ARGUMENTS IN SUPPORT: According to the sponsors, the California Federation of Labor Unions:

"Artificial intelligence (AI) technologies go beyond video and audio surveillance and leaves workers vulnerable to surveillance by the boss while in bathrooms. This is not science fiction; AI surveillance is being used now. Halo Smart Sensor boasts that it is designed for "24/7 monitoring without video or audio…ideal for spaces like restrooms." Halo claims it uses machine learning, and flags "aggression events" using key words. It also uses "infrared and thermal counters" to monitor occupancy. Throne, a "smart" porta-potty used by transit agencies in California, boasts 21 sensors inside the bathroom.

Workers deserve to use the bathroom without the boss getting real time AI updates on their location, use time, temperature, tone of voice, or key words that could include "union," "wage claim," or other words bosses can use to deny workers the right to organize their co-workers."

ARGUMENTS IN OPPOSITION: A coalition of private employer organizations, including the California Chamber of Commerce, are opposed to the measure as it read before the recent amendments. Their opposition arguments, which may no longer apply to the current version of the bill, included:

"AB 1331 jeopardizes safety and security in every workplace:
- AB 1331 applies to both public and private employers, including schools, hospitals, gambling establishments, cities, counties, correctional facilities, small businesses, and more.

- AB 1331 permanently bans any use of AI in security systems used in a break room or cafeteria. This means banning the following:

- Technology that pinpoints where there is an ongoing emergency, including gunshot detection or detection of sounds over a specific decibel
- Technology that can detect in video footage when and where violence or theft occurred
- Technology used to help find lost children in theme parks

- AB 1331 permanently bans any recording of audio in break rooms or cafeterias, including during an ongoing emergency
- AB 1331 allows workers (including any contractor who ever sets foot on premises) to request copies of video footage they are in, regardless of who else or what else is in that footage.
- AB 1331 functionally prohibits even simple use of AI"

SUBJECT: Public postsecondary education: residency: dependents of members of the Armed Forces: reenrollments

SOURCE: Author

DIGEST: This bill extends eligibility for retaining resident classification for purposes of paying tuition at a public higher education institution to a dependent of an Armed Forces member who is granted reenrollment by the university, even if the Armed Forces member has been transferred out of state on military orders or has retired from active duty.

ANALYSIS:

Existing law:

1) Generally known as the Uniform Residency Law, establishes a variety of residency requirements for students attending the California Community Colleges (CCC) or the California State University (CSU). The determination of

such residency status is required in order to assess either resident or nonresident fees and tuition. The Regents of the University of California (UC) may, by resolution, make these provisions of law applicable to the UC (and historically have done so). (Education Code (EC) § 68000-68134)

2) Defines a "nonresident" as a student who does not have residence in the state for more than one year immediately preceding the residence determination date. (EC § 68018)

3) Establishes uniform residency requirements for purposes of ascertaining the amount of fees to be paid by students at CSU and CCC and establishes various exceptions to these residency requirements, including many for current and former members of the Armed Forces. (EC § 68074 and 68075)

4) Requires the CSU, and requests the UC, to require each campus in their respective systems to grant students the right to reenroll in their baccalaureate degree program after withdrawing or stopping out, if the student was in good academic standing with the university. (EC § 66208)

5) Prohibits a student who is attending, or has been admitted to, a public postsecondary educational institution from losing their resident classification if they are continuously enrolled at that institution and a dependent of a member of the Armed Forces of the United States, even if that member is (1) thereafter transferred on military orders to a place outside this state where the member continues to serve in the Armed Forces of the United States, or (2) thereafter retired as an active member of the Armed Forces of the United States. (EC § 68074 (b))

This bill extends eligibility for retaining resident classification for purposes of paying tuition at a public higher education institution to a dependent of an Armed Forces member who is granted reenrollment by the university after withdrawing from a baccalaureate degree program, even if the Armed Forces member has been transferred out of state on military orders or has retired from active duty.

Comments

Need for the bill. According to the author, "AB 1346 is a powerful tool to help our military dependents unlock their educational opportunities. This proposal will support students who faced setbacks but are determined to continue their education. By enabling them to return to school and still benefit from resident

tuition rates, this legislation recognizes California's commitment to second chances and personal growth."

Tuition rates and residency classification. California public higher education institutions are publicly subsidized. As a result, students classified as California residents pay lower tuition rates than nonresident students. Students classified as nonresidents may pay several times more than those charged the resident rate, making eligibility for in-state tuition a significant financial benefit for students.

Current law extends in-state residency classification to a dependent of an Armed Forces member stationed in this state on active duty. If the Armed Forces member is transferred out of state or has retired, current law further provides that the in-state residency classification of a student who is the dependent of an Armed Forces member may be retained, but is contingent upon continuous enrollment at the institution. This bill would additionally authorize the retention of in-state residency classification when the student is granted reenrollment. Under current law, reenrollment rights into a CSU or UC baccalaureate degree program may be granted to students who withdrew or "stopped out" from the program.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations analysis, this bill would have the following fiscal impact:

- The University of California estimates between $37,600 and $75,200 in lost revenues each year as a result of the bill.

- The California State University indicates that any administrative costs associated with verifying students' nonresident classification would be minor, while the Chancellor's Office estimates no costs to community colleges.

SUBJECT: Consumer protection: ticket sellers

SOURCE: Music Artists Coalition
National Independent Venue Association- California

DIGEST: This bill prohibits speculative ticket sales, modernizes existing anti-bot provisions, and imposes restrictions on deceptive websites and advertising practices.

ANALYSIS:

Existing law:

1) Defines a ticket seller as any person who for compensation, commission, or otherwise sells admission tickets to sporting, musical, theatre, or any other entertainment event. Clarifies that various entities are not a ticket seller subject to various requirements. Establishes various requirements for ticket sellers, a violation of which constitutes a misdemeanor. (Business and Professions Code §§ 22500 – 22511)

2) Prohibits a ticket seller from contracting to sell or accepting payment for tickets unless the ticket seller has lawful possession of the ticket; has a contractual right to obtain the ticket; or informs the purchaser the seller does not have possession of the tickets, has no contract to obtain the offered ticket, and may not be able to supply the ticket at the contracted price, as specified. Authorizes a ticket seller to accept a deposit from a prospective purchaser as part of an agreement that the ticket seller will make best efforts to obtain a ticket at a specified price or price range and within a specified time, provided that the ticket seller informs the purchaser orally at the time of the contract or receipt of consideration, whichever is earlier, and in writing within two days, of the terms of the deposit agreement, and includes in the oral and written notice other required disclosures. (BPC § 22502.1)

3) Prohibits a ticket seller from representing that they can deliver or cause a ticket to be delivered at a specific price or within a specific price range and fail to deliver within a reasonable time at or below or within the price and range of prices stated. Specifies that a ticket seller who violated this prohibition and violates 3) above is civilly liable to the ticket purchaser for two times the contracted price of the ticket, in addition to any sum expended in trying to attend the event, and reasonable attorney's fees and court costs. (BPC §§ 22052.2 and 22052.3)

4) Prohibits a person from using, selling, offering for sale, or advertising software designed to circumvent a ticket seller's security measures, access controls, or other controls used to ensure an equitable ticket-buying process. Makes it unlawful to use software or other technological means to purchase tickets in excess of posted limits for online ticket sales. (BPC § 22505.5)

This bill:

1) Repeals existing BPC Section 22503.5 which exempts certain primary ticket sales activities from the law.

2) Establishes various definitions and makes various conforming changes.

3) Prohibits a ticket seller from engaging in a speculative ticket sale, defined as the advertisement, listing, marketing, offering for sale, contracting for sale, acceptance of payment for, or sale of a ticket by a person who, at the time of the advertisement, listing, marketing, offer for sale, contract for sale, acceptance of payment for, or sale, does not have either actual or constructive possession of the ticket or authorization by the event presenter or venue operator to sell the ticket. Prohibits a ticket seller from advertising, listing, marketing, offering for sale, contracting for sale, accepting payment for, or selling a ticket before the ticket has been made available for sale by the event presenter, venue operator, rights holder, or original seller, unless expressly authorized by the event presenter, venue operator, rights holder, or original seller unless the ticket seller has constructive possession of the ticket.

4) Prohibits a ticket resale marketplace from knowingly or recklessly processing payment, collecting a fee, advertising, listing, marketing, offering for sale, contracting for sale, accepting payment for, or facilitating the completion of a speculative ticket sale, and requires a ticket resale marketplace to implement reasonable measures designed to prevent speculative ticket sales on its platform.

5) Strengthens prohibitions against the use of ticket-buying software and other technological methods to circumvent ticket purchasing restrictions, including posted ticket limits, electronic queues, presale restrictions, account limitations, and security or access controls. Prohibits providing, selling, marketing, or facilitating software or services used to engage in or enable this conduct.

6) Prohibits deceptive or misleading practices in the advertising, marketing, sale, or resale of event tickets, including practices that misrepresent or create consumer confusion regarding the source, authorization, affiliation, availability, price, nature, or seating location of tickets. Provides that violations constitute false or misleading advertising under existing law.

Background

California's ticket sellers regulations were largely enacted before the widespread adoption of online ticket marketplaces, digital ticketing systems, mobile ticket transfers, and sophisticated resale platforms. Today, consumers purchase, transfer, and resell tickets through a variety of online channels that did not exist when many of the ticketing statutes were first enacted. While technological advances have increased convenience and expanded access to tickets, they have also introduced

new challenges relating to speculative ticket sales, automated purchasing software, deceptive online practices, fee transparency, and restrictions on ticket transferability. Policymakers, regulators, artists, venues, ticketing companies, and consumer advocates have increasingly focused on whether existing laws adequately protect consumers in the modern ticketing marketplace.

Federal regulators have devoted significant attention to ticketing-related consumer protection concerns in recent years. The Federal Trade Commission (FTC) has identified hidden fees, deceptive pricing practices, and the use of automated software to circumvent ticket purchasing restrictions as practices that can harm consumers and impair fair competition. In 2024, the FTC adopted its Rule on Unfair or Deceptive Fees, commonly referred to as the "Junk Fees Rule," which requires greater transparency in ticket pricing and seeks to ensure that consumers receive meaningful information regarding the total cost of a ticket before making purchasing decisions. The FTC has also pursued enforcement actions under the Better Online Ticket Sales (BOTS) Act against entities alleged to have used automated technologies, multiple accounts, and other means to evade ticket purchasing limits designed to provide equitable access to tickets.

At the same time, federal antitrust scrutiny of the live entertainment industry has continued to increase. In 2010, the United States Department of Justice (DOJ) approved the merger of Live Nation and Ticketmaster subject to conditions intended to address competition concerns. In 2019, the DOJ announced that Live Nation had violated portions of the consent decree governing the merger and extended the decree through 2025. Following highly publicized ticketing issues associated with major concert tours and broader concerns regarding competition in the live entertainment marketplace, the DOJ and a coalition of state attorneys general, including California, filed an antitrust lawsuit against Live Nation Entertainment and Ticketmaster in 2024. The litigation alleges conduct affecting competition in concert promotion, venue services, and ticketing and reflects ongoing national debate regarding competition, consumer choice, and access to live entertainment events.

The Legislature has considered numerous measures over the past decade intended to address evolving issues in the ticketing marketplace. AB 329 (Pan, Chapter 325, Statutes of 2013) prohibited the use and sale of software designed to circumvent ticket purchasing controls intended to ensure an equitable ticket-buying process. AB 1556 (Friedman, Chapter 180, Statutes of 2021) strengthened consumer protections relating to cancelled, postponed, and rescheduled events by establishing refund requirements. Subsequent legislative efforts have explored a

range of consumer protection issues including fee transparency, all-in pricing, resale marketplace disclosures, speculative ticket sales, deceptive practices, ticket transferability, and consumer understanding of ticket transactions. In addition, broader consumer protection measures such as SB 478 (Dodd, Chapter 740, Statutes of 2023), California's Honest Pricing Law, reflect increasing legislative interest in ensuring transparency and fairness in transactions involving mandatory fees.

Although California law already prohibits certain unfair ticketing practices, many of the existing statutes were enacted before the widespread use of digital ticketing, mobile ticket transfers, online resale marketplaces, and automated purchasing technologies. As a result, questions have emerged regarding whether existing laws adequately address modern practices such as speculative ticket sales, the use of sophisticated software to circumvent ticket purchasing controls, deceptive online ticketing websites, and consumer confusion regarding whether a ticket is being sold by an authorized seller or through a resale marketplace. Consumer advocates and policymakers have also raised concerns regarding consumer confusion about the source of tickets, whether tickets are being sold by authorized sellers or resale marketplaces, and whether sellers possess or have a legal right to transfer the tickets being offered for sale. Policymakers have increasingly examined whether additional statutory clarity is warranted to address these practices while preserving legitimate ticketing, resale, and consumer transfer rights.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Committee on Appropriations, the bill will result in unknown court cost pressures ranging from minor to significant to the extent the Attorney General (AG) brings civil actions against any person who violates the new requirements and restrictions regarding ticket resale marketplaces. Actual costs will depend on the number of actions filed and the time required to adjudicate each case. The Department of Justice (DOJ) reports that it does not anticipate a significant fiscal impact; this assessment suggests the department may not actively pursue enforcement using the authority prescribed in the bill. The bill will also result in unknown, potentially significant court cost pressures as the False Advertising Law, Unfair Competition Law, and general statutes governing ticket sellers provide a private right of action for consumers. Although trial courts are not funded based on workload, increased pressure on the Trial Court Trust Fund may create a demand for additional court resources. For context, the proposed 2026-27 Governor’s Budget would provide $70 million General Fund support to the Trial Court Trust Fund. The bill will also result in unknown local county costs to the extent that a six month misdemeanor jail sentence is imposed, though incarceration

for this offense appears unlikely. The average annual cost to incarcerate one person in county jail is approximately $80,000. Actual county incarceration costs will depend on the number of convictions and the length of each sentence. Generally, county incarceration costs are not reimbursable state mandates pursuant to Proposition 30 (2012).

OPPOSITION: (Verified 8/14/26)

StubHub
Valley Industry and Commerce Association

ARGUMENTS IN SUPPORT: A coalition of stakeholders previously opposed to the bill writes that "The amended bill strikes the right balance between consumer protection, transparency, and competition in California's live event marketplace. We believe these changes strengthen AB 1349 and better serve fans, artists, venues, and communities across the state. California's live event ticketing marketplace has needed meaningful reform for years. Consumers deserve a system that is transparent, competitive, and fair—one that protects fans from deceptive practices while preserving consumer choice and encouraging competition. As amended, AB 1349 represents an important step toward achieving those goals and creating a marketplace that works better for fans."

A coalition of music creators, venues, labels, workers and unions write that Most importantly, the bill prohibits speculative ticket sales—listing or selling tickets that the seller does not actually possess or have a legally enforceable right to obtain. Consumers should not unknowingly purchase what amounts to a promise that a reseller hopes to fulfill at some future date. By requiring sellers to possess or have enforceable contractual rights to the tickets they offer for sale, AB 1349 restores integrity and accountability to the marketplace while protecting consumers from fraud and last-minute cancellations… Importantly, AB 1349 does not prohibit the lawful resale of tickets. Legitimate secondary marketplaces remain free to operate and consumers will continue to have access to resale opportunities. Rather, the bill establishes reasonable guardrails to prohibit speculative ticket sales, deceptive marketing, website impersonation, and other practices that undermine consumer confidence and disadvantage both artists and fans. Honest resale continues; fraud and deception do not."

ARGUMENTS IN OPPOSITION: Valley Industry and Commerce Association writes that "While VICA supports efforts to protect consumers from deceptive practices and ticket-buying bots, AB 1349's approach would discourage legitimate resale, limit flexibility for fans who can no longer attend events, and tilt the playing field toward incumbents with the most data and market leverage."

StubHub notes that "While the Department of Justice and some states settled with Live Nation and Ticketmaster, over 30 states, including California, continued in court. California and the other State AGs have since asked the court for structural remedies, including breaking up Live Nation and Ticketmaster. StubHub believes any new ticketing industry policy should take this lawsuit into account and treat the

industry holistically, ensuring it doesn't further entrench monopolistic control while the courts are still determining remedies. StubHub requests amendments to request that a marketplace be allowed to cure by refunding the buyer the full purchase price, including all fees and to update various definitions. StubHub also states that this bill introduces the undefined concept of "authorized entry" and could create a mechanism by which [LiveNation Entertainment] could potentially cancel tickets sold by competitors after deeming them 'unauthorized' even though they are valid tickets. AB 1349 could be strengthened by instead focusing on enforcing existing bots laws by encouraging collaboration between those breached by bots, event presenters and original ticket sellers, and those who enforce the law." StubHub also states that the bill "includes discriminatory trademark requirements that prohibit the use of identifying graphics or those that are 'likely to mislead a reasonable consumer.' This vague and ambiguous standard is ripe for abuse by ticket sellers who are seeking to eliminate legitimate competitors from the marketplace. For example, a competitor may argue that a seat map is an identifying graphic and attempt to prohibit any non-affiliated entity from properly informing consumers about the seat location of a ticket being offered for sale, leading to greater confusion and difficulties for consumers. To address this opacity, we suggest aligning Sec. 22505.6 with existing trademark law pursuant to California Code Section 17200…Aligning AB 1349 with best practices from other states can ensure bad actors are prohibited from participating in the marketplaces while protecting fair competition."

SUBJECT: Income taxes: credits: motion picture credit

SOURCE: Author

DIGEST: This bill removes the option for applicants to make a good faith effort to meet the diversity goals in their diversity work plans to receive an additional 4% Motion Picture and Television Production Tax Credit amount, effective in the 2025 taxable year.

ANALYSIS:

Existing law:

1) Allows various income tax credits and deductions, as well as sales and use tax exemptions.

2) Enacts a tax credit against the Personal Income and Corporation Taxes for producing qualified motion pictures with a minimum production budget of at least $1 million at a certified studio construction project, in which the qualified taxpayer claiming a credit must have at least 50% ownership or a ten-year lease

with the soundstage, using most of the same definitions and requirements from the motion picture production credit detailed below (SB 144, Portantino, Chapter 114, Statutes of 2021). The California Film Commission (CFC) can allocate $150 million in credits for qualified motion pictures, but cannot allocate more than $12 million in total or $750,000 per episode.

3) Enacts a tax credit against the Personal Income and Corporation Taxes for qualified motion picture production in California, directing CFC to allocate $750 million in credits each fiscal year starting in 2025-26 and continuing through 2029-30 (SB 132 Committee on Budget & Fiscal Review, Chapter 56, Statutes of 2023; SB 132, Committee on Budget & Fiscal Review, Chapter 17, Statutes of 2025; AB 1138, Zbur, Chapter 27, Statutes of 2025); CFC can allocate credits to "qualified motion pictures" that:

   a) Have 75% of the motion picture shooting days take place in California, or have 75% of the production budget incurred within the state for services or the purchase or rental of property;

   b) Commence principal photography after the date CFC approves its application, but before 180 days after the date of approval, and finish within 30 months from the date when the application was approved by the CFC, with some exceptions;

   c) Obtain a copyright from the United States Copyright Office; and

   d) Provide a workplace diversity plan checklist.

4) Provides that a qualified motion picture includes:

   a) A feature with a minimum production budget of at least $1 million; however, no more than $120 million in qualified expenditures count for purposes of generating the credit.

   b) An independent film, defined as a motion picture that is produced by a company that is neither publicly traded, nor more than 30% owned by publicly traded companies.

   c) A television series that relocated to California, defined as one that had 75% of the principal photography of the most recent season conducted outside the state.

d) A live action or animated series produced in California with a run time of 20 minutes or more on average, with a minimum budget of $1 million per episode.

e) Animated films produced in California with a $1 million budget or more.

f) A large-scale competition show produced in California with a minimum budget of $1 million per episode.

g) A pilot for a new live action or animated series with a run time of 20 minutes or more on average, produced in California with a minimum budget of $1 million per episode.

5) Provides that the amount of the tax credit is equal to either:

a) 35% of the qualified production expenditures for films, television series, pilots, or independent films, or

b) 40% of the qualified expenditures for relocating television.

6) States that qualified expenditures are amounts paid or incurred to purchase or lease tangible personal property, pay wages and fringe benefits, or contract for services performed in the state during production in California.

7) Excludes from qualified expenditures any amounts paid to writers, directors, music directors, music composers, music supervisors, producers, or performers, other than background actors.

8) Requires applicants to file an application with the CFC that includes specified information, including data regarding the diversity of the workforce employed by the applicant, and, if applicable, a summary of the applicant's voluntary programs to increase the representation of minorities and women in the job classifications.

9) Allows credit "uplifts" for productions when they incurred qualified expenditures for:

a) Filming outside the Los Angeles zone (5%), as defined;

b) Visual effects expenditures, where at least 75% or a minimum of $10 million is paid or incurred in California (5%); and

c) Local-hire labor for feature films, new TV series, recurring TV series, pilots, and miniseries (10%), as well as independent films or relocating TV series (5%).

10) Directs CFC to increase the total credit amount allocated to an applicant by up to 2% of the initial credit amount for qualified productions that employ trainees from a Career Pathways Program.

11) Requires CFC to include on a tax credit application the diversity of the workforce employed by the applicant, including the ethnic and racial makeup of the individuals employed by the applicant during the production of the qualified motion picture, to the extent possible.

12) Precludes CFC from allocating credits unless applicants supplied aggregate data for individuals whose wages cannot generate credits (such as actors, writers, and directors), including their gender, ethnic, and racial makeup.

13) Under the soundstage and general production credit, limits the overall credit amount to 96%, unless the qualified taxpayer chooses to submit a diversity work plan, and CFC determines that the applicant has met or made a good-faith effort to meet the diversity goals in its diversity work plan.

14) Requires CFC to certify an additional 4% when the qualified taxpayers submit the following to CFC:

a) A diversity work plan within 30 days after receiving a credit allocation letter, which must be consistent with the diversity work plan checklist to address diversity and be broadly reflective of California's population in terms of race, ethnicity, gender, veteran status, disability status, and ZIP code for members of the workforce whose wages are excluded from qualified expenditures.

b) A statement of the diversity goals the motion picture will seek to achieve in terms of qualified wages, and for individuals whose wages are excluded from qualified wages.

c) A plan of what strategies the motion picture will employ to achieve its diversity goals.

d) An interim assessment, and a final assessment, of whether it is meeting its diversity work plan.

15) Directs CFC to approve or reject diversity work plans to the extent allowed by state and federal law.

16) Requires CFC to also annually report diversity data supplied by applicants, commencing June 30, 2027, including an assessment of whether the diversity work plan goals are met for productions that submitted a final assessment.

17) Requires assessments to include accounts of diversity work plans submitted, interim assessments submitted, and final assessments submitted, as well as diversity checklist information.

18) Requires CFC to submit each assessment to the Legislature.

19) Directs CFC to adopt rules and regulations implementing voluntary programs designed to increase the representation of minorities and women in certain job classifications and to establish the Career Pathways Training program.

20) Requires CFC to identify a fiscal agent with direct relationships to industry skills training programs to manage the funds; and engage labor-management jointly administered training programs with skills training focused on the entertainment industry to implement the Program with CFC approval and oversight.

21) Requires applicants receiving a credit allocation letter under the current credit program to make a financial contribution to fund the Program for individuals from underserved communities to receive training for careers in the industry of 0.5% of the credit amount, which CFC can increase in 0.25% increments up to 1% after January 1, 2028.

22) Directs the Program to work with nonprofit organizations that have an established record of training and job placement in the entertainment industry, focus on training individuals from traditionally underserved communities, and offer training courses focused on skilled, technical positions that would be eligible for qualified wages if performed on a qualified motion picture as well as administrative- and industry-related technical occupations or soft skills training for the motion picture industry.

    a) Require CFC to expand the number of nonprofit organizations that partner with the Career Pathways Program to provide access to the widest cross-section of Californians, including historically disadvantaged and underrepresented individuals seeking training and employment opportunities in motion picture and television production.

b) Direct CFC to establish an application process for these nonprofit organizations, with applications submitted to the fiscal agent as part of a request for proposal process.

c) Set forth a series of requirements for CFC to initiate and sequence the request for proposal process.

d) Direct CFCs to approve Career Pathways Programs, and requires them to meet all of the following requirements:

i) Be conducted by a nonprofit organization that has an established record of training and job placement in the entertainment industry.

ii) Be focused on training individuals 18 years or older from traditionally underserved communities.

iii) Offer training courses focused on one or more of the following:

(1) Skilled, technical positions that would be eligible for qualified wages if performed on a qualified motion picture.

(2) Administrative- and industry-related technical occupations.

(3) Soft skills training.

This bill:

1) Amends the soundstage and 4.0 credits in the Personal Income and Corporation Tax laws to delete the option for applicants to show a good faith effort for CFC to certify an additional 4% credit amount. Instead, the 4% augmentation would be contingent on a finding by the CFC that the qualified taxpayer has met the diversity goals in its diversity work plan.

2) Applies commencing in the 2025 taxable year.

3) Makes conforming changes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The Franchise Tax Board (FTB) notes that the revenue impact of this bill is unknown. To calculate the magnitude of its potential impact to the General Fund, FTB would need to know (1) the frequency of taxpayers meeting the

diversity workplan goal, and (2) the amount of additional credits allocated. FTB assumes that the motion picture credit will be fully allocated each year, and assumes that if taxpayers meet the requisite diversity plan requirements, they would generate more credits than they would have otherwise. The annual impact would likely be less than $100,000.

- The California Film Commission (CFC) indicates that it would incur annual General Fund costs of $919,000 to support five positions to implement the provisions of the bill. Additionally, CFC estimates a one-time General Fund cost of $150,000 to update forms and contract for external consulting and software services to support to tutorial and educational materials (See Staff Comments).

ARGUMENTS IN SUPPORT: According to the author, "AB 1377 builds on the important work of expanding the state's film and television tax credit program by requiring studios who opt-in to participate in optional diversity, equity, inclusion and accessibility tax credits to actually complete the plans that the studios themselves develop and submit to the California Film Commission. It's simple math. If a studio chooses to apply for additional DEIA tax credits, they actually need to do the work they are committing to do. Currently, studios only have to demonstrate a good faith effort to accomplish diversity goals in order to receive these additional tax credits. And frankly, just a good faith effort is not good enough. It is a false choice for anyone to say that California has to choose between retaining and growing jobs in the film and television industries and increasing the diversity of its workforce. The film industry can and must do both."

SUBJECT: Public employees' retirement benefits

SOURCE: California Professional Firefighters

DIGEST: This bill (1) freezes existing Public Employees' Pension Reform Act of 2013 (PEPRA) safety formulas to apply only to service from January 1, 2013, to December 31, 2026; (2) provides new formulas for service from 1/1/27; and (3) requires public employers to raise their PEPRA firefighter and peace officer safety pension benefit formulas to this bill's new formulas effective January 1, 2027, to give at age 55 what their PEPRA formula gives at age 57 unless the parties bargain for a higher or lower formula, as specified. It also (4) increases the PEPRA pensionable compensation caps for all PEPRA members, as specified.

ANALYSIS:

Existing law:

1) Establishes PEPRA which applies to all public employers and public pension plans on and after January 1, 2013. (Government Code § 7522 et seq.)

2) Establishes a cap on the amount of compensation that can be used to calculate a retirement benefit for all new members, as specified, of a public retirement

system equal to the Social Security wage index limit (originally $110,100, now $159,733) for employees who participate in Social Security, or 120% of that limit (originally $132,120, now $191,679) if they do not participate in Social Security. (Government Code § 7522.10)

3) Requires the retirement systems to adjust the compensation cap annually, as specified, based on changes in the Consumer Price Index (CPI) for all Urban Consumers. (Government Code § 7522.10 (d))

4) Specifies that the Legislature reserves the right to modify the annual CPI adjustments to the compensation cap prospectively. (Government Code § 7522.02 (d)(2))

5) Prohibits an employer from offering a defined benefit (DB) plan, or combination of DB plans, on compensation in excess of the compensation cap. (Government Code § 7522.02 (e))

6) Allows an employer to offer a defined contribution (DC) plan on earnings above the compensation cap up to the federal limit on compensation that can be creditable to DB plans. Any such DC plan must comply with federal laws, and employees do not have a vested right to an employer contribution to such a plan. (Government Code § 7522.02 (f))

7) Defines "new member" with regard to eligibility for PEPRA as:

   a) An individual who has never been a member of any public retirement system prior to January 1, 2013.

   b) An individual who moved between retirement systems with more than a six month break in service, as specified.

   c) An individual who moved between public employers within a retirement system after more than a six month break in service, as specified. (Government Code § 7522.04 (f))

8) Defines "Normal Cost" to mean the portion of the present value of projected benefits under the defined benefit that is attributable to the current year of service, as determined by the public retirement system's actuary according to the most recently completed valuation. (Government Code § 7522.04 (g))

9) Specifies that the retirement formula for the DB plan will be 2% at age 62 for all new non-safety employees, excluding teachers. The formula is adjusted to encourage members to retire at later ages. The earliest an employee would be eligible to retire is age 52 with a 1% factor and the maximum retirement factor of 2.5% is provided at age 67. (Government Code § 7522.20)

10) Specifies that the retirement formula for new members of the California State Teachers' Retirement System (CalSTRS) will be 2% at age 62. The earliest an employee would be eligible to retire is age 55 with an actuarially reduced formula, and with a maximum formula of 2.4% at age 65. (Government Code § 7522.02 (c), Education Code § 24202.6 and § 24202.7)

11) Provides for three retirement formulas for the DB plan that apply to new safety employees, as specified. The three formulas are: 2% at age 57 (basic plan); 2.5% at age 57 (safety option plan one); and 2.7% at age 57 (safety option plan 2). (Government Code § 7522.25)

12) Requires contributions from employees to the DB plan to equal to one-half of normal cost of the DB. (Government Code § 7522.30)

13) Requires that final compensation be defined for all new employees as the highest average annual compensation over a three-year period. (Government Code § 7522.32)

14) Defines "pensionable compensation" and prohibits the following types of compensation from being used to calculate a retirement benefit: compensation paid to enhance a retirement benefit; compensation previously provided "in-kind" and converted to cash in the final comp period; one-time or ad hoc payments; severance pay; pay for unused leave or time off; pay for work outside of normal hours; uniform, housing or vehicle allowances; pay for overtime, except planned overtime, extended duty workweek, or pay defined in the federal labor codes; employer contributions to DC plans; bonuses, and other pay determined to not be pensionable compensation. (Government Code § 7522.34)

15) Limits the maximum salary taken into account for <u>any</u> retirement plan (DB and DC combined) to the federal limit established under 401(a)(17) of the Internal Revenue Code (IRC) and prohibits an employer from seeking a federal exemption from the limit. (Government Code § 7522.42)

16) Prohibits an employer from making contributions to any public retirement plan (DB or DC) on any amounts of compensation that exceeds the 401(a)(17) limit. (Government Code § 7522.42)

17) Prohibits a public employer from offering a benefit replacement plan for any member or survivor who is subject to the federal limit on benefits established by section 415(b) of the IRC for an employee first hired on and after January 1, 2013, or to any group of employees that was not offered a benefits replacement plan prior to that date. (Government Code § 7522.43)

18) Prohibits a retroactive enhancement to a benefit formula, either due to a change to an existing formula, or due to a change to the retirement classification for a specific job. (Government Code § 7522.44)

19) Requires a public employer's contribution to a defined benefit plan, in combination with employee contributions, to be not less than the normal cost rate for that defined benefit plan for that fiscal year. (Government Code § 7522.52)

20) Prohibits post-retirement employment from exceeding 960 hours in a consecutive 12 month period. If a retiree receives unemployment benefits, he or she is prohibited from working for 12 months as a retiree for a public employer.

21) Prohibits a person who retires on or after January 1, 2013, from returning to work as a retired annuitant for a period of 180 days after retirement unless the action is approved in an open meeting, as specified by the governing body of the employer, or by California Department of Human Resources (CalHR) authority if state retiree, as specified. However, in no case could a person who receives a retirement incentive (e.g., a "golden handshake") return to work as a retired annuitant for a period of 180 days after retirement. (Government Code § 7522.56)

22) Establishes the following exceptions to 180 day rule:

    a) The retiree is participating in the Faculty Early Retirement Program pursuant to a collective bargaining agreement with the California State University.

    b) The retiree is a public safety officer or firefighter.

c) The retiree is a trustee, administrator, or fiscal advisor appointed to address academic or financial weaknesses in a school or community college district, pursuant to specified requirements.

d) The retiree is a subordinate judicial officer whose position, upon retirement, is converted to a judgeship and he or she returns to work in the converted position.

e) The retiree is a person taking office as a judge, as specified. (Government Code § 7522.56)

23) Allows more flexibility for bargaining increased cost sharing between employers and existing employees in CalPERS and retirement systems established pursuant to the County Employees' Retirement Law of 1937 (37 Act). Using impasse procedures to impose cost sharing arrangements achieved through this new flexibility would be prohibited if the proposed contribution exceeds statutorily required contributions for current employees or half of the normal cost of benefits for employees first hired on or after January 1, 2013. (Government Code § 7522.30)

This bill:

1) Freezes existing PEPRA safety formulas and makes them applicable only for service from 1/1/2013 – 12/31/26, increases safety retirement plans as of 1/1/2027 for all public employers, and makes this bill's new formulas bargainable, as specified.

2) Requires employers to move, beginning January 1, 2027, from their existing PEPRA safety formula[1] to one of three new, richer retirement formulas that would give at age 55 what their PEPRA formula gives at age 57 unless the parties bargain for a higher or lower formula, as specified. [2] However, this bill prohibits employers from using impasse procedures to impose a lower plan.

---

[1] Current law requires employers to offer one of three PEPRA safety formulas:
- Basic Safety 2% @ 57
- Safety Option One 2.5% @ 57
- Safety Option Two 2.7% @ 57
- (PEPRA has no fourth formula like the New Option Three)

[2] The bill creates the following four new formulas; mandates employers to move to one of the first three, as specified; and authorizes bargaining to move from that formula to one of the other new formulas.
- New Basic Safety 2% @ 55
- New Safety Option One 2.5% @ 55

3) Establishes a bargainable fourth formula that would provide 3% @ 55 rather than PEPRA's current maximum formula that provides 2.7% @ 57.

4) Increases, through a two-step modification, PEPRA's limits on compensation that a retirement system is permitted to include in the calculation of a member's retirement, thereby increasing pensions for all members, both safety and miscellaneous, who are above the current pensionable compensation caps.

   a) First, this bill mandates the systems use the 2027 Social Security 430 (b) base instead of the 2013 base to determine the pensionable compensation caps. This provision raises the cap from $159,733 to $184,500 for members covered under Social Security (e.g., miscellaneous members).
   b) Second, it raises the cap even further for members not covered under Social Security (e.g., safety members, or other members not covered under Social Security) by increasing it the from 120% to 135% of the new 2027 Social Security 430(b) base. This provision raises the cap from $191,679 to $249,075.
   c) The provisions thus increase pensionable compensation by someone over the limits up to $24,767 and $57,396 respectively, depending on whether they are covered by Social Security.

5) After imposing one of the new formulas closest to the employer's PEPRA formula, authorizes a public employer and a recognized employee organization to negotiate for a different new formula for a prospective increase to the retirement benefit formulas for safety members and new safety members.

6) Exempts the Judges' Retirement System (JRS) and JRS II from this bill's provisions.

7) Requires that benefit formula increases adopted pursuant to this bill, be established in accordance with PEPRA's prohibition against retroactive benefit increases.

8) Declares that it is the intent of the Legislature that this act shall not be construed to affect any retirement benefits or pension rights accrued before its effective date.

- New Safety Option Two 2.7% @ 57
- New Safety Option Three 3% @ 55 w/ pension limited to 90 % final comp

9) Finds and declares the following approximately: the state is experiencing significant challenges recruiting firefighters, police, and other first responders; firefighters face heightened risks of occupational diseases; these high-stress positions contribute to increased rates of disability, injury, and early retirement; it is necessary to adjust safety employee pension formulas to sustain an effective workforce and address occupational challenges; retirement benefits should be collectively bargained; and current compensation caps are too low.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Senate Appropriations committee:

- The current California Public Employees Retirement System (CalPERS) actuarial analysis estimates that the bill would increase pension costs for *state, school, and local agency* plans by approximately $4.8 billion in the present value of future benefits (PVB) and increase annual normal cost contributions by approximately $233 million. The estimated impact varies depending on which provisions of the bill are implemented, as follows:
    - Increasing the pensionable compensation limit for all PEPRA members: This provision would increase annual normal cost contributions by approximately $241 million in the first year and increase the PVB by approximately $4.2 billion. The higher costs would apply to all affected employee groups with members whose benefits are impacted by the increased compensation limit.
    - Increase the benefit age factor for PEPRA safety members: This provision would increase annual normal cost contributions by approximately $38 million in the first year and increase the PVB by approximately $560 million. These costs could be partially offset by an unknown amount if earlier retirement reduces workplace injuries or disability-related costs among safety members.
    - Allowing PEPRA and new safety members to receive a 3 percent at age 55 retirement formula: This provision would increase annual normal cost contributions by approximately $353 million in the first year and increase the PVB by approximately $3.4 billion. However, these costs would only occur if an employer and employees negotiate adoption of the enhanced formula through a memorandum of understanding.
- Under current law, PEPRA member and employer contributions generally share the normal cost of benefits equally. Therefore, for the first two scenarios—

which would take effect without collective bargaining—the employer share of the estimated increase in normal cost contributions is approximately $141 million annually across state, school, and local employers (General Fund, special funds, and local funds). Additionally, these estimates reflect costs for current PEPRA members only; employer costs would increase over time as additional employees are hired under the bill's expanded benefit provisions.

- CalPERS would incur approximately $1.2 million in one-time administrative costs for information technology updates, revised publications and training materials, increased member call volume, and program support (Public Employees' Retirement Fund).

Background

Pension Systems Prior to 1999. Before 1999, California's public retirement systems, including CalPERS, provided defined benefit pensions based on a formula incorporating three primary factors: (1) years of credited service, (2) age at retirement, and (3) final compensation. Rather than depending on investment returns or employee contributions, retirees received a guaranteed lifetime benefit determined by statute and, if applicable, collective bargaining agreements. Retirement formulas varied by employee classification, with public safety employees generally receiving more generous benefits than miscellaneous employees because of the physical demands and earlier retirement expectations associated with those occupations.

Prior to 1999, the retirement formulas available to state employees were generally more modest than those adopted in subsequent years. For example, many state miscellaneous employees were covered by a formula that provided approximately 2 percent of final compensation for each year of service at age 60 ("2 percent at 60"), while safety employees typically received formulas such as 3 percent at age 50. Final compensation for many members was based on the highest average compensation earned over a three-year period, which moderated pension costs by reducing the effect of end-of-career salary increases.

Senate Bill 400 (1999). Enacted during a period of exceptional investment returns and strong funding levels, SB 400 (Ortiz, chapter 555, statutes of 1999) significantly enhanced retirement benefits for many CalPERS members. The legislation was premised on the expectation that robust investment earnings would finance much of the increased cost without requiring substantial additional employer contributions. Among its most significant provisions, SB 400:

- Increased retirement formulas for many state miscellaneous employees from 2 percent at age 60 to 2 percent at age 55, with benefit factors increasing to 2.5 percent at age 63.

- Applied the enhanced benefit formulas retroactively to both past and future service, substantially increasing the pensions of current employees.

- Changed the calculation of final compensation for many state and school members from the highest consecutive three-year average salary to the highest consecutive 12-month salary, resulting in larger pension benefits.

- Authorized numerous state and local employers to adopt enhanced retirement formulas for additional employee groups, particularly public safety employees.

Impact of SB 400. SB 400 substantially increased long-term pension liabilities for CalPERS and participating public employers. Although the legislation was enacted when CalPERS was more than fully funded and investment markets were producing historically high returns, subsequent market downturns—particularly the dot-com collapse and the 2008 financial crisis—revealed that investment earnings alone were insufficient to finance the enhanced benefits. Employer contribution rates increased significantly over time as unfunded liabilities grew, placing additional pressure on state and local government budgets. While investment losses and other actuarial factors also contributed to the growth in pension liabilities, SB 400's retroactive benefit enhancements are widely regarded as one of the principal factors increasing the long-term cost of California's public pension systems.

Assembly Bill 340 (2012) – Public Employees' Pension Reform Act. In response to growing pension liabilities and escalating employer costs, the Legislature enacted AB 340 (Furutani, Chapter 296, Statutes of 2012), establishing the California Public Employees' Pension Reform Act of 2013 (PEPRA). The reforms took effect on January 1, 2013, and primarily apply to individuals who first entered California public retirement systems on or after that date ("new members"). Existing employees (referred to as “classic” members) generally retained the retirement benefits they had already earned. PEPRA implemented numerous reforms designed to reduce future pension costs, including:

- Establishing lower retirement formulas for new employees, such as 2% at age 62 for many miscellaneous state employees and 2.7% at age 57 for many public safety employees.

- Increasing normal retirement ages for many employee groups.

- Requiring new members to pay at least 50% of the normal cost of their pension benefits, subject to collective bargaining.

- Imposing limits on pensionable compensation that may be used to calculate retirement benefits.

- Narrowing the definition of pensionable compensation by excluding certain forms of pay from retirement calculations.

- Restricting pension-spiking practices and placing new limits on post-retirement employment.

Impact of AB 340 (PEPRA). PEPRA fundamentally changed the trajectory of California's public pension systems by reducing the cost of retirement benefits for employees hired on or after January 1, 2013, while preserving the vested benefits of existing employees. Because the reforms apply only to new members, their fiscal effects have accumulated gradually as the workforce has turned over. As a result, an increasing share of employees is now covered by lower-cost benefit formulas, reducing normal pension costs and slowing the growth of future pension liabilities.

These reductions, however, do not represent actual budgetary savings or cash available for other state priorities. Instead, they reflect avoided costs—estimates of how much higher employer pension contributions would have been absent PEPRA. Employer pension contributions have generally continued to increase as governments fund benefits earned by current employees and pay down substantial unfunded liabilities associated with benefits earned before PEPRA's enactment. Thus, while PEPRA has improved the long-term sustainability of California's public retirement systems by lowering the cost of future benefits, it has not eliminated existing pension debt or reduced annual pension expenditures in absolute terms.

Thus, PEPRA did not eliminate existing unfunded liabilities associated with benefits previously earned by employees and retirees, which continue to require significant employer contributions. As a result, while PEPRA improved the long-term sustainability of California's public retirement systems, governments remain responsible for amortizing pension obligations that accrued before the reforms took effect.

Comments

AB 1383 Risks. According to the California Actuarial Advisory Panel (CAAP):

"In addition to increasing liabilities and normal cost rates, the changes to the benefit formulas and compensation limits can be expected to increase the future volatility of costs. Higher benefits must eventually result in higher liabilities and assets. With more assets invested in the market, investment risk will go up. With higher liabilities, changes in behavior or assumptions that affect those liabilities - such as a potential future reduction in the discount rate - will have a greater impact on the required contributions.

The changes in the benefits may also result in modifications in member behavior that could result in other unexpected downstream effects. For example, improvements in the benefit multiplier for public safety members at earlier ages could result in changes in the retirement patterns for these members. These changes may not only affect plan costs, but also other compensation and personnel-related costs, such as post-retirement medical benefits and training or recruitment expenses."

In other words, if the market significantly deteriorate and/ or members work longer to earn higher pensions under the new formulas than they otherwise would have under the PEPRA formulas, both pension costs and other post-employment benefit costs will be higher than these estimates. Moreover, CalPERS' estimates for AB 1383 are based on 2024 data. The economy has become much more volatile in the last 2 years with the Iran war-related and Trump tariff-related inflation spikes, the increasing concern over private equity valuations (where CalPERS has substantially increased its portfolio weighting), the potential that we are living through another era of "irrational exuberance" in the stock market driven by AI technology investments, and the expected disruption of economic activity by those AI innovations.

AB 1383's Potential Inequity from Lifting the Compensation Caps. According to CAAP: "For PEPRA members, current statutes require that members pay at least half of the normal cost (subject to rounding provisions for some groups). As discussed above, the overall normal cost is expected to increase for all groups if they include members with benefits that are expected to be affected by the current PEPRA compensation limits, including non-Safety groups. If this occurs, PEPRA member contribution rates will increase for all members of the group [, unless the employer negotiates to pay more than half the normal cost, which would now be allowed under AB 1383 [3]]. In other words, it is likely that all PEPRA members

[3] The bill no longer authorizes employers and employee representatives to negotiate for the employer to pay the employee contribution. Thus, any increase to normal costs will most likely impact lower-wage employees who will never benefit

would be required to contribute more, even though only the more highly compensated individuals will experience any benefit improvement, at least for the non-Safety groups."

In other words, lower compensated employees whose salary will never hit the current compensation limits will pay more so that highly compensated employees can get an even larger pension.

Unintended Victims if Cost Estimates Are Incorrect. Pension benefits, with good reason, have special protection in California under constitutional case law. Once given, employers can almost never take back the benefits for members who were working when the new benefits were offered. If benefit costs exceed projections, pension systems' unfunded liability goes up. That requires the systems to raise employer contributions and may result in pressure for employees to reach an agreement to share in the increased unfunded liability. Employees, especially veteran employees, may find that option more palatable than potential immediate reductions in force, suspension of anticipated raises, colas, or other benefit enhancements since the unfunded liability costs would be amortized over 20 years under current CalPERS policy. In any case, those increased employer costs reduce public funding that could otherwise be used to support vulnerable communities who depend on public services for other critical services, especially in health and welfare programs. Because projected costs are likely to increase during economic downturns, these reductions hit those vulnerable communities at the moment they most need public services and when public employers' resources are most strained.

Ironically, public employee recruitment and retention can also suffer significantly since public employers often respond to resource and cost pressures from increased personnel costs and economic downturns by eliminating positions. That can result in fewer employees being pressured to do far more work with a lot less help and fewer resources. It can also lead to younger employees being blocked from advancement opportunities because of position and wage freezes.

AB 1383's Effect on Local Government with Pension Systems other than CalPERS. The proponents have focused exclusively on costs to the state from changes to CalPERS' plans. However, this bill's provisions mandate that all public pension funds adopt the McKinnor compensation caps and formulas. There are 20 CERL county systems and several other independent systems that will face increasing

---

from the increased pensionable compensation caps. Effectively, lower-paid employees will partially subsidize larger pensions to highly compensated employees.

costs because of this bill's mandate. Those costs have not been evaluated, presumably because they are local costs not General Fund costs. Yet should those local governments fail to be able to pay the increased pension costs, there will be great pressure for the state to bail them out. In any event, those costs will compound the reduction for services to vulnerable populations as outlined above, given that counties and local districts play an outsized role in providing those services. Committee time constraints prevent a substantive analysis of this bill's potential impact on local government, but opponents and researchers have expressed significant concern that local governments are already under-resourced and unprepared for this bill's costs. [4] For example, according to a coalition of local government associations, including the California State Association of Counties:

"Unfortunately, pension costs for many California public agencies continue to be a challenge, threatening the delivery of basic public services, compromising general fund budgets and, indeed, posing a long-term fiscal challenge to the State itself. That is why it is increasingly important that any change to the system be sustainable, fair to taxpayers and employees, and provide long-term financial stability. Any change to PEPRA must protect the fiscal integrity of public agencies and retirement for public employees."

Related/Prior Legislation

AB 1054 (Gipson) would establish a Deferred Retirement Option Program (DROP) to allow participating State Bargaining Unit (BU) 5 peace officers (CAHP) and State BU 8 firefighters (CalFire Local 2881) to elect a deferred retirement date, continue working 1-5 years, freeze their defined benefit (DB) pension benefit accrual, divert their employee contributions and potentially the employer contributions to their DROP account, earn a guaranteed specified interest rate on their DROP savings, and upon reaching the deferred retirement date, receive their pension and a one-time lump-sum payment of their program account balance upon termination of employment and subsequent retirement from CalPERS. The bill is currently on the Senate Floor.

SB 292 (Pan, 2015) specified that the requirement for employees subject to PEPRA to pay 50 percent of the actuarial normal cost of their pension benefits does not apply in specific cities and one county in which voter-approved tax levies were

[4] State Association of County Retirement Systems (SACRS) June 3, 2025, letter to Honorable Tina McKinnor; Local *Governments Not in Position for AB 1383*, Reason Foundation, May 2026

enacted prior to 1978 for the purpose of paying pension costs. The Governor vetoed the bill.

SB 13 (Beall, Chapter 528, Statutes of 2013) made technical corrections to PEPRA in order to clarify the Legislature's intent in enacting PEPRA and to assist affected employers and retirement systems in implementation of PEPRA.

AB 340 (Furutani, Chapter 296, Statutes of 2012) established PEPRA, which made major revisions to the public retirement systems' laws and applied to all public employers and public pension plans on and after January 1, 2013.

SB 400 (Ortiz, Chapter 555, Statutes of 1999), among other things, provided enhanced retirement formulas for State Peace Officer/Firefighter members who retire on or after January 1, 2000. The enhanced formula provided a retirement benefit factor of 3 percent at and after age 55 and allowed members to retire, on a discounted basis, as early as age 50 and also provided enhanced pension formulas for state patrol members who retire on or after January 1, 2000. The enhanced formula provided a retirement benefit factor of 3 percent at age 50 and was also available as a contract option for local contracting agencies.

ARGUMENTS IN SUPPORT: According to a coalition of firefighter unions:

"Firefighting is one of the most difficult and dangerous jobs imaginable. Those who answer the call to serve their communities put their mental and physical health on the line every time they respond to an incident, risking a known range of injuries and illnesses to serve the public. Firefighters carry a 14% higher risk of dying of cancer than the general population. This risk is so great that the International Agency for Research on Cancer (IARC) has classified occupational exposure as a firefighter as a Group 1 known human carcinogen.

These cancer risks come from innumerable sources, including circadian rhythm disruption, smoke inhalation, exposure to toxic chemicals and substances, and

many more. Every day on the job represents a new set of exposures to these known risks.

Asking firefighters to work for a significantly longer period in a deadly profession for a reduced pension does not make economic sense. While changes to the pension systems that disadvantage workers are nearly always framed in financial terms such as increasing the health of the fund and reducing taxpayer costs, these costs are not fully eliminated but transferred.

Put most simply – the longer a firefighter is forced to work, the more likely it is they will develop cancer or another job-caused illness, thereby incurring significant workers' compensation and industrial disability retirement costs. Due to minimum staffing requirements, every day that a firefighter is off the job due to a job-caused injury or illness, another member must be assigned to take their place, adding the cost of mandatory overtime to what is necessary for treatment. With these health risks in mind, the adjustments proposed by AB 1383 will help protect firefighters by providing pathways for a dignified retirement by age 55.

Outside of health-related issues, a recent report by the National Institute on Retirement Security found that pension benefits drive significant economic activity in California, both through the direct support of jobs and their wages as well as the spending power granted to retirees by their secure retirement. This activity included $28.4 billion in wages and salaries, $86.9 billion in economic output, and $16.6 billion in federal, state, and local tax revenues. This results in the "pension benefit multiplier" that means each dollar paid out in pension benefits results in $1.27 in economic output, and the "taxpayer investment factor" that means each dollar contributed by taxpayers results in $4.30 in economic output."

ARGUMENTS IN OPPOSITION: According to a coalition of approximately several local government associations, including the League of California Cities, the California State Association of Counties, and the California Special Districts Association:

"AB 1383 increases mandated costs without a way for public agencies to absorb them.

The potential cost of this bill comes at a time of fiscal uncertainty. Much like the state, local agencies are facing budget challenges, as revenues are not keeping pace with the costs of delivering services or new mandates and are facing significant loss of resources and heightened responsibilities due to passage of H.R. 1. Some local agencies are currently considering significant budget cuts across all

departments. AB 1383 would cause increased benefit costs and new cost pressures, leading to serious cost increases for local government.

According to CalPERS, given the current discount rate of 6.8%, *AB 1383 is expected to increase the required contributions of employers and PEPRA members and increase the present value of future benefits (PVB) by $4.8 billion across State, Schools, and Local Agency plans.* In addition to the change in PVB, CalPERS estimates that the *change to the accrued liability to be $233 million* across State, Schools, and Local Agency plans. Additionally, AB 1383 further proposes that employers may increase their PEPRA formula to 3% at age 55 through individual agency collective bargaining. The benefit for this formula will be limited to 90 percent of final compensation. The increase in the normal cost due to this change could lead to increased annual normal cost contributions of $353 million in the first year and increase the present value of future benefits by $3.4 billion.

The CalPERS analysis does not include estimates for non-CalPERS pension systems, including for the twenty county-operated pension systems. Additionally, these costs are based on a snapshot of current compensation for public employees and could be heightened significantly if compensation increases rise and exceed the current compensation cap.

As of June 30, 2025, the Public Employees Retirement Fund (PERF) was approximately 79% funded. If CalPERS misses its investment return mark of 6.8%, local agencies in CalPERS and the State have to pay the difference. Again, this bill would compound costs for local governments and the State and do nothing to offset the costs.

While this bill may be prospective, agencies have already been authorizing salary increases since the passage of PEPRA under the assumption that the cost of benefits would remain in line with current PEPRA law. The prospective costs would likely cause an immediate financial strain on any agency, especially those with a large number of PEPRA safety employees."

SUBJECT: Artificial intelligence: auditors: registration

SOURCE: Author

DIGEST: This bill establishes a registration process for auditors of artificial intelligence (AI) systems or models through the Government Operations Agency (GovOps) and creates and sets standards, reporting requirements, and transparency requirements for registered AI audits.

Senate Floor Amendments of 8/25/26 require GovOps to establish an AI Auditor Registry, no later than January 1, 2029, prohibits an unregistered person from conducting a covered AI audit, add various transparency and reporting

requirements for registered AI auditors, create standards for registered AI auditors, and refine various definitions, among other changes.

ANALYSIS:

Existing law:

1) Establishes GovOps within the state government. (Government (Gov.) Code § 12800.)

2) Establishes the Department of Technology within GovOps, and charges it with the approval and oversight of information technology projects. (Gov. Code §§ 11545, 11546.)

3) Defines "artificial intelligence" as an engineered or machine-based system that varies in its level of autonomy and that can, for explicit or implicit objectives, infer from the input it receives how to generate outputs that can influence physical or virtual environments. (Gov. Code § 11546.45.5(a)(1).)

This bill:

1) Requires GovOps, no later than January 1, 2029, to do all of the following:
   a) Establish an AI Auditor Registry on their website allowing AI auditors to register and natural persons to report misconduct by a registered AI auditor.
   b) Fix annual registration fees at an amount not exceeding the reasonable costs of administering these provisions.

2) Requires GovOps, starting January 1, 2029, to do all of the following:
   a) Issue a unique registration number to each registered AI auditor.
   b) Publish various pieces of information, as specified, provided in a publicly accessible format on the agency's website.
   c) Retain misconduct reports submitted using the relevant mechanism for as long as the relevant AI auditor remains registered, plus 10 years.
   d) Share misconduct reports submitted using the relevant mechanism with other state agencies as necessary for enforcement purposes.
   e) Periodically review and update the annual registration fees and reporting mechanism.

3) Prohibits a person, beginning January 1, 2029, from offering, selling, or conducting a covered AI audit unless the person is registered with GovOps.

4) Defines "covered AI audit" as an audit conducted to assess internal controls, processes, or systems implemented for an AI system or model that are necessary for compliance with state law.

5) Requires an AI auditor that registers with GovOps to provide all of the following information:
   a) The business name and contact information of the AI auditor.
   b) A list of California laws and regulations under which the AI auditor conducts covered AI audits.
   c) Any relevant certifications or accreditations held by the AI auditor.
   d) A written description of the AI auditor and their services.
   e) A standard operating procedure, as specified.

6) Requires a registered AI auditor, after conducting a covered AI audit, to provide the auditee with an audit report, as specified, and to conduct covered AI audits in accordance with widely recognized industry standards.

7) Requires a registered AI auditor to retain various information and documentation, as specified, for at least 10 years.

8) Requires a registered AI auditor to adhere to various standards of independence, objectivity, and integrity, as specified.

9) Prohibits a registered AI auditor from preventing an employee from disclosing information to the Attorney General or Labor Commissioner, submitting a misconduct report, as specified, or retaliate against an employee for disclosing information or submitting a misconduct report.

10) Prohibits a registered AI auditor shall not do either of the following:
   a) Prevent an employee from disclosing information to the Attorney General or the Labor Commissioner, or using the misconduct-reporting mechanism, including through terms and conditions of employment or seeking to enforce terms and conditions of employment, if the employee has reasonable cause to believe the information indicates that the auditor is out of compliance with the requirements of this chapter.
   b) Retaliate against an employee for so disclosing information.

11) Requires the registration number of a registered AI auditor to be clearly and conspicuously displayed on all advertising materials offering or soliciting covered AI services.

12) Provides that violations of the above provisions constitute grounds for removal from the registry and referral to the Attorney General or other appropriate

enforcement authority. Provides that prior to removal from the registry, GovOps shall provide the AI auditor with a written notice and a reasonable opportunity to cure or contest the removal.

13) Provides that GovOps may adopt regulations reasonably necessary to effectuate the purposes of this bill, as specified.

14) Establishes the AI Auditors' Registration Fund within the State Treasury. The fund shall be administered by GovOps and all moneys collected or received by the agency hereunder shall be deposited into this fund to be available for expenditure by GovOps, upon appropriation, to administer this program.

Background

AI models and systems have opened beneficial possibilities and breakthroughs in a variety of sectors, including healthcare, creative industries, education, business operations, and customer service. However, these models also pose significant risks to society with their capabilities, whether it is through the creation of chemical, biological, radiological, or nuclear (CBRN) weapons, utilization to carry out cyberattacks at scale, algorithmic discrimination, or evasion of the oversight and control of their developers or deployers. Given how complex and opaque these models can be and the lack of comprehensive regulatory oversight of their development, one tool that has increasingly been advocated for as a foundational element of any such framework is the use of independent auditing.

In order to ensure the proper oversight and identification of sophisticated and reliable AI auditors should such auditing be required by law in the future, this bill establishes a process for GovOps to register AI auditors and create a publicly accessible listing of relevant information about these auditors. The bill provides clear guidelines for "covered AI audits" and a number of requirements to ensure no conflict of interests or misconduct on the part of registered AI auditors. This bill is author-sponsored and supported by Oakland Privacy and Transparency Coalition.ai. It is opposed by industry associations, including TechCA. For a more thorough discussion of the bill, please see the Senate Judiciary Committee analysis of the bill, which is incorporated herein by reference.

Comment

According to the author:

> Over the past decade, artificial intelligence (AI) systems have become increasingly powerful and accessible. Just as financial audits improve transparency and mitigate risks in capital markets, independent third

> party audits play a critical role in ensuring that AI systems are developed and deployed responsibly. Well-structured audits can help identify risks, verify compliance with ethical and legal standards, and build public trust in AI technologies. AB 1405 establishes a registration process for AI auditors and sets minimum transparency, competency, and ethical standards for registered auditors.

The use of AI auditing can be a key tool in effectively assessing how AI systems and models are working and what their impacts are. Audits can ensure legal compliance and, when shared publicly, afford a measure of transparency. Mandatory audits create baseline standards across the industry, making it easier to compare different AI systems and ensuring minimum safety thresholds. This levels the playing field and prevents a "race to the bottom" where competitive pressures lead companies to skimp on safety measures. Audit requirements create transparency that builds public confidence in AI systems, especially those used in critical domains like healthcare, criminal justice, or financial services. When people know systems have been independently verified, they are more likely to accept and appropriately use AI tools. This accountability also provides recourse when things go wrong, as qualified auditors can provide concrete evidence for regulatory decisions and legal proceedings. They create a paper trail showing whether companies exercised reasonable care, which is crucial for determining liability when AI systems cause harm. Especially given the limited resources and expertise of state government in carrying out such audits, ensuring the availability of qualified independent auditors is crucial to the effectiveness of any auditing regime.

Last year, the National Telecommunications and Information Administration (NTIA) published an "Artificial Intelligence Accountability Policy Report." One of its main recommendations focused on the utility of such independent auditing:

> Independent AI audits and evaluations are central to any accountability structure. To help create clarity and utility around independent audits, we recommend that the government work with stakeholders to create basic guidelines for what an audit covers and how it is conducted – guidance that will undoubtedly have some general components and some domain-specific ones. This work would likely include the creation of auditor certifications and audit methodologies, as well as mechanisms for regulatory recognition of appropriate certifications and methodologies.

> Auditors should adhere to consensus standards and audit criteria where possible, recognizing that some will be specific to particular risks (e.g., dangerous capabilities in a foundation model) and/or particular deployment contexts (e.g., discriminatory impact in hiring). Much work is required to create those standards – which NIST and others are undertaking. Audits and other evaluations are being rolled out now concurrently with the development of technical standards. Especially where evaluators are not yet relying on consensus standards, it is important that they show their work so that they too are subject to evaluation. Auditors should disclose methodological choices and auditor independence criteria, with the goal of standardizing such methods and criteria as appropriate. The goals of safeguarding sensitive information and ensuring auditor independence and appropriate expertise may militate towards a certification process for qualified auditors.
>
> AI audits should, at a minimum, be able to evaluate claims made about an AI system's fitness for purpose, performance, processes, and controls.[1]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Government Operations Agency (GovOps) reports a significant fiscal impact (General Fund, AI Auditors Enrollment Fund) ranging from $5 million to $10 million annually. Specifically GovOps reports that its estimated costs depend on platform complexity, startup and recurring costs; platform development: build public enrollment and reporting system; staffing: program administration, IT development, data management; maintenance & oversight: manage complaints, compliance, enforcement coordination; and, fund management.

ARGUMENTS IN SUPPORT: Oakland Privacy asserts:

> Assembly Bill 1405 addresses the large question of how all of the companies that will have to start performing risk assessments under proposed regulations at both the CA Privacy Protection Agency, and on the legislative agenda, will find qualified auditors. While we firmly believe that the creation of new markets causes human beings to pivot to fill the void, it makes perfect sense for the State to help such organic processes along.
>
> AB 1405 proposes a registry that would provide in one place the experiences and qualifications of a number of third party entities who are available to take on this work and allows businesses, especially those who may never have undertaken a risk assessment audit before, to get a handle on how to contract for this service.
>
> We are always glad to see the Legislature making an effort to produce useful compliance resources and we think this makes a great deal of sense. It is always more cost-effective and more helpful to the people of the State to aid regulatory compliance as opposed to penalizing for noncompliance.

ARGUMENTS IN OPPOSITION: The Business Software Alliance writes:

> [T]he existing AI auditing ecosystem is immature. While existing state law requires audits of certain public-sector high-risk automated decision systems, proposed legislation, namely AB 1018, would require third-party audits of private-sector automated decision systems. We have concerns regarding requirements for third-party audits of private-sector AI systems because today's AI auditing ecosystem is nascent and lacks: (1) comprehensive standards for how AI audits should be conducted; (2) a robust framework for governing

the professional conduct of AI auditors; and (3) sufficient resources for conducting AI audits. Establishing clear mechanisms for audits of government AI systems that are already required by current law may help ensure those audits are conducted efficiently, however, we are concerned by any legislation that seeks to create auditing regimes for private-sector AI systems and encourage policymakers to consider more widely used and workable accountability tools, like impact assessments.

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 76-0, 5/1/25 (Consent) - See last page for vote

SUBJECT: Horse racing: audits of the horsemen's organizations: license fee deposits: minisatellite wagering facilities

SOURCE: Author

DIGEST: This bill makes various technical and non-substantive changes to provisions of the Horse Racing Law including, among other things: eliminating the 90-day time limit on conducting specified audits and authorizes the California Horse Racing Board to permit exceptions to the requirement, and eliminates an existing statutory requirement that each application for a license to conduct a horse race meeting by a private racing association to include a $10,000 deposit, as specified.

Senate Floor Amendments of 8/18/26 eliminate an existing statutory requirement that each application for a license to conduct a horse race meeting by a private racing association to include a $10,000 deposit and eliminate associated references in Horse Racing Law.

Senate Floor Amendments of 6/2/26 eliminate the 90-day time limit on conducting the annual audit and authorize the California Horse Racing Board (CHRB) to permit exceptions to the audit requirement.

ANALYSIS:

Existing law:

1) Authorizes the Legislature via Article IV, Section 19(b) of the Constitution of the State of California to provide for the regulation of horse races and grants the CHRB the authority to regulate the various forms of horse racing authorized in this state.

2) Authorizes the CHRB to approve minisatellite wagering sites, as defined, under specified conditions.

3) Requires an organization formed by associations or fairs to operate the audiovisual signal system to execute a specified agreement with the association conducting a racing meeting and the minisatellite wagering facility that specifies, among other things, the components of its racing program, including, out-of-zone, out-of-state, and out-of-country races, that an association or fair will make available to the site.

4) Requires an annual audit of the financial books and records of the horsemen's organizations, with respect to pension funds received by the organizations pursuant to specified laws, to be conducted by a nationally recognized accounting firm within 90 days of the close of the fund's business year.

5) Requires each application for a license to conduct a horse racing meeting to be accompanied by a deposit to secure the payment of any license fee imposed pursuant to specified provisions of that law, in the form of a certified check payable to the Treasurer of the State of California, in the amount of $10,000.

6) Requires a person engaged in the conduct of a recognized horse racing meeting to pay a separate license fee imposed under other provisions of the Horse Racing Law in lieu of the license fee subject to that deposit requirement.

This bill:

1) Requires explicitly the above-mentioned agreement to specify which live in-state races would be provided by the association or fair to the site.

2) Eliminates the above-mentioned 90-day time limit on conducting the annual audit described above and authorizes the CHRB to permit exceptions to the audit requirement.

3) Eliminates the above-mentioned $10,000 deposit requirement and eliminates associated references in the Horse Racing Law.

4) Makes other non-substantive changes, including deleting obsolete statutes.

Background

Author's Statement. According to the author's office, "this bill removes an outdated provision concerning mini-satellite wagering sites and makes related technical updates. Furthermore, it defines 'live' for mini-satellite contractual purposes to mean 'live in-state' races as part of the organization's overall racing program."

Additionally, "the $10,000 deposit is no longer relevant as racing associations now pay their annual proportional share to support CHRB and related programs. Further, even if a racing association chose not to pay their share of the funding formula, a $10,000 deposit would be extremely ineffective. To compare, in FY 2024-25, associations paid a pro-rata proportion of over $18 million, far greater than a $10,000 deposit."

And lastly, "staff are no longer collecting these outdated deposit checks from associations and instead state in their review that the 'deposit is on file' when the license is issued. The CHRB would prefer to remove the deposit requirement and related references and accurately represent that no deposit is necessary or has been collected to eliminate staff acting contrary to statute or collecting funds without merit from licensees."

Satellite Wagering. Satellite wagering via an off-track facility has been legal in California since the 1980s when California racetracks started to experience declining attendance and handle figures. The industry believed that making the product easier to access not only would expose and market horse racing to potential customers but also would make it more convenient for the existing patrons to wager more often. However, while off-track-betting and simulcasting can open new revenue pathways, they often cannibalize traditional on-track

income, putting tracks at further financial risk and potentially contributing to closures.

Simulcasting. Simulcasting is the process of transmitting the audio and video signal of a live racing performance from one facility to a satellite for re-transmission to other locations or venues where pari-mutuel wagering is permitted. Simulcasting provides racetracks with the opportunity to increase revenues by exporting their live racing content to as many wagering locations as possible, such as other racetracks, fair satellite facilities, and Indian casinos. Revenues increase because simulcasting provides racetracks that export their live content with additional customers in multiple locations who would not have otherwise been able to place wagers on the live racing event.

Distribution of Audiovisual Signals and Wagering. Thoroughbred racing associations and fairs in California can distribute the audiovisual signal and accept wagers on the results of out-of-state thoroughbred races during their own race meetings. This is allowed even on days when no live races are being held at their venues. There is a limit on the number of out-of-state races that can be imported into California for betting purposes. On days when there is live thoroughbred or fair racing happening in California, the total number of races imported from out-of-state must not exceed 75 races-per-day.

California Horse Racing Board. The CHRB designates the organizations that represent California horsemen for each breed. Pursuant to specified sections of the Business and Professions Code, CHRB rules, and requirements outlined in applicable license applications, recognized industry participants that receive statutory distributions are required to comply with annual reporting obligations. Specifically, existing law requires an annual audit of the financial books and records of the horsemen's organizations, with respect to pension funds received by the organizations pursuant to specified laws, to be conducted by a nationally recognized accounting firm within 90 days of the close of the fund's business year. Under Business and Professions Code section 19613.2(c), the CHRB may take disciplinary action against a horsemen's organization that fails to annually file its audited financial statements.

Individuals seeking a copy of a horsemen's organization's complete audited financial statements may obtain one by contacting the CHRB headquarters office in Sacramento.

According to the California Thoroughbred Trainers (CTT), the current statutory timeframe is not workable because CTT must first obtain financial information and related data from other entities before it can complete and submit the report. Rather than routinely submitting the annual report late, CTT is seeking to revise the statute so that the reporting deadline more accurately reflects the time needed to receive the necessary information and data.

Specifically, AB 1526 eliminates the 90-day time limit on conducting the annual audit and would authorize the CHRB to permit exceptions to the audit requirement.

Additionally, Horse Racing Law requires that each application for a license to conduct a horse race meeting by a private racing association include a $10,000 deposit. Relatedly, when the CHRB issues a license, it must specify certain information per statute, including a recitation of the payment to and receipt by the CHRB of the deposit to secure payment of the license fee. This deposit was originally used to secure the license fee and provide upfront funding to the Board and drug testing program. However, the California Legislature has overhauled the CHRB's license fee mechanisms several times, making this deposit unnecessary.

Currently, each racing association conducting racing pays a proportional amount as determined by an annual formula devised by the CHRB in consultation with stakeholders (Bus. & Prof. Code § 19616.51). Per statute, this proportional amount is considered a license fee and supports the CHRB and the equine drug testing program. The CHRB stopped collecting deposits from racing associations in 2015, yet it is still technically required by statute.

This bill eliminates the $10,000 deposit requirement and the associated references in Horse Racing Law.

Related/Prior Legislation

SB 397 (Strickland, 2025) authorizes thoroughbred and Appaloosa horses to enter into quarter horse races at any distance, as specified; and, amends the conditions that a licensed quarter horse racing association can conduct thoroughbred racing as part of its racing program, as specified. This bill was never heard in the Senate Governmental Organization Committee.

SB 844 (Rubio, 2025) increases the limit on the importation of out-of-state thoroughbred races by a California thoroughbred racing association or fair for pari-

mutuel wagering from 75 to 80 races-per-day, as specified. This bill is pending in the Assembly Governmental Organization Committee.

AB 1389 (Rubio, Chapter 9, Statutes of 2026) adds the New York Stakes to the group of identified race meetings which are exempt from the current 75-race per day limit on imported races into California for the purposes of wagering.

SUBJECT: Federal Workforce Pell Grant program: local workforce development boards: participant training requirement

SOURCE: The Institute for College Access & Success

DIGEST: This bill 1) establishes state consumer protection standards for public and private postsecondary institutions seeking to participate in the federal Workforce Pell Grant program for short-term workforce training programs; and 2) modifies Workforce Innovation and Opportunity Act (WIOA) requirements by requiring local workforce development boards to ensure that at least 50% of participants receive workforce training services beginning in 2028.

Senate floor amendments of 8/21/26 update the title of the California Priority Jobs Credentials List to the California Priority Programs List.

ANALYSIS:

Existing federal law:

1) Establishes the federal Pell Grant to provide aid to students who demonstrate financial need. The Pell Grant award can be used for tuition and fees, books, and supplies, transportation, and living expenses for the equivalent of up to six years of full-time enrollment. The maximum Pell Grant for the 2025-26 academic year (which covers the period from July 1, 2025 – June 30, 2026) is $7,395. The minimum Pell Grant award for the same time frame is $740. (United States Code (USC) Title 20 § 1070)

2) Establishes the federal Workforce Pell Grant program (via H.R. 1, Public Law 119-21), beginning July 1, 2026, to provide federal Pell Grant funding for eligible students enrolled in short-term workforce training programs aligned with high-skill, high-wage, or in-demand industries.

Existing state law:

1) Establishes the Donahoe Higher Education Act, setting forth the mission of the University of California (UC), the California State University (CSU), and the California Community Colleges (CCC); and, defines "independent institutions of higher education" as nonpublic higher education institutions that grant undergraduate degrees, graduate degrees, or both, and that are formed as nonprofit corporations in California and are accredited by an agency recognized by the United States Department of Education (USDE). Specifies that for purposes of any code or statute, a national or regional accrediting agency recognized by the USDE as of January 1, 2025, shall retain that recognition until July 1, 2029, provided that the accrediting agency continues to operate in substantially the same manner as it did on January 1, 2025. (Education Code (EC) § 66010, et seq.)

2) Establishes California Student Aid Commission (CSAC) as the state agency charged with administering state financial aid programs to qualifying students enrolled in qualifying institutions of higher education throughout the State. Existing law requires CSAC to prescribe the use of standardized student financial aid applications for California. (EC § 69433 and § 69510, et seq.)

3) Establishes the Labor and Workforce Development Agency to coordinate workforce development programs and support workforce policy in California. (Government Code § 15550, et seq.)

4) Provides for implementation of the federal Workforce Pell program, including alignment of the Cal Grant C program and other conforming changes. (EC § 69870)

This bill:

1) Prohibits a public and private higher education institutions from disbursing Workforce Pell Grant program funds to students enrolled in the institution's short-term programs, and from advertising, marketing, or informing students about the availability of those funds, unless the institution has met both of the following:

   a) Obtained authorization from CSAC, on behalf of the Governor, as prescribed.

   b) Obtain approvals and meet all federal requirements.

2) Prohibits CSAC from authorizing public and private higher education institutions to receive Workforce Pell Grant program funds for a short program if it does any of the following:

   a) Partners, contracts, or affiliates with an entity, including an institution or organization, that is not accredited by an accrediting agency recognized and approved by the USDE, and that provides the instructors for the instruction of the short-term program, unless one of the following applies:

      i) The institution partners, contracts, or affiliates with the entity for the purpose of offering instruction for a registered apprenticeship program.

      ii) The short-term program has a contract education agreement with a participating community college that meets the specified requirements.

   b) The institution meets all of the following requirements:

      i) Discloses and ensures that the entity is a company that is separate from the institution and a description of all of the services that the entity is contracted to provide for the institution in the manner specified.

      ii) Ensures the entity is not paid using incentive compensation or tuition sharing with the institution.

      iii) Ensures the entity does not exercise authority of any kind over the institution's governance or decision-making processes, including participation in any deliberative or decision-making committee, task force, or other body, related to the design or development of core curriculum or instruction, admission standards, determining enrollment targets, or creation of new short-term programs. The entity may provide

consultation or technical assistance in an advisory capacity only, and the institution shall retain sole and independent authority for all final decisions.

c) Offers or affiliates with a company that offers financing for the short-term program using a private educational loan, including the specified types of financing.

d) Charges tuition and fees to a student for the short-term program that is more than the maximum amount of Workforce Pell Grant program funds available for a student in the short-term program. The prohibition does not apply if the portion of tuition and fees that exceeds the maximum Workforce Pell Grant program amount is paid on behalf of the student by the specified third parties.

3) Authorizes CSAC to use the California Priority Programs List to determine whether a short-term program satisfies the following requirement:

a) Provides an education aligned with the requirements of high-skill, high-wage, or in-demand industry sectors or occupations.

b) Meets the hiring requirements of employers in high-skill, high-wage, or in-demand industry sectors or occupations.

c) Leads to a recognized postsecondary credential that is stackable and portable across more than one employer or prepares students enrolled in the short-term program for employment in an occupation for which there is only one recognized postsecondary credential and that awards the credential upon completion.

4) Authorizes the Labor and Workforce Development Agency to enter into a data-sharing agreement with the Office of Cradle to Career Data to the extent it is necessary to establish and maintain the California Priority Jobs Credential List.

5) Modifies the following provisions to the WIOA Adult and Dislocated Worker program, effective July 1, 2028:

a) Requires local workforce development boards, instead of spending a minimum of 30% of specified *funds* for adults and dislocated workers, to ensure that at least 50% of *participants* enrolled in the adult and dislocated worker program receive workforce training services.

i) Prescribes the training services that count toward the participant training requirements, as specified.

6) Retains the existing WIOA expenditure reporting, requires separate WIOA participant reporting requirements, and clarifies the Employee Development Department (EDD) reporting process in the event a local area does not report leverage funds.

7) Makes other conforming and technical changes.

8) States various findings and declarations related to the federal Workforce Pell Grant program and workforce training opportunities.

9) States that it is the Legislature's intent to expand access to high-quality workforce training opportunities by defining standards for short-term programs to be eligible for the federal Workforce Pell Grant program and requiring an increase in participants that receive workforce training services under the federal WIOA program.

Comments

Need for the bill. According to the author, "Californians looking to gain new skills or advance in their careers by enrolling in short-term workforce training programs may be eligible for new financial assistance. The federal government is set to begin rolling out Workforce Pell Grants for eligible Californians seeking to enroll in short-term programs lasting eight to 15 weeks. These programs will lead to industry-recognized credentials in sectors like healthcare, IT and skilled trades, and will train participants for high-wage and in-demand jobs.

"As states prepare to implement this historic expansion of aid, proper safeguards are necessary to ensure these programs deliver real opportunities for students and their families and prevent them from wasting their lifetime-limited Pell Grant eligibility. AB 1534 includes important consumer protection measures that protect students from risky private loans and require programs to charge reasonable costs and fully disclose partnerships with unaccredited organizations."

Federal Workforce Pell program. Congress enacted H.R. 1, in the Summer of 2025. Among the many provisions contained in the measure is a section that expands Pell Grant eligibility to students enrolled in short-term, career-focused training programs that meet defined quality requirements and lead to industry-recognized credentials. The workforce training programs tend to be between 8 and 14 weeks in length and are intended to provide rapid pathways to employment in

high-demand industries. This expansion is commonly referred to as "Short-Term Pell" or "Workforce Pell."

According to the National Governors Association and America Achieves, in their Workforce Pell: An Overview for Governors March 2026 policy memo, "the Congressional Budget Office estimates that over the next ten years, the federal government will invest approximately $1.5 billion in Workforce Pell Grants of about $2,200 per recipient, although awards will vary as they are prorated based on program length and student need. However, research on such short-term programs demonstrates that while some programs deliver strong labor market returns, many do not. This new funding stream represents an opportunity for Governors to drive resources to the strongest programs to address critical workforce development needs and better align postsecondary training to high-skill, high-wage, and in-demand jobs through their implementation decisions."

The Workforce Pell goes into effect on July 1, 2026, the USDE proposed regulations in March 2026, and is expected to finalize regulations later this Spring. Presently, the draft regulations leave Governors with considerable leeway in the details of implementation.

Workforce Pell and existing state financial aid programs. As mentioned, Workforce Pell is designed to support short-term workforce training programs that may be completed in as little as eight weeks and can be up to 15 weeks in duration. California's primary state financial aid programs under Cal Grant generally support students enrolled in degree and longer-term certificate programs. Specifically, Cal Grant C supports occupational and technical training programs that are at least four months in length. To that end, Workforce Pell is filling a gap in student aid not covered under the Cal Grant program. This bill establishes additional state participation standards for Workforce Pell but does not modify eligibility for existing state financial aid programs.

Consumer protection measures. This bill aims to create state-level consumer protection standards intended to protect Workforce Pell recipients enrolling in short-term programs. The proposed requirements are applicable to public and private higher education institutions physically located in this state seeking to participate in the Workforce Pell program. Among other provisions, this bill restricts tuition and fee levels, limits the use of certain private financial arrangements, establishes conditions governing third-party partnerships, and requires participating programs to demonstrate alignment with workforce needs. Specifically, this measure prohibits institutions from charging tuition and fees that exceed the maximum available Workforce Pell award, unless the excess amount is

paid by an employer, labor-management partnership, or another third-party that does not require repayment by the student. It also prohibits participation by institutions that offer or affiliate with providers of private education loans, income share agreements, or similar credit products. This bill also requires CSAC to deny authorization to institutions that do not satisfy specified requirements. The proponents of this measure argue that restricting tuition levels limits reliance on private educational loans and income share agreements, and that imposing requirements for third-party partnerships and alignment with workforce needs helps ensure students are participating in quality programs that will lead to meaningful employment opportunities related to their field of study/training.

Third-Party providers and tuition-sharing arrangements. This bill further prohibits higher education institutions from receiving authorization to participate in the Workforce Pell if it compensates a third-party provider through tuition sharing or incentive compensation arrangements. The sponsors of this bill argue that these compensation models may create incentives to prioritize enrollment growth over student outcomes and can blur the lines between higher education institutions and for-profit education providers. Proponents point to recent disputes involving online program manager (OPM) partnerships with public and private institutions, including the University of Southern California and 2U, and Caltech and Simplilearn, and a 2023 State Auditor review of UC's use of OPMs as issues that may arise from these types of partnerships. A UC audit identified 52 UC contracts with OPMs in effect at that time, none of which involved undergraduate programs. Of those contracts, 30 were with five UC campuses, of which 15 pertained to continuing education provided through campus extension units. This bill does not prohibit institutions from partnering with OPMs or other third-party providers. Rather, it restricts certain compensation arrangements and limits the role third-party entities may play in academic and institutional decision-making. Institutions may continue to contract with third-party providers if the partnership satisfies the bill's specified conditions. This bill also preserves the institution's responsibility for academic decision-making by prohibiting third-party entities from exercising authority over curriculum development, admissions standards, enrollment targets, or the creation of new short-term programs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee analysis, this bill would have the following fiscal impact:

- The Chancellor's Office for the California Community Colleges estimates one-time Proposition 98 General Fund costs in the low tens of thousands of

dollars for each participating district to develop an implementation plan necessary to participate in the federal Workforce Pell Grant Program. Participation in the program is voluntary, therefore the exact cost would depend on the number of community college districts that elect to pursue Workforce Pell eligibility. The Chancellor's Office also estimates one-time General Fund workload costs of $12,000 to $24,000 to develop and distribute a guidance memo and provide technical assistance to the field.

- The California Student Aid Commission (CSAC), Office of Cradle to Career Data (C2C) and the Employee Development Department (EDD) each indicate that the costs to implement this bill would be minor and absorbable. The 2026 Budget Act includes $1.3 million in General Fund for the C2C for workload related to the federal Workforce Pell Grant Program.

- This bill could result in additional costs for local workforce development areas to submit corrective actions plans to the EDD for not meeting the bill's participant training requirements. The extent of these costs is unknown and could be deemed to be reimbursable by the Commission on State Mandates.

SUBJECT: Peace officers: secondary employment

SOURCE: ICE Out of California Coalition

DIGEST: This bill prohibits specified peace officers from engaging in any form of secondary employment that involves engaging in, arresting, detaining, transporting, or deporting individuals pursuant to or out-of-state federal immigration laws, as specified.

Senate Floor Amendments of 8/21/26 specify that the prohibition above extends to the enforcement of immigration laws of another state, and adds language to the findings and declarations.

ANALYSIS:

Existing law:

1) Establishes the Commission on Peace Officer Standards and Training (POST) to set minimum standards for the recruitment and training of peace officers, develop training courses and curriculum, and establish a professional certificate

program that awards different levels of certification based on training, education, experience, and other relevant prerequisites. (Penal (Pen.) Code, §§ 830-832.10; 13500 et seq.)

2) Requires POST to establish a certification program for peace officers, as defined, and provides that basic, intermediate, advanced, supervisory, management, and executive certificates shall be established for the purpose of fostering professionalization, education, and experience necessary to adequately accomplish the general police service duties performed by peace officers. (Pen. Code § 13510.1, subds. (a), (b).)

3) Gives POST the authority to suspend, revoke, or cancel any certification, which extends to any certificate or proof of eligibility issued by the commission, including any certificate or proof of eligibility that is invalid, inactive, expired or canceled. (Pen. Code § 13510.1, subd. (f).)

4) Establishes the California Public Records Act (CPRA), which generally provides that access to information concerning the conduct of the people's business is a fundamental and necessary right of every person in this state, and requires government agencies to disclose government records to the general public upon request, unless such records are exempted from disclosure. (Government (Gov.) Code, § 7920.000 et seq.)

5) Provides that the CPRA does not require the disclosure of peace officer personnel files and background investigation files gathered by law enforcement agencies that are in the custody of POST in connection with the commission's authority to verify eligibility for the issuance of certification and investigate grounds for decertification of a peace officer including any and all investigative files and records relating to complaints of, and investigations of, police misconduct, and all other investigative files and materials. (Gov. Code, § 7923.601.)

6) Provides that the personnel records of peace officers and custodial officers and records maintained by a state or local agency or information obtained from these records, are confidential and shall not be disclosed in any criminal or civil proceeding except by discovery. This provision does not apply to investigations or proceedings concerning the conduct of peace officers or custodial officers, or an agency or department that employs those officers, conducted by a grand jury, a district attorney's office, the Attorney General's office, POST, or a civilian oversight board, as specified. (Pen. Code, § 832.7, subd. (a).)

7) Specifies that notwithstanding the above provision or any other law, specified peace officer or custodial officer personnel records and records maintained by a state or local agency – including any record relating to an incident in which a sustained finding was made involving dishonesty by a peace officer, as specified – are not confidential and shall be made available for public inspection pursuant to the CPRA. (Pen. Code, § 832.7, subd. (b)(1).)

8) Prohibits a local agency officer or employee from engaging in any employment, activity, or enterprise for compensation which is inconsistent, incompatible, in conflict with, or inimical to their duties as a local agency officer or employee or with the duties, functions, or responsibilities of their appointing power or the agency by which they are employed. (Gov. Code, § 1126, subd. (a).)

9) Prohibits an officer or employee from performing any work, service, or counsel for compensation outside of their employment where any part of their efforts will be subject to approval by any other officer, employee, board, or commission of their employing body, unless otherwise approved. (Gov. Code, § 1126, subd. (a).)

10) Authorizes each appointing power to determine, subject to approval of the local agency, those outside activities which, for employees under its jurisdiction, are incompatible with their duties as local agency officers or employees, and provides that an employee's outside employment, activity, or enterprise may be prohibited if certain conditions are met. (Gov. Code, § 1126, subd. (b).)

11) Prohibits a state officer or employee from engaging in any employment, activity, or enterprise that is clearly inconsistent, incompatible, in conflict with, or inimical to their duties. (Gov. Code, § 19990.)

12) Authorizes each appointing power to determine, subject to approval of the Department of Human Resources (Cal HR), those activities which, for employees under its jurisdiction, are incompatible with their duties. (Gov. Code, § 19990.)

13) Provides that every executive or ministerial officer, employee, or appointee of the State of California, or any county or city therein, or any political subdivision thereof, who knowingly asks, receives, or agrees to receive any emolument, gratuity, or reward, or any promise thereof excepting such as may be authorized by law for doing an official act, is guilty of a misdemeanor. (Pen. Code, § 70, subd. (a).)

14) Specifies that the above prohibition does not preclude a peace officer from engaging in, or being employed in, other employment while off duty from his or her principal employment and outside his or her regular employment as a peace officer of a state or local agency. (Pen. Code, § 70, subd. (e)(1).)

15) Provides that subject to the above, and except as provided by written regulations or policies adopted by the employing agency, or pursuant to an agreement between the employing agency and a recognized employee organization representing the officer, no officer shall be prohibited from engaging in, or being employed in, other employment while off duty from their principal employment and outside their regular employment as an officer. (Pen. Code, § 70, subd. (e)(2).)

16) Requires an employer, if they withhold consent to allow an officer to engage in or be employed in other employment while off duty, to, at the time of denial, provide the reasons for denial in writing to the officer. (Pen. Code, § 70, subd. (e)(3).)

This bill:

1) Provides that notwithstanding the above provisions permitting secondary employment a peace officer shall not engage in any form of secondary employment, including contract based or as an individual contractor, that involves engaging in arresting, detaining, transporting, or deporting individuals pursuant to or out-of-state federal immigration laws.

2) Exempts service with any branch of the United States Armed Forces from the above prohibition.

3) Specifies that a violation of the prohibition in (1) above is an act of serious misconduct and may constitute grounds for decertification, as specified.

4) Requires a peace officer to report to their employing law enforcement agency any conditional offer of secondary employment subject to (1) above.

5) Defines the following terms for the purposes of the prohibition in (1) above:

    a) "Law enforcement agency" means any local or state entity that employs a peace officer.

    b) "Conditional offer" is defined as any communication from a potential employer to an individual officially offering an individual to accept a position.

c) "Peace officer" refers to a range of sheriff's deputies, police officers, marshals, investigators, custodial officers, correctional officers, parole officers and agents, and probation officers, as specified.

d) "Response" is defined as any communication from a peace officer replying to a conditional offer.

6) Provides that records that are reportable under (4) above or that are related to secondary employment pursuant to (1) above, including records of investigations into violations of that provision where there is a sustained finding that a violation did occur, shall be maintained by the law enforcement agency and shall constitute public records for purposes of the CPRA.

7) Includes several legislative findings and declarations.

8) Includes a severability clause.

Comments

Penal Code section 70 makes it a crime for a public employee in California to receive consideration in exchange for doing an official act. This provision also makes clear that a peace officer is not prohibited from engaging in casual or part-time employment as a private security guard or patrolman for a public entity or a private employer, provided certain conditions are met as to both, and only when the officer is off-duty from their principal employment. Moreover, section 70 makes clear that peace officers are permitted to engage in other outside employment while off-duty from their principal employing agency, subject only to written regulations or policies adopted by the employing state or local agency, or pursuant to an agreement between the employing state or local agency and a recognized employee organization representing the peace officer. If an employer withholds consent to allow a peace officer to obtain outside employment while off-duty, the employer is required to provide the reasons for denial in writing to the peace officer. For instance, Sacramento Police Department's General Order on Outside Employment provides that sworn SPD officers shall not work in any outside employment that "involves any other municipality or political subdivision of the state or federal government except with express permission from the Chief of Police."

This bill seeks to prevent California law enforcement officers from seeking outside employment with an entity engaged in immigration enforcement. According to the author, "Working for ICE on one shift while working as a California law enforcement officer on the next presents insurmountable conflict of interest

concerns […] Working for both employers divides loyalty between local community safety and federal deportation priorities [and] can further erode community trust when residents fear contacting the police due to a potential association with immigration enforcement." Accordingly, this bill amends Penal Code section 70 to prohibit peace officers from engaging in any form of secondary employment, including contract based or as an individual contractor, that involves engaging in arresting, detaining, transporting, or deporting individuals pursuant to federal or out-of-state immigration laws. This bill specifies that a violation of this prohibition constitutes serious misconduct and may constitute grounds for decertification of the offending officer. Moreover, this bill requires officers to report to their employing agency any conditional offer of secondary employment that involves immigration-related responsibilities described above. This bill additionally provides that records related to these offers of employment, as well as investigations into any violations of the operative prohibition where there was a sustained finding that a violation did occur, are subject to the CPRA.

For additional discussion and context, see the analysis prepared by the Senate Committee on Public Safety.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

> Major costs to state law enforcement entities to maintain employment records subject to the PRA (special funds, General Fund).
>
> Major costs to local law enforcement entities to maintain employment records subject to the Public Records Act (PRA). Reimbursement would be subject to a determination by the Commission on State Mandates (General Fund).
>
> Minor to moderate costs to the Commission on Peace Officer Standards and Training (POST) to investigate violations of serious misconduct that may constitute grounds for decertification of employees.

SUBJECT: 988 Suicide & Crisis Lifeline: LGBTQ+ youth

SOURCE: California Alliance of Child and Family Services
Equality California

DIGEST: This bill directs the California Office of Emergency Services (Cal OES) to establish a dedicated "Press 3" function within the 988 Suicide and Crisis Lifeline (988) to direct a caller to a LGBTQ+ specific crisis line, if the California Health and Human Services Agency (CHHSA) makes an annual determination first, as specified.

ANALYSIS:

Existing federal law establishes the National Suicide Hotline Designation Act, which designates "988" as the universal, three-digit dialing code for the National Suicide Prevention Lifeline (now known as the 988 Suicide and Crisis Lifeline**)** maintained through the federal Substance Abuse and Mental Health Services Administration (SAMHSA).

Existing state law:

1) Designates Cal OES as the lead state agency responsible for addressing natural, technological, or man-made disaster and emergencies, including activities necessary to prevent, respond to, recover from, and mitigate the effects of emergencies and disasters to people and property.

2) Establishes, pursuant to AB 988 (Bauer-Kahan, Chapter 747, Statutes of 2022), the Miles Hall Lifeline and Suicide Prevention Act, to implement the national 988 system in California, and creates the 988 State Suicide and Behavioral Health Crisis Services Fund to receive revenue generated by a specified surcharge on telephone access lines.

3) Requires Cal OES to implement and oversee the technology infrastructure, coordination, and transfer of calls between 988, 911, and behavioral health crisis services.

This bill:

1) Makes numerous legislative findings and declarations for purposes of this bill, including the following legislative intent:
   a) It is the intent of the State of California to continue its long history of advancing policies that support suicide prevention efforts and further the initiative to address our youth mental health crisis. Young LGBTQ+ Californians have benefited from the 988 Suicide & Crisis Lifeline's LGBTQ+ Youth Specialized Services program since 2022.
   b) It is the intent of the Legislature to reinstate this program in California.

2) Requires the CHHSA to annually determine whether an adequate specialized LGBTQ+ suicide prevention hotline is activated by the federal government under 988.

3) Provides that Cal OES and the CHHSA shall implement the requirements of this bill only after the CHHSA has determined that the specialized hotline in 2)

above has not been activated.

4) Directs Cal OES, no later than six months after the CHHSA determination in 3) above, to request SAMHSA to enable, for calls originating in California, a "Press 3" function to allow callers to dial 988 and press "3" to be automatically routed to a specialized 988 call center.

5) Requires Cal OES to request authorization to enable text or chat features between a caller and a specialized 988 call center, as specified.

6) Requires the specialized 988 call center to be a qualified entity that meets specified requirements, including maintaining policies that comply with medical confidentiality laws, as specified.

7) Requires Cal OES, no later than 12 months following the approval by SAMHSA or its contracted administrator, to ensure that the required call, text, and chat technologies in 4) and 5) above are available.

8) Directs the CHHSA, no later than 12 months following approval from SAMHSA, to identify and contract with a qualified entity or entities that specialize in LGBTQ+ suicide prevention services.

9) Contains an urgency clause.

Background

988. According to SAMHSA, 988 is a phone, chat, and text service that provides free and confidential support to people in suicidal crisis or mental health related distress 24 hours a day, 7 days a week, across the U.S. The network consists of more than 200 local, independent, and state crisis centers staffed with skilled, trained crisis counselors. 988 offers specialized services for Spanish-language speakers and people who are deaf or hard of hearing, and connects veterans, service members, and their families to the Veterans Crisis Line for tailored support. 988 also uses Language Line Solutions to provide interpretation to callers in more than 240 additional languages.

In September 2022, Governor Newsom signed AB 988 to ensure and expand services for Californians experiencing a behavioral health crisis. When Californians dial 988, they are directed to one of 12 crisis call centers. The call is

routed based on the caller's area code. If a local crisis center is unable to take the call, the caller is automatically routed to a national backup crisis center.

The role of Cal OES. Cal OES is required to verify 988 technology allows for transfers between 988 centers as well as between 988 centers and 911 public safety answering points, commonly known as dispatch centers. Cal OES indicates that all 988 centers have the capability to transfer calls to other 988 centers and to and from 911 dispatch centers. Cal OES has validated this interoperability through controlled test calls and successful live transfers. According to Cal OES, these efforts confirm that both the technical capability and functional interoperability required under statute have been established.

Cal OES reports that it does not anticipate any impact on 988 and 911 interoperability related to deployment of the statewide Next Generation (NG) 911 system. According to Cal OES, moving all dispatch centers to NG 911 from the existing legacy 911 system will further improve the ability of dispatchers to transfer and receive calls with 988 centers. Cal OES indicates that it also continues to work with 988 providers on their modernization and technology needs and will ensure any buildout of 988 technology sustains or improves compatibility with NG 911. Ongoing work will continue to focus on strengthening consistency and operational protocols across systems.

Federal Changes. Beginning in 2022, under a pilot program, pressing "3" after dialing 988 directed a caller to an LGBTQ+ specific crisis line. The federal government ended support for the 988 "Press 3" option on July 17, 2025, eliminating the service nationwide. According to a letter dated June 9, 2026, from SAMHSA, the federal 2026 Labor and Health and Human Services Appropriations Act directs SAMHSA to restore $33.1M for Specialized Services for LGBTQ+ Youth, including the 988 "Press 3" option. Specifically, SAMHSA is required to provide specialized services for LGBTQ+ youth, including training for existing counselors in LGBTQ+ youth cultural competency and the establishment and operation of an Integrated Voice Response to transfer LGBTQ+ youth to a specialty organization. SAMHSA notes in the letter that it "is currently assessing the most appropriate approach to implementing this congressional directive for the "Press 3" option….[and] regardless, the 988 Lifeline will continue to serve all callers, providing 24/7 access to skilled, caring, and culturally competent crisis counselors for individuals experiencing suicidal, substance use, or mental health crises."

This bill establishes a process to restore the 988 "Press 3" option in California,

contingent upon an annual specified determination by the CHHSA.

FISCAL EFFECT: Appropriation: No Fiscal Com.:Yes Local:No

According to the Senate Appropriations Committee:

- Cal OES estimates initial costs of $1.79 million and $791,000 ongoing to support 3.0 permanent positions (988 State Suicide and Behavioral Health Crises Services Fund (988 Fund)). This estimate includes a one-time cost of up to $1 million for telecommunications infrastructure. Total costs will ultimately depend on the number of 988 centers established to meet statewide demand.

- According to CHHSA, the agency intends to delegate the bill's implementation to the Department of Health Care Services (DHCS). DHCS estimates total costs of $6.11 million in Fiscal Year (FY) 2027-28 and $4.00 million annually ongoing (988 Fund), which includes:
    - Contracting: $4 million initially and $2 million ongoing to integrate the bill's requirements into current 988 processes, and to support specialized routing, training, reporting, and performance standards for statewide consistency across 988 crisis centers.
    - Personnel: $2.11 million in FY 2027-28 and $2.00 million ongoing for 12.0 permanent personnel years (PYs). DHCS reports that these additional resources are required for an expanded workload that existing staff cannot absorb. These new responsibilities include managing the application, selection, and funding process for qualified entities; providing contract oversight, technical assistance, and stakeholder engagement; integrating the "Press 3" option into the existing 988 framework while ensuring alignment with 911 and mobile crisis services; and conducting the legal analysis required to ensure compliance with federal regulations.

Staff notes that the 2026-27 Budget Act augments funding and provides 8.0 PYs to DHCS to support 988 California and implementation of the Behavioral Health Crisis Continuum (988 Fund). Specifically, it allocates $25.9 million in FY 2026-27, $25.8 million annually from FY 2027-28 through FY 2029-30, and $4.4 million annually ongoing

ARGUMENTS IN SUPPORT: In support of this bill, the co-sponsors, California Alliance of Child and Family Services and Equality California write that, "Given the disproportionate risk of suicide for LGBTQ+ individuals, queer youth need and deserve specialized suicide prevention services. AB 1540 provides a much-needed solution by re-establishing the 988 "Press 3" program that successfully helped many LGBTQ+ individuals before the federal government eliminated the program. AB 1540 also incorporates amendments to ensure that the State will not duplicate efforts, should the federal government restart the "Press 3" line nationally. AB 1540 is a life-saving bill, ensuring that all LGBTQ+ youth in California, once again, have access to critical and lifesaving suicide and crisis intervention."

ARGUMENTS IN OPPOSITION: In opposition to this bill, Our Duty-USA writes that, "The federal government's decision to end LGBTQ+-specialized routing reflects a policy judgment that all callers in crisis should receive the same evidence-based crisis intervention services rather than being sorted by identity category. Whether one agrees with that policy or not, California's response should be to strengthen general 988 infrastructure for all youth in crisis, not to recreate an ideologically directed subnetwork that routes minors to organizations whose primary mission is LGBTQ+ affirmation."

SUBJECT: Sensitive personal information

SOURCE: Consumer Reports
California Initiative for Technology & Democracy

DIGEST: This bill prohibits the selling or sharing of "sensitive personal information", as specified, pursuant to the California Consumer Privacy Act (CCPA).

Senate Floor amendments of 8/21/26 allow commercial credit reporting agencies to sell a consumer's social security number, as provided.

ANALYSIS:

Existing law:

1) Establishes the CCPA, which grants consumers certain rights with regard to their personal information, including notice, access, and disclosure; the right to deletion; the right to restrict the sale or sharing of information; and protection

from discrimination for exercising these rights. It places attendant obligations on businesses to respect those rights. (Civil (Civ.) Code § 1798.100 et seq.)

2) Provides a consumer the right, at any time, to direct a business that sells or shares personal information about the consumer to third parties not to sell or share the consumer's personal information (Civ. Code § 1798.120.)

3) Defines "personal information" as information that identifies, relates to, describes, is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household. (Civ. Code § 1798.140(v).) The CCPA defines and provides additional protections for sensitive personal information, as defined, that reveals specified personal information about consumers, including precise geolocation, genetic data, and immigration status. (Civ. Code § 1798.140(ae).)

4) Requires businesses that collect consumers' sensitive personal information to inform consumers of the categories of sensitive personal information to be collected and the purposes for which the categories of sensitive personal information are collected or used, and whether that information is sold or shared. (Civ. Code § 1798.100(a)(2).)

5) Affords consumers the right, at any time, to direct a business that collects sensitive personal information about the consumer to limit its use of the consumer's sensitive personal information, as specified. A business that has received such direction shall be prohibited from using or disclosing the consumer's sensitive personal information for any other purpose after its receipt of the consumer's direction unless the consumer subsequently provides consent for the use or disclosure of the consumer's sensitive personal information for additional purposes. Sensitive personal information that is collected or processed without the purpose of inferring characteristics about a consumer is not subject hereto and shall be treated as personal information for purposes of all other sections of the CCPA. (Civ. Code § 1798.121.)

6) Establishes the California Privacy Rights Act of 2020 (CPRA), which amends the CCPA and creates the California Privacy Protection Agency (CalPrivacy), which is charged with implementing these privacy laws, promulgating regulations, and carrying out enforcement actions. (Civ. Code § 798.100 et seq.; Proposition 24 (2020).) Permits amendment of the CPRA by a majority vote of each house of the Legislature and the signature of the Governor, provided such amendments are consistent with and further the purpose and intent of this act as set forth therein. (Proposition 24 § 25 (2020).)

7) Provides that a business need not comply with the CCPA to the extent it restricts the business's ability to carry out certain conduct, including to cooperate with law enforcement. (Civ. Code § 1798.145(a).)

8) Provides that a business does not sell or share personal information when a consumer uses or directs the business to intentionally disclose personal information or interact with one or more third parties. (Civ. Code § 1798.140.)

This bill prohibits a business, service provider, or contractor from selling or sharing the sensitive personal information of a consumer to a third party, except that a commercial credit reporting agency may sell a consumer's social security number to the extent the agency uses that information solely to identify the relationship of a consumer to a business that the consumer owns.

Background

The CCPA grants consumers certain rights with regard to their personal information, including the right to restrict the sale of information. It places attendant obligations on businesses to respect those rights. The CPRA created a new category of "sensitive personal information" and afforded consumers enhanced rights with respect to that information, including the ability to restrict businesses' use and disclosure of that information. This category includes data such as precise geolocation information and immigration status.

Given the heightened sensitivity of this information and the widespread weaponization and commodification of it, this bill prohibits the selling or sharing of sensitive information by a business, service provider, or contractor to a third party, subject to relevant provisions of the CCPA, except as provided.

This bill is sponsored by Consumer Reports and the California Initiative for Technology & Democracy (CITED). This bill is supported by many privacy, consumer, labor, and other advocacy organizations, including Equality California and the California Federation of Labor Unions. This bill is opposed by industry associations, including the Association of National Advertisers and ATA Action. For a more thorough analysis, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis of this bill.

Comments

The mass collection of consumer data as an asset is not new, but has rapidly expanded beyond just targeted advertising. This commodification of personal information has been dubbed "surveillance capitalism" by social psychologist, Shoshana Zuboff:

> As we move into the third decade of the 21st century, surveillance capitalism is the dominant economic institution of our time. In the absence of countervailing law, this system successfully mediates nearly every aspect of human engagement with digital information. The promise of the surveillance dividend now draws surveillance economics into the "normal" economy, from insurance, retail, banking and finance to agriculture, automobiles, education, health care and more.[1]

Companies gather data through multiple channels, including purchase history, browsing behavior, location tracking, demographic information, social media activity, and even biometric data. This information gets fed into sophisticated algorithms that create detailed consumer profiles. With the rise of data brokers, the concerns are only further exacerbated:

> Data brokers operate within a multibillion-dollar industry built on the collection and sale of detailed personal information—often without individuals' knowledge or consent. These companies create extensive profiles on nearly every American, including highly sensitive data such as precise location history, political affiliations, and religious beliefs. This information is frequently resold for purposes ranging from marketing to law enforcement surveillance.
>
> Many people are unaware that data brokers even exist, let alone that their personal information is being traded.[2]

This bill responds to the privacy concerns raised by outright prohibiting the selling or sharing of sensitive personal information, as provided.

According to the author:

> With the rapid growth of the data broker industry, tech companies are quietly harvesting and selling detailed information about where people go—from protests and political gatherings to reproductive health clinics, places of worship, and shelters. Recent reports have revealed that federal agencies, including ICE, have purchased this data to

conduct surveillance and detain individuals—sidestepping legal safeguards and public accountability.

Californians should not have to worry that their sensitive personal information is being sold to the highest bidder. From precise location data to deeply personal information, AB 1542 draws a clear line—it puts the safety and privacy of everyday Californians first.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Enforcement costs of $536,000 in FY 2026-27 and $520,000 ongoing to the California Privacy Protection Agency (CalPrivacy). CalPrivacy estimates that the enforcement division will require one attorney position and one information technology specialist position to investigate and enforce the prohibition on selling and sharing sensitive personal information. Although CalPrivacy currently investigates the data sharing practices of businesses, this prohibition will likely lead to a larger universe of potential targets and an increased need for analysis about data flows. (General Fund)

Costs to the Department of Justice (DOJ), which shares enforcement authority with CalPrivacy, potentially of a similar amount. Actual costs will depend on the extent to which the Public Rights Division pursues enforcement actions. If DOJ hires staff to handle enforcement actions, DOJ would incur significant workload costs, likely in the low hundreds of thousands of dollars annually. If DOJ does not pursue enforcement as authorized by this bill, it would likely not incur any costs.

Cost pressure of an unknown but potentially significant amount to the courts to adjudicate any additional filings. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources. The FY 2026-27 Budget appropriated $70 million General Fund for this purpose. (Trial Court Trust Fund, General Fund)

ARGUMENTS IN SUPPORT: A coalition of organizations, including Techequity Action, writes:

> Sensitive personal information reveals the most intimate parts of ourselves, including our immigration status, sexual orientation, location, political activities, genetic and health information, and even the contents of our communications. This type of data has been used by scammers to facilitate financial fraud, by retailers to generate predatory pricing schemes, and even by our own federal government to surveil individuals exercising their constitutional rights. It is imperative we protect the privacy rights of our communities, especially with increased attacks on immigrants, Black and Brown community members, LGBTQ people, and individuals seeking reproductive health care. California must take bold action to ensure individuals are protected and their sensitive personal information is kept private. AB 1542 answers this call.

ARGUMENTS IN OPPOSITION: A coalition of industry associations, including the California Chamber of Commerce, writes:

While AB 1542 would continue to permit certain disclosure of sensitive PI to service providers and contractors for permitted business purposes, when it comes to all other persons and entities – "third parties," – the bill would change the law from a "right to limit" model to a categorical prohibition. Again, under the CCPA, a third party is any "person" who is not the business with whom the consumer intentionally interacts and that collects PI (including SPI) from the consumer as a result of that current interaction with the business; a service provider to the business, or a contractor. In turn, a "person" is any individual, company, organization, or "group of persons acting in concert". Thus, in practice, AB 1542's ban on selling or sharing sensitive PI with third parties would significantly alter, if not constrain, several common and lawful business operations and even beneficial uses by other third parties—from business to nonprofits, to researchers, to political organizations, and government entities.

SUBJECT: Vehicles: driving under the influence

SOURCE: Author

DIGEST: This bill increases the punishment for a driving under the influence (DUI) conviction with two priors from a misdemeanor to a wobbler and increases the punishment for a DUI with four or more priors from a wobbler to a jail felony.

ANALYSIS:

Existing law:

1) Makes it unlawful for any person who is under the influence of any alcoholic beverage or drug, or under the combined influence of any alcoholic beverage and drug, or who has 0.08% or more, by weight, of alcohol (BAC) in their blood, to drive a vehicle (hereafter, "DUI"). (Vehicle (Veh.) Code, § 23152, subds. (a), (b), (f), & (g).)

2) Establishes graduated penalties for a first DUI, DUI with one prior, DUI with two priors, and DUI with three or more priors, including jail time, fines, ignition interlock device (IID) installation, license suspension or revocation,

and completion of a DUI program. (Veh. Code, §§ 13352, 13352.1, 23538, 23540, 23542, 23546, 23550, 23552, 23548, 23575.3.)

3) Requires a 10-year license revocation if a person has been convicted of three or more DUIs or DUIs causing bodily injury, the last of which was punishable as a DUI or DUI causing bodily injury with two priors, a DUI with three or more priors, or as an alternate-felony misdemeanor because of a prior specified felony. (Veh. Code, § 23597, subd. (a).)

4) Makes it unlawful for any person who is under the influence of any alcoholic beverage or drug, or the combined influence of the two, or who has a BAC of .08 or more, to drive a vehicle, and concurrently do any act forbidden by law or neglect any duty imposed by law in driving the vehicle, which proximately causes bodily injury to any person other than the driver (hereafter, "DUI causing bodily injury.") (Veh. Code, § 23153 subds. (a), (f), & (g).)

5) Establishes graduated penalties for a first DUI causing bodily injury, DUI causing bodily injury with one prior, and DUI causing bodily injury with two or more priors, including jail or prison time, fines, IID installation, license suspension or revocation, and completion of a DUI program. (Veh. Code, §§ 13352, 23554, 23556, 23560, 23562, 23566, 23568, 23575.3.)

6) Provides that a person who proximately causes bodily injury or death to more than one victim in any one instance that results in a felony conviction of a DUI causing bodily injury, gross vehicular manslaughter while intoxicated, or vehicular manslaughter while intoxicated, shall receive a one-year sentence enhancement in state prison for each additional victim injured (maximum of three). (Veh. Code, § 23558.)

7) Punishes a person convicted of a DUI causing bodily injury, where the violation proximately causes great bodily injury to any person other than the driver, and the offense occurred within 10 years of two or more priors, as a felony by imprisonment for two, three, or four years in state prison, a $1,015 to $5,000 fine, and a five-year license revocation (Veh. Code, §§ 23566, subd. (b), 13352 subd. (a)(6).)

8) Provides that if a person is convicted of the above offense, and the underlying offense occurred within 10 years of four or more priors, there shall be an additional punishment of three years in state prison, which shall be served in

addition and consecutive to the sentence imposed above. (Veh. Code, § 23566, subd. (c).)

9) Makes any DUI or DUI causing bodily injury (hereafter, "any DUI") an alternate felony-misdemeanor if that person has previously been convicted of certain impaired driving crimes:

10) Punishes a person convicted of any DUI within 10 years of specified felonies – a DUI with three or more priors, a DUI causing bodily injury, or gross vehicular manslaughter – as an alternate-felony misdemeanor, a $390 to $1,000 fine, a four- or five-year license revocation (including a three-year designation as a habitual traffic offender), and a three- or four-year IID mandate. (Veh. Code, §§ 13352, subd. (a)(6)-(7); 23550.5, subds. (a), (c) & (d); 23575.3, subd. (h)(1)-(2).)

11) Punishes a person convicted of any DUI, who has a prior conviction for felony vehicular manslaughter while intoxicated, as an alternate felony-misdemeanor, a fine of $390 to $1,000, a four- or five-year license revocation, and a three- or four-year IID mandate. (Veh. Code, §§ 13352 subd. (a)(6)-(7); 23550.5, subds. (b), (c) & (d); 23575.3, subd. (h)(1)-(2).)

12) Requires the court, if a person is convicted of a DUI or a DUI causing bodily injury, to consider a BAC of .15% or more, or a person's refusal to take a breath or urine test, as a special factor that may justify enhancing the penalties in sentencing, in determining whether to grant probation, and, if probation is granted, in determining additional or enhanced terms and conditions of probation. (Veh. Code, § 23578.)

13) Requires the prosecutor, if the prosecution agrees to a plea of guilty or no contest to reckless driving in satisfaction of, or as a substitute for, an original charge of a DUI—also known as a wet reckless—to state for the record a factual basis for the satisfaction or substitution, including whether or not there had been consumption of an alcoholic beverage or ingestion or administration of a drug, or both, by the defendant in connection with the offense. Provides that a wet reckless is punishable by imprisonment in a county jail for 5 to 90 days, or by a fine of $145-1,000, or both. (Veh. Code, §§ 23103, subd. (c); 23103.5, subd. (a).)

14) Requires a court to advise a person convicted of a DUI or a DUI causing bodily injury, or who pleads to a reckless driving conviction in satisfaction of, or as a

substitute for an original DUI charge, of the following: "You are hereby advised that being under the influence of alcohol or drugs, or both, impairs your ability to safely operate a motor vehicle. Therefore, it is extremely dangerous to human life to drive while under the influence of alcohol or drugs, or both. If you continue to drive while under the influence of alcohol or drugs, or both, and, as a result of that driving, someone is killed, you can be charged with murder." (Veh. Code, § 23593, subd. (a).)

15) Provides that any person who personally inflicts great bodily injury on any person other than an accomplice in the commission of a felony or attempted felony shall be punished by an additional and consecutive term of imprisonment in the state prison for three years. (Pen. Code, § 12022.7, subd. (a).)

16) Defines "great bodily injury," for purposes of the enhancement statute, as a significant or substantial physical injury. (Pen. Code, § 12022.7, subd. (f)(1).)

17) Prohibits the application of the great bodily injury enhancement to murder or manslaughter. Provides that the great bodily injury enhancement shall not apply if infliction of great bodily injury is an element of the offense. (Pen. Code, § 12022.7, subd. (g).)

This bill:

1) Increases the punishment for a person convicted of a DUI with two priors within 10 years of the current offense, from a misdemeanor to a wobbler, punishable either as a misdemeanor by imprisonment for 120 days to one year in county jail or as a jail-eligible felony by 16 months, two years, or three years, and by a fine of $390 to $1,000.

2) Increases the punishment and associated criminal sanctions for a person convicted of a DUI with four or more priors within 10 years of the current offense, as follows:

   a) Increases the punishment from a wobbler to a jail felony, punishable by 16 months, two years, or three years, and by a fine of $390 to $1,000.
   b) Extends the license revocation period from four years to five years, as specified.
   c) Extends the IID installation mandate from three years to four years.

3) Clarifies that the punishment and associated criminal sanctions that apply to a DUI with three or more priors apply only to a DUI with three priors.

Background

According to the most recent annual report on DUIs published by the California Department of Motor Vehicles (DMV), there were 110,017 DUI arrests in 2021. (DMV, *32nd Annual Report of the California DUI Management Information System* (Oct. 2025), summary statistics available at <https://www.dmv.ca.gov/portal/file/32nd-annual-report-dui-management-information-system-pdf .) For DUI arrests made in 2020, 74.7% of DUI convictions were for first-time DUIs, 19.2% for second-time DUIs, 4.6% for third-time DUIs, and 1.4% for fourth or subsequent DUIs. (*Id*. at p. 30.)

Alcohol-Involved Traffic Fatalities. Alcohol- and drug-impaired driving contribute significantly to traffic deaths and injuries in California. According to the California Office of Traffic Safety (OTS), 1,355 people were killed in alcohol-involved traffic crashes in 2023 in the state. (OTS, *California's Annual Report Fiscal Year 2025* (Mar. 2026), p. 8 <https://www.ots.ca.gov/wp-content/uploads/sites/67/2026/03/FY_2025_Annual_Report_Final.pdf ; OTS, *California Traffic Safety Quick Stats* available at <https://www.ots.ca.gov/ots-and-traffic-safety/score-card/ .) After a decade of increasing alcohol-involved crash fatalities, the latest data suggest this trend may be reversing. Like other fatal crashes, alcohol-involved crash fatalities decreased in California 4.5 percent between 2022 and 2023. (OTS, *Annual Report*, *supra*, at p. 8.)

Alcohol- and drug-involved crash fatalities (hereafter, "DUI crash fatalities"), which have historically comprised a significant portion of total crash fatalities, peaked at 2,065 in 2005, before declining to a multi-decade low of 1,416 in 2010. (DMV, *DUI Summary Statistics* <https://www.dmv.ca.gov/portal/dmv-research-reports/research-development-data-dashboards/dui-management-information-system-dashboards/dui-summary-statistics/ .) While DUI crash fatalities have steadily increased since then, DUI crash fatalities comprise an increasingly smaller proportion of total crash fatalities. In 2013, DUI crash fatalities were responsible for 54.7% of all crash fatalities. (*Ibid*.) That percentage dropped to 41.7% in 2021—the lowest proportion of total crash fatalities since 2001. (*Ibid*.)

This bill changes the state's DUI laws in two ways. First, it increases the punishment for a person convicted of a DUI with two priors from a misdemeanor to wobbler, punishable either as a misdemeanor by imprisonment for 120 days to

one year in county jail or as a jail felony by 16 months, two years, or three years, and by a fine of $390 to $1,000. Effectively, this gives prosecutors discretion to charge a person's third DUI within 10 years as a felony.

Second, it increases the punishment and associated sanctions for a DUI with four or more priors. A DUI with three or more priors may currently be punished as a wobbler. (Veh. Code, §§ 23550, subds. (a), (b).) This means that a person convicted of their fourth, fifth, or sixth DUI in ten years can still be charged with a misdemeanor. This bill makes a DUI with four or more priors a jail felony, punishable by imprisonment for 16 months, two years, or three years, and by a fine of $390 to $1,000. In other words, this change eliminates the misdemeanor option for the most serious category of repeat DUI offenders.

Additionally, this bill increases the associated license revocation term and IID installation term for a DUI with four or more priors. As previously noted, a conviction for a DUI with three or more priors results in four-year license revocation and a three-year IID mandate. (Veh. Code, §§ 13352, subd. (a)(7); 23550; 23575.3, subd. (h)(1)(D).) This bill extends the license revocation period for a DUI with four or more priors from four years to five years, as specified, and extends the IID installation mandate for this offense from three years to four years.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

Potentially major costs to the counties to incarcerate if punishment increases from a one year misdemeanor sentence to a wobbler or to a jail felony punishable by 16 months, two years, or three years and by a fine of $390 to $1,000. The average annual cost to incarcerate one person in county jail is approximately $80,000. In 2021 Los Angeles County budgeted $1.3 billion for jail costs with $90,000 per incarcerated person. Actual incarceration costs to counties will depend on the number of convictions and the length of each sentence. Generally, county incarceration costs are not reimbursable state mandates pursuant to Proposition 30 (2012).

Potentially significant costs to the courts to adjudicate new penalties. An eight-hour court day costs approximately $10,500 based on the hourly rate of court personnel including at minimum the judge, clerk, bailiff, court reporter, jury administrator, administrative staff, and jury per-diems. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would increase pressure to fund additional staff and resources. The

FY 2026-27 Budget appropriated $70 million General Fund for this purpose (Trial Court Trust Fund, General Fund).

Implementation will require the Department of Motor Vehicles (DMV) to make modifications to its core legacy information technology systems to create new court suspensions and update driving records accordingly. DMV is undertaking an enterprise modernization project, and resources are fully committed to the project. Coordinating implementation of this bill within the project could delay implementation and/or increase costs by requiring the services needed to be built outside the core legacy system.

The Motor Vehicle Account (MVA), the primary funding account for the DMV and the California Highway Patrol, is facing insolvency. The LAO has noted that, "Until a plan is put in place to address MVA's structural deficit, we recommend the Legislature set a high bar for considering approval of any proposals that create additional MVA cost pressures and accelerate the risk of insolvency." The proposed Governor's FY 2026-2027 Budget currently projects that the MVA will be insolvent as soon as FY 2028-29.

SUBJECT: Community colleges: exemption from nonresident tuition fee: College of the Siskiyous

SOURCE: College of the Siskiyous

DIGEST: This bill authorizes the College of the Siskiyous to (1) exempt all or some of its nonresident tuition fee for 200 students per academic year residing in specified counties in Oregon and (2) claim state apportionment funding for students qualifying for an exemption of nonresident tuition fees.

Senate floor amendments of 8/25/26 add language to avoid chaptering out issues with the section amended by this bill.

ANALYSIS:

Existing law:

1) Establishes the California Community Colleges (CCCs), a postsecondary education system in this state, under the administration of the Board of Governors (BOG), and specifies that the CCC system consists of community college districts (CCDs). (Education Code (EC) § 70900)

2) Authorizes the CCC BOG to enter into an interstate attendance agreement with any statewide public agency of another state that is responsible for public institutions of postsecondary education providing the first two years of college instruction, and that is an agency of a state that is a member of Western Interstate Commission for Higher Education (WICHE), which is a regional interstate higher education compact between 15 states in the western United States. (EC § 66801)

3) Authorizes a CCD to admit nonresident students and requires that these students be charged a tuition fee, with specified exemptions, and requires that CCDs use one of several statutorily outlined options for the calculation of the nonresident tuition fee. (EC § 76140)

4) Exempts no more than 200 students in any academic year from paying all or part of nonresident tuition fees if they attend the Lake Tahoe CCD and reside in specified communities in the State of Nevada. (EC § 76140)

5) Exempts, until January 1, 2028, no more than 150 full-time equivalent students (FTES) from paying all or part of nonresident tuition fees if they are low income students who are residents of Mexico who register for lower division courses at specified community colleges near the California-Mexico border and who reside within 45 miles of the California-Mexico border. (EC § 76140)

6) Prohibits nonresident students from being reported as FTES for state apportionment purposes, except for specified instances, which include: (1) the CCD has fewer than 1,500 FTES, is within 10 miles of another state, and has a reciprocity agreement with that state or participates in the Western Undergraduate Exchange (WUE) through WICHE; (2) if a CCD has between 1,501 and 3,000 FTES, is within 10 miles of another state, and has a reciprocity agreement with that state or participates in WICHE, the CCD can claim up to 100 FTES for state apportionment purposes; (3) the exemption for 200 students per academic years provided for Lake Tahoe CCD as specified in #4 above; and

(4) the exemption provided for 200 students per academic year who are Mexican residents living near the California-Mexico border specified in #5 above. (EC § 76140)

7) Provides that specified nonresident students exempted from paying nonresident tuition may be reported as resident FTES for purposes of state apportionment and are required to pay 1.5 times the amount of the fee established for residents. (EC § 76140)

This bill:

1) Authorizes the College of the Siskiyous to exempt all or some of its nonresident tuition fee for 200 students per academic year residing in the Oregon counties of Jackson County, Josephine County, and Klamath County.

2) Authorizes the College of the Siskiyous to claim state apportionment funding for students qualifying for an exemption of nonresident tuition fees and requires the College of the Siskiyous to charge these students a per-unit fee that is one and one-half times the fee for residents.

3) Requires that the governing board for the College of the Siskiyous adopt rules and regulations for determining a student's residence classification and for establishing procedures for an appeal and review of the residence classification.

4) Requires that a student will be determined to have residence in one of the specified Oregon counties if they have lived in the county for more than one year immediately before seeking the nonresident tuition fee exemption.

5) Requires that residence be determined pursuant to existing laws for the determination of student residence, as specified.

6) Adds language to avoid chaptering out issues with the section amended by this bill.

Comments

Need for the bill. According to the author, "along the California-Oregon border, residents see themselves not as Californians or Oregonians, but as one cross-border community. Residents of this bi-state community in Siskiyou County interact daily with neighboring Oregon communities for work, healthcare, commerce, and education. Recent data indicates 90 percent of community college students go to

college within 50 miles of their home. The CoS provides workforce programs that South Oregon University and nearby colleges cannot meet. … However, Oregon applicants face significantly higher costs due to nonresident tuition and the total cost of college—often paying up to ten times more than California residents.

The author continues, "Assembly Bill 1555 allows the CoS to enroll Oregon students as in-state students. … Current law already authorizes the Lake Tahoe Community College District to enroll an unlimited number of nonresident Nevada students in Lake Tahoe Community College as resident full-time equivalent students."

College of the Siskiyous' proximity to the California-Oregon border. The College of the Siskiyous, located in Weed, is the northern-most CCC in the system and therefore the closest to the California-Oregon border. The next closest CCC is Shasta College, which is located roughly 70 miles to the south in Redding.

The Oregon border is about 50 miles, or an hour, to the north of College of the Siskiyous. Josephine County, Jackson County, and Klamath County—the three counties specified in this bill—are three counties on the southern Oregon border. According to the college, these counties were selected for this bill based on past enrollment trends at the college. In academic year 2025-26, the College of the Siskiyous enrolled 61 students from these specific counties and 112 students from Oregon in total.

Student housing at College of the Siskiyous. The College of the Siskiyous currently has co-ed student housing for 154 residents and are single, double, or triple occupancy. According to the college, roughly 60% of students living in the college's current student housing are Oregon residents.

In addition, the 2022 Budget Act awarded a $32.6 million grant to College of the Siskiyous to construct new student housing as part of the Higher Education Student Housing Grant Program. As of May 2026, the 161-bed student housing project is scheduled to be completed in 2028, with the anticipation of a soft launch in spring 2028.

Reciprocity agreements and exchanges. The WUE is a program coordinated by the WICHE, and through the WUE, students from participating western states and territories from the WICHE may apply to enroll in college programs at a reduced tuition level. Existing law permits the College of the Siskiyous to annually serve a maximum of 100 FTES through WUE, which includes students from Oregon as

well as other western states. Currently, the College of the Siskiyous serves 50 FTES from Oregon through WUE.

In addition, the College of the Siskiyous has a reciprocity agreement with the state of Oregon, called the Oregon Exchange, that allows the college to admit up to 50 eligible students who are Oregon residents to attend the college at a discounted rate. The reciprocity agreement also includes offering in-state tuition to eligible California residents attending College of the Siskiyous and seeking to transfer to, and attend, Southern Oregon University or Oregon Institute of Technology. Currently, the College of the Siskiyous serves 50 students through the Oregon Exchange.

For both of these agreements in the 2025-26 school year, students pay $69 per unit (which is 1.5 times the resident fee) at the College of the Siskiyous instead of the out-of-state tuition of $338 per unit.

Similar exemptions provided in recent years. SB 605 (Gaines, Chapter 657, Statutes of 2015) provided a nearly identical statutory exemption for students residing in specified communities in Nevada from paying nonresident tuition fees while attending Lake Tahoe CCD, with a sunset date of July 1, 2022. SB 436 (Dahle, Chapter 573, Statutes of 2021) removed the sunset date for the specified exemption for Lake Tahoe CCD.

In addition, AB 91 (Alvarez, Chapter 796, Statutes of 2023) exempts a maximum of 150 FTES from paying all or part of their nonresident tuition fees if they are low income students who are residents of Mexico who register for lower division courses at specified community colleges near the California-Mexico border and who reside within 45 miles of the California-Mexico border. This exemption is provided until January 1, 2028.

This bill seeks a similar exemption for students residing in specified communities in Oregon from paying nonresident tuition fees while attending the College of the Siskiyous.

Related/Prior Legislation

AB 91 (Alvarez, Chapter 796, Statutes of 2023) exempts, until January 1, 2029, from the non-resident tuition fee, a non-resident, low-income student who is a resident of Mexico, registers for lower division courses at specified community colleges near the California-Mexico border, as defined, and has residence within 45 miles of the California-Mexico border.

AB 1998 (Smith, Chapter 495, Statutes of 2022) (1) authorizes the CCC BOG to enter into the WUE through WICHE; (2) allows small CCDs located near a bordering state to charge a lower tuition rate to out-of-state students from WUE participating states; and, (3) decreases the per-unit fee for eligible resident students from three to one and one-half times the amount established for resident students.

SB 436 (Dahle, Chapter 573, Statutes of 2021) removes the sunset date of provisions in current law, authorizing Lake Tahoe CCD to waive non-resident tuition fees and claim apportionment for a limited number of students residing in specified communities in the State of Nevada (in the Lake Tahoe Basin), thereby making the authorization permanent.

SB 605 (Gaines, Chapter 657, Statutes of 2015) exempts persons residing in specified communities in the State of Nevada from paying non-resident tuition fees if they attend Lake Tahoe CCD until July 1, 2022.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

The Chancellor's Office indicates that this bill would not result in additional Proposition 98 General Fund cost pressures since the College of the Siskiyous is already authorized to exempt nonresident students from the nonresident tuition fee and report these students as resident FTES for state apportionment purposes. Staff notes that to the extent the bill results in an increase in students above the statutory cap, this could lead to additional Proposition 98 General Fund costs under the Student Centered Funding Formula (SCFF). However, such increases may be funded through future SCFF growth budget allocations.

SUBJECT: Recovery housing: funding

SOURCE: Bay Area Council
Mayor Daniel Lurie, City and County of San Francisco

DIGEST: This bill codifies recovery housing eligibility for state homelessness funds provided the program complies with, among other specifications, the core components of Housing First.

ANALYSIS:

Existing law:

1) Defines "recovery housing", for purposes of specified funding programs administered by the Department of Corrections and Rehabilitation, as meeting the following requirements:

a) A recovery housing program participant shall sign an agreement upon entry that outlines the roles and responsibilities of both the participant and the program administrator to ensure individuals are aware of actions that could result in removal from the recovery housing program. Violations of the agreement shall not automatically result in discharge from the recovery housing program.

b) Efforts to link program participants to alternative housing options, including interim sheltering, permanent housing, or transitional housing, shall be documented. If a recovery housing program participant chooses to stop living in a housing setting with a recovery focus, is discharged from the program, or is removed from housing, the program administrator shall offer assistance accessing other housing and services options, including options operated with harm-reduction principles, and identifying an alternative housing placement.

c) The program administrator shall offer program participants who inform the program administrator that they are leaving the program one or more housing ore service options, as specified.

d) Specified annual reporting to track use of funding, including individuals service, demographics, and outcome data.

2) Establishes the California Interagency Council on Homelessness (Cal-ICH) with the purpose of coordinating the state's response to homelessness by utilizing Housing First practices. Requires agencies and departments administering state programs created on or after July 1, 2017, to incorporate the core components of Housing First. Defines "Housing First" to mean the evidence-based model that uses housing as a tool, rather than a reward, for recovery and that centers on providing or connecting homeless people to permanent housing as quickly as possible.

3) Defines, among other things, the "core components of Housing First" to mean:

a) Acceptance of referrals directly from shelters, street outreach, drop-in centers, and other parts of crisis response systems frequented by vulnerable people experiencing homelessness.

b) Supportive services that emphasize engagement and problem-solving over therapeutic goals and service plans that are highly tenant-driven without predetermined goals.

c) Participation in services or program compliance is not a condition of permanent housing tenancy.

d) Tenants have a lease and all the rights and responsibilities of tenancy, as specified.

e) The use of alcohol or drugs in and of itself, without other lease violations, is not a reason for eviction.

4) Establishes the Homeless Housing Assistance and Prevention Program (HHAPP) to provide funds to help local jurisdictions combat homelessness.

This bill:

1) Defines "recovery housing" as the same definition in (1) of the existing law section above, except that recovery housing shall extend to all state agency or housing funds for purposes of providing emergency shelter, interim housing, permanent housing, or housing-based services to people experiencing homelessness or at risk of homelessness, as specified. Applicants for state homelessness funding for recovery housing shall demonstrate the availability of a range of interventions within the jurisdiction, including harm-reduction-focused permanent housing.

2) Provides that a recovery housing program may be eligible for state funding if it meets all of the following requirements:

a) Satisfy the core components of Housing First.

b) Use substance use-specific, peer support, and physical design features that support individuals and families on a path to recovery from substance use disorders.

c) Emphasize abstinence.

d) Offer tenants permanent housing or program participants interim housing.

e) Provide nonclinical services that are participant driven and tailored to participant needs and facilitates voluntary access and linkages to licensed treatment providers and services.

f) Unless participation in recovery housing is court ordered, residency is initiated by the tenant or program participant the program participant is

offered at least one harm-reduction housing placement option and the resident chooses a recovery housing program instead of housing offering a harm-reduction approach.

g) Relapse is not, unless there is another lease violation, grounds for eviction from recovery housing and residents receive relapse support.

h) Support, and does not prevent or restrict, a resident's access to, or use of, medications prescribed for behavioral or physical health conditions, as specified.

i) Provide emergency preparedness and overdose prevention and response training to staff and residents and make overdose reversal medication available and readily accessible to staff and residents onsite.

j) Adopt and maintain a written return-to-use policy that is approved by an organization currently recognized as an affiliate of the National Alliance for Recovery Residences (NARR) for consistency with NARR best practices, or other similar entity. The return-to-use policy shall include all of the following:

   i) A clear articulation of the recovery housing's policy on the possession and use of alcohol, cannabis, and other controlled substances.

   ii) Contact information for treatment providers, mutual aid supports, and recovery coaches that can be contacted for additional support.

   iii) An explanation that the housing program's standard response to a resident's return to substance use will not be punitive in nature.

   iv) An explanation of the steps the housing program will take to address a resident's return to use.

   v) An explanation of actions by the resident that may result in eviction or discharge, including, but not limited to, repeated program violations.

   vi) An explanation that if a tenant of permanent housing or permanent supportive housing is no longer interested in living in the housing, or is at risk of eviction for violating the lease, the housing program shall allow the resident to reside in the housing until the operator secures the tenant another permanent housing placement option operated with harm-reduction principles that is also permanent housing and provides a

comparable level of supportive services. If the tenant rejects the offer of a housing placement option, the operator may evict the tenant.

vii) An explanation that if a program participant in an interim recovery housing program is no longer interested in living in the housing, or is at risk of discharge for violating the return-to-use policy, the housing program shall allow the program participant to remain in the residence until the operator secures the program participant placement in interim housing operated with harm-reduction principles that is also interim housing and provides a comparable level of supportive services. If the resident rejects the offer of another housing placement option, the operator may discharge the program participant.

k) Disclose applicable rules, behavioral expectations, participation requirements, and program policies to prospective residents or participants through lease agreements, intake materials, resident handbooks, program agreements, or other program documentation, as appropriate.

l) Requires the housing program to meet the requirements for a recovery housing program as defined in existing law.

3) Requires, if an unlawful detainer proceeding is initiated for an alleged violation of a lease provision agreement or program requirement, the housing program operator to submit documentation of the alleged lease violation to the local grantor of state funds. The local grantor shall submit a copy of the documentation and a summary of all alleged violations reported pursuant to this provision to the appropriate state agency that administers the housing funds, as specified.

4) Requires, if a program participant is discharged for an alleged violation of any program requirement, the facility operator to submit documentation of the alleged violation to the local grantor of state funds. The local grantor shall submit a copy of the documentation and a summary of all alleged violations reported pursuant to this provision to the appropriate state agency that administers the housing funds, as specified.

5) Provides that, for purposes of state and federal housing law, including, but not limited to, the federal Fair Housing Act and the federal Americans with Disabilities Act of 1990, a recovery housing program is a housing provider and not a treatment facility solely on the basis of providing nonclinical services.

6) Provides that participation in recovery housing programs and eligibility for state or local funding shall not be conditioned on requiring the recovery housing to provide clinical treatment services.

Background

Homelessness: stats and causes. According to the most recent point in time (PIT) count, 187,084 people were experiencing homelessness in California—representing 24% of the nation's homeless population. Two-thirds of the homeless population in California is unsheltered. Over half (51%) of all unsheltered people in the United States were in California. A lack of affordable housing is the biggest contributor to homelessness. As housing costs continue to rise, rent becomes less affordable for lower-income households, who are forced to live beyond their means (paying more than 30% of income on housing costs) or are pushed out of their homes, leading to rapid increases in homelessness. The need for, and costs of, housing have consistently outpaced the development of affordable housing for over 30 years.

Seeing results. Despite the sobering data, California's state investments and policy decisions are working. From 2023-2024, the nation as a whole experienced an increase in homelessness eight times larger than the increase in California. During the same period, California had the largest reduction in the number of veterans experiencing homelessness in the nation, with 1,279 fewer veterans experiencing homelessness on a single night in January in 2024 than in 2023 (8% reduction year over year). Furthermore, California had the largest reduction in the number of unaccompanied youths experiencing homelessness in the nation, with 1,121 fewer unaccompanied youth experiencing homelessness on a single night in January 2024 than in January 2023. Additionally, individual jurisdictions reported decrease in homelessness.

According to the UCSF Benioff Homelessness and Housing Initiative (UCSF Benioff), the reason for the reduction in veteran (and likely youth given set-asides for this population in specific programs) homelessness in California is because California has adequately scaled the evidence-based responses which include Housing First, and housing subsidies paired with appropriate services. State funds have also allowed California's homeless response providers to serve more people than ever before; for example, in 2024, providers served 356,660 Californians, over 20,000 more Californians than in 2023, and in the first half of 2025, providers served 265,716 Californians, including: 176,101 individuals and 88,373 people in families with children, of which 38,496 were unaccompanied youth.

Comments

1) *Federal and state guidance regarding recovery housing.* Recovery housing is a model that is abstinence-focused and offers peer supports for people recovering from substance abuse issues. These homes are not licensed or regulated by DHCS or any other state or local government. After treatment for substance abuse, whether by prison, hospital-based treatment programs, or therapeutic communities, many patients return to former high-risk environments or stressful family situations. Returning to these settings without a network of people to support abstinence increases chances of relapse. As a consequence, alcohol and substance use recidivism following treatment is high for both men and women. Recovery housing offers participants an option to live with other abstinence-focused residents while being offered supports through the recovery process.

   The U.S. Department of Housing and Urban Development (HUD) guidance for recovery housing or "sober living environment" (*e.g.*, the recovery housing programs contemplated in this bill) emphasizes the Housing First approach, but also recognizes the importance of providing "individual choice to support various paths towards recovery." Some people pursuing recovery from addiction express a preference for an abstinence-focused residential or housing program where they can live among and be supported by a community of peers who are also focused on pursuing recovery from addiction – environments that are provided by recovery housing programs. However, the HUD guidance states that supporting individual choice must also mean that a community is ensuring that housing options are available for people at all stages of recovery, including people who continue to use drugs or alcohol.[1] In other words, if a person chooses an abstinence-focused/sober living program and relapses, in order to comply with Housing First principles, the relapse alone should not be treated as an automatic cause for eviction or termination. Cal-ICH, the state's lead entity for coordinating state efforts to prevent and end homelessness, has provided similar guidance on how recovery housing can comply with Housing First core principles.[2]

[1] "Recovery Housing Policy Brief". (United States Department of Housing and Urban Development, December 2015). **https://files.hudexchange.info/resources/documents/Recovery-Housing-Policy-Brief.pdf**
[2] **Housing First and Recovery Housing Cal ICH Guidance**

2) *If at first you don't succeed…* Despite clear federal and state guidance, the sponsors are seeking statutory changes to allow for recovery housing. The two prior attempts to do this were AB 2893 (Ward, 2024) and AB 255 (Haney, 2025), though only AB 255 reached the Governor's desk. AB 255 was vetoed by the Governor; the veto message noted that recovery housing is already permitted under current law and encouraged the stakeholders to work with his administration moving forward.

   This bill attempts to codify the Cal-ICH Recovery Housing guidance by incorporating the 4 key components identified in that guidance (*e.g.,* alignment with housing first principles, person-centered care and harm reduction, participant choice, and eviction protections). It also incorporates critical, evidence-based guardrails designed to keep people stably housed while on the path to recovery; namely, program participants must choose recovery housing, relapse without other lease violations shall not be grounds for eviction, and residents must receive relapse support. Should a resident choose to leave the program or is at risk of eviction, the resident shall reside at the program until another housing placement is secured by the operator. Any eviction proceedings shall be reported to the grantor of the state funds, along with documentation for the alleged violation.

ARGUMENTS IN SUPPORT: According to the author, "[a]lthough housing that does not require sobriety works for thousands of people who are not yet ready to enter recovery housing, it does not work for everyone. There are thousands of people who want, and need, to live in a drug-free recovery environment, but access to this type of housing remains limited. As a result, many people are forced to live in housing that is not best suited to their recovery journey, increasing the risk of relapsing, overdose, and homelessness. AB 1556 recognizes that drug-free recovery housing is a critical component of the Housing First model and ensures these programs can access state funding while maintaining the recovery environments residents and families depend on."

ARGUMENTS IN OPPOSITION: A coalition of homelessness organizations are opposed unless amended to this bill. They note that recent Cal-ICH guidance already allows the state to fund recovery housing that is consistent with existing California law, making this bill unnecessary. They are also seeking amendments to either codify the guidance directly, or modify the language with specific provisions to ensure consistency with existing Housing First laws.

SUBJECT: Lobbyist certification

SOURCE: Author

DIGEST: This bill prohibits a person from serving as a lobbyist for 12 years after a conviction for a crime of public corruption.

Senate Floor Amendments of 8/12/26 resolve chaptering conflicts with AB 2592 (Pacheco).

ANALYSIS:

Existing law:

1) Regulates lobbyists through the Political Reform Act (PRA), including by requiring lobbying firms and lobbyist employers to register with the Secretary of State (SOS) and file periodic reports disclosing their activities.

2) Requires, as part of the registration process, that each lobbyist submit a lobbyist certification with the SOS. This certification shall include:

   a) A recent photograph;

   b) The full name, business address, and telephone number of the lobbyist;

c) A statement that the lobbyist understands the statutory gift limit; and

d) A statement that the lobbyist has or will complete an ethics course.

3) Specifies administrative, civil, and criminal penalties for violating provisions of the PRA, including making any person who knowingly or willingly violates the PRA guilty of a misdemeanor. Conviction of a misdemeanor under the PRA precludes a person from being a candidate for office or acting as a lobbyist for four years, unless the court at sentencing determines this provision is not applicable.

4) Prohibits a person from being a candidate for office or serving in elected office in California if the person has been convicted of a felony involving accepting, giving or offering to give any bribe, the embezzlement of public money, extortion or theft of public money, perjury, or conspiracy to commit any of these crimes.

This bill:

1) Prohibits a person from serving as a lobbyist for 12 years after a felony conviction for a crime of public corruption, defined in 4) of existing law. If a person is already a registered lobbyist and is convicted of such a crime, then the person's certification as a lobbyist shall be void upon the conviction, and the lobbyist is required to terminate their registration immediately upon conviction.

2) Requires a lobbyist certification submitted to the SOS to include a statement that the lobbyist has not been convicted of a crime of public corruption within the previous 12 years.

3) Prohibits the SOS from accepting a lobbying certification from a person who has indicated on the lobbying certification that they have been convicted of a crime of public corruption within the previous 12 years.

Background

Proposition 9, which appeared on the June 1974 ballot, created the PRA and established California's system of regulating lobbying activity, campaign finance, and conflicts of interest for public officials. Proposition 9 created the Fair Political Practices Commission (FPPC) to implement, administer, and enforce the PRA. The PRA regulates lobbyists, including requiring lobbying firms and lobbyist employers to register with the SOS and file periodic reports disclosing their activities.

The PRA requires any person who qualifies as a lobbyist, and thus works for a lobbying firm or a lobbyist employer, to submit a lobbyist certification and include a recent photograph of the lobbyist. The SOS makes a list, with photographs, of all lobbyists publicly available on its website, which also provides lists of registered lobbying firms and lobbyist employers. The SOS publishes a directory of registered individual lobbyists, lobbying firms, and lobbyist employers.

Comments

Author's Statement. Public trust in government depends on accountability and integrity in the policymaking process. California law already recognizes that certain crimes of public corruption, including offenses involving the misuse or theft of public funds, are serious enough to prevent someone from running for public office for life. Yet under current law, those same individuals can still register as lobbyists and be paid to influence the decisions of the Legislature. That double standard undermines public confidence in government. This bill closes this loophole by prohibiting individuals convicted of public corruption from serving as lobbyists in California.

If someone has been convicted of corrupting the public process, they should not be allowed to profit from influencing it. This bill is a commonsense step to restore integrity, strengthen transparency, and ensure that Sacramento holds lobbyists to the same ethical standard expected of those who seek elected office.

ARGUMENTS IN SUPPORT: Fresno County, the Fresno County District Attorney, the Fresno Chamber of Commerce, and the County of Inyo write in support of the bill:

> Over the years, our state has seen several high-profile cases in which individuals found guilty of public corruption-related charges continue working in an industry where public trust is essential. Allowing those facing such serious charges to lobby only encourages the problem. California cannot afford to let individuals with a record of unethical behavior influence policy and shape decisions that affect all Californians.
>
> [This bill] is a straightforward, common-sense reform that protects the integrity of our government. By keeping those with corruption charges out of the lobbying process, this bill will help to restore public trust, promote fairness, and ensure that decisions are guided by the public interest, not what benefits individuals with questionable morals.

ASSEMBLY FLOOR: 71-0, 5/21/26 - See last page for vote

SUBJECT: General plan: annual report: congregate and residential care for the elderly

SOURCE: Author

DIGEST: This bill allows cities and counties to include congregate housing for the elderly and residential care facilities for the elderly in their annual progress report (APR) and allows those units to count toward a portion of the jurisdiction's share of the regional housing need.

Senate Floor Amendments of 8/21/26 address chaptering issues with SB 1116 (Caballero).

ANALYSIS:

Existing law:

1) Provides that each community's fair share of housing be determined through the housing element cycle, which is composed of three main stages:

a) The Department of Finance and Department of Housing and Community Development (HCD) prepare a regional housing needs determination (RHND).

b) Councils of government (COGs) allocate the determined housing needs to local governments within the region through a regional housing needs allocation (RHNA) plan (where a COG does not exist, HCD makes the determinations).

c) Cities and counties incorporate their allocations into their housing elements.

2) Requires each city and county to adopt a housing element, which must contain specified information, programs, and objectives, including:

a) An assessment of housing needs and an inventory of resources and constraints relevant to the meeting of these needs.

b) A statement of the community's goals, quantified objectives, and policies relative to affirmatively furthering fair housing and to the maintenance, preservation, improvement, and development of housing.
A program that sets forth a schedule of actions during the planning period, and timelines for implementation, that the local government is undertaking to implement the policies and achieve the goals and objectives of the housing element.

3) Requires each jurisdiction to submit an APR to its legislative body, HCD, and the Governor's Office of Land use and Climate Innovation (GO-LUCI) by April 1 of each year that includes specified information, including progress in meeting its share of the regional housing need, a list of sites rezoned to accommodate allocation for each income level that could not be accommodated on sites identified in the housing element's sites inventory, and the number of net new units of housing that have been issued a completed entitlement, building permit, or certificate of occupancy and the income category that each unit satisfied.

This bill allows a city or county, beginning with the 7th housing element cycle, to include the number of units approved for congregate housing for the elderly and residential care facility for the elderly for up to 15% of the jurisdiction's RHNA for any income category, provided that these units were considered in the RHND applicable to the city or county.

Background

Housing Elements and RHNA. Each community's general plan must include ahousing element, which outlines a long-term plan for meeting the community's existing and projected housing needs. The housing element demonstrates how the community plans to accommodate its "fair share" of its region's housing needs. Following a staggered schedule, cities and counties located within the territory of a metropolitan planning organization (MPO) must revise their housing elements every eight years, and cities and counties in rural non-MPO regions must revise their housing elements every five years. These five- and eight-year periods are known as the housing element planning period.

Before each revision, each community is assigned its fair share of the region's housing need for four separate income categories (very low-, low-, moderate-, and above-moderate income households) through a two-step process known as RHNA. In the first step, HCD determines the aggregate housing need for the region during the planning period the housing element will cover. In the second step, the COG for the region allocates the regional housing need to each city and county within the region. The COG must come up with a regional housing needs plan, to further specific objectives such as affirmatively furthering fair housing, ensuring an equitable mix of housing throughout the region, and balancing jobs and housing.

In general, a housing element must identify and analyze existing and projected housing needs, identify adequate sites with appropriate zoning to meet its share of the RHNA, and ensure that regulatory systems provide opportunities for, and do not unduly constrain, housing development. Among other things, the element specifically must include an analysis of existing subsidized housing developments that are eligible to convert to market-rate rental housing upon the expiration of affordability restrictions, and identify all public resources.

As part of the process to identify adequate sites, a city or county first prepares an inventory of existing sites zoned for housing. When the inventory of existing sites is insufficient to accommodate the need for one or more income categories, the housing element must contain a program to rezone sites within the first three years of the planning period.

Each jurisdiction must submit an APR to HCD by April 1st of each year that documents its progress toward meeting its RHNA allocation and the plans outlined in its housing element.

Comments

Author's Statement. "Cities and counties are unable to count assisted living facilities towards their RHNA numbers; however, AB 1567 would encourage cities and counties to produce more assisted living as defined by Section 50062.5 of the Health and Safety Code, freeing up more homes to be available on the market for purchase by families. This is first and foremost a definition bill that authorizes the HCD to have a definition for assisted living for meeting RHNA goals for senior housing."

Permanent v. non-permanent units. Under current housing element law, RHNA only takes into account permanent units. However, non-permanent housing units, such as assisted living facilities and student dormitories may or may not be included depending on the type of housing unit offered. According to *California's Housing Future 2040: The Next Regional Housing Needs Allocation (RHNA)*, HCD recommends that the Department of Finance use a clear rule for categorizing developments that may include both group quarters and housing units. This bill attempts to address that recommendation by allowing congregate housing for the elderly and residential care facilities for the elderly to count for up to 15% of a jurisdiction's RHNA.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

HCD indicates that this bill would impose ongoing workload to collect, validate, and store reported data on congregate housing units or residential care facilities for the elderly, and provide technical assistance to local agencies, as well as one-time costs to update the housing element APR form and to update IT systems. HCD notes that there are multiple pending bills that would impact APR requirements, and that if several such bills are enacted, total costs would be in the hundreds of thousands of dollars. Staff estimates that workload directly attributable to this bill would likely exceed $50,000, and could be as high as $150,000 if no other APR bills are enacted and HCD would still be responsible for one-time fixed costs to update forms and IT systems, and to provide ongoing data collection and technical assistance services.

SUBJECT: California Interscholastic Federation: officials: registration, certification, and eligibility verification

SOURCE: Author

DIGEST: This bill requires the California Interscholastic Federation (CIF) to require its officials to annually register through a platform selected by the CIF to verify the official's eligibility to officiate CIF contests, which will, until July 1, 2028, include a statewide and standardized background screening and, commencing July 1, 2028, will include a record of a valid Activity Supervisor Clearance Certificate (ASCC) issued by the Commission on Teacher Credentialing (CTC).

ANALYSIS:

Existing law:

1) States that the CIF is a voluntary organization that consists of school and school-related personnel with responsibility for administering interscholastic athletic activities in secondary schools. (Education Code (EC) § 33353)

2) Requires the CIF to report to the appropriate policy committees of the Legislature and the Governor on its evaluation and accountability activities on or before January 1, 2023, and on or before January 1 every seven years thereafter, and shall include, but not be limited to, the goals and objectives of the CIF with regard to, and the status of, all of the following:

   a) The governing structure of the CIF, and the effectiveness of that governance structure in providing leadership for interscholastic athletics in secondary schools.

   b) Methods to facilitate communication with agencies, organizations, and public entities whose functions and interests interface with the CIF.

   c) The quality of coaching and officiating, including, but not limited to, professional development for coaches and athletic administrators, and parent education programs.

   d) Gender equity in interscholastic athletics, including, but not limited to, the number of male and female pupils participating in interscholastic athletics in secondary schools, and action taken by the CIF in order to ensure compliance with Title IX of the federal Education Amendments of 1972 (20 United States Code (USC) § 1681 et seq.).

   e) Health and safety of pupils, coaches, officials, and spectators.

   f) The economic viability of interscholastic athletics in secondary schools, including, but not limited to, the promotion and marketing of interscholastic athletics.

   g) New and continuing programs available to pupil athletes.

   h) Awareness and understanding of emerging issues related to interscholastic athletics in secondary schools. (EC § 33353)

3) Authorizes a community youth athletic program to request state and federal level criminal history information from the California Department of Justice (DOJ) for a volunteer coach or hired coach candidate. (Penal Code § 11105.3)

4) Requires, commencing January 1, 2016, a community youth athletic program to provide written notice to the parent or guardian of any youth participating in the program regarding the program's policies relating to whether the program obtains criminal background checks for hired and/or volunteer coaches. Defines a community youth athletic program as an organization for which the primary purpose is the promotion or provision of athletic activities for youth under 18 years of age and which has adult employees who have supervisory or disciplinary power over children. (Business and Professions Code § 18900)

5) Requires any entity that has a contract with a local educational agency (LEA) to ensure that any employee who interacts with pupils, outside of the immediate supervision and control of the pupil's parent or guardian or a school employee, has a valid criminal records summary. Requires, when the contracting entity performs the criminal background check, the entity to immediately provide any subsequent arrest and conviction information it receives to any LEA that it is contracting with pursuant to the subsequent arrest service. (EC § 45125.1)

6) Requires all noncertificated candidates, prior to assuming a paid or volunteer position to work with pupils in a pupil activity program sponsored by a school district, to obtain an ASCC from the CTC. Indicates that a "pupil activity program" sponsored by a school district includes, but is not limited to, scholastic programs, interscholastic programs, and extracurricular activities sponsored by a school district or school booster club. (EC § 49024)

7) Requires the CTC to issue an ASCC to candidates serving in a specified position upon verification of the candidate's personal identification and verification that the candidate meets all specified professional requirements. (EC § 44258.7)

8) Requires that an ASCC be issued initially for a five-year period and may be renewed, and requires that the CTC establish a fee for the ASCC. (EC § 44258.7)

9) Excludes from the definition of an "employee" a person, other than a regular employee, performing services as a sports official, as defined, for an entity sponsoring an intercollegiate or interscholastic sports event, or any person

performing services as a sports official for a public agency, public entity, or a private nonprofit organization sponsoring an amateur sports event. Defines a "sports official" as including an umpire, referee, judge, scorekeeper, timekeeper, or other person who is a neutral participant in a sports event. (Labor Code § 3352)

This bill:

1) Requires the CIF to require its officials to annually register through a platform selected by the CIF to verify the official's eligibility to officiate CIF contests.

2) Requires the platform to consist of all of the following components:

   a) Until July 1, 2028, a statewide and standardized background screening, and commencing July 1, 2028, a record of a valid ASCC issued by the CTC, including the applicable expiration date.

   b) A record of rules tests, online training modules, sport-specific annual certifications, and continuing education requirements.

   c) A record of liability insurance coverage.

3) Requires, commencing July 1, 2028, that the CTC regularly publish a list on its internet website of ASCC holders who have their certificate suspended or revoked by CTC.

4) Requires the CIF, through its chosen platform, to verify that all specified components are complete before an official is deemed and marked as eligible to receive an assignment to officiate.

5) Requires that CIF complete the specified verification annually until July 1, 2028, and requires, commencing July 1, 2028, that the CIF maintain the platform and, as part of the verification requirement, ensure that the chosen platform regularly reviews the list published by the CTC in order to update the eligibility of the officials whose ASCC has been suspended or revoked.

6) Authorizes that only officials who are deemed eligible in the selected platform be assigned to CIF contests by assignors or officiating associations.

7) Requires the CIF to ensure that its participating member schools, school districts, county offices of education, and charter schools can access the platform to verify the eligibility of an official, but shall not have access to the sensitive information in each individual component of the platform.

8) Prohibits the CIF from being considered an employer of officials.

Comments

Need for the bill. According to the author, "AB 1572 is necessary to ensure that California's student athletes compete in safe, fair, and well-regulated environments. By establishing a consistent standard for CIF officials, we can give schools and parents confidence that officials assigned to games are qualified and accountable. This measure will also promote greater transparency and consistency across leagues, reducing uneven enforcement of rules. Ultimately, it strengthens the integrity of high school athletics and reinforces a commitment to protecting the well-being of every student athlete."

CIF's structure and role in interscholastic athletics. The CIF, founded in 1914, is a voluntary organization consisting of over 1,600 public, public charter, and private high schools and over 750,000 student-athletes, for the purpose of governing education-based athletics in grades 9 through 12. Almost all public and private high schools in California are CIF members. The CIF is organized under the California Department of Education (CDE), and CDE has allowed the CIF to regulate interscholastic athletics and be the rulemaking body for these programs.

The CIF consists of ten regional sections, each of which is divided into several local leagues, for purposes of developing sports, scheduling athletic contests, and assigning referees. Each league elects a representative to their respective CIF section's governing body, which is called a Board of Managers or Council. Each CIF section's governing body elects officers, establishes section policies, develops section playoff sports and schedules, and CIF members adhere to these rules and regulations adopted by their section.

This bill creates requirements for game officials for CIF contests, and game officials are not considered employees of CIF or schools. This bill requires officials to annually register for a platform selected by the CIF to verify the official's eligibility to officiate CIF contests, including having done fingerprinting and a criminal background check as well as that official having liability insurance coverage.

Existing law excludes sports officials from being considered employees of an entity sponsoring an interscholastic sports event, or any person performing services as a sports official for a public agency or public entity, and according to CIF, these sports officials are considered independent contractors. There are associations of officials and referees that are accredited by CIF and organized by region and sport, and as mentioned above, CIF consists of ten regional sections, which are divided into local leagues, and the local leagues assign referees and officials to CIF games. These officials are paid and generally have liability insurance coverage, either individually or through an officials' or referees' association.

CIF is rolling out a similar statewide eligibility program for officials. In July 2025, CIF launched a new statewide registration and eligibility process for all high schools called the CIF Officials Registration Program. Officials can pay $29 to register through a platform to begin the process of becoming CIF-eligible, and the system will streamline background checks, standardize qualifications, and simplify access to cost effective insurance coverage through a centralized structure. The program is voluntary in 2025-26 and will become mandatory beginning in 2026-27. This bill creates a very similar process, with the notable exception of requiring officials to obtain an ASCC from the CTC, which is considered a higher level of screening than a background check. According to CIF, other states have similar systems for game officials, including Massachusetts, Illinois, and New Jersey.

What is an ASCC? When AB 1572 was introduced, the bill required CIF to require that its officials who have undergone a background screening would be deemed eligible to receive an assignment to officiate. The most recent version of this bill ensures a greater level of security screening for officials and requires CIF, starting July 1, 2028, to require that its officials have a record of a valid ASCC issued by the CTC before being deemed and marked as eligible to receive an assignment to officiate.

According to the CTC, an individual obtaining an ASCC from the CTC must obtain fingerprint clearance through a criminal background check completed by the DOJ and the Federal Bureau of Investigation. This is considered a higher level of screening than a background check. Existing law already requires non-certificated individuals, prior to starting a paid or volunteer position working with pupils in a student activity program sponsored by the school district or county office of education, to obtain an ASCC from the CTC.

The sole purpose of the ASCC is to provide verification that the holder has completed the professional fitness review before being placed in a position

working with pupils in a pupil activity program, and a pupil activity program may include interscholastic programs. Here are a few features of the ASCC as it relates to the implementation of this bill:

- The ASCC is not limited to one employing agency but may be used in all California public school districts, which makes it a valuable certification for game officials working across multiple school districts.

- The CTC charges a $100 fee on a rolling five-year basis for the ASCC.

- In renewing the ASCC, if an individual maintains their certificate and renews in a timely manner, they would not need to repeat fingerprinting.

- The initial fingerprinting allows the CTC to continuously receive official criminal history records in the case that a certificate holder is arrested.

- According to the CTC, when there are no delays in fingerprint information being received, and no flags on an applicant's background that require investigation, ASCC applications are granted within 10 business days from receipt. However, if there is misconduct that needs to be investigated, processing may take longer, and timing depends on the specific investigation.

- According to CIF, this bill delays the requirement that game officials obtain an ASCC from January 1, 2027 to July 1, 2028 because that gives additional time for CIF to ensure that their platform interfaces with CTC's list of ASCC holders who have their certificate suspended or revoked. In the meantime, game officials would still be required to receive a statewide and standardized background screening.

Related/Prior Legislation

AB 465 (Bonilla, Chapter 146, Statutes of 2013) specifically provides that a community youth athletic program can request state and federal level criminal history information from the DOJ for a volunteer or paid coach.

AB 346 (Conway, Chapter 52, Statutes of 2010) provides that the requirement to obtain an ASCC is applicable to a paid or volunteer position to work with pupils in a pupil activity program sponsored by a school district.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The CTC estimates General Fund costs of $625,000 each year to hire additional analytical and legal staff to manage the additional screenings, case intake, and misconduct caseload.

- The costs for the CIF to oversee the registration platform and verification process are expected to be minor and absorbable.

- The Department of Justice does not anticipate a significant fiscal impact as a result of this bill.

SUBJECT: Lanterman Developmental Disabilities Services Act

SOURCE: The Arc and United Cerebral Palsy California Collaboration

DIGEST: This bill updates terminology throughout the Lanterman Developmental Disabilities Services Act (Lanterman Act).

Senate Floor Amendments of 8/21/26 cleanup language used throughout the Welfare and Institutions Code and other relevant code sections and reinstate codified language that would have been struck or amended by this bill.

ANALYSIS:

Existing law:

1) Establishes the Lanterman Act, which states that California is responsible for providing a range of services and supports sufficiently complete to meet the needs and choices of each person with developmental disabilities, regardless of age or degree of disability, and at each stage of life, and to support their integration into the mainstream life of the community. (Welfare and Institutions Code [WIC] § 4500 et seq.)

2) Defines "developmental disability" as a disability that originates before an individual attains 18 years of age, continues, or can be expected to continue, indefinitely, and constitutes a substantial disability for that individual. As defined by the Director of the Department of Developmental Services (DDS), in

consultation with the Superintendent of Public Instruction, this term shall include intellectual disability, cerebral palsy, epilepsy, and autism. This term shall also include disabling conditions found to be closely related to intellectual disability or to require treatment similar to that required for individuals with an intellectual disability, but shall not include other handicapping conditions that are solely physical in nature. (WIC § 4512(a)(1))

3) Adds criteria for a child under five years of age who does not meet the definition of developmental disability under (2) to receive regional center services:

   a) Provides that a child who is under five years of age shall be provisionally eligible for regional center services if the child has a disability that is not solely physical in nature and has significant functional limitations in at least two areas of major life activity, as specified. Provides that a child is not required to have one of the developmental disabilities listed in (2) to be provisionally eligible. Provides that a child who is provisionally eligible shall be reassessed at least 90 days before turning five years of age, and the child must meet the definition of developmental disability set forth in (2) to continue to be eligible for regional center services at five years of age.

   b) Provides that an infant or toddler referred for early intervention services may be concurrently assessed, if appropriate, to determine whether the infant or toddler is provisionally eligible for regional center services or eligible for regional center services if they have a developmental disability pursuant to (2). If the regional center determined that the infant or toddler qualifies for early intervention services from the regional center but has not been found to have a developmental disability pursuant to (2) or to be provisionally eligible, the regional center shall assess the child at least 90 days prior to the date that they turn three years of age for purposes of determining their eligibility for regional center services. If the regional center determines the child is not eligible, the regional center shall give adequate notice, as specified. (WIC § 4512(a)(2–4))

4) Defines “consumer” as a person who has a disability that meets the definition of developmental disability. (WIC § 4512(d))

5) Establishes a system of nonprofit regional centers, overseen by DDS, to provide fixed points of contact in the community for all persons with developmental disabilities and their families to coordinate services and supports best suited to them throughout their lifetime. (WIC § 4620)

This bill:

1) Updates the word "consumer" to "person eligible for regional center services" throughout the Lanterman Act when referring to a person found eligible for and/or receiving regional center services.

2) Updates the word "consumer" to "person seeking services from a regional center" throughout the Lanterman Act in sections related to intake where a person has not yet been assessed for eligibility for regional center services.

3) Updates the following terms throughout the Lanterman Act:

   a) Changes "native language" to "preferred language".

   b) Changes "state hospital" to "developmental center".

   c) Changes "hospital director" to "developmental center director".

   d) Changes "patient" to "resident" of a state institution.

   e) Changes "the developmentally disabled" to "people with developmental disabilities".

4) Provides that any section of any act enacted by the Legislature during the 2026 calendar year that takes effect on or before January 1, 2027, that amends, renumbers, adds, or repeals a section included in this bill shall prevail over this bill, whether that act is enacted before or subsequent to the enactment of this bill.

Background

Purpose of the Bill. According to the author, "Adults with disabilities continue to experience discrimination in education, employment, and healthcare settings. These challenges predictably result in reduced access to care and more limited opportunities, creating an often inescapable cycle of frustration for families trying to navigate the system. Shifting away from the use of harmful language will help in eliminating this stigma. AB 1575 updates the Lanterman Act to ensure consistent use of person-first language, emphasizing each person's humanity and moving away from stigmatizing language."

Lanterman Act. In 1969, the Lanterman Act established that individuals with developmental disabilities and their families have a right to receive the necessary services and supports required to live independently in the community. The Lanterman Act enumerates the rights of individuals with developmental

disabilities, as well as the rights of their families, what services and supports are available to these individuals, and how regional centers and service providers work together to provide these services and supports. The term "developmental disability" is defined as a disability that originates before a person reaches 18 years of age, is expected to continue indefinitely, and is a significant disability for the individual. Such disabilities include, among others: epilepsy, autism spectrum disorder, intellectual disability, and cerebral palsy.

In addition to establishing the rights of individuals, the Lanterman Act also created California's regional center system, comprised of 21 nonprofit regional centers throughout the state whose primary purpose is to connect individuals with services in the community. The Department of Finance estimates that approximately 487,114 individuals will receive developmental services in 2025–26, increasing to 526,848 in 2026–27.

Person-First and Identity-First Language. Person-first or people-first language refers to a person before describing their disability or condition. Person-first language is meant to humanize the person and de-stigmatize their condition. Some examples of person-first language include: person with autism, person experiencing homelessness, or person with a substance use disorder. Identity-first language refers to a person's identity first. Identity-first language is preferred by some self-advocates and disability advocates because it recognizes the identity as an inherent part of the person. Some examples of identity-first language include: Autistic person, Deaf person, or Indigenous person. While there is no one-size-fits-all choice between person-first or identity-first language across all groups and identities, advocates and experts agree that offensive and othering language should not be used. Examples include outdated or condescending terms or descriptions, slurs, using adjectives as nouns (nominalization), and language that implies deficiency or restriction.

Social Science & Medicine, a journal that publishes peer-reviewed original research, published an article in December 2024 entitled "Person-first and identity-first disability language: informing client centered care". The article was based upon a survey of 875 people, ages 14 to 89, on their self-reported health condition and use of person-first and identity-first language. The researchers published the following findings, among others:

- 94.4% of participants were aware of person-first and identity-first language.
- When referring to oneself, 42.4% of participants preferred identity-first language, while 34.1% of participants reported using person-first language, and 23.7% used both interchangeably.

- When referring to others, 39.4% of participants reported using person-first language, while 26.6% of participants reported using identity-first language, and 34.0% used both interchangeably.

- People who reported using person-first language were more likely to be older, while people who reported using identity-first language were more likely to be younger.

- Preference for person-first versus identity-first language varied by disability. The survey included the following disability categories: nervous system, neurodevelopmental, developmental anomaly, mental health, musculoskeletal, hearing, digestive, pain, vision, and other/undisclosed.

The article concluded that use of person-first language appears to be more appropriate than identity-first language for all settings, including healthcare, education, media, the general public, and among people with a disability or health condition. The article also described an "ingroup-outgroup" phenomenon where identity-first language may be acceptable among people with a disability or health condition but less acceptable when used by third parties.

This bill replaces the term "consumer" throughout the Lanterman Act with "person eligible for regional center services" or "person seeking services from a regional center". This bill also replaces "the developmentally disabled" with "people with developmental disabilities".

Comments

This bill adopts person-first language by changing the term "consumer" throughout the Lanterman Act to "person eligible for regional center services", or "person seeking services from a regional center" when a person's eligibility has not yet been assessed. According to this bill sponsor, the term "consumer" implies a commercial relationship between a person and the developmental services system, which is not a proper representation of services and supports provided under the Lanterman Act. This bill would not affect a person's eligibility for, or receipt of, services and supports under the Lanterman Act. This bill also updates other terminology in the Lanterman Act, such as changing "native language" to "preferred language".

Related/Prior Legislation

AB 162 (Committee on Budget, Chapter 47, Statutes of 2024), a budget trailer bill, amended the definition of "developmental disability" to allow a regional center to

concurrently assess an infant or toddler referred for early intervention services for provisional eligibility or full eligibility for regional center services.

SUBJECT: Pupils: data reporting: American Indian and Alaska Native pupils

SOURCE: Soboba Band of Luiseño Indians

DIGEST: This bill requires the California Department of Education (CDE), beginning on July 1, 2028, to annually post statewide aggregate educational outcome data for the prior school year for American Indian or Alaska Native (AI/AN) pupils, as defined, on the CDE's website, including, but not limited to, the number of pupils, the academic achievement of pupils, and the rate of suspension, expulsion, and chronic absenteeism of pupils.

ANALYSIS:

Existing law:

1) Establishes a longitudinal data system known as the California Longitudinal Pupil Achievement Data System (CALPADS) to:

   a) Provide school districts and the CDE access to data necessary to comply with federal reporting requirements.

   b) Provide a better means of evaluating educational progress and investments over time.

c) Provide local educational agencies (LEAs) with the data needed to improve pupil achievement, including college and career readiness.

d) Provide an efficient, flexible, and secure means of maintaining longitudinal statewide pupil level data between and among the state's educational segments and operational tools, as defined.

e) Facilitate the ability of the state to publicly report data.

f) Ensure that any data access provided to researchers, as required, is provided only to the extent that the data access is in compliance with the federal Family Educational Rights and Privacy Act of 1974. (Education Code (EC) § 60900)

2) Requires, pursuant to the federal Every Student Succeeds Act, specified LEAs to consult with appropriate officials from American Indian tribes or tribal organizations approved by the tribes located in the area served by the LEA prior to its submission of a required plan or application for a covered program under the Act. (United States Code, Title 20 § 7918)

3) Establishes the California American Indian education centers program to serve as community-based educational resource centers for American Indian pupils, parents, guardians, and public schools in order to promote the academic and cultural achievement of American Indian pupils. (EC § 33381)

4) Encourages LEAs to form California Indian Education Task Forces with California Indian tribes local to their region or tribes historically located in the region. (EC § 33391)

5) Requires the CDE, by June 1, 2022, in collaboration with, and subject to the approval of, the executive director of the State Board of Education, to use specified funding to enter into a contract with a county office of education (COE) or a consortium of COEs for the purposes of developing a model curriculum related to Native American studies by September 1, 2025. Requires that the model curriculum be housed on the platform developed and maintained by the California History-Social Science Project. (EC § 51226.9)

This bill:

1) Defines "pupils", for purposes of this bill, as pupils who identify as AI/AN only, and pupils who identify as AI/AN in addition to another race or ethnicity.

2) Requires the CDE, beginning with July 1, 2028, to post statewide aggregate educational outcome data for the prior school year for AI/AN pupils, as specified, on CDE's website every year on July 1, which includes:

   a) The number of pupils.

   b) The academic achievement of pupils, as determined by quantitative data currently collected.

   c) The rate of suspension and expulsion of pupils.

   d) The rate of chronic absenteeism of pupils.

   e) The four- and five-year cohort graduation rates of pupils.

3) Requires CDE to use data, where appropriate, reported pursuant to existing law to meet the requirements of this bill.

4) Makes findings and declarations related to the importance of accurate identification of AI/AN pupils in California.

Comments

1) *Need for the bill.* According to the author, "Due to federal guidelines, California is undercounting almost 90% of its Native American students. That is a grave and obscenely ridiculous undercount of a population that is severely underserved. The undercount results in inadequate allocation of resources to serve these students with the culturally responsive programs they need to succeed and thrive in school and broader community. Our state should not continue a centuries-old tradition of neglect or worse to its First People. By requiring this report, we can utilize an inclusive count of Native students on important metrics which could help inform policy decisions."

2) *A 2023 report highlighted issues with accurate representation of AI/AN national and state pupil data, which is collected and reported based on federal guidelines and standards.* A 2023 report by the American Institutes for Research (AIR) and the Indigenous Education State Leaders Network (IESLN)—called "Indigenous Students Count: A Landscape Analysis of

American Indian and Alaska Native Student Data in U.S. K–12 Public Schools"—found that though Indigenous students in the country are estimated to be about 1% of the K–12 student population in public schools, the "undercounting of Indigenous students may be as high as 70% nationwide." The author has indicated that this bill is aimed at addressing the findings of this report.

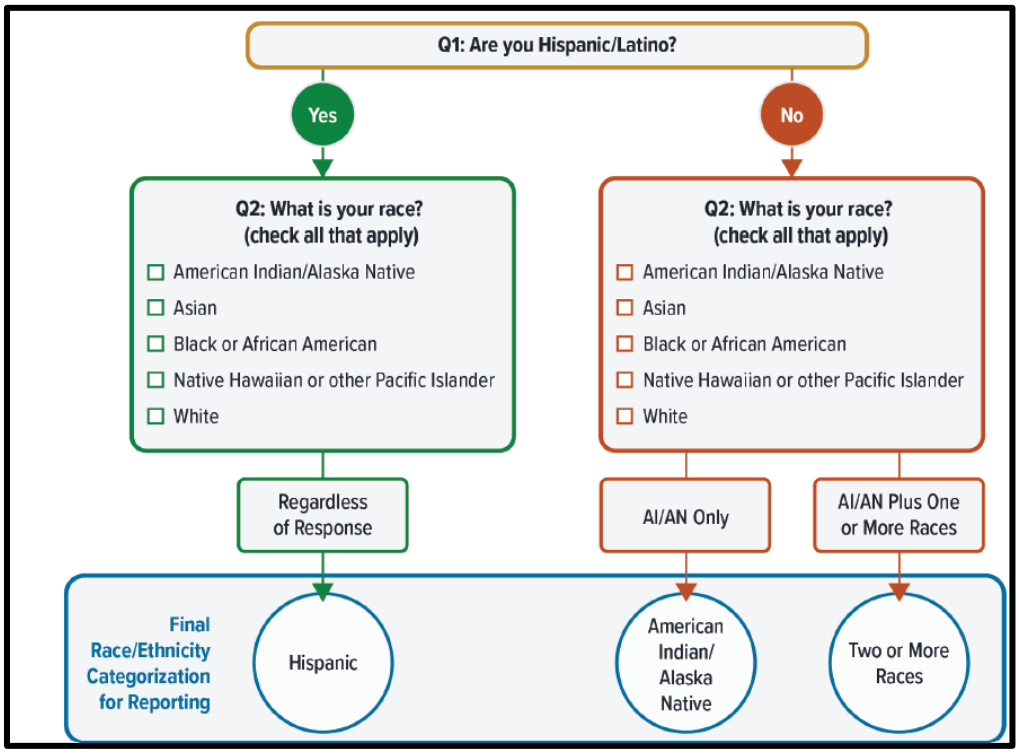
3) *Report focuses on two issues for accurately representing AI/AN pupils in national and state data.* The AIR and IESLN report states that in the K–12 public education system, race and ethnicity data are collected and reported using guidelines adopted by the U.S. Department of Education (USDE) in 2007 and aligned with the Office of Management and Budget's (OMB's) 1997 standards. Specifically, in 1997, the OMB introduced the following format known as the "two-part question":

   - Are you Hispanic or Latino?
   - What is your race? (check all that apply)

   The report indicates two primary mechanisms for which AI/AN pupils are underrepresented in national and state data (see the graphic below from the report for a visual representation of this undercount):

   - For a parent or guardian of a pupil answering "yes" to the first part of the "two-part question", then *the pupil is considered Hispanic or Latino regardless of how they answer the question about race*. This means an AI/AN pupil who also identifies as Hispanic or Latino is included as part of the count of Hispanic or Latino pupils and is not recorded as AI/AN in demographic data.

   - For a parent or a guardian of a pupil answering "no" to the first part of the "two-part question", but identifying two or more races, then *the pupil is considered in the "two or more races" category only.* This means a pupil who identifies their race as both AI/AN and White is part of the count of multi-racial pupils and is not recorded as AI/AN in demographic data.



The report indicates that a more "inclusive" definition of AI/AN would count students who are indicating that their race is AI/AN, even if they are also indicating they are Hispanic or Latino or if they identify as multi-racial.

4) *The federal government planned changes in March 2024 to its collection and reporting of federal data on race and ethnicity, but implementation has stalled under the current Administration.* Beginning in June 2022, the OMB began working on a set of revisions to its Statistical Policy Directive No. 15 (SPD 15), which are its standards for maintaining, collecting, and presenting federal data on race and ethnicity, to develop recommendations for improving the quality and usefulness of federal race and ethnicity data. These revisions would be the first to SPD 15 since 1997. By March 2024, the OMB published key revisions to SPD 15, including:

   a) Using one combined question for race and ethnicity (instead of the "two-part question"), and encouraging respondents to select as many options as apply to how they identify.

   b) Adding Middle Eastern or North African as a new minimum category. (The new set of minimum race and/or ethnicity categories would be: AI/AN; Asian; Black or African American; Hispanic or Latino; Middle Eastern or North African; Native Hawaiian or Pacific Islander; and White.)

c) Requiring the collection of additional details beyond the minimum required race and ethnicity categories for most situations, to ensure further disaggregation in the collection, tabulation, and presentation of data when useful and appropriate.

One of the primary goals of SPD 15 is to ensure consistent and comparable race and ethnicity data across the federal government. To help meet that goal, the revisions to SPD 15 instruct federal agencies to begin updating their surveys and administrative forms as quickly as possible, and federal agencies were given until 2029 to adopt these changes, ahead of the 2030 Census. However, according to the CDE, guidance that the USDE had intended to send to state educational agencies in September 2025 was indicated to be delayed due to the federal shutdown. It is currently unclear when CDE and other state educational agencies will receive updated guidance on SPD 15 from the federal government, which would govern data collection and reporting of these data, especially given the significant reductions in force at USDE and the President's plans to abolish the department.

Moreover, according to a December 2025 article from National Public Radio, the OMB stated that the Administration has started a new review of the SPD 15 standards and how the 2024 revisions were approved, signaling the possibility that the Administration may not adopt the 2024 revisions to SPD 15 for federal government data more broadly.

5) *Federal guidelines ultimately dictate how race and ethnicity data is collected by the states.* The author identifies an important issue regarding how AI/AN data is counted and how the current rules aggregating the data can lead to a misrepresentation or underrepresentation of AI/AN data, especially given how that data informs federal program allocations.

Due to federal guidelines on how states must collect and report data related to race and ethnicity, the State of California is limited in how it can address this problem from a data collection and reporting standpoint, specifically. Federal guidelines exist, in part, because of a desire for the data to be comparable across states and to build a national dataset with all states using the same standards. The AIR and IESLN report highlights a national problem that points to federal requirements as its root cause, not a problem that is specific to what the state is doing or that the state could fix on its own. If the State of California decided to deviate from federal guidelines (i.e., not ask the "two-part question"), the state

would be out of compliance, which could put federal funds for CDE at risk. Absent changes at the federal level, state legislation would not be able to ultimately change how these data are collected and reported to address the underrepresentation of AI/AN pupils that is referenced in the 2023 report.

However, even if data collection and reporting is subject to federal guidelines, CDE and districts can still look at underlying data to shine a light and report on data using other definitions of race and ethnicity data, including for AI/AN pupils. This bill attempts to do that by requiring CDE to post statewide aggregate educational outcome data for AI/AN pupils, by using a revised definition of AI/AN pupils that is considered more inclusive.

For an example of how this may work, AI/AN pupils—whose data is currently reported to the federal government as Hispanic or Latino or as multi-racial—would be included in the CDE's annual post of statewide educational outcome data on AI/AN pupils, which would be more consistent with the recommendations of the 2023 report.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee on the version of this bill amended on March 23, 2026:

The CDE estimates General Fund costs of $610,000 each year and 4.0 positions for data collection, the ongoing monitoring and management of tribal information within CALPADS, and providing ongoing technical assistance to LEAs.

SUBJECT: Opioid overdose reversal medication: school resource officers

SOURCE: California Association of Alcohol and Drug Program Executives, Inc.

DIGEST: This bill (1) requires school resource officers (SRO), commencing with the 2027–28 school year, and at least every two years thereafter, to complete opioid overdose recognition and response training that is approved by the Commission on Peace Officer Standards and Training (POST) or the Board of State and Community Corrections (BSCC); (2) clarifies existing authorizations and liability protections for SROs to administer emergency opioid antagonists to persons believed to be experiencing an opioid overdose; (3) requires SROs to annually report on opioid antagonist usage, as specified; and (4) requires California Department of Public Health (CDPH) to submit a report to the Legislature on the SRO reported information.

