly engaging in targeted advertising, using information about students to create a profile about them except in furtherance of K-12 school purposes, selling students' information, or disclosing their information, except as provided. (BPC § 22584(b))

7) Requires an operator to delete a pupil's CCPA-excluded covered information under the operator's control if a parent, guardian, or adult pupil requests the deletion of the information if the pupil has not been enrolled in the school for 60 days or more. (BPC § 22584(d)(3))

This bill:

1) Expands the scope of KOPIPA to regulate the use of pupil data in AI systems by prohibiting operators from using covered information, including persistent unique identifiers, to train or develop AI systems unless the use is in furtherance of K–12 school purposes and for the use and benefit of the school and the teacher, pupil, or parent.

2) Expands the scope of ELPIPA to regulate the use of pupil data in AI systems by prohibiting operators from using covered information, including persistent unique identifiers, to train or develop AI systems unless the use is strictly in furtherance of preschool or prekindergarten purposes and for the use and benefit of the preschool or prekindergarten and the teacher, pupil, or parent.

3) Establishes, operative July 1, 2027, the Higher Education Student Information Protection Act to regulate the collection, use, disclosure, and protection of postsecondary education student data by educational technology operators, as defined. Specifically, it:

    a) Prohibits operators from knowingly engaging in targeted advertising based on student information, creating student profiles unrelated to higher education purposes, selling student information except in limited circumstances, making unauthorized disclosures of covered information, or using covered information to train or develop AI systems, as specified. The bill allows specified sales or disclosures by a national assessment provider for assessment, admissions, scholarships or financial aid, or other

educational purposes, and by a nonprofit enrollment data reporting entity for specified verification, reporting compliance, and higher education purposes. These transactions must be governed by a written contract restricting further sales, disclosure, and use of the information, as specified.

b) Specifies circumstances under which disclosures of covered information are not prohibited, including higher education purposes, research, legal compliance, security, contracted services providers, and the assessment and enrollment data reporting activities described, subject to certain conditions, as specified.

c) Requires operators to implement and maintain reasonable security procedures and data governance practices. Operators are to protect student information from unauthorized access or disclosure, comply with specified student and institutional requests to delete covered information, limit retention of covered information to the period reasonably necessary to fulfill its purposes, and maintain a written data retention policy that identifies retention and deletion timelines, as specified.

d) Specifies various exemptions and permitted uses of student Information, including the use of deidentified or aggregated information for product improvement and research, adaptive learning and customized instruction, and disclosures otherwise authorized by law, and communications to students regarding required or recommended course materials, payment deadlines, rental and return policies, refunds, returns, and order fulfillment, as specified.

e) Clarifies that this bill's provisions do not supersede specified federal student privacy and disability laws.

4) Creates a private right of action for specified violations of pupil and student privacy protections.

5) Expands the definition of "covered information" under KOPIPA and ELPIPA to include additional categories of information, including extracurricular activities, biometric or behavioral information, device identifiers, search activity, photographs, and voice recordings. This bill applies a similar definition under the Higher Education Student Information Act.

6) Expands the definition of "Operator" under KOPIPA and ELPIPA to include entities working on behalf of operators of websites, online services, applications, or online applications designed, marketed, and used for educational purposes, including providers of digital educational software and services. This bill applies a similar definition under the Higher Education Student Information Protection Act.

7) Adds the definition of various terms applicable to KOPIPA, ELPIPA, and the Higher Education Student Information Protection Act, including:

   a) "Deidentified information" to mean information that cannot reasonably identify, relate to, describe, be capable of being associated with, or be linked, directly or indirectly, to a particular individual or household if the operator that possesses the information does all of the following:

      i) Takes reasonable measures to ensure that the information cannot be associated with a particular individual or household.

      ii) Publicly commits to maintain and use the information in deidentified form and not to attempt to reidentify the information. The operator may attempt to reidentify the information solely for the purpose of determining whether its deidentification processes satisfy the criteria of this paragraph.

      iii) Contractually obligates any recipient of the information to meet the criteria described above in i) and ii) above of this analysis.

      iv) Applies deidentification measures consistent with those required of educational agencies and institutions under FERPA and implementing regulations, as determined by the preschool, prekindergarten, school, local educational agency (LEA), or higher education institution.

      v) Makes its deidentification processes available for review, by the preschool, prekindergarten, school, LEA or higher education institution that the operator serves before any use of deidentified data by the operator.

      vi) To the extent the preschool, prekindergarten, school, LEA, or higher education institution that the operator serves maintains a deidentification

policy or standard, applies deidentification measures in accordance with that policy or standard.

vii) If the preschool, prekindergarten, school, LEA, or higher education institution reviews the operator's deidentification processes, prohibits the operator from using, sharing, or retaining the information as deidentified information until the institution determines that the operator's process is sufficient under the applicable standards.

viii) Clarifies that a preschool, prekindergarten, school, LEA, or higher education institution is not required to review an operator's deidentification processes or approve an operator's retention or use of deidentified information.

b) "Operator" to mean the operator, or an entity working on behalf of the operator, of an internet website, online service, online application, or mobile application with actual knowledge that the site, service, or application is used for preschool, prekindergarten, K–12 school or higher educational purposes and was designed or marketed for preschool, prekindergarten, K–12 school or higher educational purposes, including a provider of digital educational software or services, including digital course books. "Operator" does not include the State Department of Education, a preschool, prekindergarten, a LEA, a school, or a higher education institution.

Comments

1) *Need for the bill.* According to the author, "The Student Online Personal Information Protection Act and the Early Learner Personal Information Protection Act were landmark pieces of legislation that created protections for student and early learner data. However, technological progress has outpaced the legal protections provided by these laws, leaving students and early learners vulnerable to irresponsible collection, usage, and disclosure of their data. Additionally, students in California's higher education institutions have no equivalent protections. AB 1159, the CA Learner Personal Information Protection Act, modernizes existing data protections in the education field and extends those protections to students in higher education, ensuring that all students can learn safely and securely in an increasingly digital world."