ANALYSIS:

Existing law:

1) Requires county offices of education (COEs) to purchase and distribute at least two units of emergency opioid antagonists to each middle school, junior high school, high school, and adult school schoolsite within their jurisdiction. Requires at least two staff members per schoolsite be trained to administer emergency opioid antagonists. (Education Code (EC) § 49414.8)

2) Authorizes school districts, COEs, and charter schools to provide naloxone hydrochloride or another opioid antagonist to school nurses or trained personnel who have volunteered, as specified, and authorizes school nurses or trained personnel to use naloxone hydrochloride or another opioid antagonist to provide emergency medical aid to persons suffering, or reasonably believed to be suffering, from an opioid overdose. (EC § 49414.3)

3) Requires the State Superintendent of Public Instruction (SPI) to establish minimum training standards for the administration of naloxone or another opioid antagonist, and refresh those standards as necessary, every 5 years. Requires that training to include the following:

   a) Techniques for recognizing symptoms of an opioid overdose.

   b) Standards and procedures for the storage, restocking, and emergency use of naloxone hydrochloride or another opioid antagonist.

   c) Basic emergency follow up procedures, including, but not limited to, a requirement for the school or charter school administrator or, if the administrator is not available, another school staff member to call the emergency 911 telephone number and to contact the pupil's parent or guardian.

   d) Recommendations on the necessity of instruction and certification in cardiopulmonary resuscitation.

   e) Written materials covering specified information. (EC § 49414.3)

4) Authorizes each public and private elementary and secondary school in the state to voluntarily determine whether or not to make emergency naloxone hydrochloride or another opioid antagonist and trained personnel available at its school. Requires schools, in making this determination, to evaluate the emergency medical response time to the school and determine whether initiating emergency medical services is an acceptable alternative to naloxone hydrochloride or another opioid antagonist and trained personnel. (EC § 49414.3)

5) States that a volunteer who has received specified training and administers naloxone hydrochloride or another opioid antagonist, in good faith and not for compensation, to a person who appears to be experiencing an opioid overdose shall not be subject to professional review, be liable in a civil action, or be subject to criminal prosecution for his or her acts or omissions in administering the naloxone hydrochloride or another opioid antagonist. (EC § 49414.3)

6) Encourages COEs to establish a County Working Group on Fentanyl Education in Schools for the purposes of outreach, building awareness, and collaborating with local health agencies regarding fentanyl overdoses. (EC § 49428.16)

7) Requires the California Department of Education (CDE) to curate and maintain on its website, information on opioid overdose awareness and safety advice, the provision of opioid antagonists, and the statewide programs related to naloxone hydrochloride distribution. (EC § 49428.16)

8) Requires schools serving pupils in any of grades 7 to 12, inclusive, to include within its comprehensive school safety plan (CSSP), a protocol in the event a pupil is suffering or is reasonably believed to be suffering from an opioid overdose. (EC § 32282)

9) Requires any school police officer first employed by a K–12 public school district to successfully complete a basic course of training before exercising the powers of a peace officer. Requires POST to prepare a specialized course of instruction for the training of school peace officers to meet the unique safety needs of a school environment and for such officers to complete the specialized training within two years of the date of first employment. (Penal Code (PEN) § 832.3)

10) Provides that any peace officer employed by a K-12 public school district who has completed training as prescribed shall be designated a school police officer. (PEN § 830.32)

This bill:

1) Requires, beginning with the 2027-28 school year, an SRO, upon assignment to a schoolsite, and at least every two years thereafter, to complete opioid overdose recognition and response training that is approved by POST or BSCC.

    a) Authorizes the inclusion of the training requirement above into existing POST continuing professional training requirements or BSCC standards and training for corrections.

2) Clarifies that a trained SRO may volunteer to administer an opioid antagonist to a person who appears to be experiencing an opioid overdose, pursuant to existing statute.

3) Provides that an SRO who, while assigned to a schoolsite, administers an opioid antagonist in good faith and not for compensation, to a person who appears to be experiencing an opioid overdose constitutes the rendering of emergency care. Provides that an SRO or the entity employing or contracting with the SRO shall not be liable in a civil action or be subject to criminal prosecution for the SRO's acts or omissions in administering the opioid antagonist, unless an act or omission of the SRO constitutes gross negligence or willful or wanton misconduct connected to the administration of the opioid antagonist.

4) Requires POST, in consultation with CDE, to provide implementation guidance to local educational agencies (LEAs) and law enforcement agencies on accessing opioid antagonists at low or no cost and integrating overdose response into school safety planning.

5) Requires an SRO to report all of the following information to the CDPH, on or before July 1, 2028, and annually thereafter until July 1, 2030:

   a) The number of units of opioid antagonists they received.

   b) The number of times the SRO administered an opioid antagonist while serving at a schoolsite.

   c) The number of times the SRO needed an opioid antagonist but did not have one available.

   d) The types of opioid antagonists received and administered.

   e) The name and contact information of the SRO and individual completing the form.

   f) Schoolsite information, including the name of the school, the LEA, and the city and county where the school is located.

6) Requires the CDPH to post the data reported pursuant to items a) to c) of #5 above on the CDPH's internet website to ensure the data is publicly accessible.

7) Requires the CDPH, on or before January 1, 2031, to submit a report to the Legislature, as specified.

8) Authorizes the provisions of this bill to be implemented using existing state and local resources, including but not limited to the Naloxone Distribution Project (NDP) administered by the DHCS, opioid settlement funds, federal grants, and private or philanthropic donations to procure opioid antagonists and support opioid overdose recognition and response training.

9) Establishes the following definitions for the purposes of this bill:

   a) "Local educational agency" means a school district, COE, or charter school serving pupils in kindergarten or any of grades 1 to 12, inclusive.

   b) "Opioid antagonist" means naloxone hydrochloride or another drug approved by the federal Food and Drug Administration that, when administered, negates or neutralizes in whole or in part the pharmacological effects of an opioid in the body, and has been approved for the treatment of an opioid overdose.

   c) "School resource officer" means an individual who is a peace officer, as defined in Chapter 4.5 (commencing with Section 830) of Title 3 of Part 2 of the Penal Code, and who is employed by, or contracts with, an LEA, city, county, or other law enforcement agency to act in a school assignment.

   d) "Schoolsite" means an individual school campus of an LEA or an area where a school-sponsored activity of an LEA is currently being held.

Comments

1) *Need for the bill.* According to the author, "School Resource Officers have been a crucial part of our students' safety. Ensuring that they have naloxone on hand and are properly trained to use it will provide schools with someone on site who can safely intervene when an incident occurs. Because every minute counts, making sure more people have access to this life saving drug is essential to protecting our students."

2) *Opioids and naloxone.* According to the Centers for Disease Control and Prevention (CDC), opioids are a class of drugs used to reduce pain. Opioids such as oxycodone (OxyContin), hydrocodone (Vicodin), morphine, and methadone may be prescribed by a physician. Fentanyl is a synthetic opioid pain reliever that is many times more powerful than other opioids and is approved for treating severe pain, typically advanced cancer pain. Illegally made and distributed fentanyl has been on the rise in several states. Heroin is an illegal opioid. Symptoms of opioid intoxication may include confusion or delirium, very slow breathing, extreme sleepiness, vomiting, and small pupils.

According to the DHCS, naloxone is a life-saving medication that reverses an opioid overdose while having little to no effect on an individual if opioids are not present in their system. Naloxone works by blocking the opioid receptor sites and reversing the toxic effects of the overdose. It has few known adverse effects and no potential for abuse. Naloxone is administered when an individual is showing signs of opioid overdose. The medication can be given by intranasal spray, intramuscularly (into the muscle), subcutaneously (under the skin), or by intravenous injection.

3) *Addressing fentanyl among K-12 students.* According to the CDPH, fentanyl-related overdose deaths increased by 625% among ages 10-19 from 2018 to 2020, and there were 177 fentanyl-related overdose deaths, and 1,165 opioid-related overdose emergency department visits among youth ages 10 to 19 years old in 2022. State statute requires the SPI to establish minimum training standards for school employees who volunteer to administer naloxone or another opioid antagonist. In addition to setting minimum training standards, the CDE must maintain on its website, a clearinghouse for best practices in training nonmedical personnel to administer naloxone or another opioid antagonist to pupils.

   The CDE, in conjunction with the CDPH, also provides LEAs with resources and information that they can readily share with parents and students to help keep them safe. The shareable Fentanyl Awareness and Prevention toolkit page offers information about the risks of fentanyl and how to prevent teen use and overdoses. In addition to the toolkit, the CDPH's Substance and Addiction Prevention branch also provides resources for parents, guardians, caretakers, educators, schools, and youth-serving providers.

4) *School resource officers*. SROs are members of a school district police department or officers assigned to a school site by a local law enforcement agency. SROs are sworn peace officers who have successfully completed a minimum of 800-1,200 hours of training in a police academy program in order to initially qualify as a peace officer and to carry firearms. The decision of whether to employ an SRO and how many SROs an LEA chooses to employ is a determination made at the local level. Current law in California requires SROs to take additional POST-developed and certified training on topics specific to law enforcement in an educational setting.

   Beyond the training required for basic peace officer and SRO certification, state statutes and regulations also require officers to complete continued professional

training courses and refresher courses at various intervals to build and maintain proficiency in areas of an officer's duties.

This bill requires an SRO, upon assignment to a schoolsite, and at least every two years thereafter, to complete opioid overdose recognition and response training that is approved by POST or DHCS.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to Senate Appropriations Committee:

- The Department of Public Health estimates annual General Fund costs of $360,000 for 2.0 positions and an annual data analysis software subscription to complete data analysis responsibilities as a result of this bill.
- The POST may incur additional General Fund costs in the low hundreds of thousands of dollars to provide implementation guidance for integrating overdose response into school safety planning.
- Any costs for DHCS and CDE are expected to be minor and absorbable within existing resources.

SUBJECT: Vehicles: Sideshow Accountability and Community Safety Act

SOURCE: Author

DIGEST: This bill establishes new criminal penalties for engaging in an exhibition of speed, where the violation occurred as part of a sideshow, and expands the definition of a sideshow.

Senate Floor Amendments of 8/21/26 resolve chaptering out conflicts with AB 1830 (Petrie-Norris, 2026) and add a coauthor.

ANALYSIS:

Existing law:

1) Prohibits a person from engaging in a motor vehicle speed contest on a highway or in an off-street parking facility (speed contest), and from aiding or abetting a speed contest. (Vehicle Code (VEH) § 23109)

2) Defines "motor vehicle speed contest" to include a motor vehicle race against another vehicle, a clock, or other timing device. (VEH § 23109)

3) Punishes a speed contest as follows:

   a) Punishes a person convicted of engaging in a speed contest by imprisonment in a county jail for 24 hours to 90 days or by a fine of $355 to $1,000, or by both, 40 hours of community service, and a 90-day to six-month license suspension at the court's discretion, with the option for a restricted license; (VEH § 23109)

   b) Punishes a person convicted of engaging in a speed contest that proximately causes bodily injury to another person by 30 days to six months in county jail or by a fine of $500 to $1,000, or by both; (VEH § 23109)

   c) Punishes a person convicted of engaging in a speed contest that proximately causes specified injuries, including loss of consciousness, a concussion, a bone fracture or a wound requiring extensive suturing as a wobbler, punishable by imprisonment for 16 months or two or three years, or by 30 days to six months in county jail, a fine of $500 to $1,000, or by both; (VEH § 23109.1)

   d) Punishes a person convicted of engaging in a speed contest where the offense occurred within five years of the date of the same offense that resulted in a conviction, by imprisonment in a county jail for four days to six months, a fine of $500 to $1,000, and a six month license suspension; if the most recent offense causes bodily injury to another person it is punishable by 30 days to six months in county jail; if the most recent offense causes serious bodily injury to another person, as defined, it is punishable as a wobbler by imprisonment in state prison for 16 months or two or three years or 30 days to one year in county jail, and a fine of $500 to $1,000. (VEH § 23109)

4) Defines "exhibition of speed" as accelerating or driving at a rate of speed that is dangerous and unsafe in order to show off or make an impression on someone else. (People v. Grier (1964) 226 Cal.App.2d 360, 364; CALCRIM No. 2202 (2026).)

5) Prohibits a person from, for the purpose of facilitating or aiding or as an incident to a speed contest or exhibition, in any manner obstructing or placing a barricade or obstruction or assisting or participating in placing a barricade or obstruction upon a highway or in an off-street parking facility. (VEH § 23109)

6) Punishes a person convicted of aiding and abetting a speed contest, engaging in an exhibition of speed, aiding and abetting an exhibition of speed, or obstructing or placing a barricade upon a highway or parking facility for the purpose of facilitating a speed contest or exhibition of speed, by imprisonment in a county jail for up to 90 days, by a fine of up to $500, or by both. (VEH § 23109)

7) Authorizes a court, commencing January 1, 2029, if a person engages in an exhibition of speed or aids or abets an exhibition of speed, to suspend the person's driving privileges for 90 days to six months, only if the violation occurred as part of a sideshow, with the option for a restricted license at the court's discretion. (VEH § 23109)

8) Defines "sideshow" to mean an event in which two or more persons block or impede traffic on a highway or in an off-street parking facility for the purpose of performing motor vehicle stunts, motor vehicle speed contests, motor vehicle exhibitions of speed, or reckless driving, for spectators. (VEH § 23109)

9) Authorizes vehicle impound, including impoundment of a vehicle involved in a speed contest, exhibitions of speed, or reckless driving, subject to the following:

    a) States that any removal of a vehicle is a seizure under the Fourth Amendment of the Constitution of the United States and Section 13 of Article I of the California Constitution, and shall be reasonable and subject to the limits set forth in Fourth Amendment jurisprudence; (VEH § 22650)

    b) Authorizes a peace officer and other specified persons to remove a vehicle, subject to specified notice, storage, and release requirements, in a variety of enumerated circumstances, including where a vehicle is parked on a highway in a position that obstructs traffic or creates a hazard to other traffic, and if the officer arrests a person driving a vehicle for an alleged offense, and the officer is required, permitted to take, and does take, the person into custody, except as specified; (VEH §§22651 – 22856)

    c) Authorizes a peace officer to remove a vehicle when the vehicle was used by a person who was engaged in a speed contest, and when the person was

arrested and taken into custody for that offense by a peace officer; (VEH § 22651.6)

d) Provides that if a person is convicted of engaging in a speed contest and the vehicle used in the offense is registered to that person, the vehicle may be impounded at the registered owner's expense for one day to 30 days; (VEH § 23109)

e) Authorizes a peace officer who determines that a person engaged in a speed contest, exhibition of speed, or reckless driving, but excluding aiding and abetting an exhibition of speed, to immediately arrest and take into custody that person, cause the removal and seizure of the vehicle used in the offense, and the seized motor vehicle may be impounded for up to 30 days; (VEH § 23109)

f) Provides that if a peace officer arrests a person for obstructing or placing a barricade upon a highway or parking facility for the purpose of facilitating a speed contest, as specified, and causes the seizure of the vehicle pursuant to peace officer authority to remove a vehicle if the officer arrests a person driving a vehicle for an alleged offense where the officer is required or permitted take the person into custody, the peace officer shall not be required to take the person into custody; and, (VEH § 23109.3)

g) Requires a magistrate presented with a peace officer affidavit establishing reasonable cause to believe that a vehicle, as specified, was an instrumentality used in the peace officer's presence in violation of specified crimes, including engaging in a motor vehicle speed contest, engaging in a motor vehicle exhibition of speed or aiding and abetting a motor vehicle exhibition of speed, to issue a warrant authorizing any peace officer to immediately seize and remove the vehicle, to be impounded for up to 30 days. (VEH § 14602.7)

This bill:

1) Provides that if a person is convicted of a violation of engaging in an exhibition of speed on a highway or in an off-street parking facility, as specified, where the violation occurred as part of a sideshow, and the vehicle used in the violation is registered to that person, the vehicle may be impounded at the registered owner's expense for not less than one day nor more than 30 days.

2) Punishes a person convicted of engaging in an exhibition of speed on a highway or in an off-street parking facility, where the violation occurred as part of a sideshow, as follows:

   a) A conviction is punishable by imprisonment in a county jail for not less than 24 hours nor more than 90 days or by a fine of not less than $355 nor more than $1,000, or by both that fine and imprisonment;

   b) If the driver proximately causes bodily injury to a person other than the driver, the conviction is punishable by imprisonment in a county jail for not less than 30 days nor more than six months or by a fine of not less than $500 nor more than $1,000, or by both that fine and imprisonment;

   c) If the driver proximately causes specified injuries, including loss of consciousness, a concussion, a bone fracture or a wound requiring extensive suturing to a person other than the driver, the conviction is punishable as an alternate felony-misdemeanor (wobbler) by imprisonment for 16 months or two or three years or by imprisonment in a county jail for not less than 30 days nor more than six months, or by a fine of not less than $500 nor more than $1,000, or by both that fine and imprisonment;

   d) If the conviction is for an offense that occurred within five years of the date of a prior conviction of this same offense, that person shall be punished by imprisonment in a county jail for not less than four days nor more than six months and by a fine of not less than $500 nor more than $1,000;

   e) If the perpetration of the most recent offense within the five-year period proximately causes bodily injury to a person other than the driver, a person convicted of that second violation shall be imprisoned in a county jail for not less than 30 days nor more than six months and by a fine of not less than $500 nor more than $1,000; and,

   f) If the perpetration of the most recent offense within the five-year period proximately causes serious bodily injury, as defined, to a person other than the driver, a person convicted of that second violation shall be imprisoned in the state prison for 16 months, or two or three years, or in a county jail for not less than 30 days nor more than one year, and by a fine of not less than $500 nor more than $1,000.

3) Expands the definition of a “sideshow,” as follows:

   a) Specifies that this means an event or gathering in which two or more persons barricade, block, impede, or otherwise obstruct traffic upon or access to a

highway or off-street parking facility without the consent of the owner, operator, or agent thereof, for the purpose of performing motor vehicle stunts, motor vehicle speed contests, motor vehicle exhibitions of speed, or reckless driving;

b) Removes the requirement that the event is for the purpose of performing certain vehicle crimes for spectators; and,

c) States that a sideshow may involve the use or operation of any motor vehicle, including, but not limited to, motorcycles or off-highway motor vehicles, regardless of whether or not those vehicles display license plates or are registered.

4) Incorporates changes proposed by AB 1830 to be operative only if this bill and AB 1830 are enacted and this bill is enacted last.

Comments

1) *Purpose of the bill.* According to the author, "Illegal sideshows have evolved into highly organized and dangerous events that threaten public safety, disrupt California's transportation system, and negatively impact communities throughout the state. These gatherings frequently involve coordinated efforts to block intersections, freeway ramps, and highways while drivers perform reckless stunts before large crowds. Despite recent legislative action, existing enforcement tools and penalties have not kept pace with increasingly sophisticated tactics, including the use of unregistered dirt bikes and social media coordination, as well as a growing number of repeat offenders. Sideshows and street takeovers have become the catalyst for shootings, looting, arson, and other serious crimes. AB 1588 strengthens California's response by closing enforcement gaps, increasing accountability for repeat offenders, and aligning sideshow penalties with existing street racing laws. By providing law enforcement with additional tools to address organized sideshow activity, this bill aims to improve public safety, protect transportation infrastructure, and enhance the quality of life for communities affected by these dangerous events."

2) *Sideshows and exhibitions of speed.* Sideshows are illegal street activities in which people block or impede traffic to perform vehicle stunts, street racing, exhibitions of speed, or reckless driving, for spectators. These events, where people race vehicles and shut down streets, can cause crashes and spectator injuries and can block roadways and disrupt traffic flow, including access for

emergency vehicles. An exhibition of speed is when a driver accelerates or drives at a dangerous speed to show off or make an impression on someone else. It does not include street racing, which is known as a motor vehicle speed contest.

3) *A new definition of sideshow.* This bill revises the definition of "sideshow" in an effort to close loopholes identified by law enforcement. Among other changes, the bill adds motorcycles and off-highway vehicles (such as dirt bikes) to the definition of sideshow, as the involvement of these types of vehicles has become more common. It is not clear, however, that this is actually a loophole in current law, as motorcycle and dirt bike riders can currently be charged for their participation in a sideshow. Earlier this year, Bay Area law enforcement agencies arrested nine people and impounded 77 all-terrain vehicles (ATVs) and dirt bikes after a sideshow and street takeover on the Bay Bridge.

   Additionally, this bill creates more flexibility in the definition of sideshow, which may result in some activities that did not previously rise to the definition of sideshow now being classified as a sideshow. For example, this bill removes the requirement that a sideshow have "spectators," as frequently the only people participating in these events are the drivers themselves.

4) *This bill imposes penalties for exhibitions of speed at sideshows.* AB 1588 creates a new penalty structure for an exhibition of speed as part of a sideshow. This means that a driver would have had to accelerate or drive at an unsafe rate of speed in order to show off to someone else while they were part of a sideshow. Currently, an offense of this nature would likely be prosecuted as reckless driving. The bill aligns the new penalties with those imposed for motor vehicle speed contests—also know as street racing. The escalating penalties begin with one to 90 days in county jail and grow based on severity and recurrence. Drivers that cause serious injuries or commit repeat offenses can be charged with wobblers, meaning either a misdemeanor or a felony. Lastly, the bill authorizes vehicles used in sideshows to be impounded for up to 30 days.

Related/Prior Legislation

AB 1978 (Sanchez, Chapter 501, Statutes of 2024) – Authorized a peace officer to impound a vehicle without taking the driver into custody for obstructing or placing a barricade upon a highway, or an offstreet parking facility for the purpose of facilitating or aiding a speed contest or exhibition of speed.

AB 2186 (Wallis, Chapter 502, Statutes of 2024) – Authorized a peace officer to removal and seize a motor vehicle used in an exhibition of speed in an offstreet parking facility for no more than 30 days and provides that a peace officer may not remove and seize a vehicle of a person who aided and abetted a person engaged in an exhibition of speed.

AB 3085 (Gipson, Chapter 504, Statutes of 2024) – Expanded the list of offenses for which a peace officer may impound a vehicle pursuant to a warrant or order issued by a magistrate.

AB 2000 (Gabriel, Chapter 436, Statutes of 2022) – Made it a crime for a person to engage in a motor vehicle speed contest in an off-street parking facility or an exhibition of speed in an off-street parking facility, or to aid or abet therein.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, Fiscal impacts include:

- Court impacts: Unknown court cost pressures to adjudicate additional criminal enforcement actions authorized by this bill. Actual costs would depend on the number of additional cases related to violations for engaging in an exhibition of speed as part of a sideshow and the amount of court time needed to resolve each case. Staff notes that it generally costs about $10,500 to operate a courtroom for one eight-hour day. Although courts are not funded on the basis of workload, increased staff time and resources may create a need for additional support from the General Fund to support court operations. The 2026-27 Budget appropriated $70 million from the General Fund to backfill the current fund imbalance in the Trial Court Trust Fund and help pay for court operations. (Trial Court Trust Fund, General Fund

- State prison: Potential increase in incarceration costs (General Fund) for new commitments to state prison for persons convicted of engaging in an exhibition of speed as part of a sideshow for a second or subsequent time within 5 years of a prior conviction and proximately causing serious bodily injury. To the extent that the provisions of this measure lead to additional commitments to state prison, it would result in additional General Fund costs of approximately $138,000 for each year of sentencing imposed on violators.

- County jail: Potential increase in local incarceration costs (local funds) to the extent persons would be convicted of a crime created by this bill and sentenced to county jail time. The punishment for crimes specified in this bill range from optional jail time of 30 days to six months, to mandatory jail sentences ranging

from four days to 16 months or two or three years, depending on the violation. The annual cost to incarcerate one person in county jail varies by county but can range from $70,000 to $90,000 per year. County incarceration costs are not subject to reimbursement by the state, but overcrowding in county jails creates cost pressure on the General Fund because the state has historically granted new funding to counties to offset overcrowding resulting from public safety realignment. (local funds, General Fund)

ACLU California Action
Initiate Justice
Local 148 Los Angeles County Public Defender's Union
Sister Warriors Freedom Coalition

ARGUMENTS IN SUPPORT: According to the California Police Chiefs Association, "AB 1588 provides law enforcement with important tools to address this growing public safety threat. The bill closes existing enforcement gaps by expressly prohibiting participation in, aiding, or abetting a sideshow, expands the statutory definition of a sideshow to reflect modern tactics used by organizers, including the use of motorcycles and off-highway vehicles to block and obstruct roadways, and strengthens penalties for repeat offenders. The bill also authorizes courts to treat vehicles used as performing vehicles in sideshows as public nuisances subject to forfeiture following conviction and permits vehicle seizure warrants to be supported by video evidence from reasonably reliable sources."

ARGUMENTS IN OPPOSITION: According to Initiate Justice, "Based on evidence, this proposal will be ineffective. Oakland, Alameda County, San Jose, and Fresno increased fines for sideshow participation and it did not lead to meaningful reduction in the number of sideshows. While Oakland increased its fines in 2023, sideshows in Oakland are still prevalent. In 2024, the Oakland Police Department (OPD) stated that crimes, such as sideshow incidents, had actually increased, and this year hundreds of spectators still gathered at sideshows.

"Moreover, higher fines do not deter behavior that is social, impulsive, or collective. Instead, financial penalties of this scale fall most heavily on low-income residents, deepening cycles of poverty and punishment rather than improving public safety.

SUBJECT: California Career Technical Education Incentive Grant Program: revised allocation formula

SOURCE: Career Technical Education Coalition

DIGEST: This bill requires the California Department of Education (CDE), in consultation with the Executive Director of the State Board of Education (SBE), to revise the California Career Technical Education Incentive Grant (CTEIG) allocation formula no later than the 2027-28 fiscal year to ensure that all funds appropriated for the program are fully allocated in the fiscal year in which the funds are appropriated, to the maximum extent practicable.

ANALYSIS:

Existing law:

1) Establishes the CTEIG Program as a state education, economic, and workforce development initiative intended to encourage, maintain, and strengthen the delivery of high-quality career technical education (CTE) programs. (Education Code (EC) § 53070)

2) Provides an ongoing appropriation of $300 million annually for the CTEIG program beginning in the 2021-22 fiscal year, subject to appropriation by the Legislature, and specifies that funding be distributed among small, medium, and large applicants based on average daily attendance (ADA). (EC § 53070)

3) Requires applicants to provide a local match of $2 for every $1 received from the program and prohibits an applicant from receiving an amount greater than the amount determined by the allocation formula. (EC § 53071)

4) Requires applicants to demonstrate that their CTE programs meet specified minimum eligibility standards, including high-quality curriculum and instruction, work-based learning opportunities, student support services, labor market alignment, industry partnerships, pathways to postsecondary education and employment, access for students with exceptional needs, and annual data reporting. (EC § 53071)

5) Requires the California Department of Education (CDE), in consultation with the Executive Director of the SBE, to give positive consideration to applicants serving unduplicated pupils, students with higher-than-average dropout rates, applicants in areas of high unemployment, regional programs operated by county offices of education or joint powers authorities, and applicants demonstrating regional collaboration, industry engagement, and infrastructure investment. (EC § 53075)

6) Requires the Superintendent of Public Instruction (SPI), in collaboration with the Executive Director of the SBE, to determine and publicly release the CTEIG allocation formula, allowable expenditures, funding amounts, and number of grants to be awarded. (EC § 53076)

7) Establishes the K-12 Strong Workforce Program, administered by the California Community Colleges Chancellor's Office, to support regional CTE and workforce alignment efforts. (EC § 88827)

8) Establishes the Golden State Pathways Program to support the development and implementation of college and career pathways in high-wage, high-skill, and high-growth industry sectors. (EC § 53020)

This bill requires CDE, in consultation with the Executive Director of the SBE, to revise the CTEIG allocation formula no later than the 2027-28 fiscal year to ensure that all funds appropriated for the program are fully allocated in the fiscal year in which the funds are appropriated, to the maximum extent practicable.

Comments

1) *Need for the bill.* According to the author, "Career Technical Education programs are essential in exposing students to a wide range of career pathways, preparing them with practical, workforce-ready skills, and offering specialized coursework that support both career readiness and access to higher education. Unfortunately, nearly $120 million in state-approved CTE funding has not reached our students due to a broken funding formula. AB 1590 requires the Superintendent of Public Instruction and the State Board of Education to fix this formula to ensure that when the state appropriates funding for CTE, all those dollars go directly to students."

2) *This bill appears to respond to growing frustration regarding unallocated CTEIG funds.* This bill is intended to address longstanding concerns from local educational agencies (LEAs), county offices of education, regional occupational programs, and other CTE stakeholders that significant amounts of appropriated CTEIG funding have gone unallocated despite strong statewide demand for CTE investments. According to the author and supporters, nearly $120 million in appropriated funding remained unawarded over recent grant cycles due to limitations within the allocation methodology currently used by the CDE.

   The concern underlying this bill appears to stem less from insufficient applicant demand than from the interaction between the formula-generated entitlement amount and the program's required local match. Historically, applicants have been effectively funded based on the lesser of: (1) the amount generated by the allocation formula; or (2) the amount supported by the applicant's available local match. In instances where an applicant's available match has been lower than its calculated entitlement, the remaining entitlement capacity has not been redistributed to other applicants with unused match capacity, resulting in carryover balances and subsequent funding rounds.

3) *Existing law provides broad authority over the allocation formula, but also establishes guardrails.* Existing law grants CDE, in consultation with the Executive Director of the SBE, substantial discretion to determine the CTEIG allocation formula. At the same time, statute establishes several significant parameters around the program, including the required 2:1 local match, the distribution of funds among small, medium, and large applicants, minimum eligibility standards, and required "positive consideration" factors favoring high-need and regionally collaborative applicants.

   This bill does not prescribe a specific revised methodology. Instead, it establishes an outcome-oriented requirement that all appropriated funds be allocated within the fiscal year in which they are appropriated. As a result, the

bill raises an important policy and legal question regarding the extent to which existing law already provides CDE sufficient authority to revise the methodology in a manner that fully allocates available funds absent additional statutory changes.

4) *Potential administrative changes may partially address the concerns raised by this bill.* Since the introduction of this measure, CDE has been evaluating revisions to the CTEIG allocation methodology intended to reduce or eliminate the carryover balances that have occurred in recent funding rounds. The recently released Round 12 Request for Applications states that the allocation methodology for the upcoming cycle will "slightly differ" from prior years and further states that the CDE "anticipates allocating all available funds in a single funding round."

   According to CDE, the Round 12 allocation methodology differs from prior years in two significant ways. First, the methodology proportionally allocates an applicant's unduplicated pupil count (UPC) based on the percentage of ADA attributed to an individual application versus a consortium application. Second, where an applicant's available local match is less than the amount generated by the allocation formula, funding that would otherwise remain unallocated is redistributed among other applicants with remaining match capacity. According to CDE, these changes are anticipated to allow all available program funds to be allocated in a single funding round.

   To the extent the CDE is able to implement a methodology that consistently allocates the full annual appropriation within existing statutory authority, this bill may not be necessary. At the same time, proponents may argue that codifying the expectation that all appropriated funds be fully allocated each fiscal year would help ensure that future administrations continue prioritizing full allocation of available CTEIG funding.

5) *Bill reflects a broader statewide focus on workforce development and career readiness.* This measure aligns with ongoing state efforts to strengthen college and career pathways, improve alignment between TK-12 education and workforce needs, and expand access to work-based learning opportunities. As noted in the Governor's Master Plan for Career Education stakeholder discussions, stakeholders identified fragmented and inconsistent funding streams as a major challenge to sustaining high-quality CTE pathways and workforce partnerships over time.

   CTE coursework has also been associated with improved educational and workforce outcomes, including higher graduation rates, improved

postsecondary participation, and stronger employment outcomes, particularly for historically underserved student populations. In that context, supporters argue that ensuring existing CTEIG appropriations consistently reach LEAs and students is an important component of the state's broader workforce and economic development goals.

6) *CTEIG operates within a broader landscape of CTE funding streams.* While concerns regarding unallocated CTEIG funds are significant, CTEIG is one of several major state and federal funding streams supporting CTE programs. LEAs may also support CTE programs using Local Control Funding Formula (LCFF) base funding, Perkins V funds, the K-12 Strong Workforce Program, Golden State Pathways grants, California Partnership Academies, Agricultural Career Technical Education Incentive Grants, and various local or regional workforce initiatives.

   Nevertheless, because CTEIG remains one of the state's largest ongoing dedicated K-12 CTE funding sources, stakeholders argue that persistent carryover balances undermine both the practical and symbolic value of the state's continued investment in workforce preparation and career readiness.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

This bill is not expected to result in additional Proposition 98 General Fund costs to the state. Additionally, the California Department of Education (CDE) indicates that any workload costs would be minor and absorbable.

SUBJECT: Disadvantaged communities: farmworker communities

SOURCE: La Cooperativa de Campesina

DIGEST: This bill requires California Environmental Protection Agency (CalEPA) to make findings on barriers to investment opportunities in farmworker communities and to consider identifying these communities as disadvantaged pursuant to those findings.

Senate Floor Amendments of 8/21/26 remove farmworker communities from the definition of disadvantaged communities and instead require that the CalEPA considers identifying farmworker communities as disadvantaged communities after making specified determinations.

ANALYSIS:

Existing law:

1) Establishes the Greenhouse Gas Reduction Fund (GGRF), and requires all moneys collected by the California Air Resources Board (CARB) under the state's Cap-and-Invest Program to be deposited into the GGRF. (Government Code (GOV) § 16428.8)

2) Provides that it is the intent of the Legislature that GGRF moneys shall only be appropriated in a manner consistent with state laws governing the GGRF, including the GGRF Investment Plan and Communities Revitalization Act. (Health and Safety Code (HSC) § 39712(a)(1))

3) Requires the California Environmental Protection Agency (CalEPA) to identify disadvantaged communities for GGRF investment opportunities; requires these communities to be identified based on geographic, socioeconomic, public health, and environmental hazard criteria; provides that the criteria may include, but are not limited to, either of the following:

   a) Areas disproportionately affected by environmental pollution and other hazards that can lead to negative public health effects, exposure, or environmental degradation; and,

   b) Areas with concentrations of people that are of low-income, high unemployment, low levels of homeownership, high rent burden, sensitive populations, or low levels of educational attainment. (HSC § 39711)

4) Requires that the GGRF investment plan allocate a minimum of 25% of GGRF moneys to projects located within the boundaries of, and benefiting individuals living in, disadvantaged communities identified by CalEPA, as specified:

   a) a minimum of 5% to projects that benefit low-income households or to projects located within the boundaries of, and benefiting individuals living in, low-income communities located anywhere in the state; and

   b) a minimum of 5% to projects that either benefit low-income households that are outside of, but within one-half mile of, disadvantaged communities, or to projects located within the boundaries of, and benefiting individuals living in, low-income communities that are outside of, but within one-half mile of, disadvantaged communities. (HSC § 39713(a-c))

5) Requires CARB to ensure that greenhouse gas (GHG) emission reduction rules, regulations, programs, mechanisms, and incentives under its jurisdiction, where applicable and to the extent feasible, direct public and private investment toward the most disadvantaged communities in California and provide an opportunity for small businesses, schools, affordable housing associations, and other community institutions to participate in and benefit from statewide efforts to reduce GHG emissions. (HSC § 38565)

6) Establishes the California Department of Community Services and Development (CSD) to provide services to impoverished communities,

including overseeing federal block grants, funding and technical assistance to community action agencies, coordinate antipoverty efforts, and plan and evaluate long-range and short-range strategies for overcoming poverty in the state. (GOV § 12085 *et seq.*)

7) Requires the CSD to develop and administer the Energy Efficiency Low-Income Weatherization Program (LIWP); authorizes CSD to develop requirements, guidelines, and subgrantee contract provisions for LIWP, as specified; requires, before a subgrantee contract is executed for the provision of local service, CSD to post draft program guidelines on CSD's website and to hold a public hearing to obtain public input on the draft program guidelines, as specified. (GOV § 12087.5)

8) Requires that $10 million of Proposition (Prop) 4 funds be made available, upon appropriation by the Legislature, as part of the Farmworker Housing Component of LIWP, to low-income farmworker households for no-cost energy efficiency upgrades designed to reduce GHG emissions by saving energy; requires that these upgrades include, but are not limited to, insulation, central heating and cooling system upgrades, lighting upgrades, and window replacement. (Public Resources Code (PRC) § 93580)

This bill:

1) Requires CalEPA to:

   a) Assess the following:

      i) Whether designating farmworker communities would increase investment opportunities;

      ii) Whether there is sufficient data to identify farmworker communities; and

      iii) Potential barriers to investment opportunities in farmworker communities.

   b) Make the above findings available on its website.

   c) Consider identifying farmworker communities as disadvantaged communities pursuant to those findings.

2) Requires the Office of Environmental Health Hazard Assessment to develop a strategy to engage with farmworker communities on environmental, health, and socioeconomic burdens.

Background

The Greenhouse Gas Reduction Fund. The GGRF was created in the 2012 budget (SB 1018, Budget Committee, Chapter 39, Statutes of 2012) to use funds collected from Cap-and-Invest auctions to further the goals in the Global Warming Solutions Act of 2006 (AB 32, Nunez, Chapter 488, Statutes of 2006). GGRF funds essential programs such as the Affordable Housing and Sustainable Communities Program, the Community Air Protection Program, wildfire and forest resilience, and the Safe and Affordable Drinking Water Program.[1]

State law established under SB 535 (De León, Chapter 830, Statutes of 2012) and AB 1550 (Gomez, Chapter 369, Statutes of 2016) targets a portion of these investments to frontline communities, by requiring CalEPA to identify disadvantaged communities and mandating the allocation of 35% of GGRF dollars to disadvantaged communities, low-income communities, and low-income households, which the state collectively refers to as priority populations. Priority populations include all of the following:

a) Disadvantaged communities, comprised of:

   i) The top 25% of census tracts experiencing disproportionate amounts of pollution, environmental degradation, and socioeconomic and public health conditions according to CalEnviroScreen (described below);

   ii) Census tracts lacking overall scores in CalEnviroScreen due to data gaps, but receiving the highest 5% of CalEnviroScreen "Pollution Burden" composite scores;

   iii) Census tracts identified in 2017 as disadvantaged, regardless of their CalEnviroScreen scores; and,

   iv) Lands under the control of federally recognized Tribes.

b) Low-income communities and households, which have incomes either at or below 80% of the statewide median, or below a threshold designated as "low-income" by the California Department of Housing and Community Development.

[1] LAO (2025) *Overview of New Updates to The Cap-and-Invest Program*, https://lao.ca.gov/Publications/Report/5097

Farmworker communities. California farmworkers face major challenges, including pesticide exposure, poverty, educational barriers, linguistic isolation, housing and food insecurity, difficult working conditions, and poor healthcare access. As noted above, a number of these factors are captured as indicators in CalEnviroScreen, suggesting that farmworker communities may be at the nexus of many of the pollution and socioeconomic indicators that the state uses to identify disadvantaged communities.

In a 2022 study, researchers from the University of California, Riverside state that pesticides "contribute to poor health conditions among farmworkers who have considerably higher exposure to pesticides than non-agricultural workers, increasing their risk for skin disease, vision problems, and respiratory-associated illness."[2]

In 2022, the United States Department of Labor released "California Findings from the National Agricultural Workers Survey (NAWS) 2015-2019" which found that 96% of California farmworkers were Hispanic, 84% could not speak English well or at all, 35% lived in crowed dwellings, and the average income was less than $25,000.[3] Another 2022 survey conducted by CDPH and UC Merced found that 42% of California farmworkers reported very low or low food security, more than one third reported difficulties keeping their home cool, 40 to 50% had health testing indicating pre-diabetes, diabetes, or chronic inflammatory conditions, and nearly half did not have health insurance at some point in the last 12 months.[4]

The Low-Income Weatherization Program. Funded by GGRF, LIWP reduces household energy costs and GHG emissions by funding energy efficiency upgrades and rooftop solar photovoltaic systems, at no cost to low-income households.[5] Since its inception in 2014, LIWP has received funding from GGRF, the state's General Fund, and, most recently, Prop 4, the Safe Drinking Water, Wildfire Prevention, Drought Preparedness, and Clean Air Bond Act of 2024, which authorized the issuance of $10 million to the Farmworker Housing Component of LIWP.

[5] CSD, *Low-Income Weatherization Program*. https://www.csd.ca.gov/Pages/Low-Income-Weatherization-Program.aspx

Farmworker families spend a larger share of their annual income on home energy and often cut back on other critical needs to pay their energy bills. Launched in 2019, the LIWP Farmworker Housing Component provides services to low-income farmworker households and is administered by La Cooperativa Campesina de California to install energy saving and solar measures in single-family dwellings and buildings of 2-4 units of eligible farmworker households.[6]

Comments

Purpose of Bill. According to the author, "Farmworkers should be treated with dignity and respect reflective of the essential contribution they make to California's agricultural economy. Every day, they face the compounding burdens of extreme heat, pesticide exposure, substandard housing, and environmental degradation, conditions that are only worsening as climate change intensifies. However, some farmworker communities remain structurally excluded from climate investments that are designed to help communities like theirs.

For example, California's climate investment framework prioritizes disadvantaged communities (DACs) for investments from the Greenhouse Gas Reduction Fund (GGRF). Even though farmworkers face clear environmental and socioeconomic vulnerability, many rural and unincorporated farmworker communities fall outside the eligibility boundaries for DAC designation. AB 1600 resolves this gap by directing CalEPA and OEHHA to identify potential barriers that low-income communities face in accessing investment opportunities, evaluate if DAC designation would expand community funding, and develop a strategy to engage with farmworker communities throughout this process."

Lack of support for farmworker communities. Understanding that the agricultural industry is essential for California's food security and economy, farmworker communities deserve additional support. Designating farmworker communities as disadvantaged communities could provide additional support. However, CalEPA could choose not to identify farmworker communities as disadvantaged due to a lack of data, rather than a lack of need. Additionally, there is no provision in the bill to obtain the data that may be necessary to identify disadvantaged farmworker communities.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

[6] CSD, *Farmworker Housing Energy Efficiency and Solar PV*. https://www.csd.ca.gov/Pages/Farmworker-Housing-Component.aspx

According to the Senate Appropriations Committee:

- Cost pressures likely in the hundreds of thousands or low millions of dollars annually (General Fund or Greenhouse Gas Reduction Fund) for the Office of Environmental Health Hazard Assessment, California Air Resources Board, and other state entities to incorporate farmworker communities into the DAC designation as encouraged by this bill.

SUBJECT: Foster youth: disaster aid assistance

SOURCE: Children Now, California Alliance of Caregivers, California Youth Connection

DIGEST: This bill establishes a statewide Child Welfare Disaster Response Fund and a Child Welfare Disaster Response Program to support the needs of foster children and youth and their caregivers during a disaster. Requires that funds awarded be made available to meet the housing, clothing, transportation, and other tangible needs of foster children and youth and their caregivers that occur within 180 days of a local emergency proclamation or a state of emergency proclamation.

ANALYSIS:

Existing Law:

1) Establishes a state and local system of child welfare services, including foster care, for children who have been adjudged by the court to be at risk of abuse and neglect or who have been abused or neglected, as specified. (Welfare and Institutions Code [WIC] section 202)

2) Establishes a system of juvenile dependency for children for specified reasons, and designates that a child who meets certain criteria is within the jurisdiction

of the juvenile court and may be adjudged as a dependent child of the court, as specified. (WIC section 300 et seq.)

3) Empowers the Governor to proclaim a state of emergency in an area affected or likely to be affected thereby when requested to do so by local government officials, or if he finds that local authority is inadequate to cope with the emergency. Requires the Governor to proclaim the termination of the state of emergency at the earliest possible date that conditions warrant. (Government Code sections 8625 and 8629)

This bill:

1) Establishes the Child Welfare Disaster Response Program (Program) to be administered by the California Department of Social Services (CDSS).

2) Creates the Child Welfare Disaster Response Account (Account) to fund the Program.

3) Provides that, upon appropriation by the Legislature, moneys in the Child Welfare Disaster Response Account shall be used for purposes of the Program and to support the needs of foster children and youth and their caregivers during a disaster.

4) Requires CDSS to determine eligibility criteria for the allocation of funds to applications.

5) Provides that a child county welfare agency, county probation department, or Indian tribe, as specified, may apply for funds on behalf of foster children and youth and their caregivers under supervision of the agency, department, or tribe based on the eligibility criteria established by CDSS.

6) Provides that funds awarded shall be made available to meet the housing, clothing, transportation, and other tangible needs of foster children and youth and their caregivers that occur within 180 days of a local emergency proclamation by a local government or a state of emergency proclamation by the Governor.

7) Provides that it is the intent of the Legislature that the Account may be replenished at the start of every fiscal year.

8) Provides that gifts, donations, and bequests may be made to the Account, subject to any conditions or restrictions from CDSS.

9) Provides that CDSS may implement, interpret, or make specific this chapter by means of all-county letters or similar written instructions from CDSS.

Background

Author Statement. According to the author, "AB 1602 would establish a statewide Child Welfare Disaster Response Fund to provide immediate financial resources to address the urgent needs of children and youth in foster care and their caregivers following a declared natural disaster, including fires, floods, or earthquakes. While the state has a legal obligation to ensure the health, safety, and well-being of children and youth in foster care, existing funding mechanisms do not adequately account for the unanticipated costs that arise in the aftermath of a disaster. These costs may include the replacement of clothing, food, and essential personal belongings; temporary housing and placement stabilization; and transportation to maintain continuity of education, health care, and other required services. Children and youth in foster care and their caregivers experience distinct and heightened challenges during emergency situations, and delays in accessing resources can exacerbate trauma and placement disruption. AB 1602 would ensure timely access to necessary resources following a disaster, supporting continuity of care and minimizing further harm to vulnerable children and families."

Child Welfare Services System. California's child welfare services system is an essential component of the state's safety net. Social workers in each county receive reports of abuse or neglect and investigate and resolve those reports. When an allegation is substantiated, a family is either provided with services to ensure a child's well-being and avoid court involvement, or a child is removed and placed into foster care. In 2025, the state's child welfare agencies received 398,861 reports of abuse or neglect. Of these, 45,856 reports contained substantiated allegations, and 17,886 children were removed from their homes and placed into foster care via the child welfare services system.

Disasters in California. According to Federal Emergency Management Agency (FEMA) data, California had six declared disasters in 2025, fifteen in 2024, eleven in 2023, five in 2022, eleven in 2021, and twenty-three in 2020, with most being fire related. The California Office of Emergency Services data shows as of May 27, 2026, there had been seven new states of emergency declared by the Governor in 2026. The California Legislative Analyst's Office reported that between 1950 and 2017 there were 95 Federal Major Disasters or Emergencies declared, and 189 Federal Fire Management Disaster Declarations. California has a long history of droughts and wildfires, but these are increasing in severity and in frequency due to

climate change. The majority of the largest and most destructive wildfires in California have happened in the last 20 years.

Children in Foster Care During Natural Disasters. CDSS is the sole state agency mandated[1] to oversee Child Welfare Services (CWS) Disaster Response Plans for California. CDSS issues an All County Letter or All County Information Notice that provides guidance to the counties and counties are required to submit their CWS Disaster Response Plan on an annual basis.

The CWS Disaster Response Plan describes the responsibilities and actions required for locating and monitoring dependent and probationary children under the care or supervision of the CDSS. Disaster response plans include procedures describing how the county will do the following:

- Identify, locate, and continue availability of services for CWS children, probation children, non-minor dependents, including non-minor dependents residing in foster care, out-of-county placements, children placed in or out of California through the Interstate Compact on the Placement of Children, cross coordination with Tribal representative for Indian children in placements, and out-of-state non-minor dependents under county care or supervision who are displaced or adversely affected by a disaster;

- Respond appropriately to new CWS cases in areas adversely affected by a disaster and provide services in those cases;

- Address and provide care for unaccompanied minors;

- Remain in communication with caseworkers and other essential child welfare personnel who are displaced because of a disaster;

- Preserve essential program records; and

- Coordinate services and share information with other states and counties. Include a description of the process utilized by the county to ensure that information regarding children placed pursuant to the Interstate Compact on the Placement of Children occurs with both the sending state and the CDSS.

---

[1] Pursuant to the Child and Family Services Improvement Act of 2006, PL 109-288, Section 6 (16); Part B Section 422 of Title IV of the Social Security Act; and Senate Bill 703, Chapter 583, Section 29 (c) Statutes of 2007; and the WIC Section 16500.1(c)(1);

CDSS's Child Welfare Services Disaster Planning and Response Unit was created in 2021 to provide additional support during disasters to Child Welfare and Probation agencies across the state. The unit collaborates with all 58 counties to establish effective processes for making, activating, and operating emergency and disaster preparedness plans relating to children in placements under state care - from probation to foster care to out-of-county placements. The Disaster Planning and Response Unit has outlined four emergency management phases as follows:

- Preparedness Phase (including increased readiness): The preparedness phase involves activities taken in advance of an emergency and include mitigation, emergency/disaster planning, meeting with counties to review current CWS Disaster Response Plan and provide feedback, and public education. These activities develop operational capabilities and effective response to a disaster.

- Response Phase (including Pre-emergency, Emergency Response, and Sustained Emergency): When a large-scale disaster is inevitable, actions are precautionary and emphasize protection of life. Activities during this phase include outreach to county(ies) affected to ensure the safety of children/youth, families, and staff; and communicating and coordinating services and information with local government agencies and child welfare personnel in areas adversely affected by a disaster.

- Recovery Phase: During the recovery phase, procedures for the Disaster Planning and Response Unit include reviewing and updating the county Child Welfare Disaster Response Plan Template and Guide for improvements in disaster preparedness to better address the needs of all children/youth and their families.

- Mitigation Phase: Mitigation efforts occur both before and following disaster events and include eliminating or reducing the impact of hazards which exist with the State and are a threat to life and property. Mitigating these hazards, both before and after a disaster is particularly important when evaluating the impact on dependent and probationary children under the care or supervision of the State.

This bill seeks to build on response phase activities by providing the important aspect of funding to support the immediate needs of foster youth and their families during disasters.

Related/Prior Legislation:

AB 689 (Rubio, 2025) was identical to this bill and was vetoed by Governor Newsom.

SB 589 (Alvarado-Gil, 2023) was similar to this bill. The bill created a Child Welfare Disaster Response Program, which upon appropriation, would have allocated two million dollars from the General Fund to the Child Welfare Disaster Response Account to support the needs of foster children and youth and their caregivers during a disaster. SB 589 was held in the Assembly Appropriations Committee.

AB 1034 (Friedman, 2019) would have required every facility of each of the following types to have an emergency and disaster plans: community care facilities that serve children or nonminor dependents, resource families, certified or licensed foster family homes, small family homes, community care facilities that serve adults, residential care facilities for persons with chronic life-threatening illness, and child care centers. The bill would also have required the Community Care Licensing Division within CDSS to confirm during annual licensing visits that a plan is on file at the facility and includes the required content. AB 1034 held in the Assembly Appropriations Committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown ongoing General Fund costs, potentially low millions, to fund the proposed Child Welfare Disaster Response Account.
- CDSS anticipates minor and absorbable costs for state administration.

SUBJECT: Customer service chatbots

SOURCE: Communication Workers of America, District 9

DIGEST: This bill requires large private businesses, as defined, to provide customers with timely access to human customer service and support, as provided, and to disclose the use of customer service chatbots, as specified.

Senate Floor Amendments of 8/20/26 refine the definition of "regular business hours" and provide an alternative path to compliance.

ANALYSIS:

Existing law:

1) Defines artificial intelligence or "AI" as an engineered or machine-based system that varies in its level of autonomy and that can, for explicit or implicit objectives, infer from the input it receives how to generate outputs that can influence physical or virtual environments. (Government (Gov.) Code § 11546.45.5.)

2) Makes it unlawful for any person to use a bot to communicate or interact with another person in California online, with the intent to mislead the other person about its artificial identity for the purpose of knowingly deceiving the person about the content of the communication in order to incentivize a purchase or sale of goods or services in a commercial transaction or to influence a vote in an election. A person using a bot is not liable if the person discloses that it is a bot. This disclosure must be clear, conspicuous, and reasonably designed to inform persons with whom the bot communicates or interacts that it is a bot. (Business & Professions (Bus. & Prof.) Code § 17941.)

3) Defines "companion chatbot" as an AI system with a natural language interface that provides adaptive, human-like responses to user inputs and is capable of meeting a user's social needs, including by exhibiting anthropomorphic features and being able to sustain a relationship across multiple interactions. However, there are several exemptions included. (Bus. & Prof. Code § 22601.)

4) Requires an operator making a companion chatbot available, if a reasonable person interacting with a companion chatbot would be misled to believe that the person is interacting with a human, to issue a clear and conspicuous notification indicating that the companion chatbot is artificially generated and not human. (Bus. & Prof. Code § 22602(a).)

This bill:

1) Prohibits a large private business from representing that a customer service chatbot is a human. If a reasonable person interacting with the customer service chatbot is likely to be misled to believe that the person is interacting with a human, the business must provide a clear and conspicuous disclosure in the medium in which the customer service chatbot interacts with the customer that the customer service chatbot is artificially generated and not human.

2) Requires such businesses, during regular business hours, to provide customers who require customer assistance with goods or services offered by or provided from the large private business with a simple customer service feature on all

platforms through which the business provides customer service, including online chatbot customer service and telephonic customer service platforms, that allows customers to request to connect to a customer service agent. A large private business satisfies this subdivision if its customer service platform enables a customer to request a customer service agent through commonly understood commands, prompts, menu selections, or verbal requests during the customer interaction.

3) Requires these businesses to make a good faith effort to provide a customer requesting a customer service agent with one of the following:

   a) Connection to a customer service agent within 15 minutes of the request.

   b) A specific appointment time within one business day of the request at which a customer service agent will call or connect with the customer.

4) Provides that a large private business subject to Section 1707.2 of Title 16 of the California Code of Regulations, governing pharmacists, may satisfy the requirements in the preceding section by returning a phone call within one business hour.

5) Provides that a large private business shall make a good faith effort to ensure a customer is not placed on hold or made to wait for more than 15 minutes at any time after connection with a customer service agent, and that cumulative hold or wait times or escalation queues do not exceed more than one hour total.

6) Requires large private businesses who provide goods and services to customers in California through online platforms and who have a telephonic customer service platform to post their telephonic customer service telephone number clearly and conspicuously on their internet website.

7) Authorizes a public prosecutor to bring an action against a business in violation, seeking a civil penalty not exceeding $5,000 for an initial violation, and $10,000 for each subsequent violation.

8) Provides that the use of commercially reasonable and practicable standards that are designed and intended to achieve compliance shall satisfy the “good faith effort” requirements herein, and the inability to comply because of unforeseen circumstances beyond its reasonable control or other extraordinary situations, as provided, does not constitute a violation.

9) Does not require an operator who, as of January 1, 2027, does not utilize any telephonic customer services to customers, to provide telephonic customer service, provided that the business offers customer service methods by which the customer may promptly connect with a customer service agent consistent herewith.

10) Provides specified exemptions.

11) Provides that the duties, remedies, and obligations imposed by this chapter are cumulative to the duties, remedies, or obligations imposed under other law and shall not be construed to relieve a large private business from any duties, remedies, or obligations imposed under any other law.

12) Defines the relevant terms.

Background

Generative AI (GenAI) chatbots have become increasingly prevalent. They seek to offer consumers the benefits of convenience and personalized interaction. These chatbots are powered by large language models and are sophisticated enough for some to believe they are interacting with another human. These chatbots have been increasingly deployed in the customer service and support realm. This provides businesses with a cheaper alternative to human agents, however, many consumers have expressed frustration with seemingly endless or circular interactions with these customer service chatbots. Even when options to bypass such chatbots are provided, consumers are often left on hold for painfully long durations.

This bill seeks to address consumer frustrations with the provision of customer service and support. This bill targets large private businesses, those with over $500 million in gross revenue that provide goods and services to consumers. This bill first requires clear disclosures about the use of customer service chatbots. This bill then requires these businesses to provide easy access to human customer service within 15 minutes of a request, or a specific appointment time within one business day of the request at which a customer service agent will call or connect with the customer, except as provided. This bill is sponsored by the Communication Workers of America, District Council 9. It is supported by a number of labor groups, including the California Federation of Labor Unions. It is opposed by a number of industry associations, including Technet.

Comment

According to the author:

> Across industries, consumers increasingly report being unable to resolve basic issues because customer service systems rely heavily on automated chatbots and long telephone hold times. These systems often fail to understand complex or sensitive problems, repeat scripted responses, or disconnect calls without resolution — wasting hours of consumers' time and leaving critical issues unresolved. For Californians seeking help with housing services and appointments, utility services, health care, travel or essential purchases, the inability to reach a human representative can have serious consequences.
>
> Technology should make life easier — not lock people out of the help they need. When Californians reach out for customer support, they deserve timely, transparent access to a real human who can understand their situation and help solve the problem. AB 1609, the Right to Human Customer Service Act, applies to large businesses with over $500,000,000 in annual revenue and ensures Californians can reach a real person for customer service instead of being trapped in endless phone holds or frustrating AI chatbot loops.

FISCAL EFFECT: Appropriation: No Fiscal Com.:Yes Local:No

According to the Senate Appropriations Committee:

Potential costs to the Department of Justice (DOJ) of an unknown amount. Actual costs will depend on whether the Attorney General pursues enforcement actions, and, if so, the level of additional staffing DOJ needs to handle the related workload. If DOJ hires staff to handle enforcement actions authorized by this bill, the department would incur significant costs, likely in the low hundreds of thousands of dollars annually at a minimum. If DOJ does not pursue enforcement as authorized by this bill, the department would likely not incur any costs. (General Fund).

Cost pressure of an unknown but potentially significant amount to the courts to adjudicate any additional filings. Actual costs will depend on the number of cases filed and the amount of court time needed to resolve each case. An eight-hour court day costs approximately $10,500 based on the hourly rate of court personnel including at minimum the judge, clerk, bailiff, court reporter, jury administrator, administrative staff, and jury per-diems. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and

increase pressure to fund additional staff and resources. The FY 2026-27 Budget appropriated $70 million General Fund for this purpose (Trial Court Trust Fund, General Fund).

ARGUMENTS IN SUPPORT: The Communications Workers of America, District 9, the sponsor of this bill, writes:

"The use of AI driven customer service tools has increased in recent years. However, there are stipulations with these tools understanding complex situations. Consumers are often left on repetitive loops, with scripted responses, ultimately leading to customer frustration and unsolved issues. Additionally, these AI customer service tools require individuals to wait on hold for extended periods of time, sometimes being disconnected from the call without help. These issues are leading to wasted time, unresolved issues, and consumer frustration across California.

These challenges are not just minor inconveniences, they can have serious consequences. If individuals cannot connect effectively with the services and support they need, their health, employment, and ability to meet basic needs can be put at risk.

Not only are consumers being impacted by the increased use of AI customer service tools, but workers are too. These customer service professionals provide essential labor that cannot be fully understood by an automated tool. The expanding use of this technology, without proper protections, risks displacing workers.

AB 1609 establishes clear and reasonable standards to address these customer services issues by requiring large business providing goods and services in California to ensure access to human customer service during business hours. This helps ensure that automated tools are not a barrier to consumers receiving assistance."

ARGUMENTS IN OPPOSITION: A coalition of industry organizations, including the California Association of Collectors, writes:

"[R]igid time limits can pressure agents to prioritize speed over accuracy, increasing employee stress, the likelihood of errors, and potential data-security risks while diminishing service quality. The bill's timing requirements may also

constrain businesses' ability to triage customer contacts based on urgency, safety concerns, fraud risks, and other operational priorities.

Even with the June 10 amendments, AB 1609 continues to impose timing requirements that may not reflect the realities of customer-service operations across industries. Wait times are affected by factors such as call volume, emergency events, fraud-prevention measures, staffing needs, and the complexity of individual inquiries. A one-size-fits-all timing framework risks reducing flexibility and undermining service quality without necessarily improving consumer outcomes.

While the extended timeframes and "good faith effort" standard represent meaningful improvements, questions remain regarding implementation and whether these changes adequately address operational and compliance concerns. Accordingly, the "commercially reasonable and practicable" safe-harbor language and related liability revisions discussed above remain critical.

More fundamentally, AB 1609 continues to apply a largely uniform customer-service framework across industries with very different operational realities and regulatory obligations. Some companies handle highly sensitive data subject to strict federal and state requirements, while others manage situations that require careful triage through technology and specially trained personnel. Although the bill has made progress in recognizing these differences, additional narrowing of its scope remains necessary."

SUBJECT: Taxation: private detention facilities

SOURCE: State Superintendent of Public Instruction Tony Thurmond; California Immigrant Policy Center; Services, Immigrant Rights and Education Network

DIGEST: This bill imposes an annual tax on "private detention facility operators" equal to 25% of the operator's gross income derived from the operation of each "private detention facility" in California.

Senate Floor Amendments of 8/21/26 (1) Apply its tax to gross income, as defined, instead of gross receipts; (2) Lower the rate of tax from 50% to 25%; (3) Delay implementation from January 1, 2027, to July 1, 2028; (4) Provide that the tax applies each July 1st on a fiscal year basis for the previous 12-month period ending June 30th; (5) Set forth payment deadlines, return and registration requirements, and direct the California Department of Tax & Fee Administration (CDTFA) to authenticate returns and registration; (6) Ensure that this bill and AB 2465 (Ortega) do not create duplicative Funds.

ANALYSIS:

Existing law:

1) Enacts the Corporation Tax Law, which among other provisions, taxes net apportioned business income and allocated net nonbusiness income of corporations doing business in California at a rate of 8.84%, or imposes the $800 minimum tax, whichever is greater.

2) Applies the combined report method for corporate taxation, which requires a corporation computing its California tax liability to include the tax returns of each of its unitary subsidiaries and affiliates in one combined report.

3) Allows taxpaying corporations to elect to exclude the income and expenses of their foreign subsidiaries from their combined reports, called the "water's edge" election, with some exceptions.

4) Imposes several excise taxes, including on cigarettes and tobacco products, alcoholic beverages, motor vehicle and diesel fuel, cannabis, and electronic cigarettes, among others, which can contain provisions governing administration of the excise tax, such as requirements to register with the California Department of Tax and Fee Administration (CDTFA), enforcement, collections, penalties, and appeals, among others.

5) Enacts the Fee Collections Procedures Law (FCPL), which is the state's general purpose statute for CDTFA to administer special taxes and fees.

6) Requires the Department of Justice (DOJ) to report on immigration detention facilities operating in California.

7) Prohibits the California Department of Corrections and Rehabilitation (CDCR) from entering into, or renewing contracts with, private for-profit prisons after January 1, 2020, and eliminates their use by January 1, 2028.

This bill:

1) Imposes an annual tax upon all "private detention facility operators" equal to 25% of the operator's gross income derived from or attributable to the state, defined by reference to the Personal Income and Corporation Taxes, derived from the operation of each "private detention facility" in California, commencing July 1, 2028. The tax applies each July 1st on gross income derived in the prior fiscal year, beginning on July 1 and ending June 30th.

2) Provides that the tax applies regardless of whether the contracting agency is federal, state, or local.

3) Directs CDTFA to administer and collect the tax imposed by this bill using the FCPL and authorizes CDTFA to issue regulations to implement this bill, including emergency regulations.

4) Provides that the tax is due and payable annually on or before July 31st following the close of the prior fiscal year and must be accompanied by a return filed using electronic media.

5) Requires private detention facility operators to register with CDTFA.

6) Directs CDTFA to authenticate the return and the registration in a form and manner according to methods it prescribes, including electronic media.

7) Requires CDTFA to deposit revenues from the tax into the Due Process for All Fund, which this bill creates in the State Treasury. However, the measure does not create the Fund if AB 2465 (Ortega) is also enacted.

8) Provides that the Legislature can appropriate money from the Fund for immigration-related services.

9) Defines "Private detention facility" by reference to the Government Code.

Background

Private prisons. The federal government contracts with private detention facilities throughout the country to house immigration detainees and federal criminal pretrial detainees. On May 15, 2026, Attorney General Rob Bonta released the Department of Justice (DOJ)'s fifth report on immigration detention facilities operating in California, where noncitizens are detained by Immigration and Customs Enforcement, pursuant to a requirement enacted by the Legislature.

The report found that conditions in these facilities had largely worsened as the Trump Administration's mass deportation campaign led to overcrowding and strained resources, especially impacting access to medical care and conditions of confinement. Tragically, there were six deaths of detainees between September 2025 and March 2026 — the highest number since the DOJ started conducting reviews in 2017. These deaths, coupled with DOJ's findings of substandard conditions that fail to meet ICE's own detention standards, raise serious concerns about these facilities' ability to safely detain a growing detainee population and underscore the need for greater accountability and oversight.

According to USA Spending, the federal government has paid out $604.9 million in contracts related to the operation of 12 California-based private detention

facilities, operated by CoreCivic (five), GEO Group (six), and Management and Training Corporation (one). From 2023 to 2024, outlays rose from $116.0 million to $321.2 million, and in 2025, they increased further to $388.3 million. According to IBISWorld, revenue for California's private detention facilities is projected to reach $600 million in the 2027-28 fiscal year, followed by a 2% decline in subsequent years.

Comment

Precedents. AB 1633 sets at least two important precedents. First, the measure takes one item of income that is included for the purpose of determining net income for California's Corporation Tax – gross income derived from the operation of private detention facilities in California – and subjects it to a gross receipts tax where taxpayers can neither deduct expenses nor apply credits. As such, AB 1633 would treat one item of business income differently than all others. Additionally, because the measure does not exclude the gross income subject to its tax from the Personal Income and Corporation Taxes, the same items of income would be subject to tax twice. Second, proceeds of the state's general taxes – Personal Income, Corporation, and Sales and Use – flow to the General Fund, from which the Legislature appropriates them in the Budget Act. Although similar to other excise taxes, AB 1633 directs its revenues outside the Budget Act to the Due Process for All Fund, only allowing the Legislature to then appropriate those funds for purposes of immigration-related services. The Legislature can appropriate any funds it wishes for those purposes by appropriation or the Budget Act. Lastly, the measure isn't clear whether additional revenues are subject to Proposition 98's K-14 educational guarantee or whether Proposition 2's Budget reserve must be satisfied before the Controller transfers moneys from the General Fund to the Due Process for All Fund.

Related legislation.

AB 43 (Thurmond, 2017), AB 2303 (Thurmond, 2018), and AB 2560 (Thurmond, 2018) proposed taxes measured by the value of the contract between a person and the CDCR. None of these measures advanced from the Assembly Revenue & Taxation Committee.

AB 2465 (Ortega), which would make ineligible for any tax credit under the Personal Income Tax or Corporation Taxes specified business entities that are directly invested in, own, operate, or manage a private detention facility or that contract with a private detention facility or agency engaging in immigration enforcement for the purpose of aiding in or furthering immigration enforcement. AB 2465 directs the Franchise Tax Board (FTB) to estimate the amount of tax

collected attributable to disqualified taxpayers being ineligible to claim credits, and report the estimate to the Controller. AB 2465 similarly creates the Due Process for All Fund in the State Treasury, and directs the Controller to transfer from the General Fund to the Fund an amount equal to FTB's estimate.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CDTFA estimates that this bill would result in a revenue gain of $177 million in 2027-28 (Due Process for All Fund). Annual revenue gains thereafter would likely be similar, to the extent such contracts continue in the State.

- CDTFA indicates that it would incur administrative costs of $257,000 in 2026-27, $1.5 million in 2027-28, $131,000 in 2028-29, $115,000 in 2029-30, and $126,000 annually thereafter, to implement the provisions of the bill. Cost drivers would include identifying and notifying taxpayers, creating a new tax return, programming computer systems, revising publications, developing special notices and tax guides, developing regulations, preparing guidelines for staff, and answering numerous questions from operators and the public (Due Process for All Fund).

One Individual

OPPOSITION: (Verified 8/24/26)

San Fernando Valley Alliance
One Individual

ARGUMENTS IN SUPPORT: According to the author "Corporations such as GEO Group and CoreCivic continue to profit from operating private, for profit detention facilities in California, despite longstanding concerns about unsafe conditions, inadequate medical care, and lack of accountability in civil detention settings. In 2026 alone, at least six individuals have died in ICE custody nationwide, underscoring the serious risks associated with this system. California has a duty to protect the health and safety of its residents, and the state has a responsibility to ensure that corporations profiting from private detention are held accountable. AB 1633 seeks to do so by imposing a gross receipts tax on private detention operators and directing the revenue towards immigration services and due process protections."

ARGUMENTS IN OPPOSITION: According to the San Fernando Valley Alliance, "this is an obvious punitive tax on contractors that are fulling federal enforcement of congressional approved legislation, congressional funded and signed off by the President of the United States currently, and Presidents prior. The congressional members that approved of the legislation and funding where majority elected representatives of their districts, as was the presidents elected by the people. It is also a punitive tax against those fulfilling the will of the majority of people of the United States who voted for this administration to aggressively enforce immigration codes of the United States. If this legislation passes, is signed in to tax code and withstands court challenges, it may results in these facilities leaving California. While I don't think the majority of the legislature will care about the increased tax revenue and local economic activity that will be lost from the closures, it might want to think about family members, loved ones, and legal representatives of those being detained and going through their due process hearings. Forcing detention centers out of state will make the detention center farther from love ones to either visit and or check in on the person being detained. It will also make it harder and more expensive for California lawyers representatives to do in person representation, possibly forcing those lawyers to do remote representation."

SUBJECT: California Restaurant Reservation AntiPiracy Act

SOURCE: California Restaurant Association

DIGEST: This bill prohibits a person from selling or transferring, or facilitating the sale or transfer of, a restaurant reservation for an amount higher than the price they paid for the reservation, unless the person has a written agreement with the restaurant expressly permitting them to charge a higher amount.

ANALYSIS:

Existing law:

1) Prohibits a person from using, without the consent of the registrant, any reproduction, counterfeit, copy, or colorable imitation of a mark registered under the Model State Trademark Law in connection with the sale, distribution,

offering for sale, or advertising of goods or services if such use is likely to cause confusion or mistake, or to deceive as to the source of origin of the goods or services. (Bus. & Prof. Code, § 14245(a)(1).)

2) Establishes the Unfair Competition Law (UCL), which provides a statutory cause of action for any unlawful, unfair, or fraudulent business act or practice and unfair, deceptive, untrue, or misleading advertising, including over the internet. (Bus. & Prof. Code, div. 7, pt. 2, ch. 5, §§ 17200 et seq.)

3) Prohibits a food delivery platform, as defined, from arranging for the delivery of an order from a food facility without first obtaining an agreement with the food facility expressly authorizing the food delivery platform to take orders and deliver meals prepared by the food facility. (Bus. & Prof. Code, § 22599(a).)

4) Prohibits a person from selling, or offering to sell, an appointment with the Department of Motor Vehicles. (Veh. Code, § 1680(a).)

This bill:

1) Establishes the California Restaurant Reservation AntiPiracy Act (Act).

2) Defines "restaurant" as a retail food establishment in this state that prepares, serves, and vends food directly to the customer.

3) Provides that a person shall not sell or transfer, or facilitate the sale or transfer of, a reservation for a restaurant for an amount higher than the person paid to acquire the reservation.

4) Provides that 3) does not apply if the person has a written agreement with the restaurant that expressly authorizes the person to charge the higher amount.

5) Provides that a person who violates the Act or causes another person to violate the Act shall be liable for the following, as applicable, in a civil action brought by the Attorney General, or any county or city attorney, in a court of competent jurisdiction:

   a) A civil penalty not to exceed $1,000 per violation.

   b) Injunctive or declaratory relief.

   c) Reasonable attorney's fees.

6) Provides that an individual or entity who suffers actual harm as a result of a violation of the Act may bring a civil action to recover all of the following:

a) Actual damages.

b) Reasonable attorney's fees and costs.

c) Injunctive or declaratory relief.

d) Any other relief the court deems proper.

7) Provides that any civil penalty recovered by the Attorney General pursuant to 5) shall be deposited in the Public Rights Law Enforcement Special Fund, as specified.

Comments

Restaurant reservations benefit restaurants and consumers. The restaurant gets a sense of how busy it's likely to be on a given night, allowing it to more efficiently plan seating charts and divide up tables between servers. The consumer gets to show up for dinner without having to worry about a wait for a table. Because reservations are a win-win, restaurant reservations are virtually always free, though some restaurants require a deposit or charge a no-show fee to reduce their losses in the event a diner doesn't make it. Increasingly, restaurants offer reservations through online platforms; in theory, letting consumers make reservations online at any time, and letting them see available dates and times for reservations, is more convenient for both the restaurant and the consumer.

Recently, however, a secondary market for reservations has sprung up to profit off of free reservations. These "reservation marketplaces" advertise themselves as merely connecting diners who need to offload a reservation—say, because a conflict arose on the reservation date—with diners who want a reservation at the same restaurant. But in practice, these marketplaces make it profitable for individuals—often, but not always, using bots—to scoop up all available free reservations, so that the only way a diner can get a reservation is to pay for it. The restaurant still bears all the risk and downside of a missed reservation; the consumer has to pay for a free thing; the only winner is the reservation pirate who gamed the system.

This bill puts a stop to reservation pirating in the state by prohibiting any person from selling restaurant reservations for more than what was paid for the reservation, unless the person has a written agreement with the restaurant to do so. Under this bill, therefore, reservation resales would still be allowed in two circumstances: when the reservation is resold at its original cost (thereby allowing consumers to recoup deposits they would otherwise lose), or when the reservation is resold with the consent of the restaurant (thereby allowing restaurants to choose

whether, and on what terms, to work with reservation resellers, and giving restaurants a greater degree of certainty regarding reservations). The bill is enforceable by a public prosecutor and creates a private right of action for persons actually harmed by a violation.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the fiscal effect is as follows:

> Unknown, potentially significant workload cost pressures to the state funded trial court system to adjudicate any civil cases filed as a result of this bill (Trial Court Trust Fund, General Fund). The fiscal impact of this bill to the courts will depend on many unknowns, including the number of cases filed and the factors unique to each case. An eight-hour court day costs approximately $8,000 in staff in workload. If court days exceed 10, costs to the trial courts could reach hundreds of thousands of dollars. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources and to increase the amount appropriated to backfill for trial court operations.

ARGUMENTS IN SUPPORT: According to a coalition of this bill's supporters:

> Eating establishments constantly look for ways to help maximize occupancy in their businesses, which increasingly includes the use of integrated reservation systems. While restaurateurs use these systems to make booking reservations seamless for customers, there has been a rise in unauthorized third-party

reservation services that use bots and fake profiles to hoard reservations and then sell them for a profit – monetizing a restaurant's inventory of tables in a dining room and creating arbitrary economic barriers for guest access.

Restaurants invest in staffing, product procurement, developing brand reputation, and reservation services. When these third parties insert themselves into that system without an agreement and intrude on the complex system for managing reservations, it creates several hardships for consumers and restaurants. Firstly, customer confusion – guests may assume that the establishment is involved in the reservation sales, possibly devaluing the experience for the guest because of the increased expectations that come with an inflated price. Consequently, this has created a system where only people with the means to pay for inflated reservation prices can acquire them and enjoy these restaurants.

Moreover, operational disruptions may arise from the mishandling of reservations by these third parties, potentially harming the guest experience and the reputation of the restaurant. Similarly, when these third parties are unable to resell reservations, nobody shows up – resulting in a situation where employees lose a tipped-earning opportunity, and the restaurants experience a revenue loss. These no-shows are especially harmful for neighborhood restaurants that rely on legitimate reservations to plan for anticipated costs.

Ultimately, unauthorized third-party reservation companies profit by charging exorbitant fees for reservations while making no investment or taking any risk in that same restaurant. AB 1640 is a sensible measure that helps restore control of a dining room back to restaurant operators, while removing artificial economic barriers of entry for potential guests.

SUBJECT: Wildfires: contamination standards

SOURCE: Eaton Fire Residents United

DIGEST: This bill requires the Department of Toxic Substances Control (DTSC) to adopt regulations that specify standards for investigation, environmental testing, and clearance to guide the removal of contamination from wildland urban interface (WUI) fire debris in residential areas after a wildfire.

ANALYSIS:

Existing federal law:

1) Establishes the federal Toxic Substances Control Act (TSCA), which, among other things, empowers the United States Environmental Protection Agency (U.S. EPA) with the authority to require reporting, record-keeping, and testing requirements, and restrictions relating to chemical substances and mixtures. (15 United States Code (USC) §§ 2601 et seq.)

2) Establishes, under TSCA, dust-lead hazard standards, post-abatement clearance levels, and abatement requirements for lead-based paint in certain residential structures. (40 Code of Federal Regulations (CFR) §§ 745.61 et seq.)

Existing state law:

1) Establishes the Hazardous Waste Control Law (HWCL) to authorize the Department of Toxic Substances Control (DTSC) to regulate the management of hazardous wastes in California. (Health and Safety Code (HSC) §§ 25100 et seq.)

2) Defines "hazardous waste" as waste, that, because of its quantity, concentration, or physical, chemical, or infectious characteristics:

   a) Causes, or significantly contributes to, an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or

   b) Poses a substantial present or potential hazard to human health or the environment, as specified. (HSC § 25141(b))

3) Requires the DTSC, under the HWCL, to adopt, and revise when appropriate, standards and regulations for the management of hazardous wastes to protect against hazards to public health, domestic livestock, wildlife, or the environment. (HSC § 25150)

4) Establishes DTSC's Toxicity Criteria for Human Health Risk Assessments, Screening Levels, and Remediation Goals (Toxicity Criteria Rule) for hazardous waste and hazardous substance cleanup sites; requires, among other things, that human health risk assessment calculations—including, but not limited to, all cancer risk and non-cancer hazard screening levels and corrective action objectives—use the toxicity criteria specified under the Toxicity Criteria Rule and attain human health protection, as specified. (22 California Code of Regulations (CCR) § 68400.5).

5) Specifies, under the Toxicity Criteria Rule, criteria for all human health risk assessments, human health risk-based screening levels, and human health risk-based remediation goals statewide, for the cleanup of releases of hazardous waste or hazardous substances to the environment. (22 CCR §§ 69020-69022)

6) Defines, under DTSC's health standards for the management of hazardous waste, "remediation goal" to mean a contaminant concentration that is media-specific (e.g., for air, groundwater, surface water, or soil affected by a release),

site-specific, protective of human health and the environment, and used as a final cleanup goal for a response or corrective action. (22 CCR § 69020(c)(5))

7) Defines, under DTSC's health standards for the management of hazardous waste, "screening level" to mean a risk-based, contaminant concentration, calculated as specified and considered to be protective for humans (including sensitive groups) over a lifetime. (22 CCR § 69020(c)(6))

This bill:

1) Provides that there is a nonrebuttable presumption that a structure is safe for human occupancy only if the level of lead on an indoor surface meet specified conditions and authorizes DTSC to adopt regulations for standards that are stricter than these specified conditions;

2) Requires DTSC to adopt emergency regulations specifying the science-informed, health-based standards for investigation, environmental testing, and clearance, to guide the adequate removal of lead and TEM-identified asbestos (asbestos) inside and outside structures in residential areas after a wildfire in consultation with relevant coordinating agencies no later than July 1, 2027.

3) Requires the emergency regulations to include all of the following:

   a) A rebuttable presumption that if the WUI debris is present in a structure after a WUI fire, any identified hazardous contamination in the WUI impact zone is the result of that WUI fire;

   b) Requirements for testing lead and asbestos in specified locations of a surviving structure;

   c) Specified requirements for preremediation testing to understand where contaminants are present to guide cleanup efforts and ensure worker safety, and post-remediation testing to confirm that lead and asbestos have been removed from the structure and that clearance has been achieved, or to determine that further remediation efforts are required;

   d) Preremediation and postremedation testing guidelines establishing protocols and methodologies to evaluate specified WUI fire hazards.

   e) The standards set forth in DTSC's Residential Soil Evaluation Guidance for the 2025 LA Wildfires; and

f) Guidance on the use of other restoration strategies and methods and routines to reduce indoor exposures to the residual contamination following remediation.

4) Requires DTSC to adopt regulations specifying science-informed, health-based standards for hazardous chemicals, including levels that are required to achieve clearance for a structure and standards for investigation, environmental testing, and removal of hazardous chemicals inside and outside of a structure in a residential area no later than July 1, 2028.

5) Requires the adopted regulations to include all of the following:

a) The emergency regulations adopted for standards for levels of lead on an indoor surface;

b) A rebuttable presumption that if WUI debris is present in a surviving structure after a WUI fire, that any identified hazardous contamination in the WUI impact zone is the result of that fire;

c) Requirements for testing in specified locations of a surviving structure;

d) Specified requirements for preremediation testing to understand what hazardous chemicals are present to guide cleanup efforts and ensure worker safety, post-remediation testing after cleanup to confirm that WUI debris and contamination have been removed from the structure or to determine that further remediation efforts are required, and health-based thresholds for specified WUI fire hazards; and

e) Standards to ensure that individuals can inhabit a structure safely, including steps to ensure that a structure is habitable to pre-fire conditions and has reached clearance before a resident is required to move back into the resident's home or return to a structure.

6) Requires DTSC to determine the downwind ash zone for each WUI fire using methodologies and data sources, including maps, from the National Oceanic and Atmospheric Administration, within 45 days of the wildfire reaching 100% containment.

7) Defines “clearance” to mean a formal determination that a home, school, workplace, or other structure has been cleared of WUI debris and that any remaining hazardous chemicals meet the standards established in regulation.

8) Makes related findings and declarations.

Background

Fires in the wildland urban interface. Due to climate change, the frequency and severity of wildfires have been increasing in the state and globally.[1] Four out of the five most destructive wildfires in California history have occurred in the last 10 years.[2] In 2025, the Eaton and Palisades fires in Los Angeles County destroyed over 16,000 structures and burned nearly 38,000 acres combined; in 2018, the Camp Fire in Butte County destroyed nearly 19,000 structures and burned 153,000 acres; and in 2017, the Tubbs Fire in Napa and Sonoma counties destroyed more than 5,500 structures and burned nearly 37,000 acres.

These fires are all examples of WUI fires, which means a zone of transition between unoccupied land and human development. It is known as the line, area, or zone where structures and other human development meet or intermingle with undeveloped wildland or vegetative fuels.[3] California is first among the top 5 states with the most homes in WUI areas, with 30-45% of all homes in the state in WUI areas.

Where there's smoke, there's toxins. When fires in the WUI burn into densely populated areas, wildfires can transition into urban conflagrations, in which fires spread rapidly from structure-to-structure. In the wake of these fires, both the interiors and exteriors of structures can become polluted by smoke residue, ash, and debris, which can contain toxic chemicals. The smoke from these fires doesn't just consist of the chemicals from plant-fueled fires, but also of various toxic compounds from lead-based paint, lithium batteries, vinyl siding, fiberglass insultation, electrical wiring, rubber tires, and more.[4]

Fires have been blamed for a long list of health illnesses. Wildland fire smoke has been linked to increased hospital admissions for asthma, strokes, and heart attacks. House fires have been associated with higher levels of cancer in firefighters. But new hazards arise when these types of fires are combined and amplified by burning entire neighborhoods. Health risks associated with WUI fire toxicants can persist beyond the active burning of the fire, due to contamination of the ecosystem and built environment. Exposure to these toxicants and health impacts can also extend

well beyond the WUI communities, as smoke can be transported for hundreds to thousands of kilometers.[5]

Studies have reported that several types of chemicals can be found at elevated concentrations inside of structures following WUI fires, including volatile organic compounds (VOCs) and heavy metals.[6,7,8] Reports and independent studies have also demonstrated that unsafe levels of toxins can remain in homes after professional cleaning and can be redistributed throughout the home by the HVAC systems.[9] Some types of contamination from WUI fire smoke damage may cause permanent physical damage to property and pose potential acute and chronic health impacts if it goes without sufficient remediation.[10]

For homes that remain standing but have been impacted by WUI fire smoke and debris, there are no uniform state or federal standards pertaining to investigation, testing, and remediation for indoor chemical hazards. Residents returning to their homes have reported feeling concerned about whether it is safe to do so. In the absence of such standards, various entities have developed professional standards and certifications to guide the work of remediation and testing by contractors and hygienists, as well as recommendations for residents. Some guidance has been released from the state for soil contamination following WUI fires.[11] The state has not released similar guidance for indoor contaminants. This bill creates standards for investigation, environmental testing, and clearance to remove contamination, as specified, inside and outside of residential structures following a WUI fire.

Smoke Claims and Remediation Task Force. Out of recognition of the need for statewide standards for investigating and addressing smoke damage, CDI established the Smoke Claims and Remediation Task Force (Task Force) in May 2025. Key takeaways of the report from the Task Force highlighted areas of agreement and disagreement on how to address smoke damage. There was general consensus regarding the relatively greater potential for harm from toxins resulting from WUI fires; the need for standards for contaminants of concern in addition to existing standards; the utility of a tiered classification system for smoke damage

claims with varying protocols; and the importance of training and certification programs for personnel involved in the insurance claim and remediation process, including, but not limited to insurance adjusters, industrial hygienists, remediation experts, and testing laboratories.

Areas of contention included the necessity for pre-remediation testing; the applicability of additional remediation and repeated clearance testing under an insurance claim; and the development of the tiered classification system for smoke damage claims and the activities that apply to the varying protocols. The provisions of this bill reflect some of the more cautious perspectives expressed during the Task Force's activities. For example, the presumptions of safety and attribution in this bill could require additional testing and remediation to achieve what is considered an acceptable level for clearance.

While this bill does not directly address how the standards would apply in an insurance context, its implications should be considered within the broader policy framework of insurance to address smoke damage. There are broad, yet uncertain, implications to various entities that testing and remediation requirements would apply to, including homeowners, schools, and businesses. The presumptions warrant considerations within each of those contexts, and it is unclear how the regulations would apply them. A related bill, AB 1795 (Gipson, 2026), does address how health-based standards would apply within an insurance context in addition to the policy solutions set forth in this bill, however duplicative efforts between these two bills would need to be resolved.

> [NOTE: See the Senate Environmental Quality Committee analysis for detailed background of this bill.]

Comments

1) *Purpose of Bill.* According to the author, "The 2025 Los Angeles Wildfires exposed the enormous gaps in our wildfire recovery protocol, specifically around testing and remediation for smoke damaged properties. There are currently no statewide standards for how to handle smoke damaged homes, what contaminants to test for, and what levels are unsafe for re-occupancy. This bill makes one thing clear: when it comes to our families' health we trust science. AB 1642 will create a statewide scientific standard for when it's safe to return to a home after an urban wildfire. Public health will be the standard, not the exception."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DTSC estimates one-time costs of at least $1.8 million in fiscal year 2027-28 (Toxic Substances Control Account [TSCA]), which includes funding for research as well as regulation development and adoption.

- The California Department of Insurance (CDI) estimates ongoing costs of $727,5000 in fiscal year 2026-27, $1.4 million in 2027-28, and $1.2 million annually thereafter (Insurance Fund—Proposition 103 sub-account) to implement the provisions of this bill. CDI notes that Proposition 103 funds may not be able to absorb these additional costs, and that these costs would put additional pressure on Proposition 103, which could accelerate the need for a fee increase in the future.

- The Office of Environmental Health Hazard Assessment (OEHHA) estimates ongoing costs of $1.2 million (General Fund) to maintain and update standards once they are developed, as needed and supported by the science, or the identification and development of additional needed standards as new WUI-related fire hazards are identified.

SUBJECT: Juvenile facilities: visitation

SOURCE: Hoops 4 Justice; Urban Peace Institute

DIGEST: This bill establishes the right of youth confined in juvenile facilities to engage in certain types of consensual physical contact with visitors during in-person visits, as specified.

ANALYSIS:

Existing law:

1) Provides that the purpose of the juvenile court system is to provide for the protection and safety of the public and each minor under the jurisdiction of the juvenile court and that minors under the jurisdiction of the juvenile court who are in need of protective services shall receive care treatment and guidance consistent with their best interest and the best interests of the public. (Welfare & Institutions (Welf. & Inst.) Code, § 202, subds. (a), (b).)

2) Authorizes the court to place a ward of the court in juvenile facility, as specified. (Welf. & Inst. Code, § 726.)

3) Defines "juvenile facility" to mean a juvenile hall, juvenile camp or ranch, a facility of the California Department of Corrections and Rehabilitation (CDCR), Division of Juvenile Facilities, a regional youth educational facility, a youth correctional center, a juvenile regional facility or any other local or state facility used for the confinement of minors or wards. (Welf. & Inst. Code, § 208.3, subd. (a).)

4) Provides that juvenile halls shall not be deemed to be, nor be treated as, penal institutions and that juvenile halls shall be safe and supportive homelike environments. (Welf. & Inst. Code, § 851.)

5) Requires the Board of State and Community Corrections (BSCC) to adopt minimum standards for the operation and maintenance of juvenile halls for the confinement of minors. (Welf. & Inst. Code, § 210.)

6) Establishes the Youth Bill of Rights, which applies to youth confined in a juvenile facility, and provides youth have specified rights. (Welf. & Inst. Code, § 241.71.)

7) Provides that it is the policy of the state that all youth confined in a juvenile facility have specified rights, including, among others:

    a) To maintain frequent and continuing contact with parents, guardians, siblings, children, and extended family members, through visits, phone calls, and mail. Specifies that youth may be given access to computer technology for maintaining relationships with family as an alternative, but not as a replacement for, in-person visiting.
    b) To not be deprived of contact with parents, guardians, family, or attorneys as a disciplinary measure.
    c) To information about their rights as parents, including available parental support, reunification advocacy, and opportunities to maintain or develop a connection with their children. (Welf. & Inst. Code, § 241.71, subds. (g), (m), (o).)

This bill:

1) Establishes a right for all youth confined in a juvenile facility to have the right to engage in consensual physical contact with visitors during in-person visits that a reasonable person would find appropriate under the circumstances, including hugging at the beginning and end of the visit and holding hands.

2) Prohibits physical contact from being restricted as a disciplinary measure.

3) Requires that limitations to physical contact during in-person visits is only implemented when a significant safety and security concern is present, including pursuant to any court-ordered restrictions on visitations or visitors for a youth confined in a juvenile facility or a temporary and specific health concern. Requires that physical contact is only temporarily restricted for a specific youth or visitor as necessary to address the significant safety and security concern.

4) Requires that all significant safety and security concerns and subsequent contact limitations to be documented in detail, including the duration of the contact limitation and any additional accommodations or security measures implemented to facilitate a return to physical contact visits.

5) Requires that all juvenile facilities establish regulations and procedures for in-person visitation consistent with the requirements in the bill.

Background

SB 518 (Migden, Chapter 649, Statutes of 2007), established the Youth Bill of Rights which enumerates several rights for youth confined in any juvenile facility within the state, including the right to live in a safe, healthy, and clean environment; to be free from various forms of abuse; to receive adequate and healthy meals, clean water at any time, timely access to toilets, access to daily showers, sufficient personal hygiene items, clean bedding, and clean clothing in good repair; to receive adequate, appropriate, and timely medical, reproductive, dental, vision, and mental health services provided by qualified professionals; to not be searched for the purpose of harassment or humiliation, a form of discipline or punishment, or to verify the youth's gender; to receive a rigorous, quality education; and to have daily opportunities for age-appropriate physical exercise and recreation, among others. (Welf. & Inst. Code, § 241.71.) Of relevance to this bill, the Youth Bill of Rights provides for the right to maintain frequent and continuing contact with parents, guardians, siblings, children, and extended family members through visits, and the right to not be deprived of contact with parents,

guardians, family, or attorneys as a disciplinary measure. (Welf. & Inst. Code, § 241.71, subds. (g), (m).)

The BSCC establishes minimum standards for juvenile facilities. Existing BSCC regulations require juvenile facilities to develop and implement written policies and procedures for visiting. Youth must be allowed to receive visits by parents, guardians, and the youth's children. (California Code of Regulations (Cal. Code Regs.), tit. 15, § 1374.) Regulations authorize visits with other family members and other supportive adults. Regulations require visitation to occur at reasonable times unless restrictions are necessary to maintain order and security. (*Ibid.*) Regulations prohibit a visitor from being denied visitation solely based on the visitor's criminal history unless staff determine that the visitor would be a safety risk to youth or staff in the facility. (*Ibid.*) Facilities are required to provide opportunities for at least two hours of visitation per week, and facility staff are prohibited from monitoring conversations during visitation unless there is a security or safety need. (*Ibid.*) Finally, facilities may not replace in-person visitation with technological alternatives. (*Ibid.*)

This bill establishes the right for youth confined in a juvenile facility to engage in consensual physical contact with visitors during in-person visits. This bill specifies that the physical contact is contact "that a reasonable person would find appropriate under the circumstances, including hugging at the beginning and end of the visit and holding hands."

This bill allows for limitations on this right but provides that limitations can only be implemented when a significant safety and security concern is present. This bill specifies that a safety or security concern could include a court-ordered restriction on visitation or visitors for a youth as well as a temporary and specific health concern. This bill provides that limitations on the right to physical contact during in-person visits can only be restricted temporarily for a specific youth or visitor as necessary to address the significant safety and security concern.

This bill additionally requires that all significant safety and security concerns and subsequent contact limitations are documented in detail, including the duration of the contact limitation and any additional accommodations or security measures implemented to facilitate a return to physical contact visits. Finally, all juvenile facilities must establish regulations and procedures for in-person visitation consistent with the requirements outlined in this bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

Likely major costs to county probation departments to provide the right to consensual physical contact in juvenile facilities. Expanded physical contact allowances and the requirement that such contact shall be permitted during in person visits may require operational adjustments to maintain institutional safety and security. These costs, possibly reimbursable by the state could be both major at the local level (Los Angeles County is estimating up to $1 million annually) and greater in the aggregate statewide. Costs will depend on whether the duties imposed by this bill constitute a reimbursable state mandate, as determined by the Commission on State Mandates. (General Fund).

SUBJECT: Rental vehicles: law enforcement

SOURCE: Author

DIGEST: This bill requires any privately owned vehicle rented by, or furnished to, any federal, state, or local law enforcement agency for use in detaining, arresting, or transporting persons suspected of violating any law to display a temporary decal displaying the agency name and logo, as specified.

ANALYSIS:

Existing law:

1) Requires every authorized emergency vehicle to be equipped with at least one steady burning red warning lamp visible from at least 1,000 feet to the front of the vehicle, as specified. (Vehicle (Veh.) Code § 25252.)

2) Provides that a rental company and a renter may agree that the renter will be responsible for no more than all of the following:
   a) Physical or mechanical damage to the rented vehicle up to its fair market value, as determined in the customary market for the sale of that vehicle, resulting from a collision, regardless of the cause of the damage;
   b) Loss due to theft of the rented vehicle up to its fair market value, as determined in the customary market for the sale of that vehicle, provided that the rental company establishes by clear and convincing evidence that the renter or the authorized driver failed to exercise ordinary care while in possession of the vehicle, as specified;
   c) Physical damage to the rented vehicle up to its fair market value, as determined in the customary market for the sale of that vehicle, resulting from vandalism occurring after, or in connection with, the theft of the rented vehicle;
   d) Physical damage to the rented vehicle up to a total of five hundred dollars ($500) resulting from vandalism unrelated to the theft of the rented vehicle;
   e) Actual charges for towing, storage, and impound fees paid by the rental company if the renter is liable for damage or loss; and
   f) An administrative charge, which includes the cost of appraisal and all other costs and expenses incident to the damage, loss, repair, or replacement of the rented vehicle. (Civ. Code § 1939.03.)

3) Specifies the content of optional damage waivers in a rental car contract. (Civil (Civ.) Code § 1939.09 (c).)

4) Defines the following terms, for the purposes of various provisions regulating vehicle rentals:
   a) “rental company” to mean a person or entity in the business of renting passenger vehicles to the public;
   b) “renter” to mean any person in a manner obligated under a contract for the lease or hire of a passenger vehicle from a rental company for a period of less than 30 days. (Civ. Code § 1939.01.)

This bill:

1) Makes various findings and declarations related to public safety and the need to appropriately mark rental vehicles used by law enforcement agencies.

2) Specifies that any privately owned vehicle rented by, or furnished to, any federal, state, or local law enforcement agency for the use of detaining, arresting, or transporting persons who have violated, or are suspected of having violated, any law, must be required to have a temporary decal displaying the agency name and logo.

3) Requires that the indicia or name of the governmental entity operating the vehicle be displayed in sharp contrast to the background on the front door panels and must be of such size, shape, and color as to be readily legible during daylight hours from a distance of 50 feet. Requires the governmental entity to create and affix the temporary decal to the vehicle.

4) Specifies that the requirement described in (2) and (3), above, does not apply to:
   a) an officer engaged in plainclothes operations;
   b) exigent circumstances involving an imminent danger to persons or property, the escape of a perpetrator, or the destruction of evidence, including if the officer is responding while off duty;
   c) a Special Weapons and Tactics or tactical team unit that is actively performing their tactical team responsibilities, including predeployment, staging, and training use;
   d) an officer engaged in protective operations involving elected officials, judicial officers, or other designated dignitaries if the display of identification would compromise the safety, anonymity, or tactical effectiveness of the protection detail;
   e) an officer engaged in surveillance, active undercover operations, or investigative activities; or
   f) when the vehicle is used solely for the transport of a person who is already in lawful custodial status following arrest pursuant to a judicial warrant issued by a court of competent jurisdiction, or pursuant to a judicially issued extradition order, and is being transported to or from a custodial facility or transportation hub, where the officer reasonably determines that the display of a decal would compromise officer safety, public safety, or the security of the person being transported, as specified.

5) Specifies that a failure to display a decal in accordance with these provisions shall subject the entity renting the vehicle to liability to be enforced in a civil action by the Attorney General, a district attorney, county counsel, or a city

attorney. Permits such suits to be for injunctive or declaratory relief, and provides that a prevailing party is entitled to all reasonable attorney's fees and costs.

6) Requires the terms and conditions of the rental car contract to specify that compliance with the temporary decal requirement is mandatory, and permits the contract to include a term requiring the law enforcement agency to indemnify the owner of the private vehicle.

7) Specifies that these provisions do not apply to any rental car contract entered into prior to January 1, 2027.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Up to $1.4 million in FY 2025-27 and up to $2.5 million annually to investigate and pursue civil action against the entity renting vehicle from the private owner for failure to comply with the display requirements of the bill.

Unknown, potentially significant costs to the courts to adjudicate new penalties depending on many unknowns, including the numbers of people charged and the factors unique to each case. An eight-hour court day costs approximately $10,500 based on the hourly rate of court personnel including at minimum the judge, clerk, bailiff, court reporter, jury administrator, administrative staff, and jury per-diems. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources. The FY 2026-27 Budget appropriated $70 million General Fund for this purpose (Trial Court Trust Fund, General Fund).

SUPPORT: (Verified 8/12/26)

California Faculty Association
California School Employees Association
CFT – a Union of Educators & Classified Professionals, AFT, AFL-CIO
Coalition for Humane Immigrant Rights
SEIU California
United Domestic Workers/AFSCME Local 3930

OPPOSITION: (Verified 8/12/26)

California State Sheriff's Association

ARGUMENTS IN SUPPORT:

According to SEIU California, which supports AB 1650:

> The Supreme Court of the United States ruled that targeting service workers was justified. That is why it should be no surprise that, in the recent raids in Minnesota, over 30 service workers who are members of our union were arrested and detained. Since the summer of 2025, ICE raids targeting immigrant communities and families that began in Los Angeles have spread to San Diego, Sacramento, San Francisco, and other cities.
>
> Among the locations that rental car companies operate out of are airports where SEIU United Service Workers West (USWW) members work. Requiring temporary decals would likely reduce the likelihood these workers would encounter immigration enforcement activity.

ARGUMENTS IN OPPOSITION:

According to the California State Sheriff's Association, which is opposed to AB 1650:

> [AB 1650] would require any privately owned vehicle rented by, or furnished to, any law enforcement agency for the use of detaining, arresting, or transporting persons who have violated, or are suspected of having violated, any law, shall be required to have a temporary decal displaying the agency name and logo.
>
> AB 1650 acknowledges that its provisions would create a security problem that burdens law enforcement agencies and attempts to address that notion by exempting several situations from the bill's reach. Unfortunately, there are other scenarios that are not excluded that create problems for law enforcement (e.g., cars used by local officers engaged in plainclothes operations or driven by the elected sheriff).
>
> Also, all indications are that this bill is focused on federal immigration authorities and their enforcement practices. This is one of a number of bills that attempts to regulate federal practices and at the same time implicates state and local law enforcement. As we have already seen with bills enacted during this session, it is not uncommon for courts to eliminate such bills' application to

federal entities, thereby leaving the measures to only apply to state and/or local agencies.

SUBJECT: California FAIR Plan Association

SOURCE: Insurance Commissioner Ricardo Lara / California Department of Insurance

DIGEST: This bill aims to create greater ability for the California Department of Insurance (CDI) to ensure accountability and coverage options in the operations of the California Fair Access to Insurance Requirements Plan Association (FAIR Plan).

Senate Floor amendments of 8/19/26 address chaptering issues with AB 69 (Calderon).

ANALYSIS:

Existing law:

1) Establishes the FAIR Plan to assure the stability of the property insurance market, to assure the availability of basic property insurance, as defined, to encourage maximum use of the normal insurance market in obtaining basic

property insurance provided by admitted insurers and licensed surplus line brokers.

2) Allows the Insurance Commissioner (Commissioner) to conduct an examination of any company as often as the Insurance Commissioner in his or her discretion deems appropriate but shall, at a minimum, conduct an examination of every insurer admitted in this state not less frequently than once every five years.

3) Requires the Commissioner to approve the FAIR Plan's plan of operation and authorizes the Commissioner to examine the FAIR Plan's books, records, files, papers, and documents that relate to its operation.

4) Specifies that rates for the FAIR Plan shall not be excessive, inadequate, or unfairly discriminatory, shall be actuarially sound so that premiums are adequate to cover expected losses, expenses and taxes, and shall reflect investment income of the plan.

5) Requires all members of the FAIR Plan to participate in the writings, expenses, profits, and losses of the FAIR Plan in the proportion that its premiums written during the second preceding calendar year bear to the aggregate premiums written by all insurers.

This bill:

1) Requires the FAIR Plan to take corrective actions, as specified by the Commissioner or their designee, to correct violations of applicable statutes, regulations, accounting principles, the plan of operation, or other legally binding applicable rules and identified in a report of examination or other operational report. Failure to take these actions will subject the FAIR Pan to up to $20,000 for each unaddressed violation.

2) Allows the FAIR Plan to request additional extensions of 30 calendar days, or other greater extensions approved by the Commissioner, for good cause, to comply. The Commissioner or their designee may deny a request for an extension of time if it is determined the request is not made in good faith or there has not been a good faith effort to comply, as specified.

3) Specifies that the Commissioner may require the FAIR Plan to adjust the policy limits available under the programs it underwrites, and make additional coverage offerings available under the FAIR Plan to include fair rental value coverage under the FAIR Plan's renters' property insurance program.

4) Provides for civil penalties not to exceed $10,000 for each act in violation or not to exceed $20,000 if the act was willful and would require the Commissioner to impose those penalties.

5) Includes the provisions of AB 69 (Calderon) to address chaptering issues with that bill.

Related/Prior Legislation

AB 69 (Calderon). Enacts various provisions to assist California Fair Access to Insurance Requirements Plan Association (FAIR Plan) policyholders in securing coverage outside of the FAIR Plan. These provisions include providing policyholder information to interested insurers and agents or brokers of record simultaneously, while also making policyholders aware of additional coverage options. Pending on the Senate Floor.

AB 2061 (Chen). Requires the FAIR Plan to post quarterly on its website, the number of policies it issued in each ZIP Code and its risk exposure. Additionally, deletes the requirement that the FAIR Plan publish its telephone number in all general distribution telephone directories in the state. Pending on the Senate Floor.

AB 234 (Calderon, Chapter 474, Statutes of 2025). Required the Speaker of the Assembly and the Chairperson of the Senate Committee on Rules to serve as nonvoting, ex officio members of the governing committee, and authorized each to name a designee to serve in their place.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

The California Department of Insurance does not anticipate a fiscal impact from the bill (Insurance Fund).

Staff notes there may be an unknown potential increase in enforcement workload for CDI to address noncompliance with the Commissioner's specified corrective actions, which may be offset to some extent by penalty revenue (Insurance Fund). It is possible that higher aggregate penalties may incentivize the FAIR Plan to contest enforcement actions through the administrative hearing process rather than opting for immediate compliance, which may increase administrative and adjudicatory workload. The magnitude of this workload would depend on the number and scope of violations, as well as any attached penalties.

United Policyholders

OPPOSITION: (Verified 8/13/26)

None received

ARGUMENTS IN SUPPORT:

According to Insurance Commissioner Ricardo Lara, sponsor of this bill:

"In recent years, wildfire risks, insurer withdrawals, and widespread nonrenewals have driven unprecedented growth in FAIR Plan enrollment. As the FAIR Plan increasingly functions as a major insurer rather than a limited backstop, gaps have emerged in its coverage offerings, operational flexibility, and accountability mechanisms. The statutory framework has not kept pace with the scale of the FAIR Plan's responsibilities or the needs of policyholders who rely on it.

In addition, the California Department of Insurance's Report of Examination - the most comprehensive review of the FAIR Plan in decades – revealed systemic problems that have left wildfire survivors struggling with delays, denials, and inconsistent claims decisions, particularly after the 2025 Los Angeles wildfires, the largest urban wildfire disaster in state history. The examination evaluated the FAIR Plan's financial conditions, corporate governance, and controls to protect policyholders across 32 areas – finding that in more than half of them, the FAIR Plan had not started or fully implemented the Department's recommendations. The legislation would require the FAIR Plan to make significant operational and governance changes to meet Californians' needs.

The FAIR Plan's policy count and exposure levels have grown dramatically, creating financial and operational risks that extend beyond the program's original purpose. Many policyholders require coverage options that exceed the FAIR Plan's basic offerings, particularly renters and homeowners who require more complete protection. Commercial policyholders lack a mechanism to transition back into the admitted market, leaving many businesses dependent on the FAIR Plan for

extended periods. The Commissioner's oversight tools must be strengthened to ensure timely compliance with examination findings and statutory requirements. Without a penalty structure, there is limited deterrence for violations.

AB 1680 modernizes the FAIR Plan to reflect current market conditions and strengthen consumer protections. It clarifies and reinforces the Commissioner's authority to approve, revoke, or require revisions to the FAIR Plan's plan of operation and ensures that the Plan must adopt statutory and other legally binding examination recommendations within agreed-upon timelines."

SUBJECT: Driver's licenses: revocation

SOURCE: Author

DIGEST: This bill 1) requires the Department of Motor Vehicles (DMV), beginning January 1, 2031, to revoke a person's driving privilege upon conviction of a DUI causing bodily injury when the person has four or more prior convictions within a 10-year period for impaired driving offenses; prohibits DMV from reinstating that person's driving privileges until the expiration of 72 months after the date of revocation, subject to certain requirements including the installation of an ignition interlock device (IID); and 2) requires, until January 1, 2033, a person convicted of DUI causing bodily injury with four or more prior convictions within a 10-year period for impaired driving offenses to install and maintain an IID for 72 months.

Senate Floor Amendments of 8/21/26 revise the license revocation period and the covered impaired driving offenses, and delay the bill's implementation date.

ANALYSIS:

Existing law:

1) Makes it unlawful for any person who is under the influence of any alcoholic beverage or drug, or under the combined influence of any alcoholic beverage and drug, or who has 0.08% or more, by weight, of alcohol (BAC) in their blood, to drive a vehicle (hereafter, "DUI"). (Vehicle (Veh.) Code, § 23152, subds. (a), (b), (f), & (g).)

2) Establishes graduated penalties for a first DUI, DUI with one prior, DUI with two priors, and DUI with three or more priors, including jail time, fines, IID installation, license suspension or revocation, and completion of a DUI program. (Veh. Code, §§ 13352, 13352.1, 23538, 23540, 23542, 23546, 23550, 23552, 23548, 23575.3.)

3) Requires a 10-year license revocation if a person has been convicted of three or more DUIs or DUIs causing bodily injury, the last of which was punishable as a DUI or DUI causing bodily injury with two priors, a DUI with three or more priors, or as an alternate-felony misdemeanor because of a prior specified felony. (Veh. Code, § 23597, subd. (a).)

4) Makes it unlawful for any person who is under the influence of any alcoholic beverage or drug, or the combined influence of the two, or who has a BAC of .08 or more, to drive a vehicle, and concurrently do any act forbidden by law or neglect any duty imposed by law in driving the vehicle, which proximately causes bodily injury to any person other than the driver (hereafter, "DUI causing bodily injury.") (Veh. Code, § 23153 subds. (a), (f), & (g).)

5) Establishes graduated penalties for a first DUI causing bodily injury, DUI causing bodily injury with one prior, and DUI causing bodily injury with two or more priors, including jail or prison time, fines, IID installation, license suspension or revocation, and completion of a DUI program. (Veh. Code, §§ 13352, 23554, 23556, 23560, 23562, 23566, 23568, 23575.3.)

6) Provides that a person who proximately causes bodily injury or death to more than one victim in any one instance that results in a felony conviction of a DUI

causing bodily injury, gross vehicular manslaughter while intoxicated, or vehicular manslaughter while intoxicated, shall receive a one-year sentence enhancement in state prison for each additional victim injured (maximum of three). (Veh. Code, § 23558.)

7) Punishes a person convicted of a DUI causing bodily injury, where the violation proximately causes great bodily injury to any person other than the driver, and the offense occurred within 10 years of two or more priors, as a felony by imprisonment for two, three, or four years in state prison, a $1,015 to $5,000 fine, and a five-year license revocation (Veh. Code, §§ 23566, subd. (b), 13352 subd. (a)(6).)

8) Provides that if a person is convicted for the above offense, and the underlying offense occurred within 10 years of four or more priors, there shall be an additional punishment of three years in state prison, which shall be served in addition and consecutive to the sentence imposed above. (Veh. Code, § 23566, subd. (c).)

9) Makes any DUI or DUI causing bodily injury (hereafter, "any DUI") an alternate felony-misdemeanor if that person has previously been convicted of certain impaired driving crimes:

   a) Punishes a person convicted of any DUI within 10 years of specified felonies – a DUI with three or more priors, a DUI causing bodily injury, or gross vehicular manslaughter – as an alternate-felony misdemeanor, a $390 to $1,000 fine, a four- or five-year license revocation (including a three-year designation as a habitual traffic offender), and a three- or four-year IID mandate. (Veh. Code, §§ 13352, subd. (a)(6)-(7); 23550.5, subds. (a), (c) & (d); 23575.3, subd. (h)(1)-(2).)
   b) Punishes a person convicted of any DUI, who has a prior conviction for felony vehicular manslaughter while intoxicated, as an alternate felony-misdemeanor, a fine of $390 to $1,000, a four- or five-year license revocation, and a three- or four-year IID mandate. (Veh. Code, §§ 13352 subd. (a)(6)-(7); 23550.5, subds. (b), (c) & (d); 23575.3, subd. (h)(1)-(2).)

10) Requires the prosecutor, if the prosecution agrees to a plea of guilty or no contest to reckless driving in satisfaction of, or as a substitute for, an original charge of a DUI—also known as a wet reckless—to state for the record a factual basis for the satisfaction or substitution, including whether or not there had been consumption of an alcoholic beverage or ingestion or administration

of a drug, or both, by the defendant in connection with the offense. Provides that a wet reckless is punishable by imprisonment in a county jail for 5 to 90 days, or by a fine of $145-1,000, or both. (Veh. Code, §§ 23103.5, subd. (a); 23103, subd. (c).)

11) Provides that gross vehicular manslaughter while intoxicated is the unlawful killing of a human being without malice aforethought, in the driving of a vehicle, where the driving was driving under the influence, and the killing was either the proximate result of the commission of an unlawful act, not amounting to a felony, and with gross negligence, or the proximate result of the commission of a lawful act that might produce death, in an unlawful manner, and with gross negligence. Provides that gross vehicular manslaughter while intoxicated is punishable by imprisonment in the state prison for 4, 6, or 10 years. (Penal (Pen.) Code, § 191.5, subds. (a), (c).)

12) Provides that vehicular manslaughter while intoxicated is the unlawful killing of a human being without malice aforethought, in the driving of a vehicle, where the driving was driving under the influence, and the killing was either the proximate result of the commission of an unlawful act, not amounting to a felony, but without gross negligence, or the proximate result of the commission of a lawful act that might produce death, in an unlawful manner, but without gross negligence. Provides that vehicular manslaughter while intoxicated is punishable by imprisonment in a county jail for not more than one year, or imprisonment in the county jail for 16 months, 2 years, or 4 years. (Pen. Code, § 191.5, subd. (b).)

13) Requires that a person convicted of a violation of vehicular manslaughter while intoxicated that occurred within seven years of two or more separate convictions for wet reckless or DUI, or any combination, be designated as a habitual traffic offender for three years subsequent to the conviction. (Pen. Code, § 193.7.)

14) Requires the DMV to immediately to revoke the privilege of a person to drive a motor vehicle upon receipt of a duly certified abstract of the record of a court showing that the person has been convicted of any of the following crimes or offenses:

    a) Vehicular manslaughter, except vehicular manslaughter without gross negligence.

b) Conviction of three or more violations of hit and run, hit and run causing injury, reckless driving, or reckless driving causing injury, great bodily injury, or specified injuries, within a period of 12 months from the time of the first offense to the third or subsequent offense, or a combination of three or more convictions of violations within the same period.
c) Gross vehicular manslaughter while intoxicated, gross vehicular manslaughter while intoxicated when the person was operating a vessel, or fleeing or attempting to elude a pursuing peace officer, causing serious bodily injury resulting in a serious impairment of physical condition, including, but not limited to, loss of consciousness, concussion, serious bone fracture, protracted loss or impairment of function of any bodily member or organ, and serious disfigurement. (Veh. Code, § 13351, subd. (a).)

15) Prohibits the DMV from reinstating the person's revoked driving privilege until the expiration of three years after the date of revocation and until the person whose privilege was revoked gives proof of financial responsibility, as defined. (Veh. Code, § 13351, subd. (b).)

This bill:

1) Requires the DMV, beginning January 1, 2031, to revoke a person's driving privilege upon conviction of a DUI causing bodily injury when the person has four or more prior convictions within a 10-year period for impaired driving offenses

2) Prohibits DMV from reinstating that person's driving privileges until the expiration of 72 months after the date of revocation, subject to certain requirements including the installation of IID.

3) Requires, until January 1, 2033, a person convicted of DUI causing bodily injury with four or more prior convictions within a 10-year period for impaired driving offenses to install and maintain an IID for 72 months.

Background

This bill authorizes the DMV to revoke a person's driver's license for eight years if the person is convicted of three or more specified impaired driving offenses. This bill authorizes the DMV to revoke a person's driving privileges for eight years if they are convicted of three or more of the following offenses, or any combination, where each of the three or more violations occurred within 10 years: 1) gross

vehicular manslaughter while intoxicated, 2) vehicular manslaughter while intoxicated within seven years of two or more priors; 3) vehicular manslaughter while intoxicated while operating a vessel; 4) a DUI with two priors; 5) a DUI with three or more priors; 6) a DUI causing bodily injury with two or more priors; 7) a DUI or DUI causing bodily injury within 10 years of certain impaired driving felonies; and 8) a DUI causing bodily injury, where the violation proximately causes great bodily injury and occurred within 10 years of two or more priors. If a revocation is ordered, the DMV is prohibited from reinstating the person's driving privileges until the expiration of eight years after the date of revocation and until the person provides proof of financial responsibility, except as specified below.

Similar to existing DUI license suspensions and revocations, and particularly, the existing 10-year revocation option, this bill authorizes a person to apply for a restricted license. Specifically, it authorizes a person to apply to have their driving privileges reinstated four years from the date of the last conviction of an offense specified above, conditioned on the requirement that the person agrees to install and maintain an IID. The IID must remain on the person's motor vehicle for two years following reinstatement.

Most of the convictions that this bill applies to already receive either a four- or five-year license revocation. In addition, Vehicle Code section 23597 authorizes a court to order a 10-year license revocation for individuals convicted of three or more DUIs (the last of which is punishable pursuant to one of the repeat offender statutes). (Veh. Code, § 23597, subd. (a).) Similar to the provisions of this bill, a person subject to a 10-year license revocation may apply for a restricted license, conditioned on the installation of an IID on that person's vehicle, five years from the date of their last conviction. (Veh. Code, § 23597, subd. (c)(1).)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

The DMV indicates that it would incur significant one-time costs to make necessary IT systems changes to create a new permissive license revocation and restricted license program. DMV's legacy systems have limited capacity to accommodate new functionality and are currently being replaced through the Enterprise Modernization Project (the Digital eXperience Platform, or DXP). As a result, implementation would either require modifications within DXP, potentially increasing project costs and/or delaying implementation, or development of a temporary solution outside the legacy environment, resulting in duplicative costs,

additional technology procurement, and requiring additional approvals. Assuming a temporary solution is required, implementation costs are expected to be at least in the low millions, and potentially higher, depending on the final scope of work, implementation timelines, and the technology solution ultimately required. Direct modifications to legacy systems would likely result in significantly higher costs. Staff notes that DMV would be unable to make the necessary programming changes by the January 1, 2027 operative date of this bill. (Motor Vehicle Account)

SUBJECT: Good Fire Act: Prescribed Fire Liability Pilot Program: burn bosses: California Environmental Quality Act

SOURCE: Pacific Forest Trust

DIGEST: This bill establishes the Good Fire Act, which indefinitely extends the Prescribed Fire Liability Program, and makes changes to the program and other relevant laws to advance the implementation of prescribed fire throughout the state.

Senate floor amendments of 8/20/26 create consistency between this bill and AB 2513 (Petrie-Norris), eliminating chaptering conflicts.

ANALYSIS:

Existing law:

1) Pursuant to Public Resources Code (PRC) §4477:
   a) Requires the State Fire Marshal (SFM), with the involvement of the Statewide Training and Education Advisory Committee, to develop a curriculum for, or amend into an existing curriculum, a certification program for burn bosses, who possess authority to engage in a prescribed burning operation and to enter into the necessary contracts related to a prescribed burning operation. The curriculum shall provide for the initial certification as well as the continuing education of burn bosses.
   b) Requires the Department to develop a training program for prescribed fire users to certify professionals in any agency or organization as burn bosses. Requires the Department to certify these individuals to a common standard. It is the intent of the Legislature that the Department use its discretion to ensure that burn bosses are thoroughly qualified to engage in prescribed burning operations prior to issuing certifications.
   c) Requires the SFM to post and update on its internet website the number of burn bosses with an active burn boss certification.
2) Declares cooperation by the Department with a person desiring to use prescribed burning as a means of converting brush-covered lands into forage lands or to help meet wildland management goals, which has as its objective the prevention of high intensity wildland fires, watershed management, range improvement, vegetation management, forest improvement, wildlife habitat improvement, restoring ecological integrity and resilience, community wildfire protection, carbon resilience, or enhancement of culturally important resources a public purpose. (PRC §4491)
3) Authorizes a person, firm, or corporation, or a group or combination of persons, firms, corporations, or groups, that owns or controls brush-covered land, forest lands, woodland, grassland, shrubland, or any combination thereof within a state responsibility area (SRA) to apply to the Department for permission to utilize prescribed burning for those public purposes in PRC §4491. (PRC §4492)
4) Requires, upon receipt of an application, the Department to inspect the land in company with the applicant to determine whether a permit shall be granted; to prescribe the manner in which the site for the prescribed burning shall be prepared; and, to require any precautions to be taken by the applicant as may be considered reasonable to prevent damage to the property of others by reason of the burning. (PRC §4493)
5) Authorizes the director of the Department to enter into an agreement with the owner or any other person who has legal control of any property, any public

agency with regulatory or natural resource management authority over any property that is included within any wildland, or any nonprofit organization to conduct joint prescribed burning operations that serve the public interest and are beneficial to the state. Requires the agreement to establish guidelines for the cooperative management of joint prescribed burning operations and requires the completion of a project agreement for each prescribed burn. (PRC §4497)

6) Defines "burn boss" as a person certified pursuant to PRC §4477 to conduct prescribed burning operations and to enter into contracts related to prescribed burning operations; or, a person qualified for the National Wildfire Coordinating Group position title of "Prescribed Fire Burn Boss Type 1" or "Prescribed Fire Burn Boss Type 2." (PRC §4500 (a))
7) Establishes the Prescribed Fire Liability Pilot Program to increase the pace and scale of the use of prescribed fire and cultural burning and to reduce barriers for conducting prescribed fires and cultural burning. (PRC §4500 (b))
8) Establishes the Prescribed Fire Claims Fund (Claims Fund) to support coverage for losses from prescribed fires and cultural burning by nonpublic entities, such as cultural fire practitioners, private landowners, and nongovernmental entities. Requires moneys in the fund to be under the control of the Department, and the Department, or the third-party administrator with whom the Department contracts, is authorized to direct payments for claims from the Fund. (PRC 4500 (c)(1))
9) Establishes CEQA to provide a process to identify the significant effects on the environment of a project, to identify alternatives to the project, and to indicate the manner in which those significant effects can be mitigated or avoided, and provides specified exemptions for wildfire risk reduction projects. (PRC §21000 *et seq*.)

This bill:

1) Establishes that the SFM, as part of the continuing education of burn bosses, shall require recertification no sooner than every three years.
2) Requires the Department to consider methods to increase the pool of available instructors for the certification program, including the use of nondepartment instructors.
3) Requires the Department, in consultation with the Statewide Training and Education Advisory Committee, to develop a mechanism to allow individuals certified as prescribed fire managers under other certification programs to be designated as a state-certified burn boss, and to allow that person to use the SFM recertification process to maintain currency.

4) Specifies that changes made to PRC §4477 by this bill do not alter, expand, or limit the applicable standard of care related to prescribed fires and cultural burning under California law.
5) Authorizes the Department to waive the inspection of land proposed to be burned by a private person for a burn application submitted by certain qualified prescribed fire managers.
6) Authorizes the Department to modify standard precautions, undertaken by the applicant to prevent damage to the property of others by burning, for a burn application submitted by certain qualified prescribed fire managers.
7) Specifies that changes made to PRC §4493 by this bill do not alter, expand, or limit the applicable standard of care related to prescribed fires and cultural burning under California law.
8) Specifies that state bodies awarding funding that pays for individuals involved in beneficial fire projects to include overtime or double rates of pay as an allowable expense when such expenses are necessary for the implementation of the project.
9) Establishes that the Prescribed Fire Claims Fund (Claims Fund) applies to prescribed fires and cultural burning conducted by individuals and entities other than the Department or the federal government and on any lands within the state.
10) Specifies that, for a claim to be paid from the Claims Fund, the burn plan must have been approved by the Department or a burn boss before the prescribed fire or cultural burn.
11) Requires that a burn plan be submitted to the Claims Fund portal prior to ignition.
12) Requires the Department develop methodologies for prioritizing broadcast burns and burns by nonpublic individuals or entities or California Native American tribes in the event the Claims Fund is oversubscribed.
13) Specifies that changes made to PRC § 4500 by this bill do not alter, expand, or limit the applicable standard of care related to prescribed fires and cultural burning under California law.
14) Requires the Department, no later than one year after a claim is paid from the fund, to submit a report to the Legislature regarding the claims process.
15) Exempts from CEQA certain wildfire risk reduction projects to actions taken by the Department to assist in the implementation of prescribed fire or cultural burning projects that do not otherwise require compliance with CEQA.

16) Amends the Forest Improvement Grant Program to require grantees to file accountability reports with the Department six months from the date of receiving funds and every six months thereafter.

17) Replaces a reference to the Office of Planning and Research to the Office of Land Use and Climate Innovation.

18) Makes findings and declarations relevant to the value of prescribed burning in California.

19) Establishes this bill as an urgency statute.

20) Includes chaptering out amendments with AB 2513 (Petrie-Norris)

Background

Executive action. Last year, Governor Newsom issued Executive Order (EO) N-35-25 expressing concern that strict compliance with various statutes and regulations would prevent, hinder, or delay the use of beneficial fire to limit dangerous wildfire conditions that threaten life and property.

Codifying the EO. This bill is largely an effort to codify the Governor's EO.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

- By removing the sunset on the Prescribed Fire Claims Fund and significantly expanding the universe of eligible entities, this bill would create ongoing General Fund cost pressures of an unknown amount, possibly in the low to tens of millions of dollars annually.
- By prohibiting a state entity that awards grant funds for beneficial fire projects from restricting those funds for use as payment for overtime or double rates of pay, this bill potentially creates cost pressures on various grant funds.
- The Department of Forestry and Fire Protection does not anticipate a fiscal impact from this bill.

ARGUMENTS IN SUPPORT: According to the author, "For generations, California Tribes have stewarded the landscape with fire. This community wide effort created a safer and healthier ecosystem for all. Tragically, one of the first laws ever passed by this Legislature outlawed this practice. We restricted cultural burning practices and ignored that wisdom. We eventually set up a fire response system that extinguished all flames, even when they were desperately needed to clear overly dense vegetation and support fire dependent plants. AB 1699 is about righting that historic wrong. The use of beneficial fire, a prescribed fire, or a controlled burn are all examples of "Good Fire". We know all too well about the opposite, catastrophic wildfires that burn out of control. We need much more Good Fire to address that very real threat that far too many of us have learned to live with. We need to follow the leadership of our Tribes and build up the systems to use more Good Fire."

SUBJECT: Electricians: certification application, examination, and renewal

SOURCE: Author

DIGEST: This bill transfers authority over the certification of electricians from the Division of Labor Standards Enforcement (DLSE) to the Contractors State License Board (CSLB), contingent upon an appropriation by the Legislature beginning July 1, 2028, pursuant to certain timelines and procedures, as specified.|

Senate Floor Amendments of 8/21/26 allow applicants for certification to provide verifiable work history as identified by the CSLB; require CSLB to determine the adequate level of supervision of apprentices through regulations; delete the $25 fee cap for initial registration as a trainee and a prohibition on CSLB charging a fee for registration renewal; remove CSLB requirements to certify electricians and register trainees prior to this bill's effective date and ; authorize CSLB to establish initial and renewal registration and certification fees; and make other technical changes.

ANALYSIS:

Existing law:

1) Establishes the DLSE within the Department of Industrial Relations under the

direction of the Labor Commissioner. (Labor Code (LC) §79-107)

2) Requires DLSE to maintain minimum standards for the competency and training of electricians through a system of testing and certification. (LC §108)

3) Requires DLSE to maintain separate certifications for general electrician, fire/life safety technician, residential electrician, voice data video technician, and nonresidential lighting technician. (LC §108.2(c))

4) Requires DLSE to maintain an electrical certification curriculum committee comprised of representatives of the State Department of Education, the California Community Colleges, and the division to, among other things, establish written educational curriculum standards for enrollees in training programs. (LC §108)

5) Requires individuals who perform work as electricians to become certified pursuant to 2) above. (LC §108.2(a))

6) Provides that certification is required only for those persons who perform work as electricians for contractors licensed as class C-10 electrical contractors under the CSLB. (LC §108.2(b)(1))

7) Requires individuals desiring to be certified to submit to the DLSE an application for certification and examination that includes an employment history report from the Social Security Administration. (LC §108.2(b)(4))

8) Establishes CSLB to license and regulate contractors and home improvement salespersons. (Business and Professions Code (BPC) § 7000 et seq.)

9) Establishes four branches of contracting business in the following classifications: general engineering contracting (A), general building contracting (B1), residential remodeling contracting (B2), specialty contracting (C). (BPC § 7055)

10) Defines a C Specialty Contractor as those whose operations involve performance of construction work requiring special skill and whose principal contracting business involves the use of specialized building trades or crafts. (BPC § 7058)

11) Establishes an enforcement division within the CSLB to rigorously enforce the

Contractors License Law (license law), enforces the obligation to secure the payment of valid and current workers' compensation insurance and prohibit all forms of unlicensed activity, as specified. (BPC § 7011.4(a))

12) Mandates the CSLB to charge a fee of $20 with the renewal fee for an active C-10 license in addition to any other fees charged to C-10 contractors used by the CSLB to enforce provisions of the LC related to electrician certification. (BPC § 7137(6)(A)

This bill:

1) Transfers the entire electrician certification regulatory program from the jurisdiction of the DSLE and moves it under the jurisdiction of the CSLB beginning January 1, 2028, and makes the implementation of this program under the CSLB's jurisdiction contingent upon an appropriation by the Legislature in the annual budget act, as specified. Requires the CSLB to utilize the current regulations under the DSLE for administration and enforcement of the electrician certification program until such time as the CSLB adopts regulations for enforcement and regulation of the electrician certification program. Requires the CSLB to determine through regulations the adequate level of supervision for apprentices.

2) Deletes the $25 fee cap for initial registration for a trainee under the CSLB and removes the prohibition on the CSLB from assessing a renewal fee.

3) Authorizes CSLB to establish initial and renewal registration and certification fees necessary to implement the electrician certification program.

4) Authorizes an individual who fails the electrician certification examination to reregister for certification and retake the examination no sooner than 21 days upon approval, as specified.

5) Limits the current electrician certification program under the jurisdiction of the DLSE to apply only to those applications received on or before July 1, 2028, and has continuing authority to perform any necessary action on applications received, including, but not limited to approving and denying applications and participating in any hearings regarding the denial of those applications.

6) Sunsets the electrician certification program under the jurisdiction of the DLSE on January 1, 2029, including the requirements in 3) above.

7) States that any electrician certification or trainee registration that is valid on the operative date of the transfer of oversight of the electrician certification program remain valid until its expiration according to its existing term and conditions.

Background

Current Electrician Certification Program Oversight. The DLSE is currently responsible for the registration and enforcement of the electrician certification program in California. LC § 108.2(a) requires individuals who perform work as electricians to become certified. Existing law prohibits uncertified individuals from performing electrical work for which certification is required. Individuals who perform electrical work for C-10 contractors licensed by the CSLB are required to obtain an electrician certification. Individuals who perform work for C-7 low voltage systems contractors or C-45 electric sign contractors do not need to obtain certification. C-10 licensed contractors may only employee individuals who have obtained the electrician certification from the DSLE. If a C-10 contractor is in violation of the certification law, their license is subject to discipline by the CSLB. The DSLE does not take enforcement actions against a licensed contractor, but rather a person who holds or should hold the electrician certification.

The DLSE is currently mandated to issue separate certifications for general, residential, fire/life/safety, non-residential lighting, and voice-data-video technicians. Certification requires 4,800-8,000 hours of experience depending on the type of certification, plus a passing score on the state exam. Currently, to apply for the exam, an applicant must mail an application and a check or money order for $175 ($100 exam fee and $75 administration fee) to DLSE. Additionally, the application must include a Social Security Administration employment history report and documentation of training hours. Once approved, DLSE sends the applicant an eligibility notice, and the applicant can then schedule their exam at a Pearson Vue test center, The number of questions and the length of the exam vary depending on the type of certification.

Electricians must renew their certification every three years by mailing an application and check or money order for $100 to DLSE. Renewal is contingent upon completion of 32 hours of approved continuing education and proof of at least 2,000 hours of work experience in the industry during that three-year period. The DSLE is also responsible for establishing the minimum competency and training of electricians and must maintain an advisory committee and panels including an electrical certification curriculum committee that determines the

curriculum standards for enrollees in training programs. In addition, the curriculum committee reviews education program providers to ensure they continue to meet the standards established by the curriculum committee. While certification is required for any person working for a C-10 contractor licensee, those who are in approved training programs register with the DSLE and can then perform work which requires electrician certification during the period of enrollment in the training program.

The Role of the CSLB and Electrician Certification Requirements. The CSLB is responsible for the implementation and enforcement of the laws and regulations related to the licensure, practice and discipline of the construction industry in California. All businesses and individuals who by themselves or through others construct, alter, or repair, or offer to construct, alter, or repair, any building, highway, road, parking facility, railroad, excavation, or other structure in California must be licensed by the CSLB if the total cost, including both labor and materials of one or more contracts on the project is $1,000 or more. The CSLB issues four distinct license types, within three branches of contracting services, and separately registers home improvement salespersons. Each licensing classification specifies the type of contracting work permitted within that classification. There are The CSLB oversees approximately 240,000 licensed contractors. The CSLB does not approve or review any construction-related education providers nor have any established curriculum review committees. There are 43 specialty classifications within the (C) specialty licensure category, including the C-10 electrician. As a self-funded program, the CSLB relies solely on licensing, renewal, enforcement and other administrative fees and does not receive general fund support. Licensing fees are specified in statute and updated when necessary to ensure CSLB can perform its regulatory functions.

Specific to the electrician certification program, the CSLB is currently only responsible for ensuring that the C-10 employees meet the electrician certification requirements. BPC § 7137 requires the CSLB to charge a fee, not to exceed $20, for C-10 for enforcement of the electrician certification requirement. There are approximately 28,000 active C 10 contractors and if they use employees as prescribed in LC § 108.2, the CSLB must ensure that those employees are certified.

As currently drafted, this bill transfers the regulatory program from the DSLE to CSLB's jurisdiction. Pursuant to the provisions of this bill, the CSLB would be the entity responsible for maintaining an electrician certification program, including issuing certificates and renewals, establishing advisory committees and panels as

necessary, including establishing the education and curriculum standards for training programs and approving education providers. The current statutory requirements are lifted from the Labor Code and inserted into the Business and Professions Code. This bill does include a delayed implementation and allows the CSLB and the DSLE to utilize resources from the current electrician certification fund. This bill, as currently drafted, does not require a fee study of the new regulatory program at CSLB.

Comments

The current version of this bill does not provide a clear implementation pathway for the CSLB to begin its oversight of this regulatory program. Until the time the CSLB can adopt regulations, it will be required to abide by the current regulations in effect immediately preceding July 1, 2028, as promulgated under the DSLE, which includes locking the CSLB into a potentially outdated fee structure, a licensing and registration application and renewal process that may be inconsistent with existing practices, and a requirement to approve curriculum training programs, which CSLB currently does not undertake.

A few of the more important programmatic and implementation issues for consideration to ensure the CSLB can effectively administer the electrician certification program are as follows below.

This bill requires CSLB to issue electrician certifications. To become a certificate holder, a registrant must submit an application, qualify for an examination through on-the-job training or education that must be verified, and take and pass an examination. However, fees for the certification, examination, and renewal are not specified in this statute, but rather specified in the current regulations under the DSLE. Although the CSLB will be able to eventually promulgate regulations to implement the program, the regulatory process takes time, and the CSLB will be required to follow a fee structure that might not be sufficient. Without statutory authority to set a fee, CSLB may not be able to adopt regulations for the certification and examination fees.

Additionally, this bill requires each registrant’s completed coursework to be updated annually and requires the CSLB to maintain a list of registrants that must be made available upon request and does not set a limit on the number of years any registrant may remain on the list. Due to the renewal workload and estimated volume of registrants, consideration should be included to prescribe a registration renewal fee.

It is currently unknown whether the $100 fee will be the cost of the examination until CSLB executes a contract with its examination vendor. The CSLB currently contracts with PSI testing centers while the DSLE program utilizes Pearson Vue testing centers. It is unclear how the transfer of testing centers or testing center contracts will be implemented. The fee for the examination should be set to the cost to administer the examination to prevent the applicant from being overcharged or the CSLB from incurring losses. Additionally, to be consistent with other examination fees, fees should be paid directly to the vendor. This bill maintains that the CSLB collect the fee for the examination. It is unclear how the CSLB will then transfer payment to any testing center.

Contractors License Fund Should be Protected. Currently licensing, enforcement and administrative fees are collected in the Contractors License Fund. Regardless of whether the recommendations above are taken, existing licensees of the CSLB should not be responsible for subsidizing the electrician certification program through their current license and renewal fees. Their license fees pay to process their initial license and renewal fees fund administrative and enforcement functions of the CSLB. Taking on this program should not be to the detriment of licensees through reduced services, longer wait times, or higher fees. Importantly, consumers also should not notice a degradation in the quality of services provided by CSLB. Consequently, this bill should ensure that the money in the Contractors License Fund cannot be expended to implement or administer the electrician registration and certification program and that the electrician certification fund remain separate at this time of transition. Merging funds may be appropriate in the future after further assessment of electrician certification program under the jurisdiction of the CSLB.

Curriculum Committee. As currently drafted, this bill requires the CSLB to create and maintain an electrician certification curriculum committee which includes the State Department of Education, the California Community Colleges and the CSLB to establish standards for training programs, review approved curriculum and curriculum providers and remove approval of an approved provider.

The CSLB does not currently review or approve curriculum. California already has an entity with specific expertise in apprenticeship and workforce training. The Division of Apprenticeship Standards (DAS) within the Department of Industrial Relations administers California's apprenticeship laws and has existing responsibility for the approval and oversight of apprenticeship programs and standards, including programs in the building and construction trades. Moreover, existing electrician-certification regulations expressly involve DAS in curriculum oversight. The current Electrician Certification Curriculum Committee is

established within the California Apprenticeship Council's regulatory framework, includes the Chief of DAS, or the Chief's designee, as a member, and requires the Chief of DAS or designee to serve as secretary to the committee.

Given DAS' existing expertise in apprenticeship and training standards, as well as its existing role on the Electrician Certification Curriculum Committee, responsibility for establishing and approving electrician training curricula would be more appropriately assigned to DAS, or another entity with expertise in vocational education and workforce training, rather than requiring CSLB to assume responsibility for an area outside its traditional contractor licensing and enforcement functions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Committee on Appropriations, this bill would result in one-time and ongoing costs, likely exceeding $3 million annually, to CSLB to assume responsibility for the Electrician Certification Program, including staffing, examination administration, legal support, and information technology activities. Specifically, estimated costs include $1.2 million annually for staffing, $1.2 million annually for contracted examination and operational support, $300,000 annually for legal services, and one-time information technology transition costs of approximately $900,000, followed by ongoing IT support costs of approximately $450,000 annually (Electrician Certification Fund and Contractors License Fund). Costs to the Department of Industrial Relations (DIR) would be minor and absorbable.

California State Association of Electrical Workers

OPPOSITION: (Verified 8/21/26)

None received

ARGUMENTS IN SUPPORT: The California State Association of Electrical Workers writes in support and notes, "AB 1707 improves the administration of California's electrician certification program by transferring oversight from the Division of Labor Standards Enforcement (DLSE) to the Contractors State License Board (CSLB), placing certification for electricians under the same agency that already licenses and regulates electrical contractors. This alignment improves efficiency and coordination while maintaining the existing certification standards and qualifications that ensure electrical work is performed by trained and qualified professionals."

SUBJECT: Covered platforms: age restriction: e-Safety Advisory Commission

SOURCE: Organization for Social Media Safety

DIGEST: This bill prohibits "covered platforms" from providing an addictive feature to a user under the age of 16. The Attorney General (AG) may adopt regulations, as provided. This bill establishes the e-Safety Advisory Commission to advise the AG on, among other things, matters related to online safety.

ANALYSIS:

Existing law:

1) Establishes the Protecting Our Kids from Social Media Addiction Act, prohibits an operator of an addictive internet-based service or application, including a

social media platform, from providing an addictive feed, as defined, to a minor user. (Health & Safety (Saf.) Code § 27000 et seq.)

2) Defines "addictive feed" as an internet website, online service, online application, or mobile application, or a portion thereof, in which multiple pieces of media generated or shared by users are, either concurrently or sequentially, recommended, selected, or prioritized for display to a user based, in whole or in part, on information provided by the user, or otherwise associated with the user or the user's device, unless any of the following conditions are met, alone or in combination with one another:

   a) The information is not persistently associated with the user or user's device and does not concern the user's previous interactions with media generated or shared by others.
   b) The information consists of search terms that are not persistently associated with the user or user's device.
   c) The information consists of user-selected privacy or accessibility settings, technical information concerning the user's device, or device communications or signals concerning whether the user is a minor.
   d) The user expressly and unambiguously requested the specific media or media by the author, creator, or poster of the media, or the blocking, prioritization, or deprioritization of such media, provided that the media is not recommended, selected, or prioritized for display based, in whole or in part, on other information associated with the user or the user's device, except as otherwise permitted by this chapter and, in the case of audio or video content, is not automatically played.
   e) The media consists of direct, private communications between users.
   f) The media recommended, selected, or prioritized for display is exclusively the next media in a preexisting sequence from the same author, creator, poster, or source and, in the case of audio or video content, is not automatically played.
   g) The recommendation, selection, or prioritization of the media is necessary to comply with the act. (Health & Saf. Code § 27000.5(a).)

3) Requires, for purposes of the Protecting Our Kids from Social Media Addiction Act, the Attorney General to adopt regulations regarding age assurance by January 1, 2027. (Health & Saf. Code § 27006(b).)

4) Establishes the Digital Age Assurance Act, which establishes a device-based age verification system in which parents who allow their children to be the primary user of a device can enter a non-identifying age-bracket signal that

operating systems and application stores must send to application developers. (Civil (Civ.) Code § 1798.500 et seq.)

This bill:

1) Prohibits a covered platform from providing an addictive feature to a user under the age of 16. It requires a covered platform to implement reasonable measures to ensure users under the age of 16 are not provided any addictive feature on their platform.

2) Requires a covered platform, before providing an addictive feature to a user, to verify the age of a user pursuant to the Digital Age Assurance Act, subject to regulation by the AG. Provides that, if a covered platform is unable to verify the age of a user pursuant to the Act, then the platform shall instead rely on age determination made pursuant to regulations made by the AG under the Protecting Our Kids from Social Media Addiction Act.

3) Provides that the AG may adopt regulations to implement and enforce these provisions.

4) Provides that the AG may alter the scope of "covered platform" if they determine that doing so is necessary to ensure that a "covered platform" applies to websites, online services, online applications, or mobile applications that make addictive features available to users under the age of 16.

5) Provides that a covered platform that violates the above provisions shall be subject to a civil penalty, brought only by the AG or a local public prosecutor, of up to $50,000 per affected minor for a knowing violation and $25,000 per affected minor for a negligent violation. Requires a court to consider the size of a covered platform, the severity and duration of the violation, and the platform's good faith efforts to comply when assessing a civil penalty.

6) Establishes the e-Safety Advisory Commission as an independent advisory commission only for administrative purposes within the Department of Justice. Provides that the commission is purely advisory and shall not be considered a part of the Department of Justice for any other purpose.

7) Requires the e-Safety Advisory Commission to consist of members who possess relevant experience and include individuals with expertise or experience in one or more of the following areas:

    a) Pediatrics.
    b) Child psychology, adolescent psychology, or social psychology.

c) Technology.
d) Civil society organizations with expertise in children's online safety or public health.
e) Advocacy on behalf of marginalized youth, including, but not limited to, LGBTQ+ youth, youth of color, foster youth, or youth with disabilities.
f) Academia or research related to child development, public health, or online safety.
g) Education, specifically K-12 education.

8) Provides that the commission may advise the AG on the following:

a) The state of age assurance technologies.
b) Feedback from social media users, parents of minors, and online safety and children's safety organizations regarding implementation of California's online safety laws.
c) The differential impact of online age restrictions on various groups.
d) Harmful design features in covered entities and their impacts on youth health and well-being.
e) Safety practices of covered entities to protect children.
f) State agency rulemaking under Section 22685 of the Business and Professions Code.

9) Requires the commission to report to the Legislature and Governor all of the following:

a) The commission's activities.
b) Proposed actions taken and statutory changes.
c) Recommendations for legislative changes to enhance the protections of minors online.

Background

Since its inception, social media has exploded in popularity. People around the world use social media to connect with like-minded others, find various resources, and entertain themselves. However, these benefits did not come without a heavy price: a price that is felt the most by children. Youth mental health problems are skyrocketing, while digital consumption only increases. Social media use has been linked to increasing depression, anxiety, suicidality, eating disorders, and countless other harmful effects.

In response, this bill prohibits "covered platforms," including social media platforms, from providing an addictive feature to children under 16 years of age and requires the platforms to verify users' ages pursuant to the Digital Age Assurance Act before providing users with an addictive feature. The AG is authorized to promulgate necessary regulations and to alter the scope of what is considered a "covered platform," as necessary. The bill also stands up the e-Safety Advisory Commission as an independent advisory body to provide advice and recommendations to the AG on various topics.

The bill is sponsored by the Organization for Social Media Safety. It is supported by a variety of groups, including the California Initiative for Technology & Democracy and the Los Angeles County Sheriff's Department. The bill is opposed by a wide variety of groups, including Chamber of Progress and ACLU California Action. For a more thorough analysis, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis of this bill.

Comment

According to the author:

> AB 1709 would establish a state-wide minimum age requirement for users to create or maintain accounts on social media platforms that use addictive feeds as a significant part of the service provided by their platform. This bill is grounded in a substantial and growing body of research showing that early and unrestricted access to social media can harm children's mental health, cognitive development, and overall well-being. Children under 16 face heightened risks online, including compulsive use patterns, exposure to harmful content, and negative mental health outcomes. These risks are not incidental but are closely tied to how modern social media platforms are designed. Many platforms rely on algorithmically driven feeds that prioritize engagement, often by delivering highly stimulating or emotionally charged content. This design encourages prolonged use and can foster addictive behaviors, particularly in younger users whose self-regulation skills and executive functioning are still developing.
>
> By requiring platforms to implement meaningful age verification and prevention measures, the bill shifts responsibility from individual users to the companies that control access and design. This approach aims to reduce early exposure to addictive platform features during a key developmental window and to encourage safer, age-appropriate digital environments.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Major costs to the Department of Justice, including enforcing the social media ban provisions and rulemaking. (General Fund)

Significant to major costs annually to establish an e-Safety Advisory Commission. Costs may vary widely by year depending on workload. (General Fund)

Potentially significant costs to the courts to adjudicate new penalties depending on violations that may be unique to every platform. An eight-hour court day costs approximately $10,500 based on the hourly rate of court personnel including at minimum the judge, clerk, bailiff, court reporter, jury administrator, administrative staff, and jury per-diems. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources. The FY 2026-27 Budget appropriated $70 million General Fund for this purpose (Trial Court Trust Fund, General Fund).

ARGUMENTS IN SUPPORT: The Organization for Social Media Safety writes:

> AB 1709 is aimed at the mechanics of addictive platform design, not protected speech or online content. AB 1709 draws the correct public-safety line: children under 16 should not have to choose between social participation and exposure to addictive, compulsive-use design.
>
> AB 1709 is a reasonable, evidence-based response to a well-documented problem. Younger adolescents should not be expected to navigate products engineered to capture and hold their attention during a critical stage of development, where the available evidence clearly and convincingly shows both the serious harms of these products and long-standing internal awareness by the companies themselves.

ARGUMENTS IN OPPOSITION: A coalition of industry groups, including Technet, write:

> To be clear, our companies recognize the impacts their platforms can have and are committed to being part of the solution. However, social media is one factor, and any "solution" that ignores the scientific research, the individualized nature of mental health and the many other stressors impacting young people today, like academic pressure,

school safety, socio-economic challenges, and substance abuse, is not actually responsive to this complex problem.

Against this backdrop, AB 1709 applies a blunt, one-size-fits-all restriction to a highly individualized issue. If passed and signed, this bill completely cuts off access, while the research instead identifies use patterns, individual vulnerability, and context as the relevant risk factors. The bill would eliminate the benefits that many teens find in social media and sever youth in marginalized communities from their online communities.

SUBJECT: Public utilities: reporting

SOURCE: The Utility Reform Network

DIGEST: This bill requires quarterly reporting by electrical and natural gas corporations regarding federal funding received from federal or other funds. This bill requires the California Public Utilities Commission (CPUC) to ensure any savings are delivered to customers; requires the CPUC to impose penalties on electrical and natural gas corporations for failing to comply with the required reporting; and requires the CPUC to annually report to the Legislature information reported by electrical and gas corporations pursuant to the quarterly reports.

Senate Floor Amendments of 8/20/26 are minor and clarifying to address requests from the CPUC, including removing specific reference to a CPUC adopted resolution and references to pursuant to federal law.

ANALYSIS:

Existing law:

1) Establishes and vests the CPUC with regulatory authority over public utilities, including electrical corporations and gas corporations. (Article XII of the California Constitution)

2) Authorizes the CPUC to fix the rates and charges for public utilities and requires those rates and charges to be just and reasonable. (Public Utilities Code §451)

3) Authorizes the CPUC to inspect the accounts, books, papers, and documents of any public utility, or any affiliate, subsidiary, or holding corporation of that utility; and to examine under oath any officer, agent, or employee of such a utility in relation to its business and affairs. (Public Utilities Code §314)

4) Requires every public utility to furnish to the CPUC all information the CPUC requests, including tabulations, computations, maps, reports, books, and records. (Public Utilities Code §§581, 582, 585)

5) Establishes information provided by utilities to the CPUC is confidential and not open to public inspection unless ordered by the CPUC. Makes unauthorized disclosure by CPUC personnel a misdemeanor. (Public Utilities Code §583)

6) Requires the CPUC to determine and fix, by order, the just, reasonable, or sufficient rates, classifications, rules, practices, or contracts to be thereafter observed and in force whenever it finds, after a hearing, the rates or classifications, demanded, observed, charged, or collected by any public utility for or in connection with any service, product, or commodity, or the rules, practices, or contracts affecting such rates or classifications are insufficient, unlawful, unjust, unreasonable, discriminatory, or preferential. (Public Utilities Code §728)

7) Requires electrical corporations and gas corporations to submit various information to the CPUC and requires the CPUC to annually report to the Legislature on, among other things, all sources and amounts of funding and actual and proposed expenditures, including any costs to ratepayers, related to entities or programs established by the CPUC. (Public Utilities Code §910.4)

8) Requires the CPUC to prepare a report on the costs of programs and activities conducted by the major electric and gas IOUs. (Public Utilities Code §913)

This bill:

1) Requires each utility, defined as an electrical corporation or gas corporation, to report certain information for any taxpayer funding greater than or equal to $1 million that the utility has applied for or received.

2) Defines "taxpayer funding" to mean any funds received from public entities in the form of grants, loans, or bonds that were appropriated by the U.S. Congress and provided under specified federal laws, including the Inflation Reduction Act and the Infrastructure and Investment Jobs Act.

3) Requires each utility to include specified information in quarterly reports.

4) Requires the CPUC, for each application in which a utility is seeking ratepayer funding, to require the utility to report all relevant taxpayer funding greater than or equal to $1 million that the utility is pursuing or has secured.

5) Authorizes the CPUC to impose a penalty against the utility if the CPUC determines that a utility is not in compliance with the reporting requirements.

6) Requires the CPUC to require each utility to deliver to ratepayers the financial benefits of taxpayer funding received, including all value to or savings expected to benefit ratepayers.

7) Requires the CPUC, by January 1, 2028, and annually thereafter, to provide an annual report to the Legislature with a summary of the information on taxpayer funding reported by each utility, including the number of grants or loans, the source of those grants or loans, the dollar amount received, the projects funded by the grants or loans, and the demonstrated ratepayer savings.

8) Repeals the provisions of this bill on January 1, 2037.

Background

Resolution E-5254. In April 2023, the CPUC adopted Resolution E-5254, *Adopts Procedural Mechanisms for Review and Approval of Electric and Gas Investor-Owned Utility Cost Recovery Requests for Infrastructure Investment and Jobs Act and Other Federal Grant Programs*, which formalized tracking of electric and natural gas IOU federal funding opportunities. Resolution E-5254 establishes procedural mechanisms for California's electric and gas IOUs to seek cost recovery for expenses (i.e., matching funds and tax liabilities) associated with federal grant programs, including the Infrastructure Investment and Jobs Act

(IIJA), the Inflation Reduction Act (IRA), and the Creating Helpful Incentives to Produce Semiconductors and Science Act (CHIPS).

In response to Governor Newsom's Executive Order N-5-24 concerning addressing utility bill affordability, the CPUC summarized some of the various federal funding opportunities California's IOUs have secured and reported as part of Resolution E-5254, as shown below.

Summary of Federal Funding Secured by Electric IOUs
(Source: CPUC)

Applicant	Project	Award Amount	Description
PG&E, SCE, CEC, CPUC, CAISO, UC Berkeley	CHARGE-2T (California Harnessing Advanced Reliable Grid Enhancing Technologies for Transmission	$600 million federal share/ $901 million ratepayer share	Reconductor 100+ miles of transmission lines to increase transmission capacity.
PG&E, Redwood Coast Energy Authority, Schatz Energy Research Center at Cal Poly Humboldt	Tribal Energy Resilience and Sovereignty (TERAS) Project	$88 million federal share/ $89 million ratepayer share	Implement nested microgrids serving Hoopa Valley, Yurok, Karuk, and Blue Lake Rancheria tribal lands to reduce outage durations.
Liberty Utilities	Project Leapfrog	$13 million federal share/ $13 million ratepayer share	Upgrade distribution system for real-time information gathering and faster outage management.
CPUC, CEC, CA Infrastructure Economic Development Bank, CA Labor & Workforce Development Agency	Solar for All (EPA Award)	$249.8 million	Deliver residential solar for low-income and disadvantaged communities across the state. [Subject of litigation]
PG&E	Maintaining & Enhancing Hydroelectricity Section 247 (US DOE Award)	$34.5 million for 39 projects	Maintain and improve hydropower facilities.
PG&E	Project Polaris	$15 billion loan	Expand hydropower generation and battery storage, upgrade transmission capacity through reconductoring and grid enhancing technologies, and enable virtual powerplants.

Pacific Gas & Electric's $15 Billion Loan. The largest of these federal funding amounts is a $15 billion loan from the Department of Energy (DOE) to Pacific Gas & Electric (PG&E). Announced in December 2024, the $15 billion loan is to modernize PG&E's power grid and expand clean energy infrastructure across Northern and Central California. This initiative, known as Project Polaris, is part of the DOE's Energy Infrastructure Reinvestment program under the IRA. The loan's key objectives include refurbishing PG&E's 61 hydroelectric powerhouses, supporting the expansion of battery energy storage systems, upgrading transmission lines through reconductoring and grid-enhancements, and deploying virtual power plants. The loan is expected to support ongoing job creation and community investment, as well as generate an estimated $1 billion in customer savings, according to PG&E, over the life of the loan.

Advice letters. An advice letter is a document prepared by a utility to request action by the CPUC, including approval, authorization, or other relief. Most commonly, advice letters are requests for a tariff change, such as an informal request for approval to furnish service under rates, charges, terms or conditions other than those contained in the utility's approved rates and terms and conditions. Statute has largely deferred to the CPUC to adopt rules and procedures for addressing advice letters. Advice letters are procedurally less formal than other proceedings at the CPUC that require more judicial-type elements of an evidentiary hearing. Advice letters are classified into three tiers, ranging from Tier 1 to Tier 3. Tier 1 advice letters generally become effective upon filing of the advice letter. However, Tier 3 advice letters require commissioners to hear the item and take a vote at a publicly noticed meeting.

CPUC Rules. Advice letter filings are governed largely under CPUC General Order 96-B. The rules include provisions related to classification of the advice letters, public notice requirements, and specified requirements by industry (such as water, energy, or telecommunications). Additionally, General Order 173 provides additional rules associated with the filing and disposition of advice letters related to certain transactions transferring interests in utility property valued at $5 million or less, pursuant to Public Utilities Code Section 851.

Comments

Need for this bill. The author states:

> Californians are suffering under high electricity rates that are only expected to grow in the coming years to pay for wildfire safety measures and needed grid infrastructure and resiliency projects. Alternative financing structures, such as

> the $15 billion Department of Energy loan to Pacific Gas and Electric, are key strategies to reduce the growth of customer energy bills. Lower financing costs projected from taxpayer funded loans or grants are savings that should be passed on to ratepayers. Assembly Bill 1715 will ensure frequent and transparent reporting on the use of public funds by investor-owned utilities, so Californians can be confident their dollars are going towards lowering their energy bills.

Concerns about ratepayer impacts. The $15 billion loan to PG&E from the U.S. DOE has the potential to reduce costs for customers. Public financing, with lower interest rates compared to traditional lending offer potential savings for ratepayers. The sponsors of this bill, The Utility Reform Network (TURN), and others, acknowledge the potential benefits of the funding and have generally advocated for alternative financing to reduce costs to ratepayers. These include tapping into federal funding opportunities, along with any provided by the state, such as the alternative transmission financing from SB 254 (Becker, Chapter 119, Statutes of 2025). Though TURN supports these alternative financing approaches, they want to ensure there is appropriate accounting that will make certain savings for customers are realized. As such, they seek to codify many of the requirements in the CPUC Resolution requiring specified reporting of any federal funding secured from IRA, IIJA, and CHIPS. This bill also expands on those provisions to include any other funding sources or attempts to secure those funding sources.

Related/Prior Legislation

AB 2589 (Irwin, 2026) requires the CPUC to evaluate the full effect on public utilities' tax liabilities of the changes to corporate tax federal law and explicitly includes those changes as enacted by the One Big Beautiful Bill Act, federal House Resolution 1 (Public Law 119-21). The bill is pending before the full Senate.

AB 1020 (Schiavo, 2025) included nearly identical language as this bill, except it did not include the requirement for a searchable database or the customer notices for advice letters. The bill was held by the Senate Appropriations Committee.

AB 2666 (Boerner, Chapter 413, Statutes of 2024) required the CPUC to review forecasted costs by electric and gas utilities on a more frequent basis after the approval of each general rate case (GRC), and to adjust the authorized revenue requirement in the subsequent GRC, as appropriate, based on actual past cost.

AB 3256 (Irwin, 2024) would have required the CPUC to annually determine if accounts of public utilities have achieved their intended purpose; and if not, to deny ratepayer recovery of the costs recorded therein and to limit the public utility in using such accounts. Additionally required the CPUC to include the status of utilities' accounts as part of an existing report. The bill was held by the Senate Appropriations Committee.

AB 3264 (Petrie-Norris, Chapter 762, Statutes of 2024) included a suite of proposals to help address energy costs; these included requiring large electrical corporations, as defined, and large gas corporations, as defined, by January 1, 2026, and each year thereafter, to publish on their internet websites and provide to the CPUC a visual representation of certain cost categories included in residential electric or gas rates for the succeeding calendar year.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, unknown but likely significant ongoing costs, potentially in the hundreds of thousands of dollars annually (ratepayer funds), for the California Public Utilities Commission (CPUC) to accept reports of any taxpayer funding a utility applied for or received, review and analyze any such report, report annually to the Legislature and, as necessary, pursue enforcement actions.

OPPOSITION: (Verified 8/19/26)

Coalition of California Utility Employees

ARGUMENTS IN SUPPORT: According to The Utility Reform Network:

> By requiring strict reporting to the CPUC of non-traditional funding, such as public grants and loans, AB 1715 prevents for-profit, investor-owned utilities (IOUs) from being paid twice for the same projects. For every such funding agreement, IOUs will be required to submit detailed spending plans and quantify the savings expected to benefit ratepayers. Second, IOUs must disclose potential grants and loans in all related applications for ratepayer funding. Finally, the CPUC will ensure IOUs deliver savings to ratepayers and report back to the legislature.

ARGUMENTS IN OPPOSITION: According to the California Coalition of Utility Employees:

> As an initial matter, the bill would require an IOU, when seeking any ratepayer funding, to report to the California Public Utilities Commission all relevant nontraditional funding (e.g., federal grants or loans) the IOU applied for or received. If an IOU fails to comply with this requirement, the CPUC can impose a penalty, the amount of which is not defined. This provision of the bill could lead to substantial penalties simply for failing to report a nontraditional funding source (that an IOU may not have secured or ever will!). Even more troubling is the bill's requirement for an IOU to "promptly deliver" the financial benefits of nontraditional funding to ratepayers. This is a totally unrealistic requirement.

SUBJECT: State employment: telework programs

SOURCE:
Association of California State Supervisors
American Federation of State, County and Municipal Employees
California Association of Professional Scientists
California Attorneys Administrative Law Judges and Hearing Officers in State Employment
Professional Engineers in California Government
Service Employees International Union, California
Service Employees International Union, Local 1000

DIGEST: This bill amends and renames the existing State Employee Telecommuting Program; requires state agencies to evaluate their (now named) telework programs every 10 years, as specified; requires state agencies to provide a detailed, written justification to CalHR and to the agency's employees if the agency requires its employees to report to a workplace; and requires the Department of General Services (DGS) to establish a telework dashboard displaying the cost benefits of state telework programs.

ANALYSIS:

Existing law:

1) Defines "telecommuting" to mean the partial or total substitution of computers or telecommunication technologies, or both, for the commute to work by employees residing in California. (Government Code § 14200)

2) Finds and declares the following:

   a) Telecommuting can be an important means to reduce air pollution and traffic congestion and to reduce the high costs of highway commuting.
   b) Telecommuting stimulates employee productivity while giving workers more flexibility and control over their lives.
   c) It is the intent of the Legislature to encourage state agencies to adopt policies that encourage telecommuting by state employees to ensure the cost-effective and efficient delivery of services to taxpayers. (Government Code § 14200.1)

3) Requires state agencies to review work operations to determine where telecommuting provides them a practical benefit, and on or before July 1, 1995, to develop and implement a telecommuting plan, as specified. (Government Code § 142001)

4) Requires agencies that participated in specified experimental telework studies to continue and expand those programs, allows other agencies to offer telecommuting programs by partnering with a multiagency group that participated in the experimental studies, as specified, and requires the Department of General Services to establish an internal unit to oversee agency telecommuting programs and perform specified duties. (Government Code § 142001)

5) Requires each state agency to evaluate its telecommuting program and requires DGS to establish criteria for evaluating the state's telecommuting program and recommend modifications, if necessary. (Government Code § 142003)

This bill:

1) Denominates the "telecommute" program as the "telework" program and makes conforming changes to existing statute.

2) Finds and declares that telework schedules could reduce state-owned and leased office space by approximately 30% according to the Department of General Services, which the California State Auditor estimates could generate annual cost savings of as much as two hundred twenty-five million dollars ($225,000,000).

3) Updates statutory provisions by:

   a) Replacing references to reviewing telecommuting programs and with language that requires the development and implementation of telework programs, as specified.
   b) Requiring an agency to provide a detailed, written justification to CalHR and to the agency's employees where its unique operational needs and programmatic mission require employees to report to a workplace.

4) Requires DGS' specified unit responsible for developing telework guidelines to establish a telework dashboard that displays the cost-effectiveness and efficiency benefits of state telework programs, including documenting the annual savings to the state of reduced office space and operating costs, cuts in emissions and energy use, the decrease in vehicle miles traveled, and other benefits that save taxpayer dollars while delivering high-quality services to taxpayers.

5) Requires each state agency, every 10 years, to evaluate its telework program to ensure that it aligns with the state agency's unique operational needs to carry out its programmatic missions and to help recruit and retain a qualified workforce.

6) Contains an urgency clause, as specified.

Background

Dual Referral. The Senate Rules Committee referred this bill to the Senate Labor, Public Employment and Retirement Committee and to the Senate Governmental Organization Committee.

Related/Prior Legislation

AB 2672 (Cortese, Chapter 1209, Statutes of 1994) authorized state agencies to incorporate a telecommuting work option as an element of its transportation management programs, required state agencies to review work operations to determine where telecommuting provides them a practical benefit, and on or before July 1, 1995, to develop and implement a telecommuting plan, as specified.

AB 2963 (Klehs, Chapter 1389, Statutes of 1990) authorized agencies that participated in specified experimental telework studies to continue and expand those programs, as specified, and required the Department of General Services to establish an internal unit to oversee agency telecommuting programs and perform specified duties.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

"Current law requires state agencies to develop and implement telecommuting programs where telework is practical and beneficial, and requires the Department of General Services (DGS) to oversee statewide telework policies. Although these statutes date back to the 1990s, they have not been substantially updated despite the widespread expansion of telework during and after the COVID-19 pandemic.

Following the pandemic, many state employees continued working under hybrid telework schedules. In April 2024, Governor Newsom directed most state agencies to require employees to work in the office at least two days per week. In March 2025, the Governor issued Executive Order N-22-25 increasing the in-office requirement to four days per week. The order prompted collective bargaining disputes, an unfair practice charge before the Public Employment Relations Board, and a subsequent one-year delay in implementation. In response, the Joint Legislative Audit Committee directed the State Auditor to review the state's telework policies and return-to-office decisions.

In August 2025, the State Auditor concluded that the Administration could have made better use of available information on departmental operational needs, office space utilization, and costs before expanding return-to-office requirements. The audit found that 19 departments spent approximately $117 million in 2024-25 to maintain underutilized office space under the two-day-per-week policy and estimated statewide savings from broader telework could reach approximately $225 million. The Auditor also found that DGS had not established the telework evaluation criteria required by existing law, limiting departments' ability to assess the effectiveness and fiscal impacts of their telework programs."

OPPOSITION: (Verified 8/12/26)

Downtown Sacramento Partnership

ARGUMENTS IN SUPPORT: According to the Professional Engineers in California Government: "AB 1729 will save taxpayers hundreds of millions of dollars, reduce traffic congestion and emissions, and allows the state to hire and retain state qualified staff during a period of ongoing wage freezes."

According to the Service Employees International Union, California: "Telework has proven to be a reliable and effective tool to maintain service delivery while improving working conditions and operational efficiency. AB 1729 helps ensure

that these programs are guided by data, consistency, and accountability across departments."

"Findings from the California State Auditor reinforce the value of telework. The Auditor identified that expanded telework can generate significant cost savings for the state, estimating up to $225 million annually, while also reducing the need for leased office space. At a time when the state must be thoughtful about both fiscal stewardship and workforce stability, this bill moves us in the right direction."

According to the American Federation of State, County and Municipal Employees: "AB 1729 also advances fairness and consistency across state service by establishing clearer expectations around telework eligibility and implementation. Our members have demonstrated their ability to meet performance standards and public service obligations while teleworking, and this bill helps ensure telework decisions are made transparently and equitably."

According to the Association of California State Supervisors: "AB 1729 will help maintain flexible telework policies for eligible state employees, including state supervisors and managers."

"AB 1729 reiterates legislative support for telework and recognizes that it has proven to be a cost-effective and efficient way to deliver services to California taxpayers. This bill also clarifies the existing telework statutes to require a state agency to identify operational needs, and provide detailed, written justification when employees are required to report to a workplace."

ARGUMENTS IN OPPOSITION:

According to the Downtown Sacramento Partnership: "At a time when state and local governments face persistent structural budget challenges, AB 1729 undermines taxpayer investments, weakens California's most productive economic centers, and erodes the tax base that funds essential public services.

State agencies serve as anchor institutions in employment centers throughout California. In Sacramento, they occupy more than 60% of the downtown office market, according to Department of General Services (DGS) and CoStar data.i As a result, state workplace policies carry significant economic and fiscal consequences – impacts that AB 1729 largely ignores.

While AB 1729 requires reporting on projected savings within state agencies, it provides no mechanism to evaluate the corresponding fiscal impacts shifted onto local governments and taxpayers. Property tax, sales tax, transit occupancy tax, and related revenues that fund essential public services throughout entire jurisdictions

depend on healthy, circular economic activity in high occupancy commercial centers. These fiscal outcomes are closely tied to land use and transportation policies that shape residential and employment patterns, infrastructure utilization, and regional mobility.

Policies that encourage permanent or predominantly remote work diminish the value of employment centers, weakening the economic clustering that drives commercial investment, business activity, and local tax generation. State telework policies reduce Sacramento's economic activity by more than $218.5 million annually, according to an estimate in a 2023 report by Varshey & Associates.ii Moreover, downtown Sacramento commercial office values have declined by $800 million since 2020.iii Those effects ultimately weaken the tax base local governments rely upon to fund police, fire, parks, education, infrastructure, and other essential services. These indicators demonstrate why evaluating only state-level office savings provides an incomplete fiscal picture."

SUBJECT: Sexual battery

SOURCE: Riverside District Attorney's Office

DIGEST: This bill makes sexual battery, when committed after having entered an inhabited dwelling without consent, punishable as an alternate felony-misdemeanor.

ANALYSIS:

Existing law:

1) States that any person who touches the intimate body part of another person while that person is unlawfully restrained by the accused or accomplice, and if the touching is against the will of the person touched and is for the purpose of sexual arousal, sexual gratification, or sexual abuse, is guilty of sexual battery. This act is punishable as an alternate felony-misdemeanor by imprisonment in a county jail for not more than one year, and by a fine not exceeding $2,000; or by imprisonment in the state prison for 2, 3, or 4 years, and by a fine not exceeding $10,000. (Penal [Pen.] Code, § 243.4, subd. (a).)

2) States that sexual battery of another person who is institutionalized for medical treatment and who is seriously disabled or medically incapacitated is punishable as an alternate felony-misdemeanor by imprisonment in a county jail for not more than one year, and by a fine not exceeding $2,000; or by imprisonment in the state prison for 2, 3, or 4 years, and by a fine not exceeding $10,000. (Pen. Code, § 243.4, subd. (b).)

3) States that sexual battery of another person when the perpetrator fraudulently represented that the touching served a professional purpose is punishable as an alternate felony-misdemeanor by imprisonment in a county jail for not more than one year, and by a fine not exceeding $2,000; or by imprisonment in the state prison for 2, 3, or 4 years, and by a fine not exceeding $10,000. (Pen. Code, § 243.4, subd. (c).)

4) States that sexual battery of a person while that person is unlawfully restrained either by the accused or an accomplice, or is institutionalized for medical treatment and is seriously disabled or medically incapacitated, to masturbate or touch an intimate part of either of those persons or a third person is punishable as an alternate felony-misdemeanor by imprisonment in a county jail for not more than one year, and by a fine not exceeding $2,000; or by imprisonment in the state prison for 2, 3, or 4 years, and by a fine not exceeding $10,000. (Pen. Code, § 243.4, subd. (d).)

5) Makes all other types of sexual battery, including causing a person to masturbate or touch an intimate part of those persons or a third person against the victim's will, punishable as a misdemeanor by a fine not exceeding $2,000, or by imprisonment in a county jail not exceeding six months, or by both that fine and imprisonment. (Pen. Code, § 243.4, subd. (e)(1).)

6) Provides that "touches," for the purpose of sexual battery, means physical contact with another person, whether accomplished directly, through the clothing of the person committing the offense, or through the clothing of the victim. (Pen. Code, § 243.4, subd. (e)(2).)

7) Defines "intimate part" for purposes of sexual battery as the sexual organ, anus, groin, or buttocks of any person, and the breast of a female. (Pen. Code, § 243.4, subd. (g)(1).)

8) Specifies that "sexual battery" does not include rape or sexual penetration. (Pen. Code, § 243.4, subd. (g)(2).)

9) Requires a person convicted of sexual battery to register as a sex offender. (Pen. Code, § 290, subd. (c).)

10) Specifies that the punishment for indecent exposure after having entered, without consent, an inhabited dwelling house, trailer coach, or the inhabited portion of any other building, is either imprisonment in the state prison, or in the county jail not exceeding one year. (Pen. Code, § 314.)

11) Specifies that the punishment for annoying or molesting a child under 18 after having entered, without consent, an inhabited dwelling house, or trailer coach, or the inhabited portion of any other building, is either by imprisonment in the state prison, or in a county jail not exceeding one year, and by a fine not exceeding $5,000. (Pen. Code, § 647.6, subd. (b).)

12) Provides that every person who enters any house, room, apartment, tenement, shop, warehouse, store, mill, barn, stable, outhouse or other building, tent, vessel, floating home, railroad car, locked or sealed cargo container, any house car, inhabited camper, vehicle when the doors are locked, aircraft, or mine or any underground portion thereof, with intent to commit grand or petit larceny or any felony is guilty of burglary. (Pen. Code, § 459, subd. (a).)

13) Defines "inhabited" for purposes of burglary to mean currently being used for dwelling purposes, whether occupied or not. (Ibid.)

14) States that every burglary of an inhabited dwelling house, vessel that is inhabited and designed for habitation, floating home, or trailer coach, or the inhabited portion of any other building, is burglary of the first degree. (Pen. Code, § 460, subd. (a).)

This bill:

1) Makes sexual battery when committed after having entered an inhabited dwelling or trailer coach, as defined, or the inhabited portion of any other building without consent an alternate felony-misdemeanor.

2) Requires that the sexual battery be committed in the dwelling house, trailer coach, or inhabited portion of any other building for this provision to apply.

Background

California's sexual battery statute, Penal Code section 243.4, includes five subdivisions that define sexual battery based on the defendant's conduct and set

the punishment for each respective situation. Subdivisions (a), (b), and (c) cover situations where the defendant touches the intimate parts of the victim while the victim is unlawfully restrained, institutionalized for medical treatment, or not conscious of the sexual nature of the act because of a fraudulent representation. (Pen. Code, § 243.4, subds. (a)-(c).) Subdivisions (a), (b), and (c) are wobblers (i.e., either a felony or misdemeanor).

Subdivision (d) proscribes conduct different from the other sexual batteries. Subdivision (d) covers the situation where the defendant causes the victim to masturbate or touch the intimate part of the defendant or another person. Subdivision (d) is a wobbler, and like the other wobblers, subdivision (d) requires that the victim is unlawfully restrained or institutionalized for medical treatment, and the "touching" requires the victim to touch the skin of the defendant or another person's intimate parts. (Pen. Code, § 243.4, subds. (d), (f).)

Subdivision (e) is misdemeanor sexual battery. (Pen. Code, § 243.4, subd. (e).) This subdivision covers situations where the defendant touches the intimate parts of the victim. For misdemeanor sexual battery, unlike subdivisions (a), (b), and (c), there is no requirement that the victim be unlawfully restrained, institutionalized for medical treatment, or not conscious of the sexual nature of the act. These differences make the misdemeanor definition broader than the wobbler definition, and as such, subdivision (e) proscribes a wider variety of conduct than subdivisions (a), (b), and (c).

Additionally, every person who enters any house, room, apartment, tenement, shop, warehouse, store, mill, barn, stable, outhouse or other building, tent, vessel, floating home, railroad car, locked or sealed cargo container, any house car, inhabited camper, vehicle when the doors are locked, aircraft, or mine or any underground portion thereof, with intent to commit grand or petit larceny or any felony is guilty of burglary. (Pen. Code, § 459, subd. (a).) "Inhabited" for purposes of burglary means currently being used for dwelling purposes, whether occupied or not. (*Ibid*.) Every burglary of an inhabited dwelling house, vessel which is inhabited and designed for habitation, floating home, or trailer coach, or the inhabited portion of any other building, is burglary of the first degree. (Pen. Code, § 460, subd. (a).)

This bill adds to the existing sexual battery statute a circumstance where a person commits an act of sexual battery after having entered an inhabited dwelling without consent. This offense would be punishable as a wobbler. This bill requires that the sexual battery be committed in the dwelling for this provision to apply.

Notably, there is already an existing statute that may be used to punish this conduct. Subdivision (b) of Penal Code section 220 makes a person who assaults another with intent to commit rape, sodomy, oral copulation, lewd and lascivious acts, or sexual penetration guilty of a felony. This crime is punishable by imprisonment in the state prison for two, four, or six years. If the victim is under 18 years of age, the punishment is five, seven, or nine years. If the person commits this crime via first degree burglary, the punishment is life with the possibility of parole. For example, in one case in Fresno, a man entered an occupied home and groped a woman as she slept. He was charged with felony assault with intent to commit a sex offense. (*Fresno Man Arrested for Home Invasion, Groping Sleeping Woman*, GV Wire (July 18, 2025) <https://gvwire.com/2025/07/18/fresno-man-arrested-for-home-invasion-groping-sleeping-woman/ [as of Jun. 5, 2026].)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

> Unknown costs to the California Department of Corrections and Rehabilitation (CDCR) to incarcerate if the felony sentence is imposed. Unknown costs to the counties to incarcerate if a one year misdemeanor sentence is imposed. Unknown, potentially significant costs to the courts to adjudicate new penalties depending on many unknowns, including the numbers of people charged and the factors unique to each case. Likely minor and absorbable costs to local law enforcement agencies for increased reporting of sex offender data to the Department of Justice Megan's Law website (local funds).

SUBJECT: CalWORKS

SOURCE: Coalition of California Welfare Rights Organization
California Partnership to End Domestic Violence
End Child Poverty California Powered by Grace
Parent Voices CA
SEIU CA

DIGEST: This bill deletes the rule that families with parents who work over 100 hours in a month are ineligible for assistance from the California Work Opportunity and Responsibility to Kids (CalWORKs) program.

ANALYSIS:

Existing Law:

1) Establishes the federal Temporary Assistance for Needy Families (TANF) program, which permits states to implement the program under a state plan. (42 United States Code [U.S.C.] section 601 et seq.)

2) Permits TANF financial assistance to any child that has been deprived of parental support or care by reason of the fact that his or her parent who is the

principal earner is employed less than 100 hours a month; or exceeds that standard for a particular month if his or her work is intermittent and the excess is of a temporary nature as evidenced by the fact that he or she was under the 100-hour standard for two prior months and is expected to be under the standard during the next month. (45 Code of Federal Regulations [CFR] section 233.100)

3) Establishes the CalWORKs program to provide cash assistance and other social services for low-income families through the federal TANF program. Under CalWORKs, each county provides assistance through a combination of state, county, and federal TANF funds. (Welfare and Institutions Code [WIC] section 11200 et seq.)

4) Establishes income, asset, and real property limits used to determine eligibility for the CalWORKs program and grant amounts based on family size and county of residence. (WIC section 11150-11160; WIC section 11450 et seq.)

5) Requires all individuals in the household who are 16 years of age or older, unless they are otherwise exempt, to participate in welfare-to-work activities as a condition of eligibility for CalWORKs. (WIC section 11320.3 and section 11322.6)

6) Establishes asset limits to determine eligibility for CalWORKs aid. Prohibits a CalWORKs applicant or recipient from receiving aid if they have countable resources over $10,000, or more than $15,000 if one member of the household is age 60 or older or has a disability, or if they have a vehicle valued over $25,000. Requires asset limits to be increased every year based on the California Necessities Index. (WIC section 11155)

7) Establishes that a child is considered deprived of parental support for the purposes of receiving CalWORKs benefits due to the unemployment of their parent or parents when a parent has worked less than 100 hours in the preceding four weeks and meets specified federal definitions of an unemployed parent. (WIC section 11201(b))

8) Establishes that a family receiving CalWORKs benefits with a child who is considered to be deprived of parental support due to unemployment may continue to receive assistance regardless of the number of hours their parent works, provided the family does not exceed the applicable gross or net income limits and is otherwise eligible for assistance. (WIC section 11201(c))

This bill:

1) Makes the requirement that a parent must not work more than 100 hours in the preceding four weeks in order to for their child to be considered deprived of parental support due to unemployment of the parent inoperative on July 1, 2027 or on the date the department notifies the Legislature that the Statewide Automated Welfare System can perform the necessary automation to implement this section, whichever date is later, and on January 1 of the following year, repealed.

2) Makes the current the provision that allows a family receiving CalWORKs benefits with a child who is considered to be deprived of parental support due to unemployment to continue to receive assistance regardless of the number of hours their parent works, provided the family does not exceed income limits and is otherwise eligible for assistance inoperative on July 1, 2027 or on the date the department notifies the Legislature that the Statewide Automated Welfare System can perform the necessary automation to implement this section, whichever date is later, and on January 1 of the following year, repealed.

3) Defines "unemployed parent" to mean a natural or adoptive parent with whom the child is living.

4) Makes a child to be considered to be deprived of parental support or care due to the unemployment of their parent, and therefore qualify for CalWORKs benefits, as long as the family's income does not exceed the applicable CalWORKs gross or net income limits and is otherwise eligible for assistance.

5) Allow California Department of Social Services (CDSS) to implement, interpret, or make specific the bill through all- county letters or similar written instructions until regulations have been adopted.

6) Makes this section operative on July 1, 2027, or on the date the department notifies the Legislature that the Statewide Automated Welfare System can perform the necessary automation to implement this section, whichever date is later.

Background

According to the author, "California's safety net should support families working to make ends meet, not penalize them for working additional hours. The current 100-hour rule in CalWORKs is an outdated policy that denies assistance to otherwise income-eligible families solely because a parent exceeds a monthly work-hour threshold. AB 1755 modernizes the program by eliminating this

obsolete barrier and ensuring eligibility is based on income and need rather than arbitrary hour limits. By removing a policy that discourages work, the bill promotes family stability, advances economic equity, reduces administrative burdens, and strengthens California's commitment to reducing child poverty and supporting working families."

CalWORKs. As California's version of the federal TANF program, CalWORKs is the state's largest anti-poverty program. CalWORKs provides temporary cash assistance aimed at moving children out of poverty and helping qualified low-income families meet their basic needs, such as rent, clothing, utility bills, food, and other items needed to ensure children are cared for at home and safely remain with their families. In addition to cash assistance, adult CalWORKs recipients are provided education, employment, and training services designed to help remove barriers to work and promote self-sufficiency. These services are typically outlined in a welfare-to-work plan. CDSS is the designated state agency responsible for program supervision at the state level, and counties are responsible for administering the program at the local level.

CalWORKs is funded through federal, state, county and realignments funds. The federal government gives the state a TANF block grant and CalWORKs receives a majority of that allocation. California and local governments spend a maintenance-of-effort amount as well, as required by federal law. The state also uses General Fund money for state-only programs and provides counties with a single allocation to fund many CalWORKs services. Funds from the 1991 realignment are also used to fund assistance payments and are part of the single allocation.

Eligibility for CalWORKs is based on family size, income level, and region. Families must show economic hardship through income and asset tests and participation in the program is time limited. Adults are only allowed to use CalWORKs for 60 months in their lifetime. Children of adults who receive cash aid can continue to receive benefits until they are 18 years old in California.

Welfare-to-Work. Adults who participate in CalWORKs are also required to participate in welfare-to-work activities, unless exempted, which include employment, education, job skills training, vocational education, work study on college campuses, on-the-job training, community service, and job retention services, or activities to address or remove barriers like mental health, substance use disorder, and domestic abuse. Eligible families can also receive supportive services like child care, transportation, ancillary expenses, mental health services, substance abuse services, and personal counseling.

CalWORKs Deprivation Standard. The state's CalWORKs deprivation standards were originally enacted to comply with federal Aid to Families with Dependent Children (AFDC) rules, which required two-parent families to take additional steps to prove deprivation in order to receive aid. The AFDC statute was replaced in 1996 with the TANF program, which emphasized work preparation in conjunction with receipt of the grant. One of the four core purposes of the TANF program is to encourage the formation and maintenance of two-parent families.

The deprivation test means that, to qualify for CalWORKs, a child in the family must be "deprived of parental support or care" due to the death, physical or mental incapacity, or incarceration of a parent; the unemployment of a parent or parents; or the continued absence of a parent, as defined. Consequently, the only way a two-parent household can meet the deprivation test is if the principal wage earner is unemployed, which is defined as working less than 100 hours a month, regardless of their income. The 100-hour work limit is a remnant of the prior AFDC law, which was based on the assumption that an average of 25 hours per week would put a family above the threshold to receive cash benefits.

Many states have modified or removed special requirements for two-parent units, but California remains one of the few states that has the 100-hour limit in statute. The elimination of this rule would allow county eligibility workers to evaluate applications based only on income limits and allow more families to receive benefits that would otherwise qualify. An evaluation of the Minnesota Family Investment Program found that when "the 100-hour and work history rules were removed, two-parent families were allowed to retain more of their earnings"[1]. Studies of the program have also found that rules like the 100-hour rule discourage employment rather than incentivize it. This bill would remove 100-hour work limit for purposes of determining if a family meets the deprivation standard.

Related/Prior Legislation:

AB 1324 (Sharp-Collins, 2025) would have made several changes to CalWORKs, including deleting the rule that families with unemployed parents who work over 100 hours in a month are ineligible for CalWORKs assistance and made changes to the extended subsidized employment program, including conducting a CalWORKs expansion feasibility study. AB 1324 was vetoed.

SB 996 (Kamlager, 2022) would have repealed the consideration of an individual's or family's assets as a condition of eligibility for CalWORKs and repealed the 100-

[1] Paula Roberts and Mark Greenberg. Marriage and the TANF Rules: A Discussion Paper. Center for Law and Social Policy. February 1, 2005

hour standard described above for purposes of determining a child's deprivation of parental support or care due to the unemployment of their parent. SB 996 was held in the Assembly Appropriations Committee.

AB 371 (Mullin, 2015) would have removed the deprivation standard for purposes of determining eligibility for CalWORKs and would have instead required that aid be granted to a family if the family meets applicable eligibility requirements, without regard to the absence or employment status of the parent, among other changes to CalWORKs requirements. AB 371 was vetoed.

AB 1502 (Mullin, 2014) would have removed the deprivation standard for purposes of determining eligibility for CalWORKs and would have instead required that aid be granted to a family if the family meets applicable eligibility requirements, without regard to the absence or employment status of the parent, among other changes to CalWORKs requirements. AB 1502 was held in the Senate Appropriations Committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee: "Unknown ongoing General Fund costs, likely low millions, to eliminate the 100-hour rule limitation for child deprivation. Costs are related to grants, employment services, child care, and automation. Costs to counties for administration would be potentially reimbursable by the state, subject to a determination by the Commission on State Mandates."

SUBJECT: Department of Consumer Affairs: public members of boards: conflicts of interest

SOURCE: Author

DIGEST: This bill defines "close family member" as including, but not limited to, a parent or child, for the purposes of avoiding conflict of interest when a public member is appointed to a board within the Department of Consumer Affairs (DCA). Requires each board within DCA to adopt regulations to determine whether any relationship with a licensee of a board other than parent-child should prevent an individual from serving as a public member on that board within DCA.

ANALYSIS:

Existing Law:

1) Establishes the DCA comprised of specified boards, bureaus, and commissions vested with the authority to license and regulate various professions and vocations, and to enforce the standards and regulations set forth. (Business and Professions Code (BPC) §§ 100 *et. seq.*)

2) Defines "Board," for the purpose of identifying entities to which provisions relating to public members apply, as a board, advisory board, commission, examining committee, committee or other similarly constituted body exercising powers under the BPC. (BPC § 452)

3) Enumerates 38 entities that comprise the DCA, including 27 boards, one commission, and one committee. (BPC § 101)

4) Prohibits a public board member from being a current or past licensee of the board, or a close family member of a licensee, to avoid potential for a conflict of interest. (BPC § 450.2)

5) States that boards in DCA are established for the purpose of ensuring that those private businesses and professions deemed to engage in activities which have potential impact upon the public health, safety, and welfare are adequately regulated in order to protect the people of California. (BPC § 101.6)

6) Provides that each board comprising DCA exists as a separate unit, and has the functions of setting standards, holding meetings, and setting dates thereof, preparing and conducting examinations, passing upon applicants, conducting investigations of violations of laws under its jurisdiction, issuing citations and holding hearings for the revocation of licenses, and the imposing of penalties following those hearings, insofar as these powers are given by statute to each respective board. (BPC § 108)

7) Prohibits a public or lay member of a board under the DCA from being, or having been within the five years preceding their appointment, any of the following:

   a) An employer, officer, director, or substantially full-time representative of an employer or group of employers,

   b) A person maintaining a contractual relationship, or

   c) An employee. (BPC § 450)

8) Establishes an exception that a board member may be, or may have been within five years preceding their appointment, for purposes of relationships described in 4), engaged in an employment or contractual relationship with a licensee of the board so long as the relationship does not constitute more than two percent of the overall practice or business of the licensee. (BPC §§ 450(a) – 450(c))

9) Prohibits a public member from having any financial interest in any organization that is subject to regulation by the board of which they are a member either at the time of their appointment or during their tenure in office. (BPC § 450.3)

10) Prohibits a public or lay member from engaging in pursuits which lie within the field of the industry or profession regulated by the board of which they are a member, or providing representation to the industry or profession, during the term of their service or within the five-year period preceding their appointment. (BPC § 450.5)

11) States that if, as part of its functions, any board delegates any duty or responsibility to be performed by a single board member, public or lay members cannot:

    a) Prepare, administer, or grade examinations, or

    b) Inspect or investigate licensees, their manner or method of practice or business, or their place of practice or business. (BPC § 451)

12) Requires each newly appointed board member to complete a training and orientation program offered by the DCA regarding, among other things, their functions, responsibilities, and obligations as a board member, within one year of assuming office. (BPC § 453)

This bill:

1) Defines “close family member” as including, but not limited to, a parent or a child for the purposes of avoiding a potential for a conflict of interest of a public member of a board within the DCA.

2) Requires each board within DCA to adopt regulations to provide guidance on determining whether relationships with a licensee of that board other than a parent-child should prohibit an individual from serving as a public member of that board.

Background

Department of Consumer Affairs Boards. Within DCA's 38 regulatory entities, there are 27 boards, one commission, and one committee (boards) that regulate California's professions and vocations. Boards are semi-autonomous regulatory bodies vested with decision-making authority independent of the administration. Board members commonly serve four-year terms, but term lengths may vary

depending on the board and appointment date. Boards are comprised of members of the regulated profession appointed by the Governor, or "professional" members, and non-licensee members, or "public" members, who are appointed by the Governor and the Legislature.

Board members make policy decisions that impact licensees, review licensee disciplinary cases, establish minimum standards, act as stewards over program's budget, and have many other functions that require public members to have an objective viewpoint in their decision-making process. Any bias, such as a financial or personal interest, that informs a board member's judgement could lead to flawed policies, diminished consumer protection, and reduced public confidence in the board's ability to achieve its mission.

Public Member Close relationships. Existing law establishes qualifications and limitations of public board member appointments (BPC §§ 450-453), including those of a public member to a board who is a close relative of a licensee of that board. However, "close relative," is not defined. This bill would define "close relative," as a parent or child and require each DCA board to adopt regulations to expand upon that limitation to define which familial relationship(s) should be prohibited from serving as a public member to avoid potential for conflict of interest.

This bill does not provide a deadline for implementation so presumably, DCA's boards would integrate the regulation required by this bill into their rulemaking calendar as workload and time permits.

SUBJECT: Student transfer: tribal colleges

SOURCE: California Indian Nations College
Table Mountain Rancheria

DIGEST: This bill requires the California State University (CSU) and California Community Colleges (CCC) that offer a baccalaureate degree, and requests the University of California (UC), to develop and implement transfer and articulation pathways for students attending California tribal colleges and universities (TCUs).

Senate floor amendments of 8/21/26 add intent language related to associate degree for transfer, replace Board of Governors references with the Community College District, replace reference to the California Articulation Number system with Course Identification Numbering System and the Common Course Numbering Project, and clarify that an articulation agreement does not require a public postsecondary educational institution to accept a student who does not meet minimum transfer requirements.

ANALYSIS:

Existing Federal law defines "Indian tribal government" as the governing body of any tribe, band, community, or group of Indians, or (if applicable) Alaska Natives,

as determined by the Secretary of the Interior, to exercise governmental functions. (Title 26, United States Code § 7701 (a)(40))

Existing State law:

1) Establishes the Donahoe Higher Education Act, setting forth the mission of the UC, the CSU, and the CCC; and defines "independent institutions of higher education" as nonpublic higher education institutions that grant undergraduate degrees, graduate degrees, or both, and that are formed as nonprofit corporations in California and are accredited by an agency recognized by the United States Department of Education. For purposes of any code or statute, a national or regional accrediting agency recognized by the United States Department of Education as of January 1, 2025, shall retain that recognition until July 1, 2029, provided that the accrediting agency continues to operate in substantially the same manner as it did on January 1, 2025. (Education Code (EC) § 66010, et seq.)

2) Includes TCUs in the definition of "public institution of higher education." (EC Section 94858.5(b))

This bill:

1) Requires the CSU Trustees and the governing boards of community college districts that offer a baccalaureate degree, and requests the UC Regents, to develop and implement transfer agreements and articulation programs that include general education and transfer curricula to support and enhance the transfer of students attending TCUs to UC, CSU, and CCCs. It also requires, that in developing a transfer agreement or articulation program, the CSU and the CCCs, and request the UC to, work collaboratively with participating TCUs to identify opportunities to align coursework with the California General Education Transfer Curriculum (Cal-GETC), where appropriate.

2) Requires that a transfer agreement and articulation program include all of the following:

   a) Enrollment and resource planning.

   b) Intersegmental faculty curricular efforts.

   c) Coordinated counseling.

d) Financial aid and transfer services.

e) Specific efforts to improve diversity.

f) Early outreach activities.

g) Concurrent enrollment opportunities.

h) Support centers.

3) Requires the CSU Trustees, the governing boards of community college districts that offer a baccalaureate degree, and requests UC Regents to develop and implement, to the extent capacity is available, concurrent enrollment programs that allow students attending TCUs to enroll in courses offered at UC, CSU or CCC for purposes of expanding opportunities for students attending TCUs to potentially transfer to UC, CSU or CCC.

4) Requires the CSU and CCCs and requests UC in consultation with faculty and other institutional representatives, as appropriate, assess tools, systems, or curricula designed to facilitate student transfer for purposes of building upon those that are most effective in communicating articulation for students attending TCUs that must include the Course Identification Numbering System, the Common Course Numbering Project, the Intersegmental Major Preparation Articulated Curriculum, the General Education Transfer Curriculum, and the Articulation System Stimulating Interinstitutional Student Transfer.

5) Defines "TCU" to mean tribal colleges and universities geographically located in California that are operated by an Indian tribal government, as defined in Section 7701(a)(40) of Title 26 of the United States Code. "TCU" includes, but is not limited to, California Indian Nations College, California Tribal College, and Kumeyaay Community College.

6) States that this bill's provisions do not require the UC, the CSU, or the CCC to articulate coursework completed at a TCU that is not institutionally accredited by an accrediting agency recognized by the United States Department of Education.

7) States that this bill's provisions do not require a public postsecondary educational institution to accept a student who does not meet the minimum requirements to transfer to the institution.

8) States Legislative findings and declarations related to the benefits of articulation agreements and effective transfer pathways, as well as encourages evaluation of associate degrees for transfer for students attending TCUs to transfer to public postsecondary educational institutions.

9) States that it is the Legislature's intent to facilitate articulation and seamless transfer pathways for students attending TCUs to public postsecondary educational institutions. The goal of developing and implementing transfer agreements and articulation programs is to ensure that students attending TCUs can earn certificates and degrees that allow them greater job-earning potential in the workforce, and to ensure the effective and efficient progression of students attending TCUs when they transfer to UC, CSU, or CCCs, in order to minimize duplication of coursework.

Comments

Need for the bill. According to the author, "Tribal Colleges and Universities (TCU) offer culturally relevant education and serves to bridge the gap in postsecondary education for Native American students. When students who are enrolled at a TCU decide to transfer to one of California's higher education institutions, they may be met with the challenge of ensuring courses they have taken are accepted at their new university. To ensure these students are not burdened by duplicative courses if they decide to transfer, we must work to establish transfer agreements. This would offer a helpful tool when it comes to transferring and aim to ensure effective and efficient progression for these students as they continue their pursuit in higher education."

Accreditation and transferability of coursework. This bill requires the CSU and CCCs and requests the UC to develop transfer agreements, articulation programs, and concurrent enrollment opportunities for students attending TCUs. However, this bill does not establish any minimum standards regarding the accreditation status of participating TCUs. Of the three TCUs specifically identified in this bill, California Indian Nations College is institutionally accredited, while the remaining institutions are not currently accredited or pursuing accreditation. Given that transfer credit determinations and articulation agreements are generally informed by institutional accreditation and academic review processes, the absence of an

accreditation standard may create uncertainty regarding the transferability of coursework and implementation of transfer goals. As such, this bill explicitly states that its provisions do not require articulation of unaccredited coursework.

Development of transfer pathways. According to the California Indian Nations College, students transferring from a TCU often do not know how their coursework will be applied toward degree requirements until after admission because formal articulation pathways generally do not exist. As a result, students may receive elective credit for completed coursework rather than credit that satisfies lower-division general education or major preparation requirements. This bill requires the CSU, CCCs, and requests the UC, in consultation with other involved entities as appropriate, to assess existing tools, systems, and curricula designed to facilitate student transfer. Given that articulation agreements are typically developed through faculty review and ongoing curriculum alignment between intuitions, this bill requires that consultation include faculty and other appropriate institutional representatives.

Concurrent enrollment. This bill also requires the public segments to develop concurrent enrollment opportunities for students attending TCUs to simultaneously enroll in courses offered by CSU, UC, and CCCs to the extent capacity is available. The extent to which concurrent enrollment programs are implemented would largely be left to the discretion of the participating institutions.

Existing transfer systems. Public higher education institutions currently have authority to evaluate coursework, establish articulation agreements, and develop transfer pathways with other institutions. This bill requires the CSU, CCCs, and requests the UC to assess existing transfer tools and systems, including the Cal-GETC, as part of developing transfer pathways for students attending TCUs. Ensuring eligible TCUs are able to not only participate in transfer pathways, but are integrated into the Cal-GETC (which is the singular general education pathway for CCC students to fulfill lower-division general education requirements necessary for transfer and admission to both the CSU and the UC), and Assist.org (the official course transfer and articulation system for California colleges and universities) could ease the transfer process for TCU students. This bill identifies these existing resources and requires participating institutions to identify opportunities to align coursework with Cal-GETC, where appropriate, to further the goal of creating seamless transfer pathways for students attending TCUs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee analysis, this bill would have the following fiscal impact:

- The UC estimates one-time General Fund costs of $500,000 and ongoing costs of $450,000 each year to bring in the California Indian Nations College and future tribal colleges into Articulation System Stimulating Interinstitutional Student Transfer (ASSIST) which is the official course transfer and articulation systems that the CCCs use for transfer, and staff time to develop and implement transfer agreement

- The CSU estimates additional General Fund costs possibly in the low millions of dollars for major preparation articulation, including one-time costs for campuses to evaluate and create major-course articulation for each AA degree offered by participating tribal colleges, mapping degree and course requirements to CSU major preparation and transfer admission expectations. This estimate also includes ongoing costs in the mid to high hundreds of thousands of dollars pertaining to student support services and outreach.

- The Chancellor's Office estimates Proposition 98 General Fund costs of $600,000 to $1.4 million each year for the 49 colleges that offer a baccalaureate degree program to implement and maintain transfer agreement and articulation programs including coordinated counseling, financial aid and transfer services, and concurrent enrollment. This estimate assumes a cost of $15,000 to $29,000 for each of these colleges. However, the costs could be lower to the extent that the program is integrated within existing resources. The Chancellor's Office also estimates one-time workload costs of between $13,000 and $59,000 to assess the Common Course Numbering system, the California Education General Education Transfer Curriculum, and ASSIST to facilitate student transfers from the TCUs. These costs could be higher to the extent this assessment results in updates to these systems to ensure integration.

DIGEST: This bill adds, to the Cartwright Act, a prohibition on engaging in monopolistic or monopsonistic conduct, as specified; a violation of this measure's provisions can be enforced only through an action brought by the Attorney General or a district attorney.

ANALYSIS:

Existing federal law:

1) Establishes the Sherman Antitrust Act of 1890 (Sherman Act). (15 United States Code (U.S.C.) §§ 1-7.)

2) Prohibits, under the Sherman Act:

   a) Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the states or with foreign nations. (15 U.S.C. § 1.)

   b) The monopolization, or attempt to monopolize, or combination or conspiracy with any other persons to monopolize, any part of the trade or commerce among the states, or with foreign nations. (15 U.S.C. § 2.)

3) Authorizes a state attorney general to bring a civil action in the name of the state in any district court of the United States having jurisdiction over the defendant to secure monetary relief, as provided, for violations of the Sherman Act or the Clayton Act. (15 U.S.C. § 15c.)

Existing state law:

1) Establishes the Cartwright Act. (Business & Professions (Bus. & Prof.) Code, div. 7, pt. 2, ch. 2, §§ 16700 et seq.)

2) Defines "person" within the Cartwright Act to include corporations, firms, partnerships, and associations. (Bus. & Prof. Code, § 16702.)

3) Defines a "trust" under the Cartwright Act as a combination of capital, skill, or acts by two or more persons for specified purposes, including restricting trade or commerce or preventing competition. (Bus. & Prof. Code, § 16720.)

4) Makes every trust unlawful, against public policy, and void, except as exempted under the Cartwright Act. (Bus. & Prof. Code, § 16726.)

5) Provides that any contract or agreement in violation of the Cartwright Act is absolutely void and not enforceable. (Bus & Prof. Code, § 16722.)

6) Authorizes the Attorney General, or the district attorney of any county, subject to specified notice requirements, to initiate a civil action or criminal proceeding for a violation of the Cartwright Act. (Bus. & Prof. Code, § 16754.)

7) Authorizes any person who is injured in their business or property by reason of anything forbidden under the Cartwright Act, regardless of whether the injured person dealt directly or indirectly with the defendant, to file a civil action to recover treble damages, interest, and injunctive relief.

   a) The state and its political subdivisions and public agencies are "persons" for the purpose of 7).

   b) The Attorney General or a district attorney may file a suit for damages on behalf of a state or county political subdivision, respectively. (Bus. & Prof. Code, § 16750.)

8) Authorizes the Attorney General to file a civil action in the name of the people of the State of California, as *parens patriae* on behalf of natural persons residing in the state, for a violation of the Cartwright Act, to secure monetary relief in the form of treble damages sustained by those natural persons, interest, costs, and reasonable attorney fees. (Bus. & Prof. Code, § 16760.)

9) Provides that, in any civil action for a violation of the Cartwright Act brought by the Attorney General or a district attorney, a civil penalty of not more than $1 million shall be assessed, as determined by a court or jury based on specified enumerated factors. (Bus. & Prof. Code, § 16755.1.)

This bill:

1) Adds the provisions set forth below to the Cartwright Act.

2) Makes findings and declarations relating to the history of the Cartwright Act and the Legislature's intent for the interpretation of the Cartwright Act.

3) Provides that it is unlawful for every person to monopolize or monopsonize, attempt to monopolize or monopsonize, maintain a monopoly or monopsony, or combine or conspire with another person to monopolize or monopsonize any part of trade or commerce.

4) Provides that, for purposes of 3), procompetitive justifications of the challenged conduct shall be evaluated within the same relevant market as the conduct that is alleged to be unlawful.

5) Requires a court adjudicating a claim brought under 3) to use the analytical framework and guidance of the California Supreme Court in the manner described in *In re Cipro Cases I & II* (2015) 61 Cal.4th 116, 146-147.

6) Requires a plaintiff bringing an action pursuant to 3) to allege and, to prevail at trial, prove, substantial market power, either through direct or indirect evidence.

7) Provides that 3) does not apply to any small business, meaning an independently owned and operated business, the principal office of which is located in California, the officers of which are domiciled in California, and which, together with affiliates, has 100 or fewer employees and average annual gross receipts of $10 million or less over the three years before the filing of the complaint.

8) Provides that 3) does not prevent, limit, or prohibit either of the following:

   a) An exclusive franchise, contract, license, or permit authorized by state law that is granted and supervised by a local governmental agency, as defined, or impose any liability on any person or entity acting within the scope of authority granted by one or more such exclusive franchises, contracts, licenses, or permits.

   b) Conduct required or authorized pursuant to state or federal law that is granted and supervised by a local, state, or federal governmental agency.

9) Provides that 3) does not impose any liability on a person or entity for conduct within the scope of authority granted by one or more exclusive franchises, contracts, licenses, or permits listed in 8).

10) Requires courts to liberally interpret California's antitrust laws to best promote free and fair competition and be mindful that California favors "maximizing" effective deterrence of antitrust violations.

11) Provides that an action for a violation of this measure may be initiated only by the Attorney General or a district attorney, and that an action brought pursuant to, or under, this measure is deemed a complex case, as defined in the California Rules of Court.

Comments

California's primary antitrust law, the Cartwright Act, prohibits "trusts," or combinations of two or more persons, to restrain trade or commerce. Unlike the federal Sherman Antitrust Act, the Cartwright Act does not also prohibit conduct

by a single company in restraint of trade, which generally occurs when one corporation has monopolistic or monopolistic market power and can impose anticompetitive measures on the market and on consumers.

In response to increasing corporate concentration across a host of industries, the Legislature enacted ACR 95 (Wicks & Cunningham (Resolution Chapter 147, Statutes of 2022)), which tasked the California Law Revision Commission (CLRC) with studying potential reforms to the Cartwright Act, the state's antitrust law. This year, after three years of extensive work, the CLRC released its recommendations for amending the law to address anticompetitive behavior by a single firm.

This bill adopts the CLRC's recommendation to add a single-firm conduct prohibition to the Cartwright Act, with language that mirrors the prohibition on monopolization in the federal Sherman Act. This bill also adds statutory guidance to courts on how to interpret Cartwright Act claims, including the single-firm conduct provision, and on when and how to rely on potentially analogous Sherman Act case law. An action to enforce the bill's provisions may be brought only by the Attorney General or a district attorney; when the action is a civil action, the case must be automatically designated as a complex case under existing procedures in the California Rules of Court.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, the fiscal effect is:

> Potentially significant costs to the Department of Justice if the Attorney General (AG) brings civil actions for violations of the Cartwright Act. Monopolization is only available under the federal Sherman Act. If the AG pursues monopolization under the Cartwright Act in state court, costs could be higher. (Unfair Competition Law Fund, Attorney General Antitrust Account).
>
> Cost pressures of an unknown but potentially significant amount to the courts. Actual costs will depend on the number of new actions created by this bill and the amount of court time needed to resolve each case. Complex cases, an action is provisionally a complex case if it involves antitrust or trade regulations claims, are more time consuming. An eight-hour court day costs approximately $10,500 based on the hourly rate of court personnel including at minimum the judge, clerk, bailiff, court reporter, jury administrator, administrative staff, and jury per-diems. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources. The FY

2026–27 Budget appropriated $70 million General Fund for this purpose (Trial Court Trust Fund, General Fund).

ARGUMENTS IN SUPPORT: According to a coalition of labor organizations, consumer protection groups, and small business advocates:

> Without a state law against illegal monopolization, Californians may only use antitrust law to challenge illegal monopolies in federal court pursuant to weakened federal antitrust law. The erosion of federal antitrust laws was not accidental. Beginning in the late 1960s, an intellectual movement known as the "Chicago School" de-emphasized market competition in favor of short-sighted economic gains. Over the next several decades, big business co-opted and promoted Chicago School thinking as a tool to advance its interests. Big businesses triumphed, and antitrust enforcement plummeted.
>
> By every measure, the COMPETE Act reflects a consensus-based, nonpartisan approach to reinvigorating competition. The CLRC's study was initiated in 2022 by bipartisan resolution ACR 95 (Wicks, Cunningham). The CLRC's Single Firm Conduct Working Group Report, upon which the COMPETE Act is based, was written by legal experts and economics professors, government officials, and attorneys who have defended Fortune 500 companies in antitrust litigation.6 The study, which included 17 public hearings, elicited over 110 letters from trade groups, businesses, advocacy organizations, and members of

the public.7 When presented with an option to codify an "abuse of dominance" standard, the CLRC instead proposed codifying California jurisprudence that is well understood by businesses and antitrust experts.8 What emerges is a modest, pro-business proposal to promote competition, affordability, and fair labor standards.

ARGUMENTS IN OPPOSITION: According to a coalition of this bill's opponents, including the California Chamber of Commerce:

AB 1776 prohibits monopolization, attempts to monopolize and conspiracies to monopolize, just like Section 2 of the federal Sherman Act. Not surprisingly, under federal law, these kinds of monopolization claims require the possession of "monopoly power" or at least a dangerous probability of obtaining such monopoly power. AB 1776, however, creates a new standard that merely requires that a single-firm possess "substantial market power." Not only is this a standard that federal and California courts have not applied to single-firm conduct, it is a standard that does not fit with the type of monopolization offenses created by this bill and one that presumably creates a threshold lower than that under federal law.

While this may seem like a small tweak to a term of art, it is a massive departure from existing law that will result in two serious problems. First, it will expose businesses that would be entirely beyond the reach of Section 2 of the Sherman Act to monopolization claims even though they do not possess the type of monopoly power that allow monopolists to dominate markets. Second, it will generate satellite litigation over the meaning of "substantial," as courts, juries, and competing experts spend years in expensive litigation arguing about where "market power" ends and "substantial market power" begins—a line that does not exist in federal law because federal law never adopted this standard.

Uncertainty like this chills competition and innovation, it discourages investment and it leads to increased litigation and increased costs for California businesses and consumers. If AB 1776 is intended to outlaw monopolization, it should do just that, not some ill-defined category of conduct that falls short of monopolization.

SUBJECT: Smoke Damage Recovery Act

SOURCE: Insurance Commissioner Ricardo Lara / California Department of Insurance

DIGEST: This bill requires that the California Environmental Protection Agency (CalEPA) develop, by June 30, 2027, health-based standards and requirements for minimum sampling, testing, and chemical screening levels for residential properties that have sustained smoke damage from a wildland-urban interface (WUI) fire or urban conflagration. Establishes a framework for the application and implementation of these standards, including the development of training and certification requirements for insurance adjusters and those who sample, test, or restore residential properties. Further sets down affiliated requirements for insurers, and responsibilities for the California Department of Insurance (CDI).

ANALYSIS:

Existing law:

1) Provides that a fire perimeter is determined by the Department of Forestry and Fire Protection (CAL FIRE) in consultation with the Office of Emergency Services (CalOES). Subsequently, CAL FIRE must provide the Insurance Commissioner (Commissioner) with data describing the fire perimeter so that the Commissioner may determine which ZIP Codes are within or adjacent to the fire perimeter. The Commissioner must then issue a bulletin to inform insurers which ZIP Codes are subject to a one-year moratorium.

2) Defines a "state of emergency" as the duly proclaimed existence of conditions of disaster or extreme peril to the safety of persons and property within the state, caused by conditions such as air pollution, fire, flood, storm, epidemic, riot, drought, cyberterrorism, sudden and severe energy shortage, electromagnetic pulse attack, plant or animal infestation or disease, among other conditions.

3) Regulates the licensing including exam, education, and background check requirements for insurance adjusters, who engage in investigation for the purpose of obtaining information while adjusting or participating in the disposal of any claim in connection with a policy of insurance.

4) Regulates the licensing including exam, education, and background check requirements of public insurance adjusters who act on behalf of an insured in negotiating for or effecting the settlement of a claim or claims for loss or damage under a policy of insurance.

5) Establishes the Hazardous Waste Control Law (HWCL) to authorize the Department of Toxic Substances Control (DTSC) to regulate the management of hazardous wastes in California.

6) Defines "hazardous waste" as waste, that, because of its quantity, concentration, or physical, chemical, or infectious characteristics:

    a) Causes, or significantly contributes to, an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness.

    b) Poses a substantial present or potential hazard to human health or the environment, due to factors including, but not limited to, carcinogenicity, acute toxicity, chronic toxicity, bio accumulative properties, or persistence

in the environment, when improperly treated, stored, transported, disposed of, or otherwise managed.

7) Requires DTSC, under the HWCL, to adopt, and revise when appropriate, standards and regulations for the management of hazardous waste to protect against hazards to public health, domestic livestock, wildlife, or the environment.

This bill:

1) Requires CalEPA, on or before June 30, 2027, to develop health-based standards and requirements for minimum sampling, testing, and chemical screening levels for residential properties that have sustained smoke damage as a result of a WUI fire or urban conflagration.

2) Stipulates that the standards and requirements mentioned above must include protocols, parameters, and thresholds for pre-remediation testing, post-remediation testing, and clearance of a residential property for habitation after remediation is completed.

3) Requires, in creating these standards, CalEPA to consult with agencies including DTSC, Office of Environmental Health Hazard Assessment (OEHHA), California Air Resources Board (CARB), California Department of Public Health (CDPH), air pollution control districts, and local public health departments, as necessary. Requires CalEPA to adopt regulations to implement or make the above provisions more specific.

4) States that CalEPA may create additional standards and requirements pertaining to a particular wildfire, including requirements for the identification of contaminants, supplementary minimum sampling and testing recommendations or requirements, or chemical screening levels for residential properties that have sustained smoke damage. Further states that these requirements, relating to a particular wildfire, shall be exempt from specified state laws that govern rulemaking.

5) Creates related definitions, including that "impact zone" means a ZIP Code that is either within the fire perimeter or adjacent to the fire perimeter, as specified, and downwind of the fire perimeter based on maps generated by the National Oceanic and Atmospheric Administration.

6) Requires CalEPA, by January 1, 2028, to consult with CDI, CDPH, the Department of Industrial Relations (DIR), Contractors State License Board (CSLB), State Water Resources Control Board (State Water Board), and any

other state or local government agency, as may be necessary, to establish training and certification requirements for a person who inspects, evaluates, samples, tests, analyzes, remediates, or restores residential properties that have sustained smoke damage as a result of a WUI fire or urban conflagration, including industrial hygienists, restoration professionals, and laboratories.

7) Prohibits an insurer from terminating coverage for additional living expenses for a covered smoke damage claim submitted under a policy of residential property insurance, as a result of a WUI fire or urban conflagration until the property has been cleared for habitation pursuant to CalEPA's standards and requirements, subject to the applicable policy limit.

8) States that CalEPA's standards and requirements apply to all covered smoke damage claims within the impact zone submitted under policies of residential property insurance due to a WUI fire or urban conflagration.

9) Requires that, if a smoke damage insurance claim is settled on the basis of a written scope or estimate prepared by or for the insurer, the insurer must supply the claimant with a copy of each document upon which the settlement is based.

10) Stipulates that the estimate be for an amount that will restore the damaged property to at least its pre-loss condition and allow for restoration to meet or exceed CalEPA's standards and requirements, other relevant laws and regulations, and accepted trade and industry standards that do not conflict with CalEPA's standards and requirements.

11) Requires CDI, by January 1, 2028, to develop, implement, and enforce training and certification programs, as specified, for insurance adjusters and public insurance adjusters in inspecting, evaluating, sampling, or testing smoke damage caused by a WUI fire or urban conflagration involving residential properties.

12) Makes related findings and declarations.

13) Contains an urgency clause.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

CDI estimates a one-time cost of $91,000 (Insurance Fund) in Fiscal Year (FY) 2026-27 to develop the training and certification program for adjusters and to address the expected increase in rate filing.

CalEPA estimates ongoing annual costs of $6 million (General Fund) to promulgate regulations and to implement, administer, and enforce the requirements of this bill. CalEPA also anticipates substantial, yet undetermined, annual contracting costs.

The Office of Environmental Health Hazard Assessment (OEHHA) estimates total ongoing annual costs of $1.024 million (Wildfire Remediation Certification and Training Fund and General Fund). This estimate includes $624,000 to support 1.0 personnel year (PY) and $400,000 in contract funding to maintain and update standards, as well as to identify and develop additional standards as new wildland-urban interface related fire hazards are identified.

The California Department of Public Health (CDPH) estimates ongoing annual costs of $545,000 (General Fund) beginning in FY 2026-27 to consult with CalEPA and to resolve current laboratory and measurement issues, including the specific chemicals to be tested, regarding residential property wildfire remediation and restoration.

The Department of Industrial Relations (DIR) anticipates any costs associated with its required consultation activities will be minor and absorbable.

Unknown costs to other state agencies required to consult with CalEPA during the development of the testing standards. Based on feedback from OEHHA, CDPH, and DIR, these costs may range from absorbable to the high hundreds of thousands of dollars (General Fund and special fund).

Staff notes that actual ongoing costs to each affected state agency are unknown because the bill does not specify a timeline or requirements for updating the standards. While the upfront workload to evaluate WUI-related fire hazards may be significant, ongoing costs could decrease in subsequent years. This reduction would occur if agencies review and update standards on an as-needed basis, rather than conducting a full annual review.

ARGUMENTS IN SUPPORT:

According to Insurance Commissioner Ricardo Lara, sponsor of the bill:

"California has experienced record-breaking wildfires, including the January 2025 Eaton and Palisades Fires, which destroyed thousands of homes and left many more contaminated by smoke, soot, ash, char, and other hazardous substances. Thousands of smoke-damage insurance claims have since been filed. Because no authoritative, enforceable standards exist for testing or remediating smoke damage, survivors report inconsistent claims handling, partial or total denials, and refusals by insurers to pay for pre- or post-remediation testing. CDI has taken executive actions—including consumer bulletins, enforcement actions, and investigations—but the absence of standards has resulted in a patchwork of insurer practices. In response to the January 2025 fires, I convened a Smoke Claims and Remediation Task Force to develop recommendations for statewide standards and insurance coverage expectations.

Residential property insurance policies that cover the peril of fire also cover smoke damage caused by fire, and insurers are required to cover restoration of properties to pre-loss condition. However, California has no statewide standards governing the inspection or testing of smoke-damaged homes, no minimum sampling or clearance protocols, no mandated remediation methods, and no training or certification requirements for professionals who assess or remediate smoke damage. No state agency is currently designated to enforce uniform smoke-damage remediation standards, and existing claims-handling requirements lack the specificity needed for consistent enforcement.

The absence of enforceable standards has resulted in inconsistent insurer practices, including denials of testing, partial claim denials, and refusals to reimburse for pre- or post-remediation testing. Homeowners and tenants face uncertainty about whether their homes are safe to reenter, and many have been forced to pay for testing or remediation out of pocket. Without statewide standards, neither insurers

nor regulators have a clear framework to ensure that smoke-damaged homes are restored to safe, habitable, pre-loss condition, and the resulting instability contributes to rising costs in the residential property insurance market

AB 1795 would create a comprehensive statewide framework for residential property insurance policies to ensure consistent, science-based handling of smoke-damage claims. This bill will mandate insurer compliance with remediation protocols and clarify their obligation to cover the cost of restoring properties to a pre-loss condition. Finally, AB 1795 also identifies the appropriate state agencies responsible for implementing and enforcing the standards and creates penalties for noncompliance."

ARGUMENTS IN OPPOSITION:

According to the insurance associations known as the "Trades":

"The insurance industry supports standards on the testing and remediation of smoke claims and actively participated in the Smoke Claims and Remediation Task Force established by the California Department of Insurance (CDI). Clear and credible standards benefit homeowners, regulators, and insurers. However, standards must be grounded in defensible science and structured in a way that is operationally feasible and legally durable.

AB 1795 introduces a comprehensive new framework governing wildfire smoke testing, remediation, and insurance claims handling. While intended to improve consistency and consumer outcomes, several provisions raise significant concerns for insurers related to contract certainty, retroactive application, operational feasibility, and cost escalation.

The bill was improved in Assembly Insurance Committee; however we do remain concerned with certain provisions of the bill. Most importantly the cost. In recent years we have seen the costs for smoke claims grow exponentially. These are claims where a home does not have a single ember touch the home, and in some cases are exhausting million-dollar policies. These are unpredictable costs that fall well outside underwriting expectations and the pricing of smoke coverage. If AB 1795 moves forward as drafted companies will have to anticipate that the entirety of a homeowner's policy could be exhausted through smoke claims, thus undermining the affordability and availability benefits of mitigation.

To address this concern and continue towards greater market availability and affordability we have suggested to the author and sponsor that a sublimit on smoke should be included. This would cap smoke coverage at a percentage of the total

policy coverage, such that cleaning, remediation, and testing are available without increasing the amount needed in claims paying capacity. This sublimit would be available with optional higher limits for those desiring higher coverage protection for smoke. This will contain the costs for those not in WUI or high smoke risk areas, while providing sufficient protection for homeowners and predictability to insurers. We appreciate the commitments made by the author to address this concern and are in active discussion with his office and the CDI to determine the best way to proceed."

SUBJECT: Genetic testing for life and disability insurance

SOURCE: Insurance Commissioner Ricardo Lara / California Department of Insurance

DIGEST: This bill (1) prohibits a life or disability insurer from canceling, limiting, or denying coverage based on a test for a genetic characteristic, except as specified; (2) prohibits a life or disability insurance institution, agent, or insurance-support organization from requiring, requesting, or soliciting genetic information; using genetic test results; or considering a person's decisions or actions relating to genetic testing in any manner for an insurance purpose, with certain exemptions; (3) bans the use or disclosure of an individual's full genome.

Senate Floor Amendments of 8/21/26 address chaptering issues with SB 354 (Limón).

ANALYSIS:

Existing law:

1) Prohibits discrimination on the basis of genetic information under the Unruh Civil Rights Act and the Fair Employment and Housing Act (FEHA).

2) Prohibits, pursuant to federal law under the Genetic Information and Nondiscrimination Act (GINA), discrimination based on genetic information in group health plan coverage and employment.

3) Subjects any person who improperly discloses genetic test results contained in a health care service plan applicant or enrollee's medical records, or pursuant to a genetic test requested by an insurer, to civil and criminal penalties.

4) Prohibits a Direct-to-Consumer (DTC) genetic testing company from disclosing a consumer's genetic data to any entity that is responsible for administering or making decisions regarding health insurance, life insurance, long-term care insurance, disability insurance, or employment, or to any entity that provides advice to an entity that is responsible for performing those functions, except as specified.

5) Prohibits a life or disability insurer from requiring a test for the presence of a genetic characteristic for the purpose of determining insurability other than for those policies that are contingent on review or testing for other diseases or medical conditions.

6) Prohibits discrimination made in the fees or commissions of agents or brokers writing or renewing a life or disability income policy on the basis of a test of that person's genetic characteristics.

7) Prohibits life and disability insurers from failing or refusing to accept an application for insurance, from failing to issue insurance to an applicant, and from issuing insurance under conditions less favorable to the insured than in other comparable cases, except for reasons applicable alike to persons of every race, color, religion, sex, gender, gender identity, gender expression, national origin, ancestry, or sexual orientation; and prohibits considering race, color, religion, national origin, ancestry, and sexual orientation from, of itself, constituting a condition or risk for which a higher rate, premium, or charge may be required of the insured for that insurance, except as specified.

8) Prohibits life and disability insurers from refusing to issue/sell or renew a policy, or from requiring beneficiaries to accept less than the full sum of the

policy, solely because the person to be insured carries a gene which may, under some circumstances, be associated with disability in that person's offspring, but which causes no adverse effects to the carrier.

9) Defines "genetic characteristics" to mean any scientifically or medically identifiable gene or chromosome, or alteration thereof, that is known to be a cause of a disease or disorder, or that is determined to be associated with a statistically increased risk of development of a disease or disorder, and that is presently not associated with any symptoms of any disease or disorder.

This bill:

1) States the intent of the Legislature that the changes made by this bill should not be interpreted to authorize the use or disclosure of an individual's full genome.

2) Prohibits, as specified, an insurance institution, agent, or insurance-support organization from seeking information in connection with an insurance transaction concerning an individual's full genome or genetic information. including if the genetic information is for the purpose of ruling out an adverse finding based on the individual's medical record and the individual has provided informed, written consent for the release, disclosure, and use of the genetic test results or has provided the genetic test results to the insurer.

3) Prohibits, as specified, a life or disability insurer from cancelling, limiting, or denying coverage, establishing differentials in premium rates, conditions, or terms, or making an adverse underwriting decision based on a test for a genetic characteristic.

4) Prohibits, as specified, a life or disability insurer from requiring, requesting, or soliciting genetic information, using genetic test results, or considering a person's decisions or actions relating to genetic testing in any manner for an insurance purpose, except as necessary for the payment of benefits or for a therapeutic purpose.

5) Prohibits a life or disability insurer from requiring a person to undergo a test of the person's genetic characteristics to determine eligibility or insurability or for other insurance purposes.

6) Prohibits a life or disability insurer from asking a person if they or any member of their family have taken a genetic test, or asking about the result of a genetic test.

7) Specifies that, unless prohibited by law, the above provisions do not apply if the genetic information or test results are in the individual's medical record, are not derived from a DTC genetic test, and if the genetic information is for the purpose of ruling out an adverse finding based on the individual's medical record and the individual has provided informed, written consent for the release, disclosure, and use of the genetic test results or has provided the genetic test results to the insurer.

8) States that this bill does not limit an insurer's right to decline an application or enrollment request for a life or disability insurance policy, charge a higher rate or premium for such a policy, or place a limitation on coverage under such a policy, based on the manifestation, diagnosis, or treatment of any present disease or disorder. Furthermore, this bill does not prohibit a life insurer or disability insurer from considering a medical diagnosis included in an individual's medical record, even if the diagnosis was made based on the results of a genetic test.

9) Creates affiliated penalties for violations of this bill's provisions.

Related/Prior Legislation

SB 41 (Umberg, Chapter 596, Statutes of 2021). Provided several privacy and consumer protections for genetic information collected through DTC testing.

SB 559 (Padilla, Chapter 261, Statutes of 2011). Expanded the prohibited bases of discrimination under the Unruh Civil Rights Act and the California Fair Employment and Housing Act to include genetic information.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Unknown, potentially significant workload cost pressures to the state funded trial court system to adjudicate any violations resulting from this bill (Trial Court Trust Fund, General Fund). The fiscal impact of this bill to the courts will depend on many unknowns, including the number of cases filed and the factors unique to each case. An eight-hour court day costs approximately $8,000 in staff in workload. If court days exceed 10, costs to the trial courts could reach hundreds of thousands of dollars. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the

General Fund to fund additional staff and resources and to increase the amount appropriated to backfill for trial court operations.

Unknown local county costs to the extent that a one-year misdemeanor jail sentence is imposed, though incarceration for this offense appears unlikely. The average annual cost to incarcerate one person in county jail is approximately $80,000. For historical context, Los Angeles County budgeted $1.3 billion for jail costs in 2021, averaging roughly $90,000 per incarcerated person. Actual county incarceration costs will depend on the number of convictions and the length of each sentence. Generally, county incarceration costs are not reimbursable state mandates pursuant to Proposition 30 (2012).

The California Department of Insurance does not anticipate a fiscal impact from the bill (Insurance Fund).

Staff notes there may be an unknown potential increase in enforcement workload for CDI to address violations of this bill, which may be offset to some extent by penalty revenue (Insurance Fund). It is possible that higher aggregate penalties may incentivize insurers to contest enforcement actions through the administrative hearing process rather than opting for immediate compliance, which may increase administrative and adjudicatory workload. The magnitude of this workload would depend on the number and scope of violations, as well as any attached penalties.

OPPOSITION: (Verified 8/14/26)

American Council of Life Insurers
Association of California Life & Health Insurance Companies
National Association of Insurance and Financial Advisors - California

ARGUMENTS IN SUPPORT: Insurance Commissioner Ricardo Lara, sponsor of the bill states:

"AB 1798 ensures that proactive, at-risk individuals are not discouraged from or punished for obtaining this important information. When consumers fear adverse insurance consequences, they may avoid valuable genetic tests. A 2023 Centers for Disease Control and Prevention survey indicated that 60% of respondents were

concerned that the results of genetic testing for a higher risk of cancer would impact their life insurance. AB 1798 removes this barrier, promoting early detection, prevention, and better health outcomes.

Genetic information differs from traditional underwriting factors because it most often suggests a remote chance of future diseases rather than a reasonably anticipated risk. Medical experts emphasize that genetic tests cannot reliably predict if or when a disease will occur and should not be used to penalize healthy individuals. Sound underwriting does not require genetic testing of asymptomatic individuals. Insurers will continue to retain access to the full range of established underwriting tools that they use and have used effectively for decades prior to the advent of genetic testing.

A 2016 study reported that 28% of individuals who declined whole genome sequencing cited insurance discrimination as their primary reason. Participants expressed that including the genetic information in a medical record was like a "ticking time bomb." AB 1798 would address these concerns by prohibiting insurance companies from using this information when it appears in the medical files of individuals without symptoms. This protection is expected to increase participation in whole genome sequencing, which supports efforts to find cures and therapies for rare diseases.

As more Californians use early genetic testing screenings to better understand their health, they should never have to worry that this deeply personal information will be turned against them. AB 1798 closes a dangerous gap in our laws by banning insurers from using genetic tests performed in the absence of symptoms or disease to deny coverage or raise premiums for most California consumers. Your DNA and your medical markers belong to you, not to an insurance company. Protecting consumer privacy and preventing discrimination ensures people can use the latest medical technology without putting their health, their coverage, or their most sensitive data at risk."

ARGUMENTS IN OPPOSITION: A coalition representing the life insurance industry states:

"At a fundamental level, life insurance is about pricing risk, and medical testing that can inform a patient, doctor, or insurer about an individual's risk needs to be accessible in underwriting. It should not matter whether that test is a CT scan, EKG, blood test, or doctor-ordered genetic test. The results are telling the insurer something material about the risk of insuring that individual.

We have heard often that most genetic markers do not guarantee an outcome, and therefore using the test is unfair. We agree that outcomes are rarely entirely determined by an individual's genes. But calling the use of genetic information unfair fundamentally misunderstands what we are insuring. We are insuring against the risk of the outcome, not the outcome itself. Genetic testing can provide meaningful information about the risk of developing a disease, and insurers should be able to consider that information.

That said, we have heard your concerns about direct-to-consumer genetic tests and tests an individual may take to participate in genetic research. We have offered amendments to your office and the sponsor that would take those tests off the table for underwriting consideration, even if they are in an applicant's medical file. In exchange, we simply ask that you accept our amendment to allow access to doctor-ordered, medical-grade genetic tests which reflects the statements made, and understandings developed in the Assembly Insurance Committee.

We believe the responsible path forward is to maintain balanced guardrails that preserve information symmetry, protect confidentiality, and maintain long-term affordability. Despite our strong opposition, we remain committed to working with you on this proposal. At this time, however, we respectfully continue to oppose AB 1798 in its current form."

SUBJECT: Western Joshua Tree Conservation Act: industrial projects and commercial projects: single-family residences: public works projects

SOURCE: Author

DIGEST: This bill 1) authorizes the California Department of Fish and Wildlife (CDFW) to delegate to a city permitting authority under the Western Joshua Tree Conservation Act (WJTCA) for commercial and industrial projects to take up to 40 western Joshua trees; 2)further authorizes CDFW to authorize, without fees or other mitigation the removal or trimming of up to 10 western Joshua trees by the owner of a single family residence or up to 40 western Joshua trees for a public works project where certain criteria are met; and 3) waives the California Environmental Quality Act (CEQA) for these single-family home projects until CDFW certifies a programmatic environmental impact report; among other provisions, as provided.

Senate Floor Amendments of 8/19/26 add chaptering out amendments with SB 1062 (Ochoa Bogh, 2026).

ANALYSIS:

Existing law:

1) Establishes CDFW and the California Fish and Game Commission (commission) in the California Natural Resources Agency. In general, CDFW implements and enforces the regulations set by the commission and provides data and expertise to inform the commission's decision making.

2) Specifies that CDFW has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species. (Fish & Game Code (FGC) §1802).

3) Defines "take" as hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill. (FGC §86).

4) Prohibits the taking of an endangered or threatened species, except in certain situations. Provides that a candidate species receives protections under the California Endangered Species Act (CESA) while its status is pending. (FGC §§2070 *et seq.*).

5) Allows CDFW to authorize the taking of listed species pursuant to an incidental take permit (ITP) if the taking is incidental to an otherwise lawful activity, the impacts are minimized and fully mitigated, and the issuance of the permit would not jeopardize the continued existence of the species. (FGC §§2081; 2084).

6) Establishes the WJTCA that enacts the following (FGC §§1927 *et seq.*):

   a) Prohibits any person or public agency from importing into the state, exporting out of the state, or taking, possessing, purchasing, or selling within the state, a WJT or any part or product of the WJT, except pursuant to the WJTCA, CESA, or the Natural Community Conservation Planning Act (NCCP Act).

   b) Authorizes WJT take under CESA or by paying certain in-lieu fees specified by the WJTCA when the WJT is a candidate species under CESA.

c) Requires the WJTCA to remain operative if the commission determines that listing the WJT under CESA is not warranted. Requires WJT take permitting under CESA or pursuant to the NCCP Act if the commission determines that listing the WJT under CESA is warranted, which would render the WJTCA inoperative.

d) Authorizes CDFW to issue a permit for the taking of a WJT if specified conditions are met, including, that the permittee mitigates all impacts to, and taking of, the WJT.

e) Authorizes a permittee, in lieu of completing the mitigation measures on its own, to elect to satisfy the mitigation obligation by paying a fee pursuant to a specified fee schedule.

f) Requires CDFW to annually adjust the fees for inflation, and to review the fees by December 31, 2026, and every three years thereafter, to ensure the conservation of WJT.

g) Requires all fees remitted to CDFW to be deposited into the Conservation Fund, as provided, and requires the moneys in the Conservation Fund, upon appropriation by the Legislature, to be used solely for the purposes of acquiring, conserving, and managing WJT conservation lands and completing other activities to conserve the WJT.

h) Authorizes CDFW to enter into an agreement with any county or city to delegate to the county or city the ability to authorize the taking of a WJT associated with developing single-family residences, accessory structures, and public works projects, as defined, concurrent with the city's or county's approval of the project. Limits the number of WJTs taken associated with single-family residences, multifamily residences, or accessory structures projects to 10 under this delegation.

i) Authorizes CDFW or its designee to issue a permit to authorize the removal or trimming of a dead WJT or the trimming of a live WJT, as provided.

j) Requires CDFW to develop and implement a WJT conservation plan, as provided. Specifies that CDFW shall present the final conservation plan at a public meeting of the commission, for its review and approval, by December 31, 2024, and requires the commission to take final action on the plan by June 30, 2025.

k) Requires CDFW to submit an annual report to the commission and the Legislature addressing the conservation status of the WJT, as provided.

l) Requires the commission, beginning in 2026, and at least every two years thereafter, to, at a public meeting, review the status of the WJT and the effectiveness of the conservation plan, as specified.

m) Requires CDFW to submit to the commission an update of the status review required under CESA that incorporates any new scientific information and includes an evaluation of conservation efforts under the WJTCA by January 1, 2033.

This bill:

1) Authorizes CDFW to enter into an agreement with a city to delegate to the city the ability to authorize the take of a WJT associated with developing commercial and industrial projects concurrent with the city's approval of a project, as provided.
   a) Limits the city's delegated take authorization to no more than 40 individual WJT.
   b) Requires the city to obtain CDFW's written concurrence that a commercial or industrial project has avoided and minimized the take of WJT for projects that take more than 20 individual WJT.
   c) Authorizes only commercial and industrial projects in certain locations to pay in-lieu fees to satisfy the project's mitigation requirements.

2) Authorizes CDFW to authorize by permit both a) and b) below with reduced mitigation fees of $250 for each WJT equal to or greater than 5 meters in height, $50 for each WJT between 1 and up to 5 meters in height, and $37.50 for each WJT less than 1 meter in height:
   a) The removal of no more than 10 WJTs or trimming of WJTs by an owner-occupant of an existing single-family residence (SFR) if the WJTs are:
      i) Within 30 feet of an existing SFR or within 15 feet of an existing accessory structure, or
      ii) Within the construction footprint or within 15 feet of the construction footprint of a new accessory structure proposed for an existing SFR.
   b) The removal of no more than 40 WJTs or trimming of WJTs by the proponent of a public works project if the WJTs are within the construction footprint, or within 15 feet of the construction footprint, of a public works project to repair, rehabilitate, replace, or maintain an existing structure.

3) Authorizes a county or city operating under an approved delegation agreement to authorize by permit without mitigation both a) and b) below:
   a) The removal of no more than 10 WJTs or trimming of WJTs by an owner-occupant of an existing SFR if the WJTS are:

   i) Within 30 feet of an existing SFR or within 15 feet of an existing accessory structure, or
   ii) Within the construction footprint or within 15 feet of the construction footprint of a new accessory structure proposed for an existing SFR.
b) The removal of no more than 40 WJTs or trimming of WJTs by the proponent of a public works project if the WJTs are within the construction footprint, or within 15 feet of the construction footprint, of a public works project to repair, rehabilitate, replace, or maintain an existing structure.
c) Authorizes a county or city issuing a permit under a) or b) above to impose a reasonable fee to cover the administrative costs of issuing the permit.
d) Requires a property owner or proponent of a public works project seeking a permit under a) or b) above to submit a request to the county or city on a form provided by the county or city that requires the following information:
   i) Name, telephone number, mailing and email address of the property owner or public works project proponent.
   ii) The street address of the SFR or public works project on which each WJT requested to be removed or trimmed is located, or alternative location information, as provided.
   iii) A statement on how each WJT requested to be trimmed or removed meets the conditions of (a) or (b) above.
   iv) The size class of each WJT requested to be trimmed or removed.
   v) The distance of each WJT requested to be trimmed or removed from the SFR, existing accessory structure or construction footprint of a new accessory structure that is proposed or of the public works project.
   vi) Photographs of each WJT requested to be removed or trimmed that depict its location relative to the SFR, existing accessory structure, or construction footprint of a new accessory structure that is proposed to be constructed or of the public works project.
e) Requires the county or city, within 60 days of receipt of a request for a permit, to either notify the property owner or public works project proponent that the county or city will issue the permit or deny the request, as provided.

4) Provides that CEQA does not apply to issuing a permit pursuant to 2) until CDFW certifies a PEIR that addresses actions with the potential to result in limited take of WJTs for SFRs and accessory structures and there is a final unappealable judgment in litigation, if any, challenging the PEIR, or until January 1, 2032, whichever occurs first.

5) Postpones by six months to June 30, 2027 when the first revision of the fees by CDFW is due.

6) Adds an urgency provision for specified reasons, adds chaptering out amendments with SB 1062 (Ochoa Bogh, 2026), and makes various conforming changes to statute.

Background

The WJT is a candidate species for listing under CESA.

[NOTE: For additional information about this bill, see the Senate Natural Resources and Water, and Environmental Quality Committees' analyses.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Ongoing costs of an unknown amount, likely around or less than $1 million annually (General Fund), for CDFW to support the new permitting pathway that would be created by this bill, including development of new application materials and forms, instructions and guidance materials, website updates, permit templates, education and outreach materials, and updated tracking metrics.

ARGUMENTS IN SUPPORT: According to the author, "The Western Joshua Tree is an iconic symbol of the High Desert region, and I support the preservation

of this species. Although the state has been moving in the right direction to protect this iconic species while meeting our state's goals, we need to address the burden on single family homeowners and public works, as well as the need to streamline permitting for projects vital to economic development. Single family homeowners who love the Western Joshua Tree struggle as they are expected to spend tens of thousands of dollars on fees to upgrade from a septic tank or build a shed. Local governments that represent historically disenfranchised areas are expected to spend millions of additional dollars on upgrading infrastructure, some of which haven't been upgraded since the 19th century. All the while these same governments are unable to permit vital economic development projects, as their constituency grows rapidly due to lack of space and affordability in the LA Metropolitan area. We must strike a balance between conservation and the needs of an increase in population."

SUBJECT: Electricity: customer renewable energy subscription program

SOURCE: Californians for Local Affordable Solar and Storage

DIGEST: This bill requires the California Public Utilities Commission (CPUC) to adopt or modify a customer renewable energy subscription program with specified requirements by which a program participant is credited for electricity generated from a renewable generation facility.

ANALYSIS:

Existing law:

1) Establishes and vests the CPUC with regulatory authority over public utilities, including electrical corporations. (Article XII of the California Constitution)

2) Requires the CPUC, on or before March 31, 2024, to evaluate each customer renewable energy subscription program to determine if the program meets

specified goals and to determine whether it would be beneficial to ratepayers to establish a new tariff or program for an electrical corporation, or modify an existing tariff or program administered by an electrical corporation, to establish a community renewable energy program, as provided. If the CPUC determines it would be beneficial to ratepayers to establish the community renewable energy program, existing law requires the CPUC, on or before July 1, 2024, to establish the program and require each electrical corporation to participate in the program. (Public Utilities Code §769.3)

3) Requires the CPUC, within 24 months of establishing a community renewable energy program and annually thereafter for the duration of the program, to submit to the Legislature a report on the facilities deployed and customers subscribed, as provided. (Public Utilities Code §913.15)

4) Requires every electric utility, defined to include electrical corporations (IOUs), local publicly owned electric utilities (POUs), and electrical cooperatives, to develop a standard contract or tariff for net energy metering (NEM), for generation by a renewable electrical generation facility, and to make this contract or tariff available to eligible customer-generators, upon request on a first-come-first-served basis until the time that the total rated generating capacity used by eligible customer generators exceeds five percent of the electric utility's aggregate customer peak demand. (Public Utilities Code §2827)

5) Requires the CPUC for a large electric IOUs to have developed a second standard contract or tariff to provide NEM to additional eligible customer-generators in the IOU's service territory and imposes no limitation on the number of new eligible customer-generators entitled to receive service pursuant to this second standard contract or tariff. (Public Utilities Code §2827.1)

6) Establishes the Green Tariff Shared Renewables Program (GTSR) with 600 megawatts (MW) of renewable resources available to customers of the IOUs on a proportional basis to which a participating customer can subscribe. Prohibits the shifting of costs for the GTSR program to nonparticipating customers. Requires the CPUC to ensure that charges and credits for the GTSR are set in a manner that ensures nonparticipant ratepayer indifference for the remaining bundled service, direct access, and community choice aggregation (CCAs) customers, and ensures that no costs are shifted from participating customers to nonparticipating ratepayers. (Public Utilities Code §2831, *et seq*.)

This bill:

1) Revises the requirements of the customer renewable energy subscription program, among other things, to:

   a) Promote participation by low-income customers at levels commensurate with the opportunity to customer-generators as part of NEM.
   b) Provide bill credits to subscribers based on the avoided costs of a community renewable energy generators participating in the program if the community renewable energy generator is determined to be a load modifying resource.
   c) Require all community renewable energy generators participating in the program to have no more than five MW of generation capacity and no more than five MW of energy storage.
   d) limit the total program capacity to four gigawatts (GW) or end the enrollment of new community renewable energy generators in the program after seven years, whichever occurs first.

2) Requires the California Energy Commission (CEC), on or before December 1, 2027, to evaluate the load modifying potential of community renewable energy generators and identify attributes that CEC would expect a community renewable energy generator to meet to be classified as a load modifying resource

3) Requires the CPUC, 90 days following the completion of the evaluation by the CEC, to establish a mechanism to determine whether community renewable energy generators are load modifying resources consistent with the attributes identified by the CEC.

4) Requires the CPUC, 90 days following the establishment of the mechanism, to adopt or modify a customer renewable energy subscription program consistent with the revisions to the program made by this bill.

5) Requires the CPUC, within 24 months of the adoption or modification of a customer renewable energy subscription program and annually thereafter for the duration of the program, to submit to the Legislature a report on the community renewable energy generators participating in the program and customers subscribed. Repeals this requirement on January 1, 2034.

Background

What is Community Solar? The U.S. Department of Energy defines community solar as any solar project or purchasing program, within a geographic area, in which the benefits of a solar project flow to multiple customers such as includes from various customer classes: residential, commercial, etc. Community solar can be designed in several ways, but the ultimate goal is to provide residents with more options to participate in solar projects. In most cases, customers are benefitting from energy generated by solar panels at an off-site array; however, there are also on-site multifamily community solar options where occupants of apartment and condominium buildings each benefit from the energy produced from the rooftop solar project. Additionally, who pays to plan, construct, and operate the solar project varies across the different community solar models – such as when a utility may own or operate a project that is open to voluntary ratepayer participation, or when customers themselves may collectively sign a contract with a third-party developer and be treated as departing load from their utility.

Community solar customers typically receive a bill credit for electricity generated by their share of the community solar system – similar to someone who has rooftop panels installed on their home and receives the NEM tariff. However, the value of that customer bill credit can also vary widely between community solar programs, with some more generous than others. Community solar can be a great option for people who do not own their homes, have financial constraints, or have insufficient roof conditions such as shading, roof size, or other factors and who desire to participate in a solar project.

Existing Community Solar Programs. There are community solar programs currently in place for eligible customers of California's large electric IOUs:

- Disadvantaged Communities-Green Tariff (DAC-GT) program.
- Community Solar Green Tariff (CSGT) program.
- GTSR program, which is comprised of two subprograms:
  - the Green Tariff (GT) option.
  - the Enhanced Community Renewables (ECR) option.

AB 327 (Perea, Chapter 611, Statutes of 2013) directed the CPUC to develop specific alternatives designed to increase adoption of renewable generation in disadvantaged communities. In 2018, the CPUC created several programs (Decision 18-06-027) aimed at increasing access to solar energy for residents of disadvantaged communities (DAC) located in one of the three large electric IOU

distribution service territories. These include: DAC-GT program and DAC-CSGT program.

In order to offset the high costs of these projects, electric IOU greenhouse gas (GHG) auction proceeds and public purpose funds from non-participating ratepayers are utilized. Prior to the establishment of the DAC programs, SB 43 (Wolk, Chapter 413, Statutes of 2013) directed the CPUC to establish the GTSR program. GTSR has the overall objective of expanding customer access to renewable energy and to build up to 600 MW in additional renewable facilities. GTSR includes both a GT option and an ECR option. Pursuant to statute, the costs of GTSR may not be borne by nonparticipants. The two GTSR programs are similar in structure to the two DAC community solar programs mentioned above:

- GT program: renewable facility is utility-scale and utility procured; open to all customers of states' three largest IOUs; customer pays the difference between their current charge for generation on their IOU bill and the cost of procuring either 50 or 100% renewables.

- ECR program: renewable facility is a local solar project; project size limited to 20 MW; facility developers must fulfill a "community interest requirement," where interested customers commit to enroll in 30% of the project's capacity or expressed interest to reach a 50% subscription rate ahead of time, and must have a minimum of three separate subscribers; customers agree to purchase a share of a local solar project directly from a solar developer, and in exchange, the customer will receive a credit from their utility for the customer's avoided generation and for their share of the benefit of the solar development to the utility; customers, in buying the solar generation directly from a third party, are treated as departing load. When an ECR customer moves within the IOU's territory they can retain their ECR subscription at their new service address.

Solar on Multifamily Affordable Housing (SOMAH). Established by AB 693 (Eggman, Chapter 582, Statutes of 2015), the SOMAH program provided incentives for solar energy photovoltaic (PV) systems for multifamily affordable housing. SOMAH provides for up to $100 million annually from the electric IOUs GHG auction proceeds, up to $1 billion dollars over 10 years, to install 300 MW of capacity. The SOMAH program began accepting applications on July 1, 2019, receiving more than 200 applications on the first day it opened, and waitlists were started in the large electric IOUs' territories. The program website notes over 100 MW installed serving affordable housing units.

Solar ready buildings in the Title 24 Regulations. In May of 2018, as part of its regulation of building energy efficiency, the CEC adopted a requirement for the installation of solar system capacity on all new low-rise residential buildings. More specifically, the CEC regulations require: (a) installation of a certain sized solar system on a newly constructed, low-rise residential building; (b) successful exemption from the installation requirement in the event of excessive shade, roof design or other defined factors; or (c) development of a community solar project that offsets the load of the newly constructed, low-rise residential building. Builders are struggling to comply with the CEC's requirement. In particular, builders are looking to develop community solar projects as a means of compliance, which builders note are much cheaper to develop than rooftop solar.

Title 24 community solar compliance option. For a community solar project to comply with Title 24 it must (a) reduce the building's energy bill by an amount greater than the added cost to the building resulting in the building's share in the community solar project; (b) provide energy savings benefits dedicated to the building for no less than 20 years, and (c) be exclusively dedicated to the building. The CEC's community solar compliance option is conceptually analogous to the ECR component of GTSR. Current statute requires electric IOUs to support ECR projects that allow customers to contract directly with a third-party participating renewable developer to subscribe to a specific local renewable facility. The ECR component of the GTSR has been unsuccessful, to date at least, with only 10 MW (of a possible 600 MW) developed. To date, two utilities have community solar programs that satisfy the CEC's alternative compliance option, the Sacramento Municipal Utility District (SMUD) and recently approved Plumas-Sierra electrical cooperative. SMUD's program is currently fully subscribed.

The Avoided Cost Calculator (ACC). The ACC is a complex determination of the benefits resources provide to the grid and all ratepayers. It calculates a monetary amount in $/kWh to value a resource. The ACC calculates the avoided costs of electricity resources based on generation energy, generation capacity, ancillary services, transmission and distribution capacity, GHG, and high global warming potential gases. For example, using Pacific Gas & Electric's (PG&E's) E-TOU-C residential rate for simplicity, the summer off-peak retail rate is 42¢/kWh, which corresponds to the hours that solar-only systems would export to the grid. The generation-only portion of that is 0.14¢/kWh. However, the avoided cost value for mid-day hours is closer to 0.01¢/kWh. NEM relies on the generous retail rate to compensate owner-generators, while other CPUC programs provide a generation-only rate. This bill's program compensates based on the avoided cost. The ACC is

updated annually to improve the accuracy of how benefits are calculated, taking inputs from various CPUC proceedings and California Independent System Operator (CAISO) wholesale market data. However, this annual updating may create volatility for programs relying on the ACC to determine credits or incentives values. For instance, the value of solar avoided costs has declined over the last decade. Cost shifts occur when the program's costs outweigh its benefits, and nonparticipants of the program are left covering the difference. This is the controversy associated with NEM – where customers with NEM are paid from collections of customers without NEM.

Comments

Need for this bill. The author states:

> California must build seven times the amount of solar, wind, and batteries every year for the next 25 years if we are to meet SB 100 goals. Unfortunately, nearly half of all California households are renters, and 70% of low-income households are renters, which in nearly any situation prevents onsite solar opportunities. AB 1813 provides a targeted way to build a robust community renewables program to lower electric bills for low-income households and renters, provide benefits to all ratepayers, and ease cost burdens for meeting the significant demand for new homes. Community Solar and Storage programs are an incredible tool the state can use to bridge this gap and ensure all Californian's can access the benefits of renewable energy.

AB 2316 (Ward, Chapter 350, Statutes of 2022). The Coalition for Community Solar Access (CCSA) filed a proposal similar to what is included in this bill in the CPUC's NEM proceeding. The CPUC's December 2020 proposed decision declined to adopt CCSA's proposal, stating it was premature and reiterating the CPUC's intent to review the broader aspects of community solar across the various programs. In 2022, AB 2316 was introduced and chaptered just as the CPUC was in the midst of evaluating the electric IOUs' community solar programs and with the desire to develop a new community solar program aligned with CCSA's proposal. The supporters of AB 2316 intended that the legislation would require the CPUC to adjust its proposal to reflect the desired elements CCSA sought, including a reliance on the ACC to determine the value of the energy from the community solar subscription program. Instead, the CPUC proposed a different community solar option that would not use the ACC and instead treat the new community solar energy akin to wholesale energy resources.

CPUC adopts decision on June 11th. To date, the CPUC has remained adamant about the need to treat these resources as wholesale energy resources and not rely on the ACC. On June 11th, the CPUC adopted a decision consistent with the treatment of the new community solar offering as a wholesale resource, the Community Renewable Energy tariff (CRET), which would rely on the Renewable Market Adjusting Tariff (ReMAT) as a cost and generation resource foundation with the ability to contract for 10, 15, or 20 years. The decision also caps each project at no more than three MW and the overall generation capacity at 750 MW proportioned across the three large electric IOUs, PG&E with 218.8 MW, SCE with 226 MW, and San Diego Gas & Electric (SDG&E) with 48.8 MW [minus the capacity already on contract]. In the decision the CPUC argued any costs recovered beyond those proposed would result in nonparticipant funded compensation that exceeds the avoided costs. They also noted that such a tariff could divert generation developers away from competitive solicitations in the wholesale market.

AB 1813 seeks to overturn CPUC decision and create adjusted community solar program. This bill seeks to create the community solar option sought by the proponents who have thus far been unsuccessful at securing their desired program at the CPUC. This proposal would also require energy storage (at five MW) with solar (at five MW) and a program cap of four GW. This bill would require the CEC to determine whether community solar subscription program would be a load-modifying resource. Electric IOUs oppose this provision, arguing such treatment is reserved for behind-the-meter demand response or energy efficiency resources. They take issue with suggesting that front-of-the-meter community solar installations could serve the same purpose. Proponents of this bill suggest the CEC could determine whether the resources are not load-modifying and therefore the compensation would be affected. However, they prefer to have the CEC conduct this analysis instead of the CPUC and require the CPUC within 90 days of the CEC's evaluation to establish a mechanism to determine whether community solar resources are load-modifying. This bill also provides that the community solar project can be sited in any area within the Local Reliability Areas determined by the CAISO. These areas can encompass multiple counties and hundreds of miles. To the extent community solar is intended to serve a local community, such large geographic areas raise concerns about whether the avoided costs on the transmission and distribution system are in fact being avoided to serve load. The proponents contend the electrons are still serving the need to the electrical grid and should therefore not be modified. They largely seek opportunities to provide greater financial certainty that these community solar projects will be built.

Prior/Related Legislation
(See Policy Committee Analysis.)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The CEC estimates ongoing costs of about $2.7 million in the first year and $1.7 million annually thereafter (Energy Resource Program Account [ERPA]) to engage with stakeholders and develop a "load modifying" criteria for CREGs, collect and analyze data to understand the nature and capabilities of CREGs and their relation to the load subscribed to the projects, and provide policy support to understand load-serving entity procurement obligations and maintain alignment with related state electric system planning processes, among other things. The CEC warns that ERPA faces an ongoing structural deficit and may not be able to sustainably support new activities.
- Ongoing costs of an unknown but significant amount, likely over $3 million annually (ratepayer funds), for the CPUC to implement the provisions of this bill.

OPPOSITION: (Verified 8/13/26)

Pacific Gas and Electric Company
Public Advocates Office
San Diego Gas and Electric Company
Southern California Edison

ARGUMENTS IN SUPPORT: According to Californians for Local Affordable Solar & Storage, the sponsor of this bill:

> AB 1813 would seek to rectify the failures of existing programs designed by the CPUC by setting more objective standards for the CPUC to evaluate participation levels. These clarifying amendments will ensure that community renewable energy projects are treated the same as other distributed resources. As the CPUC Public Advocates Office has stated, the CPUC should use the avoided cost calculator as "the Commission's single resource for avoided cost calculation across DER programs," which is consistent with CPUC policy that "there should be a single avoided cost model applied to all DER proceedings." (February 21, 2024 Opening Brief of the Public Advocates office in CPUC Docket 22-11-013, p. 39)

ARGUMENTS IN OPPOSITION: The Public Advocates Office states:

> AB 1813 would intervene in the ongoing [CPUC] proceeding by legislatively prescribing outcomes that the CPUC has not yet determined are cost-effective or affordable. This creates substantial risk that Californians who do not participate in these programs – including many working families and individuals who are already burdened by high utility bills – will subsidize projects whose full system benefits remain disputed.

SUBJECT: Factory-built housing: building standards and local requirements

SOURCE: California Housing Consortium
Housing Action Coalition

DIGEST: This bill prohibits cities and counties from imposing or enforcing building standards that exceed state minimum building standards on a housing construction project that utilizes factory-built housing (FBH), as specified.

Senate Floor Amendments of 8/21/2026 delete and replace an erroneous reference to the California Building Standards Commission to reference the Housing and Community Development Department.

1) Incorporate technical feedback from the administration regarding definitions applicable to factory-built housing.

2) Recast the definition of "factory-built housing" and "factory-built housing structure" to be calculated based on the percentage of building area, volume or size that uses factory-built components, rather than the percentage of project costs that uses factory-built components.

3) Recast provisions specifying that a city and county shall not impose or enforce local building standards on factory-built housing structures that exceed mandatory minimum building standards.

4) Explicitly prohibits cities and counties from imposing local energy efficiency and green building standards that exceed the state building standards on factory-built housing structures.

5) Restates and references the general ability of a city or county to make changes or modifications to the California Building Standards Code.

6) Requires cities and counties to make specified findings that adopting modifications or changes to the state building code are reasonably necessary to maintain minimum health and safety because of local climatic, geological, or topographical conditions, including but not limited to, wildfire risk and flood risk.

7) Provides that locally adopted modification or changes to the California Building Standards Code shall not become effective until the finding and modification is filed with the California Building Standards Commission (CBSC).

8) Provides that for the purposes of interpreting provisions related to local building codes, there shall be a rebuttable presumption in favor of a determination that facilitates the use of factory-built housing, and that the presumption may only be overcome upon a written finding supported by a preponderance of the evidence that such a determination would conflict with a state building standard or create a specific, adverse impact on public health or safety.

9) Makes technical changes and updates to definitions in FBH Law.

Senate Floor Amendments of 8/20/2026 do the following:

1) Incorporate technical feedback from the administration regarding definitions applicable to factory-built housing.

2) Recast the definition of "factory-built housing" and "factory-built housing structure" to be calculated based on the percentage of building area, volume or size that uses factory-built components, rather than the percentage of project costs that uses factory-built components.

3) Recast provisions specifying that a city and county shall not impose or enforce local building standards on factory-built housing structures that exceed mandatory minimum building standards.

4) Explicitly prohibits cities and counties from imposing local energy efficiency and green building standards that exceed the state building standards on factory-built housing structures.

5) Restates and references the general ability of a city or county to make changes or modifications to the California Building Standards Code.

6) Requires cities and counties to make specified findings that adopting modifications or changes to the state building code are reasonably necessary to maintain minimum health and safety because of local climatic, geological, or topographical conditions, including but not limited to, wildfire risk and flood risk.

7) Provides that locally adopted modification or changes to the California Building Standards Code shall not become effective until the finding and modification is filed with the California Building Standards Commission (CBSC).

8) Provides that for the purposes of interpreting provisions related to local building codes, there shall be a rebuttable presumption in favor of a determination that facilitates the use of factory-built housing, and that the presumption may only be overcome upon a written finding supported by a preponderance of the evidence that such a determination would conflict with a state building standard or create a specific, adverse impact on public health or safety.

9) Makes technical changes and updates to definitions in FBH Law.

ANALYSIS:

Existing law:

1) Establishes the California FBH Law, which does the following:

    a) Defines "FBH" to mean a residential building, dwelling unit, or an individual dwelling room or combination of rooms thereof, or building component, assembly, or system manufactured in such a manner that all concealed parts or processes of manufacture cannot be inspected before installation at the building site without disassembly, damage, or deconstruction of the part, including units designed for use as part of an institution for resident or patient care, that is either wholly manufactured or is in substantial part manufactured at an offsite location to be wholly or partially assembled onsite in accordance with specified building standards and regulations. Excludes from the definition of FBH a mobilehome, recreational vehicle, or a commercial modular, as specified.

b) Defines "Design Approval Agency" (DAA) to mean a private organization meeting the requirements specified in Department of Housing and Community Development (HCD) regulations to perform evaluation of FBH and factory-built specifications.

c) Requires all FBH manufactured after the effective date of the FBH building standards adopted under the FBH Law, that is sold or offered for sale to first users within California, to bear insignia of approval issued by HCD.

d) Requires all FBH bearing an insignia of approval to be deemed to comply with the requirements of all ordinances or regulations enacted by any city, county, or district that may be applicable to the construction of housing.

2) Establishes the CBSC within the Department of General Services, and requires the commission to approve and adopt building standards and to codify those standards in the California Building Standards Code. Requires CBSC to publish editions of the code in its entirety once every three years. In the intervening period the commission must publish supplements as necessary.

3) Requires CBSC to receive proposed building standards from a state agency for consideration in an 18-month code adoption cycle. Requires CBSC to adopt regulations governing the procedures for 18-month code adoption cycle.

4) Provides that only those building standards, that are approved by the CBSC and are in effect at the local level at the time an application for a building permit is submitted shall apply to the plans and specifications for construction, with exceptions for permits for residential dwellings based on model home designs approved under specified standards.

5) Pauses changes to building standards affecting residential units at the state and local level until 2031, with limited exceptions.

This bill:

1) Defines a "factory-built housing structure" to mean a residential building where at least two-thirds of the new or converted square footage is designated for residential use and in which at least 30 percent of the residential use portion of the building is built using factory-built housing, calculated based on the building's area, volume or size as determined by the licensed design professional responsible for the project and subject to concurrence by HCD or the DAA.

2) Specifies that a city, county, or district, shall not impose or enforce local building standards on factory-built housing structures that exceed or differ from the applicable mandatory standards in the California Building Standards Code.

3) Specifies that a city, county, or district shall not impose or enforce local amendments to the energy efficiency and green building standards that exceed or differ from the California Building Standards Code on factory-built housing structures.

4) Restates the ability of a city or county under existing law to make local changes and modifications to the requirements contained in the Building Standards Code.

5) Provides, pursuant to existing law, that a city or county must make specified findings that adopting modifications or changes to the state building code are reasonably necessary to maintain minimum health and safety because of local climatic, geological, or topographical conditions, including but not limited to, wildfire risk and flood risk.

6) Provides that a locally adopted modification or changes to the California Building Standards Code shall not become effective until the finding and modification is filed with the CBSC

7) Provides that for the purposes of interpreting provisions related to local building codes, there shall be a rebuttable presumption in favor of a determination that facilitates the use of factory-built housing, and that the presumption may only be overcome upon a written finding supported by a preponderance of the evidence that such a determination would conflict with a state building standard or create a specific, adverse impact on public health or safety.

Background

Factory-Built Housing. FBH refers to industrialized housing construction, where either the entirety of, or components of, a housing unit are produced or assembled in an offsite factory, or both, and then transported to the housing site. FBH is often colloquially referred to as modular, or prefabricated housing. Where traditional "site-built" or "stick-built" housing is entirely constructed on a foundation at the actual housing site, FBH utilizes the efficiencies of an assembly line, similar to a car or an appliance. Entire units and modules are assembled in a climate-controlled factory and are much less susceptible to construction delays associated with traditional housing construction (*e.g.,* disruptive weather). While benefits may vary by project and jurisdiction, the Terner Center for Housing Innovation at

University of California, Berkeley (Terner Center), finds that using FBH methods has the potential to reduce hard costs for a project by 10-25% and significantly reduce build times, compared to traditional construction.[1]

Comments

Author's statement. "California urgently needs to embrace innovation to solve our housing crisis. Modern construction methods like [FBH] hold so much potential to produce housing more quickly, more affordably, and in a more environmentally friendly manner. But our regulatory framework is constraining the industry's growth and adoption. AB 1815 will create the standardization that factories need to scale across the state. Building all factory-built housing projects to the state's building standards code prevents fragmentation across California's 540 local jurisdictions. This will create a clear, consistent pathway for factories to successfully scale up production across the state, producing housing more quickly and more affordably at a time when we need it most."

FBH in California. FBH may be installed where other similar types of dwelling units are allowed. Existing law allows local governments to exercise specified local land use requirements with respect to FBH, but local requirements imposed on FBH may not differ substantially from requirements imposed on other residential buildings of the same size.

HCD maintains building code and plan approval authority over FBH. HCD currently contracts with various Design Approval Agencies (DAAs) who perform third-party review and approval of FBH designs according to regulations established by HCD and the building standards governing FBH. HCD approves Quality Assurance Agencies (QAAs) that inspect FBH during the production phase in the manufacturing facility or offsite. In-plant inspections are conducted by a third-party agent certified by HCD to ensure FBH and modular buildings meet state codes and standards during the manufacturing process. Approved FBH must bear a California Insignia of Approval on each FBH system or component in the project.

Zoning codes and building codes. California FBH Law currently allows local agencies to impose "local use zone" or zoning requirements, and certain categories of building standards on FBH projects, provided that the standards do not deviate

[1] Stephanie Hawke, et. al. *Potential Pathways to Scale Innovative Construction Methods in California.* Accessible here: **https://ternercenter.berkeley.edu/wp-content/uploads/2026/03/PathwaystoScaleInnovativeConstruction2026.pdf**. March 2026.

substantially from standards imposed on similar residential structures. Existing law specifies that in addition to zoning requirements, local agencies can impose building setbacks, side and rear yard requirements, site development, property line, and architectural requirements on FBH projects; these standards are all duplicative examples of zoning code requirements, which statute already reserves for local agencies to impose. This bill removes these superfluous references. Removing these references to zoning code standards removes excess language from statute but does not have a practical effect on the ability of local agencies to impose zoning requirements that apply broadly to residential structures in the jurisdiction such as setback requirements, and requirements for off-street parking.

The more substantive changes in this bill stems from provisions that remove the ability of a city or county to impose or enforce building standards that exceed the state minimum building standards on any projects where FBH components comprise 15% of the vertical construction costs of each structure in the project. An exception to this preemption is made for locally adopted flood resistance and wildfire safety standards.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

> The Department of Housing and Community Development (HCD) indicates that this bill would impose ongoing workload to collect, validate, and store reported data on congregate housing units or RCFEs, and provide technical assistance to local agencies, as well as one-time costs to update the housing element APR form and to update IT systems. HCD notes that there are multiple pending bills that would impact APR requirements, and that if several such bills are enacted, total costs would be in the hundreds of thousands of dollars. Staff estimates that workload directly attributable to this bill would likely exceed $50,000, and could be as high as $150,000 if no other APR bills are enacted and HCD would still be responsible for one-time fixed costs to update forms and IT systems, and to provide ongoing data collection and technical assistance services.

OPPOSITION: (Verified 8/20/2026)

California State Association of Electrical Workers
California State Pipe Trades Council

Western States Council Sheet Metal, Air, Rail and Transportation

ARGUMENTS IN SUPPORT: The California Housing Consortium, and the Housing Action Coalition are sponsoring this measure. They argue that building code fragmentation standards as one of the barriers that slows production timelines and poses risks for factory-built housing. They further note, that by allowing all factory-built housing projects to be built to the state building code, AB 1815 creates the standardization needed for factories to successfully scale up production across California.

ARGUMENTS IN OPPOSITION: The California State Association of Electrical Workers, the California State Pipe Trades Council, and the Western States Council of Sheet Metal Workers oppose this bill. They note that FBH factories are often located outside of California, creating a risk that portion of California based construction work will be outsourced to factories out of state with weaker labor standards. They argue that this bill should be amended to include a Buy California/ Buy America mandate for factory-built components, and that the bill should establish strong labor standards..

SUBJECT: Ignition interlock devices

SOURCE: SAFE California Roads Coalition

DIGEST: This bill makes the installation of an ignition interlock device (IID) mandatory upon conviction of a first driving under the influence (DUI) offense involving alcohol; adopts a mandatory IID/restricted license model for alcohol-involved DUI convictions; allows a first-time DUI offender to opt for suspension of their driving privilege in lieu of maintaining a restricted license and IID; requires a 30-day (pre-conviction) administrative license suspension prior to a person applying for a restricted license for a DUI involving alcohol; creates a suspension/restricted license framework for drug-only DUI convictions; broadly reorganizes and consolidates existing DUI-related statutes; and repeals the existing statewide IID pilot program and other provisions of law made obsolete by the provisions of this bill.

ANALYSIS:

Existing law:

1) Makes it unlawful for any person who is under the influence of any alcoholic beverage; who has 0.08 percent or more, by weight, of alcohol in their blood; who has 0.04 percent or more, by weight, of alcohol in their blood and is driving a commercial vehicle or a motor vehicle when a passenger for hire is a passenger in the vehicle; or is under the combined influence of any alcoholic beverage and drug to drive a vehicle. (Vehicle (Veh.) Code, § 23152, subds. (a), (b), (d), (e), (g).)

2) Makes it unlawful for a person who is addicted to the use of any drug or who is under the influence of any drug to drive a vehicle. (Veh. Code, § 23152, subds. (c) & (f).)

3) Makes it unlawful for a person to drive a vehicle and concurrently do any act forbidden by law, or neglect any duty imposed by law in driving the vehicle, which act or neglect proximately causes bodily injury to any person other than the driver, while the person is under the influence of any alcoholic beverage; has 0.08 percent or more, by weight, of alcohol in their blood; has 0.04 percent or more, by weight, of alcohol in their blood while driving a commercial motor vehicle or motor vehicle when a passenger for hire is a passenger in the vehicle; or is under the combined influence of any alcoholic beverage and drug. (Veh. Code, § 23153, subds. (a), (b), (d), (e), (g).)

4) Makes it unlawful for a person, while under the influence of any drug, to drive a vehicle and concurrently do any act forbidden by law, or neglect any duty imposed by law in driving the vehicle, which act or neglect proximately causes bodily injury to any person other than the driver. (Veh. Code, § 23153, subd. (f).)

5) Provides that convictions for DUI, DUI causing bodily injury, and a "wet reckless" are considered prior convictions for purposes of DUI sentencing. (Veh. Code, § 23550.)

6) Requires the DMV to immediately suspend the privilege of a person to operate a motor vehicle for any one of the following reasons:

a) The person was driving a motor vehicle when the person had 0.08 percent or more, by weight, of alcohol in their blood.
b) The person was under 21 years of age and had a blood-alcohol concentration (BAC) of 0.01 percent or greater, as measured by a preliminary alcohol screening test, or other chemical test.
c) The person was driving a vehicle that requires a commercial driver's license when the person had 0.04 percent or more, by weight, of alcohol in their blood.
d) The person was driving a motor vehicle when on probation for a DUI and the person had 0.01 percent or more, by weight, of alcohol in their blood, as measured by a preliminary alcohol screening test or other chemical test. (Veh. Code, § 13353.2, subd. (a).)

7) Outlines the following administrative (i.e., pre-conviction) license suspension timelines: 4 months for a first DUI; and 1 year for a second or subsequent DUI. (Veh. Code, §§ 13353.2, 13353.3.)

8) Prohibits the driving privilege from being restored, and a restricted or hardship permit to operate a motor vehicle from being issued, to a person during the specified suspension or revocation period, except as provided. Prohibits the driving privilege from being restored after a suspension or revocation until all applicable fees have been paid and the person submits proof of financial responsibility to the Department of Motor Vehicles (DMV). (Veh. Code, § 13353.4.)

9) Allows a person subject to an administrative license suspension to apply for a restricted license if the person: satisfactorily provides proof of enrollment in licensed DUI program; installs a functioning, certified IID on any vehicle that the person operates and submits the "Verification of Installation" form; agrees to maintain the functioning, certified IID; was 21 or older at the time the offense occurred and provides proof of financial responsibility; and pays all applicable reinstatement or reissue fees. (Veh. Code, § 13353.6, subd. (a).)

10) Requires that a person whose driving privilege has been administratively suspended, who is eligible for a restricted driver's license, and who installs a functioning, certified IID, receive credit toward the mandatory term the person is required to install an IID for a conviction of a violation arising out of the same occurrence that led to the person's driving privilege being suspended equal to the period of time the person installs an IID under the administrative process. (Veh. Code, § 13353.6, subd. (d).)

11) Allows a person subject to an administrative license suspension to apply for a restricted license limited to travel to and from the activities required by a licensed DUI program that the person is enrolled in as well as to and from and in the course of the person's employment. Requires the DMV to suspend the person's privilege to operate a motor vehicle for 30 days and then issue the person a restricted driver's license, as specified. (Veh. Code, § 13353.7.)

12) Outlines a process by which a person subject to an administrative license suspension who has a prior DUI-related conviction may obtain a restricted license, including a requirement to install an IID. (Veh. Code, § 13353.75.)

13) Requires the DMV to immediately suspend or revoke the privilege of a person to operate a motor vehicle upon the receipt of an abstract of the record of a court showing that the person has been convicted of DUI or DUI causing bodily injury. (Veh. Code, § 13352, subd. (a).)

14) Outlines the following suspension and revocation periods for a person upon conviction of a DUI, and prohibits the driving privilege from being reinstated until the person submits proof of financial responsibility and successful completion of a DUI program, as specified:

    a) For a first DUI, 6-month license suspension.
    b) For a first DUI causing bodily injury, 1-year license suspension.
    c) For a DUI with one prior, 2-year license suspension.
    d) For a DUI causing bodily injury with one prior, 3-year license revocation.
    e) For a DUI with two priors, 3-year license revocation.
    f) For a DUI causing bodily injury with two priors or punishable as a felony, 5-year license revocation.
    g) For a DUI with three priors or punishable as a felony, 4-year license revocation. (Veh. Code, § 13352, subd. (a)(1)-(7).)

15) Permits a person to apply for a restricted license following a DUI conviction if certain requirements are met, including installing an IID. Provides that the restricted driving privilege remains in effect until all reinstatement requirements are satisfied. (Veh. Code, § 13352, subds. (a) & (e).)

16) Requires a person whose driving privilege is restricted to arrange for each vehicle with a functioning, certified IID to be serviced by the installer at least once every 60 days in order for the installer to recalibrate the device and

monitor the operation of the device. Requires the installer to notify the DMV if the device is removed or indicates that the person has attempted to remove, bypass, or tamper with the device, or if the person fails three or more times to comply with any requirement for the maintenance or calibration of the ignition interlock device. (Veh. Code, §§ 13352, subd. (i); 13353.6, subd. (f).)

17) Requires the driving privilege to be suspended for 10 months when a person is convicted of DUI and whose BAC was 0.20 percent or more, by weight. Prohibits the privilege from being reinstated until the person gives proof of financial responsibility and successful completion of a DUI program. Permits a person to apply for a restricted license if certain requirements are met, including installing an IID. Provides that the restricted driving privilege remains in effect until all reinstatement requirements are satisfied. (Veh. Code, § 13352.1, subds. (a)-(d).)

18) Provides the following IID terms for a person required to install a functioning, certified IID upon conviction of a DUI involving alcohol:

    a) For a person convicted of a violation of DUI involving alcohol with no priors, the court may order an IID for up to six months.
    b) For a person convicted of a violation of DUI involving alcohol with one prior, the person is subject to a mandatory 12-month IID term.
    c) For a person convicted of a violation of DUI involving alcohol with two priors, the person is subject to a mandatory 24-month IID term.
    d) For a person convicted of a violation of DUI involving alcohol with three or more priors, the person is subject to a mandatory 36-month IID term. (Veh. Code, § 13353.75, subd. (h)(1).)

19) Provides the following IID terms for a person required to install a functioning, certified IID upon conviction of a DUI involving alcohol and causing bodily injury:

    a) For a person convicted of a violation with no priors, the person is subject to a mandatory 12-month IID term.
    b) For a person convicted of a violation with one prior, the person is subject to a mandatory 24-month IID term.
    c) For a person convicted of a violation with two priors, the person is subject to a mandatory 36-month IID term.

d) For a person convicted of a violation with one prior in the previous 10 years punishable as a felony, the person is subject to a mandatory 48-month IID term. (Veh. Code, § 13353.75, subd. (h)(2).)

20) Requires an IID manufacturer to agree to provide functioning, certified IIDs to DUI offenders at reduced costs when the offender is eligible for reduced costs. Provides that the failure of the manufacturer, its agents, or authorized installers to comply with the fee schedule specifying reduced fees for eligible offenders will result in suspension or revocation of the DMV's approval for the manufacturer to market IIDs in this state. (Veh. Code, § 13386, subd. (h).)

21) Requires every IID manufacturer and manufacturer's agent certified by the DMV to provide IIDs to adopt the following fee schedule that provides for the payment of the costs of the certified IID by offenders in amounts commensurate with that person's income relative to the federal poverty level (FPL):

a) A person with an income at 100 percent of the FPL or below and who provides income verification is responsible for 10 percent of the cost of the manufacturer's standard IID program costs, and any additional costs accrued by the person for noncompliance with program requirements.
b) A person with an income at 101 to 200 percent of the FPL and who provides income verification is responsible for 25 percent of the cost of the manufacturer's standard IID program costs, and any additional costs accrued by the person for noncompliance with program requirements.
c) A person with an income at 201 to 300 percent of the FPL and who provides income verification is responsible for 50 percent of the cost of the manufacturer's standard IID program costs, and any additional costs accrued by the person for noncompliance with program requirements.
d) A person who is receiving CalFresh benefits and who provides proof of those benefits to the manufacturer or manufacturer's agent or authorized installer is responsible for 50 percent of the cost of the manufacturer's standard IID program costs, and any additional costs accrued by the person for noncompliance with program requirements.
e) A person with an income at 301 to 400 percent of the FPL and who provides income verification is responsible for 90 percent of the cost of the manufacturer's standard IID program costs, and any additional costs accrued by the person for noncompliance with program requirements.
f) All other offenders are responsible for 100 percent of the cost of the IID.
g) The manufacturer is responsible for the percentage of costs for which the offender is not responsible. (Veh. Code, § 23575.3, subd. (k)(1).)

22) Requires the IID provider to verify the offender's income to determine the cost of the IID by verifying specified following documents. (Veh. Code, § 23575.3, subd. (k)(2).)

23) Establishes a statewide IID pilot program, which sunsets on January 1, 2033, that does the following:

    a) Requires a court to order the installation of an IID for repeat DUI offenders and any DUI causing bodily injury to another person, as follows:
        i) For a period of one year for a person convicted of a DUI involving alcohol (or both alcohol and drugs) with one prior, or a first-time DUI causing bodily injury to another person;
        ii) For a period of two years for a person convicted of a DUI involving alcohol (or both alcohol and drugs) with two priors, or a DUI causing bodily injury to another person with one prior;
        iii) For a period of three years for a person convicted of a DUI involving alcohol (or both alcohol and drugs) with three or more priors, a DUI causing bodily injury to another person with two priors, or a prior specified DUI conviction punishable as a felony. (Veh. Code, § 23575.3, subd. (h)(1)(B)-(D).)
    b) Authorizes the court to order the installation of an IID for a first-time DUI offender for a period not to exceed six months from the date of conviction, or allows the offender to apply for a restricted driver's license upon specified conditions. Specifies that only one of these sanctions may be imposed. (Veh. Code, § 23575.3, subd. (h)(1)(A).).

24) Requires a person subject to an IID to arrange for each vehicle they operate to be equipped by a functioning, certified IID by a certified provider, provide proof of installation to the DMV, and pay a fee, determined by the DMV, sufficient to cover the costs of administration. (Veh. Code, § 23575.3, subds. (d) & (f).)

This bill:

1) Requires the DMV to immediately suspend the privilege of a person to operate a motor vehicle when the person was driving a motor vehicle when a passenger for hire was a passenger in the vehicle when the person had a 0.04 percent or more, by weight, of alcohol in their blood.

2) Requires a person subject to an administrative license suspension for a DUI involving alcohol to apply for a restricted license after a 30-day license suspension.

3) Eliminates the course of employment exception to the IID requirement in order to obtain a restricted license for purposes of an administrative license suspension.

4) Establishes the following license suspension timelines for a drug-only DUI conviction:

   a) For a first DUI, the privilege is suspended for 6 months.
   b) For a DUI causing bodily injury, the privilege is suspended for 12 months.
   c) For a second DUI, the privilege is suspended for 24 months.
   d) For a second DUI causing bodily injury, the privilege is suspended for 36 months.
   e) For a DUI with two priors, the privilege is suspended for 36 months.
   f) For a DUI causing bodily injury with two priors, the privilege is suspended for 48 months.
   g) For any DUI with three or more priors, the privilege is suspended for 60 months.

5) Requires that certain conditions are met for the driving privilege (suspended due to a drug-only DUI) to be reinstated. Requires that the person provide proof of financial responsibility to DMV, provide proof of successful completion of a licensed DUI program, as specified, and pay all reinstatement and reissue fees.

6) Allows a person subject to a license suspension for a drug-only DUI to apply for a restricted license if the person provides proof of financial responsibility to DMV, completes a minimum specified period of the suspension period, provides proof of enrollment or participation in a licensed DUI program, as specified, and pays all reinstatement and reissue fees.

7) Requires a DUI program that a person is required to be enrolled in to report any failure to participate in the program to the DMV. Outlines a process to request a review of the finding that the person has failed to comply with the program requirements to the Department of Health Care Services (DHCS), requires DHCS to review the request, and requires DHCS to notify the person and the DUI program of their finding. Permits the DMV to reinstate any restricted license terminated as a result of the notification.

8) Requires, upon a conviction for a DUI involving alcohol, the driving privilege to be suspended. Prohibits the privilege from being reinstated until the person meets specified requirements, including maintaining a restricted license (which requires the installation of an IID) for a specified period of time. Provides the following restricted license periods:

   a) For a first DUI, restricted license for 6 months.
   b) For a first DUI causing bodily injury, restricted license for 12 months.
   c) For a DUI with one prior, restricted license for 24 months.
   d) For a DUI causing bodily injury with one prior, restricted license for 36 months.
   e) For a DUI with two priors, restricted license for 36 months.
   f) For a DUI causing bodily injury with two priors, restricted license for 48 months.
   g) For a DUI with three priors, restricted license for 60 months.
   h) For a first DUI with a BAC of .20 or higher, restricted license for 10 months.

9) Allows a first-time DUI offender to opt for suspension of their driving privilege in lieu of maintaining a restricted license and IID.

10) Revises the fee schedule for reduced IID fees as follows:

   a) A person with an income at 125 percent of the FPL or below and who provides income verification is responsible for 10 percent of the cost of the manufacturer's standard IID program costs, and any additional costs accrued by the person for noncompliance with program requirements.
   b) A person with an income at 126 to 225 percent of the FPL and who provides income verification is responsible for 25 percent of the cost of the manufacturer's standard IID program costs, and any additional costs accrued by the person for noncompliance with program requirements.
   c) A person with an income at 226 to 325 percent of the FPL and who provides income verification is responsible for 50 percent of the cost of the manufacturer's standard IID program costs, and any additional costs accrued by the person for noncompliance with program requirements.

11) Provides that a person is not responsible for any IID costs, including installation, service, and maintenance, due to malfunctions of the IID unrelated to the person's non-compliance.

12) States that its provisions do not go into effect until January 1, 2031.

13) Makes other technical and conforming changes, including repealing existing provisions of law made obsolete by the provisions of this bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Significant one-time and ongoing state costs (Motor Vehicle Account (MVA), General Fund) to the Department of Motor Vehicles (DMV). DMV reports that it would be required to modify forms, promulgate regulations, and make IT modifications prior to the January 1, 2031, implementation date. DMV indicates that these costs are estimated at $3-6 million. Ongoing costs within the range would depend on the technology solutions ultimately adopted. The bill includes cost-recovery mechanisms through the restriction and reinstatement process, similar to those used in the existing pilot program. These estimates do not account for any supplemental funding that may be available (such as through the Office of Traffic Safety) to support implementation and help offset costs.

The MVA, the primary funding account for the California Highway Patrol and the DMV is facing insolvency. In a report, the LAO noted that, "Until a plan is put in place to address MVA's structural deficit, we recommend the Legislature set a high bar for considering approval of any proposals that create additional MVA cost pressures and accelerate the risk of insolvency." In the Governor's proposed 2026-2027 budget, the Governor stated that, "the Budget currently projects that the MVA will be insolvent as soon as 2028-29. Given the ongoing fiscal constraints in the MVA, the Administration will continue to limit new workload or initiatives, including those with delayed implementation dates that would create additional cost pressures over time."

Unknown, potential state costs to the Department of Health Care Services (DHCS) to review relevant documents or evidence and to make determinations of whether a person failed to participate in a DUI program, as specified, and to notify the person and the DUI program of their findings.

SUBJECT: 2-1-1 information and referral response system

SOURCE: 211 California
Family Resource Center San Joaquin
United Ways of California

DIGEST: This bill creates the 211 Fund in the State Treasury for the 211 system and related purposes, subject to appropriation by the Legislature, and directs the California Office of Emergency Services (Cal OES) to allocate the funds as specified.

ANALYSIS:

Existing law:

1) Designates Cal OES as the lead state agency responsible for addressing natural, technological, or man-made disaster and emergencies, including activities necessary to prevent, respond to, recover from, and mitigate the effects of emergencies and disasters to people and property.

2) Authorizes the California Public Utilities Commission (CPUC) to supervise and regulate every public utility, including telephone companies, in the state and do all things necessary and convenient in the exercise of such power.

This bill:

1) Establishes the 211 Fund in the State Treasury, subject to legislative appropriation, and provides the moneys in the fund shall be used for the 211 system and related purposes.

2) Requires Cal OES to allocate the funds to the California 211 Providers Network, known as 211 California, to implement the activities specified in this bill.

3) Provides that the 211 Fund shall be used for the following purposes, as specified:

   a) Enhancing critical 211 system capacity and service quality;

   b) Providing equitable access to 211 dialing and services;

   c) Publishing a statewide 211 community needs data dashboard;

   d) Strengthening 211 community resource databases and enabling data sharing;

   e) Promoting public awareness about 211; and,

   f) Improving 211 system readiness, infrastructure, and capacity to respond to disasters and all hazard events.

4) Directs 211 California to provide an annual report to Cal OES on the status of the 211 system, use of any funds, and future 211 system funding needs.

5) Requires Cal OES to administer the 211 Fund solely for the purpose of allocating moneys appropriated from the Fund to 211 California and for receiving and reviewing the annual report required in 4) above.

6) Authorizes OES to recover up to $100,000 per fiscal year for its reasonable administrative costs.

Background

What is 211? In 2000, the Federal Communications Commission (FCC) designated 211 as the free telephone number to obtain information and referral (I&R) services

to various health and human services programs, such as physical and mental health resources, housing, utility, food and employment assistance. 211 also provides related preparedness, response, and recovery services during and after disasters and emergencies.

211 California. As described in its 2026-2028 Strategic Plan, 211 California is a statewide 501(c)3 nonprofit organization consisting of more than 20 local and regional 211 providers that deliver coverage to over 98% of California's population. According to 211 California, most 211 providers facilitate additional service navigation and care coordination that go beyond a referral. These services include accessing care services for the homeless, conducting benefits screening and enrollment for health and human services programs, recommending caregiver support programs, providing Public Safety Power Shutoff (PSPS) safety planning for vulnerable households, arranging transportation and trip planning assistance, and collaborating with county and community partners to determine additional program eligibility. In 2025, 211 California providers responded to 1.8 million calls and texts. The most common requests involved housing assistance and food programs.

Statewide 211 coverage. As part of its action to reserve the 211 dialing code, the FCC encouraged states to implement 211 for access to I&R services. In response, the CPUC, under its authority to regulate telephone companies, issued an order in 2002 deploying the 211 system to counties and establishing administrative procedures for implementing 211 dialing in California. The CPUC further designated 211 California to serve as a single point of coordination and implementation in achieving statewide 211 coverage. An entity seeking to provide 211 services must apply to the CPUC for authority to use the 211 dialing code.

According to the CPUC, as of 2024, 45 of the state's 58 counties, covering approximately 99.3% of California's population, have 211 service. Of the 13 rural counties that do not have access to full 211, nine only offer disaster 211 service, meaning it is only activated and operational specifically in response to emergencies and disasters. The CPUC indicates it is working with various agencies and nonprofit organizations to extend 211 service to these remaining unserved areas.

211 and disaster response. 211 California reports that during major emergencies 211 providers often handle five to ten times the normal call volume. Due to the increasing role of 211 in disaster response, 211 California created 211Now **(**www.211Now.com**),** a dedicated online resource hub and emergency portal to support Californians during disasters, community distress incidents, PSPS events and other emergencies. The online platform supplies live information regarding

road closures, evacuation routes, shelters, food and medical assistance, and provides power outage support to electricity-dependent individuals with access and functional needs (AFN) in impacted communities. According to the Office of AFN within Cal OES, 211 is a trusted resource and essential community partner that provides important information and services to help individuals with AFN and their families stay informed, connected, safe and healthy.

Sustainability and funding challenges. Currently, the 211 system in California lacks a lead state agency to provide operational oversight and program sustainability. Prior legislative attempts to identify a state agency to administer 211 or establish a governance structure, via the California Health and Human Services Agency (CHHSA), the California Department of Social Services (CDSS) and the Governor's Office of Land Use and Climate Innovation (LCI), have not been successful.

The lack of a centralized state administrative entity for the 211 system also means 211 activities vary widely across the state. For example, according to 211 California's 2025 Annual Report, some counties partner with their respective 211 providers to deliver PSPS programming and support, while Los Angeles County partnered with its 211 affiliate, 211 LA, to report hate crimes under funding provided by the California Department of Civil Rights. 211 LA also served as a critical community resource for emergency response during the Los Angeles area wildfires in 2025.

Unlike the 911 emergency and 988 crisis response lines which have dedicated funding through telephone surcharges, 211 in California is funded through a fragmented mix of public and private sources, including charitable donations, grants, private foundations, local and state agencies for specific purposes, utility partnerships, and fee-for-service contracts. 211 California notes in its annual report that as more states contribute funding to support their 211 systems, California's lack of reliable public funding further exacerbates 211 service capacity and access inequities statewide.

This bill seeks to establish a structured arrangement between Cal OES and 211 California by directing Cal OES to administer moneys in a newly created 211 Fund to 211 California for the purposes described in the bill. The operation of the 211 Fund and its related purposes would be contingent on an appropriation by the Legislature.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown, ongoing General Fund cost pressures, likely in the tens of millions of dollars, to provide additional funding for 211 system enhancements. For context, the author's office has submitted a budget request for $20 million in one-time funding; however, it is ultimately unknown at what level an appropriation for the bill might be made.

- While the bill specifies Cal OES administer the 2-1-1 Fund solely for the purpose of allocating moneys to 211 California, Cal OES may require additional resources to do so. The bill authorizes Cal OES to recover only up to $100,000 per fiscal year to cover its administrative costs. To the extent that administrative costs rise above this threshold, there may be additional workload and cost pressures for Cal OES.

- Staff notes that even if Cal OES does not assume a significant administrative role, the office would still likely incur additional workload, with associated costs potentially in the hundreds of thousands to low millions of dollars, to create funding allocation criteria and evaluate reports for future fund distributions.

ARGUMENTS IN SUPPORT: In support of this bill, the co-sponsors, 211 California, Family Resource Center San Joaquin and United Ways of California write that, "Simply put, our service organizations, counties, 9-1-1, and 9-8-8 need 2-1-1 to function so they can do their jobs and people can get the right kind of live help they need at the right time. This bill would support critical emergency management integration and ensure core operational capacity and infrastructure for the 2-1-1 system in California."

SUBJECT: State holidays: Native American Day

SOURCE: Author

DIGEST: This bill, upon appropriation by the Legislature, entitles state employees to a holiday on the fourth Friday in September, known as "Native American Day," in lieu of a personal holiday, as specified, and authorizes any state bargaining unit to negotiate for a paid holiday on Native American Day, as specified.

Senate Floor Amendments of 8/21/26 address conflicting statutory chaptering issues with similar legislation, as specified.

Senate Floor Amendments of 8/18/26 require that the implementation of this bill be contingent upon appropriation by the Legislature, rather than upon the determination of the Department of Human Resources that sufficient funds exist to provide a holiday for all state employees, and add coauthors, as specified.

ANALYSIS:

Existing law:

1) States that it is the policy of the state that the workweek of the state employee is 40 hours, and the workday of state employees is eight hours, except as specified.

2) Provides that all state employees are entitled to the following holidays: January 1, the third Monday in January, the third Monday in February, March 31, the last Monday in May, July 4, the first Monday in September, November 11, Thanksgiving Day, the day after Thanksgiving, December 25, the day chosen by an employee as a personal holiday, and every day appointed by the Governor of this state for a public fast, thanksgiving, or holiday.

3) Authorizes any state employee to elect to receive eight hours of holiday credit for the date known as "Lunar New Year," the date known as "Genocide Remembrance Day," the date known as "Diwali," the date known as "Juneteenth," or the date known as "Native American Day," in lieu of receiving eight hours of personal holiday credit, as specified.

4) Authorizes a state employee to elect to receive eight hours of holiday credit for observance of a holiday or ceremony of the state employee's religion, culture, or heritage in lieu of receiving eight hours of personal holiday credit, as specified.

5) Entitles every employee, upon completion of six months of his or her initial probationary period in state service, to one personal holiday per fiscal year, as specified.

6) Establishes the fourth Friday in September, known as "Native American Day," as a holiday in this state.

This bill:

1) Provides that, upon appropriation by the Legislature, all state employees shall be entitled to a holiday on the fourth Friday in September, known as "Native American Day," in lieu of the personal holiday, as specified.

2) Authorizes any state bargaining unit to negotiate to receive this day as a paid holiday as a part of their memorandum of understanding (MOU).

Background

Author Statement. According to the author's office, "Native American Day is a celebration honoring California's First People, their cultures, their achievements, and their resilience after centuries of violence and discrimination. It serves as a reminder that while the state has taken meaningful steps toward addressing the historical injustices committed against Native communities, the work of healing the deep scars that remain has only begun. Establishing Native American Day as an official state holiday affirms the state's commitment to building a long and meaningful relationship with its sovereign tribes. It acknowledges that despite years of displacement and violence, California's First People remain and will continue to be an essential part of the state's history and culture."

Native American Day. Among other things, information provided by the author states that, "[under] Section 19853 of the Gov. Code, Native American Day, the 4th Friday of September, is listed as one of the available holidays state employees may observe using their yearly allowance of personal holidays." While this policy acknowledges Native American Day as a holiday and allows state employees the option to observe it with pay, the policy does not adequately emphasize the significance of this day to California's history and culture.

In 2021, the California Legislature passed AB 855 (Ramos, Chapter 283, Statutes of 2021) making Native American Day a paid judicial holiday and removing Columbus Day from its approved list of observed holidays. This change was part of the Judicial Branch's ongoing efforts to modernize itself and provide recognition of the importance of diversity within the court system. However, while the Judicial Branch now formally observes Native American Day, the remainder of state government does not. Under current law, most state employees may observe the day only by using a personal holiday, which results in an uneven recognition and inconsistent treatment of this important cultural holiday for California tribes. This bill is intended to correct that disparity and ensure that Native American Day is recognized uniformly across all branches of state government.

Related/Prior Legislation

AB 2017 (Haney, 2026) would add the first day of the month of Shawwal in the Islamic lunar calendar, known as "Eid al-Fitr," and the 10th day of the month of Dhu al-Hijjah in the Islamic lunar calendar, known as "Eid al-Adha" to the existing list of state holidays, as specified. (Pending on the Senate Floor)

AB 2294 (Ta, 2026) designates "Sylvia Mendez Day" as a state holiday, as specified. (Pending on the Senate Floor)

AB 2455 (Haney, 2026, Chapter 49, Statutes of 20026) requires the Governor to annually proclaim May 17 as "Bruce Lee Day," and designates and sets apart that date each year as having special significance, as specified.

AB 855 (Ramos, Chapter 283, Statutes of 2021) replaced Columbus Day with Native American Day as an approved judicial holiday.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, CalHR reports annual costs of approximately $16.3 million ($12.2 million General Fund) to provide state employees with an additional paid holiday. While the bill makes the holiday contingent upon a determination by CalHR, the department notes that assessing fund sufficiency falls under the jurisdiction of the Department of Finance.

Additionally, if the holiday is phased in over-time across multiple bargaining units, CalHR notes that overall state costs will change, and likely increase, depending on unit membership, salary ranges, and future wage increases.

ARGUMENTS IN SUPPORT: In support of this bill, the California Native American Vote Project writes that, "[a]s an organization dedicated to advancing civic engagement and political power in Native American communities across California, the California Native Vote Project works to ensure Native voices are heard, respected, and represented at all levels of government. Recognizing Native American Day as an official state holiday aligns with our mission to uplift Native identities, cultures, and histories, and reflects an ongoing commitment to equity, visibility, and tribal sovereignty."

Further, "AB 1841 would make Native American Day, the fourth Friday in September, an official paid holiday for state employees. We believe this bill elevates the importance of this historic day, not just for native people, but all Californians. Native American Day is a celebration of the resilience of California's First People and their struggle for survival. More importantly, it serves as a reminder to all that there is still more work to be done to help heal the scars of violence and discrimination that many tribes bare to this day.

And finally, "[i]n addition to its symbolic importance, Native American Day would serve as an opportunity for the public to learn more about California's history. Formal recognition would encourage communities to dedicate time to learning about the people who inhabited these lands long before it was ever a state."

SUBJECT: Judges' Retirement System II: beneficiaries

SOURCE: California Judges Association

DIGEST: The bill allows a judge in the Judges' Retirement System II (JRS II) who retires on or after January 1, 2027, and elects specified optional retirement payment plans to designate a beneficiary other than their spouse to receive continuing retirement benefits after the judge's death, subject to the community property rights of the judge's spouse.

ANALYSIS:

Existing law:

1) Establishes the Judges' Retirement System II System (JRS II) to provide a defined benefit retirement plan for judges who were first elected or appointed to the bench on or after November 9, 1994. (Government Code § 75500 et seq.)

2) Designates the California Public Employees' Retirement System (CalPERS) board as JRS II's board of administration. (Government Code § 75502 (h))

3) Authorizes JRS II to pay a pension allowance to a judge upon qualifying for retirement either by serving on the bench for 20 years and reaching age 65; serving on the bench 5 years and reaching age 70; or leaving the bench after serving 15 years and reaching age 60, or after serving 10 years and reaching age 65, and deferring retirement until the number of years that would have qualified them for retirement. (Government Code §§ 75522 and 75522.5)

4) Caps a judge's retirement allowance to no more than 75 percent of the judge's final compensation. (Government Code § 75522 (d)(2))

5) Requires the state to contribute monthly to a judge's personal retirement account, 18 percent of the judge's monthly salary and an additional amount credited monthly at a rate, not less than zero, equal to JRS II's annual investment return from the prior fiscal year. These monies are designated as the judge's Monetary Credits. (Government Code § 75520)

6) Allows a retiring judge to opt to receive the judge's Monetary Credits, either as a lump sum or an annuity, instead of the judge's JRS II retirement allowance.

7) Requires the state to make variable, actuarial-determined employer contributions to JRS II, currently projected to be 22.18 percent of judges' payroll for 2026-27. (Government Code § 75600.5)

8) Requires judges to make employee contributions equal to 8 percent of their monthly salary for JRS II classic members and one-half the normal cost for JRS II PEPRA members, projected to be 16.75 percent for 2026-27. (Government Code § 75601)

9) Provides a judge who does not qualify for a retirement allowance but who has served at least 5 years to receive the judge's Monetary Credits.

10) Provides a judge who does not serve 5 years an amount equal to the judge's employee contributions.

11) Provides, in the event of a judge's death, a survivor's benefit to the judge's spouse, including domestic partner. The survivor benefit available depends on if the judge died before or after retirement, and if the former, whether the judge was eligible for a service or deferred retirement. The survivor benefit is designed into the funding mechanism of the JRS II plan and does not require

the judge to opt for a reduced pension to fund it. (Government Code § 75590 et seq.)

12) Provides, in the event of a judge's death, a separate benefit from the survivor benefit, known as an optional settlement benefit which is also payable to the judge's surviving spouse. The optional settlement benefit available depends on if the judge died before or after retirement, and if the former, whether the judge was eligible for a service or deferred retirement. In contrast to the survivor benefit, if the judge chooses to provide a retirement allowance to the judge's surviving spouse under the optional settlement benefit, the judge must take a reduction in the judge's pension allowance to fund the optional settlement. (Government Code § 75571 et seq.)

13) Restricts or reduces certain JRSII benefits if the judge is divorced based on the community property rights of the judge's ex-spouse. (Government Code § 75550 et seq.)

This bill:

1) Expands beneficiary designation options under JRS II by allowing judges who retire on or after January 1, 2027, and elect specified optional retirement payment plans, to designate a beneficiary other than their spouse to receive continuing retirement benefits after the judge's death, subject to the community property rights of the judge's spouse.

2) Provides that if a nonspouse beneficiary waives the continuing benefit, the judge's retirement allowance would be restored to the amount that would have been payable had the optional settlement not been elected.

3) Specifies that these changes must be implemented on a cost-neutral basis and may not increase employer costs.

4) Expands eligibility for the survivor benefit available to the surviving spouse of a judge who dies while in office by eliminating the requirement that the judge have at least 20 years of judicial service.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Senate Appropriations Committee:

- The California Employees Retirement System (CalPERS) indicates that implementation costs would be minor and absorbable.

- This bill would increase state costs by expanding eligibility for survivor benefits and eliminating certain actuarial gains currently recognized by the Judges' Retirement System II (JRS II). According to CalPERS' most recent actuarial cost analysis, the bill would increase JRS II's accrued liability by approximately $3 million, from $2.802 billion to $2.805 billion, and reduce the system's funded status by 0.1 percentage point, from 106.5 percent to 106.4 percent. The bill would also increase the total normal cost rate by 0.07 percentage point, from 34.01 percent to 34.08 percent, resulting in a corresponding increase in the employer normal cost rate from 22.96 percent to 23.03 percent. This increase would result in additional annual employer costs of approximately $297,000 (Judges' Retirement System II Fund). The PEPRA member contribution rate would remain unchanged at 16.75 percent.

California Judges Association (source)
Judicial Council of California

OPPOSITION: (Verified 8/12/26)

None received

ARGUMENTS IN SUPPORT:

According to the California Judges Association:

"Under current law, JRS II generally permits only a spouse or registered domestic partner to receive ongoing survivor pension benefits. As a result, unmarried judges—including those with long-term partners, adult children, or other dependents—cannot designate a beneficiary to receive continuing retirement benefits following their death. This limitation is unique to JRS II; other major California public retirement systems, including CalPERS, CalSTRS, and the University of California Retirement Plan, permit the designation of non-spouse beneficiaries."

"AB 1844 modernizes the system by authorizing judges to designate a non-spouse beneficiary to receive survivor retirement benefits and by aligning survivor benefit elections with standard vesting requirements. These changes ensure that vested judges are able to protect a beneficiary in the event of death while maintaining actuarial neutrality within the system."

According to the Judicial Council of California:

“Assembly Bill 1844 ensures that all judges have the same access to survivor benefits for their loved ones on an equal basis and thereby assists the branch in recruiting and retaining a diverse and highly qualified bench. Under current law, judges who are unmarried are at a disadvantage relative to those who are married in providing support for their heirs if they outlive them.

Similarly, judges who are vested by virtue of reaching age 70 and at least 5 years of service cannot provide the same level of survivor benefit as those who are vested by reaching age 65 with 20 years of service. Assembly Bill 1844 will remedy those inequities in an actuarially neutral manner to ensure that these features of JRS II do not provide a disincentive to taking or continuing judicial service for those judges who are unable to access these survivor benefits under existing law.”

SUBJECT: Student safety: human trafficking

SOURCE: 3Strands Global Foundation
American Association of University Women of California
California Survivor Coalition

DIGEST: This bill establishes specific policies and procedures that postsecondary educational institutions must adopt to address incidents of human trafficking on campus, including providing training for employees of postsecondary educational institutions about human trafficking prevention and ensuring that all incidents of human trafficking are recorded and reported to law enforcement.

ANALYSIS:

Existing federal law:

1) Requires each eligible institution receiving federal financial assistance, as defined, to collect information with respect to campus crime statistics and campus security policies of that institution, including statistics concerning the occurrence on campus of the following criminal offenses reported to campus security authorities or local police agencies: murder, sex offenses, robbery, aggravated assault, burglary, motor vehicle theft, manslaughter, arson, and arrests or persons referred for campus disciplinary action for liquor law violations, drug-related violations, or weapons possession. This also includes crimes in which the victim is intentionally selected due to specified characteristics, domestic violence, dating violence, stalking incidents, and hazing incidents. (United States Code (USC) Title 20, Chapter 28, Subchapter IV, Part G, § 1092)

2) Establishes Title IX, providing that, in part, "no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any educational program or activity receiving Federal financial assistance." (USC Title 20, Chapter 38, § 1681 (commonly known as Title IX))

3) Outlines the required response, pursuant to Title IX, of a postsecondary higher education institution when the institution is made aware of an alleged sexual harassment incident on campus, which include a requirement for a formal complaint, a grievance procedure for an investigation into whether the incident based on a standard of evidence occurred, a hearing by which advisors are provided an opportunity to cross-examine, and a method of appealing the outcome of the grievance process. (Code of Federal Regulations (CFR) Title 34, Subtitle B, Chapter 1, Part 106, Subpart D, § 106.45)

4) Defines sexual harassment as a form of sex discrimination and as conduct on the basis of sex that satisfies at least one of the following:

   a) *Quid pro quo harassment*. An employee of the postsecondary education institution conditions aid, benefit, or services to a postsecondary education institution's education program or activity on the individual's participation in unwelcome sexual conduct.

   b) *Hostile environment harassment.* Unwelcome conduct determined by a reasonable person to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the recipient's education program or activity.

c) *Specific offenses.* Sexual assault, dating violence, domestic violence, and stalking, as defined in the USC. (CFR, Title 34, Subtitle B, Chapter 1, Part 106, Subpart A, § 106.2)

Existing state law:

1) Requires that each postsecondary educational institution, as specified, receiving public funds for student financial assistance do all the following:

   a) Require the appropriate officials at each campus to compile records of both of the following:

      i) All occurrences reported to campus police and security, and arrests for, crimes that are committed on campus that involve violence, hate violence, theft, destruction of property, illegal drugs, or alcohol intoxication.

      ii) All occurrences of noncriminal acts of hate violence, as defined.

   b) Require any written record of noncriminal hate violence to include, but not be limited to, a description of the hate violence, the victim's characteristics, and the offender's characteristics, if known.

   c) Make information concerning crimes reported pursuant to #1a to be made available within two days following the request from any student or employee of a campus, or the media, unless the information is exempt. The disclosure shall be done in a manner that does not disclose the identity of the victim without the permission of the victim.

   d) Require the appropriate officials at each campus to prepare and make available a campus safety plan.

   e) Requires the appropriate officials at each campus to report information relating to hate violence on campus; which will be made available to the appropriate governing board and the public.

   f) Requires any report made regarding a Part 1 violent crime, sexual assault, or hate crime received by campus security authorities to be immediately reported to appropriate local law enforcement agency for investigation. The reporting will be done in a manner that withholds the victim's identity unless the victim has consented to being identified.

g) Prohibits this code section from applying to institutions with less than 1,000 students or to the California Community Colleges (CCCs) unless the Legislature has made funds available for the intended purpose. (Education Code (EC) § 67380)

2) Requires the Trustees of the California State University (CSU), the Regents of the University of California (UC), and the governing boards of independent postsecondary institutions to adopt rules requiring their respective campuses to enter into written agreements with local law enforcement agencies to clarify the operational responsibilities for investigations of Part 1 violent crimes, sexual assaults, and hate crimes. This section is known as the Kristin Smart Campus Safety Act of 1998. (EC § 67381)

3) Requires the governing board of each community college district (CCD) to adopt rules requiring CCC campuses to enter into written agreements with local law enforcement agencies that clarify operational responsibilities for investigations of Part 1 violent crimes occurring on campus. Stipulates that once a governing board of a CCD adopts these specified rules requiring its campuses to update an agreement, the governing board of a CCD will be subject to the requirements of #2 instead of this section. (EC § 67381.1)

4) Requires a postsecondary educational institution—as defined, as a condition for participation in the Cal Grant Program, and by July 1, 2015—to adopt and implement written policies, and procedures to ensure that any report of a Part 1 violent crime, sexual assault, or hate crime received by campus authorities, that is made for the purpose of notifying the institution or law enforcement, is immediately, or as soon as practically possible, forwarded to the appropriate law enforcement agency. Maintains requirements for a victim's identity to be withheld unless the victim consents to disclosure. (EC § 67383)

5) States that a person who deprives or violates the personal liberty of another with the intent to obtain forced labor or services, or with the intent to effect or maintain a violation of specified sections of the Penal Code, including taking away a minor from their parent or guardian without their consent for the purpose of prostitution, is guilty of human trafficking. (Penal Code (PC) § 236.1)

6) States that a person who causes, induces, or persuades, or attempts to cause, induce, or persuade, a person who is a minor at the time of commission of the

offense to engage in a commercial sex act, with the intent to effect or maintain a violation of specified sections of the Penal Code, is guilty of human trafficking. (PC § 236.1)

This bill:

1) Requires a postsecondary institution, by July 1, 2027, to include as part of the training it provides for employees:

   a) The definition of human trafficking, including sex trafficking and labor trafficking.

   b) Myths and misconceptions about human trafficking.

   c) Physical and mental signs to be aware of that may indicate that human trafficking is occurring.

   d) Guidance on how to identify individuals who are most at risk for human trafficking.

   e) Protocols for how to report human trafficking to campus and non-campus authorities.

2) Requires a postsecondary institution, by July 1, 2027, to ensure each employee annually completed the specified training.

3) Clarifies that a postsecondary institution is not required to provide separate training for identification of human trafficking and may include the specified training in an existing employee training required by the institution.

4) Specifies that an employee of a postsecondary institution failing to report human trafficking to a postsecondary institution or to local law enforcement agencies does not, by itself, result in the liability of a postsecondary institution.

5) Requires a postsecondary institution to post and display the specified model notice on the institution's website and in a prominent location on campus.

6) Requires every postsecondary institution who receives student financial aid assistance from the state to do both of the following:

   a) Requires the appropriate officials at each postsecondary institution receiving student financial assistance to compile records on all occurrences reported to campus police, and arrests for, crimes that are committed on campus and

that involve human trafficking, in addition to other crimes for which officials are already statutorily required to compile records.

b) Require any report made by a victim or employee of a postsecondary institution of human trafficking—in addition to other crimes already specified in statute—received by campus authorities and made by the victim for purposes of notifying the institution or law enforcement, to be immediately, or as soon as practicably possible, disclosed to the local law enforcement agency with which the institution has a specified written agreement without identifying the victim, unless the victim consents to being identified after the victim has been informed their right to have their personally identifying information withheld.

7) Removes language excluding the California Community Colleges (CCCs) from disclosing and reporting specific crimes that occur on campus to the authorities and the public unless the Legislature makes funds available to the CCCs for this purpose.

8) Amends the Kristin Smart Campus Safety Act of 1998 to include human trafficking requirements and to include the community colleges as required postsecondary educational institutions. Specifically, requires the governing board or body of postsecondary educational institutions to adopt rules requiring each campus to enter into written agreements with local law enforcement for the operational clarity regarding the responsibilities of investigating of human trafficking on campus, in addition to other crimes. Clarifies the written agreements will designate which law enforcement agency will have operational responsibility for investigating each human trafficking incident, in addition to other crimes.

9) Repeals Education Code Section 67381.1 as it is no longer operationally necessary.

10) Requires each postsecondary institution, as a condition to receive state funds for student financial assistance, to adopt a policy concerning incidents of human trafficking that involve students, faculty, or staff. Requires the policy include all of the following:

a) A statement that human trafficking is a state and federal crime.

b) A statement that a conviction of human trafficking by a criminal court is a violation of the student and employee code of conduct.

c) The physical and mental signs to be aware of that may indicate that human trafficking is occurring.

d) Guidance on how to identify individuals who are most at risk for human trafficking.

e) The protocols for how to report an incident of human trafficking to local law enforcement, the appropriate campus authorities, and the contact information for national hotlines for reports of human trafficking.

11) Requires each postsecondary institution, as a condition for participation in the Cal Grant Program, adopt and implement written policies and procedures to ensure that any report of human trafficking—in addition to other crimes already specified in statute—received by campus authorities and made by the victim for purposes of notifying the institution or law enforcement, is immediately, or as soon as practicably possible, forwarded to the appropriate law enforcement agency, by July 1, 2027, instead of July 1, 2015.

12) Defines for purpose of the entire measure "human trafficking" as a violation of section 236.1 of the Penal Code.

13) Makes conforming and technical amendments to provisions of the Education Code.

Comments

Need for the bill. According to the author, "In 1972, Title IX was federally enacted to prohibit sex-based discrimination, like sexual harassment or sexual violence, in any education program receiving federal funds. While human trafficking and sexual exploitation through online platforms, social networks, recruitment or coercive relationship constitute severe forms of gender-based violations under Title IX, existing law does not require the inclusion of human trafficking in campus training and protocols."

Moreover, the author states, "Victims of human trafficking can be of any age, sex, race, ethnicity, immigration status or socioeconomic class. College students can be vulnerable to environmental risk factors such as housing instability, lack of social or familial support, or naivety to exploitive situations. Traffickers may recruit students on campus, at off campus parties, online or at local bars. A study conducted among college students on 12 Southern California campuses found that 42% of students reported having known someone who sold sex or was trafficked as a college student. … California colleges are in a unique position to reach students

who may be vulnerable to exploitation and sex trafficking due to environmental risk factors such as housing instability, lack of social or familial support, or naivety to exploitive situations. AB 1845 ensures that sexual harassment policies are updated to include human trafficking identification and prevention. Expanding existing strategies to prevent human trafficking recruitment is vital to protecting the safety of college students."

Expanding the definition of human trafficking in the Education Code by including both sex trafficking and labor trafficking. Human trafficking is not explicitly defined as one of the sexual assault crimes included within the jurisdiction of Title IX. However, the Education Code provides that "sexual exploitation" means a person taking sexual advantage of another person for the benefit of anyone other than that person without that person's consent, which may include "the trafficking of another person, defined in the inducement of a person to perform a commercial sex act, or labor or services, through force, fraud, or coercion", among other acts. This definition is specific to sex trafficking, but this bill broadens the definition of human trafficking by using a definition in the Penal Code that is inclusive of both sex trafficking and labor trafficking.

This bill establishes specific policies and procedures for postsecondary educational institutions to address incidents of human trafficking on campus. This bill expands the definition of human trafficking and clarifies processes for how colleges and universities should address human trafficking, and requires postsecondary educational institutions of the following, as a condition of receiving state financial assistance:

- Ensuring that employees complete annual training on human trafficking prevention and how to report human trafficking.

- Posting and displaying a model notice on human trafficking on the institution's website and in a prominent location on campus.

- Compiling records of all occurrences of human trafficking reported to campus authorities, and report this information to the local law enforcement agency as well as the governing board or body of the institution.

- Entering into written agreements with law enforcement agencies that clarify operational responsibilities for investigations of human trafficking.

- Adopting a policy concerning incidents of human trafficking that involve students, faculty, or staff, including a statement that human trafficking is a state and federal crime and a statement that a conviction of human trafficking by a criminal court is a violation of the student and employee code of conduct.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The California Community Colleges Chancellor's Office estimates one-time Proposition 98 General Fund costs of between $15,000 and $29,000 per district, or $1 million to $2.1 million statewide, to develop or update a policy on human trafficking. The costs for the training content are minimal since free materials from the Department of Justice (DOJ) are allowed to be used.

- The CSU estimates minor and absorbable costs for campuses to update existing staff training on sexual harassment/violence to include the required information on human trafficking. There may also be increased workload to establish or update memoranda of understanding with local police as necessary, resulting in additional, unknown costs. Further, the CSU indicates there would be minor, one-time administrative costs per campus to post the required model notices.

- The UC estimates minor and absorbable costs to update training and relevant policies.

- The DOJ anticipates no significant fiscal impact as a result of the bill.

SUBJECT: Dependency: placement of child with relative

SOURCE: Children's Law Center of California
County Welfare Directors Association
Dependency Legal Services

DIGEST: This bill clarifies that the relative placement preference for a child who is a dependent of the juvenile court extends throughout the dependency proceeding, unless and until parental rights are terminated, as specified.

ANALYSIS:

Existing law:

1) Establishes the juvenile court, which has jurisdiction over minors who are suffering or at substantial risk of suffering harm or abuse and may adjudge the

minor to be a dependent of the court. (Welfare and Institutions Code (Welf. & Inst. Code), § 300.)

2) States that it is the intent of the Legislature to preserve and strengthen a child's family ties whenever possible and to reunify a foster youth with their biological family whenever possible, or to provide a permanent placement alternative, such as adoption or guardianship. (Welf. & Inst. Code, § 16000.)

3) Requires a county to petition the juvenile court for a detention hearing, within 48 hours of placing a child in temporary custody, to determine whether a child should remain in custody and whether any specific court permissions are necessary to provide for the health and safety of the child. (Welf. & Inst. Code, §§ 313, 319.)

4) Requires a social worker, within 30 days of removing a child from the custody of their parents, to conduct an investigation in order to identify and locate any grandparents, siblings, or other adult relatives of the child, including any other adult relatives suggested by the child, and, unless a relative's history of family or domestic violence makes notification inappropriate, notify the family member of the following:

   a) That the child has been removed from their parents' custody.

   b) An explanation of the various options to participate in the care and placement of the child and support for the child's family, as specified. (Welf. & Inst. Code, § 309(e).)

5) Requires the social worker, at the initial petition hearing on a petition to make a child a dependent of the juvenile court, to report to the court on topics including whether there are any relatives who are able and willing to take temporary physical custody of the child. (Welf. & Inst. Code, § 319(b).)

6) Provides that, if the court does not order the child released from custody and returned to their parents at the hearing in 5), the court must order the temporary placement of the child; preference must be given to placement in the home of a relative, or if no relative is available, a nonrelative extended family member, as defined. (Welf. & Inst. Code, § 319(h).)

7) Requires the court, after finding that a child is a dependent of the juvenile court, to hold a hearing on the disposition of the child (the "dispositional hearing"); at this hearing, the court must determine whether to return the child to their parents' custody. If the court does not return the child to their parents' custody, the court must make additional determinations, including:

a) Where to place the child pending the possible return to their parents' custody, including a finding as to whether the social worker exercised due diligence in conducting its investigation into whether any of the child's relatives would be willing to accept placement of the child.

b) Whether to order reunification services to the parents. (Welf. & Inst. Code, §§ 358, 361.5.)

8) Requires the social worker's report to the court, filed in advance of the dispositional hearing, to include the appropriateness of any relative placement for the child and, when the child has been placed in an approved relative's home on a short-term basis, whether the relative desires and is willing to be appointed the child's legal guardian. (Welf. & Inst. Code, § 358.1.)

9) Provides that, in any case where the juvenile court removes a child from their parents' physical custody, preferential consideration shall be given to a request by a relative of the child for placement of the child with the relative, regardless of the relative's immigration status, and that the social worker and court shall consider specified factors in determining whether placement with a relative is appropriate. (Welf. & Inst. Code, § 361.3(a).)

10) Provides that, in any case in which more than one relative requests preferential consideration, each relative shall be considered; this provision does not limit a social worker's ability to place a child in the home of a relative or a nonrelative extended family member pending the consideration of other relatives who have requested preferential consideration. (Welf. & Inst. Code, § 361.3(b).)

11) Requires, following the dispositional hearing, that whenever a new placement of the child must be made, consideration for placement shall again be given as described under 9) to any relative who has not been found to be unsuitable and who will fulfill the child's reunification or permanent plan requirements; the social worker shall consider, in addition to the other factors, whether the relative has established and maintained a relationship with the child. (Welf. & Inst. Code, § 361.3(d).)

12) Requires the social worker, in advance of every status hearing to review a parent's progress toward regaining custody of their child, to include in its report to the court, for a child who does not reside with their relatives or nonrelative extended family members, information about the social worker's efforts to locate relatives or nonrelative extended family members who could potentially provide family support of a placement for the child. (Welf. & Inst. Code, §§ 366.1 & 366.21.)

13) Requires the court, in cases where parental rights have been terminated, to determine whether to place the child for adoption or to establish a legal guardian for the child; in such cases, the application of any person who, as a relative caretaker or foster parent, has cared for the child for whom the court approved a permanent plan for adoption or who has been freed for adoption, shall be given preference with respect to that child over all other applications for adoptive placement if the agency making the placement determines that the child has substantial emotional ties to the relative caretaker or foster parent and removal from the relative caretaker or foster parent would be seriously detrimental to the child's wellbeing. (Welf. & Inst. Code, §§ 366.21, 366.26.)

This bill:

1) Clarifies that the preferential consideration given to a request by a relative of the child to take custody of the child who has been removed from their parent's custody extends for the duration of a dependency matter unless and until parental rights have been terminated.

2) Requires a social worker, if a relative makes a request for placement after the dispositional hearing and until family reunification services are terminated, to assess that relative for placement, provided that the relative has not been previously assessed and found to be unsuitable, pursuant to the existing statutory factors.

3) Provides that, if a relative requests placement after the termination of reunification services, the county social worker and the court must consider all of the following factors in addition to the existing statutory factors:

   a) The child's relationship with the current caregiver.

   b) The child's progress toward permanency with the current caregiver.

   c) The child's placement preference, if found to be age- and developmentally appropriate.

4) Provides, notwithstanding 2), that if the county welfare agency has complied with family finding relative notification requirements and the relative's initial request for placement occurs after family reunification services have been terminated, the social worker may exercise discretion to conduct an initial assessment; if the social worker declines to do so, the court may order the assessment at the request of any party or the relative if the court determines that the assessment is in the best interest of the child.

5) Provides that 2)-4) do not apply if reunification services were not provided, as specified.

6) Requires a juvenile court, if it does not initially place the child with a relative who has been considered for placement, to state on the record the reasons that the placement was denied or delayed.

7) Clarifies, where the child is an Indian child, as defined, the placement of the child to comply with applicable state and federal law.

8) Requires, whenever a new placement for a child must be made, consideration for placement to again be given, using the existing order of preference and considerations, to relatives who have not been found to be unsuitable and who will fulfill the child's reunification or permanent plan requirements; in making a placement decision, the social worker shall also consider whether the relative has established and maintained a relationship with the child.

9) Clarifies that nothing in Section 361.3 of the Welfare and Institutions Code prevents the juvenile court from ordering placement with a relative following the dispositional hearing or from giving the social worker the discretion for a placement change into the appropriate home of a relative.

Comments

Research shows that a child taken from the custody of their parent, guardian, or Indian custodian will suffer fewer negative outcomes if they are placed with a trusted relative or other person with whom they have a family-like relationship, rather than with a stranger. To this end, California law establishes a relative placement reference when a child is taken into custody and declared a dependent of the juvenile court, and the child's social worker is required to make efforts to find any suitable relatives for a placement, and such relatives are given preference over any other placement alternatives.

According to the author and sponsor, there are ambiguities in the relative placement preference statutes that have led to confusion over the duration and application of the relative placement preferences. This bill is intended to clarify that the relative placement preference extends throughout a child's dependency proceeding unless and until parental rights are terminated, and that a child may be placed with a suitable relative—even if they have already been placed with a nonrelative—if the social worker or court deem the new placement in the child's best interests. This bill also clarifies that a relative requesting a placement must be assessed if the request comes prior to the termination of reunification services, and

gives the social worker or court the discretion to assess the suitability of a requested placement if the request comes after the termination of reunification services.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, the fiscal effect is as follows:

> Up to $125,000 in FY 2026-27 and up to $250,000 annually thereafter for social workers to complete the additional documentation of assessing any relative who requests placement. (General Fund)
>
> Estimated $90,000 additional funding is provided by Title IV E of the Social Security Act, with the amount of Federal Financial Participation based on the 50 percent administration rate for those cases meeting federal eligibility criteria. (federal funds)
>
> Although these county workload costs are mandated by the state, they are not reimbursable but instead must be funded by the state pursuant to Proposition 30 (2012). Proposition 30 requires legislation enacted after September 30, 2012, that has an overall effect of increasing the costs already borne by a local agency for programs or levels of service mandated by realignment to apply to local agencies only to the extent the state provides annual funding for the cost increase. (General Fund)

ARGUMENTS IN SUPPORT: According to the Children's Law Center of California, the California Welfare Directors Association, and Dependency Legal Services:

> California's statute is clear that the relative preference applies in the initial stage of a dependency case or any time a new placement must be made. While the statute does not express a time limit on the relative preference, there is some ambiguity in the law that has led to different interpretations and practices throughout the state. In some situations, the law has been interpreted to preclude the social worker from even having discretion to assess a relative for placement to determine if that placement would be in the best interests of the child(ren). This is inconsistent with the legislative intent of relative preference, and also with recent and ongoing efforts in law and policy to remove barriers and prioritize placement with kin.
>
> AB 1846 resolves these issues and aligns with significant state and county efforts to promote a kin-first culture by clarifying that the relative preference applies until family reunification services have been terminated. AB 1846 further grants the social worker or the court discretion to assess a relative if they request placement after family reunification services have been terminated. This critical legislation recognizes the positive impacts of kinship care and bolsters California's commitment to honor and prioritize keeping families together.

SUBJECT: Pupil instruction: dual enrollment: College and Career Access Pathways partnerships

SOURCE: Hispanas Organized for Political Equality

DIGEST: This bill changes the College and Career Access Pathways (CCAP) dual enrollment program by removing the requirement that participating students obtain a principal recommendation, requiring CCAP agreements to permit students to complete a single community college application for the duration of their participation, eliminating the existing limit of four college courses per term while retaining the 15-unit cap, and revising state reporting requirements to emphasize student outcomes.

ANALYSIS

Existing law:

1) Authorizes community college districts to enter into a CCAP partnership agreements with school districts, county offices of education, and charter schools to expand dual enrollment opportunities for students who may not already be college-bound or who are underrepresented in higher education. (Education Code (EC) § 76004)

2) Requires CCAP partnership agreements to be approved by the governing boards of participating entities and to include specified provisions related to courses offered, information sharing, facilities use, and student participation. (EC § 76004)

3) Requires, as part of CCAP participation protocols, parental consent and a principal recommendation, and provides that participating students need only submit one parental consent form and principal recommendation during their participation in the partnership. (EC § 76004)

4) Requires the Chancellor of the California Community Colleges to revise the special part-time student application process so that a student participating in a CCAP partnership may complete a single community college application for the duration of participation. (EC § 76004)

5) Authorizes a student participating in a CCAP partnership to enroll in up to 15units per term if specified conditions are met, provided those units constitute no more than four community college courses per term. (EC § 76004)

6) Requires participating community college districts and local educational agencies to annually report specified participation and completion data to the Chancellor's Office, including enrollment, course-taking, course completion, and full-time equivalent students (FTES) information. (EC § 76004)

This bill:

1) Deletes the requirement that CCAP participation protocols require a student to obtain a recommendation from the principal to participate in a CCAP partnership.

2) Requires CCAP partnership agreements to establish protocols authorizing participating students to complete a single community college application for the duration of their attendance as a special part-time student under the CCAP partnership.

3) Removes the existing limitation that restricts CCAP students enrolled under the 15-unit exception to no more than four community college courses per term.

4) Retains the existing 15-unit maximum per term for participating students.

5) Revises annual reporting requirements by replacing the requirement to report the total number of community college courses taken by CCAP participants with outcome-oriented measures.

6) Requires annual reporting of the total number of participating students who:

   a) Successfully complete 12 or more units of college coursework before graduation;

   b) Complete a certificate; or

   c) Complete the coursework required for an associate degree or an associate degree for transfer.

7) Requires reporting of successful course completions by instructional modality, including online and in-person coursework.

Comments

1) *Need for the bill.* According to the author, "CCAP program was established to enable high school students to take college courses at their school sites, easing logistical barriers. CCAP is an invaluable resource for high school students, setting students up for success in both their academic and professional lives. Despite the benefits of dual enrollment programs, dual enrollment participation has not been equitable for all students. According to the CCCCO, participation rates were measured at 13.9% among white students, 10.9% among Latino students, and 10.8% among the socioeconomically disadvantaged.

   "AB 1871 will ensure more equitable access to dual enrollment opportunities for all students by streamlining the application process so that a student completes only one application for the duration of their attendance at a community college as a unique part-time student participating in a CCAP agreement. This will avoid confusion of the application process and remove an unnecessary hurdle that limits access to dual enrollment opportunities. To address potential bias in application approvals, this bill will also remove the requirement that the school principal approves a student's CCAP application. Applicants from certain racial or ethnic backgrounds may be unfairly favored or discriminated against, which has led to biased outcomes in approving applications. Furthermore, this bill will eliminate the four community college courses per term limit to give students flexibility in meeting the current 15-unit

cap on dual enrollment courses. By removing this restriction, students can accumulate more college credits while still in high school, easing the transition to college and reducing future tuition costs. Lastly, AB 1871 will streamline the CCAP reporting requirements so that more outcome-driven data is collected to evaluate the program effectively."

2) *Continued legislative interest in expanding dual enrollment participation.* Over the last decade, the Legislature has made significant investments in dual enrollment as a strategy to improve college access, accelerate postsecondary attainment, and strengthen college and career pathways. Those efforts include the creation of the CCAP framework in 2015, subsequent statutory refinements, and more recent state investments through the Golden State Pathways Program and Dual Enrollment Funding Opportunity Program. Participation has grown substantially during that period, with nearly 150,000 California students participating in dual enrollment by the Class of 2024. Research consistently finds that students who participate in dual enrollment are more likely to enroll in college, accumulate postsecondary credits, and complete degrees.

   This bill continues that policy trend by focusing on administrative barriers that stakeholders argue may discourage student participation without directly advancing academic goals.

3) *Administrative streamlining versus local discretion.* Several provisions of this bill seek to simplify participation in CCAP partnerships. Requiring students to repeatedly complete community college applications and obtain principal recommendations may create additional administrative steps that vary across local partnerships. The bill therefore standardizes certain participation procedures and reduces local gatekeeping requirements.

   At the same time, the Legislature may wish to consider whether the principal recommendation requirement serves any meaningful purpose within the CCAP framework. Existing law already requires parental consent and local partnership agreements approved by governing boards. If principal recommendations are rarely used to screen students or identify readiness concerns, their removal may have little practical effect. Conversely, if some districts rely on principal recommendations as part of local student support and advising processes, the bill would reduce local discretion in favor of a more uniform statewide approach.

4) *Aligning reporting requirements with student outcomes.* Current law primarily emphasizes participation metrics, such as enrollment levels, courses taken, and course completion rates. This bill shifts part of the reporting framework toward student outcomes, including completion of at least 12 college units, certificates, and coursework leading to associate degrees or associate degrees for transfer.

   This change reflects a broader policy question regarding how the success of dual enrollment programs should be measured. While participation data remains useful for understanding access and scale, outcome measures may provide a clearer picture of whether students are progressing along meaningful postsecondary pathways. The additional data required by this bill could help policymakers evaluate not only how many students participate in CCAP partnerships, but also whether those experiences are translating into measurable academic progress before high school graduation.

5) *Course limits and accelerated pathways.* Current law allows CCAP students to enroll in up to 15 units per term but separately limits those units to no more than four college courses. Because many community college courses carry three units, the four-course restriction can effectively prevent some students from fully utilizing the 15-unit authorization.

   By removing the course-count limitation while retaining the overall unit cap, the bill creates greater flexibility for students enrolled in structured pathways designed to lead to certificates, credentials, or degree completion. The change appears intended to better align statutory course limits with the Legislature's growing interest in accelerated college and career pathways that allow students to accumulate meaningful postsecondary credit while still in high school.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

This bill could result in annual Proposition 98 General Fund costs, potentially in the hundreds of thousands of dollars, for additional state apportionments due to increased CCAP enrollment and program participation. However, the bill's exact costs would depend on the number of new students that participate and the number of courses being taken.

SUBJECT: California Indian Freedom Act of 2026

SOURCE: Indigenous Justice

DIGEST: This bill establishes a framework for California Native American tribes to exercise their religious beliefs or spiritual practices on state lands, and requires a governmental agency to obtain free, prior, and informed consent of any affected tribe before undertaking any project action on state lands that may pose a risk to sacred sites, as specified; these provisions will take effect on January 1, 2028.

Senate Floor amendments of 8/21/26 delay the operative date of the bill to January 1, 2028; provide that items of cultural, sacred, or religious significance may, as needed, be screened through technical means, and require items that cannot be admitted into specified government buildings to be stored and held for the California Indian visitor; and provide that a governmental agency may substantially burden a California Indian or California Native American tribe's exercise of religious beliefs or spiritual practice on state lands, without applying this bill's strict scrutiny standard, as necessary to protect public safety and security.

ANALYSIS:

Existing federal law:

1) Provides that, on and after August 11, 1978, it shall be the policy of the United States to protect and preserve for American Indians their inherent right of freedom to believe, express, and exercise the traditional religions of the American Indian, Eskimo, Aleut, and Native Hawaiian peoples, including, but not limited to, access to sites, use and possession of sacred objects, and the freedom to worship through ceremonials and traditional rites. (42 United States Code (U.S.C.) § 1996.)

2) Establishes the Religious Freedom Restoration Act (RFRA), which provides that a government shall not substantially burden a person's exercise of religion even if the burden results form a rule of general applicability, unless the government demonstrates that the burden is both:

   a) In furtherance of a compelling government interest.

   b) The least restrictive means of furthering that compelling governmental interest. (42 U.S.C. § 2000bb-1.)

3) Provides that 3) cannot be enforced against state and local laws. (*City of Boerne v. Flores* (1997) 521 U.S. 507, 532-536.)

4) Establishes the Religious Land Use and Institutionalized Persons Act (RLUIPA), which prohibits a government agency from implementing a land use regulation in a manner that imposes a substantial burden on the religious exercise of a person, including a religious assembly or institution, unless the government demonstrates that the imposition of that person, assembly, or institution is both:

   a) In furtherance of a compelling governmental interest.

   b) The least restrictive means of furthering that compelling governmental interest. (42 U.S.C. § 2000cc.)

5) Provides that 4) applies in any case in which:

   a) The substantial burden is imposed in a program or activity that receives federal financial assistance, even if the burden results from a rule of general applicability.

b) The substantial burden affects, or removal of that financial burden would affect, commerce with foreign nations, among the several states, or with Indian tribes, even if the burden results from a rule of general applicability.

c) The substantial burden is imposed in the implementation of a land use regulation or system of land use regulations, under which a government makes, or has in place formal or informal procedures or practices that permit the government to make, individualized assessments of the proposed uses for the property involved. (42 U.S.C. § 2000cc.)

Existing state law:

1) Gives a California Native American tribe that is on the contact list maintained by the Native American Heritage Commission certain rights with respect to land use. (E.g., Government (Gov.) Code, §§ 65902, 65351, 65352, 65352.3, 65562.5.)

2) Prohibits a public agency, or a private property using or operating public property under a public license, permit, lease, or contract made on or after July 1, 1977, from interfering with the free expression or exercise of Native American religion as provided in the United States Constitution and the California Constitution, or from causing severe or irreparable damage to any Native American sanctified cemetery, place of worship, religious or ceremonial site, or sacred shrine located on public property, except on a clear and convincing showing that the public and necessity so require. (Public (Pub.) Resources Code, § 5097.9.)

3) Provides that 2) shall not be construed to limit the requirements of the Environmental Quality Act of 1970 (CEQA) and does not apply to the public property of all cities, counties, and city and county located within the limits of the city, county, and city and county, except for all parklands in excess of 100 acres. (Pub. Resources Code, § 5097.9.)

4) Establishes the Native American Heritage Commission (Commission) within the state government. (Pub. Resources Code, § 5097.91.)

5) Establishes the powers and obligations of the Commission, which include:

a) Identifying and cataloguing places of special religious or social significance to Native Americans, and known graves and cemeteries of Native Americans on private lands.

b) Making places of special religious or social significance to Native Americans, and known graves and cemeteries of Native Americans on private lands.

c) Bringing an action to prevent severe and irreparable damage, or assure appropriate access for Native Americans, to a Native American sanctified cemetery, place of worship, religious or ceremonial site, or sacred shrine located on public property, as specified.

d) Assisting Native Americans in obtaining appropriate access to sacred places that are located on public lands for ceremonial or spiritual activities. (Pub. Resources Code, § 5097.94.)

6) Requires every state and local agency to cooperate with the Commission in carrying out its duties, as specified. (Pub. Resources Code, § 5097.95.)

7) Permits the Commission, in the event that any Native American organization, tribe, group, or individual advises the Commission that a proposed action by a public agency may cause severe or irreparable damage to a Native American sanctified cemetery, place of worship, religious or ceremonial site, or sacred shrine located on public property, or may bar appropriate access thereto by Native Americans, to conduct an investigation into the effect of the proposed action and, if the Commission finds that the proposed action would result in such damage or interference, to recommend mitigation measures to the agency; if the agency fails to accept the mitigation action, the Commission may ask the Attorney General to take appropriate legal action. (Pub. Resources Code, § 5097.97.)

8) Provides, within CEQA, that California Native American tribes traditionally and culturally affiliated with a geographic area may have expertise concerning their tribal cultural resources, and requires the lead agency, prior to the release of a declaration or environmental impact report, to begin consultation with a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project if both of the following conditions are met:

a) The California Native American tribe requested to the lead agency, in writing, to be informed by the lead agency through formal notification of proposed projects in the geographic area that is traditionally and culturally affiliated with the tribe.

b) The California Native American tribe responds, in writing, within 30 days of receipt of the formal notification and requests the consultation. (Pub. Resources Code, § 21080.3.1.)

This bill:

1) Establishes the California Indian Freedom Act of 2026 (the Act).

2) Makes findings and declarations relating to the long history of Native Nations within California, the history of government policies in California intended to exterminate or culturally erase Indigenous groups, including through the suppression of religious and spiritual practices, and the lack of state laws protecting Indigenous religious freedom.

3) Exempts, from the disclosure requirements of the CPRA, information identifying sacred sites, cultural landscapes, or religious practices of California Native American tribes.

4) Defines the following relevant terms:

   a) "California Indian" means a Native American who is a member or citizen of a California Native American tribe.

   b) "California Native American tribe" means a Native American tribe located in California that is on the contact list maintained by the Native American Heritage Commission.

   c) "Consultation" has the same meaning as in CEQA.

   d) "Cultural landscape" means a geographical area on state lands that includes cultural and natural resources associated with the spiritual and cultural practices of a California Native American tribe.

   e) "Exercise of religious beliefs or spiritual practices" means any tribal practice undertaken as part of California Indian religious, spiritual, or sacred observance, whether or not compelled by, or central to, a system of religious beliefs, as specified.

   f) "Governmental agency" means any state agency, department, board, or commission.

   g) "Least restrictive means" shall be interpreted consistent with strict judicial scrutiny jurisprudence of California.

h) "Sacred site" means any specific location, landscape, landform, waterbody, or area on state lands that is both (1) historically, culturally, or spiritually significant to a California Indian or tribe; and used, or has historically been used, for religious, ceremonial, or cultural purposes.

i) "State lands" means lands owned by the state or any state agency, excluding lands owned by, or under the jurisdiction of, any city, county, or district; but does not include private lands or lands used for public infrastructure or services, or authorized for private use or development.

j) "Substantial burden" mans any government action or policy that occurs on or after January 1, 2027, excluding routine administrative procedures, minor restrictions, or actions that do not materially prevent or significantly interfere with a California Indian or tribe's exercise of religious beliefs or spiritual practices, that does any of the following:

   i) Significantly restricts, denies, or unreasonably interferes with gathering or collecting traditional foods and plants used in ceremonies, including funerals, feasts, and celebrations on state lands.

   ii) Denies or unreasonably restricts access to sacred sites, ceremonial grounds, or other locations of religious or spiritual significance on state lands.

   iii) Destroys, desecrates, materially alters, or otherwise interferes with sacred sites, cultural landscapes, or ceremonial items on state lands in a manner that prevents or substantially impedes the practice of sincerely held religious or spiritual beliefs.

   iv) Restricts items of cultural, sacred, or religious significance, including, but not limited to, regalia, headdresses, eagle feathers, traditional medicines, gourd rattles, or other ceremonial items, when entering state government buildings; these items shall be permitted and, whenever possible, may be inspected only by hand or through other nontechnological means, and shall not be inspected by technological screening. At the request of a California Indian visitor to the State Capitol Building, the State Capitol Building Annex, or the State Capitol O Street Building, any item, including cultural or religious artifacts, that cannot be admitted into a secure facility for security reasons shall be stored and held for the convenience of the visitor until it can be collected.

5) Provides that a governmental agency shall not substantially burden a California Indian or California Native American tribe's exercise of religious beliefs or spiritual practices on state lands, except as necessary to protect public safety and security, including their access to, and use of, sacred sites or objects, and their ability to perform religious ceremonies and rites, even if the burden results from a rule of general applicability, unless the governmental agency demonstrates that the application of the burden is (1) in furtherance of a compelling governmental interest, and (2) the least restrictive means of furthering that interest.

6) Provides that a California Indian or tribe shall have standing and may assert a violation of 5) as a claim or defense in any judicial or administrative proceeding, and may obtain declaratory or injunctive relief.

7) Provides that a prevailing party asserting a claim under the Act is entitled to reasonable attorney's fees and costs, and any other equitable remedies determined by the court.

8) Requires a governmental agency to allow California Indians access to sacred sites on state lands for Native American religious, ceremonial, or cultural activities, except where public safety or resource protection makes access impossible.

9) Requires, consistent with Articles 11, 12, 25, and 32 of the United Nations Declaration on the Rights of Indigenous Peoples (UNDRIP), a governmental agency to seek and document free, prior, and informed consent of any affected tribe before undertaking any project action on state lands that may pose a risk to sacred sites of which the agency has actual knowledge or has been formally notified that may result in any of the following:

   a) Physical destruction or alteration of a sacred site.

   b) Loss of access, privacy, or quiet use.

   c) Long-term environmental degradation affecting religious and spiritual practices.

10) Requires the affirmative consent required under 9) to be in writing from the governing body of the affected tribe, subject to the following:

   a) If a tribe does not respond within a reasonable timeframe designated in the request, then the governmental agency may interpret the lack of response as a grant of request.

b) If a tribe responds to a request for consent by objecting to the undertaking, the governmental agency may request consultation with the tribe to see if issues raised by the tribe can be addressed.

11) Provides that information identifying sacred sites, cultural landscapes, or religious practices obtained by a governmental agency for the purposes of the Act shall be confidential and exempt from public records laws, including the CPRA.

12) Requires the Department of General Services (DGS), in coordination with the Capitol Protective Section, to the greatest extent possible, to uphold the religious freedom, ceremonial practices, sacred sites, cultural patrimony, and cultural landscapes of tribes when accessing the State Capitol Building Annex and grounds.

13) Requires the Capitol Protective Section, to the greatest extent possible, to avoid undue harm when handling tribal instruments and regalia.

14) Provides that nothing in the Act shall be construed to limit or restrict the authority of the state or any state agency to enter into an agreement, memorandum of understanding (MOU), or other arrangement with any tribe to allow access to any state lands for the purpose of conducting religious, cultural, or ceremonial practices.

15) Provides the following with respect to the Act:

a) The application of the Act is strictly limited to a governmental agency's management actions that involve only state lands, regardless of whether this limitation is specified in any provision in the Act.

b) The Act has no application to any actions or direct or indirect effects arising out of, pertaining to, or relating to, lands that are not state lands.

c) To the extent there is a conflict between these provisions and any other provision of the Act, these provisions shall control.

16) Provides that the Act shall become operative on January 1, 2028.

17) Includes a severability clause.

Comments

California has the highest population of Native Americans in the United States. California's over 100 Native Nations are an essential part of California, each with

their own religions, spiritual traditions, and ceremonies that predate statehood. Unfortunately, colonization and California's early policies toward Native Americans disrupted centuries-old religious practices for many California Native American tribes. Many sacred sites and other locations of religious significance are located on what is now state-owned lands, and current law does not reliably protect California Native American tribes' ability to practice their spiritual and cultural practices free from state interference.

This bill establishes the California Indian Freedom Act of 2026 to ensure that California Native Americans have access to traditional sacred sites and are not unduly denied the right to exercise their religious beliefs and engage in spiritual practices on state public lands. This bill specifically prohibits state agencies from substantially burdening California Native American tribal religious practices, as defined, on state lands, except as necessary to protect public safety and security, unless the burden is the least restrictive means of achieving a compelling state interest, also known as the "strict scrutiny" standard. This bill also requires a state agency to seek free, prior, and informed consent from any California Native American tribe whose sacred sites will be affected by an agency's project on state lands, provided that the agency has actual knowledge of the site. This bill's provisions will become operative on January 1, 2028.

From a constitutional standpoint, it appears that this bill is within the state's authority to regulate relations with Indian tribes consistent with federal guidance. Opponents of this bill, however, are concerned that the bill's provisions could harm the ability to deliver water throughout the state.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the fiscal effect is as follows:

> Ongoing workload costs, potentially in the millions of dollars annually, across state agencies with jurisdiction over state public lands, including the Department of Parks and Recreation, State Lands Commission, Department of Water Resources, Department of Fish and Wildlife, Caltrans, and the University of California and California State University systems, to conduct expanded tribal consultation, seek and document written consent where required, screen records for new Public Records Act exemption findings, and develop implementation procedures. (General Fund and various special funds.)
>
> Major cost pressure on the courts to adjudicate additional filings. Actual costs will depend on the number of cases filed and the amount of court time needed to resolve each case. Although courts are not funded on the basis of workload,

increased pressure on the Trial Court Trust Fund may create a demand for increased funding for courts. The FY 2025–27 Budget provided $70 million General Fund to backfill the Trial Court Trust Fund to offset revenue reductions.

ARGUMENTS IN SUPPORT: According to Indigenous Justice:

AB 1881 strengthens protections for Tribes' religious and spiritual practices by ensuring that the state cannot interfere with their ability to practice their traditions. This bill recognizes tribes' deep connections to the land and natural resources, which are central to tribal identity and community, and affirms that these connections are inseparable from their spiritual and religious practices.

These protections must include the ability of tribal members to access their sacred sites without unnecessary barriers. These places are not simply historic locations, but living spaces where prayer, teaching, and responsibilities to the land continue every day. When access is restricted, it disrupts the continuation of these practices and harms the cultural and spiritual wellbeing of tribal communities.

Equally important is the freedom to gather the traditional materials needed for ceremonies. Many require certain plants, foods, water sources, and other natural elements that cannot simply be replaced or collected elsewhere. Protecting the right to gather these materials freely is essential to keeping these traditions alive.

AB 1881 also affirms the right of tribal members to carry traditional instruments, regalia, and sacred items without being questioned or stopped. These items are part of spiritual practices, and the ability to transport them safely and without interference is an important component of religious freedom.

ARGUMENTS IN OPPOSITION: According to a coalition of this bill's opponents:

The California Environmental Quality Act (CEQA) provides a framework for the assessment of environmental impacts from projects that require discretionary action and provides for public disclosure of those environmental impacts, including proposed mitigation measures and project alternatives as part of the overall project analysis. Lead agencies must follow a formal process for early government-to-government consultation with California Native American tribes traditionally and culturally affiliated with the geographic area of a proposed project as part of the environmental review process under CEQA.

This bill would create a duplicative path for tribal consultation outside of the CEQA process and set standards that could result in projects not moving forward. Such provisions like requiring a government agency to "seek and document free, prior, and informed consent from an affected tribe for any project" could drastically constrain projects, including those necessary to modernize water infrastructure in the face of a changing climate. This shift from consultation to mandating consent marks a fundamental change in California land use law and could effectively grant a single tribe the power to halt or indefinitely delay any project—including projects that have already undergone extensive environmental review and received all other required approvals.

SUBJECT: Workplace surveillance tools

SOURCE: California Federation of Labor Unions

DIGEST: This bill regulates the use of specified workplace surveillance tools.

Senate Floor amendments of 8/21/26 apply the provisions to employees, as defined, rather than "workers," add and revise various definitions, and make various technical and conforming changes.

ANALYSIS:

Existing law:

1) Provides, pursuant to the California Constitution, that all people have inalienable rights, including the right to pursue and obtain privacy. (California Constitution (Cal. Const.), art. I, § 1.)

2) Establishes the California Consumer Privacy Act (CCPA), which grants consumers certain rights with regard to their personal information, including enhanced notice, access, and disclosure; the right to deletion; the right to restrict the sale of information; and protection from discrimination for exercising these rights. It places attendant obligations on businesses to respect those rights. (Civil (Civ.) Code § 1798.100 et seq.)

3) Requires a business that collects a consumer's personal information to, at or before the point of collection, inform consumers of the categories of personal information to be collected and the purposes for which the categories of personal information are collected or used. (Civ. Code § 1798.100(a).)

4) Grants a consumer the right to request that a business that collects personal information about the consumer disclose to the consumer the following:
   a) the categories of personal information it has collected about that consumer;
   b) the categories of sources from which the personal information is collected;
   c) the business or commercial purpose for collecting, selling, or sharing personal information;
   d) the categories of third parties with whom the business shares personal information; and
   e) the specific pieces of personal information it has collected about that consumer. (Civ. Code § 1798.110.)

This bill:

1) Prohibits an employer from using a "workplace surveillance tool" that uses AI on employees for either of the following:
   a) Recognizing, or making inferences or predictions about, an individual's emotional state.
   b) Collecting neural data.

2) Defines "workplace surveillance tool" as any system, application, instrument, or device that collects or facilitates the collection of employee data, activities, communications, actions, biometrics, or behaviors by means other than direct observation by a person, including video or audio surveillance, continuous incremental time-tracking tools, geolocation, electromagnetic tracking, photoelectronic tracking, or that utilizes a photo-optical system or other means.

3) Provides for civil enforcement by the Labor Commissioner and public prosecutors. Such petitioners may bring a civil action seeking civil penalties, appropriate temporary or preliminary injunctive relief, including punitive damages, and reasonable attorney's fees and costs, in addition to other specified remedies.

4) Authorizes the Labor Commissioner, in addition to the above civil action, to further enforce this part, including by investigating an alleged violation, and ordering appropriate temporary relief to mitigate a violation or maintain the status quo pending the completion of a full investigation or hearing, including issuing a citation against an employer in violation, as specified.

5) Provides specified exemptions.

Background

Workplace surveillance technology has expanded dramatically in recent years, evolving from basic security cameras and badge access systems to sophisticated digital monitoring tools that track virtually every aspect of employee activity. These tools may provide benefits to employers in the form of increased productivity and security. However, they raise serious concerns about their impact on privacy and worker organizing; the psychological effects on workers; and when decisions are based on automated performance metrics, issues of algorithmic bias and unfairness.

This bill regulates employers use of "workplace surveillance tools," specified tools that collect or facilitate the collection of employee data, activities, communications, actions, biometrics, or behaviors by means other than direct observation by a person. This includes video or audio surveillance, continuous incremental time-tracking tools, and geolocation. Employers are prohibited from using a workplace surveillance tool that uses AI on employees for analyzing emotional state or collecting neural data.

This bill is sponsored by the California Federation of Labor Unions. It is supported by a large coalition of labor organizations and advocacy groups, including the State Building and Construction Trades Council of California. It is opposed by a coalition of governmental associations and industry groups, including the League of California Cities. For a more thorough discussion of this bill, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis, which is incorporated herein by reference.

Comments

According to the author:

> Workplace surveillance has evolved into highly invasive systems that track worker movements and collect massive amounts of data. Current laws fail to protect workers from these practices. AB 1883 will prohibit the use of invasive surveillance systems in the workplace, systems that pose profound risks not just to employee privacy but also to unaccountable discrimination. It also prohibits the use of surveillance tools to infer protected and personal information about workers, including immigration and health status, and the likelihood of unionizing or speaking up against workplace violations.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Estimated $2.6 million in FY 2026-27, $2.5 million annually thereafter to the Division of Labor Standards Enforcement within the Department of Industrial Relations. The Labor Commission, as chief of the DLSE, enforces wage laws and retaliation laws whereas this bill will require regulating employer conduct. (Labor Enforcement and Compliance Fund)

Potentially significant costs to the courts to adjudicate new penalties depending on the numbers of employers charged and the factors unique to each case. An eight-hour court day costs approximately $10,500 based on the hourly rate of court personnel including at minimum the judge, clerk, bailiff, court reporter, jury administrator, administrative staff, and jury per-diems. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources. The FY 2026-27 Budget appropriated $70 million General Fund for this purpose (Trial Court Trust Fund, General Fund).

Likely minor, if any, costs to state entities found using workplace surveillance tools for prohibited purposes. (Special funds, General Fund)

ARGUMENTS IN SUPPORT: A large coalition of labor organizations and advocacy groups, including the California Teachers Association, writes:

Employers have used surveillance to monitor, manage, and control workers for decades. However, today's employers now have access to a plethora of AI enabled surveillance tools capable of analyzing a worker's gait, neural activity, emotional state, and face. AI enabled surveillance differs from traditional video and audio monitoring in several ways. For one, these tools strip workers of their biometric data, essentially committing a full-scale invasion of workers' physical, mental, and emotional space at all hours of the day. Rather than requiring a human to monitor live surveillance feeds, today's tools utilize active AI monitoring that are capable of monitoring workers with zero interruptions. Heart rate, perspiration, facial expressions, and eye movements are tracked and used as data points to target "unproductive" workers and to "minimize risk" in the workplace.

AI tools rely on black-box algorithms to surveil workers. Data from emotion recognition, neural sensors, and facial and gait sensors are not just observations, but analysis of the data collected. Not only is that data potentially unreliable, but it can have bias built in, further exacerbating discrimination and inequities. For example, tools that utilize emotion recognition technology may very well fail to understand cultural nuances of expression and may be trained on biased information that inaccurately tags certain forms of speech as "aggressive" or "inappropriate." Similarly, facial recognition has a long history of failing to accurately recognize people of color, thus automating discrimination on a massive scale.

In order to protect workers from unregulated forms of military grade surveillance technology, AB 1883 prohibits employers from deploying gait, emotional, and neural recognition technologies in the workplace. AB 1883 also sets guardrails on the use of facial recognition technology by prohibiting employers from using the

technology to make inferences to fire, discipline, or deactivate a worker. AB 1883 also prohibits employers from using any surveillance tool to infer personal and sensitive information of a worker such as their immigration status, gender identity, or sexual orientation and if a worker is exercising their protected rights. Lastly, the bill prohibits the use of any AI tool that prevents compliance with or violates any federal, state, or local labor, occupational health and safety, employment, or civil rights laws or regulations.

ARGUMENTS IN OPPOSITION: A large coalition of associations representing public employers, including the California State Association of Counties, writes:

We have fundamental concerns with this and other bills that aim to restrict how public agencies can use the tools defined as "workplace surveillance tools," which we believe are essential and, in many cases, routine tools used for security.

- We oppose any legislation that will compromise health, safety, and security for our employees, the public we serve, and our officials.
- We oppose any legislation that compromises our ability to conduct investigations into fraud, waste, or abuse.
- We do not believe it is appropriate to regulate tools used for security and basic operations in response to private sector labor concerns. State law has protected the right of public employees to bargain and most public employees have a property interest in their position that is protected by due process.

AB 1883 would impose several rules on how public agencies may use surveillance tools – a term that is vast in its application, including video cameras, ID badge or key fob access, digital workplace messaging collaboration platforms (e.g. Microsoft Teams or Slack), and a wide array of tools used to keep workplaces safe, conduct essential government services, and protect against abuse, fraud, and waste of public resources.

We understand the reasonable concerns one could have about the rapid integration of surveillance tools into every aspect of daily life, particularly as new technologies emerge. However, we are concerned that this bill and others aimed at limiting workplace technology are too broad, too expensive, and too dangerous for public agencies and those we serve.

SUBJECT: Prescription drug coverage for rare diseases

SOURCE: California Chronic Care Coalition

DIGEST: This bill (1) requires prior authorization for prescription drugs prescribed for the treatment of a rare disease to be completed within 30 days of the initial request by a provider if the drug is the only U.S. Food and Drug Administration-approved treatment for the rare disease; and (2) requires approval of the prescription if the 30-day timeline is not met due to an unresolved decision or dispute.

Senate Floor Amendments of 8/21/2026 clarify that this bill does not affect the timelines required for prescription drug prior authorization in current law and add the appropriate cross-references.

ANALYSIS:

Existing law:

1) Establishes the Department of Managed Health Care (DMHC) to regulate health plans under the Knox-Keene Health Care Service Plan Act of 1975 and the California Department of Insurance (CDI) to regulate health and other insurance. [Health & Safety Code (HSC) §1340, et seq. and Insurance Code (INS) §106, et seq.]

2) Requires health plans and insurers that perform utilization review (UR) or utilization management (UM) functions, or who delegate these functions to other contracting providers, to make decisions to approve, modify, or deny, a health service in a timely fashion appropriate for the enrollee's/insured's condition, as specified. [HSC §1367.01 and INS §10123.135]

3) Requires DMHC and CDI to require health plans and insurers to establish and maintain a prior authorization application programming interface for enrollees/insureds and contracted providers. [HSC §1374.196 and INS §10133.12]

4) Requires a health plan or insurer to accept only a standardized prior authorization form developed by DMHC and CDI, or an electronic prior authorization process when requiring prior authorization for prescription drugs. [HSC §1367.241 and INS §10123.201]

5) Requires a prior authorization exception to be deemed granted if a health plan or insurer fails to respond, within 72 hours upon the receipt of a completed form, or within 24 hours if exigent circumstances exist. Defines "exigent circumstances" as when an enrollee/insured is suffering from a health condition that may seriously jeopardize their life, health, or ability to regain maximum function, or when an enrollee/insured is undergoing a current course of treatment using a nonformulary drug. [HSC §1367.241 and INS §10123.191]

6) Excludes, from health plan or insurer prior authorization requirements, covered health care services that have been approved by the plan/insurer 90% or more times, as determined by DMHC or CDI after reporting and evaluation. Excludes specified services, including outpatient drugs on tier three or tier four of a formulary. Sunsets on January 1, 2034. [HSC §1367.025 and INS §10133.52]

This bill:

1) Defines "rare disease" as a disease that affects fewer than 200,000 people in the U.S.

2) Requires a health plan or insurer to complete prior authorization within 30 days upon the initial request for a prescription approved by the U.S. Food and Drug

Administration (FDA) for the treatment of a rare disease if the drug is prescribed by a specialist with expertise in the condition or disease being treated, the specialist has determined the drug is medically necessary, and the drug is the only FDA-approved treatment for the rare disease.

3) Requires the prior authorization to be immediately approved if, at the end of the 30-day period, a decision to approve or deny the prior authorization has not been made or a dispute between the plan and provider or enrollee is ongoing.

Background

According to the author of this bill:

> Families living with rare diseases in California often spend years searching for a diagnosis and an effective treatment, only to be forced to "fail first" on less appropriate therapies or wait weeks or months for prior authorization from their health plan before they can start the one FDA-approved drug that can slow or stop their condition. These insurer-imposed delays are unnecessary when a specialist has prescribed an FDA approved therapy based on medical necessity, and in some cases, they are reckless and life threatening. This bill aims to address this by accelerating prior authorization for rare disease treatments when prescribed by an appropriate specialist based on medical necessity. California is a global leader in rare disease research and innovation; this bill ensures that the people who rely on these breakthroughs can access them without bureaucratic obstacles, improving health outcomes and quality of life for some of our most vulnerable residents.

Rare diseases and treatment. According to the National Human Genome Research Institute (NHGRI), and as defined in the federal Food, Drug, and Cosmetic Act, rare diseases are those that affect fewer than 200,000 people in the U.S. There are over 7,000 rare diseases, according to the California Center for Rare Diseases at UCLA, including diseases like cystic fibrosis, Huntington's disease, Duchenne muscular dystrophy, phenylketonuria, and sickle cell disease. According to the NHGRI, about 80% of rare diseases are genetic. Because many rare diseases are genetic, approximately 75% of rare diseases manifest during childhood, and 50% of patients with rare diseases are children, according to a 2025 review in *ACR Open Rheumatology*.

The Orphan Drug Act of 1983 created an orphan drug designation that offers financial incentives for pharmaceutical manufacturers to invest in research and development for rare diseases, which, by definition, have a small market.

According to a 2024 policy brief from the Congressional Research Service, since the enactment of the Orphan Drug Act, over 500 rare disease drugs have been approved. About 5% of rare diseases have an FDA-approved drug, according to a 2023 study in the *Orphanet Journal of Rare Diseases*, and up to 15% have least one promising drug candidate in the pipeline for treatment, diagnosis, or prevention.

Prior authorization in California. Prior authorization is a form of UR or UM in which the payer grants permission for the use of the medication after the clinician prescribes it, before the patient can begin treatment. For prescription drugs, state-regulated health plans and insurers must use a standardized prior authorization form and decide requests within 72 hours (or 24 hours for urgent cases), or the request is automatically approved. If additional information is needed, the plan must notify the provider within those same timeframes or the request is deemed approved. Once the missing information is received, the 72- or 24-hour review period restarts. If no decision or request for more information is provided within the required timeframe, the prior authorization is approved for the full prescription, including refills. Denials must include notice to the provider and enrollee/insured of an external appeals process. Because rare disease drugs are specialty drugs, virtually all of them require prior authorization.

Exemption from SB 306. Concerns about prior authorization's effectiveness, administrative burden, and patient outcomes led the Legislature to pass SB 306 (Becker, Chapter 408, Statutes of 2025), which, beginning in 2028, eliminates prior authorization for services that receive approval at least 90% of the time, as determined by DMHC and CDI. Specialty outpatient drugs on Tier 4 of a drug formulary, like those for rare diseases, are exempt from the SB 306 process.

California Health Benefits Review Program (CHBRP) analysis. Key findings include:

- *Coverage impacts and enrollees covered*. CHBRP estimates that 13.8 million Californians (36.2% of the state) have CDI- and DMHC-regulated insurance subject to this bill. Medi-Cal managed care plans are excluded from this bill.
- *Medical effectiveness.* CHBRP did not find any literature on the impacts of UM on the use of prescription drugs for rare diseases. However, there is some evidence that UM leads to delays in access to prescription drugs to treat non-rare diseases, causing delays in the initiation of prescription drug treatment ranging from an average of four to 44 days. Furthermore, there is some evidence from retrospective studies that UM for prescription drugs for non-rare diseases are related to unnecessary hospitalizations, emergency department visits, and increased morbidity resulting from delays in prescription drug

treatments. Lastly, CHBRP found conflicting evidence on the impact of UM on denials of prescription drug treatments for non-rare diseases.

- *Utilization*. CHBRP estimated that the removal of UM would result in 8,200 people starting an additional 17,000 new prescriptions for a medication to treat a rare disease within a plan benefit year, increasing utilization of small-molecule drugs by 4% for those drugs available at the pharmacy and by 8% for those administered by a physician. Utilization of biologics is estimated to increase by 2% for those available through the pharmacy and 2% for those administered by a physician.
- *Medi-Cal.* This bill does not apply to Medi-Cal plans.
- *Impact on premiums.* Eliminating an estimated 60-day delay for new rare disease prescriptions is estimated to increase total annual premiums by $148 million, with $96.1 million paid by employers and $51.7 million paid by enrollees/insureds. Average annual enrollee/insured premiums are estimated to increase by between $1.49 and $10.69, depending on the insurance market, with the largest increase in the individual market.
- *Impact on cost-sharing.* Because this bill is expected to provide two additional 30-day prescriptions per year for affected enrollees/insureds, cost-sharing for those taking those drugs will increase. The annual average cost-sharing for those with drugs subject to this bill is expected to increase by $900 to $1,200, depending on the insurance market, with the largest cost-sharing increases in the individual market.
- *Essential health benefits (EHBs).* Because this bill does not require coverage for any additional prescription drugs, it does not exceed the current definition of EHBs in California.
- *Public health.* CHBRP estimates no measurable population-level public health impacts of this bill, although there may be meaningful quality-of-life improvements for the individuals with rare diseases who would be able to access their treatments sooner, and for clinicians, patients, and families who would be able to avoid protracted prior authorization processes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, there are unknown and likely minor ongoing costs for DMHC and CDI for state administration, as well as unknown ongoing General Fund costs, potentially in the low millions, due to increases in CalPERS plan premiums.

OPPOSITION: (Verified 8/21/26)

Association of California Life & Health Insurance Companies
California Association of Health Plans
California Chamber of Commerce

ARGUMENTS IN SUPPORT: The California Chronic Care Coalition (CCCC), the sponsors of this bill, share that many rare disease patients see an average of 17 providers over more than six years before receiving an accurate diagnosis, and the avoidable costs associated with those delays range from $86,000 to $517,000 per patient. The CCCC states that this bill stops prolonged review from standing between a patient and the treatment a specialist has already determined is medically necessary, and many other patient advocacy and disease research groups agree that this bill offers a targeted solution to protect access to rare disease therapies while allowing plans to apply UM controls in situations where true alternatives exist. Many groups share specific examples of difficulties accessing treatments. The Dravet Syndrome Foundation shares that access to the three approved medications for the disease is limited by prior authorization and step therapy requirements, which may result in increased seizure activity, emergency hospitalizations, and long-term impacts. The Hemophilia Foundation of Southern California shares that they have heard directly from families who have had to postpone or miss treatments while waiting for approvals—putting their health, mobility, and quality of life at risk. The ALS Association writes that many patients continue to face significant barriers to accessing the first FDA-approved treatment for a rare and particularly aggressive form of ALS, including prior authorization delays, repeated requests for additional documentation, coverage denials, and lengthy appeals processes. Provider groups state that patients face long diagnostic journeys and uncertainty, and additional administrative delays can lead to disease progression, avoidable complications, and interruptions in care. A provider from the National Association of Pediatric Nurse Practitioners states that it is frustrating to see pediatric patients go weeks without enzyme replacement infusions due to delayed prior authorization. Lastly, The Rare and Ready Coalition and Little Legs Big Heart Foundation supports the bill but also asks the Committee to consider an amendment removing prior authorization requirements for patients age 18 and under.

ARGUMENTS IN OPPOSITION: The Association of California Life and Health Insurance Companies (ACLHIC) and California Association of Health Plans (CAHP) oppose the $148 million projected increase in health insurance premiums, particularly given that health plans already cover these medications. They also oppose this bill's 30-day review period for prior authorization requests,

arguing that because prior authorization requests for rare disease treatments are typically used as a verification tool rather than a mechanism to deny care, the language around automatic approval should be removed to avoid setting a precedent of preferential treatment for one class of expensive drugs. CAHP/ACLHIC also point out that because this bill does not require a provider's request to be complete or to include all clinically necessary information before the clock begins, it may not hold all parties equally accountable for ensuring patients receive safe and appropriate care. The California Chamber of Commerce also opposes the bill due to the impacts on insurance premiums for employers and employees. They highlight that employer health care premiums are estimated to increase by over $96 million per year, and the largest increases will be seen in small-group (small businesses with fewer than 51 employees) and individual markets. These must also be viewed in the context of consistent increases year after year, partially due to benefit mandates. They share that the average premium for family coverage has increased 20% over the five years prior to the publication of the 2022 Kaiser Family Foundation Employer Health Benefits Survey.

SUBJECT: County of Napa: farmworker housing: funding

SOURCE: Napa County

DIGEST: This bill increases the amount of funding the Department of Housing and Community Development (HCD) awards to the Napa County Housing Authority's (NCHA) farmworker centers from $250,000 to $500,000, annually.

ANALYSIS:

Existing law:

1) Establishes the Napa County Farmworker Centers Account (NCFCA) to be administered by HCD through its Office of Migrant Services (OMS) and requires HCD to administer the program.

2) Provides that funds provided to NCHA are to assist in financing, maintenance, and operation of the Napa County farmworker centers for year-round use by migrant and nonmigrant farm labor employees.

3) Grants the NCHA continued ownership and operation of farmworker centers pursuant to the local ordinances, regulations, or bylaws currently applicable.

4) Awards up to $250,000 in matching funds to the NCHA upon demonstration that the NCHA is capable of continuing to effectively serve the housing needs of Napa's farmworkers.