2) *Institutional oversight of deidentified information.* Existing federal law, including FERPA, governs educational institutions' handling of student education records and certain disclosures to third parties. FERPA primarily

applies to LEAs and institutions that receive funds under programs administered by the United States (U. S.) Department of Education. That includes K-12 schools, school districts, community colleges, the California State University (CSU), the University of California (UC), and many private colleges that participate in federal student aid programs. FERPA further permits educational institutions to disclose education records to contractors and service providers acting as school officials under certain conditions, while requiring institutions to maintain direct control over the use and maintenance of those records. This bill permits operators to use and share deidentified student information for specific purposes and places responsibility on operators to determine whether information has been sufficiently deidentified. Federal guidance issued by the U.S. Department of Education regarding FERPA deidentification practices suggests that LEAs and institutions take an active role in evaluating whether information has been sufficiently deidentified and assessing the risk of reidentification.

Concerns have been raised regarding the extent to which educational institutions (LEA, school, prekindergarten, preschool, and higher education institutions) have oversight of operator deidentification practices, particularly when the underlying information originates from records shared by the institution. In response to these concerns, the amendments require an operator to apply measures consistent with FERPA deidentification requirements, as determined by the educational institution; make its process available for institutional review before using deidentified data; and, if the institution conducts a review, refrain from using, sharing, or retaining the information as deidentified until the institution determines the process is sufficient.

3) *Student privacy protections consistent across educational segments.* This bill expands existing K-12 and early learning student privacy laws while establishing a new higher education privacy framework. Although many provisions are substantially similar across the three acts, the bill creates separate statutory frameworks governing different educational sectors. Aligning the three privacy act frameworks may make compliance easier for operators that serve multiple educational sectors.

4) *Permitted disclosures and sales.* This bill generally prohibits the sale or disclosure of covered information but establishes certain exceptions. Recent amendments revise the exceptions for national assessment providers and nonprofit enrollment data reporting entities and require written contracts limiting further sales, disclosure, and use. This bill's provisions stating that it does not limit or supersede FERPA preserves applicable federal requirements,

and each disclosure of education records must still be supported by consent or an applicable FERPA exception.

5) *Private right of action.* This bill creates a private right of action for specified violations of its student privacy protections.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee analysis, this bill would have the following fiscal impact:

- This bill could result in additional, unknown cost pressures to the courts to adjudicate additional cases that are filed. The actual costs will depend on the number of cases filed and the amount of court time needed to resolve each case. It typically costs about $1,000 to operate a courtroom for one hour. Although the courts are not funded based on workload, increased pressure on the Trial Court Trust Fund may create a demand for increased funding for the courts from the General Fund.

- The Chancellor's Office estimates minor, one-time Proposition 98 General Fund costs for the community colleges to train staff on student rights under the Higher Education Student Information Protection Act. There could also be one-time General Fund workload costs of $12,000 to $23,000 for the Chancellor's Office to release guidance.

- The administrative costs to the University of California and California State University are expected to be minor and absorbable within existing resources.

- The Department of Justice anticipates no significant fiscal impact as a result of this measure.

SUBJECT: Public works: prevailing wages

SOURCE: State Building and Construction Trades Council of California

DIGEST: This bill requires updated prevailing wage rates, as determined by the Director of the Department of Industrial Relations (DIR), to apply to any public works contract that is awarded or for which notice to bidders is published after July 1, 2027, if the awarded value of the prime contract is $35 million or greater. Contracts for affordable housing development projects are exempt from this requirement, as specified.

Senate Floor Amendments of 8/21/26: 1) limit mid-project prevailing wage rate increases to any public works contract that is awarded or for which notice to bidders is published after July 1, 2027*, if the awarded value of the prime contract is $35 million or greater*; and 2) clarify, for affordable housing development projects, that the Director shall determine prevailing wage rate increases during a *semiannual period*.[1]

[1] For affordable housing developments, the Director's determination shall not be effective as to any contract for which notice to bidders has been published or as to any contract that has been awarded.

ANALYSIS:

Existing law:

1) Establishes the DIR, under the control of an executive officer known as Director of Industrial Relations (Director), to foster, promote, and develop the welfare of the wage earners of California, to improve their working conditions, and to advance their opportunities for profitable employment. (Labor Code §50-64.5)

2) Requires that not less than the general prevailing rate of per diem wages be paid to all workers employed on a "public works" project costing over $1,000 dollars and imposes misdemeanor penalties for violations of this requirement. (Labor Code §1771)

3) Requires the body awarding any contract for public work, or otherwise undertaking any public work, to obtain the general prevailing rate of per diem wages and the general prevailing rate for holiday and overtime work in the locality in which the public work is to be performed for each craft, classification, or type of worker needed to execute the contract from the Director. (Labor Code §1773)

4) Requires the Director to determine the general prevailing rate of per diem wages and the Director's determination to be final, except as specified. (Labor Code §1770)

5) Provides that in determining the prevailing wage rate, the Director shall ascertain and consider the applicable wage rates established by collective bargaining agreements (CBAs) and the rates that may have been predetermined for federal public works, within the locality and in the nearest labor market area. Where the rates do not constitute the rates actually prevailing in the locality, the Director shall obtain and consider further data from the labor organizations and employers or employer associations concerned, including the recognized collective bargaining representatives for the particular craft, classification, or type of work involved. The rate fixed for each craft, classification, or type of work shall be not less than the prevailing rate paid in the craft, classification, or type of work. (Labor Code §1773)