5) Requires that the NCHA provide equal or greater funds from local sources to support financing, maintenance, and operations of housing in order to be eligible for NCFCA funding.

6) Requires the NCHA to demonstrate its capability of ensuring the fiscal integrity of the farmworker centers and maintaining the projects in a decent, safe, and sanitary manner for at least 25 years.

7) Allows year-round use of farmworker centers to be interrupted, if necessary, in order to perform maintenance purposes, to allow new migrant farmworkers to obtain housing, or for any other purpose the NCHA deems necessary.

8) Authorizes Napa County to form a county service area fund for the construction and maintenance of farmworker housing centers.

9) Levies $10 annually per planted vineyard acre on the agricultural industry to support the three Napa farmworker centers.

10) Assists agricultural communities with the development, construction, reconstruction, rehabilitation, and operation of migrant farm labor centers through HCD's OMS Centers Program.

11) Establishes the Joe Serna, Jr., Farmworker Housing Grant Program (Serna Program) at HCD to fund the new construction, rehabilitation, and acquisition of housing for farmworkers.

This bill:

1) Increases the amount of funding HCD awards to NCHA farmworker centers from $250,000 to $500,000, annually.

2) Provides that funding for this program and policy changes made in this bill is contingent upon an appropriation by the Legislature in the Budget.

3) Provides that funding provided to NCHA shall not be used to house H-2A workers, and any employer that utilizes Napa County farmworker centers to house H-2A workers is required to reimburse the state for the cost.

Comments

1) *Author's statement. "*Farmworkers work in the hardest jobs in Napa County's agricultural economy and play a vital role in its success. But many face limited access to affordable housing. Napa County's farmworker housing centers are a model for partnerships between employers, government and workers, with subsidies provided by the county and self-assessments on farmers. They provide an important resource by offering low-cost housing and support services for agricultural workers in a region with severe housing shortages. AB 1890 builds on the framework established under AB 317 by extending and increasing the state's authorized matching funds, addressing rising operating costs and supporting the continued operation of these centers. While the centers are located in Napa County, the agricultural workforce they serve contributes to an industry that is critical to the regional and statewide economy. By sustaining stable housing for farmworkers, AB 1890 helps strengthen California's agricultural workforce and support the broader food production system."

2) *Napa Farmworker Housing*. Napa County's economy is based largely on its $1 billion agriculture industry, the value of which arises almost exclusively from its wine grape crops. This creates a massive demand for farmworkers in the county, and a related need for housing to support these migrant workers. Farmworkers frequently face significant barriers to accessing stable and affordable housing, particularly in regions like Napa County, where housing costs are high and supply is limited.

   To address the housing needs of the farmworker workforce, Napa County operates farmworker housing centers that provide dormitory style housing to migrant farmworkers. Napa County's farmworker centers are different from the other farmworker centers in California. HCD operates the Office of Migrant Services (OMS) program, which manages state-owned farm worker housing centers that provide family-style units that are open 270 days each year. In comparison, Napa County's centers are dorm-style operations that cater to single male residents. Napa County operates three farmworker centers, totaling 180 beds, serving an average of 400 farmworkers during the eleven months of the year that each is open. Housing consists of dorm-style accommodations with two renters per room, and lodgers receive food, hot showers, laundry

facilities, a library, and internet access on-site. The center also provides opportunities to participate in community gardens, health screenings, and literacy programs. Farmworkers tend to have lower incomes, higher risk of living in poverty, and limited access to safe, healthy, and affordable housing choices.

In 2001, AB 1550 (Wiggins, Chapter 340) authorized Napa County to form a county service area (CSA) to raise funding for the purpose of acquiring, constructing, leasing, or maintaining farmworker housing. The Napa County Board of Supervisors (BOS) adopted an ordinance in 2002 to create CSA No. 4, and, with the approval of the affected property owners, levied a $10 assessment per acre of planted vineyard. AB 1550 limited the original assessment levied by CSA No. 4 to a five-year period but authorized the BOS to seek an extension of the assessment every five years thereafter. In 2017, SB 240 (Dodd, Chapter 72), increased the assessment to $15 per acre. This private assessment, now at $14 per acre, generates approximately $650,000 in annual revenue, representing about 30% of the operating costs of the housing centers. The assessment has been reauthorized by the property owners every five years since then.

In 2017, AB 317 (Aguiar-Curry, Chapter 469) authorized $200,000 in state General Funds to support the Napa County farmworker centers. This funding will expire in the fiscal year 2028-29. At the time, the author argued that inflation had increased the farmworker centers' annual operating expenses, and while the County of Napa and its partners have been fiscally responsible in building reserves, increasing costs had eroded this source. The additional funding provided by AB 317 was intended to prevent the closure of the centers at the time, which the county was predicting would happen by 2018 when the centers would run out of reserves. HCD operates all other OMS centers. AB 317 essentially directed funds that would go toward state-operated OMS centers in Napa to support the existing farmworker centers upon demonstration that the NCHA is capable of continuing to effectively serve the housing needs of migrant or other farmworkers. The NCHA must provide equal or greater funds from local sources.

This bill increases the amount that the state provides to the Napa County farm centers from $250,000 to $500,000 annually. The author is also requesting an allocation in the budget to fund the centers.

3) *H-2A Visa Program.* The H-2A Visa program is a federal program that allows U.S. employers or U.S. agents who meet specific regulatory requirements to bring foreign nationals to the United States to fill temporary agricultural jobs.

Petitioners requesting to utilize this program must demonstrate that there are not enough U.S. workers who are able, willing, qualified, and available to do the temporary work. They must also show that employing H-2A workers will not adversely affect the wages and working conditions of similarly employed U.S. workers. Employers must provide clean and safe housing to H-2A workers at no charge to the employee. Employees are responsible for their food costs, but employers must provide a place for workers to prepare their meals. An employer must arrange for a worker's transportation from the originating country to the place of employment or reimburse the worker for transportation costs.

Since its introduction in 1986, the H-2A program has grown steadily in size. According to the U.S. Department of Labor, in 2000, there were approximately 30,000 visa-holders, in 2010 there were approximately 55,000, and in 2016 there were over 134,000 (including 11,000 in California). This represents about 4-7% of farmworkers nationwide, and 2-3% in California. According to the Economic Policy Institute, this increase is because "most crop workers are unauthorized, and farmers are turning to H-2A guestworkers as unauthorized migration from Mexico to the United States slows, to replace current workers who leave agriculture to find non-farm jobs."

The H-2A program is not uncontroversial. Farmers convey that the additional cost of providing housing and transportation, without the ability to offset those costs through lower wages, limit their use of the program. However, they cite its practical necessity in the face of a diminishing labor supply and the inability of Congress to pass immigration reform that meets the well-documented needs of the nation's food producers. Opponents point to the fact that H-2A visa ties the worker to the employer. They cite power imbalance as enabling substantial abuses, including lack of access to legal resources, wage theft, poor housing, denial of medical benefits for on-the-job injuries, and withholding of documents.

AB 1783 (Rivas, Chapter 866, Statutes of 2019) prohibited state housing funds from being utilized for constructing housing for H-2A workers, including the following programs: Community Service Block Grants, Building Homes and Jobs Trust Fund, Joe Serna, Jr. Farmworker Housing Grant Program, and other programs for migratory workers, but does not include any allocation of federal or state low-income housing tax credits.

According to the sponsor of this bill, Napa County farmworker centers do not house H-2A workers. Workers are not referred to the centers by their employers, but rather learn about the center through outreach made by the Napa Housing Authority. Consistent with AB 1783, this bill prohibits centers from providing housing to H-2A workers, and if they do, employers must reimburse the state for the cost of the housing.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Ongoing annual local assistance costs of up to $250,000, beginning in 2027-28, to provide additional matching funds to the NCHA for its farmworker centers. (General Fund)

- HCD indicates that it would not incur any additional workload-related costs to administer the program as a result of this bill. (General Fund)

SUBJECT: Forestry: Beneficial Fire Capacity Program

SOURCE: Author

DIGEST: This bill requires the Department of Forestry and Fire Protection (Department) to, on an annual basis, use no less than 10% of the Greenhouse Gas Reduction Fund (GGRF) moneys appropriated to them to expand training, organizational capacity, and support for community-led beneficial fire programs, and would give priority to funding for proposals that involve California Native American tribes or indigenous-led organizations. Additionally, the Department is required to award 25% of the Greenhouse Gas Reduction Fund appropriation to California Native American tribes or tribally- or indigenous-led organizations.

ANALYSIS:

Existing law:

1) Pursuant to Public Resources Code (PRC) §4477:
   a) Requires the State Fire Marshal (SFM), with the involvement of the Statewide Training and Education Advisory Committee, to develop a curriculum for, or amend into an existing curriculum, a certification program

for burn bosses, who possess authority to engage in a prescribed burning operation and to enter into the necessary contracts related to a prescribed burning operation. The curriculum shall provide for the initial certification as well as the continuing education of burn bosses.

b) Requires the Department to develop a training program for prescribed fire users to certify professionals in any agency or organization as burn bosses. Requires the Department to certify these individuals to a common standard.

c) Requires the SFM to post and update on its internet website the number of burn bosses with an active burn boss certification.

2) Defines "burn boss" as a person certified pursuant to PRC §4477 to conduct prescribed burning operations and to enter into contracts related to prescribed burning operations; or, a person qualified for the National Wildfire Coordinating Group position title of "Prescribed Fire Burn Boss Type 1" or "Prescribed Fire Burn Boss Type 2." (PRC §4500(a))

3) Establishes the Prescribed Fire Liability Pilot Program to increase the pace and scale of the use of prescribed fire and cultural burning and to reduce barriers for conducting prescribed fires and cultural burning. (PRC 4§500 (b))

4) Establishes the Prescribed Fire Claims Fund (Fund) to support coverage for losses from prescribed fires and cultural burning by nonpublic entities, such as cultural fire practitioners, private landowners, and nongovernmental entities. (PRC §4500 (c)(1))

5) Requires $165 million to be appropriated from GGRF in the annual Budget Act each year through the 2023–24 fiscal year to the Department for healthy forest and fire prevention programs and projects that improve forest health and reduce greenhouse gas emissions caused by uncontrolled wildfires.

6) Requires $35 million to be appropriated from GGRF in the annual Budget Act each year through the 2023–24 fiscal year to the Department to complete prescribed fire and other fuel reduction projects through proven forestry practices consistent with the recommendations of the Forest Carbon Plan, including the operation of year-round prescribed fire crews and implementation of a research and monitoring program for climate change adaptation. (Sec. 45 of SB 901 (Dodd), Chapter 626, Statutes of 2018)

7) Requires the annual proceeds of the GGRF to be continuously appropriated, until FY 2028-29, to the Department as follows: $200 million for healthy forest and fire prevention programs, and $35 million for the completion of prescribed fire and other fuel reduction projects through proven forestry practices consistent with the recommendations of the California Forest Carbon Plan,

including the operation of year-round prescribed fire crews and implementation of a research and monitoring program for climate adaptation. (Health and Safety Code (HSC) §39719 (b)(4))

8) Requires, after specified amounts are fully allocated, as determined by the Department of Finance, moneys in GGRF to be continuously appropriated, without regard to fiscal year, so that $200 million goes to the Department as follows: 82.5% for healthy forest and fire prevention programs and projects that improve forest health and reduce emissions of greenhouse gases caused by uncontrolled wildfires, and 17.5% for the completion of prescribed fire and other fuel reduction projects through proven forestry practices consistent with the recommendations of the California Forest Carbon Plan, including the operation of year-round prescribed fire crews and implementation of a research and monitoring program for climate adaptation. (HSC §37919.4 (c)(1)(E))

This bill:

1) Makes codified legislative findings and declarations regarding:
   a) The use of beneficial fire for reducing the risk of catastrophic wildfire and greenhouse gas emissions, and
   b) The critical need for investment in training, organizational capacity, and project implementation, regardless of the immediate quantification of greenhouse gas emissions.
2) Requires that the Department, on an annual basis, use not less than 10% of any funding appropriated to the Department for local assistance and other grant programs where prescribed fire is an eligible activity, to expand training, organizational capacity, and support for community led beneficial fire programs, as specified.
   a) Of this 10%, not less than 25% allocated funds shall be awarded to California Native American tribes or tribally led or indigenous-led organizations.
   b) Specifies that the Department may award less than the 10% only in circumstances where the total funding requested by qualified applicants does not reach the minimum allocation.
   c) Requires that the Department deliver the funding through grants, programs, and other mechanisms including direct awards, block grants, and subawards.
3) Specifies the activities that qualify as part of the 10% allocation are:
   a) Funding to support and implement community-led beneficial fire programs, including training, and building and maintaining capacity. The Department

shall prioritize organizations with demonstrated effectiveness developing or leading beneficial fire programs.

b) Funding to implement beneficial fire projects or projects involving beneficial fire capacity building, research, innovation, or training.

4) Require the Department collaborate with other relevant state agencies, beneficial fire practitioners, and organizations currently engaged in beneficial fire programs in the administration of the funding.

5) Requires the Department, to the extent feasible under grants, programs, and other mechanisms, to

a) Allow awarded funds to be used to pay California Native American tribes or tribally designated individuals for consultation or engagement on programs or projects.

b) Reduce application and reporting requirements.

c) Develop metrics for program success other than acres treated.

d) Use the maximum flexibility provided for by law to allow for longer grant or award terms.

6) Authorize the Department to prescribe rules, guidelines, procedures, or other guidance to carry out the purposes of this chapter.

7) Exempt such rules from the Administrative Procedures Act.

8) Make non-codified findings and declarations.

Prescribed burning. Prescribed burning is the controlled application of fire to the land to reduce wildfire hazards, clear downed trees, control plant diseases, improve rangeland and wildlife habitats, and restore natural ecosystems. Prescribed fires are typically conducted in compliance with a written prescribed fire plan that outlines the conditions necessary for the burn to be "within prescription." Recent research on California's 2020 wildfire season found prescribed fires decreased wildfire burn severity by 16% and led to a net reduction of 14% in smoke emissions.

California's Strategic Plan for Expanding the Use of Beneficial Fire (March 2022) (Strategic Plan) estimates that between 10 and 30 million acres in California would benefit from some form of fuel reduction treatment and sets a target for deploying beneficial fire on 400,000 acres annually.

According to the Strategic Plan, approximately 125,000 to 150,000+ acres are treated with prescribed burning in California annually by state and federal agencies. According to the Wildfire Forest Resilience Task Force Dashboard , 188,000 acres were treated with beneficial burns in 2024. While this rate is

increasing to manage wildfire hazards, it remains far below the long-term goal of 400,000 acres annually and the roughly 4.5 million acres that burned annually before the year 1800.

Prescribed burns are safe. The US Forest Service reported in 2022 that 99.84% of prescribed burns operate as planned without incident.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

- The Department estimates ongoing costs of $354,000 in the first year, $392,000 in the second, and $371,000 annually thereafter (Greenhouse Gas Reduction Fund [GGRF]) to implement the provisions of this bill.
- The California Air Resources Board (CARB) estimates ongoing costs of $391,000 annually (GGRF) to develop quantification and reporting materials specific to the new projects for agencies administering California Climate Investments (CCI) programs; conduct additional outreach in disadvantaged communities, including within lands under the control of federally recognized tribes, to inform community members about investment opportunities available through CCI; provide ongoing guidance, including quantification guidance and support; and assist with outreach and engagement, especially to tribes and indigenous-led organizations.
- By requiring the Department to use at least 10% of its funding appropriated for local assistance and other grant programs where prescribed or beneficial fire is an eligible activity to implement the Beneficial Fire Capacity Program, this bill would create ongoing cost pressures of an unknown amount on the department's funding allocation to the extent the proposed set-aside in the bill diverts resources away from projects that would otherwise have received funding from the department. According to the Department, its grant programs are consistently oversubscribed.

ARGUMENTS IN SUPPORT: According to the author, "AB 1891 sets aside 10% of the Greenhouse Gas Reduction Fund allocated to [the Department] for wildfire resiliency and forest health to support beneficial fire, with 25% of that dedicated specifically to tribes and tribal organizations. Beneficial fire has been a proven practice utilized by California's first peoples for thousands of years. The evidence is clear, beneficial fire projects help our ecosystems foster biodiversity, reduce wildfire risk, and preserve natural habitats and forests. It is time we expand these practices and give California another tool to help make our state more resilient to wildfires and natural disasters."

SUBJECT: Public employment: disqualifications

SOURCE: Author

DIGEST: This bill (1) disqualifies a person from public employment in California, including employment as a peace officer, if they were previously employed as a sworn law enforcement officer or individual contractor and personally engaged in immigration enforcement; (2) requires a hiring agency considering a peace officer applicant to conduct a suitability review of that candidate based on standards developed by the Commission on Peace Officer Standards and Training (POST), as specified.

Senate Floor Amendments of 08/21/26 require POST to adopt a definition of "suitability" based on recommendations from a newly established working group; specify that the signed declaration required to be submitted to the Department of Justice (DOJ) by a peace officer applicant should instead be submitted to the hiring

agency; require employment forms used by a state or local agency to require a person applying for employment to disclose whether the person has been employed as a sworn law enforcement officer or individual contractor personally engaged in immigration enforcement; remove definitions and make technical changes.

ANALYSIS:

Existing law:

1) The California Values Act, generally prohibits California law enforcement agencies from using agency moneys or personnel to investigate, interrogate, detain, detect, or arrest persons for immigration enforcement purposes, as specified, from placing officers under the supervision of federal agencies for the purpose of immigration enforcement, and from cooperating in other specified ways with federal immigration authorities. (Government (Gov.) Code, § 7284.6, subd. (a).)

2) Provides that notwithstanding the above limitations, and in accordance with local laws and agency policies, California law enforcement agencies are not prohibited from conducting enforcement or investigative duties associated with a joint law enforcement task force, including the sharing of confidential information with other law enforcement agencies for purposes of task force investigations, so long as the following conditions are met:

   a) The primary purpose of the joint law enforcement task force is not immigration enforcement, as defined.

   b) The enforcement or investigative duties are primarily related to a violation of state or federal law unrelated to immigration enforcement.

   c) Participation in the task force by a California law enforcement agency does not violate any local law or policy to which it is otherwise subject. (Gov. Code, § 7284.6, subd. (b).)

3) Requires POST to establish a certification program for peace officers, as defined, and provides that basic, intermediate, advanced, supervisory, management, and executive certificates shall be established for the purpose of fostering professionalization, education, and experience necessary to adequately accomplish the general police service duties performed by peace officers. (Penal (Pen.) Code § 13510.1, subds. (a)-(b).)

4) Authorizes POST to suspend or revoke the certification of a peace officer if the person has been terminated for cause from employment as a peace officer for,

or has, while employed as a peace officer, otherwise engaged in, any serious misconduct, as described. (Pen. Code, § 13510.8, subd. (a)(2).)

5) Requires POST to adopt by regulation a definition of "serious misconduct" that shall serve as the criteria for consideration for ineligibility for, or revocation of, certification of a peace officer, and which must include specified elements. (Pen. Code, § 13510.8, subd. (b).)

6) Provides that if a public employee is convicted of any felony involving accepting or giving, or offering to give, any bribe, conflict of interest, the embezzlement of public money, extortion or theft of public money, perjury, or conspiracy to commit any of those crimes arising directly out of their official duties as a public employee, the public employee shall be disqualified for five years from any public employment, including, but not limited to, employment with a city, county, district, or any other public agency of the state, as specified. (Gov. Code, § 1021.5.)

7) Provides that a person is ineligible to hold office or employment of any kind under the State, any county, city, district or other political or governmental unit of the State if he, while either a citizen or resident of the United States, has by oath bound himself to support, maintain or further the military or political activities or policies of any foreign government or of any official thereof or society or association therein or to obey the orders or directions of any foreign government or of any official thereof. (Gov. Code, § 1023.)

8) Provides that the California Department of Human Resources (Cal HR) is generally responsible for developing eligibility lists for positions within the civil service comprising California state government, which shall be established as a result of free competitive examinations open to persons who lawfully may be appointed to any position within the class for which these examinations are held and who meet the minimum qualifications requisite to the performance of the duties of that position as prescribed by the specifications for the class or by rule. (Gov. Code, §§ 18900 et. seq.)

9) Authorizes Cal HR or a designated appointing power to refuse to examine, or after examination refuse to declare as eligible, or withhold or withdraw from an eligible list, before the appointment, anyone who meets specified criteria. (Gov. Code, § 18935.)

10) Requires a law enforcement agency (LEA) to conduct a background check on a peace officer or prospective officer, as provided. (Gov. Code, § 1030, subd. (a).)

11) Requires an LEA to submit to the DOJ fingerprint images and related information for a peace officer or prospective officer who is subject to a state and national criminal history background check, as specified, and requires the DOJ to provide a state- or federal-level response, as specified. (Gov. Code, § 1030, subd. (b).)

12) Provides that each class of public officers or employees declared by law to be peace officers shall meet specified minimum standards. (Gov. Code, § 1031.)

13) Provides that any background investigation of a candidate for a peace officer position shall include an inquiry into whether the candidate has engaged or is engaging in membership in a hate group, participation in any hate group or advocacy of public expressions of hate. (Pen. Code, § 13681.)

14) Provides that, for purposes of performing a thorough background investigation for applicants not currently employed as a peace officer or in the case of an applicant for a position other than a sworn peace officer within a law enforcement agency, an employer shall disclose employment information relating to a current or former employee, upon request of a law enforcement agency, if specified conditions are met. (Gov. Code, § 1031.1, subd. (a).)

15) Provides that specified persons are disqualified from being a peace officer in California, including specified persons who have been charged or convicted of a felony, persons that have had a POST certificate revoked or application denied, or any person previously employed in law enforcement in any state or United States territory or by the federal government, whose name is listed in the National Decertification Index of the International Association of Directors of Law Enforcement Standards and Training or any other database designated by the federal government whose certification as a law enforcement officer in that jurisdiction was revoked for misconduct, or who, while employed as a law enforcement officer, engaged in serious misconduct that would have resulted in their certification being revoked by the commission if employed as a peace officer in this state. (Gov. Code, § 1029, subd. (a).)

This bill:

1) Provides that a person is disqualified from public employment, including, but not limited to, employment with a city, county, district, or any other public agency of the state, because they were previously employed as a sworn law enforcement officer or individual contractor and personally engaged in immigration enforcement.

2) Provides that a person shall not be disqualified from public employment per the above if they are approved to enter a POST basic course, as specified.

3) Provides that a person is disqualified from being a California peace officer if they were previously employed as a sworn law enforcement officer or individual contractor, and personally engaged in immigration enforcement.

4) Provides that a person shall not be disqualified from being employed as a California peace officer per (3) above if they are approved to enter a POST basic course, as specified.

5) Provides that, for the purpose of a thorough background investigation, a hiring agency may consider news articles, verified social media posts, filings of civil complaints, and other verified sources.

6) Provides that, for peace officer applicants not currently employed as a peace officer or an applicant for a position other than a sworn peace officer within a law enforcement agency, who were previously employed as a sworn law enforcement officer or individual contractor and personally engaged in immigration enforcement, the background investigation shall be completed by the hiring agency prior to the candidates participation in the POST basic course.

7) Provides that the hiring agency shall review the background investigation and determine if the individual is suitable for entering a POST basic course, and that suitability shall be based on both of the following:

   a) The standards adopted by the Commission on Peace Officer Standards and Training by regulation on suitability.

   b) California laws and regulations, as specified. The standards established for peace officers under all applicable

8) Provides that suitability shall be determined on a case-by-case basis based on information contained in the applicant's background check and any additional information POST deems relevant.

9) Specifies that the hiring agency shall only be responsible for determining suitability for those applicants that affirm they engaged in immigration enforcement and shall not be required or liable under the bill to determine suitability or prior employment history of applicants who did not affirm a declaration of such employment.

10) Provides that as part of the fingerprint-based criminal history review conducted for every applicant seeking peace officer employment or enrollment in a POST basic course, each applicant shall submit to the hiring agency a declaration signed under penalty of perjury that states whether the applicant has, at any time, been employed as a sworn law enforcement officer or individual contractor that personally engaged in immigration enforcement.

11) Specifies that if the hiring agency determines, based on the declaration above or other information lawfully available to the department, that an applicant has been employed as a sworn law enforcement officer and engaged in immigration enforcement, the hiring agency shall conduct a suitability review for the applicant, as specified.

12) Specifies that a knowingly false declaration submitted pursuant to (9) above shall constitute a false statement made under penalty of perjury and shall be considered by the hiring agency as part of its suitability determination.

13) Provides that Cal HR may refuse to examine, or after examination may refuse to declare as eligible, or may withhold or withdraw from an eligible list, before the appointment, anyone who has been found to have been previously employed as a sworn law enforcement officer or individual contractor and personally engaged in immigration enforcement.

14) Specifies that Cal HR shall not refuse to examine anyone who was approved to enter a POST basic course, as specified.

15) Provides that, for the purposes of an applicant to attend the POST basic course who was previously employed as a sworn law enforcement officer or individual contractor and personally engaged in immigration enforcement, POST shall deny suitability for enrollment in the basic course, unless the commission receives notice from a hiring agency granting their suitability.

16) Specifies that no applicant shall enter the basic course without a hiring agency granting their suitability.

17) Requires POST, by January 1, 2028, to adopt by regulation a definition of "suitability" that shall serve as criteria to be considered for the suitability of an applicant who has engaged in immigration enforcement, and be based, in part, on recommendations from a working group that the commission shall convene which shall consist of 11 members, as specified.

18) Provides that any background investigation of a candidate for a peace officer position shall include an inquiry into whether the candidate has engaged in immigration enforcement, as specified.

19) Requires employment forms used by a state or local agency to require a person applying for employment to disclose whether the person has been employed as a sworn law enforcement officer or individual contractor personally engaged in immigration enforcement

20) Defines "immigration enforcement" as any efforts to investigate or enforce any federal civil immigration law, including investigating or enforcing any federal criminal immigration law that penalizes a person's presence in, entry to, or reentry to, or employment in, the United States, but excludes conduct permitted under the California Values Act.

21) Specifies that its provisions do not prohibit or restrict any governmental entity or official from sending to, or receiving from, federal immigration authorities information regarding the citizenship or immigration status, lawful or unlawful, of an individual, or from requesting from federal immigration authorities immigration status information, lawful or unlawful, of any individual, or from maintaining or exchanging that information with any other federal, state, or local governmental entity, as specified.

22) Includes a severability clause.

Comments

For a discussion of relevant existing law, including existing minimum standards for peace officers and the POST certification and decertification processes, see the analysis prepared by the Senate Committee on Public Safety. Recent amendments restructure the central provisions of this bill, and function to disqualify an applicant for public employment, including as a California peace officer, who was previously employed as a sworn law enforcement officer or individual contractor and personally engaged in immigration enforcement, defined as any efforts to investigate or enforce any federal civil immigration law, including investigating or enforcing any federal criminal immigration law that penalizes a person's presence in, entry to, or reentry to, or employment in, the United States, but excluding conduct permitted under the California Values Act.

This bill also, for purposes of an applicant who was previously employed as a sworn law enforcement officer or individual contractor and personally engaged in immigration enforcement, requires the hiring agency to complete the background

investigation before the candidate participates in a POST basic course, and requires the agency to review the background investigation and determine if the individual is suitable to enter the POST basic course subject to a definition of suitability adopted by POST based, in part, on recommendations from a working group, as specified. This bill also requires an applicant to submit a signed declaration under penalty of perjury to the hiring agency as to whether the applicant personally engaged in immigration enforcement. Additionally, this bill, for purposes of an applicant for the basic course who was previously employed as a sworn law enforcement officer or individual contractor and personally engaged in immigration enforcement, requires POST to deny suitability for enrollment in the basic course, unless the commission receives notice from the hiring agency granting the applicant's suitability.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

> Minor costs to state law enforcement agencies. (special funds, General Fund) Minor to modest costs to local law enforcement. To the extent this bill would impose additional duties on local law enforcement agencies, this bill would impose a state mandated local program. Costs will depend on whether the duties imposed by this bill constitute a reimbursable state mandate, as determined by the Commission on State Mandates. (General Fund)

SUBJECT: Mentally disordered offenders: criteria for commitment

SOURCE: San Francisco District Attorney's Office

DIGEST: This bill 1) requires a psychiatrist or psychologist, when evaluating an incarcerated person for a commitment as an offender with a mental health disorder (OMHD), to consider specified factors in determining whether the person represents a substantial danger of physical harm to others as a result of a severe mental health disorder; and 2) authorizes a court to conduct the OMHD hearing in the county of commitment to state prison upon stipulation of the petitioner, prosecuting attorney, and defense counsel in the county of commitment to state prison.

Senate Floor Amendments of 8/11/26 add intent language and clarifying language.

ANALYSIS:

Existing law:

1) Provides that the Legislature finds that there are incarcerated individuals who have a treatable, severe mental health disorder that was one of the causes of, or was an aggravating factor in, the commission of the crime for which they were

incarcerated. Provides that the Legislature finds that if the severe mental health disorders of those incarcerated individuals are not in remission or cannot be kept in remission at the time of their parole or upon termination of parole, there is a danger to society, and the state has a compelling interest in protecting the public. Provides that the Legislature finds that in order to protect the public from those persons, it is necessary to provide mental health treatment until the severe mental health disorder that was one of the causes of or was an aggravating factor in the person's prior criminal behavior is in remission and can be kept in remission. (Penal [Pen.] Code, § 2960, subdivision [subd.] (a).)

2) Provides that the Legislature further finds and declares the California Department of Corrections and Rehabilitation (CDCR) should evaluate each incarcerated individual for severe mental health disorders during the first year of the person's sentence, and that incarcerated individuals with severe mental health disorders should be provided with an appropriate level of mental health treatment while in prison and when returned to the community. (Pen. Code, § 2960, subd. (b).)

3) Allows the Board of Parole Hearings (BPH), upon a showing of good cause, to order an incarcerated person to remain in custody for up to 45 days past the person's scheduled release date for a full OMHD evaluation. Defines good cause to mean circumstances where there is a recalculation of credits or a restoration of denied or lost credits, a resentencing by a court, the receipt of the incarcerated individual into custody, or equivalent exigent circumstances which result in there being less than 45 days prior to the person's scheduled release date for the OMHD evaluation. (Pen. Code, § 2963.)

4) Requires incarcerated persons who meet the following criteria to be deemed an OMHD and be treated by the Department of State Hospitals (DSH) as a condition of parole:

    a) The incarcerated person has a severe mental health disorder that is not in remission or that cannot be kept in remission without treatment.
    b) The severe mental health disorder was one of the causes of, or was an aggravating factor in, the commission of a crime for which the person was sentenced to prison.
    c) The incarcerated person has been in treatment for the severe mental health disorder for 90 days or more within the year prior to the person's parole or release.

d) The person's severe mental health disorder indicates that the person represents a substantial danger of physical harm to others. (Pen. Code, § 2962, subd. (a)-(d).)

5) Defines "severe mental health disorder" as an illness, disease, or condition that substantially impairs the person's thought, perception of reality, emotional process, or judgment; or that grossly impairs behavior; or that demonstrates evidence of an acute brain syndrome for which prompt remission, in the absence of treatment, is unlikely. Specifies that "severe mental health disorder" does not include a personality or adjustment disorder, epilepsy, intellectual disability or other developmental disabilities, or addiction to or abuse of intoxicating substances. (Pen. Code, § 2962, subd. (a)(2).)

6) Defines "remission" as a finding that the overt signs and symptoms of the severe mental health disorder are controlled either by psychotropic medication or psychosocial support. (Pen. Code, § 2962, subd. (a)(3).)

7) Provides that a person "cannot be kept in remission without treatment" if during the year prior to the question being before the BPH or a trial court, the person has been in remission and has been physically violent, except in self-defense, or has made a serious threat of substantial physical harm upon the person of another so as to cause the target of the threat to reasonably fear for their safety or the safety of their immediate family, or the person has intentionally caused property damage, or has not voluntarily followed the treatment plan. Provides that in determining if a person has voluntarily followed the treatment plan, the standard is whether the person has acted as a reasonable person would in following the treatment plan. (*Ibid*.)

8) Outlines the process by which a person is evaluated to determine whether someone meets the criteria of an OMHD. (Pen. Code, § 2962, subd. (d).)

9) Requires the crime for which the person was sentenced to prison to meet the following criteria:

a) The defendant received a determinate sentence.
b) The crime is one of the following: voluntary manslaughter; mayhem; kidnapping; a robbery wherein it was charged and proved that the defendant personally used a deadly or dangerous weapon in the commission of that robbery; carjacking if the defendant personally used a deadly or dangerous weapon in the commission of the carjacking; rape; sodomy by force,

violence, duress, menace, or fear of immediate and unlawful bodily injury on the victim or another person; oral copulation by force, violence, duress, menace, or fear of immediate and unlawful bodily injury on the victim or another person; lewd acts on a child under 14 years of age; continuous sexual abuse; sexual penetration by force, violence, duress, menace, or fear of immediate and unlawful bodily injury on the victim or another person; arson; a felony in which the defendant used a firearm; igniting an explosive or destructive device; attempted murder; any crime not enumerated in which the person used force or violence, or caused serious bodily injury; or a crime in which the perpetrator expressly or impliedly threatened another with the use of force or violence likely to produce substantial physical harm in a manner that a reasonable person would believe and expect that the force or violence would be used. (Pen. Code, § 2962, subd. (e).)

10) Provides that "substantial danger of physical harm" does not require proof of a recent overt act. (Pen. Code, § 2962, subd. (g).)

11) Allows the incarcerated person to request a hearing before BPH for the purpose of proving that the person meets the OMHD criteria. Provides that the person may file a petition in the superior court in the county in which the person is incarcerated or being treated. Provides that the burden of proof is on the person or agency who certified the person as an OMHD. Provides that the incarcerated person has the right to a jury trial and the right to be represented by an attorney. Provides that the standard of proof is beyond a reasonable doubt, and if the trial is by jury, the jury verdict must be unanimous. (Pen. Code, § 2966, subds. (a), (b).)

12) Requires CDCR, if the court or jury finds that the person does not meet the OMHD criteria and the person is eligible for release, to notify the probation department of the county of supervision of the pending release within five working days of the court order and work with the county of supervision to coordinate the orderly and safe release of the incarcerated person. (Pen. Code, § 2966, subd. (b).)

This bill:

1) Requires a psychiatrist or psychologist, in determining whether the incarcerated person represents a substantial danger of physical harm to others as a result of their severe mental health disorder, to consider all of the following:

a) The incarcerated person's history of violence that was related to their severe mental health disorder.
b) The incarcerated person's current mental status.
c) The incarcerated person's recent behavior and treatment response.
d) The incarcerated person's current capacity to inflict physical harm on others, including their age, physical condition, and other present limitations.
e) Any clinically relevant factor bearing directly on the risk of physical harm to others.

2) Authorizes the court to conduct the OMHD hearing in the county of commitment to state prison upon stipulation of the petitioner, prosecuting attorney, and defense counsel in the county of commitment to state prison.

Background

An OMHD commitment, formerly known as a mentally disordered offender commitment, is a post-prison civil commitment to further detain a person with a severe mental health disorder. The OMHD Act is designed to confine a mentally ill individual who is about to be released on parole when it is deemed that that the person's mental illness not only contributed to the commission of a violent crime but also continues to make them dangerous to others. Rather than release the person to the community, CDCR paroles the incarcerated person to the supervision of the state hospital, and the individual remains under hospital supervision throughout the parole period.

Penal Code section 2962 lists the criteria that must be proven for an initial OMHD certification: the incarcerated person has a severe mental disorder; the severe mental disorder was one of the causes or an aggravating factor in the commission of the offense; the disorder is not in remission or capable of being kept in remission without treatment; the incarcerated person was treated for the disorder for at least 90 days in the year before their release; and by reason of the severe mental disorder, the person poses a substantial danger of physical harm to others. (Pen. Code, § 2962, subds. (a)-(d).)

The initial determination that the incarcerated person meets the OMHD criteria is made administratively. The person in charge of treating the incarcerated person and a practicing psychiatrist or psychologist from DSH evaluate the incarcerated person. If it appears that the incarcerated person meets the OMHD criteria, the chief psychiatrist then will certify so to BPH.

The incarcerated person may request a hearing before BPH to require proof that they qualify as an OMHD. If BPH determines that the person meets the criteria of an OMHD, the person may file a petition in the superior court of the county in which they are incarcerated or are being treated for a hearing on whether they, as of the date of the board hearing, meet the criteria. (Pen. Code, § 2966, subd. (a).) The person is entitled to a jury trial, which can be waived. The jury must unanimously agree that the allegations of the petition were proven beyond a reasonable doubt. If the court or jury reverses the BPH determination, the court must stay the execution of the decision for up to 30 days to allow for an orderly release of the person. (Pen. Code, § 2966, subd. (b).) If the court or jury finds that the person does not meet the OMHD criteria and the person is eligible for release, CDCR must notify the probation department of the county of supervision of the pending release within five working days of the court order and work with the county of supervision to coordinate the release of the incarcerated person. (*Ibid*.)

Under current law, an OMHD must receive inpatient treatment unless there is reasonable cause to believe that the person can be safely and effectively treated on an outpatient basis. (Pen. Code, § 2964.) If the person's severe mental disorder is put into remission during the parole period and can be kept in remission, DSH must discontinue treatment. (Pen. Code, § 2968.) However, if prior to the termination of parole, the person's severe mental disorder is not in remission or cannot be kept in remission without treatment, the medical director of the state hospital that is treating the person must notify the district attorney who can file a petition in the superior court for continued involuntary treatment for one year. (Pen. Code, § 2970.)

This bill requires a psychiatrist or psychologist, in determining whether the incarcerated person represents a substantial danger of physical harm to others as a result of their severe mental health disorder, to consider all of the following:

- The incarcerated person's history of violence that was related to their severe mental health disorder.
- The incarcerated person's current mental status.
- The incarcerated person's recent behavior and treatment response.
- The incarcerated person's current capacity to inflict physical harm on others, including their age, physical condition, and other present limitations.
- Any clinically relevant factor bearing directly on the risk of physical harm to others.

This bill also authorizes the court to conduct the hearing in the county of commitment to state prison upon stipulation of the petitioner, prosecuting attorney, and defense counsel in the county of commitment to state prison.

SUBJECT: Secure youth treatment facilities

SOURCE: Santa Cruz District Attorney's Office

DIGEST: This bill authorizes a court to order an extended confinement for a person who is set to be discharged from a secure youth treatment facility (SYTF) for up to three years based on a finding that the person is physically dangerous to the public, and to make other changes to the process to extend detention.

ANALYSIS:

Existing law:

1) Provides, generally, that a minor who is between 12 years of age and 17 years of age, inclusive, when the minor violates any law defining a crime, is subject to the jurisdiction of the juvenile court and to adjudication as a ward. (Welfare & Institutions (Welf. & Inst.) Code, § 602, subd. (a).)

2) Authorizes a court to make any reasonable orders for the care, supervision, custody, conduct, maintenance, and support of a minor or nonminor who is adjudged a ward of the court. (Welf. & Inst. Code, § 727, subd. (a)(1).)

3) Authorizes a court to order commitment of a minor to a juvenile home, ranch, camp, or forestry camp, or to juvenile hall if the county does not have a juvenile home, ranch, camp, or forestry camp, when the minor is adjudged a ward of the court. (Welf. & Inst. Code, § 730, subd. (a)(1).)

4) Authorizes a court to order a ward who is 14 years of age or older to be committed to an SYTF for a period of confinement if the ward meets all of the following criteria: the juvenile is adjudicated and found to be a ward of the court based on an offense listed in Section 707(b) that was committed when the juvenile was 14 years of age or older; the adjudication is the most recent offense for which the juvenile has been adjudicated; and the court has made a finding on the record that a less restrictive, alternative disposition for the ward is unsuitable. (Welf. & Inst. Code, § 875, subd. (a)(1)-(3).)

5) Requires the court, in determining whether a less restrictive disposition is suitable, to consider all relevant and material evidence, including the recommendations of counsel, the probation department, and any other agency or individual designated by the court to advise on the appropriate disposition of the case. Requires the court to additionally make its determination based on specified criteria, including the severity of the offense or offenses for which the ward has been most recently adjudicated; the ward's previous delinquent history; whether the programming, treatment, and education offered and provided in an SYTF is appropriate to meet the treatment and security needs of the ward; and whether the goals of rehabilitation and community safety can be met by assigning the ward to an alternative, less restrictive disposition that is available to the court, among other things. (Welf. & Inst. Code, § 875, subd. (a)(3)(A)-(E).)

6) Requires the court, in making its order of commitment for a ward, to set a baseline term of confinement for the ward that is based on the most serious recent offense for which the ward has been adjudicated. Requires the baseline term of confinement to represent the time in custody necessary to meet the developmental and treatment needs of the ward and to prepare the ward for discharge to a period of probation supervision in the community. Requires the baseline term of confinement for the ward to be determined according to offense-based classifications. Provides that the baseline term is subject to

modification in progress review hearings. (Welf. & Inst. Code, § 875, subd. (b)(1).)

7) Requires the court, in making its order of commitment, to additionally set a maximum term of confinement for the ward based upon the facts and circumstances of the matter or matters that brought or continued the ward under the jurisdiction of the court and as deemed appropriate to achieve rehabilitation. (Welf. & Inst. Code, § 875, subd. (c)(1).)

8) Provides that the maximum term of confinement is the longest term of confinement in a facility that the ward may serve subject to the following:

   a) Prohibits a ward committed to an SYTF from being held in secure confinement beyond 23 years of age, or two years from the date of the commitment, whichever occurs later. Allows a ward who has been committed to an SYTF based on adjudication for an offense or offenses for which the ward, if convicted in adult criminal court, would face an aggregate sentence of seven or more years, to be held in secure confinement until 25 years of age, or two years from the date of commitment, whichever occurs later.
   b) Prohibits the maximum term of confinement from exceeding the middle term of imprisonment that can be imposed upon an adult convicted of the same offense or offenses. Requires, if the court elects to aggregate the period of physical confinement on multiple counts or multiple petitions, the maximum term of confinement to be the aggregate term of imprisonment specified in Section 1170.1 of the Penal Code.
   c) Requires precommitment credits for time served to be applied against the maximum term of confinement. (Welf. & Inst. Code, § 875, subd. (c)(1)(A)-(C).)

9) Provides that is the intent of the Legislature to apply existing law (beginning with Section 1800), governing extended detention of persons physically dangerous to the public who are served by the Division of Juvenile Justice (DJJ), to persons physically dangerous to the public who are committed to an SYTF, pending development of a specific commitment process for realigned persons. (Welf. & Inst. Code, § 875.5.)

10) Requires the probation department, if it determines the discharge of a person confined in an SYTF would be physically dangerous to the public because of the person's mental or physical condition, disorder, or other problem that causes

the person to have serious difficulty controlling their behavior, to request the prosecuting attorney to petition the committing court for an order directing that the person remain subject to the control of the department beyond the release date. (Welf. & Inst. Code, § 876, subd. (a).)

11) Requires the prosecuting attorney to promptly notify the probation department of a decision not to file a petition. (Welf. & Inst. Code, § 876, subd. (b).)

12) Requires the court, if a petition is filed with the court and, upon review, the court determines that the petition, on its face, supports a finding of probable cause, to order that a hearing be held. Requires the person who is the subject of the petition to receive notice, have an opportunity to appear at the hearing with the aid of counsel, and the right to cross-examine experts or other witnesses upon whose information, opinion, or testimony the petition is based. (Welf. & Inst. Code, § 876, subd. (c).)

13) Requires the probable cause hearing to be held within 10 calendar days after the date the order for a hearing is issued unless the person named in the petition waives time. (Welf. & Inst. Code, § 876, subd. (c).)

14) Requires the court, if it determines there is not probable cause, to dismiss the petition and the person must be discharged from the control of the SYTF, as applicable. Requires the court to order that a trial be conducted to determine whether the person is physically dangerous to the public because of their mental or physical condition, disorder, or other problem, if it determines there is probable cause. (Welf. & Inst. Code, § 876, subd. (d).)

15) Requires that the trial be by jury unless the right is waived. Requires the verdict to be unanimous and provides that the standard is beyond a reasonable doubt. Provides that the person is entitled to all rights guaranteed under the federal and state constitutions in criminal proceedings. (Welf. & Inst. Code, § 876, subd. (e).)

16) Requires the probation department to continue to have control over the person if an order for continued detention is made. Requires the department to, within two years after the date of the order, file a new application for continued detention if deemed necessary. (Welf. & Inst. Code, § 876, subd. (f).)

17) Authorizes these applications to be repeated at intervals as often as in the opinion of the probation department may be necessary for the protection of the

public, except that the court has the power, in order to protect other persons in the custody of probation to refer the person for evaluation for civil commitment or to transfer the custody of any person over 25 years of age to the county adult probation authorities for placement in an appropriate institution. (Welf. & Inst. Code, § 876, subd. (f).)

18) Provides that an order of the committing court for continued detention is appealable by the person whose liberty is involved in the same manner as a judgment in a criminal case. Authorizes the appellate court to affirm the order of the lower court, or modify it, or reverse it and order the appellant to be discharged. Requires the appellant to remain under the control of the probation department pending appeal. (Welf. & Inst. Code, § 876, subd. (g).)

This bill:

1) Requires that the person remain in custody in an SYTF until the conclusion of a probable cause hearing if the court determines that the petition, on its face, supports a finding of probable cause.

2) Prohibits the probable cause hearing from being continued, except upon a showing of good cause by the party requesting the continuance.

3) Provides that the finding of probable cause may be based in whole or in part on the opinions of an expert admitted through the expert's reports provided that the report was first attached to, or incorporated by, reference in the petition. Provides that the finding of probable cause may also be based in whole or in part on the sworn testimony of a law enforcement officer or honorably retired law enforcement officer.

4) Changes the timeline for the trial and require that the person be brought to trial within 60 days from the determination that there is probable cause, unless good cause to the contrary is shown, the person enters a general waiver of the 60-day trial requirement, or the person requests or consents to the setting of a trial date beyond the 60-day period.

5) Requires the court, if it or the jury finds that the person has a mental condition or disorder that makes them dangerous, to determine the period of continued detention informed by the evidence presented at trial and a clinical assessment by the person's treatment team at the SYTF based on the person's individual treatment needs for the underlying mental condition, disorder, or other problem.

Prohibits continued detention from exceeding three years. Requires the court to state on the record the basis for the period ordered.

6) Requires that the criminal discovery process, as specified, applies to all proceedings.

Background

With the passage of SB 823 (Committee on Budget and Fiscal Review, Chapter 337, Statutes of 2020) the state planned the closure of DJJ and realigned the responsibility for managing all youth under the jurisdiction of the juvenile courts to county probation departments. SB 92 (Committee on Budget and Fiscal Review, Chapter 18, Statutes of 2021) was enacted the following year to establish a new dispositional option for juveniles ages 14 and over who are adjudicated for a Welfare and Institutions Code section 707(b) offense (i.e., a specified serious or violent felony) and for whom a less restrictive alternative disposition is not suitable. This dispositional option—commitment to an SYTF—is a secured, custodial setting.

If a court commits a youth to an SYTF, it must set a baseline term of commitment that must "represent the time in custody necessary to meet the developmental and treatment needs of the ward and to prepare the ward for discharge to a period of probation supervision in the community." (Welf. & Inst. Code, § 875, subd. (b)(1).) The baseline term is established using an offense-based classification matrix developed and adopted by the Judicial Council. The court must also set the maximum term of confinement for the youth. In general, a youth committed to an SYTF cannot be held in secure confinement beyond 23 years of age or two years from the date of the commitment, whichever occurs later, unless the youth has been committed to an SYTF based on adjudication for an offense or offenses for which the youth would have faced an aggregate sentence of seven or more years if convicted in adult criminal court. (Welf. & Inst. Code, § 875, subd. (c)(1)(A).) In that case, the youth can be held until 25 years of age or two years from the date of commitment, whichever occurs later. (Welf. & Inst. Code, § 875, subd. (c)(1)(A).)

Authority to Extend Confinement. Prior to the closure of DJJ, Welfare and Institutions Code section 1800 established a process to extend confinement of a juvenile offender committed to DJJ due to the "person's mental or physical deficiency, disorder, or abnormality that causes the person to have serious difficulty controlling his or her dangerous behavior" making the person "physically dangerous to the public." Upon DJJ's closure and the creation of the SYTF, a

similar process to extend confinement of a juvenile offender committed to an SYTF was codified in Welfare and Institutions Code section 876.

Welfare and Institutions Code section 876 adopted a substantially similar process to order extended confinement for persons committed to an SYTF. The process is triggered by a probation department's determination that the discharge of the person from an SYTF at the time statutorily required would be physically dangerous to the public because of the person's mental or physical condition, disorder, or other problem that causes the person to have serious difficulty controlling their dangerous behavior. The probation department then requests the prosecuting attorney to file a petition at least 90 days before the time of discharge otherwise required. If the prosecuting attorney files a petition and the court determines there is probable cause at a probable cause hearing, a trial must be ordered and conducted within 30 days from the date of the order for trial, unless waived.

If the person is found at trial by unanimous verdict that the person is physically dangerous to the public because of a mental or physical condition, disorder, or other problem that causes the person to have serious difficulty controlling their dangerous behavior by proof beyond a reasonable doubt, the court shall order extended confinement under the control of the probation department for a period of up to two years. A new application for continued detention may be repeated at intervals as often as in the opinion of the probation department is deemed necessary. The court is authorized, in order to protect other persons in the custody of probation to refer the custody of a person over 25 years if age to the county adult probation authorities for placement in an appropriate institution.

This bill makes changes to the detention extension process for individuals committed to an SYTF. First, this bill requires that a person remain in custody in SYTF until the conclusion of a probable cause hearing if the court determines that the petition, on its face, supports a finding of probable cause. This bill also prohibits the probable cause hearing from being continued, except for good cause. This bill provides that the finding of probable cause may be based on expert opinions or sworn testimony of a law enforcement officer. This bill extends the timeline for the trial and requires that the person be brought to trial within 60 days from the determination that there is probable cause.

This bill additionally authorizes the court to order a person's continued detention for up to three years—one year longer than is permitted under current law. The court must state on the record the basis for the period ordered. Finally, this bill

requires that the criminal discovery process applies to all proceedings related to a person's continued detention.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

Unknown costs to the counties to extend SYTF confinement from two years to up to three years upon a court finding. For a cost reference, the average annual cost to incarcerate one person in county jail is approximately $80,000. With the small number of youths who have SYTF commitments extended under Welfare and Institutions Code 876, extensions could go on indefinitely, so the person could be over age 18, or even over age 25. Regardless, their custody and control remains with the county, either in the SYTF or, for those persons over age 25, who remain under juvenile court jurisdiction, the court could refer them for a civil commitment or transfer custody to adult probation to place the person in an adult institution (but still as a ward of the juvenile court until the commitment ends). Actual incarceration costs to counties will depend on the number of convictions and the length of each sentence. Generally, county incarceration costs are not reimbursable state mandates pursuant to Proposition 30 (2012).

Likely significant court cost pressure for additional hearings in juvenile courts to determine if a person set for discharge is physically dangerous to the public. These hearings are among the costliest hearings held in juvenile courts. Each hearing may last at least a week of court time, with concomitant costs to the District Attorney, appointed defense counsel, and the juvenile probation department. Additionally, there are court costs for expert witnesses that are routinely necessary, including experts in adolescent neuropsychology and intellectual disability experts.

SUBJECT: Construction defects

SOURCE: California Building Industry Association

DIGEST: This bill makes various changes to construction defect law, including by substantially changing the applicable standards, providing the builder an opportunity to obtain a release in exchange for repairs effective one year after repairs, providing a builder the ability to bring a motion to dismiss for failing to substantially comply to pre-litigation requirements, and increasing the requirements for notices of claims, and more.

Senate Floor Amendments of 8/21/26 add to this bill's provisions that substantially amend various sections of the construction defects standards in Civil Code sections 895 and 896, including to require damage to another component part for various defects; add a new section of the standards that make any hairline cracking, efflorescence, temporary moisture condensation, or staining outside of the living space not a violation unless they result in damage to another building component; specify that the release applies effective one year after the conclusion of the repair; remove the requirement that any nonspeculative, present physical damage to another component part; make its provisions prohibiting an insurer from asserting that repairs are a voluntary payment effective July 1, 2027; remove this bill's provisions regarding investigative costs; add a provision that specifies that its amendments apply to structures subject to these provisions regardless of the date of substantial completion or close of escrow, except for when a claim for which a

notice of claim has been served before this bill's operative date, or an action or proceeding commenced before the operative date; and add a severability clause.

ANALYSIS: Existing law:

1) Provides that, in any action seeking recovery of damages arising out of, or related to deficiencies in, the residential construction, design, specifications, surveying, planning, supervision, testing, or observation of construction, a builder, general contractor, subcontractor, material supplier, individual product manufacturer, or design professional is generally liable for, and the claimant's claims or causes of action are to be limited to, violations of the building performance standards articulated in law. (Civil [Civ.] Code § 896.)

2) Requires a homeowner to follow all reasonable maintenance obligations and schedules communicated in writing to the homeowner by the builder and product manufacturers, as well as commonly accepted maintenance practice. (Civ. Code § 907.)

3) Requires, prior to filing any action for construction defect, a claimant or their legal representative to provide written notice via certified mail, overnight mail, or personal delivery to the builder of the claimant's claims that the construction of their property violates any of the performance standards specified in (1), above. (Civ. Code § 910.)

4) Requires the notice in (3) to include the claimant's name, address, and preferred method of contact, to state that the claimant alleges a violation against the builder, and to describe the claim in reasonable detail sufficient to determine the nature and location, to the extent known, of the claimed violation unless the claimant is within a homeowner's association in which case the notice may identify the claimants solely by address or other description sufficient to apprise the builder of the locations of the subject residences. (Civ. Code § 910.)

5) Requires a builder to acknowledge the receipt of a notice of a construction defect within 14 days after receipt of the notice of the claim, and if the claim is served by the claimant's legal representative, or if the builder receives a written representation letter from a homeowner's attorney, the builder must include the attorney in all subsequent substantive communications, including, without limitation, all written communications and all substantive and procedural communications, including all written communications, following the commencement of any subsequent complaint or other legal action, except that if

the builder has retained or involved legal counsel to assist the builder in this process, all communications by the builder's counsel shall only be with the claimant's legal representative, if any. (Civ. Code § 913.)

6) Permits a builder, within 30 days of the initial or, if requested, second inspection or testing, to offer in writing to repair the violation. (Civ. Code § 917.)

7) Provides that if the builder fails to complete the repair within the time specified in a repair plan, the claimant may proceed with the filing of an action. (Civ. Code § 925.)

8) Prohibits a builder from obtaining a release or waiver of any kind in exchange for the repair work mandated by law, and that at the conclusion of the repair, the claimant may proceed with filing an action for violation of the applicable standard or for a claim of inadequate repair, or both. (Civ. Code § 927.)

9) Provides that if the applicable statute of limitations has otherwise run during the repair process, the time period for filing a complaint or other legal remedies for a construction defect claim, or for a claim of inadequate repair, is extended from the time of the original claim by the claimant to 100 days after the repair is completed, whether or not the particular violation is the one being repaired. (Civ. Code § 927.)

10) Provides that a builder may make a cash offer and not repair a defect and that a reasonable release of claims may be obtained in exchange for the cash payment. (Civ. Code § 929.)

11) Requires, in order to make a claim for violation of the performance standards of 1), a homeowner need only demonstrate, in accordance with the applicable evidentiary standard, that the home does not meet the applicable standard, subject to the affirmative defenses set forth in law. (Civ. Code § 942.)

12) Provides that, if a claim for damages is made relating to a construction defect, the homeowner is only entitled to damages for the reasonable value of repairing any violation of the standards, the reasonable cost of repairing any damages caused by the repair efforts, the reasonable cost of repairing and rectifying any damages resulting from the failure of the home to meet the standards, the reasonable cost of removing and replacing any improper repair by the builder, reasonable relocation and storage expenses, lost business income if the home

was used as a principal place of a business licensed to be operated from the home, reasonable investigative costs for each established violation, and all other costs or fees recoverable by contract or statute. (Civ. Code § 944.)

13) Provides that the provisions of (1) though (13) apply only to new residential units where the purchase agreement with the buyer was signed by the seller on or after January 1, 2003. (Civ. Code § 938.)

14) Authorizes a homeowner's association to institute, defend, settle, or intervene in litigation, arbitration, mediation, or administrative proceedings in its own name as the real party in interest and without joining with it the members, in matters pertaining to the following:
    a) Enforcement of the governing documents;
    b) Damage to the common area;
    c) Damage to a separate interest that the association is obligated to maintain or repair; and
    d) Damage to a separate interest that arises out of, or is integrally related to, damage to the common area or a separate interest that the association is obligated to maintain or repair. (Civ. Code § 5980.)

15) Requires that a homeowner's association board, no later than 30 days before filing of any civil action by the association against the declarant or other developer of a common interest development for alleged damage to the common areas, alleged damage to the separate interests that the association is obligated to maintain or repair, or alleged damage to the separate interests that arises out of, or is integrally related to, damage to the common areas or separate interests that the association is obligated to maintain or repair, provide a written notice to each member of the association who appears on the records of the association when the notice is provided. (Civ. Code § 6150.)

16) Defines the following terms:
    a) "Structure" means any residential dwelling, other building, or improvement located upon a lot or within a common area;
    b) "Claimant" or "homeowner" includes the individual owners of single-family homes, individual unit owners of attached dwellings and, in the case of a common interest development, any association; and
    c) "designed moisture barrier" and "actual moisture barrier." (Civ. Code § 895.)

This bill:

1) Removes the definition of "designed moisture barrier" and "actual moisture barrier" and instead defines "moisture barrier" as a discrete building component or material whose primary purpose is preventing water intrusion into the building or enclosure, not to include components whose primary function is structural, aesthetic, or incidental to moisture management, such as interior or exterior finishes, including but not limited to stucco, cladding, siding materials, roof tiles, roof shingles, or other exterior weather proofing finish elements.

2) Amends the definition of "unintended water" to mean water that passes beyond, around, or through the final moisture barrier that is designed to prevent that passage.

3) Adds definitions of "living space" and "non-habitable space," and adds a definition of "actionable water intrusion" to mean either unintended water intrusion into a living space, or unintended water intrusion beyond the final moisture barrier into a non-habitable space that causes actual damage. Specifies that water that does not pass beyond the final moisture barrier is not actionable.

4) Amends numerous of the 45 standards in Civil Code section 896, and removes two standards, including by requiring actionable water intrusion for various standards related to water issues, and by requiring damage to another component in numerous standards.

5) Specifies that, for a function or component of a structure that is not addressed by the standards, a defect is actionable if it causes damage to another component part.

6) Adds new provisions that specify that hairline cracking, efflorescence, temporary moisture condensation, and staining outside of the living space is not a violation of any standard if it does not result in damage to another component part.

7) Specifies that, for the written notice of claim described in (3), above, the notice must:

    a) state that the claimant alleges a violation pursuant to the construction defect laws against the builder;

    b) be signed by the claimant; and

    c) include:

        i) the claimant's name, address, and preferred method of contact;

ii) a description of the claimed violation in reasonable detail sufficient to determine the nature and location, to the extent known, of the claimed violation; and

iii) evidence of the claimed violation, including copies of any reasonably available photographs, estimates, or reports relating to any claimed violation to the extent they exist at the time the notice is provided, and the specific location of the evidence.

8) Specifies that this notice shall have the same force and effect as a notice of commencement of a legal proceeding.

9) Removes the prohibition on a builder obtaining a release or waiver in exchange for a repair, and instead permits the builder to obtain a release or waiver of any kind in exchange for the repair work effective one year after the conclusion of the repair.

10) Provides that, if a claimant does not substantially comply to the pre-litigation procedures, the builder may bring a motion to dismiss without prejudice in any court action, or a motion to stay until the requirements are satisfied in the alternative. Specifies that the court, in its discretion, may award a prevailing party their reasonable attorney's fees and costs incurred in bringing or opposing the motion.

11) Requires, in order to make a claim for a violation of the performance standards, a claimant must affirmatively demonstrate:

a) There is a violation of the applicable standard; and

b) The violation is caused by the original construction.

12) Prohibits, effective July 1, 2027, an insurer from asserting repairs as a voluntary payment or as payment made without the insurer's consent, or from denying counting the costs associated with those repairs, whether pursuant to a warranty or not, against a deductible or self-insured retention.

13) Specifies that an action may not be filed for a particular violation unless the conditions for filing the action for that violation have been met, unless agreed to by the parties.

14) Specifies that its amendments to the law apply to structures subject to the construction defect provisions regardless of the date of substantial completion or close of escrow, except for a claim for which a notice was served before the

operative date of these amendments and any action or proceeding commenced before the operative date of this bill.

15) Provides a severability clause.

ARGUMENTS IN SUPPORT:

According to the California Building Industries Association and a number of other industry and pro-housing groups, which support AB 1903:

> Homeownership is one of the most reliable and widely supported ways to achieve long-term financial stability. However, for many Californians, especially first-time buyers, the path to ownership has become increasingly challenging due to limited housing supply, high prices, and barriers that hinder the production of affordable homes.
>
> California's residential construction defect law, established through SB 800 (2002), was intended to create a fair and efficient process for resolving defect claims while giving builders the opportunity to repair problems before litigation. Over time, however, that system has too often shifted away from timely repairs and toward costly, prolonged litigation. As a result, homeowners are often left waiting years for issues to be resolved, while the costs and uncertainty associated with litigation have made it harder to build condominiums and other multifamily ownership housing.
>
> AB 1903 restores the original intent of the law by strengthening the right to repair, improving clarity and transparency in the claims process, and helping ensure disputes are resolved more efficiently. By realigning incentives to address legitimate construction issues and reduce unnecessary litigation risk, the bill will better support homeowners while also making it more feasible to build attainable missing-middle homes in California.

ARGUMENTS IN OPPOSITION:

According to the Consumer Attorneys of California and a number of other homeowner's association and consumer groups, which oppose AB 1903:

> [AB 1903] fundamentally dismantles California's carefully balanced Right to Repair Act (Civ. Code § 895 et seq.), which was designed to ensure that residential construction meets minimum safety and performance standards and that defects are corrected before they cause injury or significant property damage.

For more than two decades, California law has promoted early detection and repair of construction defects in exchange for limited timelines within which claims must be brought. AB 1903 upends this framework by requiring homeowners to wait until physical damage occurs before seeking relief, while preserving short statutes of repose that will bar many claims before defects become visible. This approach undermines California's longstanding commitment to safe housing and shifts the risk of unsafe construction from builders to homeowners.

Housing is often the largest financial investment Californians will ever make. AB 1903 shifts the cost of defective construction onto homeowners who cannot afford to pay for builders' mistakes, weakens accountability for unsafe building practices, and reduces incentives to construct housing that complies with basic safety standards.

At a time when California faces an affordability crisis, the Legislature should strengthen—not undermine—consumer protections that ensure homes are safe, durable, and built to last.

SUBJECT: Teachers: credentialed educator apprenticeship programs

SOURCE: Children Now

DIGEST: This bill (1) establishes the Credentialed Educator Apprenticeships Act and creates a framework for the approval, oversight, and operation of credentialed educator apprenticeship programs in California; (2) requires the Commission on Teacher Credentialing (CTC) and the Division of Apprenticeship Standards (DAS) to jointly oversee educator apprenticeship programs; (3) authorizes the CTC to issue apprenticeship certificates or permits to participating educator candidates; (4) establishes minimum requirements for apprenticeship programs seeking state approval; and (5) requires the CTC to provide guidance and support for the development and expansion of educator apprenticeships.

ANALYSIS

Existing law:

1) Declares it the policy of the state to encourage the use of apprenticeship as a form of on-the-job training and requires public agencies to make diligent efforts to establish apprenticeship programs for apprenticeable occupations.

2) Establishes the DAS within the Department of Industrial Relations to oversee apprenticeship programs in California.

3) Requires the CTC to establish standards for the issuance and renewal of teaching credentials.

4) Requires candidates for a preliminary multiple subject, single subject, or education specialist credential to complete a commission-approved professional preparation program.

5) Establishes the Teacher Residency Grant Program to support partnerships between local educational agencies (LEAs) and commission-accredited teacher preparation programs that provide year-long clinical preparation and mentoring for teacher candidates.

This bill:

1) Establishes the Credentialed Educator Apprenticeships Act within the Education Code.

2) Requires the CTC and DAS to partner in the dissemination, approval, and monitoring of credentialed educator apprenticeship programs.

3) Requires the CTC to communicate apprenticeship requirements to professional preparation programs, LEAs, and other prospective apprenticeship sponsors.

4) Requires the CTC, when reviewing educator apprenticeship program applications submitted through DAS, to verify that:

   a) The program is operated by, or partnered with, a commission-accredited preparation program and, where applicable, an induction program in good standing.

   b) Apprentices receive at least 300 hours of paid on-the-job training before serving as an educator of record.

   c) Apprentices earn a bachelor's degree from a regionally accredited institution before serving as an educator of record.

d) Apprentices receive at least 200 hours annually of support, mentoring, and supervision meeting commission standards.

5) Requires the CTC to notify DAS if a preparation or induction program associated with an approved educator apprenticeship loses accreditation.

6) Requires the CTC to provide information regarding approved educator apprenticeship programs on its website and through relevant reports to the Legislature.

7) Requires the CTC to publish guidance on its website for prospective and approved apprenticeship sponsors, commission-accredited professional preparation programs, and employing LEAs regarding the relationship between educator apprenticeships and professional preparation programs, as specified.

8) Requires the CTC to support the development and expansion of educator apprenticeships in credential shortage areas and geographic areas with persistent educator workforce needs, including, as applicable, through commission-administered grant programs.

9) Authorizes the CTC and DAS to enter into a memorandum of understanding governing information sharing, application review, data collection, and reporting.

10) Authorizes the CTC to issue apprenticeship certificates or permits to educator candidates who:

a) Are employed by an LEA;

b) Are participating in a CTC-approved educator apprenticeship program; and

c) Have successfully completed credentialing background check requirements.

11) Requires the CTC to adopt regulations implementing the apprenticeship certificate or permit process.

12) Requires applicants seeking approval of a new educator apprenticeship program, or expansion of an existing program into a new credential area or geographic region, to submit specified documentation to DAS demonstrating compliance with program requirements.

13) Requires DAS to submit educator apprenticeship applications to the CTC for review before approval and prohibits DAS from approving a program unless the CTC confirms that statutory requirements have been met.

14) Requires educator apprenticeship programs to be administered through a joint apprenticeship committee, or unilateral management or labor apprenticeship committee, and requires joint sponsorship where a collective bargaining agreement exists.

15) Clarifies that apprentices may simultaneously hold another classified position but may not perform the duties of that separate position during apprenticeship hours.

16) Authorizes DAS to initiate deregistration proceedings if an apprenticeship program's associated preparation or induction program loses CTC accreditation.

17) Authorizes the Chief of DAS, in consultation with the CTC, to adopt rules and regulations governing educator apprenticeship programs, including approval standards, program administration, evaluations, working conditions, and minimum standards.

18) Requires the CTC's annual report to the Legislature and Governor regarding teacher availability to include the number and percentage of individuals serving pursuant to an apprenticeship certificate or permit, including specified information regarding those individuals.

19) Specifies that the act does not apply to apprenticeship programs in the education field that do not result in a credential issued by the CTC.

Comments

1) *Need for the bill.* According to the author, "AB 1904 aims to address the ongoing teacher shortage by establishing the California Teacher Residency Apprenticeship Program, a pathway that helps schools recruit and train teachers from the communities they serve. This approach can be especially impactful in high-need schools serving low-income families, many of which are located in Assembly District 65. One of the primary barriers preventing aspiring teachers from entering the profession is the high cost of obtaining a teaching credential. AB 1904 would help alleviate these financial barriers by allowing prospective teachers to earn while they learn through paid, on-the-job training and mentorship from experienced educator. Additionally, the bill would align California's existing teacher residency programs with a federal and state apprenticeship framework, enabling participating programs to leverage both federal and state funding. This approach would expand resources available to

train and support future educators while strengthening long-term teacher pipelines for California's schools."

2) *Continued investments in multiple educator workforce strategies.* California continues to face staffing challenges in certain credential areas, particularly special education, bilingual education, and other hard-to-staff assignments. In response, the Legislature has invested in a variety of initiatives intended to recruit, prepare, and retain educators, including teacher residency grants, classified employee teacher credentialing programs, Golden State Teacher Grants, and other teacher pipeline efforts.

   This measure represents the latest in a series of proposals intended to expand workforce-based approaches to educator preparation. Similar educator apprenticeship measures have been introduced in recent legislative sessions, reflecting ongoing interest among education, labor, and workforce-development stakeholders in creating additional pathways into the teaching profession. Unlike traditional educator preparation models, apprenticeship programs are generally structured around an "earn while you learn" framework that allows participants to receive compensation while completing training requirements. Proponents argue that such models may help address financial barriers that discourage otherwise qualified individuals from pursuing a teaching career.

3) *Continued investment in teacher residency programs.* Over the last several years, the Legislature has made teacher residency programs a central component of its educator workforce strategy. Teacher residencies are intended to provide candidates with extensive clinical practice, mentoring, and financial support while completing their preparation requirements, particularly in shortage fields such as special education, bilingual education, STEM, and transitional kindergarten.

   Since 2018, the state has appropriated hundreds of millions of dollars to support teacher residency programs. Most recently, the Governor proposed an additional $250 million one-time Proposition 98 augmentation for the Teacher Residency Grant Program, and the Senate Budget Subcommittee on Education recently approved that proposal as part of its budget package. If ultimately adopted, the augmentation would represent a substantial additional state investment in residency-based educator preparation.

   These ongoing investments reflect a legislative belief that reducing financial barriers and strengthening clinical preparation can improve educator recruitment, preparation, and retention. The continued expansion of residency

funding provides important context for evaluating this bill and its proposed apprenticeship framework.

4) *Relationship between teacher residencies and educator apprenticeships.* This bill raises a broader policy question regarding how educator preparation programs should be structured and funded in the future. While teacher residencies and registered apprenticeships originate from different policy arenas, education and workforce development, they share many common characteristics, including paid work-based learning, structured mentoring, and partnerships between employers and training providers.

   Supporters argue that educator apprenticeships could complement existing residency programs by connecting educator preparation to California's workforce development infrastructure and potentially creating access to additional funding streams, technical assistance, and support services. Under this view, apprenticeship designation may represent less of a new preparation model and more of an opportunity to build upon and strengthen existing workforce development efforts.

   As California continues to invest in teacher residency programs, policymakers may wish to consider whether educator apprenticeships should operate as a separate preparation pathway or as a complementary framework layered onto existing residency investments. The answer may have implications for how future educator workforce investments are coordinated across the state's education and workforce systems.

5) *This bill is primarily about governance and infrastructure.* Although this bill is framed as creating educator apprenticeships, it does not establish a new credential, modify credentialing standards, or alter existing requirements for becoming a teacher. Rather, the bill establishes a framework through which educator preparation programs may participate in California's apprenticeship system.

   The measure formalizes a partnership between the CTC and DAS, establishes minimum requirements for educator apprenticeship programs, authorizes the issuance of apprenticeship certificates or permits, and creates a process for program approval, oversight, and monitoring. As a result, the primary policy question presented by the bill is not whether educator candidates should satisfy different preparation requirements, but whether California's educator preparation system would benefit from greater integration with the state's workforce development infrastructure.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The CTC estimates General Fund costs of $419,000 in the first year and ongoing costs of $413,000 to support 3.0 additional positions to implement various activities associated with establishing and overseeing educator apprenticeship pathways that lead to a credential.

- The Department of Industrial Relations estimates General Fund costs of $450,000 in the first year and $425,000 ongoing to comply with the bill's requirements.

SUBJECT: Health care coverage: home test kits

SOURCE: Author

DIGEST: This bill requires health plans, insurers, and Medi-Cal to provide coverage without cost-sharing for cervical cancer screening when ordered or provided by an in-network provider consistent with nationally recognized clinical guidelines, instead of annually, and includes coverage for cervical cancer screening test kits that allow patients to self-collect at a location outside of a clinical setting that is ordered by the patient's health care provider .

Senate Floor Amendments of 8/21/26 replace "nationally recognized clinical guidelines" with any relevant recommendations published by the California Department of Public Health (CDPH), as specified. Exempt vision-only, dental-only, or Medicare supplement health plan contracts and insurance policies, as well as Medi-Cal managed care plan contracts, as specified. Remove provisions from this bill regarding billing codes home test kits for sexually transmitted diseases. Make cervical cancer screening tests under Medi-Cal subject to medical necessity and utilization management controls, to the extent required or permitted by federal law. Make cervical cancer screening test kits for screening that allow patients to self-collect samples covered subject to medical necessity and utilization

management controls. Require cervical cancer screening test kits covered under Medi-Cal to be ordered or provided by a patient's health care provider and to be consistent with recommendations published by CDPH, and Medi-Cal policies. Require Medi-Cal reimbursement for a cervical cancer screening test kit to use a clinically appropriate Current Procedural Terminology or Healthcare Common Procedure Coding System billing code in order to comply with Health Insurance Portability and Accountability Act requirements. Indicate Medi-Cal coverage for cervical cancer screening test kits is a covered benefit only to the extent that federal financial participation is available and not otherwise jeopardized and any necessary federal approvals have been obtained. Permit DHCS to implement, interpret, or make specific this coverage by means of all-county letters, plan letters, plan or provider bulletins, or similar instructions.

ANALYSIS:

Existing law:

1) Establishes the Department of Managed Health Care (DMHC) to regulate health plans under the Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene Act) and the California Department of Insurance (CDI) to regulate health insurance. [Health and Safety Code (HSC) §1340, et seq. and Insurance Code (INS) §106, et seq.]

2) Requires every individual and group health plan contract, except specialized health plans, and a disability insurance policy that covers hospital, medical, or surgical benefits to provide coverage for an annual cervical cancer screening test (includes conventional Pap test, federal Food and Drug Administration (FDA)-approved human papillomavirus (HPV) screening test, and the option of any cervical cancer screening test approved by the FDA) upon the referral of the patient's physician and surgeon, a nurse practitioner, or a certified nurse-midwife, providing care to the patient and operating withing the scope of practice otherwise permitted for the licensee. Permits application of a deductible or copayment in an existing plan contract. [HSC §1367.66 and INS §10123.18]

3) Establishes the Medi-Cal program, administered by the Department of Health Care Services (DHCS), under which qualified low-income individuals receive health care services. [Welfare and Institutions Code (WIC) §14000, et seq.]

4) Establishes a schedule of benefits under the Medi-Cal program, which includes benefits required under federal law and benefits provided at the state's option, both of which are funded with federal and state dollars. The schedule of

benefits includes annual cervical cancer tests for screening or diagnostic purposes, upon the referral of a patient's physician, to the extent required or permitted by federal law, and home test kits for STDs, including any laboratory costs of processing the kit, that are deemed medically necessary or appropriate and ordered directly by an enrolled provider or furnished through a standing order for patient use based on clinical guidelines and individual patient needs. [WIC §14132 and §14132.17]

5) Requires a group or individual non-grandfathered (plans after the federal Affordable Care Act (ACA)) health plan contract or health insurance policy to, at a minimum, provide coverage without cost-sharing for the following (this is based on the ACA preventive services requirements):
   a) Evidence-based items or services that had in effect on January 1, 2025, a rating of "A" or "B" in United States Preventative Services Task Force (USPSTF) recommendations, as periodically updated or any modification or supplement to that recommendation adopted by the California Department of Public Health (CDPH), as specified;
   b) Additional preventive care and screenings for women not described in a) above as provided for in comprehensive guidelines supported by the Health Resources and Services Administration (HRSA), as specified, in effect on January 1, 2025, or any modification or supplement to that recommendation adopted by CDPH; and,
   c) Current USPSTF recommendations regarding breast cancer screening, mammography, and prevention in effect on January 1, 2025, or any modification or supplement to that recommendation adopted by CDPH. [HSC §1367.002 and INS §10112.2]

6) Permits CDPH to modify or supplement baseline recommendations from entities described above that were in effect on January 1, 2025, and requires CDPH to publish any modifications or supplement and filed with the Secretary of State and published in the California Code of Regulations. [HSC §120164]

This bill:

1) Requires a health plan contract, except a specialized health plan, and a disability insurance policy issued, amended, or renewed on or after January 1, 2027, to provide coverage for cervical cancer screening when ordered or provided by an in-network provider operating within their permitted scope of practice and consistent any relevant recommendations published by CDPH, including FDA-authorized or cleared self-collected cervical cancer screening

kits that allow patients to self-collect samples a location outside of a clinical setting.

2) Prohibits a health plan contract and disability insurance policy from imposing a deductible, coinsurance, copayment, or any other cost-sharing requirement on the coverage provided pursuant to this bill, to the extent the plan does not fail to be treated as a high deductible health plan, under federal law, as specified.

3) Exempts vision-only, dental-only, Medicare supplement health plan contracts or insurance policies, and Medi-Cal managed care plans from 1) and 2) directly above.

4) Requires Medi-Cal to cover cervical cancer tests for screening that are ordered by a patient's health care provider and consistent with any relevant recommendations published by CDPH to the extent required or permitted by federal law, including FDA-authorized or cleared cervical cancer home test kits for screening that are ordered by a patient's health care provider and consistent with Medi-Cal policies and any relevant recommendations published by CDPH. Subjects home test kits for screening to medical necessity and utilization management.

5) Deletes the coverage requirement for annual cervical cancer screening.

Background

According to the author:

> Cervical cancer is the fourth most common cancer among women and is almost always caused by HPV. If caught early, it's highly treatable—but too many Californians, especially those in rural communities and Black and Native populations, face deadly late-stage diagnoses. Cervical cancer screenings have cut deaths by about 70% since 1950, but many people still do not get tested because they lack coverage or cannot easily access a clinic. Recent federal guidance has confirmed the importance of expanding access to cervical cancer screenings by requiring private health plans to cover at-home test kits beginning in 2027. CDPH has not yet adopted these federal guidelines, leaving Californians without this life-saving care. This bill will require coverage of at-home cervical cancer tests at no cost to patients, making preventive care affordable, promoting early detection, and reducing health disparities. This bill also offers significant long-term cost savings for the state, health systems, and insurers by reducing the need for in-person visits and preventing costly late-stage cancer treatments.

USPSTF recommendation. The USPSTF, with an A rating, recommends screening for cervical cancer every three years with cervical cytology alone in women ages 21 to 29 years and then every five years with clinician- or patient-collected high-risk HPV primary screening in women ages 30 to 65 years. As an alternative to HPV primary screening for women ages 30 to 65 years, the USPSTF recommends continued screening every three years with cervical cytology (Pap test) alone or screening every five years with high-risk HPV testing in combination with cytology (cotesting).

HRSA recommendation. HRSA adopted the Women's Preventive Services Initiative recommendation for cervical cancer screening for average-risk women aged 21 to 65 years. For women aged 21 to 29 years, cervical cancer screening using Pap test (cytology) every three years is recommended. Co-testing with cytology and high-risk HPV testing is not recommended for women younger than 30 years. Women aged 30 to 65 years should be screened with primary high-risk HPV testing every five years or cytology and high-risk HPV testing every five years. If high risk HPV testing is not available, continue screening with cytology alone every three years. Women who are at average risk should not be screened more than once every three years. Patient-collected high risk HPV testing is an appropriate method and should be offered as an option for cervical cancer screening in women aged 30 to 65 years at average risk. Additional testing may be required to complete the screening process and follow-up findings on the initial screening. If additional testing (e.g., cytology, biopsy, colposcopy, extended genotyping, dual stain) and pathologic evaluation are indicated, these services also are recommended to complete the screening process for malignancies. Non-grandfathered group health plans and health insurance issuers offering group or individual health insurance coverage must cover without cost-sharing the services and screenings listed on the updated Women's Preventive Services Guidelines for plan/policy years that begin one year after this date.

CDPH. CDPH endorses the recommendations of the USPSTF as they stood on January 1, 2025, and HRSA published updates regarding cervical cancer screening for average-risk people on January 5, 2026, with a clarifying addition to align with the American Cancer Society. The CDPH endorsed recommendations are described below and will be published (with potential updates) by CDPH before February 1, 2027. California regulated health plans and insurers are expected to cover these services without cost-sharing by February 1, 2027:

- Age 21-29 years - Cervical cytology every 3 years.
- Age 30-65 years - Primary high-risk Human Papillomavirus (hrHPV) testing is preferred.

  - Clinician collected hrHPV or co-testing (hrHPV plus cervical cytology) every five years.
  - If hrHPV testing is not available, cervical cytology (alone) every three years.
  - Self-collected hrHPV testing should be offered as an alternative to clinician collected hrHPV testing in order to increase screening rates and improve health equity.
  - Screening after a negative self-collected hrHPV test should be repeated in three years (American Cancer Society 2025).
- Additional testing that may be required to complete the screening process and follow-up screening findings are recommended and should be covered without cost-sharing.
- Implementation, systems and infrastructure support for self-collection screening and follow-up testing outside of the clinical setting should be considered.

California Health Benefits Review Program (CHBRP) report. Key findings include:

- *Cervical cancer screening.* Cervical cancer screening detects precancerous changes in cervical cells so that treatment can prevent the development of invasive cancer. The three primary methods of testing are: 1) HPV testing which checks cells for infection with high-risk HPV types of cells; 2) Cytology or Pap testing, where cervical cells are checked for abnormalities caused by HPV. Pap testing does not detect high risk HPV; and, 3) HPV/Pap co-test which tests for both abnormal cells and high-risk HPV infection. There are three FDA approved tests for self-collection in a clinic or office, and two self-collection tests for home: one is FDA authorized, and one is FDA cleared. CHBRP reports 25% of women in the U.S. are under screened and 2% require more frequent screening due to abnormal results or immunosuppression. Studies have also found 41% of women screened with Pap tests, 51% with co-testing, and 9% with HPV testing were over-screened.
- *Coverage impacts and enrollees covered.* CHBRP indicates that 40% of enrollees in state regulated health insurance have coverage without cost-sharing for home test kits.
- *Medical effectiveness.* According to CHBRP, the scientific consensus and pooled data indicate very strong evidence that, when instructions are properly followed, self-samples provide accurate, stable, and clinically valid HPV detection suitable for future widespread home-based screening. Currently, the Teal Wand is the only FDA-authorized home test kit for cervical cancer screening for use at the time of the CHBRP report. The Teal Wand can be requested online through the Teal Health website. Ordering the kit requires

attending a virtual visit with a Teal provider to review the patient's screening history and discuss the at-home screening steps. The test kit is mailed and returned once the sample is collected. Virtual consultation to discuss follow-up care is available through Teal Health. A second product has been cleared by the FDA, BD Onclarity HPV Assay, in April 2026. CHBRP also indicates that some health systems in California are planning their own self-collection screening programs outside of the Teal mechanism, using their own laboratories and mailing infrastructure.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, unknown costs, potentially hundreds of thousands to low millions, in the Medi-Cal program due to increased utilization of cervical cancer screenings (General Fund and federal funds).

Unknown costs for DMHC for state administration (Managed Care Fund).

CDI estimates costs of $7,000 in 2026-27 and $19,000 in 2027-28 for state administration (Insurance Fund).

Unknown ongoing General Fund costs, likely minor, due to increased California Public Employees' Retirement System plan premiums.

OPPOSITION: (Verified 8/21/26)

America's Health Insurance Plans

ARGUMENTS IN SUPPORT: American College of Obstetricians & Gynecologists (ACOG) writes this bill addresses barriers by ensuring coverage of clinician-referred home screening options, which can increase screening uptake, particularly among underserved and hard-to-reach populations. According to ACOG, by requiring coverage without cost-sharing across both commercial markets and Medi-Cal, this bill promotes equitable access to lifesaving preventive care, and early detection of cervical cancer and precancerous conditions significantly improve outcomes, reduces the need for more invasive treatment, and lowers long-term health care costs. ACOG writes this bill maintains the role of the patient's health care provider in recommending and guiding appropriate screening, ensuring continuity and quality of care.

ARGUMENTS IN OPPOSITION: The Association of Health Insurance Plans writes that this is one of ten health insurance mandate bills that will increase costs, reduce choice and competition, and further incent some employers and individuals to avoid state regulated coverage by seeking alternative coverage options.

SUBJECT: California Health Benefit Exchange

SOURCE: Author

DIGEST: This bill expands automatic enrollment from Medi-Cal to Covered California by also allowing people who apply for insurance affordability programs through the Statewide Automated Welfare System and who are eligible for financial assistance to be notified of requirements and be enrolled in specified low-cost health insurance plans as determined by Covered California. Revises open enrollment and effective dates if inconsistent with federal law.

ANALYSIS:

Existing law:

1) Establishes the Medi-Cal program, administered by the Department of Health Care Services (DHCS), under which qualified low-income individuals are eligible for medical coverage. [Welfare & Institutions Code (WIC) §14000, et seq.]

2) Establishes Covered California as an independent entity in state government, not affiliated with any state agency or department, governed by a five-member board. Requires Covered California to establish and use a competitive process to select qualified health plans (QHPs) and other contractors. [Government Code (GOV) §100500 -100522]

3) Requires, for individuals determined ineligible for Medi-Cal, a county to determine eligibility for other insurance affordability programs and if the individual is found to be eligible, transfer the individual's electronic account to other insurance affordability programs via a secure electronic interface. This electronic interface is known as the California Healthcare Eligibility, Enrollment and Retention System (CalHEERS). [WIC §14005.37]

5) Requires an entity making eligibility determinations for an insurance affordability program, during the processing of an application, renewal, or a transition due to a change in circumstances, to ensure that an eligible applicant, who meets all program eligibility requirements and complies with all necessary requests for information, moves between programs without any breaks in coverage and without being required to provide duplicative information or verification. Requires the individual to be informed about how to obtain information about the status of their application, renewal, or transfer to another program at any time, and that the information must be provided promptly when requested. [WIC §15926]

6) Requires Covered California, upon receipt of an individual's information from the insurance affordability program, to use the available information to enroll the individual or individuals in the lowest cost silver plan available, unless it has information from the county, DHCS, managed care plan, or another plan, that enables it to enroll the individual with their previous managed care plan before the termination date of coverage through the insurance affordability program. [GOV §100503.4]

7) Requires Covered California to provide an individual, who is enrolled pursuant to 6) above, a notice that includes the plan information, the individual's right to select another plan and deadlines for that selection, how to receive assistance to select a plan, the individual's right not to enroll, information on appealing their previous coverage through an insurance affordability program, and, a statement that services during the first month of enrollment will only be covered if the premium is paid by the due date. [GOV §100503.4]

This bill:

1) Makes existing law, which requires Covered California to enroll people no longer eligible for Medi-Cal into the lowest cost silver plan, inoperative on July 1, 2027, and replaces it with 2) through 4) below.

2) Requires, commencing July 1, 2027, Covered California, upon receipt of an individual's electronic account, as specified, or upon receipt of a complete application for an insurance affordability program submitted through the Statewide Automated Welfare System (SAWS), to use the available information to enroll the individual or individuals determined eligible for financial assistance within required timelines in one of the following:
   a) The lowest silver plan available;
   b) The plan in which other members of the modified adjusted gross income household are enrolled;
   c) The lowest cost plan available to an Indian, as defined, eligible for the reduced cost-sharing specified in federal law; or,
   d) If Covered California has information from the County, DHCS, the managed care plan, or another plan as determined by Covered California, Covered California to enroll the individual in a plan offered by the individual's previous managed care plan.

3) Requires plan enrollment to occur before the termination date of coverage through the insurance affordability program or upon receipt of the complete application for an insurance affordability program through SAWS.

4) Requires Covered California to provide an individual who is enrolled in a plan pursuant to this bill with a notice prior to the individual's effective date of coverage that includes specified information, such as: the plan in which the individual is enrolled; the right to select another available plan and relevant deadlines; how to receive assistance selecting a plan; the right not enroll in a plan; information about appealing their previous coverage; and, instructions on how to effectuate coverage and premium payment deadlines.

5) Changes the annual open enrollment period and effective dates for policy years beginning January 1, 2027; to be consistent with specified federal rules to the extent those federal rules are inconsistent with California annual open enrollment and effective dates.

Comments

According to the author of this bill: "In recent years, the introduction of auto-enrollment greatly boosted California's mission to ensure total health coverage for its residents. Despite this progress, changes in healthcare at the federal level will cause up to 3.4 million Californians to lose coverage. This bill will help connect people with affordable coverage plans based on the information they have already submitted, thus streamlining the process and reducing gaps in coverage. This bill is the next step towards ensuring that no Californian falls through the cracks when it comes to obtaining and maintaining not just the health care they can afford, but the health care they deserve."

Background

Auto enrollment. California's insurance affordability programs have implemented several automated enrollment systems to assist a consumer to streamline the process of moving from one program to another. SB 260 (Hurtado, Chapter 845, Statutes of 2019) created automatic plan selection for subsidized Covered California coverage. Through SB 260, Covered California automatically assigns a health plan to a consumer who loses Medi-Cal coverage and gains eligibility for subsidized Covered California coverage. The consumer is then enrolled in the lowest cost silver plan available. When possible, a consumer may be automatically enrolled in the same health insurance plan as their previous Medi-Cal managed care plan to maintain continuity of coverage and care. Records indicate that since this program was implemented in 2023, more than 200,000 consumers have been successfully auto enrolled into Covered California health coverage. Covered California reports that among those who enrolled, 70% kept the default plan and close to 90% remained in the silver coverage tier. More than three-quarters of consumers who transitioned to Covered California did so without a gap in coverage. More than two-thirds of those who transitioned were from communities of color and close to 20% were Spanish-speakers. Lastly, 80% found the sign-up process easy.

Federal policy changes. Recently approved federal marketplace integrity regulations and budget reconciliation legislation will have an impact on Covered California enrollment for eligible individuals with the imposition of onerous eligibility verification processes and the elimination of annual automatic renewal processes. Covered California indicates for the 2025 coverage year, about 73% of enrollees (1.2 million people) automatically renewed coverage. Covered California indicates the 2025 Marketplace Integrity and Affordability Final Rule does not affect the SB 260 auto-enrollment process nor would it impact the process

proposed in this bill. Covered California is reviewing the budget reconciliation bill to evaluate its potential effects on existing programs but does not foresee any immediate impact on this bill.

Open enrollment and effective dates. The open enrollment period for the individual market, including coverage offered both through and outside the Affordable Care Act exchanges, is governed by federal regulations. Previously, the federal regulations required the annual open enrollment period to begin on November 1 of the calendar year preceding the benefit year and extend through January 15 of the benefit year, although a state exchange could adopt a later end date after January 15. The federal final Marketplace Integrity and Affordability Rule, issued on June 25, 2025, changed the open enrollment period dates for benefit years beginning on or after January 1, 2027. Under the amended federal regulations, all exchanges must begin the annual open enrollment period no later than November 1 and end it no later than December 31 of the calendar year preceding the benefit year, and the period may not exceed nine weeks in duration. For those same benefit years, coverage must be effective January 1 for plan selections received on or before December 31 of the preceding calendar year. However, this policy is currently the subject of two federal lawsuits, including one brought by a multistate coalition that includes California. On June 12th in the City of Columbus v. Kennedy, a U.S. District Court vacated the shortened annual open enrollment period for the 2027 plan year. With this ruling, Covered California will maintain a full three-month open enrollment period starting November 1 through January 31.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, Covered California estimates costs of approximately $500,000 (California Health Trust Fund) in CalHEERS-related costs for the system modifications necessary to support the expansion of the auto-enrollment program. In addition, Covered California anticipates minimal expenditures associated with marketing and communications efforts to educate newly auto enrolled consumers.

Unknown costs, likely minor, for DMHC for state administration (Managed Care Fund).

CDI indicates no fiscal impact for state administration.

OPPOSITION: (Verified 8/14/26)

None received

ARGUMENTS IN SUPPORT: Health Access California writes this bill will help enroll more people into affordable Covered California plans by expanding the auto enrollment process to include not only people who are losing Medi-Cal coverage but also those who apply but do not qualify for Medi-Cal. Health Access indicates Covered California is the only place where Californians who qualify can get financial assistance on a sliding scale to reduce premium costs. The Local Health Plans of California (LHPC) write that this bill allows for enrollment not only in the lowest cost silver plan but also into plans that better reflect family alignment or enhanced cost-sharing options. Additionally, LHPC writes this bill also strengthens notice requirements by ensuring enrollees receive clear, actionable instructions prior to coverage taking effect, including how to activate coverage through premium payment or opt-in steps. The California Pan-Ethnic Health Network writes that extra steps can create confusion and uncertainty which can be a barrier for some consumers and believes this bill will help enroll more people into affordable health coverage.

SUBJECT: State Fire Marshal: home hardening certification program implementation plan

SOURCE: Author

DIGEST: This bill directs the Wildfire Mitigation Advisory Committee (WMAC) within the Office of the State Fire Marshal (OSFM) to develop an implementation plan for a home hardening certification program by January 1, 2028.

ANALYSIS:

Existing law:

1) Establishes the OSFM within the Department of Forestry and Fire Protection (CAL FIRE) to protect life and property through the development and application of fire prevention, engineering, training and education, and

enforcement.

2) Establishes the WMAC within the OSFM to provide a public forum to solicit and consider public input on community wildfire preparedness and fire mitigation, and advise on the development and implementation of programs under the Deputy Director of Community Wildfire Preparedness and Mitigation.

3) Requires the OSFM to develop and make available on its internet website a Wildland-Urban Interface (WUI) Fire Safety Building Standards Compliance training intended for use in the training of local building officials, builders, and fire service personnel, as specified.

4) Requires the OSFM to develop and update a WUI Products listing of products and construction assemblies that comply with prescribed regulations regarding building in a WUI area.

5) Requires the California Office of Emergency Services (Cal OES) to enter into a joint powers agreement (JPA) with CAL FIRE, until July 1, 2029, to develop and administer a comprehensive wildfire mitigation program (CWMP) to, among other things, encourage cost-effective structure hardening and retrofitting to create fire-resistant homes, businesses, and public buildings.

6) Specifies areas eligible for financial assistance under the CWPM to include areas located within fire hazard severity zones and any other lands designated by the JPA, as specified.

7) Requires the JPA to develop eligibility criteria for property owners, community organizations, and local governments that may receive financial assistance under the CWMP.

This bill:

1) Directs, on or before January 1, 2028, the WMAC to develop an implementation plan for a home hardening certification program that identifies home hardening measures, including defensible space, that can be voluntarily implemented during renovation or property improvement projects to substantially reduce the risk of loss during a fire and bring existing building stock into alignment with the California Building Standards Code.

2) Directs the WMAC to provide recommendations in the implementation plan that include, but are not limited to, the following:

   a) Multiple tiers of home hardening certification with at least one tier defined as ember resistant and requires the minimum tier for any voluntary home hardening certification to meet specified criteria.
   b) Identifying the qualifications necessary for individuals tasked with inspecting a home and confirming its compliance, as specified.
   c) The length of time that a certification is valid.
   d) Implementation steps.

3) Requires, by January 1, 2028, the WMAC to provide a report to the relevant policy committees of the Legislature on its findings and recommendations pursuant to this bill.

4) Directs, by January 1, 2029, the OSFM to establish and implement the certification program based on the recommendations in the WMAC's implementation plan.

Background

Home hardening. According to CAL FIRE, home hardening is a method of utilizing construction features, building materials, and maintenance practices intended to increase a building and structure's resistance to ignition from fire exposure, including direct flame contact, radiant heat and embers. Home hardening includes using fire-resistant building materials, adopting safe landscaping practices, and implementing preventative measures to reduce fire risk and enhance property safety. CAL FIRE has information on its website relating to how various components of a home can be vulnerable to fire, whether it is the roof, gutters and vents or the exterior siding, windows, and/or a deck and fence, and provides recommendations to homeowners to minimize those risks.

Defensible space. The University of California Fire Network describes defensible space as the area adjacent to a structure where vegetation and other combustible materials are carefully located and maintained to provide defense from an approaching wildfire burning or to minimize the spread of a structure fire to wildlands or surrounding areas. The purposes of defensible space are to minimize fire pathways to the structure, reduce potential heat exposures to structure components, reduce the potential for embers to ignite materials adjacent to the structure, and provide a safe place for fire personnel to defend the structure and

allow evacuation. Adequate defensible space acts as a barrier to slow or halt the progress of fire that would otherwise engulf a property.

Chapter 7A of the California Building Standards Code. Chapter 7A is California's WUI building code. This chapter establishes the minimum standards applicable to building materials, systems and/or assemblies used in the exterior design and construction of new buildings located within a WUI fire area for the protection of life and property. Chapter 7A was initially adopted in 2008 and has undergone multiple revisions as part of the code development process to incorporate the most recent insights and scientific advancements from technical experts in the field.

The CWMP. AB 38 (Wood, Chapter 391, Statutes of 2019) directs Cal OES and CAL FIRE to jointly create and administer the CWMP to strengthen community-level wildfire hardening. The program has leveraged hazard mitigation grant funding from the Federal Emergency Management Agency to develop a wildfire community hardening framework and establish pilot home hardening programs in socially vulnerable communities at high risk of wildfires in the counties of Lake, San Diego, Shasta, El Dorado, Tuolumne, and Siskiyou. The framework incorporates lessons learned from the pilot counties and is intended to be a living document that will be continuously updated throughout the duration of the CWMP.

The WMAC. The WMAC provides a forum for the OSFM, representatives of industry, state agencies, the fire service, and other stakeholders to address wildfire preparedness and mitigation issues of statewide concern, share best practices, seek comments and technical input on specific programs, and inform local agencies and the public of applicable new laws and regulations. WMAC acts in an advisory capacity on the programs and activities of the OSFM's Community Wildfire Preparedness and Mitigation Division.

This bill requires the WMAC to develop a plan with recommendations for implementing a home hardening certification program by January 1, 2028, and further directs the OSFM to establish the certification program based on the WMAC's recommendations no later than January 1, 2029. As noted by the author, homeowners can only rely on private certifications currently when hardening their home and this bill seeks to begin the process of establishing a statewide certification framework.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, CAL FIRE reports costs of approximately $6.9 million in year one, $12.3 million in year two, $17 million in

year three, $19.2 million in year four, and $20.1 million in year five and ongoing to establish and implement the certification program (General Fund).

ARGUMENTS IN SUPPORT: In support of this bill, the California State Association of Counties writes that, "California local governments support the establishment of a statewide home hardening certification program because it would provide a clear, science-based standard for reducing wildfire risk to existing homes, strengthening community resilience while helping residents make informed investments in safety. A uniform certification would also improve eligibility for insurance incentives; however, property-level and communitywide wildfire risk mitigation efforts still need to be accounted for in insurance rates and formalized in an update to the Safer from Wildfires regulations. By lowering structure loss during wildfires, home hardening ultimately protects lives and reduces the long-term public costs of disaster response and recovery."

SUBJECT: Unlawful practices: discrimination: menopause

SOURCE: California Commission on the Status of Women and Girls

DIGEST: This bill adds, to the definition of "sex" within the California Fair Employment and Housing Act (FEHA), perimenopause, menopause, or postmenopause, or medical conditions related to perimenopause, menopause, and postmenopause; and provides that "medical conditions," as used in connection with perimenopause, menopause, and postmenopause include, but are not limited to, the existing definition of "medical condition" within FEHA.

Senate Floor Amendments of 8/21/26 add contingent enactment language to avoid a conflict with AB 2563 (Pacheco).

ANALYSIS:

Existing law:

1) Establishes the FEHA, which makes it an unlawful employment practice, unless based upon a bona fide occupational qualification, or, except where based upon applicable security regulations, for an employer, on the basis of a person's protected characteristics, to refuse to hire or employ the person or to refuse to select the person for a training program leading to employment, or to bar or to discharge the person from employment or from a training program leading to employment, or to discriminate against the person in compensation or in terms, conditions, or privileges of employment. (Government (Gov.) Code, § 12940.)

2) Provides that the protected characteristics under FEHA are: race, religious creed, color, national origin, ancestry, physical disability, mental disability, reproductive health decision making, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or veteran or military status. (Gov. Code, § 12940.)

3) Defines the following relevant terms within the FEHA:
   a) "Employer" includes any person regularly employing five or more persons, with specified exceptions for religious associations and nonprofit organizations.

   b) "Medical condition" means either (1) any health impairment related to, or associated with, a diagnosis of cancer or a record or history of cancer, or (2) genetic characteristics, as defined.

   c) "Reasonable accommodation" may include either of the following: (1) making existing facilities used by employees readily accessible to, and useable by, individuals with disabilities; or (2) job-restructuring, part-time or modified work schedules, reassignment to a vacant position, acquisition or modification of equipment or devices, adjustment or modifications of examinations, training materials, or policies, the provision of qualified readers or interpreters, and other similar accommodations for individuals with disabilities.

   d) "Sex" includes, but is not limited to, all of the following:

      i) Pregnancy or medical conditions related to pregnancy.

ii) Childbirth or medical conditions related to childbirth.

iii) Breastfeeding or medical conditions related to breastfeeding.

iv) A person's gender, which means sex, and includes a person's gender identity and gender expression; "gender expression" means a person's gender-related appearance and behavior whether or not stereotypically associated with the person's assigned sex at birth. (Gov. Code, § 12926.)

4) Requires the Civil Rights Department (CRD) to create a poster on discrimination in employment and the illegality of sexual harassment that sets forth specified information, which an employer must post in a prominent and accessible location in the workplace. (Gov. Code, § 12950.)

This bill:

1) Provides that the definition of "sex" within the FEHA includes perimenopause, menopause, or postmenopause or medical conditions related to perimenopause, menopause, and postmenopause.

2) Provides that "medical condition," as used in connection with 1), includes, but is not limited to, the conditions included in the FEHA's definition of "medical condition."

3) Requires the CRD, on or before July 1, 2027, to update its employment discrimination and sexual harassment poster to notify people of their rights and protections in regard to perimenopause, menopause, or postmenopause or medical conditions related to perimenopause, menopause, or postmenopause.

4) Adds contingent enactment language to avoid a conflict with AB 2563 (Pacheco, 2026).

Comments

The FEHA protects against discrimination on the basis of specified characteristics in employment and housing. Protected characteristics include sex, which includes pregnancy, gender, and gender identity, and age, beginning with persons aged 40 years or older. The FEHA also prohibits discrimination on the basis of an intersection of protected characteristics.

This bill expressly adds "perimenopause, menopause, or postmenopause, or medical conditions related to perimenopause, menopause, and postmenopause" to the FEHA's definition of "sex." While these characteristics should already be

covered under the definition of sex, or as a form of intersectional discrimination combining sex and age, this bill is intended to remove any ambiguity and to make clear that employees experiencing menopause are protected even if their menopause symptoms are not so severe that they qualify as a disability or medical condition under the FEHA. Additionally, this bill provides that medical conditions relating to perimenopause, menopause, and postmenopause include, but are not limited to, conditions that fall under the FEHA's existing definition of "medical condition." This bill also seeks to expand awareness about menopause-related conditions by requiring the CRD to update posters on discrimination to notify employees of their rights and protections in regard to perimenopause, menopause, and postmenopause.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/21/26)

California Commission on the Status of Women and Girls (source)
American College of Obstetricians and Gynecologists, District IX
California Teachers Association
Menopause Education Center
Two individuals

OPPOSITION: (Verified 8/21/26)

California Apartment Association
California Chamber of Commerce
California Restaurant Association
National Federation of Independent Businesses

ARGUMENTS IN SUPPORT: According to the American College of Obstetricians and Gynecologists, District IX:

> From a clinical standpoint, menopause is not a single event; it is a transition that can last years, often coinciding with a woman's peak professional responsibilities. Many women experience significant symptoms, including hot flashes, sleep disruption, cognitive changes, anxiety, depression, and musculoskeletal pain. These are not trivial inconveniences. They can materially impact a person's ability to perform at work without reasonable support.
>
> Too often, however, these experiences are stigmatized, misunderstood, or dismissed. As a result, women may suffer in silence, reduce their hours, or leave the workforce entirely. That is a loss not only to those individuals, but also to employers and to California's economy.

AB 1940 does two important things. First, it provides legal clarity so that workers experiencing menopause-related conditions are protected from discrimination and have access to reasonable accommodations, just as California law already recognizes protections for pregnancy and related conditions. Second, it promotes education and awareness so employers better understand both their obligations and the practical, low-cost accommodations that can make a meaningful difference, such as flexible scheduling, temperature control, or access to breaks.

Supporting menopausal women in the workplace is not burdensome; it is sound workforce policy. It improves retention, productivity, and equity for a substantial portion of California's workforce.

ARGUMENTS IN OPPOSITION: According to a coalition of this bill's opponents:

We agree that women experiencing symptoms due to perimenopause, menopause, and postmenopause should have protections. Under current law, where menopause-related symptoms rise to the level of a medical condition or disability under FEHA, employers are already required to engage in the interactive process and provide reasonable accommodation where appropriate. *See Sipple v. Crossmark, Inc.*, 2012 WL 2798791 (E.D. Cal. 2012). That framework allows for a conversation between the employee and employer to find an appropriate accommodation and takes into account potential fiscal impacts, especially on small businesses. It also protects employee privacy because employers are prohibited from ever asking what an employee's medical condition is – they are only supposed to know what accommodations are being requested or recommended by a medical professional. FEHA therefore already provides broad remedies and expansive protections for menopause-related conditions, and we are concerned that AB 1940's language will open public and private employers up to litigation as explained below…

By adding perimenopause, menopause, and postmenopause to the definition of "sex" in FEHA, our concern is that this creates a new, automatic basis on which to challenge any adverse employment action rather than keeping those conditions under the accommodation framework as described above. Women ages 35-54 represent roughly 40% of all women participating in California's workforce, making this one of the largest demographic segments of the California labor marker according to Employment Development Department's 2025 Labor Market Report. Because employers are prohibited from asking employees to disclose any medical conditions, employers would effectively

have to assume that 40% of the workforce falls in this new protected category. That would make it difficult for employers to ever take any disciplinary action against an employee who falls in this group out of concern for litigation.

SUBJECT: Wildfire Prevention Grants Program: identified cohesive fire communities

SOURCE: Author

DIGEST: This bill 1) requires the Department of Forestry and Fire Protection (the Department), in consultation with the State Fire Marshal's Wildfire Mitigation Advisory Committee, to establish a wildfire mitigation validation program to provide voluntary official recognition to a community that achieves progress toward community-scale wildfire preparedness and mitigations; 2) authorizes the Department of Forestry and Fire Protection to disburse funds appropriated for the Wildfire Prevention Grants Program to identified communities that partner with fire safe councils to use for activities related to hazardous fuel reduction, wildfire prevention planning, and wildfire prevention education; and 3) requires the Department, commencing with the 2028-29 fiscal year, to prioritize disadvantaged cohesive fire communities.

Senate Floor Amendments of 8/19/26 make conforming changes; and transitioned the proposed "identified cohesive fire community program" to be operated by state or private entities into a specific program at the Department of Forestry and Fire Protection.

ANALYSIS:

Existing law sunsets the California Wildfire Mitigation Program (CWMP) on July 1, 2029.

This bill:

1) Requires the Department of Forestry and Fire Protection (Department), in consultation with the State Fire Marshal (SFM)'s Wildfire Mitigation Advisory Committee (WMAC) to establish a wildfire mitigation validation program to provide voluntary official recognition to a community that achieves progress towards community-scale wildfire preparedness and mitigation.
2) Requires the Department, in consultation with WMAC, to set the wildfire mitigations.
3) Requires the Department, in consultation with WMAC, to set the minimum percentage of mitigations required to achieve recognition in this program and requires the Department to set increases in those percentages to incentivize continued community-scale preparedness.
4) Authorizes the Department, commencing with the 2028-29 fiscal year, to disburse funds appropriated for the Wildfire Prevention Grants Program to recognized communities that partner with fire safe councils or other eligible groups to use for activities related to hazardous fuels reduction, wildfire prevention planning, and wildfire prevention education, among other activities.
5) Specifies that, for the purposes of the Wildfire Prevention Grants Program distribution, a fire safe council shall be the entity the applies to the department for grant funding and receives and manages any awarded funding.
6) Authorizes the Department to award preference to disadvantaged recognized communities pursuant to the Department's established procedures for prioritizing disadvantaged applicants for the Wildfire Prevention Grants Program.
7) Specifies that qualification as a recognized community shall not be used for the purposes of insurance.

Background

Wildfire Prevention Grants. Administered by the Department, the Wildfire Prevention Grants Program funds projects in and near fire threatened communities to improve public health and safety while reducing greenhouse gas emissions.

Home hardening. The Department and California Office of Emergency Services (CalOES) are authorized to enter into a joint powers agreement to administer a Wildfire Mitigation Financial Assistance Program.

Incentivizing individual home hardening. This bill would provide an incentive for individual homeowners to undertake work to harden their home, by providing for a hardened community to be eligible for grants that may further protect their neighborhood from wildfire.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the fiscal analysis reflects a previous version of this bill:

- By authorizing the Department to provide wildfire prevention grants to identified cohesive fire communities (ICFCs) that partner with fire safe councils, and providing that disadvantaged ICFCs receive preference under CalFire's established procedures for prioritizing disadvantaged applicants, this bill would create cost pressures of an unknown amount possibly in the hundreds of thousands to low millions of dollars annually, on the wildfire prevention grant program (General Fund, special fund such as the Greenhouse Gas Reduction Fund [GGRF], or bond funds such as the Proposition 4 climate bond) to the extent there is increased demand for funding from eligible communities.
- The Department reports its administrative costs to implement this bill are absorbable within existing resources.

ARGUMENTS IN SUPPORT: According to the author, "Last year, we watched entire communities destroyed by ferocious wildfires. As California continues to grapple with more frequent, intense, and destructive wildfires, we need to ensure whole neighborhoods won't be decimated. AB 1960 allows CAL FIRE to disperse Wildfire Prevention Grant funding to communities that have reached at least a certain number of homes hardened. This bill incentivizes California's communities to reduce risk together, rather than one home at a time. Through strategic planning, retrofitting, and engagement, Californians will decrease property loss and become more resilient in the face of climate change."

SUBJECT: Juveniles

SOURCE: Alliance for Children's Rights
California Coalition for Youth

DIGEST: This bill modifies the procedures through which a minor can apply to a social worker for a petition, on their own behalf, to find them a dependent of the juvenile court; and permits a nonminor to become a dependent of the juvenile court if their former guardian(s) or adoptive parent(s) receive benefits on their behalf, but the minor no longer receives any support from their former guardian(s) or adoptive parent(s), as specified.

Senate Floor Amendments of 8/21/26 clarify when a nonminor is eligible to become a dependent of the juvenile court in circumstances when they are no longer receiving support from their former guardian(s) or adoptive parent(s); remove

language that may have exceeded requirements under federal law; and add contingent enactment language.

ANALYSIS:

Existing law:

1) Establishes the juvenile court, which has jurisdiction over minors who are suffering or at substantial risk of suffering harm or abuse and may adjudge the minor to be a dependent of the court. (Welfare & Institutions (Welf. & Inst.) Code, § 300.)

2) Permits the juvenile court to retain jurisdiction over any person who is found to be a ward or dependent child of the juvenile court until they attain 21 years of age. (Welf. & Inst. Code, § 303.)

3) Establishes criteria for who qualifies as a nonminor dependent subject to the extended jurisdiction under 2), including that the nonminor attained 18 years of age while under an order of foster care placement and has a transitional independent living case plan. (Welf. & Inst. Code, § 11400(v).)

4) Permits a person to apply to a social worker to commence proceedings in the juvenile court.

   a) The application must be in the form of an affidavit alleging that the child is within the county and falls within the juvenile court's jurisdiction.

   b) The social worker must immediately investigate, as necessary, to determine whether proceedings in the juvenile court should be commenced.

   c) If the social worker does not commence a program of supervision with the consent of the parent or file a petition within three weeks after the application, the social worker shall state their intent not to proceed and the reasons therefor and notify the applicant of that decision. (Welf. & Inst. Code, § 329.)

5) Permits a person who applied to a social worker pursuant to 4), when the social worker declines to commence a program of supervision or file a petition, to, within one month after making the application, apply to the court to review the social worker's decision; the court may affirm the decision of the social worker or, if the court finds that the child is within the jurisdiction of the juvenile court, order the social worker to commence juvenile court proceedings. (Welf. & Inst. Code, § 331.)

6) Permits a nonminor who has not attained 21 years of age to petition the court in which they were previously found to be a dependent or delinquent child of the juvenile court for a hearing to determine whether to assume dependency jurisdiction over the nonminor, provided that the nonminor meets specified criteria. (Welf. & Inst. Code, § 388.1.)

7) Provides, within certain criteria for the assumption of dependency jurisdiction under 6), that a nonminor does not qualify for the assumption of dependency jurisdiction if the nonminor's former guardian(s) or adoptive parent(s) no longer provide ongoing support to, and no longer receive benefits on behalf of, the nonminor after the nonminor attained 18 years of age. (Welf. & Inst. Code, § 388.1(a).)

8) Permits a nonminor who meets the requirements of 6) to enter into a voluntary reentry agreement in order to establish eligibility for foster care benefits before or after filing the petition to assume dependency jurisdiction; if the agreement is made with a placing agency, the agency shall file the petition to dependency jurisdiction on the nonminor's behalf, unless the nonminor elects to file the petition at an earlier date. (Welf. & Inst. Code, § 388.1.(e).)

This bill:

1) Provides that an affidavit in support of an application to a social worker to commence proceedings in the juvenile court may be submitted to the social worker by mail, facsimile, or email.

2) Provides that, if an application to a social worker to commence proceedings in the juvenile court is submitted by the minor on their own behalf or by the minor's attorney, and the minor is currently residing at a residential facility, as defined, for children and youth, the social worker shall, when conducting a safety assessment or substitute care provider safety assessment, also assess the safety of the home of those who hold the custodial rights of the minor.

3) Provides that, if a minor or attorney has applied on the minor's behalf to a social worker to commence juvenile court proceedings and the social worker does not file a petition within three weeks after the petition, and the minor has applied to the juvenile court to review the decision of the social worker, the juvenile court shall review the decision and either affirm the decision or order the social worker to commence juvenile court proceedings within 14 days of the minor's application to the court for review.

4) Eliminates the provisions preventing a nonminor who has not attained 21 years of age, and who otherwise meets the conditions for extended foster care, from petitioning the court to resume dependency jurisdiction over themself if their adoptive parent(s) or former guardian(s) receive specified benefits or payments on the nonminor's behalf; and instead permits such a minor to petition the court to resume dependency jurisdiction if their adoptive parent(s) or former guardian(s) receive benefits for the nonminor, but the minor is no longer receiving any support from their former guardian(s) or adoptive parent(s).

5) Provides that a nonminor may enter into a voluntary reentry agreement to establish eligibility for foster care benefits before or after filing a petition to assume dependency only if one of the two following conditions apply:

   a) The nonminor's former guardian(s) or adoptive parent(s), as applicable, have died.

   b) The nonminor is no longer receiving any support from their former guardian(s) or adoptive parent(s).

6) Permits the Department of Social Services to implement the changes made in 6) by means of all-county letters or similar instructions from the department until January 1, 2028.

7) Makes nonsubstantive technical and conforming changes.

8) Adds contingent enactment language to avoid a conflict with AB 2764 (Ahrens, 2026).

Comments

California's foster care system provides temporary care for children who have been removed from their homes due to neglect or abuse. Through extended foster care, youths who would otherwise "age out" of the system when they turn 18 may voluntarily remain in the system from 18 to 21 and thus receive support, housing, and educational or employment assistance while transitioning to independent living.

According to the author and sponsor, some of the most at-risk youth and minors currently face barriers to obtaining foster benefits. When a youth who is living in a homeless shelter requests that a social worker investigate and file a dependency petition on their behalf, current law is not clear that the social worker's

investigation must include an investigation into the youth's original home (i.e., the circumstances that caused them to leave and go to the shelter). Current law also puts the burden on a person who seeks an investigation by a social worker to seek judicial review if the social worker declines to file a petition. With respect to nonminor dependents, current law prohibits a nonminor from petitioning for entry into extended foster care if their guardian or adoptive parent is receiving specified benefits on their behalf; unfortunately, sometimes the guardian or adoptive parent does not actually pass those benefits onto the nonminor, leaving the nonminor stuck without support and without a path back into extended foster care.

This bill seeks to make it easier for minors and eligible nonminors to access foster care services by; (1) requiring a more timely and more appropriately focused child welfare investigation whenever a minor who, while living in a residential facility, seeks to enter foster care through self-petition; and (2) ensuring that a nonminor is not precluded from extended foster care when a former guardian or adoptive parent continues to collect benefits for the nonminor, but the nonminor is not actually receiving any support from that guardian or adoptive parent. Recent floor amendments removed the provisions requiring the court to terminate benefits provided to an adoptive parent or guardian, because those provisions may have exceeded the requirements under federal law; as amended, dependency courts will follow federal law regarding benefits termination.

ARGUMENTS IN SUPPORT: According to the Alliance for Children's Rights and the California Coalition for Youth:

> AB 1967 will improve upon the existing referral pathway for anyone who suspects that a youth has been the victim of abuse or neglect when the petition is made by the youth themselves to prevent them from falling through the cracks. AB 1967 will support older youth access the supports and services of extended foster care, if they choose to self-petition for entry into foster care, by requiring county social workers to review the circumstances in the home of the youth, rather than a youth shelter or group home, if the youth is not living at home when determining whether to open a juvenile dependency case. In addition, by requiring the juvenile court to review the decision and either affirm the decision or order the social worker to commence juvenile court proceedings within 14 days of the minor's application to the court for review, if a minor has applied on their own behalf to the social worker to commence juvenile court proceedings, and the social worker does not file a petition within three weeks after the application, and the minor has applied to the juvenile court to review the decision of the social worker.
>
> AB 1967 will also support older youth in failed adoptions or guardianships access the supports and services of extended foster care, if they choose to voluntarily reenter foster care by:
>
> - suspending the payment to the adoptive parent or guardian when they are not providing support to a nonminor, and
> - allowing the nonminor to enter into extended foster care under a voluntary reentry agreement.

ARGUMENTS IN OPPOSITION: According to CAUSE:

> AB 1967 creates a statutory mechanism where a minor in any residential facility licensed under Section 1502 of the Health and Safety Code (including: inpatient psychiatric facilities, drug rehabilitation programs, faith-based residential programs, wilderness therapy programs, private alternative

(therapeutic) boarding schools, outdoor behavioral programs, and youth shelters) may on their own - or with the assistance of ideologically motivated staff - initiate state dependency proceedings against his or her own parents, triggering a mandatory government investigation of the family home, setting in motion a pathway into the juvenile dependency system and the temporary and permanent removal of a distressed, vulnerable child from their parents.

AB 1967 is another step taken by the State of California to subvert parent rights and separate troubled teenagers from their loving families. This bill raises serious constitutional concerns under the Due Process Clause of the Fourteenth Amendment and the Fourth Amendment, and will not stand up to constitutional scrutiny by the courts.

SUBJECT: California Community Schools Partnership Program: Promise Neighborhoods

SOURCE: Grace INC

DIGEST: This bill requires any local education agency that retains funds distributed through the California Community Schools Partnership Program for administration to use the funds consistent with the Community Schools Framework and authorizes the local educational agency to use those funds to make a schoolsite a network lead for multiple schoolsites located in a Promise Neighborhood.

Senate Floor Amendments of 8/21/26 remove the definitions and grant program and instead allow local education agencies to use funds retained from the California Community Schools Partnership Program as specified.

ANALYSIS:

Existing Law:
1) Establishes, in federal law, the Promise Neighborhood program, which provides grants to nonprofit organizations, tribal organizations, or institutions of higher education, which, together with partners, develop and implement plans to significantly improve outcomes of children living in a given neighborhood. (20 United States Code (U.S.C.) section 7274)

2) Establishes the "California Cradle-to-Career Data Systems Act", which expresses legislative intent to build a data system that services students and families by identifying and tracking predictive indicators to enable parents, teachers, health and human services providers, and policymakers to provide appropriate interventions and supports to address disparities in opportunities and improve outcomes for all students. (Education Code (EDC) section 10850 et seq.)

3) Defines "Community school" to mean a public school serving preschool, transitional kindergarten, kindergarten, or any of grades 1 to 12, inclusive, with strong and intentional community partnerships ensuring pupil learning and whole child and family development, and specifically includes the following:

   a) Integrated supports services, including the coordination of trauma-informed health, mental health, and social services that ensure coordination and support with county and local educational agency resources and nongovernmental organizations, and early screening and intervention for learning and other needs.

   b) Family, pupil, schoolsite staff, and community engagement, which may include home visits, home-school collaboration, culturally responsive community partnerships to strengthen family well-being and stability, and school climate surveys.

   c) Collaborative leadership and practices for educators and administrators, including professional development to transform school culture and climate, that centers on pupil learning and supports mental and behavioral health, trauma-informed care, social-emotional learning, restorative justice, and other key areas relating to pupil learning and whole child and family development.

   d) Extended learning time and opportunities, including before and after school care and summer programs. (EDC section 8901 (b))

4) Allocates funding to the California Community Schools Partnership Program to be spent in accordance with the California Community Schools Framework and used to implement community schools supported by local networks and to implement shared decision-making practices with education interest holders but not be used for punitive disciplinary practices or the engagement of campus law enforcement. (EDC section 8903 (b))

5) Allows local education agencies to retain 10% of California Community Schools Partnership Program funds for administration. (EDC section 8903 (f))

This bill:

1) Makes findings and declarations about child poverty and the impact of place-based initiatives.

2) Authorizes local education agencies that retain the allowable amount of California Community Schools Partnership Program funds for administration to use it to establish a schoolsite as the network lead for multiple schoolsites in a Promise Neighborhood.

Background

According to the author, "A strong understanding of the community and regional context, as well the effective coordination of services and supports aligned with the needs of the community, are essential to achieving better outcomes for children and families at every stage of life – from cradle to career.

"Over the last 10 years, Promise Neighborhoods, Cradle to Career (C2C) networks, and similar entities have worked in disadvantaged communities. Utilizing a place-based, equity-focused approach, these networks coordinate services and supports across the public and private sectors and collect and share data to maximize the efficiency and efficacy of programming. Areas where these networks have operated have seen substantial improvements in healthcare access, literacy, and college and career readiness, as well as reduced child welfare and juvenile justice involvement. To scale these proven cradle- to- career solutions, the state must invest in the "It Takes A Village" strategy by allowing Local Educational Agencies to partner up with these community based networks like Promise Neighborhoods in order to provide community schools with a support network."

California's Safety Net. According to End Poverty in California, "the safety net's job is to undo the poverty and disparities wrought by other institutions" by providing financial and programmatic support to folks already experiencing poverty or economic need. In California, the safety net includes numerous programs that provide a mix of supports and services including cash grants, nutritional support, housing assistance, and tax credits. These programs include CalFresh, CalWORKs, school lunch programs, the Women, Infants and Children Nutrition Program, state and federal Earned Income Tax Credit, the child tax credit, General Assistance, and Supplemental Security Income/State Supplementary Payment.

These programs help millions of Californians each year. According to the Public Policy Institute of California, the federal Earned Income Tax Credit lowered poverty rates in 2023 by 2.3 points among children and CalFresh prevented 3.7% more children from living in poverty. Additionally, CalWORKs and General Assistance together lowered California's child poverty rate by 0.9%.

The majority of safety net programs have stringent and unique eligibility criteria and different application and access points, which make programs difficult to navigate and attain for families who need support, especially when compounded with the chronic stress of living in poverty.

Community Schools. Community Schools are an educational model that requires schools to provide services that care for the whole student, not just their educational needs. This includes expanded options for before and after school programs, health and wellness services, and services for the student's family. The schools provide these services with their own funding and through partnerships with community organizations. According to the State Department of Education, community schools usually include four features: (1) integrated support services; (2) family and community engagement; (3) collaborative leadership and practices for educators and administrators; and (4) extended learning time and opportunities. This bill acknowledges the alignment in administration and mission of place-based partnerships and community schools. This year the California budget included $1 billion allocated for the California Community Schools Partnership Program to allow local education agencies to implement new community schools and provide ongoing support for existing community schools. Local education agencies can retain 10% of the funding they receive for specified activities. This bill allows schools that receive funding to also use it to serve as the network lead for multiple school sites in a Promise Neighborhood.

Federal Promise Neighborhoods. Promise Neighborhoods are a holistic, place-based approach to reducing poverty and improving economic, social, and academic outcomes in disadvantaged communities by developing "cradle to career" solutions that support children and families. According to the Lifting Children and Families out of Poverty Task Force, "Promise Neighborhoods tailor their specific set of cradle-to-college-and-career solutions to the local context, but each share the following characteristics: results-driven focus on impacting population-level results; place-based to focus on a specific high-need geography; collective impact is achieved through partnerships."

Notable examples of Promise Neighborhoods outside of California include the Promise Heights Neighborhood in Baltimore. According to the Urban Institute,

"Promise Heights successfully built partnerships with schools, community organizations, and families. These partnerships served as the infrastructure for expanded access to a cradle-to-career pipeline of resources and supports aligned with the goals of the Promise Neighborhoods program. And during the COVID-19 pandemic, the flexibility of grant funding enabled Promise Heights to pivot from its long-term strategy in order to meet urgent needs that arose in the community. Although Promise Heights made a shift toward a partnership-based model and established a childcare center to sustain programming, the initiative faced barriers to sustainability in the final years of the grant."

Related/Prior Legislation:

AB 1321 (Bonta, 2023) was substantially similar to this bill. AB 1321 was held in the Senate Appropriations Committee.

AB 2517 (Bonta, 2022) was substantially similar to this bill. AB 2517 was vetoed by Governor Newsom, who cited costs concerns and stated, "Bills with significant fiscal impact, such as this measure, should be considered and accounted for as part of the annual budget process."

AB 132 (Committee on Budget, Chapter 144, Statutes of 2021) establishes the Cradle-to-Career Data System to link data on student progress through education, workforce training, employment, health and social services; establishes a governing board comprised of 21 members; and establishes the Office of Cradle-to-Career Data within Government Operations Agency until July 1, 2026, among other things.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Senate Appropriations for the 6/10/26 version of this bill: "Unknown General Fund costs, potentially tens of millions, to fund the grant program. Unknown General Fund costs, potentially hundreds of thousands, annually for the California Department of Social Services (CDSS) to administer the grant program. The California Department of Education (CDE) estimates General Fund costs of $384,000 in 2026–27 and $378,000 in 2027–28 for state administration."

ASSEMBLY FLOOR: 71-2, 4/20/26 - See last page for vote

SUBJECT: Firearms: voluntary firearm storage program

SOURCE: Giffords Law Center to Prevent Gun Violence

DIGEST: This bill authorizes a law enforcement agency to create a voluntary firearm storage program that allows a person to voluntarily transfer custody of their firearm to the local law enforcement agency for temporary safekeeping purposes to prevent firearm violence, suicide, and other injury, as provided.

ANALYSIS:

Existing law:

1) Generally prohibits the sale, lease or transfer of firearms unless the person has been issued a license by the Department of Justice (DOJ) and establishes various exceptions to this prohibition. (Penal (Pen.) Code, §§ 26500-26625.)

2) Provides that a license to sell firearms is subject to forfeiture for any violation of a number of specified prohibitions and requirements, with limited exceptions. (Pen. Code, § 26800, subd. (a).)

3) Includes several exemptions from the requirement that transfers go through a licensed dealer, including for the transfer of a firearm by bequest or intestate succession, or to a surviving spouse, or transfers by a person acting pursuant to operation of law, a court order, or pursuant to other specified laws. (Pen. Code, §§ 26505, 26515.)

4) Provides that persons convicted of felonies and certain violent misdemeanors are prohibited from owning or possessing a firearm. (Pen. Code, §§ 29800, 29805.)

5) Provides that where neither party to a firearms transaction holds a dealer's license (i.e. a "private party transaction"), the parties shall complete the transaction through a licensed firearms dealer. (Pen. Code, § 27545.)

6) Provides that the above provision does not apply to a firearm transfer if all of the following conditions are satisfied:

    a) The firearm is voluntarily and temporarily transferred to another person who is 18 years of age or older for safekeeping to prevent it from being accessed or used to attempt suicide by the transferor or another person that may gain access to it in the transferor's household.

    b) The transferee does not use the firearm for any purpose and, except when transporting the firearm to the transferee's residence or when returning it to the transferor, keeps the firearm unloaded and securely stored in the transferee's residence.

    c) The duration of the loan is limited to that amount of time reasonably necessary to prevent harm.

    d) The individual receiving the firearm is not prohibited by state or federal law from possessing, receiving, owning, or purchasing a firearm. (Pen. Code, § 27882, subd. (a).)

7) Provides that if a firearm transferred pursuant to the above cannot be returned to the owner because the owner is prohibited from possessing a firearm, the person in possession of the firearm shall deliver the firearm to a law enforcement agency without delay. (Pen. Code, § 27882, subd. (b).)

8) Establishes procedures for the transfer of a firearm to a dealer or a third party in order to prevent it from being accessed or used by the transferor or other persons that may gain access to it in the transferor's household to cause significant danger of personal injury to themselves or others. (Pen. Code, §§ 27882, 26892.)

9) Prohibits firearm dealers from delivering newly purchased firearms within 10 days of the application to purchase a firearm, as specified. (Pen. Code, § 26815.)

10) Provides that any person who claims title to any firearm, ammunition feeding device, or ammunition that is in the custody or control of a court or law enforcement agency and who wishes to have the firearm, ammunition feeding device, or ammunition returned shall make application, including specified information, for a determination by the Department of Justice as to whether the applicant is eligible to possess a firearm, ammunition feeding device, or ammunition, as provided. (Pen. Code, § 33850, subd. (a).)

11) Provides that a person who owns a firearm that is in the custody of a court or law enforcement agency and who does not wish to obtain possession of the firearm, and the firearm is an otherwise legal firearm, and the person otherwise has right to title of the firearm, shall be entitled to sell or transfer title of the firearm to a licensed dealer or a third party that is not prohibited from possessing that firearm. (Pen. Code, § 33850, subd. (b).)

12) Specifies several requirements that must be satisfied before a law enforcement agency or court that has taken custody of any firearm, ammunition feeding device, or ammunition may be returned to an individual claiming said items. (Pen. Code, § 33855.)

13) Specifies that when DOJ receives a completed application for return of a firearm, it shall conduct an eligibility check of the applicant to determine whether the applicant is eligible to possess a firearm, ammunition feeding device, or ammunition. (Pen. Code, § 33865, subd. (a).)

14) Provides that if a law enforcement agency determines that an applicant requesting the return of a firearm, ammunition feeding device, or ammunition is the legal owner of said items, the applicant shall be entitled to sell or transfer those items to a licensed firearm or ammunition vendor, as applicable. (Pen. Code, § 33870.)

15) Requires a law enforcement agency to enter into the DOJ's Automated Firearm System each firearm that has been reported stolen, lost, found, recovered, held or safekeeping, surrendered, relinquished, or under observation, as specified. (Pen. Code, § 11108.2.)

16) Requires any weapon surrendered to law enforcement under specified provisions to be destroyed, except as specified. (Pen. Code, § 18005, subd. (a).)

17) Requires every California law enforcement agency to develop and maintain a written policy on the destruction of firearms and other weapons, as specified. (Pen. Code, § 18005, subd. (e).)

This bill:

1) Provides that a law enforcement agency may create a voluntary firearm storage program that allows a person to voluntarily transfer custody of their firearm to the local law enforcement agency for temporary safekeeping purposes to prevent firearm violence, suicide, and other injury.

2) Provides that an agency adopting a voluntary storage program shall not be held liable for damage to the firearms while the firearms are in the temporary custody of the agency.

3) Requires the following of any law enforcement agency that elects to adopt a voluntary storage program:

    a) The agency shall have the capability to store the firearm for a duration of one year.

    b) The agency shall provide clear instructions on the procedure for a person to voluntarily transfer custody of their firearm to the law enforcement agency, and make the procedure available to the public on the agency's internet website, as specified.

    c) The agency shall provide clear instructions on the process for requesting return of the firearms in accordance with existing law, including, but not limited to, by electronically submitting a Law Enforcement Release application for the return of a firearm via the California Firearms Application Reporting System (CFARS). Instructions on the process for requesting the return of surrendered firearms shall be made available to the public on the agency's website.

    d) The agency shall provide clear information on the maximum amount of time that the law enforcement agency may store a firearm and on the disposition of a firearm after the firearm has exceeded the maximum storage time allowed by the local law enforcement agency. This information must notify the person that their firearm or firearms shall be destroyed, returned to the person, or donated to a public or private nonprofit historical society, museum, or institutional collection.

    e) The agency shall provide clear information on how people using the safe storage program, if they decide they no longer want their firearm at any point during the firearm storage period, can elect to have the firearm destroyed, donated to a public or private nonprofit historical society, museum, or institutional collection, or, pursuant to policies and

procedures set forth in existing law, may sell or transfer title of the firearm to a licensed dealer or a third party that is not prohibited from possessing that firearm.

4) Provides that upon receipt of a firearm, a law enforcement agency with a voluntary storage program must do all of the following:

    a) Check the Automated Firearm System (AFS) to ensure that the firearm has not previously been reported as lost or stolen or otherwise involved in a crime, as specified.

    b) Update AFS to record the current disposition of the firearm.

    c) Prior to the return of a firearm to a person requesting its return, the law enforcement agency shall ensure that the requesting person is eligible to possess firearms when the firearm is returned to the person, as provided.

    d) Upon return, donation, transfer or destruction of the firearm, a law enforcement agency shall update the AFS to reflect the change in disposition pursuant to the agency's firearm destruction policy.

5) Specifies that failure to retrieve the firearm at the end of a time period specified by the law enforcement agency shall result in the destruction of the firearm pursuant to the agency's firearm destruction policy. However, destruction of the firearm shall not be executed if the person who surrendered the firearm has submitted a Law Enforcement Release application for the return of their firearm via CFARS and the person is awaiting an eligibility determination.

6) Encourages law enforcement agencies that establish a voluntary firearm storage program to make family law advocates and veterans' outreach programs aware of the program.

7) Specifies that it does not limit a law enforcement agency's ability to accept firearms for voluntary temporary firearm storage pursuant to any other authority, program, or services the law enforcement agency offers.

8) Defines law enforcement agency as any police or sheriff's department.

9) Provides that specified laws restricting openly carrying an unloaded firearm, carrying an unloaded firearm, and delivering or transferring a firearm, do not apply to or affect the transportation of a firearm by a person to a law enforcement for the purposes of participating in a voluntary storage program, if

the person gives prior notice to the agency that they are transporting the firearm to the agency.

Comments

In 2019, the Legislature added a preventative feature to California firearm law via SB 172 (Portantino), Chapter 840, Statutes of 2019, which permitted the temporary transfer of a firearm without a dealer's participation to a person who is 18 years of age or older for safekeeping to prevent it from being used to attempt suicide by the transferor or another person that may gain access to it in the transferor's household. In 2023, another protective firearm transfer provision was added to California law via SB 368 (Portantino), Chapter 251, Statutes of 2023, which required firearm dealers to accept a firearm for storage if 1) the firearm is voluntarily and temporarily transferred to the licensee to prevent significant danger of personal injury to the transferor or others, 2) the licensee does not use the firearm for any purpose except storage, and 3) the duration of the transfer is limited to the amount of time reasonably necessary to prevent the harm.

After a custody battle resulted in the murder of her 9-year-old son, Pierce, by his father, Lesley Hu founded Pierce's Pledge, a nonprofit dedicated to reducing gun violence against children during volatile custody disputes by promoting the voluntary, temporary storage of firearms outside the home during situations of crisis or high conflict. In September 2025, the San Francisco Police Department, in partnership with Pierce's Pledge, launched a first-in-the-nation gun storage program in which San Francisco residents can store their firearms at any of the city's 10 police district stations for up to a year without paying any fees. According to the author, such programs are critical, especially in light of the fact that few dealers participate in voluntary storage pursuant to the programs described above. The author further states that:

> Although there is nothing preventing law enforcement from establishing a program to temporarily store firearms for the public–indeed, SFPD did and serves as the basis for this law–there is also nothing in the current law to provide guidance or best practices for local law enforcement seeking to implement the policy. This lack of guidance can lead to police departments being more hesitant to establish such a program within their own jurisdiction or lead to inconsistencies in the application of each program.

Accordingly, the author proposes this bill, which provides that a law enforcement agency may create a voluntary firearm storage program that allows a person to voluntarily transfer custody of their firearm to the agency for temporary

safekeeping to prevent firearm violence, suicide and other injury. The bill does not require agencies to establish such a program, but imposes several mandates on agencies that do, including that the agency have the capability to store a firearm for one year and that it provide clear instructions on the relevant transfer processes, including those already set forth in existing law, such as the process for requesting the return of a firearm.

Additionally, the bill requires a participating agency to provide clear information on the maximum duration that the agency may store a firearm and on the disposition of a firearm after the expiration of the storage period, including that the firearm must be destroyed, returned, or donated to a public or private nonprofit historical society, museum, or institutional collection. Participating agencies must also provide information on how individuals who no longer want their firearm can elect to have the firearm destroyed, donated or transferred to a firearm dealer or nonprohibited third party pursuant to specific procedures set forth in existing law.

This bill further requires that participating agencies make relevant updates to the Automated Firearms System and provides that failure to retrieve a firearm at the end of the storage period shall result in the destruction or donation of the firearm according to prescribed processes. Finally, the bill indemnifies participating agencies against liability for damage to firearms while they are being stored and clarifies that existing criminal penalties related to the transportation of firearms do not apply when the firearms are being transported for the purpose of being stored pursuant to this bill and the transporting party has given the agency prior notice.

ASSEMBLY FLOOR: 49-19, 5/28/26 - See last page for vote

SUBJECT: Streets and highways: pedestrian and bicycle facilities

SOURCE: Streets for All

DIGEST: This bill exempts the development of pedestrian malls from the California Environmental Quality Act (CEQA) and limits cities' and counties' ability to deny or delay pedestrian and bicycle safety improvements, among other provisions.

Senate Floor Amendments of 8/21/26 clarify that limits on community input meetings do not limit public participation required by federal regulation or funding requirements.

ANALYSIS:

Existing law:

1) Allows a city to "make and enforce within its limits, all local, police, sanitary and other ordinances and regulations not in conflict with general laws." It is from this fundamental power (commonly called the police power) that local governments derive their authority to regulate behavior to preserve the health, safety, and welfare of the public.

2) Allows local agencies to adopt rules and regulations prohibiting entry to or exit from any street if it is necessary to implement the circulation element of its General Plan.

3) Enacts the Pedestrian Mall Law (PML) of 1960 to create a statewide process to build pedestrian malls in recognition that in certain areas in cities, and particularly in retail shopping areas, there is a need to separate pedestrian travel from vehicular travel, and that the separation is necessary to protect the public safety or otherwise to serve the public interest and convenience. Under PML, a city or county can establish a pedestrian mall to prohibit vehicular traffic on a pedestrian mall, and pay property owners for damages resulting from establishing a pedestrian mall from the general fund or via assessment.

4) Provides that, to establish a pedestrian mall, the city or county must adopt a resolution declaring its intent describing the pedestrian mall, notifying the public of the opportunity to protest the mall's establishment at a public hearing, and describing how the city or county will pay for damages to property owners. Not less than 90 days before the public hearing, the city or county must post the resolution on all affected streets and intersections and record the resolution with the county recorder. No later than 45 days before the public hearing, the city or county must mail the resolution to affected property owners. At the public hearing, the city or county must hear all objections, protests, and claims. If at least a majority of affected property owners protest the mall's establishment, the city or county cannot establish the mall, and must wait a year before it brings it up again.

5) Provides that property owners that might suffer damage due to the pedestrian mall can file a claim of damages to the city or county's clerk. At the public hearing, the city or county can allow for any damage claims. If there are unsettled claims, the city or county must direct that action to the relevant superior court in the nature of an eminent domain claim.

6) Provides that, under the California Environmental Quality Act (CEQA), a lead agency determines whether a project is exempt from CEQA, or if it must do an initial study to determine if a project will have significant effects on the environment. If a project has no effect on the environment or effects that can be mitigated, the lead agency prepares a negative declaration (ND) or mitigated ND (MND). If the project will have significant impacts, the lead agency prepares an environmental impact report (EIR) to evaluate and propose mitigation measures for any effects on the environment, including impacts or likely impacts to land, air, water, minerals, flora, fauna, ambient noise, and historic or aesthetic significance.

This bill:

1) Prohibits a city or county from holding a community input meeting to reconsider, delay, or prevent implementation of a proposed pedestrian or bicycle safety project if that project is included in an approved plan that will be implemented as part of the circulation element of the city or county's general plan, after that project has passed 90% design, as specified.

2) Provides that the limits to community input meetings shall not be construed to limit public participation otherwise required by law, including, but not limited to, a federal regulation or federal funding requirement.

3) Prohibits, at a public meeting when a contract is awarded or when county or city staff are directed to begin the construction of a pedestrian or bicycle safety project, or anytime thereafter, the bill would prohibit the city or county from terminating the project unless the city or county makes at least one specified finding at a public meeting.

4) Prohibits a city or county from requiring a petition to request the installation of a traffic-calming measure to contain the signatures of more than a majority of the total number of persons whose residences are located within 1,000 feet of the proposed traffic-calming measure, as specified.

5) Establishes a CEQA exemption for pedestrian malls meeting existing CEQA criteria for location, labor standards, and public transparency.

Comments

Purpose of Bill. According to the author, "While many of California's transportation laws are well-intentioned, there are a number of laws and regulations that have become overly burdensome when implementing much-

needed bicycle and pedestrian-related safety measures and projects. Bicycle and pedestrian-related transportation projects have run into outdated regulations that discourage action, raise costs, and lead to delays. AB 1976 would update existing laws and regulations in order to provide more streamlined processes for projects that provide additional safety measures and accessibility for local communities to walk and live safely."

Not so fast. The state empowers local officials to make decisions that principally affect only their residents. This ensures that local governments can be responsive to the needs and concerns of their residents. Rather than leave decisions about how best to engage with the local community when it comes to bicycle and pedestrian safety improvements, this bill imposes a statewide limitation to the steps local agencies can take when considering bicycle and pedestrian improvements. Specifically, the bill limits the types of public input meetings that local agencies can hold to gather community feedback once design is 90% complete. Additionally, if a local agency wants to ensure that a bicycle or pedestrian safety improvement shares broad community input, it can no longer institute a protest process that requires more than majority approval of affected residents. Finally, it limits when local agencies can stop pedestrian improvements already underway unless they make findings on the public benefits or fiscal constraints that justify terminating the project. This bill does this to limit the ways a local agency can try to misuse public input to interfere with bicycle and pedestrian safety improvements. However, it may also limit legitimate opportunities for the public to express their concerns with the proposed project. It is unclear whether the potential misuse of public input justifies state-imposed limitations to the public's ability to provide input on bicycle and pedestrian safety improvements. Local officials may be better suited to make determinations regarding the amount of public input on bicycle and pedestrian safety improvements in their jurisdictions.

SUBJECT: Subsidized childcare: reimbursement rates: reporting

SOURCE: Child Care Providers United
SEIU California State Council
United Domestic Workers/AFSCME Local 3930

DIGEST: This bill (1) revises requirements for the California Department of Social Services (CDSS) to provide updates to the Legislature regarding the implementation of reimbursement rates for subsidized child care based on the alternative methodology; (2) adopts several recommendations in the Single Rate Structure report.

Senate floor amendments of 8/21/26 make a number of technical and substantive changes.

ANALYSIS:

Existing Law:

1) Establishes the Child Care and Development Services Act to provide a comprehensive, coordinated, and cost-effective system of child care and

development services for children from infancy to 13 years of age and their parents, including a full range of supervision, health, and support services through full- and part-time programs. (Welfare and Institutions Code [WIC] § 10207 et seq.)

2) Establishes the Building a Better Early Care and Education System Act to promote quality, access, and stability in the early care and education system by authorizing an appropriate unit of family child care providers to choose a provider organization to act as their unit's representative on all matters specified under the Act. (WIC § 10420 et seq.)

3) States it is the intent of the Legislature to use an alternative methodology, as defined, to inform the setting of reimbursement rates for subsidized child care. Provides that reimbursement rates are subject to agreement and codification by the Legislature. (WIC §10227.6(a) and (b))

4) Requires CDSS, in collaboration with the California Department of Education, to develop and conduct an alternative methodology. Establishes a timeline for the development of an alternative methodology, including reporting requirements. (WIC § 10227.6)

This Bill:

1) Makes various findings and declarations.

2) Changes the sunset date for CDSS to provide quarterly updates on the implementation of the new reimbursement rates set under the alternative methodology from July 1, 2027, to July 1, 2028.

3) Requires CDSS to provide the Chairperson of the Joint Legislative Budget Committee, rather than the Legislature, with CDSS' anticipated timeline for transitioning from the rates that are in effect on July 1, 2025, to the new rates if the new reimbursement rates do not take effect on July 1, 2025.

4) Adds that it is the intent of the Legislature for CDSS to use values or selection points that reflect the actual, established costs of providing care when updating the alternative methodology, as required by the triennial federal Child Care Development Fund plan.

5) Requires CDSS, in consultation with the California Department of Education, when establishing new reimbursement rates using an a single-rate structure informed by an alternative methodology, to the extent it is consistent with the

approved Child Care and Development Fund state plan, to do all of the following:

a) Vary rates based on geographic regions; provider type; regulatory and statutory requirements; time considerations; and child age; as specified.

b) Include an enhanced rate for nonstandard hours of care, enhanced inclusion rate, and other enhanced rates, as determined through the annual Budget process.

c) Ensure that the reimbursement rate for a specific child, payable to an individual provider, includes all enhanced rates for which the child is eligible, and that are for services the child is receiving from the individual provider or contractor.

d) Ensure that base payment rates are based on a child's maximum certified hours of care with an individual provider, regardless of attendance.

6) Authorizes CDSS to implement and administer this act by all-county letters, child care bulletins, or similar written instructions until regulations are adopted. Specifies that these instructions shall have the same force and effect as regulations.

7) States this act is an urgency statue necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the California Constitution and shall go into immediate effect.

Background

Purpose of the Bill. According to the author, "Child care providers are the backbone of our early education system and a critical part of California's economy, yet too many of these mostly women- and minority-owned small businesses are barely scraping by. AB 1981 is about ensuring providers are paid based on the true cost of delivering care. This bill ensures continued transparency and accountability by requiring ongoing quarterly updates from CDSS on the transition to the new reimbursement rate system until it is fully implemented.

"After nearly two decades of unfulfilled commitments to reform child care rates, the Legislature deserves clear accountability and transparency from the Administration on when these changes will finally take effect. Paying providers fairly will help stabilize the child care workforce, keep providers' doors open, and ensure families can access the care they need. This is especially critical as the federal government implements the work requirements included in H.R. 1, and

other policies that raise the cost of living for California families. Now more than ever, working parents need reliable child care to remain employed and support their families."

Subsidized Child Care. California's subsidized child care system is designed to provide assistance for income eligible parents and guardians who are working, in training, seeking employment, incapacitated, or in need of respite. The state's largest subsidized child care programs are General Child Care, Alternative Payment, CalWORKs Child Care, and the California State Preschool Program.

General Child Care provides care through contracted centers and family child care home education networks. Alternative Payment provides vouchers to families, which they can use to obtain child care at a center, family child care home, or from a license-exempt provider. Families are income eligible for General Child Care or Alternative Payment if their household income is below 85% of the State Median Income, depending on family size. In 2025–26, a family of four is income eligible if their annual family income is at or below $108,237.

CalWORKs Child Care provides vouchers for families to use at a center, family child care home, or with a license-exempt provider. Families are eligible for CalWORKs Child Care from when they are enrolled in CalWORKs until 24 months after a family has been off cash aid. CalWORKs is organized into three stages. Stage 1 and Stage 2 are considered entitlement programs, meaning anyone who is eligible and has a qualifying need must receive services. Stage 3 Child Care is dependent on the availability of funding and is not an entitlement program.

The California State Preschool Program provides care for three- and four-year-olds at local educational agencies and some community-based centers. Current law additionally allows California State Preschool Programs to serve two-year-olds through June 30, 2027. Families are eligible for the California State Preschool Program if their income based on family size falls below 100% of the State Median Income. In 2025–26, a family of four is income eligible if their annual family income is at or below $127,338. California State Preschool Programs are under the purview of the Senate Education Committee.

History of Reimbursement Rate Reform. AB 131 (Committee on Budget, Chapter 116, Statutes of 2021) established the state's efforts to move to a single reimbursement rate structure. The first was a Joint Labor Management Committee, established between the State and Child Care Providers United (CCPU), the family child care providers union. The Joint Labor Management Committee was tasked with developing recommendations for a single reimbursement rate structure that addresses quality standards for equity and accessibility. The second effort was the

Rate and Quality Stakeholder Workgroup, established by CDSS in consultation with the California Department of Education. The Workgroup was tasked with assessing the methodology for establishing reimbursement rates and the existing quality standards for child care and preschool programs. AB 131 also increased rates for all contractors.

AB 116 (Committee on Budget, Chapter 41, Statutes of 2023) required CDSS, in consultation with the California Department of Education, to develop and conduct an alternative methodology for setting reimbursement rates. CDSS contracted with Prenatal to Five Fiscal Strategies to assist in designing and implementing an alternative methodology process. SB 140 (Committee on Budget and Fiscal Review, Chapter 193, Statutes of 2023) added a timeline for adoption of a new alternative methodology, requiring CDSS to submit information on the alternative methodology to the federal Administration for Children and Families in the Child Care and Development Fund state plan by July 1, 2024. Additionally, the timeline in SB 140 required CDSS to provide the Legislature with an outline for planned implementation of the single rate structure utilizing the alternative methodology within 60 days of federal approval, upon which the Legislature shall have 30 days to review and provide feedback for implementation of these policies.

SB 163 (Committee on Budget and Fiscal Review, Chapter 73, Statutes of 2024) required CDSS to provide the Assembly and Senate Budget Committees with a report that outlines the implementation components for the approved single rate structure, including the department's plan to set new reimbursement rates under the alternative methodology by no later than July 1, 2025, and the estimated costs and estimated timelines associated with implementation. SB 163 required CDSS to provide quarterly updates on implementation, including any changes to the information provided in the report. SB 163 provided that the Governor and Legislature shall, by no later than July 1, 2025, establish reimbursement rates based on the alternative methodology, and if new reimbursement rates do not take effect, CDSS shall provide the Legislature with a timeline for transitioning from the rates in effect on July 1, 2025, to the new rates.

SB 120 (Committee on Budget and Fiscal Review, Chapter 13, Statutes of 2025) revised the sunset date for quarterly updates on the implementation of the new reimbursement rates to July 1, 2027, and stated the intent of the Legislature to cease using a regional market rate survey and instead use an alternative methodology beginning July 1, 2025. In December 2025, the Joint Labor Management Committee published a final report with joint recommendations for a single rate structure. The final report additionally included State recommendations and CCPU recommendations that were not jointly agreed upon. This bill would

adopt several of these recommendations. The recommendations to be adopted through this bill include varying rates based on geographic regions, provider type, time-of-day considerations, and child age considerations; and including an enhanced rate for nonstandard hours of care, enhanced inclusion rate, and other enhanced rates, as determined through the annual Budget process.

According to the July 2025 Update to the Report to the Legislature on Implementation of the Single Rate Structure, CDSS projects that, upon finalization of a single rate structure, a minimum of two years will be needed to complete the necessary automation and program implementation activities required to implement the new structure. However, this timeline is subject to change based on various factors, such as implementation of the Joint Labor Management Committee joint recommendations, which will require statutory changes. Further, the Memorandum of Understanding between the State and CCPU states that a single rate structure will become operable upon the parties reaching agreement on the specific rates. This bill would extend the sunset for quarterly updates on the implementation of new reimbursement rates by one year to July 1, 2028.

Related/Prior Legislation

SB 120 (Committee on Budget and Fiscal Review, Chapter 13, Statutes of 2025), a budget trailer bill, revised the sunset date for quarterly updates on the implementation of the new reimbursement rates to July 1, 2027, and stated the intent of the Legislature to cease using a regional market rate survey and instead use an alternative methodology beginning July 1, 2025, among other things.

SB 163 (Committee on Budget and Fiscal Review, Chapter 73, Statutes of 2024), a budget trailer bill, required CDSS to publish a report that outlines the implementation timeline for the approved single rate structure, including a plan to set new reimbursement rates under the alternative methodology by no later than July 1, 2025, and required CDSS to provide quarterly updates on implementation. SB 163 provided that the Governor and Legislature shall, by no later than July 1, 2025, establish reimbursement rates based on the alternative methodology, and if new reimbursement rates do not take effect, CDSS shall provide the Legislature with a timeline for transitioning from the rates in effect on July 1, 2025, to the new rates.

SB 140 (Committee on Budget and Fiscal Review, Chapter 193, Statutes of 2023), a budget trailer bill, established various intermediate deadlines toward the submission of the Child Care and Development Fund state plan with necessary information to support use of a single rate structure utilizing the alternative methodology.

AB 116 (Committee on Budget, Chapter 41, Statutes of 2023), a budget trailer bill, stated the intent of the Legislature to utilize an alternative methodology, as defined, to inform the setting of reimbursement rates for subsidized child care. AB 116 required CDSS, in collaboration with the California Department of Education, to develop and conduct an alternative methodology.

AB 131 (Committee on Budget, Chapter 116, Statutes of 2021), a budget trailer bill, transferred administration of child care and development programs from the California Department of Education to CDSS. AB 131 also established the Joint Labor Management Committee and Rate and Quality Stakeholder Workgroup, among other things.

AB 378 (Limón, Chapter 385, Statutes of 2019) authorized family childcare home providers to form, join, and participate in the activities of a provider organization (union) of their own choosing for the purpose of representing them and bargaining on matters regarding the terms and conditions of their employment.

Comments

This bill seeks to continue transparent communication to the Legislature regarding the transition to a new single rate structure by extending quarterly reporting requirements by one year. This bill would adopt several single rate structure recommendations published in the Joint Labor Management Committee's final report to codify rate-setting principles in preparation of reimbursement rate negotiations—to determine the actual percentages and/or dollar amounts to be paid—and implementation of the new rate structure. The report was published by the Joint Labor Management Committee, comprised of representatives from CDSS, the California Department of Education, and CCPU. The communication and proactive implementation goals of this bill seem to align with the Legislature's years-long efforts to adopt a single rate structure using an alternative methodology.

[NOTE: See the Senate Human Services Committee analysis for additional background on this bill.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, "Unknown, potential ongoing General Fund costs for child care reimbursement rates to the extent the bill's provisions would impact the development of the new rate structure required under current law."

SUBJECT: Continuing care retirement communities: repayable contracts

SOURCE: Erickson Senior Living

DIGEST: This bill adds sequential order method as a type of repayable contract that may be entered into between a Continuing Care Retirement Community and a person entering residential care.

Senate floor amendments of 8/21/26 make technical and substantive changes.

ANALYSIS:

Existing Law:

1) Establishes the California Residential Care Facilities for the Elderly Act to provide for the licensure and regulation of residential care facilities for the elderly as a separate category within the existing licensing structure of the California Department of Social Services (CDSS). (Health and Safety Code [HSC] § 1569 et seq.)

2) Provides for the certification and regulation of Continuing Care Retirement Communities by CDSS. (HSC §1770 et seq.)

3) Requires an applicant for a certificate of authority to operate a Continuing Care Retirement Community to obtain appropriate licenses for the entire facility, including residential care facility for the elderly and/or skilled nursing facility licenses. (HSC §1771.5)

4) Defines the following terms related to Continuing Care Retirement Communities:

   a) "Continuing care contract" means a contract that includes a continuing care promise made in exchange for an entrance fee, the payment of periodic charges, or both types of payments. A continuing care contract may consist of one agreement or a series of agreements, as specified.

   b) "Entrance fee" means the sum of any initial, amortized, or deferred transfer of consideration made or promised to be made by, or on behalf of, a person entering into a continuing care contract for the purpose of ensuring care or related services pursuant to that continuing care contract or as full or partial payment for the promise to provide care for the term of the continuing care contract.

   c) "Repayable contract" means a continuing care contract that includes a promise to repay all or a portion of an entrance fee that is conditioned upon reoccupancy or resale of the unit previously occupied by the resident. A repayable contract shall not be considered subject to refund reserve requirements, provided that this conditional promise of repayment is not referred to by the applicant or provider as a "refund". A provider may repay all or a portion of an entrance fee that is conditioned upon resale of the unit before the resale of the unit. The repayment of an entrance fee before the resale of the unit shall not cause any other entrance fee to be subject to refund reserve requirements, provided that the provider does not promise or represent intent to make this type of early repayment, or indicate that the provider has a practice of making this type of early repayment. (HSC § 1771)

5) Requires a continuing care contract to contain numerous specified elements, including, but not limited to, the duration of the contract, the list of services that will be made available to the resident as required to provide the appropriate level of care, an itemization of the services included in the monthly fee and services available for an extra charge, and others. Further requires additional information and disclosures to be attached to the continuing care contract. (HSC §1788)

6) Establishes requirements regarding the cancellation of a continuing care contract. (HSC §1788.2)

7) Requires a lump-sum payment that is conditioned upon resale of a unit to be paid to the resident within 14 calendar days after resale of the unit. Requires that this payment not be considered, characterized, or advertised as a refund. Requires any balance of the lump sum owed that has not been paid to the resident or their estate within 180 days after termination of a repayable contract to accrue interest, as specified. (HSC §1788.4)

8) Establishes reporting and reserve requirements for any provider offering a refundable contract. (HSC §1792.6)

This bill:

1) Defines "entrance fee refund" as the return of all or a portion of the initial entrance fee paid by a resident to a provider, which is required to be paid back to the resident or the resident's estate upon the termination or cancellation of a refundable contract.

2) Defines "lump sum payment" as a one-time reimbursement of all or a portion of an entrance fee owed by a provider to a resident or the resident's estate in the event of cancellation, termination, or death.

3) Amends the definition of "repayable contract" to mean either a repayable conditioned on resale contract or a repayable in sequential order contract.

4) Defines "repayable conditioned on resale contract" to mean a continuing care contract that includes a promise to repay all or a portion of an entrance fee that is conditioned upon resale or reoccupancy of the unit previously occupied by the resident.

5) Defines "repayable in sequential order contract" as a continuing care contract that includes a promise to repay all or a portion of an entrance fee based strictly on the sequential order in which repayable contracts are terminated. Requires a provider to repay entrance fees solely in the sequential order in which the contracts were terminated, and prohibits a provider from repaying all or a portion of an entrance fee before the resident's sequential number is reached. Requires a provider to provide the resident, their estate, or other appropriate party with written notice of their sequential number on the repayment log at the time a contract is terminated, as specified. Requires the provider to ensure the full repayment amount and any applicable interest is kept in the sequential repayment account until the payment can be made if the resident, their estate, or

other appropriate party is unable to receive the repayment when their sequential number is reached. Requires the provider to keep records adequate to show which moneys have been designated for each resident and the moneys to be held in the account until the resident, their estate, or other appropriate party can receive the payment.

6) Defines the following terms related to repayable in sequential order contracts:

   a) Defines "sequential order method" or "sequential order" to mean the repayment of entrance fees in the order in which repayable contracts are terminated. Provides that the provider shall assign each terminated contract a sequential repayment number, to be paid from a sequential repayment account funded by entrance fees received from any reoccupied residential living units with sequential order contracts. Provides that, each time a unit is reoccupied, the repayment account shall be credited with an amount equal to the repayment owed to the unit's prior resident. Provides that, when the funds in the repayment account are sufficient to repay the next terminated contract in sequential order, the provider shall issue the repayment within 14 days.

   b) Defines "sequential repayment account" as a separately accounted for financial bank account established and maintained by a provider for the exclusive purpose of funding repayments of entrance fees under repayable in sequential order contracts. Requires the account to indicate that the moneys are held for the exclusive benefit of the residents or their estates. Requires the money to remain separate, intact, and free from any liability the provider incurs. Prohibits the sequential repayment account from being deemed a refund reserve or subject to refund reserve requirements.

7) Adds repayable contract language to the list of requirements a continuing care contract must contain, where only refundable contract language exists in current law.

8) Requires the policy or terms of a continuing care contract for refunds or repayments due to cancellations to specify whether repayment is conditioned upon resale of the unit or subject to the sequential order method.

9) Requires the policy or terms of a repayable in sequential order contract to state that repayment of sequential order contracts shall be paid from a sequential repayment account funded by entrance fees received from the sale of residential living units with repayable in sequential order contracts.

10) Requires the policy or terms of a repayable in sequential order contract to include a disclosure with specified information.

11) Requires, for repayable in sequential order contracts, the full lump sum owed, including any interest accrued, to be paid within 14 calendar days after sufficient funds exist in the sequential repayment account to satisfy the contract's assigned sequential repayment number. Requires a provider that offers or maintains any repayable in sequential order contracts to establish and maintain a sequential repayment account for the exclusive purpose of funding repayments owed under those contracts.

12) Clarifies the provider shall be responsible for funding all accrued interest.

13) Provides that, for repayable in sequential order contracts, the accrual of interest, as specified, shall not alter the assigned sequential repayment number or priority of payment. Requires interest to accrue beginning 180 days after termination of the contract, regardless of whether sufficient funds exist in the sequential repayment account. Requires payment of both principal and accrued interest to occur only in accordance with the sequential order method. Makes this provision apply only to repayable in sequential order contracts entered into on or after January 1, 2027.

14) Provides that the accrued interest for repayable in sequential order contracts shall be repayable from the sequential repayment account at the time the terminated contract reaches its assigned repayment number. Requires the provider to ensure that the sequential repayment account is funded in an amount sufficient to satisfy both principal and accrued interest prior to issuing repayment. Makes this provision apply only to repayable in sequential order contracts entered into on or after January 1, 2027.

15) Requires providers offering repayable in sequential order contracts to disclose specified information in the continuing care contract.

Background

Purpose of this Bill. According to the author, "AB 1983 addresses delays and uncertainty in the repayment of entrance fees to residents of Continuing Care Retirement Communities (CCRCs). Under current law, refunds are tied to the re-occupancy of a specific unit, which can leave residents and their families waiting months or even years for repayment. The bill authorizes a sequential repayment method, in which refunds are issued based on when residents vacate rather than when a unit is resold. This approach creates a more predictable, transparent, and

equitable system, increasing fairness for residents and their families while giving providers flexibility to adopt a system that meets the needs of a growing older adult population."

Continuing Care Retirement Communities. Continuing Care Retirement Communities offer people 60 years of age and older a full range of long-term care options that include independent living, assisted living, and skilled nursing care. This model allows senior residents to move from independence to high levels of care without leaving the community in which they reside. Typically, this is provided in a campus-like community setting, usually for a resident's lifetime, and always for at least one year. Continuing Care Retirement Communities must be licensed with CDSS as a residential care facility for the elderly, and must be licensed by the California Department of Public Health if the campus includes a skilled nursing facility. As of June 2025, there were 109 licensed Continuing Care Retirement Communities in California with a total capacity of 34,867.

Continuing Care Retirement Communities require residents to sign a contract that sets forth the range of services, sometimes at an additional cost, depending on the type of contract, to be provided by the Continuing Care Retirement Communities to the resident. Services include housing, residential services, and nursing care. Most Continuing Care Retirement Communities require substantial entrance fees, along with monthly fees. These fees can vary significantly and depend on the level of services included in the contract and other factors associated with location, exclusivity, business plan variations, and more. Entrance fees can range from $40,000 to more than $2 million depending on the community, size and type of residence, location, and contract structure. According to AARP, the average entrance fee was about $402,000 in 2021. Residents also pay monthly fees, which were an average of $3,555 in 2021 and rise about 2% per year.

Repayable and Refundable Contracts. Continuing Care Retirement Communities often offer contracts that enable a resident, or their estate in the event of the resident's death, to receive some or all of the initial entrance fee when the contract is terminated. In California, these contracts are classified as either "repayable" or "refundable." Repayable contracts include a promise to repay all or a portion of an entrance fee, conditioned upon the reoccupancy or resale of the unit that was previously occupied by the resident to whom the entrance fee is owed. Refundable contracts include a promise by the provider to refund the entrance fee within a specified time frame that is not conditioned upon re-occupancy or resale of the unit. The key difference between repayable and refundable contracts is the source of the funds; repayable contracts generate the required funds as a result of reselling the resident's unit, while refundable contracts appropriate funds from a reserve

account. Current law requires that residents be made aware of whether their contract is refundable or repayable at the time the resident signs the contract.

This bill pertains to repayable contracts. This bill adds a new type of repayable contract based on the sequential order in which repayable contracts are terminated. Under the sequential order method, a provider would assign each terminated contract with a sequential payment number and establish a designated sequential repayment account from which the owner of a unit with a sequential order contract will be repaid. This bill gives Continuing Care Retirement Communities the option to offer sequential order repayable contracts while retaining the option to offer "exact unit" repayable contracts or refundable contracts already permitted by law, which would be renamed as "repayable conditioned on resale" contracts.

Related/Prior Legislation

AB 2033 (Choi, 2018) would have revised the definition of a repayable contract to include a contract that includes a promise to repay all or a portion of an entrance fee on a sequential basis from an entrance fee repayment pool that is funded by the resale of units in the pool at the facility, as they become available. AB 2033 was referred to the Assembly Aging and Long-Term Care Committee but never heard.

AB 853 (Choi, 2017) would have expanded the definition of a repayable contract to include a promise to repay all or a portion of an entrance fee based on the sequential order of termination of all repayable contracts at the facility previously occupied by the resident. AB 853 was referred to the Assembly Aging and Long-Term Care Committee but never heard.

SB 939 (Monning, Chapter 112, Statutes of 2016) required that continuing care contracts that contain lump sum contract termination payments conditioned on resale of the unit must meet a series of requirements and timelines, must pay interest after a specified period of vacancy, and must meet other requirements.

SB 475 (Monning, 2015) would have required continuing care contracts which condition lump sum contract termination payments on resale of the unit to meet a series of requirements and timelines, to pay interest after a specified period of vacancy, and to meet other requirements. The bill would also have created a complaint process for residents if the repayment had not been made within 12 months. SB 475 was vetoed by the Governor.

Comments

This bill seeks to create a new type of repayable contract based on sequential order for Continuing Care Retirement Communities. According to the sponsor, allowing

the sequential order method would be in the best interest of the provider and the resident or their family, as the sequential order method allows for more transparency and certainty of repayment timelines. Under the sequential order method, repayment would be issued in order of who has been waiting the longest rather than based on the sale of a specific unit. This bill would make the sequential order method optional for providers.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, "The California Department of Social Services (CDSS) estimates General Fund costs of $185,000 in 2026-27 and $181,000 ongoing thereafter to review contracts and create an additional repayment method to review within contracts, as well as to provide training to staff on these contract types."

SUBJECT: Student health: athletic coaches and trainers: mental health training

SOURCE: Sarah Shulze Foundation

DIGEST: This bill requires, by July 1, 2028, and every two years thereafter, the campuses of the California State University (CSU), the California Community Colleges (CCCs), and each private postsecondary educational institution and independent institution of higher education that receives state financial assistance, and requests of the campuses of the University of California (UC), a coach of an athletic program—including an assistant coach or trainer—to complete a training on student mental health, as specified, as a condition of the coach's employment or volunteer service.

ANALYSIS:

Existing law:

1) Establishes the UC as a public trust to be administered by the Regents of the UC; and grants the Regents full powers of organization and government, subject only to such legislative control as may be necessary to insure security of its funds, compliance with the terms of its endowments, statutory requirements

around competitive bidding and contracts, sales of property and the purchase of materials, goods and services. (Article IX § 9 of the California Constitution)

2) Establishes UC, CSU, and the CCCs as the three segments of public higher education and defines "independent institutions of higher education" as nonpublic higher education institutions that grant undergraduate degrees, graduate degrees, or both, and that are formed as nonprofit corporations in California and are accredited by an agency recognized by the United States Department of Education (USDE). For purposes of any code or statute, a national or regional accrediting agency recognized by the USDE as of January 1, 2025, shall retain that recognition until July 1, 2029, provided that the accrediting agency continues to operate in substantially the same manner as it did on January 1, 2025. (Education Code (EC) § 66010, et seq.)

3) Requires the governing board of each community college district (CCD), the Trustees of the CSU, the Board of Directors of the College of Law, San Francisco, and the Regents of the UC to, within existing resources, adopt and implement a rape and sexual assault education program for, and ensure maximum feasible participation of, students and student services professional staff members or student affairs professional staff members at each of their respective campuses or other facilities. (EC § 67391)

4) Finds and declares that colleges should provide special sexual assault seminars for all athletic coaches and administrators and members of athletic teams, and states that these seminars should take place during a student athlete orientation program or prior to the first team meeting. (EC § 67390)

This bill:

1) Requires, by July 1, 2028, and every two years thereafter, each campus of the CSU, each CCC, and each private postsecondary educational institution and independent institution of higher education that receives state financial assistance, and requests of the UC, a coach in an athletic program—including an assistant coach or trainer—to complete a training on student mental health, as specified, as a condition of the person's employment or volunteer service.

2) Requires the specified training to cover suicide prevention education, at a minimum, and permits the specified trainings to cover mental health first aid education.

3) Permits that the specified training be provided by an entity that offers free, online, or other types of training courses.

4) Requires that this legislation be known, and may be cited, as Sarah Shulze's Law.

Comments

Need for the bill. According to the author, "There is currently no standard in state law that requires athletic coaches at college and universities to be trained on mental health awareness and best practices for their student-athletes. Without a state standard, individual institutions and campuses are left to create their own standards if they voluntarily train coaches on mental health. This leaves room for potentially no standard at all, inconsistent implementation if there is a policy, and generally a lack of oversight from the state to ensure coaches are receiving training on the most up-to-date and evidence-based best practices."

Slate of bills from 2025-26 Regular Session promoting wellness and improved mental health for pupil athletes. This bill, along with AB 1626 (Gabriel of 2026) and AB 1665 (Pacheco of 2026), recognizes the unique role that athletic coaches have in young athletes' lives and aims to equip coaches with the tools and the understanding so that they can appropriately respond and provide support to young men and women during an age when this support is critical. This bill aims to provide mental health training for athletic coaches at the collegiate level, and AB 1626 (Gabriel of 2026) and AB 1665 (Pacheco of 2026) address providing mental health training for athletic coaches in K-12 schools and youth organizations.

Mental health challenges on college campuses and for college athletes. Historical data suggests the prevalence of mental health issues among college students nationally has increased over the long term. More recent data suggests the COVID-19 pandemic exacerbated this trend. Since the onset of the pandemic, several studies have found further increases in a variety of student mental health issues. For example, a 2024-25 study from the Healthy Minds Network, which is a research organization focused on the mental health of young adults, reports that college students continue to report poor mental health, with more than one in three students saying they experience moderate anxiety or depression. Data from the most recent survey found that only 36% of college students are thriving, reporting high levels of success in relationships, self-esteem, purpose, and optimism, down slightly from 38% the previous year.

For college athletes in particular, the pressures of balancing their academics and the time spent traveling, practicing, and competing in competitions are draining and leave many student athletes overwhelmed. Moreover, with more colleges moving into conferences that are not geographically close to the campuses, college athletes are traveling farther than ever as part of their regular season. This bill requires training on student mental health for athletic coaches, with the intent for coaches to be equipped to recognize signs of mental illness and behavioral distress in students participating in athletic programs. The UC has indicated that they already mandate their athletic coaches to take the trainings required by this bill.

Related/Prior Legislation

AB 1626 (Gabriel of 2026) would establish training content areas, related to behavioral and mental health challenges specific to pupil athletes, to be used for trainings for coaches of interscholastic athletic programs, non-interscholastic athletic programs, and youth sports organizations. This bill requires the CDE, by September 1, 2027, to identify an existing training or develop a model youth athletics behavioral and mental health training, as specified, for coaches in youth sports organizations. AB 1626 is currently on the Assembly Floor.

AB 1665 (Pacheco of 2026) would require, commencing July 1, 2027: (1) a coach for an interscholastic athletic program at a high school that is a member of the California Interscholastic Federation to complete an initial training, and subsequent training every two years, on a coaching education and training program on mental health, and (2) that a local educational agency (LEA) ensure a coach of a non-interscholastic athletic program complete an initial training, and subsequent training every two years, covering sudden cardiac arrest and youth athletics behavioral and mental health, if the LEA chooses to offer a non-interscholastic athletic program. AB 1665 is currently on the Senate Floor.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The California Community Colleges Chancellor's Office estimates minor, ongoing Proposition 98 General Funds costs for community colleges to identify and provide the required training, with the understanding they would opt to offer an existing or free training that is available, or an existing training that may already be offered to mental health employees that satisfies the requirement. However, to the extent a community college decides to develop its

own training, the Proposition 98 General Fund costs could range from the tens of thousands to the hundreds of thousands of dollars.

- The bill's costs for CSU and UC are expected to be minor and absorbable within existing resources.

SUBJECT: California Child Poverty Reduction Advisory Council

SOURCE: Grace INC

DIGEST: This bill establishes the California Child Poverty Reduction Advisory Council and requires the council to create benchmarks and metrics that measure California's progress toward reducing child poverty by 50% in 10 years.

ANALYSIS:

Existing Law:

1) Establishes, in federal law, the Promise Neighborhood program, which provides grants to nonprofit organizations, tribal organizations, or institutions of higher education, which, together with partners, develop and implement plans to significantly improve outcomes of children living in a given neighborhood. (20 United States Code section 7274)

2) Establishes the "California Cradle-to-Career Data Systems Act," which expresses legislative intent to build a data system that services students and families by identifying and tracking predictive indicators to enable parents,

teachers, health and human services providers, and policymakers to provide appropriate interventions and supports to address disparities in opportunities and improve outcomes for all students. (Education Code section 10850 et seq.)

3) Establishes the California Work Opportunity and Responsibility to Kids (CalWORKs) program to provide cash assistance and other social services for low-income families through the federal Temporary Assistance for Needy Families (TANF) program. Under CalWORKs, each county provides assistance through a combination of state, county, and federal TANF funds. (Welfare and Institutions Code (WIC) 11200 et seq.)

4) Establishes the CalFresh program to administer the provision of federal SNAP benefits to families and individuals meeting specified criteria. (WIC section 18900 et seq.)

5) Requires the Governor to create an Interagency Council on Homelessness. (WIC section 8257 et seq.)

6) Makes findings and declarations establishing the Homeless Youth Act of 2018 to improve prevention and early intervention services for youth at risk of experiencing homelessness and increase access to services for youth experiencing homelessness. (WIC section 8259)

7) Requires CDSS to work with the State Department of Education to maximize participation in the federal Summer Electronic Benefit Transfer for Children program (WIC section18901.57)

8) Requires public assistance program recipients to be supplied with information regarding their potential eligibility for the federal and California Earned Income Tax Credit, Young Child Tax Credit and Foster Youth Tax Credit. (Revenue and Taxation Code section 19854)

This bill:

1) Makes findings and declarations about the impact of child poverty and the intent of the Legislature to reduce child poverty by 50% within 10 years.

2) Establishes the California Child Poverty Reduction Advisory Council (Council) within the California Department of Social Services.

3) Requires CDSS to provide staff for and administer the Council.

4) Requires the Council to convene no later than April 1, 2027.

5) Requires CDSS to assist the task force in carrying out its duties to the extent funding is available.

6) Requires the Council to be co-chaired by both the Secretary of California Health and Human Services or their designee and the Director of Social Services or their designee.

7) Requires the Council to be made up of 19 members, as follows:

   a) Fifteen members appointed by the Governor including executive-level representatives from each of the following:

      i) CDSS.

      ii) The State Department of Health Care Services.

      iii) The State Department of Education.

      iv) The State Board of Education.

      v) The State Department of Finance.

      vi) The California Interagency Council on Homelessness.

      vii) The California Cradle-to-Career Data System.

      viii) A county organization focused on ending child poverty, including, but not limited to, the First 5 Association of California or a County Children's Cabinet.

      ix) A county or regional human services agency.

      x) A statewide nonprofit focused on ending child poverty.

      xi) A California Promise Neighborhood or similar place-based initiative.

      xii) An organization representing immigrant families.

   b) Two individuals with lived experience of child or family poverty.

   c) One youth representative who is 16 to 25 years of age, inclusive.

   d) Two members appointed by the Speaker of the Assembly.

e) Two members appointed by the President pro Tempore of the Senate.

8) Requires members of the Council to serve without compensation except for reimbursement of reasonable travel expenses.

9) States that a vacancy occurs upon the resignation, death, removal, or failure of a member to attend three consecutive meetings without good cause.

10) Permits an appointing authority to remove a member for misconduct, neglect of duty, chronic nonattendance, change of employment, conflict of interest, or conduct inconsistent with the mission of the council and requires the vacancy to be filled by the original appointing authority within 60 days.

11) Prohibits a vacant seat from counting toward a quorum.

12) Requires the Council to determine where there is overlap of existing child poverty reduction or child welfare commissions and reports and develop a comprehensive plan for reducing redundancy. The plan shall include annual benchmarks to reduce statewide child poverty by 50% within 10 years.

13) Requires the Council to determine considerations to evaluate whether a policy proposal, budget provisions, or pending legislation increases or decreases child poverty. Policy proposals include, but are not limited to, expansion of refundable tax credits, guaranteed income or cash plus supports, affordable and subsidized childcare, housing and homelessness prevention, nutrition programs, behavioral health supports, workforce, and living wage pathways.

14) Requires the Council to determine considerations to evaluate whether a policy proposal, budget provision, or pending legislation increases or decreases administrative burdens for families with children.

15) Requires the Council to, at least once per year, apply the considerations to at least one policy proposal budget provision, or pending piece of legislation that requires interagency or multiagency collaboration.

16) Requires the Council to post the application of the considerations required by the preceding point on a platform of its choosing.

17) Allow the Council to apply the considerations to other relevant policy proposals, budget provisions, and pending pieces of legislation. The council may post the application of considerations on a platform of its choosing, including an existing department internet website.

18) Requires the Council to, at least once per year, apply the considerations to least one interagency or multiagency state program or administrative process that can be modified to reduce barriers to access and improve equity for children and families.

19) Requires the Council to post the application of the considerations required by the preceding point on a platform of its choosing.

20) Allow the Council to apply the considerations to other state programs or administrative processes. The council may post the application of considerations on a platform of its choosing, including an existing department internet website.

21) Requires the Council to meet at least quarterly.

22) Requires the Council to submit both of the following reports to the Legislature:

    a) Comprehensive recommendations by March 1, 2028.

    b) A progress report by January 1, 2030.

23) Requires all the reports listed above to be submitted in compliance with Section 9795 of the Government Code.

24) Makes the bill inoperative on July 1, 2030 and repealed as of January 1, 2031.

Background

According to the author, "AB 1996 is grounded in the principle that every child in California deserves to grow up with stability, dignity, and access to the resources necessary to thrive. Yet today, nearly one in five children lives in a household struggling to afford basic necessities like housing, food, and healthcare—placing immense strain on families and limiting opportunities for youth through no fault of their own. As pandemic-era supports have expired and federal cuts loom, families are being asked to do more with less, and the consequences are immediate and real.

"The impacts are visible every day: missed meals, delayed care, preventable health inequities, and chronic stress that disproportionately burden communities already facing systemic barriers. While California has demonstrated that targeted investments can reduce child poverty, the state currently lacks a coordinated structure to sustain and build on that progress. AB 1996 addresses this gap by establishing a Child Poverty Reduction Advisory Council to promote accountability, align policy efforts, and ensure that the needs of children and families remain central in budget and legislative decisions. By setting a clear goal of reducing child poverty

by 50 percent over the next 10 years, this bill advances an equity-driven, data-informed approach to improving outcomes for children statewide."

California's Safety Net. The majority of California's safety net programs have stringent and unique eligibility criteria with different application and access points, which make programs difficult to navigate and attain for families who need support, especially when compounded with the chronic stress of living in poverty.[1] This bill will require the Council to consider whether policy proposals increase or decrease these types of administrative burdens for families with children.

Lifting Children and Families out of Poverty Task Force. AB 1520 *(Burke, Chapter 415, Statutes of 2017)* created the Lifting Children and Families out of Poverty Task Force (Task Force) to identify comprehensive strategies aimed at addressing deep childhood poverty and reducing child poverty in California. As a part of this effort, the Task Force examined strategies to better coordinate services, noting that families in poverty often have an array of service needs, but linking families with support services can be challenging due to disparate eligibility rules across programs and families' lack of time to find and apply for services they could be eligible for. The Task Force drew from the research support of Goldman School of Public Policy, University of California, Berkeley, and Stanford Center on Poverty and Inequality as well as state departments and stakeholders. It also convened meetings, discussions, and subcommittees that created a list of recommendations to reduce child poverty by 50%. The final Task Force report, the End Child Poverty Plan, was published in 2018 and notes that:

> Recommendations to address both immediate and long-term needs include increased tax credits, larger CalWORKs grants, expanded Medi-Cal eligibility and more child care and early education access. The Task Force reported that the phase-in of their recommendations would cost $1.4 billion in 2019–20, $3.5 billion in 2020–21, and $5.6 billion in 2021–22 but would ultimately create $12 billion in benefits to state and local government as children exit poverty and become successful adults. According to the End Child Poverty California coalition, 41 of the 43 recommendations have now been partially or fully implemented. It should be noted that these estimates are based on the Medi-Cal and CalFresh program before changes in federal law made by H.R. 1 (Public Law 119-21), which will make it harder for families to remain eligible for these programs.

---

[1] Francis, L., DePriest, K., Wilson, M., & Gross, D. Child Poverty, Toxic Stress, and Social Determinants of Health: Screening and Care Coordination. Online journal of issues in nursing, 2018. https://doi.org/10.3912/OJIN.Vol23No03Man02

This bill creates a Council that would have a similar mission to the Task Force but be a permanent entity housed in the Health and Human Services Agency. It will also create considerations that can be used to determine whether a policy proposal will increase or decrease childhood poverty and the administrative burden on families in poverty.

Federal Promise Neighborhoods. One recommendation of the Task Force was to create 20 new Promise Neighborhoods throughout California. Promise Neighborhoods are a federally funded effort to provide holistic, place-based approaches to reducing poverty and improving economic, social, and academic outcomes in disadvantaged communities. According to the Lifting Children and Families out of Poverty Task Force, "Promise Neighborhoods tailor their specific set of cradle-to-college-and-career solutions to the local context, but each share the following characteristics: results-driven focus on impacting population-level results; place-based to focus on a specific high-need geography; collective impact is achieved through partnerships; […] and most importantly, Promise Neighborhoods implement a comprehensive cradle-to-college-and-career continuum that addresses all of a family's needs to help them move out of poverty." Additionally, the Task Force noted that the model is community-powered, relies on both public and private investments, and is equity-focused.[2] This bill includes representatives from Promise Neighborhoods on the Council.

Related/Prior Legislation:

AB 1969 (Bonta, 2026) would establish the It Takes a Village Act of 2026 which creates the California Coordinated Neighborhood and Community Services Grant Program to be administered by CDSS or another department within the California Health and Human Services Agency, as designated by the Secretary of California Health and Human Services. AB 1969 is pending on the Senate Floor.

AB 132 (Committee on Budget, Chapter 144, Statutes of 2021) establishes the Cradle-to-Career Data System to link data on student progress through education, workforce training, employment, health and social services; establishes a governing board comprised of 21 members; and, establishes the Office of Cradle-to-Career Data within Government Operations Agency until July 1, 2026, among other things.

[2] ibid

AB 1520 (Burke, Chapter 415, Statutes of 2017) created the Lifting Children and Families out of Poverty Task Force to identify comprehensive strategies aimed at addressing deep childhood poverty and reducing child poverty in California.

SUBJECT: Housing developments: urban lot split: owner-occupancy

SOURCE: Author

DIGEST: This bill revises owner-occupancy requirements for an urban lot split under SB 9 (Atkins, Chapter 162, Statutes of 2021) until January 1, 2032.

Senate Floor Amendments of 8/19/26 address chaptering conflicts with AB 2601 (Lee).

ANALYSIS:

Existing law:

1) Allows, under the California Constitution, cities and counties to "make and enforce within its limits, all local, police, sanitary and other ordinances and regulations not in conflict with general laws."

2) Requires, under SB 9, a city or county to ministerially approve either or both of the following, as specified:

   a) A housing development of no more than two units (duplex) in a single-family zone; or,

   b) The subdivision of a parcel zoned for residential use, into two approximately equal parcels (urban-lot split), as specified.

3) Authorizes a city or county to impose objective zoning, subdivision, and design review standards that do not conflict with state standards, except:

   a) A city or county shall not impose objective standards that would physically preclude the construction of up to two units or that would physically preclude either of the two units from being at least 800 square feet in floor area. A city or county may, however, require a setback of up to four feet from the side and rear lot lines; and,

   b) A city or county shall not require a setback for an existing structure or a structure constructed in the same location and to the same dimensions as the existing structure.

4) Requires a city or county to ministerially approve a parcel map for an urban-lot split only if the local agency determines that the parcel map for the urban-lot split meets specified requirements.

5) Provides that a local government shall not be required to permit more than two units on a parcel.

6) Requires an applicant for an urban-lot split to sign an affidavit stating that the applicant intends to occupy one of the housing units as their principal residence for a minimum of three years from the date of the approval of the urban-lot split.

This bill:

1) Adds the option for an applicant of an SB 9 urban-lot split to select a different owner occupancy requirement, which shall be imposed as a condition of approval of a parcel map for the lot split, as follows:

a) The applicant signs an affidavit stating they intend to sell both parcels of an urban lot split after issuance of a certificate of occupancy within 3 years from the date of the approval of the urban lot split.

b) The applicant requires, as a condition of sale to the homebuyer, that one of the units on each parcel of the lot split remain owner-occupied for three years, beginning on the date the parcel or unit is conveyed.

c) The local agency records a notice of the owner-occupancy requirement as a condition of ministerial approval of the parcel map for the lot split.

d) The parcel or unit being purchased is subject to a recorded deed restriction imposing the owner-occupancy requirement on any subsequent homebuyer who purchases the parcel or unit during the three-year period.

e) The homebuyer records a notice of owner-occupancy as a condition to acquiring title to a parcel or unit. The notice shall state that the homebuyer, and any subsequent homebuyer who purchases the parcel or unit during the three-year period, is required to occupy the parcel or unit or designate the parcel or unit as their primary residence.

2) Requires all applicants for SB 9 urban-lot splits to sign an affidavit, under penalty of perjury, stating that they intend to comply with the owner occupancy requirement.

3) Allows a natural person who is the managing or authorized member of a limited liability company (LLC) or the trustee or beneficiary of a living trust to be the applicant for an urban-lot split under SB 9.

4) Provides that an applicant for an urban-lot split who is the managing or authorized member of an LLC who violates the SB 9 owner occupancy requirements shall be liable for civil penalties.

5) Excludes the boundaries of the 2025 Palisades or Eaton Fires in Los Angeles County from the bill.

6) Prohibits a local agency from adopting or imposing any requirement, process, practice, or procedure, or undertake any course of conduct, that applies to a project solely or partially on the basis of the project being an SB 9 lot split, including, but not limited to, restricting the eligibility of an applicant for an urban-lot split.

7) Requires the seller of an urban-lot split under SB 9 to disclose, in writing, any owner occupancy requirement for three years after the conveyance of an urban-lot split if the seller is the managing or authorized member of a LLC or the trustee of a living trust.

8) Sunsets the provisions of SB 9 that are added by this bill on January 1, 2032.

Background

Planning and approving new housing is mainly a local responsibility. The California Constitution allows cities and counties to "make and enforce within its limits, all local, police, sanitary and other ordinances and regulations not in conflict with general laws." It is from this fundamental power (commonly called the police power) that cities and counties derive their authority to regulate behavior to preserve the health, safety, and welfare of the public—including land use authority.

Planning and Zoning Law. State law provides additional powers and duties for cities and counties regarding land use. The Planning and Zoning Law requires every county and city to adopt a general plan that sets out planned uses for all of the area the plan covers. Cities' and counties' major land use decisions—including most zoning ordinances and other aspects of development permitting—must be consistent with their general plans.

Subdivision Map Act. The Subdivision Map Act (or Map Act) governs how local officials regulate the division of real property into smaller parcels for sale, lease, or financing. Cities and counties adopt local subdivision ordinances to carry out the Map Act and local requirements. City councils and county boards of supervisors use the Map Act to control a subdivision's design and improvements. Local subdivision approvals must be consistent with city and county general plans.

Under the Subdivision Map Act, cities and counties can attach scores of conditions. The Map Act allows local officials to require, as a condition of approving a proposed subdivision, the dedication of property within a subdivision for streets, alleys, drainage, utility easements, and other public easements and improvements. Once subdividers comply with those conditions, local officials must issue final maps. For smaller subdivisions that create four or fewer parcels, local officials usually use parcel maps, but they can require tentative parcel maps followed by final parcel maps. The Map Act also constrains the dedications and improvements that local cities and counties can require as a condition of a subdivision of four or fewer lots to only the dedication of rights-of-way, easements, and the construction of reasonable offsite and onsite improvements for the parcels being created.

Senate Bill 9 (Atkins, 2021). SB 9 requires cities and counties to permit ministerially either or both of the following, as long as they meet specified conditions:

- A housing development of no more than two units (a duplex).
- The subdivision of a parcel into two approximately equal parcels (urban lot split).

To be eligible, a development or parcel to be subdivided must be located within an urbanized area or urban cluster, as defined by the United States Census and cannot be located on specified types of sites with certain environmental conditions.

SB 9 requires a city or county to permit a housing development containing no more than two units ministerially in single family zones if the development meets certain conditions, including the requirements on eligible parcels above. A development can include adding one unit to an existing unit, or constructing two new units. In combination, SB 9's provisions allow up to four units to be built in areas where local zoning currently only allows one home.

Owner-occupancy requirements. Among other conditions, SB 9 requires that an applicant for an urban lot split submit a sworn affidavit to the city or county stating that the applicant intends to occupy one of the housing units as their principal residence for a minimum of three years from the date of the approval of the urban lot split. It also prohibits a local agency from imposing other owner occupancy standards.

Because housing developers focus on selling properties to other owners after they complete construction, SB 9's owner-occupancy requirement effectively prohibits anyone other than an owner-occupant from building the maximum of four units allowed by the law.

Recent reports on SB 9's effectiveness. In July 2021, as SB 9 was proceeding through the legislative process, the Terner Center for Housing Innovation at UC Berkeley (Terner Center) completed an analysis that estimated it could make approximately 700,000 units financially feasible to construct. The report emphasized that this number represents a maximum potential number of units, and was not a forecast of the number of units that would be developed.

After one year of SB 9 implementation, the Terner Center evaluated SB 9's effectiveness through another report. The report found that SB 9's impact has been

limited, and some larger cities have only seen a few, if any, applications for lot splits or new units. According to the report:

> We found that SB 9 activity is limited or non-existent in these thirteen cities (Table 1). Los Angeles had the most overall activity, with 211 applications for new units under SB 9 in 2022. The state's other large cities all reported very few applications for lot splits or new units. For example, the city of San Diego reported receiving just seven applications for new SB 9 units in 2022. To put these numbers into context, the city of San Diego permitted over 5,000 new homes in all of 2021 and Los Angeles permitted just under 20,000 new homes in 2021.

The report listed a variety of changes that could increase use of the law, including:

- Establishing more flexible standards for new home design—such as larger maximum home sizes and heights—and limiting extra costs—such as impact fees, particularly for single-family home to duplex conversions; and

- Revisiting the owner-occupancy requirement to encourage higher usage, while maintaining proper guardrails to protect against speculation by institutional investors and displacement in vulnerable communities.

In 2024, the Legislature amended SB 9 to address some of the early barriers to low utilization of the law through SB 450 (Atkins, Chapter 286, Statutes of 2024). SB 450 added a 60-day review period for SB 9 applications, removed the ability of local agencies to deny certain SB 9 projects, prohibited a local agency from imposing standards on SB 9 projects that do not apply to the underlying zoning district, gave the Department of Housing and Community Development (HCD) explicit enforcement authority over SB 9, and strengthened the statewide concern findings that applied SB 9 to charter cities. However, SB 450 did not modify the law's owner-occupancy requirements.

Uptake in recent years has increased: HCD's Annual Progress Report dashboard reports, as of June 2026, that 1,671 SB 9 projects have been submitted statewide, with 862 projects submitted in the City of Los Angeles alone. The author wants to further encourage the use of SB 9 to build additional units.

Comments

1) *Purpose of the bill.* According to the author, "California's housing shortage—and the growing homeownership crisis—requires solutions at many scales. SB 9

was designed to enable small, incremental housing production led by homeowners, creating opportunities for more attainable, entry-level ownership in existing neighborhoods. It also allows homeowners to unlock value within their own property that is otherwise inaccessible unless they sell and leave their home.

"However, implementation has revealed unintended technical barriers that prevent some responsible homeowners from participating, particularly those who use common estate planning tools. AB 2005 clarifies the law, so it works as intended, ensuring these homeowners are not excluded while maintaining strong protections against investor speculation.

"In my district, I still need to rent because the average price of a first-time home exceeds $ 1 million. AB 2005 can help create greater equity in homeownership, removing barriers that unlock small-scale housing production, expand access to entry-level homeownership, and support long-term wealth building for California families who are increasingly being priced out of the market."

2) *There's gold in them thar hills*. The urban lot split provisions of SB 9 attempt to strike a balance between encouraging widespread, but less visible, densification of single-family zones and the desire to keep community ties intact. It allows homeowners to build generational wealth by splitting off a portion of their lot to be used to develop new housing, while keeping them in their home and the community they have connections to. SB 9's current owner-occupancy requirement allows urban lot splits in these circumstances, but prevents developers, who may have more expertise and capacity to build new units but do not occupy the units they build, from maximizing the number of units built through SB 9. AB 2005 revises the owner-occupancy requirement to allow sale of units developed using an urban lot split to future homeowners who occupy the property. This could enable more SB 9 units to be built, which are smaller and therefore may sell for cheaper than the currently available homes. Opponents of the measure are concerned that this could lead to displacement of vulnerable residents if investors see a profitable opportunity and flip less-expensive housing into more expensive new homes that are unaffordable to existing community members.

SUBJECT: Blood banks and plasma centers

SOURCE: Plasma Protein Therapeutics Association

DIGEST: This bill makes various updates in licensing provisions for plasma centers (PCs), including: excluding PCs from blood bank licensing laws; eliminating requirements pertaining to blood transfusion principles and practices; modernizing the requirements for acceptable photographic identification to be a plasma donor; allowing for other licensed health professionals to do pre-donor screenings; and, allowing for the continuity of PC operation when there are personnel or ownership changes.

ANALYSIS:

Existing law:

1) Prohibits a person from engaging in the production of human whole blood or human whole blood derivatives unless the person is licensed by the California Department of Public Health (CDPH), and the human whole blood or human whole blood derivative is collected, prepared, labeled, and stored in accordance with standards for all licensed blood banks (including PCs) and blood

transfusion services in the state set by the American Association of Blood Banks and specified state regulations. [Health and Safety Code (HSC) §1602.5]

2) Requires blood to be processed into plasma only in blood banks adequately staffed and equipped for that purpose. Requires the individual directly in charge of plasma processing to be a licensed physician or an individual sufficiently trained in laboratory procedures relating to blood banking and plasma processing and whose qualifications have been approved by CDPH. Permits the staff to include other trained persons necessary for the proper operation of plasma processing. [17 California Code of Regulations (CCR) §1011]

3) Permits a person to perform a total protein test using a digital refractometer in a licensed PC, if CDPH, as part of its routine, fee-supported inspection of the licensed PC, including its review of personnel reports for licensed and unlicensed personnel and job descriptions of all center positions for a licensed plasma collection center, determines that specific conditions, such as education, training, and supervision, are met. [Business and Professions Code (BPC) §1246.7]

4) Requires each blood bank or PC to require as identification either a driver's license or other photographic identification issued by the Department of Motor Vehicles (DMV) from all donors of human whole blood or blood components who receive payment in return for the donation of that blood or blood components. [HSC §1603.2(a)]

5) Requires establishments that receive human whole blood and human whole blood derivatives specified by regulation and are not subject to licensure provisions for human whole blood, human whole blood derivatives, and other biologics, to be considered as blood bank depositories. Laboratory tests and other procedures with respect to the preparation of blood for transfusion are the sole responsibility of the blood bank depository. [HSC §1605]

6) Requires blood bank and PC licenses to be automatically revoked when there is a change of address, ownership, or person in charge of biologics production. Permits a new license to be secured for the new location, owner, or person in charge prior to the actual change if the contemplated change is in compliance with all the provisions of relevant existing law. [HSC §1615]

This bill:

1) Makes various updates to laws governing the operation of PCs and related licensing provisions that:

   a) Specify that "source plasma donation centers" are not blood bank depositories. Defines "source plasma donation centers" as a facility, other than a licensed blood bank, where source plasma is collected by plasmapheresis;

   b) Expands the forms of identification blood banks and PCs are required to obtain from all donors of human whole blood or blood components who receive payment for the donation to include photographic identification issued by another state, federal agency, or tribal government. Permits CDPH to notify PCs of the acceptable forms of donor identification by means of a provider bulletin or notice, policy letter, posting on CDPH's website, or other similar instructions without taking regulatory action; and,

   c) Deletes the requirement that a PC license be automatically revoked upon a change in the person in charge of the PC. Requires a PC, if the person in charge of biologics production disassociates with it, to provide written notification to CDPH within 24 hours of the date of the disassociation and to submit, within 30 days, an amendment to the application designating a new person in charge.

2) Prohibits a licensee from operating without the supervision of a medical director.

3) Requires a license to be automatically revoked when there is a change of address, ownership, or the person in charge of biologics production. Permits a new license to be secured for the new location, owner, or person in charge prior to the actual change of the contemplated change is in compliance with all the provisions of this bill's provisions and regulations.

4) Prohibits CDPH from automatically revoking a PC's license when there is a change of the person in charge of biologics production if: (1) The owner or the owner's representative provides written notification of the change to CDPH within five days of the change that includes the name of the previous person in charge of biologics and their date of departure, the name and qualifications of the interim designee and anticipated duration of service, and the signature of the owner or owner's representative; and (2) the licensee submits, within 30 days of

the change, the application for a new person in charge of biologics production pursuant to this bill's provisions.

5) Permits a licensed PC's medical director to establish protocols for authorizing other licensed health care professionals, as approved by CDPH, acting within their scope of practice to perform donor screenings, predonation health screenings, and donor suitability assessments.

6) Permits a licensed PC's medical director to delegate to other licensed health care professionals the performance of health services duties that are both of the following:

   a) Within the scope of practice of the licensed health care professional, as approved by CDPH and as defined under that person's respective licensing act; and,

   b) Performed under the supervision and protocols established by the medical director, consistent with facility policies and applicable state and federal requirements.

7) Specifies that 6) above does not expand the scope of practice of any licensed health care professional or limit the authority of CDPH to regulate PCs.

8) Adds to the list of conditions under which a person may perform a total protein test using a digital refractometer that the licensed PC's medical director has sufficient proficiency and knowledge with the use and supervision of digital refractometers in performing total protein tests. If the PC only performs services related to plasma collection, CDPH is prohibited from imposing additional unrelated experiential requirements for medical directors of PCs, including transfusion principles and transfusion practices.

9) Requires PCs and their auxiliaries to be under the direction of a medical director or person in charge of biologics production who is both a licensed physician and has a minimum of three months of experience or training in PC methods and meets other applicable state and federal requirements.

Background

According to the author of this bill:

> California prides itself on being a leader in innovation and health care, but outdated laws are holding us back. This bill will improve our ability to collect source plasma efficiently and better meet the needs of patients who depend on these therapies every day. California is one of only ten states in the nation that does not collect enough plasma to meet the needs of its residents, forcing reliance on long, out-of-state supply chains for essential medicines. This bill brings California's policies into alignment with modern medical practice without compromising safety.

Author's stated need for updates. In background information provided by the author's office, it is stated that California currently applies a mix of laws written for other entities (blood banks for transfusion, clinical labs, etc.) to govern PCs. Some of these laws are from a time when source plasma donation was a manual process. The plasma donation process has been automated since the 1990s. As a result of these antiquated rules and regulations, California lags far behind other states when it comes to plasma donation. Even though California is the most populous state and the fourth largest economy in the world, California ranks 39th in the country in terms of per capita plasma donation. In fact, California only collects 80% of the plasma needed to meet the needs of its residents.

Whole blood vs. plasma donation. According to the Red Cross website, whole blood is simply the blood that flows through one's veins. It contains red cells, white cells, and platelets, suspended in plasma. Whole blood is the most flexible type of donation and can be transfused in its original form, or used to help multiple people when separated into its specific components of red cells, plasma, and platelets. Every day, donations help save the lives of children and adults fighting to survive cancer, blood disorders, traumatic injuries, and more. During a plasma-only donation, blood is drawn from one arm and sent through a machine that collects plasma and returns red cells and platelets back to the donor, along with some saline. It takes only a few minutes longer than donating blood but can have a profound impact. Type AB plasma is the only universal type and can be given to patients of any blood type. Only 4% of the population has type AB blood. Plasma products are used by burn, trauma, and cancer patients.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, unknown costs, potentially tens of thousands, for the California Department of Public Health (CDPH) for state administration (Clinical Laboratory Improvement Fund).

OPPOSITION: (Verified 8/13/26)

None received

ARGUMENTS IN SUPPORT: The Plasma Protein Therapeutics Association, as sponsor, and other supporters state that this bill would modernize California's laws that regulate PCs, where human plasma is donated for the purpose of manufacturing plasma-derived therapies (PDTs). There are currently more than 60 PCs in the Golden State, providing between 3,000 and 6,000 high-paying jobs and injecting more than $300 million into local economies. Enactment of this bill would facilitate additional development of plasma collection in our state and, in doing so, ensure that the patients who depend on PDTs have reliable access to these lifesaving therapies.

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 76-0, 5/28/26 - See last page for vote

SUBJECT: Vehicles: transportation of manufactured homes

SOURCE: Author

DIGEST: This bill makes various changes to the requirements in regards to the transport of manufactured homes, as specified. Additionally, requires the State Department of Housing and Community Development (HCD) to convene a stakeholder working group and submit a report to the Legislature pertaining to improving efficiencies in the transport of various types of housing structures, as specified.

Senate Floor Amendments of 8/21/26 provide additional provisions pertaining to changing the Caltrans' permitting process for the transport of manufactured homes, factory-built housing, and commercial modular, as defined.

ANALYSIS:

Existing law:

1) Authorizes the State Department of Transportation (Caltrans), in consultation with the California Highway Patrol (CHP), to impose permit conditions,

including routing requirements and escort vehicle requirements (e.g. pilot car, CHP escort, etc), necessary to ensure safe movement of oversized loads.

2) Authorizes Caltrans and local authorities to issue special and annual permits for the movement of manufactured homes and mobilehomes, subject to specified terms and conditions to ensure public safety and highway protection.

3) Establishes requirements governing the transportation of manufactured homes on highways, including restrictions and conditions related to width, safety equipment, and operational requirements.

4) Defines a "Highway" as a way or place of whatever nature, publicly maintained and open to the use of the public for purposes of vehicular travel. A highway includes a street.

This bill:

1) Removes the good cause requirement for Caltrans or a local authority to issue a special or annual permit for the transport of manufactured homes, factory-build housing, or commercial modulars, as defined.

2) Expands the issuance of a special or annual permit to include the transportation of a manufactured home, factory-built housing, and commercial modular, not exceeding 14 feet in total width, as specified.

3) Provides that, when transporting a manufactured home, factory-built housing, and commercial modular, as defined, a mover is not required to obtain an additional special permit issued by Caltrans if the mover has obtained a Caltrans-issued annual permit to transport manufactured homes.

4) Removes the requirement and further authorizes Caltrans in cooperation with CHP or a local authority to require pilot car or special escort services for the transport of manufactured housing units, as specified.

5) Requires by March 31, 2027, for HCD in consultation with Caltrans and CHP to convene a stakeholder workgroup to gather feedback on cost pressures associated with the transport of manufactured homes, factory-built housing, and commercial modular and further provide feedback in regards to efficiencies and cost saving opportunities associated with the transport of the abovementioned housing units. Further specifies the workgroup is to meet on a quarterly basis

and identifies various stakeholder groups required to serve on the HCD-led working group, as specified.

6) Requires HCD in consultation with Caltrans and CHP to submit a report to the Legislature with findings and recommendations by January 1, 2029.

7) Makes technical changes to clarify the provisions specified in this bill pertain to manufactured homes, factory-built housing, or commercial modular, as defined.

Comments

1) *Caltrans-Issued Permits*. The Caltrans Transportation Permit Manual specifies four main types of transportation permits: single trip, repetitive, variance, and annual. Each of these is considered a type of special permit.

   A single-trip (i.e. special permit) is issued for a load or vehicle exceeding 8'-6" in width, 14' in height, or 80,000 pounds in weight, and is valid for one-way travel from Point A to Point B. The permit is valid for seven days and is good for one trip. Permit applicants prepare a safe route by checking all horizontal and vertical clearances, as well as bridge weight restrictions. If the same route is used for multiple one-way trips, a repetitive permit may be issued for loads up to 12 feet wide, 14'-6" high, and 90 feet long. A repetitive permit is valid for up to 90 days. For loads exceeding 15 feet in width, 17 feet in height, or 135 feet in length, a variance permit is issued, which is a type of single trip permit. A variance permit may require a CHP escort to move the load.

   An annual permit is issued for a load or vehicle up to 12 feet in width, 14 feet in height, and 40 feet distance from kingpin to rear axle. These permits are valid for one year. Permit applicants do not prepare a specific route; rather, annual permit holders may travel on all designated / approved routes.
   Caltrans weekly notifies the hauler of any restrictions on those approved routes.

   Regarding manufactured homes, annual permits are issued for loads up to 12 feet in width, 14 feet in height, and combined lengths up to 105 feet using California pilot car maps. These limits allow uniform statewide travel without requiring route-specific engineering review. A single-trip (i.e. special) permit is issued for manufactured homes between 12 and 16 feet in width because exceeding annual permit parameters (width, height, and length) requires

verification of bridge clearances, overhead structures, turning radii, and overall route feasibility.

2) *What are pilot vehicles / CHP escorts?* Pilot vehicles or CHP escorts are required when the vehicle load exceeds specified width / length / height thresholds. Pilot vehicle operators must carry valid California pilot car certification, two-way radios, warning flags, and comply with Vehicle Code signage and lighting requirements. Pilot vehicles must maintain a safe distance from the load, avoid impeding traffic, and follow designated positions (preceding or following). Pilot vehicles are typically required when width, length, or height exceed general requirements. For example, a load with a width over 12 feet would require a pilot vehicle(s). For significantly larger loads, a CHP escort is required when the load exceeds route-specific width / length thresholds, opposing lanes must be used, slowing is required for structures, crossing bridges, etc.

3) *Attempt to improve the process.* Supporters of this measure assert that as the state attempts to address its housing supply issues, more is needed to improve the efficiencies of transporting manufactured homes, factory-built housing, or commercial modular in and throughout California to assist in tackling the housing supply issue. The provisions specified in this bill attempt to take a step forward by attempting to implement a number of efficiencies in the Caltrans' permitting process, making changes to the permitting process, and establishing a stakeholder working group to identify inefficiencies and cost saving measures that aim to improve the transport of these three types housing structures in the future. However, it's important to note while this bill aims improve the various processes, the necessity for a number of provisions remains unclear including HCD being designated to lead the stakeholder working group and / or changing Caltrans' requirement to require pilot vehicles or CHP escort services for the transport of manufactured homes to be permissive.

SUBJECT: Department of Transportation: third-party navigation applications: study and report

SOURCE: Streets for All

DIGEST: This bill requires the California Department of Transportation (Caltrans) to conduct a pilot study and make recommendations on the impact of third-party navigation applications on roads in a particular region of the state.

ANALYSIS:

Existing law:

1) Authorizes local jurisdictions to implement slow streets programs, by closing a portion or the entirety of a local street to through traffic. To implement a slow streets program, the jurisdictions must, among other things: (Vehicle Code (VEH) §21101)

a) Conduct outreach and engagement with local residents and property owners.

b) Determine that the restrictions leave a sufficient portion of surrounding streets for other uses.

c) Determine that the closure is necessary for the safety of persons who use the street.

This bill:

1) Requires Caltrans, in consultation with the California State Transportation Agency (CalSTA), and regional and local authorities, to conduct a pilot study, in a region of the state determined by Caltrans, on the impact of third-party navigation applications on the state highway system and local street and road networks. This study must analyze:

   a) The extent to which third-party navigation applications shift congestion from state highways to local streets;

   b) The impact on local infrastructure;

   c) Changes in traffic safety on local roads; and,

   d) The effect on response times of emergency responders.

2) Requires Caltrans to submit a report based on the study to the relevant fiscal and policy committees of the Legislature by January 1, 2029. This report must contain policy recommendations, as part of which the following may be considered:

   a) Requiring data sharing between third-party navigation applications and local jurisdictions;

   b) Establishing frameworks for third-party navigation applications to respect local traffic ordinances; and,

   c) Establishing technological standards to prioritize safety and emissions reductions over marginal time savings.

Comments

1) *Purpose of the bill.* According to the author, "Third-party navigation apps like Google Maps, Apple Maps, and Waze have fundamentally altered how drivers move through California's cities and towns. By continuously optimizing for the

fastest route, these algorithms regularly divert traffic off state highways and onto streets and roads — often without regard for weight limits, access restrictions, school zones, or other conditions that local governments have established to protect their communities. AB 2015 requires Caltrans to conduct a study on the impact of third-party navigation apps on the state highway system and local street and road networks. Sending drivers down the fastest path — regardless of whether that path runs through a quiet residential block, past a school, or down a street that a community has worked for years to make safer – is a decision that deserves to be scrutinized, so California has the data and policy framework to align navigation technology with the transportation planning decisions of state and local governments."

2) *Third-party navigation applications.* Third-party navigation apps have proliferated since the introduction of Waze in 2008, which utilized crowdsourced data, incorporating real-time, user-submitted travel information to optimize routing based on live traffic patterns. Since then, navigation apps have increasingly harnessed the ability to dynamically divert traffic to avoid congestion. This ability has become increasingly important, as according to the *2025 Annual Urban Mobility Scorecard*, Americans lost an average of 63 hours sitting in traffic in 2024, equivalent to nearly eight full workdays. The same study found a 16% increase in national congestion costs over the previous five years, bringing the total cost up to $269 billion annually.

   Navigation apps though have been shown to make a measurable difference in congestion. According to a 2020 report by the London School of Economics, titled *Mitigating Traffic Congestion: The Role of Intelligent Transportation Systems*, providing drivers with route advice through navigation apps is a successful traffic management tool with the potential to reduce traffic externalities such as congestion, air pollution, and crashes. The report found that the use of navigation systems by individual drivers is associated with a significant decrease in unnecessary travel time and congestion costs, resulting in annual national savings of approximately 175 million hours in travel time and $4.72 billion in travel costs. Furthermore, the study suggests that the congestion-mitigating effect of these systems is enhanced as commuters collectively increasingly utilize online traffic services and navigation applications. This finding is supported by a study from the UC Berkeley Institute of Transportation Studies, titled *Impact of Navigation Apps on Congestion and Spread Dynamics on a Transportation Network,* which found that traffic congestion can improve if even just 30-60% of users follow so-called dynamic routing. These findings together highlight that real-time information provided by navigation apps is a highly cost-effective intervention

for relieving congestion, especially compared to traditional physical infrastructure investments.

3) *Slow streets programs.* While navigation apps can help address traffic congestion at a macro level, local jurisdictions often have their own concerns with traffic and traffic safety. Increasingly, many jurisdictions have started adopting slow streets programs. These programs, also sometimes called safe streets programs, are generally focused on providing safe places for people to walk, cycle, skate, or otherwise get outside and exercise without having to worry about vehicular traffic at high speeds. Generally, these streets have specific exemptions for local access, deliveries, and emergency vehicles.

   Slow streets are typically enforced through the installation of traffic diverters, narrowing streets, creating turn restrictions, or implementing other traffic calming measures. Signage, such as "Local Traffic Only" signs or other such signs redirecting the flow of traffic, is also used at main vehicle entry points to reduce vehicle congestion. Local jurisdictions have also at times identified stewards to take care of and monitor barricades.

   According to state law, local authorities must adopt such a program by ordinance and are required to define the program and facilitate public engagement. Specifically, the locality must determine the closure or restriction is necessary for the safety and protection of the people who are to use that portion of the street, determine that the closure or restriction leaves a sufficient portion of streets in the surrounding area for other public uses, such as vehicular traffic, and clearly designates the streets with state-approved signage. Furthermore, the locality must conduct an outreach and engagement process that at a minimum, includes notification to the residents and owners of property abutting any street being considered for inclusion in the program; provide advance notice of any closure or traffic restriction to residents and owners of abutting streets; maintain a public website with information about the program, including a list of streets that are in the program or being considered and instructions for participating in the public engagement process.

4) *Navigation apps move congestion to local roads.* While third-party navigation apps have been shown to ease traffic congestion on busy commuter routes, in practice this is accomplished by diverting traffic to local streets and roads. This has created a host of issues for local jurisdictions, particularly when traffic is diverted into regions with slow streets programs.

   Many of these issues arise because these local streets and roads were usually

not designed to optimize or even accommodate high levels of traffic flow. These streets may be narrow, have steep hills, or have tight or blind turns, all of which can create hazards for drivers unfamiliar with the area. Furthermore, these roads were often not built to withstand the increased traffic volumes or use by heavier vehicles that navigation apps often bring.
Finally, many local jurisdictions are simply facing increased traffic congestion, in some cases to extreme levels. For example, in the small town of Leonia, New Jersey, navigation apps were increasingly routing commuters through the town to avoid backups ahead of the George Washington Bridge into New York City. As a result, businesses and private residences were being blocked as traffic piled up on local streets, with local residents reporting having to wait up to 15 minutes to pull out of their driveways.

Altogether, these issues have caused many jurisdictions to try and undertake their own solutions to prevent navigation apps from rerouting traffic through their local streets and roads. The town of Leonia changed local laws to prevent through traffic on all side streets during rush hour. Other communities have told their residents to go into applications like Google Maps and report local routes as incorrect routing options.

In California, many local jurisdictions are somewhat limited in the responses they can take. This is because state law generally restricts the ability of local jurisdictions to lower speed limits or close local roads. In most cases, local jurisdictions cannot lower local speed limits without performing a traffic study that demonstrates a clear safety need. Similarly, local jurisdictions are heavily restricted in their ability to close or limit access to local roads, with the slow streets program being one of the only primary exceptions.

5) *Balancing the benefits of navigation apps with local concerns.* AB 2015 seeks to take a first step towards balancing the concerns of local jurisdictions with the wider benefits of navigation apps on regional traffic patterns. It does so by requiring Caltrans to carry out a pilot study investigating how third-party navigation apps impact local jurisdictions. Specifically, the study must look at how congestion is displaced to local streets and roads and how that displacement impacts local infrastructure, traffic safety, and emergency response abilities. Caltrans is then tasked with producing a set of policy recommendations centered on producing new standards or frameworks to allow greater coordination between navigation apps and local jurisdictions, and to place guardrails on the ability of navigation apps to reroute traffic through local streets and roads.

Moving forward, the Legislature may want to consider the tradeoffs between overall traffic and pollution mitigation created by navigation apps, and the acute stresses that traffic displacement can cause for local jurisdictions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Caltrans estimates one-time costs of approximately $3.9 million (State Highway Account) to complete the pilot study and report to the Legislature by January 1, 2029, including $2.5 million for a consultant contract and approximately $693,000 annually for two years for 4.0 PY (limited term) to oversee the consultant contract, coordinate with state and local partners, manage procurement and public outreach, develop supporting data capabilities, review technical work products, and prepare the final report. The consultant would develop specialized methodologies, analytical tools, and evaluation framework necessary to assess the impacts of traffic diversion caused by third-party navigation apps.

- The California Transportation Agency (CalSTA) indicates that any costs to consult with Caltrans for the study and report would be minor and absorbable. (State Highway Account)

SUBJECT: State holidays: Eid

SOURCE: California Commission on Asian and Pacific Islander American Affairs; Council on American Islamic Relations, California Muslim Impact Council

DIGEST: This bill adds Eid al-Fitr and Eid al-Adha to the list of state holidays, as specified.

Senate Floor Amendments of 8/21/26 address statutory chapter issues with similar legislation.

ANALYSIS:

Existing law:

1) Authorizes any state employee to elect to receive eight hours of holiday credit for the date known as "Lunar New Year," the date known as "Genocide Remembrance Day," the date known as "Diwali," the date known as "Juneteenth," or the date known as "Native American Day," in lieu of receiving eight hours of personal holiday credit, as specified.

2) Designates holidays on which community colleges and public schools are authorized to close pursuant to a memorandum of understanding (MOU) between the governing board and represented employees, including "Native American Day" on the fourth Friday in September.

3) Entitles state employees, with specified exceptions, to be given time off with pay for specified holidays.

4) Authorizes state employees to elect to use eight hours of vacation, annual leave, compensating time off, or personal holiday credit corresponding with specified dates.

This bill:

1) Designates the first day of the month of Shawwal in the Islamic lunar calendar, known as "Eid al-Fitr," and the 10th day of the month of Dhu al-Hijjah in the Islamic lunar calendar, known as "Eid al-Adha," as state holidays, and excludes those dates from designation as judicial holiday.

2) Authorizes community colleges and public schools to close on "Eid al-Fitr" and "Eid al-Adha," and authorizes public educational institutions to conduct exercises, funded through existing resources exploring the history of Eid al-Fitr and Eid al-Adha, as specified.

3) Provides that for those holidays whose dates vary annually, a state employee may instead make the election on the dates designated by their group, as specified.

4) Includes related legislative findings and declarations, as specified.

Background

Author Statement. According to the author's office, "AB 2017 recognizes Eid al-Fitr and Eid al-Adha as official California state holidays. California is home to one of the nation's largest and most diverse Muslim communities, yet our state holiday calendar has not kept pace with that reality. Muslim students and families are often forced to choose between fully observing their holiest days and attending school or work obligations. By adding Eid al-Fitr and Eid al-Adha to California's list of recognized state holidays, consistent with the state's existing recognition of observances such as Lunar New Year and Diwali—AB 2017 promotes inclusion, respect, and a stronger sense of belonging for Muslim Californians while relying on existing law governing school calendars, employee leave, and institutional observance."

Eid al-Fitr and Eid al-Adha. Islam recognizes two principal religious holidays that are celebrated by Muslims around the world: Eid al-Fitr and Eid al-Adha. The dates of both holidays are determined by the Islamic lunar calendar, which is based on the cycles of the moon rather than the solar-based Gregorian calendar. As a result, the Gregorian dates of these observances change each year, occurring approximately 11 days earlier annually.

Eid al-Fitr, meaning the "Festival of Breaking the Fast," marks the conclusion of Ramadan, the month during which Muslims fast from dawn to sunset and commemorate the first revelation of the Quran to the Prophet Muhammad. Ramadan is a period of religious observance, prayer, Quran recitation, self-reflection, and spiritual devotion, including the observance of Laylat al-Qadr, one of the holiest nights in Islam. Eid al-Fitr begins on the first day of Shawwal, the month following Ramadan, and is traditionally marked by special congregational prayers held shortly after sunrise, as well as gatherings with family and community members.

Eid al-Adha, known as the "Festival of Sacrifice," commemorates the Prophet Ibrahim's willingness to sacrifice his son in obedience of Allah. The holiday emphasizes the values of faith, sacrifice, generosity, and service to others. Observed beginning on the tenth day of Dhu al-Hijjah, the final month of the Islamic calendar, Eid al-Adha coincides with the culmination of the annual Hajj pilgrimage and is traditionally celebrated over a three-day period.

While both Eid al-Fitr and Eid al-Adha are significant religious celebrations marked by prayer and community gatherings, they commemorate different events

and traditions. Eid al-Fitr celebrates the completion of Ramadan and is commonly associated with feasting, charitable giving, and the exchange of gifts. In contrast, Eid al-Adha coincides with the conclusion of Hajj and focuses on themes of sacrifice, reflection, generosity, and communal worship. Together, these observances are among the most important holidays in Islam and serve as occasions for spiritual renewal, family gatherings, and community engagement.

Unpaid/Paid Holidays. California law does not require a private employer to provide its employees with paid holidays, that it closes its business on any holiday, or that employees be given the day off for any particular holiday. If an employer closes its business on holidays and gives its employees time off from work with pay, that occurred pursuant to a policy or practice adopted by the employer, pursuant to the terms of a collective bargaining agreement, or pursuant to the terms of an employment agreement between the employer and employee, as there is nothing in law that requires such a practice.

At the local level, cities have the liberty to specify by charter, ordinance or resolution what paid holidays the city will provide to its city employees. Similarly, most state employees are bound by the memorandum of understanding that they have negotiated with the Governor.

This bill adds Eid al-Fitr and Eid al-Adha to the list of state holidays and excludes each of those days from designation as judicial holidays. This bill also authorizes community colleges and public schools to close on Eid al-Fitr and Eid al-Adha and authorizes public educational institutions to incorporate exercises celebrating the meaning and importance of those dates. This bill also authorizes state employees to take a certain type of personal leave on those dates.

Related/Prior Legislation

AB 1841 (Ramos, 2026) entitles state employees to a holiday on the fourth Friday in September, known as "Native American Day," as specified. (Pending on the Senate Floor)

AB 2294 (Ta, 2026) designates Sylvia Mendez Day as a state holiday, as specified. (Pending on the Senate Floor)

AB 2455 (Haney, Chapter 49, Statutes of 2026) requires the Governor to annually proclaim May 17 as Bruce Lee Day, and designates and sets apart that date each year as having special significance, as specified.

AB 268 (Kalra, Chapter, Statutes of 2025) added Diwali to the list of state holidays, and authorized public schools and community colleges to close on that date, as specified.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown, potentially significant fiscal impact to local educational agencies (LEAs), to the extent their governing boards agree to the paid holiday (Proposition 98 General Fund). The California Department of Education (CDE) notes in Fiscal Year 2023-24, LEAs paid $17.78 billion in classified salaries. Assuming 260 unadjusted working days, the statewide cost of one day of pay for classified employees of school districts, county offices of education, charter schools, and K-12 joint powers authorities is approximately $68.8 million. While CDE anticipates no direct fiscal impact, it estimates $300,000 in costs to develop public school exercises if the State Board of Education (SBE) adopts a model curriculum guide.

Unknown total fiscal impact, potentially ranging in the tens to low hundreds of thousands of dollars to the California Community Colleges (CCCs), to the extent districts enter into memorandums of understanding with faculty or staff unions to observe Eid al-Fitr and Eid al-Adha (Proposition 98 General Fund). The CCC Chancellor's Office notes potential workload costs in the low thousands of dollars per district to develop the policy, plus cost pressures to add a corresponding instructional day. Each of the 73 districts would also incur minor workload costs to update holiday guidance and related documents.

Unknown cost pressures to the SBE if it adopts a model curriculum guide for exercises related to Eid al-Fitr and Eid al-Adha.

CalHR anticipates minor and absorbable costs for workload to revise the state holidays list, update related policies, and inform agencies and employee bargaining units of the change in law.

OPPOSITION: (Verified 8/21/26)

California Family Council
Real Impact

ARGUMENTS IN SUPPORT: In support of this bill, the Council on American-Islamic Relations, California (CAIR-CA) writes, in part, "Islam is the world's second-largest religion, with over 1.9–2 billion followers worldwide. The United States is home to approximately 4.5 million Muslims, and California has one of the largest Muslim populations in the country, with over 1 million estimated Muslim residents. Despite California's long-standing commitment to diversity and inclusion, the two most important holidays in the Islamic faith are not currently recognized in California statute.

"Eid al-Fitr marks the end of Ramadan, a month of fasting, reflection, prayer, and charitable giving observed by Muslims around the world. Eid al-Adha occurs during the final month of the Islamic lunar calendar and coincides with the completion of the Hajj pilgrimage. Both holidays are deeply significant days of prayer, family gatherings, community celebration, and charitable giving.

"Because Eid follows the Islamic lunar calendar, the dates shift approximately 10 to 11 days earlier each year on the Gregorian calendar. As a result, Muslim students and employees frequently face difficult choices between fulfilling school or workplace obligations and participating in essential religious observances.

"Muslim students often face a no-win situation: attend school and miss communal prayers and religious practices or observe their faith and risk falling behind academically. Even when absences are excused, students can miss instruction and feel excluded from their peers. Employees similarly face challenges when workplaces do not formally recognize these holidays."

ARGUMENTS IN OPPOSITION: In opposition to this bill, Real Impact writes, in part, "AB 2017 seeks to give official recognition to California's Muslim holidays, Eid al Fitr and Eid al Adha. The bill would require public schools to excuse student absences for these holidays, allow schools and community colleges to close on these days if local governing boards approve. It would also permit schools to offer educational activities about the significance of the holidays.

Additionally, state employees would be allowed to use up to eight hours of leave annually to observe Eid al-Fitr and Eid al-Adha.

"At a time when many California schools are facing challenges in academic performance and accountability, the primary responsibility of government should be to strengthen educational outcomes and uphold high academic standards. This includes evaluating whether additional non-instructional days are consistent with improving student achievement and meeting testing and learning benchmarks.

"There is also a broader concern regarding precedent. When additional holidays are added, it raises ongoing questions about equity and consistency across different cultural and religious observances. While historical and cultural traditions are part of American civic life, public institutions must carefully balance recognition of diversity with the constitutional principle of governmental neutrality in matters of religion."

SUBJECT: Housing programs: financing

SOURCE: Nonprofit Housing Association of Northern California
The California Housing Partnership

DIGEST: This bill allows the Department of Housing and Community Development (HCD) to authorize the transfer of residual receipts or excess reserves from one rental housing development to another rental housing development with the same owner.

Senate Floor Amendments of 8/21/2026 redefine "excess reserves" as replacement reserves, in excess of the amount needed to fund immediate and short-term capital repair needs, as specified, within the preceding three years by a qualified independent third party, operating reserves, or project-specific transition reserves by the HCD regulatory agreement, and makes other clarifying changes.

ANALYSIS:

Existing law:

1) Allows HCD to approve an extension of an HCD loan, the reinstatement of a qualifying unpaid matured loan, the subordination of an HCD loan to new debt, or an investment of tax credit equity under various older HCD rental housing finance programs.

2) Provides that HCD may subordinate its loan to refinance existing senior debt only as necessary for project feasibility and to reimburse borrower advances for predevelopment costs, recent capital improvements, and recent operating deficits.

3) Creates the Multifamily Housing Program (MHP), whose Regulations include the following prohibitions:

   a) Prohibits the Sponsor from encumbering, pledging, or hypothecating the Rental Housing Development, or any interest therein or portion thereof, or allow any lien, charge, or assessment against the Rental Housing Development without the prior written approval of HCD. HCD will not permit refinancing of existing liens or additional financing secured by the Rental Housing Development except to the extent necessary to maintain or improve the Fiscal Integrity of the Project, to maintain Affordable Rents, or to decrease Rents and for no other purpose, including, but not limited to, cash payments to the Sponsor, repayment of general partner loans or of limited partner loans, or for limited partner buyouts. This special condition controls, in that no MHP reserve balance can fund a limited partner buyout or exit; and

   b) No loan may be paid off prior to maturity without the prior written consent of HCD in its sole discretion, which shall be subject to conditions deemed necessary to ensure compliance with the Program requirements. All of the loan documents, including the Regulatory Agreement and Deed of Trust, shall continue in full force and effect notwithstanding any prepayment, in whole or in part, of the loan.

4) Requires HCD to allow an owner of a property subject to a regulatory agreement with HCD to take out additional debt on the development to finance, with HCD's approval, rehabilitation of the property or investment in new affordable housing, if all of the following conditions are met:

   a) All hard debt, including the additional debt, is underwritten with a debt-service coverage ratio of, at a minimum 1.15, and is demonstrated to project

positive cash flow for 15 consecutive years. For the purposes of this subdivision, "hard debt" means debt that must be repaid via an amortizing payment or at a specified maturity date;

b) Any new debt is subordinate to HCD's lien and regulatory agreement, as applicable, unless HCD reasonably determines that subordination of HCD's lien is necessary for the feasibility of a project and to fund reasonable rehabilitation or improvements, including soft costs;

c) Any extracted equity is any of the following:

i. With HCD's approval, contributed to other projects that will increase or improve the supply of deed-restricted affordable housing serving low-income households in the state;
ii. Utilized in the purchase of a limited partner interest of a tax credit investor in the project, as specified;
iii. Utilized in the payment of any unpaid deferred developer fee for the project pursuant to any applicable HCD regulations;
iv. Applied toward payment for necessary repairs and rehabilitation of the project;
v. Utilized for the establishment or replenishment of HCD-approved project reserves; and,

vi. Utilized for any other purposes approved by HCD.

d) HCD's regulatory agreement remains in place for the project for its remaining term; and,

e) HCD continues to be entitled to receive monitoring fees to ensure compliance with the existing regulatory agreement.

5) Defines "extracted equity" to mean debt added to a HCD-regulated property that is not used for any of the following purposes:

a) Approved project rehabilitation work;

b) To pay off existing debt;

c) Replenishment of reserves; and,

d) Other HCD-approved project specific uses.

This bill:

1) Defines "department residual receipts share" as the portion of residual receipts, surplus cash, available cashflow, net cashflow, distributable cash, or other similar project cashflow distributions otherwise payable to HCD for the applicable fiscal year under the project's applicable financing documents and regulatory requirements, calculated after full satisfaction, or due provision for payment to all other lender, public agency, or governmental entity under the applicable note, regulatory agreement, deed of trust, residual receipts agreement, subordination agreement, intercreditor agreement, or other recorded operative project financing documents, as if no transfer authority under this bill existed.

2) Defines "excess reserves" as replacement reserves, in excess of the amount needed to fund immediate and short-term capital repair needs, as specified, within the preceding three years by a qualified independent third party, operating reserves, or project-specific transition reserves by the HCD regulatory agreement. Replacement reserves may not be transferred if doing so would reduce the balance below $1,000 per unit or if the project has not met or is not projected to meet the minimum annual replacement reserve deposit requirements.

3) Allows HCD to authorize the transfer of "residual receipts share" or "excess reserves" from one rental housing development, subject to a HCD regulatory agreement as equity, to another rental housing development that is owned by the same sponsor or affiliate.

4) Provides that no transfer shall reduce, offset, subordinate or otherwise impair any residual receipts, surplus cash, available cashflow, net cashflow, distributable case, reserve rights or other payment rights owed to any other lender, public agency, or governmental entity, including any city, county, or city and county, housing authority, successor agency, joint powers authority, or holder of federal, state, or local housing program loans.

Background

Affordable Housing Finance. The state finances affordable multifamily rental housing using a combination of loans, tax credits, and private activity bonds.

Unlike market rate housing, affordable housing does not have enough cash-flow from rents to support conventional financing. Affordable housing is provided to tenants whose household income are below the area median income (AMI). To qualify, very low-income tenants must make 60% or less of the AMI, and lower-income tenants must make only 80% or less of AMI. Tenants in affordable housing are only required to pay 30% of their income toward rent, so the state provides enough long-term subsidy to reduce the overall debt service on a development. HCD loans serve as the permanent financing that comes in once a development is complete to take out the predevelopment and construction loans a developer took on to construct the development. HCD loans are secured with a lien in first position on the property. Developments are also subject to a 55-year recorded regulatory agreement, which runs with the project. If a developer pays off an HCD loan before the covenants expire, the regulatory agreement is not extinguished, and the developer must continue to provide the units at an affordable rent for the length of the regulatory agreement to lower-income tenants.

Comments

Author's statement. "California continues to face a severe housing crisis, making the preservation of existing affordable housing more critical than ever. To help address this challenge, affordable housing providers need flexible financial tools to preserve their affordable housing units and maintain the long-term stability of their developments in the face of rising costs. AB 2020 seeks to address this by allowing the Department of Housing and Community Development to authorize the transfer of excess reserves or operating income between affordable housing developments owned by the same sponsor. This simple change will help stabilize developments facing financial challenges and protect California's existing supply of affordable housing."

Challenges Facing Affordable Housing Developments. Due to several factors including the depletion of operating reserves resulting from the COVID-19 rent moratorium and unprecedented increases in insurance rates, affordable housing developments are facing financial challenges. Enterprise Community Partners recently conducted a survey of 130 affordable properties and found that, on average, the developments were experiencing insurance cost increases of 70%, with some providers reporting increases up to 500%. Because rents are capped, these properties have fewer options to cover these increases. In some cases, the situation is made worse because the project's operating reserves have not recovered from the rent moratoriums. Due to these financial pressures, some

properties are at risk of foreclosure or becoming market-rate developments, which would eliminate vital affordable housing units.

Shifting excess between projects. To address the fiscal integrity of housing developments financed by HCD, this bill would give HCD the authority to allow for the transfer of excess reserves or residual receipts income from one rental housing development owned by the same developer to another development. Previous bills, AB 2638 (Ward, 2024), AB 515 (Ward, 2023), and AB 578 (Berman, 2023) have attempted to address a similar issue. Those bills allowed for the early payoff of an HCD loan, if approved by HCD. Those funds could be used to develop a new project. Last year, AB 130 (Committee on Budget, Chapter 22, Statutes of 2025), gave HCD authority to allow developers to utilize equity in their affordable housing projects to finance further investments in other affordable housing projects, purchase a limited partners interest of a tax credit investor in the project, pay any unpaid deferred developer fee for the project, and pay for necessary repairs and rehabilitation of the project.

This bill is different from AB 130 in that it allows for the transfer of excess reserves or HCD residual receipts share rather than project equity between developments with HCD financing, to alleviate financial challenges (*e.g.*, from increased insurance costs or loss of rental income). It also ensures that any funds owed to other entities, such as local governments, would still be paid.

Senate Appropriations Amendments. Author amendments clarify the definitions of HCD residual receipts and excess reserves, and provide that any transfers do not otherwise reduce payments owed to other lenders.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Staff estimates that the bill would create ongoing General Fund cost pressures, at least in the mid-hundreds of thousands of dollars annually, to the extent HCD exercises the authority to establish and administer a program to provide for the transfer of reserves and operating revenues from one rental housing development to another owned by the same sponsor. The level of workload would vary depending on the number of transactions authorized, the complexity of the ownership structures, the financial condition of the involved projects, and the need to evaluate impacts on existing regulatory agreements, affordability covenants, and the involvement of other financing sources. While there would be no immediate direct costs to HCD since the authority is permissive, the bill

creates General Fund cost pressures to fund HCD's costs to establish such a program, should it exercise this discretionary authority. (General Fund)

SUBJECT: Companion chatbots: children's safety

SOURCE: Author

DIGEST: This bill seeks to comprehensively regulate companion chatbots with regard to children's safety, including imposition of a series of obligations and restrictions on operators that make such chatbots available in California.

ANALYSIS:

Existing law:

1) Requires an operator to prevent a companion chatbot on its companion chatbot platform from engaging with users unless the operator maintains a protocol for preventing the production of suicidal ideation, suicide, or self-harm content to

the user, including, but not limited to, by providing a notification to the user that refers the user to crisis service providers, including a suicide hotline or crisis text line, if the user expresses suicidal ideation, suicide, or self-harm. Requires an operator to publish details on this protocol on the operator's website. (Business and Professions Code [Bus. & Prof. Code] § 22602(b).)

2) Requires an operator, if a reasonable person interacting with a companion chatbot would be misled to believe that the person is interacting with a human, to issue a clear and conspicuous notification indicating that the companion chatbot is artificially generated and not human. (Bus. & Prof. Code § 22602(a).)

3) Requires an operator, for a user that the operator knows is a minor, to do all of the following:

   a) Disclose to the user that the user is interacting with AI.

   b) Provide by default a clear and conspicuous notification to the user at least every three hours for continuing companion chatbot interactions that reminds the user to take a break and that the companion chatbot is artificially generated and not human.

   c) Institute reasonable measures to prevent its companion chatbot from producing visual material of sexually explicit conduct or directly stating that the minor should engage in sexually explicit conduct. (Bus. & Prof. Code § 22602(c).)

4) Defines the relevant terms, including:

   a) "Companion chatbot" means an AI system with a natural language interface that provides adaptive, human-like responses to user inputs and is capable of meeting a user's social needs, including by exhibiting anthropomorphic features and being able to sustain a relationship across multiple interactions. However, there are several exemptions included.

   b) "Companion chatbot platform" means a platform that allows a user to engage with companion chatbots.

   c) "Operator" means a person who makes a companion chatbot platform available to a user in the state. (Bus. & Prof. Code § 22601.)

5) Requires an operator, beginning July 1, 2027, to annually report to the Office of Suicide Prevention specified information, which shall not include any

identifiers or personal information about users. Requires the Office of Suicide Prevention to post data from the reports on its website. (Bus. & Prof. Code § 22603.)

6) Requires an operator to disclose to a user of its platform that companion chatbots may not be suitable for some minors, as provided. (Bus. & Prof. Code § 22604.)

7) Provides that a person who suffers injury in fact as a result of a violation of this chapter may bring a civil action to recover all of the following relief:

   a) Injunctive relief.

   b) Damages in an amount equal to the greater of actual damages or $1,000 per violation.

   c) Reasonable attorney's fees and costs. (Bus. & Prof. Code § 22605.)

8) Establishes the Digital Age Assurance Act, which requires a developer to request a signal with respect to a particular user from an operating system provider or a covered application store when the application is downloaded and launched. A developer that receives such a signal is deemed to have actual knowledge of the age range of the user to whom that signal pertains across all platforms of the application and points of access of the application even if the developer willfully disregards the signal. (Civil [Civ.] Code § 1798.501(b).)

This bill:

1) Requires "operators," those who make a companion chatbot available to a user in the state, to verify the age of users consistent with the Digital Age Assurance Act, except as provided.

2) Imposes a series of obligations on operators to complete by July 1, 2027, including:

   a) Perform annual, comprehensive risk assessments to identify any child safety risks posed by the design, configuration, and operation of the companion chatbot, which shall assess specified factors.

   b) Take and document measures that reasonably mitigate any child safety risk.

   c) Publish and update a child safety policy.

d) Implement a documented crisis response protocol to mitigate any material risk that the companion chatbot will generate a statement that promotes suicidal ideation, suicide, or self-harm content to a child user, as specified.

e) Implement safeguards for child users that include usage reminders and disclosures, age-appropriate risk prompts, and other protective design features reasonably related to documented child safety risks.

f) Implement default settings that can only be changed by a parent, including, among others, push notification limitations and time limits.

g) Establish a mechanism for providing notice to a child user that the child is interacting with, or receiving content generated by, an AI system that meets specified criteria.

h) Implement measures that prevent the chatbot from engaging in certain specified behavior, such as encouraging children to self-harm or to cause certain harms to others; providing health advice; engaging in obscene matter; discouraging a child from certain healthy behaviors; advertising products during conversation; and producing overly sycophantic responses.

i) Implement parental controls, as specified, including ability to set preferences and time limits and to disable access for children under 16.

j) Create an interface design that ensures the companion chatbot's features and controls are accessible and clear so that children and parents can reasonably locate, understand, and use those protections. The design shall be annually tested to ensure compliance.

k) Establish a public incident reporting mechanism that enables a third party to report directly to the operator an incident regarding a child safety risk and to access other reports made through that reporting mechanism.

3) Prohibits the following actions by an operator:

a) Targeting advertising at a child using data about the child, including through product placement in conversational chats with the child.

b) Selling, sharing, or using the personal information of a child for any purpose not expressly authorized.

c) Designing, implementing, or deploying a user interface design, feature, or technique that is likely to mislead, impair, or interfere with a reasonable

child's or reasonable parent's autonomy, decision-making, or choice or with the ability to locate, understand, enable, or maintain a safety feature, privacy control, or parental control.

4) Requires the Attorney General (AG), on or before January 1, 2028, to adopt regulations regarding annual auditing of operators, including eligibility and standards to ensure auditor independence, procedures for auditors to assess compliance, and requirements for AI child safety audit reports.

5) Requires operators, within 180 days of the above regulations being promulgated and annually thereafter, to submit to an independent audit and to submit an AI child safety audit report to the AG thereafter. The report is confidential and the AG cannot disclose details, except as provided.

6) Requires the AG to do the following:

   a) Establish a public incident reporting mechanism for consumers to submit complaints relating to companion chatbots to the AG.

   b) Establish a process for qualified researchers to access anonymized and aggregated audit data for academic study of child safety in companion chatbots.

   c) Beginning January 1, 2028, issue an annual public report that includes specified components, including a high-level summary of each audit report, findings and trends, data on compliance rates and deficiencies, and recommendations for operators, parents, and policymakers.

7) Authorizes a public prosecutor to bring a civil action for violations seeking specified remedies, including civil penalties per violation. A child who suffers actual harm may also bring a civil action for actual damages and other relief.

8) Defines the relevant terms, including:

   a) "Child safety policy" means a public-facing document describing protective measures taken by an operator to mitigate identified child safety risks.

   b) "Child safety risk" means a reasonably foreseeable risk of a covered harm to a child.

   c) "Companion chatbot" has the meaning defined in Section 22601.

d) "Covered harm" means any of the following harms proximately caused by the use of a companion chatbot:

   i) Reasonably foreseeable physical or financial harm.

   ii) Severe and reasonably foreseeable psychological or emotional harm to a reasonable child.

   iii) A highly offensive intrusion on privacy rights protected by state or federal law.

   iv) Adverse discrimination in violation of state or federal law.

Background

AI companion chatbots created through generative AI have become increasingly prevalent. They seek to offer consumers the benefits of convenience and personalized interaction. These chatbots are powered by large language models that generally learn intimate details and preferences of users based on their interactions and user customization. Millions of consumers use these chatbots as friends, mentors, and even romantic partners.

Many studies and reports point to the addictive nature of these chatbots and call for more research into their effects and for meaningful guardrails. Increasing the urgency of such efforts, several high-profile incidents resulting in users harming themselves and even committing suicide have been reported in the last few years. This bill, and a companion bill, SB 1119 (Padilla, 2026), establish a framework for protecting children from these harms and empowering parents with proper tools to protect their own children. This bill lays out a series of obligations on operators and prohibits specified conduct. Operators must submit to annual independent audits and reporting by the AG is required. Public prosecutors and children harmed by violations are authorized to bring civil actions.

This bill is author-sponsored. It is supported by the Los Angeles Unified School District and other advocacy groups. It is opposed by various industry associations, including the California Chamber of Commerce. For a more thorough discussion of this bill, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis, which is incorporated herein by reference.

Comment

According to the author:

> As the technological landscape continues to develop and rapidly grow, AI chatbots have become increasingly mainstream and more accessible and present new risks and harms to users, especially children. Our kids are navigating this new technology in real time without sufficient guardrails in place to protect them. To provide safeguards for children as they navigate these products, AB 2023 would require that chatbot companies provide meaningful guardrails to ensure that these products are safe for kids.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

$1.9 million in FY 2026-27, $4 million in FY 2027-28, $5.2 million in FY 2028-29, $4.9 million in FY 2029-30, $4.2 million annually thereafter to the Department of Justice for the Consumer Protection Section of the Public Rights Division, Public Inquiry Unit within the Directorate Division and Office of General Counsel. Information technology upgrades to the California Justice Information Services (CJIS) would be needed. (Unfair Competition Law Fund, General Fund)

Unknown, significant to major cost pressure to the courts to the extent there are additional civil filings for new violations created by this bill. Actual costs would depend on the number of operators in the state, violations and the amount of court time required for each action. Although courts are not funded based on workload, increased pressure on the Trial Court Trust Fund may create a demand for increased funding for courts. The FY 2026-07 Budget appropriated $70 million General Fund for support of the courts. (Trial Court Trust Fund, General Fund)

ARGUMENTS IN SUPPORT: The Los Angeles Unified School District writes in support:

With its comprehensive framework for mitigating a broad array of potential chatbot-linked harms to minors, AB 2023 institutes or expands on meaningful guardrails including age verification technology, parental controls and oversight, and restrictions on targeted advertising through conversational chats. The measure further adds assurances that interventions as working as intended by requiring the chatbot operators to submit to independent 3rd party audits and establishing clear and enforceable legal oversight by state and local entities.

As generative AI technology rapidly spreads into countless aspects of work, education, and daily life, unregulated chatbots pose significant risks to vulnerable users such as children, who are still developing the critical and analytical faculties adults take for granted. Because chatbots mimic human interaction children may perceive chatbot interactions as having human-like knowledge, intentions, and authority, which can lead them to trust and follow recommendations even when those systems produce inaccurate or harmful responses.

ARGUMENTS IN OPPOSITION: A coalition of groups, including the California Chamber of Commerce, identify a number of areas they would like to see amended, including defining the relevant harms, the liability structure, and the restrictions on selling, sharing, or using children's personal information. As to the auditing provisions, the coalition argues:

> AB 2023's auditing provisions give rise to a host of concerns regarding unclear audit standards, a limited pool of qualified auditors, protections for sensitive business information, and broad AG disclosure authority, including to "qualified researchers". Without more objective statutory standards, audit findings may vary significantly across auditors, reducing their reliability and utility for both regulators and operators.
>
> While third-party audits can play a role in compliance frameworks, they also impose significant costs and may not reliably advance safety objectives for AI systems. Audits are most effective when conducted against clear, objective standards, which are not generally suited to trying to evaluate a

complex issue like the effects a platform has on minors. Here, auditors may be asked to evaluate highly subjective concepts such as emotional harm, autonomy, decisionmaking, and excessively sycophantic behavior. These are inherently difficult assessments that remain the subject of ongoing academic debate.

SUBJECT: Deferred deposit transactions: assessments

SOURCE: Author

DIGEST: This bill requires the Department of Financial Protection and Innovation (DFPI) to include specified information in an invoice or assessment notice related to the annual pro rata assessment levied on licensees of the California Deferred Deposit Transaction Law.

Senate Floor Amendments of 8/20/26 address potential chaptering conflicts with AB 2795. The amendments are nonsubstantive.

ANALYSIS:

Existing Law:

1) Provides the California Deferred Deposit Transaction Law (DDTL), a licensing framework administered by the Department of Financial Protection and Innovation (DFPI) that regulates the provision of deferred deposit transactions (more commonly known as "payday loans"). (Division 10 of the Financial Code, commencing with Section § 23000)

2) Requires each licensee to pay its pro rata share of all costs and expenses incurred by DFPI in administering the DDTL, as specified. Provides that the assessment is the proportion that a licensee's total dollar amount of deferred deposit transactions made bears to the aggregate total dollar amount of deferred deposit transactions made by all DDTL licensees, as specified. Provides a minimum assessment amount of $250 per licensed location per year. (Financial Code Section § 23016)

This bill:

1) Requires DFPI to provide the following information in an invoice or assessment notice issued to a DDTL licensee:

   a) The total costs and expenses reasonably incurred in the administration of this division, as estimated by the commissioner, for the ensuing year.

   b) Any deficit actually incurred or anticipated in the administration of the program in the year in which the assessment is made.

   c) The aggregate total dollar amount of deferred deposit transactions made by all licensees.

   d) The licensee's total dollar amount of deferred deposit transactions.

   e) The number of license locations operated by the licensee.

Comments

The DFPI licenses and oversees a variety of businesses in the financial services industry, such as state-chartered banks and credit unions, money transmitters, nonbank lenders, mortgage lenders, debt collectors, and payday lenders. The costs incurred by DFPI in regulating these businesses are recovered through fees and assessments charged to licensed businesses. Rather than requiring the General Fund to cover these expenses, the regulated entities bear the costs.

The DDTL is a licensing law that covers lenders providing certain short-term credit instruments, familiarly known as "payday loans." In 2024, the author of this

bill authored AB 3148 (Chen, Chapter 252, Statutes of 2024) which shifted the apportionment of annual assessments under the DDTL from one based on physical locations to a pro rata model based primarily on a licensee's share of payday loans originated in the prior year. This change had the effect of increasing costs for payday lenders operating exclusively online while reducing costs for lenders that rely primarily on brick-and-mortar storefronts to originate payday loans.
The California Financial Service Providers (CFSP) is a trade association representing payday lenders and supporters of this bill. CFSP states the rationale for this bill in its support letter:

Last year, each licensee was unexpectedly faced with an annual assessment that was much higher than anticipated. Not only did DFPI neglect to provide licensees with any warning before issuing invoices, but the department also refused to provide an explanation afterwards. Licensees were left unable to determine whether higher costs stemmed from increased program expenses, deficit recovery, or other factors. This lack of transparency makes it difficult for the industry to budget and plan for future operations, a key component of running a business.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

This bill was reported out of Senate Appropriations Committee pursuant to Senate Rule 28.8.

SUBJECT: Fish and wildlife: invasive mussels: golden mussels

SOURCE: Contra Costa Water District
San Luis Delta Mendota Water Authority

DIGEST: This bill 1) exempts a public or private agency that operates a water supply system from certain California Department of Fish and Wildlife (CDFW) invasive mussel permitting requirements until an invasive mussel control plan is submitted, approved, or denied, as applicable; requires at least quarterly updating of an online map of invasive mussel observations by CDFW; and 2) requires the California Department of Food and Agriculture and the State Water Resources Control Board to quickly and efficiently respond to the threat of golden mussels, among other provisions, as provided.

ANALYSIS:

Existing law:

1) Prohibits, until January 1, 2030, a person from possessing, importing, shipping, or transporting in the state, or placing, planting, or causing to be placed or planted in any water within the state, invasive mussels (Fish and Game Code (FGC) §2301(a)).

2) Requires a public or private agency that operates a water supply system to cooperate with CDFW to implement measures to avoid infestation by invasive mussels and to control or eradicate any infestation that may occur in a water supply system. Requires the operator of the water supply system, if invasive mussels are detected, and in cooperation with CDFW, to prepare and implement a plan to control or eradicate invasive mussels within the system, and eliminate or minimize any potential downstream transport of an invasive mussel (FGC §2301(d)).

   a) Requires all plans that do not specifically address invasive mussel species that are known to be present in bodies of water in the state as of January 1, 2026, to be updated or revised on or before September 30, 2027.

3) Requires any entity that discovers invasive mussels within the state to immediately report the discovery to CDFW (FGC §2301(e)).

4) Makes any person who violates the above provisions, violates any verbal or written order or regulation adopted pursuant to these provisions, or who resists, delays, obstructs, or interferes with the implementation of these provisions subject to an administrative penalty (FGC §2301(f)).

5) Defines "invasive mussel" as any nonnative detrimental mussel species that is capable of spreading in freshwater and is listed in specific regulations adopted by the Fish and Game Commission (FGC §2303).

This bill:

1) States legislative intent to align permitting processes to better support the necessary rapid response to prevent serious impacts of golden mussels on water infrastructure, water supply systems and waterbodies and to support public and private agencies that operate those systems, as provided.

2) Exempts a public or private agency that operates a water supply system and has submitted an invasive mussel control plan to CDFW from any permit requirement for invasive mussels for maintenance, operational, and research activities within the water supply system, as provided.

3) Exempts a public or private agency that operates a water supply system and has submitted a control plan to CDFW from any permit requirement for dead invasive mussels for research, outreach, education, species verification, training, or other purposes in the best interest of the state, as specified.

4) Sunsets the exemptions in 2) and 3) above when CDFW either approves or denies a submitted invasive mussel control plan.

5) Requires CDFW's Invasive Species Program to develop by April 1, 2027, guidance for public and private agencies that operate water supply systems to develop effective invasive mussel control plans. Requires the guidance to include relevant protocols, example standards, and statutory requirements. Provides that compliance with the guidance is voluntary except as specified.

6) Requires CDFW's Invasive Species Program to develop and publish on CDFW's internet website by April 1, 2027, guidance for scientific research conducted by or for public and private agencies that operate water supply systems that is conducted outside of an infested water supply system and that includes mussel handling procedures to prevent and control the spread of invasive mussels, as provided. Requires the guidance to include mussel handling standards to minimize any potential negative impacts of the possession, transportation, and disposal of invasive mussels, as provided.

7) Requires CDFW to update the invasive mussel spatial distribution maps of infested water bodies posted on its internet website no less than quarterly based on monitoring and reported detections. Requires the maps to distinguish between reported and confirmed detection of invasive mussels and include the date of the most recent map update, as provided.

8) Requires the California Department of Food and Agriculture (CDFA) to work with state and local agencies in order to quickly and efficiently respond to the threat of golden mussels. Requires CDFA to identify any tools available to assist a state or local agency response including an integrated pest management strategy or registered pesticide, as provided. Requires CDFA to help identify any existing processes that allow for the rapid use of any tool to address the invasive species threat, as provided.

9) Requires the State Water Resources Control Board (SWRCB) and the regional water quality control boards to work with state and local agencies to quickly and efficiently respond to the threat of golden mussels. Requires the SWRCB to identify any tools available to assist in rapidly responding to the invasive species threat, as provided. Requires the SWRCB to help identify any existing

processes that allow for the rapid use of any tool that could be used to address the invasive species threat and enables a streamlined or faster process, as provided. Requires the SWRCB to help coordinate efforts between the regional water quality control boards in response to the threat of an invasive species.

10) Makes this act an urgency statute and justify the urgency due to the serious threat golden mussels pose to water infrastructure, water systems, water bodies and ecosystem health, as provided. Makes numerous relevant legislative findings and declarations.

[NOTE: Additional information regarding this bill can be found in the Senate Natural Resources and Water, and Environmental Quality Committees' analyses.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Ongoing costs in the low hundreds of thousands of dollars annually (General Fund) for CDFW to develop all identified best management practices and provide research guidance, among other things.

- The California Department of Pesticide Regulation (CDPR) reports its fiscal estimate is unknown and could range from minor to the low hundreds of thousands of dollars. CDPR states that it is unable to determine an exact cost estimate at this time as it's unclear the range of work CDPR would be tasked with on invasive mussels as a result of this bill.

- The State Water Board and Regional Water Boards anticipate minor and absorbable costs and note the boards are actively engaging on this issue via the draft "Statewide National Pollutant Discharge Elimination System General Permit for Discharges from Pest Control Applications to Waters of the United States," which provides regulatory coverage for the point source discharge of chemical and biological residual pesticides and other nonpesticidal products to waters of the United States from aquatic animal invasive species control applications.

ARGUMENTS IN SUPPORT: According to the author, "Golden mussels are an invasive species that threaten California's waterways, ports, and agriculture. First detected in the San Joaquin Delta in October 2024, golden mussels have spread rapidly throughout the state, now reaching as far south as San Diego, causing significant harm to water infrastructure, water quality, and aquatic ecosystems. These costly damages have a direct impact on water affordability and access to our farms and our families. Current law requires a multitude of permits across state agencies, creating barriers for local water agencies to respond quickly and effectively. This ongoing crisis must be addressed with urgency. AB 2032 would expedite onerous and lengthy permitting processes across state agencies to ensure local water agencies can effectively respond to prevent, mitigate, control, and eradicate golden mussels from California's waterways."

SUBJECT: Common interest developments: declarations: amendments

SOURCE: Third Laguna Hills Mutual

DIGEST: This bill allows a superior court to approve a change to the governing documents in a homeowner's association (HOA), meeting specified criteria, if the change is approved by 37% of the owners, rather than 50%.

ANALYSIS:

Existing law:

1) Provides that an HOA or a member of an HOA may petition the superior court of the county to reduce the percentage of affirmative votes required to amend a declaration when the declaration requires more than 50% approval of the membership, or members having more than 50% of the votes in more than one class in a voting structure with more than one class.

2) Establishes that the petition must include documentation such as the governing documents, the full amendment text, copies of any solicitation materials, an explanation of the reason for amendment, and vote results.

3) Provides that the court may approve the amendment if it finds that:

   a) Proper notice of the hearing was given to specified parties (at least 15 days);

   b) The balloting complied with governing documents and applicable law;

   c) A reasonably diligent effort was made to permit all eligible members to vote;

   d) More than 50% of the votes actually cast supported the amendment, including a majority of each required voting class; and,

   e) The amendment is reasonable and approval is not otherwise improper.

4) Authorizes the court to confirm the amendment as validly approved on the basis of affirmative votes actually received during the balloting period; after making the findings required in 3).

5) Provides that an amendment is not effective until it has been recorded in every county in which the HOA is located. Provides that amendment shall have the same force and effect as if the amendment were adopted in compliance with every requirement imposed by the governing documents.

6) Requires after recordation, the HOA deliver an individual notice to all members with a copy of the amendment.

This bill:

1) Adds an option for HOA members to approve amendments to their governing documents with 37% of the vote of the owners, rather than the standard 50% threshold, by petitioning a superior court, if all of the following are met:

   a) The HOA is a senior citizen housing development;

   b) The HOA has more than 6,000 separate interests (units);

   c) More than 25% of the separate interests are occupied by tenants; and,

   d) The declaration has not been amended in at least 35 years.

Background

Davis-Stirling Act (Act). The Act went into effect in 1986 and is the primary state law governing Common Interest Developments (CIDs) and HOAs in California. The Act provides the legal framework for the creation and management of HOAs, including rules related to governance, assessments, dispute resolution, maintenance responsibilities, and member rights. The law aims to balance the authority of HOAs with the rights of individual property owners, ensuring that communities are managed efficiently and fairly. Over time, the Act has been amended to address the evolving needs of CIDs and HOAs, including increased transparency, accountability, and consumer protections. Key provisions of the Act include requirements for open meetings, financial disclosures, election procedures, and architectural review processes. The Act also provides mechanisms for resolving disputes, including dispute resolutions before certain legal actions can proceed. As the majority of new housing construction in California is part of an HOA, the Act plays a critical role in shaping the environment and governance of these communities and the tens of millions of residents who reside in them.

Covenants, Conditions, and Restrictions (CC&Rs). CC&Rs are the legally binding documents that establish the rules, restrictions, and rights that impact all HOA members, covering everything from architectural standards to pet policies to how the association itself is governed. Because CC&Rs are recorded against the property, they run with the land, binding current owners to the governing documents, as well as any future owners of a separate interest. CC&Rs often require amendments to address the changing needs of any given community. However, amending an HOA's CC&Rs is intentionally difficult. Most declarations require approval from a supermajority of all members, often ranging from 50-75% of all HOA members, not just all voting members. In a large HOA development, this can mean thousands of individual owners must affirmatively cast ballots. This can present logistical challenges even under the best circumstances, as HOA voting rates tend to be low.

Under the Act, there is a process through which HOA members can seek to address this difficulty in obtaining a majority of votes of all HOA members: if an amendment to the HOA's CC&Rs falls short of the voting threshold required by the HOA documents, an HOA or member can petition a superior court to approve the amendment anyway, so long as the court finds the process was fair, the effort to reach members was diligent, and the amendment is reasonable. But even under the court petition process in existing law, at least 50% of members must have voted in favor of the proposed amendment. This bill reflects a unique situation in which,

even under good faith attempts to meet the 50% voter threshold requirement, a large HOA has been unable to and cannot update their CC&Rs via this process.

Comments

Author's statement. "AB 2035 provides a commonsense solution to allow large, senior citizen common interest developments to amend significantly out of date declarations when they are unable to reach quorum requirements established by their CC&Rs. Some HOAs, such as Third Laguna Hills Mutual, are unable to meet quorum requirements for amendments to their CC&Rs and the current statutory alternative to reduce quorum requirements to 50% is insufficient. AB 2035 creates an additional alternative to reduce quorum requirements to 37% when the common interest development meets specified conditions. Specifically, the common interest development is required to be a senior citizen housing development, must contain at least 6,000 separate interest, more than 25% of those interests are occupied by non-owner residents, and that the development's declaration has not been amended in 35 years. This alternative will allow large, senior citizen developments to amend their CC&Rs when they are unable to meet quorum requirements while maintaining strong guardrails to ensure an equitable outcome. By maintaining the existing court petition process used for quorum reduction requests, AB 2035 ensures that this exception will only be used in specific, unique and necessary situations."

A very narrow solution. The Third Laguna Hills Mutual HOA is the largest HOA within the broader Laguna Hills Village—a massive residential community for senior citizens in Orange County which comprises over 90% of the city of Laguna Hills. With over 6,000 units, many of which are owned by people living abroad and/or not within the community full-time, the community has faced major obstacles to updating its CC&Rs, and has been unable to do so since 1988, leaving many provisions of these governing documents out of compliance with changes in state HOA law. That inability is not for a lack of trying. The association has spent hundreds of hours and well over $100,000 trying to turn out the vote in two separate elections, with the hope of at least meeting the voter threshold to petition CC&R amends to the superior court. However, even with these extensive and costly efforts, the HOA has only managed to get approximately 40% of their membership to vote. This stalemate has left crucial governing documents out-of-date and unreflective of not only statutory changes, but also modern advances in HOAs, like the need to regulate the installation and operation of electric vehicle charging stations, as well as virtual mediums for delivering notices and conducting certain business.

While this bill's allowance of sub-majority (37%) approval as eligible for a superior court petition could raise concerns about democratic governance, the bill seems well-tailored to only impact this specific community and enable its members to benefit from clearer, up-to-date governing documents. Given the high costs associated with the two election turnouts, it is worth considering how those costs may be passed onto the members, some of whom may be on fixed incomes due to their age and/or retirement status. Additionally, this bill does not mean amendments to the CC&Rs will automatically be granted upon meeting the lower threshold—the presiding Superior Court Judge will retain authority to ensure all processes were followed and that amendments proposed are reasonable and comply with all relevant statutes.

While exact data on the average membership size of age-restricted senior HOAs is difficult to obtain, the California Association of HOAs reports that the average size of an HOA in California is 276 residents.[1] Taking that figure, compared to the more than 6,000 residents in the Third Laguna Hills Mutual HOA, it is not clear whether concerns about other communities seeking similar carveouts would bear out. Due to the unique size and ownership characteristics of this specific HOA, and the fact that essential governing documents have not been updated in more than three decades, there seems to be clear rationale as to why this targeted solution is a standalone one.

Opposition. The California Association of Realtors (CAR) wrote the following in opposition to the bill, "While senior communities often have high levels of engagement, proposed amendments can sometimes be legally problematic, creating governance and enforcement challenges. Additionally, creating a special exemption for one HOA sets a concerning precedent."

Double-referral. This bill is also referred to the Senate Judiciary Committee.

Related/Prior Legislation

AB 2692 (Irwin, 2026) — would allow an HOA whose CC&Rs expired prior to a natural disaster, as defined, to reinstate those CC&Rs with majority approval of the membership of the HOA. *This bill is currently pending in the Assembly.*

AB 1458 (Ta, Chapter 303, Statutes of 2023) — authorized a lower quorum requirement for HOA elections of directors under specified circumstances.

Third Laguna Hills Mutual (source)

OPPOSITION: (Verified 7/22/26)

California Association of Realtors

ARGUMENTS IN SUPPORT: Supporters of the bill argue that it is a precise measure intended to empower a single HOA community that experiences unique challenges and has been unable to update its CC&Rs for nearly four decades.

ARGUMENTS IN OPPOSITION: Opponents of the bill argue that it could set a concerning precedent from which many other HOAs would ask for lower thresholds to petition changes and depress homeowner involvement in decisions.

SUBJECT: Firearms: 3-dimensional printing blocking technology

SOURCE: Everytown for Gun Safety Action Fund

DIGEST: This bill makes it unlawful to sell or transfer a three-dimensional (3-D) printer in California that is not equipped with firearm blocking technology or not listed on the Department of Justice's (DOJ) list of three-dimensional printers for which the manufacturer has submitted a complete self-attestation that the printer is equipped with firearm blocking technology; requests that ASTM International develop industry standards for firearm blocking technology for three-dimensional printer manufacture use; requires the DOJ to quarterly check whether ASTM International has published industry standards, as specified; requires the DOJ to publish guidance or regulations for firearm blocking technology adopting some or all of ASTM International's industry standards, if the DOJ determines that ASTM

International published such industry standards by July 1, 2029, or guidance or regulations adopting some or all of industry standards from another state governmental entity if ASTM International does not publish industry standards by the date and the DOJ determines that a state governmental entity outside of California has published such standards; requires the DOJ to publish a list of three-dimensional printers for which the manufacturers have submitted a self-attestation that the printer is equipped with firearm blocking technology; and provides a cause of action for a violation of these provisions, as specified.

ANALYSIS:

Existing law:

1) Establishes the Firearm Industry Responsibility Act (FIRA) to prohibit firearm industry members from dealing in abnormally dangerous firearm-related products. Requires a firearm industry member to comply with the firearm industry standard of conduct, and makes it a violation of the firearm industry standard of conduct for a firearm industry member to fail to comply with specified provisions, including establishing, implementing, and enforcing reasonable controls. (Civil (Civ.) Code, §§ 3273.50 et seq.)

2) Specifies that a firearm-related product includes a "firearm manufacturing machine," and defines, for the purposes of FIRA, "firearm manufacturing machine" to mean a three-dimensional printer, as defined, a computer numerical control (CNC) milling machine, or a similar machine, that is marketed or sold, or is reasonably designed or intended to be used, to manufacture or produce firearms, firearm components, or firearm accessories. (Civ. Code § 32783.50(d).)

3) Authorizes a person who has suffered harm because of a firearm industry member's conduct, the Attorney General, a city attorney, and a county counsel to bring an action in court under FIRA for a violation of the firearm industry standard of conduct. (Civ. Code § 3273.52.)

4) Permits a civil action to be brought against a person who knowingly distributes or causes to be distributed, by any means, including the internet, any digital firearm manufacturing code to any other person in this state who is not a federally licensed firearms manufacturer, a member of the Armed Forces, or any law enforcement agency or forensic laboratory, as specified, or who commits specified criminal acts related to firearms. (Civ. Code § 3273.61.)

5) Prohibits a person from selling, offering to sell, transferring, advertising, or marketing a CNC milling machine or three-dimensional printer in a manner that knowingly or recklessly causes another person in the state to engage in conduct prohibited by Penal Code section 29185, or in a manner that otherwise knowingly or recklessly aids, abets, promotes, or facilitates conduct prohibited by that section.
   a) Creates a rebuttable presumption that a person is engaged in this prohibited conduct if they offer to sell, advertise, or market a CNC milling machine or three-dimensional printer in a manner that, under the totality of the circumstances, is targeted at purchasers seeking to manufacture firearms or that otherwise affirmatively promotes the machine or printer's ability to manufacture firearms, and the person sells or transfers the CNC milling machine or three-dimensional printer without verifying that the purchaser or transferee in this state is a federally licensed firearms manufacturer or not otherwise prohibited, as specified. (Civ. Code § 3273.62.)

6) Makes it unlawful to knowingly, willfully, or recklessly cause another person to engage in the unlawful manufacture of firearms, or to knowingly, willfully, or recklessly aid, abet, promote, or facilitate the unlawful manufacture of firearms. (Civ. Code § 3273.625.)

7) Defines "firearm" to mean a device, designed to be used as a weapon, from which is expelled through a barrel, a projectile by the force of an explosion or other form of combustion. (Pen. Code § 16520.)

This bill:

1) Establishes the "California Firearm Printing Prevention Act," and defines for the Act the following:
   a) "Department" to mean the Department of Justice;
   b) "firearm" to mean the definition of firearm in Penal Code section 16520;
   c) "firearm blocking technology" to mean hardware, firmware, or other integrated technological measures capable of ensuring a three-dimensional printer will not proceed to any print job unless the underlying three-dimensional printing file has been evaluated by a firearms blueprints detection algorithm and determined not to be a printing file that would produce a firearm or illegal firearm parts;
   d) "firearm blueprint detection algorithm" to mean a software service that evaluates three-dimensional printing files, whether in the form of stereolithography (STL) files or other computer-aided design files or

geometric code, to determine if the files can be used to program a three-dimensional printer to produce a firearm or illegal firearm parts, and flags any such files to prevent their use to manufacture a firearm or illegal firearm parts;

e) "firearm precursor part" to have the same meaning as it is defined in Penal Code section 16531;
f) "firmware design" to mean integration of a firearms blueprint detection algorithm directly into a three-dimensional printer's firmware, such that any geometric code received by the printer must be evaluated by the algorithm before the printer will proceed to print, and such that the printer will reject print jobs identified by the algorithm because they would direct the printer to print firearms or illegal firearm parts;
g) "illegal firearm parts" to mean a firearm precursor part and any part designed and intended for use in converting a semiautomatic weapon into a machine gun, including, but not limited to, a pistol convertor;
h) "integrated pre-print software design" to mean a limitation of a three-dimensional printer's operation to accept geometric code for printing exclusively from a single slicer or other preprint software, which may be the manufacturer's proprietary software, and integration of a firearm blueprint detection algorithm into that pre-print software, such that any STL file or other computer-aided design file must be evaluated by the algorithm before the software will proceed to produce geometric code, and such that the software will not produce geometric code for files that are identified by the algorithm because they would direct the printer to print firearms or illegal firearm parts;
i) "Pistol convertor" to have the same meaning as it is defined in Penal Code section 17015;
j) "Software controls process" to mean a system designed to stop a three-dimensional printer from initiating any print job unless the underlying three-dimensional printing file has been evaluated by a firearm blueprint detection algorithm and determined not to be a printing file that would produce a firearm or illegal firearm parts; and
k) "Three-dimensional printer" to have the same meaning as defined in Civil Code section 3273.60.

2) Requests ASTM International to develop industry standards for firearms blocking technology consistent with this section for three-dimensional printer manufacturer use in order to comply with these sections, and encourages these industry standards to require that firearm blueprint detection algorithms have the capacity, with a high degree of accuracy, to:

a) Evaluate three-dimensional printing files, whether in the form of STL files or other computer-aided design files or geometric code;
b) Detect and identify any such files that can be used to instruct a three-dimensional printer to produce a firearm or illegal firearm parts; and
c) Flag any disallowed files for print rejection by a software control process.

3) Specifies that the industry standards for firearm blueprint detection algorithms are encouraged to require that, at a minimum, firearm blueprint detection algorithms have the capacity to utilize information from an inventory of disallowed firearm blueprint files that have been commonly shared on internet forums to detect those files and modified versions of those files, and, in order to meet these requirements, permits the standards to require blueprint detection algorithms to receive updated information from an inventory of firearm blueprint files and illegal firearm parts blueprint files, including but not limited to, a library maintained by any state agency or out-of-state agency, academic institution, or nongovernmental entity.

4) Specifies that Civil Code section 3273.61 does not apply to a person or entity who distributes, or causes the distribution of, a digital firearm manufacturing code, including firearms blueprint files and illegal firearm parts blueprint files, solely for the bona fide purpose of developing, refining, and testing the functionality of firearm blocking technology or maintaining an updated library of digital firearm manufacturing code files solely for that bona fide purpose.

5) Encourages the industry standards for firearm blueprint algorithms to include standards for acceptable false-positive and false-negative rates in detection algorithm performance, but prohibits the standards from requiring that a firearm blueprint detection algorithm produce a false-negative rate of zero corresponding to a perfect success rate at detecting disallowed files, as specified.

6) Encourages the industry standards for firearm blueprint detection algorithms to require that the firearm blueprint detection algorithm have the capacity to implement regular updates to the set of disallowed firearm files it has the capacity to detect, to an extent and frequency that reasonably considers the rate of innovation for the design and availability of new firearm blueprint files, as specified, and encourages the industry standards to include a process for periodically reviewing emerging detection software techniques, including advanced forms of image recognition and geometric search functionality.

7) Encourages the industry standards for software controls processes to include minimum standards on developer testing to confirm an acceptably low level of evasion with identified design files for firearms and illegal firearm parts, and prohibits the industry standards from requiring that a software controls process produces a perfect success rate at preventing a user from evading a firearms blueprint detection algorithm.

8) Encourages the industry standards for software controls processes to set out options for design forms that may be used for a software controls process integration into a three-dimensional printer, including that the standards-setting process shall consider: firmware design; integrated pre-print software design; and any other form, including handshake authentication design or other design forms directed towards open-source compatibility, if the software controls process meets all performance requirements of the standard and is either at least as effective or at least as resistant to being defeated by a technically skilled user as the above-listed design forms, as specified.

9) Encourages the industry standards for software controls processes to include both: for firmware design, guidance for how vendors are required to demonstrate that their technology will ensure a printer directs potential print jobs to the algorithm before printing; and for integrated pre-print software design, guidance for how vendors must demonstrate that printers will accept print jobs exclusively through authorized and validated software systems, as specified.

10) Encourages the industry standards for software controls processes to require that software controls processes have the capacity, to a high degree of reliability, to substantially reduce the likelihood of foreseeable circumvention attempts intended to evade a firearms blueprint detection algorithm.

11) Requires, from July 1, 2027 to July 1, 2029, that the DOJ check on a quarterly basis whether ASTM International has published industry standards for firearm blocking technology.
    a) If the DOJ determines by July 1, 2029 that ASTM International has published or adopted industry standards for firearm blocking technology, requires the DOJ to publish written guidance or regulations within 18 months after determining that ASTM International has published industry standards for firearm blocking technology. Requires this written guidance or regulations to incorporate some or all of the industry standards published by ASTM International, and to establish that compliance with the industry standards constitutes compliance with the requirement that

manufacturers equip three-dimensional printers sold in California with firearm blocking technology, except as otherwise required.

b) If the DOJ determines ASTM International has not published such industry standards by July 1, 2029, requires the DOJ to determine, on or before August 1, 2029, whether a state governmental entity outside California has published or adopted industry standards for firearm blocking technology after a good-faith investigation of the available technology. If the DOJ determines by August 1, 2029 that another state governmental entity has published or adopted industry standards for firearm blocking technology, requires the DOJ to publish written guidance or regulations no later than 18 months that describe the minimum performance standards for firearm blocking technology that a three-dimensional printer manufacturer must meet to comply with these provisions. Requires that this guidance or regulations incorporate some or all of the industry standards, and establishes that compliance with those industry standards constitutes compliance with the requirement that manufacturers equip three-dimensional printers sold in California with firearm blocking technology, except as otherwise required.

c) If the DOJ determines on July 1, 2029 that ASTM International did not publish industry standards for firearm blocking technology because ASTM International determined that it is not technologically feasible for three-dimensional printers to be equipped with firearm blocking technology, prohibits the DOJ from making any further determinations regarding whether a state governmental entity outside California has published or adopted industry standards, as specified.

12) Requires, six months after the publication of DOJ's performance standards or regulations, as specified, that any business that produces or manufactures three-dimensional printers for sale or transfer in California to submit to the DOJ an attestation, for each make and model of printer they intend to sell in California, that the manufacturer has equipped the printer with a firearm blueprint detection algorithm and a software controls process, and which confirms that the manufacturer tested and confirmed the functionality of the firearm blocking technology.

a) Provides the Attorney General with the authority to investigate and inspect the submission and the models if the attestation is incomplete or there exists information that indicates that the make and model may not be effectively equipped with firearm blocking technology, as specified. Specifies that any make and model of three-dimensional printer under investigation and inspection may be identified as having an incomplete attestation.

b) Permits a self-attestation form to include instructions to manufacturers on how to test the functionality of firearm blocking technology and how to submit the self-attestation form.
c) Requires the self-attestation to include: the make and model of the three-dimensional printer; confirmation that the manufacturer has equipped that make and model with a firearm blocking technology; confirmation of testing the functionality of the firearm blocking technology once installed as specified; and confirmation that the attestation form is submitted under penalty of perjury.

13) Requires the DOJ, nine months after the publication of the DOJ's performance standards or regulations, as specified, to publish a list of the makes and models of three-dimensional printers that have complete attestations, and of any makes and models that have an incomplete attestation. Requires this list to be updated no less frequently than on a quarterly basis and be made accessible on the DOJ's website, and requires the retailers and distributors of three-dimensional printers to consult the list to ensure their inventory consists of compliant three-dimensional printers.

14) Requires a business that produces or manufactures three-dimensional printers to, before any three-dimensional printer is offered, sold, transferred, or distributed to any person or business in California:
a) equip the printer with firearm blocking technology that meets the performance standards published by the DOJ;
b) submit a self-attestation of installation of the firearm blocking technology to the DOJ.

15) Specifies that any business that sells, offers to sell, distributes, or transfers a three-dimensional printer in California must consult the DOJ's list. Makes it unlawful to sell or transfer a three-dimensional printer in California that is not equipped with a firearm blocking technology and is not listed on the DOJ's list.

16) Does not apply the requirements described in 15) through 16), above, to:
a) Printers manufactured for and sold exclusively to a state-licensed firearms manufacturer, as defined;
b) Printers manufactured for and sold exclusively to the state or law enforcement agencies of the United States for the manufacturing of firearms for law enforcement or military purposes;

c) Printers manufactured exclusively for or sold directly to aerospace, biomedical, automotive, or chemical or mechanical engineering companies or government contractors, except that software required by these provisions must be installed prior to the resale of the printer to a user outside of these exempted industries;
d) Printers used exclusively for the manufacture of properties (props) in the entertainment industry; or
e) Printers sold or transferred in private transactions that were originally purchased before the publication of the DOJ's list.

17) Permits a civil action against a person who sells, offers to sell, or transfers a three-dimensional printer in California that is not equipped with firearm blocking technology, and against a person who knowingly files an attestation containing false information. For a civil action for selling a printer without firearm blocking technology, it is an affirmative defense against a retailer, distributor, wholesaler, importer, or other transferor that they only sold or transferred the three-dimensional printer after verifying that that it was on the DOJ's list as having a complete attestation.

18) Permits a person who suffers harm in California as a result of a violation of these provisions to bring a civil action pursuant to 18), above, and permits such a person to seek compensatory damages as well as injunctive relief. Additionally permits the Attorney General, county counsel, or a city attorney to bring an action for a violation of these provisions, and permits them to seek a civil penalty of no more than $25,000 for each violation as well as injunctive relief. Specifies that a prevailing plaintiff is entitled to recover reasonable attorney's fees and costs.

19) Makes the provisions described in 15) through 18), above, operative six months after the publication of the list of three-dimensional printers whose manufacturers have submitted complete self-attestations.

20) Permits the DOJ to promulgate regulations and develop forms and publications to implement the requirements of this bill, including but not limited to, procedures for manufacturers to update their attestation forms when industry standards have been updated and to specify the process for submitting attestation forms for new models of three-dimensional printers introduced after the timeline for self-attestations, and permits the DOJ to adopt regulations that provide for exceptions to these provision that is consistent with the purpose of these provisions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Costs to DOJ to establish and operate this program overall are unquantifiable and will require the hiring of personnel and securing technological expertise outside DOJ's existing scope and capabilities (General Fund).

ARGUMENTS IN SUPPORT:

According to Everytown for Gun Safety, the sponsor of this bill:

> The 3D printed gun crisis is not a faraway or abstract problem. It's happening here in California, right now. And at the rate it's increasing, this

crisis will get much worse if we don't use every tool we have. In just the six month span between September 2025 - February 2026, numerous instances of 3-D printed firearm manufacturing were uncovered by law enforcement agencies all around California. These incidents often include teenagers too young to legally purchase the types of firearms they are printing at home.

- In September 2025, Yuba County Sheriffs uncovered a "fully operational 3D-printing workshop" run by three men aged 19-38 and seized 8 handguns, several 3-D printed handgun frames, four assault weapons, one rifle, and assorted firearms parts.
- In October 2025, the Santa Clara County DA's Gun Violence Task Force arrested a man who was on probation for domestic violence running a ghost gun manufacturing operation out of his apartment. The press release paints an alarming picture: "When task force members entered the prohibited person's home, they found the 3D gun printer still working inside a closet, two loaded weapons, three nearly finished weapons, and 35 machine gun conversion devices. All of the weapons were considered "ghost guns" – made and sold with no serial number to avoid tracing and detection."
- In November 2025, Santa Rosa Police detectives found an 18-year-old running a ghost gun manufacturing operation in his apartment, less than two years after arresting a 14-year-old illegally manufacturing a ghost gun with a 3-D printer.
- In February 2026, 3D-printed firearms were recovered in at least four more newsworthy incidents, spread around the state:
    - Law enforcement in Santa Rosa seized over 165 guns and three 3D printers from a 22-year-old ghost guns manufacturer.18
    - Victor Valley sheriffs found a 3D-printed assault rifle, over 130 Polymer80 jigs, 3D printer materials and a 3D printing guide for different firearms in a Lucerne Valley ghost guns arrest involving a man who was previously indicted and pled guilty for manufacturing guns for a gun trafficker.19
    - A San Jose teenager was arrested with 27 finished or near-finished 3D-printed firearms, including DIY machine guns, and two 3D printers near his sneaker collection in his bedroom.
    - A Daly City narcotics and identity theft investigation led to uncovering a San Francisco residence with several 3D-printed firearms, rifle components, and a 3D printer. […]

3D-printing firearms is the next wave of the ghost guns crisis, a problem California has been battling for years. The threat is evolving and our policy

solutions need to evolve too. AB 2047 gives us a chance to get a step ahead of the criminals running underground ghost gun selling operations and the teenagers tempted to use a home 3-D printer in their bedroom or basement to print a deadly weapon. […]

While California's recent laws have focused on prohibition and deterrence, AB 2047 provides an opportunity for prevention using new technology to stop 3D gun printing at its source. We can't fully address this emerging threat to our foundational gun laws and public safety without an intervention at the manufacturing stage. And there's good news on this front: the technology already exists to equip printers to identify and block these dangerous firearm print jobs. AB 2047 will simply ensure that printer manufacturers actually deploy these technological solutions and stop the spread of DIY firearms before it accelerates any further.

Specifically, AB 2047 creates a new requirement that 3D printers sold in California must be equipped with firearm printing blocking technology by March 2029. The law will primarily be enforced through civil mechanisms similar to the existing Firearm Industry Responsibility Act (Civil Code section 3273.50 et seq.) and existing laws allowing for civil actions to enjoin Unlawful Firearm Manufacturing (Civil Code section 3273.60). The bill sets out a staged implementation process to evaluate and certify the underlying components of firearm printing blocking technology before imposing any kind of requirement on 3D printer manufacturers.

ARGUMENTS IN OPPOSITION:

According to the California Rifle & Pistol Association, which opposes AB 2047:

While framed as preventing unlawful manufacturing, this bill represents a costly, impractical, and constitutionally problematic burden on innovation, small businesses, and lawful hobbyists.

Key concerns:

- Technological Impracticality and Ineffectiveness: Detection algorithms and software controls can be evaded by technically skilled individuals through modifications, open-source alternatives, or altered files. Criminals will simply ignore the mandates or obtain printers out-of-state, while law-abiding makers and innovators face unnecessary barriers.

- Burdensome Regulation and Costs: Mandatory certification, attestations, testing, and quarterly DOJ lists will drive up prices for 3D printers, harm small businesses and California's emerging tech sector, and stifle hobbyist innovation in areas far beyond firearms (prototyping, education, manufacturing).
- Constitutional Issues: The bill imposes prior restraints and technological mandates on tools that have substantial lawful uses, raising serious Second Amendment concerns under Bruen and due process issues. It effectively creates a de facto ban on non-compliant printers for most consumers.
- Bureaucratic Overreach: Placing the DOJ in charge of certifying complex software algorithms and policing printer sales adds layers of red tape without meaningfully addressing criminal activity, which is already illegal under existing manufacturing prohibitions.

SUBJECT: Public resources: coastal resources: Coastal Resilience Permitting Working Group

SOURCE: Author

DIGEST: This bill 1) authorizes the California Coastal Commission (Coastal Commission) to retroactively extend for up to 5 years any time limitation established for a local government to act on the Coastal Commission's suggested modifications to a land use plan amendment that would authorize approval of a 100% affordable housing development which otherwise expired, as provided; and 2) requires the Secretary of the California Natural Resources Agency to convene a Coastal Resilience Permitting Working Group to develop a Coastal Resilience Permitting Roadmap by July 1, 2028 with recommendations for process improvements and legislative reforms to enable efficient environmental permitting of coastal resilience projects statewide, as provided

ANALYSIS:

Existing law:

1) Establishes the California Coastal Act of 1976 (Coastal Act) which:

   a) Establishes the Coastal Commission in the California Natural Resources Agency (CNRA).

   b) Requires each local government in the coastal zone to prepare a local coastal program (LCP) for that portion of the coastal zone within its jurisdiction, as provided. Requires the precise content of each LCP to be determined by the local government in full consultation with the Coastal Commission and full public participation. (Public Resources Code (PRC) §30500)

      i) Each LCP includes a land use plan and an implementation plan. The land use plan contains policies and the implementation plan includes accompanying measures to implement the land use plan, including zoning ordinances, and zoning district maps, among others.

   c) Authorizes the Coastal Commission for good cause to extend for up to one year any time limitation established related to the preparation, approval, and certification of a LCP.

   d) Provides for the planning and regulation of development within the coastal zone.

      i) A person planning to perform or undertake any development in the coastal zone is required to obtain a coastal development permit (CDP) from the Coastal Commission or local government enforcing an LCP certified by the Coastal Commission.

      ii) The coastal zone means the coastal land and waters of California, and includes the lands that extend inland generally 1,000 yards from the mean high tide line, as specified, with various exceptions including the San Francisco Bay.

      iii) Development means, among other things, the placement or erection of any solid material or structure on land or in water.

   e) Requires the Coastal Commission to take into account the effects of sea level rise in coastal resources planning and management policies and activities in order to identify, assess, and, to the extent feasible, avoid and mitigate the adverse effects of sea level rise. (PRC §30270)

2) Establishes the San Francisco Bay Conservation and Development Commission (BCDC): (Government Code (GOV) §§66600 *et seq*.)

   a) BCDC, among other things, is required to address emerging issues and to implement comprehensive plans for the preservation and protection of San

Francisco Bay and the Suisun Marsh, including preparedness for, and resilience to, rising sea levels, tides, and storm surge due to climate change. BCDC has adopted the San Francisco Bay Plan, which is a comprehensive plan that addresses the development of the bay and shoreline.

3) Requires a local government lying within the coastal zone or the San Francisco Bay shoreline to develop a sea level rise plan as part of a LCP or subregional San Francisco Bay shoreline resiliency plan subject to BCDC's approval, as provided.

   a) Requires local governments to comply by January 1, 2034.

   b) Requires the Coastal Commission and BCDC to establish guidelines for the sea level rise plan, as provided.

   c) Requires local governments that receive Coastal Commission or BCDC approval of their sea level rise plans be prioritized for funding, subject to appropriation, for the implementation of sea level rise adaptation strategies and recommended projects in the approval sea level rise plan. (PRC §§30985, 30985.2, 30985.5)

This bill:

1) In addition to existing law authorizing the Coastal Commission to extend certain deadlines by up to one year, authorizes the Coastal Commission to retroactively extend for up to five years any time limitation established for a local government to act on the Coastal Commission's suggested modifications to a land use plan amendment that would authorize approval of a 100% affordable housing development which otherwise expired between January 1, 2025 and December 1, 2026, as provided.

2) Requires the Secretary of CNRA (CNRA Secretary) to develop a Coastal Resilience Permitting Roadmap (Roadmap) with recommendations for process improvements and legislative reforms to enable efficient and timely delivery of environmental approvals by July 1, 2028.

3) Requires the CNRA Secretary, in consultation with the Secretary of the California Environmental Protection Agency (CalEPA), to convene a Coastal Resilience Permitting Working Group (Working Group) for the purpose of developing the Roadmap.

4) Requires that the Working Group consist of representatives from federal, state, and local agencies, including but not limited to: the Coastal Commission; CalEPA; the State Water Resources Control Board (State Water Board) and

regional water quality control board representatives (Regional Water Boards); the California Department of Fish and Wildlife; the Governor's Office of Land Use and Climate Innovation; CNRA; the Ocean Protection Council; BCDC; the State Coastal Conservancy; the State Lands Commission; and the State Office of Historic Preservation.

5) Requires that the Roadmap include, at minimum, recommendations that address:

   a) Administrative reforms that can be implemented by state agencies within their existing authority to improve permit issuance timelines, including, among others:

      i) Improving efficiency in the process for agencies to determine and communicate that permit applications are complete including through the use of tools, as provided; and

      ii) Unified applications with a predictable sequence and timeline for review;

   b) A state process to align agency mitigation requirements and enable in-lieu fees or advance mitigation through which applicants can contribute funding to eligible restoration or mitigation initiatives, as provided;

   c) Legislative reforms that have the greatest potential to further accelerate permitting for projects that increase coastal resilience, with a focus on current legislative requirements, as provided;

   d) A coastal resilience project pilot program and any required legislative authorizations, if needed to test alternative approaches;

   e) An evaluation of whether consolidated coastal resilience permits, similar to those provided for offshore wind, would facilitate timely permits; and

   f) Workforce assessment and funding options for regulatory staffing positions and as-needed permitting support contracts to supplement staff, as provided.

6) Requires, on or before April 1, 2027, the CNRA Secretary, in collaboration with the commission, BCDC, the California Department of Fish and Wildlife (CDFW), and the State Water Board and Regional Water Boards, convene a Coastal Resilience Permit Advisory Group (Advisory Group), consisting of representatives from at least the following:

   a) State Department of Transportation, State Coastal Conservancy, and other relevant state agencies that seek permits for projects in coastal areas;

b) Local governments required to update their LCPs for sea level rise;

c) California ports;

d) Local transportation agencies and wastewater treatment agencies, as specified;

e) California Native American tribes that are on the contact list administered and maintained by the Native American Heritage Commission; and

f) Other members of the public, including businesses, home and affordable housing builders, commercial and recreational fishers, environmental organizations, and environmental justice organizations.

7) Requires the CNRA Secretary, in consultation with the Coastal Commission, BCDC, CDFW, the State Water Board and the Regional Water Boards to conduct a series of public workshops with the Advisory Group or subgroups thereof to:

a) Solicit feedback regarding challenges with existing permitting processes; and

b) Review and seek comment on draft reform proposals from the Working Group's Roadmap.

8) Provides that a project alternative should be developed that uses existing natural features and ecosystem processes, or the restoration of natural features and ecosystem processes, to mee a project's goals when developing infrastructure to address adaption, where feasible.

9) Defines "coastal resilience project" as a project that maintains, protects, restores, or enables coastal ecosystems, infrastructure, or communities to withstand and adapt to sea level rise and other natural hazards amplified by climate change. Makes relevant legislative findings and declarations.

[NOTE: Additional information regarding this bill may be found in the Senate Natural Resources and Water Committee's bill analysis.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No
According to Senate Appropriations Committee for a previous version of this bill:

- One-time costs, likely in the high hundreds of thousands of dollars spread over 2-3 years (General Fund) for CNRA to facilitate interagency collaboration, public workshops, development of the Roadmap, and other deliverables required by the bill.

- One-time costs, likely in the low millions of dollars spread over 2-3 years (General Fund) for the California Coastal Commission estimates to help develop relevant components of the Roadmap, including recommendations across 10 topic areas, new state agency mitigation processes, proposed legislative reforms, alternatives analyses, evaluation of the efficacy of offshore wind project permitting practices, and more.

- Unknown but significant ongoing costs, possibly in the millions of dollars annually (General Fund, Waste Discharge Permit Fund, or other fund) for the State Water Board and Regional Water Boards to support state and regional board participation in the creation of Coastal Resilience Permitting Roadmap, including expansive subject matter expertise, developing recommendations, participating in statewide public workshops, providing legal consultation, and ensuring the necessary internal operational support to carry out the bill's provisions. In addition, the State Water Board anticipates that the scale of the required implementable solutions required by this bill's provisions would have significant costs ongoing, with significant information technology resources required to develop unified applications on a statewide or regional scale.

- Ongoing costs, likely around $1 million annually (General Fund), for the San Francisco Bay Conservation and Development Commission.(BCDC) to assist with development of the Roadmap and implement reforms identified by the Working Group. BCDC notes that without additional positions and contracting resources, BCDC may need to utilize its existing permitting staff and its regulatory improvements team to implement this bill, thereby increasing permitting timelines and delaying implementation of BCDC's preexisting efforts to improve permitting processes.

- One-time costs, likely less than $1 million spread over 3-4 years (General Fund), for the California Department of Fish and Wildlife (CDFW) to organize input from the department's coastal regions (specifically, regions one, three, four, five, and seven); participate in the Working Group, Advisory Group, and public workshops; and assist with the development and review of the Roadmap.

- One-time costs, likely less than $1 million spread over 3-4 years (General Fund), for the California Environmental Protection Agency (CalEPA) to consult with the members of the Working Group to collaborate on the drafting and recommendations to be included in the Roadmap.

- One-time costs, likely less than $1 million spread over 3-4 years (General Fund), for the California Department of Transportation (Caltrans) to consultant services to participate in the Advisory Group, participate in public workshops, and assist with the development and review of the Roadmap and legislative reforms resulting from recommendations made in the Roadmap.

ARGUMENTS IN SUPPORT: According to the author, "AB 2051 directs the Natural Resources Agency to convene a Coastal Resilience Permitting Working Group who will meet to develop a Roadmap for projects proposed along California's coast and in the San Francisco Bay. Under current law, a project sponsor on the coast may need to secure more than ten separate permits from state, federal, and local agencies. Decades worth of well-meaning permitting processes are overlaid on top of one another, and it is too expensive and time-consuming to move with the speed and cost efficiency our coastline is going to need to adapt to sea-level rise and an altered climate. The bill also gives the Coastal Commission the ability to extend, under narrow conditions, the expiration date of suggested modifications to a local land use plan that would facilitate the approval of a 100% affordable housing development."

In a joint sign-on letter in support, Venice Community Housing, among others, write, "The California Department of Housing and Community Development has awarded Venice Dell $42.5 million in funds, which requires a construction start by spring 2028. As the remaining hurdles to the project get stripped away, allowing the Coastal Commission to renew its approval of the project will save months of repeat work, enable the project to meet its funding deadline, and allow hundreds of people to have a safe and affordable home."

SUBJECT: Vessels: operation: registration

SOURCE: California State Sheriff's Association

DIGEST: This bill 1) prohibits a court from staying, suspending, or entertaining dismissal of the proceedings of a case in which a person is charged with operating a vessel under the influence of alcohol or drugs for attendance or participation in any education, training, or treatment programs; 2) makes the failure of a vessel to display a ski flag to indicate a swimmer in the vicinity of the vessel an infraction; 3) changes the definition of a for-hire vessel to any vessel propelled by machinery carrying one or more passengers for hire; and 4) requires registration of all recreational vessels using waters of the state.

ANALYSIS:

Existing law:

1) Prohibits a person from using any vessel or manipulate water skis, an aquaplane, or a similar device in a reckless or negligent manner so as to endanger the life, limb, or property of any person. (Harbor (Harb.) & Navigation (Nav.) Code, § 655, subd. (a).)

2) Prohibits operating a vessel, water skis, aquaplane, or similar device while under the influence of an alcoholic beverage, a drug, or combination. Prohibits the operation of any of these devices by a person who is addicted to the use of any drug. (Harb. & Nav. Code, § 655, subd. (b)-(f).)

3) Creates an infraction punishable by a fine not exceeding $15 for failure of the operator of a vessel involved in towing a skier to display or cause to be displayed a ski flag to indicate any of the following conditions: a downed skier; a skier in the water preparing to ski; a ski line extended from the vessel; or a ski in the water in the vicinity of the vessel. (Harb. & Nav. Code, § 658.7, subd. (a).)

4) Defines a "for-hire vessel" as any vessel propelled by machinery carrying more than three passengers for hire, except a sea plane on water or a watercraft specifically designed to operate on a permanently fixed course. (Harb. & Nav. Code, § 760.)

5) Defines an "undocumented vessel" as any vessel that is not required to have, and does not have, a valid marine document issued by the U.S. Coast Guard or any federal successor agency. (Harb. & Nav. Code, § 651, subd. (ad).)

6) Authorizes a peace officer to a person for violating the Vehicle Code when the peace officer has reasonable cause to believe that the person involved in a traffic accident has violated a provision of the Vehicle Code not declared to be a felony or a local ordinance and the violation was a factor in the occurrence of the traffic accident. (Vehicle (Veh.) Code, § 40600.)

7) Requires every undocumented vessel using the waters or on the waters of the state to be currently numbered. Authorizes the Department of Motor Vehicles (DMV) to adopt rules and regulations for the registration of undocumented vessels belonging to the state, local public agencies, or to the U.S. without payment of specified fees, except fees for duplicate certificates of ownership, duplicate certificates of number, or substitute current year registration stickers. (Veh. Code, §§ 9850, 9851.)

8) Exempts undocumented vessels from DMV registration if the vessel is registered by the federal government or a federally approved registration system of another state. (Veh. Code, § 9873.)

9) Prohibits a court from staying or suspending proceedings of a case in which a person is charged with operating a vehicle under the influence of alcohol or drugs, or considering dismissal or entertaining dismissal of the proceedings, for attendance or participation in any education, training, or treatment programs. (Veh. Code, § 23640.)

This bill:

1) Authorizes a peace officer to prepare a written notice to appear when the office has reasonable cause to believe that a person involved in a traffic accident has violated boating law and that the violation was a factor in the occurrence of the vessel accident.

2) Provides that a peace officer has reasonable cause to issue a written notice to appear if, as a result of the officer's investigation, the officer has evidence, either testimonial or real, or a combination of testimonial and real, that would be sufficient to issue a written notice to appear if the officer had personally witnessed the events investigated.

3) Requires that a notice to appear contain the name and address of the person, the registration number of the person's vessel, if any, the name and address, when available, of the registered owner or lessee of the vessel, the offense charged, and the time and place when and where the person may appear in court or before a person authorized to receive a deposit of bail. Requires that the time specified is at least 10 days after the notice to appear is delivered.

4) Makes the failure of a vessel to display a ski flag to indicate a swimmer in the vicinity of the vessel an infraction punishable by a fine not exceeding $15. Exempts public safety activities from the ski flag requirement.

5) Defines a "for-hire vessel" as any vessel propelled by machinery carrying one or more passengers for hire.

6) Requires, on and after July 1, 2028 and until January 1, 2034, and to the extent permissible under federal law, every recreational vessel using the water or on

the waters of this state to be registered. Requires the owner of a vessel that is required to or that has a valid marine document issued by a federal agency and that is registered to obtain from the department a decal and to display it on the vessel, either within 18 inches of the normal boarding area or on the mast. Requires the owner to apply for the decal if the vessel remains in California waters for more than 60 days and to display the decal if the vessel remains in California waters for more than 90 days. Requires the decal to be visible regardless of whether doors and hatches are open or closed. Prohibits the department from issuing a decal to an owner of a vessel that is larger than a registration sticker issued to an undocumented vessel. Provides that a decal is not registration.

7) Prohibits a court from staying, suspending, or entertaining dismissal of the proceedings of a case in which a person is charged with operating a vessel under the influence of alcohol or drugs, for attendance or participation in any education, training, or treatment programs.

Background

Boating under the influence. Existing law prohibits operating a vessel, water skis, aquaplane, or similar device while under the influence of an alcoholic beverage, drug, or combination of alcohol and drugs. (Harb. & Nav. Code, § 655, subd. (b)-(f).) When a person is charged with a DUI for a violation of the Vehicle Code, the court is prohibited from suspending or staying the proceeding, or considering dismissal or entertaining dismissal, for the purpose of allowing the defendant to participate in an education, training, or treatment program. (Veh. Code, § 23640.) This bill applies these provisions to boating under the influence.

Notice to appear. Vehicle Code section 40600 allows a peace officer to cite a person for violating the Vehicle Code when the peace officer has reasonable cause to believe that the person involved in a traffic accident has violated a provision of the Vehicle Code not declared to be a felony or a local ordinance and the violation was a factor in the occurrence of the traffic accident. There is no analogous provision for boaters involved in vessel accidents. This bill provides the same authority for peace officers to prepare a written notice to appear for a person operating a vessel.

Ski flag law. Under current law, boat operators are required to display a ski flag under specific conditions to alert nearby vessels that a skier is in the water,

signaling them to proceed with caution. This bill extends that requirement to apply to when a swimmer is in the water, except as provided.

For-hire vessels. Harbors and Navigation Code section 760 defines a "for-hire vessel" as any vessel propelled by machinery carrying more than three passengers for hire. This bill updates the definition to be consistent with the federal standards established by the U.S. Coast Guard.

Vessel registration. In California, vessels are registered in one of two ways: with the U.S. Coast Guard and referred to as a documented vessel or with the DMV and referred to as an undocumented vessel. This bill updates provisions relating to vessel registration to clarify that every recreational vessel must be registered with the state.

FISCAL EFFECT: Appropriation: No Fiscal Com.:Yes Local:Yes

According to the Senate Appropriations Committee:

Workload increase of $175,000 annually to the Department of Parks and Recreation Division of Boating and Waterways resulting from the change in the definition of a for-hire vessel from more than three to one or more (Harbors and Watercraft Revolving Fund).

Minor, absorbable costs to the Commission on Peace Officer Standards and Training (POST). It is the responsibility of the local agency to ensure that their course is POST certified.

The Department of Motor Vehicles would have absorbable costs associated with requiring every vessel using the water or on the waters of California be registered with the state, to the extent permissible under federal law.

SUBJECT: California Factory-Built Housing Law

SOURCE: California Housing Consortium

DIGEST: This bill authorizes a first user of factory built housing (FBH) to select either a local enforcement agency (LEA) or a quality assurance agency (QAA) to enforce and inspect the installation of the FBH structure, and caps the fees LEAs may charge for FBH permits and inspections when selected by the first user.

Senate floor amendments of 8/21/26 remove requirements for the Department of Housing and Community Development (HCD) to establish rules and regulations for cost recovery and make minor clarifying changes.

ANALYSIS:

Existing law:

1) Establishes the Factory-Built Housing Law, which provides uniform health and safety standards and inspection procedures for FBH throughout the state.

2) Defines FBH to mean a residential building, dwelling unit, or an individual dwelling room or combination of rooms thereof, or building component, assembly, or system that is manufactured in such a manner that all concealed parts or processes of manufacture cannot be inspected before installation at the building site without disassembly, damage, or destruction of the part, including units designed for use as part of an institution for resident or patient care, that is either wholly manufactured or in substantial part manufactured at an offsite location to be wholly or partially assembled onsite in accordance with specified building standards and regulations. FBH does not include a mobilehome, a recreational vehicle, or a commercial modular, as specified.

3) Defines LEA to mean the city, county, or city and county in which factory-built housing is installed.

4) Defines QAA to mean a private organization meeting the requirements in regulations of HCD to perform in-plant inspections of FBH construction.

5) Defines "first user" to mean the person, firm, or corporation who initially installs FBH. Excludes from the definition of first user anyone who subsequently purchases FBH from the first user.

6) Deems all FBH bearing an Insignia of Approval, as specified, to comply with the requirements of all ordinances or regulations enacted by any city, county, city and county, or district which may be applicable to the construction of housing, except as specified.

7) Requires LEAs to enforce and inspect the installation of FBH and requires the installation of FBH to be conducted in accordance with the requirements of the State Building Standards Code and State Housing Law relating to FBH.

8) Authorizes local jurisdictions to maintain their own local use zone requirements, local snow load requirements, local wind pressure requirements, local fire zones, building setback, side and rear yard requirements, site development and property line requirements, as well as the review and regulation of architectural and aesthetic requirements.

9) Prohibits those local requirements imposed on FBH from varying substantially from the requirements imposed on other residential buildings of similar size.

10) Authorizes HCD to provide by regulation for the qualification and disqualification of QAAs to perform inspections of FBH manufacturers, acting on behalf and under the supervision of HCD.

This bill:

1) Expands definition of QAA to mean a private organization meeting the requirements specified in regulations of the department to perform in-plant inspections of the manufacture of FBH and onsite inspections of FBH.

2) Eliminates the requirement that only LEAs enforce and inspect the installation of FBH. Requires a first user of FBH to select either an LEA or a QAA, acting on behalf of and subject to HCD approval, to inspect the installation of FBH.

3) Prohibits an LEA or QAA from disassembling, damaging, or destroying FBH while inspecting the installation of that FBH housing, as specified.

4) Authorizes an LEA, by ordinance, to establish an inspection fee for the inspection of the installation of FBH. The fee shall be capped at no more than 50% of the equivalent inspection fee for non-FBH units and components, unless it makes a written finding and an adopted resolution or ordinance that provides substantial evidence of the reasonable cost to conduct the inspections.

5) Prohibits an LEA from charging an inspection fee if a first user chooses to instead have a QAA enforce and inspect the installation of FBH. Clarifies an LEA may charge fees for inspection of sitework for items not related to the installation of the FBH, including, but not limited to, grading, foundations, and landscaping other non-FBH.

6) Prohibits an LEA from establishing any permitting fee related to FBH that exceeds 50% of the equivalent fee for non-FBH, unless it makes a written finding and an adopted resolution or ordinance that provides substantial evidence of the reasonable cost to permitting review the permits.

Background

Factory-Built Housing. FBH refers to industrialized housing construction, where either the entirety of, or components of, a housing unit are produced or assembled in an offsite factory, or both, and then transported to the housing site. FBH is often

colloquially referred to as modular, manufactured, or prefabricated housing. Where traditional "site-built" or "stick-built" housing is entirely constructed on a foundation at the actual housing site, FBH utilizes the efficiencies of an assembly line, similar to a car or an appliance. Entire units and modules are assembled in a climate-controlled factory and are much less susceptible to construction delays associated with traditional housing construction (*e.g.,* disruptive weather). While benefits may vary by project and jurisdiction, the Terner Center for Housing Innovation at University of California, Berkeley (Terner Center), finds that using FBH methods has the potential to reduce hard costs for a project by 10-25% and significantly reduce build times, compared to traditional construction.[1]

Select Committee on Housing Construction Innovation. In late 2025, the Assembly Select Committee on Housing Innovation (Select Committee) was established with the purpose of exploring how the state can play a role in reducing housing costs by facilitating innovation in housing construction. The Select Committee conducted two hearings in January 2026 and received testimony from industry experts. These experts discussed all of the following: the benefits and risks of industrialized construction methods, including potential cost savings; the ability to reduce project timelines; and, regulatory, labor, and budget considerations. The hearings also explored barriers to opportunities for scaling construction innovation.

The Select Committee requested support from the Terner Center to conduct research, including interviews with people familiar with the industry. The Terner Center interviewed 65 people representing different perspectives in the industry, including market-rate and affordable housing developers, general contractors, off-site manufacturers, architects, investors, lenders, union members, state and regional government staff, building code experts, and representatives from companies using 3D printing, A.I., and other emerging technologies.

Stakeholders identified instances in which building elements were inspected by local jurisdictions despite having already been reviewed during the in-factory inspection process by HCD-approved QAAs, per HCD regulations. The Terner Center's white paper identified consensus among stakeholders for consolidated review and inspection authority at the state level, though less consensus on the form of such consolidated review. One potential policy identified by some stakeholders was to allow third-party inspectors, hired by the project developer, to perform on-site inspections. Some stakeholders noted that allowing FBH projects

[1] Stephanie Hawke, et. al. *Potential Pathways to Scale Innovative Construction Methods in California.* Accessible here: **https://ternercenter.berkeley.edu/wp-content/uploads/2026/03/PathwaystoScaleInnovativeConstruction2026.pdf**. March 2026.

to use third-party inspectors for an entire project, including on-site work, would reduce local inspection duplication and inconsistency and may improve project approval efficiency.

International FBH Models. FBH has achieved notable success in countries like Sweden and Japan, where it has become a prominent method of delivering housing at scale. In Sweden, an advanced industrialized construction ecosystem integrates forestry, manufacturing, and housing development, allowing firms to standardize designs and use assembly-line production to deliver high-quality, multi-family housing efficiently, using more sustainable and durable materials like mass timber. Academic research on Swedish prefabrication systems shows that companies have successfully translated manufacturing principles, like repeatability, supply-chain integration, and quality control, into housing production, resulting in strong performance across cost, time, and quality dimensions.

Prefabrication has also been institutionalized for decades in Japan through coordinated industry and government support. According to research from the Harvard Joint Center for Housing Studies, prefabricated housing accounted for about 14% of all housing starts in Japan as of 2019. Large firms have refined factory-based production systems that can assemble a majority of a home in a matter of days, emphasizing precision, durability, and customization at scale. Studies of Japanese and Swedish firms also find that prefabricated housing can deliver higher and more consistent quality than site-built construction due to controlled factory environments and advanced automation, even when costs are comparable or slightly higher. These models position FBH as a promising strategy to address housing shortages by improving productivity and reducing construction risk when aided by standardized regulations and stable demand pipelines.

Comments

1) *Author's statement.* "The housing crisis in California is making life increasingly unaffordable for families, young adults, and working communities, and it is forcing many people to leave the state simply because they cannot find a home within their budget. Factory-built homes offer a solution by getting homes built faster and cheaper, but current laws allow unnecessary inspections, delays, and high fees that drive up costs and slow construction. AB 2058 will streamline inspections, protect homes from damage during installation, and reduce permitting fees, making it faster and more affordable to bring these homes to Californians. By removing these barriers, the bill will help more people to achieve the dream of homeownership."

2) *The FBH Approval Process.* Under the FBH Law, factory-built units and building components are regulated by HCD, which promulgates health and safety regulations to benefit users and purchasers of FBH.

There are three primary components of the current FBH Approval Process:

1. Design Approval	A third-party QAA, approved by HCD, reviews design plans submitted by an FBH manufacturer to ensure compliance with state building codes. Approved designs must also provide a document describing in detail all of the installation and assembly methods required onsite to clarify the onsite inspection responsibilities of the local building departments.
2. In-Plant Inspection	An in-plant inspection is conducted by a third-party QAA within the factory ("in the plant") manufacturing the units and components to ensure all output is manufactured in accordance with the approved design plans and relevant building codes, prior to transportation to the housing site.
3. Site Inspection	Under current law, when an FBH unit or building components are delivered to a housing site, an LEA is responsible for ensuring the installation meets building standards, and that no previously approved components were changed since the QAA's inspection. An LEA may also enforce local reach codes that apply to the site, as well as other local requirements like setbacks.

3) *Who is best equipped to handle this?* LEAs (*i.e.,* local building departments) are currently the sole entity responsible for inspecting on-site FBH installations. Similar to site-built homes, these agencies are responsible for ensuring a housing unit and its components adhere to state and local building standards. However, Terner Center research found that some building departments are conducting duplicative reviews of FBH building elements.[2] Unlike site-built housing, the FBH program ensures that FBH building elements have already

[2] Hawke, Stephanie, et. al. *Potential Pathways to Scale Innovative Construction Methods in California.* Accessible here: **https://ternercenter.berkeley.edu/wp-content/uploads/2026/03/PathwaystoScaleInnovativeConstruction2026.pdf**. March 2026.

gone through multiple stages of review and approval prior to installation at the building site. As such, unnecessary reviews can lead to frustrating outcomes for all parties involved, causing unnecessary work for inspectors and increasing time and costs expended by the first user of the FBH. These duplicative reviews, as well as reports of LEA inspectors tearing apart and damaging building components that are already cleared, have culminated in a desire to allow QAAs more experienced in the field to conduct these inspections instead. While this bill would still allow first users to select an LEA as their on-site inspector, it would give them *the option* to instead select a QAA.

4) *Prohibition of fees.* This bill prohibits LEAs from charging more than 50% of the cost of a site-built inspection for an FBH site inspection. This change recognizes that many site-built units have more components, which take more time and resources to inspect; FBH units and components, on the other hand, are often less complex are structurally different, and have already gone through pre-approval processes. Capping inspection fees will ensure cost efficiencies of FBH are not lost due to an LEA equating FBH inspections with those of site-built units. This bill would also prohibit an LEA from charging an inspection fee if a QAA assumes the responsibility for inspection at the request of the first user, instead of an LEA. Lastly, this bill would prohibit an LEA from establishing any permitting fee related to FBH that exceeds 50% of the equivalent permitting fee for non-FBH. This change recognizes that FBH units and components that benefit from standardized designs and strict adherence to state building standards are not treated like traditional site-built units with design and construction variants that may complicate permitting. As amended, this bill allows LEAs to impose higher inspection and permitting fees by ordinance if they make certain findings with specified evidence.

5) *Double-referral.* This bill was also heard in the Senate Local Government Committee on June 23rd, 2026, where it received a vote of 7-0.

Related/Prior Legislation

AB 557 (McKinnor, 2025) – required FBH plans be assigned a serial number, and be automatically approved for subsequent use in different projects if approved for use in one prior. Required HCD and QAAs to limit their reviews to the portions of a plan or specification that have not already received approval, as specified. *This bill was held at the request of the author.*

SUBJECT: California Environmental Quality Act: transportation impacts: vehicle miles traveled: mitigation

SOURCE: Author

DIGEST: This bill specifies that for purposes of the California Environmental Quality Act (CEQA), a transportation project is presumed to have a less than significant transportation impacts as determined by the Vehicle Miles Traveled (VMT) metric if the project meets certain criteria: this provision will sunset once the California Department of Transportation (Caltrans) publishes guidance on VMT mitigation for transportation projects meeting that same criteria.

ANALYSIS:

Existing law:

1) Requires lead agencies with the principal responsibility for carrying out or approving a proposed discretionary project to prepare a negative declaration (ND), mitigated negative declaration (MND), or environmental impact report (EIR) for this action, unless the project is exempt from the California

Environmental Quality Act (CEQA). (Public Resources Code § (PRC) 21000 et seq.)

2) Requires the Office of Planning and Research (OPR, now known as LCI) to prepare and develop proposed guidelines for the implementation of CEQA by public agencies. Requires the guidelines to include objectives and criteria for the orderly evaluation of projects and the preparation of EIRs and NDs. Also requires the guidelines to include criteria for public agencies to follow in determining whether a proposed project may have a significant effect on the environment. (PRC § 21083)

3) Requires LCI to prepare proposed revisions to the CEQA Guidelines establishing criteria for determining the significance of transportation impacts within transit priority areas (TPAs). Requires the criteria to promote the reduction of greenhouse gas (GHG) emissions, the development of multimodal transportation networks, and a diversity of land uses. (PRC § 21099)

4) Authorizes LCI to adopt CEQA Guidelines alternative methods of analyzing transportation impacts under CEQA including Vehicle Mile Traveled (VMT). Pursuant to this authority, LCI revised the CEQA Guidelines to identify VMT as the most appropriate metric to evaluate a project's transportation impacts and to apply VMT statewide. (PRC § 21099)

5) Establishes an in-lieu fee mechanism for VMT mitigation – permitting a project, which is under the jurisdiction of a regional transportation planning agency (RTPA) and has a VMT mitigation requirement pursuant to CEQA, to satisfy its VMT mitigation requirement by contributing an unspecified amount per VMT to the transit-oriented development (TOD) fund to provide financing for transit-oriented rental housing developments. (PRC §21080.43 and 21080.44)

This bill:

1) Requires Caltrans to develop guidance for non-metropolitan areas on VMT mitigation for transportation projects that do not add lanes to the state highway system, unless there is a demonstrated safety or evacuation need for the project. Specifically, this bill requires Caltrans in their guidance to:
   a) Provide case studies of the costs associated with VMT mitigation for these projects and provide examples of mitigation measures for these types of projects.

   b) Identify barriers to implementing VMT mitigation for these projects
   c) Develop recommendations for processes for lead agencies and developers to identify and implement appropriate VMT mitigation for these types of projects.
   d) Develop recommendations for appropriate VMT significance thresholds for these transportation projects.

2) Specifies that, until December 31, 2031, a transportation project for which a lead agency has issued a notice of preparation, as defined, is presumed to have a less than significant transportation impact as determined by the VMT metric if the project meets the following:
   a) At least 70% of the project lies within one or more nonmetropolitan counties; and
   b) The project does not add lanes to the state highway system unless there is a demonstrated safety or evacuation need for the project.

3) Adds the following definitions:
   a) "Demonstrated evacuation need" means a project that is specifically identified as necessary to provide evacuation capacity for the affected area in an adopted local hazard mitigation plan, general plan safety element, local emergency operations plan, or other local or regional emergency evacuation plan approved by a city, county, or regional planning agency through a public process;
   b) "Demonstrated safety need" means a project for which the lead agency demonstrates, through documented collision, injury, or fatality data specific to the project location, or through a risk-based or systemic safety analysis consistent with state and federal guidance, that the proposed project includes safety countermeasures that are necessary to reduce the number and severity of injuries or the number of fatalities, including reducing specific risks to vulnerable road users;
   c) "Nonmetropolitan county" means a nonmetropolitan county designated by the Methodology for Determining Rural Status of Project Site for 2025 Applications issued by the California Tax Credit Allocation Committee on January 1, 2025 (including 22 rural counties); and
   d) "Transportation project" means a project undertaken by a public agency that consists of the planning, design, construction, reconstruction, rehabilitation, improvement, expansion, or operation of a highway, road, bridge, transit facility, rail facility, bicycle or pedestrian facility, or other public transportation infrastructure.

Background

CEQA 101. Under CEQA, projects (unless they have a specific exemption) must undergo environmental analysis. This process starts with an initial study which determines what level of further environmental review is needed for a given project. If a project has no significant effects on the environment, or if those effects can be fully mitigated, the project can move forward with a negative declaration (ND) or mitigated negative declaration (MND). If the initial study finds that the project has potential significant effects on the environment, then a full EIR is conducted. An EIR provides thorough environmental review of a proposed project. The EIR also includes proposed mitigation measures for any significant effects that it identifies and considers alternatives to the proposed project.

What are significant transportation impacts in CEQA. Transportation impacts are one of the key environmental impacts that must be considered under CEQA. In July 2020, the CEQA guidelines directed agencies to use VMT to analyze the transportation impacts of a project under CEQA, replacing an older metric for transportation impacts, Level of Service (LOS). While LOS measures the presence of traffic and how quickly cars can move through a street, VMTs are a metric that simultaneously considers greenhouse gas (GHG) emissions, the development of multimodal transportation networks, and diversity of land uses. VMT measures the amount of travel for all vehicles in a geographic region over a given period (typically one year), and can be calculated for a region or on a per-capita basis.

To help lead agencies use VMTs as a tool to assess whether a project has significant transportation impacts under CEQA, LCI, released a "Technical Advisory on Evaluating Transportation Impacts in CEQA" (Technical Advisory) that includes a recommended threshold VMT level over which additional VMTs would be considered a significant transportation impact. The threshold for "significant transportation impacts" recommended by LCI for residential projects is a VMT level that is least 15% lower than existing VMTs per capita in the project area. In other words, if a project has an associated VMT rate that is only 14% lower than the VMT per capita in the project area, that project would be considered to have significant transportation impacts. For retail projects, any net increase in total VMT is considered a significant transportation impact. The pre-existing VMT per capita in an area used to measure the relative VMT impacts of the project may be measured as regional VMT per capita or as city VMT per capita. Having the option to compare a project's VMTs to regional or city VMT per capita gives

projects some flexibility in achieving the 15% threshold and some variability across projects and regions.

These thresholds for VMT significance are recommendations, not requirements. Local entities can develop their own thresholds or VMT criteria. In fact, OPR writes in the Technical Advisory that "in rural areas… fewer options may be available for reducing VMT, and significance thresholds may be best determined on a case-by-case basis."

How to mitigate VMTs? If a project has VMT levels above the significance threshold, as determined by the lead agency under CEQA, then those impacts could be mitigated through CEQA. In its 'Technical Advisory', LCI provides a long list of actions a local government could take to reduce a project's VMT. These mitigation measures include, among others:

a) Orient the project toward transit, bicycle and pedestrian facilities;
b) Improve pedestrian or bicycle networks, or transit service;
c) Project design (street grid instead of cul-de-sacs);
d) Incorporate affordable housing into the project;
e) Incorporate a neighborhood electric vehicle network;
f) Provide traffic calming;
g) Provide bicycle parking;
h) Limit or eliminate the supply of parking;
i) Implement or provide access to a commute reduction program;
j) Provide car-sharing, bike-sharing, and ride-sharing programs;
k) Provide transit passes;
l) Shift single occupancy vehicle trips to carpooling or vanpooling; or
m) Provide telework options for office projects.

VMT mitigation bank. In 2025, the legislature passed AB 130 (Committee on budget, Chapter 22, Statutes of 2025) which established a VMT mitigation bank. The money that is put into the VMT bank through in in-lieu fees will be invested in affordable housing and related infrastructure projects in the following order of priority locations: (1) location-efficient areas within the same region as the impacting project; (2) other areas within the same region as the impacting project; (3) location-efficient areas within an adjacent region.

AB 130 tasked LCI with developing guidelines to implement the VMT mitigation bank, including defining an appropriate rate for the VMT in lieu fee and identifying a "location-efficient areas" where low-VMT housing funded through

the VMT bank can be located, and proximity radius, which will determine how far apart projects funded through the VMT mitigation bank can be from projects that generated the funding through the VMT in lieu fee.

Money paid into the fund will be kept in separate accounts for each region, with prioritization given to projects in the same region as the project that generated the VMT in-lieu mitigation fee. “Regions” are defined as the territory of metropolitan planning organization (MPOs) within which a project is located, or the territory of the RTPA within which a project is located if the project is located outside of the boundaries of an MPO. LCI guidelines further separate Southern California Association of Governments (SCAG) region into sub-regions given that SCAG is significantly larger than the other MPOs.

LCI has published a draft AB 130 statewide VMT mitigation program guidance document which accepted public comment through May 8th, 2026.

Ongoing investigations at Caltrans re: VMT in rural areas. In May 2025, the SB 743 Implementation Working Group Rural VMT Action Subcommittee was formed to develop a response to CAPTI 2.0 Key Action S2.2. This identifies key actions to: Improve VMT analysis and mitigation guidance for rural projects to better account for the low VMT impact of many rural projects in consultation with rural stakeholders. The working group will improve guidance on VMT analysis and mitigation options for projects on the State Highway System (SHS) within rural areas in California. This stakeholder working group is a subcommittee to the ongoing Caltrans-LCI SB 743 Implementation Working Group**.**

On June 30, 2026, a study by UC Berkeley that had been commissioned by Caltrans was published titled: “Investigating the Ability to Assess VMT Impacts of Rural Capacity-Enhancing Projects” It was commissioned by Caltrans as required by CAPTI 2.0 action item, and concludes:

> While California is making progress meeting the goals of VMT reduction from CAPTI investments, much of the significant reductions are tied to mitigation or avoidance of projects in urbanized areas. A one-size-fits all strategy may not be suitable for rural projects. The existing research on induced travel demand and VMT reduction is primarily from studies conducted in urban and metropolitan areas where highway capacity has been added with the goal to relieve congestion. Implementation of these strategies in rural areas require more nuanced guidance given the limited research.

Comments

Purpose of Bill. According to the author, "California's transition to a Vehicle Miles Traveled (VMT) framework under CEQA, implemented pursuant to SB 743 (Steinberg, 2013), was intended to better align transportation and land use decisions with the state's climate goals. While that objective remains important, the current, project-level application of VMT mitigation has created unintended consequences that are undermining the delivery of critical transportation infrastructure, particularly in rural communities.

"AB 2059 strikes a balanced path forward by maintaining California's commitment to reducing greenhouse gas emissions while ensuring that the state's smallest counties can deliver safe, reliable, and resilient transportation infrastructure. For these reasons, AB 2059 is a necessary and timely reform."

Is AB 2059 jumping the gun on AB 130? Last year, the Legislature passed AB 130, which established a VMT mitigation bank wherein developers could pay in lieu fees into the VMT bank instead of mitigating VMTs directly. That fund is then intended to subsidize location-efficient housing (e.g. housing in infill areas that have low VMTs). LCI has released draft regulations to implement the VMT bank, but the program has not yet been finalized.

One of the benefits of a VMT bank is to provide developers with another option to mitigate VMTs, particularly when direct VMT mitigation can be very expensive for some projects. By allowing transportation projects in rural areas to presume that their transportation impacts are not significant until 2032, AB 2059 would take projects out of the soon-to-be finalized VMT mitigation bank before it is possible to determine if the VMT mitigation bank is a viable option to reduce costs for such projects.

Related/Prior Legislation
AB 130 (Committee on budget, Chapter 22, Statutes of 2025) establishes, among numerous other provisions, an in-lieu fee mechanism for VMT mitigation – permitting a project, which is under the jurisdiction of a regional transportation planning agency (RTPA) and has a VMT mitigation requirement pursuant to CEQA, to satisfy its VMT mitigation requirement by contributing an unspecified amount per VMT to the transit-oriented development (TOD) fund to provide financing for transit-oriented rental housing developments. (PRC 21080.43 and 21080.44)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- One-time costs, possibly in the high tens of thousands or low hundreds of thousands of dollars (General Fund), for the Department of Transportation (Caltrans) and the Office of Land Use and Climate Innovation (LCI) to develop, publish, and integrate CEQA guidance, as well as to update guidelines and procedures.

SUBJECT: California FAIR Plan Association: data

SOURCE: Author

DIGEST: This bill 1) requires the California Fair Access to Insurance Requirements Plan (FAIR Plan) to post quarterly on its website, the number of policies it issued in each ZIP Code and its risk exposure; and 2) removes the requirement that the FAIR Plan publish its telephone number in all general distribution telephone directories in the state.

Senate Floor Amendments of 8/17/26 address chaptering issues.

ANALYSIS:

Existing law:

1) Establishes the FAIR Plan to assure the stability of the property insurance market, to assure the availability of basic property insurance, as defined, to encourage maximum use of the normal insurance market in obtaining basic property insurance provided by admitted insurers and licensed surplus line brokers.

2) Specifies that rates for the FAIR Plan shall not be excessive, inadequate, or unfairly discriminatory, shall be actuarially sound so that premiums are adequate to cover expected losses, expenses and taxes, and shall reflect investment income of the plan.

This bill:

1) Requires the FAIR Plan to post quarterly on its website, the number of policies it issued in each ZIP Code and its risk exposure.

2) Removes the requirement that the FAIR Plan publish its telephone number in all general distribution telephone directories in the state.

3) Includes provisions of AB 69 (Calderon, 2025) to address chaptering issues with that bill.

Related/Prior Legislation

AB 69 (Calderon, 2025). Enacts various provisions to assist FAIR Plan policyholders in securing coverage outside of the FAIR Plan. These provisions include providing policyholder information to interested insurers and agents or brokers of record simultaneously, while also making policyholders aware of additional coverage options. Pending on the Senate Floor.

AB 1680 (Calderon, 2026). Creates greater ability for the California Department of Insurance to ensure accountability and coverage options in the FAIR Plan. Pending on the Senate Floor.

AB 234 (Calderon, Chapter 474, Statutes of 2025). Required the Speaker of the Assembly and the Chairperson of the Senate Committee on Rules to serve as nonvoting, ex officio members of the governing committee, and authorized each to name a designee to serve in their place.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/3/26)

Little Hoover Commission

OPPOSITION: (Verified 8/3/26)

None received

ARGUMENTS IN SUPPORT: According to the Little Hoover Commission:

"In its 2024 report, *Building a Stronger Home Insurance Market for California*, the Commission found it difficult to answer basic questions about the state's home insurance market using information currently available from the Department of Insurance. As a result, the Commission recommended that the Department modernize its website with timely and accessible information. Part of this recommendation included adding online data about the number of homeowners policies of the FAIR Plan, total written exposure, and the number of non-renewals and cancellations of the FAIR Plan, amongst many other data points.

AB 2061 would be a step toward making information about homeowners insurance more accessible and informative, which is critical as more Californians rely on the FAIR Plan as a market of last resort. For this reason, the Little Hoover Commission supports this bill."

SUBJECT: Regional transit hub districts: downtown housing developments

SOURCE: California Yimby
State Building & Construction Trades Council of California

DIGEST: This bill requires major transit cities to designate high-density downtown transit hub districts where qualifying housing developments are allowed by right, subject to specified labor and affordability standards, and requires the California Housing Finance Agency (CalHFA) to conduct a housing construction loan and financing study by March 1, 2028, as specified.

Senate Floor amendments of 8/21/26 make several changes to the establishment of the downtown transit hub districts, require HCD to notify a local government if they are in violation of this bill, permit HCD to notify the attorney general if a local government is in violation of this bill, and require the study to be completed by March 1, 2028.

ANALYSIS:

Existing law, pursuant to SB 79 (Wiener, Chapter 512, Statutes of 2025):

1) Establishes the following definitions:

   a) "Adjacent" means within 200 feet of any pedestrian access point to a transit oriented development (TOD) stop. A parcel that meets any of the eligibility criteria under this bill and is adjacent to a Tier 1 TOD Stop or Tier 2 TOD Stop, as defined below, shall be eligible for an adjacency intensifier to increase the height limit by an additional 20 feet, the maximum density standard by an additional 40 dwelling units per acre, and the floor area ratio (FAR) by 1 prior to the application of Density Bonus Law.

   b) "Residential FAR" means the ratio of net habitable square footage dedicated to residential use to the area of the lot. A local government may not impose any other local development standard or combination of standards that would physically preclude the residential FAR established.

   c) "Tier 1 TOD stop" means a transit-oriented development stop with an urban transit county, served by heavy rail transit or very high frequency commuter rail.

   d) "Tier 2 TOD stop" excludes a Tier 1 TOD stop, and means a transit-oriented development stop with an urban transit county served by light rail transit, by high-frequency commuter rail, or by bus service, as specified. "Urban transit county" means a county with more than 15 passenger rail stations.

   e) "TOD stop" means a major transit stop or a stop on a route for which a preferred alternative has been selected or which are identified in a regional transportation improvement program, served by heavy rail transit, very high frequency commuter rail, high frequency commuter rail, light rail transit, or specified bus service within an urban county. When a new transit route is planned that was not identified in the applicable regional transportation plan on or before January 1, 2026, these stops shall not be eligible as a TOD stop unless they would be eligible as Tier 1 TOD stops. If a county becomes an urban transit county subsequent to July 1, 2026, then bus service in that county shall remain ineligible for designation of a transit-oriented development stop.

   f) "Urban transit county" means a county with more than 15 passenger rail stations.

2) Provides that a housing development within a specified distance of a transit stop in a residential, mixed-use, or commercial zone shall be entitled to specified development standards pursuant to the table below. TOD housing development projects shall also meet the following requirements:

   a) The average total area of floor space for the proposed units in the transit-oriented housing development project shall not exceed 1,750 net habitable square feet, and

   b) The housing development project shall include at least five dwelling units and meet the greater of the following:

      i) A minimum density of at least 30 dwelling units per acre; or

      ii) The minimum density required under the local zoning, if applicable.

TOD Stop Type	**Dist. from Stop (TOD Zone)**	**Development Standards for Project**
Tier 1: Major transit stop, heavy rail transit, or very high frequency commuter rail in urban transit county	¼ mile from stop	• **Max Height**: 75 ft or 95 ft if adjacent to stop • **Max Density**: 30 - 120 units per acre (u/a) plus any density bonus or 160 u/a if adjacent to stop • **FAR**: 3.5 or 4.5 if adjacent to stop • **Specified Concessions**
	¼ - ½ mile from stop in city with population at least 35,000	• **Max Height**: 65 ft • **Max Density**: 30 - 100 u/a plus any density bonus • **FAR**: 3 • **Specified Concessions**
Tier 2: Not Tier 1 major transit stops served by light rail transit, high-frequency commuter rail, or bus rapid transit	¼ mile from stop	• **Max Height**: 65 ft or 85 ft if adjacent to stop • **Max Density**: 30 - 100 u/a plus any density bonus or 140 u/a if adjacent to stop • **FAR**: 3 or 4 if adjacent to stop
	¼ - ½ mile from stop in a city with a population	• **Max Height**: 55 ft • **Max Density**: 30 - 80 u/a plus any density bonus • **FAR**: 2.5 • **Specified Concessions**

in an urban transit county	at least 35,000	

3) Provides that for projects with more than 10 units, the project shall comply with one of the following requirements:

   a) Any of the following:

      i) At least 7% are dedicated to extremely low-income (ELI) households.

      ii) At least 10% of the total units are dedicated to very low-income (VLI) households.

      iii) At least 13% of the total units are dedicated to low-income households.

   b) If a local inclusionary housing requirement mandates a higher percentage or deeper level of affordability, then the local inclusionary housing standard shall apply.

   c) All units dedicated to ELI, VLI, or low-income households shall have an affordable cost or rent, as defined, and ensure the continued affordability of those units for 45 years for ownership or 55 years for rental units.

4) Prohibits a transit housing development from being located on either of the following:

   a) A site containing more than two units where the development would require the demolition of housing that is subject to any form of rent or price control through a public entity's valid exercise of its police power that has been occupied by tenants within the last seven years.

   b) A site that was previously used for more than two units of housing that was demolished within seven years before the development proponent submits an application under this section any of the units were subject to any form of rent or price control.

5) Requires a TOD project to meet specified labor standards, including the provision of prevailing wages if the project is not entirely a public work, as specified, and projects over 85 feet shall employ a skilled and trained workforce, as specified.

6) Requires Metropolitan Planning Organizations (MPOs) to create a map of TOD stops and zones established by SB 79 (Wiener, Chapter 512, Statutes of 2025)(SB 79).

7) Delays implementation of SB 79 development standards until July 1, 2026, unless a local government adopts an ordinance or local TOD alternative plan deemed compliant by the Department of Housing and Community Development (HCD) before July 1, 2026. Delays implementation to unincorporated areas of a county until the 7th regional housing needs allocation cycle.

Existing state law:

1) Authorizes California Housing Finance Agency (CalHFA) to make loans to housing sponsors for housing developments and to qualified mortgage lenders, among others. Provides that the primary purpose of CalHFA is to meet the housing needs of persons and families of low- or moderate-income.

This bill:

1) Defines for purposes of this bill:

   a) "Downtown housing development" means a housing development project within a regional transit hub district that meets the following conditions:

      i) Labor Standards pursuant to SB 423 (Wiener, Chapter 778, Statutes of 2023) (SB 423).

      ii) Requires a minimum density of 60 dwelling units per acre and an average total area of floor space for the proposed units in the project does not exceed 1,750 net habitable square feet.

      iii) Meets the affordability requirements established in SB 79 for projects containing more than 10 units or the local inclusionary housing requirement, whichever has a higher percentage of affordable units or deeper level of affordability (see (3) in Existing Law).

      iv) Requires the development proposed pursuant to the bill to comply with the anti-demolition standards established in SB 79 (see (4) in Existing Law).

      v) Prohibits the demolition of any individually landmarked property on a local, state, or federal historic register.

vi) Requires consistency with the height, noise, and safety standards of an adopted airport land use compatibility plan or Department of Defense Air Installation Compatible Use Zone, as specified.

b) "Housing development project" means the same as a housing development project is defined in the Housing Accountability Act (HAA), generally a multiunit project that is at least two-thirds residential.

c) "Major transit city" means a city with a population of at least 400,000 in the most recent decennial census that contains at least two transit-oriented development stops.

d) "Regional transit hub district" (district) means a district surrounding a transit stop designated by a city.

e) "Transit-oriented development stop" (TOD stop) has the same meaning as defined in SB 79.

2) Requires each major transit city to comply with the applicable of the following:

a) A major transit city with a population of at least 400,000 and less than 1 million in the most recent decennial census shall designate at least one district with a total area of at least 0.5 square miles.

b) A major transit city with a population of at least 1 million and less than 2 million in the most recent decennial census shall designate at least one district with a total area of at least 1 square mile.

c) A major transit city with a population of at least 2 million in the most recent decennial census shall designate at least one district with a total area of at least 1.5 square miles.

3) Provides that if a major transit city does not comply with (2), then the equivalent area in a uniform radius around the city's highest ridership TOD stop shall be deemed a regional transit hub district.

4) Authorizes a major transit city to designate multiple hug districts so long as they cumulatively meet the requirements of (2).

5) Provides that a city that is not a major transit city may designate a district.

6) Provides that designation of a district pursuant to this bill shall not be considered a "project" for the purposes of the California Environmental Quality Act (CEQA).

7) Requires districts to be a contiguous area of land at least .25 square miles containing at least one TOD stop.

8) Requires that a downtown housing development be an allowable use in a district. Provides that a downtown housing development in a district is subject to all of the following:

   a) Prohibits a city from setting a maximum height limit lower than 150 feet.

   b) Requires at least 25% of the total area of all districts within a city to allow a maximum height of 450 feet.

   c) Prohibits a city from setting a maximum floor area ratio lower than six.

   d) Requires at least 25% of the total area of all districts within a city to allow a maximum floor area ratio of at least 12.

   e) Prohibits a city from setting a maximum density of less than 200 dwelling units per acre.

   f) Prohibits at least 25% of the total area of all districts in a city from having a maximum density limit.

9) Allows a city to set other objective zoning standards, objective subdivision standards, and object design review standards related to a downtown housing development within a district that are consistent the requirements specified in of 6).

10) Applies the following to a downtown housing development:

   a) Ability to quality for a density bonus, incentives or concessions, waivers or reductions of development standards, or parking ratios pursuant to DBL or a local density bonus, using the requirements of the bill as the base density.

   b) Provides eligibility for streamlined ministerial approval pursuant to SB 423 without meeting the standards for a project under SB 423, except that the downtown housing development project is still restricted from using the ministerial process in SB 423 if the project is on an environmentally sensitive site.

   c) Requires the local government to, as a condition of approval, require the development proponent to complete a phase I environmental assessment, as specified.

11) Requires the California Housing Finance Agency, but March 1, 2028, to conduct and submit to the relevant policy committees, a housing construction loan and financing study, including feedback from interested stakeholders, that includes, but is not limited to, all of the following:

    a) An analysis of existing construction loan programs and housing construction loan programs implemented in California and an assessment and case study analysis of current gaps in housing construction loan availability for a state housing construction loan program, including, but not limited to gaps that impeded the production of the types of housing sought to be developed.

    b) Recommendations for how a state construction loan program could function and facilitate multifamily rental and for-sale housing developments, as specified.

    c) An analysis of state resources needed to establish construction loans serving different housing projects described in subparagraph (C).

    d) Recommendations to mitigate increased lending risk and maximize leverage of state funds.

Background

SB 79 Development Standards. Beginning July 1, 2026, SB 79 makes housing an allowable use on sites zoned residential, mixed-use, or commercial within one-half mile of an existing or currently proposed qualifying TOD stop in an "urban transit county" for jurisdictions with a population of at least 35,000 residents, and within one-quarter mile of the qualifying TOD stop for jurisdictions with a population of less than 35,000. For unincorporated areas of a county, implementation is delayed until the 7th housing element cycle begins. SB 79 projects must include at least five units, achieve the greater of 30 dwelling units per acre (du/acre) or meet the local minimum density requirements, and maintain an average unit size not exceeding 1,750 square feet. SB 79 projects over 10 units must include specified levels of affordable housing, comply with anti-displacement provisions of the Housing Crisis Act, and comply with specified labor standards.

Comments

1) *Author's statement.* "California's downtowns are at a crossroads. In the wake of the pandemic, many of our city centers are struggling with high vacancy rates, declining foot traffic, and reduced economic activity. At the same time,

we continue to face a severe housing shortage, especially in the very places where housing makes the most sense: near jobs, transit, and existing infrastructure. AB 2074 responds to both of these challenges by creating a clear, statewide framework to support high-density housing in our downtown cores while ensuring that the jobs created are high-quality, family-supporting jobs. This bill establishes regional transit hub districts in major cities and sets baseline zoning standards that allow for meaningful mixed-use and residential high-rise development, while providing a streamlined approval pathway for projects that meet affordability and strong labor standards. It also creates a revolving loan fund through CalHFA to help address one of the most significant barriers to building housing today: access to early-stage financing. By pairing housing production with robust labor protections and financial tools, AB 2074 is designed to unlock housing, support good-paying jobs, and bring new life to our downtowns."

2) *High-rise housing projects near transit.* This bill uses the existing legislative framework established by SB 79 (Wiener) by establishing TOD zoning standards that are typically higher than what a local agency has zoned the area for in its general plan near TOD stops. Specifically, this bill requires the following cities, based on population, to establish the following sized districts with at least one TOD stop:

   a) Los Angeles (population over 2 million) - at least 1.5 square miles;

   b) San Diego and San Jose (population between 1 million and 2 million) - at least 1 square mile; and,

   c) San Francisco, Sacramento, Long Beach, and Oakland (population between 400,000 and 1 million) - at least 0.5 square miles in districts.

   Within the districts, housing shall be an allowable use, and the following development standards would apply to downtown housing developments:

   a) A city cannot impose a maximum height lower than 150 feet. At least 25% of the district or districts shall allow up to 450 feet;

   b) A city cannot set a maximum FAR lower than 6. At least 25% of the district or districts shall allow a maximum FAR of at least 12.

   c) A city cannot set a maximum density of less than 200 units per acre (u/a). At least 25% of the total area of district or districts shall have no maximum density requirements. The housing project shall be at least 60 u/a.

Additionally, these high-rise housing projects are eligible for streamlined ministerial approval and to utilize the benefits of DBL. Housing projects shall meet the same affordability, labor standards, and anti-demolition and anti-displacement provisions as SB 79 (Wiener). The intent is for each major transit city to designate at least district subject to the requirements above; they may establish more than one, so long as cumulatively the districts meet the overall size requirements. This bill also authorizes non-major transit cities to designate districts.

3) *Report on new innovative housing construction methods*. Given the interest in identifying new and creative ways to finance housing projects, this bill requires CalHFA to issue a report that would evaluate and analyze: construction loan programs implemented elsewhere and how those models could be replicated in California; how a program could serve a range of income levels, project sizes (including smaller multifamily developments as well as high-rise buildings), and in various regions in the state, (including but not limited to the downtown areas contemplated by this bill); and recommendations to mitigate increased lending risk and maximize leverage of state funds. The report must be informed by feedback from interested stakeholders and include considerations for the Legislature to consider for adopting a state construction loan program and submit those recommendations to the Legislature by March 1, 2028.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CalHFA estimates one-time costs of up to $250,000 to conduct the required study, including contracted data analysis and staff time for coordination with stakeholders, data collection, and preparation of the final report. (General Fund)

- The Department of Housing and Community Development (HCD) estimates ongoing costs of approximately $236,000 annually for 1.0 PY of staff to update guidelines related to streamlined and ministerial provisions, and respond to an expected significant increase in technical assistance inquiries from housing advocates, local agencies and developers related to compliance with the bill, designation of districts, and processing of applications. (General Fund)

- The Department of Industrial Relations (DIR) estimates Labor Commissioner's Office costs of approximately $1.1 million in the first year and $1 million annually ongoing for oversight and enforcement activities related to prevailing wage and apprenticeship standards on projects constructed pursuant to the provisions of this bill. There would also be penalty revenue gains, potentially

in the hundreds of thousands of dollars annually, to partially offset these costs. Actual costs and penalty revenues would depend upon the number of qualifying projects constructed under this bill and the number of complaints and referrals to the Division of Labor Standards and Enforcement that require enforcement actions, investigations, and appeals. (State Public Works Enforcement Fund)

- Unknown local mandated costs. The bill would impose new costs on seven major transit cities to establish regional transit hub districts and to revise planning requirements and considerations for specified housing development projects within those districts. These costs are not state-reimbursable because local agencies have general authority to charge and adjust planning and permitting fees to cover their administrative expenses associated with new planning mandates. (local funds)

SUBJECT: Investment of funds: delegation to county treasurer

SOURCE: California Association of County Treasurers and Tax Collectors

DIGEST: This bill allows a county board of supervisors to delegate investment authority to the county treasurer indefinitely, or until the board revokes the authority, if the county's investment policy meets specified reporting requirements.

Senate Floor Amendments of 8/21/26 address chaptering conflicts with SB 1438 (Committee on Local Government).

ANALYSIS:

Existing law:

1) Provides that, except as otherwise provided, the county officers to be elected by the people are the treasurer, county clerk, auditor, sheriff, tax collector, district attorney, recorder, assessor, public administrator, and coroner.

2) Requires the county treasurer to receive and keep safely all money belonging to the county.

3) Authorizes the board of supervisors to, by ordinance, delegate to the county treasurer the authority to invest or reinvest the funds of the county and the funds of other depositors in the county treasury. The county treasurer shall thereafter assume full responsibility for those transactions until the board of supervisors

either revokes its delegation of authority, by ordinance, or decides not to renew the annual delegation.

4) Specifies that with regard to county funds deposited in the county treasury, the board of supervisors is the agent of the county who serves as a fiduciary and is subject to the prudent investor standard, unless a delegation has occurred, in which case the county treasurer shall be the agent of the county with respect to these funds, serve as a fiduciary, and be subject to the prudent investor standard and the board of supervisors shall not be the agent, serve as a fiduciary, or be subject to the prudent investor standard.

5) Provides that when investing, reinvesting, purchasing, acquiring, exchanging, selling, or managing public funds, the primary objective of the county treasurer or the board of supervisors, as the case may be, shall be to safeguard the principal of the funds under the treasurer's or the board's control. The secondary objective shall be to meet the liquidity needs of the depositor. The third objective shall be to achieve a return on the funds under his or her control.

6) The board of supervisors in each county or city and county may, if the county or city and county is investing surplus funds, establish a county treasury oversight committee, as specified.

7) Provides that the authority of the legislative body to invest or to reinvest funds of a local agency, or to sell or exchange securities so purchased, may be delegated for a one-year period by the legislative body to the treasurer of the local agency, who shall thereafter assume full responsibility for those transactions until the delegation of authority is revoked or expires, and shall make a monthly report of those transactions to the legislative body. Subject to review, the legislative body may renew the delegation of authority pursuant to this section each year.

This bill allows, in addition to annually delegating investment authority to the county treasurer, a county board of supervisors to delegate investment authority to the county treasurer indefinitely, or until the board revokes the authority, if the county's investment policy requires monthly transaction reports and quarterly investment policy reports to the board.

Background

Issues regarding whether county treasurers use their delegated investment authority wisely appear from time to time. For example, on December 6, 1994, Orange County became the largest municipality in U.S. history to declare bankruptcy at the

time. The county treasurer had lost $1.7 billion of taxpayers' money through investments in risky Wall Street securities. In 1994, the Orange County investment pool had about $7.6 billion in deposits from the county government and almost 200 local public agencies (cities, school districts, and special districts). Borrowing $2 for every $1 on deposit, the County Treasurer increased the size of the investment pool to $20.6 billion. While in bankruptcy, every county program budget was cut, about 3,000 public employees were discharged, and all services were reduced. Orange County did not make its final payment on the $1 billion bond that helped it get out of bankruptcy until 2017. Following Orange County's bankruptcy filing, the Legislature enacted a number of bills to increase protections and address these problems, including SB 109 (Kopp, Chapter 749, Statutes of 1996), which required the investment delegation to be made on an annual basis.

More recently, at the end of 2024, the Orange County Board of Supervisors elected not to extend their county treasurer's investment authority due to concerns over the county's oversight regarding investment practices, which had not happened in the county since 2010. In February 2025, the board of supervisors passed an ordinance to allow the county Chief Financial Officer, who is under the county's Chief Executive Officer, to exercise investment authority, not the county treasurer, which is an independent elective office.

Comments

Purpose of the bill. According to the author, "As a former local elected official, I'm happy to be authoring AB 2080, which will help to ensure that investment authority delegation is not interrupted by requirements that such authority is renewed on an annual basis. By changing this practice to instead requiring a proactive revocation of delegated authority, this bill will streamline county finances without sacrificing necessary oversight and reporting mechanisms."

Not so fast. Requiring the board of supervisors to annually authorize the county treasurer to invest county funds on their behalf ensures that the treasurer's investment practices align with county policies. While AB 2080 preserves the ability of a board of supervisors to revoke a treasurer's investment authority, or to not delegate investment authority at all, it removes the annual requirement for the board to delegate the authority. This means the board of supervisors would have to proactively identify investment concerns, rather than conduct an annual review before they renew the treasurer's authority. That said, conditioning investment authority on an annual board decision does come at a cost. If the county board does not make the delegation in a timely fashion, investment decisions could be missed or delayed, putting taxpayer dollars at risk. AB 2080 preserves existing

reporting requirements, which puts more pressure on the board of supervisors to actively monitor county treasurer investment decisions on an ongoing basis.

SUBJECT: Medi-Cal: Home and Community-Based Alternatives Waiver

SOURCE: Cardea Health

DIGEST: This bill requires the Department of Health Care Services (DHCS) to expand the number of Home and Community-Based Alternative waiver slots by 5,000, subject to federal approval, and authorizes DHCS to evaluate and designate additional populations receiving priority enrollment, subject to federal cost-neutrality requirements.

ANALYSIS:

Existing law:

1) Permits, under federal law, a state Medicaid program to pay for part or all of the cost of home and community-based services (HCBS) that are federally approved, and which are provided pursuant to a written plan of care to individuals with respect to whom there has been a determination that but for the provision of such services the individual would require the level of care provided in a hospital, nursing facility, or intermediate care facility for the

developmentally disabled, the cost of which could be otherwise be reimbursed by the state's Medicaid program. [42 USC §1396n]

2) Establishes the Medi-Cal program, administered by the DHCS, which provides medical coverage to low income persons. [Welfare and Institutions Code (WIC) §14000, et seq.]

3) Establishes a schedule of benefits under the Medi-Cal program, which includes benefits required under federal law and benefits provided at the state's option, both of which are funded with federal and state dollars. The schedule of benefits includes HCBS approved by the U.S. Department of Health and Human Services to the extent that federal financial participation is available for those services under the state plan or an applicable federal waiver. [WIC §14132]

4) Requires DHCS to seek all necessary waivers in order to provide for HCBS services approvable under federal law and limits coverage of HCBS services to the terms, conditions, and duration of the federal waiver. [WIC §14132 and §14137]

5) Establishes authority and requirements for the Nursing Facility/Acute Hospital Transition and Diversion waiver (the predecessor to the Home and Community-Based Alternative (HCBA) waiver) to provide care management and access to home- and community-based services, for persons requiring hospital, nursing facility, or other institutional care that would otherwise be covered by Medi-Cal who can be treated safely at home, or for individuals who have been continuously receiving in home care services under the Early and Periodic Screening, Diagnosis, and Treatment State Plan benefit, California Children Services or Pediatric Palliative Care programs for children, for at least the prior three months but have at the time of transition exceeded the age limit for that benefit. [WIC §14132.991]

6) Requires DHCS to propose that the waiver program meet federal annual cost neutrality requirements in the aggregate.

This bill:

1) Requires DHCS to increase the total number of HCBA waiver slots by 5,000, in addition to any planned expansion of waiver slots federally approved as of January 1, 2026, beginning in 2027.

2) Authorizes DHCS to evaluate the populations described in 5) above in order to maintain the aggregate the cost neutrality; and, based on this evaluation, designate additional populations within those described populations for whom enrollment in HCBA would be cost neutral.

3) Specifies that the requirement to increase HCBA waiver slots does not require DHCS to enroll individuals in all waiver slots if doing so would be inconsistent with achieving aggregate annual cost neutrality or the most recent evaluation conducted pursuant to 2) above.

4) Authorizes DHCS to seek any amendments to the HCBA waiver or other actions as necessary to implement this bill, including issuing guidance in lieu of regulations.

5) Updates the name of the Nursing Facility/Acute Hospital Transition and Diversion waiver to the currently used HCBA waiver.

Background

According to the author of this bill:

> Medi-Cal's HCBA program helps medically vulnerable Californians receive high quality care in their own homes and communities instead of being forced into institutional settings. It supports people with serious medical needs, including adults living with disabilities, medically fragile children, seniors with chronic needs, and others with complex health conditions, so they can remain with their families while receiving the care they need. The program improves quality of life and saves the state money, generating about $110 million in annual cost savings. Yet enrollment caps have limited its impact and left more than 5,600 vulnerable Californians stuck on a waiting list without access to these critical services. Expanding the HCBA waiver program will ensure Medi-Cal recipients, including people with significant health needs who are experiencing homelessness, can access the care they need, live with dignity, and remain in their communities. California should not be forcing medically vulnerable people into institutions when safe, cost-effective care at home is within reach.

Medi-Cal HCBS waivers. HCBS waivers allow states that participate in Medicaid to develop alternatives for individuals who would otherwise require care in an institutional setting. The Medi-Cal program has an agreement with the federal

government, which allows for waiver services to be offered in either a home or community setting. The services offered under the waiver must cost no more than the alternative institutional level of care. The services available under HCBS waivers include case management, community transition services, private duty nursing, family training, home health aides, life-sustaining utility reimbursement, habilitation services, respite care, and other services required to maintain the health and safety of eligible participants in the community setting of their choice.

HCBA waiver program. The HCBA waiver is one of several HCBS waiver programs in California. It provides care management services to persons of any age who are medically fragile or technologically dependent. The care management services are provided by a multidisciplinary Care Management Team comprised of a nurse and social worker. The Care Management Team coordinates waiver and state plan services (those services available to all Medi-Cal recipients, such as medical, behavioral health, In-Home Supportive Services, etc.), and arranges for other long-term services and supports available in the local community. Care management and waiver services are provided in the participant's community-based residence. This residence can be privately owned, secured through a tenant lease arrangement, or the residence of a participant's family member.

The HCBA waiver program is approved by the federal Centers for Medicare and Medicaid Services (CMS) in five-year increments, and was most recently approved on February 2, 2023 for the 2023-2027 period. There is an enrollment cap, and the program reached maximum capacity. A waiting list was implemented on July 12, 2023. New applicants can apply and secure a placement on a waiting list with the assigned Waiver Agency in their area of residence. When slots are available, applicants will be prioritized based on Reserve Capacity criteria that includes applicants transitioning from other HCBS programs because their needs can no longer be met, applicants under 21, or applicants who have been residing in a health care facility (such as a nursing home) for at least 60 days. Adult applicants currently receiving care at home with institutional-level needs are the lowest priority.

The HCBA waitlist is currently over 6,000 individuals. According to the DHCS May 2026 Medi-Cal Local Assistance Estimate (Medi-Cal estimate), based on historical enrollment and attrition trends, it was determined that the waiver would reach capacity before the end of 2023. DHCS submitted a waiver amendment to begin phasing in new slots on January 1, 2024; CMS approved the waiver amendment on December 11, 2023. According to the waiver amendment, the total number of slots for 2026 was increased from 12,782 to 15,313, while the total

number of slots for 2027 was increased from 13,932 to 17,321. However, the Medi-Cal estimate states that updated enrollment data is trending lower than estimated, and is thus estimating only approximately 10,500 members for fiscal year 2026-2027 (despite December 2025 enrollment of 10,760, according to the DHCS enrollment dashboard).

A January 2025 analysis, *California Home and Community Based Services Gap Analysis Report,* funded by DHCS, noted that the formal HCBS waiver waitlists were only one part of the problem. Lack of providers or staffing shortages at providers also limited participation in these programs. According to a May 4, 2026 fact sheet by Justice in Aging, administrative complexities, including staffing shortages at DHCS, have also caused delays in waiver enrollment. Individuals who are not prioritized, those currently at home or enrolled in another program, face even longer waits.

It should also be noted that the current waitlist consists primarily of individuals moving from the community, rather than those in the priority populations, which includes individuals transitioning from other waivers, children and young adults, and institutionalized individuals, due to how cost neutrality is calculated. In other words, fewer slots are available for individuals transitioning from the community.

Related/Prior Legislation

SB 111 (Laird, Chapter 21, Statutes of 2026), the Budget Act of 2026, includes $1.5 million to support staffing or contract authority to enable DHCS to clear the HCBA waiver waitlist and serve all eligible individuals seeking enrollment in the HCBA waiver program.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee: Unknown ongoing costs, potentially hundreds of thousands, for DHCS for state administration (General Fund and federal funds).

ARGUMENTS IN SUPPORT: Source, Cardea Health, a provider that serves individuals with complex medical and behavioral health needs, including those experiencing homelessness, writes that for many individuals, the HCBA waiver is the only pathway to remain safely in the community. They regularly identify individuals who meet HCBA eligibility criteria but cannot access services due to limited waiver capacity. These are individuals with documented medical necessity; who remain unsheltered, hospitalized, or at risk of institutionalization because there are not enough waiver slots available. Disability Rights California writes that when access to HCBA waiver services are delayed, families are forced into impossible decisions: going without adequate care or placing loved ones in institutions, often far from their support networks. In addition to the worse health outcomes, this also undermines the right to receive services in the least restrictive setting. The Children's Specialty Care Coalition writes that the inability to come home with proper nursing support increases the chance of children staying hospitalized longer or being sent to pediatric subacute facilities. When kids do go home without appropriate care, medically fragile kids are placed at substantial risk of adverse outcomes or even death and families are at risk of undergoing extreme stress in attempting to provide the care themselves.

SUBJECT: Office of Data and Innovation: Engaged California Program

SOURCE: Author

DIGEST: This bill establishes the Engaged California Program within the Office of Data and Innovation (ODI) inside the Government Operations Agency.

Senate Floor Amendments of 8/18/26 provide that the Engaged California Program can fulfill its conditional deliberation responsibilities if the office partners with a state entity or there is a proclaimed state of emergency, and make various technical changes.

ANALYSIS:

Existing law provides for open meetings and citizen participation from local school boards to the California State Legislature. The Bagley-Keene Open Meeting Act (Government [Gov.] Code §§ 11120-11132) requires meetings of state boards and commissions to be conducted openly. Additionally, the Ralph M. Brown Act (Gov. Code §§ 54950-54963) imposes similar requirements on local legislative bodies.

This bill:

1) Creates the Engaged California Act within the Office of Data and Innovation (ODI) within the Government Operations Agency. ODI is to operate as a standalone entity within the agency.

2) Establishes the mission of ODI as delivering better government services to the people of California through technology and service innovation, data, and design. The office shall fulfill this mission by:

   a) Collaborating with state entities to transform government services.

   b) Investing in state capabilities to put users first.

   c) Empowering agencies to use data ethically, efficiently, effectively, securely, responsibly, and in a manner that respects privacy.

   d) Improving how the state buys digital services and datasets.

   e) Expanding the use of common platforms, servicers, and tools.

3) Requires ODI to design, operate, and maintain the platform, establish standards, guidance, and best practices for use of the platform, consistent with state and federal law, ensuring the platform remains up to date for future deployment.

4) Conditions the program's deliberation responsibilities the selection of a topic and the following conditions:

   a) Upon appropriation by the Legislature.

   b) The office partners with a state entity with discretionary funding to fund an engagement.

   c) During a state of emergency proclaimed pursuant to the California Emergency Services Act.

5) Establishes a process for the deliberation and selection of discussion topics as specified.

6) Requires the office to solicit participation from diverse groups of participants, including all economic segments.

7) Expands ODI's existing annual report to the Joint Legislative Budget Committee to include detailed information on each Engaged California deliberation, including topic, problem definition, platform used, data sources, agencies impacted, participant demographics and identification methods,

outcomes and recommendations, and follow-up status of prior-year deliberations.

8) Provides that any unspent Fiscal Year (FY) 2026-27 program funds remain available for use during the FY 2027-28.

9) Adds personal information protections for data collected through the program, consistent with the Information Practices Act.

Background

Open and transparent communication with government is a central value of American democracy. However, as governments have grown larger and more complex, the ability of California citizens to access their government has grown equally more complex. This bill seeks to address a structural gap in how Californians participate in state policymaking and how state government gathers public input.

This bill creates the Engaged California Program within ODI to facilitate structured dialogue between Californians and their state government through deliberation and shared learning. It authorizes the Legislature to fund the program and participate in the selection of discussion topics. It sets additional reporting requirements, including topic, problem definition, data sources, agencies impacted, and participant demographics, as specified.

This bill is author-sponsored and supported by a coalition of tech associations, (Technet, TechCA) and citizen advocacy groups (Elevate California, Project Liberty, LLC). No opposition has been received. For a more thorough analysis of this bill, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis.

Comment

According to the author:

> AB 2103 modernizes how Californians engage with their government by codifying Engaged California within the Office of Data and Innovation as a permanent statewide public engagement program. While traditional tools like hearings and public comment remain important, they do not always capture the full diversity and tapestry of California's communities. This bill provides a durable framework for structured public deliberation so that Californians from different backgrounds and regions can participate more meaningfully in state

policymaking and help generate actionable recommendations that inform government policies. This measure ensures that the program can continue across administrations, preserving an innovative model for enhanced civic engagement.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No
According to the Senate Appropriations Committee:

Major administrative costs to ODI to continue statutory governance and operational requirements of the Engaged California Program (Data and Innovation Services Revolving Fund, General Fund).

Significant to major costs to state entities to participate in Engaged California Programs for outreach, community engagement, communications, data sharing and technical expertise depending on the topics selected. (Special funds, General Fund).

Technet

OPPOSITION: (Verified 8/14/26)

None received

ARGUMENTS IN SUPPORT: Elevate California writes:

AB 2103 represents an important step forward in modernizing how Californians engage with their government. By codifying Engaged California as a permanent statewide public engagement program within the Office of Data and Innovation, this bill ensures that more inclusive, representative, and deliberative processes become a sustained part of state governance.
Engaged California's model—bringing together diverse cohorts of residents, providing balanced educational materials, and facilitating structured dialogue—aligns closely with Elevate California's commitment to amplifying the voices of everyday Californians. AB 2103 provides the stability and flexibility needed to sustain and scale this effort across state government.

ASSEMBLY FLOOR: 72-1, 5/14/26 - See last page for vote

SUBJECT: Community colleges: current expense of education: exclusions

SOURCE: West Valley-Mission Community College District

DIGEST: This bill authorizes a community college district (CCD) to exclude, as part of its current expense of education, any local unrestricted expenditures from a CCD's unrestricted general fund maintaining student support functions previously funded through federal discretionary grants that were terminated due to federal action on or after September 10, 2025, for a period of five fiscal years following the 2025-26 fiscal year or until federal funding is fully restored.

Senate Floor Amendments of 8/13/26 remove and urgency clause, respond to questions about this bill raised by the California Federation of Teachers, and give the bill a lower vote threshold to pass the Senate floor.

Senate Floor Amendments of 8/4/26 require a CCD opting to exclude expenditures from its current expense of education pursuant to the provisions of this bill to (1) first present this action at a regular public meeting of the governing board of the CCD, (2) identify the action as a distinct agenda item, and (3) provide advance notice of the item to the campus community, including faculty, consistent with the CCD's established practices for noticing governing board meetings.

ANALYSIS:

Existing law:

1) Establishes the California Community Colleges (CCCs), a postsecondary education system in this state, under the administration of the Board of Governors (BOG), and specifies that the CCC system consists of CCDs. (Education Code (EC) § 70900)

2) Defines "current expense of education" as the gross total expended for the purposes classified in the final budget of a district for the following:

   a) Academic salaries other than academic salaries for student transportation, food services, and community services.

   b) Classified salaries other than classified salaries for student transportation, food services, and community services.

   c) Employee benefits other than employee benefits for student transportation personnel, food services personnel, and community services personnel.

   d) Books, supplies, and equipment replacement other than for student transportation and food services.

   e) Community services, contracted services, and other operating expenses other than for student transportation, food services, and community services. (EC § 84362)

3) States that "current expense of education" does not include:

   a) Expenditures classified as sites, buildings, books, media, and new equipment.

   b) The amount expended from categorical aid received from the federal or state government which funds were granted for expenditures in a program not incurring any instructor salary expenditures or requiring disbursement of the funds without regard to the requirements of this section.

   c) Expenditures for facility acquisition and construction.

d) The amount expended pursuant to any lease agreement for plant and equipment or the amount expended from funds received from the federal government pursuant to the "Economic Opportunity Act of 1964" or any extension of that act of Congress or the amount expended by a community college from state or federal funds received by the community college for grants to community college students or for the employment of community college students. (EC § 84362)

4) Requires that, during each fiscal year, a CCD expend 50% of the district's current expense of education for payment of salaries of classroom instructors. Also known colloquially as the Fifty Percent Law. (EC § 84362)

5) Requires the BOG, for CCDs that have not expended at least 50% of their current expense of education, to designate an amount of apportionment equal to the deficiency in CCD expenditures and make those funds unavailable for expenditure by the CCD pending the determination to be made by the BOG on any application for exemption which may be submitted to the BOG. (EC § 84362)

6) Requires, if no exemption is made or an exemption is denied, the BOG to order the designated amount or amount not exempted to be added to the amounts expended for salaries for classroom instructors during the next fiscal year. (EC § 84362)

7) Permits the governing board of a CCD to apply to the BOG, in writing, not later than September 15 of the immediately succeeding fiscal year for exemption from the requirements of the Fifty Percent Law, in the event it appears to the governing board of a CCD that the application of the Fifty Percent Law during a fiscal year results in serious hardship to the CCD, or in the payment of salaries of classroom instructors in excess of the salaries of classroom instructors paid by other districts of comparable type and functioning under comparable conditions. (EC § 84362)

8) Permits the BOG to grant an exemption for a CCD from the requirement for the fiscal year for which the application is made if a majority of all the members of the BOG finds, in writing, that the CCD will suffer serious hardship or will have to pay salaries of classroom instructors in excess of those paid by other CCDs of comparable type and functioning under comparable conditions, unless the CCD is granted an exemption. (EC § 84362)

9) Requires the BOG, no later than the 10th calendar day of each year of the Legislature, to submit to the Legislature a written report on the operation, effect, and the extent of compliance with this section by CCDs during the two most recently ended fiscal years. (EC § 84362)

This bill:

1) Authorizes a CCD, for a period of five fiscal years following the 2025-26 fiscal year or until federal funding is fully restored to every CCD, to exclude, as part of its current expense of education, any local unrestricted expenditures from a CCD's unrestricted general fund that maintain student support functions previously funded through federal discretionary grants that have been terminated, nonrenewed, or defunded due to federal action on or after September 10, 2025.