6) Provides that if the Director determines that the rate of prevailing wage for any craft, classification, or type of worker is the rate established by a CBA, the Director may adopt that rate by reference as provided for in the CBA and that

determination shall be effective for the life of the agreement or until the Director determines that another rate should be adopted. (Labor Code §1773)

7) Requires the Director to use the following methodology to determine the general prevailing rate of per diem wages in the locality in which the public work is to be performed:

   a) The basic hourly wage rate being paid to a majority of workers engaged in the particular craft, classification, or type of work within the locality and in the nearest labor market area, if a majority of the workers are paid at a single rate. If no single rate is being paid to a majority of the workers, then the single rate being paid to the greatest number of workers, or modal rate, is prevailing. If a modal rate cannot be determined, then the Director shall establish an alternative rate by considering the appropriate CBAs, federal rates, rates in the nearest labor market area, or other data such as wage survey data.

   b) Other employer payments included in per diem wages pursuant to Labor Code §1773.1 and as included as part of the total hourly wage rate from which the basic hourly wage rate was derived. In the event the total hourly wage rate does not include any employer payments, the Director shall establish a prevailing employer payment rate, as specified.

   c) The rate for holiday and overtime work shall be those rates specified in the CBA when the basic hourly rate is based on a CBA rate. In the event the basic hourly rate is not based on a CBA, the rate for holidays and overtime work, if any, included with the prevailing basic hourly rate of pay shall be prevailing. (Labor Code §1773.9)

8) Provides that if the Director determines that the general prevailing rate of per diem wages is the rate established by a CBA, and that the CBA contains definite and predetermined changes during its term that will affect the rate adopted, the Director shall incorporate those changes into the determination. Predetermined changes that are rescinded prior to their effective date shall not be enforced. (Labor Code §1773.9)

9) Provides that if during any quarterly period the Director determines that there has been a change in any prevailing rate of per diem wages in any locality he or she shall make such change available to the awarding body and his or her determination shall be final. Such determination by the Director shall not be

effective as to any contract for which the notice to bidders has been published. (Labor Code §1773.6)

This bill:

1) Requires, if during any semiannual period the Director determines there has been a change in any prevailing rate of per diem wages, the Director to make such change available to the awarding body. The Director's determination shall be final, except as specified.

2) Provides that the Director's determination of a change in the prevailing wage shall only apply on its effective date to any contract that is awarded or for which notice to bidders is published after July 1, 2027, if the awarded value of the prime contract is $35 million or greater.

3) Exempts from the requirement in 2) contracts for a housing development project if 100 percent of units, excluding managers' units, are restricted by deed, regulatory restrictions contained in an agreement with a governmental agency, or other recorded document as affordable housing for persons and families of low or moderate income, as specified, or subject to an agreement that provides housing subsidies for affordable housing for persons and families of low or moderate income, as specified.

4) Provides that for contracts for a housing development project, described in 3), the Director's determination of a change in the prevailing wage *shall not be effective* as to any contract for which notice to bidders has been published or as to any contract that has been awarded.

5) Authorizes any contractor, awarding body, or representative of any craft, classification, or type of work affected by a change in rates on a particular contract to, within 20 days after publication of the new determination, file with the Director a verified petition to review the determination of that rate upon the ground that it has not been determined in accordance with (Labor Code §1773). Within two days after the filing of the petition, a copy of that petition shall be filed with the awarding body. The petition shall set forth the facts upon which it is based.

6) Requires the Director, or the Director's authorized representative, to, upon notice to the petitioner, the awarding body, and other persons the Director deems proper, including the recognized collective bargaining representatives for

the particular crafts, classifications, or types of work involved, initiate an investigation or hold a hearing.

7) Requires the Director, within 20 days after the filing of a petition, or within a longer period as agreed upon by the Director, awarding body, and all interested parties, to make a final determination and transmit that determination in writing to the awarding body and to the interested parties.

8) States that a determination by the Director is effective 10 days after its issuance. The Director shall include an issue date on the determination. The determination shall remain in effect until it is modified, rescinded, or superseded by the Director.

9) Provides that 1) through 8) shall become operative on July 1, 2027.

Background

Prevailing Wages: The prevailing wage rate is the basic hourly rate paid on public works projects to a majority of workers engaged in a particular craft, classification, or type of work within the locality and in the nearest labor market area. Prevailing wage laws ensure that the ability to receive a public works contract is not based on paying lower wages than a competitor. The Director of DIR has the sole responsibility to establish prevailing wage rates for all classifications of workers. In determining the rates, the Director ascertains and considers the applicable wage rates contained in CBAs and the rates that have been predetermined for federal public works.

The Director issues wage determinations semiannually on February 22 and August 22. Determinations become effective 10 days after their issue date- on March 3rd in leap years and March 4th in non-leap years and September 1st.

Predetermined Wage Increases: Existing law states that if the Director determines that there has been a change in the prevailing wage, such change shall be made available to an awarding body. This notification is for informational purposes and *does not require* an awarding body to update wages on contracts for which the notice to bidders has been published or for ongoing projects. However, there is the potential for prevailing wage rates to change mid-project if the wage determination in effect at the time of bidding includes a predetermined increase.

Each prevailing wage determination contains an expiration date and either one or two asterisks to indicate whether there is a predetermined change. A double asterisk following the determination's expiration date indicates a predetermined

change in the prevailing wage rate. If work on a project extends past the expiration date, the new rates must be paid and should be incorporated into contracts at the start of the project. Predetermined increases typically occur when the prevailing wage rate is based on a CBA and the CBA includes a scheduled pay increase. Predetermined increases are available on DIR's website. A single asterisk following the determination's expiration date indicates that the prevailing wage rate remains in effect for the entirety of the project.

Comments

This bill requires the Director's determination of a change in the prevailing wage rate to apply on its effective date to any public works contract that is awarded or for which notice to bidders is published after July 1, 2027. Put simply, this bill requires mid-project prevailing wage increases. Additionally, this bill exempts contracts for an affordable housing development project, as specified, and establishes a mechanism to review the Director's determination.

The author argues that if a project extends beyond scheduled wage increases, or if no increases were set by the wage determination in effect at the time of bidding, workers will receive outdated wages that do not reflect current labor standards. Furthermore, the author argues that allowing contractors to pay outdated wage rates for the duration of a project creates an uneven playing field for contractors who update wages to reflect current prevailing wage determinations or negotiated labor agreements.

This bill contains nearly identical language to AB 1140 (Daly, 2013), which was vetoed by Governor Brown, and AB 2182[2] (Haney, 2024), which was vetoed by Governor Newsom.

Governor Brown's veto message stated the following:

> "This measure requires contractors on public works projects to increase workers' pay any time the state updates its prevailing wage rates. This is intended to address the circumstance where a non-union contractor is not

[2] AB 2182 would have applied mid-project prevailing wage increases to any contract for which notice to bidders was published after July 1, 2026, and that met all of the following requirements:

- The contract is not for the development of housing.
- The contract is subject to public works law, as specified.
- The awarded value of the prime contract is $35 million or greater.
- The contract is not awarded by the state or a state agency, nor is the contract awarded in furtherance of a project undertaken by the state. "State" is inclusive of the Legislature, the Judicial Council, the California State University, and the University of California.

> required to adjust wages mid-project but a union contractor is subject to such adjustments pursuant to a collective bargaining agreement.
>
> In most cases, projects are bid, awarded and completed in a relatively short period of time and this measure would have little, if any impact. Larger, long term projects are the more likely setting for the union/non-union wage differential this bill seeks to address. Unfortunately, introducing such wage adjustments as proposed by this measure is likely to lead to uncertainty in the cost of public works projects and increase costs ultimately borne by the taxpayers.
>
> Finally, many collective bargaining agreements already address this limited circumstance by allowing wage rates to remain at the level determined by the state at the time of the bid, award or start of the contract. Given this, I do not find a statutory change warranted to address the issue raised by this measure."

Governor Newsom's veto message stated the following:

> "This bill would require that any change in prevailing wage rates apply to existing contracts on certain public works projects…
>
> While I am a steadfast supporter of prevailing wage law, the adjustments proposed by this measure would likely lead to uncertainty in the cost of public works projects, potentially creating significant cost pressures on the state budget.
>
> In partnership with the Legislature this year, my Administration has enacted a balanced budget that avoids deep program cuts to vital services and protected investments in education, health care, climate, public safety, housing, and social service programs that millions of Californians rely on. It is important to remain disciplined when considering bills with significant fiscal implications that are not included in the budget, such as this measure."

The questions raised in both veto messages remain relevant today. Who will bear the costs related to increases in wage rates mid-project? What effect will this have on future bids for public works projects? However, the committee also asks, is it fair to pay non-union workers employed on lengthy public works projects an outdated prevailing wage rate? Would applying mid-project wage rate increases maintain a level playing field?

Related/Prior Legislation

AB 2182 (Haney, 2024) would have, among other things, required a change in the prevailing rate of per diem wages, as determined by the Director, to apply to any public works contract for which notice to bidders is published after July 1, 2026, and that meets specified criteria. AB 1198 is substantially similar to AB 2182. The bill was vetoed by Governor Newsom.

AB 1140 (Daly, 2013) would have required a change in the prevailing rate of per diem wages, as determined by the Director, to apply to any public works contract that is awarded or for which notice to bidders is published on or after January 1, 2014. AB 1198 is nearly identical to AB 1140. The bill was vetoed by Governor Brown.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DIR indicates that it would incur first-year costs of $5.75 million to $6 million, and $5.4 million to $5.7 million annually thereafter, to implement the provisions of the bill (State Public Works Enforcement Fund).

- To the extent that state agencies execute a public works project, the bill would result in increased project costs. The magnitude is unknown, but potentially significant (General Fund and special fund).

ARGUMENTS IN SUPPORT: The source of the measure, the California Building and Construction Trades, argues:

"[AB 1198] is crucial to ensuring that all contractors operate on a level playing field and that workers receive fair wages as determined by collective bargaining agreements (CBAs) which determine the prevailing wage.

In California contract law, the asterisk (*) and double asterisk (**) provisions in prevailing wage determinations indicate that future wage increases are tied to a collective bargaining agreement (CBA) but may not be immediately reflected in the contract at the time of bidding. The single asterisk (*) signifies that wage rates

are subject to periodic adjustments based on scheduled increases in the CBA, while the double asterisk (**) denotes that the wage determination itself is entirely based on an underlying CBA, including any future wage escalations. However, some non-union contractors exploit this system by bidding on public works projects using the lower, pre-adjustment wage rates and then refuse to honor subsequent increases once the contract is awarded. This creates an unfair advantage over responsible contractors who comply with CBA-mandated wage adjustments, undermining fair competition and leading to wage suppression for workers.

AB 1198 seeks to close this loophole by ensuring that all contractors adhere to post-award wage adjustments, reinforcing fair labor practices in public works projects. AB 1198 closes this loophole by requiring that prevailing wages be adjusted in accordance with CBAs that take effect after a contract is awarded. This will ensure that all contractors adhere to the same wage obligations, preventing unfair cost-cutting tactics that harm both workers and law-abiding businesses. Furthermore, this bill reinforces California's commitment to fair labor standards and the protection of skilled workers who rely on negotiated wage increases to keep up with the cost of living."