2) Requires CCDs that choose to exclude expenditures to annually certify eligibility to the California Community Colleges Chancellor's Office (CCCCO), consistent with existing law, and requires the CCCCO to maintain documentation and include certifications the CCCCO receives from CCDs in the annual report the CCCCO submits on the current expense of education.

3) Prohibits excluded expenditures from exceeding the amount of federal discretionary grant funding awarded for use by a CCD to maintain student support functions before the termination, nonrenewal, or defunding of federal discretionary grants due to federal action on or after September 10, 2025.

4) Prohibits excluded expenditures from being considered in determining compliance with a CCD's current expense of education requirement, and prohibits the use of excluded expenditures as grounds to reduce instructional expenditures.

5) Requires that a CCD continues to have the obligation to do all of the following:

    a) Maintain compliance with the requirement that not less than 50% of a CCD's current expense of education be expended for salaries of classroom instructors.

    b) Maintain compliance with the Faculty Obligation Number and related requirements established by the BOG.

c) Not reduce the number of full-time faculty positions or otherwise diminish the overall quality of instruction.

d) Avoid the use of the exclusion to fund the creation or expansion of administrative positions, or to provide compensation increases to administrators or supervisors beyond adjustments otherwise authorized by existing contracts or salary schedules.

e) Continue to treat as a matter of negotiation any decisions affecting instructional assignments, faculty load, or course offerings.

6) Defines the following terms:

a) "Discretionary grant" means a grant awarded on a competitive basis by the United States Department of Education to a CCD for the specific and limited purpose of funding student support functions, and does not include a financial award provided directly to an individual student on the basis of student eligibility.

b) "Student support functions" means any activities that were authorized to be funded by federal discretionary grants awarded to a CCD that has been terminated, nonrenewed, or defunded due to federal action on or after September 10, 2025. "Student support functions" include, but are not limited to: academic tutoring; individualized counseling; mentoring programs; providing information on the full range of federal student financial aid programs and benefits; developing articulation agreements designed to facilitate the transfer of students; and faculty development, curriculum development, and academic instruction support.

7) Requires that the provisions of this bill become inoperative on July 1, 2031, or on the first day of the fiscal year following the full restoration of the federal funding for every CCD, whichever occurs first, and requires that the provisions of this bill be repealed on January 1 of the year following the date that this section becomes inoperative.

Comments

Need for the bill. According to the author, "In September 2025, the Trump administration terminated $350 million in Minority Serving Institution (MSI) grants, leaving colleges without funding for these vital student support programs. The administration's proposed fiscal year 2026 budget seeks to eliminate MSI and

TRIO programs entirely, threatening long-standing initiatives that provide counseling, tutoring, mentoring, and transfer guidance to more than 1.6 million California community college students. These cuts threaten services that help California's most vulnerable students – low-income, first-generation, and students of color – complete their degrees.

The author continues, "AB 2121 responds to the Trump administration's systematic dismantling of federal student success programs by removing barriers that prevent community colleges from backfilling this loss in federal funding. By temporarily excluding those backfill dollars from the Fifty Percent Law, community colleges can preserve federally-defunded student supports."

Federal government actions for various discretionary grants. Actions taken by the federal government have created programmatic and fiscal uncertainty at the CCCs, including the sudden termination of certain discretionary federal grants in September 2025, including Hispanic Serving Institution (HSI) Grants, Minority Serving Institution (MSI) Grants, and Asian American and Native American Pacific Islander-Serving Institutions (AANAPISI) Grants. The federal government also terminated some federal TRIO grants in September 2025 for specified higher education institutions, which are outreach and student services programs designed to identify and provide services for individuals from disadvantaged backgrounds. According to the CCCCO, these HSI, MSI, and AANAPISI grants were provided to select colleges and are projected to be a loss of $61.4 million statewide over the next 5 years:

	(In millions)					
Program	**2025-26**	**2026-27**	**2027-28**	**2028-29**	**2029-30**	**Total**
HSI	$26.4	$13.4	$7.5	$4.7	-	**$52.0**
MSI	$1.6	$1.2	$0.4	$0.0	$0.5	**$3.8**
AANAPISI	$3.2	$2.0	$0.4	$0.0	-	**$5.6**
Total	**$31.2**	**$16.6**	**$8.3**	**$4.7**	**$0.5**	**$61.4**

Differences between the current statutory exemption and the exclusions authorized by this bill. Existing law requires CCDs that have not complied with the Fifty Percent Law to designate the amount equal to the deficiency in expenditures and have those amounts expended for salaries for classroom instructors during the next fiscal year. Current statute also permits CCDs to apply for an exemption if the application of the Fifty Percent Law results in a serious hardship for the CCD. This

bill provides a process for temporarily *excluding* specified expenditures from the calculation of the Fifty Percent Law, rather than *exempting* them.

According to the author, "a qualifying district may exclude the expenditures and certify eligibility to the Chancellor's Office annually, rather than an exemption [and] applying for after-the-fact discretionary relief. This provides upfront budget certainty districts need to commit resources during the budget planning cycle."

Related/Prior Legislation

SB 116 (Committee on Budget and Fiscal Review, Chapter 25, Statutes of 2020) requires, from July 1, 2020 to July 1, 2021, a CCD from excluding from its computation of the Fifty Percent Law any expenditures incurred by that district during a state or local declared emergency related to the COVID-19 pandemic that are not otherwise normal expenditures that would have been incurred by the CCD.

SUBJECT: School districts: community college districts: short-term employees: classified service

SOURCE: California Federation of Teachers
California School Employees Association

DIGEST: This bill requires school and community college districts using a merit system to replace short-term positions with permanent classified positions under specified conditions unless the district could rebut the presumption that positions meeting the conditions are classified, not short-term positions.

ANALYSIS:

Existing law:

1) Requires the governing board of a school district to employ persons for positions not requiring certification qualifications and classify all of these employees and positions, except as specified. The employees and positions shall be known as the classified service. (Education Code § 45103)

2) Allows school districts to employ short-term employees who are employed and paid for less than 75% of a school year, and provides that short-term employees are not part of the classified service. (Education Code § 45103 (b))

3) Defines "short-term employee" to mean a person who is employed to perform a service for the school district, upon the completion of which, the service required or similar services will not be extended or needed on a continuing basis. Before employing a short-term employee, the governing board of a school district, at a regularly scheduled board meeting, shall specify the service required to be performed by the employee pursuant to the definition of "classification" in subdivision (a) of Section 45101, and shall certify the ending date of the service. The ending date may be shortened or extended by the governing board of a school district, but shall not extend beyond 75% of a school year. (Education Code 45103 (d)(2))

4) Provides that the provisions described above apply only to school districts not incorporating the merit system. (Education Code 45103 (f))

5) Requires the governing board of a community college district to employ persons for positions that are not academic positions and classify those employees and positions, as specified, to be known as the classified service. (Education Code § 88003)

6) Allows community college districts to employ short-term employees who are employed and paid for less than 75% of a college year, and provides that short-term employees are not part of the classified service. (Education Code § 88003)

7) Defines "short-term employee" to mean a person who is employed to perform a service for the community college district, upon the completion of which, the service required or similar services will not be extended or needed on a continuing basis. Before employing a short-term employee, the governing board of a community college district, at a regularly scheduled meeting of the governing board of the community college district, shall specify the service required to be performed by the employee pursuant to the definition of "classification" in subdivision (a) of Section 88001, and shall certify the ending date of the service. The ending date may be shortened or extended by the governing board of the community college district, but shall not extend beyond 75 percent of a school [college] year. (Education Code § 88003 (c)(1))

8) Provides that the provisions described above applicable to a community college district, apply only to a community college district not incorporating the merit system. (Education Code 88003 (f))

This bill:

1) Provides a rebuttable presumption that a school or community college district is required to replace a short-term employee position with a position in the classified service if any of the following occurs:

   a) The short-term employee performs the required service of the position beyond 75% of a school year.

   b) The short-term employee voluntarily separates or is laid off or terminated from employment for at least 50% but less than 75% of a school year, and the same employee is then rehired in the next school year to perform substantially the same services for at least 50% of the school year.

   c) The services of the short-term employee position are used at least 50% of a school year for three of five consecutive school years.

Comments

Need for this bill? According to the author:

"School districts and community colleges are allowed to hire classified 'short-term' workers for a variety of classified positions. These workers are defined largely as anyone who is employed to perform a service for the school, upon the completion of which, the service required will not be extended or needed on a continuing basis. These "short-term" employees may only be employed for 75 percent of a school year.

Although these positions are deemed 'not needed on a continuing basis', in theory; they are in fact utilized continuously for many years.

… [The bill's supporters] have shared many such situations where people are being worked as short-term employees for 10 years or more. The practice denies employees the status and benefits of regular employment."

Related/ Prior Legislation

AB 1247 (Garcia, 2025) would have required that contracted employees at a school district or community college district (CCD) meet or exceed the minimum qualifications and standards required of direct hires with the same job functions, as prescribed, and would have required a district provide them with the same health care or retirement benefit contributions as a direct hire. The bill also would have

required that a school district or CCD compensate classified employees for any time necessary to complete required training at the employee's regular pay rate. *The Assembly Appropriations held the bill in committee.*

AB 2413 (Carrillo, Chapter 913, Statutes of 2022) prohibits K-12 and community college (CCC) districts from suspending without pay, suspending with a reduction in pay, demoting, or dismissing a permanent classified employee who timely requests a hearing on the charges against the employee before the district or hearing officer renders a decision on the matter except for certain conduct as specified.

AB 438 (Reyes, Chapter 665, Statutes of 2021) made specified changes related to layoff procedures for classified employees at school and community college districts including requiring district superintendents to provide notice no later than March 15 prior to the ensuing school year of the superintendent's recommendation to the district governing board to initiate required layoff procedures.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Senate Appropriations Committee:

- This bill would result in ongoing Proposition 98 General Fund cost pressures to school districts, potentially reaching the millions of dollars annually. The magnitude of these costs would depend on the number of temporary employees who, as a result of the bill, must be retained as permanent employees.

- The Chancellor's Office of the California Community Colleges (CCC) indicates that updating an existing policy to establish a rebuttable presumption when a "short-term employee" is considered a classified employee, would result in costs of $34,000 to $76,000 per district. Accounting for all 72 CCDs, the total costs would range between $2.4 million and $5.4 million (General Fund, Proposition 98). Administrative costs to CCC would be minor and absorbable

California County Superintendents
California School Boards Association
Central Valley Education Coalition
Chief Executive Officers of the California Community Colleges Board
Community College League of California
Kern County Superintendent of Schools
Small School Districts' Association

ARGUMENTS IN SUPPORT:

According to the California Federation of Teachers:

"EC [Education Code] Sections 45103 and 88103 allow education employers to bring on "short-term employees" for up to 75% of a school year and deny them every single right explicitly guaranteed by law to classified workers. As concerning as this section of law is, the reality is even worse: sometimes these workers are kept on as short-term employees for years if not decades, leaving dedicated employees languishing in unacceptable working conditions for far too long and in clear violation of the law.

For example, classified workers are guaranteed certain rehire rights that reward seniority when bringing workers back on after layoffs. Another section of the Education Code guarantees vacation days, accrued at the rate of 5/6 of a day for each month of work, to those employed for six months or longer. A similar section ensures that classified workers earn 12 sick days for every year on the job. Short-term employees, meanwhile, are denied all of these rights and many more. Action must be taken to ensure that, at a minimum, workers who have passed the aforementioned 75% cutoff are immediately awarded all rights and benefits guaranteed by current law.

AB 2142 (Garcia) clarifies that workers employed for more than 75% of the school year are automatically placed into the classified service. The bill further details that employers cannot skirt the law by bringing workers back in future years and

continue refusing to award workers their earned rights and benefits as members of the classified service."

ARGUMENTS IN OPPOSITION:

According to a coalition of statewide and regional education organizations and local educational agencies, including the Association of California School Administrators and the California School Boards Association:

"AB 2142 would drastically change the way that short-term or temporary classified positions are established and how those positions are filled. Regrettably, it establishes an arbitrary new set of thresholds and minimum days served, with carry-over between multiple years of service in subsequent academic years. AB 2142 also creates a rebuttable presumption that an employee reaches permanent status after completing 195 days of service, including all leave allowances.

…We are also concerned with the potential impact that AB 2142 would have on March 15 layoff notice requirements. Tying permanency to a percentage of an individual's rolling threshold makes alignment with the fixed layoff notice deadline extremely difficult.

…Finally, we believe this bill could result in the unintended consequence of experienced, trusted employees not being hired in future school years. Episodic hourly costs convert to multi-year salary and benefit obligations funded primarily by the general fund, with substantially increased per-employee costs and long-term fiscal exposure. Schools will not be able to support the cost of returning employees becoming permanent and will seek other candidates to fill positions."

SUBJECT: California Environmental Quality Act: essential local fire station projects: infrastructure project streamlining

SOURCE: Author

DIGEST: This bill establishes expedited administrative and judicial review procedures under the California Environmental Quality Act (CEQA) for "essential local fire station projects," requiring the courts to resolve lawsuits within 270 days, to the extent feasible.

Senate Floor Amendments of 8/21/2026 revise and recast the provisions of the bill to remove the creation of specific CEQA judicial streamlining program for essential fire stations and instead add essential fire stations, as defined, to the list of programs eligible for CEQA judicial streamlining as part of the Environmental Leadership Develop Program (ELDP): these projects are certified as eligible by the Governor.

ANALYSIS:

Existing law:

1) Requires, via CEQA, lead agencies with the principal responsibility for carrying out or approving a project to prepare a negative declaration (ND), mitigated negative declaration (MND), or environmental impact report (EIR) for the project, unless the project is exempt from CEQA. (Public Resources Code (PRC) §21000 et seq.). If a project may have a significant effect on the environment, the lead agency must prepare a draft EIR. (CEQA Guidelines §15064(a)(1), (f)(1))

2) Establishes processes and timelines for lawsuits that challenge a public agency's compliance with the requirements of CEQA including:

    a) Challenges must be filed in the superior court within 30 days of filing the notice of approval;

    b) The courts are required to give CEQA actions preference over all other civil actions;

    c) Requires the court to regulate the briefing schedule so that, to the extent feasible, hearings commence within 1 year of the filing of the appeal;

    d) Requires the plaintiff to request a hearing within 90 days of filing the petition; and

    e) Requires the court to establish a briefing schedule and a hearing date, requires briefing to be completed within 90 days of the plaintiff's request for hearing, and requires the hearing, to the extent feasible, to be held within 30 days thereafter. (Public Resources Code Section (PRC) 21167 et seq.)

3) Establishes the Jobs and Economic Improvement Through Environmental Leadership Act of 2011 (AB 900, Buchanan, Chapter 354, Statutes of 2011), which established CEQA administrative and judicial review procedures for an "environmental leadership" project. The Act was later extended and modified in 2021 (SB 7, Atkins, Chapter 19, Statutes of 2021). Establishes expedited judicial and administrative CEQA processes for a broad swath of energy, transportation, water, and semiconductor projects eligible for expedited judicial

review under CEQA in SB 149 (Caballero, Chapter 60, Statutes of 2023). (PRC §21178 et seq.)

This bill:

1) Defines an essential local fire station project as one meeting the following criteria:
   a) The project is undertaken by a city, county, city and county, or local fire agency to plan, design, acquire property for, and construct or replace a fire station.
   b) The project will employ best practices, as compared to similar fire station projects previously reviewed under CEQA

   c) The project's construction contracts are covered by a project labor agreement, as that term is defined in Section 2500 of the Public Contract Code.

   d) The project is not located on the following sensitive sites:

      i) Prime farmland, farmland of statewide importance, or unique farmland as designated by the Department of Conservation;

      ii) Wetlands, as defined in specified federal regulations;

      iii) A hazardous waste site that is included on any list compiled pursuant to Section 65962.5 of the Government Code (i.e., the "Cortese List");

      iv) A floodplain, as mapped by the Federal Emergency Management Agency, unless the project includes adequate flood protection as determined by the lead agency;

      v) Within a delineated earthquake fault zone, as determined by the State Geologist, in any official maps published by the State Geologist, unless the development complies with applicable seismic protection building code standards adopted by the California Building Standards Commission;

      vi) Lands identified for conservation in an adopted natural community conservation plan, a habitat conservation plan, or other adopted natural resource protection plan;

vii) Habitat for protected species identified as candidate, sensitive, or species of special status by state or federal agencies, fully protected species, or species protected by the federal Endangered Species Act, the California Endangered Species Act, or the Native Plant Protection Act; or

viii) Lands under conservation easement;

e) Makes these 'essential fire station' projects eligible for the Environmental Leadership Development Program. Under the ELDP, eligible projects that are certified by the Governor as meeting this criteria are eligible for judicial streamlining of 270 days as feasible, and administrative streamlining wherein the lead agency concurrently prepares the record of proceedings with the EIR.

Background

The A, B, C's of CEQA. CEQA is designed to (a) make government agencies and the public aware of the environmental impacts of a proposed project, (b) ensure the public can take part in the review process, and (c) identify and implement measures to mitigate or eliminate any negative impact the project may have on the environment. CEQA is enforced by civil lawsuits that can challenge any project's environmental review. Nonprofits, private individuals, public agencies, advocacy groups, and other organizations can all file lawsuits under CEQA.

Under CEQA, projects (unless they have a specific exemption) must undergo environmental analysis. This process starts with an initial study which determines what level of further environmental review is needed for a given project. If a project has no significant effects on the environment, or if those effects can be fully mitigated, the project can move forward with an ND or MND. If the initial study finds that the project has potential significant effects on the environment, then a full EIR is conducted. An EIR provides thorough environmental review of a proposed project, analyzing the significant direct and indirect environmental impacts of a proposed project on water quality, transportation, air quality and greenhouse gas emissions, terrestrial and aquatic biological resources, surface and subsurface hydrology, land use and agricultural resources, aesthetics, geology and soils, recreation, public services and utilities such as water supply and wastewater disposal, and cultural resources, among other factors. The EIR also includes

proposed mitigation measures for any significant effects that it identifies and considers alternatives to the proposed project.

CEQA timelines. Under CEQA, state and local agencies must complete and adopt a ND in 180 days, and certify an EIR within a year. If there is a compelling circumstance to extend this timeline, agencies may take longer, but only if the project applicant consents. After the environmental review is completed, the case may be subject to litigation. Judicial Council asserts that it takes over six months just for a CEQA case to get a hearing, let alone reach a decision. To help speed CEQA cases through the court system, current law provides several measures to prioritize CEQA cases and speed up judicial review, including:

a) The Superior Court and the Court of Appeal must give CEQA lawsuits preference over all other civil actions;

b) If feasible, the Court of Appeal must hear a CEQA appeal within 1 year of filing;

c) Discovery is generally not allowed, as CEQA cases are generally restricted to review of the record; and

d) Counties with a population of over 200,000 must designate one or more judges to develop expertise on CEQA and hear CEQA cases.

Judicial and administrative streamlining. The Legislature has developed streamlining measures to speed CEQA lawsuits against specified projects through the courts. In current law, CEQA streamlining entails both judicial and administrative streamlining. Judicial streamlining requires that a CEQA lawsuit be heard in 270 days, including all appeals, as feasible. Administrative streamlining requires projects to prepare the administrative record, the comprehensive document at the heart of a CEQA case, at the same time as the environmental review documents are prepared. Preparing these documents concurrently, instead of sequentially, saves time if there is a lawsuit. These streamlining measures shorten what is potentially the lengthiest portion of the CEQA process—litigation—while retaining the full environmental review and public engagement offered under CEQA.

In 2011, the Legislature passed the first CEQA streamlining certification program with the Jobs and Economic Improvement Through Environmental Leadership Act (Leadership Act), which created CEQA streamlining for residential, retail,

commercial, sports, and recreational use projects that were certified as Environmental Leadership Development Projects (ELDP) by the Governor (AB 900, Buchanan, Chapter 354, Statutes of 2011). The ELDP program was further extended and modified in 2021 with (SB 7, Atkins, Chapter 19, Statutes of 2021).

In 2023, The Legislature expanded these same streamlining provisions for certain energy, transportation, and water infrastructure projects (SB 149, Caballero, Chapter 60, Statutes of 2023).

The specific criteria that projects must meet to be eligible for CEQA streamlining varies by project and process, but all are intended to ensure that projects meet high environmental and labor standards. In current law environmental criteria for streamlining includes requirements such as achieving Leadership in Energy and Environmental Design (LEED) Gold certification and being greenhouse gas neutral. SB 149 (Caballero, Chapter 60, Statutes of 2023) also includes a specific equity provision which requires that projects both minimize significant environmental impacts in disadvantaged communities and take mitigation measures that directly benefit the affected community. In offering CEQA streamlining for projects that meet these high standards, California has been able to promote projects that align with the State's environmental, climate, and labor goals.

Increasing Need for Fire Stations. According to this bill's sponsors, California fire agencies have seen significantly increased call volume and population growth, but no corresponding expansion of fire stations in those communities. For example, a recent analysis by the International Association of Fire Fighters found that the Los Angeles Fire Department is in need of 62 new fire stations and 4,000 additional firefighters to meet the needs of the community. National rates suggest most cities are operating at 1.54 to 1.81 firefighters per 1,000 residents. But that is not the trend everywhere, a prominent example of this is the city of Los Angeles, which is operating at .88 firefighters per 1000 residents. In 1960, the Los Angeles Fire Department (LAFD) had 112 fire stations that serviced 2.5 million residents; they now only have 106 stations servicing 3.9 million residents.

Comments

Purpose of Bill. According to the author, "Across our state, localities struggle to construct new fire stations due to rising costs, procedural delays, and, at times, CEQA litigation. Los Angeles is a prime example of what could happen across this state. In The Tiara Group vs. City of Los Angeles, a group of residents successfully

delayed a fire station from being built for over 2 years—placing lives on the line and wasting nearly $2 million of valuable taxpayer dollars. With the International Association of Fire Fighters determining that LAFD needs 62 new Fire Stations and 4,000 additional Firefighters, and the last attempted fire station built in LAFD being sued twice under frivolous lawsuits, now is the time to ensure our fire departments across the state have the streamlined process they need to bolster fire infrastructure."

Streamlining CEQA for Fire Stations. According to CEQAnet, the State's database of CEQA documents, the vast majority of fire stations are subject to CEQA exemptions or short environmental review through an ND/MND. However, some fire stations are subject to full EIRs. Occasionally, fire stations are subject to lawsuits under CEQA. According to the author's office, LAFD station 39 in Van Nuys was subject to court challenge over CEQA, delaying the project over three years and costing the City more than $1.9 million.

This bill addresses the issue directly by authorizing CEQA judicial streamlining for fire stations through the existing ELDP program. This retains important environmental review, public transparency, and mitigation measures required under CEQA while also ensuring that essential fire station projects are not delayed in lengthy lawsuits.

Related/Prior Legislation

AB 2231 (Ahrens, 2026) would create expedited administrative and judicial review procedures under the CEQA for "environmental leadership hospital campus projects" in the cities of Emeryville and Santa Clara, requiring the courts to resolve lawsuits within 270 days, to the extent feasible.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations committee:

- This bill could result in potential cost pressure (Trial Court Trust Fund, General Fund) of an unknown amount to the courts to process and hear challenges to environmental reviews for essential local fire station projects on an expedited timeline. Expedited cases generally create costs and staffing pressures on the courts, as each review typically requires a judicial officer, research attorneys, and staff. Cost pressures would likely be offset by the higher filing fee. Under existing rules of court (that Judicial Council may amend to reference the

specific projects in this bill), these reviews would be subject to a $180,000 filing fee.

SUBJECT: Property tax: documentary transfer tax: exemptions: nonprofit corporations chartered under tribal or federal law

SOURCE: Mooretown Rancheria

DIGEST: This bill clarifies that nonprofit tribal corporations and wholly owned tribal entities are eligible for the welfare exemption from property tax and exemption from Documentary Transfer Tax for tribal land return transactions.

ANALYSIS:

Existing law:

1) Vests Congress with the authority to engage in relations with Indian tribes, sovereign nations that existed long before the founding of the Republic (United States Constitution, Article One, Section Eight).

2) Provides that all property is taxable unless explicitly exempted by the Constitution or federal law (California Constitution, Article XIII, Section One.)

3) Limits the maximum amount of any *ad valorem* tax on real property at 1% of full cash value, plus any locally-authorized bonded indebtedness, and caps a

property's annual inflationary increase in taxable value to 2%. Provides that assessors reappraise property whenever it is purchased, newly constructed, or when ownership changes (California Constitution, Article XIIIA, as added by Proposition 13, 1978).

4) Sets, generally, a property's value as its sales price when purchased or, when there is no sales price, at its fair market value when ownership changes.

5) Allows the Legislature to exempt property used exclusively for charitable purposes, so long as it is owned by non-profit corporations or other entities organized and operated for charitable purposes, such as universities, hospitals, and libraries, commonly known as the "welfare exemption" (California Constitution, Article XIII, Section Four).

6) Applies the welfare exemption to property used exclusively for the preservation of native plants and animals, biotic communities, geological or geographical formations of scientific or educational interest, or open-space lands used solely for recreation and for the enjoyment of scenic beauty. The land must be open to the public subject to reasonable restrictions, and the exemption cannot apply to property that is reserved for future development. In 2022, the Legislature extended the exemption until the 2027 lien date (SB 825, Committee on Governance & Finance, Chapter 433, Statutes of 2022).

7) Enacts the Documentary Transfer Tax Act, which allows counties to levy a tax upon the recording of documents that transfer interests in real property. All 58 counties impose a documentary transfer tax (DTT), which is levied at a rate of 55 cents per $500 (or 0.11%) of the value of the real property or interest being transferred.

8) Under the Act, permits a city within a county that has adopted a DTT to impose a DTT at one-half of the county rate, where the amount of tax paid to a city is a credit against the amount of the tax owed to a county. More than 450 cities levy a DTT pursuant to the Act, including some charter cities, which can apply the tax at rates that exceed the Act's limits on the DTT.

9) Directs county recorders to administer documentary transfer taxes, and prohibits a recorder from recording a document subject to the DTT unless the tax is paid at the time of recording.

10) Exempts tribal land return transactions, as defined, from the documentary tax, and enacts a property tax exemption parallel to the current exemption for open space lands for properties owned and operated by a federally recognized Indian

tribe, or its wholly owned subsidiary (AB 1485, Macedo, Chapter 2, Statutes of 2026).

11) Defines "tribal land return transactions" as a land return acquisition that transfers ownership of land to a federally recognized Indian tribe, or a wholly owned subsidiary of a federally recognized Indian tribe in fee simple, and that includes restrictive covenants that prohibit that tribe from engaging in commercial activities on the land, instead restricting its uses to cultural, educational, recreational, or conservation purposes.

This bill:

1) Adds the following entities as eligible property owners to apply AB 1485's documentary transfer tax and property tax exemptions:

   a) Nonprofit corporations chartered by a federally recognized tribe pursuant to tribal law,

   b) Nonprofit corporations chartered under Section 17 of the Indian Reorganization Act, and

   c) Wholly owned tribal entities.

2) Defines "wholly owned tribal entity," as an entity wholly owned by one or more Indian tribal governments, as that term is defined in Section 7701(a)(40) Title 26 of the United States Code, that is organized or incorporated under the law of the tribe or tribes that own the entity and authorized by all of the other owning tribes.

3) Deletes references to "subsidiary."

4) Makes a conforming change to AB 1485's legislative findings and declarations to comply with Section 41 of the Revenue & Taxation Code.

Background

Tribal corporations. The Indian Reorganization Act of 1934 has long provided a framework for tribes to create corporations that facilitate economic development while safeguarding their sovereignty and assets. Tribal nations often create separate corporations or subsidiaries for specific purposes, including owning land not held in trust by the federal government. Tribes state that forming corporations under their own law is an exercise of their inherent sovereign authority to generate governmental revenue, self-govern the use of that revenue according to their own

laws, and self-determine the use of that revenue for their citizenry. Tribes add that incorporating corporations under Tribal law enables Tribes to create entities that meet their emerging revenue opportunities, establish guidelines for the operation of these entities that are culturally appropriate and protect Tribal assets, and dissolve them when they are no longer needed.

Last December, the Internal Revenue Service issued new regulations that included a new rule providing that entities wholly owned by Tribes and organized, incorporated, or authorized under the laws of the Tribes that own them generally are not recognized as separate entities for federal tax purposes. The regulations also apply to entities wholly owned by one or more Indian Tribal governments, and to entities other than corporations, such as Limited Liability Companies.

AB 1485 allowed wholly-owned subsidiaries of tribes to qualify for the measure's welfare exemption from property tax as well as its DTT exemption. However, tribes can differ in the types of entities they create, and the term "wholly owned subsidiary" may be interpreted differently from tribe to tribe. Additionally, it's unclear whether a non-profit land trust created by several tribes would qualify as a "wholly owned subsidiary" of a tribe.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- This bill would likely reduce local property tax revenues relative to current law. Although the Board of Equalization (BOE) estimates no revenue impact, the actual fiscal effect is unknown because it is unclear how many nonprofit corporations chartered under tribal law currently own, or may in the future acquire, property that would become eligible for the exemption.

- Reductions in local property tax revenues, in turn, can increase General Fund Proposition 98 spending by up to roughly 50 percent (the exact amount depends on the specific amount of the annual Proposition 98 guarantee, which in turns depends upon a variety of economic, demographic and budgetary factors).

- BOE would incur minor and absorbable costs as a result of the bill.

- By imposing specified duties on local officials, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a

higher level of service on local agencies, local agencies could claim reimbursement of those costs. The magnitude is unknown, but likely minor.

ARGUMENTS IN SUPPORT: According to the author, "California has taken an important step toward supporting tribal land return transactions and the preservation of natural resources and open-space lands under current law. AB 2167 is a narrow follow-up measure to ensure that framework works as intended. Some tribes hold land through corporations chartered under tribal law. Those entities are legitimate arms of tribal self-governance, but current statutory language does not clearly state them in the relevant tax provisions. As a result, similarly situated tribal land return transactions may be treated differently based solely on how a tribe structures its ownership. AB 2167 provides a simple fix by expressly including corporations chartered under tribal law in the applicable welfare exemption and documentary transfer tax provisions. This bill promotes parity, respects tribal governance structures, and preserves the intent of existing law."

ASSEMBLY FLOOR: 70-0, 5/7/26 - See last page for vote

SUBJECT: Workplace violence: restraining orders

SOURCE: City of Carlsbad
San Diego County District Attorney's Office

DIGEST: This bill requires a court, beginning January 1, 2028, to permit electronic filings and remote appearances in proceedings for a workplace violence restraining order, and requires the Judicial Council of California to develop the necessary forms and rules to implement those requirements.

Senate Floor Amendments of 8/21/26 add additional language to this bill's contingent enactment language to conform to recent amendments to AB 1961 (Ahrens, 2026).

ANALYSIS:

Existing law:

1) Permits an employer or collective bargaining unit of an employee who has suffered harassment, unlawful violence, or a credible threat of violence from any individual, that can reasonably be construed to be carried out or to have

been carried out at the workplace, to seek a temporary restraining order (TRO) or order after hearing on behalf of the employee and, at the discretion of the court, any number of other employees at the workplace and, if appropriate, other employees at other workplaces of the employer.

a) A TRO or order after hearing may not be issued to prohibit speech or other activities that are constitutionally protected or otherwise protected by law.

b) The TRO or order after hearing may, on a showing of good cause, include other named family or household members, or other persons employed at the employee's workplace or workplaces. (Code of Civil Procedure [Code Civ. Proc.], § 527.8(a), (c), (d).)

2) Requires an employer or collective bargaining representative, prior to filing a petition for an order under 1), to provide the employee who has suffered harassment, unlawful violence, or a credible threat of violence an opportunity to decline to be named in the TRO; an employee's request not to be named does not prohibit an employer or representative from seeking a TRO on behalf of other employees at the workplace or, if appropriate, at another of the employer's workplaces. (Code Civ. Proc., § 527.8(e).)

3) Permits a petitioner to obtain a TRO under 1) if the petitioner files a declaration that establishes, to the satisfaction of the court, one of the following:

a) Reasonable proof that an employee has suffered unlawful violence or a credible threat of violence by the respondent, and that great or irreparable harm would result to an employee.

b) Clear and convincing evidence that: (1) the employee has suffered harassment by the respondent; (2) that great or irreparable harm would result to an employee; (3) that the course of conduct at issue serves no legitimate purpose; and (4) that the issuance of the order is not prohibited by 1)(a). (Code Civ. Proc., § 527.8(f).)

4) Requires a request for a TRO under 2) to be granted or denied on the same day that the petition is submitted to the court, unless the petition is filed too late to permit effective review, in which case the order shall be granted or denied on the next day of judicial business in sufficient time for the order to be filed that day with the clerk of the court. (Code Civ. Proc., § 527.8(g).)

5) Requires the respondent to be personally served with a copy of the petition, TRO, if any, and notice of hearing on the petition, at least five days before the hearing in 6), below. If, however, the respondent has not been served

personally but has received actual notice of the existence and substance of the order through personal appearance, no additional proof of service is required. (Code Civ. Proc., § 527.8(n), (r).)

6) Provides that a TRO granted under 1) shall remain in effect, at the court's discretion, for a period not to exceed 21 days, and the court must hold a hearing on the petition before the expiration of the TRO.

   a) The court may, for good cause, extend the time for hearing to 25 days.

   b) The respondent may file a response to the petition prior to the hearing.

   c) The respondent is entitled, as a matter of course, to one continuance, for a reasonable period, to respond to the petition.

   d) Either party may request a continuance of the hearing, which the court shall grant on a showing of good cause; the TRO shall be extended for the duration of the continuance.

   e) At the hearing, the judge shall receive any testimony that is relevant and may make an independent inquiry. (Code Civ. Proc., § 527.8(h)-(k), (p), (q).)

7) Requires the court, if the hearing under 6) establishes clear and convincing evidence that the respondent engaged in harassment, engaged in unlawful violence, or made a credible threat of violence, to issue an order prohibiting further harassment, unlawful violence, or threats of violence.

   a) The order may have a duration of not more than three years, subject to termination or modification by the court either on written stipulation or on the motion of a party.

   b) The order may be renewed for a duration of not more than three years, without a showing of further harassment, unlawful, or credible threats of violence since the issuance of the order. (Code Civ. Proc., § 528.7(k), (*l*).)

8) Prohibits the subject of a protective order issued under 2) from owning, possessing, purchasing, receiving, or attempting to purchase or receive a firearm or ammunition while the order is in effect, as specified. (Code Civ. Proc., § 528.7(t).)

9) Provides that there is no filing fee for a petition filed under 2). (Code Civ. Proc., § 527.8(x).)

This bill:

1) Permits, commencing January 1, 2028, a party or witness to appear remotely at a hearing on a petition for a workplace violence restraining order.

   a) A court may not charge a fee for a party to appear remotely at the hearing.

   b) The superior court of each county shall develop local rules and instructions for such remote appearances, which must be posted on the court's website.

2) Requires a court, commencing January 1, 2028, to permit a petition for a workplace violence restraining order or other related filings to be submitted electronically.

   a) The court shall, based on the time of receipt, act on the filings consistent with the existing timeframe for granting a TRO.

   b) The request for order, notice of the court date, copies of the request, and the TRO, if granted, shall be provided electronically to the petitioner who electronically filed the petition, unless the petitioner notes, at the time of filing, that they will obtain physical copies of those documents from the court.

3) Requires the Judicial Council of California, on or before January 1, 2028, to develop the necessary forms and rules to implement 1) and 2).

4) Makes nonsubstantive conforming changes.

5) Incorporates chaptering-out language to avoid a conflict with AB 1961 (Ahrens, 2026).

Comments

Current law authorizes an employer or collective bargaining representative to petition for a civil restraining order from a court for an employee who has suffered harassment, violence, or a credible threat of violence at the workplace. The court can issue a TRO on an ex parte basis, and then may enter a restraining order after the respondent has been given notice and an opportunity to be heard. To enter a restraining order after hearing, the court must find, by clear and convincing evidence, that the respondent engaged in harassment or unlawful violence, or made credible threats of violence; upon making this finding, the court has significant discretion to apply the order broadly, including to cover other employees at the same workplace or workplaces as the affected employee, and family members of

the threatened employees. The initial order can last for up to three years, and can be renewed for up to three additional years.

This bill requires a court, beginning January 1, 2028, to permit electronic filings and remote appearances in proceedings for a workplace violence restraining order, and requires the Judicial Council of California to develop the necessary forms and rules to implement those requirements on or before that date. These measures bring the workplace violence restraining order statute into conformity with other civil protective order regimes.

OPPOSITION: (Verified 8/20/26)

None received

ARGUMENTS IN SUPPORT: According to the City of Carlsbad:

> California law currently allows employers (and, in certain cases, authorized collective bargaining representatives) to seek workplace violence restraining orders when an employee has suffered unlawful violence, harassment, or a credible threat of violence that could reasonably be carried out at the workplace. However, the process can still require in-person participation and paper-based steps that create unnecessary barriers — especially for employees and witnesses who may fear retaliation, lack transportation, cannot easily take time off work, or face safety concerns traveling to and from court.
>
> AB 2179 would permit any party or witness in a workplace violence restraining order proceeding to appear remotely at the hearing. It would also ensure courts do not charge a fee for participating remotely and would require courts to allow

electronic submission of filings related to these protective orders, improving timely access to the court process.

AB 2179 supports workplace safety by making restraining order proceedings more accessible and safer to navigate. By reducing practical barriers to participation, the bill can help ensure the court receives the information it needs while minimizing disruption to work and reducing safety risks for parties and witnesses.

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 73-0, 5/21/26 - See last page for vote

SUBJECT: Controlled environment horticulture space: thermal curtains

SOURCE: Windset Farms

DIGEST: This bill requires the California Building Standards Commission (CBSC) to adopt a standard developed by the California Energy Commission (CEC) to allow certain indoor agriculture buildings and air-conditioned greenhouses to use alternative technologies instead of using double-paned glass windows.

ANALYSIS:

Existing law:

1) Establishes the CEC's authority to create regulations for building efficiency standards. Existing law requires the CEC to create cost-effective regulations for lighting, insulation, climate control systems, and other building design and construction standards that increase energy and water efficiency for new residential and new nonresidential buildings. Local governments may not issue

permits for construction and installation projects that fail to comply with the CEC's certified efficiency standards. (Public Resources Code §25402)

2) Requires the CEC's building water and energy efficiency standards to be cost effective for the economic life of the building when compared to historic practice. When determining a standard's cost effectiveness, the CEC must consider the value of the water or energy saved, impact on product performance for consumers, and the life-cycle cost of the standard. Existing law also requires the CEC to consider a standard's impact on housing costs, the total statewide costs and benefits of the standard over its lifetime, the economic impact on California businesses, and alternative approaches and costs. (Public Resources Code §25402)

This bill:

1) Defines a "controlled environment horticulture space" as a building space dedicated to plant production using environmental controls, including electric lighting, irrigation, heating, cooling, or dehumidification.

2) Requires the CBSC to adopt standards developed by the CEC in the next triennial building code requirements, allowing controlled environment horticulture (CEH) spaces or conditioned greenhouses to use alternative technologies, such as thermal curtains, thermal screens, shade cloths, or equivalent technologies, in lieu of the requirements for double-paned glass windows.

3) Specifies that a CEH space that uses single-paned glass windows and either thermal curtains, thermal screens, shade cloths, or equivalent technologies shall be considered compliant under the energy code if the CEC finds that these technologies are at least as efficient as technologies used under existing regulations.

Background

CEC's Title 24 Building Energy Efficiency Standards. Existing law establishes the CEC's authority to adopt cost-effective building and appliance standards to promote the conservation of energy and water. Title 20 of the California Code of Regulations includes the CEC's appliance standards. Title 24 includes the CEC's building energy efficiency standards. While the CEC develops the building energy efficiency standards, the CBSC is responsible for adopting all building standards,

including Title 24 energy efficiency standards. Local governments are responsible for enforcing building standards through building inspections. Building energy efficiency standards are developed and adopted for a three-year period and apply at the time of construction. While some standards are mandatory, others are less proscriptive.

Bill primarily addresses energy code compliance needs for one farm but may benefit others. This bill addresses barriers that greenhouse farms may face when developing new facilities that use certain technologies that do not currently comply with existing energy code for CEH spaces. As part of the 2022 edition of the building energy efficiency standards, the CEC adopted a definition of a CEH space, which applies to agricultural productions that occur indoors, including in greenhouses. Among other requirements, the CEC's efficiency standards for CEH spaces specified that the building envelope of an air-conditioned CEH must be either 1) an opaque wall or roof or 2) a double-glazed window that uses air or gas as insulation between the panels. These existing requirements do not enable a greenhouse farm that uses other technologies, including single paned windows paired with thermal screens or more advanced temperature and environmental control systems to use these alternative technologies to meet energy code requirements.

Energy code requirements are prospective and do not apply retroactively to existing facilities; as a result, some farms that pre-date the CEC's rules for CEH spaces are already operating greenhouses that do not use double-paned windows for insulation. While the CEC's energy code requirements do not impact these existing structures, they can prevent farms that use alternative technologies as part of their operations from expanding or building new facilities that also match their existing production processes.

At least one in-state agricultural producer, Windset Farms, uses alternative insulation technologies as part of its greenhouse vegetable farming. Windset Farms is based in Santa Maria, California, and operates the largest greenhouse vegetable farm in the state. Windset Farms greenhouses currently use single-paned glass with retractable thermal curtains along with environmental control systems developed by KUBO, a Netherlands-based manufacturer of advanced technology greenhouses. Windset established much of its existing agricultural production prior to the CEC's adoption of CEH energy code requirements. However, the company in the process of expanding its greenhouses to include an additional 97 acres of greenhouse space adjacent to its existing facilities. Existing CEC standards for CEH spaces would limit Windset's ability to use its existing KUBO-designed

advanced greenhouses for its expansion. This bill would enable Windset to continue using its existing greenhouse technology as part of its expansion and would enable other farms to establish new greenhouses using similar alternative climate and insulation technologies.

Prior/Related Legislation

SB 48 (Becker, Chapter 378, Statutes of 2023) required the CEC, along with other agencies, to develop a state strategy to achieve state goals for energy and greenhouse gas emissions (GHG) from existing buildings, as specified.

SB 795 (Stern, 2023) would have required the CEC to develop and implement an electronic statewide heating, ventilation and air conditioning (HVAC) equipment sales registry and compliance tracking system. It also would have required the CEC to develop an electronic statewide compliance documentation data repository for HVAC equipment and lighting controls. The bill was held by the Assembly Appropriations Committee.

SB 1477 (Stern, Chapter 378, Statutes of 2018) required the CEC to develop a statewide market transformation initiative to transform the state's market for low-emission space and water heating equipment for new and existing residential and nonresidential buildings and to develop an incentive program to fund near-zero emission technology for new residential and commercial buildings.

AB 3232 (Friedman, Chapter 373, Statutes of 2018) required the CEC to assess the potential for the state to achieve the goal of reducing the emissions of GHGs by the state's residential and commercial building stock by at least 40% below 1990 levels by January 1, 2030.

AB 802 (Williams, Chapter 590, Statutes of 2015), among its provisions, established the energy use "benchmarking" and disclosure program at the CEC for existing buildings.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

SUPPORT: (Verified 8/3/26)

Windset Farms (source)

OPPOSITION: (Verified 8/3/26)

None received

ARGUMENTS IN SUPPORT: According to the author:

> AB 2200 will give food producers flexibility in meeting energy efficiency standards in ways that are tailored to local conditions and specific crop needs, helping keep costs down and produce more affordable. Current energy regulations require double-paned windows for new agricultural greenhouses to improve energy efficiency. Many greenhouse systems, however, rely on the temperate climate and extensive sunlight found in much of California. Single-paned windows with curtain systems provide the necessary sunlight into these greenhouses and give growers the ability to adjust to changing conditions for optimal crop growth and yield. AB 2200 helps support innovative greenhouses, bolster crop production, and keep more farms here in California by creating a narrow exemption for greenhouses that utilize single-paned windows.

ASSEMBLY FLOOR: 78-0, 5/27/26 - See last page for vote

SUBJECT: Prisons: organized sports programming

SOURCE: Anti-Recidivism Coalition

DIGEST: This bill requires the Department of Corrections and Rehabilitation (CDCR) to establish a policy on organized sports programming at facilities operated by the department.

Senate Floor Amendments of 8/24/26 clarify that moneys deposited into the Second Chance Sports Fund shall be available upon appropriation by the Legislature in the annual Budget, rather than requiring approval by the Government Operations Agency; and add a sunset date applying to the bill's provisions of January 1, 2036.

Senate Floor Amendments of 8/21/26:

- Extend the deadline by which CDCR must formalize a policy on organized sports programming from July 1, 2027 to January 1, 2028;
- Require that in developing the policy, CDCR must consider additional factors, including geographic, climate, and infrastructure differences across department facilities that may affect equitable access to organized sports programming and

how to maximize access to sports programming using existing recreational spaces and infrastructure;
- Clarify that monies deposited into the Second Chance sports Fund are available upon appropriation;
- Clarify that the Controller, rather than the Treasurer, must annually report on the amount deposited in the fund;
- Extend the deadline for the first report from the Controller to January 1, 2029;
- Delete the sunset date that applies to the provisions of the bill.

ANALYSIS:

Existing law:

1) Establishes the position of Secretary of CDCR and vests in that position responsibility for the care, custody, treatment, training, discipline, and employment of persons confined in state prisons. (Penal (Pen.) Code, § 5054.)

2) Authorizes CDCR to adopt regulations as necessary to implement the department's administrative duties. (Pen. Code, § 5058.)

3) Provides that any amendments to existing regulations and any future regulations adopted by CDCR that may impact visitation of incarcerated persons shall do all of the following:

   a) Recognize and consider the value of visiting as a means to improve the safety of prisons for both staff and incarcerated persons;
   b) Recognize and consider the important role of incarcerated person visitation in establishing and maintaining a meaningful connection with family and community; and
   c) Recognize and consider the important role of incarcerated person visitation in preparing an incarcerated person for successful release and rehabilitation. (Pen. Code, § 6400, subds. (a)-(c).)

4) Provides that the essential purpose of incarceration is rehabilitation and successful community reintegration, which should be achieved through education, treatment, and active participation in rehabilitative and restorative justice programs. (Pen. Code, § 1170.)

5) Requires CDCR to develop and implement policies for contraband interdiction at institutional entry points, including standardized screening procedures

applicable to all individuals entering facilities, such as visitors, staff, volunteers, and contract employees. (Pen. Code, § 6402.)

6) Establishes the Inmate Welfare Fund, which authorizes CDCR to fund programs for the benefit of incarcerated persons, including recreational and physical education activities, hobby programs, and other leisure-time services. (Pen. Code, § 5006.)

7) Requires CDCR to provide incarcerated persons with access to recreational and physical education programs under safe and secure conditions, consistent with custodial classification and institutional operations. (Cal. Code Regs., tit. 15, § 3220.)

8) Permits CDCR to allow competitions between outside public teams and teams of incarcerated individuals if competitions take place within the facility and under the direct supervision of staff. (Cal. Code Regs., tit. 15, § 3220, subd. (e).)

9) Provides that incarcerated persons may voluntarily participate in athletic activities, contests, and games only if those activities are specifically authorized by the institution head or their designee. (Cal. Code Regs., tit. 15, § 3220, subd. (f).)

10) Authorizes CDCR to regulate recreational programming, including restricting activities that present safety risks and requiring supervision and medical clearance for certain activities. (Cal. Code Regs., tit. 15, § 3220.1.)

11) Authorizes CDCR to regulate and control access to its institutions through a visitor approval process, including establishing conditions necessary to ensure institutional safety and security. (Cal. Code Regs., tit. 15, § 3170.)

This bill:

1) Establishes a policy in California to recognize participation in organized sports programming in state prisons as a form of rehabilitation.

2) Requires CDCR to adopt a department-wide policy on organized sports programming to be applied to all CDCR facilities by July 1, 2027.

3) Requires CDCR to consult with a wide range of stakeholders when creating the policy, including researchers and experts in sports and rehabilitation, criminal

justice reform organizations, professional and semi-professional sports teams and leagues, CDCR staff, and organizations representing incarcerated persons and their families.

4) Requires CDCR to consider the following topics when adopting the policy:

   a) The safety of CDCR staff, incarcerated persons, and other participants;
   b) The appropriate use of CDCR resources and facilities by incarcerated persons;
   c) Eligibility requirements for participation; and
   d) Broader impacts to public safety.

5) Permits CDCR to solicit proposals, accept unsolicited proposals, negotiate, and enter into agreements with public and private entities, including professional sports teams, the University of California, the California State University, the California Community Colleges, and private universities for the purpose of expanding access to organized sports programming at CDCR facilities.

6) Establishes the Second Chance Sports Fund within the State Treasury and requires:

   a) Funds deposited into the fund to be available, upon appropriation and approval of the Government Operations Agency, to support the expansion of organized sports programming at facilities operated by CDCR;
   b) The Government Operations Agency to seek advisement from the Legislature and CDCR on how to prioritize the use of the funds, and to approve the uses of the moneys;
   c) The fund to receive money from any source, including private donations;
   d) The funds to supplement, not replace, existing funding for recreational sports programming at CDCR; and
   e) No more than 5 percent of the funds to be used for administrative purposes.

7) Requires the State Treasurer to provide a report to the Legislature on the amounts deposited into the fund before January 1, 2028, and annually thereafter.

8) States that the provisions of this bill will remain operative until January 1, 2030, or until the funds appropriated pursuant to this bill are exhausted, whichever occurs first.

9) Includes legislative findings and declarations.

Background

Although there is limited research on the positive impact of sports programming, there are some studies that suggest structured sports programming in correctional settings may support improvements in institutional behavior, mental health, and post-release outcomes for incarcerated individuals. For example, the Twinning Project, a partnership between correctional systems and professional soccer clubs in England and Wales, was recently evaluated in collaboration with researchers at the University of Oxford. The evaluation found that participation in their soccer-based programming was associated with a significant reduction in disciplinary infractions, as well as increased social bonding and optimism regarding post-release outcomes.

More broadly, a systematic review and meta-analysis of sports-based interventions found that participation in such programs was associated with moderate improvements across a range of outcomes, including recidivism, anger control, substance use, and attitudes toward offending. Additional research suggests that sports participation may contribute to improved mental health outcomes among incarcerated individuals, including reduced stress, improved emotional regulation, and increased social connection.

Existing regulations already provide for rehabilitative programming, including recreational and physical activities. (Cal. Code Regs., tit. 15, § 3220.) CDCR currently states on its website that "Physical Education and Recreation programs are provided at each institution." Additionally, existing regulations provide that incarcerated persons may participate in athletic activities, contests, and games, even with outside organizations, so long as the program is authorized by institutional leadership. (Cal. Code Regs., tit. 15, § 3220, subd. (f).) CDCR also permits access to approved visitors and outside organizations, including for the provision of recreational programs and activities, subject to institutional security requirements. (Cal. Code Regs., tit. 15, § 3220, subd. (e).)

This bill seeks to expand access to organized sports programming in state prisons by directing CDCR to develop a department-wide policy, facilitate partnerships with outside organizations, and establish a fund to support such programming. The bill is intended to increase opportunities for incarcerated persons to participate in structured athletic activities through collaboration with public and private entities, including colleges, universities, and professional sports teams. Specifically, the bill is intended to create more opportunities for incarcerated individuals to participate

in programs like the San Quentin Giants, where outside organizations visit the prisons for sports programming.

The primary effect of this bill is to require CDCR to formalize and standardize a policy on organized sports programming and to consult with specified stakeholders in doing so. While the bill encourages expanded collaboration with outside entities and establishes a funding mechanism to support such efforts, it does not mandate that CDCR enter into specific partnerships, implement particular programs, or ensure that organized sports involving outside participants are available at a specific number of facilities.

Therefore, while the bill may provide additional structure, guidance, and potential funding opportunities for organized sports programming, its practical impact will largely depend on how CDCR exercises its existing discretion to implement and expand existing recreational sports programs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

The Senate Appropriations Committee writes:

> Moderate to significant costs to CDCR to establish the Second Chance Sports Act (General Fund). Unknown annual costs to CDCR and the Gov Ops Agency to establish and operate organized sports programming (private).

California Public Defenders Association
Ella Baker Center for Human Rights
Sacramento Mayor Kevin McCarty
San Quentin Skunkworks
Smart Justice California

OPPOSITION: (Verified 8/21/26)

None received

ARGUMENTS IN SUPPORT:

Smart Justice California writes:

> AB 2204 would direct the California Department of Corrections ("CDCR") to establish a policy on organized sports, in collaboration with researchers, nonprofits, athletic organizations, and correctional line staff. The legislation would allow CDCR to collaborate with public and private entities, such as colleges and universities or professional sports teams, to implement this sports policy. Additionally, the legislation would establish a state fund to support the expansion of rehabilitative sports programs. The fund would be able to receive donations from a variety of sources, including private philanthropy, further facilitating public-private partnerships like those at San Quentin Rehabilitation Center.
>
> By providing additional support, investment, and collaboration, AB 2204 will provide meaningful opportunities for incarcerated people to participate in sports. Not only will this improve physical and mental health at CDCR facilities, but it will also help improve outcomes for our state's incarcerated population, helping to make California a safer place.

SUBJECT: Hunting tags: transfer: youth program

SOURCE: Author

DIGEST: This bill requires the California Fish and Game Commission to establish a hunting tag transfer program for pronghorn antelope, elk, deer, bear, or bighorn sheep tags from a parent, grandparent, or legal guardian to a youth, as provided.

ANALYSIS:

Existing law:

1) Establishes the California Fish and Game Commission (commission) and the department in the California Natural Resources Agency.

2) Requires the commission to determine the form of all licenses, permits, tags, reservations, and other entitlements issued pursuant to the Fish and Game Code, and the method of carrying and displaying all licenses, and requires the department to prepare and issue all licenses, permits, tags, reservations, and other entitlements, as provided. Requires both the commission and the department to establish fees in an amount sufficient to recover all reasonable administrative and implementation costs of the department and commission relating to the program for which the fee is paid. (Fish and Game Code (FGC) §1050)

3) Declares the legislative intent that the costs of hunting and sport fishing programs shall be provided out of hunting and sport fishing revenues and reimbursements and federal funds received for hunting and sport fishing programs, and other funds appropriated by the Legislature for this purpose, as specified. (FGC §711)

4) Authorizes the commission to set regulations for and authorizes a licensed hunter to obtain a tag to take pronghorn antelope, elk, deer, bear, and bighorn sheep, as specified. (FGC §§331, 332, 4332, 4751, 4902)

5) Requires a resident or nonresident to be issued a hunting license upon payment of a specified fee, as provided. (FGC §3031)

6) Creates the Big Game Management Account within the Fish and Game Preservation Fund; requires fees from the sale of antelope, elk, deer, bear, and sheep tags, and wild pig validations to be deposited in the Big Game Management Account; and requires the collected fees to be used, upon appropriation, to benefit applicable species and public hunting programs, among other related uses. (FGC §3953)

7) Makes it unlawful to:

   a) Take or possess a bird, mammal, fish, reptile, or amphibian except as provided by the Fish and Game Code or applicable regulations, as specified. (FGC §§2000, 2002)

   b) Transfer licenses, tags, validations, permits, applications, or reservations to another person. (FGC §1052)

   c) Use or possess any license, tag, validation, permit, application, or reservation not lawfully issued to the user. (FGC §1052)

   d) Hunt any game bird or mammal without having the required licenses, tags, and/or stamps in possession. (FGC §1054.2)

This bill:

1) Requires the commission to establish a hunting tag transfer program that authorizes a person to transfer a tag subject to the following conditions:

   a) Requires the transferor to transfer a tag issued for pronghorn antelope, elk, deer, bear, or bighorn sheep, as provided.

b) Requires the transferor to be the parent, legal guardian, or grandparent of the person to whom the tag is transferred.

c) Requires the transferee to be 17 years of age or younger, in possession of a valid hunting license, and is otherwise eligible to obtain the applicable tag on the date of the transfer.

d) Requires the transferee to be accompanied during the take authorized by the tag by their parent, legal guardian, or grandparent, or any combination of those persons.

e) Requires that a transferee not lose any preference points for the particular species as a result of the transfer of the tag if the tag was obtained through a modified-preference point drawing, as provided.

f) Authorizes the transferor to transfer a tag for a particular species that may be drawn only once. Requires the ineligibility to draw another tag for that species to apply to the transferor, not the transferee.

2) Requires the department to collect a fee from the transferor to cover the reasonable cost of transferring a tag and requires the department to deposit the revenues into the Big Game Management Account, as provided.

3) Requires the commission to adopt regulations to implement the hunting tag transfer program described in 1) and 2) above.

4) Sunsets the tag transfer program on January 1, 2033, as provided.

[NOTE: For additional information regarding this bill, see the Senate Natural Resources and Water Committee's analysis.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- One-time costs below $150,000 (General Fund) for the California Department of Fish and Wildlife (CDFW) to develop and implement a hunting tag transfer program that authorizes a person to transfer a tag issued for the take of specified species to their child or grandchild, subject to specified conditions.

- Potential increased fee revenues of an unknown amount not to exceed CDFW costs for administration (Big Game Management Account).

ARGUMENTS IN SUPPORT: According to the author, "Assembly Bill 2207 focuses on improving access to hunting opportunities for families […]. This bill is about making sure the traditions of hunting do not fade away, especially for the next generation. If an adult in the family draws a tag but can't use it, AB 2207 would allow them to pass that opportunity down to a young hunter in the same hunt—so that chance to learn and participate does not go to waste. This bill would make it easier for young hunters to get out in the field with their dad or grandpa—learning the skills, the respect for the land, and the stories that come with it. This bill helps keep California's hunting heritage alive."

SUBJECT: Postsecondary education: sexual harassment, harassment, intimidation, and bullying policies: student training

SOURCE: Survivors + Allies

DIGEST: This bill expands the definition of sexual harassment by adding that it includes technology-facilitated sexual harassment, stalking, and sextortion. This bill expands the definition of sexual exploitation by adding that it includes the creation, generation, or distribution of digitized sexually explicit materials without the written consent of the depicted individual or individuals of each such act.

Senate floor amendments of 8/21/26 (1) delay implementation of the provisions of this bill to August 1, 2027; (2) remove definitions for "cyber sexual bullying",

"cyber stalking", "doxing", "electronic act", and "written consent"; (3) add a definition for "stalking" consistent with federal law; (4) clarify the definition of "sexual exploitation"; (5) add "stalking" and "sextortion" to the definition of "sexual harassment"; and (6) other technical and clarifying changes.

ANALYSIS:

Existing federal law:

1) Establishes Title IX, providing that, in part, "no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any educational program or activity receiving Federal financial assistance." (United States Code (USC) Title 20, Chapter 38, § 1681 (commonly known as Title IX))

2) Defines stalking as engaging in a course of conduct directed at a specific person that could cause a reasonable person to: a) fear for his or her safety or the safety of others, or b) suffer substantial emotional distress. (USC Title 34, Chapter 121, § 12291)

3) Defines sexual harassment as a form of sex discrimination and as conduct on the basis of sex that satisfies at least one of the following:

   a) *Quid pro quo harassment*. An employee of the postsecondary education institution conditions aid, benefit, or services to a postsecondary education institution's education program or activity on the individual's participation in unwelcome sexual conduct.

   b) *Hostile environment harassment.* Unwelcome conduct determined by a reasonable person to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the recipient's education program or activity.

   c) *Specific offenses.* Sexual assault, dating violence, domestic violence, and stalking, as defined in the USC. (Code of Federal Regulations (CFR), Title 34, Subtitle B, Chapter 1, Part 106, Subpart A, § 106.2)

Existing state law:

1) Defines the following terms:

a) "Affirmative consent" as affirmative, conscious, and voluntary agreement to engage in sexual activity. (Education Code (EC) § 67386)

b) "Sexual harassment" as unwelcomed sexual advances, requests for sexual favors, and other verbal, visual, or physical conduct of a sexual nature made by someone from or in the work or educational setting in which specific conditions are met. "Sexual harassment" also includes sexual battery, sexual violence, and sexual exploitation.

c) "Sexual violence" as physical sexual acts perpetrated against a person without the affirmed consent of the person, and these acts include rape and sexual battery.

d) "Sexual exploitation" means a person taking sexual advantage of another person for the benefit of anyone other than that person without that person's consent, including, but not limited to: prostituting or trafficking of another person, or the nonconsensual recording or distribution of images or audio of another person's sexual activity or intimate parts. (EC § 66262.5)

2) Requires each postsecondary educational institution that receives state financial assistance, beginning on September 1, 2024, to annually train its students on sexual violence and sexual harassment, and consider updating the annual training every two years thereafter beginning September 1, 2026. (EC § 67385.7)

3) Requires the governing board of the community college district (CCD) and the Trustees of the California State University (CSU), and requests of the Regents of the University of California (UC) and governing boards of independent colleges and universities that receive state financial assistance, as part of the hiring process for an appointment to an academic, athletic, or administrative position with their respective campuses, to:

a) Require an applicant to disclose any final administrative or judicial decision issued within the last 7 years from the date of submission of the application determining that the applicant committed sexual harassment, and permit applicants to disclose if they have filed an appeal with the previous employer or with the United States Department of Education.

b) Require the campuses, if an applicant reaches the final stages of the application process for the specified position, to use a specified signed

release form to engage in a reasonable attempt to obtain information from the previous employer concerning any substantiated allegations of misconduct. (EC §§ 87604.5, 89521, 92612.1, and 66281.9)

4) Provides that a depicted individual has a cause of action against a person who does any of the following:

   a) Creates and intentionally discloses digitized sexually explicit material portraying the depicted individual, and the person knows, or reasonably should know, that the depicted individual in that material did not consent to its creation or disclosure or was a minor when the material was created.

   b) Intentionally discloses digitized sexually explicit material portraying the depicted individual that the person did not create, and the person knows, or reasonably should know, that the depicted individual in that material did not consent to the creation of the digitized sexually explicit material or was a minor when the material was created. (Civil Code § 1708.86)

This bill:

1) Delays implementation of the provisions of this bill to August 1, 2027.

2) Adds the following definitions and stipulations:

   a) "Depicted individual" means an individual who is portrayed in sexually explicit material.

   b) "Digitization" means a process by which any of the following are realistically depicted: i) the nude body parts of another human being as the nude body parts of the depicted individual, ii) computer-generated nude body parts as the nude body parts of the depicted individual, and iii) the depicted individual engaging in sexual conduct in which the depicted individual did not engage.

   c) "Digitized sexually explicit material" means any portion of a visual or audiovisual work created or substantially altered through digitization, including an image, that shows the depicted individual in the nude or appearing to engage in, or being subjected to, sexual conduct.

d) "Sextortion" means a threat to use sexual or intimate images or videos, however obtained, to compel another person to produce sexual or intimate images or videos, engage in sexual acts, or provide anything of value.

e) "Sexual conduct" means any of the following: i) masturbation; ii) sexual intercourse; iii) sexual penetration of the vagina or rectum by, or with, an object; iv) the transfer of semen by means of sexual conduct from the penis directly onto the depicted individual as a result of ejaculation; and v) sadomasochistic abuse involving the depicted individual.

f) Expands the definition of "sexual exploitation" by adding that it includes:

   i) The creation or generation of digitized sexually explicit materials without the depicted individual's written consent.

   ii) The distribution of digitized sexually explicit materials, if the individual distributing the materials knows or should have known that the depicted individual did not provide written consent to the disclosure.

g) Expands the definition of "sexual harassment" by adding that it includes stalking, sextortion, and technology-facilitated sexual harassment.

h) "Stalking" means engaging in a course of conduct directed at a specific person that could cause a reasonable person to do either of the following: i) fear for their safety or the safety of others, or ii) suffer substantial emotional distress.

i) "Technology-facilitated sexual harassment" means sexual harassment that occurs on, or is facilitated by, digital platforms or digital technologies.

3) Provides updated definitions of sexual harassment and sexual violence, as appropriate, for the following:

   a) Requiring the governing board of CCDs and Trustees of the CSU, and requesting of the Regents of the UC and governing boards of independent colleges and universities, that applicants to disclose if they have committed sexual harassment.

   b) Requiring the governing board of CCDs and Trustees of the CSU, and requesting of the UC, to provide educational and preventive information

about sexual violence to students at all campuses of their respective segments and to provide annual training on sexual violence and sexual harassment.

c) Requiring CCC and CSU campuses, and requests of UC campuses, to develop policies to encourage students to report any campus crimes involving sexual violence.

Comments

1) *Need for the bill.* According to the author, "The definition of "sexual harassment" in California's Education Code was developed before generative artificial intelligence tools became widely available. As a result, higher education institutions lack uniform standards for defining, investigating, and remediating technology-facilitated sexual harassment. AB 2212, the HEAR Survivors Act, updates the definition of "sexual harassment" in the Education Code to account for modern digital technologies, and requires that California's higher education institutions adopt and publish policies addressing technology-facilitated sexual harassment. Updating these terms and policies in the Education Code promotes consistent campus responses, reduces stigma, and reinforces that digital abuse is no less serious than offline misconduct."

2) *This bill expands definitions of sexual harassment and sexual exploitation.* AB 2212 intends to address sexual harassment that is aided or facilitated through the internet, smartphones, and the rise of generative artificial intelligence, including the availability of free and widespread text-to-image models that can quickly generate digital images with a written prompt.

   This bill uses existing definitions from the Education Code and other Codes and consolidates them in one section under the Equity in Higher Education Act. Though many of these definitions are not new to state law or to the Education Code, this is the first time they are being considered as part of the definition of sexual harassment and sexual exploitation on college campuses.

   At a high level, this bill expands the definitions of sexual harassment and sexual exploitation and requires these expanded definitions be included in a postsecondary educational institution's annual training for students, updating and posting educational and preventive information on sexual violence, and updating employment and hiring processes to require applicants to disclose if they have committed sexual harassment.

a) For "sexual harassment", this bill expands the definition by adding that it includes a new type of sexual harassment defined as technology-facilitated sexual harassment, which is sexual harassment that occurs on, or is facilitated by, digital platforms or digital technologies. This bill also adds stalking and sextortion to the definition of sexual harassment.

   i) For "stalking", this definition is consistent with the federal Clery Act, which requires colleges and universities to report campus crime data, support victims of violence, and publicly outline the policies and procedures put in place to improve campus safety. This bill adds stalking as a form of sexual harassment.

   ii) For "sextortion", this is defined elsewhere in the Education Code by AB 2932 (Joe Patterson, Chapter 118, Statutes of 2024), which requires the Instructional Quality Commission (IQC) to consider including content on sextortion in the health curriculum framework. This bill adds sextortion as a form of sexual harassment.

b) For "sexual exploitation", this bill expands the definition by adding the creation, generation, or distribution of digitized sexually explicit materials without a depicted person's written consent.

3) *Standards of affirmative consent and written consent.* Existing state processes for the prevention of sexual harassment on college campuses generally use an affirmative consent standard, which is currently defined in the Education Code as affirmative, conscious, and voluntary agreement to engage in sexual activity. This bill largely references affirmative consent consistent with existing Education Code; however, this bill expands the definition of sexual exploitation by including the creation, generation, or the distribution of digitized sexually explicit materials without the depicted individual's *written consent*. This requirement is consistent with language in the Civil Code; specifically, SB 621 (Bauer-Kahan, Chapter 673, Statutes of 2025) provides that a depicted individual (known as a person who is portrayed in sexually explicit material) has a cause of action against a person who creates and intentionally discloses digitized sexually explicit material portraying the depicted individual if the depicted individual did not provide *written consent*. Colleges and universities would need to reconcile the two different consent standards depending on the type of misconduct, which will likely require widespread student, faculty, and staff training and education.

Related/Prior Legislation

AB 621 (Bauer-Kahan, Chapter 673, Statutes of 2025) fortifies existing law providing a cause of action to persons depicted in nonconsensual, sexually explicit, digitized material.

SB 493 (Jackson, Chapter 303, Statutes of 2020) requires postsecondary institutions to adopt rules and procedures for the prevention of sexual harassment, and adopt and post on their websites the grievance procedures to resolve complaints of sexual harassment.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee on the version of this bill amended on August 13, 2026:

- The UC estimates General Fund implementation costs in the mid-hundreds of thousands annually. This estimate assumes that an additional .5 FTE at each location at a cost of $700,000 ($75,000 x 10 campuses) would be required to support increased workload and administrative costs to manage complex dual-track case evaluations, as compliance officers must manually vet and cross-reference every report against existing federal frameworks, expanded state statutory criteria, and campus policies. The UC also notes there would be modest one-time resource and financial impacts for staff training on new and expanded definitions, required updates to campus orientations and training modules, and actions required to ensure accessibility and appropriate translations.

- The CSU estimates one-time General Fund costs in the low hundreds of thousands of dollars for various administrative activities necessary to implement the bill's provisions, including the updating of its systemwide nondiscrimination policy to include the new definitions, and ensuring that student conduct policies regarding bullying cover what is specified in the bill. The CSU also estimates minor, ongoing costs for providing information related to bullying, harassment, and intimidation at new student orientations.

- The Chancellor's Office for the California Community Colleges estimates that the costs to community college districts would likely be minor.

SUBJECT: Personal Income Tax Law and Corporation Tax Law: credits: local news outlets: business expense deduction: excessive employee remuneration

SOURCE: Rebuild Local News

DIGEST: This bill authorizes a refundable credit under the Personal Income and Corporation Taxes for local news outlets to hire journalists working in California; and conforms to recent federal changes to the Internal Revenue Code (IRC) Section 162(m), relating to the deductibility of certain excessive employee remuneration.

Senate Floor Amendments of 8/21/26 (1) Add cross-references to new paragraphs added to the tentative minimum tax (TMT) under the Corporate Tax Law; and (2) Make technical amendments replacing "local news organizations" with "local news outlets."

Senate Floor Amendments of 8/20/26 (1) Add the measure's credit onto the list of credits that can reduce tax below the Tentative Minimum Tax under both the

Personal Income and Corporation Taxes; (2) Add the measure's credit into provisions of law that set the order in which taxpayers can claim credits; (3) Add a definition for "annualized wages, salary or passthrough income;" (4) Set a deadline of January 1, 2028, for the Franchise Tax Board (FTB) to issue guidance for nonprofit organizations to claim the credit; (5) Clarify the administration of the credit for nonprofit organizations by stating that the credit can reduce the tax imposed on unrelated business taxable income; and (6) Make additional technical and conforming changes.

ANALYSIS:

Existing federal law:

1) Allows, pursuant to IRC 162, a deduction for the ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business, including a reasonable allowance for salaries or other compensation for personal services actually rendered.

2) Disallows, pursuant to IRC Section 162(m), a deduction by any publicly held corporation for applicable employee remuneration that is otherwise deductible with respect to any covered employee to the extent that such remuneration for the taxable year exceeds $1 million.

3) Applies a controlled-group aggregation rule to the IRC 162(m) deduction limitation, for taxable years beginning after December 31, 2025, as follows (One Big Beautiful Bill Act (OBBBA) of 2025, Section 70603):

   a) If a publicly held corporation is part of a controlled group under IRC 414, compensation paid by all controlled-group members to a specified covered employee is aggregated for purposes of the $1 million limitation.

   b) The allowable deduction is allocated among group members in proportion to the remuneration each member paid.

4) Defines a "covered employee," for the purposes of IRC 162, as an "employee of the taxpayer" if such employee meets one of the following criteria (Tax Cuts and Jobs Act of 2017 (TCJA), Section 13601):

a) The employee is the principal executive officer (PEO) or principal financial officer (PFO) of the taxpayer at any time during the taxable year, or was acting in such a capacity;

b) The total compensation of the employee for the taxable year is required to be reported to shareholders under the Securities Exchange Act of 1934 (Exchange Act) by reason of the employee being among the three highest compensated officers for the taxable year;

c) The individual was a covered employee of the taxpayer (or any predecessor) for any preceding taxable year beginning after December 31, 2016.

5) Expands the definition of a covered employee to include any employee of the taxpayer whose total compensation for the taxable year places the individual among the three highest compensated officers for the taxable year (other than any individual who is the PEO or PFO of the taxpayer at any time during the taxable year, or was an individual acting in such a capacity) even if the compensation of the officer is not required to be reported to shareholders under the Exchange Act (TCJA, Section 13601).

6) For taxable years beginning after December 31, 2026, the expanded definition of a covered employee applies to the five highest paid employees (American Rescue Plan Act of 2021 (ARPA), Section 9708).

7) Establishes an Alternative Minimum Tax (AMT) calculation, which is owed on the excess amount of TMT that is greater than the regular tax owed by the taxpayer. The AMT exists to ensure that taxpayers cannot significantly reduce their tax liability in the regular system. The TMT is calculated with fewer deductions than the regular tax.

Existing state law:

1) Does not automatically conform to changes made by Congress to the Internal Revenue Code, except for changes to pension and retirement programs; instead, the Legislature must affirmatively conform state law to federal to ensure consistent treatment for the same items.

2) Conforms to the IRC as of January 1, 2025, with modifications (SB 711, McNerney, Chapter 231, Statutes of 2055).

3) Conforms to IRC 162(m) as of the specified date, January 1, 2025, with modifications.

4) Does not conform to the expanded definition of covered employee or the controlled group aggregation rule in ARPA and OBBBA.

5) Conforms, with modification, to IRC 55-59, pertaining to the AMT and TMT.

6) Prohibits, generally, taxpayers from using tax credits against the Personal Income and Corporation Taxes to reduce their tax liability under the tentative minimum tax; a part of the alternative minimum tax. However, the Legislature has allowed several credits to do so, such as the Motion Picture Production Credit 4.0 and the elective refundable credit for the business credit limitation.

7) Requires credits allowed against the net tax under the Personal Income Tax to be applied in a specified order, including applying credits that reduce the regular tax below the TMT.

8) Allows various income tax credits and deductions, as well as sales and use tax exemptions.

9) Limits the total of all business credits, including credit carry forwards, to $5 million or 50% of liability, whichever is greater, commencing in the 2024 taxable year and ending before the 2030 taxable year, after which limits credits to $5 million or 75% of liability, whichever is greater, with some exceptions (SB 167, Committee on Budget & Fiscal Review, Chapter 34, Statutes of 2024 and SB 122, Committee on Budget & Fiscal Review, Chapter 23, Statutes of 2026). Taxpayers can make an irrevocable election to receive an annual refundable credit claimed in future tax years for business credits equal to credit amounts not claimed due to the limitation.

This bill:

1) Conforms state tax law to two recent federal changes made to IRC 162(m): the expanded definition of covered employee enacted by ARPA, and the controlled group aggregation rule enacted by OBBBA.

2) Adds the refundable credit for local news outlets to the list of tax credits that can reduce tax below TMT.

3) Places its credit at the end of the list set within state law establishing the order in which taxpayers can claim credit under the Personal Income Tax.

4) Authorizes, for taxable years beginning on or after January 1, 2027, and before January 1, 2032, a refundable credit under the Personal Income and Corporation Taxes to a local news outlet, equal to:

   a) $20,000 for each qualifying journalist continuously employed on a full-time basis, as defined, by the qualified taxpayer, not to exceed five journalists.

   b) $15,000 for each qualifying journalist continuously employed on a full-time basis in excess of five journalists employed by the qualified taxpayer.

   c) An additional $15,000 for each qualifying journalist employed on a full-time basis in a new journalism position.

   d) An additional $7,500 for each qualifying part-time journalist employed on a part-time basis by the qualified taxpayer.

   e) Defines "Qualified Taxpayer" to mean a person or entity engaged in a trade or business within California that owns or operates a local news outlet that satisfies all of the following:

      i) Is organized in this state, or legally registered to conduct business within this state, for at least 12 months prior to the start of the taxable year.

      ii) Operates a qualifying digital news outlet, qualifying broadcast station, or qualifying print publication, as defined;

      iii) Publicly discloses all of its beneficial owners, or its board of directors if the taxpayer is a nonprofit entity, on its internet website or in its publication;

      iv) Carries active media liability insurance coverage for the taxable year;

      v) Maintains and publicly displays an editorial policy for error correction and clarification that includes an accessible process for reporting errors and complaints; and

vi) Is not controlled, either directly or indirectly, by a political action committee or political organizations described in IRC 527; or tax exempt pursuant to IRC 501(c)(4).

f) Defines "taxpayer," for the purposes of the credit under the Corporations Tax Law, to include tax exempt organizations.

g) Defines "on a full-time basis" as employed by, or is the sole proprietor of, a qualified taxpayer on a full-time basis of at least 30 hours per week for more than 26 weeks, with annualized wages, salary, or passthrough income of no less than $35,000 during the taxable year.

h) Defines "on a part-time basis" as employed by a qualified taxpayer for at least 20 hours per week but less than 30 hours per week for more than 26 weeks, with annualized wages or salary of no less than $25,000 during the taxable year.

i) Defines "annualized wages, salary or passthrough income" to mean the wages, salary, or passthrough income paid to or earned by the individual for qualifying employment during the taxable year, divided by the number of weeks of that employment during the taxable year, multiplied by 52.

j) Authorizes the credit, under the Corporations Tax Law, to be applied against any tax liabilities that may be owed by an exempt organization for their unrelated business tax income and specifies that the excess credit shall be refunded to the taxpayer.

k) Requires, by January 1, 2028, the FTB to issue guidance on the administration and enforcement of the credit for tax exempt organizations, including the form and manner in which those organizations shall claim the credit and receive a refund for excess credit.

l) Contains legislative findings and declarations to comply with Section 41 of the Revenue & Taxation Code.

m) Defines additional terms.

5) Makes other technical and conforming changes.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Franchise Tax Board (FTB) estimates that this bill would result in General Fund revenue increases of $9.9 million in 2026-27, $15 million in 2027-28, and $23 million in 2028-29. FTB would incur administrative costs of $434,000 in 2027-28, and minor amounts annually thereafter, to implement the provisions of the bill (General Fund, see Staff Comments).

ARGUMENTS IN SUPPORT: According to the author, "Local journalism plays an essential role in strengthening democracy and civic engagement by ensuring communities have access to reliable information about local government, schools, and public safety. Yet across the country and in California, local news

organizations are facing unprecedented financial challenges that have led to widespread newsroom closures and a dramatic decline in the number of journalists covering local communities. AB 2222 provides targeted relief to local news organizations by creating a refundable tax credit tied directly to the employment of journalists. By helping offset the cost of retaining and hiring reporters, photographers, editors, and other newsroom staff, this bill aims to stabilize local news outlets and encourage greater investment in original reporting that serves California communities. Supporting local journalism means supporting informed communities, stronger civic participation, and greater transparency in government. AB 2222 represents a practical step to help sustain the journalists who provide Californians with the trusted local reporting they depend on every day."

ARGUMENTS IN OPPOSITION: According to the California Chamber of Commerce, "AB 2222 seeks to further conform California law to the federal limitations under Internal Revenue Code Section 162(m) related to governing the deductibility of executive compensation by publicly traded corporations. While CalChamber has no concerns with the development of the journalism tax credit provisions, we have significant concerns with increasing businesses' tax liabilities to fund the new tax credit… While AB 2222 increases conformity with current federal law, it does so by expanding the executive compensation deduction limitation, resulting in permanently nondeductible compensation for affected businesses. These prohibited deductions generally cannot be recovered in future tax years, increasing a business' taxable income without accounting for commonly used compensation arrangements. Executive compensation structures often involve stock-based compensation, deferred compensation arrangements, and multi-year performance incentives. Companies remain obligated to pay compensation that has been agreed upon via multi-year contracts, yet AB 2222 would permanently deny a corresponding tax deduction. This increases the cost of operating in California and reduces resources available for further investments, workforce expansion, and research and development."

SUBJECT: Pupil achievement: State Education Alignment and Impact Plan

SOURCE: California School Boards Association

DIGEST: This bill requires the State Superintendent of Public Instruction (SPI) to convene a working group to develop a State Education Alignment and Impact Plan to support cohesion and collaboration between state level entities and the support that they provide to local educational agencies (LEAs).

ANALYSIS:

Existing law:

1) Establishes the single multiple measures public school accountability system, which must measure the overall performance of numerically significant pupil subgroups in schools, including charter schools, school districts, and county offices of education (COEs). Numerically significant pupil subgroups include: ethnic subgroups, socioeconomic disadvantaged pupils, English learners, long-term English learners, pupils with disabilities, foster youth, and homeless youth. (Education Code (EC) § 52052)

2) Requires Local Control and Accountability Plans (LCAPs) to address how the district will address and improve in eight state priority areas, including pupil achievement as measured by, among other things, the percentage of pupils who have successfully completed courses that satisfy the requirements for entrance to the University of California (UC) and the California State University (CSU), or the completion of career pathways. (EC § 52060)

3) Requires local educational agencies (LEAs) to adopt and annually revise LCAPs. (EC §§ 47604.33, 52060, and 52066)

4) Establishes a single system for providing support (System of Support) to LEAs and schools and for programs established by the federal Every Student Succeeds Act to do all of the following:

   a) Support the continuous improvement of pupil performance within the state priorities;

   b) Address the gaps in achievement between pupil subgroups;

   c) Improve outreach and collaboration with stakeholders to ensure that the goals, actions, and services described in school district and COE LCAPs reflect the needs of pupils and the community, especially for historically underrepresented or low-achieving populations. (EC § 52059.5)

5) Establishes the California Collaborative for Educational Excellence (CCEE), whose purpose is to advise and assist school districts, county superintendents of schools, and charter schools in achieving the goals set forth in their LCAPs. The CCEE is required to achieve this purpose by facilitating continuous improvement for LEAs within California's Statewide System of Supports (SSOS). (EC § 52074)

6) Requires, for any school district for which one or more pupil subgroups meet specified criteria, the county superintendent of schools to provide technical assistance for a minimum of two years following the identification that shall be focused on building the school district's capacity to develop and implement actions and services responsive to pupil and community needs. (EC section 52071(c))

This bill:

1) Requires the SPI, on or before October 1, 2027, to convene a working group to develop a State Education Alignment and Impact Plan, as specified, and requires that the working group consist of all of the following members:

a) The Speaker of the Assembly or the Assembly Member's designee of another member of the Assembly.

b) The President pro Tempore of the Senate or the Senator's designee of another member of the Senate.

c) The President of the State Board of Education (SBE) or the president's designee of another member of the SBE.

d) The Education Commissioner or the commissioner's designee of a deputy commissioner.

e) The Secretary of the California Health and Human Services Agency (CalHHS), or the secretary's designee of a deputy or assistant secretary.

f) The Executive Director of the Commission on Teacher Credentialing (CTC) or the executive director's designee of a deputy director of the commission.

2) Requires the SPI, on or before November 1, 2027, to convene a stakeholder advisory group to solicit feedback and input during the development of the State Education Alignment and Impact Plan. Requires the SPI to meet regularly with the stakeholder advisory group. Requires that the stakeholder advisory group be inclusive and representative of the diversity of the state, and include, but not be limited to, representatives of all of the following:

a) Governing board members of school districts, including small school districts.

b) Members of county boards of education.

c) Education labor organizations.

d) School district and county office of education administrators.

e) Charter schools.

f) School district business officials.

g) Parents of public school pupils.

h) Special education administrators.

i) Educational equity organizations.

j) Public school pupils.

3) Requires the working group established in #1 above to develop a State Education Alignment and Impact Plan that is foundationally based in aligning state efforts to support LEAs. Required that the plan include, but not be limited to, all of the following:

   a) Specific goals and benchmarks for the state to support LEAs in closing the achievement gap, gaps, which shall be developed based on a consideration of the following principles:

      i) Measurable outcome targets for state entities, including, but not limited to, the Governor, the Legislature, the California Department of Education (CDE), the SBE, CalHHS, the CTC, and other applicable state departments that allow for the assessment of the extent to which state entities are collaborating and communicating with each other to better align support for LEAs and not placing undue or unnecessary barriers on LEAs int heir efforts to improve pupil outcomes and close achievement gaps.

      ii) Broadly assessing state-imposed requirements and the extent that those requirements help or inhibit LEAs' efforts to close achievement gaps, including, but not limited to, an assessment of state-adopted policies and determinations of whether the policies result in increased responsibilities for LEAs, create conflict between state entities, and inhibit the state's goal of effectively supporting LEAs to close achievement gaps.

      iii) Funding levels and alignment, including an assessment of restricted and unrestricted funding for local educational agencies, as specified.

      iv) Interagency collaboration among state agencies, departments, and other state entities to avoid programmatic overlap or the provision of inconsistent or conflicting guidance, as specified.

   b) Specific performance targets aimed at creating greater interoperational collaboration and coordination between the SBE, the CDE, the CTC, the CCEE, and other relevant entities.

   c) An assessment of state entities tasked with meeting the state's public education goals and the establishment of roles and actions that the state can take to reduce fragmentation and prevent overlapping guidance and regulations.

   d) Recommendations for specific actions that each state educational entity, including the Governor and the Legislature, can take to reduce the number of

unfunded or partially funded mandates and align state-level operations and initiatives with the principles of local control.

4) Authorizes the working group to use the Education Commissioner's forthcoming findings and recommendations for a second phase of education governance consolidation and streamlining to help inform its work.

5) Prohibits the provisions of this bill from being construed to allow for the establishment of new recommendations of either of the following:

   a) New LEA mandates or allow for the new or revised local accountability structures for LEAs.

   b) New requirements on LEAs or requirements to submit any new or additional report beyond existing federal and state reporting requirements.

6) Requires the workgroup to only rely upon metrics provided through existing statewide data collections, to the maximum extent practicable.

7) Requires the working group to submit the State Education Alignment and Impact Plan to the Governor and the Legislature, as specified, on or before October 1, 2028.

8) Encourages the Assembly Committee on Budget, the Assembly Committee on Education, the Senate Committee on Budget and Fiscal Review, and the Senate Committee on Education to evaluate the state's progress in meeting the benchmarks and goals established in the State Education Alignment and Impact Plan, on or before March 1, 2029, and annually thereafter.

9) Defines "local educational agency" to mean a school district, COE, or charter school.

Comment

1) *Need for the bill.* According to the author, "AB 2225 convenes educators, families, researchers, and policymakers to develop a comprehensive statewide plan with clear goals, benchmarks, and annual performance targets to close achievement gaps and evaluate how well our state education programs are supporting student success.

   "The achievement gap - persistent disparities in academic outcomes between different groups of students, often along lines of income, race, language status,

or access to resources - show up in test scores, graduation rates, and college readiness, and they reflect deeper inequities in opportunity.

"AB 2225 is the first of a package of 4 bills in CSBA's package to address these persistent gaps."

2) *California's state education entities.* This bill establishes a working group and a stakeholder advisory group to develop a State Education Alignment and Impact Plan to align state efforts to support LEAs. The bill requires that the Plan include, among other things, an assessment of the state entities tasked with meeting the state's public education goals as well as recommendations on actions that the state can take to reduce fragmentation and prevent overlapping guidance and regulations.

   California's education ecosystem comprises several entities with distinct objectives that are intended to work together to serve students and schools. They include the following:

   a) The Governor signs legislation and proposes programs and school funding allocations through the state budget.

   b) The Legislature reviews and approves the Governor's budget and passes legislation, including those that establish new programs and initiatives, and define the roles and responsibilities of state and local educational entities.

   c) The SBE serves as a policymaking body appointed by the Governor that is responsible for adopting and approving academic standards, curriculum frameworks, instructional materials, state assessments, and regulations.

   d) The SPI is an elected official who implements laws and programs as head of the CDE. The CDE and the SPI are responsible for administering educational programs; enforcing education laws and regulations; collecting demographic, fiscal, and performance data; providing technical assistance and training; distributing funds; and overseeing COEs and LCAPs.

   e) The CTC develops program standards and accredits educator credential preparation programs; issues teaching and service credentials as well as permits; and administers credential discipline.

   f) The CCEE provides various levels of academic support and technical assistance to LEAs, helping them achieve the goals set forth in their LCAPs and facilitate continuous improvement within the SSOS.

g) The Fiscal Crisis and Management Assistance Team (FCMAT) helps LEAs identify, prevent, and resolve financial, operational, and data management challenges by providing management assistance and professional learning opportunities.

3) *The Local Control Funding Formula*. This bill seeks to address concerns voiced by LEAs that California's existing accountability and governance systems lack cohesion, which, in turn, creates barriers and burdens on their ability to support student outcomes. Much of California's current accountability mechanisms resulted from the state's shift away from a previous education funding model based on rigid categorical programs and highly centralized education programs to one that emphasizes local control—known as the Local Control Funding Formula (LCFF).

   The LCFF was enacted in 2013-14 to simplify school funding and improve student outcomes by giving LEAs more control over how to spend state funding, and providing more resources to meet the educational needs of low-income students, English learners, and foster youth. To provide oversight regarding how LEAs spend LCFF funding and serve students, the state also established a new system of transparency, accountability, and stakeholder engagement through the LCAP, the California Schools Dashboard, the SSOS, and the CCEE. These systems work hand in hand to identify LEAs that need additional assistance in supporting students from historically underserved backgrounds and to monitor their progress in addressing student needs.

4) *Local Control and Accountability Plans.* The LCAP is a three-year plan that describes the goals, actions, services, and expenditures to support positive student outcomes that address state and local priorities. The LCAP provides an opportunity for LEAs (school districts, COEs, and charter schools) to share their stories of how, what, and why programs and services are selected to meet their local needs. LCAPs help ensure that (1) LEAs address the needs of consistently low-performing student groups and (2) higher performing LEAs address the needs of low-performing schools within the LEA.

5) *California School Dashboard*. The Dashboard is an online tool that shares school and LEA performance and progress on both state and local measures that are drawn from the eight priority areas of the LCFF. State measures apply to LEAs, charter schools, and student groups, and are based on data that is collected annually across the state. The state measures are as follows: Academic Performance (reported separately for English language arts and Math assessments); Chronic Absenteeism; College/Career; English Learner Progress;

Graduation Rate; Suspension Rate; and Science. LEAs receive one of five color-coded performance levels on the state indicators. From highest to lowest, the five performance levels are: Blue, Green, Yellow, Orange, and Red.

Local measures apply at the LEA and charter school level and are based on data collected at the local level. Provided an LEA satisfies the performance standards for each local measure, the Dashboard will automatically assign a performance level of Met. If an LEA does not meet the performance standards, the Dashboard will automatically assign a performance level of Not Met or Not Met for Two or More Years, as applicable.

The Dashboard is updated annually. For LEAs and schools in need of additional assistance or intervention to support student achievement, the Dashboard helps identify specific areas in need of targeted assistance.

6) *California Collaborative for Educational Excellence.* The CCEE was established as part of the LCFF to advise and assist LEAs in achieving the goals set forth in their LCAPs and facilitate continuous improvement within the SSOS. The CCEE provides universal, targeted, and intensive supports and resources for LEAs through the work of their three Centers for Educational Excellence:

   a) The Center for Teaching, Learning, and Leading (TTLC)

   b) The Center for Innovation, Instruction, and Impact (I3)

   c) The Center for Transformative Systems (TSEE)

   For more on the types of support provided by the respective centers of the CCEE, please refer to the Senate Education Committee Analysis.

7) *California's Statewide System of Support*. The SSOS was established under the LCFF to provide varying levels of assistance to meet the unique needs of LEAs. This system ensures that all LEAs have access to the resources and support they need to improve student outcomes. The purpose of the SSOS, as articulated in statute, is to build the capacity of LEAs in each of the following ways:

   a) Support continuous improvement of student performance in each of the eight state priority areas, based on Dashboard results;

   b) Address the gaps in achievement between student groups; and

c) Improve outreach and collaboration with stakeholders to ensure that goals, actions, and services described in school district and COE LCAPs reflect the needs of students and the community, especially for historically underrepresented or low-achieving groups.

The SSOS is based on a three-level framework:

- Level 1 - Universal Support: This foundational level of support is available to all districts, charters, COEs, and Special Education Local Plan Area (SELPAs) in California. Universal supports include access to tools and resources, professional learning, and services provided by various technical assistance providers within the SSOS, coordinated by the CCEE and the CDE.

- Level 2 – Targeted/Supplemental Assistance or Differential Assistance (DA): Targeted support is available to LEAs with an identified area of need that meets the eligibility requirements set by the SBE At this level, COEs, the CDE, and the Geographic Lead Agencies (Geo Leads) provide DA to eligible LEAs in the form of individually designed assistance to address identified performance issues, including significant performance disparities among student groups. Targeted supports often include specialized professional learning, coaching, consultation, and/or strategic planning.

- Level 3 – Intensive (Direct Technical Assistance): Intensive support is provided to districts and charters identified as requiring an additional level of hands-on partnership, often due to persistent performance challenges and a lack of improvement over three of the last four consecutive years. Intensive support often involves a collaborative process with the CCEE, COE, SELPA, the CDE, and/or Geo Leads to determine the most effective support strategies. This tier of support may include identifying a technical assistance provider with relevant expertise to work closely with the district or charter to improve student outcomes.

Outside the three levels of support, a referral to the SPI may occur with approval from the SBE if the LEA has failed or is unable to implement the recommendations of the CCEE, or if the LEA's inadequate performance is either so persistent or so acute as to require intervention by the SPI.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The California Department of Education estimates General Fund costs of $188,000 and 1.0 position to convene the working group to develop the CTAG Plan.

SUBJECT: Farm labor contractors: surety bonds

SOURCE: California Farmworker Coalition
California Rural Legal Assistance Foundation

DIGEST: This bill increases the amount of a surety bond that a farm labor contractor (FLC) is required to deposit to the Labor Commissioner in order to obtain a FLC license, as specified. This bill also requires the Labor Commissioner to include the bond information on the public FLC license database, as specified, and disclose information about the availability of the bond and the process to access the bond to any worker that has filed a claim against an FLC.

ANALYSIS:

Existing federal law:

1) Establishes, under the federal Migrant and Seasonal Agricultural Worker Protection Act (MSPA), employment standards for migrant and seasonal farmworkers related to wages, housing, transportation, disclosures and recordkeeping. The MSPA also requires farm labor contractors to register with

the U.S. Department of Labor. (29 U.S.C. Sections 1801, et seq.; 29 C.F.R. Part 500.)

Existing state law:

1) Establishes within the Department of Industrial Relations (DIR), various entities including the Division of Labor Standards Enforcement (DLSE) under the direction of the Labor Commissioner, and empowers the Labor Commissioner with ensuring a just day's pay in every workplace and promotes economic justice through robust enforcement of labor laws. (Labor Code §79-107)

2) Requires the Labor Commissioner to issue a license to any person acting as a *farm labor contractor (FLC)*, as specified, and establishes civil penalties for any person who violates these provisions. (Labor Code §1683)

   a) Prohibits the Labor Commissioner from issuing a license to a person to act as an FLC, or renewing that license, until specified conditions are met, including a written application, a surety bond, and a license fee, as specified. (Labor Code §1683-1699)

   b) Specifies that the FLC must deposit a surety bond with the Labor Commissioner in an amount based on the size of the person's annual payroll for all employees, as follows: (Labor Code §1684)

      i) For payrolls up to five hundred thousand dollars ($500,000), a twenty-five-thousand-dollar ($25,000) bond.

      ii) For payrolls of five hundred thousand dollars ($500,000) to two million dollars ($2,000,000), a fifty-thousand-dollar ($50,000) bond.

      iii) For payrolls greater than two million dollars ($2,000,000), a seventy-five-thousand-dollar ($75,000) bond.

         (1) Provides that for purposes of this paragraph, the Labor Commissioner must require documentation of the size of the person's annual payroll, which may include, but is not limited to, information provided by the person to the Employment Development Department, the Franchise Tax Board, the Division of Workers' Compensation, the insurer providing the licensee's workers' compensation insurance, or the Internal Revenue Service.

(2) Specifies that if the contractor has been the subject of a final judgment in a year in an amount equal to or greater than the amount of the bond required, they are required to deposit an additional bond within 60 days.

(3) Specifies that all bonds, as required, must be payable to the people of the State of California and are conditioned upon the farm labor contractor's compliance, as specified. The bond is also payable for interest on wages and for any damages arising from violation of orders of the Industrial Welfare Commission, and for any other monetary relief awarded to an agricultural worker as a result of a violation, as specified.

2) Defines a "farm labor contractor" as any person who, for a fee, employs workers to render personal services in connection with the production of any farm products to, for, or under the direction of a third person, or who recruits, solicits, supplies, or hires workers on behalf of an employer engaged in the growing or producing of farm products, and who, for a fee, provides in connection therewith one or more of the following services: furnishes board, lodging, or transportation for those workers; supervises, times, checks, counts, weighs, or otherwise directs or measures their work; or disburses wage payments to these persons. (Labor Code §1682)

   a) Specifies that "farm labor contractor" includes any "day hauler." "Day hauler" means any person who is employed by a farm labor contractor to transport, or who for a fee transports, by motor vehicle, workers to render personal services in connection with the production of any farm products to, for, or under the direction of a third person.

   b) Specifies that "farm labor contractor" does not include a commercial packing house engaged in both the harvesting and the packing of citrus fruit or soft fruit for a client or customer.

3) Requires, on and after July 1, 2016, a person acting as a *foreign labor contractor* to register with the Labor Commissioner, as specified. (Business and Professions Code §9998.1.5)

   a) Prohibits the Labor Commissioner from registering a person to act as a foreign labor contractor, or renewing a registration, until specified conditions are met, including a written application, a surety bond, and a registration fee.

b) Specifies that a foreign labor contractor must deposit with the Labor Commissioner a surety bond in an amount based on the size of the person's annual gross receipts from operations as a foreign labor contractor, as follows:

i) For gross receipts up to five hundred thousand dollars ($500,000), a fifty-thousand-dollar ($50,000) bond.

ii) For gross receipts of five hundred thousand dollars ($500,000) to two million dollars ($2,000,000), a one-hundred-thousand-dollar ($100,000) bond.

iii) For gross receipts greater than two million dollars ($2,000,000), a one-hundred-fifty-thousand-dollar ($150,000) bond.

(1) Specifies that if the foreign labor contractor has been the subject of a final judgment in a year in an amount equal to that of the bond required, that contractor is required to deposit an additional bond within 60 days. The bond must be payable to the people of the State of California and must be conditioned on the foreign labor contractor compliance, as specified. The bond must also be payable for interest on wages and for any damages arising from violation of applicable orders of the Industrial Welfare Commission, and for any other monetary relief awarded to a foreign worker as a result of a violation of law by the foreign labor contractor.

4) Provides that a person must not act as a farm labor contractor until a license to do so has been issued to the person by the Labor Commissioner and the license is in full force and effect and in the person's possession.

a) Provides that a person who violates this section, as specified, is subject to a civil penalty as follows:

i) For any initial citation, one hundred dollars ($100) for each farmworker employed by the unlicensed person, plus one hundred dollars ($100) for each calendar day that a violation occurs, for a total penalty not to exceed ten thousand dollars ($10,000).

ii) For a second citation, two hundred dollars ($200) for each farmworker employed by the unlicensed person, plus two hundred dollars ($200) for each calendar day that a violation occurs, for a total penalty not to exceed twenty thousand dollars ($20,000).

iii) For a third or subsequent citation, five hundred dollars ($500) for each farmworker employed by the unlicensed person, plus five hundred dollars ($500) for each calendar day that a violation occurs, for a total penalty not to exceed fifty thousand dollars ($50,000).

(1) If, upon inspection or investigation, the Labor Commissioner determines that a person has violated this section, the Labor Commissioner shall issue a citation, as specified.

(2) The civil penalties collected pursuant to this section must be deposited into the Farmworker Remedial Account and shall be available, upon appropriation by the Legislature, as specified.

(3) The specified civil penalties are in addition to any other penalty provided by law.

This bill:

1) Makes the following changes to the surety bond requirement for a person to obtain from the Labor Commissioner a license to act as an FLC:

   a) Requires a person to deposit with the Labor Commissioner a surety bond in an amount based on the size of the person's annual payroll, for all employees, as follows:

      i) For gross receipts up to five hundred thousand dollars ($500,000), a fifty-thousand-dollar ($50,000) bond.

      ii) For gross receipts of five hundred thousand dollars ($500,000) to two million dollars ($2,000,000), a one-hundred-thousand-dollar ($100,000) bond.

      iii) For gross receipts greater than two million dollars ($2,000,000), a one-hundred-fifty-thousand-dollar ($150,000) bond.

      iv) Requires the bond amounts described above to be deposited when a FLC first registers or files the application for their first annual renewal.

2) Requires the Labor Commissioner to include bond information on the public FLC license database, including the bond number, effective and expiration dates, bond size, and contact information for the surety company for all active bonds for the previous five years.

3) Requires the Labor Commissioner to disclose information about the availability of the surety bond and the process to access the surety bond to any worker that has filed a claim against an FLC.

4) Makes the following changes to the civil penalties for a person who violates the farm labor contractor license requirements, as follows:

   a) For any initial citation, one hundred dollars ($100) for each farmworker employed by the unlicensed person *or licensed farm labor contractor*, plus one hundred dollars ($100) for each calendar day that a violation occurs, for a total penalty not to exceed ten thousand dollars ($10,000).

   b) For a second citation, two hundred dollars ($200) for each farmworker employed by the unlicensed person *or licensed farm labor contractor*, plus two hundred dollars ($200) for each calendar day that a violation occurs, for a total penalty not to exceed twenty thousand dollars ($20,000).

   c) For a third or subsequent citation, five hundred dollars ($500) for each farmworker employed by the unlicensed person *or licensed farm labor contractor*, plus five hundred dollars ($500) for each calendar day that a violation occurs, for a total penalty not to exceed fifty thousand dollars ($50,000).

Background

Farmworkers and Wage Theft. California produces over 400 commodities including nearly half of the nation's vegetables and over three-quarters of the nation's fruits and nuts.[1] California is home to an estimated 400,000 farm workers that are the backbone to this country's agricultural system. Although California (and the rest of the nation) relies on the important work of farm workers, they tend to earn some of the lowest wages in the labor market and they also experience wage theft and other workplace abuses all too often.

A report by the Economic Policy Institute in 2020 found that employers violate federal wage and hour laws designed to protect farm workers and investigations have found millions in wage theft every year.[2] In fact, the U.S. Department of Labor's Wage and Hour Division conducted more than 31,000 investigations of U.S. employers in agriculture between 2000 and 2019, an average of 1,500 per

[1] California Agricultural Production Statistics, **https://www.cdfa.ca.gov/statistics/**
[2] Costa, Daniel, Phillip Martin, and Zachariah Rutledge. "Federal labor standards enforcement in agriculture." Economic Policy Institute, Dec. 15, 2020. **https://www.epi.org/publication/federal-labor-standards-enforcement-in-agriculture-data-reveal-the-biggest-violators-and-raise-new-questions-about-how-to-improve-and-target-efforts-to-protect-farmworkers/**

year. As a result of these investigations, employers were ordered to pay $76 million in back wages to 154,000 farm workers and to pay $63 million in civil money penalties for violations. The report also found that over the past 15 years, agriculture accounted for 7% of all federal wage and hour investigations and 3% of the violations found.

According to the report, "farm labor contractors—nonfarm employers acting as staffing firms for farm employers—were the most egregious violators between 2005 to 2019. These employers represent 14% of agricultural employment nationwide but accounted for 24% of all agricultural violations from 2005 to 2019. Farm labor contractors also represented a higher share of agricultural violations than their share of employment in the two major farm labor states, California and Florida—where they accounted for approximately half of all violations over the 2005–2019 period. Farmworkers who are employed by farm labor contractors are more likely to suffer wage and hour violations than those who are hired directly by farms."

Farm labor contractors. A farm labor contractor (FLC) is a person who, for a fee, employs people to perform work connected to the production of farm products under the direction of a third person. An FLC is also any person who recruits, supplies, or hires workers on behalf of someone engaged in the production of farm products and, for a fee, provides board, lodging, or transportation for those workers, or supervises, times, checks, counts, weighs, or otherwise directs or measures their work, or disburses wage payments to these persons. According to the California Farm Labor Contractor Association, FLCs account for over 40% of California's agricultural labor force, representing the employment of over 360,000 California farm workers.

In California, FLCs must meet the following conditions in order to obtain or renew a license from the Labor Commissioner's Office:

- submit a written application,
- deposit a surety bond based on the size of the person's annual payroll for all employees,
- pay a $600 license fee,
- take a written exam demonstrating an essential degree of knowledge of the current laws and regulations around FLCs for the safety and protection of farmers, farmworkers, and the public, including the identification and prevention of sexual harassment in the workplace,

- register as an FLC and their employees must register as an FLC employee, pursuant to the federal Migrant and Seasonal Agricultural Worker Protection Act[3] when registration is required by federal law,

- provide a written statement, attesting that the person's supervisorial employees has been trained on the prevention of sexual harassment in the workplace, and that all new nonsupervisorial employees, including agricultural employees, have been trained at the time of hire, and that all nonsupervisorial employees, including agricultural employees, have been trained at least once every two years in identifying, preventing, and reporting sexual harassment in the workplace.

FLC surety bonds. A surety bond is a written agreement, often required by law, to guarantee performance or payment of another company's obligation under a separate contract or compliance with a law or regulation.[4]

As mentioned above, an FLC must currently deposit with the Labor Commissioner a surety bond in an amount based on the size of the person's annual payroll for all employees, as follows:

- For payrolls up to $500,000, a $25,000 bond.

- For payrolls of $500,000 to $2,000,000, a $50,000 bond.

- For payrolls greater than $2,000,000, a $75,000 bond.

The condition of the bond states that the FLC will comply with all terms and provisions of the Labor Code governing FLCs and will pay for all damages and any other monetary relief awarded because of a violation of this code. The bond is also payable for interest on wages and for any damages arising from violation of orders of the Industrial Welfare Commission, and for any other monetary relief awarded to an agricultural worker because of a violation of the Labor Code.

This bill, AB 2227, increases the amount of the surety bond the FLC must deposit with the Labor Commissioner's office, as follows:

---

[3] 29 U.S.C. Sec. 1801 et seq

[4] "What is a Surety Bond? The Surety & Fidelity Association of America, **https://surety.org/surety-fidelity/what-is-surety/**

Existing law:	Proposed AB 2227:
For payrolls up to $500,000 = a $25,000 bond.	For payrolls up to $500,000 = a **$50,000** bond.
For payrolls of $500,000 to $2,000,000 = a $50,000 bond.	For payrolls of $500,000 to $2,000,000 = a **$100,000** bond.
For payrolls greater than $2,000,000 = a $75,000 bond.	For payrolls greater than $2,000,000 = a $**150,000** bond.

Related/Prior Legislation

AB 1362 (Kalra, Chapter 190, Statutes of 2025) beginning on July 1, 2027, extends the foreign labor contractor registration requirements and oversight under the Labor Commissioner to all agricultural workers under the H-2A visa program, as specified, and requires DIR to conduct a study on how to expand the existing law to other temporary work visas.

AB 364 (Rodriguez, 2022, Vetoed) was identical to this AB 1362, but did not include findings and declarations. *This bill was vetoed by Governor Newsom*.

AB 1913 (Kalra, 2018) was identical to AB 364. *This bill failed passage on the Assembly floor.*

SB 477 (Steinberg, Chapter 711, Statutes of 2014) established a registration and oversight process for foreign labor contractors with the Labor Commissioner, including enumerated protections for temporary foreign workers who are recruited to work in California.

SB 516 (Steinberg, 2013, Vetoed) was nearly identical to SB 477, but it specified a contractor registration fee of $500. *This bill was vetoed by Governor Brown*.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- This bill could potentially result in costs to the Department of Industrial Relations in the hundreds of thousands of dollars annually.

- The bill could result in increased penalty revenue to the State. The magnitude is unknown.

ARGUMENTS IN SUPPORT: According to the co-sponsors of this bill, the California Rural Legal Assistance Foundation and the California Farmworker Coalition: "Farm labor contractors (FLC), who recruit, hire, and employ farmworkers on behalf of growers and farm owners, are the fastest-growing segment of farm employment in California. FLCs are responsible for paying wages and ensuring workers' labor rights—yet they are also the worst violators of those rights, accounting for one-half of all federal wage and hour violations detected in California agriculture. By inserting a middleman between growers and workers, the FLC model distances growers from employer responsibility while leaving workers deeply vulnerable to abuse. Because of the prevalence of labor violations, the state requires FLCs to purchase a surety bond as a condition of licensure. This bond is meant to function as a financial backstop—allowing workers to access funds to compensate for stolen wages or fines. However, the current system fails workers in multiple critical ways:

- Workers cannot access the bond in a timely manner–or at all. Bond companies typically require a court judgment or Labor Commissioner decision before releasing funds. These processes can take two or more years–or may never come to completion–when employers refuse to cooperate, fail to appear at hearings, or drag out proceedings until responsible parties disappear.

- Workers don't know the bond exists. Even when workers successfully navigate these long processes, they are rarely informed of the bond's

existence, and detailed information about which surety company holds an FLC's bond requires a Public Records Act Request and further waiting.

- Bond amounts are far too small. The current bond ranges from $25,000–$75,000— wholly inadequate when multiple workers' wages are stolen by the same employer.

AB 2227 will take meaningful steps to reform the surety bond system for farm labor contractors to ensure stronger recovery rights for farmworkers."

ARGUMENTS IN OPPOSITION: A coalition of agricultural employer associations, including the California Farm Labor Contractor Association, write in an oppose unless amended position: " [T]he bill proposes to require that the Labor Commissioner put every FLC's bond information on the public FLC license database. While this may not seem inherently problematic, it raises questions as to the purpose of the California Department of Industrial Relations incurring additional costs, time, and resources to update the system. If the intent is for employees to file claims directly with the bond company instead of first going through the process of filing a claim with the Labor Commissioner, this is extremely problematic. If employees first go directly to the bond company, this will result in a lot of confusion for employees as the bond company would need to redirect that employee back to the Labor Commissioner to investigate and engage in enforcement as required under existing law. If the intent is for the bond company to serve as the trier of fact, this is even worse. Bond companies are not equipped for this and are the wrong entity to determine whether there is a valid wage claim; this is and should be the purview of the Labor Commissioner.

We agree the Labor Commissioner should share information regarding the FLC bond with relevant parties if an employer fails to make whole an employee after the claim has been adjudicated and all due process regarding notification, appeals, etc. has been respected. Furthermore we would encourage the Labor Commissioner to use efficient and direct methods to communicate the information (avoiding an expensive system overhaul of the FLC licensing database)."

SUBJECT: California Environmental Quality Act: hospital projects

SOURCE: Author

DIGEST: This bill establishes expedited administrative and judicial review procedures under the California Environmental Quality Act (CEQA) for an "environmental leadership hospital campus project" in the city of Santa Clara, requiring the courts to resolve lawsuits within 270 days, to the extent feasible.

Senate Floor Amendments of 8/21/2026 narrow the scope of environmental leadership hospital campus projects eligible for CEQA judicial streamlining to those in the city of Santa Clara (removing those in the city of Emeryville), strike the provision requiring a health impact reviewed by the Attorney General, and make changes to the labor criteria for environmental leadership hospital campus projects.

ANALYSIS:

Existing law:

1) Establishes CEQA, which requires lead agencies with the principal responsibility for carrying out or approving a project to prepare a negative declaration (ND), mitigated negative declaration (MND), or environmental impact report (EIR) for the project, unless the project is exempt from CEQA. (Public Resources Code (PRC) §21000 et seq.). If a project may have a significant effect on the environment, the lead agency must prepare a draft EIR. (CEQA Guidelines §15064(a)(1), (f)(1))

2) Authorizes judicial review of CEQA actions taken by public agencies, following the agency's decision to carry out or approve the project. Challenges alleging improper determination that a project may have a significant effect on the environment, or alleging an EIR does not comply with CEQA, must be filed in the superior court within 30 days of filing of the notice of approval. The courts are required to give CEQA actions preference over all other civil actions. Requires the court to regulate the briefing schedule so that, to the extent feasible, hearings commence within one year of the filing of the appeal. Requires the plaintiff to request a hearing within 90 days of filing the petition. Requires the court to establish a briefing schedule and a hearing date, requires briefing to be completed within 90 days of the plaintiff's request for hearing, and requires the hearing, to the extent feasible, to be held within 30 days thereafter. (PRC 21167 *et seq*).

3) Established the Jobs and Economic Improvement Through Environmental Leadership Act of 2011 (AB 900, Buchanan, Chapter 354, Statutes of 2011), which established accelerated CEQA administrative and judicial review procedures for an "environmental leadership" project. The Act was later extended and modified in 2021 to include infrastructure projects for clean energy, transportation, and water (SB 7, Atkins, Chapter 19, Statutes of 2021). (PRC §21178 et seq.)

This bill:

1) Requires the city council of the City of Santa Clara, as the lead agency for the project in question, to certify an environmental leadership hospital campus project (as defined) for streamlining pursuant to this bill if the city council finds that numerous specified environmental, labor, and other conditions will be met, including that:

    a) The project applicant agrees to pay the costs of the trial court and the court of appeal in hearing and deciding any case subject to this bill, including payment of the costs for the appointment of a special master if deemed appropriate by the court, as specified;

b) The project applicant agrees to pay the costs of preparing the record of proceedings for the project concurrent with review and consideration of the project, as specified;

c) The project is on an infill site, as defined;

d) The project will result in an investment of at least one billion dollars ($1,000,000,000) in California upon completion of the construction and generate at least 500 construction jobs;

e) The project creates high-wage, highly skilled jobs that pay prevailing wages and living wages, employs a skilled and trained workforce;

f) The project will not result in any net additional greenhouse gas emissions, and at least 50% of reductions shall be local or within the Bay Area Air Quality Management District;

g) The project has a community benefits agreement that may include additional mitigation measures such as being fully electric, using carbon free energy sources, providing zero-emission vehicle charging stations, or improving public transportation;

h) The project will be low vehicle miles traveled (VMT) (have a per capita VMT at least 15% lower than comparable development);

i) The project will obtain certification as Leadership in Energy and Environmental Design (LEED) gold standard or better; and

j) The project applicant will meet labor criteria, including:

    i) ensure that the prevailing wage requirement is included in all contracts for the performance of work, in certain criteria

    ii) require in all contracts for the performance of work that every contractor and subcontractor at every tier will individually use a skilled and trained workforce to complete the project, and every contractor and subcontractor shall use a skilled and trained workforce to complete the project

2) Specifies that the project applicant must agree to meet all the mitigation requirements, and will submit an annual report on the implementation of the environmental mitigation measures required by the section to the lead agency

which will be responsible for enforcing and monitoring those mitigation measures.

3) Establishes the following definitions:

   a) "Hospital project" means a project for the construction and operation of a hospital licensed under Chapter 2 (commencing with Section 1250) of Division 2 of the Health and Safety Code, including both outpatient clinics and associated parking structures;

   b) "Jobs that pay prevailing wages" means that all construction workers employed in the execution of the project will receive at least the general prevailing rate of per diem wages for the type of work and geographic area, as determined by the Director of Industrial Relations. If the project is certified for an exemption, the project applicant shall include this requirement in all contracts for the performance of the work; and

   c) "Project labor agreement" has the same meaning as set forth in Section 158(f) of Title 29 of the United States Code.

   d) "Skilled and trained workforce" has the same meaning as provided in Chapter 2.9 (commencing with Section 2600) of Part 1 of Division 2 of the Public Contract Code.

Background

A, B, C's of CEQA. CEQA is an environmental planning law designed to (a) make government agencies and the public aware of the environmental impacts of a proposed project, (b) ensure the public can take part in the review process, and (c) identify and implement measures to mitigate or eliminate any negative impact the project may have on the environment.

CEQA is enforced by civil lawsuits that can challenge any project's environmental review, and it is the only state environmental law that allows civil suits. Under CEQA, projects (unless they have a specific exemption) must undergo environmental analysis. This process starts with an initial study which determines what level of further environmental review is needed for a given project. If a project has no significant effects on the environment, or if those effects can be fully mitigated, the project can move forward with a negative declaration (ND) or mitigated negative declaration (MND). If the initial study finds the project has potential significant effects on the environment, then a full EIR is conducted. An EIR provides a thorough environmental review of a proposed project, analyzing the significant direct and indirect environmental impacts of a proposed project. The

EIR also includes proposed mitigation measures for any significant effects that it identifies and considers alternatives to the proposed project.

Provisions to expedite CEQA. Under CEQA, state and local agencies must complete and adopt a ND in 180 days, and certify an EIR within a year. If there is a compelling circumstance to extend this timeline, agencies may take longer, but only if the project applicant consents. After the environmental review is completed, the case may be subject to litigation. Judicial Council asserts that it takes over six months just for a CEQA case to get a hearing, let alone reach a decision.

To help speed CEQA cases through the court system, current law provides several measures to prioritize CEQA cases and speed up judicial review, including:

a) The Superior Court and the Court of Appeal must give CEQA lawsuits preference over all other civil actions;

b) If feasible, the Court of Appeal must hear a CEQA appeal within one year of filing;

c) Discovery is generally not allowed, as CEQA cases are generally restricted to review of the record; and

d) Counties with a population of over 200,000 must designate one or more judges to develop expertise on CEQA and hear CEQA cases.

CEQA Administrative and Judicial Streamlining. The Legislature has developed streamlining measures to speed CEQA lawsuits against specified projects through the courts. In current law, CEQA streamlining entails both judicial and administrative streamlining. Judicial streamlining requires that a CEQA lawsuit be heard in 270 days, including all appeals, as feasible. Administrative streamlining requires projects to prepare the administrative record, the comprehensive document at the heart of a CEQA case, at the same time as the environmental review documents are prepared. Preparing these documents concurrently, instead of sequentially, saves time if there is a lawsuit. These streamlining measures shorten what is potentially the lengthiest portion of the CEQA process—litigation—while retaining the full environmental review and public engagement offered under CEQA.

In 2011, the Legislature passed the first CEQA streamlining certification program with the Jobs and Economic Improvement Through Environmental Leadership Act (Leadership Act), which created CEQA streamlining for residential, retail, commercial, sports, and recreational use projects that were certified as Environmental Leadership Development Projects (ELDP) by the Governor (AB

900, Buchanan, Chapter 354, Statutes of 2011). The ELDP program was further extended and modified in 2021 with (SB 7, Atkins, Chapter 19, Statutes of 2021) and in 2023, The Legislature expanded these same streamlining provisions for certain energy, transportation, and water infrastructure projects (SB 149, Caballero, Chapter 60, Statutes of 2023).

Environmental Leadership Development Programs. While only a small number of projects are challenged under CEQA (e.g. 1.05% of projects that went through CEQA in 2022-2023 were challenged[1]), very environmentally impactful and controversial projects are more likely to face a lawsuit. The Legislature has developed streamlining measures to speed CEQA lawsuits against specified, often large-scale and high-profile, projects through the courts.

In current law, this CEQA streamlining entails both judicial and administrative streamlining. Judicial streamlining requires that a CEQA lawsuit be heard in 270 days, including all appeals, as feasible. Administrative streamlining requires projects to prepare the administrative record, the comprehensive document at the heart of a CEQA case, at the same time as the environmental review documents are prepared. Preparing these documents concurrently, instead of sequentially, saves time if there is a lawsuit. These streamlining measures shorten what is potentially the lengthiest portion of the CEQA process—litigation—while retaining the full environmental review and public engagement offered under CEQA.

In 2011, the Legislature passed the first CEQA streamlining certification program with the Jobs and Economic Improvement Through Environmental Leadership Act (Leadership Act), which created CEQA streamlining for residential, retail, commercial, sports, and recreational use projects that were certified as Environmental Leadership Development Projects (ELDP) by the Governor (AB 900, Buchanan, Chapter 354, Statutes of 2011). The ELDP program was further extended and modified in 2021 with (SB 7, Atkins, Chapter 19, Statutes of 2021).

In 2023, The Legislature expanded these same streamlining provisions for certain energy, transportation, and water infrastructure projects (SB 149, Caballero, Chapter 60, Statutes of 2023).

The specific criteria that projects must meet to be eligible for CEQA streamlining varies by project and process, but all are intended to ensure that projects meet high environmental and labor standards. In current law, environmental criteria for streamlining includes requirements such as achieving Leadership in Energy and Environmental Design (LEED) Gold certification and being greenhouse gas

[1] CEQA for the Future Protecting Land, People, & Climate. Smith-Heimer and Hitchcock, Dec 2025.

neutral. SB 149 (Caballero, Chapter 60, Statutes of 2023) also includes a specific equity provision which requires that projects both minimize significant environmental impacts in disadvantaged communities and take mitigation measures that directly benefit the affected community. In offering CEQA streamlining for projects that meet these high standards, California has been able to promote projects that align with the State's environmental, climate, and labor goals.

Comments

Purpose of Bill. According to the author, "AB 2231 is a judicial streamlining bill that helps ensure critical hospital projects can move forward without unnecessary delays and costly litigation. At a time when California faces growing health care demands and uncertainty in federal funding, we cannot afford to slow the construction of essential medical facilities in Santa Clara which will help expand access to emergency, inpatient, and specialty care for communities across the Bay Area."

What makes an environmental leader? This bill provides expedited judicial review for an "environmental leadership hospital campus project" (a term created in this bill) in the City of Santa Clara. What makes a project an environmental leader that should receive prioritized expedited judicial review, bumping it to the front of the line of cases to be heard in the event of a lawsuit? This bill adds some environmental criteria, including that the project does not result in net additional GHG emissions, and will be relatively low-VMT. It also offers some environmental guardrails by specifying that the project applicant will enter into a legally binding and enforceable community benefits agreement with the lead agency that may include specified measures in addition to any other mitigation measures required pursuant to CEQA. This is an important addition, since environmental projects can still have environmental impacts, and thus it is still important to provide additional tools for communities to advocate for measures to mitigate the impacts of projects on their communities, even when the projects are deemed environmental leaders. This bill also adds a process for accomplishing this goal by requiring that the applicant submit an annual report to the lead agency report on the mitigation measures they are taking to meet the eligibility criteria to be a leadership project.

Expedited Judicial Review tradeoffs. Expedited judicial review entails tradeoffs, including potentially burdening the courts and affecting access to justice for other litigants. As described above, the Legislature has continually expanded projects that qualify for expedited judicial review under CEQA. Additionally, the

Legislature has begun applying expedited judicial review to other areas of the law as well. For example, SB 808 (Caballero, Chapter 527, Statutes of 2025) established an expedited writ of mandate procedure for judicial review of a local agency decision denying approval of a housing development project, as defined.[2] This Committee will be considering three CEQA expedited judicial review bills this legislative session.

Under existing law, certain parties are entitled to calendar preference, including a party that is at least 70 years old and in ill health, a party in a personal injury or wrongful death matter who is under the age of 14, or a party that is unlikely to survive beyond another six months. (Code Civ. Proc. § 36). Additionally, certain actions receive calendar preference, including appeals in probate proceedings, contested election cases, and actions for libel or slander by a person who holds any elective public office or a candidate for any such office alleged to have occurred during the course of an election campaign. (Code Civ. Proc. § 44.) Additionally, existing law already provides that the superior court and appeals courts are to give CEQA lawsuits preference over all other civil actions. (Gov. Code § 21167.1(a).) These expedited CEQA judicial review bills taken as one-offs may not seem to cause a major concern for the courts and are intended to expedite beneficial development. However, when taken as a whole, these bills entail potential tradeoffs with respect to not only the sufficiency of environmental review, but increasing pressure on court dockets and access to justice for other litigants. These concerns have only been magnified by the judicial backlog arising from the COVID-19 pandemic.[3]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the assembly appropriations committee, this bill has "Potential cost pressure (Trial Court Trust Fund, General Fund) of an unknown amount to the courts to process and hear challenges to environmental reviews for environmental leadership hospital campus projects on an expedited timeline. Expedited cases generally create costs and staffing pressures on the courts, as each review typically requires a judicial officer, research attorneys, and staff. However, under existing rules of court (that Judicial Council may amend to reference the specific projects in

SUBJECT: California Environmental Quality Act: geothermal exploratory projects: geothermal technology pilot projects: Geologic Energy Management Division

SOURCE: Sonoma Clean Energy

DIGEST: This bill creates geothermal technology pilot projects composed of up to six wells, provides for a geothermal technology pilot project well to be within one-half mile of an existing geothermal well capable of producing the geothermal resource in commercial quantities if a written consent agreement meeting certain specifications is reached, requires the Geologic Energy Management Division (CalGEM) to be the lead agency under the California Environmental Quality Act (CEQA) for a geothermal technology pilot project, and authorizes CalGEM to delegate its lead agency status to a county in certain circumstances, among other provisions, as provided.

ANALYSIS:

Existing law:

1) Establishes CalGEM within the Department of Conservation as the state's geothermal well regulator. The State Oil and Gas Supervisor (supervisor) leads CalGEM.

2) Proclaims that Californians have a direct and primary interest in the development of geothermal resources, and the state should exercise its power and jurisdiction to require that wells for the discovery and production of geothermal resources be drilled, operated, maintained and abandoned in such manner as to safeguard life, health, property, and the public welfare, and to encourage maximum economic recovery. (Public Resources Code (PRC) §3700)

3) Requires the supervisor to so supervise the drilling, operation, maintenance and abandonment of geothermal resources wells as to encourage the greatest economic recovery of geothermal resources, to prevent damage to life, health, property, and natural resources, and to prevent damage to, and waste from, the underground geothermal deposits, and to prevent damage to underground and surface waters suitable for irrigation or domestic purposes by reason of the drilling, operation, maintenance, and abandonment of geothermal resources wells. (PRC §3714)

4) Requires the supervisor to also supervise the drilling, operation, maintenance, and abandonment of wells so as to permit the owners or operators of such wells to utilize all methods and practices known to the industry for the purpose of increasing the ultimate recovery of geothermal resources, and to allow the operator to do what a prudent operator using reasonable diligence would do, as provided. (PRC §3715)

5) Requires an owner or operator before drilling or re-drilling, abandoning or deepening or altering the casing of a well to file with the supervisor or CalGEM district deputy a written notice of intention (NOI) to drill the well containing certain information and pay a fee. (PRC §3724)

6) Defines geothermal resources to mean the natural heat of the earth, the energy, in whatever form, below the surface of the earth present in, resulting, from, or created by, or which may be extracted from, such natural heat, and all minerals in solution or other products obtained from naturally heated fluids, brines, associated gases, and steam, in whatever form, below the surface of the earth,

but excluding oil, hydrocarbon gas, or other hydrocarbon substances. (PRC §6903)

7) Defines a geothermal exploratory project to be not more than six wells and for the purpose of evaluating the presence and characteristics of geothermal resources prior to starting a geothermal field development project. For purposes of preparing an environmental document the environmental impacts shall be limited to the proposed drill sites, the proposed wells, and any roads or other facilities that may be required before the exploratory wells can be drilled. Wells included within a geothermal exploratory project must be located at least one-half mile from geothermal development wells which are capable of producing geothermal resources in commercial quantities. Application requirements include a narrative description including the probable short-term and long-term impacts of the project, and acceptable mitigation measures. (see PRC §21065.6; Title 14, California Code of Regulations, §§1680 *et seq*.)

8) CEQA requires a lead agency to spearhead an environmental impact report (EIR) for a project that may have a significant effect on the environment. CEQA also requires a lead agency to prepare an negative declaration (ND) for a project that will have no significant effects on the environment, or a mitigated negative declaration (MND) for projects that have no significant effects after mitigation. (PRC §§21000 *et seq*.)

9) Specifies that CalGEM is the default lead agency for geothermal exploratory projects, but that CalGEM can delegate its lead agency responsibility to a county that has adopted a geothermal element in its general plan. In addition, at the request of an applicant, the county in which a geothermal exploratory project is located shall assume responsibilities of the lead agency, regardless of whether or not the county has a geothermal element. In this case, the county and CalGEM confer regarding necessary information that should be included in the environmental review for the project to facilitate CalGEM's exercise of its authority as a responsible agency. (PRC §3715.5)

10) Defines "geothermal field development project" as a development project composed of geothermal wells, resource transportation lines, production equipment, roads, and other facilities which are necessary to supply geothermal energy to any particular heat utilization equipment for its productive life, all within an area delineated by the applicant. (Government Code §65928.5)

This bill:

1) Defines “geothermal technology pilot project” to mean a project composed of not more than six wells and associated drilling and testing equipment, including equipment and activities necessary to establish interconnectivity between wells and reservoirs, to connect geothermal reservoirs whose permeability or capacity to allow the flow of geothermal fluids has been increased from its natural or original state through stimulation, horizontal drilling, or the use of closed-loop configurations, for the chief and original purpose of confirming the viability of those techniques or technologies within that resource.

2) Requires CalGEM to be the lead agency under CEQA for geothermal technology pilot projects, and adds geothermal technology pilot projects to the existing ability of CalGEM to delegate its lead agency responsibility for geothermal exploratory projects to a county, as provided.

3) Requires the owner or operator of a well that is part of a geothermal technology pilot project to file with the supervisor a written NOI to commence drilling before commencing drilling, deepening, or redrilling, as specified.

    a) If the NOI is for a well that is part of a geothermal technology pilot project and the well is located within one-half mile of an existing geothermal well capable of producing geothermal resources in commercial quantities, the NOI shall include a written consent agreement, as provided. Requires the written consent agreement to meet all of the following requirements:

        i) Requires the written consent agreement to be executed by a responsible officer of the owner or operator of the existing well, or by a responsible office of both the owner or operator if the owner or operator are different.

        ii) Authorizes the owner or operator of the existing geothermal well capable of producing in commercial quantities to require provisions in the agreement requiring the owner or operator of the geothermal technology pilot project well to undertake certain measures – such as ongoing monitoring of the resource, demonstration that the geothermal technology pilot project will not impose any undue harm to the productive capability of any geothermal project operating under a powerplant license, and indemnification by the geothermal technology pilot project owner and operator for all costs associated with safeguarding existing geothermal resources, including a bond or escrow fund sufficient to cover any required remediation, compensation, or infrastructure repair, among others.

iii) Requires the written consent agreement to provide that either party may bring an appropriate civil action in a court of competent jurisdiction to enforce the terms of the written consent agreement as a contract, and shall not limit the availability to either party of any remedy at law or in equity otherwise available.

4) Provides that no reimbursement is required to local agencies and school districts for certain state-mandated costs, as specified. Makes various minor, technical and conforming changes to statute.

[NOTE: For additional information regarding this bill, see the Senate Environmental Quality, and Natural Resources and Water Committees' analyses.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to Senate Appropriations Committee:

- Ongoing costs likely in the hundreds of thousands of dollars annually (Oil, Gas, and Geothermal Administrative Fund) for the Geologic Energy Management Division (CalGEM) to receive notices of intention (NOIs) for pilot-project wells, review consent agreements as part of NOI completeness, serve as CEQA lead agency for geothermal technology pilot projects, among other things.

SUPPORT: (Verified 8/14/26)

Sonoma Clean Energy (source)
California Resources Corporation
San Jose Clean Energy
The Nature Conservancy

OPPOSITION: (Verified 8/14/26)

California Department of Finance

ARGUMENTS IN SUPPORT: According to the author, "California has a massive underground network of untapped geothermal energy. Innovations like closed-loop and enhanced geothermal systems (EGS) have the potential to generate many gigawatts more energy than previous technologies, as conventional geothermal developers are limited by their need for naturally occurring groundwater."

"However, the outdated statutory definition of geothermal exploratory projects restricts the deployment of these new technologies. AB 2234 will modernize the

definition of geothermal projects by updating the application of the half-mile restriction and recognizing that all equipment and infrastructure necessary for modern development should be considered part of a project, not separate. By revising the geothermal exploratory project definition, AB 2234 can expand access to firm, clean energy and signal that California is open for exploration."

ARGUMENTS IN OPPOSITION: The California Department of Finance, writing in opposition to a previous version of the bill notes: "Finance is opposed to this bill because it results in General Fund impacts not included in the 2026 Budget Act."

SUBJECT: Non-Ultraprocessed Certified food standard

SOURCE: Environmental Working Group

DIGEST: This bill establishes a process for the California Department of Public Health (CDPH) to accredit certification agents that can certify food products as "Non-Ultraprocessed Certified" (Non-UPF Certified), and requires CDPH to create a standardized seal for these certified food products. Requires grocery stores with more than $10 million in gross annual sales to make at least three or more items that are Non-UPF Certified clearly identifiable, with regard to their display in the grocery store, if the grocery store sells more than 25 Non-UPF Certified items.

Senate Floor Amendments of 8/24/26 incorporate technical assistance from the CDPH to address implementation concerns and to permit CDPH to establish fees

for accreditation agents and certification of food products, clarify what is eligible for the Non-UPF label, and clarify that minimarts, including gas station food marts, are not considered grocery stores for purposes of this bill.

ANALYSIS:

Existing law:

1) Defines "ultraprocessed food (UPF)," for purposes of food intended to be served or sold in schools, as any food or beverage that contains a substance that has one of eight FDA-defined technical effects, as specified, and that has either higher amounts of saturated fat, sodium, or added sugar, or contains a nonnutritive sweetener or other sugar substitute, as specified. Excludes certain food products from this definition, including Class 1 milk, alcoholic beverages, medical foods, and infant formula. [Health and Safety Code (HSC) §104661]

2) Defines "UPFs of concern," for purposes of food intended to be served or sold in schools, as a food product that is a UPF, and that is determined by regulations adopted by CDPH to be of concern, based on specified factors, including whether it contains a substance linked to health harms or adverse health consequences. Requires these regulations to be adopted by June 1, 2028. [HSC §104662(a)(2)]

3) Defines "restricted school foods," for purposes of food intended to be served or sold in schools, as a food or beverage that contains a substance that has one of the eight United States Food and Drug Administration (FDA)-defined technical effects but does not meet the definition of a UPF because it is not high in fat, sodium, or added sugar, but is restricted from being sold in schools because the it has been determined by regulations adopted by CDPH to be of concern. Requires these regulations to be adopted by June 1, 2028. [HSC §104662(a)(1)]

4) Requires, no later than July 1, 2029, schools to begin to phase out UPFs of concern and restricted school foods, and by July 1, 2032, prohibits a vendor from offering UPFs of concern or restricted school foods to a school. [HSC §104664]

This bill:

1) Requires CDPH, no later than June 1, 2029, to accredit certification agents that can certify food products as "Non-Ultraprocessed Certified" (Non-UPF Certified) pursuant to this bill.

2) Prohibits an accredited certification agent from certifying a product as Non-UPF Certified if the food product is any of the following:
   a) Meets the additive criteria for UPF, as defined in existing law;
   b) Classified as a UPF of concern, as defined in existing law; or,
   c) Classified as a restricted school food, as defined in existing law.

3) Requires a product to be recertified as Non-UPF Certified at least every three years.

4) Requires a manufacturer, if a product using the Non-UPF Certified seal is reformulated, to seek recertification prior to using the seal on the reformulated product.

5) Requires CDPH to maintain a data system for Non-UPF food products.

6) Requires CDPH to create a standardized seal that is permitted to incorporate both of the following:
   a) The phrase "Non-Ultraprocessed Certified Food Standard" or Non-UPF Certified" and,
   b) Images and themes association with California and health, nutritious whole foods.

7) Restricts the use of the Non-UPF Certified seal on a product to only those products that have been certified by an accredited certification agent.

8) Permits the Non-UPF Certified seal to be placed on the principal display panel, the information panel, or elsewhere on the package, provided that the seal does not obscure other required information, such as the nutrition facts panel or the statement of identity.

9) Requires an accredited certification agent to do all of the following:
   a) Register with CDPH on a form provided by CDPH;
   b) Complete CDPH required accreditation certification agency training;
   c) Annually renew the accreditation agent status, unless the certification agent is no longer engaged in certifying products under this bill; and,
   d) Provide a list to CDPH of all the products certified by the accredited certification agent.

10) Requires any registration information submitted by an accredited certification agent to CDPH to be made available to the public for inspection and copying.

11) Requires an accredited certification agent to report all of the following information to CDPH for each food product certified as Non-UPF: food product

name, food product ingredients, food product nutrition facts, food product manufacturer and brand, Global Trade Item Number and Universal Product Code, date certified, and other information required by CDPH.

12) Requires an accredited certification agent that certifies Non-UPF Certified products to immediately make the following records available for inspection by CDPH, or provide copies within three business days of a request by CDPH, or within a reasonable time exceeding three business days as determined by CDPH:
   a) Records obtained for certification of a food product; and,
   b) Records created by the accredited certification agent regarding applications for certification of a product.

13) Permits CDPH to audit the accredited certification agent's certification procedures and records at any time, but requires any records of the accredited certification agent not otherwise required to be disclosed to be kept confidential by CDPH.

14) Requires CDPH to maintain a webpage that lists all of the products currently certified as Non-UPF Certified as reported by the accredited certification agent.

15) Permits CDPH to adopt any regulations as are reasonably necessary to assist in the implementation of, or to make more specific, the provisions of this bill related to the certification of Non-UPF foods.

16) Permits CDPH to establish fees for the registration and renewal of accredited certification agents and certification of food products. Establishes the Public Health Food and Nutrition Education Fund for purposes of implementing this bill, and requires fees to be deposited in this account, which is subject to appropriation by the Legislature.

17) Deems the following actions as unlawful:
   a) For a person to certify products as Non-UPF Certified unless duly registered as an accredited certification agent;
   b) For a person to willfully make a false statement or representation, or knowingly fail to disclose a fact required to be disclosed, in registration as an accredited certification agent;
   c) For a person to willfully make a false statement or representation, or knowingly fail to disclose a fact required to be disclose to an accredited certification agent; and,

d) For a person to use the Non-UPF Certified seal on a product that does not meet the requirements of this bill.

18) Permits a person who engages in the misuse of the Non-UPF Certified seal to be enjoined in a court by any of the following:
   a) CDPH;
   b) The Attorney General, county counsel, city attorney, or city prosecutor in a city having a full-time city prosecutor; or,
   c) A consumer, business entity, or non-profit organization.

19) Specifies that a violation of the above provisions is not subject to existing criminal penalties for violations of the Sherman Law.

20) Requires a grocery store, as defined in existing law, with gross annual store sales of more than $10 million dollars, to make clearly identifiable at least three or more items that are Non-UPF Certified if the food facility offers for sale more than 25 Non-UPF Certified items.

21) Defines "clearly identifiable," for purposes of the requirement in 17) above, as a manner of offering a product for sale on a display unit or within a retail setting that allows a reasonable consumer to readily distinguish the product from other products, including through physical separation, signage, or other visual cues.

22) Permits a grocery store that fails to meet the requirement in 17) above to be enjoined in court by the Attorney General, county counsel, city attorney, or city prosecutor in a city having a full-time city prosecutor. Specifies that this violation is not subject to existing criminal penalties for violations of the California Retail Food Code.

23) Deems a grocery store to be in compliance with the requirement in 17) above if it demonstrates that it has made a good faith effort to comply and has implemented reasonable policies, procedures, or employee training designed to achieve compliance. Prohibits de minimis or isolated instances of noncompliance that occur despite good faith efforts, from constituting a violation of the requirement.

24) Exclude the following from being considered a "grocery store" for purposes of this bill: an establishment primarily engaged in retailing a limited line of groceries such as a convenience store or food mart, including an establishment operating fuel pumps.

25) Sunsets the provisions of this bill relating to grocery stores making certified products "clearly identifiable" on January 1, 2040.

Background

The NOVA classification system and the definition of UPF. The NOVA classification, also referred to as Nova, comes from the Portuguese title of the article that was originally published in 2009 by a researcher in Brazil: "A new classification of foods." As it has evolved since originally formulated, NOVA classifies foods into four groups:

- *Group 1: unprocessed or minimally processed foods.* Minimally processed foods are natural foods (from plants, or from animals, including muscle, eggs, and milk) that are altered by processes that include removal of inedible or unwanted parts; and drying, crushing, grinding, fractioning, filtering, roasting, boiling, non-alcoholic fermentation, pasteurization, refrigeration, chilling, freezing, placing in containers, and vacuum packaging. These processes are designed to preserve natural foods, make them suitable for storing, or make them safe or edible or more pleasant to the consumer.

- *Group 2: processed culinary ingredients.* Processed culinary ingredients such as oils, butter, sugar and salt, are substances derived from Group 1 foods or from nature by processes that include pressing, refining, grinding, milling, and drying. The purpose of such processes is to make durable products that are suitable for use in home and restaurant kitchens to prepare, season, and cook Group 1 foods. They are not meant to be consumed by themselves, and are normally used in combination with Group 1 foods to make freshly prepared drinks, dishes and meals.

- *Group 3: processed foods.* Processed foods, such as bottled vegetables, canned fish, fruits in syrup, cheeses, and freshly made breads, are made by adding salt, oil, sugar, or other substances from Group 2 to Group 1 foods. Processes include various preservation or cooking methods, and, in the case of breads and cheese, non-alcoholic fermentation. Most processed foods have two or three ingredients, and are recognizable as modified versions of Group 1 foods. They are edible by themselves, or more usually, in combination with other foods.

- *Group 4: UPFs.* UPFs, such as soft drinks, sweet or savory packaged snacks, reconstituted meat products, and pre-prepared frozen dishes, are not modified foods but formulations made mostly or entirely from substances derived from foods and additives, with little, if any, intact Group 1 food. Ingredients of these

> formulations usually includes those also used in processed foods, such as sugars, oils, fats, or salt, but also include other sources of energy and nutrients not normally used in culinary preparations. Some of these are directly extracted from foods, such as casein, lactose, whey, and gluten. Many are derived from further processing of food constituents, such as hydrogenated or interesterified oils, hydrolysed proteins, soy protein isolate, maltodextrin, invert sugar, and high-fructose corn syrup. Additives in UPF include some used in processed foods, such as preservatives, antioxidants and stabilizers. Classes of additives found only in UPF products include those used to imitate or enhance the sensory qualities of foods or to disguise unpalatable aspects of the final product. These additives include dyes and other colors, color stabilizers, flavors, flavor enhancers, non-sugar sweeteners, and processing aids such as carbonating, firming, bulking, and anti-bulking, de-foaming, anti-caking and glazing agents, emulsifiers, sequestrants and humectants.

AB 1264 (Gabriel, Chapter 467, Statutes of 2025) establishes a multi-pronged definition to categorize whether foods intended to be sold or served in schools are UPF. First, it uses the FDA's Substances Added to Food database (which was previously known as Everything Added to Foods in the United States, or EAFUS). This is a database of additives, including color additives, flavoring substances, and other ingredients added to food to achieve certain "technical effects." Federal regulations list 32 different physical or technical effects that a food ingredient or additive can have, including antioxidants or antimicrobial agents used to preserve food, drying agents to maintain an environment of low moisture, enzymes to improve food processing, leavening agents, lubricants and release agents to prevent food from sticking to food contact surfaces, etc. The definition of UPF includes eight of these technical effects that are considered by the proponents of AB 1264 and this bill as associated with UPF – technical effects that are for flavoring or coloring effects, for example, or emulsifiers and thickeners.

If a food product meets the first test of having an additive with one of the eight technical effects, it moves on to the second prong: whether it is <u>either</u> high in saturated fat, sodium, or added sugar, <u>or</u> it contains a nonnutritive sweetener or one of eleven other substances that are used as sugar replacements. These eleven substances, such as xylitol, D-sorbitol, and isomalt, are sugar alcohols or other substances that do not meet the definition of nonnutritive sweeteners because they still contain some calories, but are used as sugar substitutes.

Restricted school foods will be determined at a later date by a regulatory process. In addition to foods designated as UPF, this bill also prohibits products from being Non-UPF Certified if they are "restricted school foods." (This bill also prohibits

certification of "UPFs of concern" from AB 1264, but UPFs of concern already come from the universe of UPFs.) Restricted school foods were included in AB 1264 last year to capture foods that have one or more of the additives in the first prong of the definition of UPF, but do not meet the "high-in saturated fat, sodium, or added sugar" of the second prong of the definition, and do not have a nonnutritive sweetener or other sugar substitute. The purpose of adding the category of "restricted school foods" was to give CDPH the ability to restrict a food that has all the characteristics of a UPF of concern, including a risk of adverse health consequences, etc., but was not high in saturated fat, sodium, or added sugar. Unlike the definition of UPF, which is a statutory definition, the list of restricted school foods will be determined pursuant to regulations adopted by CDPH, just like the "UPFs of concern" targeted by AB 1264.

Because the definition of UPF is statutory, the Non-UPF certification process can start without waiting for regulations. However, it is possible a product could be approved as "Non-UPF Certified," and then later lose this eligibility as a result of the product being included in the list of restricted school foods.

Based on certified organic program. The author states that this bill is modeled on the California Organic program. Under the California Organic Food and Farming Act, any certification agency that certifies products in California sold as organic is required to register with the Department of Agriculture, including paying an annual registration fee. Similar to this bill, a certification agency that certifies organic products is required to make records available for inspection. All products sold as organic in California are required to be certified by an accredited certifying agent.

Other Non-UPF programs. There are at least two existing programs that provide seals for food products to indicate that the product is "non-UPF:" Non-UPF Verified, which is a project under the umbrella of the Non-GMO Project and its Food Integrity Collective; and, WISEcode Non-UPF Shield.

Non-UPF Verified. The Non-GMO Project started in 2007, and in 2025 launched the Non-UPF Verified program. They published their Non-UPF Standard on January 21, 2026, which is a 30 page document detailing standard criteria and requirements for verification as Non-UPF Verified. This standard includes processing methods, which is something that the definition of UPF in California law used by this bill does not cover. There is some overlap in the list of ingredients that would exclude a product from being considered Non-UPF, such as non-nutrititive sweeteners, and thickeners and texturizers, but also some prohibited products not captured by this bill, such as certain refined oils.

WISEcode. On May 4, 2026, WISEcode launched "Non-UPF Shield," a verification program for brands, and a redesigned WISE Code UPF Detector mobile app. Both are powered by an artificial intelligence classification system that relies on an ingredient database and a proprietary automated review system.

Comments

According to the author of this bill:

> This bill would establish a Non-UPF seal that food manufacturers could place on products that meet clear standards for not being ultra-processed. Modeled after the "USDA Organic" label, the seal would provide consumers with a simple, trustworthy way to identify healthier options with a quick glance. Additionally, the bill would require grocery stores in California to feature products bearing the seal in a display, thereby making it easier for busy families to locate healthier foods quickly and conveniently. Ultimately, parents shouldn't need a Ph.D. to understand what they're feeding their kids, and this new law will empower consumers with clear, trustworthy information and make it easier for them to find foods that are free from harmful additives.

Related/Prior Legislation

AB 1264 (Gabriel, Chapter 467, Statutes of 2025) enacts the Real Food, Healthy Kids Act to reduce the consumption of UPFs by California children by: defining UPFs intended to be sold or served in schools; establishing a regulatory process for CDPH to determine which UPFs are of concern by June 1, 2028; and, requiring these UPFs of concern to be phased out of schools until they are prohibited from being offered to schools by vendors as of July 1, 2032, and prohibited from being served or sold in schools by July 1, 2035.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Committee on Appropriations, unknown ongoing General Fund costs, potentially hundreds of thousands, for CDPH for state administration.

The California Department of Justice anticipates a minor fiscal impact to the department.

Unknown potential costs to local enforcement agencies related to requirements on grocery stores. Costs could be potentially reimbursable by the state, subject to a determination by the Commission on State Mandates.

Unknown, potential workload costs to the courts to adjudicate cases seeking injunctive relief (Trial Court Trust Fund, General Fund). While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to increase the amount appropriated for trial court operations.

ARGUMENTS IN SUPPORT: This bill is sponsored by the Environmental Working Group, and is joined in support by a large coalition. Supporters state that this bill builds on California's first-in-the-nation definition of UPFs and creates a voluntary Non-UPF Certified seal that gives consumers a clear, trusted way to identify healthier food options for their families. According to supporters, UPFs now make up more than half of all calories consumed by adults in the U.S., and nearly two-thirds of the calories consumed by children. Consumers want to make better choices, but they do not have practical information at the point of purchase. Supporters point to a 2025 national survey that found that 72% of Americans are trying to reduce their UPF intake, yet fewer than half could correctly identify common UPF products. A separate study of more than 50,000 products at Walmart, Target, and Whole Foods found that most offerings across all three stores fell in the UPF category. This bill creates a voluntary certification program administered through CDPH-accredited third-party agents, backed by a public product registry and enforceable by the Attorney General. No manufacturer is required to participate, and a requirement that the product display is clearly identifiable only applies to large retailers that carry more than 25 certified items. Unlike private certification programs that operate without government oversight, this bill establishes a clear, accountable, state-backed standard.

ARGUMENTS IN OPPOSITION: The Consumer Brands Association, the California Manufacturers & Technology Association, the Food Ingredient Safety Coalition, and the Calorie Control Council submitted a joint letter of opposition, stating that this bill is premature, would create consumer confusion, and would distort the marketplace. This group notes this bill creates a state-backed Non-UPF Certified seal at a time when private certification already serves this purpose, pointing to the Non-UPF Program and WISEcode, which already certify Non-UPF foods nationwide. Consumers already encounter a wide range of certifications and claims in the marketplace, including California Grown, organic, non-GMO, and Fair Trade, many administered by nonprofit or independent third parties. California should not single out one processing-based standard, attach a California-branded seal to it, and imply a unique level of state endorsement. This group states that certification under this bill turns in part on whether a product is classified as a UPF of concern or a restricted school foods, terms that CDPH is not required to define by regulation until June 1, 2028, and has not even begun the rulemaking. These opponents also note that the definition this bill relies on were enacted for school nutrition, a narrow context never intended for the general food supply. Because that definition excluded alcoholic beverages from the definition of UPF, a spirit or flavored malt beverage could carry the states Non-UPF Certified seal, while a low-fat, low-calorie yogurt sweetened with a nonnutritive sweetener, or a packaged salad whose dressing pairs a common emulsifier with added sugar, could be denied it. The opponents state that this bill authorizes anyone to seek an injunction over an alleged misuse of the seal, and given the close similarity between this seal and the existing national Non-UPF seal, there is a meaningful risk of litigation arising from consumer confusion between the two. Finally, according to the opponents, the FDA and United States Department of Agriculture are actively developing a federal definition of UPF, and no single, universally accepted definition exists today. Because private programs are not codified in statue, they can adapt as federal guidance evolves. By contrast, anchoring a California seal to a state-specific definition would require legislative action to realign.

The California League of Food Producers, the California Chamber of Commerce, and the Dairy Institute of California also jointly wrote in opposition, making similar arguments. The broad definition of UPF risks capturing foods that are widely regarded as healthy and nutritious, and states the part of the definition tying in foods that have high amounts of saturated fat, sodium, or added sugars could impact foods like cheeses, even though it is widely recognized as a healthy source of protein, calcium, and other essential nutrients.

The Non-GMO Project states in opposition that they are a California nonprofit corporation with more than 20 years of experience in food certification and the

operator of Non-UPF Verified, the nation's leading independent certification for non-UPF foods. The Non-GMO project notes that they are not observers of this issue, they are one of its practitioners, and have serious concerns about this bill. The Non-GMO Projects core concerns include that it duplicates an existing nonprofit certification (Non-UPF Verified); it requires certification before definitions are finalized; it introduces litigation exposure and consumer confusion; and it establishes a non-UPF certification framework without requiring evaluation of actual processing methods.

DIGEST: This bill replicates portions of the California Age-Appropriate Design Code Act (AADC), removing provisions found unconstitutional by federal courts.

Senate Floor Amendments of 8/21/26 repeal relevant portions of the existing AADC, provide that a business subject to the AADC take reasonable steps to prevent specified risks, provide that any contract provision entered as the result of a design feature, as specified, is voidable, and expand public enforcement, among other changes.

ANALYSIS:

Existing law:

1) Establishes the federal Children's Online Privacy Protection Act (COPPA) to provide protections and regulations regarding the collection of personal information from children under the age of 13. (Title 15 United States Code (U.S.C.) § 6501 et seq.)

2) Establishes the AADC. (Civil (Civ.) Code § 1798.99.28 et seq.)[1]

3) Defines relevant terms within the AADC. (§ 1798.99.30.)

4) Requires a business that provides an online service, product, or feature likely to be accessed by children to take all the following actions:
    a) Before offering a new online service, product, or feature to the public, complete a DPIA. The business must biennially review the DPIA and maintain documentation of the assessment as long as the online service, products, or features are likely to be accessed by children.
    b) Make DPIAs available to the Attorney General within 5 days of a request, as specified.
    c) Document any risk of material detriment to children that arises from the data management practices of the business identified in the DPIA and create a timed plan to mitigate or eliminate the risk before the online service, product, or feature is accessed by children.
    d) Estimate the age of child users with a reasonable level of certainty appropriate to the risks that arise from the data management practices of the business or apply the privacy and data protections afforded to children to all consumers.
    e) Configure all default privacy settings provided to children by the online service, product, or feature to settings that offer a high level of privacy, unless the business can demonstrate a compelling reason that a different setting is in the best interests of children.
    f) Provide any privacy information, terms of service, policies, and community standards concisely, prominently, and using clear language suited to the age of children likely to access that online service, product, or feature.
    g) If the online service, product, or feature allows the child's parent, guardian, or any other consumer to monitor the child's online activity or track the child's location, provide an obvious signal to the child when the child is being monitored or tracked.

[1] All further statutory references are to the Civil Code unless specified otherwise.

h) Enforce published terms, policies, and community standards established by the business, including, but not limited to, privacy policies and those concerning children.
i) Provide prominent, accessible, and responsive tools to help children, or if applicable their parents or guardians, exercise their privacy rights and report concerns. (§ 1798.99.30(a).)

5) Prohibits a business that provides an online service, product, or feature likely to be accessed by children from taking any of the following actions:
   a) Using the personal information of any child in a way that the business knows, or has reason to know, is materially detrimental to the physical health, mental health, or well-being of a child.
   b) Profiling a child by default unless (1) the business can demonstrate it has appropriate safeguards in place to protect children, and (2) profiling is necessary for the service, product or feature, and the business can demonstrate a compelling reason that profiling is in the best interests of children.
   c) Collect, sell, share, or retain any personal information that is not necessary to provide an online service, product, or feature with which a child is actively and knowingly engaged, unless the business can demonstrate a compelling reason that doing so is in the best interests of children.
   d) Use personal information for any reason other than a reason for which that personal information was collected, unless the business can demonstrate a compelling reason that use of the personal information is in the best interests of children.
   e) Collect, sell, or share any precise geolocation information of children by default unless the collection of that precise geolocation information is strictly necessary for the business to provide the service, product, or feature requested and then only for the limited time that the collection of precise geolocation information is necessary to provide the service, product, or feature.
   f) Collect any precise geolocation information of a child without providing an obvious sign to the child for the duration of that collection that precise geolocation information is being collected.
   g) Use dark patterns to lead or encourage children to provide personal information beyond what is reasonably expected to provide that online service, product, or feature, to forego privacy protections, or to take any action that the business knows, or has reason to know, is materially detrimental to the child's physical health, mental health, or well-being.

   h) Use any personal information collected to estimate age or age range for any other purpose or retain that personal information longer than necessary to estimate age. (§ 1798.99.30(b).)

6) Establishes the California Children's Data Protection Working Group (CDPWG) within the Office of the Attorney General to deliver a report to the Legislature regarding best practices for the implementation of the AADC. (§ 1798.99.32.)

7) Subjects any business that violates the AADC to an injunction and liability for a civil penalty of not more than $2,500 per affected child for each negligent violation or not more than $7,500 per affected child for each intentional violation, to be assessed and recovered in a civil action brought by the Attorney General. Allows for a 90-day notice-and-cure period in which a business may avoid liability under the AADC. Authorizes the AG to adopt regulations to clarify the requirements of the AADC. (§ 1798.99.35.)

8) Establishes the Digital Age Assurance Act, which requires a developer to request a signal with respect to a particular user from an operating system provider or a covered application store when the application is downloaded and launched. A developer that receives such a signal is deemed to have actual knowledge of the age range of the user across all platforms and points of access of the application. (§ 1798.501(b).)

This bill:

1) Reworks provisions of the AADC, as described below, and repeals the corresponding sections of the existing AADC.

2) Requires a business that provides an online service, product, or feature likely to be accessed by children to take all of the following actions:
   a) Estimate the age of child users with a reasonable level of certainty appropriate to the risks that arise from the data management practices of the business pursuant to subdivision (b) of Section 1798.501 or apply the privacy and data protections afforded to children to all consumers.
   b) Configure all default privacy settings provided to children by the online service, product, or feature to settings that offer a high level of privacy.
   c) Provide any privacy information, terms of service, policies, and community standards concisely, prominently, and using clear language suited to the age of children likely to access that online service, product, or feature.

   d) If the online service, product, or feature allows the child's parent, guardian, or any other consumer to monitor the child's online activity or track the child's location, provide an obvious signal to the child when the child is being monitored or tracked.
   e) Provide prominent, accessible, and responsive tools to help children, or if applicable their parents or guardians, exercise their privacy rights and report concerns.

3) Prohibits a business that provides an online service, product, or feature likely to be accessed by children from taking any of the following actions:
   a) Profile a child by default, unless profiling is necessary to provide the online service, product, or feature or necessary to enhance the safety, privacy, or education of a child.
   b) Collect, sell, share, or retain any personal information that is not necessary to provide an online service, product, or feature with which a child is actively and knowingly engaged, or as described in subparagraphs (A) to (D), inclusive, of paragraph (1) of subdivision (a) of Section 1798.145 of the Civil Code.
   c) If the end user is a child, use personal information for any reason other than a reason for which that personal information was collected.
   d) Collect, sell, or share any precise geolocation information of children by default unless the collection of that precise geolocation information is strictly necessary for the business to provide the service, product, or feature requested and then only for the limited time that the collection of precise geolocation information is necessary to provide the service, product, or feature.
   e) Collect any precise geolocation information of a child without providing an obvious sign to the child for the duration of that collection that precise geolocation information is being collected.
   f) Use dark patterns to lead or encourage children to provide personal information beyond what is reasonably expected to provide that online service, product, or feature to forego privacy protections.
   g) Retain any personal information collected to estimate age or age range for any other purpose or retain that personal information longer than necessary to estimate age. Age assurance shall be proportionate to the risks and data practice of an online service, product, or feature.

4) Clarifies that nothing therein shall be construed to require a business to prevent or preclude a child from accessing or viewing any piece of media or category of media.

5) Requires a business that provides an online service, product, or feature, likely to be access by children, to take reasonable steps to prevent the following risks of harm to children:
    a) Reasonably foreseeable physical or financial harm.
    b) Severe and reasonably foreseeable psychological or emotional harm to a reasonable child.
    c) A highly offensive intrusion on privacy rights protected by state or federal law.
    d) Adverse discrimination in violation of state or federal law.

6) Provides that any provision of contract entered into by a child or a child's parent or guardian is voidable at the child's election if the contract was entered into as a result of a design feature likely to be access by children.

7) Provides for enforcement by public prosecutors as well as the Attorney General and doubles the penalties that are provided for under the AADC.

8) Includes a severability clause.

Background

AB 2273 (Wicks, Chapter 320, Statutes of 2022) established the AADC, placing a series of obligations and restrictions on businesses that provide online services, products, or features likely to be accessed by children. This includes a prohibition on using the personal information of any child in a way that the business knows or has reason to know is materially detrimental to the physical health, mental health, or well-being of a child. The law also requires these businesses to "[e]stimate the age of child users with a reasonable level of certainty appropriate to the risks that arise from the data management practices of the business or apply the privacy and data protections afforded to children to all consumers." The AADC requires specified businesses to perform data protection impact assessments (DPIA) and to provide default privacy settings and other protections. The law also calls for the creation of a Children's Data Protection Working Group (CDPWG) tasked with delivering a report on best practices for AADC implementation. Violations are enforceable by the Attorney General. The law was challenged shortly after going into effect and although a number of opinions have been issued from the Ninth Circuit, the legal battle continues. Those opinions have upheld certain provisions of the law but found others unconstitutional.

This bill repeals and reworks portions of the AADC, excising parts found unconstitutional and further narrowing other provisions. The bill also adds in a duty of care, public prosecutor enforcement, and contract protections, as specified.

The bill is sponsored by Children Now. It is supported by the American Academy of Pediatrics, California, among other groups. It is opposed by several industry associations. For a more thorough analysis of this bill, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis.

Comment

According to the author:

> As new technology continues to emerge and evolve, there needs to be comprehensive guardrails that protect children and their privacy while they are interacting and consuming content online. Providing more safeguards for children and their privacy is important because its misuse can expose children to harmful material, risks to their mental and physical health, and other challenges. AB 2246 would help make technology and online products safer for children and protect them from risks and features that may be harmful to them.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

Estimated $840,000 in FY 2026-27, increasing to $1.5 million annually to the Consumer Protection Section of the Department of Justice (DOJ) to conduct legal research, prepare documents for appeals, writs, trials and arbitration proceedings, including discovery, court appearances, and conducting complex and sensitive investigations. (Consumer Privacy Fund, General Fund)

Potentially significant costs to the courts to adjudicate civil actions. Expanding civil penalties could lead to lengthier and more complex court proceedings with attendant workload and resource costs to the court. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources. The FY 2026-27 Budget appropriated $70 million General Fund for this purpose (Trial Court Trust Fund, General Fund).

OPPOSITION: (Verified 8/24/26)

California Chamber of Commerce
Computer and Communications Industry Association
Technet

ARGUMENTS IN SUPPORT: Children Now writes:

Since the enactment of the California AADC, at least a dozen states have followed with similar legislation. Many of those states have had the benefit of adapting their legislation to align with the findings of the Ninth Circuit Court of Appeals. With the introduction of AB 2246, California can also adapt its most expansive child online protection law to similarly withstand constitutional scrutiny and continue to lead the country in preventing harms stemming from online activities.

ARGUMENTS IN OPPOSITION: A group of industry associations, including Technet, writes:

Personalization is not simply a commercial feature — it is a critical tool that enables platforms to tailor experiences to individual users in ways that benefit teens and actively reduce their exposure to harmful or inappropriate content. Removing this capability as a default has real consequences:

- Algorithmic filtering is a form of personalization that many platforms use to prevent harmful or borderline content from reaching minor users. Restricting this could make teens more, not less, likely to encounter age-inappropriate content. This is precisely the kind of safety tool parents want platforms to deploy.

- Personalization helps teens connect with like-minded communities, including school friends, local religious organizations, and sports teams. A nonpersonalized experience undermines these connections and reduces the meaningful value these platforms offer young people.

We respectfully request that this provision be amended to restore an exception consistent with the existing AADC, or alternatively that it be struck from the bill.

SUBJECT: Solid waste: products: environmental marketing claims

SOURCE: Author

DIGEST: This bill requires voluntary recycled content claims on labels does not exceed the amount of third-party certified recycled content introduced into the manufacturer's or supplier's overall supply stream for the material used in that product line, and specifies that only certain chains of custody models can be used to make recycled content claims.

Senate floor amendments of 8/21/2026 take minor changes to this bill, most notably allowing all manufacturers, not just beverage manufacturers, to comply with the provisions of this bill through reporting requirements already established in the beverage container recycling program.

ANALYSIS:

Existing law:

1) Defines "product" as including, but not limited to:

   a) A consumer product, as specified;

   b) A package or packaging component;

   c) A bag, sack, wrap, or other thin plastic sheet film product; and,

   d) A food or beverage container or container component, including straws, lids, and utensils. (Public Resources Code (PRC) section 42356)

2) Requires manufacturers or suppliers making environmental marketing claims relating to the recycled content of a plastic food container product to maintain information and documentation in support of that claim, including the recycled content for materials that have been recovered or otherwise diverted from the solid waste stream either during the manufacturing process (preconsumer) or after consumer use (postconsumer), and the recycled content claim conforms to the uniform standards for recycled content contained in the Federal Trade Commission Guides for the Use of Environmental Marketing Claims. (PRC section 42357.6)

3) Requires a manufacturer or supplier to furnish the information and documentation to any member of the public upon request or to provide the information on its website. (PRC section 42357.6)

This bill:

1) Requires voluntary recycled content claims on product labels meet the following criteria:

   a) The amount of recycled content material claimed on the label or labeling cannot exceed the amount of third-party certified recycled content introduced into the manufacturer's or supplier's overall supply stream for the material used in that product line (while allowing variation in individual products due to normal variations in the supply chain or manufacturing operations). This amount of recycled content may be determined using any of the following chain of custody models: identity-preserved, segregated model, controlled blending model, rolling average percentage method, as described in International Organization for Standardization (ISO) standard 22095:2020(E), or the actual recycled content used in the production of the material used in the product line, as determined through proportional attribution, as defined in ISO standard 22095-2:2026, as long as no recycling

credits are provided to any form of fuel use or fuel production and without credit transfers between unrelated processes.

b) The recycled content for materials has been recovered or otherwise diverted from the waste stream during the manufacturing process.

c) The recycled content claim conforms to the uniform standards for recycled content contained in the Federal Trade Commission Guides for the Use of Environmental Marketing Claims (16 Code of Federal Regulations [C.F.R.] Part 260), as it read on January 1, 2026.

2) Requires manufacturers or suppliers making a voluntary recycled content claim to maintain documentation that the recycled content meets the requirements in (1) above.

3) Requires a manufacturer or supplier of a product other than a plastic food container product to provide this information to the Attorney General, upon request.

a) Alternatively, or in addition to this, a manufacturer or supplier may elect to have the information and documentation reviewed by an independent third-party auditor qualified to evaluate recycled content accounting systems, chain of custody methodologies, and supporting records, and meeting certain criteria
b) Specifies that any confidential, proprietary, or trade secret information included in (3) shall not be subject to the California Public Records Act (Division 10 (commencing with Section 7920.000) of Title 1 of the Government Code) and shall remain protected from public disclosure to the fullest extent permitted by law.

4) Specifies that the postconsumer recycled content reporting requirements for plastic beverage containers established through the beverage container recycling program (BCRP) satisfy the requirements of this bill.

5) Specifies that the criteria for voluntary recycled content claims in this bill do not, unless otherwise required by law, include a regulatory filing or statement to comply with any plans or other documents submitted by a producer responsibility organization.

6) Adds a January 1, 2030 sunset to the existing requirement that manufacturer or supplier making an environmental marketing claim relating to the recycled

content of a plastic food container product keep documentation supporting that claim and provide that information to any member of the public upon request.

Background

Mass Balance and other chains of custody. Generally speaking, mass balance (MB) is an accounting system that is used by industry to track materials through the production process. According to a National Institute of Standards and Technologies (NIST) report[1], MB is one of five common chain of custody (CoC) models designed to create transparency and trust throughout the value chain regarding properties of goods and materials that are otherwise difficult to distinguish. These CoC's vary on the precision of information required to be traced through the system. Some models trace material through a supply chain form start to finished product: other models allow credits to be traded from different materials and products.

Another important distinction in different models particularly pertaining to recycled content is whether or not they allow fuel to count as a product or not (e.g. if half of a used plastic bottle is converted to fuels, can that fuel be counted as 'recycled content' in another bottle on its own, or be counted as recycled content on a newly made bottle?).

There are several types of MB accounting systems, including:

- *Rolling average percentage model.* This model uses a rolling average percentage to track physical recycled content, but allows for physical recycled content fluctuations in individual products. This method is currently used in numerous industries to calculate recycled content for finished products. For example, a facility could use a feedstock that is 10% recycled content and 90% virgin plastic over the span of a month, but each day of that month could have a different proportion of virgin to recycled content, meaning that while there is variability in recycled content in each bottle, as a batch over the course of a month will have about 90% virgin and have 10% post-consumer recycled content.

- *Proportional Attribution/Allocation models.* Proportional allocation: This method is based on the assumption that recycled units act the same as non-recycled units and therefore have the same distribution among outputs. The

[1] NIST Special Publication 1500-206 An Assessment of Mass Balance Accounting Methods for Polymers Workshop Report

certified (e.g., recycled) inputs flow to outputs in accordance with the yield in which they went in. For example, if 10 % of the input stream is comprised of recycled polymers, then 10 % of each output stream is considered to contain recycled content and credits must be allocated accordingly.

- Proportional credit allocation: This method allows the use of credits for recycled input into the production process and allows for the allocation of that credit to be distributed proportionally to the various products produced. Depending on the certification process used, fuels may be counted as recycled inputs under this standard.

- *Non proportional allocation / free credit allocation* This method allows the use of credits for recycled input into any part of the production process, whether or not any portion of recycled content is in the finished product. Many chemical processes produce multiple outputs, many of which may not have a market for recycled content. Non-proportional allocation allows for credits to be freely assigned to any product. For example, one output product can be allocated 100% of the recycled content claims and the other products have no claim. Non-proportional allocation can be fuels-exempt or "polymers only" which only counts polymer products (non-polymer products or outputs are lost and cannot be applied to other products.)

Certification and ISO standards. Industries making marketing claims for postconsumer recycled content today can use a third-party certifier. Some common third-party certifiers include the Association of Plastic Recyclers, GreenBlue Recycled Materials Standard, Intertek, ISCC Plus, SCS Global and UL.

These certifiers can provide certification based on any model of CoC, and which CoC models they use depends on the certifier. For example, ISCC plus offers chain of custody certifications using segregated and mass balance CoC. ISCC plus offers CoC certifications using rolling average mass balance, proportional, and credit-based mass balance, including fuel included and fuel excluded CoC systems[2].

ISO is an independent, non-governmental global entity that creates and publishes official standards with protocols for nearly every industry to ensure quality, safety, and efficiency[3]. These standards create shared definitions and terminology that are essential for communication across businesses and industries. There is an ISO for

[2] https://iscc-system.org/wp-content/uploads/_legacy/2026/01/ISCC-PLUS_Chain-of-Custody.pdf
[3] Heires, M. (2008). The International Organization for Standardization (ISO). *New Political Economy*, *13*(3), 357–367. https://doi.org/10.1080/13563460802302693

CoC's, and a specific ISO for mass balance, ISO 22095-2 recently released in 2025.

Comments

1) *Purpose of Bill.* According to the author, "AB 2253 ensures that consumers know whether the products they are purchasing actually contain recycled content. Currently, companies can utilize accounting to obscure the actual recycled content of their products. This practice of greenwashing means that Californians who think they are making better choices for the environment actually aren't. And, Californians are not only being misled by these fraudulent claims, but are also paying more for the false belief they are doing good because of misleading claims. California has always been the leader in the nation in protecting consumers and the environment. Californians shouldn't be bamboozled by these companies' false marketing on products that are not green. AB 2253 would protect consumers from deceptive recycled content claims by requiring companies that advertise recycled content in their products to maintain and make available written documentation proving the recycled material was diverted from the waste stream and demonstrate that their claims comply with the Federal Trade Commission standards."

2) *AB 2253, a truth in labeling bill.* AB 2553 ensures that if a product claims to have a certain recycled content, that product actually does have that recycled content in it (give or take variability of an individual product in a batch), and doesn't allow material that is turned into fuel to count as recycled content. AB 2553 takes credit based CoC systems, including some subtypes of MB, are off the table for companies making on-label marketing claims about recycled content in their products This is important to provide accurate and honest information to consumers and drive changes to innovate more recycled content in consumer-facing products.

   Without requiring products to contain postconsumer recycled content in order to claim that they have post-consumer recycled content, manufacturers could up-price products with recycled content claims, using a credit system to only add recycled content to products where that is cheaper and easier. In some types of allocation, while using credits such as non-proportional or free allocation including fuel, entities could claim to be making 100% recycled containers, for instance, while those containers have no recycled content, and are taking that 'credit' from products such as fuel or coke ash used to make roads rather than recovering actual plastic polymers.

AB 2253 asserts that this is unfair to the public that often pays a premium price for recycled content without understanding that the product they have purchased does not actually contain recycled content.

3) *But can't certifiers ensure truth in labeling?* Third party certifiers play an important role in communicating the credibility of recycled content claims to consumers. However, their certification is only as good as the CoC's that they use, and there is no limiting criteria that a third party certifier use non-credit based accounting. A third-party certifier may certify that a company is properly using the free allocation fuel included mass balance accounting system in making a 100% recycled content claim for a plastic container, but that does not mean that the plastic container has any recycled content or that any of the postconsumer material was converted to polymers to make new plastic.

   As such, third party certification is only incidental to the issue raised in AB 2253, which questions what accounting systems are misleading or informative to consumers choosing to purchase products with recycled content.

4) *Recycled content in an advanced context*. AB 2253 encompasses all consumer products, and is not restricted to plastic. However, plastic recycling provides an important example of why transparency on how recycled content is calculated is so important. In 2024, the California Department of Justice (DOJ) filed suit against ExxonMobil and related plastic industry groups based on allegations that the industry has, and continues to, "mislead consumers by engaging in an aggressive campaign to deceive the public and perpetuate the myth that recycling will solve the crisis of plastic pollution." According to the DOJ:

   - The vast majority—92%—of plastic waste processed through ExxonMobil's "advanced recycling" technology does not become recycled plastic, but rather primarily fuels;
   - The plastics that are produced through ExxonMobil's "advanced recycling" process contain so little plastic that they are effectively virgin plastics deceptively marketed as "circular" and sold at a premium;
   - ExxonMobil's "advanced recycling" process cannot handle large amounts of post-consumer plastic waste without risking the safety and performance of its equipment; and,
   - Plastics produced through ExxonMobil's "advanced recycling" program, in its best case scenario, will only account for less than one percent of its total virgin plastic production capacity, which continues to grow.

Industry groups have stated that advanced recycling will be essential to achieve California's recycling goals. If that is true, then having a clear understanding of what constitutes recycled content will be essential to evaluating whether meaningful progress is being made towards those recycling goals, or whether the goals will be achieved in name only.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

- Unknown, potentially significant cost pressures (Trial Court Trust Fund), possibly in excess of $150,000, to the courts to adjudicate enforcement actions. Actual costs would depend on the number of cases filed and the amount of court time needed to resolve each case. It generally costs approximately $1,000 to operate a courtroom for one hour. Although courts are not funded on the basis of workload, increased pressure on the Trial Court Trust Fund may create a demand for increased funding for courts from the General Fund. The state budget provides annual General Fund backfills to the Trial Court Trust Fund to offset revenue reductions, totaling approximately $117.3 million in 2025-26. The Legislative Analyst's Office recently warned of General Fund structural deficits of around $35 billion per year in the 2027-28 fiscal year and ongoing.

- Unknown but potentially significant costs (General Fund) for the Department of Justice (DOJ) to investigate, monitor, request information, and bring enforcement actions to support this bill's provisions.

- The Department of Resources Recycling and Recovery anticipates minor and absorbable costs as a result of this bill because the bill affects only the legality of marketing claims and does not impact CalRecycle's existing compliance- or enforcement-related authority, nor does the bill give the department any new authority.

SUBJECT: Electricity: load-serving entities

SOURCE: Author

DIGEST: This bill requires the California Public Utilities Commission (CPUC), on or before January 1, 2030, to consider a process to consolidate specified energy procurement plans submitted by load serving entities (LSEs) to the CPUC. This bill also requires the CPUC, when feasible, to consolidate specified compliance reporting requirements.

Senate Floor Amendments of 08/21/26 delete provisions of this bill addressing capacity valuation methods and reporting on the use of backstop procurement. The amendments also require the CPUC to consider consolidated procurement plans, instead of requiring consolidated plans, and requires the CPUC to provide reasons if it determines not to consolidate procurement plans or compliance reporting.

ANALYSIS:

Existing law:

1) Establishes and vests the CPUC with regulatory authority over public utilities, including electrical corporations. (Article 12 of the California Constitution)

2) Establishes the California Independent System Operator (CAISO) as a nonprofit, public benefit corporation and requires the CAISO, among other duties, to ensure the efficient use and reliable operation of the electrical transmission grid consistent with the achievement of planning and operating reserve criteria, as provided. (Public Utilities Code §§ 345 and 345.5)

3) Requires the CPUC to work with the CAISO to establish resource adequacy (RA) requirements for LSEs, which include electrical corporations, electric service providers (ESPs), and community choice aggregators (CCAs). Specifies the criteria the CPUC must consider when establishing RA requirements and specifies that an electrical corporation's reasonable costs for meeting RA are recoverable from customers through nonbypassable charges. Defines LSEs as electrical corporations, CCAs and ESPs. (Public Utilities Code § 380)

4) Establishes the Renewable Portfolio Standard (RPS) program which requires retail sellers (including LSEs) to procure at least 60% eligible renewable energy resources by December 31, 2030. (Public Utilities Code §§ 399.11-399.33)

5) Requires the CPUC to identify a diverse and balanced portfolio of resources needed to ensure a reliable electricity supply that provides optimal integration of renewable energy and resource diversity in a cost-effective manner. Requires the CPUC to establish integrated resource planning-based procurement requirements that rely on zero-carbon-emitting resources to the maximum extent reasonable and be designed to achieve the state policy specified in Section 454.53 and any statewide greenhouse gas emissions (GHG) limit. (Public Utilities Code § 454.51)

6) Requires the CPUC to adopt a process for each LSE to file an integrated resource plan (IRP) and schedule periodic update to the plan and require that LSEs ensure system and local reliability and require sufficient, predictable resource procurement and development to avoid unplanned energy supply shortfalls, as provided. (Public Utilities Code § 454.52)

This bill:

1) Makes findings and declarations regarding the Legislature's intent to improve information and transparency and minimize the state's reliance on backstop procurement mechanisms.

2) Requires the CPUC, on or before January 1, 2030, to consider a process to consolidate plans submitted by LSEs to the CPUC pursuant to the IRP and RPS programs into a single procurement plan.

3) Requires the CPUC, when feasible, to consolidate compliance reporting for reliability requirements pursuant to the RA and IRP programs.

4) Requires the CPUC, if it determines consolidation of plans or reporting requirements are not feasible, to provide the reasons in the decision or ruling addressing LSEs' procurement or compliance reporting obligations.

5) Requires any compliance reporting requirements or templates issued by the CPUC to ensure compliance with the RA program, RPS, or IRP are finalized for a minimum of 30 business days before a compliance report submission by an LSE.

Background

SB 100 (De León, Chapter 312, Statutes of 2018). SB 100 established the state's target to meet 100% of the state's electricity retail load with renewable and zero-carbon resources by 2045. SB 1020 (Laird, Chapter 361, Statutes of 2022) established interim goals to meeting the SB 100 target, specifically requiring 90% of retail sales by 2035, 95% by 2040 to be met with renewable and zero-carbon energy resources. SB 100 Joint Agency Report evaluates the challenges and opportunities in implementing SB 100. It includes an initial assessment of the additional energy resources and the resource building rates needed to achieve 100% clean electricity, along with the associated costs. The report is scheduled to be updated every four years. The first report issued March 2021 identified preliminarily that on average the state may need six gigawatts of new renewable and energy storage annually to meet the SB 100 goals. The California Energy Commission (CEC) is developing the 2025 report.

IRP process. SB 350 (De León, Chapter 547, Statutes of 2015) required each LSE to file a biennial IRP for approval or certification by the CPUC. The CPUC combines all LSEs' IRPs to ensure the state is on its path to meet its clean energy

procurement goals. Public owned utilities (POUs) are required to file their own IRPs with the CEC. The goal of the IRP is a two-year planning process to ensure that LSEs are meeting targets that allow the electricity sector to contribute to California's economy-wide GHG emissions reductions goals and that helps to reduce overall costs. The CPUC adopted a 2023 portfolio that reduces 25 million metric ton (MMT) of GHG emissions by 2035, as compared to the previously adopted 38 MMT by 2030 planning target. The IRP is intended to forecast needs on a 10-year horizon. In this regard, the IRP is a forward-looking activity. As part of the IRP process, the CPUC has issued several procurement orders on LSEs to address near-term and mid-term procurement needs. Within the procurement orders, the CPUC has directed central procurement for local RA and mid-term reliability by electric investor-owned utilities (IOUs) for customers, including those of other LSEs.

Resource adequacy (RA). Following the California energy crisis of 2000-01, the California Legislature enacted legislation to prevent future incidents of widespread blackouts and rolling brownouts due to lack of electric generating capacity. Among the reforms adopted in response to the crisis was the adoption of Public Utilities Code §380 as an effort to better ensure reliability of electricity generation supply. The statute directs the CPUC, in consultation with the CAISO, to establish RA requirements for all LSEs, including electric IOUs, ESPs, and CCAs (which did not exist at the time of the crisis).

The current RA program consists of system, local, and flexible requirements for each month of a compliance year. In October of each year, LSEs must demonstrate that they have procured 90% of their system RA obligations for the five summer months (May-September) of the following year, as well as 100% of their local requirements, and 90% of their flexible requirements for each month of the coming compliance year. In recent years, the CPUC has adopted changes to the RA program, including increasing the planning reserve margin for all LSEs. The CPUC also assesses penalties on the LSEs who fail to satisfy their RA obligations, including limiting the expansion of CCAs if they are deficient in their RA requirement. The CPUC has implemented a significant change to the RA program by implementing a slice-of-day (SOD) framework that assesses the hourly use of resources. The CPUC has been developing the new structure for a few years and in 2025 implemented the first year of compliance for the SOD. The CPUC adopted a 17% planning reserve margin for the SOD framework, consistent with previous planning reserve margins, to procure enough RA to meet load obligations in each hour rather than monthly. Under the SOD framework, LSEs receive a 24-hour obligation for each of the 12 months of the year. The new RA framework requires

that resources, including energy storage resources, demonstrate their ability to provide capacity during specific, critical hours rather than just a daily peak.

CAISO backstop procurement. If California RA rules fail to provide sufficient resources, the CAISO is compelled to utilize centralized backstop procurement mechanisms in order to maintain electric system reliability. Backstop procurement is whereby the CAISO contracts with a generator to address the shortfall. Under Federal Energy Regulatory Commission (FERC) rules, the CAISO, like all other balancing authorities, must ensure system reliability or face penalties by FERC. The CAISO has two mechanisms for centralized backstop procurement: Reliability Must Run (RMR) and Capacity Procurement Mechanism (CPM). As this procurement can be due to an emergency supply shortfall, they can be more expensive than planned procurement.