ARGUMENTS IN OPPOSITION: The Western Electrical Contractors Association opposes the measure, arguing:

"AB 1198 would fundamentally change how prevailing wage determinations apply to public

works contracts by requiring that any change in a prevailing wage rate during a semiannual period be applied to contracts awarded or bid after July 1, 2027. While presented as an administrative update, the fiscal and practical consequences are substantial."

The Rural County Representatives of California, the California State Association of Counties, the League of California Cities, and the California Special Districts Association, among others, oppose the measure unless amended, arguing:

"Under current law, when a project is first advertised for bid, the public agency (as well as the contractor) can go to a webpage managed by DIR to see what the prevailing wage rates are. These wage rates generally include those upcoming increases which will occur during the duration of the project. Contractors incorporate those known labor costs into their bids, allowing public agencies to accurately evaluate proposals, establish project budgets, secure financing, and award contracts with certainty. We are concerned that contracting and put projects in jeopardy.

For projects funded through fixed appropriations, grants, bond proceeds, voter-approved local revenues, or adopted local budgets, unexpected labor cost increases may require agencies to reduce project scope, delay construction, or cancel projects altogether. It would be challenging to predict how many future wage determinations could occur during the project period and adequately plan for cost increases, which may put potential projects at risk…

By introducing additional cost uncertainty into public works contracting, the bill will increase overall project costs and further challenge the affordability of critical infrastructure investments for state and local governments."

SUBJECT: Licensed Dentists from Mexico Pilot Program

SOURCE: Clinica de Salud del Valle de Salinas

DIGEST: This bill revises and recasts the statutory framework for the Licensed Dentists from Mexico Pilot Program (Mexico Dentists Program) and updates various requirements of the existing pilot program relating to temporary state licensure of licensed dentists from Mexico who work for a federally qualified health facility that has at least one health professional shortage area or dental professional shortage area within its service area in California.

Senate Floor Amendments of 8/21/26 eliminate Mexico Dentists Program evaluation requirements; update orientation program subjects and specify that the subjects must be taught by an instructor affiliated with a California Dental School accredited by the Commission on Dental Accreditation; authorize the Dental Board of California (DBC) to terminate a license if a participant is denied a visa; decrease the license fee; update license timeframes; impose a new requirement for program participants to pass the ADEX Dental Examination and; state Legislative intent that DBC implement the Mexico Dentists Program within six months of receiving

philanthropic funds of $200K or more and that DBC administer the program without adopting regulations.

ANALYSIS:

Existing Law:

1) Establishes the Dental Practice Act (Act). (Business and Professions Code (BPC) §§ 1600 et seq.)

2) Establishes the Dental Board of California (DBC or Board) within the Department of Consumer Affairs (DCA) to administer and enforce the Dental Practice Act (Act). (BPC § 1601.1)

3) Establishes the Mexico Dentists Program which requires the Board to issue a three-year non-renewable permit to practice dentistry to no more than 30 dentists from Mexico who meet specified criteria. (BPC § 1645.4)

4) Requires dentists in the pilot program to meet specified criteria to qualify for participation. (BPC § 1645.4(e))

5) Limits employment of dentists in the Mexico Dentists Program to nonprofit community health centers. (BPC § 1645.4(f))

6) Requires dentists in the Mexico Dentists Program to apply for a three-year visa and Social Security number (SSN) within 14 days of receiving a permit, provide the SSN within 10 days of obtaining it, and prohibits participants from engaging in the practice of dentistry until these are met. (BPC § 1645.4(i))

7) Provides that all applicable employment benefits, salary, and policies provided by nonprofit community health centers to their current employees shall be provided to medical and dental practitioners from Mexico participating in the Mexico Dentists Program and that nonprofit community health centers must provide malpractice insurance coverage. (BPC § 1645.4(j))

8) Requires an evaluation of the program to commence 12 months after implementation, performed by a California dental school or independent consultant, and requires the evaluation to include specified issues, e.g. quality of care and impact on cultural and linguistic services. (BPC § 1645.4(k))

9) Requires costs for administering the Mexico Dentists Program to be secured from philanthropic entities. (BPC § 1645.4(l))

10) Requires Mexico Dentists Program applicants to work with the governments of Mexico and the United States in order to obtain the necessary three-year visa required for program participation. (BPC § 1645.4(m))

Background

Licensed Dentists in California. To obtain a dental license in California, applicants to the Dental Board are required to: furnish satisfactory evidence of having graduated from a board-approved dental college; successfully pass a written license examination (National Board of Dental Examination of the Joint Commission on National Dental Examinations); successfully take an examination in California Law and Ethics; successfully pass a practical exam of dental skills and diagnosis-treatment planning; submit fingerprints for the purposed of conducting a background check; and furnish evidence of liability insurance for any injuries sustained as a result of the applicant's taking of the practical licensure examination, among other requirements.

Out-of-country unlicensed applicants may be issued a license to practice in California if they have been issued a diploma from a foreign dental school accredited by a body that has a reciprocal accreditation agreement with any commission or accreditation organization whose findings are accepted by the board so long as the applicant has been issued a degree of Doctor of Dental Medicine or Doctor of Dental Surgery and provides evidence of completion of the full number of academic years of undergraduate courses required for graduation and that the applicant has been issued a dental diploma or degree to the Board (BPC § 1628).

Additionally, if an out of country applicant holds a valid and unrestricted license from another U.S. state or territory, and meets the clinical practice requirements, or can secure a two-year full-time contract with an approved dental school or community/public clinic, they may qualify for licensure through the Licensure by Credential pathway (BPC § 1635.5).

This bill builds upon the existing pathway to licensure in California for a very limited number of currently licensed dentists from Mexico to allow these licensed professionals to serve limited term tenures in critically underserved areas where cultural competency is severely needed.