Comments

Need for this bill. According to the author:

> AB 2266 would streamline overlapping CPUC procurement and compliance processes, improve transparency, and help align how resource reliability is evaluated across programs. As California has built on its success as a clean-energy leader, separately enacted programs have created a patchwork of CPUC processes over time. This bill seeks to reduce duplicative reporting, provide clearer procurement signals, and improve confidence in whether the state is procuring the right mix of resources. …Taken together, these changes are intended to support continuous process improvements, more efficient planning, better accountability, and better outcomes for ratepayers.

CPUC proposes new framework, Reliable and Clean Power Procurement Program (RCPPP). As part of existing proceedings, including those related to RA and IRP, specifically R. 25-10-003, the CPUC is actively exploring a more formal programmatic approach for how procurement may be ordered or authorized, in lieu of the current ad hoc, order-by-order approach. Beginning in 2020 to April 2025, CPUC staff papers have proposed an RCPPP to support affordability in both reliability and GHG reductions by giving LSEs a more predictable regulatory framework to procure their share of resources needed to meet electric system reliability and GHG emissions reduction goals at least cost. The CPUC's proposed RCPPP offers two options: one that allows LSEs to procure both new and existing resources to fill system reliability gaps, and one limited to new resources only. Both options are designed to address procurement shortfalls that LSEs cannot or do

not fill on their own. The proposal will undergo extensive stakeholder review in the coming months through the IRP proceeding.

Bill requires the CPUC to consider consolidated procurement plans and/or compliance reporting. This bill requires the CPUC, by January 1, 2030, to consider a process to consolidate procurement plans submitted by LSEs in compliance with the RPS and the IRP. The bill also requires the CPUC, when feasible, to consolidate compliance reporting for reliability requirements pursuant to the RA and IRP programs. Recent amendments require the CPUC to provide reasons for not consolidated procurement plans or compliance reporting. These requirements may be folded into considerations within the RCPPP or within relevant proceedings.

Related/Prior Legislation

(See Policy Committee Analysis)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, unknown but significant ongoing CPUC costs, possibly around a million dollars annually (ratepayer funds), to implement the provisions of this bill. Potential CPUC workload could include rulemaking, methodology development, reconciliation with the Slice-of-Day framework, compliance and other reporting, and coordination with the CEC and utilities.

SUPPORT: (Verified 8/21/26)

Alliance for Retail Energy Markets
Ava Community Energy
California Community Choice Association
Environmental Defense Fund
NRG Energy

OPPOSITION: (Verified 8/21/26)

Independent Energy Producers Association

ARGUMENTS IN SUPPORT: According to AVA Community Energy:

As the grid incorporates a wider range of resource types, including storage and distributed energy resources, the need for consistent and transparent valuation methodologies has become increasingly important. As a community choice aggregator (CCA), Ava and other load serving entities (LSEs) must navigate multiple capacity valuation frameworks across different programs, each with its own assumptions, metrics, and compliance requirements. This fragmentation increases administrative burden, complicates procurement decisions, and introduces uncertainty into long-term planning.

AB 2266 addresses these challenges by requiring the CPUC to adopt a single, standardized approach to valuing resource adequacy capacity. This reform will improve transparency, reduce duplicative compliance requirements, and enable more efficient resource procurement. By streamlining these processes, AB 2266 will help reduce administrative costs and support more cost-effective planning, ultimately benefiting customers through lower rates.

ARGUMENTS IN OPPOSITION: The Independent Energy Producers Association (IEP) reasons for opposing this bill largely relate to language that was amended out of this bill by recent Floor Amendments. It is unclear whether IEP opposes the current language remaining in this bill.

SUBJECT: Office of Elections Cybersecurity

SOURCE: Author

DIGEST: This bill requires the Secretary of State (SOS) to assess whether additional state resources are needed to replace election cybersecurity resources previously provided by the federal government and permits the Office of Elections Cybersecurity (OEC) to consult with academic researchers to develop best practices for protecting against threats to election cybersecurity.

ANALYSIS:

Existing law:

1) Establishes, under the SOS, the OEC and tasks the OEC with the following:

   a) Coordinating efforts between the SOS and local election officials to reduce the likelihood and severity of cyber incidents that could interfere with the security or integrity of elections in the state.

   b) Monitoring and counteracting false or misleading information regarding the electoral process that is published online or on other platforms and that may

suppress voter participation or cause confusion and disruption of the orderly and secure administration of elections.

2) Requires the OEC to do all of the following:

   a) Coordinate between federal, state, and local agencies the sharing of information on threats to election cybersecurity, risk assessment, and threat mitigation in a timely manner and in a manner that protects sensitive information.

   b) In consultation with federal, state, and local agencies and private organizations, develop best practices for protecting against threats to election cybersecurity.

   c) In consultation with state and local agencies, develop and include best practices for cyber incident responses in emergency preparedness plans for elections.

   d) Identify resources, such as protective security tools, training, and other resources available to state and county election officials.

   e) Advise the SOS on issues related to election cybersecurity, and make recommendations for changes to state laws, regulations, and policies to further protect election infrastructure.

   f) Serve as a liaison between the SOS, other state agencies, federal agencies, and local election officials on election cybersecurity issues.

   g) Coordinate efforts within the SOS to protect the security of internet-connected elections-related resources, including the state's online voter registration system, the statewide voter registration database (VoteCal), the SOS' election night results website, online campaign and lobbying filing and disclosure system developed by the SOS (CalAccess), and other parts of the SOS' website.

   h) Assess the false or misleading information regarding the electoral process that is published online or other platforms, mitigate the false or misleading information, and educate voters, especially new and unregistered voters, with valid information from election officials or the SOS.

This bill:

1) Requires the SOS to assess whether additional state resources are needed to replace election cybersecurity resources previously provided by the federal government.

2) Permits the OEC to consult with academic researchers to develop best practices for protecting against threats to election cybersecurity.

3) Makes minor and technical changes.

Background

Office of Elections Cybersecurity. AB 3075 (Berman, Chapter 241, Statutes of 2018) established the OEC, known as the Election Security Program, within the SOS' office. The OEC has two primary missions. First, it is responsible for coordinating efforts between the SOS and local election officials to reduce the likelihood and severity of cyber incidents that could interfere with the security or integrity of elections in California. The OEC is also tasked with monitoring and counteracting false or misleading information regarding the electoral process that is published online or on other platforms that may suppress voter participation, cause confusion, or disrupt the ability to ensure a secure election. According to the OEC's website, the office serves California with the sole purpose of keeping every Californian's vote safe from online interference, especially the spread of mis- and disinformation. The SOS also provides information on how to identify incorrect election information, information on where to find correct election information, and ways to report false or misleading information.

Additionally, the OEC works with federal, state, and local partners to share election security information and best practices. This includes the Department of Homeland Security, the Federal Bureau of Investigation, California Department of Technology, California Office of Emergency Services, California Highway Patrol, and county election officials. Cybersecurity trainings with federal and state partners, as well as organizing tabletop exercises and drills for county election officials, are also hosted by the OEC.

Cybersecurity and Infrastructure Security Agency. The federal Cybersecurity and Infrastructure Security Agency (CISA) works with partners at every level to coordinate efforts relating to information on critical infrastructure in the United States. This includes election security and cybersecurity. In 2025, 130 CISA positions were eliminated and funding for information-sharing programs under

CISA were terminated. This led to new concerns with the agency's ability to provide information and combat domestic and foreign cyber threats.

Comments

Author's Statement. I was proud to author legislation in 2018 to create the OEC, which is tasked with coordinating efforts between federal, state, and local officials to reduce the likelihood and severity of cyber incidents that threaten the integrity of California elections. Unfortunately, the Trump Administration has cut critical funding, coordination, and support that helped states guard against threats to our election systems. Given the loss of federal election cybersecurity infrastructure, this bill would direct OEC to assess if additional state resources are needed to ensure that California officials continue to have the information and tools necessary to defend our democracy from cyber-attacks. Additionally, this bill would strengthen OEC by authorizing them to consult with academic researchers, allowing them to utilize their expertise in support of OEC's mission.

Related/Prior Legislation

AB 3075 (Berman, Chapter 241, Statutes of 2018) established the OEC within the SOS' office.

SUBJECT: State holidays: Sylvia Mendez Day

SOURCE: Author

DIGEST: This bill designates April 14 as Sylvia Mendez Day, as specified.

Senate Floor Amendments of 8/21/26 address statutory chaptering issues with similar legislation, as specified.

Senate Floor Amendments of 8/17/26 make minor and technical revisions to the Legislative findings and declarations.

ANALYSIS:

Existing law:

1) Designates specific days as holidays in the state, including, among others, Dr. Martin Luther King, Jr. Day.

2) Designates certain days as judicial holidays and exempts others including, Lunar New Year, Diwali, and Genocide Remembrance Day.

This bill:

1) Designates April 14, a state holiday, as Sylvia Mendez Day.

2) Exempts Sylvia Mendez Day from being a judicial holiday, as specified.

3) Includes related Legislative findings and declarations, as specified.

Background

Author Statement. According to the author's office, "as the former Mayor of Westminster, I know the power of the Mendez v. Westminster case. It's important for California to celebrate the civil rights challenges faced by Mexican-Americans in this state. Furthermore, I am confident California will benefit from learning of the historical link between Mendez v. Westminster and Brown v. Board of Education, and of how California led the way as the first state to outlaw all public school segregation. This legislative session should waste no time in celebrating Sylvia Mendez's contribution to civil rights in the state's government code to ensure this trailblazing case receives its proper place in history."

State Holidays. Existing law establishes the various state holidays of California, including those deemed to be judicial holidays. While many state holidays coincide with "judicial" or "bank" holidays, a number of these dates have been exempted in law from being a judicial holiday.

Existing state holidays include:

a) Every Sunday.
b) January 1.
c) The third Monday in January, known as "Dr. Martin Luther King, Jr. Day."
d) The date corresponding with the second new moon following the winter solstice, or the third new moon following the winter solstice should an intercalary month intervene, known as "Lunar New Year."
e) February 12, known as "Lincoln Day."
f) The third Monday in February.
g) March 31, known as "Farmworkers Day."
h) April 24, known as "Genocide Remembrance Day."
i) The 15th day of the month of Kartik in the Hindu lunar calendar of each year, known as "Diwali."
j) The last Monday in May.

k) June 19, known as "Juneteenth."
l) July 4.
m) The first Monday in September.
n) September 9, known as "Admission Day."
o) The fourth Friday in September, known as "Native American Day."
p) The second Monday in October, known as "Columbus Day."
q) November 11, known as "Veterans Day."
r) December 25.
s) Good Friday from 12 noon until 3 p.m.

This bill establishes April 14 as "Sylvia Mendez Day," and specifically exempts that date from being included as a judicial holiday. This bill also includes related Legislative findings and declarations regarding Sylvia Mendez.

Mendez et al. v Westminster School District of Orange County et al. The landmark case of *Mendez et al. v. Westminster School District of Orange County et al.,* (S.D. Cal. 1946) 64 F.Supp. 544, aff'd *Westminster School District of Orange County v. Mendez* (9th Cir. 1947) 161 F.2d 774 (hereafter Mendez v. Westminster) remains a pivotal decision in the struggle for civil rights and educational equality for Mexican American students in California.

The case arose when Sylvia Mendez and approximately 5,000 similarly situated children in Orange County were denied admission to neighborhood schools and instead directed to separate "Mexican schools," based solely on their ancestry and ethnicity. In response, Sylvia Mendez's family, with four other families, challenged the practice in federal court. The families argued that the segregation of Mexican American students violated the Equal Protection Clause of the Fourteenth Amendment. The federal district court agreed, and the Ninth Circuit Court of Appeals affirmed the decision in 1947, marking a major victory for educational equity and civil rights.

Mendez v. Westminster is widely regarded as one of the earliest and most important school desegregation cases in the nation. Years before the United States Supreme Court decided Brown v. Board of Education, the federal Courts in California recognized that separating children based on ancestry deprived them of equal educational opportunities and underlined the principles of equality upon which public education is founded. The case also attracted support from a broad coalition of civil rights organizations including the NAACP which filed an amicus brief through attorneys – including Thurgood Marshall – who would later

successfully argue Brown v. Board of Education before the United States Supreme Court.

The decision's impact extended beyond the courtroom. Just months after the Ninth Circuit affirmed the ruling, Governor Earl Warren signed legislation ending statutory school segregation in California. This act made California a national leader in the movement toward integrated public education. Governor Warren would later go on to serve as the Chief Justice of the United States and the author of the unanimous opinion in Brown v. Board of Education.

The Mendez family was one of five plaintiff families (Gonzalo and Felicitas Mendez, Thomas and Mary Luisa Estrada, William and Virginia Guzman, Frank and Irene Palomino, Lorenzo and Josefina Ramirez). Their surname appears first because Gonzalo Mendez was the first-listed plaintiff in the legal caption, just as Westminster School District was the first-listed defendant. The legal record does not establish that the Mendez family alone initiated or led the litigation, nor does being listed first diminish the equal role played by the other plaintiff families throughout the case. Each of the five families accepted personal risk, challenged school segregation together, and remained a part of the litigation through the federal district court's decision and the Ninth Circuit's April 14, 1947, affirmation of that victory. Today, three children directly involved in the original litigation remain living: Joe Ramirez, Evelina Estrada, and Daniel Estrada.

This bill designates Sylvia Mendez Day as a state holiday and exempts that date from being considered a judicial holiday. Existing law does not require private employers to provide paid holidays or close their businesses on any holiday. Similarly, local governments and state employers retain authority under applicable laws regarding paid time off.

Not All Holidays are Paid Holidays. California law does not require private employers to provide paid holidays, to close their business on any holiday, or to give employees the day off for any particular holiday. When an employer chooses to close its business on a holiday and provide paid time off, that practice exists because of an employer adopted policy or practice, the terms of a collective bargaining agreement, or the terms of an individual employment agreement. There is no legal requirement that an employer offer paid holidays or close its operations on those days.

At the local level, cities have the liberty to specify by charter, ordinance or resolution what paid holidays the city will provide to its city employees. Similarly,

most state workers are bound by the memorandum of understanding that they have negotiated with the Governor. For all other state employees, they are entitled to the holidays prescribed in existing law.

This bill adds Sylvia Mendez Day to the list of state holidays. An additional state holiday does not equate to an additional paid day off. Public employees earn personal holidays that they may use to take any day off with pay.

Related/Prior Legislation

AB 1841 (Ramos, 2026) entitles state employees to a holiday on the 4th Friday in September, known as "Native American Day," among other provisions. (Pending on the Senate Floor)

AB 2017 (Haney, 2026) adds "Eid al-Fitr" and "Eid al-Adha" to the list of state holidays, as specified. (Pending on the Senate Floor)

AB 2156 (Rivas, Chapter 7, Statutes of 2026) designated May 31 as Farmworkers Day and requires the Governor to annually proclaim March 31 as Farmworkers Day.

AB 2455 (Haney, Chapter 49, Statutes of 2026) requires the Governor to annually proclaim May 17 as Bruce Lee Day, and designates that date as having special significance, as specified. (Pending on the Senate Floor)

AB 268 (Kalra, Chapter 358, Statutes of 2025) added Diwali to the list of state holidays, authorized public schools and community colleges to close on Diwali, and authorized state employees to elect to take specified leave in recognition of Diwali.

OPPOSITION: (Verified 8/21/26)

California League of United Latin American Citizens

ARGUMENTS IN SUPPORT: In support of this bill, the California Hispanic Chamber of Commerce writes that, "[t]he Mendez v. Westminster decision stands as an early and pivotal affirmation of equal protection in public education. Through determination and sacrifice, Latino families successfully confronted institutional discrimination, leading California to become one of the first states to prohibit school segregation. Their efforts not only advanced justice within the state but also helped lay the groundwork for the United States Supreme Court's later rulings on educational equality."

ARGUMENTS IN OPPOSITION: In opposition to this bill, the California League of United Latin American Citizens (LULAC) write, in part, "California LULAC deeply respects Sylvia Mendez and recognizes her decades of work educating the public about the landmark school desegregation case commonly known as *Mendez v. Westminster*. Her efforts have helped ensure that generations of Californians understand the importance of this historic civil rights victory.

Our concern is not with honoring Sylvia Mendez or her family's contributions. Rather, it is with ensuring that California law accurately reflects the collective nature of the litigation and the many families whose courage made this victory possible."

Further, "[t]he case was filed as *Mendez et al. v. Westminster School District of Orange County et al.* It was a class-action lawsuit brough on behalf of approximately 5,000 similarly situated Mexican American children and involved

five plaintiff families challenging segregation across four Orange County school districts. The federal district court identified Gonzalo Mendez, Thomas Estrada, William Guzman, Frank Palomino, and Lorenzo Ramirez as the fathers bringing the action on behalf of their children and the broader class."

And finally, "California now has an opportunity to commemorate this landmark decision in a manner that is both accurate and inclusive. We respectfully request that AB 2294 be amended to recognize the collective achievement of all five plaintiff families in *Mendez et al. v. Westminster et al.*, rather than naming the observance solely after one participant.

"California LULAC stands ready to work collaboratively with your office, the surviving family members, and other stakeholders to develop amendments that appropriately recognize the full history of this landmark case. Until such amendments are adopted, California LULAC must respectfully oppose AB 2294."

Bill No: AB 2298
Author: Irwin (D)
Amended: 8/20/26 in Senate
Vote: 21

SENATE EDUCATION COMMITTEE: 7-0, 6/17/26
AYES: Pérez, Ochoa Bogh, Cabaldon, Choi, Cortese, Gonzalez, Reyes

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 68-0, 5/21/26 (Consent) - See last page for vote

SUBJECT: Pupil instruction: computer science: content standards and instructional materials

SOURCE: Author

DIGEST: This bill requires the Instructional Quality Commission (IQC), during the next revision of the computer science content standards occurring after January 1, 2027, to consider incorporating cybersecurity skills content into those standards.

Senate floor amendments of 8/20/26 strike a provision of this bill requiring the IQC to consider including cybersecurity skills in its criteria for evaluating instructional materials, when such materials are next adopted by the State Board of Education (SBE).

ANALYSIS:

Existing law:

1) Requires, on or before July 31, 2019, the IQC to consider developing and recommending to the SBE computer science content standards for kindergarten (K) and grades 1 to 12, inclusive, as specified. States that the computer science content standards may be used by school districts to develop computer science

programs and course assessments but are not mandatory. (Education Code (EC) § 60605.4)

2) Requires the SBE to adopt at least five instructional materials for grades K-8 in the following subjects:

   a) Language arts;

   b) Mathematics;

   c) Science;

   d) Social science;

   e) Bilingual or bicultural subjects; and

   f) Any other subject, discipline, or interdisciplinary areas for which the SBE determines the adoption of instructional materials to be necessary or desirable. (EC § 60200)

3) Establishes procedures for the adoption of instructional materials for grades K-8 by the SBE. (EC § 60200)

4) Authorizes a process for conducting a follow-up adoption of instructional materials, and defines it as one other than the primary adoption. (EC § 60227)

5) Authorizes local educational agencies (LEAs) to use instructional materials that are aligned with state adopted academic content standards, including instructional materials that have not been adopted by the SBE. (EC § 60210)

6) Requires that if an LEA chooses to use instructional materials that have not been adopted by the SBE, the LEA shall ensure that a majority of the participants of any review process it conducts are classroom teachers who are assigned to the subject area or grade level of the materials. (EC § 60210)

This bill:

1) Requires the IQC to consider incorporating cybersecurity skills content during the next revision of the computer science content standards occurring after January 1, 2027.

2) Defines "cybersecurity skills" to mean techniques to protect information and devices by preventing, detecting, and responding to attacks by threat actors.

Comments

Need for the bill. According to the author, "Recent years have seen a stark increase in the number and sophistication of cyber threats posed to the students in our state, underscoring the need for modernized cybersecurity education. Existing computer science content standards, last updated in 2018, include cybersecurity content, but they focus primarily on protecting information rather than identifying and preventing threats. While this foundation has value, it reflects an outdated generation of cyber risks."

"Since 2018, cyberattacks have grown increasingly complex, particularly with the growth of artificial intelligence, enabling more advanced phishing schemes, social engineering, and automated attacks. As a result, our existing standards no longer align with the current cyber threat landscape. Modern cybersecurity education standards must emphasize the skills needed to identify, prevent, and respond to these increasingly sophisticated attacks."

"AB 2298 addresses this gap by requiring the Instructional Quality Commission to consider including updated, more robust cybersecurity skills content focused on identifying and responding to threats into the state's computer science standards. This will ensure that, as cyber threats continue to evolve, students are equipped with the knowledge and skills needed to protect themselves and respond effectively to the modern cyber threats they face today."

Computer Science Standards for California Public Schools: Kindergarten through Grade Twelve. In September 2018, the SBE adopted the California Computer Science Standards based on the revised International Computer Science Teachers Association standards, which align with the national K–12 Computer Science Framework.

The standards include five core concept areas which are each coupled with seven core practices. Each core concept provides foundational knowledge on key ideas, which build upon each other as students progress through grade spans. Core practices help demonstrate ways in which students actively engage in computer science learning experiences that build conceptual knowledge.

Cybersecurity in the Computer Science Standards. This bill requires the IQC, during its next revision of the Computer Science Standards, to consider incorporating content on cybersecurity skills. Currently, cybersecurity content is featured across all grade spans in the Computer Science Standards as a subconcept under the Networks and the Internet (NI) core concept. Examples within the standards include, but are not limited to, the following:

Kindergarten through Grade 2

Standard: K-2.NI.5 - Explain why people use passwords.

Descriptive Statement: Passwords protect information from unwanted use by others. When creating passwords, people often use patterns of familiar numbers and text to more easily remember their passwords. However, this may make the passwords weaker. Knowledge about the importance of passwords is an essential first step in learning about cybersecurity. Students explain that strong passwords are needed to protect devices and information from unwanted use. For example, students could play a game of guessing a three-character code. In one version of the game, the characters are only numbers. In the second version, characters are numbers or letters. Students describe why it would take longer to guess the correct code in the second case. Alternatively, students could engage in a collaborative discussion regarding passwords and their importance. Students may follow up the discussion by exploring strong password components (combination of letters, numbers, and characters), creating their own passwords, and writing opinion pieces indicating reasons their passwords are strong.

Grades 3 through 5

Standard: 3-5.NI.5 - Describe physical and digital security measures for protecting personal information.

Descriptive Statement: Personal information can be protected physically and digitally. Cybersecurity is the protection from unauthorized use of electronic data, or the measures taken to achieve this. Students identify what personal information is and the reasons for protecting it. Students describe physical and digital approaches for protecting personal information, such as using strong passwords and biometric scanners. For example, students could engage in a collaborative discussion orally or in writing regarding topics that relate to personal cybersecurity issues. Discussion topics could be based on current events related to cybersecurity or topics that are applicable to students, such as the necessity of backing up data to guard against loss, how to create strong passwords, and the importance of not sharing passwords, or why we should keep operating systems updated and use anti-virus software to protect data and systems. Students could also discuss physical measures that can be used to protect data, including biometric scanners, locked doors, and physical backups.

Grades 9 through 12

Standard: 9-12.NI.6 - Compare and contrast security measures to address various security threats.

Descriptive Statement: Network security depends on a combination of hardware, software, and practices that control access to data and systems. The needs of users and the sensitivity of data determine the level of security implemented. Potential security problems, such as denial-of-service attacks, ransomware, viruses, worms, spyware, and phishing, present threats to sensitive data. Students compare and contrast different types of security measures based on factors such as efficiency, feasibility, ethical impacts, usability, and security. For example, students could review case studies or current events in which governments or organizations experienced data leaks or data loss as a result of these types of attacks. Students could provide an analysis of actual security measures taken compared to other security measures which may have led to different outcomes. Alternatively, students might discuss computer security policies in place at the local level that present a tradeoff between usability and security, such as a web filter that prevents access to many educational sites but keeps the campus network safe.

The IQC and the SBE. The Legislature has vested the IQC and the SBE with the authority to develop and adopt state content standards, curriculum frameworks, and instructional materials. The content standards describe the knowledge, concepts, and skills that educators and professionals in the field expect students to know at each grade level. Curriculum frameworks provide guidance for implementing the content standards by describing the scope and sequence of knowledge and the skills that all students are expected to master.

The IQC develops curriculum frameworks through a process involving practitioners and experts who have an in-depth understanding of curriculum and instruction, including the full scope and sequence of the curriculum in each subject and at each grade level, constraints on instructional time and resources, and the relationship of curriculum to state assessments and other measures of student progress. Changes are frequently made in response to public comment. The frameworks are then adopted by the SBE in a public meeting.

The resulting curriculum framework is intended to serve as a guidance document for educators and administrators on how to plan for and provide quality, skills-based, standards-aligned instruction on the various content areas.

SUBJECT: Gas corporations: gas distribution service line replacements: alternatives

SOURCE: Earthjustice
Natural Resource Defense Council

DIGEST: This bill establishes the Home Energy Choice Act, which requires the California Public Utilities Commission (CPUC) to solicit proposals for, and require each gas corporation to offer, a Gas Distribution Service Line Replacement Alternatives Program, on or before January 1, 2028, to provide certain residential gas customers served by a gas distribution service line that will be replaced with a monetary incentive to deploy gas distribution service line replacement alternatives and cease gas service to avoid the gas distribution service line replacement.

ANALYSIS:

Existing law:

1) Establishes and vests the CPUC with regulatory authority over public utilities, including gas and electrical corporations. (Article XII of the California Constitution)

2) Requires the CPUC to require each gas corporation to provide bundled basic gas service to all core customers in its service territory unless the customer chooses or contracts to have natural gas purchased and supplied by another entity. (Public Utilities Code §328.2)

3) Requires every public utility to furnish and maintain such adequate, efficient, just, and reasonable service, instrumentalities, equipment, and facilities, …as are necessary to promote the safety, health, comfort, and convenience of its patrons, employees, and the public. (Public Utilities Code §451)

4) Authorizes a gas corporation to cease providing service in an area within its service territory where a pilot project, pursuant to Public Utilities Code §663, has been implemented and the CPUC determines that adequate substitute energy service is reasonably available to support the energy end uses of affected gas corporation customers. (Public Utilities Code §459)

5) Requires the CPUC, in consultation with the state's gas corporations, to establish a voluntary program to facilitate the cost-effective decarbonization of priority neighborhood decarbonization zones, not to exceed 30 pilot projects across the state. (Public Utilities Code §663)

6) Requires the CPUC to require each gas corporation to provide bundled basic gas service to all core customers in its service territory, unless the customer chooses or contracts to have natural gas purchased and supplied by another entity. (Public Utilities Code §963)

This bill:

1) Establishes the Home Energy Choice Act, which requires the CPUC, in a new or existing proceeding, to solicit proposals for, and require each gas corporation to offer, a Gas Distribution Service Line Replacement Alternatives Program, on or before January 1, 2028, to provide certain residential gas customers served by a gas distribution service line that will be replaced with a monetary incentive to deploy gas distribution service line replacement alternatives, as defined, and cease gas service to avoid the gas distribution service line replacement, as specified.

2) Requires the CPUC to exempt from the program the emergency replacement of a gas distribution service line.

3) Requires the CPUC to annually review the program to determine whether adjustments should be made to program design to increase program participation.

4) Requires the CPUC, on or before January 1, 2029, and annually thereafter, to report to the Legislature on the progress of each implemented program, as provided.

5) Limits customer enrollment in the program to no more than 1% of the utility's service territory, including customers enrolled in zonal neighborhood decarbonization program.

6) Repeals its provisions on January 1, 2035.

Background

Natural gas utility service. Natural gas is transported to California customers via a system of interstate and common carrier transmission and distribution pipelines, and underground storage fields. Most natural gas consumed in state is delivered from out-of-state sources. Approximately 77% of California's homes receive natural gas utility service (just over 11 million households of a total of 14.5 million); additionally, about 450,000 commercial customers and another nearly 36,000 industrial customers receive gas service, based on the data (2021) from the Energy Information Administration. Southern California Gas (SoCalGas) and Pacific Gas & Electric (PG&E) provide gas utility service to about 5.9 million and 4.5 million customer service connections, respectively, while San Diego Gas & Electric (SDG&E) provides service to over 800,000 customer service connections and a few additional smaller gas investor-owned utilities (IOUs) provide service, including Southwest Gas and West Coast Gas. Additionally, there are a few publicly owned (POU) gas utilities serving the cities of Coalinga, Long Beach, Susanville, and Vernon [who are not economically regulated by the CPUC]. The state's natural gas utilities operate over 100,000 miles of transmission and distribution pipelines, including what is referred to as the "back-bone," and thousands more miles of service lines. According to a 2021 CPUC Staff Proposal, most gas used by the residential sector is for space and water heating, with smaller percentages used for cooking, fireplaces, clothes drying, and a few other functions.

Dual fuel homes – those using both gas and electricity – are the dominant type of home in California. California is the state with the highest percentage of households using natural gas for cooking (70%), according to a 2020 analysis from the Energy Information Administration.

Reducing GHGs from the building sector. The California Air Resources Board *2022 Climate Change Scoping Plan* identifies actions to reduce GHG emissions from the building sector, including progressively improving building codes and standards, pursuing voluntary efforts to exceed code requirements, and completing existing building retrofits. The Scoping Plan also noted that "achieving carbon neutrality must include transitioning away from fossil gas in residential and commercial buildings, and will rely primarily on advancing energy efficiency while replacing gas appliances with non-combustion alternatives. This transition must include the goal of trimming back the existing gas infrastructure, so pockets of gas-fueled residential and commercial buildings do not require ongoing maintenance of the entire limb for gas delivery."

CPUC actions to support State's climate goals. California's agencies are taking steps toward achieving carbon neutrality by 2045 and meeting the state's ambitious 2030 GHG emissions reduction target, including with actions specific to reducing emissions from the building sector. The CPUC, in particular, has taken various actions to support the state's GHG reduction goals, while protecting ratepayers to ensure safe, reliable, and reliable natural gas utility sector, including:

- Eliminated financial subsidies available to builders to offset the costs of extending natural gas lines to serve new buildings, known as allowances which are funded by natural gas utility customers.
- Required natural gas investor-owned utilities (IOUs) to seek CPUC approval of projects via an application for a certificate of public convenience and necessity (CPCN) prior to commencing construction on any gas infrastructure project whose cost exceeds $75 million.
- Required natural gas corporations to file annual reports detailing planned long-term infrastructure projects exceeding $50 million.
- Reduced incentives for natural gas energy efficiency measures in residential and commercial new construction to align more closely with the state's GHG reduction, climate change mitigation, and decarbonization goals.

SB 1221 (Min, Chapter 602, Statutes of 2022) authorized limited pilot projects within gas utility service territory for neighborhood scale decarbonization. SB 1221 authorized up to 30 targeted pilot projects to provide learnings and greater

understanding of the challenges to transition away from the natural gas utility system to electrification at the neighborhood level. The pilot projects are voluntary to natural gas utilities, require consent from a super-majority of affected customers (66.66%), and require the projects to be more cost-effective for ratepayers as compared to proposed upgrades needed on the natural gas system. SB 1221 also ensured that where a pilot project is implemented, the natural gas corporation can cease providing service with no continued obligation to serve, thereby protecting ratepayers from having to rebuild the system in the future. The CPUC has recently adopted maps for priority neighborhoods as required by SB 1221. The agency has required public workshops and is also actively pursuing efforts towards developing pilot projects with stakeholder participation.

Obligation to serve. The concept of a regulatory compact recognizes a set of mutual rights, obligations, and benefits between utilities and their customers. Utilities are granted exclusive service franchise (service territories), and in exchange accept the responsibility to serve everyone in the territory (obligation to serve everyone willing to pay) and submit to rate-regulation by an economic regulator (the CPUC) where the utility has the opportunity to earn a reasonable rate of return. A utility's obligation to serve is noted in various statues and Constitutional provisions, most notably, in Public Utilities Code §451 which requires utilities "to furnish and maintain… adequate, efficient, just, and reasonable service." A number of statutes also provide requirements for how a utility must discontinue service, including provisions related to nonpayment by a customer.

Comments

Need for this bill. According to the author:

> If we're going to meet our goal of creating a more affordable and sustainable California, we need to encourage electrification and ease the economic barriers to clean energy. Gas utilities plan to spend millions of ratepayer dollars in coming years to replace aging gas service lines. AB 2313, the Home Energy Choice Act, will give homeowners with a planned service line replacement the option to instead discontinue their gas service and use a portion of those funds to electrify their home. This bill is focused on a subset of pipeline replacement projects, at a point where we can reduce costs for all utility customers, avoid stranded assets, and expand energy choices for Californians. By redirecting funds that utilities would otherwise spend on fossil fuel infrastructure, the

Home Energy Choice Act will protect the environment, promote public health, and provide long-term savings for all ratepayers.

Bill proposes to provide customers with the option to decline utility service line upgrades. This bill proposes to establish a Gas Distribution Service Line Replacement Alternatives Program, on or before January 1, 2028, to provide residential natural gas IOU customers served by a distribution service line that will be replaced with a monetary incentive to deploy gas distribution service line replacement alternatives and cease gas service to avoid the gas distribution service line replacement**.** The effort is modeled after a similar program being implemented in New York, the Home Energy Choice Act which require gas utilities to offer customers facing a service line replacement an incentive to instead replace their gas appliances with electric alternatives. The service line could then be decommissioned rather than replaced. The proponents note that in PG&E's service territory, roughly 15,000 service lines are upgraded each year. Given the long-lived asset life of these upgrades, they contend alternative options can be provided to customers on a voluntary basis that would decommission the utility service line from the home to the main line. They argue that such an effort is complementary to the SB 1221 Neighborhood Decarbonization efforts, as these projects would be on an individual customer-by-customer basis, as opposed to a neighborhood scale.

Concerns that safety and reliability will be jeopardized. Opponents of this bill raise concerns about jeopardizing the existing natural gas utility system, including reliability and safety, as well as costs to customers. Opponents of this bill, including the Utility Workers Union of America Locals 132, 483, and 522, who represent thousands of natural gas utility skilled workers raise concerns that this bill does not reflect how gas infrastructure work is performed in the field, and how it is generally planned and sequenced. Therefore, customer service line replacements are not standalone activities, as they are typically performed as part of larger, coordinated infrastructure projects which can be driven by federal safety requirements, including those under the U.S. Department of Transportation Pipeline and Hazardous Materials Safety Administration. The bill attempts to address safety concerns by exempting emergency service line replacements from the voluntary customer program established by the bill in order to ensure safety upgrades are conducted on these emergency projects. Opponents contend these protections are not sufficient to address safety concerns.

Protecting Ratepayers. This bill would provide customers who elect to decline a natural gas utility service upgrade with the opportunity to receive financial incentives to electrify, including funding for electric appliances based on the

avoided cost of the gas distribution service line replacement. The Utility Workers Union of America Locals 132, 483, and 522 raises concerns that removing an individual service line may not provide meaningful cost savings given that these projects are embedded within large projects whose primary costs (such as engineering, permitting, traffic control) remain unchanged. They contend such approaches would saddle other customers with costs to implement the program, particularly as it is likely customers with greater financial resources are more likely to take advantage of electrification opportunities. Similar to SB 1221, this bill limits the customer enrollment to no more than 1% of the natural gas IOU's customers in its service territory (including those in the SB 1221 neighborhood zonal decarbonization pilot projects).

Prior/Related Legislation

SB 1359 (Stern, 2025) requires the CPUC, before authorizing recovery of costs associated with a gas distribution infrastructure replacement and upgrade project, to consider whether cost-effective electrification alternatives or nonpipeline alternatives could reasonably avoid or reduce the costs. The bill is pending in the Assembly.

SB 1221 (Min, Chapter 602, Statutes of 2024) authorized 30 pilot projects where cost-effective decarbonization of priority neighborhoods meeting specified criteria can be implemented, if the CPUC determines adequate substitute energy is available, among other requirements. The bill also required specified mapping of the natural gas utility distribution system and requires the identification of priority decarbonization neighborhood zones, authorizes gas corporations to cease providing service within the 30 pilot projects, among other provisions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Unknown ongoing costs, likely in the hundreds of thousands of dollars annually (ratepayer funds), for the CPUC to staff the proceeding needed to create a Gas Distribution Service Line Replacement Alternatives Program for each utility, provide advisory support for determining cost-effective incentives and program design, oversee implementation and potential revisions to the program, and prepare annual reports to the Legislature — among other things.
- To the extent that this bill impacts energy rates, it could result in costs or savings to the state as a ratepayer. The State of California is a natural gas

customer, purchasing roughly four percent of the gas sold by the state's utilities. As such, the state incurs costs when rates increase, and realizes cost savings if rates go down (various funds).

ARGUMENTS IN SUPPORT: A coalition of organizations, including the Building Decarbonization Coalition Action Fund, Earthjustice, and NRDC, state:

> By redirecting funds that gas utilities would otherwise spend on replacing gas service lines, the Home Energy Choice Act will reduce barriers to electrification, further California's public health, air quality and climate objectives, and reduce risk for all gas customers. Gas service lines are the pipelines that connect a gas main pipeline running down a street to individual buildings. Pacific Gas & Electric (PG&E) replaces approximately 15,000 gas service lines each year, the vast majority of which connect to a single home. Utilities profit off of gas service line replacements, the costs of which are paid for by all gas customers in their gas bills over 55 to 60 years. This means that a gas service line replaced today would not be paid off until after 2080, decades after California's 2045 carbon neutrality target, creating significant risks the pipeline will no longer be needed before it is fully paid off. Participation is entirely voluntary. Eligible gas customers would simply have the option to take advantage of monetary incentives to help them upgrade their home with modern electric appliances like heat pumps and realize the health and safety benefits of improved indoor air quality and access to cooling. All gas customers would benefit by avoiding the significant stranded asset risks of continued long-term capital investments in the gas system.

ARGUMENTS IN OPPOSITION: San Diego Gas & Electric and Southern California Gas Company state:

> The bill takes considerations for granted. AB 2313 proposes redirecting pipeline safety funding toward home electrification subsidies, even though gas service line replacements are typically larger, federally mandated (49 CFR Part 192) projects that rely on risk-based planning, coordinated construction, and regulatory certainty to address safety risks efficiently. By adding new approval layers and procedural requirements, the bill risks disrupting these safety-driven workflows, introducing delays and fragmenting projects designed to mitigate known risks. …AB 2313 attempts to address cost-shifting through a vaguely defined "mechanism," but does not clearly explain how it would work or ensure

that remaining customers are held harmless. …AB 2313 establishes a program framework before California has the data needed to design it responsibly. …California should not establish a programmatic framework for customer gas service disconnection and electrification incentives before the State has the benefit of data from existing pilot efforts, before equity, and affordability issues are resolve, and before statutory safeguards clearly ensure that nonparticipating customers are protected.

SUBJECT: Law enforcement: facilitating medical care

SOURCE: Voters of Tomorrow

DIGEST: This bill prohibits a law enforcement officer from denying, delaying, obstructing, or failing to facilitate access to medical evaluation or treatment for an individual under law enforcement control when certain conditions are met, and requires law enforcement to document the basis for a denial within 72 hours of the incident, as specified.

ANALYSIS:

Existing law:

1) States the intent of the Legislature that the authority to use physical force, conferred on peace officers by existing law, is a serious responsibility that shall be exercised judiciously and with respect for human rights and dignity and for the sanctity of every human life, and that every person has a right to be free from excessive use of force by officers acting under color of law. (Penal (Pen.) Code, § 835a, subd. (a)(1).)

2) Includes a legislative finding and declaration that the decision by a peace officer to use force shall be evaluated carefully and thoroughly, in a manner that reflects the gravity of that authority and the serious consequences of the use of force by peace officers, in order to ensure that officers use force consistent with law and agency policies. (Pen. Code, § 835a, subd. (a)(3).)

3) Authorizes a peace officer who has reasonable cause to believe that a person to be arrested has committed a public offense to use objectively reasonable force to effect the arrest, to prevent escape, or to overcome resistance. (Pen. Code, § 835a, subd. (b).)

4) Permits a peace officer who is authorized to make an arrest and who has stated their intention to do so, to use all necessary means to effect the arrest if the person to be arrested either flees or forcibly resists. (Pen. Code, § 843.)

5) Authorizes a peace officer to release a person arrested without a warrant, instead of taking the person before a magistrate, if, among other reasons, the person was arrested only for being under the influence and the person is delivered to a facility or hospital for treatment and no further proceedings are desirable, the person was arrested for driving under the influence and the person is delivered to a hospital for medical treatment that prohibits immediate delivery before a magistrate, the person was arrested and subsequently delivered to a hospital or other urgent care facility, as specified, and no further proceedings are desirable, or the person was arrested and subsequently delivered or referred to a public health or social service organization that provides services including medical care, and the organization agrees to accept the delivery or referral, and no further proceedings are desirable. (Pen. Code, § 849, subd. (b)(3)-(6).)

6) Requires each law enforcement agency to maintain a policy that provides a minimum standard on the use of force which, among other elements, must include all of the following:

   a) A requirement that an officer may only use a level of force that they reasonably believe is proportional to the seriousness of the suspected offense or the reasonably perceived level of actual or threatened resistance.

   b) A requirement that an officer intercede when present and observing another officer using force that is clearly beyond that which is necessary, as determined by an objectively reasonable officer under the circumstances, taking into account the possibility that other officers may have additional information regarding the threat posed by a subject.

c) A requirement that officers promptly provide, if properly trained, or otherwise promptly procure medical assistance for persons injured in a use of force incident, when reasonable and safe to do so. (Government (Gov.) Code, § 7286, subd. (b).)

7) Prohibits a law enforcement agency from authorizing the use of a carotid restraint, as defined, by any peace officer employed by that agency. (Gov. Code, § 7286.5, subd. (a).)

8) Prohibits a law enforcement agency from authorizing techniques or transport methods that involve a substantial risk of positional asphyxia. (Gov. Code, §7286.5, subd. (b).)

9) Authorizes a court to order the removal of a prisoner confined in any city or county jail to a hospital when it is made to appear by any judge by affidavit of the sheriff or district attorney and oral testimony that a prisoner requires medical or surgical treatment necessitating hospitalization, which treatment cannot be furnished at the city or county jail. (Pen. Code, § 4011, subd. (a).)

10) Authorizes a sheriff or jailer, who determines that a prisoner in a county jail or a city jail is in need of immediate medical or hospital care, and that the health and welfare of the prisoner will be injuriously affected unless the prisoner is removed to a hospital, to remove the prisoner to a hospital, without first obtaining a court order, as specified. (Pen. Code, § 4011.5.)

11) Requires each law enforcement agency to report to the Department of Justice (DOJ) on a monthly basis all instances when a peace officer employed by that agency is involved in specified incidents, including an incident involving the shooting of a civilian by a peace officer, the shooting of a peace officer by a civilian, the use of force by a peace officer against a civilian that results in serious bodily injury or death, and use of force by a civilian against a peace officer that results in serious bodily injury or death, and to include specified information relating to the incident, including whether any medical aid was rendered. (Gov. Code, § 12525.2, subds. (a) & (b)(12).)

12) Provides that in any case in which a person dies while in the custody of a law enforcement agency or a local or state correctional facility, the applicable agency shall report in writing to the Attorney General, within 10 days after the death, all facts in the possession of the agency concerning the death. (Gov. Code, § 12525, subd. (a).)

13) Provides that if any of the in-custody death report changes or if new information becomes available regarding the death, including, but not limited to, the manner and means of death, the agency shall update its written report to the Attorney General within 10 days of the date of the change or the date the new information becomes available. (Gov. Code, § 12525, subd. (b).)

14) Provides that when a person in custody dies, the agency with jurisdiction over the state or local correctional facility with custodial responsibility for the person at the time of their death shall post specified information on its website for the public to view within 10 days of the date of death. (Pen. Code, § 10008, subds. (a) & (b).)

15) Defines "in custody death," for purposes of the above reporting requirement, to mean the death of a person who is detained, under arrest, or is in the process of being arrested, is in route to be incarcerated, or is incarcerated at a municipal or county jail, state prison, state-run boot camp prison, boot camp prison that is contracted out by the state, any state or local contract facility, or other local or state correctional facility, including any juvenile facility. "In-custody death" also includes deaths that occur in medical facilities while in law-enforcement custody. (Pen. Code, § 10008.)

This bill:

1) Provides that it is unlawful for any law enforcement officer to deny, delay, obstruct, or fail to facilitate access to medical evaluation or treatment for an individual under law enforcement control if it is safe and reasonable to provide access to the treatment and a medical professional has been requested or is present and is willing to render care to the individual.

2) Specifies that the above prohibition does not apply to an individual in the custody of, or detained by, the Department of Corrections and Rehabilitation.

3) Provides that to the extent that documenting the incident does not compromise an ongoing investigation or officer safety, if access to medical evaluation or treatment is denied or delayed when a medical professional is present and is willing to assist, law enforcement shall document the basis for the denial within 72 hours of the incident and include the following information:

   a) The basis for denial or delay.

   b) A detailed incident narrative that includes, but is not limited to, time of the incident, location of the incident, and personnel involved in the incident.

c) Any available supporting evidence, including body-worn camera footage, radio transmissions, or written incident reports.

4) Provides that incident reporting shall be provided to either the relevant civilian oversight body responsible for reviewing law enforcement conduct or the Office of the Inspector General.

5) Specifies that failure to comply with the above provisions may result in administrative discipline, including suspension or termination.

Comments

Aggressive tactics have been one of the hallmarks of federal immigration enforcement during President Trump's second term, especially here in California. Hundreds of federal agents conducted raids and immigration sweeps across Los Angeles, detaining and arresting individuals through "at large" arrests on the street, and often through blatant racial profiling. Federal agents often conducted raids in civilian clothing or military uniforms, and often while masked, heavily armed, and without providing identification. There have also been numerous reports of federal agents using excessive force and causing injury and property damage while conducting these raids, as well as reports that agents have denied those detained access to legal counsel. Such tactics were also on full display during Operation Metro Surge, a joint operation of Immigration and Customs Enforcement (ICE) and Customs and Border Patrol (CBP) that took place throughout Minnesota (though primarily in the Twin Cities area) beginning in December 2025 and concluding early February 2026. During this operation, federal immigration officials employed harsh, confrontational, and arguably illegal tactics to make arrests, serve warrants, conduct raids and contain protesters. Operation Metro Surge also resulted in the shooting of three civilians by federal immigration agents, two of which were fatal: the killings of Alex Pretti and Renee Good.

The author cites the killing of Renee Good as the driving force behind this bill. After the shooting, witnesses to the scene claimed that federal officers impeded emergency medical personnel from accessing the scene by blocking the road with their vehicles. A video from the scene shows that a man who identified himself as a physician attempted to check Renee Good for a pulse, but was rejected by the federal officers who claimed they had their own medics. Ultimately, firefighters began lifesaving measures, and Ms. Good was transported to a local medical center, where she passed away.

The Department of Homeland Security's (DHS) policy on the use of force, which was updated in February 2023, sets forth the standards and guidelines that DHS officers must follow in an array of scenarios, including the provision of medical care. Specifically, the policy provides that:

> As soon as practicable following a use of force and the end of any perceived public safety threat, DHS law enforcement officers shall obtain appropriate medical assistance for any subject who has visible or apparent injuries, complaints of being injured, or requests medical attention. This may include rendering first aid if properly trained and equipped to do so, requesting emergency medical services, and/or arranging transportation to an appropriate medical facility.

This policy also requires DHS offices employing law enforcement officers to provide annual trainings to those officers regarding the affirmative duty to request and/or render medical aid following the use of force, and the affirmative duty to intervene if an officer is misusing force or using excessive force, among other topics.

California law enforcement agencies are also subject to certain medical assistance requirements pursuant to existing law regarding permissible use of force. In 2019, California refined its use of force statutes in order to provide clearer guidance to law enforcement and the public, specifically regarding when the use of deadly force is appropriate. Namely, AB 392 (Weber, Chapter 170, Statutes of 2019), specified the circumstances in which deadly force is and is not appropriate, and SB 230 (Caballero, Chapter 285, Statutes of 2019), required law enforcement agencies to update their training and policies with specific requirements regarding use of force, including a requirement "that officers promptly provide, if properly trained, or otherwise promptly procure medical assistance for persons injured in a use of force incident, when reasonable and safe to do so." Pursuant to SB 230, agency policies must also include training and guidelines regarding vulnerable populations, including, but not limited to, children, elderly persons, people who are pregnant, and people with physical, mental, and developmental disabilities.

SB 230 also required California Peace Officers Standards and Training (POST) to implement a course of training in the use of force, although notably, the training is not required to include instruction on procurement of medical assistance for persons injured as the result of a use of force. However, in response to SB 230, POST developed new use of force standards and guidelines, which "include the statewide minimum standards law enforcement executives are now required to

incorporate into their agency's use of force policy." The singular standard related to medical aid provides, in relevant part:

> The highest priority of officers is safeguarding the life, dignity, and liberty of all persons, without prejudice to anyone. Officers have a duty, as soon as it safe and practical, to provide or request medical aid. As such, an agency's policy shall require that officers promptly provide, if properly trained, or otherwise promptly procure medical assistance for persons injured in a use of force incident, when reasonable and safe to do so. […] Whenever a person requires or reasonably requests medical attention after a use of force incident, an officer should request medical aid (such as calling for emergency medical services) and/or if properly trained, provide medical attention (such as first aid and/or transport to an emergency medical facility), as soon as feasible.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

> Potential costs in the hundreds of thousands of dollars in administrative work for state law enforcement entities. The fiscal impact is difficult to quantify due to the capacity for administrative, civil or criminal penalties for any failure to comply with the provisions of the bill. Written documentation within 72-hours each time an officer delays or denies access to medical care may equate into thousands of new reports annually, expanded review, storage and oversight systems that likely would result in a cost of hundreds of thousands of dollars in administrative work. Likely greater impacts on local law enforcement entities. Penalty and reporting costs for each instance will likely be low, but costs could be significant in the aggregate statewide, with actual costs dependent on whether the duties imposed by this bill constitute a reimbursable state mandate, as determined by the Commission on State Mandates. (special funds, General Fund)
>
> Potentially significant costs to POST to the extent the curriculum update triggers additional training hours that agencies claim for reimbursement. The Peace Officer Training Fund (POTF) has a structural deficit as criminal fine and penalty assessment collections have declined, and POST's operations are increasingly supported by General Fund appropriations. (Peace Officers Training Fund, General Fund)

Minor and absorbable costs to POST to incorporate the new guidance into existing training curricula. POST reports that California peace officers are already required to render first aid in use-of-force situations under existing law and POST guidelines, and that the bill is largely duplicative of existing requirements. (General Fund)

Minor and absorbable costs to the Office of the Inspector General to review law enforcement conduct. (General Fund)

Costs of an unknown but likely minor and ongoing amount for local law enforcement agencies to prepare the required 72-hour documentation in cases where access to medical care is denied or delayed while a medical professional is present, subject to the bill's investigation- and safety-based disclosure carve-out. The volume of work depends on how frequently denial or delay occurs in practice. Costs will depend on whether the duties imposed by this bill constitute a reimbursable state mandate, as determined by the Commission on State Mandates. (General Fund)

SUBJECT: Personal Income Tax Law: Corporation Tax Law: credits: qualified motion picture: post-production

SOURCE: The California Post Alliance & the Motion Picture Editors Guild

DIGEST: This bill enacts the California Post-production Tax Credit program, authorizing a credit under the Personal Income and Corporation Taxes for qualified expenses relating to the post-production of a qualified motion picture in California.

Senate Floor Amendments of 8/21/26 (1) Modify several requirements to improve implementation of the credit by the California Film Commission (CFC); (2) Import provisions from the Motion Picture and Television Production 4.0 credit program; (3) Replace the first-come-first-served allocation award process with a ranking system based on applicant's "post-production services ratio," as defined; (4) Specify that CFC must promulgate regulations to administer and enforce the requirements of the credit; and (5) Make other technical and conforming changes.

ANALYSIS:

Existing law:

1) Allows various income tax credits and deductions, as well as sales and use tax exemptions.

2) Limits the total of all business credits, including credit carry forwards, to $5 million or 50% of liability, whichever is greater, commencing in the 2024 taxable year and ending before the 2030 taxable year, after which limits credits to $5 million or 75% of liability, whichever is greater, with some exceptions (SB 167, Committee on Budget & Fiscal Review, Chapter 34, Statutes of 2024 and SB 122, Committee on Budget & Fiscal Review, Chapter 23, Statutes of 2026). Taxpayers can make an irrevocable election to receive an annual refundable credit claimed in future tax years for business credits equal to credit amounts not claimed due to the limitation.

3) Enacts the Film & Television Tax Credit Program 4.0 program, which authorizes a tax credit against the Personal Income and Corporation Taxes for qualified motion picture production in California, directing California Film Commission (CFC) to allocate $750 million in credits each fiscal year (FY) starting in 2025-26 and continuing through 2029-30 (SB 132 Committee on Budget & Fiscal Review, Chapter 56, Statutes of 2023; SB 132, Committee on Budget & Fiscal Review, Chapter 17, Statutes of 2025; AB 1138, Zbur, Chapter 27, Statutes of 2025).

4) Provides that a "qualified motion picture" includes:

   a) A feature with a minimum production budget of at least $1 million; however, no more than $120 million in qualified expenditures count for purposes of generating the credit.

   b) An independent film, defined as a motion picture that is produced by a company that is neither publicly traded, nor more than 30% owned by publicly traded companies.

   c) A television series that relocated to California.

   d) A live action or animated series produced in California with a run time of 20 minutes or more on average, with a minimum budget of $1 million per episode.

   e) Animated films produced in California with a $1 million budget or more.

   f) A large-scale competition show produced in California with a minimum budget of $1 million per episode.

   g) A pilot for a new live action or animated series with a run time of 20 minutes or more on average, produced in California with a minimum budget of $1 million per episode.

5) Authorizes CFC to allocate credits to "qualified motion pictures" that satisfy the following general requirements:

   a) Have 75% of the motion picture shooting days in California, or have 75% of the production budget incurred within the state;

   b) Commence principal photography after the date CFC approves its application, but before 180 days after the date of approval, and finish within 18 months from the date when the application was approved by the CFC;

   c) Obtain a copyright from the United States Copyright Office; and

   d) Provide a workplace diversity plan checklist.

This bill:

1) Enacts the California Post-production Tax Credit program, authorizing a credit under the Personal Income and the Corporation Taxes, to a "qualified taxpayer" for qualified post-production expenditures of a "qualified motion picture" in California, to be allocated by the CFC, to applicants on or after July 1, 2027, and before July 1, 2032, in four or more allocation periods per fiscal year (FY).

2) Provides that the credit shall be an amount equal to the sum of:

   a) 35% of qualified expenditures attributable to "qualified editorial expenditures," as defined, subject to the following credit limitations:

      i) Up to $6 million for qualified expenditures, unrelated to visual effects.

      ii) Up to $6 million for qualified expenditures relating to visual effects.

   b) An aggregate amount, not to exceed 15% of qualified expenditures, as follows:

      i) 5% of qualified expenditures relating to post-production outside the Los Angeles (LA) zone, as specified;

      ii) 10% of qualified expenditures for qualified wages relating to post-production outside of the LA zone to "qualified individuals;" and

      iii) 15% of qualified expenditures relating to qualified music scoring.

   c) An additional 5% of qualified expenditures if 50% or more of production days were performed in state.

3) Caps the aggregate amount of credits that may be allocated per FY, at an amount authorized in a Budget Act, for FY 2027-28 and through FY 2032-33.

4) Requires the credit to be administered in the same manner as the Film & Television Tax Credit Program 4.0, except as specified.

5) Specifies that the credit shall not be allowed for a motion picture for which a credit has been claimed under the 4.0 program.

6) Requires CFC to allocate the annual credit amounts as follows:

   a) 50% to features, independent films, and animated films.

   b) 50% to television series, miniseries, limited series, and animated series.

   c) Provides an additional 5% of qualified expenditures if at least 50% of below-the-line production wages are for services performed in the state.

7) Requires CFC to reserve 85% of the total aggregate credits allocable for the year for applicants that demonstrate meeting specified labor standards:

   a) Provides wages for employees in California that are, on average, equal to or more than the average weekly wage rate for similar workers.

   b) Provides, or contributes to, employer-paid health and welfare benefits and pension contributions for direct-hire employees performing services in state.

   c) Participates in a CFC approved career-based learning and training program.

   d) Complies with reporting requirements established by the CFC, including reporting related to diversity, anti-harassment, and workforce composition.

   e) Directly employs at least one employee providing qualified services in state.

   f) Provides that deviation from the above criteria shall not be disqualifying if such deviation is required to comply with a collective bargaining agreement.

8) Requires that applicants provide a self-attestation, under penalty of perjury, confirming that they will satisfy all specified requirements for the qualified motion picture.

9) Requires CFC to promulgate regulations and an appropriate penalty for failure to meet the commitments identified in the self-attestation.

10) Requires CFC, when allocating the credit, to list each applicant from highest to lowest according to the post-production services ratio as computed by the CFC, and to then allocate the credit to each applicant with the highest post-production services ratio, working down the list until the credit amount is exhausted.

11) Provides that a qualified taxpayer may make a one-time election to make the credit refundable for each taxable year of the "refundable period," not to exceed the "annual refundable amount."

    a) The "refundable period" means the first taxable year the credit certificate is issued to the qualified taxpayer and the succeeding four taxable years.

    b) The "annual refundable amount" is 20% of the "total refundable amount."

    c) The "total refundable amount" is equal to 90% of the credit amount that exceeds the tax liability in the first taxable year of the refundable period.

12) Requires CFC to promulgate rules and regulations necessary to adapt the existing Career Readiness requirements of the Film & Television Tax Credit Program 4.0 to this credit; provides that a qualified taxpayer must participate in Career Readiness only to the extent the program has been adapted to post-production pursuant to regulations promulgated by CFC.

13) Establishes a diversity assessment requirement, mirroring the Film 4.0 program, requiring CFC to review this data separately from the diversity workplan and assessment process.

14) Defines "qualified taxpayer" as a taxpayer or a disregarded single-member limited liability company, that has "qualified expenditures," fulfilled the Career Readiness requirement, and been issued a credit certificate by CFC.

15) Defines "qualified expenditures" as amounts paid or incurred for:

    a) Tangible personal property purchased or leased, and used, within this state;

    b) Services performed within this state; and

    c) Music orchestration services performed outside of the state if it is for music recorded in the state.

16) Specifies that "qualified expenditures" include only those amounts paid or incurred, for tangible personal property purchased or leased, used or otherwise consumed in this state, including qualified wages.

17) Defines "post-production" to mean both "editorial post-production" and "visual effects," as defined.

18) Defines "qualified motion picture" substantially similar to the 4.0 program, with the following differences:

    a) A feature, including an animated film and an independent film, with a minimum production budget of $1 million;

    b) A miniseries or limited series consisting of two or more episodes, each longer than 40 minutes of running time, exclusive of commercials, with a minimum production budget of $1 million per episode;

    c) A large-scale competition show, not including traditional reality, game shows, talk shows, or docufollow television programming, with a minimum production budget of $1 million per episode.

19) Defines "post-production services ratio" to mean the dollar amount for qualified wages divided by the dollar amount of tax credits, not including the credit uplifts allowed by this bill as computed by the CFC. For purposes of the calculation, "qualified wages" only includes 80% of the qualified wages paid to third-party vendors and excludes visual effects, as defined.

20) Authorizes CFC to allocate credits to "qualified motion pictures" that satisfy the substantially similar general requirements to the 4.0 Film program, with the following difference: at least 75%, or $1 million, whichever is greater, of post-production expenses are incurred for payment for services performed within the state and the purchase or rental of property used within the state;

21) Provides that the CFC must issue a credit certificate only after it has verified a qualified taxpayer's qualified expenditures and computed the post-production service ratio.

22) Specifies that if a qualified motion picture's actual post-production services ratio comes in more than 10% below what was represented on its application, the CFC must reduce the credit by that same percentage, unless the applicant can demonstrate reasonable cause for the shortfall, in which case CFC has discretion not to apply the reduction. This requirement mirrors the existing Film 4.0 program approach of holding applicants accountable to their attested figures.

23) Provides that the credit is allowed for the taxable year in which the CFC issues the credit certificate for the qualified motion picture.

24) Specifies that the amount of the credit allowed to a qualified taxpayer is limited to the amount specified in the credit certificate issued by the CFC.

25) Contains legislative findings and declarations to comply with Section 41 of the Revenue and Taxation Code.

26) Makes other technical and conforming changes.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The CFC indicates that it would incur annual implementation costs of $672,000 (General Fund).

- Assuming $100 million in tax credit allocations are authorized beginning in 2027-28, the Department of Finance (DOF) estimates this bill would reduce General Fund revenues by $2 million in 2027-28, $9.4 million in 2028-29, and $18.1 million in 2029-30, with additional revenue losses in subsequent years. DOF also estimates the bill would reduce sales tax revenues deposited into the Local Revenue Fund 2011 by $18,000 in 2027-28, $86,000 in 2028-29, and $1.6 million in 2029-30, with additional revenue losses in subsequent years.

- The Franchise Tax Board would incur administrative costs of $290,000 in 2026-27, $342,000 in 2027-28, and minor amounts annually thereafter, to implement the provisions of the bill (General Fund).

ARGUMENTS IN SUPPORT: According to the author, "California has the most experienced post-production workforce in the world, but we are losing jobs and

projects to other states and countries that offer targeted incentives for post-production work. AB 2319 fills a gap in our current tax credit program by creating a post-production incentive that keeps high-skill jobs, small-business vendors, and production spending in California while complementing, not replacing, the existing Film and Television Tax Credit Program. A significant portion of the post-production industry has always relied on productions that are based overseas or otherwise outside of California coming back to California for post. This work sustains thousands of good, middle-class jobs. As proposed to be amended, a large share of the tax credit allocated under AB 2319 will go to jobs that uphold industry standards. However, credits will also be available to make AB 2319 accessible to emerging voices and artists who have traditionally struggled to find an entry point into the entertainment industry. These individuals often represent members of diverse backgrounds and underserved communities, and this portion of the bill provides them with an opportunity to contribute to California's creative economy. AB 2319 is designed to capture economic activity that would otherwise leave the state and to ensure that California remains competitive in an industry we helped create. California's post-production infrastructure represents a century of investment and tens of thousands of skilled jobs, and it is sitting underutilized while other states and countries capture work that belongs here. Every qualified project that completes post-production in New York or London instead of California is a direct transfer of high-wage jobs and taxable income out of this state. AB 2319 closes the incentive gap that is making that transfer possible."

SUBJECT: Occupational safety and health: investigations

SOURCE: Author

DIGEST: This bill 1) strengthens workplace safety protections by revising case investigation, review and referral procedures for the Division of Occupational Safety and Health (Cal/OSHA) and its Bureau of Investigations (BOI) to follow when responding to workplace injuries or fatalities; 2) revises procedures for case referral to prosecuting authorities; and 3) imposes misdemeanor penalties for interfering with a Cal/OSHA investigation.

Senate Floor Amendments of 8/21/26, among other things, 1) impose the penalty of a misdemeanor for willful interference with a Cal/OSHA investigation; 2) strike the immediate response required for investigations by the BOI to instead require them to "promptly" investigate; 3) require the BOI to investigate any accident where there is serious exposure, as specified; 4) require the BOI to report to the Legislature cases involving fatalities for which a prosecuting authority declined to prosecute, as specified; 5) strike the five-year pilot program which would have transferred investigative responsibilities from the BOI to the district attorneys in

Alameda and Santa Clara counties for workplace health and safety violations that result in death in those counties.

ANALYSIS:

Existing law:

1) Under the California Occupational Safety and Health Act, assures safe and healthful working conditions for all California workers by authorizing the enforcement of effective standards, assisting and encouraging employers to maintain safe and healthful working conditions, and by providing for research, information, education, training, and enforcement in the field of occupational safety and health. (Labor Code §6300)

2) Establishes the Division of Occupational Safety and Health (known as Cal/OSHA) within the Department of Industrial Relations (DIR) to, among other things, propose, administer, and enforce occupational safety and health standards. (Labor Code §6300 et seq.)

3) Requires every employer to file a complete report with Cal/OSHA of every occupational injury or occupational illness to each employee which results in lost time beyond the date of the injury or illness, or which requires medical treatment beyond first aid. A report must be filed within five days after the employer obtains knowledge of the injury or illness. In addition to this report, in every case involving a serious injury or illness, or death, the employer is required to make an immediate report to Cal/OSHA by telephone or email. (Labor Code §6409.1)

4) Establishes the Bureau of Investigations (BOI) within Cal/OSHA and makes it responsible for directing accident investigations involving violations of laws, standards, and orders in which there is a serious injury to five or more employees, death, or request for prosecution by a division representative; reviewing inspection reports involving a serious violation if there have been serious injuries to one to four employees or a serious exposure; and may investigate cases where the BOI may find criminal violations have occurred; and preparing cases for the purpose of prosecution, as specified. (Labor Code §6315)

5) Requires Cal/OSHA to provide the BOI with all initial accident reports, the Cal/OSHA's inspection report for any inspection involving a serious violation if there is a fatality, as specified, and any other documents in Cal/OSHA's possession that are helpful to the investigation. (Labor Code § 6315)

6) Requires the BOI to refer the results of investigations it is required to conduct, in which there is a serious injury or death, to the appropriate prosecuting authority having jurisdiction for appropriate action unless it determines that there is legally insufficient evidence of a violation of the law. (Labor Code §6315(g))

7) Authorizes DIR, upon the request of a county district attorney, to develop a protocol for the referral of cases that may involve criminal conduct to the appropriate prosecuting authority in lieu of or in cooperation with an investigation by the BOI, as specified. (Labor Code §6315(i))

8) Requires the BOI to submit an annual report to Cal/OSHA, for submission to the director of DIR, on its activities including, among other things, a summary of investigations completed, as specified. (Labor Code §6315.3)

9) Establishes the Occupational Safety and Health Fund as a special account within the State Treasury and authorizes moneys in the account to be expended by the DIR, in support of Cal/OSHA, the Occupational Safety and Health Standards Board, and the Occupational Safety and Health Appeals Board, and the activities these entities perform. (Labor Code §62.5(d))

This bill:

1) Makes any person who willfully resists, prevents, impedes, or interferes with the chief of Cal/OSHA or their authorized representative in the performance of their duties, as specified, or who in any manner willfully violates an order of the court relating to those duties is guilty of a misdemeanor, punishable by imprisonment in a county jail, not exceeding six months, or by a fine not exceeding five thousand dollars ($5,000) or both.

2) Requires the BOI to promptly review inspection reports involving a serious violation and refer the results of an investigation to the appropriate prosecuting authority having jurisdiction for appropriate action, unless the BOI determines that there is legally insufficient evidence of a violation of the law.

3) Adds “serious exposure” to various provisions of law for which an employer can be held liable for willfully violations of occupational safety or health standards or orders.

4) Requires the BOI to investigate any accident in which there is a serious injury or illness or a *serious exposure* for which the division issues a citation of a willful violation.

5) Requires Cal/OSHA to immediately notify the appropriate prosecuting authority upon learning of an accident in which there is a serious injury or illness or serious exposure to five or more employees, death, or request for prosecution by a division representative, and requires Cal/OSHA and the BOI to cooperate with the prosecuting authority in the investigation.

6) Requires a state, county, or local fire or police agency, whenever they are called to an accident involving a serious injury, illness, or serious exposure, or death of an employee, to immediately, in addition to notifying Cal/OSHA, notify the district attorney's office in the county where the incident occurred.

7) Requires Cal/OSHA to immediately notify the BOI and the district attorney's office or other appropriate prosecuting authority of the accident, whether Cal/OSHA received notification by the responding agency, the employer, or by other means.

8) Authorizes Cal/OSHA to disclose information obtained in connection with any inspection or proceeding to law enforcement officers or prosecutors in any law enforcement investigation or prosecution.

9) Requires the BOI to establish written policies and procedures for reviewing cases and deciding whether to investigate or refer them for prosecution. Requires the policies and procedures to include a requirement that the bureau documents its rationale for not investigating or referring a case.

10) Requires Cal/OSHA to establish a routine or automated process for transmitting information to the BOI about cases with serious injuries or illnesses or serious exposures so that the BOI can review them.

11) Requires the BOI's annual report to Cal/OSHA, to additionally be submitted to the Legislature and include the total number of completed investigations referred to prosecuting authorities.
    a) If a case involving a fatality is referred by the BOI to the appropriate prosecuting authority but the prosecuting authority declines to prosecute due to an inadequate investigation by the BOI, requires the BOI to report that

decision and the reason therefor to the Legislature. Requires the specifics contained in that report to be kept confidential and not publicly available.

Background

As part of their enforcement responsibilities, Cal/OSHA investigates complaints of workplace hazards filed by employees, employee representatives, and others, as well as investigating reports of serious injury or illness violations or deaths. After receiving a complaint or learning of a worker fatality, injury or illness, Cal/OSHA personnel must decide whether to conduct an on-site inspection of a workplace and potentially issue citations and fines according to the results of the inspection.

In July 2025, the California State Auditor released an audit report on Cal/OSHA finding, among other things, that process deficiencies and staffing shortages have limit its ability to protect workers.[1] Among the audits key findings were that Cal/OSHA did not inspect some complaints and accidents, despite evidence that an inspection may have better protected workers. When it does conduct on-site inspections, the audit found that Cal/OSHA's process has critical weaknesses.

With regards to the BOI, the Cal/OSHA audit found that it lacked the policies and staffing necessary to ensure that it consistently refers cases for potential criminal prosecution. The auditor further reported that, due to understaffing, the BOI is essentially only investigating fatalities, leaving other cases of serious workplace injuries and safety issues unaddressed. According to the State Auditor, understaffing has been a key limitation on Cal/OSHA and the BOI's work. The State Auditor included various recommendations for improving Cal/OSHA, but specific to the BOI, the auditor recommended the following to ensure that the bureau refers cases for potential criminal prosecution when warranted:

- Establish written policies or procedures for how the bureau reviews cases, decides whether to investigate them, and decides whether to refer them for prosecution. This should include requiring the bureau to document a rationale for why it has decided not to investigate or not to refer each case.
- Establish a routine or automated process for the bureau to receive information about accident cases with non-fatal injuries so that it can review them in accordance with requirements in state law.

[1] *The Division of Occupational Safety and Health: Process Deficiencies and Staffing Shortages Limit Its Ability to Protect Workers.* California State Auditor. https://www.auditor.ca.gov/wp-content/uploads/2025/07/2024-115-Report.pdf

Need for this bill? According to the author: "AB 2321 would implement some of the auditor's recommendations related to internal process improvements within Cal/OSHA and its BOI."

[NOTE: Please see the Senate Labor, Public Employment and Retirement Committee analysis on this bill for more background information and information on more prior and related legislation.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The Department of Industrial Relations (DIR) would incur one-time implementation costs of an unknown amount for Cal/OSHA and BOI to develop required case review, referral, and case transmittal procedures, and likely minor ongoing costs for the BOI to report additional staffing vacancy information (Occupational Safety and Health Fund).

- By imposing specified new duties on the District Attorneys of Santa Clara and Alameda Counties, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on local agencies, local agencies could claim reimbursement of those costs. The magnitude is unknown, but could exceed $50,000 per year (General Fund).

- This bill may result potentially significant cost pressures to the courts; the magnitude is unknown (Trial Court Trust Fund (TCTF)). The specific number of new actions that could be filed under the bill also is unknown; however, it generally costs about $10,500 per day to operate a courtroom. Courts are not funded on the basis of workload, and increased pressure on TCTF may create a need for increased funding for courts from the General Fund. The enacted 2026-27 budget includes $70 million in ongoing support from the General Fund to continue to backfill TCTF for revenue declines.

*Staff notes that recent amendments removing the Alameda and Santa Clara DA pilot program from the bill may impact the fiscal effect of the bill.

SUPPORT: (Verified 8/21/26)

Alameda Labor Council
California Federation of Labor Unions, AFL-CIO
California State Association of Electrical Workers

California State Pipe Trades Council

United Farm Workers
United Food and Commercial Workers, Western States Council
United Steelworkers District 12
Western States Council Sheet Metal, Air, Rail and Transportation

OPPOSITION: (Verified 8/21/26)

California Chamber of Commerce

ARGUMENTS IN SUPPORT: According to the California Federation of Labor Unions:

"This [measure] ensures that the most egregious workplace tragedies get the attention they deserve and that employers are held accountable. It also frees up BOI staff to focus on the thousands of cases that are currently going uninvestigated – helping to catch safety issues earlier and prevent more serious workplace injuries.

AB 2321 also makes important process reforms within the BOI. The Bureau currently lacks written policies and procedures for reviewing cases and deciding whether to investigate or refer them for prosecution. Indeed, in many of the cases it reviewed, the auditor found that BOI investigators did not adequately document their rationale for referring a case or not. Furthermore, the BOI does not routinely receive information from Cal/OSHA inspectors about cases it is required to review. AB 2321 will require the BOI and Cal/OSHA to implement processes to ensure that investigators are receiving such cases, as well as to have clear instructions for performing their jobs."

ARGUMENTS IN OPPOSITION: The California Chamber of Commerce is opposed to the measure arguing:

"Recent amendments create a new problem for California employees and employers with AB 2321! August 21, 2026 amendments will make all sorts of new workplace injuries lead to criminal charges for employees or employers! This issue was not part of the bill at any point this year! Under current law, if a willful violation of a safety standard by an employee or employer causes death or prolonged impairment, then that employee or employer is guilty of a crime.

AB 2321 would broaden this criminal liability so that it occurs whenever any "serious injury" occurs – which can be as minor as a cut to a finger! This will put far more employees and employers at risk of criminal charges for what has been (and should be) a workplace safety issue with no clear justification! While we are sympathetic to AB 2321's focus on Cal/OSHA's failures in enforcement – we must oppose this expansion of criminal liability for employers and employees."

SUBJECT: Water discharge: commercial, industrial, or institutional sites

SOURCE: California Coastkeeper Alliance

DIGEST: This bill defines "commercial industrial, or institutional site" or "CII site" based on county tax assessor land use codes for the purposes of issuing permits for the discharge of stormwater from municipal separate storm sewer systems (MS4s).

ANALYSIS:

Existing federal law:

1) Establishes the federal Clean Water Act (CWA) to regulate discharges of pollutants into the waters of the United States (WOTUS) and to regulate quality standards for surface waters. (33 United States Code (USC) §§ 1251 et seq.)

2) Establishes, under the CWA, the National Pollutant Discharge Elimination System (NPDES) permit program, requiring the State Water Resources Control Board (State Water Board) and Regional Water Quality Control Boards (Regional Water Boards) to prescribe waste discharge requirements that,

among other things, regulate the discharge of pollutants into stormwater. (33 USC § 1342)

3) Requires operators, on and after October 1, 1994, for discharges composed entirely of stormwater, to obtain an NPDES permit under the CWA only if:

   a) The discharge is from a small municipal separate storm sewer systems (MS4), as specified;

   b) The discharge is a stormwater discharge associated with small construction activity;

   c) The Director, or in states with approved NPDES programs, either the Director or the United States Environmental Protection Agency (U.S. EPA) Regional Administrator, determines that stormwater controls are needed for the discharge based on wasteload allocations that are part of "total maximum daily loads" (TMDLs) that address the pollutants of concern; or

   d) The Director, or in states with approved NPDES programs, either the Director or the U.S. EPA Regional Administrator, determines that the discharge, or category of discharges within a geographic area, contributes to a violation of a water quality standard or is a significant contributor of pollutants to waters of the U.S. (40 Code of Federal Regulations § 122.26(a)(9)(i)(D))

Existing state law:

1) Establishes the Porter-Cologne Water Quality Control Act (Porter-Cologne), which prohibits the discharge of pollutants to surface waters unless the discharger obtains a permit from the State Water Board; declares that the health, safety, and welfare of people require there to be a statewide program for water quality control and that the statewide program for water quality control can be most effectively administered regionally, within a framework of statewide coordination and policy. (Water Code (WC) §§ 13000 et seq.)

2) Establishes the State Water Board and nine Regional Water Boards to preserve, enhance, and restore the quality of California's water resources and drinking water for the protection of the environment, public health, and all beneficial uses, and to ensure proper water resource allocation and efficient use, for the benefit of present and future generations. (WC §§ 13100 et seq.)

3) Prohibits the discharge of waste or pollutants to surface and ground waters unless the discharger obtains a permit from the State Water Board or a Regional Water Board. (WC §§ 13260 et seq.)

This bill:

1) Defines "commercial, industrial, or institutional site" or "CII site" to mean a privately owned parcel or contiguous parcels of land that are commercial, industrial, or institutional based on the appropriate county tax assessor land use codes for the purposes of issuing permits for the discharge of stormwater from municipal separate storm sewer systems (MS4s).

2) Further specifies that "CII site" shall mean the commercial, institutional, or industrial portion of the mixed land use parcel for parcels with mixed use commercial and residential land use codes; and shall not include residential facilities of any type, as specified.

Background

1) *The NPDES Permit Program.* As authorized by the federal CWA, the NPDES Permit Program controls water pollution by regulating point sources—or discrete conveyances such as pipes, or human-made ditches—that discharge pollutants into waters of the U.S. Examples of pollutants include, but are not limited to, rock, sand, dirt, and agricultural, industrial, and municipal waste. In California, implementation of the NPDES Permit Program has been delegated to the State Water Board and nine Regional Water Boards, which maintain regional jurisdiction within boundaries that are based on major watersheds. While the State Water Board has issued some NPDES permits, the Regional Water Boards issue the vast majority of NPDES permits in the state and ensure compliance with their permits through inspections, monitoring report reviews, and enforcement actions.

   Because of their propensity to contain and mobilize pollutants, stormwater discharges are regulated through NPDES permits. The State Water Board oversees three statewide NPDES stormwater programs: the Industrial Stormwater Program, Construction Stormwater Program, and Municipal Stormwater Program. Below is a description of each:

   - *Industrial Stormwater Program.* The Industrial General Permit (IGP) regulates industrial stormwater discharges and authorized non-stormwater

discharges from industrial facilities in California. The IGP is called a "general permit" because many industrial facilities are covered by the same permit, but comply with its requirements at their individual industrial facilities. Industrial facilities such as manufacturers, landfills, mining, steam-generating electricity, hazardous waste facilities, transportation with vehicle maintenance, larger sewage and wastewater plants, recycling facilities, and oil and gas facilities are typically required to obtain IGP coverage;

- *Construction Stormwater Program.* Certain dischargers—those with projects that disturb one or more acres of soil, or projects that disturb less than one acre, but are part of a larger common plan of development that in total disturbs one or more acres—are required to obtain coverage under the "General Permit for Discharges of Stormwater Associated with Construction Activity" (Construction General Permit). Construction activities subject to this permit include clearing, grading, and disturbances to the ground such as stockpiling or excavation. They do not include regular maintenance activities performed to restore the original line, grade, or capacity of the facility. The Construction General Permit requires the development of a Stormwater Pollution Prevention Plan (SWPPP) by a certified Qualified SWPPP Developer; and,

- *Municipal Stormwater Program.* The State Water Board regulates stormwater discharges from MS4s throughout California. U.S. EPA defines an MS4 as a conveyance or system of conveyances, including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, human-made channels, or storm drains. Under Phase I of the Municipal Stormwater Program, Regional Water Boards have adopted NPDES permits to regulate discharges from MS4s serving municipalities with over 100,000 people; under Phase II, the State Water Board has issued a waste discharge requirement to regulate discharges from small MS4s serving municipalities with less than 100,000 people.

2) *Residual designation authority.* The U.S. EPA and authorized states, like California, can designate other stormwater discharges to control stormwater pollutants under their "residual designation" authority. The U.S. EPA or the State and Regional Water Boards can require NPDES permits for other stormwater discharges on a *case-by-case basis* when it determines that discharges contribute to a violation of water quality standards, are a significant contributor to WOTUS, or are implicated by a TMDL.

Residual designations can also be requested by petition. There have been residual designations made by the U.S. EPA for small MS4 systems and the U.S. EPA has also received petitions for the designation of commercial, industrial, and institutional sources for stormwater permitting in U.S. EPA Regions 1, 3, and 9 (Los Angeles watersheds, as described below).

3) *Commercial, industrial, and institutional site runoff.* The impervious area associated with urban development can be a collection site for pollutants and generate greater quantities and various types of contaminants. The stormwater that washes over these impervious areas and into receiving waters could carry car emissions, litter, pesticides, industrial chemicals, and household hazardous waste. These additional pollutant loadings can result in immediate and long-term impacts on the health of the receiving water body and the organisms that inhabit it. The U.S. Geological Survey has indicated that with increased urban development, local water bodies exhibited increased concentrations of contaminants such as nitrogen, chloride, insecticides, and polycyclic aromatic hydrocarbons (PAHs).[1]

   Runoff from commercial industrial, and institutional sites can consistently contain high levels of nitrogen, phosphorus, and sediment. These can lead to major impacts including algal blooms and eutrophic conditions. Although some these sites can be covered under a local jurisdiction's MS4 permit, it is argued that the permits do not sufficiently control discharges from these sites and that direct regulation through permitting of these sites would better mitigate the impacts of the discharges.

4) *Federal action on pollution in two California watersheds.* In response to petitions (submitted to Region 9 of the U.S. EPA (Region 9) in 2015), a subsequent court case, and a 2018 District Court order, Region 9 is using its Residual Designation Authority to add requirements for certain stormwater sources that discharge into two watersheds in Los Angeles County: the Alamitos Bay/Los Cerritos Channel Watershed and the Dominguez Channel and Los Angeles/Long Beach Inner Harbor Watershed. The final designation is specifically designed to require privately-owned commercial, industrial, and institutional facilities to obtain NPDES permits for stormwater runoff. Region 9 states that both watersheds are impaired due to elevated levels of copper and zinc, and TMDLs have been established to define needed reductions of these pollutants, to restore water quality and beneficial uses of the watersheds.

[1] Masoner, J., et. al. (2019). Urban Stormwater: An Overlooked Pathway of Extensive Mixed Contaminants to Surface and Groundwaters in the United States.

According to Region 9, in a November 2024 memo explaining the Final Designation, "the record demonstrates that stormwater discharges from the [commercial, industrial, and institutional] sources…contribute to violations of water quality standards…The Final Designation will require permit coverage for discharges from approximately 600 facilities and will significantly reduce discharges of pollutants of concern, including metals." Once designated, these sites will be required to obtain coverage under an NPDES permit.

Region 9 is partnering with the Los Angeles Regional Water Quality Control Board (Los Angeles Regional Water Board), which is in the process of developing a new NPDES general permit, to provide coverage for all commercial, industrial, and institutional facilities in the two Los Angeles County watersheds designated by Region 9's action. The Los Angeles general permit defines a commercial, industrial, and institutional site as a privately owned parcel or contiguous parcels of land that are commercial, industrial or institutional based on Los Angeles County Tax Assessor land use codes 1000 through 2900, 3000 through 3920, 6000 through 6910, 7000 through 7710, and 8100 through 8400. The permit would apply to stormwater discharges and authorized non-stormwater discharges from certain unpermitted commercial, industrial, and institutional sites with five or more acres of impervious surfaces.

Describing the rationale for a new permit, the Los Angeles Regional Water Board states on its website, "Storm Water—Commercial, Industrial and Institutional (CII) Permit" (last updated January 28, 2025), "The Los Angeles Regional Water Board and U.S. EPA are considering potential regulatory requirements for stormwater runoff from certain commercial, industrial, and institutional (CII) facilities in the Dominguez Channel/Greater Los Angeles and Long Beach Harbor Watershed and the Los Cerritos Channel/Alamitos Bay Watershed to reduce pollutant levels in stormwater runoff that flows from these facilities. These waterbodies are currently polluted by numerous chemicals, including copper and zinc, which can harm aquatic life, ecosystems, and human health. Impervious surfaces such as streets, parking lots, rooftops, and sidewalks collect a variety of pollutants."

Inspired by the Los Angeles general permit, this bill would define "commercial, industrial, or institutional site" for the purposes of issuing permits for the discharge of stormwater from municipal separate sewer systems

based on tax assessor land use codes. Current law does not have a definition for "commercial, industrial, or institutional site."

Comments

1) *Purpose of Bill.* According to the author, "AB 2322 establishes a single, statewide definition of Commercial, Industrial, and Institutional (CII) sites for municipal stormwater permits using existing county land use codes. Cities and counties currently operate under stormwater permits (MS4 permits) that require them to identify and inspect businesses and ensure stormwater controls are installed when sites are built or redeveloped. However, these existing permits rely on different MS4 permittees' interpretations of what is considered a regulated facility. As a result, identical businesses can face different inspection expectations and compliance requirements depending solely on where they operate. For example, a car wash may be included in one city's program but not in a neighboring jurisdiction. AB 2322 fixes this inconsistency by providing an objective, uniform standard that can be applied consistently across California. For businesses, that means clearer rules, more predictable planning, and a fair, level playing field statewide."

2) *Codifying a definition.* This bill codifies a definition for "commercial, industrial, and institutional site" (CII site) for the purposes of issuing stormwater discharge permits and based off county tax assessor land use codes. The definition itself and its codification raises various questions about its applicability and implementation. The following sections discuss these implications:

   - *Accounting for county codes.* The aim of this legislation was to create a state-wide definition that could provide consistency on how CII sites could be identified across the state. The definition implies that any parcel of land that is commercial, industrial, or institutional would be involved. Though intended to create consistency, not all counties consistently categorize land use codes.
   - The "CII Site" definition in the LA Regional Water Board general permit for CII facilities specifies individual land use codes. While some counties have individual codes tagged with each of these categories, other individual codes captured under the LA general permit definition would not be captured by this definition. Some counties have a broad range of codes nested within each of these categories, which may or may not be fully comprehensive. Other counties may categorize land use codes under other labels that would

exclude potentially polluting sites from the definition. This calls into question how this definition would be applied to different entities within future statute or regulation, and without the associated policies, it is difficult to predict how they will apply or whether these inconsistencies will be considered.

- *Case-by-case evaluations.* As in print, the CII sites definition would encompass any and all commercial, industrial, or institutional site based on land use, whereas designations for permitting made within the existing regulatory framework have and will be assessed on a case-by-case basis by the regulator and only with certain facilities. It is unclear whether this definition would strip the authorities of the State or Regional Water Boards to evaluate the necessity of a permit on a case-by-case basis if the definition gives prescriptive statutory direction.
- *The basis for land use.* Typically, the determination for the need of a stormwater permit is based on the permeability of the land surface, parcel size, and/or the extent of disturbance or nuisance. Without case-by-case considerations or designations, it is not clear how land use alone could effectively capture the entities that should be regulated for stormwater, without overextending or over regulating. Depending on how a county designates land use, the definition may be too broad if applied in a future policy context. There could also be miscellaneous categories for land use with facilities that could significantly contribute to stormwater contamination, but they would not be captured within CII.

Without the associated policy that describes how this definition would apply, it is unclear how this definition alone would serve the State or Regional Water Boards, or regulated entities. When a policy is created through future legislation and regulation that applies this definition, questions would then be raised on its implementation given how it is crafted. There are levels of uncertainty with this bill, that could certainly lead to subsequent bills to adjust the definition if potential complications were to arise in its application. Running future legislation changing the definition to fit into certain circumstances for some jurisdictions could then impact the way other jurisdictions have applied it. Pairing a definition with a framework could create more clarity and avoid potential unintended consequences.

Related/Prior Legislation

AB 1313 (Papan, 2025) would have required the State Water Board to establish, as provided, a statewide commercial, industrial, and institutional NPDES order to regulate stormwater and authorized non-stormwater discharges from facilities with

impervious surfaces that are significant contributors of pollutants to federally-protected surface waters. This bill did not meet the house of origin deadline and died on the inactive file.

AB 2106 (Rivas, 2022) would have required the State Water Board to establish a statewide commercial, industrial, and institutional NPDES order regulating stormwater and authorized non-stormwater discharges from facilities with impervious surfaces that are significant contributors of pollutants to federally protected surface waters. This bill was vetoed by Governor Newsom.

SUBJECT: Noxious weed management: Broomrape Program: extension

SOURCE: Author

DIGEST: This bill extends the operation of the Broomrape Program within the California Department of Food and Agriculture (CDFA) until July 1, 2030 and make specified changes to the Program.

ANALYSIS:

Existing law:

1) Designates CDFA as the lead department in noxious weed management.

2) Requires CDFA, in cooperation with the Secretary of the Natural Resources Agency, to implement provisions relating to noxious weed management.

3) Creates the Noxious Weed Management Account and requires moneys appropriated from the account for expenditure by the Secretary of Food and Agriculture to be allocated, by percentage, for specified purposes, including, among others, 60% to eligible weed management areas or county agricultural commissioners for the control and abatement of noxious and invasive weeds, and 20% to qualified applicants, as defined, for research on the biology,

ecology, or management of noxious and invasive weeds, the mapping, risk assessment, and prioritization of weeds, the prevention of weed introduction and spread, and education and outreach activities, as specified.

4) Requires a weed management area, as defined, to be formed in a county or other geographic area as a condition of eligibility for funds from the Noxious Weed Management Account. Existing law requires each weed management area or county agricultural commissioner to submit an integrated weed management plan to the department for review, approval, and funding. Existing law prohibits more than 10% of the noxious weed management funds distributed to a weed management area from being used for meeting, travel, administration, and coordination costs.

This bill:

1) Makes 60% of the moneys in the Noxious Weed Management Account allocated for the control and abatement of noxious and invasive weeds only available to eligible weed management areas, as provided.

2) Revises the requirements for an integrated weed management plan submitted by a weed management area to include specific goals and purposes, as provided.

3) Revises the definition of "qualified applicant" for purposes of the 20% of the moneys in the account allocated for research and other purposes.

4) Specifies that a given geographic area may only be part of a single weed management area and would prohibit more than 25%, rather than 10%, of the noxious weed management funds distributed to a weed management area from being used for meeting, travel, administration, and coordination costs.

5) Defines "person" for purposes of this program as a producer, handler, or any other entity that holds title to a commodity subject to assessment pursuant to these provisions.

   a) Defines "commodity" for these purposes as tomatoes intended for processing and any other commodity impacted by broomrape, as specified by the secretary.

6) Extends the operation of the Broomrape Program until July 1, 2030.

7) Specifies that personal identifying information is protected under the program but still available for enforcement purposes.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Senate Committee on Appropriations:

> "The California Department of Food and Agriculture (CDFA) would incur ongoing annual costs to CDFA in the hundreds of thousands of dollars to continue operating the Broomrape Program until July 1, 2030 (Broomrape Management Account)."

SUPPORT: (Verified 8/14/26)

None received

OPPOSITION: (Verified 8/14/26)

None received

ARGUMENTS IN SUPPORT: According to the author:

> "This bill extends the Broomrape control program, a industry funded program to eradicate a noxious weed that can have a devastating impact on tomatoes in California. The bill will also update aspects of the noxious weed management."

SUBJECT: Surplus residential property: condition-adjusted price of the fair market value: Cities of Pasadena and South Pasadena

SOURCE: Author

DIGEST: This bill makes various changes to the Roberti Act to facilitate the sale of properties owned by the State Department of Transportation (Caltrans) along a specific portion of the State Route 710 (SR 710) corridor, as specified.

Senate floor amendments of 8/25/26 make various changes to the selling of SR 710 properties.

ANALYSIS:

Existing law:

1) Allows Caltrans to acquire any real property that it considers necessary for state highway purposes. Whenever it determines that any real property acquired by the state for highway purposes is no longer necessary, Caltrans is allowed to

sell or exchange it in the manner and upon terms, standards, and conditions established by the California Transportation Commission (CTC).

2) Otherwise known as the Roberti Act, provides specific direction for the disposal of excess properties in the unconstructed portion of SR 710 corridor where excess properties in this corridor are to be sold in a certain priority order, as provided.

3) Further establishes special provisions for the disposal of surplus property along the SR 710 corridor in the Cities of Pasadena and South Pasadena including allowing the cities to purchase the property at Caltrans' acquisition cost and requiring 3 affordable housing units be produced for every housing unit acquired by the cities.

4) Prohibits Caltrans from selling a nonresidential property to a tenant as described above at a value below the minimum sales price, as defined.

5) Requires Caltrans to impose appropriate terms, conditions, and restrictions for nonresidential properties being sold on the SR 710 corridor if the offered price is less than fair market value.

This bill:

1) Adds a definition of "condition-adjusted price of the fair market value" to mean the fair market value of the property as of October 13, 2019, as determined by an independent appraiser, and as adjusted as provided in this subdivision.

2) Requires an appraiser when establishing the condition-adjusted price of the fair market value of a property to reflect both of the following:

   a) The existing "as is" condition of the property, as specified; and,

   b) The standardized depreciation to major structural components or building systems shown to have materially deteriorated since October 13, 2019, according to a standardized depreciation schedule or based on an inspection of the property for material deterioration occurring after October 13, 2019, as provided.

3) Provides that for a low or moderate – income occupant, as defined, that elects to purchase a single-family residence at fair market value or is offered a single-family residence at fair market value, Caltrans is required to set the selling price

at fair market value or the condition-adjusted price of the fair market value, whichever is less.

4) Further provides that Caltrans is exempt from providing repairs to single-family residences if the property is sold at the condition-adjusted price of the fair market value.

5) Offers a present occupant or present tenant purchasing a single-family residence at an affordable price or condition-adjusted price of the fair market value to receive purchase assistance, as specified, if the purchaser is unable to obtain primary financing sufficient to complete the purchase, as provided. Further requires that the amounts repaid by a qualified purchaser pursuant to terms established in the deferred payment assistance loan to be deposited into the Affordable Housing Trust Account, as specified.

6) Requires Caltrans to provide to all persons or entities offered surplus residential property and to purchasers of surplus residential property upon their request, all documents related to the surplus residential property included, but not be limited to, valuation and appraisal materials, property condition, repair, and inspection reports, tenant leases, complete rental history, rent ledgers, including late notices, solicitations sent to prospective purchasers, title reports, and any environmental reports, including reports on lead, asbestos, or geotechnical issues. Further requires Caltrans to review the requested documentation to ensure that an individual's private information and other privileged communications have been redacted. Prohibits Caltrans from requiring the execution of a nondisclosure agreement relating to these documents.

7) Requires Caltrans to provide to a purchaser or potential purchaser of surplus residential property all appraisals, calculations, and documents related to the purchase price, including any adjustments or credits, purchase and sale agreement, escrow instructions, and a written explanation of how rent obligations or other balances, if owed, will be handled before the close of escrow. Further requires Caltrans to review the requested documentation to ensure that an individual's private information and other privileged communications have been redacted. Prohibits Caltrans from requiring the execution of a nondisclosure agreement relating to these documents.

8) Requires any surplus residential property purchased at the condition-adjusted price of the fair market value price pursuant to be assessed at its condition-adjusted price of the fair market value price for property tax purposes.

9) For the Cities of Pasadena and South Pasadena, requires both cities to offer present tenants with good standing residential properties at the condition-adjusted price of the fair market value, as defined. Further makes a number of changes to requirements pertaining to the construction / completion of affordable housing units funded by SR 710 surplus property proceeds, as specified.

10) Includes an urgency clause.

Comments

1) *History of SR 710:* In the 1950's, Caltrans planned for a freeway to connect the Port of Long Beach north to Interstate 5, Interstate 10 and the Interstate 210 freeway in Pasadena. In 1964, the southern part of SR 710 was built, starting at the Port of Long Beach and heading north. It ended 23 miles later, five miles short of the intended connection to Interstate 210, feeding into local traffic on Valley Boulevard in Alhambra, causing congestion on the neighboring freeways and streets. The gap, which was caused by challenges from the community, affects the surrounding cities of El Sereno, Alhambra, South Pasadena, Pasadena, and a portion of Los Angeles.
In 2018, the Los Angeles County Metropolitan Transportation Authority (Metro) and Caltrans identified alternatives to the freeway gap closure which did not require demolition of any homes. Subsequent legislation prohibits Caltrans from pursuing freeway gap closure. Consequently, many of these properties are no longer needed for the transportation project and are now surplus. Caltrans has begun disposing of properties pursuant to several laws enacted over the last few years.

2) *Challenges associated with selling SR 710 properties*. Since the official termination of the SR 710 extension project in 2019, the process to sell these properties to both previous and current tenants has been riddled with challenges. Several of these challenges include regulatory and emergency rulemaking delays, tenant disputes, deferred maintenance and safety issues, and the complex phased / staggered sales process itself. In response, a variety of legislative proposals have been both introduced and enacted in attempt to resolve some of the abovementioned challenges.

3) *Expediting the process.* However, local stakeholders, public agencies, and tenants continue to assert that challenges remain, and thus the need for

subsequent legislation. The proposed provisions specified in this bill intend to expedite / improve efficiencies in Caltrans' process of selling SR 710 properties while providing the Cities of Pasadena and South Pasadena with additional flexibility to sell SR 710 related residential properties and use the proceeds for various housing-related purposes.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Caltrans would likely incur administrative workload costs in the high hundreds of thousands of dollars annually for up to three years to make determinations of sales prices based on a condition-adjusted fair market value. Caltrans would incur unknown, potentially significant additional costs to pay for appraisals and inspections to determine condition-adjusted fair market value that accounts for costs of repairs and capital improvements. (State Highway Account)

- Unknown revenue losses, potentially in the low tens of millions of dollars in the aggregate, as a result of lower sales prices associated with valuing properties at the condition-adjusted fair market value rather than fair market value, as well as diversion of funds to affordable housing trust funds in Pasadena and South Pasadena. These impacts would result in a reduction of funds available to rehabilitate SR 710 surplus residential properties under the Affordable Sales Program and to fund local transportation projects, as specified in the Roberti Act. Actual revenue losses would depend upon the number of properties sold at the lower condition-adjusted value, and the differences between the sales prices and traditional fair market value, which would vary from property to property. (SR 710 Rehabilitation Account, State Highway Account)

- Unknown loss of property taxes, potentially in the low hundreds of thousands of dollars in the aggregate, related to the bill's requirement that a home sold pursuant to the Roberti Act must be assessed based on the condition-adjusted fair market value, rather than traditional fair market value. Staff notes that property tax revenues are allocated to local agencies, including cities, counties, school entities, and special districts. Any reduction in the amounts that are allocated to schools may result in a commensurate State General Fund impact to backfill school funding reductions, pursuant to Proposition 98 education funding formulas.

SUBJECT: Peace officers: theft

SOURCE: Los Angeles District Attorney's Office

DIGEST: Adds the crime of theft committed by a peace officer under color of authority to the definition of "serious misconduct" for the purposes of ineligibility for, or revocation of, peace officer certification by the Commission on Peace Officer Standards and Training (POST).

Senate Floor Amendments of 8/25/26 resolve chaptering conflicts.

ANALYSIS:

Existing law:

1) Establishes POST to set minimum standards for the recruitment and training of peace officers, develop training courses and curriculum, and establish a professional certificate program that awards different levels of certification based on training, education, experience, and other relevant prerequisites. (Penal [Pen.] Code, §§ 830-832.10; 13500 et seq.)

2) Requires every peace officer in California to satisfactorily complete an introductory training course prescribed by POST, as specified. (Pen. Code, § 832, subd. (a).)

3) Requires a law enforcement agency to conduct a background check on a peace officer or prospective officer, as provided. (Gov. Code, § 1030.)

4) Provides that each class of public officers or employees declared by law to be peace officers shall meet specified minimum standards. (Gov. Code, § 1031.)

5) Provides that each of the following persons is disqualified from being a peace officer in California:

   a) Any person who has been convicted of a felony.

   b) Any person who has been convicted of any offense in any other jurisdiction which would have been a felony if committed in this state.

   c) Any person who has been discharged from the military for committing an offense, as adjudicated by a military tribunal, which would have been a felony if committed in this state.

   d) Any person who has been convicted of a crime based upon a verdict or finding of guilt of a felony by the trier of fact, or upon the entry of a plea of guilty or nolo contendere to a felony.

   e) Any person who has been charged with a felony and adjudged by a superior court to be mentally incompetent

   f) Any person who has been found not guilty by reason of insanity of any felony.

   g) Any person who has been determined to be a mentally disordered sex offender.

   h) Any person adjudged addicted or in danger of becoming addicted to narcotics, convicted, and committed to a state institution.

   i) Any person convicted or adjudicated to have committed a crime involving moral turpitude, as specified.

   j) Any person that has been issued a peace officer certificate by POST and had that certification revoked or an application for certification denied.

k) Any person previously employed in law enforcement in any state or United States territory or by the federal government, whose name is listed in the National Decertification Index of the International Association of Directors of Law Enforcement Standards and Training or any other database designated by the federal government whose certification as a law enforcement officer in that jurisdiction was revoked for misconduct, or who, while employed as a law enforcement officer, engaged in serious misconduct that would have resulted in their certification being revoked by the commission if employed as a peace officer in this state. (Gov. Code, § 1029.)

6) Requires POST to establish a certification program for peace officers, as defined, and provides that basic, intermediate, advanced, supervisory, management, and executive certificates shall be established for the purpose of fostering professionalization, education, and experience necessary to adequately accomplish the general police service duties performed by peace officers. (Pen. Code § 13510.1, subds. (a)-(b).)

7) Provides that certificates shall be awarded on the basis of a combination of training, education, experience, and other prerequisites, as determined by POST, and specifies what POST shall recognize as acceptable college education in determining whether an applicant for certification has the requisite education. (Pen. Code § 13510.1, subd. (c).)

8) Provides that persons who are determined by POST to be eligible peace officers may make application for the certificates, provided they are employed by an agency which participates in the post program. Any agency appointing an individual who does not already have a basic certificate as described in subdivision (a) and who is not eligible for a certificate shall make application for proof of eligibility within 10 days of appointment. (Pen. Code § 13510.1, subd. (d).)

9) Grants POST the authority to suspend, revoke, or cancel any certification, which extends to any certificate or proof of eligibility issued by the commission, including any certificate or proof of eligibility that is invalid, inactive, expired or canceled. (Pen. Code § 13510.1, subd. (f).)

10) Provides that an agency that employs peace officers shall employ as a peace officer only individuals with current, valid certification, except that an agency may provisionally employ a person for up to 24 months, pending certification by POST, provided that the person has received a proof of eligibility and has

not previously been certified or denied certification, or had their certification revoked. (Pen. Code § 13510.1, subd. (g)(1).)

11) Authorizes POST to suspend or revoke the certification of a peace officer if the person has been terminated for cause from employment as a peace officer for, or has, while employed as a peace officer, otherwise engaged in, any serious misconduct, as described. (Pen. Code, § 13510.8, subd. (a)(2).)

12) Authorizes POST to cancel the certificate or proof of eligibility of a peace officer if it determines that there was fraud or misrepresentation made by an applicant at any time during the application process that resulted in the issuance of the certification. (Pen. Code, § 13510.8, subd. (a)(2).)

13) States that every person who feloniously steals, takes, carries, leads, or drives away the personal property of another, or who fraudulently appropriates property which has been entrusted to them, or who knowingly and designedly, by any false or fraudulent representation or pretense, defrauds any other person of money, labor or real or personal property, is guilty of theft. Divides theft into two degrees: petty theft and grand theft. (Pen. Code §§ 484, subd. (a), 486.)

14) Requires POST to adopt by regulation a definition of "serious misconduct" that shall serve as the criteria for consideration for ineligibility for, or revocation of, certification of a peace officer. The definition shall include all of the following:

    a) Dishonesty relating to the reporting, investigation, or prosecution of a crime, or relating to the reporting of, or investigation of misconduct by, a peace officer or custodial officer, including, but not limited to, false statements, intentionally filing false reports, tampering with, falsifying, destroying, or concealing evidence, perjury, and tampering with data recorded by a body-worn camera or other recording device for purposes of concealing misconduct.

    b) Abuse of power, including, but not limited to, intimidating witnesses, knowingly obtaining a false confession, and knowingly making a false arrest.

    c) Physical abuse, including, but not limited to, the excessive or unreasonable use of force.

    d) Sexual assault.

    e) Demonstrating bias on the basis of race, national origin, religion, gender identity or expression, housing status, sexual orientation, mental or physical

disability, or other protected status in violation of law or department policy or inconsistent with a peace officer's obligation to carry out their duties in a fair and unbiased manner. This paragraph does not limit an employee's rights under the First Amendment to the United States Constitution.

f) Acts that violate the law and are sufficiently egregious or repeated as to be inconsistent with a peace officer's obligation to uphold the law or respect the rights of members of the public, as determined by POST.

g) Participation in a law enforcement gang.

h) Failure to cooperate with an investigation into potential police misconduct.

i) Failure to intercede when present and observing another officer using force that is clearly beyond what is necessary, as determined by an objectively reasonable officer under the circumstances, taking into account the possibility that other officers may have additional information regarding the threat posed by a subject. (Pen. Code, § 13510.8, subd. (b).)

This bill adds petty theft committed by a peace officer to the definition of "serious misconduct" for the purposes of peace officer decertification.

Comments

Becoming a peace officer in California is a relatively rigorous process, requiring candidates to meet a range of minimum standards. Under existing law, prospective peace officers must be legally authorized to work in the United States under federal law, be 18 years of age or older, pass a background check, and be of good moral character, as determined by a thorough background investigation. Additionally, prospective peace officers must found to be free from any physical, emotional, or mental condition, including bias against race or ethnicity, gender, nationality, religion, disability, or sexual orientation, that might adversely affect the exercise of the powers of a peace officer, as evaluated by a licensed physician for the physical fitness aspect and a specified psychiatric specialist or psychologist for the mental and emotional aspects. Regarding educational requirements, while existing law requires peace officer candidates to have at least a high school diploma, recent legislation (AB 992, Irwin, Chapter 175, Statutes of 2025) requires most classes of peace officers, commencing January 1, 2031, to obtain either an associate's degree, a bachelor's degree, a newly-created "modern policing degree," or a "professional policing certificate" within 36 months of receiving their basic certificate from POST.

A newer feature of California's process for vetting prospective and current peace officers is POST's mandatory certification process, created by SB 2 (Bradford, Ch. 409, Stats. of 2021.) Under SB 2, POST administers an extensive certification program for peace officers, who must receive a proof of eligibility and a basic certificate in order to serve in that capacity. Additionally, SB 2 provides a mechanism by which POST may investigate and review allegations of "serious misconduct" against an officer, where "serious misconduct" is defined to include a host of behaviors unbecoming a peace officer, such as dishonesty, abuse of power, criminal behaviors, demonstration of bias, participation in a law enforcement gang, and others. After a lengthy review and investigation process, POST has the discretion to issue a certificate to a prospective officer, or to suspend or revoke an existing officer's certification, including if an officer has been terminated for or has otherwise engaged in "serious misconduct," as defined above. Additionally, law enforcement agencies are required to report a range of personnel actions to POST for their review, including the hiring of any officer.

A separate provision of existing law disqualifies any person from becoming a California peace officer who 1) has received a POST certification and either surrendered the certification or had it revoked, 2) has met the minimum requirements for the issuance of a certification but nonetheless was denied certification by POST, and 3) any person previously employed in law enforcement in any state or by the federal government, whose name is listed in the National Decertification Index or any other database designated by the federal government whose certification as a law enforcement officer in that jurisdiction was revoked for misconduct, or who, while employed as a law enforcement officer, engaged in serious misconduct that would have resulted in decertification by POST if employed as a peace officer in this state.

The author asserts that "theft under color of authority, while rare, is a significant betrayal of the public trust and causes a loss of trust in the criminal justice system." Accordingly, this bill adds the commission of petty theft by a peace officer under color of authority to the definition of "serious misconduct" that authorizes POST to suspend or revoke a peace officer's certification.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

> Ongoing costs of approximately $500,000 annually to POST for additional law enforcement consultant positions to investigate decertification cases under the new tenth definition of serious misconduct, based on an estimated 100 to 150 cases per year. The Peace

Officer Training Fund (POTF) has a structural deficit, and POST's operations are increasingly supported by General Fund appropriations. (POTF, General Fund)

SUBJECT: Animal abuse: forfeiture

SOURCE: Los Angeles County District Attorney's Office
Social Compassion in Legislation

DIGEST: This bill 1) authorizes, in a criminal case alleging a violation of specified animal abuse crimes, specified entities to request that the prosecuting attorney file a petition requesting that, before final disposition, the court issue an order forfeiting the animal to the city, county, or seizing agency 30 days after a defendant fails to appear in court, as specified; 2) authorizes those entities to request, and the court to issue, a forfeiture petition within 3 days after a defendant fails to appear in court a 2nd or subsequent time; and 3) authorizes, if the defendant is granted diversion for those crimes, the prosecution to request an order from the court that the defendant be prohibited from owning, possessing, caring for, or residing with animals of any kind throughout the period of diversion, as specified.

Senate Floor Amendments of 8/21/26 strike the postseizure forfeiture petition process, outlined above, that included provisions for a defendant who failed to appear, and reposition the bill's forfeiture petition process into existing code by

expanding an existing forfeiture petition process, that applied only to some seized animals, to include any animal properly seized under any provision of California law.

ANALYSIS:

Existing law:

1) States that every owner, driver, or keeper of any animal who permits the animal to be in any building, enclosure, lane, street, square, or lot of any city, county, city and county, or judicial district without proper care and attention is guilty of a misdemeanor. (Penal (Pen.) Code, § 597.1, subd. (a).)

2) States that a peace officer, humane society officer, or animal control officer may take possession of a stray or abandoned animal, as specified, and that the full cost of caring for and treating any animal properly seized because it is injured, abandoned, stray, or seized under a search warrant, shall constitute a lien on the animal, and the animal shall not be returned to its owner until the charges are paid, as specified. (Pen. Code, § 597.1, subds. (a)-(d).)

3) States that an authorized officer, as specified above, who seizes or impounds an animal under Penal Code section 597.1, based on a reasonable belief that prompt action is required to protect the health or safety of the animal or the health or safety of others, the officer shall, before the commencement of any criminal proceedings, provide the owner or keeper of the animal, if known or ascertainable after reasonable investigation, with the opportunity for a postseizure hearing to determine the validity of the seizure or impoundment, or both. (Pen. Code, § 597.1, subd. (f).)

4) Establishes procedures for postseizure hearings when an officer seizes or impounds an animal based on a reasonable belief that prompt action is required, as specified, under Penal Code section 597.1. (Pen. Code, § 597.1, subd. (f)(1)-(4).)

5) Requires that for any animal properly seized for misdemeanor neglect or pursuant to a search warrant, the owner or keeper shall be personally liable to the seizing agency for the cost of the seizure and care of the animal. (Pen. Code, § 597.1, subd. (h).)

6) Requires that if the charges for the seizure or impoundment and any other charges permitted under this section are not paid within 14 days of the seizure, or if the owner, within 14 days of notice of availability of the animal to be

returned, fails to pay charges permitted under this section and take possession of the animal, the animal shall be deemed to have been abandoned and may be humanely euthanized or otherwise properly disposed of by the seizing agency. (Pen. Code, § 597.1, subd. (h).)

7) Provides that any person who impounds, or causes to be impounded in any animal shelter, any domestic animal, shall supply it during confinement with a sufficient quantity of food and water, and in default thereof, is guilty of a misdemeanor. (Pen. Code, § 597e.)

8) States that the prosecuting agency in a criminal proceeding in which the defendant has been charged with the commission of any defined crimes may, in conjunction with the criminal proceeding, file a petition for forfeiture, as provided. (Pen. Code, § 598.1, subd. (a)(1).)

9) Establishes procedures for forfeiture proceedings, as defined. (Pen. Code, § 598.1, subd. (c).)

This bill expands the current postseizure hearing procedure, that currently applies only to animals seized because of misdemeanor neglect and animals seized pursuant to a search warrant, so that it will now apply to any animal properly seized under any provision of California law.

Background

A seized animal may wind up being held at a shelter from various paths. Animals may end up in a shelter if they are lost or considered vicious. Stray or lost animals are held for a certain amount of time, with public notice or with notice to the known owner. (Food & Ag. Code, § 31107.) If an animal is considered vicious, while an animal control officer or law enforcement officer petitions a superior court to have a hearing for the vicious animal, which cities and counties may establish as administrative proceedings, the animal may be held at the shelter. (Food & Ag. Code, § 31621.) An animal may be seized if it is stray or abandoned. (Pen. Code, § 597.1.) It may be seized pursuant to a search warrant. (*Ibid*.) It may be seized if an officer sees it in immediate danger. (Pen. Code, § 597.1, subd. (f).)

If the need for immediate seizure is not present, and before criminal proceedings have commenced, an agency must offer a pre-seizure hearing to the owner of the animal where the owner can present evidence as to why the animal should not be seized. If the owner does not participate, the hearing officer may order that the animal be seized for its own protection. Rarely are seized animals returned if the owner is unable to pay for release.

If an animal is in immediate danger, a responding officer is required by law to seize it and provide care and treatment for it until the matter is later resolved through the legal process. Seized animals are retained under the authority of the court. Some seized animals, including those seized pursuant to a search warrant, can be released following an established postseizure hearing. However, for animals not seized pursuant a search warrant or as otherwise specified, seized animals remain on a court hold until the criminal case is resolved.

Seized animals on a court hold could be fostered or sent to rescues. However, because seized animals are evidence and chain of custody laws regarding animals are unclear, shelters are reticent to place animals in foster homes where the animal could potentially escape, jeopardizing the criminal case. Therefore, these animals are often held for months or even years, waiting for the case to resolve.

Because current law requires that if the charges for the seizure or impoundment and any other charges permitted under this section are not paid within 14 days of the seizure, or if the owner, within 14 days of notice of availability of the animal to be returned, fails to pay charges permitted under this section and take possession of the animal, the animal shall be deemed to have been abandoned and may be humanely euthanized or otherwise properly disposed of by the seizing agency, current law does not require an individual's ability to pay be considered when forfeiting their ownership of their animal.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Committee on Appropriations:

Minor to moderate workload costs to district attorneys to file forfeiture petitions and serve process on defendants. Costs will depend on whether the duties imposed by this bill constitute a reimbursable state mandate, as determined by the Commission on State Mandates. (General Fund)

Minor to moderate cost pressures on the courts to adjudicate new cases. An eight-hour court day costs approximately $10,500 based on the hourly rate of court personnel including at minimum the judge, clerk, bailiff, court reporter, jury administrator, administrative staff, and jury per-diems. While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources. The FY 2026-27 Budget appropriated $70 million General Fund for this purpose (Trial Court Trust Fund, General Fund).

Unknown, potentially significant cost savings to the courts as a result of a more efficient animal disposition process and likely significant savings to animal control agencies from reduced sheltering costs. Whether animal control agency savings may partially or fully offset district attorney mandate claims would be determined by the Commission on State Mandates. (General Fund)

SUBJECT: Electricity: energy storage: energy-only resources

SOURCE: Abundance Network
Sonoma Clean Power

DIGEST: This bill requires specified actions to increase the opportunities for the deployment of energy-only resources, including requiring California's energy agencies provide transmission-focused information to the California Independent System Operator (CAISO) to identify cost-effective opportunities to increase the reliability contribution or mitigate congestion of planned or existing energy-only resources through transmission capacity expansions.

Senate Floor Amendments of 8/21/26 address chaptering amendments with AB 2476 (Ellis) and AB 2111 (Papan).

ANALYSIS:

Existing law:

1) Establishes that U.S. Federal Energy Regulatory Commission (FERC) has exclusive jurisdiction over the transmission of electric energy in interstate commerce. (Federal Power Act §§§201, 205, 206 (16 United States Code (USC) §§824, 824d, 824e))

2) Establishes the CAISO as a nonprofit public benefit corporation, and requires the CAISO to ensure the efficient use and reliable operation of the electrical transmission grid consistent with the achievement of planning and operating reserve criteria, as specified. (Public Utilities Code §345.5)

3) Establishes the California Public Utilities Commission (CPUC) with jurisdiction over all public utilities, including electrical and gas corporations.. (Article XII of the California Constitution)

4) Requires the California Energy Commission (CEC) to conduct assessments and forecasts of all aspects of energy industry supply, production, transportation, delivery and distribution, demand, and prices and to use these assessments and forecasts to develop and evaluate energy policies and programs. (Public Resources Code §25301(a))

5) Requires the CPUC, as part of the Public Utilities Act, to identify a diverse and balanced portfolio of resources needed to ensure a reliable electricity supply that provides optimal integration of renewable energy in a cost-effective manner. Requires the CPUC to adopt a process for each load-serving entity (LSE) to file an integrated resource plan (IRP) and a schedule for periodic updates. Requires the CPUC, in consultation with the CEC and CAISO, to determine if there is a need for the procurement of eligible energy resources based on a review of the integrated resource plans. Requires the CPUC, in consultation with the CEC, to identify all potentially achievable cost-effective electricity efficiency savings and establish efficiency targets for an electrical corporation, as specified. (Public Utilities Code §§454.51, 454.52, and 454.55)

6) Requires the CPUC, in consultation with the CEC, to provide transmission-focused guidance to the CAISO about resource portfolios of expected future renewable energy resources and zero-carbon resources, as specified, to allow the CAISO to identify and approve transmission facilities needed to interconnect resources and reliably serve the needs of load centers. Requires the CPUC and the CEC to annually provide projections to support the CAISO's

planning and approvals in its annual transmission planning process, as provided. (Public Utilities Code §454.57)

This bill:

1) Requires the CPUC, when requiring procurement of resources under an IRP, to account for the ability of energy-only resources to achieve required clean energy deployment rates to charge storage resources during off-peak periods, and to increase resource diversity, and requires the CPUC to enable energy-only resources to satisfy procurement requirements to the maximum extent feasible.

2) Requires the CPUC and CEC, as part of providing projections to the CAISO, to also identify cost-effective opportunities to enable planned or operating energy-only resources to obtain deliverability through transmission capacity expansions, and to request the CAISO to reserve associated deliverability for geothermal and wind.

3) Requires the CPUC to designate energy-only resources as long-lead time resources for purposes of the CAISO's scoring in its interconnection process.

4) Incorporates additional changes to Section 454.52 of the Public Utilities Code proposed by AB 2476 to be operative only if this bill and AB 2476 are enacted and this bill is enacted last.

5) Incorporates additional changes to Section 454.57 of the Public Utilities Code proposed by AB 2111 to be operative only if this bill and AB 2111 are enacted and this bill is enacted last.

Background

CAISO. The CAISO is a nonprofit public benefit corporation created by California statute as part of the effort to deregulate the electricity market in the late 1990s. The CAISO manages the flow of electricity across the high-voltage bulk power system that makes up 80% of California's, and a small part of Nevada's, electric grid. CAISO is registered as both a transmission operator and balancing authority (BA) under federal reliability requirements. As a general matter, BAs may contain transmission operators. As with other BAs, the CAISO is regulated by federal statute and regulations with oversight by FERC and the North American Energy Reliability Corporation (NERC).

Transmission planning process. Each year, the CAISO conducts its transmission planning process to identify potential system limitations as well as opportunities for system reinforcements that improve reliability and efficiency. The CAISO Transmission Plan provides a comprehensive evaluation of the CAISO transmission grid to address grid reliability requirements, identify upgrades needed to successfully meet California's policy goals, and explore projects that can bring economic benefits to consumers. The plan relies heavily on key inputs from state agencies in translating legislative policy into actionable policy driven inputs. The development of the transmission plan entails annual public stakeholder process that is conducted pursuant to the CAISO's FERC-approved tariff. It includes a three-phase process that leads to annual CAISO Board of Governor approval of transmission plan and associated transmission projects.

Forecasting by CEC. The CEC conducts demand forecast that is used to inform several planning processes, including the CAISO's transmission planning process and the CPUC's IRP process. The demand forecast is often a 10-year (recently 15-year) outlook for electricity and natural gas sales, consumption, and peak and hourly electricity demand. Additionally, the CPUC provides energy resource supply-side inputs, including an annual resource portfolio, to inform the transmission planning by the CAISO.

SB 100 (De León, Chapter 312, 2018). SB 100 established the state's target to meet 100% of the state's electricity retail load with renewable and zero-carbon resources by 2045. SB 1020 (Laird, Chapter 361, Statutes of 2022) established interim goals to meeting the SB 100 target, specifically requiring 90% of retail sales by 2035, 95% by 2040 to be met with renewable and zero-carbon energy resources. SB 100 Joint Agency Report evaluates the challenges and opportunities in implementing SB 100. It includes an initial assessment of the additional energy resources and the resource building rates needed to achieve 100% clean electricity, along with the associated costs. The report is scheduled to be updated every four years. The first report issued March 2021 identified preliminarily that on average the state may need six gigawatts of new renewable and energy storage annually to meet the SB 100 goals. The California Energy Commission (CEC) is developing the 2025 report.

IRP process. SB 350 (De León, Chapter 547, Statutes of 2015) required each LSE to file a biennial IRP for approval or certification by the CPUC. The CPUC combines all LSEs' IRPs to ensure the state is on its path to meet its clean energy procurement goals. Public owned utilities (POUs) are required to file their own IRPs with the CEC. The goal of the IRP is a two-year planning process to ensure

that LSEs are meeting targets that allow the electricity sector to contribute to California's economy-wide GHG emissions reductions goals and that helps to reduce overall costs. The CPUC adopted a 2023 portfolio that reduces 25 million metric ton (MMT) of GHG emissions by 2035, as compared to the previously adopted 38 MMT by 2030 planning target. The IRP is intended to forecast needs on a 10-year horizon. In this regard, the IRP is a forward-looking activity. As part of the IRP process, the CPUC has issued several procurement orders on LSEs to address near-term and mid-term procurement needs. Within the procurement orders, the CPUC has directed central procurement for local RA and mid-term reliability by electric investor-owned utilities (IOUs) for customers, including those of other LSEs.

CAISO 20-year Transmission Outlook. The CAISO embarked on creating a 20-Year Transmission Outlook for the electric grid, in collaboration with the CPUC and the CEC, with the goal of exploring the longer-term grid requirements and options for meeting California's greenhouse gas (GHG) reduction and renewable energy objectives reliably and cost-effectively. The CAISO also intends for the expanded planning horizon to provide valuable input for resource planning processes conducted by the CPUC and CEC, and to provide a longer-term context and framing of pertinent issues in the CAISO's ongoing annual 10-Year Transmission Plan.

SB 887 (Becker, Chapter 358, Statutes of 2022). SB 887 required the CPUC and CEC to provide forecasts and inputs to the CAISO that extend at least 15 years into the future to inform transmission planning process. Specifically, SB 887 required the CPUC, in consultation with the CEC and CARB, to provide transmission-focused guidance to the CAISO about resource portfolios of expected future renewable energy resources and zero-carbon resources. Required the guidance to include allocation of resources by region, make full use of studies completed before January 1, 2023, and additional projections each year to support the CAISO's planning and approvals in its annual transmission planning process. The legislation also required the CPUC and CEC to provide 15-year resource portfolios and demand forecasts, provide load growth projections that achieve economy-wide GHG reductions, eliminate the need for carbon-emitting resources for reliability in locally constrained regions by no later than 2035, among other provisions.

Comments

Need for this bill. According to the author:

> Today, most of California is functionally off-limits to new renewable energy development due to a lack of interconnection availability caused by transmission constraints. This is especially acute in Northern California, where there is great potential for expansion of wind and geothermal resources. Over 21 gigawatts of projects currently in the queue are functionally unable to be interconnected to the grid, and that's just in 2026. The state risks losing hundreds of GWs of projects over the next two decades if this challenge is not addressed, along with the associated ratepayer benefits, jobs, and reinvestment in our communities. A new approach to grid management can help resolve this problem by allowing vastly more clean energy resources to interconnect to the grid through a smarter approach to grid management. Simply put, California will not reach our ambitious clean energy goals without a better approach to interconnecting new projects to the grid.

Energy-only resources. Energy-only resources are those that generating resources that are interconnected to the electric grid but are not studied for deliverability. The CAISO has begun exploring pathways through its Interconnection Process Enhancements to allow certain energy-only resources to seek deliverability after coming online, where sufficient transmission capacity exists and no network upgrades are required. Under this concept, some projects may come online earlier as energy-only and later obtain deliverability if conditions permit. The proponents of this bill are supportive of expanding the use of these energy-only resources, particularly geothermal and wind resources that lack deliverability due to limited transmission capacity.

This bill requires the CPUC to account for energy-only resources to meet needs of procurement orders. The bill would require the CPUC to account for the role energy-only resources can provide to achieve clean energy deployment rates, including the ability to charge storage resources during off-peak periods and increase resource diversity. CPUC's recent procurement orders have increased deployment of solar and battery storage (record amounts). The CPUC has also made a request to the Department of Water Resources for long lead-time resources, including offshore wind and enhanced geothermal. However, DWR has not procured or signaled their intent to procure the resources requested. This bill seeks to have the CPUC better account for the role energy-only resources can provide to increase resource diversity. It's unclear whether this addition will result in a different outcome in CPUC procurement orders, but the proponents intend for this language to support their efforts in CPUC proceedings to increase the deployment of geothermal and wind energy resources that lack deliverability.

This bill amends the SB 887 transmission-focused guidance to enable opportunities to connect energy-only resources and request wind, and geothermal resources are considered long lead-time resources. Recent amendments require the CPUC and CEC to identify cost-effective opportunities to enable planned or operating energy-only resources to obtain deliverability through transmission capacity expansions and require the CAISO to reserve associated deliverability for geothermal and wind in the BA for that purpose. The bill also requires the CPUC and CEC to request CAISO to designate the energy-only resources as long lead-time resources for purposes of the CAISO's scoring in its interconnection process (the process to connect generating resources to the electric transmission system). Although in-state wind had been identified as a long lead-time resource, the CPUC and CAISO changed this definition to no longer include in-state wind (though out of state wind, geothermal and offshore wind are considered long lead-time resources) contending that in-state wind does not face the same time horizon challenges of the other resources for which they reserve transmission capacity. The change has raised concerns by stakeholders representing in-state wind energy resources that the loss of the designation will further limit the ability for wind to be developed in California. The proponents for this bill contend this approach will help ensure California is taking better advantage of connecting clean energy resources more quickly to help achieve our clean energy goals.

Prior/Related Legislation

AB 2111 (Papan, 2026) requires various actions to better incorporate uncertainty and risk in resource portfolio planning to inform transmission planning. The bill is pending before the full Senate.

SB 887 (Becker, Chapter 358, Statutes of 2022) among its provisions, required the CPUC, in consultation with the CEC and the CARB, to provide transmission-focused guidance to the CAISO about resource portfolios of expected future renewable energy resources and zero-carbon resources to allow the CAISO to identify and approve transmission facilities needed to allow for full deliverability of those resources to load centers.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The CPUC estimates ongoing costs of about $185,000 annually (ratepayer funds) to support the annual transmission-focused guidance provided to the CAISO under Public Utilities Code §454.57 by identifying cost-effective

opportunities to increase the reliability contribution of, and mitigate transmission congestion affecting, planned and existing energy-only resources, analyze CAISO deliverability studies and transmission capacity data to determine where targeted transmission expansions would most improve reliability value or reduce curtailment risk, and translate those findings into the annual guidance package the CPUC and California Energy Commission (CEC) jointly submit to the CAISO's transmission planning process — among other things.

- The CEC anticipates its costs would be minor and absorbable.

SUPPORT: (Verified 8/21/26)

Abundance Network (Co-source)
Sonoma Clean Power (Co-source)
California Community Choice Association
County of Humboldt
San José Clean Energy
The Nature Conservancy

OPPOSITION: (Verified 8/21/26)

Independent Energy Producers Association

ARGUMENTS IN SUPPORT: According to the co-sponsors of the bill: "Today, most of California is functionally off-limits to new clean energy development due to a lack of interconnection availability caused by transmission constraints. Our state risks losing hundreds of gigawatts' worth of diverse clean energy projects over the next two decades – along with the associated ratepayer benefits, jobs, and reinvestment in our communities – if this challenge is not addressed. … AB 2369 can help resolve this problem by allowing clean energy resources to interconnect to the existing grid more quickly and on a much greater scale."

ARGUMENTS IN OPPOSITION: According to the Independent Energy Producers Association, this bill creates reliability risks, increased ratepayer costs, and bypasses active studies. They note that the CAISO is already studying the reliability contribution of energy-only resources and results are expected in November to inform the CPUC's development of new Reliable Clean Power Procurement Program. They contend this bill will lock in energy-only resource treatment before that technical work is completed.

SUBJECT: Alcoholic beverage control

SOURCE: Author

DIGEST: This bill revises and recasts provisions in the Alcoholic Beverage Control (ABC) Act that currently require electronic fund transfers (EFT) for retailer to wholesaler alcohol payments. This bill changes the requirement from delivery to sale, defines "initiate" and "equitable manner," and expands processor options, as specified. Additionally, this bill revises the definition of "beer" for purposes of the ABC Act to provide that beer may be produced using other grains.

Senate floor amendments of 8/20/26 clarify that the requirement that the retailer pay the supplier a one percent charge after the 30th day from the day of the delivery shall made on the 32nd day rather than the 31st day from the date of the delivery.

ANALYSIS:

Existing law:

1) Establishes the Department of ABC and grants it exclusive authority to administer the provisions of the ABC Act in accordance with laws enacted by the Legislature. This involves licensing individuals and businesses associated with the manufacture, importation, and sale of alcoholic beverages and the collection of license fees for this purpose.

2) Defines "beer" to mean any alcoholic beverage obtained by the fermentation of any infusion or decoction of barley, malt, hops, or any other similar product, or any combination thereof in water, and includes ale, porter, brown, stout, lager beer, small beer, and strong beer, but does not include sake, known as Japanese rice wine. Beer may be produced using the following materials as adjuncts in fermentation: honey, fruit, fruit juice, fruit concentrate, herbs, spices, and other food materials. Beer aged in an empty wooden barrel previously used to contain wine or distilled spirits shall be defined exclusively as "beer" and shall not be considered a dilution or mixture of any other alcoholic beverage. (California Business and Professions Code [Cal. Bus. & Prof. Code] § 23006)

3) Requires specified licensees who sold and delivered alcoholic beverages to a retailer and did not receive payment within 42 days of the date of delivery to charge 1% of the unpaid balance on the 43rd day and an additional 1% for each subsequent 30-day period.

4) Requires a payment from a licensed retailer to a licensed wholesaler for the delivery of alcoholic beverages to be made by EFT pursuant to certain conditions, except as specified. Among other things, existing law requires the wholesaler to initiate the EFT and requires any service fees related to the EFT to be applied in an equitable manner. Existing law also provides for the selection of the third-party payment processor used to facilitate the EFT, as specified.

This bill:

1) Revises and recasts provisions in the ABC Act related requirements of payment from a licensed retailer to a licensed wholesaler for the *delivery* of alcoholic beverages, to instead apply to the *sale* of alcoholic beverages.

2) Requires specified licensees who sold and delivered alcoholic beverages to a retailer and did not receive payment to charge 1% of the unpaid balance after 30 days without payment and an additional 1% for each subsequent 30-day period. Under current law, the 1% charge begins after 42 days.

3) Defines "initiate," for specified provisions in the ABC Act related to the requirement that a wholesaler licensee initiate the EFT, to mean presenting an invoice to the licensed retailer requiring the licensed retailer to make payment by electronic means.

4) Provides, for specified provisions in the ABC Act related to the requirement that a wholesaler licensee initiate the EFT, that that provision does not prevent a licensed retailer from authorizing the licensed wholesaler to electronically withdraw funds directly form the licensed retailer's bank account, if the authorization is voluntary and can be withdrawn by the licensed retailer through a written notice provided to the licensed wholesaler at least 72 hours before a scheduled electronic withdrawal.

5) Defines "equitable manner," for specified provisions in the ABC Act related to the requirement that any service fees related to electronic payment transactions shall be applied in an equitable manner to each subscribing licensed wholesaler and licensed retailer, to mean that the fees paid are for those services the paying party receives from the electronic payment service provider.

6) Requires the licensed wholesaler and licensed retailer to either use the third-party payment processor used by the parties on July 1, 2025, or a payment processing service offered by a financial institution that held a deposit account of the licensed retailer on that date, and, if neither apply, would require the wholesaler to select the processor.

7) Revises the definition of "beer" for purposes of the ABC Act to provide that beer may be produced using other grain and to specify that fermentation occurs in drinkable water.

Background

Author Statement. According to the author's office, "this bill makes technical and noncontroversial changes to the Act to further facilitate implementation of AB 2991 (2024), which authorized electronic payments between retailers and wholesalers for alcoholic beverage deliveries made by an EFT in accordance with various requirements. AB 2375 conforms the statute's payment provisions to implementation guidance issued by the Department of ABC and clarifies that both 'push' (payer) and 'pull' (payee) electronic payment systems comply with statutory requirements. The amendments preserve the underlying objectives of the 2024 legislation and the tied-house credit laws by ensuring prompt payment and a level playing field, without permitting any unlawful extension of credit between the parties."

Furthermore, "traditionally, beer has been brewed using barley, malt, and hops. However, over thousands of years, brewers have experimented with a variety of adjunct ingredients to create unique and innovative beer styles that reflect both seasonal influences and regional traditions. This bill aims to update the ABC Act by expanding the definition of beer to acknowledge this historical diversity while aligning with Federal regulations on beer flavoring. Additionally, it ensures that fermentation occurs in drinkable water."

AB 2991 (Valencia, Chapter 426, Statutes of 2024). In 2024, Governor Newsom signed AB 2991 (Valencia, Chapter 426, Statutes of 2024) which requires payments from retailer licensees to wholesaler licensees for alcoholic beverage deliveries to be made by an EFT in accordance with various requirements. These requirements included:

1) The wholesaler must initiate the EFT through the withdrawal of funds from the retailer's bank account. Initiating an EFT withdrawal can include, but is not limited to, simply generating an invoice requesting payment.

2) The EFT must occur by the expiration of the 30th day from the date of delivery.

3) Any costs related to the electronic payment services must be paid by the party that incurred the costs. Wholesalers cannot pay for electronic payment fees incurred by a retailer, and a retailer cannot pay for electronic payment fees incurred by a wholesaler, and service fees must be applied in an equitable manner to the licensee to match the services they receive.

The bill designated the wholesaler license with the authority to select the third-party payment processor used to facilitate the EFT transfer. Notwithstanding, a wholesaler and retailer may agree on the third-party payment processor, but if the parties are unable to agree, they must use the third-party payment processor used

by the retailer as of July 1, 2025, to pay for wholesale alcohol purchase; and, if by July 1, 2025, the retailer does not use a third-party payment processor, the parties must use the third-party payment processor selected by the wholesaler.

The bill provided specified exceptions for cash, check, or money order, including, but not limited to, temporary service interruptions of third-party payment processors, accepting payment following an EFT of insufficient funds, and others.

In addition, the bill gave wholesalers the ability to accept credit card payments in lieu of an EFT, so long as the retailer bears the cost of the transaction. The bill gave wholesalers' discretion to accept credit card payment. In April 2025, the Department of ABC issued an advisory alerting alcohol licensees of the new law and encouraged wholesalers and retailers to work together to ensure compliance with this new law.

Change Made by this Bill. Since the enactment of AB 2991 (Valencia, Chapter 426, Statutes of 2024) the Department of ABC has received numerous complaints from retailers, largely stemming from confusion over specific provisions of that bill. This bill seeks to clarify and improve several of those provisions.

First, existing law requires EFT payment from a retailer to a wholesaler upon delivery of alcoholic beverages. This bill changes the triggering event from delivery to sale. Second, current law requires licensees who sell and deliver alcoholic beverages to a retailer and do not receive payment within 42 days of delivery to charge 1% of the unpaid balance on the 43rd day, plus an additional 1% for each subsequent 30-day period. This bill reduces that initial window to 30 days, with the same 1% monthly charge thereafter. The 42-day period originated in mid-20th century banking practice, when checks could be delayed in transit and a 12-day buffer was considered necessary. That rationale no longer applies in an era of electronic payments.

Additionally, AB 2991 requires the wholesaler to "initiate" an electronic funds transfer, but the term generated significant confusion regarding its precise meaning. This bill addresses that ambiguity by defining "initiate" to mean presenting an invoice to the licensed retailer requiring the licensed retailer to make payment by electronic means. Similarly, AB 2991 requires any service fees related to electronic payments to be applied equitably to wholesalers and retailers alike. This bill defines "equitable manner" to mean that the fees paid are for those services the paying party receives from the electronic payment service provider.

Finally, this bill clarifies that the requirement for wholesalers to initiate EFTs does not preclude a retailer from voluntarily authorizing a wholesaler to withdraw funds directly from the retailer's bank account under a mutual EFT agreement, provided the retailer may revoke that authorization by written notice to the wholesaler at least 72 hours before scheduled withdrawal.

Adding Flavors to Brewing. Beer flavor enhancement encompasses a wide range of techniques beyond the naturally occurring characteristics imparted by barley, malt, hops, yeast, and other grains. Brewers may deliberately introduce ingredients such as fruits, herbs, spices, and other flavorings — either before or after the boil — to lend a beer its distinctive character. Similarly, a diverse array of fermentable adjuncts beyond barley may be incorporated into the brewing process, as virtually any starch or sugar is capable of serving as a fermentable base.

Fermentable ingredients generally fall into two broad categories. The first encompasses sugars that are readily available for fermentation without additional processing, including refined sugars, syrups, honey, and fruits. The second comprises sugars that are bound within starches or complex carbohydrates — such as grains, roots, and vegetables — and require processing to release the simpler sugars necessary for yeast activity.

In the latter case, yeast relies on enzymatic activity to break down maltose present in the wort — the liquid extracted during mashing — into fermentable simple sugars. Fructose, though the most abundant naturally occurring fermentable sugar, sees comparatively limited use in brewing. Despite its structural similarity to glucose, its distinct molecular configuration renders it less amenable to efficient yeast fermentation.

Related/Prior Legislation

AB 1940 (Villapudua, Chapter 218, Statutes of 2024) allows a wholesaler or manufacturer to accept the return of a seasonal brand of beer from a retail licensee if the beer is exchanged for a quantity of beer of similar quality, if the original manufacturer has ceased doing business.

AB 2991 (Valencia, Chapter 426, Statutes of 2024) required, commencing on January 1, 2026, a payment by an alcohol retail licensee to a wholesaler licensee for the delivery of beer, wine, or distilled spirits, to be made by EFT, except as specified.

AB 205 (Daly, Chapter 60, Statutes of 2019) revised the definition of "beer" for purposes of the ABC Act to provide that beer may be produced using honey, fruit juice, fruit concentrate, herbs, spices, and other food materials, as adjuncts in fermentation.

AB 1812 (Chesbro, Chapter 96, Statutes of 2012) added clarity to the definition of "beer" in the ABC Act by making it explicit that beer aged in an empty wooden barrel previously used to contain wine or distilled spirits shall be defined exclusively as "beer" and shall not be considered a dilution or mixture of any other alcoholic beverage.

SB 39 (Padilla, Chapter 140, Statutes of 2011) prohibits the import, production, manufacture, distribution, or sale of beer to which caffeine has been directly added as a separate ingredient at retail locations within the state.

AB 346 (Beall, Chapter 624, Statutes of 2008) provides that any container of beer or alcoholic beverage, other than sake, that is approved for labeling as a malt beverage under the Federal Alcohol Administration Act, that derives 0.5% or more of its alcoholic content by volume from flavors or other ingredients containing distilled alcohol and that is sold within this state on or after July 1, 2009, shall bear a distinctive, conspicuous, and prominently displayed label, or firmly affixed sticker, as defined.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, staff notes that the Department of ABC's activities are funded by regulatory and license fees and generally the department does not receive support from the General Fund. New legislative mandates, although modest in scope, may in totality create new cost pressures and impact the department's operating costs and future budget requests.

SUPPORT: (Verified 8/18/26)

California Restaurant Association
California Family Beer Distributors

OPPOSITION: (Verified 8/18/26)

None received

ARGUMENTS IN SUPPORT: According to the California Family Beer Distributors, "AB 2375 preserves the purpose of AB 2991 and California's tied-

house credit laws – prompt payment and a level playing field, with no extension of unlawful credit – while giving retailers, wholesalers, and payment processors clear and consistent rules." According to the California Restaurant Association, "AB 2375 ensures restaurants, bars, and other licensees are not subject to unexpected withdrawals – instead, this common-sense legislation ensures that all payments are not only made within a reasonable time-frame, but that proper protections remain in place so that suppliers are paid on time."

SUBJECT: Family daycare homes: Fourth Amendment training

SOURCE: Child Care Providers United (CCPU)
SEIU California
United Domestic Workers/AFSCME Local 3930

DIGEST: This bill requires the California Department of Social Services (CDSS) to designate a statewide entity, to develop and provide a training program on a person's rights under the Fourth Amendment, commencing July 1, 2026. This bill requires licensed family daycare home providers to complete this training by certain deadlines. This bill specifies a violation of this act is not subject to criminal, civil, or administrative penalties, nor a licensing citation.

ANALYSIS:

Existing Law:

1) Provides that the right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized. (Fourth Amendment of the United States Constitution)

2) Establishes the Child Care and Development Services Act to provide a comprehensive, coordinated, and cost-effective system of child care and development services for children from infancy to 13 years of age and their parents, including a full range of supervision, health, and support services through full- and part-time programs. (Welfare and Institutions [WIC] §10207 et seq.)

3) Establishes the California Child Day Care Facilities Act to create a separate licensing category for child daycare centers and family day care homes within the existing licensing structure at CDSS. (Health and Safety Code [HSC] §1596.70 et seq.)

4) Defines "family daycare home" as a facility that regularly provides care, protection, and supervision for 14 or fewer children, in the provider's own home, for periods of less than 24 hours per day, while the parents or guardians are away, and is either a large family day care home or a small family day care home, as defined. (HSC §1596.78)

5) Prohibits any person or entity operating a child daycare facility from providing care or supervision without a valid license from CDSS. (22 California Code of Regulations §101156(a))

6) Requires the licensee or administrator of a licensed child daycare facility to report to CDSS and the Attorney General any requests for information or access to the facility by an officer or employee of a law enforcement agency for the purpose of immigration enforcement. Prohibits a licensee or administrator from providing personal information, as defined, of staff, children in care, or their relatives and family members. (HSC §1597.640(b)(1)(A))

7) Requires the Attorney General, by April 1, 2026, in consultation with the appropriate stakeholders, as specified, to publish model policies limiting assistance with immigration enforcement at licensed child daycare facilities to the fullest extent possible consistent with federal and state law, and ensuring that those facilities remain safe and accessible to all California residents, regardless of immigration status. Requires the Attorney General to consider

certain issues when developing the model policies, as specified. (HSC §1597.640(f))

8) Requires CDSS to inform licensed child daycare facilities of the model policies published by the Attorney General. Requires a licensed child daycare facility to ensure parents or authorized representatives of children in care are aware of the model policies published by the Attorney General. (HSC §1597.640(g))

9) Requires a licensed child daycare facility to provide a child's parent or authorized representative with information about how to access the model policies as best practices guidance. Requires CDSS to inform licensed child daycare facilities of any revisions or updates to the model updates. Requires any information, policies, or guidance provided by facilities to parents or authorized representatives to be revised as necessary, as specified. (HSC §1597.640(h))

This bill:

1) Requires CDSS to notify all licensed and license-exempt family daycare home providers of a person's rights under the Fourth Amendment to the United States Constitution. Requires the notice to include, but not be limited to, information relating to the protections against searches and seizures of a home and detentions and arrests of a person in a home by local, state, or federal law enforcement officers and employees, including the United States Immigration and Customs Enforcement, without providing valid identification, a written statement of purpose, and a valid judicial warrant.

2) Requires the notification to be developed and provided in coordination with the training required pursuant to 3) below.

3) Requires CDSS, with the concurrence of any exclusive representative for licensed and license-exempt family daycare home providers, to designate a statewide entity that has recent and significant experience in providing plain language, accessible child care worker training in multiple languages to develop and provide a training program about the rights and responsibilities of a family daycare home related to a person's rights under the Fourth Amendment to the United States Constitution. Requires the training program to include the policies limiting assistance with immigration enforcement at licensed child daycare facilities.

4) Requires, commencing July 1, 2026, the designated statewide entity to offer the training program to licensed and license-exempt family daycare home providers. Requires family daycare home providers that are licensed on the date

that this bill becomes effective to complete this training no later than June 30, 2027, and family daycare home providers that are licensed after the date that this bill becomes effective to complete this training within 12 months of their initial licensing.

5) Provides that a violation of this section is not subject to criminal, civil, or administrative penalties, and shall not result in a licensee being subject to citation under this act.

6) Provides that this act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the California Constitution and shall go into immediate effect.

Background

Purpose of the Bill. According to the author, "AB 2379 builds on existing sensitive location protections by ensuring family child care providers have the information and tools they need to protect themselves, the children in their care, and the families they serve. By educating providers of their constitutional rights, the bill helps keep child care doors open and safe from intimidation, misinformation, and unlawful searches or arrests by law enforcement, including federal immigration authorities.

"Consistent statewide notice and training is needed to eliminate confusion and alleviate fear among providers, particularly in immigrant communities. Requiring the Department of Social Services to provide clear notice to family daycare home providers regarding their constitutional rights when law enforcement or immigration authorities seek entry into a home-based child care setting and providing multilingual training to providers will help to prevent disrupted access to child care for families."

Family Child Care Home Licensure. Family child care, formerly called family daycare, is regularly provided care, protection, and supervision of children in the licensee's own home, known as a family child care home. Families who choose family child care for their child might do so because the family child care home is close to where they live, the provider speaks their home language, they prefer a home-like setting over a child care center, or their child is more comfortable with small class sizes. Family child care caregivers paid through subsidy are represented by Child Care Providers United.

The California Child Day Care Facilities Act of 1984 established the Child Care Licensing Program at CDSS. The mission of the Child Care Licensing Program is

to ensure the health and safety of children in care and to improve the quality of their care through regulation and consultation. This mission is accomplished through prevention, compliance, and enforcement.

Family child care providers are required to maintain certain information in each child's record, including basic information on the child such as name and birthdate, and emergency contact information. Licensees are required to keep these child records confidential, with the exception that a licensing agency may request to review and make copies of records. The law also permits a child's parent or guardian to review their child's record.

AB 495 (Celeste Rodriguez, Chapter 664, Statutes of 2025) prohibited licensed family child care homes and their employees from collecting information or documents regarding the citizenship or immigration status of children or their family members. This bill requires CDSS to notify all licensed family child care home providers of a person's rights under the Fourth Amendment, requires CDSS to designate a statewide entity to provide training on those rights, and requires licensed family child care home providers to complete the training by June 30, 2027, or within 12 months of initial licensure. This bill provides that a violation of these provisions is not subject to criminal, civil, or administrative penalties and shall not result in a licensee being subject to a licensing citation.

Family, Friend, and Neighbor (FFN) Care. FFN care is care provided by grandparents, aunts, uncles, close relatives, friends, and neighbors in the child or caregiver's home. FFN care, formally referred to as license-exempt child care, is exempt from state licensure requirements. FFN is the predominant form of child care in California and the United States, especially for infants and toddlers, the age range when child care is most expensive. A report by Early Edge California and the UC Berkeley Center for the Study of Child Care Employment estimates that one third to one half of all children under 5 are served through FFN care. In California, families may use a child care subsidy to pay for the cost of FFN care. FFN caregivers paid through subsidy are represented by Child Care Providers United.

Although there are no licensing requirements to become a FFN provider, California requires FFN providers to register with TrustLine, the state's background check program, to be paid with a child care subsidy. State law and regulations allow FFN providers to care for relatives or for the children of only one family in addition to the provider's own children. If an individual wants to provide care to non-relative children from more than one family, they need to obtain a family child care license.

This bill requires CDSS to notify all license-exempt family child care home providers of a person's rights under the Fourth Amendment and require CDSS to designate a statewide entity to provide training on those rights.

Early Childhood Education and Child Care Providers Guidance and Model Policies. On April 1, 2026, pursuant to AB 495, the Office of the Attorney General published guidance and model policies for child care providers to keep child care facilities safe and accessible to all children and families in California, regardless of immigration status. The guidance includes several chapters to address the following questions related to immigration enforcement for child care providers:

- What sensitive information are you required to collect about the children and families you serve, and what information are you not allowed to collect?
- When are you required to share information with immigration or other law enforcement agents? What information are you not allowed to share?
- What do you need to do if immigration enforcement agents show up at your facility?
- What should you do if a child's family member is detained or deported?
- When are you required to update and share your policies?

The guidance also includes a detailed appendix with examples of warrants, subpoenas, and other enforcement documents; a summary of confidentiality laws; a "know your rights" guide for families; a quick reference best practices checklist and a quick reference requirements checklist; and a list of resources. This bill would require licensed family child care providers to complete training on a person's rights under the Fourth Amendment.

Comments

This bill seeks to educate family child care providers about their Fourth Amendment rights to be free from unreasonable search and seizure. On June 6, 2025, U.S. Immigration and Customs Enforcement (ICE) conducted a series of immigration raids across the Los Angeles area, leading to dozens of arrests. According to the Los Angeles Times, almost three-quarters had no criminal convictions, and more than half had never been charged with a crime. Additionally, a survey of 330 Mexican citizens in local detention centers found that half of respondents had lived in the U.S. for at least 10 years. In some cases, ICE has

detained U.S. citizens. These indiscriminate acts of profiling by ICE agents have caused heightened anxiety in immigrant communities and communities of color.

Fears about immigration enforcement are especially relevant to family child care providers, many of whom are immigrants. According to a 2025 survey by the UC Berkeley Center for the Study of Child Care Employment, 44% of family child care providers were born in another country, and only 18% of those surveyed were white. This bill would ensure that both licensed and license-exempt family child care providers have access to information and training about their Fourth Amendment rights.

This bill would require a licensed family child care provider to take Fourth Amendment training. It is unclear how this would be tracked or enforced, and by whom. This bill is an urgency statute and requires an implementation date of July 1, 2026. According to Child Care Providers United, the union has already been conducting similar "know your rights" trainings.

Related/Prior Legislation

AB 2230 (Ávila Farías), among other things, would have prohibited licensed child daycare facility employees from allowing immigration enforcement from entering a licensed child daycare facility without a judicial warrant, subpoena, or court order. AB 2230 was held on the Senate Appropriations Committee suspense file.

AB 495 (Celeste Rodriguez, Chapter 664, Statutes of 2025) established the Family Preparedness Plan Act of 2025, which, in part, required licensed child daycare facilities to adopt model policies developed by the Attorney General regarding interaction with immigration enforcement authorities and required the Attorney General to develop those model policies.

AB 378 (Limón, Chapter 385, Statutes of 2019) authorized family child care home providers to form, join, and participate in the activities of a provider organization (union) of their own choosing for the purpose of representing them and bargaining on matters regarding the terms and conditions of their employment.

AB 450 (Chiu, Chapter 492, Statutes of 2017) prohibited an employer from providing access to a federal government immigration enforcement agent to any non-public areas of a place of labor if the agent does not have a warrant.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, "The CDSS estimates General Fund costs of $2,301,000 in 2027-28 and $2,287,000 annually thereafter for state

administration. This includes costs for state staffing resources and $1,600,000 to hire a contractor with immigration expertise to prepare and provide training, as CDSS does not have the expertise."

SUBJECT: Electricity: data centers

SOURCE: Author

DIGEST: This bill requires the California Public Utilities Commission (CPUC) to establish a new rate class for data centers by January 1, 2028, and requires the CPUC to direct electrical corporations to file separate tariffs for transmission and distribution and generation services for data centers in the new rate class. This bill prohibits cost-shifts between the data center rate class and other electrical rate classes. This bill specifies requirements these tariffs must meet, including, but not limited to, establishing requirements for data centers to pre-pay for certain utility costs resulting from their interconnection. This bill also requires Community Choice Aggregators (CCAs) to adopt generation tariffs for data centers that provide certain protections similar to those required in this bill for electrical corporation tariffs.

ANALYSIS:

Existing law:

1) Authorizes the CPUC to supervise and regulate every public utility in the state and permits the CPUC to do anything that is necessary and convenient to exercise its power and jurisdiction. (Public Utilities Code §701)

2) Authorizes the CPUC to set rates for public utilities and specifies that every cost charged by utilities to customers must be just and reasonable. (Public Utilities Code §451)

3) Defines an electrical corporation as every corporation or person owning, controlling, operating, or managing any electric plant for compensation within this state, except where electricity is generated on or distributed by the producer through private property solely for its own use or the use of its tenants and not for sale or transmission to others. (Public Utilities Code §218)

4) Defines a load-serving entity (LSE) as an electrical corporation, Energy Service Provider (ESP), or CCA. Existing law specifies that a LSE does not include a local publicly owned electric utility (POU) or the State Water Project. (Public Utilities Code §380)

5) Creates the Renewables Portfolio Standard (RPS) by establishing a state goal of procuring at least 60% of total retail sales of electricity from renewable energy resources by December 31, 2030, with specified benchmarks up to that date. Existing law requires the CPUC to oversee electrical corporations' compliance with renewable energy procurement mandates and requires the California Energy Commission (CEC) to oversee POU renewable energy procurement compliance. (Public Utilities Code §399.11 et. seq.)

6) Establishes a policy to source 100% of all in-state retail electricity sales from zero-carbon resources by December 31, 2045. Existing law requires the CPUC, CEC and the California Air Resources Board (CARB) to incorporate this policy into all relevant plans. (Public Utilities Code §454.53)

7) Authorizes the CPUC to assess the extent to which electrical corporation costs for new loads from data centers result in cost shifts to other electrical corporation customers. Existing law specifies that this assessment must be published by January 1, 2027, and it must include the following:

   a) An analysis of potential electrical corporation costs associated with utility procurement for data center electricity consumption.

b) An analysis of potential electrical corporation costs associated with new transmission and distribution assets to serve new data centers or expansions of existing data centers, as specified.

c) Identification of opportunities to address any substantial cost shifts. (Public Utilities Code §913.22)

8) Establishes an opt-in permitting process at the CEC for certain non-fossil fueled power generation facilities. Existing law specifies certain criteria a facility must meet in order to qualify for this opt-in certification. These criteria include, but are not limited to, meeting certain labor standards for the construction of the facility seeking certification. Existing law specifies requirements regarding the use of a prevailing wage and skilled and trained workforce for opt-in permitting eligibility. (Public Resource Code §25545 et. seq.)

This bill:

1) Defines a "data center" as a structure that primarily contains electronic equipment used to process, store, and transmit digital information, using environmental control equipment to maintain the proper conditions for the operation of electronic equipment. The bill specifies that this definition does not include the following: a publicly funded research facility, public safety facility, publicly funded national security facility, publicly owned facility, or utility facility.

2) Requires the CPUC to establish a separate electric rate class for data centers by January 1, 2028. This bill specifies that this rate class must have its own tariff.

3) Requires the CPUC to direct each electrical corporation to file a transmission and distribution tariff does all the following:

a) Allocates the cost for serving the data center rate class in a manner that ensures that incremental utility costs for serving the class are not borne by other electrical rate classes.

b) Does not increase costs for other retail electricity consumers.

c) Ensures that transmission-interconnected data centers pay a reasonable share of costs relating to wildfire mitigation, wildfire liability, electrification and environmental programs, and other costs typically collected from distribution-level ratepayers.

d) Encourages the development of data centers that bring high-wage and high-skilled jobs to California.

e) Requires a data center to enter into a contract with a minimum duration of 10 years to pre-pay interconnection costs and associated distribution costs. This bill requires these contracts to include early termination fees at levels sufficient to ensure that costs are covered.

f) Requires a data center to certify to the CPUC that the electric customer meets labor requirements generally applied to non-fossil power generation facilities seeking opt-in permitting from the CEC.

4) Requires the CPUC to direct each electrical corporation to file a generation service tariff that does all the following:

a) Allocates the costs of serving the class of data centers in a manner that ensures that incremental costs for serving the class are not borne by other electrical rate classes.

b) Enables contracts for generation resources supporting utilities' ability to meet RPS and zero-carbon procurement goals.

c) Ensures that data centers provide equitable contributions to reliability and other programs funded through charges generally collected through the generation component of a customer's bill.

d) Does not increase costs for other retail electricity consumers.

e) Requires a data center to enter into a contract with the electrical corporation to prepay those incremental generation cost increases resulting from the data center's load. These contracts must be at least 10 years in duration and must include early termination fees sufficient to ensure the costs of serving the data center are covered.

f) Requires the data center to pay a minimum amount or percentage based on the data center's projected electricity usage for the duration of a generation service contract.

g) Requires the tariffed customer to report expected on-site generation located in front of the customer's meter.

h) Ensures that a tariffed data center does not receive compensation for onsite generation in a manner that would result in cost shifts to other retail electricity consumers.

5) Authorizes an electrical corporation to submit an exceptional case filing to obtain CPUC approval for a transmission interconnection agreement or generation contract with a data center if the CPUC has not yet adopted a tariff for these services pursuant to this bill. Any transmission interconnection agreement or generation contract with a data center established on or after January 1, 2027, must comply with this bill's requirements.

6) Requires a CCA to adopt a generation service tariff for data centers and establishes requirements for a CCA tariff that are similar to those required for electrical corporation tariffs.

7) Specifies that this bill's generation tariff requirements to not authorize the CPUC to regulate the rates, terms, or condition of electrical service provided by a CCA or ESP.

8) Clarifies that this bill does not expand the Direct Access program and specifies that this bill applies only to a data center that enters into a new transmission interconnection agreement on or after January 1, 2027.

9) Specifies that this bill will only become effective if Senate Bill 886 (Padilla) of the current legislative session is also enacted and becomes effective on January 1, 2026.

Background

Data center growth has triggered electric rate concerns and new utility procurement needs. Data centers in California vary in purpose and size, and many facilities meeting the definition of a data center do not primarily support generative artificial intelligence (AI). Even those data centers that do support generative AI can provide services for a wide variety of clients, including national defense installations, research universities and labs, government agencies, and telecommunications systems. While this bill broadly applies to all large energy consumers, data centers have been the primary focus of recent ratepayer concerns regarding cost shifts from the commercial and industrial sectors. According to a May 2024 report from the CEC, data centers comprise approximately 2% of the state's total annual electricity demand. The CEC anticipates that data centers' electricity consumption may double in the next 10 years without implementation of

any additional energy efficiency measures. Load growth from data centers has been substantially higher in other states. Pennsylvania – New Jersey – Maryland Interconnection (PJM) operates the largest regional grid in the United States. In January 2026, data from PJM indicated that 40% of its expected increased electricity demand will come from data centers. With this increase in electricity demands, PJM has seen record high costs for electricity to meet future reliability needs in addition to new transmission costs. Consumers in four states within PJM territory paid over $4 billion in 2024 alone for transmission projects serving data centers. California has not experienced the level of data center growth seen in some other states; however, a number of California's utilities are projecting substantial data center load growth in the next four years.

Data centers are not the only source of projected significant load growth. In forecasts focusing on near term demand, the CEC has shown that the California Independent System Operator may experience a 1.8 gigawatt (GW) load growth from data centers by 2030. However, the CEC's energy demand forecast covering 2025 through 2045 indicates that vehicle electrification will be the largest driver of peak electricity demand in the state by 2045. While data centers are expected to increase peak electricity demand by 4.7 GW by 2045, electric vehicles and associated charging infrastructure may contribute approximately 8.2 GW to peak demand. Regardless of the sector contributing to the largest share of future energy costs, serving these future loads will necessarily require additional resources. To address these needs, the CPUC has ordered utilities under its jurisdiction to collectively procure six GW of new zero emissions energy resources by 2032. This six GW procurement is intended to cover near-term load growth and account for delays in delivering previously planned renewable resources, including offshore wind resources.

Bill requires procurements for data centers to support clean energy goals, but emissions guarantees are not explicit. This bill requires data centers to enter into 10-year contracts to fund their incremental contribution to a utility's electricity demand. While this bill requires an electrical corporation to establish a tariff that enables procurement of resources that support the utility's ability to meet clean energy procurement goals, this bill does not expressly require data centers and electrical corporations to enter into contracts for non-emitting resources. The absence of explicit requirements regarding the types of resources that must be procured to meet data center load provides the CPUC with wide discretion about what types of resources are eligible for these 10-year contracts when approving electrical corporations' tariff filings.

Bill overlaps with ongoing CPUC proceedings. In addition to ordering new procurements to serve future load growth, the CPUC is also considering new tariffs and rate structures to prevent large loads from unduly burdening other ratepayers. In November 2024, Pacific Gas & Electric (PG&E) filed an application at the CPUC to establish a new electric rule for retail electricity customers seeking interconnection at the transmission level (Application 24-11-007). According to PG&E's filings, data centers were 67% of the 34 transmission interconnection applications that PG&E received between 2023 and November 2024. In July 2025, the CPUC issued an initial decision (D. 25-07-039) that approved an interim PG&E electric rule for data centers that pre-pay the cost of interconnection. On April 9, 2026, the CPUC started the process to open a rulemaking on the California Advanced Electric Rate Design (R. 26-04-009). As part of this proceeding the CPUC intends to explore opportunities to address affordability challenges associated with wildfire costs and rapid load growth, including load from data centers. The CPUC's order opening this rulemaking indicates that the CPUC intends to publish a staff proposal on rate reforms as part of this proceeding in the 3rd Quarter of 2026. Since this bill would establish requirements for rate classes and tariffs that impact issues the CPUC intends to explore in its ongoing rate reform proceeding, this bill may require the CPUC to modify its ongoing rulemaking.

Getting the most from large megawatts (MW). A number of stakeholders, including utilities and research institutions, are identifying and developing mechanisms to support more demand responsive large loads that can respond to grid conditions and lower procurement costs. On June 22, 2026, the CEC approved grants for more than $21 million from the Electric Program Investment Charge to fund projects – including a project to develop of a flexible data center load capacity tool – to support beneficial electrification while increasing grid capacity and flexibility. Beneficial electrification can occur with large loads interconnecting in locations where excess capacity exists on the grid. Increasingly policymakers are seeking mechanisms to use large MW procurements for these beneficial electrification projects to lower overall electricity rates. The CPUC's Public Advocate's Office states the following regarding beneficial electrification's potential for ratepayer benefits:

> Expanding electrification can lower the average cost of electricity, provided it does not strain the system in ways that compromise reliability or require expensive upgrades. Policies should promote "beneficial electrification," by considering when and where energy is used to maintain safety, system reliability, control costs, and prevent inequities.

Beneficial electrification necessarily requires a large load to interconnect and take service at a specific location in coordination with the electric utility. Large loads that interconnect in locations that do not have excess capacity can exacerbate rate impacts by straining already limited resources. Data centers' need for a continuous electricity supply poses unique challenges to creating tariffs that encourage large load flexibility. To the extent that data centers locate in areas without excess capacity, this continuous demand can increase net peak load when electricity costs are highest, a larger mix of the supply is generated from fossil fuels, and where shortages are most likely to occur. Other large loads may be able to more readily adopt demand response technologies to the extent that they do not need a similar continuous supply of electricity from the grid.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Ongoing costs, likely in the high hundreds of thousands of dollars annually (ratepayer funds), for the CPUC to open or expand a proceeding creating a new classification and rate schedule for data centers, evaluate cost allocation, stranded-cost, and cost-shift issues associated with those customers, develop minimum contract requirements between data centers and load-serving entities including contract duration, early termination fees, minimum payment requirements, and onsite-generation reporting, ensure consistency of those requirements across LSEs, and provide associated legal, policy, administrative, and Administrative Law Judge support — among other things.
- To the extent that this bill impacts electricity rates, it could result in costs or savings to the state as an electric utility ratepayer. The State of California is an electricity customer, purchasing roughly one percent of the state's electricity. As such, the state incurs costs when rates increase, and realizes cost savings if rates go down (various funds).

ARGUMENTS IN SUPPORT: According to the author:

> California is recognized globally as a premier hub for the innovation economy, and specifically, with a leading footprint in advanced technologies such as artificial intelligence. With the rapid growth of these technologies, the state must grapple with the associated development of large load data centers. AB 2383 advances affordability for electricity ratepayers by ensuring that data centers pay their fair share and that costs of providing service to these facilities are not borne by other ratepayers. This bill will ensure timely and efficient planning as the state prepares for the emergence of unprecedented demand on the electrical grid, and will be critical in protecting ratepayers and advancing system-wide reliability.

ARGUMENTS IN OPPOSITION: Opponents argue that this bill is unnecessary and could limit the growth of technology infrastructure. In opposition, the California Chamber of Commerce states:

> Unfortunately, the bill's structure provides a rigid statutory framework that could complicate project development, discourage investment in digital infrastructure, and constrain the CPUC's ability to tailor ratepayer protections to actual costs and system conditions. AB 2383 seeks to ensure that the costs of serving new data center loads are not shifted onto other ratepayers. That objective is appropriate, but it is already being addressed through existing utility tariffs, interconnection agreements, and ongoing CPUC proceedings. Rather than letting the CPUC develop a record, the bill dictates terms for transmission and distribution service, generation service, and tariffs offered by community choice aggregators and electric service providers.

SUBJECT: Developmental services: direct support professionals

SOURCE: California Disability Services Association

DIGEST: This bill defines "Direct Support Professional" for purposes of the Lanterman Developmental Disabilities Services Act (Lanterman Act).

Senate Floor Amendments of 8/21/26 strike the requirement for the Department of Developmental Services (DDS) to develop billing guidance necessary to facilitate compensation associated with DSP University training.

ANALYSIS:

Existing law:

1) Establishes the Lanterman Act, which states that California is responsible for providing a range of services and supports sufficiently complete to meet the needs and choices of each person with developmental disabilities, regardless of age or degree of disability, and at each stage of life, and to support their integration into the mainstream life of the community. (Welfare and Institutions Code [WIC] 4500 et seq.)

2) Establishes a system of nonprofit Regional Centers, overseen by DDS, to provide fixed points of contact in the community for all persons with developmental disabilities and their families, to coordinate services and supports best suited to them throughout their lifetime. (WIC § 4620)

3) States legislative intent to phase in funding and policies beginning in the 2021–22 fiscal year to implement developmental services rate reform, which shall include a quality incentive program, create an enhanced person-centered, outcomes-based system, and complete this transformation by July 1, 2025. (WIC §4519.10)

4) Finds and declares that Direct Support Professionals are critical to the provision of services and support to individuals with intellectual and developmental disabilities, and, in recognition of the value of the services provided by Direct Support Professionals, additional training and development will enhance the services they provide and foster a more sustainable workforce. (WIC §4511.5(a))

5) Requires DDS to develop or utilize existing curriculum to implement enhanced Direct Support Professional training that promotes services that are person centered and culturally and linguistically sensitive, and that improve outcomes for individuals with intellectual and developmental disabilities. Provides it is the intent of the Legislature to enhance the quality of services that consumers receive from Direct Support Professionals, including, but not limited to, improving knowledge about general health and safety issues, employing principles of self-determination, and working to improve quality of services and quality of life, including advancing health equity for consumers of regional center services. Requires the enhanced Direct Support Professional training to include, but not be limited to, all of the following elements:

   a) Competency based.

   b) Tiered training and certification.

   c) Continuing education.

   d) Outcome measures, as defined by DDS, with input with stakeholders, as specified. (WIC §4511.5(b))

6) Requires DDS to consult with stakeholders throughout the implementation of enhanced Direct Support Professional training, as specified. (WIC §4511.5(c))

7) Requires DDS, commencing on July 1, 2025, and every other year thereafter, to review and update the rate models per the cost inputs available at the time of the review and post the updated rate models on its internet website no later than January 1 of the following year. Provides that an adjustment to a provider rate shall be contingent upon the appropriation of funds by the Legislature in the annual Budget Act and approval of federal funding. (WIC §4519.11)

8) Defines "substantial disability" as the existence of significant functional limitations in three or more of the following areas of major life activity, as determined by a regional center, and as appropriate to the age of the person:

   a) Self-care.

   b) Receptive and expressive language.

   c) Learning.

   d) Mobility.

   e) Self-direction.

   f) Capacity for independent living.

   g) Economic self-sufficiency. (WIC §4512(l)(1))

9) Defines, for community care facility licensing, "activities of daily living" as the following six activities: bathing, dressing, toileting, transferring, continence, and eating. (22 California Code of Regulations [CCR] §80001(a)(1))

This bill:

1) Requires DDS, on or before April 1, 2027, to develop the billing guidance necessary to facilitate compensation associated with the enhanced Direct Support Professional training described in (5) above.

2) Defines "Direct Support Professional" as an individual who receives compensation to provide direct support to children or adults with intellectual and developmental disabilities, is employed by a service provider receiving regional center funding, and spends at least 50% of their working time completing direct support tasks, including, but not limited to, all of the following:

   a) Services that enhance independence and community inclusion.

b) Assisting with skill development, including personal and vocational coaching.

c) Providing assistance with activities of daily living.

3) Renames "direct service professional" to "Direct Support Professional" throughout the Lanterman Act.

Background

Purpose of the Bill. According to the author, "Direct Support Professionals (DSPs) are on the front lines, providing direct and essential support to California's community of individuals with intellectual and developmental disabilities (IDDs). This workforce ensures that folks with IDDs maintain their dignity, independence, and access to social opportunities by providing a wide range of supports, including job coaching and employment support, mobility assistance, wound care, and the administration of medication. Unfortunately, California is currently facing a DSP workforce shortage, which severely reduces supports and services for the IDD community. Low wages in exchange for this highly skilled labor are forcing workers to seek employment in other industries to make ends meet.

"AB 2414 addresses this issue by standardizing references to DSPs throughout state law, strengthening workforce recognition, enabling consistent data collection, and supporting more effective policy development. By ensuring DSPs are formally recognized in state law, this bill also increases access to supports and services for individuals with IDDs."

Lanterman Act. In 1969, the Lanterman Act established that individuals with intellectual and developmental disabilities and their families have a right to receive the necessary services and supports required to live independently in the community. The Lanterman Act enumerates the rights of individuals with intellectual and developmental disabilities as well as the rights of their families, the services and supports available to these individuals, and how regional centers and service providers work together to provide these services and supports. The term "developmental disability" is defined as a disability that originates before a person reaches 18 years of age, is expected to continue indefinitely, and is a significant disability for the individual. Such disabilities include, among others: epilepsy, autism spectrum disorder, intellectual disability, and cerebral palsy. There are no income-related eligibility criteria to access developmental services. The Department of Finance estimates that approximately 487,114 individuals will receive developmental services in 2025–26, increasing to 526,848 in 2026–27.

Regional Centers and Provider Vendorization. In addition to establishing the rights of individuals, the Lanterman Act also created California's regional center system, comprised of 21 nonprofit regional centers throughout the state whose primary purpose is to connect individuals with services in the community. Regional centers contract with service providers, or vendors, to provide services to consumers. DDS and regional centers use the term "vendorization" to describe the approval process involved in preparing to provide services to regional center consumers, which typically involves obtaining additional licenses or approvals from other state and local agencies prior to becoming a vendor. Service providers must be vendored by a regional center before they can provide and be reimbursed for services.

Direct Support Professional Workforce. Service providers employ Direct Support Professionals, referred to in statute as direct *service* professionals, to work directly with consumers. Services and supports available to consumers may include independent and supported living, day programs, and employment services, among others. According to the Administration for Community Living:

> [Direct Support Professionals] support people with disabilities in a wide variety of ways, based upon the unique needs of the person receiving support. Many provide assistance with activities of daily living, but their role is much broader than that. [Direct Support Professionals] may also provide job coaching and employment support, independent living skills training, assistance with accessing resources and opportunities in the community, and more. Without [Direct Support Professionals], many people with disabilities would not be able to live independently.

According to the Association of Regional Center Agencies, the number of Direct Support Professionals in California's developmental services system is estimated at around 100,000.

DSP University. DSP University was established through the 2021 Budget Act to improve service quality, promote equity and culturally responsive services, strengthen the Direct Support Professional workforce, and support retention through career pathways. DSP University is a free, voluntary, statewide, competency-based training and certification program for Direct Support Professionals. It provides structured training through three tiers of training content, including foundational understanding of the developmental services system, the individuals they support, and core knowledge and skills to encourage health, safety, and well-being; quality of life outcomes beyond safety and physical well-

being; mandatory reporting training; and advanced specialization in specific areas of practice.

Participation in DSP University is voluntary. To be eligible, a Direct Support Professional must meet all of the following criteria:

- Primarily providing direct support to children and/or adults with intellectual and developmental disabilities.
- Providing support and supervision.
- Support individuals to learn new skills or continue to perform tasks independently.
- Ensuring optimal health and safety and assisting with household upkeep to maintain a clean, safe, and hazard-free environment.
- Assisting individuals with intellectual and developmental disabilities with skills development, guidance, and personal assistance.
- Spending at least 50% of their work hours performing direct support tasks.
- Being funded by a regional center.

This bill defines a Direct Support Professional as an individual who receives compensation to provide direct support to children or adults with intellectual and developmental disabilities, is employed by a service provider receiving regional center funding, and spends at least 50% of their working time completing direct support tasks, as specified.

Comments

This bill defines Direct Support Professional and cleans up inconsistent references in statute. The definition of Direct Support Professional in this bill aligns with eligibility criteria for DSP University, which was established to enhance the quality of services and improve outcomes for individuals with intellectual and developmental disabilities.

Related/Prior Legislation

AB 1575 (Arambula) would change the word "consumer" to "person eligible for regional center services" throughout the Lanterman Act. AB 1575 is pending on the Senate Floor.

AB 2423 (Mathis, Chapter 904, Statutes of 2024) required DDS, commencing July 1, 2025, and every other year thereafter, to review and update the rate models included in the rate study for developmental services providers. AB 2423 required DDS to post the updated rate models on its internet website no later than January 1 of the following year and provided that adjustments to provider rates shall be contingent upon an appropriation.

AB 136 (Committee on Budget, Chapter 76, Statutes of 2021), a budget trailer bill, required DDS to develop and implement a Direct Support Professional training curriculum (DSP University) that promotes person-centered services that are culturally and linguistically sensitive and improves consumer outcomes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown General Fund cost pressures, potentially hundreds of thousands annually, to provide compensation associated with the training for direct support professionals.

- The Department of Developmental Services (DDS) indicates no fiscal impact for state operations since the department already utilizes the term "direct support professional" and is developing billing guidance to support enhanced, training-based compensation using existing funds.

SUBJECT: State Teachers' Retirement System: community colleges: part-time faculty

SOURCE: California Federation of Teachers

DIGEST: This bill requires a community college district to provide temporary faculty employees the option to participate in social security, the CalSTRS defined benefit program, the CalSTRS Cash Balance Benefit program, if offered, or the CalPERS defined benefit program, and requires the CCC Chancellor's Office to work with CalSTRS to develop specified information materials on retirement programs opportunities for the CCC temporary faculty.

ANALYSIS:

Existing law:

1) Requires public employers, under federal law, to provide their employees with either social security coverage or membership in a qualified retirement plan, as specified. (Public Law 101-508, § 11335)

2) Provides, under state law, defined benefit pension plans for public employers that meet the federal requirement of a qualified retirement plan, including, among others, the California Public Employees' Retirement System (CalPERS) defined benefit plan, the California State Teachers Retirement Plan (CalSTRS) defined benefit (DB), and CalSTRS Cash Balance (CB) Benefit Program plan. (Government Code § 20000 et seq.; Education Code § 22000 et seq.; and Education Code § 26001 et seq.)

3) Requires a district to classify specified employees (i.e., those employed to teach for not more than 67 percent of the regular full-time weekly assignment) as a temporary employee. (Education Code § 87482.5(a))

4) Provides CalSTRS' CB plan for, among others, temporary community college district employees excluded from CalSTRS' DB plan, as specified. (Education Code § 26000 et seq.)

5) Requires the district to provide specified information about the CB plan to eligible temporary employees within 10 days of the employee's first day of employment. (Education Code § 26300)

This bill:

1) Requires a community college district to provide a temporary faculty employee the option of membership in CalSTRS' Defined Benefit (DB) Program, its Cash Balance Benefit Program if offered by the district, or social security.

2) Clarifies that the district may also offer an alternative retirement option *in addition* to those required by this bill.

3) Requires CalSTRS, in consultation with CalPERS, to post on its internet website on or before July 1, 2027, links to information regarding the differences between membership and contributions made to the Defined Benefit Program and the Cash Balance Benefit Program and under coverage by the federal Social Security Act; examples covering the amount of time required to vest in benefits offered by the Defined Benefit Program and the Cash Balance Benefit Program and under coverage by the federal Social Security Act; and examples of the impact of having credits provided under coverage by the federal Social Security Act.

4) Requires the district to provide, commencing July 1, 2027, informational materials maintained by CalSTRS, as specified, to a newly hired person classified as temporary faculty.

Background

According to CalSTRS:

"Members and participants of CalSTRS' DB and CB Benefit programs do not contribute to SSA for their CalSTRS-covered employment. Under current law, to retain an exemption from mandatory SSA coverage, a state must offer a retirement plan with commensurate benefits to SSA, known as a FICA-replacement plan. CalSTRS' DB and CB Benefit programs both serve as suitable FICA-replacement plans."

"Generally, an individual contributing to SSA can earn up to four credits a year and must earn minimum of 40 credits to be eligible for an SSA retirement benefit. A person's benefit is calculated based on their highest 35 years of SSA-covered earnings. For those with less than 35 years of earnings, SSA fills the remaining years with zeros, which lowers the average benefit. This means that working a career with some covered and some non-covered employment could dilute an individual's average earnings, resulting in a lower SSA benefit. The Social Security Administration estimates SSA benefits replace about 40% of annual pre-retirement earnings for career SSA contributors. By comparison, a career educator in CalSTRS' DB Program receives an average DB benefit replacing between 50% and 60% of salary. Still, an individual whose primary career was in non-SSA-covered employment might choose to contribute to SSA on a part-time basis to earn sufficient credits to qualify for a modest SSA benefit."

"Prior to 2025, CalSTRS members seeking to claim an SSA benefit were subject to two provisions that could negatively impact their benefit—the Windfall Elimination Provision (WEP) and Government Pension Offset (GPO). The WEP reduced SSA benefits for individuals who also received a pension for non-SSA covered work via a modified formula for calculating an individual's own SSA benefit. The GPO similarly reduced spousal and survivor SSA benefits payable to those receiving a government pension, such as through CalSTRS. On January 5, 2025, President Biden signed the Social Security Fairness Act, which repealed these two provisions."

Need for this bill? According to the author, part-time community college employees sometime come to the education field after careers in other industries where they earned retirement credits in Social Security. They may be unaware of the potential personal implications of selecting the most common retirement options in the public education field: CalSTRS' Defined Benefit or Cash Balance plans or an alternative option, instead of Social Security. Those plans are excellent for employees who start their careers early and stay continuously in the education

field. They may not provide much benefit for people who come later in their careers and may prevent those people from earning the 40 credits necessary to qualify for Social Security, since positions covered by those plans are typically excluded from Social Security. Since coverage under those plans means neither the employer nor the employee pay into Social Security, it may be tempting for the employee to elect those plans instead of Social Security and for the employer not to promote Social Security as an option. Thus, the employee who is unaware of the complicated interaction of these different retirement options may end up with very little retirement benefit and not enough credits to qualify for Social Security.

Related/Prior Legislation

H.R. 82 (Graves-LA, 2025) repealed the federal Windfall Elimination Provision and Governmental Pension Offset provisions for Social Security benefit recipients.

AB 3221 (Gallegos, Chapter 383, Statutes of 1996) among other changes combining existing
retirement election provisions, added employer notification requirements to Education Code
section 22509.

AB 1298 (Ducheny, Chapter 592, Statutes of 1995) established the CalSTRS Cash Balance Plan, including the requirement for employers to inform employees of their right to elect membership in an alternative plan.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations committee:

- CCCCO would incur minor and absorbable costs to develop the required informational materials.
- The bill would result in minor and absorbable costs to CalSTRS and CalPERS.

- This bill could increase state pension contributions to the extent that additional part-time community college employees enroll in a state retirement system as a result of the bill. The annual fiscal impact is unknown, but could exceed $50,000 annually (General Fund).

SUPPORT: (Verified 8/12/26)

California Federation of Teachers (source)
California Community College Independents
California Federation of Labor Unions
California School Employees Association
Faculty Association of California Community Colleges
Service Employees International Union, California

OPPOSITION: (Verified 8/12/26)

None received

ARGUMENTS IN SUPPORT: According to the California Federation of Teachers:

"New part-time faculty may not be aware of the long-term requirements, benefits, and drawbacks of the retirement benefits they can choose between. In many instances, these workers have accumulated decades of service credit in social security, and may not work as a part-time faculty member long enough so that starting over in a new pension system makes financial sense."

"AB 2417 brings clarity, ensuring part-timers both have the option of Social Security and a basic understanding of what options they have for retirement planning. The bill accomplished the latter by asking the community college chancellor's office to work with CalSTRS to develop informational materials that cover the financial retirement options available to part-time college faculty. This way, newly employed educators will have the most relevant information at hand so they can make the best-informed decision for their own retirement security."

SUBJECT: Housing development: density bonus

SOURCE: Author

DIGEST: This bill makes various changes to density bonus law (DBL).

Senate Floor Amendments of 8/20/26 address chaptering conflicts with AB 2480 (Ávila Farías) and SB 1383 (Arreguín).

ANALYSIS:

Existing law:

1) Requires cities and counties to grant a density bonus when an applicant for a housing development — defined as "five or more units" including mixed-use developments — seeks and agrees to construct a project that will contain at least one of the following:

   a) 10% of the total units of a housing development for lower-income households;

b) 5% of the total units of a housing development for very low-income households;

c) A senior citizen housing development or mobile home park;

d) 10% of the units in a common interest development (CID) for moderate-income households;

e) 10% of the total units for transitional foster youth, veterans, or persons experiencing homelessness;

f) 20% of the total units for lower-income students in a student housing development; or

g) 100% of the units of a housing development for lower-income households, except that 20% of units may be for moderate-income households.

2) Requires a city or county to allow an increase in density on a sliding scale from 20% to 80%, depending on the percentage of units affordable to low- and very low-income households, over the otherwise maximum allowable residential density under the applicable zoning ordinance and land use element of the general plan. Requires the increase in density, on a sliding scale, for moderate-income for-sale developments from 5% to 50% over the otherwise allowable residential density.

3) Requires a local government to grant an additional density bonus on top of the bonus in 2) if the applicant agrees to include additional rental or for-sale units affordable to very low-income households or moderate-income households.