Licensed Physicians and Dentists from Mexico Pilot Program. The Mexico Pilot Program, established by AB 1045 (Firebaugh, Chapter 1157, Statutes of 2002),

was designed to bring licensed physicians and dentists from Mexico with rural experience, who speak the language, understand the culture, and know how to apply this knowledge in serving the large Latino communities in rural areas who have limited or no access to primary health care services. AB 1045 authorized up to 30 licensed physicians specializing in family practice, internal medicine, pediatrics, and obstetrics and gynecology and up to 30 licensed dentists from Mexico to practice medicine or dentistry in California for up to three years, and required the individuals to meet certain requirements related to training and education. Proponents of the measure were concerned about addressing primary care physician and dentist shortages while maintaining a high quality of care. The bill specified that any funding necessary for the implementation of the Mexico Pilot Program, including the evaluation and oversight functions, was to be secured from nonprofit philanthropic entities and further stated that implementation of the program could not move forward unless appropriate funding was secured from nonprofit philanthropic entities.

The Medical Board of California (MBC) received the necessary philanthropic funding in 2018 to initiate the program and began taking the necessary steps for implementation. As of April 2019, MBC began accepting applications for the Mexico Pilot Program. MBC received the required funding commitments necessary for program implementation in December 2020. In August 2022, the Center for Reducing Health Disparities (CRHD) at the University of California, Davis released its first annual progress report of the Mexico Pilot Program.

In 2024, AB 2860 (Garcia, Chapter 246) created two distinct programs, the Licensed Physicians from Mexico Program (Mexico Physicians Program) in the Medical Practice Act, and the Mexico Dentists Program in the Dental Practice Act, and made various updates and conforming changes.

Despite the statutory framework for the Mexico Dentists Program being in existence for over 20 years, DBC has not implemented a program. The Mexico Physicians Program was implemented after appropriate funding was secured and appears successful in meeting the needs of medical patients in areas where cultural competency is a factor in health care outcomes, as described by an independent evaluation conducted by the University of Davis School of Medicine Center for the Study of Health Disparities.

Comments

The August 21 amendments create new impediments to implementation of the Mexico Dentists Program, including requiring participating dentists to pass the

American Board of Dental Examiners (ADEX) examination and authorizing DBC to terminate a license if a visa is denied.

Participants in this program are not dental students seeking to demonstrate competency for initial entry into the profession; they are dentists who have already completed their dental education and satisfied the requirements to become licensed dentists in Mexico. The program was specifically structured to provide an alternative, closely regulated pathway for a limited number of these licensed dentists to practice in California, subject to additional education, orientation, supervision, practice-setting, and other program-specific requirements intended to ensure competency and patient protection.

Requiring these dentists to additionally pass ADEX effectively overlays an initial-licensure examination requirement onto a program created to establish an alternative pathway for dentists already licensed in Mexico. The requirement creates additional costs, logistical barriers, and potential delays for prospective participants and may further impede implementation of the program.

California law provides a separate licensure-by-credential pathway under which an eligible dentist holding an active and unrestricted license in another state may obtain a California license without passing ADEX, provided the dentist satisfies specified practice experience and other requirements. California therefore does not require passage of ADEX in every instance in which an already-licensed dentist seeks authority to practice in this state; qualifying out-of-state licensees may instead demonstrate eligibility through their licensure, practice experience, and satisfaction of the other requirements for licensure by credential. By contrast, AB 1307 would require participants in this narrowly tailored workforce program to pass ADEX notwithstanding their existing professional licensure in Mexico and the additional competency, education, oversight, and practice restrictions imposed by the program itself.

The August 21 amendments also authorize DBC to terminate a program participant's license if the participant is denied a visa. This provision raises separate concerns because it ties continued eligibility for a state professional license to a federal immigration determination that does not necessarily reflect the dentist's professional qualifications, competency, or ability to practice safely.

The experience of the corresponding Licensed Physicians from Mexico Program is instructive. MBC previously reported to the Legislature that physician applicants encountered difficulty obtaining the visa necessary to participate in the program because they had not yet been issued their California license. In response, the Legislature established a process under which MBC may issue a program license

to an otherwise qualified applicant before the applicant obtains the necessary visa and Social Security number. The physician must then promptly seek the appropriate visa and may not begin practicing until the applicable federal immigration requirements have been satisfied. The statutory framework in the Medical Practice Act does not, however, make an initial visa denial an independent basis for terminating the physician's professional license.

This sequencing recognizes the practical relationship between professional licensure and federal immigration authorization. A visa determination may depend upon the visa classification sought, documentation presented, the individual's employment circumstances, or changes in federal immigration requirements or policy. A participant may need to pursue a different or corrected immigration pathway without any corresponding change in the individual's professional qualifications. Treating a visa denial as grounds for terminating a professional license conflates two distinct governmental determinations: whether an individual is professionally qualified to practice dentistry, which is within DBC's regulatory jurisdiction, and whether that individual is authorized to enter or remain in the United States for that employment, which is determined under federal immigration law.

This bill now authorizes DBC to terminate the license of a dentist who has otherwise satisfied the state's professional and program-specific requirements based on an immigration determination that may be unrelated to the dentist's clinical qualifications, and that may be subject to correction or reconsideration. Notably, the bill does not provide a subsequent process for a participant to appeal or otherwise challenge the termination, or address circumstances in which a visa denial is subsequently reconsidered, corrected, or reversed.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

The DBC estimated a one-time cost of $300,000 to contract with a vendor to conduct the required program evaluation for the prior version of the bill. The Board also noted it will experience a one-time workload impact on the prior version of the bill to promulgate regulations, as well as ongoing workload to process applications and issue licenses. The Senate Appropriations Committee noted that although this bill will create a non-absorbable fiscal impact to implement and regulate the program, all costs will be covered by donations from philanthropic foundations. Workload will not begin until all required funding is received, and the bill becomes operative six months after these funds are secured. DBC will establish a new, dedicated account specifically for the Mexico Pilot

Program to track all program-related revenues (including licensing fees) and expenditures.

The Office of Information Services (OIS) estimates costs of $72,000 to create a new license type in the BreEZe system. OIS notes these costs will also be paid for by philanthropic funds.

SUBJECT: Workplace surveillance

SOURCE: California Federation of Labor Unions

DIGEST: This bill prohibits an employer, both public and private, from using a workplace surveillance tool to monitor or surveil employees in a bathroom located in the workplace.

Senate Floor Amendments of 8/21/26 1) strike previous prohibitions on the use of workplace surveillance tools to monitor employees in locker rooms, changing areas, and lactation spaces but retains the limitations on the use these tools in bathrooms; 2) permit an employee to bring a workplace surveillance tool into a bathroom as long as the tool meets specified criteria; 3) strike anti-retaliation provisions; and 4) add provisions granting a petitioner, in any civil action brought

for alleged violations, the right to seek appropriate temporary or preliminary injunctive relief, including punitive damages, and reasonable attorney's fees and costs.

ANALYSIS:

Existing law:

1) States that the "right to privacy is a personal and fundamental right protected by Section 1 of Article I of the Constitution of California and by the United States Constitution and that all individuals have a right of privacy in information pertaining to them." Further states these findings of the Legislature:

    a) The right to privacy is being threatened by the indiscriminate collection, maintenance, and dissemination of personal information and the lack of effective laws and legal remedies.
    b) The increasing use of computers and other sophisticated information technology has greatly magnified the potential risk to individual privacy that can occur from the maintenance of personal information.
    c) In order to protect the privacy of individuals, it is necessary that the maintenance and dissemination of personal information be subject to strict limits. (Civil Code §1798.1)

2) States that advances in science and technology have led to the development of new devices and techniques for the purpose of eavesdropping upon private communications and that the invasion of privacy resulting from the continual and increasing use of such devices and techniques has created a serious threat to the free exercise of personal liberties that cannot be tolerated in a free and civilized society. (Penal Code §630)

3) Prohibits a person from intentionally, and without the consent of all parties to a confidential communication, using an electronic amplifying or recording device to eavesdrop upon or record the confidential communication. For purposes of these provisions, defines a "person" to mean an individual, business association, partnership, corporation, limited liability company, or other legal entity. (Penal Code §632)

4) Establishes the California Consumer Privacy Act (CCPA), which grants consumers certain rights with regard to their personal information, including enhanced notice, access, and disclosure; the right to deletion; the right to restrict the sale of information; and protection from discrimination for exercising these

rights. It places attendant obligations on businesses to respect those rights. (Civil Code §1798.100 et seq.)

5) Establishes the Consumer Privacy Rights Act (CPRA), which amends the CCPA and creates the California Privacy Protection Agency (PPA), which is charged with implementing these privacy laws, promulgating regulations, and carrying out enforcement actions. (Civil Code §1798.100 et seq.; Proposition 24 (2020))

6) Establishes within the Department of Industrial Relations (DIR), various entities including the Division of Labor Standards Enforcement (DLSE) under the direction of the Labor Commissioner (LC), and empowers the LC with ensuring a just day's pay in every workplace and promotes economic justice through robust enforcement of labor laws. (Labor Code §79-107)

7) Prohibits an employer from causing an audio or video recording to be made of an employee in a restroom, locker room, or room designated by an employer for changing clothes, unless authorized by court order. No recording made in violation of this prohibition may be used by an employer for any purpose. A violation of this section constitutes an infraction. (Labor Code §435)

8) Authorizes, until January 1, 2029, a public prosecutor to prosecute an action, either civil or criminal, for a violation of certain provisions of the labor code or to enforce those provisions independently. (Labor Code §181)

This bill:

1) Defines, among other terms, the following:

   a) "Employer" means a person who directly or indirectly, or through an agent or any other person, employs or exercises control over the wages, hours, or working conditions of any person.
      i) "Employer" includes all branches of state government, or the several cities, counties, cities and counties, and municipalities thereof, or any other political subdivision of the state, or a school district, or any special district, or any authority, commission, or board or any other agency or instrumentality thereof.
      ii) "Employer" includes a labor contractor of a person defined as an employer under (i) above and any entity or individual that contracts with the labor contractor for labor or services, including, but not limited to, a "client employer" under Labor Code Section 2810.3 or an individual or

business entity that contracts for property services under Labor Code Section 238.5.

iii) "Employer" includes a farm labor contractor, as defined in Labor Code Section 1682, or foreign labor contractor, as defined in Section 9998.1 of the Business and Professions Code.

b) "Workplace surveillance tool" means a system, application, instrument, or device that collects or facilitates the collection of employee data, activities, communications, actions, biometrics, or behaviors by means other than direct observation by a person, including, but not limited to, video or audio surveillance, continuous incremental time-tracking tools, geolocation, electromagnetic tracking, photoelectronic tracking, a photo-optical system, or other means. "Workplace surveillance tool" does not include smoke or carbon monoxide detectors or weapon detection systems that automatically screen a person's body.

2) Prohibits an employer, unless directed by a court order, from using a workplace surveillance tool to monitor or surveil employees in a bathroom located in the workplace.

3) Grants employees the right to leave behind workplace surveillance tools that are on their person or in their possession when entering a bathroom.

4) Specifies that (3) above does not apply, and therefore a worker does not have the right to leave behind workplace surveillance tools that are on their person or possession, if the employee is required to remain available during meal or rest periods pursuant to federal or existing state law.

5) Notwithstanding the specified prohibitions, authorizes an employer to check workplace surveillance tools for the one-time entry and exit of bathrooms in the workplace.

6) Specifies that an employer is not in violation of the bill's prohibitions in any of the following circumstances:

a) An employee brings a workplace surveillance tool into a bathroom in the workplace because it is required to access a locked or secured area.
b) An employee voluntarily chooses to bring a workplace surveillance tool into a bathroom in the workplace.

c) An employee brings a workplace surveillance tool, including a badge or personal alarm system, into a bathroom in the workplace because the employer has a policy that requires workplace surveillance tools to be in the employee's possession while on work premises for identification or safety purposes, if the workplace surveillance tool meets both of the following conditions:
   i) Does not detect or record audio or video.
   ii) Is not artificial intelligence enabled.

7) Authorizes the Labor Commissioner to enforce these provisions, including investigating an alleged violation, and ordering appropriate temporary relief to mitigate a violation or maintain the status quo pending the completion of a full investigation or hearing through the procedures set forth under existing law, as specified, including issuing a citation against an employer who violates these provisions and filing a civil action.
   a) If a citation is issued, specifies that the procedures for issuing, contesting, and enforcing judgments for citations and civil penalties issued by the LC shall be the same as those set forth in existing law, as specified.

8) Authorizes these provisions to also be enforced by a public prosecutor, as specified.

9) In any civil action brought, authorizes the petitioner to seek appropriate temporary or preliminary injunctive relief, including punitive damages, and reasonable attorney's fees and costs.

10) Specifies that in addition to any other remedy, an employer who violates these provisions shall be subject to a penalty of $500 for each violation.

11) Provides that an action may be brought in the superior court in any county in which the violation in question is alleged to have occurred or in which the employer transacts business.

12) Provides that the above provisions are not intended to limit any other state or local law, as specified, that provides equal or greater protection to employees.

13) Specifies that the above provisions are severable and if any provision is held invalid, that invalidity shall not affect other provisions or applications that can be given effect.

14) Specifies that these provisions do not prohibit any employer from using workplace surveillance tools as required by federal law or existing state law nor do they authorize an employer to use these as prohibited by federal law or existing state law.

15) Specifies that these provisions do not prohibit the use of a workplace surveillance tool by an employer relating to either of the following:

    a) The development of an aircraft for use in the national airspace.
    b) The development of products or services for national security, military, space, or defense purposes.

16) For purposes of (15) above, specifies that these provisions apply only to the operations covered by a federal statute, federal regulation, or binding federal contract where the use of a workplace surveillance tool is reasonably necessary to comply with the federal statute, regulation, or the binding federal contract.

17) Specifies that this bill's provisions do not apply to a law enforcement agency that includes any employee who is a peace officer, as specified, when it acts as a law enforcement agency or as the employer of its own employees.

    a) For purposes of this provision, specifies that a law enforcement agency is not to be deemed the employer of any employees who are not directly employed by the law enforcement agency.

18) Finds and declares that the provisions of the bill address a matter of statewide concern rather than a municipal affair, therefore, section 1 applies to all cities, including charter cities.

Background

Need for this bill? According to the author: "As technology's capabilities have increased, employer surveillance of workers has increased. Recent reports from ExpressVPN found that close to 80% of employers use monitoring software to track employee performance. With employer surveillance on the rise, workers have limited access to spaces in their workplace, that are not under constant surveillance. Employers use workplace surveillance to track, monitor, manage, and prevent workers from advocating for their rights. The new surveillance state at the workplace has proven to increase psychological distress, stress, and lower job satisfaction among workers."

Related/Prior Legislation

AB 1883 (Bryan, 2026) would regulate the use of workplace surveillance tools by both public and private employers. Specifically, the bill would, with certain exceptions, prohibit an employer from using a workplace surveillance tool that uses artificial intelligence to, among other things, collect neural data or recognize an individual's emotional state. AB 1883 is pending on the Senate Floor.

SB 947 (McNerney, 2026) would, among other things, prohibit an employer from using an ADS to perform certain actions and regulates allowable ADS uses. SB 947 is pending on the Assembly Floor.

SB 951 (Reyes, 2026) would, among other things, establish the California Worker Technological Displacement Act requiring a covered employer to provide advance notice when artificial intelligence or other automated technology causes significant workforce disruption. SB 947 is pending on the Assembly Floor.

[NOTE: Please see the Senate Labor, Public Employment and Retirement Committee analysis on this bill for more background information and information on more prior and related legislation.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- This bill would result in costs to the State as a direct employer to revise policies and ensure the use of any existing tools comply with its requirements (General Fund or special fund). The magnitude of such costs is unknown, and would be driven by the use of workplace surveillance tools across the State's roughly 200 departments and agencies.

- The Department of Industrial Relations (DIR) indicates that it would incur first-year costs of $1.23 million, and $1.67 million annually thereafter, to enforce the provisions of the bill. (Labor Enforcement and Compliance Fund).

- By authorizing public prosecution to enforce worker privacy rights, this bill could result in potentially significant cost pressures to the courts; the magnitude is unknown (Trial Court Trust Fund (TCTF)). The specific number of new actions that could be filed under the bill also is unknown; however, it generally costs about $10,500 to operate a courtroom for an eight-hour day. Courts are not funded on the basis of workload, and increased pressure on TCTF may create a

need for increased funding for courts from the General Fund. The enacted 2025-26 budget includes $38 million in ongoing support from the General Fund to continue to backfill TCTF for revenue declines.

- This bill could result in increased penalty revenue to the State; the magnitude is unknown, but probably minor.

*Staff notes that the fiscal impacts noted above were provided for a previous version of this bill and do not reflect the amendments recently taken.