4) Provides that, upon the developer's request, the local government may not require parking standards greater than the parking ratios specified in DBL.

5) Requires applicants to receive concessions and incentives depending on the percentage of affordable housing included in the proposed development. "Concessions and incentives" means the following:

a) A reduction in site development standards, or a modification of zoning code requirements, or architectural design requirements, that exceed the minimum building standards, including, but not limited to, a reduction in setback and square footage requirements and in the ratio of vehicular parking spaces that would otherwise be required, resulting in identifiable and actual cost reductions, to provide for affordable housing costs, as specified;

b) Approval of mixed-use zoning in conjunction with the housing project if commercial, office, industrial, or other land uses will reduce the cost of the housing development and if the commercial, office, industrial, or other land uses are compatible with the housing project and the existing or planned development in the area where the proposed housing project will be located; and,

c) Other regulatory incentives or concessions proposed by the developer or the city, county, or city and county that result in identifiable and actual cost reductions to provide for affordable housing costs, as specified.

6) Provides that the granting of a density bonus, incentive, or concession shall not be interpreted in and of itself, to require a general plan amendment, local coastal plan amendment, zoning change, or other discretionary approval.

7) Establishes procedures for calculating the maximum allowable residential density, or base density, of the project, for which the bonus is to be calculated based on.

8) Provides that, in no case, may a local government apply any development standard that will have the effect of physically precluding the construction of a development at the densities or with the concessions or incentives permitted by DBL.

This bill:

1) Requires a city or county to comply with DBL if the jurisdiction determines an applicant meets at least one of the affordability criteria that would make a housing development project (project) eligible for a density bonus under DBL as opposed to requiring compliance if the applicant *seeks* a density bonus.

2) Requires a local government, after it is required to notify an applicant for a density bonus whether their application is deemed complete, to provide the applicant with a determination as to whether the project is eligible for a density bonus.

3) Grants two additional concessions and incentives to projects that include for-sale units.

4) Prohibits the granting of a waiver or reduction of development standards, concession, or incentives to be discretionary actions, or from requiring a general plan amendment, local coastal plan amendment, zoning change, study, or other

discretionary approval or environmental review for purposes of the California Environmental Quality Act (CEQA).

5) Prohibits the granting of a density bonus to be discretionary or to require environmental review for purposes of CEQA, in addition to existing prohibitions to require a general plan amendment, local coastal plan amendment, zoning change, or other discretionary approval.

6) Provides that if an applicant provides a base density study, the applicant may elect to receive a density bonus in the form of a percentage increase in maximum floor area ratio (FAR). If an applicant elects to use density bonus to increase FAR, the applicant may not use a waiver, concession, or incentive to further modify FAR.

7) Permits the density bonus, incentives or concessions, and waivers or reductions of development standards, to be on sites that are the subject of the same housing development. The density bonus shall be permitted anywhere in the geographic are of the same housing development, including areas outside of the areas where the units for the lower-income households are located.

8) Provides that more deeply affordable units may be substituted for less deeply affordable units to satisfy the moderate-income unit percentage requirements for additional benefits provided in DBL.

9) Makes other technical and conforming changes.

Background

According to an April 2026 report by Circulate Planning & Policy, a San Diego-based transportation and land-use policy nonprofit, DBL is one of California's most successful housing streamlining laws in recent years.[1] Circulate Planning & Policy's report notes:

"Since the adoption of Assembly Bill 2345, [Density] Bonus Law has become the most widely used streamlining law tracked by the California Department of Housing and Community Development. It was not understood at the time of its adoption to be a transformative law. Nevertheless, after its adoption [Density] Bonus Law has been used to approve:

[1] Circulate Planning & Policy, "Win-Win Bonus: How California's Bonus Law quietly transformed housing approvals

- More than 140,000 homes overall;
- More than 69,000 deed-restricted affordable homes;
- In 2024, 47 percent of all homes approved in multifamily projects;
- In 2024, 78 percent of all homes in 100 percent affordable projects; and
- In 2024, ten times more homes than every other tracked streamlining law."

The report notes that in 2024, 30% of multifamily homes approved by cities and counties were eligible for density bonus law but did not use it. The report identifies several recommendations for legislation to further enhance density bonus law, including, among others, that:

- Projects that are eligible for density bonus law should automatically be granted the law's benefits, rather than requiring an opt in;
- The law should more concretely apply to the California Coastal Commission, which regulates development in the Coastal Zone; and
- The law should be renamed to reduce the emphasis on "density."

The author wants to further boost utilization of DBL.

Comments

Purpose of the bill. According to the author, "Over the past five years, Bonus Law has entitled more than 140,000 homes across the state, making it the most utilized and successful housing streamlining program in California law according to an April 2026 report by Circulate Planning & Policy. In 2024, nearly half of new California townhouses or apartments were in projects that relied on the density bonus. AB 2433, the Affordable Homeownership Bonus Law, builds on that success by making homeownership more attainable for the people who make our communities work. Specifically, the bill modernizes incentives for builders who commit to affordable housing that's for-sale, holds cities accountable to clear timelines, and removes unnecessary barriers that have slowed or blocked good projects for years. When a homebuilder is willing to do the right thing and build homes working families can afford, state law should not stand in the way. The bill re-affirms existing environmental safeguards that the Legislature adopted in AB 130 (2025) and does not interfere with the Coastal Act. Please join me in making the California dream a reality for more working families. Support the Affordable Homeownership Bonus Law."

Uncle. Legislators have amended density bonus law 23 times in the past decade and authored scores more bills on local land use planning and permitting during that time. Each change requires cities and counties statewide to review and modify their procedures to ensure they are compliant with the law, directing their efforts away from acting on housing project applications. AB 2433 layers on significant new changes to the procedures for DBL that will require local governments to modify procedures for reviewing any development applications. AB 2433 requires this change to increase uptake of density bonus law by developers. But by requiring permitting staff to adjust to new procedures, AB 2433 may, at least in the short term, slow down permitting of density bonus projects. Furthermore, it is unclear whether the application process is a significant obstacle to the use of DBL. For example, Circulate San Diego's report states, "It is notable that there is a declining share of eligible projects that are forgoing the benefits available to them under [Density] Bonus Law. This may indicate that the use of the program is growing not just because of changes to policy, but from growing familiarity with how it can be used. More homebuilders are choosing to use the policy, just as more jurisdictions may be understanding and accepting their obligations under it." Accordingly, the share of projects using DBL may continue to increase absent this measure. AB 2433's changes, while well intended, may impose costs or other friction in the development process that work counter to this bill's goals.

Other duties as assigned. DBL currently requires a developer to apply for the density bonus and request waivers, concessions, and incentives. AB 2433 flips this requirement to require the city or county, upon receipt of an application that meets the requirements of DBL, to tell the developer the density bonus they are eligible for. AB 2433 puts local planning officials in the position of telling developers the extent to which they may undermine the standards adopted by their city council or board of supervisors. Is this an appropriate role for local government employees?

SUBJECT: Inmates: visitation

SOURCE: Essie Justice Group

DIGEST: This bill 1) requires California Department of Corrections and Rehabilitation (CDCR) facilities to provide an incarcerated person with contact visits unless the person is housed in restricted housing; and 2) prohibits CDCR from denying visiting privileges for a disciplinary matter or rule violation unrelated to visitation; and establishes limitations on a CDCR facility's ability to search visitors without their voluntary, informed, and written consent.

Senate Floor Amendments of 8/20/26:

- Alter the definition of a "credible security threat";
- Require CDCR facilities to "establish" at least three days of visitation per week rather than "be open" for three days of visitation, and to provide notice whenever a facility will not be open for visitation;

- Delete the provision that prohibited a CDCR facility from denying or interfering with visiting privileges for a disciplinary matter or rule violation unrelated to visitation;
- Add a provision that provides specified rule violations for which visiting privileges may be limited, provided such limitations are reasonable under the circumstances;
- Define "correctable issue" to mean "a circumstance that can reasonably be remedied by the visitor on the day of the visit without compromising facility safety or security," including specified examples;
- Clarify that when there is a correctable issue, staff must offer a noncontact visit, if space is available, when appropriate;
- Alter a provision of the bill such that a visit may not be denied if a person has traveled more than 170 miles to attend the visit *and* has not visited within 30 days, rather than if a person has traveled more than 100 miles *or* has not visited within 30 days;
- Clarify that if a person refuses a voluntary search, the facility may—rather than must—offer a noncontact visit on the same day if space is available, or may deny the visit;
- Delete the requirement that CDCR facilities conduct all searches in the least intrusive manner reasonably available and limit searches to what is strictly necessary to address the specific security concern;
- Insert a requirement that CDCR facilities must conduct all searches of visitors in a manner and to an extent that is reasonable under the totality of the identified circumstances and the legitimate safety and security concerns involved. Further, staff must limit the scope, duration, and intrusiveness of the search to that which is reasonably capable of addressing the identified concern;
- Clarify that the bill's rules governing unclothed body searches do not apply if the facility has a court-issued warrant or has placed the visitor under arrest;
- Clarify that the facility may not conduct physical body cavity searches without a court-issued warrant for the search, while such warrants are not necessary for strip searches or any other searches involving physical intrusion;
- Delete the provision that states a facility may not require visitors who use wheelchairs or assistive devices to transfer to a facility wheelchair; and
- Add a provision that states that visitors who use wheelchairs or assistive devices may transfer to a facility wheelchair while the device is inspected, but if transfer is not feasible, and the visitor provides a doctor's note, the facility may permit visitors to remain in their own wheelchair, or use the visitor's assistive device, while the wheelchair or device is inspected using the least intrusive means available.

ANALYSIS:

Existing law:

1) Provides that any amendments to existing regulations and any future regulations adopted by CDCR that may impact visitation of incarcerated persons shall do all of the following:
   a) Recognize and consider the value of visiting as a means to improve the safety of prisons for both staff and incarcerated persons;
   b) Recognize and consider the important role of incarcerated person visitation in establishing and maintaining a meaningful connection with family and community;
   c) Recognize and consider the important role of incarcerated person visitation in preparing an incarcerated person for successful release and rehabilitation. (Penal (Pen.) Code, § 6400, subds. (a)-(c).)

2) Requires CDCR to develop policies related to the department's contraband interdiction efforts for individuals entering CDCR detention facilities, including among others:
   a) Application to all individuals, including visitors;
   b) Use of methods to ensure that profiling is not practiced during random searches or searches of all individuals entering the prison at that time;
   c) Establishment of unpredictable, random search efforts and methods;
   d) All visitors attempting to enter a CDCR detention facility shall be informed that they may refuse to be searched by a passive alert dog; and
   e) All visitors attempting to enter a CDCR detention facility, who have a positive alert for contraband by an electronic drug detection device, a passive alert dog, or other technology, shall be informed of further potential search or visitation options. (Pen. Code, § 6404, subds. (a)-(e).)

3) Requires CDCR, for an in-person visit, to allow a visitor with an infant or toddler to bring items related to the care of the child. (Pen. Code, § 6405, subd. (b).)

4) Defines "strip search," "physical body cavity search," and "visual body cavity search" as follows:
   a) "Body cavity" means the stomach or rectal cavity of a person, and the vagina of a female person;
   b) "Physical body cavity search" means physical intrusion into a body cavity for the purpose of discovering any object concealed in the body cavity;

c) "Strip search" means a search which requires a person to remove or arrange some or all of his or her clothing so as to permit a visual inspection of the underclothing, breasts, buttocks, or genitalia of such person; and
d) "Visual body cavity search" means visual inspection of a body cavity. (Pen. Code, § 4030, subd. (c).)

This bill:

1) Requires each CDCR facility to remain open for visitation at least three days per week.

2) Prohibits a facility from denying, revoking, suspending, limiting, or interfering with visiting privileges for a disciplinary matter or rule violation unrelated to visitation.

3) Prohibits a facility from immediately denying visitors entry based on correctable issues, including, but not limited to, dress code violations, excess number of accompanying minors, or missing documentation. Requires that for correctable issues, staff shall do all of the following: provide clear and specific guidance on how to remedy the issue; allow the visitor a reasonable opportunity to correct the issue and return to visiting up to one hour before the end of the visiting period; permit the visit to proceed once the issue is resolved; and offer reasonable alternatives, including a noncontact visit, if space is available, when correction is not possible that day.

4) Requires the facility, if a visit is denied on the day of visiting for a non-correctable issue, to provide written documentation to the visitor on the same day stating: the specific reason for denial; the length of the denial and explaining how to appeal.

5) Provides that a visit may not be denied if a person has traveled more than 100 miles to attend a visit or has not visited within 30 days, unless there has been a finding of a credible and documented security threat.

6) Authorizes a facility to subject any person coming onto the property to routine screening or a voluntary search to ensure facility security and prevent the introduction or removal of contraband.

7) Prohibits a facility from searching visitors without their voluntary, informed, and written consent unless facility officials possess a court-issued warrant or the individual is lawfully detained pursuant to other law. Prohibits the facility from

conducting strip searches, body cavity searches, and any search involving physical intrusion without a court-issued warrant for the search.

8) Requires a facility to give visitors information regarding their right to refuse a voluntary search before providing their written consent to the search. Prohibits a facility from forcibly searching any visitor who does not consent to a search. States that if a person refuses a voluntary search, as specified, the facility may only deny contact visiting for that day. States that the facility may offer a noncontact visit on the same day, if space is available, unless there is an immediate and credible security threat.

9) Prohibits a facility from punishing refusal to consent to a search with suspension, termination, or future restriction of visitation privileges, nor shall the refusal to consent to a search be recorded as misconduct in any permanent record.

10) Requires a facility, for any visitor who is denied visitation or has visitation restricted due to failing a search or refusing to consent to a search, at the time of that denial, to issue a written notice detailing what occurred, the date, time, who was present, and the underlying rationale given to the visitor for the denial or restriction.

11) Requires a facility to conduct all searches in the least intrusive manner reasonably available and to limit searches to what is strictly necessary to address the specific security concern.

12) Provides that clothed body searches conducted by the facility shall consist of a visual inspection and use of a hand-held wand, and the facility shall prohibit physical contact by staff.

13) Requires a facility to conduct unclothed body searches only after providing notice that the search is voluntary, obtaining the visitor's written consent, and with reasonable suspicion that contraband is concealed on the body and no less intrusive means are available. Requires the facility to require written supervisory approval for unclothed searches documenting the specific facts supporting reasonable suspicion.

14) Prohibits CDCR from conducting strip searches, visual body cavity searches, and physical body cavity searches of visitors who are under 18 years of age, unless CDCR has probable cause and obtains a warrant to search. Requires

CDCR, if there is probable cause that a minor visitor is attempting to introduce contraband, unauthorized substances, or other unauthorized items into the institution, to notify the visitor and their parent or guardian in writing, and requires CDCR to receive written consent from the visitor and their parent or guardian prior to conducting the search. Authorizes CDCR, if probable cause exists but the visitor and their parent or guardian do not consent to the visitor being searched, to offer a noncontact visit, if feasible, or to deny the visit.

15) States that the facility shall permit all visitors who cannot clear a metal detector due to a medically implanted or prosthetic device to present written verification from a licensed health care provider describing the device and its location.

16) Prohibits the facility from requiring renewal of that verification for permanent devices unless there is a material change in the device.

17) Prohibits the facility from requiring visitors who use wheelchairs or assistive devices to transfer to a facility wheelchair and requires the facility to permit visitors to remain in their own wheelchair while the device is inspected using the least intrusive means available.

18) Prohibits the facility from punishing failure to present documentation under this provision with permanent suspension of visitation but authorizes the facility to require alternative screening measures or a noncontact visit for that day.

19) Requires the facility to require that all searches be conducted professionally, respectfully, and without harassment, intimidation, or retaliatory intent.

20) Requires the facility to inform visitors of their right to file a complaint and prohibit retaliation for filing complaints.

21) Defines “credible security threat” to mean specific, articulable, and documented facts that establish a reasonable belief that a visitor or incarcerated person presents an immediate and identifiable risk of introducing contraband, facilitating escape, or causing physical harm within the facility. A credible security threat shall be based on objective information, including reliable intelligence, direct observation, or verified evidence, and shall not be based solely on generalized safety concerns, institutional convenience, anonymous or uncorroborated allegations, personal characteristics, protected traits, prior criminal history unrelated to institutional or visitor safety or security, refusal to consent to a voluntary search, or the mere existence of a past rule violation

unless the circumstances of that violation create a safety or security risk to other visitors or incarcerated individuals or institutional security.

22) Defines "routine screening" to mean a standardized, minimally intrusive inspection process applied uniformly to all visitors as a condition of entry, for the limited purpose of detecting weapons or contraband. Routine screening shall consist only of passage through a walk-through metal detector or hand-held metal detection wand, visual inspection of personal property, or screening by electronic detection equipment applied in the same manner to all visitors.

Background

This bill substantially overhauls the rules governing prison visitation. This bill requires each CDCR facility to remain open for visitation at least three days per week. Further, a facility shall not deny, revoke, suspend, limit, or interfere with visiting privileges for a disciplinary matter or rule violation unrelated to visitation.

The bill prohibits a facility from immediately denying visitors entry based on a correctable issue, including, but not limited to, dress code violations, excess number of accompanying minors, or missing documentation. For correctable issues, CDCR staff must provide clear and specific guidance on how to remedy the issue; allow the visitor a reasonable opportunity to correct the issue and return to visiting up to one hour before the end of the visiting period; or offer a noncontact visit, if space is available, when appropriate. This bill requires the facility, if a visit is denied on the day of visiting for a non-correctable issue, to provide written documentation to the visitor on the same day stating the specific reason for denial; and the length of the denial and explaining how to appeal. A visit may not be denied if a person has traveled more than 100 miles to attend a visit or has not visited within 30 days, unless there has been a finding of a credible and documented security threat.

The bill further provides that a facility may subject any person coming onto the property to routine screening or a voluntary search to ensure facility security and prevent the introduction or removal of contraband. However, the bill prohibits a facility from searching visitors without their voluntary, informed, and written consent unless facility officials possess a court-issued warrant or the individual is lawfully detained pursuant to other law. Under the bill, a facility must conduct all searches in the least intrusive manner reasonably available and limit searches to what is strictly necessary to address the specific security concern.

The bill requires a facility to give visitors information regarding their right to refuse a voluntary search before providing their written consent to the search. The bill prohibits a facility from forcibly searching any visitor who does not consent to a search. If a person refuses a voluntary search, as specified, the facility may only deny contact visiting for that day. The facility may offer a noncontact visit on the same day, if space is available, unless there is an immediate and credible security threat.

The bill states that clothed body searches conducted by the facility must consist of a visual inspection and use of a hand-held wand, and the facility shall prohibit physical contact by staff. The bill further prohibits the facility from conducting strip searches, body cavity searches, and any search involving physical intrusion without a court-issued warrant for the search. The bill also prohibits strip searches, visual body cavity searches, and physical body cavity searches of visitors who are under 18 years of age unless the department has probable cause and obtains a warrant to search. It adds that, if there is probable cause that the minor visitor is attempting to introduce contraband, unauthorized substances, or other unauthorized items into the institution, CDCR must notify the visitor and their parent or guardian in writing, and the department shall receive written consent from the visitor and their parent or guardian prior to conducting the search.

The bill states that the facility must permit all visitors who cannot clear a metal detector due to a medically implanted or prosthetic device to present written verification from a licensed health care provider describing the device and its location. The facility may not require renewal of that verification for permanent devices unless there is a material change in the device. The facility may not require visitors who use wheelchairs or assistive devices to transfer to a facility wheelchair and the facility must permit visitors to remain in their own wheelchair while the device is inspected using the least intrusive means available. The facility is prohibited from punishing failure to present documentation under this provision with permanent suspension of visitation, but the facility may require alternative screening measures or a noncontact visit for that day.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

The Senate Appropriations Committee writes:

Costs, possibly in the millions of dollars annually, for staffing for expanded visiting hours, processing visitation re-applications, and managing the revised search process, as required by this bill. The California Department of Corrections and Rehabilitation (CDCR) also anticipates possible one-time

costs for infrastructure improvements for some family visiting facilities. Additional significant, ongoing costs to CDCR to handle legal challenges arising from denial of visitation (General Fund).

SUBJECT: Impounded vehicles

SOURCE: California Association of Licensed Repossessors

DIGEST: This bill requires an impound agency to accept a debit card as a form of payment and prohibits them from requiring the presentation of any documents other than those listed in statute to release a vehicle.

Senate Floor Amendments of 8/21/26 (1) incorporate amendments to Section 14602.6 of the Vehicle Code that are proposed by AB 1830 (Petrie-Norris, 2026) making minor language changes to the existing statute; (2) incorporate the updated language regarding debit cards from AB 2437 into the new version of section 14602.6 proposed by AB 1830, to take effect in 2031; and (3) make some technical changes to conform language throughout the rest of the bill.

ANALYSIS:

Existing law:

1) Establishes that a peace officer may seize a vehicle when they determine that:

   a) The driver is driving without a license, on a suspended or revoked license, or driving without an Ignition Interlock Device (IID), when such a device is required (Vehicle Code [VEH]§14602.6);

   b) The driver attempts to flee from a peace officer, engages in reckless driving, as defined, or participates in an exhibition of speed (VEH §14602.7);

   c) The driver is under the influence of alcohol (VEH §14602.8);

   d) The vehicle is operating as an unlicensed vehicle for hire (VEH §21100.4);

   e) The vehicle is illegally parked or abandoned, as defined (VEH §22651);

   f) The vehicle is illegally parked or abandoned on private property (VEH §22658);

   g) The vehicle is used during the commission of illegal dumping or prostitution, as defined (VEH §22659.5); or,

   h) The vehicle is being used as part of a nonexempt unlicensed operation to repossess collateral. (VEH §23118)

2) Requires, depending on the reason for which the vehicle was impounded, the legal owner or legal owner's agent to provide the following documents to an impound agency to retrieve the vehicle: (VEH §§14602.6, 14602.7, 14602.7, 21100.4, 22658, 22269.5, 23118)

   a) The assignment or repossession order;

   b) A government issued photo identification card;

   c) A release from the responsible government agency, if required;

   d) If the person is acting as an agent of the legal owner, a copy of the repossession agency license, or demonstrated proof that they are exempt for

licensure; and,

e) One of the following:

i) A certificate of repossession for the vehicle,

ii) A security agreement for the vehicle, or,

iii) A paper or electronic title for the vehicle.

3) Requires an impounding agency to accept a valid credit card or cash as a form of payment. (VEH §§14602.6, 14602.7, 14602.7, 21100.4, 22651.1, 22658, 22269.5, 23118)

This bill:

1) Prohibits an impounding agency from requiring any documents other than those already laid out in statute before releasing a vehicle, when the vehicle is seized under the authorities specified above.

2) Requires an impounding agency to accept a debit card as a valid form of payment.

3) Makes conforming changes to the code.

Comments

1) *Purpose of the bill.* According to the author, "Currently, consumers and repossessors face delays in retrieving impounded vehicles due to administrative burdens and inconsistent release procedures in code. AB 2437 seeks to lift those burdens and prevent delays by ensuring that debit cards can be utilized when retrieving a impounded vehicle from the tow yard, that only the documentation required by statute is needed for a repossessor to retrieve a vehicle from a tow yard, and streamlining vehicle codes to utilize one, consistent, release procedure that requires expired registration be current before a consumer can retrieve their vehicle from a repossession agency."

2) *Vehicle seizure and impoundment.* California law outlines various situations in which a peace officer may seize a private vehicle. Many of these situations are related to parking violations, abandoned vehicles, or vehicles that are not safe to

operate on the street. Other situations pertain to a driver committing a crime directly, such as driving under the influence of alcohol, or driving without a license, or when the vehicle is being used in the commission of a crime, such as prostitution or illegal dumping. Finally, the legal owner of a vehicle, such as a bank or vehicle dealership, may repossess a vehicle when the driver has defaulted on the terms of their lease or financing agreement.

Regardless of the reason a vehicle was seized, it is typically brought to an impound agency. These are private companies that generally partner with law enforcement to retrieve and store seized vehicles. Under California law, these agencies are required to abide by certain rules and regulations regarding their duty to notify vehicle owners of impoundments, and when they must return vehicles to their legal owners. In all instances impound agencies are generally required to obtain proof that the owner has paid off any fines or fees. Furthermore, impound agencies are authorized to charge additional fees to reimburse their costs associated with the vehicle tow, storage, and other expenses.

The law also provides certain requirements for cases where the individual retrieving the vehicle is not the regular operator, but the vehicle's legal owner. Most often this occurs when the vehicle is being leased or financed and is legally owned by a bank or dealership. In these situations, the individual must present an assignment or repossession order for the vehicle; a government issued photo ID; a release from the responsible government agency, if required; and either a certification of repossession, a security agreement, or vehicle title. In some cases, legal owners such as banks will hire licensed repossessors to retrieve the vehicles. These are private, third-party companies that contract with banks and other entities to retrieve collateral. In the case of retrieving an impounded vehicle, a licensed repossessor must also present a copy of their repossession agency license, or proof that they are exempt for licensure.

3) *Difficulties retrieving vehicles.* Both private individuals and licensed repossessors have reported difficulties in retrieving vehicles they are entitled to from impound agencies. On the individual side, this most often takes the form of impound agencies not accepting particular forms of payment. For instance, while current law requires an impound agency to accept cash or credit cards as valid forms of payment, it does not require them to accept debit cards. However, the use of debit cards is incredibly widespread, with one report finding that 85% of Americans have at least one debit card. Thus, an impound agency that does not accept debit cards may defacto make an individual unable

to pay, denying them access to their vehicle and causing them to rack up additional fees.

On the licensed repossessor side, some repossessors have reported instances of impound agencies requiring additional documents beyond those laid out in state law in order to release a vehicle. Such documents can include a copy of the original lease or financing contract, a hold harmless agreement, or certain Department of Motor Vehicle (DMV) forms. According to the repossessors, this delays their ability to collect vehicles and racks up additional fees for the legal owners.

AB 2437 seeks to address these problems by requiring impound agencies to accept debit cards as a valid form of payment, and by preventing impound agencies from requiring any additional documentation other than that listed in statute before releasing a vehicle. Writing as a sponsor of the bill, the California Association of Licensed Repossessors states, "AB 2437 would clarify that debit cards must also be accepted. The bill would also ensure that no paperwork outside of the required documents be necessary for retrieving a vehicle from impound. This will ensure consumers can save money when their vehicle is repossessed from a tow yard while the reposessor searches for additional paperwork that is not required in statute."

4) *Previous attempts at similar policy.* AB 2656 (Chen, 2018) was substantially similar to this bill in that it required an impounding agency to accept a debit card for a large variety of tows and if the debit card machine was not working would have required the storage facility to call its merchant processing center to process the transaction. Furthermore, AB 2656 expanded the situations in which licensed repossessors could retrieve vehicles from impound agencies. This bill was vetoed by Governor Brown on the basis that this expansion of licensed repossessors' abilities to retrieve vehicles was unnecessary. AB 2437 does not contain this provision.

SUBJECT: Common Interest Developments: governing documents: assessments

SOURCE: Authors

DIGEST: This bill 1) prohibits a homeowner's association's (HOA) governing documents from imposing restrictions on a member's use of public streets, including parking; 2) requires an HOA to notify each member, as specified, of a change of person or entity authorized to receive payment of assessments within 60 days of the change; 3) requires an HOA to send a second notice, as specified, to any member who has missed two consecutive assessment payments, unless other conditions are met; and, 4) imposes civil liabilities, as specified, for violations of pre-lien notice requirements by the HOA board.

Senate floor amendments of 8/21/26 further clarify the responsibilities of an HOA regarding a change in receipt authorized to receive assessment payments, including notice requirements and maintenance of records.

ANALYSIS:

Existing law, pursuant to the Davis-Stirling Act (Act):

1) Provides that regular and special assessments in an HOA, along with late charges, interest, reasonable collection costs, and attorney's fees, constitute a debt of the homeowner in an HOA at the time they are levied.

2) Authorizes HOAs to impose late charges and interest on delinquent assessments, subject to specified limits, including interest not to exceed 12% annually unless a lower rate is specified in the declaration.

3) Requires HOAs to apply homeowner debt payments first to delinquent assessments owed to the HOA, and only after those are paid in full, to fees, collection costs, attorney's fees, late charges, or interest.

4) Requires HOAs to provide a receipt to the homeowner upon request for payments made, and to include a mailing address for overnight payment of assessments in the HOA's annual policy statement.

5) Requires HOAs to follow specified notice procedures prior to recording a lien for delinquent assessments and to recommence the notice process, at the HOA's expense, if those procedures are not followed.

This bill:

1) Prohibits HOA governing documents from imposing restrictions on a member's use of public roads, including parking, except for restrictions to enforce public health and safety standards and requirements imposed by local authorities.

2) Requires an HOA, when the person or entity authorized to receive payment of assessments on behalf of the HOA changes, to notify members through individual notice within 60 days, by either:

   a) Electronic delivery for any member who has opted into that method of delivery for receiving general notices from the HOA; or,

   b) First-class mail with a certificate of mail for any member who has not opted into the electronic delivery described in a).

3) Specifies that, if a member fails to pay two consecutive assessment payments after the HOA has provided the notice described in 2), the HOA must send a second notice by certified mail with return receipt.

4) Specifies that it is the responsibility of the HOA to maintain records confirming individual notices were distributed pursuant to 2) and 3), and that, if a member requests proof of delivery, the HOA must provide it at no charge to the member. The records shall be maintained by the HOA for five years.

5) Specifies that, if an HOA fails to comply with 3) and places a lien on a separate interest, and it is the third failure to comply within a five-year period, the board shall be liable to the owner of the separate interest for:

   a) The reconveyance fee and any costs of the owner of the separate interest associated with the HOA's failure to comply; and,

   b) A civil penalty of $1,000.

Background

HOAs. HOAs are the legal governing bodies of common interest developments (CIDs). These developments cover a variety of community arrangements, including apartment complexes, housing cooperatives, condominiums, and planned unit developments. In 1986, California enacted the Davis-Stirling Act, which outlines the requirements for CID and HOA governance, including assessments and other fees, maintenance responsibilities, and elections. There are over 50,000 HOAs throughout California, covering 36.3% of the state's population. In L.A. County alone, there are over 16,500 HOAs.

Davis-Stirling Act. The Act went into effect in 1986 and is the primary state law governing CIDs and HOAs in California. The Act provides the legal framework for the creation and management of HOAs, including rules related to governance, assessments, dispute resolution, maintenance responsibilities, and member rights. The law aims to balance the authority of HOAs with the rights of individual property owners, ensuring that communities are managed efficiently and fairly. Over time, the Act has been amended to address the evolving needs of CIDs and HOAs, including increased transparency, accountability, and consumer protections. Key provisions of the Act include requirements for open meetings, financial disclosures, election procedures, and architectural review processes. The Act also provides mechanisms for resolving disputes, including internal dispute resolution and alternative dispute resolution before certain legal actions can proceed. As the majority of new housing construction in California is part of an HOA, the Act

plays a critical role in shaping the environment and governance of these communities and the tens of millions of residents who reside in them.

Comments

1) *Author's statement.* "Families living in HOAs deserve fairness, transparency, and clear communication from their HOA Board. Yet too often, residents face inconsistent rule enforcement and are left unaware of critical financial actions affecting their property. This bill addresses these issues by prohibiting HOAs from regulating parking on public streets except for public safety, requiring clear and verifiable notice of changes to payment systems, and establishing penalties when HOAs fail to comply with lien notification laws. By increasing accountability and transparency, this measure protects homeowners from unfair practices and ensures they are properly informed about decisions that impact their homes and finances."

2) *Assessing the situation.* In an HOA, the owner(s) of each separate interest are expected to pay regular assessments to the association every year, often on a monthly basis, to cover essential operating expenses and other budgeted expenses, as determined by the board. The HOA is required to communicate who is responsible for collecting those payments—whether that's the association itself, or a designated third-party management company. Under existing law, HOAs are required to provide a mailing address for overnight payment of assessments in the annual policy statement. If the entity, or the address of the entity, responsible for collecting those payments changes, the HOA should be notifying its members. If this notification does not occur, this can expose both the HOA and the member to harm, with an association not receiving funds essential to its operation, and a member becoming delinquent on payments. Delinquency can lead to fines and a lien on an owner's property.

   These concerns bore out in an example described by the author, where an association alleges it provided notice of the assessment recipient changing, but could not prove it. The author then missed their assessment payments, resulting in a lien on their separate interest, along with fines. This bill contains provisions to address those concerns, including more stringent requirements for the delivery of notices. This bill would require individual notice of the assessment recipient changing be sent out to each owner of a separate interest via their preferred delivery method, as specified. If after the individual notice is sent out, the owner of a separate interest misses two consecutive assessment payments, then the HOA shall send out a second individual notice by certified

mail with return receipt. These measures are intended to balance improving transparency and keeping delivery costs incurred by the HOA reasonable.

3) *Consequences for consequential actions.* Under existing law, an HOA is required to recommence the notice process, prior to recording a lien on a separate interest, if the HOA does not follow the requirements of the article. As noted above in Comment 2, however, an owner may not be aware of the lien. As such, this bill seeks to impose civil liabilities on any HOA board that violates pre-lien notice requirements, as specified, three or more times within a five-year period. It would do so by requiring a board to pay any reconveyance fee, owner fees, and a civil fine of $1,000 to any affected separate interest owner. Historically, HOAs have difficulty recruiting members to serve on the board. If a board/board member is now required to pay fines and face civil liabilities, that could worsen such recruitment efforts and affect the ability of an HOA to function. Further, this could potentially lead to complicated legal battles between an HOA board member and an HOA member. What happens if there is a dispute over whether the board member was acting in their official duties and should not be held personally liable; or whether every board member must now pay the fines versus just one, and how those fees might be split? The committee may wish to consider whether there are other ways to ensure greater accountability without the potential for these unintended consequences.

4) *Members' use of public roads.* A minor provision of this bill clarifies that an HOA may not impose restrictions on a member's use of public roads, including parking, except for specified health and safety reasons. This arises out of a situation where the author was told she could not park on a public road, while visitors faced no restrictions for their parking on the same road. This would not change an HOA's ability to regulate the use of roads managed by the association, including parking restrictions on such. Rather, this would ensure that HOAs are not exceeding their authority and regulating roads they do not have jurisdiction over, even if they are neighboring the community.

5) *Double-referral.* This bill was also heard in the Senate Judiciary Committee on June 23, 2026, where it received a vote of 10-0.

Related/Prior Legislation

SB 1238 (Wahab, 2026) — would provide that a person or entity that facilitates specified activities, including reviewing association operating accounts, owes a duty of care that is prudent and provides the highest good faith effort to the association and its members. *This bill is pending on the Assembly Floor.*

SUBJECT: Arts and Music in Schools—Funding Guarantee and Accountability Act: allowable uses: pooled funding: certifications

SOURCE: Author

DIGEST: This bill makes various changes to the Arts and Music in Schools (AMS) Funding Guarantee and Accountability Act (Proposition 28) by authorizing local educational agencies (LEAs) to pool allocated funds across schoolsites, establishing a statutory methodology for demonstrating compliance with the supplement-not-supplant requirement, expanding reporting, certification, and transparency requirements, and revising the definition of arts education programs and allowable expenditures.

Senate Floor Amendments of 8/21/26 clarify that newly available resources are added to an LEA's existing funding calculation only to the extent those resources are spent on arts education programs. The amendments also require the annual governing board- or body-approved Proposition 28 report to be submitted and posted by September 30 in a manner determined by the California Department of Education (CDE) and, beginning in 2027-28, require LEAs to certify that all aspects of Proposition 28 have been properly implemented at each schoolsite.

ANALYSIS:

Existing law:

1) Establishes the AMS Funding Guarantee and Accountability Act (Proposition 28), which provides ongoing funding to supplement arts education programs in K-12 public schools. (Education Code (EC) § 8820)

2) Continuously appropriates an amount equal to 1% of the total state and local revenues received by LEAs in the preceding fiscal year that are included in the Proposition 98 minimum funding guarantee calculation for allocation pursuant to the AMS Act. (EC § 8820)

3) Requires AMS Act funds to be allocated by the CDE to LEAs and subsequently distributed to schoolsites based on a statutory formula. (EC § 8820)

4) Requires the principal or program director of each schoolsite to develop an expenditure plan for AMS Act funds. (EC § 8820)

5) Requires LEAs to annually certify that AMS Act funds are used to supplement, and not supplant, existing funding for arts education programs. (EC § 8820)

6) Requires LEAs with more than 500 pupils to expend at least 80% of AMS Act funds on certificated or classified employees providing arts education instruction, unless waived by CDE. (EC § 8820)

7) Requires annual audits to determine whether AMS Act funds were expended in accordance with statutory requirements. (EC § 8820; EC § 41020)

8) Requires the State Board of Education to adopt content standards in visual and performing arts. (EC § 60605.1)

This bill:

1) Authorizes LEAs to pool Proposition 28 funds across schoolsites, provided the LEA:

   a) Complies with all applicable requirements of the Act;

   b) Ensures expenditures for each schoolsite remain proportional to that school's allocation; and

   c) Complies with expenditure plans adopted for participating schoolsites.

2) Revises annual supplement-not-supplant certifications by requiring LEAs to calculate "existing funds available for arts education programs" and "current-year expenditures for arts education programs" using a specified methodology.

3) Requires LEAs, when calculating existing funds available for arts education programs, to:

   a) Begin with prior-year arts education expenditures;

   b) Exclude Proposition 28 expenditures;

   c) Exclude expenditures from resources that are no longer available in the current year;

   d) Include newly available resources that are spent on arts education programs, excluding Proposition 28 funds; and

   e) Account for specified personnel-related cost savings.

4) Specifies that resources no longer available in the current year may include expired, reduced, discontinued, exhausted, or one-time private contributions, parent fundraising revenues, and federal or state funding sources.

5) Deems an LEA to be in compliance with the supplement-not-supplant requirement if current-year arts education expenditures, excluding Proposition 28 funds, equal or exceed the calculated amount of existing funds available for arts education programs.

6) Expands the definition of an "arts education program" to include curriculum, instructional materials, and professional development.

7) Requires arts education programs funded pursuant to Proposition 28 to be consistent with specified state arts standards, frameworks, and preschool learning foundations, as applicable.

8) Requires the annual governing board- or body-approved Proposition 28 report to be submitted and posted on or before September 30, in a manner determined by CDE.

9) Requires each schoolsite or preschool to post its Proposition 28 expenditure plan and information regarding granted waivers on its internet website, and authorizes an LEA to instead require this information to be posted on the LEA's internet website.

10) Requires CDE to post approved waivers on its internet website.

11) Beginning with the 2027–28 fiscal year, requires an LEA to certify that all aspects of Proposition 28 have been properly implemented at each of its schoolsites.

12) Defines "existing funding" for purposes of the Act as revenue available in the current year.

Comments

Need for the bill. According to the author, "For too long, access to arts education has been inequitable, leaving many students without the benefits of a well-rounded curriculum. Proposition 28 marked a significant step forward by establishing a dedicated funding stream for arts and music education in schools. However, as local educational agencies (LEAs) have begun implementing the measure, key areas of the law have proven unclear.

"Specifically, additional clarity is needed regarding whether smaller LEAs may pool funds and how to comply with the 'supplement, not supplant' requirement. AB 2440 makes commonsense clarifications to Proposition 28 by authorizing LEAs to pool resources and codifying clear rules for maintaining baseline funding levels. These changes build on existing guidance from the California Department of Education and help ensure that the promise of Proposition 28 is implemented consistently and reaches students across the state."

Proposition 28 represented a major new state investment in arts education. Proposition 28, approved by voters in 2022, created an ongoing funding stream dedicated to expanding arts education opportunities in California public schools. The measure directs approximately 1% of annual Proposition 98 funding levels, roughly $1 billion per year, to support arts education programs at schoolsites throughout the state. In addition to creating a substantial new funding source, Proposition 28 included numerous accountability provisions intended to ensure that funds expand access to arts education rather than replace existing local investments.

Early implementation has revealed uncertainty regarding allowable expenditures and compliance requirements. As LEAs have begun implementing Proposition 28, questions have arisen regarding how certain provisions of the initiative should be interpreted and administered. In particular, uncertainty has existed regarding whether schoolsites may combine or pool allocations to support shared staffing arrangements and how LEAs should demonstrate compliance with the initiative's

supplement-not-supplant requirements. Because Proposition 28 includes significant fiscal penalties for noncompliance, many LEAs have sought additional guidance before committing funds. This bill largely seeks to codify implementation practices, establish clearer compliance standards, and expand certain reporting and transparency requirements in order to provide greater certainty regarding how the initiative's requirements should be applied.

The supplement-not-supplant requirement has become a central implementation challenge. One of the most significant accountability provisions in Proposition 28 requires LEAs to use the funds to supplement, rather than supplant, existing arts education spending. While the initiative established that requirement, it did not specify how LEAs should determine whether they have met it. Questions may arise when prior-year arts programs were supported by one-time grants, private donations, local fundraising efforts, or other funding sources that are no longer available. This bill establishes a methodology for calculating an LEA's baseline arts education spending and specifies which funding sources should be excluded from that calculation. By establishing a statutory framework for compliance, including specifying how LEAs should treat expired grants, fundraising revenues, discontinued funding sources, and certain personnel-related savings, the bill seeks to provide greater consistency and predictability for LEAs administering Proposition 28 funds.

Recent litigation underscores the importance of clear statutory guidance. The proper interpretation of Proposition 28's supplement-not-supplant requirement is currently the subject of ongoing litigation involving Los Angeles Unified School District. Although the courts ultimately will determine the merits of those claims, the dispute illustrates the challenges LEAs face when attempting to interpret broadly worded accountability provisions that lack detailed statutory direction. This bill represents a legislative effort to establish clearer statutory standards for demonstrating compliance with the supplement-not-supplant requirement and may reduce uncertainty for LEAs seeking to expand arts education programs while remaining compliant with Proposition 28.

Pooling authority may improve the practical use of Proposition 28 funds. Many schoolsites receive Proposition 28 allocations that are insufficient on their own to support a full-time arts educator or specialized arts program. At the same time, schools continue to face staffing shortages in a number of instructional areas, including arts education. By expressly authorizing LEAs to pool funds across schoolsites while maintaining existing site allocation and accountability requirements, the bill may provide greater flexibility for LEAs to share personnel and resources among multiple schools. This approach may be particularly

beneficial for smaller schools and districts seeking to maximize the impact of their Proposition 28 allocations.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The California Department of Education (CDE) estimates ongoing General Fund costs of $581,000 and 3.2 positions to implement the bill's requirements.

- The bill's changes to the AMS program would not result in additional costs and could possibly reduce workload for LEAs by revising various compliance requirements for the program.

SUBJECT: Elementary and secondary education: omnibus

SOURCE: Author

DIGEST: This bill, an urgency measure, a K-12 omnibus bill, makes numerous non-controversial revisions to a number of provisions related to education throughout statute.

Senate floor amendments of 8/21/26 delay the transitional kindergarten multilingual learner screening timeline by one year, including field testing and statewide screening, and extend the availability of the existing $10 million appropriation through June 30, 2029. The amendments also allow a pupil to demonstrate proficiency in Spanish for the State Seal of Biliteracy by achieving Level 3 on the high school California Spanish Assessment.

ANALYSIS:

Existing law:

1) Defines "children of military families" as a school-aged child or children, enrolled in kindergarten through 12th grade, in the household of an active duty member. This is the same definition used in current law for purposes of the Interstate Compact on Educational Opportunity for Military Children (Compact). (Education Code (EC) § 49701)

2) States that a pupil complies with the residency requirements for school attendance in a school district, if the pupil is a pupil whose parent is transferred or is pending transfer to a military installation within the state while on active military duty pursuant to an official military order. Requires that a parent provide proof of residence in the school district within ten days after the published arrival date provided on official documentation, and authorizes parents to use any of the following addresses as proof of residence:

   a) A temporary on-base billeting facility.

   b) A purchased or leased home or apartment.

   c) Federal government or public-private venture off-base military housing. (EC § 48204.3)

3) Ratifies the Compact, which has the purpose of removing barriers to educational success imposed on children of military families due to frequent moves and deployment of their parents and which includes, among other provisions:

   a) Requires a receiving state to make reasonable accommodations and modifications to address the needs of incoming students with disabilities, subject to an existing Section 504 or Title II Plan, to provide the student with equal access to education, and states that this does not preclude the school in the receiving state from performing subsequent evaluations to ensure appropriate placement of the student.

   b) Requires, in the event that official education records cannot be released to the parents for the purpose of transfer, the custodian of the records in the sending state to prepare and furnish to the parent a complete set of unofficial educational records containing uniform information as determined by the Interstate Commission on Educational Opportunity for Military Children to the extent feasible. Requires, upon receipt of the unofficial education records by a school in the receiving state, that the school enroll and appropriately

place the student based on the information provided in the unofficial records, pending validation by the official records, as quickly as possible. (EC § 49700, 49700.5, and 49701)

4) Prohibits a school district of residence from prohibiting the transfer of a student who is a child of an active duty military parent to a school district of proposed enrollment if the school district of proposed enrollment approves the application for transfer. (EC § 46600)

5) Requires, notwithstanding any other law, a local educational agency (LEA) to accept full or partial credit for full or partial coursework satisfactorily completed by a pupil who is a child of a military family while attending another public school. (EC § 51225.2)

6) Prohibits an LEA from requiring a pupil who is a child of a military family from being required to retake a course if the student has satisfactorily completed the entire course in another school. (EC § 51225.2)

7) Requires an LEA serving a pupil who is a child of a military family to allow the pupil to remain in their school of origin, regardless of any change of residence of the military family during that school year for the duration of the pupil's status as a child of a military family, and requires for a pupil who is a child of a military family to matriculate with their peers in accordance with the established feeder patterns of school districts. (EC § 48204.6)

8) Requires a candidate for a credential—before admission to any professional preparation program approved by the CTC, or participation in a field experience program as specified—to obtain a certificate of clearance from the CTC to be issued when the CTC has verified the candidate's personal identification and health status. Requires the fee for the certificate of clearance to not exceed half of the regular fee for a credential and for the fee for the certificate of clearance be deducted from the fee for the initial credential applied for by the certificate holder. (EC § 44320)

This bill, an urgency measure:

1) Expands the addresses that a parent on active military duty may use for purposes of establishing residency for their child to attend a school district, and clarifies the types of documentation to be used to provide proof of residence.

2) Requires a candidate—before admission to any professional preparation program approved by the CTC for a multiple subject credential, single subject credential, PK-3 early childhood education specialist instruction credential, or education specialist credential—to provide verification to the professional preparation program that the candidate either a) holds a valid permit or credential previously issued by the CTC or b) has applied for a certificate of clearance from the CTC that would be issued when the CTC has verified the candidate's personal identification and health status.

3) Requires a candidate that does not hold a valid permit or credential previously issued by the CTC to have obtained a certificate of clearance before beginning student teaching, clinic practice, or participation in a field experience program as specified.

4) Requires a professional preparation program approved by the CTC to issue specified credentials to submit, and annually update, candidate profile information to the CTC for each enrolled credential candidate within 30 days of the candidate beginning the program and to indicate to the CTC a candidate's program completion within 30 days of the candidate completing all credential requirements.

5) Requires that the specified candidate profile information include, but not be limited to, the candidate's credential program, type of credential being sought, and preparation pathway, including residency, student teaching, internship, or other preparation pathway, as determined by the CTC.

6) Delay the transitional kindergarten multilingual learner screening timeline by one year, including field testing and statewide screening, and extend the availability of the existing $10 million appropriation through June 30, 2029.

7) Allow a pupil to demonstrate proficiency in Spanish for the State Seal of Biliteracy by achieving Level 3 on the high school California Spanish Assessment.

Comments

Need for the bill. According to the author, "AB 2467 is a committee bill to address minor and technical issues within the Education Code. The current language relates to two key issues. Firstly, the bill addresses challenges in enrolling children of military families in school, strengthening local implementation of Advance Enrollment by making technical changes to existing law, and removing barriers

and clarifying requirements for school districts. It reinforces California's commitment to being a welcoming state for military families and ensures a stable educational environment for their children. Secondly, the bill ensures that candidates seeking a teaching credential obtain a valid background check upon their entry into the program and that the CTC has current information on all candidates seeking a teaching credential to better inform decisions on addressing teacher pipeline issues."

Interstate Compact on Educational Opportunity for Military Children. The state ratified the Compact in 2009, and the purpose of this Compact is to remove barriers to educational success imposed on children of military families because of frequent moves and deployment of their parents. This includes facilitating the timely enrollment of children of military families and ensuring they are not placed at a disadvantage due to difficulty in the transfer of education records from the previous school districts or due to variations in entrance and age requirements. All 50 states and the District of Columbia participate in the Compact that provides a uniform policy platform for resolving the challenges experienced by military children, according to the U.S. Department of War.

AB 343 (Saldana, Chapter 237, Statutes of 2009) ratified the Compact for the state and required the California Department of Education (CDE) to submit a report that examined the operation of the Compact in the state. According to CDE, "The report finds that California's membership in the Compact has substantially aided both school districts and military families by alleviating many of the educational difficulties military children encounter in their frequent moves from a school in one state to a school in another state. [However,] the report also finds discrepancies in implementation of the Compact from school district to school district. The report suggests that California undertake a more comprehensive effort to ensure that school district personnel and military families are maximally familiar with the provisions of the Compact so that Compact provisions are applied consistently. This would provide a more positive educational experience to children of military families when they transition between different schools."

"Advance Enrollment" for military families. SB 1455 (Block, Chapter 312, Statutes of 2016) enacted an "Advance Enrollment" law in 2016, which allows military families to enroll their children as pupils for a school district prior to entering the state, so long as the parent on active military duty is transferred or pending transfer to a military installation. This bill builds upon this provision by expanding the addresses that a parent may use to provide proof of residence in the school district and by clarifying the documentation that may be used by parents to provide proof of residence.

According to the Defense Manpower Data Center, which serves under the Office of the Secretary of Defense, there are nearly 164,000 active duty military personnel assigned for duty in California as of March 2026, which is the most in the country, and as of August 2024, there were 53,607 military-connected students of active duty parents in California. These students are affiliated with 30 different military installations throughout the state, with the largest concentration in San Diego County.

Recent investments in teacher preparation. Recent budget acts have provided one-time funding to address teacher staffing shortages by removing barriers to teaching for qualified teacher candidates and ensuring that current teachers receive the training they need to succeed. Specifically, the 2025 Budget Act provided $300 million in one-time funding to establish the Student Teacher Stipend Program, which will provide $10,000 grants to teacher candidates completing the required student teaching hours beginning in the 2026-27 school year, and available through the 2028-29 school year.

Certificate of clearance and the California Statewide Educator Identifier (SEID). A certificate of clearance is a document issued by CTC to an individual who has completed the CTC's fingerprint character and identification process, whose moral and professional fitness has been shown to meet the standards as established by law. A certificate of clearance is not the same as a clear teaching or services credential, and it does not authorize the holder to provide any instruction or services in schools. Its sole purpose is to provide verification that the holder has completed a professional fitness review.

Generally, fingerprint clearance through the California Department of Justice and the Federal Bureau of Investigation is required from every applicant prior to the CTC's issuance of any credential, permit, certificate, or waiver. This bill requires teacher candidates to either have a valid permit or credential issued by the CTC or to obtain a certificate of clearance from the CTC before beginning student teaching, clinic practice, or participation in a field experience program.

Candidates who receive a certificate of clearance are issued a SEID by the CTC. The SEID is a unique statewide identification number to be used by education agencies when reporting to CDE, and it is a 10-digit, randomly generated, non-personally identifiable number.

According to CTC, there are multiple benefits from requiring teacher candidates who don't have a valid permit or credential to obtain a certificate of clearance before beginning student teaching, clinic practice, or participation in a field experience program, including:

a) Given recent budget investments for student teacher stipends, requiring candidates to be issued a SEID will help with tracking and evaluating the impact of investments in teacher preparation to help better inform policy decisions. Starting July 1, 2026, CTC will be able to award stipends through the Student Teacher Stipend Program.

b) Requiring candidates to be issued a SEID will help ensure that a candidate receives a student teacher stipend. Unless a student has a SEID, CTC is currently unable to know what program a candidate is enrolled in and if they are receiving a student teacher stipend, and CTC views this change as critical for the implementation of the student teacher stipend program.

c) A candidate obtaining a certificate of clearance must undergo a fingerprint clearance. To the extent that the process reveals something in a candidate's background that could preclude them from teaching, this provides a layer of security for students, and it also lets the candidate know that there may potentially be additional steps for that candidate before moving forward as a teacher.

Urgency measure. The author indicates that an urgency measure is necessary (a) for military families who are being impacted by current laws on establishing residency for their child to attend a school district and (b) for CTC to track teacher candidates from their earliest entry into the field to inform the implementation of the student teacher stipends investment and to better inform policy decisions relating to the teacher pipeline.

SUBJECT: Data centers: water use disclosures

SOURCE: Author

DIGEST: This bill imposes requirements on cities and counties to meet before they can issue permits to proposed data center projects.

ANALYSIS:

Existing law:

1) Requires a water supplier to prepare a water supply assessment for residential, commercial, or industrial projects that must undergo review under the

California Environmental Quality Act (CEQA) and will use more than a specified amount of water.

2) Allows cities and counties to make and enforce "all local, police, sanitary and other ordinances and regulations not in conflict with general laws." It is from this fundamental state constitutional power (commonly called the "police power") that cities and counties derive their authority to regulate behavior to preserve the health, safety, and welfare of the public, including land use authority.

3) Requires the state to reduce urban per capita water use by 20% December 31, 2020, and requires each urban retail water supplier to establish their own target to help meet the statewide 20% reduction goal.

This bill:

1) Prohibits a city or county from approving a permit or other entitlement that would result in the construction or expansion of a data center that increases the maximum peak water use unless:

   a) The applicant assumes responsibility for the full cost of any required water conveyance, treatment or storage, or distribution infrastructure improvements necessary to serve the project, as determined by the water supplier.

   b) The applicant has provided the city or county with:

      i) A water supply assessment;

      ii) As of January 1, 2028, a water scarcity plan;

      iii) Projected water use and water efficiency measures; and

      iv) Disclosures regarding workforce needs associated with the project.

2) States this bill should not be construed to require a city or county to approve any permit request from a data center solely because the applicant has complied with the bill's provisions.

Background

Data centers. Data centers are facilities that support information technology servers, digital storage equipment, and network infrastructure for large-scale data processing and data storage. Increasing demand for data creation, processing, and

storage from existing and emerging technologies, such as online platforms/social media, video streaming, smart and connected infrastructure, autonomous vehicles, and artificial intelligence has led to exponential growth in data center workloads.

Cooling technology and water demand. Data centers can have substantial and sometimes irregular demands for cooling water. All computer chips produce heat as waste energy from the electricity flowing through them. While this heat is minimal in the context of a personal computer, data centers made up of thousands of servers produce an immense amount of heat that needs to be removed from the facility to maintain safety and performance. To manage this heat, data centers use a variety of cooling technologies, including:

- Air-based cooling.
- Chilled water systems
- Evaporative cooling systems.
- Liquid cooling.
- Economization technologies.

Many data centers combine several technologies and the blend of possible technologies introduces tradeoffs between electricity and water use (and between onsite and offsite water use).

Implications for water infrastructure. Data centers – like all businesses, residential customers, and other water users – need a reliable water supply. Absent reliable information about expected usage, water suppliers must make infrastructure decisions based on estimates and projections that may or may not come true, meaning they could wind up under- or over-building water supply systems.

Improving planning and coordination. Better data about water use, whether during the water supply assessment process or based on research data from across the sector, would help local water agencies better plan to meet actual needs. Local water utilities could work with data centers to understand the times of highest demand and collaborate on strategies to deliver water supply reliability.

The risk of stranded or overbuilt assets can be mitigated by requiring new large customers to pay for necessary water infrastructure upgrades as part of the connection process, potentially extending beyond traditional connection fees to include upgrades to mains, pumping stations, and other needed infrastructure.

CII water use. A 2022 Department of Water Resources (DWR) study on commercial, industrial, and institutional (CII) water use recommended performance measures to the State Water Resources Control Board (SWRCB) to

improve water use efficiency in the CII sector, one of which was to require urban retail water suppliers to classify their CII users by one of 19 user types (e.g., manufacturing/industrial, technology/science, etc.). The SWRCB incorporated this recommendation into regulations, requiring urban retail water suppliers to classify CII users into one of 22 categories by June 30, 2027.

Comments

Purpose of the bill. According to the author, "California's finite water supplies are under growing stress from climate change, prolonged drought, and the expansion of large consumptive water users. While the Legislature has long recognized the importance of coordinating land use decisions with available water supplies, the rapid growth of data centers has exposed gaps in existing law. Data centers represent a new kind of development that can impose significant, highly concentrated water demands on local systems.

"This gap is particularly important because data centers operate continuously and can drive substantial peak-day demand, often requiring new treatment, storage, or distribution infrastructure. Without timely and standardized information during the entitlement process, municipalities and water retailers may lack clear visibility into a project's water needs and the leverage to ensure that adequate supplies, infrastructure capacity, and conservation measures are in place before service commitments are made

"AB 2469 directly addresses this problem. The bill requires meaningful water planning before local approval and directs state agencies to better identify and manage large consumptive water users. In doing so, AB 2469 gives local governments and water suppliers the information they need to evaluate data center water demand before irreversible siting and infrastructure decisions are made."

Seeing the whole field – for one sector. This bill requires data centers to submit certain information to a city or county before the city or county can issue an entitlement for the project. This information includes a water supply assessment, a water scarcity plan, and projected water use and water efficiency plan – accompanied by certain disclosures regarding workforce needs of the project.

However, this bill doesn't apply these same requirements to other CII sectors or users with similar water demands. So, while this bill will provide cities, counties, and water suppliers with more information about projected water demand, they still will not have a complete picture since this measure only applies to a slice of the state's largest water users.

Similarly, this bill's requirement to create a "water scarcity plan" detailing how water users will reduce their usage if asked or required to only applies to data centers.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee's analysis, the bill will impose minor costs on DWR and the SWRCB.

SUBJECT: Kinship family approval

SOURCE: Alliance for Children's Rights,
Children's Law Center of California
Children's Legal Services of San Diego
County Welfare Directors Association of California

DIGEST: This bill establishes a Kinship Family Approval process in the California Department of Social Services (CDSS) as a streamlined pathway for relatives, nonrelative extended family members (NREFMs), and extended family members of Indian children to become approved foster care providers.

Senate Floor Amendments of 8/21/26 avoid double jointing amendments with SB 1017, AB 2746, and SB 1051 of the current legislative year.

Senate Floor Amendments of 8/20/26 make a number of technical and clarifying changes.

ANALYSIS:

Existing law:

1) Establishes a state and local system of child welfare services, including foster care, for children who have been adjudged by the court to be at risk of abuse and neglect or have been abused or neglected, as specified. (Welfare and Institutions Code [WIC] 202)

2) Requires preferential consideration be given to a request by a relative to have the child placed with the relative if the child has been removed from the physical custody of the child's parent(s). (WIC 361.3(a))

3) Requires, when placing a child in the home of a relative, an extended family member, or NREFM on a temporary basis, the court to consider the recommendations of the social worker based on the assessment required by current law, including the results of a criminal records check and prior child abuse allegations, if any, before ordering that the child be placed with a relative or NREFM. (WIC 319(h)(3))

4) Requires CDSS to adopt, no later than January 1, 2027, a simplified approval process for relative caregivers consistent with the definition of foster family homes for the purposes of federal Title IV-E eligibility. Requires the simplified approval process for relative and kinship caregivers to be implemented only if and to the extent that federal financial participation is available and after necessary federal approval of state plan amendments has been obtained. (WIC 16519.3(a))

5) Defines "nonrelative extended family member" to mean an adult caregiver who has an established familial or mentoring relationship with the child, as described. (WIC 11400(n))

This bill:

1) Requires CDSS, on or before July 1, 2028, to adopt a Kinship Family Approval process to approve a relative, NREFM, or extended family member of an Indian child to be a kinship family, defined as an individual or family who has successfully met the home environment assessment and family engagement standards necessary for providing care for a child placed by a county child welfare department or a probation department (county) by court order or

voluntarily placed by a parent or legal guardian.

2) Requires counties to ensure that relatives, NREFMs, and extended family members of an Indian child are provided information regarding available approval processes and the option to choose between the Kinship Family Approval process, the Resource Family Approval process, and, in the case of an Indian child, a tribally approved home.

3) Makes confidential certain personal identifying information, written evaluation reports, and court proceedings relating to kinship families, except as specified, and requires the application form signed by a kinship family applicant to include a declaration that the information submitted is true, correct, and contains no material omissions of fact to the best knowledge and belief of the applicant.

4) Adds kinship families, as defined, to the list of persons and entities entitled to access pupil records, including records of grades, transcripts, attendance, discipline, online communications on school-established platforms, and individualized education programs, without written parental consent or judicial order.

5) Expands the scope of an existing misdemeanor to include any person who willfully and knowingly, with intent to deceive, makes a false statement or fails to disclose a material fact in a Kinship Family Approval application.

6) Expands the court's authority to place a child after an order of removal, or on a temporary or emergency basis, in the home of a NREFM or an extended family member, in addition to a relative, as under existing law, regardless of the status of any criminal record exemption, Kinship Family Approval, or Resource Family Approval, if the court finds the placement does not pose a risk to the health and safety of the child.

7) Recasts and revises existing reporting and recommendation provisions enacted by AB 2830 (Rivas, Chapter 417, Statutes of 2024) with the new Kinship Family Approval statutory framework.

8) Makes conforming changes across various codes to make provisions currently applicable to resource families also applicable to kinship families and deletes obsolete provisions.

9) Conditions implementation on the continued availability of Title IV-E federal financial participation.

10) Adds double jointing language with SB 1017, AB 2764, and SB 1051 to avoid chaptering out issues.

Background

Author Statement. According to the author, "While California has officially embraced a 'kin-first' culture that prioritizes placing children with family or trusted adults in a child's life, the state currently utilizes a one-size-fits-all foster care approval process that can create unnecessary administrative burdens for a child's kin. Research has consistently and resoundingly shown that children experience a wide range of improved outcomes when placed with familiar caregivers, including greater placement and educational stability, higher likelihood of reuniting with siblings, and improved mental and behavioral health. California's current system, the Resource Family Approval process, was largely designed for licensed foster parents and does not fully reflect the needs of relatives and other trusted adults who step forward during a family crisis. Administrative burdens and irrelevant requirements can create undue delays for placing a child in the safest and most supportive setting possible. To address these unacceptable delays and promote the resounding benefits of kinship care, the legislature enacted AB 2830 (Rivas) to direct the California Department of Social Services to develop policy improvements to strengthen kinship placement pathways.

"AB 2478 follows through on these improvements by creating the Kinship Family Approval pathway, a streamlined approval framework for kin caregivers. This pathway is designed specifically to recognize that caregivers with pre-existing meaningful relationships with a child should not face unnecessary regulatory barriers designed for traditional foster homes. This legislation additionally clarifies emergency placement rules, allows agencies to access Title IV-E federal funding that encourages the creation of separate kinship approval pathways, and extends the eligibility of very limited criminal record exemptions to a wider range of kin so that children can be placed quickly with safe caregivers who are familiar to them. By reducing administrative delays and strengthening family-first placement policies, AB 2478 will maximize kin placements while remaining unwavering in safeguards that secure the safety and stability of a caregiver's home. The Kinship Family Approval pathway will ensure children are more efficiently given a sense of stability, consistency, and permanency with a caregiver that will keep them connected to their communities and culture."

Child Welfare System (CWS) The CWS is an essential component of the state's safety net. Social workers in each county who receive reports of abuse or neglect, investigate and resolve those reports. When a case is substantiated, a family is either provided with services to ensure a child's well-being and avoid court involvement, or a child is removed and placed into foster care. In 2025, the state's child welfare agencies received 398,861 reports of abuse or neglect. Of these, 45,856 reports contained substantiated allegations, and 17,886 children were removed from their homes and placed into foster care via the CWS.

Resource Family Approval Program The Resource Family Approval process approves Resource Families to provide placement for children and youth who fall under the jurisdiction of the juvenile court or otherwise in the care of a county child welfare agency. A Resource Family can be an individual, couple or family who wants to provide care to related or unrelated children. This program also allows for emergency placements with relatives and NREFM. CDSS describes Resource Family Approval as a family-friendly and child-centered caregiver approval process that combines elements of the foster parent licensing, relative approval, and approvals for adoption and guardianship processes. The Resource Family Approval includes a comprehensive family evaluation assessment, home environment check, and training for all families, including relatives. It also allows for a seamless transition to permanence.

The original intention of the Resource Family Approval process was to streamline foster parent approval and adoption approval requirements to facilitate an easy transition for caregivers from foster placement to adoption. The combination of these two processes results in a Resource Family Approval process that can be lengthy and involved – with requirements such as a home health and safety assessment, background check, and health questionnaire. While California has taken steps to streamline this process to address barriers and delays, there is not currently a single more streamlined process for relatives and kin.

On September 28, 2023, the federal Administration for Children and Families published a final rule regarding licensing and approval standards for kinship placements. The rule permits Title IV-E agencies to claim Title IV-E federal financial participation on behalf of a child who is placed in a relative or kinship licensed or approved foster family home, when the agency uses different licensing or approval standards for relative or kinship foster family homes and non-relative or non-kinship foster family homes. This bill creates a simplified approval process for relative placement, consistent with federal regulations.

Placement with Relatives State and federal law include a preference to place children in out-of-home care with relatives. For example, Welfare and Institutions Code Section 361.3 states that preferential consideration must be given to a request by a relative of the child for placement of the child with the relative. The child's social worker must always determine whether such a placement is appropriate by considering a variety of factors, as specified, including the ability of the relative to provide a safe, secure, and stable environment for the child, but preference is provided for a relative or NREFM placement.

Numerous national studies have documented the poor outcomes of children and youth who are removed from their homes and placed into the child welfare system. Children involved with the CWS system have increased rates of chronic health problems, developmental delays and disabilities, mental health needs, and substance abuse problems. Many youth in care have experienced traumatic events, including removal from their homes that lead to symptoms such as depression, behavior problems, hypersensitivity, and emotional difficulties. Twenty-five percent of youth who age-out of care experience Post-Traumatic Stress Disorder – double the rate of U.S. war veterans.[1] Studies have also demonstrated the significant benefit to children in the child welfare system that are placed with relatives rather than with strangers in foster homes or in group care. A 2008 study in the Archives of Pediatric and Adolescent Medicine found that children placed into kinship care had fewer behavioral problems three years after placement than children who were placed into foster care. This study also noted that a large body of research acknowledges the evidence that children in kinship care are less likely to change placements, benefiting from increased placement stability and better outcomes. Researchers also found that children placed with relatives were more likely to remain in their same neighborhood, be placed with siblings, and have consistent contact with their birth parents than other children in foster care.[2]

Streamlined System of Kinship Family Approval In 2024, AB 2380 (Rivas) was enacted and required CDSS, by January 1, 2027, to adopt a simplified approval process for relative caregivers, consistent with federal regulations, and specified that the simplified approval process be implemented only if, and to the extent that, federal financial participation is available. AB 2380 created a statutory framework and this bill seeks to enact that framework by codifying procedures for a streamlined Kinship Family Approval. This streamlined process is outlined below.

---

[1] http://www.childrensaidsociety.org/files/upload-docs/report_final_April_2.pdf

[2] *Arch Pediatr Adolesc Med.* 2008;162(6):550-556. doi:10.1001/archpedi.162.6.550.

What Families Can Qualify: This bill defines "kinship family" as including an individual or family that is a relative, a NREFM or an extended family member of an Indian child. This bill expands the pool of eligible caregivers beyond what AB 2830 contemplated. AB 2830 focused primarily on relatives, with an option for CDSS to expand the definition to include NREFMs, however this bill makes that expansion mandatory by requiring the Kinship Family Approval process to be available to relatives, NREFMs, and extended family members of an Indian child.

Background Checks: Under existing law, Resource Family Approval requires background checks of all adults residing in the home and these background checks are completed by the county. This process remains unchanged for Kinship Family Approval. Under existing law, Resource Family Approval uses a simplified exemption process for misdemeanors convictions in the last 3 years or felony convictions not otherwise prohibited in the last 5 years except for all non-exemptible felony convictions. The process for Kinship Family Approval is the same however, the list of non-exemptible convictions is limited to the federal non-exemptible convictions list.

Training: Under existing law, Resource Family Approval families must complete a minimum of 12 hours preapproval and a minimum of eight hours annually. For Kinship Family Approval, the 12 hours can be completed no later than 90 days following approval. This allows for flexibility when a child needs to be placed in an emergency situation and there is no time for training before placement. The current training topics required for Resource Family Approval include a broad range of issues such as the effects of trauma, accessing services, rights of a child in foster care, and cultural needs of children. For Kinship Family Approval, the training requirements include topics such as birth parent relationships and safety issues, child and adolescent development, and navigating the child welfare and probation systems.

For Kinship Family Approval a county may require a family to receive relevant specialized training for the particular needs of a child. A county may also require additional training to support the family. The training under the Kinship Family Approval system is more individually tailored to the specific child and family.

Ongoing Support: Under existing law, Resource Family Approval families are provided ongoing support as needed to complete the approval process

and families are monitored periodically and updates are completed at least biannually. These processes remain the same for Kinship Family Approval, however additional supports are also provided. This ongoing support is provided no less than quarterly to ensure that the proper services and supports are being provided to successfully care for the child or NMD. These supports can be provided through things such as the Peer Mentorship Program, Foster Family Agency, and California Kinship Navigator.

Documentation of Approval: For Resource Families, a written report is prepared regarding their approval or denial. For Kinship Family Approval a written summary is prepared which includes a summary of the family strengths and if the family is approved or denied.

The goal of this streamlined Kinship Family Approval is to make it easier for placements to be approved, and children to be placed, in settings where they are most likely to thrive.

Related/Prior Legislation

AB 2830 (Rivas, Chapter 417, Statutes of 2024) required CDSS to adopt a simplified approval process for relative caregivers by January 1, 2027, conditioned on federal financial participation, and required CDSS to recommend statutory changes for full implementation by September 30, 2026.

SB 354 (Skinner, Chapter 687, Statutes of 2021) adopted changes to the criminal background check process during RFA for relatives; permitted court authorization of relative placements regardless of criminal exemption or RFA status; required CDSS to report on criminal record exemptions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, CDSS estimates the following General Fund costs:

- State operations costs of $339,000 in 2026-27 and $333,000 annually thereafter.

- One-time costs of $275,000 for automation updates for CWS-CARES and $448,500 for automation costs for CalSAWS.

- Ongoing annual costs to backfill the loss of federal Title IV-E funding for Aid to Families with Dependent Children-Foster Care is $735,541 per 100 foster youth cases and $581,618 per 100 non-minor dependent cases. Due to uncertainty in caseloads, the estimate was based on a cost per 100 cases. The actual caseload may potentially be lower. These costs relate to the provisions in the bill that would create a pathway for placements that received authorization by the court but were either 1) a non-relative extended family member or extended family member of an Indian child who was denied kinship family approval or 2) a non-relative extended family member or extended family member of an Indian child who was approved for the kinship family approval process but with a federal non-exemptible conviction.

- The California Department of Justice indicates no significant fiscal impact to the department.

- Unknown costs to local agencies for administration. Proposition 30 of 2012 provides that any legislation enacted after September 30, 2012 that has an overall effect of increasing the costs already borne by a local agency for realigned services applies to local agencies only to the extent that the state provides annual funding for the cost increase. Other costs may be potentially reimbursable by the state, subject to a determination by the Commission on State Mandates.

SUBJECT: Electrical corporations: interconnection: Public Utilities Commission: transmission development monitor.

SOURCE: American Clean Power-California
Union of Concerned Scientists

DIGEST: This bill requires the California Public Utilities Commission (CPUC) to require specific actions to help accelerate interconnection of generating resources to electric transmission lines.

ANALYSIS:

Existing law:

1) Establishes the Federal Energy Regulatory Commission (FERC) has exclusive jurisdiction over the transmission of electricity in interstate commerce and over all facilities for the transmission or sale of electricity in interstate commerce. (Federal Power Act §§§201, 205, 206 (Title 16 United States Code (USC) 824, 824d, 824e))

2) Establishes and vests the CPUC with regulatory authority over public utilities, including electrical corporations. (Article 12 of the California Constitution)

3) Establishes the State Energy Resources Conservation and Development Commission (California Energy Commission (CEC)) and requires the CEC to assess trends in energy consumption and analyze the social, economic, and environmental consequences of trends. (Public Resources Code §25200 *et seq.*)

4) Establishes the California Independent System Operator (CAISO) as a nonprofit public benefit corporation and requires it to ensure efficient use and reliable operation of the electrical transmission grid. (Public Utilities Code §345)

5) Requires, under the California Global Warming Solutions Act of 2006, the California Air Resources Board (CARB) to adopt a statewide greenhouse gas (GHG) emissions limit. Authorized CARB to include market-based compliance mechanisms to comply with the regulations. (Health and Safety Code §38500 *et seq*.)

6) Requires every electrical corporation that owns electrical transmission facilities to annually prepare, as part of the FERC Order 890 process, and submit to the CPUC, a report identifying any electrical transmission facility, upgrade, or enhancement that is reasonably necessary to achieve the Renewables Portfolio Standard (RPS) procurement requirements. Requires each electrical corporation that owns electrical transmission facilities to annually prepare, and submit to the CPUC, a report on any changes to previously reported in-service dates of transmission and interconnection facilities necessary to provide transmission deliverability to eligible renewable energy resources or energy storage resources that have executed interconnection agreements. (Public Utilities Code §399.13)

7) Provides that the CPUC may supervise and regulate every public utility in the state and may do all things, whether specifically designated or in addition, which are necessary and convenient in the exercise of such power and jurisdiction. (Public Utilities Code §701)

8) Requires the CPUC to report to the Legislature by November 1 of each year specified information in order to evaluate the progress of the state's electrical corporations in complying with the California RPS Program (Article 16 (commencing with Section 399.11) of Chapter 2.3). This includes a

systemwide assessment of delays to interconnection or transmission approvals for eligible renewable energy resources or energy storage resources, based on the annual reports submitted to the CPUC by electrical corporations pursuant to Public Utilities Code §399.13. (Public Utilities Code §913.4)

This bill:

1) Requires each large electrical corporation, within 180 days following the adoption of a transmission plan by the CAISO through the transmission planning process (TPP), or a successor process, or whin 180 days following the execution of a generator interconnection agreement, that is assigned or obligated to construct a project that requires approval by the CPUC to submit to the transmission development monitor at the CPUC a project specific schedule for the project, as provided.

2) Requires the CPUC, on or before July 1, 2027, to establish a transmission development monitor within the CPUC.

3) Requires the transmission development monitor to monitor and review certain transmission- and interconnection-related facilities submitted by the large electrical corporation, the large electrical corporation's progress on completing network upgrades following approval in a generator interconnection agreement or transmission plan approved by the CAISO, the large electrical corporation's compliance with the schedule submitted to the transmission development monitor, and the large electrical corporation's compliance with any remedial actions ordered by the CPUC, as specified.

4) Requires the transmission development monitor to report to the CPUC on an annual basis, as provided, and notify the CPUC within 15 days of identifying a material deficiency, as defined.

5) Requires the CPUC, within 90 days of receiving an annual report or notification of material deficiency to issue a resolution directing the large electrical corporation to take remedial actions material deficiencies identified by the transmission development monitor, as specified.

6) Makes legislative findings and declares that Section 1 of the bill, which adds Section 769.4, to the Public Utilities Code, imposes a limitation on the public's right of access to the meetings of public bodies or the writings of public officials and agencies within the meaning of Section 3 of Article 1 of the

California Constitution in order to protect the confidential and market-sensitive information of an entity (electrical corporation) subject to Section 1 of this act.

Background

SB 100/SB 1020 clean energy goals. With the adoption of SB 100 (De León, Chapter 312, Statutes of 2018) and SB 1020 (Laird, Chapter 361, Statutes of 2022) statute establishes the policy of the state that eligible renewable energy resources and zero-carbon resources supply 90% of all retail sales of electricity to California end-use customers by December 31, 2035, 95% of all retail sales of electricity to California end-use customers by December 31, 2040, 100% of all retail sales of electricity to California end-use customers by December 31, 2045, and 100% of electricity procured to serve all state agencies by December 31, 2035. SB 100 increased the RPS requirement from 50% by 2030 to 60% of retail sales for each retail seller. SB 100 also required CARB, CEC, and CPUC to issue a joint report by January 1, 2021, and at least every four years, that describes technologies, forecasts, affordability, and system and local reliability. The report is required to include an evaluation of costs and benefits to customer rate impacts, as well as barriers to achieving the SB 100 policy. The first Joint Agency report was issued January 2021 and found that in order to meet the state's energy goals California will need to roughly triple its current electricity power capacity.

CAISO. The CAISO is a nonprofit public benefit corporation created by California statute as part of the effort to deregulate the electricity market in the late 1990s. The CAISO manages the flow of electricity across the high-voltage bulk power system that makes up 80% of California's, and a small part of Nevada's, electric grid. CAISO is registered as both a transmission operator and balancing authority (BA) under federal reliability requirements. As with other BAs, the CAISO is regulated by federal statute and regulations with oversight by FERC and the North American Energy Reliability Corporation (NERC).

Transmission planning process. Each year, the CAISO conducts its TPP to identify potential system limitations as well as opportunities for system reinforcements that improve reliability and efficiency. The CAISO Transmission Plan provides a comprehensive evaluation of the CAISO transmission grid to address grid reliability requirements, identify upgrades needed to successfully meet California's policy goals, and explore projects that can bring economic benefits to consumers. The plan relies heavily on key inputs from state agencies in translating legislative policy into actionable policy driven inputs. The development of the transmission plan entails annual public stakeholder process that is conducted pursuant to the

CAISO's FERC-approved tariff. It includes a three-phase process that leads to annual CAISO Board of Governor approval of transmission plan and associated transmission projects.

Forecasting by CEC and supply-side inputs by CPUC. The CEC conducts demand forecast that is used to inform several planning processes, including the CAISO's TPP. The demand forecast is often a 10-year (recently 15-year) outlook for electricity and natural gas sales, consumption, and peak and hourly electricity demand. Additionally, the CPUC provides energy resource supply-side inputs, including an annual resource portfolio, to inform the transmission planning by the CAISO.

Transmission Development Forum. The Transmission Development Forum is a recent joint effort between the CAISO and the CPUC to discuss and track Participating Transmission Owners expansion and network upgrade projects and schedules. The Transmission Development Forum creates a single forum to track the status of transmission network upgrade projects that affect generators and all other transmission projects approved in the CAISO's TPP. The effort allows for increased transparency for all stakeholders about transmission projects and enhances accountability of transmission owners by having them explain schedule changes, delays, and address stakeholders' questions.

Tracking Energy Development (TED) Task Force. The TED Taskforce is also a recent joint effort of the CPUC, CEC, CAISO, and the Governor's Office of Business and Economic Development (GO-Biz) to track new energy projects under development. According to the CPUC, the objective is to build on the success of ad hoc 2021 efforts to provide energy resource project development support, as appropriate, and identify barriers and mitigation strategies to accelerate energy project development.

CAISO 20-year Transmission Outlook. The CAISO embarked on creating a 20-Year Transmission Outlook for the electric grid, in collaboration with the CPUC and the CEC, with the goal of exploring the longer-term grid requirements and options for meeting California's GHG reduction and renewable energy objectives reliably and cost-effectively. The CAISO also intends for the expanded planning horizon to provide valuable input for resource planning processes conducted by the CPUC and CEC, and to provide a longer-term context and framing of pertinent issues in the CAISO's ongoing annual 10-Year Transmission Plan. The 2024 20-Year Transmission Outlook estimates $45 to $65 billion in transmission costs to

meet the state clean energy needs, load growth, and offshore wind generation development.

CAISO reforms of interconnection queue. The CAISO has also been instituting a number of reforms to address delays, particularly as the volume of projects entering the CAISO queue has grown significantly with the passage of federal legislation by the Biden administration to incentivize clean energy, state procurement directives, resource adequacy requirements, and clean energy targets. The CAISO has implemented a number of reforms through the Interconnection Process Enhancements to modify how projects enter and advance through the queue, including screening and prioritization criteria based on commercial readiness, system need, and project viability.

Comments

Need for this bill. According to the author:

> Federal clean energy tax credits worth billions of dollars to California ratepayers are on the verge of expiring, and the single greatest obstacle to capturing those savings is completion of the grid upgrades needed to connect new clean energy projects. The CPUC's own data shows that nearly two-thirds of these transmission upgrades are delayed, with some languishing for over a decade. AB 2493 creates the independent oversight and enforceable accountability mechanisms needed to break through these delays before it is too late.

Seeking legislative remedies to address delays in infrastructure build-out. The sponsors and supporters of this bill seek legislative remedies to address delays in interconnecting generating facilities to transmission and distribution grid. They note widespread delays in transmission projects, citing the CPUC's *2025 RPS Report* which found that 64% of in-development transmission projects are delayed past their original in-service dates, including Pacific Gas & Electric (PG&E) at 63% and Southern California Edison (SCE) at 70%, though San Diego Gas & Electric was excluded due to incomplete data. They further note the delay of 449 transmission projects with dependent generation, or storage is affecting 21.8 gigawatts of clean energy and storage capacity. While they acknowledge there has been much attention to the issue at the CPUC and CAISO, the longstanding delays threaten grid reliability, clean energy progress, and the ability to access the sunsetting federal tax credits that can reduce costs for Californians. As such, the

supporters seek legislative remedies to require auditing of the electric IOUs' progress to build-out the needed infrastructure.

Electric IOUs oppose the bill stating it singles them out while ignoring other responsible parties and conflicts with existing oversight. The electric IOUs raise concerns that the bill only focuses on their actions and no other responsible parties. They share that transmission and interconnection projects can often be delayed due to issues outside their control, including a project developer's lack of financing, lack of land rights, or component supply shortages. They also raise concerns that the approved projects in the CAISO TPP are mostly conceptual and often lack critical information that must be prepared prior to determining how (or if) to file for applicable permits. They noted there is extensive work related to engineering, costs, and contracts before the projects can begin the permitting process. They raise concerns that the strict deadlines for submitting requests will result in longer permitting timelines, not shorter.

Prior/Related Legislation

(See Senate Energy, Utilities and Communications Committee Analysis.)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, ongoing costs, possibly in the high hundreds of thousands of dollars annually (ratepayer funds), for the California Public Utilities Commission (CPUC) to establish a transmission development monitor and otherwise implement the provisions of this bill.

OPPOSITION: (Verified 8/21/26)

Pacific Gas and Electric Company

ARGUMENTS IN SUPPORT: According to a coalition of organizations, including the co-sponsors of this bill and 14 other organizations listed above:

> …California has set an ambitious goal to decarbonize its power grid by 2045. Realizing this goal depends on our ability to connect new clean power generation quickly and affordably. …Unfortunately, the IOUs are falling behind on those upgrades, delaying the addition of new power to the grid. …AB 2493 will help stabilize electricity prices and keep California's grid reliable by requiring the large IOUs to connect new clean energy projects faster. First, AB 2493 sets a deadline for the larger IOUs to initiate permitting for major grid upgrades. Second, the bill requires an independent auditor to assess the root causes of interconnection upgrades delays and report findings to the CPUC. …An independent audit will provide the rigorous, consistent data that state regulators need to understand why projects are falling behind and what remedies will be most effective. Third, AB 2493 requires the large IOUs to develop solutions aligned with the auditor's findings, including facilities advanced equipment procurement to mitigate supply chain constraints, expanding opportunities for entities other than the large IOUs to complete certain upgrades, and implementing a prioritization framework to fast-track upgrades that affect 100 MW or more of clean energy capacity. Finally, the bill directs the CPUC to evaluate the large IOUs' progress in addressing interconnection delays in their rate requests and cost of capital applications.

ARGUMENTS IN OPPOSITION: According to PG&E:

AB 2493 would not address the primary drivers of delays identified in numerous publications and discussed at length in the Assembly Utilities Hearing held on February 18th. This include delays related to land rights, procurement lead times, permitting timelines, and customer-driven project design changes. Instead, AB 2493 would (1) create jurisdictional conflicts and competing compliance obligations for utilities by directing corrective actions that may be inconsistent with FERC-jurisdictional requirements and CAISO planning and cost parameters; (2) duplicative existing CPUC and CAISO oversight and reporting frameworks, including the CPUC's Transmission Project Review Process under Resolution E-5252; (3) divert specialized engineering and interconnection staff away from completing studies and executing network upgrades; (4) increase costs for customers without clear, reasonable cost recovery parameters; (5) raise security concerns by requiring public posting of audit reports that could include sensitive critical infrastructure information; and (6) focus on utilities without addressing end-to-end contributors to delay across all responsible parties (utilities, manufacturers, land-owners, developers, and federal, state & local agencies).

SUBJECT: Wildfire: Regional Forest and Fire Capacity Program: local assistance grant program: regional landscape grants

SOURCE: Irvine Ranch Conservancy

DIGEST: This bill expands the kinds of activities eligible for funding from the Wildlife Conservation Board (WCB) and Regional Forest Fire Capacity Program to address ecosystem specific concerns in Southern California.

Senate floor amendments of 8/21/26 prevent code conflict if AB 1699 (Rogers) and this bill are both enacted.

ANALYSIS:

Existing Law:

1) Establishes the WCB in the California Department of Fish and Wildlife (CDFW). Among other things, the WCB is required to investigate, study, and determine the areas in the state that are most suitable for certain wildlife-related purposes.

2) Authorizes the WCB to make grants or loans to nonprofit organizations, local governmental agencies, federal agencies, and state agencies for various purposes in connection with fish and wildlife habitat.

3) Authorizes the Department to establish a local assistance grant program for fire prevention and home hardening education activities (Public Resources Code (PRC) §4124.5).

4) Establishes the Regional Forest and Fire Capacity Program (RFFC) in the California Department of Conservation (DOC) to support regional leadership to build local and regional capacity and develop, prioritize, and implement strategies and projects that create fire adapted communities and landscapes by improving ecosystem health, community wildfire preparedness, and fire resilience.

5) Requires the Task Force to update the Action Plan every five years, and develop an implementation plan to achieve the Plan's goals (PRC § 4771).

This bill:

1) Authorizes the WCB to award regional landscape grants to regional entities to implement certain regional priority strategies

2) Amends the definition of "fire prevention activities," for the purposes of the Department's Wildfire Prevention Grants Program, to include:

    a) The creation of fuel breaks.

    b) Ignition prevention.

    c) Replacement of ignition-prone non-native fuels or flashy fuels with less flammable vegetation.

    d) Technologies that improve detection and assessment of new fire ignitions.

3) Defines the term "flashy fuel," for the purposes of the Wildfire Prevention Grants Program, as "shrubs, grasses, and foliage, including, but not limited to, pine needles and leaves, that dry or cure rapidly, ignite easily, and spread fire quickly.

4) Defines the term "ignition prevention," for the purposes of the Wildfire Prevention Grants Program, as "those lawful activities that reduce the likelihood of wildfire ignitions caused directly or indirectly by human

activity or infrastructure, including replacement or modification of ignition-prone nonnative fuels or flashy fuels with less flammable vegetation, hardening of infrastructure, including primary roadways, utility corridors, and public access points, to prevent fire ignition and spread, use of ignition-resistant materials, and community education or planning programs that reduce human-caused ignitions."

5) Defines the term "non-native fuel," for the purposes of the Wildfire Prevention Grants Program as "nonnative or invasive plant species, including grasses, shrubs, and other annual plants, and nonnative or invasive woody plant species."

6) Amends eligible activities under the Wildfire Prevention Grants Program to include vegetation modification to reduce wildfire ignition risk and ignition prevention activities.

7) Establishes a definition for the term "Director," in the context of the RFFC at the DOC.

8) Specifies the director may directly award regional landscape grants to regional entities to implement regional priority strategies.

9) Requires the director to collaborate with the Task Force to establish guidelines for funding regional landscape grants to contribute to the achievement of the goals of the Action Plan.

10) Authorizes the director to provide grants for projects and programs that improve ecosystem health.

11) Authorizes moneys appropriated to the DOC for landscape-scale projects be allocated to activities that improve ecosystem health on chaparral, shrubland, grassland, and coastal sage scrub lands, including the replacement of ignition-prone nonnative fuels or flashy fuels with less flammable vegetation, and for regional landscape grants to regional entities to implement regional priority strategies.

12) Establishes definitions for the terms used in sections 11) and 12), above:

    a) "Ecosystem" includes forest, chaparral, shrubland, grasslands, and coastal sage ecosystems and natural communities.

b) "Flashy fuels" means shrubs, grasses, and foliage, including, but not limited to, pine needles and leaves, that dry or cure rapidly, ignite easily, and spread fire quickly.

c) "Nonnative fuels" means nonnative or invasive plant species, including grasses, shrubs, and other annual plants, and nonnative or invasive woody plant species.

d) "Regional entities" has the same meaning as defined in Section 4208 of the PRC.

13) Requires the director of DOC, prior to issuing regional landscape grants, to collaborate with the Task Force to establish guidelines for funding regional landscape grants to contribute to the achievement of the goals of the Action Plan.

14) Includes chaptering out amendments to avoid code conflicts between this bill and AB 1699 (Rogers), in case both bills are enacted.

Background

Regional Forest and Fire Capacity Program. Established in the Public Resources Code under the DOC, RFFC supports regional leadership to build local and regional capacity and develop, prioritize, and implement strategies and projects that create fire adapted communities and landscapes by improving ecosystem health, community wildfire preparedness, and fire resilience. DOC provides block grants to regional entities and to eligible coordinating organizations to support the statewide implementation of the program.

Lack of Southern California nuance. According to information provided by the author's office, some RFFC entities with shovel-ready projects have run into implementation delays because their projects don't neatly fall under the state's definition of approved wildfire mitigation activities. This has been felt most acutely in non-forested areas of the state where fire risk is comparable to forested areas but wildfire mitigation projects aren't easily categorized as "fuels reduction" or "forest health." This technicality delays funding and puts people's lives and homes at risk, especially in flammable shrubland regions of the state where millions of Californians live.

Expanding access to funding for RFFC. This bill expands the definition of wildfire mitigation activities in state law to include chapparal ecosystems and expands the agencies that could distribute block grants under the RFFC program.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

- Cost pressure of an unknown but potentially significant amount (General Fund, Greenhouse Gas Reduction Fund [GGRF], or bond funds) for the Department of Conservation (DOC) to directly award regional landscape grants to regional entities to implement regional priority strategies developed pursuant to the RFFC program. (See staff comments for more information on cost pressures.)
- Cost pressure of an unknown amount (General Fund, GGRF, or bond funds) for the WCB to award regional landscape grants to regional entities to implement regional priority strategies developed pursuant to the RFFC program.
- Cost pressure of an unknown but potentially significant amount (General Fund, GGRF, or bond funds) for the Department of Forestry and Fire Protection (CalFire) to fund the additional project types made eligible under its local assistance and forest health grant programs as a result of this bill, in addition to currently eligible project types.
- The California Air Resources Board (CARB) estimates ongoing costs of $391,000 annually (GGRF) to review and update quantification methodologies, calculator tools, and reporting templates for fire prevention and forest health programs; update online resources and guidance documents to reflect expanded eligibility criteria; and update outreach and engagement materials and strategy; among other things.
- The State Water Board estimates ongoing costs of approximately $2 million annually (Timber Regulation and Forest Restoration Fund [TRFRF]) to coordinate with the Wildfire and Forest Resilience Task Force, WCB, DOC, and CalFire to develop guidelines for funding regional landscape grants; conduct increased inspections, oversight, and enforcement for these projects; and develop new individual or general Waste Discharge Requirements to permit these projects.

ARGUMENTS IN SUPPORT: According to the author, "AB 2513 addresses two critical gaps in our efforts to achieve the goals of California's Wildfire and Forest Resilience Action Plan. First, the bill ensures that Regional Forest and Fire Capacity grantors can distribute funds for wildfire mitigation projects in the flammable shrubland ecosystems typical of Southern California, reflecting the full range of ecosystems at risk of catastrophic wildfire across the state. Second, AB 2513 increases the pace and scale of grant distribution by authorizing the Department of Conservation and the Wildlife Conservation Board to distribute regional landscape grants to local entities."

SUBJECT: San Diego Gas and Electric Company: energization pilot program

SOURCE: San Diego Housing Federation

DIGEST: This bill establishes a five-year pilot program regarding timelines to energize specified customers within the San Diego Gas & Electric (SDG&E) service territory.

Senate Floor Amendments of 08/21/26 shorten the duration of the proposed pilot program by two years to January 1, 2030, instead of January 1, 2032, and make additional clarifying changes.

ANALYSIS:

Existing law:

1) Establishes and vests the California Public Utilities Commission (CPUC) with regulatory jurisdiction over public utilities, including electrical corporations. (Article XII of the California Constitution)

2) Prohibits a public utility from making or granting any preference or advantage to any corporation or person or subject any corporation or person to any prejudice or disadvantage as to rates, charges, service, facilities, or in any other respect. (Public Utilities Code §453)

3) Requires the CPUC to enforce the rules governing the extension of service by a gas or electrical corporation to new residential, commercial, agricultural, and industrial customers. (Public Utilities Code §783)

4) Establishes the Powering Up Californians Act and requires the CPUC to determine the criteria for timely service for electrical customers to be energized, including categories of timely electric service through energization, as specified. Requires the CPUC to determine the criteria for timely service for electric customers to be energized. (Public Utilities Code §930 et seq.)

5) Defines "lower income households" to mean persons and families whose income does not exceed the qualifying limits for lower income families as established and amended from time to time pursuant to Section 8 of the United States Housing Act of 1937, including those defined as very low-income households and extremely low-income households. (Health and Safety Code §50079.5)

6) Defines "essential services building" to mean any building designed and constructed for public agencies, such as a fire station, police station, emergency operations center. (Health and Safety Code §16007).

7) Defines "health facility" to mean a facility that is organized, maintained, and operated for the diagnosis, care, prevention, and treatment of human illness, physical or mental, to which the persons are admitted for a 24-hour stay or longer, and includes a general acute care hospital.(Health and Safety Code §1250)

8) Defines "community clinic" to mean a clinic operated by a tax-exempt nonprofit corporation, as specified. (Health and Safety Code §1204)

This bill:

1) Requires, until January 1, 2030, SDG&E to energize construction-ready projects within specified timeframes, specifically:

a) Category 1 projects: within 40 business days of being deemed construction ready. Category 1 projects are development projects that are designed to protect, support, or advance the public health, safety, or welfare of the community, and includes only:

   i) Affordable housing developments.
   ii) Development of essential services buildings.
   iii) Development of health facilities.

b) Category 2 projects: within 55 business days of being deemed construction ready. Category 2 projects are the development of a municipal facility or an electric vehicle charger and charging station.

c) Category 3 projects: within 70 business days of being deemed construction ready. Category 3 projects are the development of any other facility and project type.

2) Requires, only until January 1, 2030, reporting on the energization of those construction-ready projects to be included in SDG&E's biannual energization reporting submitted to the CPUC.

3) Provides, if an issue specific to the project arises after SDG&E determines a project is construction ready that reasonably prevents SDG&E from safely and compliantly completing the energization, the timeframes do not apply until the issue has been resolved to the mutual satisfaction of SDG&E and the project applicant.

4) States that SDG&E's compliance with the requirements of this section is not a violation of Public Utilities Code §453 concerning preferential treatment of customers.

5) Requires that SDG&E's compliance with the proposed timeframes complement, and not conflict with nor supersede, any rule, order, or determination by the CPUC pursuant to the Powering Up Californians Act, pursuant to Public Utilities Code §930 *et seq*.

Background

Connecting to the electric and gas distribution grid. Rules governing the ability of new buildings and generation and storage resources to connect to the electric and

gas distribution grid are generally determined by statute, CPUC rules, and tariffs, (i.e., documents that specify rates, charges, rules, and conditions under which an electrical corporation will provide services to the public) for each of the electrical corporations. New service connections refer to extending an electricity or expanding distribution infrastructure to service new or expanded customer load, known as "energization." Electric Tariff Rules 15 and 16 establish the guidelines for design, cost allocation, and responsibilities of a project applicant and a utility for electric distribution line extensions. The ability to connect to the larger electrical system can take months (if not, years, in some cases) as the process can entail the need for designs, assessments on cost allocations associated with improvements on the electric distribution system to allow for the connection, and other issues. In the case of new building developments, depending on the size of the development, the need for electric service extensions may be needed in phases over months, or years.

Energization target time periods. SB 410 (Becker, Chapter 394, Statutes of 2023), the Powering Up Californians Act, required the CPUC to establish by September 30, 2024, reasonable average and maximum target energization time periods in order to connect new customers and upgrade the service of existing customers to the electrical grid. The bill also required reporting by electrical corporations and authorized specified annual cost-recovery, subject to a cap. AB 50 (Wood, Chapter 317, Statutes of 2023) required the CPUC to determine the criteria for timely service for electric customers to be energized. In CPUC proceeding (R. 24-01-018) the CPUC adopted a decision in September 2024 (D. 24-09-020) which established timelines for energization requests and a procedure for customers to report energization delays to the CPUC. The table below notes the new targets and timelines adopted by the CPUC.

Energization Type	Average Energization Target (calendar days)	Maximum Energization Target (calendar days)
Rule 15	182	357
Rule 16	182	335
Rule 15/16 combined	182	306
Application Decision	10	45
Main panel upgrade	30	45

The CPUC decision also identified eight standard energization steps for the three large electric investor-owned utilities (IOUs), Pacific Gas & Electric, SDG&E, and Southern California Edison, including identifying the steps within IOU control and which are within customer or third-party control **(**Steps 2, 4, 6, 7, and 8 are solely

within the control of an IOU). These steps are: 1) Customer intake; 2) Engineering and Design; 3) Customer Dependencies; 4) Utility Dependencies; 5) Customer Site Readiness; 6) Large Electric IOU Site Readiness; 7) Construction; and 8) Service Energization Provided to the Customer.

The CPUC decision also requires electric IOUs to submit biannual energization reports to the CPUC, with the first report due March 31, 2025, and the second due September 30, 2025, with average completion times, explanations for energization periods that exceed the maximum target, and an analysis of obstacles affecting energization**.** The electric IOUs are required to report compliance with the CPUC's adopted energization targets in those biannual reports. When an electric IOU is out of compliance, it must provide a detailed strategy for meeting the adopted targets in the future. However, the CPUC may require the IOUs to take specific remedial actions based on reported non-compliance to achieve the mandated timelines.

Comments

Need for this bill. According to the author:

> AB 2518 establishes a straightforward priority: eliminate delays and provide for the community. Energization delays are leaving critical infrastructure projects across San Diego, such as affordable housing, schools, and hospitals vacant and useless despite being ready for public access. When these delays occur, that means families are left living on the street, children can't get access to the care they need, and project costs rise.

SDG&E specific pilot program. This bill requires a five-year pilot program to energize customers by specified timelines for projects determined to be construction-ready, meaning all critical dependencies are completed (including permitting and inspections). Under this bill, SDG&E would need to meet the specific timelines which are intended to be sooner for essential services buildings, affordable housing, and health facilities at 40 business days. Category 2 projects for EV chargers and municipal facilities need to be energized by 55 business days and lastly all other remaining project types could be energized by up to 70 business days. SDG&E suggests these timelines are feasible given the stage of the project is at when it is construction ready. They note this is often the final stage of a project development seeking to receive electricity service from SDG&E distribution system.

Alignment with SB 410 and AB 50 decisions. This bill provides that the pilot program and its timelines are intended to complement and not conflict or supersede any rule, order, or CPUC determination when implementing SB 410 and AB 50. This bill also makes clear that the timelines required are not intended to violate Public Utilities Code §453 prohibiting preferential treatment of customers. The understanding of these intentions is perhaps best demonstrated by the lack of opposition to this proposed pilot program.

Related/Prior Legislation

SB 1196 (McNerney, 2026) requires the CPUC by September 30, 2027, in a new or existing proceeding, to establish timelines for electrical corporations to respond to and process requests for small energization projects. The bill is pending before the Governor.

(See Policy Committee Analysis for more)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, the California Public Utilities Commission (CPUC) estimates ongoing costs of $380,000 annually (ratepayer funds) to establish new reporting requirements to track SDG&E's compliance with the bill's energization timelines and oversee the pilot project, among other things.

SUPPORT: (Verified 8/21/26)

San Diego Housing Federation (Source)
San Diego Gas and Electric Company

OPPOSITION: (Verified 8/21/26)

None received

ARGUMENTS IN SUPPORT: According to the San Diego Housing Federation:

> After years of securing entitlements, financing commitments, and construction permits—and after completing construction—affordable housing developments can sit vacant and uninhabitable simply because SDG&E has not yet completed the electrical connection. These delays are not merely inconvenient. They translate directly into construction loan interest accruing without offsetting

rental income, expiring tax credit deadlines, and months of additional wait time for our most vulnerable neighbors looking for an affordable place to call home. …AB 2518 provides a targeted, sensible remedy. The bill requires SDG&E to prioritize energization of 100% affordable housing development projects over other residential energization projects, while preserving SDG&E's discretion to manage safety, reliability, and regulatory compliance. The bill applies a clear definition of "construction ready" to ensure prioritization is triggered only when a project has completed all prerequisites, avoiding any undue burden on the utility.

SUBJECT: Civil claims: public entities and employees: declaration

SOURCE: Author

DIGEST: This bill requires that a claim against a public entity or public employee must include a declaration that, upon information and belief, the contents of the claim are true and correct.

ANALYSIS:

Existing law:

1) Governs, under the Government Claims Act, the tort liability and immunity of, and claims and actions against, public entities, officers, and employees. (Government (Gov.) Code §§ 815 et seq.)

2) Prohibits an aggrieved person from filing a civil lawsuit against a public entity for damages unless the person satisfies the claim presentation requirements. Some types of claims against public entities are not subject to the claim presentation requirements. (Gov. Code § 945.4.)

3) Provides that a claim relating to a cause of action for death or for injury to person or to personal property or growing crops shall be presented as provided

in Government Code sections 915 et seq., not later than six months after the accrual of the cause of action. (Gov. Code § 911.2.)

4) Requires that a claim against a public entity or public employee be signed by the claimant or by some person on the claimant's behalf and include specified information. (Gov. Code § 910, § 910.2.)

This bill requires a claim against a public entity or public employee to include a declaration that, upon information and belief, the contents of the claim are true and correct.

Comments

According to the author:

> AB 2529 strengthens the Government Claims Act process and protects taxpayer dollars from frivolous claims by requiring all employment claims against a public entity to include a declaration that the contents of the claim are true and correct. Coming from a background in local government, I believe that this additional layer of protection is incredibly important in ensuring that all legitimate claims can move forward while those that lack merit are filtered out under this declaration.

The Government Claims Act gives public entities the opportunity to address claims for civil damages before the claimant files a civil lawsuit. The Act specifies information that the claimant must present to the public entity. The claim against a public entity must be signed by the claimant or by some person on the claimant's behalf and include specified information. The public entity then has 45 days to decide whether to grant or deny the claim, unless the claimant and public entity both agree to extend the decision timeframe. The claimant is permitted to file a lawsuit in civil court after they receive the public entity decision. If claim presentation requirements are not met, the claimant's law-suit can be dismissed. This bill requires the claim against the public entity to include a declaration that, upon information and belief, the contents of the claim are true and correct.

The author and supporters believe that the updated declaration will lead to less litigation and less costly litigation.

The California Contract Cities Association writes the following in support:

> Under existing law, claims filed against a public entity or its employees must be signed by the claimant. AB 2529 would add a new layer of

accountability to this process by requiring that claimants sign a formal declaration affirming that the

information contained in their claim is true and correct to the best of their knowledge. This added safeguard will discourage the presentation of frivolous or otherwise bad-faith claims, and ultimately help to reduce cities' litigation costs. As written, AB 2529 is a commonsense measure that will improve claim screening, protect limited local resources, and strengthen cities' legal position.

ASSEMBLY FLOOR: 71-0, 5/11/26 - See last page for vote

SUBJECT: Cannabis: labels, packaging, and manufacturing

SOURCE: Author

DIGEST: This bill requires edible cannabis products and cannabis beverages to include the toll-free telephone number for the national Poison Help line on labels and inserts and requires cannabis beverage products with multiple servings to contain specified information and markers related to the serving sizes, as specified.

Senate Floor Amendments of 8/21/26 delay implementation by six months to July 1, 2027, for certain labeling provisions, clarify serving size information required on a cannabis beverage product, specify that a cannabis beverage product manufacturer is required to provide a measuring device thar meets specified requirements, and makes other technical updates.

ANALYSIS:

Existing law:

1) Establishes the Medicinal and Adult-Use Cannabis Regulation and Safety Act (MAUCRSA) to regulate the cultivation, distribution, transport, storage,

manufacturing, processing, and sale of both medicinal cannabis and adult-use cannabis. (Business and Professions Code (BPC) § 26000)

2) Establishes the Department of Cannabis Control (DCC), under the jurisdiction, of the Business, Consumer Services, and Housing Agency, to administer and regulate provisions of MAUCRSA. (BPC § 26010)

3) Requires all cannabis or cannabis products purchased by a customer to be placed in an opaque package prior to leaving a licensed retail premises. (BPC § 26070.1)

4) Requires cannabis and cannabis products to be labeled and placed in a tamper-evident, child-resistant package and include a unique identifier for the purposes of identifying and tracking prior to delivery or sale at a retailer. Requires package must be re-sealable if the product contains more than one serving. (BPC § 26120(a))

5) Prohibits cannabis product packaging and labels from being attractive to children. (BPC § 26120(b))

6) Requires all cannabis and cannabis products labels and inserts to include the following information displayed in clear and legible fashion in accordance with requirements, including font size, prescribed by the DCC.

This bill:

1) Requires additional labeling information on an edible cannabis product or cannabis beverage product to include the toll-free telephone number for the national poison Help line.

2) Requires the label on a cannabis beverage containing more than one serving to clearly and conspicuously provide a print notice to consumers that the product contains multiple servings, the size of a single serving measured in fluid ounces to nearest tenth of a fluid ounce along with information how to accurately measure a single serving for consumption.

3) Requires for cannabis beverage product containers comprising of more than one serving where the container is transparent or otherwise visibly displays the amount of liquid remaining within the container, to feature unobstructed and conspicuous lines delineating individual or portion sizes unless the container is

shaped in a manner that makes it impossible to feature accurate lines delineating individual serving or portion sizes.

4) Requires at the time of purchase, a consumer be offered a measuring instrument or device provided by the manufacturer on an as-needed basis, that is able to contain at least one fluid ounce and measures to the nearest tenth of a fluid ounce. The measuring instrument is to be free of charge to the consumer.

5) Prohibits a licensed or unlicensed individual engaged in commercial cannabis activity from advertising or marketing cannabis beverage products containing multiple servings as single-serve products or otherwise encourage consumption of multiple servings within a cannabis beverage at one time.

6) Delays implementation for 2-7) above until July 1, 2027.

Background

Department of Cannabis Control (DCC). Today, the DCC is the lead agency responsible for oversight of the regulated cannabis market. DCC has both licensing and enforcement authority related to all commercial cannabis in California, including authority to act against unlicensed cannabis activities and take enforcement actions against any licensee who violates the provisions of MAUCRSA, including for violations of marketing or advertising restrictions. The DCC is vested with authority to make reasonable rules and regulations necessary to implement, enforce, and administer its duties as specified in MAUCRSA. The DCC licenses over 20 license types including laboratories, cultivators, manufacturers, retailers, cannabis event organizers, processors, and distributors. Cannabis in California is regulated from seed to sale including the growing, distribution, and testing of cannabis products.

Labeling and Packaging Requirements for Cannabis. There are strict labeling and packaging requirements for cannabis and cannabis products. Language enacted as part of the original Medical Cannabis Regulation and Safety Act (MCRSA) established standards for cannabis packaging and labeling, including specific cautionary statements. Proposition 64 (Adult Use of Marijuana Act (AUMA)) then codified nearly identical language for its own mandated label content, with a handful of minor variations reconciled when SB 94 merged MCRSA and AUMA into MAUCRSA. Under current law, all cannabis labels must display the following statement in bold print:

> GOVERNMENT WARNING: THIS PRODUCT CONTAINS CANNABIS, A SCHEDULE I CONTROLLED SUBSTANCE. KEEP OUT OF REACH OF CHILDREN AND ANIMALS. CANNABIS PRODUCTS MAY ONLY BE POSSESSED OR CONSUMED BY PERSONS 21 YEARS OF AGE OR OLDER UNLESS THE PERSON IS A QUALIFIED PATIENT. THE INTOXICATING EFFECTS OF CANNABIS PRODUCTS MAY BE DELAYED UP TO TWO HOURS. CANNABIS USE WHILE PREGNANT OR BREASTFEEDING MAY BE HARMFUL. CONSUMPTION OF CANNABIS PRODUCTS IMPAIRS YOUR ABILITY TO DRIVE AND OPERATE MACHINERY. PLEASE USE EXTREME CAUTION.

For cannabis products, the label must display:

> GOVERNMENT WARNING: THIS PRODUCT CONTAINS CANNABIS, A SCHEDULE I CONTROLLED SUBSTANCE. KEEP OUT OF REACH OF CHILDREN AND ANIMALS. CANNABIS PRODUCTS MAY ONLY BE POSSESSED OR CONSUMED BY PERSONS 21 YEARS OF AGE OR OLDER UNLESS THE PERSON IS A QUALIFIED PATIENT. THE INTOXICATING EFFECTS OF CANNABIS PRODUCTS MAY BE DELAYED UP TO TWO HOURS. CANNABIS USE WHILE PREGNANT OR BREASTFEEDING MAY BE HARMFUL. CONSUMPTION OF CANNABIS PRODUCTS IMPAIRS YOUR ABILITY TO DRIVE AND OPERATE MACHINERY. PLEASE USE EXTREME CAUTION.

In addition to the above statements, MAUCRSA requires certain information about the product's ingredients and contents to be listed, as well as information associated with a unique identifier number for purposes of tracking the cannabis goods. If the product utilizes a vaporizer, it must include the recycle symbol and all cannabis products are required to display the universal symbol developed by the DCC through regulations. MAUCRSA also authorizes the DCC to set its own additional requirements for cannabis packaging and labeling. Regulations promulgated by the DCC and its predecessors have incorporated additional labeling standards. For example, all labels must be "unobstructed and conspicuous" in at least 6-point type size and must be written in English. If the cannabis product is edible, the regulations require specific information about potential allergens in the product, the names of any artificial colorings, and any sugar, carbohydrates, and total fat per serving.

This bill proposes to mandate that all cannabis and cannabis product labels include the toll-free number for the national Poison Help line. According to information

from the California Department of Public Health *Cannabis Poison Control System Calls Dashboard*, between 2016-2024, the total number of calls to the California Poison Control System increased by 162% where the largest increases in those calls was seen in cannabis exposure among children aged five and under. Four other states require a similar poison control hotline number be marked on a label including New Mexico, Washington, Vermont and New Jersey. Michigan requires the poison control hotline information to be contained in a pamphlet provided at the time of sale.

Under MAUCRSA, cannabis beverages are defined as a "form of edible cannabis product that is intended to be consumed in its final state as a beverage." All cannabis beverages are required to abide by the same labeling requirements as all other cannabis and cannabis products but are authorized to be packaged in containers that are clear or any color. Because cannabis beverage products often contain more than one serving in a container this bill proposes, beginning July 1, 2027, to implement recommendations from the California State Auditor's report by requiring a cannabis beverage container that includes more than one serving to feature unobstructed and conspicuous line(s) delineating the individual and serving size. Additionally, this bill will require manufactures of cannabis beverage products containing more than one serving, to offer the consumer at the time of purchase a free measuring instrument or device that will allow the consumer to measure a single serving. Lastly, this bill would prohibit a licensed or unlicensed individual from advertising or marketing a cannabis beverage product as a "single serving" product if the beverage contains more than one serving.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/20/26)

California Academy of Child & Adolescent Psychiatry
Public Health Institute
Youth Forward

OPPOSITION: (Verified 8/20/2026)

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 73-0, 5/4/26 (Consent) - See last page for vote

SUBJECT: Horse racing: satellite wagering facilities: authorizations

SOURCE: Author

DIGEST: This bill makes various minor revisions to existing Horse Racing Law governing the authorization of satellite wagering facilities in the state, as specified.

ANALYSIS:

Existing law:

1) Prohibits, pursuant to the Horse Racing Law, a satellite wagering facility, except a facility that is located at a track where live racing is conducted, from being located within 20 miles of any existing satellite wagering facility or of any track where a racing association conducts a live racing meeting, except, in the northern zone, the racing association or existing satellite wagering facility is authorized to waive this prohibition and consent to locating the new satellite wagering facility within 20 miles of the facility of the track.

2) Requires, before a satellite wagering facility may be licensed for the 1997 and subsequent calendar years, the Department of Food and Agriculture (CDFA) to conduct a one-year test at the proposed site in order to determine the impact of the proposed facility on total state parimutuel revenues and on attendance and wagering at existing racetracks and fair satellite wagering facilities in the Counties of Alameda, San Mateo, Santa Clara, and Solano.

3) Authorizes fairs to contract for the operation and management of a satellite wagering facility with an individual racing association or a partnership, joint venture, or other affiliation of two or more racing associations or fairs that are licensed to conduct thoroughbred meetings or simulcast wagering within the northern zone.

This bill:

1) Expands the above-mentioned 20-mile exemption to include the entire state.

2) Deletes the requirement that the CDFA conduct a one-year test as described above.

3) Expands the above-mentioned authorization for fairs to contract for thoroughbred meetings or simulcast wagering within the state, as specified.

Background

Author Statement. According to the author's office, "this bill is intended to provide technical and clarifying changes to the Horse Racing Law following the cessation of live horse racing in Northern California in December 2024. This update is necessary because current authorizations for satellite wagering and related distributions are tied to geographic racing zones (Northern, Central, and Southern). The bill would extend an existing satellite wagering authorization, contingent upon consent from entities involved in statewide live racing operations. It would not expand current law; rather, it ensures that an existing authorization remains available should the industry choose to utilize it."

Horse Racing in California. The horse racing industry in California is grappling with a multifaceted crisis that threatens its long-term viability. Over the past three to four decades, California's horse racing industry has seen a significant decline in attendance, purses, and betting handle—a trend that mirrors shifts in consumer habits and growing competition from alternative forms of entertainment and

gambling. In its heyday, iconic tracks like Santa Anita, Del Mar, and Hollywood Park attracted tens of thousands of spectators on race days, creating a vibrant atmosphere that drove robust on-track wagering. As simulcasting emerged in the 1980s and online betting platforms took off in the early 2000s, fans increasingly chose to place their bets from home or at local simulcast facilities rather than visiting the tracks, causing live attendance to plummet.

In 2023, it was announced that the Golden Gate Fields racing track on the eastern shore of the San Francisco Bay would be closing permanently at the end of their 2024 meet. In early 2025, the California Authority of Racing Fairs (CARF) announced that it would abandon plans to organize horse racing in Northern California throughout several county fairs. At the time of last summer's racing meet, there were roughly 900 horses stalled in Pleasanton at the Alameda County fairgrounds, however with the closure of Golden Gate Fields and increasing financial distress, there were somewhere between 450 and 500 at the time of CARF's announcement.

The Alameda County Fair Board voted in January of this year to shut down their racing operations, citing an outdated water drainage system and an inability to sustain so many horses. Again, the larger issue continues to be the increasing unprofitability of the industry. According to a recent article by *NBC Bay Area News* titled "Race horses forced out of Alameda County Fairgrounds leaving owners, trainers scrambling," Alameda County Fairgrounds CEO Jerome Hoban said, "[i]t's no secret that horse racing has been economically moving in the wrong direction for a long time," and that "[t]he Alameda County Fair has lost over $2 million in just the fall race meet." This effectively ended the long-standing northern zone regional circuit.

Satellite Wagering. Satellite wagering via an off-track facility has been legal in California since the 1980s when California racetracks began experiencing declining attendance and handle figures. The industry believed that making the product easier to access not only would expose and market horse racing to potential customers but also make it more convenient for the existing patrons to wager more frequently. However, while off-track-betting and simulcasting can open new revenue pathways, they may cannibalize traditional on-track income, putting tracks at further financial risk and potentially contributing to closures.

Simulcasting. Simulcasting is the process of transmitting the audio and video signal of a live racing performance from one facility to a satellite for re-transmission to other locations or venues where pari-mutuel wagering is permitted.

Simulcasting provides racetracks with the opportunity to increase revenues by exporting their live racing content to as many wagering locations as possible, such as other racetracks, fair satellite facilities, and Indian casinos. Revenues increase because simulcasting provides racetracks that export their live content with additional customers in multiple locations who would not have otherwise been able to place wagers on the live racing event.

Thoroughbred racing associations and fairs in California can distribute the audiovisual signal and accept wagers on the results of out-of-state thoroughbred races during their own race meetings. This is allowed even on days when no live races are being held at their venues. There is a limit on the number of out-of-state races that can be imported into California for betting purposes. On days when there is live thoroughbred or fair racing happening in California, the total number of races imported from out-of-state must not exceed 75 races-per-day.

However, there are exceptions to this limit. Races that are part of specific major events like the Kentucky Derby, Breeders' Cup, and other specified races can be imported without falling under the 75 race-per-day limit. Additional exceptions are made for importing races into certain geographical zones of California when no local live racing is occurring. Any wagering on these out-of-state races must comply with specific provisions of California's Horse Racing Law that govern how betting should be conducted. Wagers on out-of-state races are not allowed after 7 p.m. Pacific Standard Time unless there is consent from the local harness or quarter horse racing associations conducting live racing in either Sacramento or Orange County.

Advance Deposit Wagering. The California horse racing industry entered into a new era in 2002 with the advent of Advance Deposit Wagering (ADW) which allows customers to deposit funds into an account in order to wager online and/or over the phone. These wagers are commingled into pools at the host track where the races are run, and within the pari-mutuel wagering system regulated by California Horse Racing Board (CHRB). Currently, eight ADW providers are operating in the state under a CHRB license. During the 2023-2024 fiscal year (FY), off-track betting within the state provided 13% of the total handle. The balance of the handle comes from out-of-state and ADW wagers – ADW accounted for about 45% or $1.34 billion. ADW remains the only legal form of online wagering in California.

Pari-mutuel Wagering. Horse racing has been active in California since the 1800s, but horse racing as we now know it – under the pari-mutuel wagering system – was

not made possible until the electorate passed a constitutional amendment in 1933. The expressed intent of California's Horse Racing Law is to allow pari-mutuel wagering on horse races. Pari-mutuel, from the French term for mutual betting, is a betting system in which all bets of a particular type are placed together in a pool, and payoff odds are calculated by sharing the pool among all winning bets. Pari-mutuel betting differs from fixed-odds betting in that the final payout is not determined until the pool is closed – in fixed-odds betting, the payout is agreed at the time the bet is sold.

Related/Prior Legislation

SB 1294 (Rubio, 2026) adds the Japan Cup to the existing group of thoroughbred horse race meetings that are exempt from the 75 race-per-day limit on imported races into California for the purposes of wagering. (Pending on the Assembly Inactive File)

Vote: 21

PRIOR VOTES NOT RELEVANT

NOTE: On August 11, 2026, the Senate Governmental Organization Committee held an informational hearing on the tribal-state gaming compact between the State of California and the Yurok Tribe of the Yurok Reservation, California

SUBJECT: Tribal-state gaming compacts: ratification

SOURCE: Author

DIGEST: This bill ratifies the Tribal-State Gaming Compact between the State of California and the Yurok Tribe of the Yurok Reservation, California, executed on August 4, 2026.

Senate Floor amendments of 8/20/26, delete the previous bill and instead ratify the Tribal-State Gaming Compact between the State of California and the Yurok Tribe of the Yurok Reservation, California, executed on August 4, 2026.

ANALYSIS:

Existing law:

1) Provides, under the Indian Gaming Regulatory Act (IGRA), for the negotiation and conclusion of compacts between federally recognized Indian tribes and the State for the purpose of conducting Class III gaming activities on Indian lands within a State as a means of promoting tribal economic development, self-sufficiency, and strong tribal governments.

2) Authorizes expressly a number of tribal-state gaming compacts between the State of California and specified Indian tribes.

3) Authorizes the conduct of Class III gaming activities to the extent such activities are permitted by state law, a gaming compact has been concluded by a federally recognized tribe and the State, and the compact has been approved by the Secretary of the Interior.

4) Limits the operation of Class III gaming activities to Indian lands acquired on or before October 17, 1988. Provides, for certain exceptions to conduct gaming activities on Indian lands acquired after October 17, 1988.

5) Defines "Indian lands" to mean all lands within the limits of any Indian reservation, and any lands title to which is either held in trust by the United States for the benefit of any Indian tribe, or individual, or held by any Indian tribe or individual subject to restriction by the U.S. against alienation and over which an Indian tribe exercises governmental power.

6) Requires the State to negotiate to conclude a compact in good faith with an Indian tribe having jurisdiction over the Indian lands upon which the Class III gaming activity is to be conducted. Provides the U.S. district courts with jurisdiction over any cause of action initiated by a tribal government alleging that the State failed to negotiate in good faith to conclude a compact. Prescribes the remedy, mediation supervised by the courts, if it is found that the State failed to negotiate in good faith to conclude a compact.

7) Authorizes the Governor, under the California Constitution, to negotiate and conclude compacts, subject to ratification by the Legislature.

This bill:

1) Ratifies the Tribal-State Gaming Compact between the State of California and the Yurok Tribe of the Yurok Reservation, California, executed on August 04, 2026.

2) Contains an urgency clause.

Background

Tribal-State Gaming Compact. The Tribal-State Gaming Compact (hereafter "Compact") between the Yurok Tribe of the Yurok Reservation, California (hereafter "Tribe") was executed on August 04, 2026. The Compact authorizes the Tribe to operate a maximum of 349 slot machines at no more than three gaming facilities located on eligible Indian lands held in trust for the Tribe.

The Tribe has agreed to pay the State its pro rata share of costs the State incurs for the performance of its duties under the Compact. The Compact does not require the Tribe to pay into the Revenue Sharing Trust Fund (RSTF) or the Tribal Nation Grant Fund (TNGF).

Certain terms of the Compact related to licensing, regulatory, patron protection, and public health provisions are substantially the same as recent compacts. Specifically, the Compact includes a Tribal Labor Relations Ordinance (TLRO), which provides that gaming may commence only after the Tribe has adopted a TLRO that allows for a secret ballot election and union neutrality.

The Compact's preamble notes that the Tribe and the State have concluded that this compact protects the interests of the Tribe and its members, the surrounding community, and the California public, and will promote and secure long-term stability, mutual respect, and mutual benefit.

The Tribe currently operates the Redwood Hotel Casino which consists of two separate entities, the Redwood Holiday Inn Express and the Redwood Casino. The Redwood Holiday Inn Express is a 60-room hotel complete with exercise room and pool. The Redwood Casino, located in Klamath, CA, currently hosts 99 Class III machines and includes the Abalone Bar and Grill. The development of the Redwood Hotel Casino is only a portion of a broader master plan for the Tribe, community, which also includes the Yurok Construction Corporation, Yurok Indian Housing Authority, Yurok Language Department, Yurok Office of Emergency Services, Yurok Telecommunications Corp, and the Yurok Tribal Court.

Once effective (legislative ratification and federal approval required), this Compact will be in full force and effect for 25 years following the effective date.

Indian Gaming Regulatory Act. In 1988, Congress enacted IGRA to provide a statutory basis for the operation and regulation of gaming on Indian lands. IGRA provides that an Indian tribe may conduct gaming activity on Indian lands if the activity "is not specifically prohibited by federal law and is conducted within a State which does not prohibit such gaming activity."

IGRA distinguishes between three classes of gaming (Class I, Class II, and Class III) and provides for different forms of regulation for each class. Class I gaming includes "social games" for minor prizes or "traditional forms of Indian gaming." Class II gaming is defined to include bingo and card games that are explicitly authorized by the laws of the state, or that are not explicitly prohibited by the laws

of the state and are played at any location in the State, so long as the card games are played in conformity with those laws and regulations. Class III gaming includes such things as slot machines, casino games, and banked card games such as blackjack and baccarat. Class III gaming may only be conducted under terms of a compact negotiated between an Indian tribe and a State.

IGRA was enacted against a legal background in which Indian tribes and individuals generally are exempt from state taxation within their own territory. IGRA provides that with the exception of assessments permitted under the statute, to defray the State's costs of regulating gaming activity, IGRA shall not be interpreted as conferring upon a State authority to impose any tax, fee, charge, or other assessment upon an Indian tribe to engage in Class III activity. Nor may a State refuse to enter into negotiations based on the lack of authority to impose such a tax, fee, charge, or other assessment.

When a tribe requests negotiations for a Class III compact, IGRA requires the State to negotiate with the Indian tribe in good faith. IGRA provides a comprehensive process to prevent an impasse in compact negotiations, which is triggered when a tribe files suit alleging that the State has refused to negotiate or has failed to negotiate in good faith.

Before 2000, the California Constitution prohibited Class III gaming. In 2000, California voters approved Proposition 1A, which had been proposed by the Governor and passed by the Legislature. Proposition 1A amended the California Constitution to permit the State to negotiate compacts with federally recognized Indian tribes for certain Class III gaming activities. Because non-Indian parties were still forbidden from operating gaming facilities, Proposition 1A granted Indian tribes a "constitutionally protected monopoly on most types of Class III games in California."

Chicken Ranch Decision. In 2021, the Chicken Ranch Rancheria of Me-Wuk Indians, along with four other tribes—the Blue Lake Rancheria, Chemehuevi Indian Tribe, Hopland Band of Pomo Indians, and Robinson Rancheria—filed suit against the State of California and Governor Gavin Newsom. The tribes alleged that the state violated IGRA by failing to negotiate new Class III gaming compacts in good faith.

According to the complaint, California insisted on compact terms covering family law, environmental regulation, and tort liability—subjects that the tribes argued were outside IGRA's limited scope, which allows negotiation only on matters directly related to the operation of gaming activities. In July 2022, the Ninth

Circuit Court of Appeals upheld the district court's finding that California's demands exceeded IGRA's bounds and therefore constituted bad-faith negotiation. The court ordered the parties to move forward under IGRA's remedial process. Under that process, if the parties are ultimately not able to agree on a compact, a mediator reviews each side's "last best offer" and selects the proposal that best aligns with federal law, and the U.S. Department of the Interior (through the Assistant Secretary for Indian Affairs) issues Secretarial Procedures regulating the tribe's gaming operation without state involvement. This outcome was viewed by Indian tribes as a significant affirmation of tribal sovereignty and a rejection of state overreach in tribal gaming regulation. The Governor's office believes the terms of this Compact are consistent with this court decision.

Revenue Sharing Trust Fund. Existing law creates in the State Treasury the RSTF for the receipt and deposit of monies derived from gaming device license fees that are paid into the RSTF pursuant to the terms of specified tribal-state gaming compacts for the purpose of making distributions to non-compacted California tribes (e.g., federally-recognized non-gaming tribes and tribes that operate casinos with fewer than 350 slot machines). Revenue in the RSTF is available to CGCC, upon appropriation by the Legislature, for making distributions of $1.1 million annually to non-compact tribes. The RSTF was created as part of the 1999 compacts, which, in conjunction with the passage of Proposition 1A, created gaming compacts with approximately 60 California tribes. Non-compact tribes are considered third-party beneficiaries of the 1999 compacts.

Tribal Nation Grant Fund. This particular fund (referenced in recent compacts) was created to complement the RSTF and provides for the distribution of funds to non-gaming tribes, upon application of such tribes for purposes related to effective self-governance, self-determined community, and economic development. Payments from this fund are intended to be made to non-gaming tribes on a "need" basis, upon application.

SUBJECT: Public health: public postsecondary education: student health centers: abortion by medication techniques

SOURCE: ACCESS Reproductive Justice
Black Women for Wellness Action Project
California Latinas for Reproductive Justice
Plan C
Reproductive Freedom for All California
Student Senate for California Community Colleges
TEACH
Unite for Reproductive and Gender Equity California

DIGEST: This bill requires a community college that has a student health center, upon appropriation by the Legislature, to offer medication abortion, promote awareness of those services, provide information on those services to students, and post their availability its website.

Senate Floor Amendments of 8/20/2026 are technical and clarifying in nature.

ANALYSIS:

Existing law:

1) Requires University of California (UC) and California State University (CSU) student health centers to offer medication abortion onsite. Permits this service to be performed by providers on staff at the student health center, through telehealth services, or by providers associated with a contracted external agency. [Education Code (EDC) §99251(a)]

2) Requires the Commission on the Status of Women and Girls to administer the College Student Health Center Sexual and Reproductive Health Preparation Fund, for the purposes of providing private moneys in the form of direct allocations to UC and CSU to support medication abortion readiness at each student health center. [EDC §99251(b)(1)]

3) Requires the Commission, upon request from a UC or CSU student health center, to assist and advise on potential pathways for the student health center to bill public programs and health insurance to help pay for the costs of providing medication abortion. Requires the Commission, each year until December 31, 2026, to submit a report to the Legislature that includes information about the number of health centers that provide medication abortion, the numbers of medication abortions provided, and funding used for medication abortion at student health centers. [EDC §99251(b)(4)(B) and §99251(e)]

This bill:

1) Requires community colleges that have a student health center, beginning January 1, 2029, to offer access to medication abortion. Permits this service to be performed by providers on staff at the student health center, through telehealth services, by providers associated with a contracted external agency, or through partnerships with other community health providers, as appropriate. Requires a community college to be deemed to provide access through a partnership with a community health provider if the health center has

established a written referral relationship, memorandum of understanding, or contract with one or more licensed providers capable of providing abortion by medication techniques.

2) Permits community colleges to satisfy this requirement by facilitating referrals or warm handoffs, assisting students in identifying support resources, and maintaining current referral information for participating providers.

3) Requires a community college that has a student health center to promote awareness of the availability of medication abortion services, provide that information to students, and post their availability on its website.

4) Requires the Chancellor of the California Community Colleges, upon request from a community college student health center, to assist and advise on potential pathways for the student health center to bill public programs and health insurance providers to help pay for the costs of providing access to medication abortion.

5) Permits the Chancellor of the California Community Colleges to enter into a statewide agreement with a health provider to provide community college student health centers with the services and resources needed to meet the requirements of this bill.

6) Requires the Commission on the Status of Women and Girls, by January 1, 2030, to submit a report to the Legislature, that includes, but is not limited to, the following information separately for each community college:

   a) The number of student health centers that provide medication abortion, provide access to medication abortion through other providers, or both; and,

   b) The number of medication abortions performed at student health centers or assisted through student health centers, disaggregated, to the extent possible, by student health center.

7) Requires the Commission on the Status of Women and Girls, in consultation with the Chancellor of the California Community Colleges, to develop a standardized reporting framework that minimizes administrative burden and protects student privacy. Requires a community college student health center to only be required to report information that is reasonably available through its existing operations and records. Prohibits this bill from requiring a community college district or student health center to collect protected health information

from an external provider, track services delivered by an external provider beyond information voluntarily provided by a student or the provider, or establish new clinical data systems for the sole purpose of meeting the reporting requirements.

8) Makes the implementation of the requirements related to community colleges contingent upon an appropriation for its purposes in the annual Budget Act or another statute to support the cost, both direct and indirect, of meeting the requirements of this section. Permits any appropriated funds to be used for implementation readiness activities and ongoing operational costs, including, but not limited to:

   a) Telehealth infrastructure and technology;

   b) Contracts with external providers and community partners;

   c) Clinical staffing, prescribing services, and medical oversight;

   d) Staff training and professional development;

   e) Administrative and legal support;

   f) Insurance billing consultation and infrastructure;

   g) Student outreach and educational materials;

   h) Data collection and reporting; and,

   i) Other direct and indirect costs reasonably necessary.

9) Requires UC and CSU student health centers to promote awareness of medication abortion services they offer, provide information on those services to students, and post their availability on their websites.

Background

According to the author of this bill:

> Reproductive healthcare is an essential part of student health. All students deserve the same, equitable access to critical services – no matter what type of college they choose to attend. While CSU and UC students already have access to medication abortion, community college students, who are more likely to be low-income, working, and students of color, do not get to reap the benefits of this important service. This bill closes a gap by ensuring that 2.2 million

students can access medication abortion services at their student health centers, through telehealth, or through contracted external entities. This bill will also require campuses to provide information about medication abortion services, so students can access care without stigma, confusion or delay.

Abortion. Sexual and reproductive health care services, including abortion care, are included in the World Health Organization's (WHO) 2020 list of essential health care services. According to the WHO, abortion is a simple health care intervention that can be safely and effectively managed by a wide range of health workers using medication or a surgical procedure. In the first 12 weeks of pregnancy, a medical abortion can also be safely managed by a pregnant person at home. This requires that the person has access to accurate information, quality medicines, and support from a trained health worker (if they need or want it during the process).

According to a May 2026 KFF factsheet on medication abortion, there are two medication abortion regimens that have a long safety and efficacy record: mifepristone with misoprostol (the most common regimen in the U.S.) and misoprostol alone. Mifepristone, also known as RU-486, is sold under the brand name Mifeprex and through a generic manufactured by GenBioPro. Mifepristone works by blocking progesterone, a hormone essential to the development of a pregnancy, and preventing a pregnancy from progressing. Misoprostol, taken 24 to 48 hours after mifepristone, works to empty the uterus by causing cramping and bleeding, similar to an early miscarriage. The U.S. Food and Drug Administration (FDA) has found that medication abortion is a safe and highly effective method of pregnancy termination, and approves use of medical abortions for up to ten weeks of pregnancy. In 2023, the FDA announced the in-person dispensing requirement for medication abortion was formally removed. When taken, medication abortion successfully terminates pregnancy 91.9% to 99.7% of the time, with a 0.4% risk of major complications, and an associated mortality rate of 0.0005%. While the combined regimen of mifepristone and misoprostol for medication abortion is recommended, there is a second medication abortion protocol using misoprostol only that is more commonly used internationally. The regimen is also recommended for up to ten weeks of pregnancy. Research has shown the misoprostol-only regimen to be a safe and highly effective method of pregnancy termination; however, it may result in a higher incidence of side effects, particularly diarrhea, fever, and chills. The misoprostol-only regimen successfully terminates pregnancy approximately 80% to 100% of the time, with a complication rate of less than 1%.

Coverage for abortion care. The national median self-pay price for abortion medication in 2023 was $563, although medications provided by telehealth clinics were much lower in price ($150). Although Danco Laboratories does not make the cost of Mifeprex public, providers report that Mifeprex pills alone cost them around $90 a pill. GenBioPro, the manufacturer of the generic mifepristone drug also does not report the cost of their pill. Federal Medicaid funding only pays for abortions when the pregnancy is a result of rape or incest or a threat to the pregnant person's life. In California, the Knox-Keene Act requires the provision of basic health care services, and the California Constitution prohibits health plans from discriminating against women who choose to terminate a pregnancy. Thus, all health plans must treat maternity services and legal abortion neutrally. Exclusions and limitations are also incompatible with both the California Reproductive Privacy Act and multiple California judicial decisions that have unambiguously established under the California Constitution that every pregnant person has the fundamental right to choose to either bear a child or to have a legal abortion. A health plan is not required to cover abortions that would be unlawful under existing law. The Medi-Cal program is one of 20 state Medicaid programs that use state funds to cover abortion and follow-up services. The Medi-Cal program covers abortions as a physician service without cost sharing for all enrollees.

Commission annual report. SB 24 (Leyva, Chapter 740, Statutes of 2019) requires CSU and UC student health centers to offer medication abortion services, and requires the Commission on the Status of Women and Girls to produce annual reports of how each UC and CSU are expending funds for medication abortion services. According to the 2025 report, all ten UC campuses have implemented the provision of medication abortion in their student health centers on January 1, 2024. All 23 CSU campuses implemented the provision of medication abortion in their student health centers on January 1, 2023. Below is a table summarizing data for UC and CSU campuses.

Table 1: Select SB 24 Data by Campus

Fiscal Year	Cumulative Total of State Grant Funds Expended by UC Campuses[4]	Total Number of Abortions by Medication Provided on UC Campuses		Cumulative Total of State Grant Funds Expended by CSU Campuses[5]	Total Number of Abortions by Medication Provided on CSU Campuses
2020-21	$434,429.31	–		–	–
2021-22	$656,503.31	72		–	0
2022-23	$926,505.66	203		$1,628,519.98	162
2023-24	$1,009,379.12	276		$2,728,740.92	412
2024-25	$1,294,135.08	297		$3,285,329.02	349

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The California Community Colleges Chancellor's Office indicates unknown, but likely minor to moderate Proposition 98 General Fund costs, if districts satisfy the bill through referral-based partnerships with qualified healthcare providers. Based on a recent statewide survey conducted by the Health Services Association of California Community Colleges, more than 95% of community college health centers currently rely on referrals to external providers, while fewer than 5% provide medication abortion onsite. Under this referral model, costs would be primarily associated with updating protocols, training staff, providing patient education and care coordination, and conducting outreach regarding available services.

  To the extent districts instead choose to provide medication abortion onsite or through telehealth partnerships, ongoing Proposition 98 General Fund costs could increase to the millions of dollars statewide. These models would require colleges to hire or contract with prescribing clinicians, establish new protocols, purchase equipment and supplies, train staff, modify facilities and information systems, and provide ongoing clinical oversight and compliance. Because community college health centers vary considerably in staffing, clinical capacity, and available resources, implementation costs would ultimately depend on the model each district adopts.
  Minor one-time General Fund state operations costs for the Chancellor's Office to consult with the Commission on Status of Woman and Girls on collecting data for the report.
- UC and CSU anticipate minor and absorbable costs.
- The Commission on the Status of Women and Girls anticipates minor and absorbable costs.

ARGUMENTS IN SUPPORT: This bill is sponsored by ACCESS Reproductive Justice, Black Women for Wellness Action Project, California Latinas for Reproductive Justice, the Student Senate for California Community Colleges, Reproductive Freedom for All, and Unite for Reproductive and Gender Equity. The sponsors note that The College Student Right to Access Act (SB 24) was signed and passed into law in 2019 to reduce barriers to abortion care for college students. Although SB 24 has been able to support students on these campuses, it left a huge gap for community college students. The sponsors state that this bill

closes that gap by allowing California community colleges that have existing student health centers to provide students with medication abortion services. Community colleges are the largest educational system within the state of California with 116 campuses that serve over two million students every year. The sponsors argue that the pathway that community colleges offer for students is the largest starting point for college students across the state, and while all 116 community colleges are required to have basic needs services, the presence of comprehensive, fully operational on-campus student health centers varies. Multiple sources show that about 93 out of the 116 (nearly 80%) community colleges have a student health center with others relying on partnerships, referrals, or telehealth to offer services. The sponsors conclude that California college students, no matter community college, CSU or UC, need and deserve equitable access to abortion care and that to achieve true reproductive freedom for all Californians, we must ensure that communities have equitable access to medication abortion care.

ARGUMENTS IN OPPOSITION: California Catholic Conference states that abortion is already free and ubiquitous in California – available on college campuses, performed by doctors, nurse practitioners, midwives, and physician assistants, as well as at 400 facilities across the state, and via telehealth and a dozen sources by mail. At the same time, student parents face a lack of affordable and accessible childcare with waitlists of a year or more on campus, high family housing costs, and fewer and fewer options for medical care. Pushing unwanted abortion on our communities is exploitative and is reproductive coercion. California Family Council writes that if the California Legislature is genuinely concerned about the health and well-being of pregnant students, it should ensure that the full range of support options receives equal or greater visibility and promotion on campus. Pregnancy resource centers across California offer no-cost medical services, material support, counseling, and ongoing care to women facing unplanned pregnancies, without the documented physical risks associated with chemical abortion. Additionally, adoption is a great option that should be promoted. Concerned Women for America Legislative Action Committee states that positioning abortion as essential healthcare shapes societal attitudes toward life, implicitly suggesting that some lives are expendable. A society that affirms the value of life at all stages builds support systems for families and pregnant individuals, rather than normalizing the deliberate ending of life as a routine medical service.

SUBJECT: Public postsecondary education: Equity in Higher Education Act: prohibition on violence, harassment, intimidation, and discrimination: student hearings

SOURCE: Author

DIGEST: This bill requires the California State University (CSU), and requests of the University of California (UC), to: (1) hold an open forum on a selected campus, by December 31, 2027, to elicit student feedback regarding content-neutral time, place, and manner (TPM) restrictions, and (2) submit information on student code of conduct violations that occurred during, or as a result of, a protest on campus and a description of the discipline imposed on the student as a result of the specified student code of conduct violation.

ANALYSIS:

Existing federal law:

1) Requires that no person in the United States, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or

be subjected to discrimination under any program or activity receiving Federal financial assistance. (United States Code, Title 42, Chapter 21, Subchapter V, § 2000d … commonly known as Title VI of the Civil Rights Act)

2) Prohibits Congress from making any law respecting an establishment of religion, prohibiting the free exercise thereof; abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances. (First Amendment to the United States Constitution)

Existing state law:

1) States that the Trustees of the CSU and the Regents of the UC have the primary responsibility to prevent and address conduct that either creates a hostile environment for students on campus, or results in differential treatment of students on campus based on a student's actual or perceived race, color, ethnicity, national origin, religion, or disability status. (Education Code (EC) § 66270.7)

2) Requires the Trustees of the CSU and requests the Regents of the UC to adopt rules and procedures in the student codes of conduct that: a) prohibit violent, harassing, intimidating, or discriminatory conduct that creates a hostile environment on campus, and b) prohibit conduct that limits or denies a person's ability to participate in or benefit from the free exchange of ideas or the educational mission of the universities. (EC § 66270.7)

3) Provides that every person may freely speak, write, and publish his or her sentiments on all subjects, being responsible for the abuse of this right, and prohibits a law from restraining or abridging liberty of speech or press. (California Constitution, Article I, § 2)

4) Prohibits the Regents of the UC, the Trustees of the CSU, the governing board of a community college district, a private postsecondary educational institution, and an administrator of any campus of those institutions, from making or enforcing a rule subjecting a student to disciplinary sanction solely on the basis of conduct that is speech or other communication that, when engaged in outside a campus of those institutions, is protected from governmental restriction by the United States Constitution or California Constitution. (EC § 66301 and § 94367)

5) Provides that #3 and #4 do not prohibit an institution from adopting rules and regulations that are designed to prevent hate violence from being directed at students in a manner that denies them their full participation in the educational process, if the rules and regulations conform to standards established by the First Amendment to the United States Constitution and Section 2 of Article I of the California Constitution for citizens generally. (EC § 66301 and § 94367)

This bill:

1) Requires the CSU, and requests of the UC, to include—as part of a report submitted annually on student code of conduct violations—information on student code of conduct violations that occurred during, or as a result of, a protest on campus and a description of the discipline imposed on the student as a result of the specified student code of conduct violation, and requires any submitted student data to be disaggregated by race and gender.

2) Requires the CSU, and requests of the UC, to hold an open forum on a selected campus, by December 31, 2027, to elicit student feedback regarding content-neutral TPM restrictions, including how students feel about the restrictions and the way the restrictions are being enforced.

3) Requires the CSU, and requests of the UC, to notify the relevant policy committees of the Legislature of the location and date of the specified open forum.

Comments

1) *Need for the bill.* According to the author, "Due to the unintended consequences of prior legislation, students are most directly affected by time, place, and manner (TPM) restrictions and their enforcement, yet their perspectives are often overlooked. Various pressing concerns have been raised about TPM implementation, including the arrest of peaceful protesters, the disciplinary actions against student advocates and organizers, and the disproportionate impact of enforcement on students and faculty of color. … AB 2551 creates meaningful opportunities for students to contribute their thoughts and experiences in informing campus policy that affects their rights, safety, and lives on campus."

2) *Recent legislation addressing protests on college campuses.* In the wake of protests on college campuses in spring 2024, the 2024 Budget Act required the

CSU and the UC to prepare a campus climate notification by the beginning of the Fall 2024 term and to develop a systemwide framework to provide for consistency with campus implementation and enforcement. (For the UC specifically, a lack of compliance meant that $25 million from the state budget would not be released to UC campuses.) Further, the 2024 Budget Act required each UC and CSU campus to provide notification of the following to students before the start of each academic year:

a) The campus' TPM policy, which identifies the allowable parameters of free speech activities and the campus.

b) The Student Code of Conduct, which identifies acceptable student behavior, and relevant state and federal laws.

c) The systemwide Nondiscrimination Policy.

d) The process by which the campus will resolve any complaint of a violation of relevant institutional policies, state law, or federal law, including complaints against individuals not affiliated with the campus.

e) The range of consequences possible for students, faculty, or staff who violate relevant institutional policies, state law, or federal law.

f) How the campus may respond to activities that threaten the safety of students, faculty, or staff, and disrupt their ability to access the campus or buildings, the educational process, or activities on campus.

g) How the campus intends to foster healthy discourse and bring together campus community members, and viewpoints that are ideologically different, in order to best promote the educational mission of the institution and the exchange of ideas in a safe and peaceful manner.

h) Identify educational programs and activities for faculty, staff, and students to support the balance between free speech activities, educational mission, and student safety.

i) A list of the resources available on campus for faculty, staff, and students to receive mental health and trauma support.

Three months later, SB 1287 (Glazer, Chapter 892, Statutes of 2024) was signed by the Governor. SB 1287 requires the Trustees of the CSU, and requests the Regents of the UC, to adopt rules and procedures in the student codes of conduct that:

a) Prohibit violent, harassing, intimidating, or discriminatory conduct that creates a hostile environment on campus.

b) Prohibit conduct that limits or denies a person's ability to participate in or benefit from the free exchange of ideas or the educational mission of the segment.

c) Establish reasonable content-neutral TPM restrictions, and, if applicable, any advance permitting requirements for protests on campus.

SB 1287 also requires the campuses to adopt rules and procedures to take reasonable steps to respond to each incident creating a hostile environment on campus, or that limits the free exchange of ideas; requires mandatory training programs for students; and requires students to acknowledge their campus' student code of conduct.

3) *Consistent with 2024 Budget Act requirements, UC and CSU put forward systemwide frameworks in August 2024.* Before 2024, all UC and CSU campuses had TPM restrictions to ensure safety, security, and order. However, the 2024 Budget Act specifically required the UC and CSU systems to develop a systemwide framework to provide consistency with campus implementation and enforcement.

   In letters sent to leadership of their respective campuses in August 2024, the UC Office of the President provided a directive to each campus to provide a compilation of existing policies that most commonly apply to protest and demonstration activity, while the CSU Chancellor's Office developed and issued a systemwide TPM policy. Both UC and CSU letters also included prohibitions on university property for the following:

   a) Camping/encampments and unauthorized structures.

   b) Restricting free movement, particularly regarding denying access to a university facility/space or occupying buildings and facilities.

c) Masking to conceal identity, either with the intent to violate laws or policies or with the intent to intimidate any person or group.

4) *Reasonable content-neutral TPM restrictions*. Freedom of speech on college campuses is allowed within the confines of student codes of conduct and TPM restrictions. Institutions cannot discipline a student for engaging in a free speech activity, but can discipline a student if the free speech activity crosses into unlawful behavior, or otherwise violates an institution's student codes of conduct.

   All UC and CSU campuses maintain TPM restrictions to ensure safety, security, and order, and have been permitted to do so long before the enactment of SB 1287. As established by case law, reasonable TPM restrictions on protected speech are permissible, provided that the restriction is content neutral, that the restriction serves a significant governmental interest, that the restriction is not more extensive than necessary to serve that interest, and that alternative means must exist to communicate the expression that is limited by the regulation.

   TPM restrictions regulate when, where, and how expression may occur freely. Regarding time, regulations may restrict the use of amplified sound during early morning or late evening hours in public forums, and case law also permits the requirement that large groups get a permit in advance of an event, protest, or demonstration. Regarding place, case law distinguishes between public and non-public forums where speech may be expressed freely, and regulations allow for activities to not block pathways or traffic. Regarding manner, regulations may address decibel levels of amplified sound, limits on signs and banner size, erecting physical structures, and the use of barricades to ensure pathways and emergency access.

5) *This bill requires the segments to hold an open forum for students about TPM restrictions.* This bill requires the CSU, and requests of the UC, to hold an open forum on a campus to elicit feedback regarding content-neutral TPM restrictions, including how students feel about the restrictions and the way the restrictions are being enforced. The author has expressed concerns with how SB 1287 has been enforced and seeks an avenue for students to provide feedback on TPM restrictions. In particular, the author indicates that campus police and administration have at times implemented or enforced the provisions of SB 1287 in an overly rigid or overzealous way, such that some students have felt targeted based on what they are protesting. Though there are opportunities for students to express concerns by engaging with campus and system leadership

and providing public comment at meetings of the Trustees or Regents, if students do feel that enforcement of TPM restrictions are disproportionately skewed toward them without justifiable cause, it may be difficult to express those concerns through typical public settings.

6) *Relationship between TPM restrictions, the student codes of conduct, and student discipline.* The author's office states that certain students have felt that the response from campus police and campus administration during student protests has been outsized relative to the level of purported infraction. For example, the author's office has stated that some students who stepped outside the permitted protest area feel that campus police overreacted to their doing so. However, it should be noted that institutions' policies do not penalize students for violations of TPM restrictions specifically; rather, any discipline for students would result from a violation of the student code of conduct or from unlawful behavior, according to the institutions' policies.

   As an example, UC's August 2024 letter required their campuses to have a consistent tiered response across all campuses that starts with informing a person of a violation, making multiple requests, and being warned of potential consequences, and then escalates to being cited for a violation of relevant UC policy, and arresting or detaining someone for unlawful behavior. In the case of a student merely stepping outside the permitted protest area, that does not seem like it would necessarily, on its face, result in a violation of the student code of conduct. However, if the campus police were overzealous in their policing of the protest area, that should be reviewed and could be seen as overstepping how the policies are meant to be implemented.

7) *What evidence do we have of these issues?* The author's office cited having heard about these issues from meetings with small groups of students, and later consulting with student groups, but it is not known how widespread an issue this is, and if there is a root cause. The anecdotes that have been presented sometimes have conflicting or unclear details, and committee staff has not independently verified these accounts. As a result, committee staff has limited ability to assess the scope of the concerns and the nature of the problem. In an attempt to gather more information, this bill requires the CSU, and requests of the UC, to report information on student code of conduct violations that occurred during, or as a result of, a protest on campus and a description of the discipline imposed on the student as a result of the violation, with a requirement for the student data to be disaggregated by race and gender.

SB 1287 does require information to be reported on the implementation and administration of the bill, and must specifically include information on student code of conduct violations relating to conduct that creates a hostile environment and conduct that limits the free exchange of ideas, as summarized below:

a) In UC's most recent report dated February 2026, UC reported 53 violations of codes of conduct related to the "Obstruction or disruption of teaching, research, administration, disciplinary procedures, or other University activities"; 14 violations of codes of conduct related to "Participation in a disturbance of the peace of unlawful assembly"; and 4 violations of codes of conduct related to "Violation of the UC Anti-Discrimination Policy". UC notes that these data represent all incidents across the system and that they do not collect data on codes of conduct violations related to TPM restrictions.

b) In CSU's most recent report dated December 2025, CSU reported 201 violations that resulted in a finding of responsibility for these behaviors and noted that these violations may be duplicative, as students may have been charged for multiple violations of the CSU Code of Conduct for one case. CSU notes that these data represent all incidents across the system and that they do not collect data on codes of conduct violations related to TPM restrictions.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

The UC estimates one-time General Fund costs of about $100,000 to develop and implement a case management system to collect demographic data regarding student code of conduct violations. There will likely be additional, ongoing vendor maintenance costs that are unknown at this time.

The CSU estimates ongoing General Fund costs of $200,000 to $300,000 to contract with a vendor for student conduct case management. Additionally, there would be one-time General Fund costs of $75,000 to $100,000 to hold the student forum.

ASSEMBLY FLOOR: 74-0, 5/28/26 - See last page for vote

SUBJECT: Alcohol or other drug recovery and treatment programs and facilities: suicide prevention

SOURCE: Author

DIGEST: This bill requires certified alcohol and other drug (AOD) programs and licensed adult residential AOD treatment facilities to have suicide prevention plans.

Senate Floor Amendments of 8/6/26 avoid the chaptering out of some provisions that were included in the recently enacted Health trailer bill.

ANALYSIS:

Existing law:

1) Grants sole authority in the state to the Department of Health Care Services (DHCS) to certify AOD programs and to license adult residential AOD treatment facilities (RTFs). [Health and Safety Code (HSC) §11832 and §11834.01]

2) Requires DHCS to conduct onsite program compliance visits for AOD programs and RTFs at least once during the certification or licensure period. Permits DHCS to conduct announced or unannounced site visits to review for compliance. [HSC §11832.12 and §11834.01]

3) Requires an AOD program to adopt policies and procedures, kept in an operation manual, that address and include, at a minimum, all of the following:

   a) Admission and discharge;

   b) Client rights;

   c) Services;

   d) Medications; and,

   e) Staff and client code of conduct. [HSC §11832.8.]

4) Enumerates requirements for an RTF, such as the types of nonmedical services each is authorized to provide; prohibitions on reasons for denying an individual admission to the RTF; a plan for when an RTF resident relapses; and, maintaining unexpired doses of naloxone hydrochloride, or any other opioid antagonist that is approved by the United States Food and Drug Administration for treatment of an opioid overdose. [HSC §11834.26]

This bill:

1) Requires an AOD program to include in its operation manual and RTFs to develop a suicide prevention plan.

2) Grants DHCS the authority to implement the suicide prevention plan requirement for RTFs by bulletin, or all-county or all-provider letter, after stakeholder input, until regulations are promulgated. Requires DHCS to promulgate regulations no later than January 1, 2031.

Background

According to the author of this bill:

> Patients or clients in substance use disorder (SUD/AOD) treatment settings can often suffer from suicidal ideation. Like addiction, suicide is unbiased and can impact anyone. From a study done by the Massachusetts Department of Public Health, "Individuals diagnosed with SUDs are at increased risk of suicidal ideation. Up to 40% of those seeking SUD treatment have a suicide attempt history. Importantly, a previous attempt is a key predictor of future suicide." Currently, in the California Code of Regulations under Title 9 "Rehabilitative and Developmental Services," two of the four departments already require suicide prevention plans. However, DHCS currently has no requirement for such health facilities to have a suicide policy in place. This gap is an oversight in alignment across departments in the importance of holistic care for individuals in rehabilitative and developmental services. By requiring licensed treatment facilities and certified programs to have a suicide prevention plan in place, we are improving and prioritizing patient safety and ultimately, their success. This bill would add a new level of care in the promotion of emotional, mental and physical health for individuals in treatment settings.

RTFs and AOD programs. RTFs licensed by DHCS, based on what is commonly referred to as the "social model," provide recovery, treatment, or detoxification services. (The Department of Public Health licenses medical model RTFs, known as chemical dependency recovery hospitals.) The services provided by social model RTFs include group and individual counseling, educational sessions, and alcoholism or drug abuse recovery and treatment planning. Social model RTFs are allowed to provide clients first aid and emergency care, and since the passage of AB 848 (Mark Stone, Chapter 744, Statutes of 2015), RTFs can apply to DHCS for an additional license to provide incidental medical services by a licensed physician or other health care practitioner. SB 823 (Hill, Chapter 781, Statutes of 2018) requires DHCS to adopt American Society of Addiction Medicine treatment criteria as the minimum standard of care for licensed RTFs. DHCS is also responsible for certification of a business entity with a physical location in the state that provides one or more of the following services to clients: treatment, recovery, detoxification services, or medications for addiction treatment. DHCS also provides program certification for facilities that are licensed by the Department of Social Services that serve adolescents. As part of their licensing and certification functions, DHCS conducts reviews of RTFs and AOD programs every two years, or as necessary; checks for compliance with statute, regulations, and certification standards to ensure the health and safety of clients; investigates all complaints; and, has the authority to suspend or revoke a license or certification for a violation

of statutes, regulations, and certification standards. DHCS states that they have the sole authority to conduct site visits to their RTFs and AOD programs.

SUD and suicide. According to the Kaiser Family Foundation, from 2014 to 2024, over half a million lives nationally (516,790) were lost to suicide, with 2022 marking the highest annual total on record. Since then, overall suicides have declined somewhat but trends diverged by method: firearm suicides continued to rise, reaching a new high in 2024. As a result, firearms accounted for 57% of all suicides in 2024, up from 50% in 2014, while suicides by other methods fell. Some of the shift may also reflect undercounting, if some suicides are recorded as unintentional drug overdose deaths. These shifts may have implications for prevention strategies including the capacity and design of crisis and treatment systems. In July 2022, the 988 Suicide and Crisis Lifeline launched nationwide, replacing the prior 10-digit number with an easier to remember, three-digit option that connects people in distress to counselors at 200+ local crisis call centers and, when needed, other crisis services. Since launch through October 2025, 988 has received more than 19 million calls, texts, or chats nationally, alongside improved answer rates and shorter wait times. However, access to mental health and SUD treatment gaps persist. In 2025, the Trump Administration discontinued the LGBTQI+ 988 call line and advanced an array of federal policy actions that could limit access to care including projected coverage loss in Medicaid and the Marketplace.

A UCLA Center for Health Policy Research brief from June 2026, "Adolescents' Substance Use, Psychological Distress, and Suicidal Thoughts and Attempts," notes that youth substance use remains common in the U.S., and many adolescents experience mental health challenges—such as anxiety, depression, and trauma—before or after trying drugs or alcohol. Early, frequent, or heavy substance use can harm brain development and worsen mental health issues, including depression, anxiety, and mood instability. Adolescents with both SUD and mental health issues are at a much higher risk for suicide. Mental health conditions are strong predictors of suicidal behavior, and substance use increases this risk by reducing inhibition and judgment, and worsening depression and anxiety. Together, these factors make suicide attempts more likely and more dangerous. The brief further notes that adolescents who currently use substances are nearly twice as likely to have had serious psychological distress in the past year as adolescents who do not currently use substances (46% and 27%, respectively), and 1.5 times as likely to have had moderate psychological distress in the past year as adolescents who do not currently use substances (21% and 13%, respectively). More than a quarter (26%) of adolescents have tried at least one substance, with alcohol (21%) being the most

common, followed by marijuana/THC (11%), e-cigarettes (11%), and cigarettes (5%). Among all adolescents, 9% currently use one or more substances, most often marijuana/THC (6%), alcohol (binge drinking) (4%), or e-cigarettes (3%). Among adolescents who currently use substances, 44% reported using multiple substances. Overall, 10% of adolescents had seriously thought about or attempted suicide in the past year. Adolescents who had ever used substances (marijuana, alcohol, e-cigarettes, or cigarettes) were more than three times as likely to report suicidal thoughts and attempts as those who had never used substances (20% and 6%, respectively). Adolescents who currently use substances were nearly four times as likely to have seriously thought about or attempted suicide in the past year (28%) as those who do not use substances (8%).

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

City of Newport Beach
County Behavioral Health Directors Association
County of Orange
One individual

OPPOSITION: (Verified 8/6/26)

None received

ARGUMENTS IN SUPPORT: Orange County (OC) states it supports measures that bring more accountability to licensed RTFs in order to balance the need of those who seek recovery with the residents of the communities where these facilities are or may be located. This bill aims to protect vulnerable populations and aligns with existing practices, as many treatment providers already address suicide risk when clinically appropriate. The bill would formalize and standardize these practices across providers, which will help ensure consistency and provide clearer guidance for staff. OC further argues that establishing a required suicide prevention plan may also build on existing approaches used in treatment settings, similar to relapse prevention and other risk mitigation strategies.

SUBJECT: Sex discrimination: scope

SOURCE: California Women's Law Center
Feminist Majority

DIGEST: This bill clarifies that "sex," as used within California antidiscrimination laws, includes gender, gender expression, gender identity, pregnancy and related conditions, and other specified traits or conditions.

Senate Floor amendments of 8/21/26 add contingent enactment language and add a co-author.

ANALYSIS:

Existing constitutional law:

1) Provides for equal protection under the law as follows:

   a) Under the United States Constitution, provides that no state shall deny to any person within its jurisdiction the equal protection of the laws. (U.S. Constitution, 14th Amend., § 1.)

b) Under the California Constitution, provides that a person may not be denied the equal protection of the laws, and that a citizen or class of citizens may not be granted privileges or immunities not granted on the same terms to all citizens. (California Constitution (Cal. Const.), Article (art.) I, § 7.)

2) Provides that the State shall not discriminate against, or grant preferential treatment to, any individual or group on the basis of race, sex, color, ethnicity, or national origin in the operation of public employment, public education, or public contracting. (Cal. Const., art. I, § 31.)

Existing state law:

1) Provides, pursuant to the Unruh Civil Rights Act, that all persons within the jurisdiction of this state are free and equal, and no matter what their sex, race, color, religion, ancestry, national origin, disability, medical condition, genetic information, marital status, sexual orientation, citizenship, primary language, or immigration status, are entitled to the full and equal accommodations, advantages, facilities, privileges, or services in all business establishments of every kind whatsoever. (Civil (Civ.) Code, § 51(a).)

2) Provides that "sex," for purposes of 1), includes, but is not limited to, pregnancy, childbirth, or medical conditions related to pregnancy or childbirth; or a person's gender, which means sex, and includes a person's gender identity and gender expression. "Gender expression" means a person's gender-related appearance and behavior whether or not stereotypically associated with the person's assigned sex at birth. (Civ. Code, § 51(e)(6).)

3) Prohibits discrimination on the basis of disability, gender, gender identity, gender expression, nationality, race or ethnicity, religion, sexual orientation, any other characteristic that is contained in the definition of hate crimes, or immigration status in any program or activity conducted by an educational institution that receives, or benefits from, state financial assistance, or enrolls pupils who receive state financial assistance. (Education (Ed.) Code, § 220.)

4) Defines the following for purposes of 5):

a) "Gender" means sex and includes a person's gender identity and gender expression.

b) "Gender expression" means a person's gender-related appearance and behavior, whether or not stereotypically associated with the person's assigned sex at birth. (Ed. Code, § 210.7.)

5) Establishes the Fair Employment and Housing Act (FEHA), which prohibits the following:

   a) Specified acts of discrimination in employment on the basis of the race, religious creed, color, national origin, ancestry, physical disability, mental disability, reproductive health decision-making, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or veteran or military status of any person. (Government (Gov.) Code, § 12940.)

   b) Specified acts of discrimination in connection with housing on the basis of the person's race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, marital status, national origin, ancestry, familial status, source of income, disability, veteran or military status, or genetic information. (Gov. Code, § 12955.)

6) Provides that "sex," for purposes of 7), includes, but is not limited to:

   a) Pregnancy, childbirth, or breastfeeding, or medical conditions related to pregnancy, childbirth, or breastfeeding.

   b) A person's gender, which means sex, and includes a person's gender expression; "gender expression" means a person's gender-related appearance and behavior whether or not stereotypically associated with the person's assigned sex at birth.

7) Establishes other prohibitions on the basis of sex, gender, gender identity, and/or gender expression throughout the Codes. (*See generally* California Codes.)

This bill:

1) States that the Legislature finds and declares that this bill is existing law and is not intended to expand or contract any existing rights or responsibilities.

2) States that any provision that prohibits discrimination on the basis of sex, discrimination on the basis of gender, or similar discrimination shall also be interpreted as prohibiting sex discrimination, as defined in 4).

3) States that, in the event of a conflict between the provisions of 2) and other provisions of the relevant Code that set forth the scope of sex discrimination, gender discrimination, or similar discrimination, the provisions that would result in greater protections of individuals based on sex, gender, or similar

discrimination shall prevail; and that these provisions shall not be construed to impair or diminish any other civil rights protection that is broader in scope.

4) Provides that, for purposes of 2) and 3), the following definitions apply:

   a) "Discrimination" includes, but is not limited to, harassment.

   b) "Pregnancy or related medical conditions" includes, but is not limited to, childbirth, abortion, lactation, miscarriage, fertility, and contraception.

   c) "Sex discrimination" includes, but is not limited to, discrimination on the basis of any of the following actual or perceived characteristics:

      i) Assigned sex or gender category, including female, male, or nonbinary.

      ii) Degree of conformity to sex or gender stereotypes.

      iii) Gender, including gender identity, gender expression, and access to, and use of, gender affirming care and other related health care.

      iv) Pregnancy or other related medical conditions.

      v) Decision-making, access to care, or potential or actual use of a drug, device, product, or service relating to pregnancy or related medical conditions.

      vi) Sexual orientation.

      vii) Variations in sex characteristics, including intersex traits or differences in sex development.

5) Provides that 2)-4) reflects the existing protections of the California Constitution recognizing the individual rights to pursue and obtain safety, happiness, and privacy, ensuring equal protection of the laws, protecting the ability to enter or pursue a business, profession, vocation, or employment, and protecting an individual's reproductive freedom, and that these provisions shall be construed liberally to effectuate the purposes of these constitutional protections.

6) Adds the language in 2)-5) to each of the Codes.

7) Adds, to the Unruh Act and the FEHA, specific references within the definitions to the clarifying sections added to their respective Codes pursuant to 6).

Comments

In 2022, the Legislature enacted SCR 92 (Leyva, Chapter 150, Statutes of 2022), which instructed the California Law Revision Commission to determine whether California's antidiscrimination laws might conflict with the Equal Rights Amendment (ERA), so that the state would be prepared if the ERA was actually added to the United States Constitution. The CLRC's 2025 report found that California law already complies with a potential ERA. The CLRC also found, however, that the specific definitions of "sex" within California's various antidiscrimination statutes are inconsistent, and while California's most significant antidiscrimination statutes define "sex" broadly, the broad definition is not clearly employed across the Codes.

This bill adopts the CRLC's proposed solution to clarify that "sex" has a consistent meaning throughout the state's antidiscrimination statutes, by adopting, within each Code, a provision clarifying the definition of "sex." The uniform definition provided by this bill accords with what is already in existing laws such as the Unruh Civil Rights Act, certain provisions of the Education Code, and the FEHA, and is intended to clarify the scope of all California antidiscrimination laws, not expand existing law. The bill also provides that, in the event that an existing provision of law conflicts with the uniform definition, the definition that results in greater protections against discrimination should prevail.

OPPOSITION: (Verified 8/21/26)

CAUSE
Democrats for an Informed Approach to Gender
Our Duty
Two individuals

ARGUMENTS IN SUPPORT: According to the California Women's Law Center and Feminist Majority:

California has long been a national leader in advancing gender equity, with strong constitutional and statutory protections against sex discrimination. However, inconsistencies in how "sex" and "sex discrimination" are defined and interpreted across different areas of state law can create gaps in protection, limit enforcement, and leave individuals vulnerable to discrimination.

AB 2563 addresses this issue by establishing a clear, minimum standard across California law. The bill requires that all provisions prohibiting discrimination on the basis of sex or gender be interpreted to prohibit sex discrimination and defines sex discrimination to include a broad range of actual or perceived characteristics, including gender identity and expression, pregnancy and related medical conditions, reproductive health decision-making, and conformity to gender stereotypes.

By aligning statutory interpretation with California's constitutional guarantees of equal protection, privacy, and reproductive freedom, AB 2563 strengthens existing civil rights protections and ensures they are applied broadly and as intended. This clarification is critical to protecting individuals from discrimination across employment, housing, education, healthcare, and public accommodations.

At a time when rights related to gender, identity, basic needs, and reproductive autonomy are increasingly contested nationwide, AB 2563 reaffirms California's commitment to ensuring that all individuals can live, work, and access services free from discrimination.

ARGUMENTS IN OPPOSITION: According to CAUSE:

Women are not women due to "identity." Women are women because our sex is determined to be female at conception. Female development in the womb and through puberty results in a body organized around the production of large, immobile egg cells- gametes- called ova in humans. Human females develop to carry our young in our uterus, give birth to our young through our cervix and vagina, and to nourish our young at our breasts, all female specific, necessary roles in human reproduction. Humans share this same reproductive process with every other mammalian species that exists or ever existed (even, in most aspects, monotremes-primitive egg-laying mammals that nurse their young.)

SUBJECT: Surveillance pricing

SOURCE: California Federation of Labor Unions
Consumer Reports
TechEquity Action

DIGEST: This bill prohibits "surveillance pricing," as defined, except as provided.

Senate Floor Amendments of 8/21/26 remove references to "electronic surveillance technology," add a series of additional exemptions from the bill, loosen some disclosure requirements, and clarify its interaction with other laws.

Senate Floor Amendments of 8/17/26 refine the definition of "surveillance pricing" and reframe and expand the exclusions therefrom.

ANALYSIS:

Existing law:

1) Establishes the California Consumer Privacy Act (CCPA), which grants consumers certain rights with regard to their personal information, including enhanced notice, access, and disclosure; the right to deletion; the right to restrict

the sale of information; and protection from discrimination for exercising these rights. It places attendant obligations on businesses to respect those rights. (Civil (Civ.) Code § 1798.100 et seq.)

2) Provides that the secret payment of allowances of rebates, refunds, commissions, or unearned discounts, whether in the form of money or otherwise, or secretly extending to certain purchasers special services or privileges not extended to all purchasers upon like terms and conditions, to the injury of a competitor and where such payment or allowance tends to destroy competition, is unlawful. (Business (Bus.) & Professions (Prof.) Code § 17045.)

3) Establishes a general prohibition on unfair competition, known as the Unfair Competition Law (UCL), which covers any unlawful, unfair, or fraudulent business act or practice and unfair, deceptive, untrue, or misleading advertising, and any act prohibited under the False Advertising Law. (Bus. & Prof. Code § 17200.)

This bill:

1) Prohibits retailers from engaging in "surveillance pricing."

2) Defines "surveillance pricing" as either of the following:

   a) Offering or setting a customized price for a good if for a specific consumer or group of consumers, based, in whole or in part, on personally identifiable information, including personally identifiable information that is gathered, purchased, or otherwise acquired from a third party. The price must be determined, at least in part, through the use of any technology or computational process that uses statistical modeling, data analytics, AI, or other data processing techniques.

   b) Random variations in prices to different consumers using a website, mobile application, or comparable online technology.

3) Provides that a retailer does not engage in surveillance pricing by doing any of the following:

   a) Offering a customized discounted price to a consumer who is terminating or taking steps to terminate a subscription or membership with the retailer.

b) Offering a customized discounted price to reestablish a consumer as a member, rewards program, or subscription enrollee if the retailer can demonstrate specified conditions.

c) Offering a customized discounted price on a specific good to a consumer based on the consumer's prior purchase history if the retailer can demonstrate specified conditions.

d) Offering a customized discounted price on a specific good to a consumer based on the consumer's saved goods if the retailer can demonstrate specified conditions.

e) Offering a customized discounted price to a consumer who is a first-time visitor to a retailer's website or application if the retailer can demonstrate specified conditions.

f) Offering a customized discounted price to a consumer for items the consumer has left in their online shopping cart if the retailer can demonstrate specified conditions.

g) Offering a customized discounted price on equal terms if all of the following apply:

    i) The customized discounted price is offered to any of the following groups of consumers:

        (1) Consumers who affirmatively purchase or enroll in a loyalty, membership, or rewards program.

        (2) Consumers who belong to a broadly defined group, as specified.

        (3) Consumers who meet eligibility criteria, as specified.

    ii) If the retailer exclusively offers a customized discounted price in stores, the current eligibility criteria, available customized discounted prices, and any conditions for receiving or earning the customized discounted price are clearly and conspicuously disclosed in all stores where the discount is available, as provided.

    iii) If the retailer offers a customized discounted price online, the current eligibility criteria, available customized discounted prices, and any conditions for receiving or earning the customized discounted price are clearly and conspicuously disclosed on the retailer's website while the

customized discounted price is offered. Disclosure is not required when the customized price is offered through a third-party promotional program, as provided.

iv) The customized discounted price is made available on equal terms to all consumers who meet the disclosed eligibility criteria.

h) Setting a price or specific terms to extend credit, refusing to extend credit on specific terms, or refusing to enter into a transaction with a specific consumer or commercial enterprise, if the retailer is acting based on information contained in a consumer or commercial credit report, as provided.

4) Defines the relevant terms.

5) Makes any waiver void and unenforceable.

6) Finds and declares that it furthers the purposes of the California Privacy Rights Act.

Comments

Companies regularly and systematically collect, analyze, share, and sell the personal information of consumers. While this data collection can provide consumers various benefits, public fears about the widespread, unregulated amassing of personal information have only grown since privacy was made a part of California's Constitution. One particularly troubling area of this systematic data collection is utilization of this information to engage in differential pricing for consumers based on various elements of that information.

This bill prohibits this practice of "surveillance pricing," defined as offering or setting a customized price for a good for a specific consumer or group of consumers, based, in whole or in part, on personally identifiable information, including personally identifiable information that is gathered, purchased, or otherwise acquired from a third party. This bill provides that a retailer does not engage in surveillance pricing if a customized discount price is offered under a series of specified circumstances.

It should be noted that several other states are also taking action to combat surveillance pricing. Legislation has been introduced and passed through legislatures in four other states. This increased movement toward regulating this

practice is driven in part by polling that suggests consumers find surveillance pricing "fundamentally unfair" and support bans.[1]

For a more thorough overview, please see the Senate Privacy, Digital Technologies, and Consumer Protection Committee analysis of this bill, which is incorporated herein by reference.

This bill is sponsored by Consumer Reports, TechEquity, and the California Federation of Labor Unions. It is supported by a wide array of labor, advocacy, and low-income services groups, including the Western Center on Law and Poverty, Equal Rights Advocates, and LGBT Tech. It is opposed by various industry groups, including TechNet and Chamber of Progress.

According to the author, "With the rise of artificial intelligence and data collection, businesses increasingly use personal data to set prices, often leading to unfair and discriminatory pricing practices. This legislation aims to establish safeguards that ensure transparency, fairness, and consumer protections in pricing algorithms. AB 2564 will prohibit the practice of surveillance pricing by making it unlawful for businesses to use personal data when charging different prices for the same product or service, whether online or during in-store checkout."

ARGUMENTS IN SUPPORT: A coalition of legal services organizations, labor associations, civil rights organizations, and consumer, privacy, and family advocacy groups, including SEIU California write:

> California consumers face a new and growing threat to fair pricing. Companies now possess the technology to collect vast amounts of consumer data and deploy artificial intelligence to charge each shopper a personalized price — one calibrated not to the market, but to the maximum that an individual can be made to pay. This practice, known as surveillance pricing, exploits detailed consumer profiles built from purchase histories, location data, browsing habits, and more.
>
> Investigations have already uncovered real-world harms. Consumer Reports revealed that Kroger built 60-plus page profiles for individual consumers from loyalty program data to infer willingness to pay. … A SFGate investigation found that the most popular hotel booking sites show prices substantially higher to San Franciscans using their online booking platforms compared with users browsing from less affluent cities, like Phoenix and

Kansas City. These are not isolated incidents — they reflect an industry trend. …

While California consumers benefit from some privacy protections under the California Consumer Privacy Act, no existing federal or state law prohibits companies from using the data they collect to charge consumers individually different prices. AB 2564 closes this gap. Without legislative intervention, surveillance pricing will become the industry standard, disproportionately harming lower-income Californians who already face the highest costs of living in the nation and have the fewest alternatives.

AB 2564 protects sensible, transparently offered discounts—including for loyalty programs. The bill's exemptions permit a vast array of discounts, and transparency provisions help ensure that discounts are not secretly discriminatory. The bill does not restrict businesses from offering lower prices — it prevents them from secretly charging higher ones based on personal data profiles.

The right to fair and affordable pricing should not be a privilege for the few but a fundamental protection for all Californians.[2]

ARGUMENTS IN OPPOSITION: A coalition led by the California Chamber of Commerce asserts:

AB 2564 prohibits "surveillance pricing," which it loosely defines as "offering or setting a customized price for a good or service[3] for a specific consumer or group of consumers, based, in whole or in part, on personally identifiable information collected through electronic surveillance technology..."

Notably, "electronic surveillance technology" is not actually defined in AB 2564. Instead, the bill only provides a list of examples that are "included," but no description that would help a covered entity determine if the bill applied to the consumer information in their possession. A metaphor helps

Spencer, *Hotel booking sites show higher prices to travelers from Bay Area* (February 3, 2025) SFGate, **https://www.sfgate.com/travel/article/hotel-booking-sites-overcharge-bay-area-travelers-20025145.php**.

[3] The definition in the bill does not include "services."

illustrate the problem with definitions that only say what they "include." Imagine trying to define what is a "pet" - but the only definition is "Pets includes dogs or cats." Such a definition provides no helpful guidance for anything not listed, such as bird or fish. Are those "pets?" Without a descriptive definition, it is impossible to know. Under AB 2564, the term "electronic surveillance technology" has the same problem – the definition does not describe what makes something an electronic surveillance technology. Instead, it only provides examples. Without a descriptive definition, employers will be left guessing what technologies are or are not covered by the bill.

SUBJECT: Voter registration information: confidentiality

SOURCE: Secretary of State Shirley N. Weber, Ph.D.

DIGEST: This bill modifies the program that makes confidential an elected official's or a candidate's voter registration record.

Senate Floor Amendments of 8/21/26 redact a voter's entire registration record, unless certain conditions are met, when enrolled in programs where a voter's registration record is made confidential.

ANALYSIS:

Existing law:

1) Defines "elected official or candidate" as a federal, state, or local elected official or a candidate for an elected federal, state, or local office.

2) Requires an elected official or candidate to have their residence address, telephone number, and email address appearing on the affidavit of registration be made confidential, unless the elected official or candidate opts-out.

3) Requires the Secretary of State (SOS) to provide to each county elections official a list identifying elected officials and candidates residing in each respective county when a person files nomination papers for an elected federal or state office.

4) Requires the county elections official to add the individual's name to a list identifying elected officials and candidates residing in that county when a person files nomination papers for an elected local office. The county elections official must periodically update the list for each election cycle. Within five business days of receipt of the list from the SOS or within five business days of the filing of nomination papers with the county elections official, the county elections official must make confidential that elected official or candidate's residence address, telephone number, and email address appearing on the affidavit of registration.

5) Requires the county elections official, in producing any list, roster, or index, to exclude voters with a confidential voter status. An elected official or candidate must apply for confidential voter status within 60 days of moving to a new county, if available in the new county. The elections official of the new county, upon notice of the confidential voter moving into the county, must (1) contact the confidential voter and provide information regarding the application for confidential voter status in the new county, (2) honor the confidential voter status from the former county for 60 days from the date of notice, (3) exclude the confidential voter in any list, roster, or index during the 60-day period, and (4) remove the confidential voter status if the new voter has not obtained or cannot obtain confidential voter status in the new county during the 60-day period.

6) Requires an elected official or candidate to contact their county elections official to ensure their voter registration record has been made confidential. County election officials must make the elected official's information confidential when contacted by the elected official or candidate.

7) Provides an elected official or candidate's residence address, telephone number, and email address must remain confidential until the official no longer holds the office or, for a candidate, the winning candidate takes office.

8) Provides a county or county elections official is not liable for taking or failing to take the action when the county or county elections official has received erroneous information from the SOS.

9) Provides an action in negligence is not maintained against any government entity or officer or employee thereof as a result of the disclosure of specified information, except by a showing of gross negligence or willfulness.

10) Provides when a notification is received from an elected official or candidate about a request to opt-out of confidential voter status, the county elections official must remove the confidential designation from the individual's voter registration record within five business days and notify the SOS and any other relevant local election officials of the decision to opt-out within five business days of processing the request.

11) Provides an elected official who opts-out may reapply for confidential voter status at any time while serving in or running for office, and confidential voter status must be reinstated upon receipt of the request.

12) Provides, notwithstanding any other law, an elected official or candidate's residence address, telephone number, and email address made confidential may be disclosed only for bona fide journalistic or governmental purposes using a specified process. The county elections official must retain records of all requests for, and disclosures of, a local elected official or candidate's confidential residence address, telephone number, and email address for journalistic purposes. The county elections official may reject a request that does not clearly adhere to specified requirements.

This bill:

1) Changes the ability for an elected official or candidate to have their voter registration record from the individual's affidavit of registration made confidential from an opt-out to an opt-in process. An elected official or candidate must submit a written request for confidential voter status to the county elections official.

2) Defines "election official or candidate" as a federal, state, or local elected official or candidate who has qualified to appear on the ballot for a federal, state, or local office. This definition does not include a member of a political party's county central committee or a candidate for that office.

3) Permits the voter registration record of an elected official's immediate family member be included in a written request for confidentiality, if the immediate family member is named in the request and the request is accompanied by a statement from the immediate family member confirming they want confidential voter status and understand the ramifications of being made

confidential. "Immediate family member" is an elected official's spouse, domestic partner, parent, or child who lives at the same residence.

4) Provides, upon a written request for confidentiality, the county elections official must make the information confidential. The elections official must provide written notice to the household of the election official or candidate that persons whose information would be confidential would lose their ability to vote a nonprovisional ballot in person at a polling location.

5) Provides that the exclusion of voters with confidential voter status on any roster, voter list, or index produced by a county elections official applies to the voter's entire voter registration, including voting history and voter registration information before the voter became a voter with confidential voter status. In addition to rosters, voter lists, or indexes, any other list created by an elections official, these lists must not include any confidential information of the elected official or candidate.

6) Requires an elected official's information remain confidential until two years after the official leaves office. For candidates, the information remains confidential until the completion of the canvass for which the candidate was listed on the ballot. Candidates in a local special election must remain confidential until the vote for the special election has been certified by the local elections official.

7) Provides that a candidate who opts into confidential voter status and is elected to the office automatically retains confidential voter status after being sworn into office.

8) Requires the county elections official to determine and identify the federal, state, and local elected officials residing in their county.

9) Removes the 60-day timeframe for when an elected official or candidate must apply for confidential voter status when moving to a new county and the requirement for an elections official to make an elected official's or candidate's information confidential. Instead, the elections official must make the information confidential upon request by the elected official or candidate.

10) Permits an elected official to opt-out of and re-enroll in confidential voter status at any time while serving in the official's current office or while running for another office. A candidate who opts-out may re-enroll in confidential voter status while as a candidate during the candidate's eligibility period for confidential voter status.

11) Requires county election officials to notify the SOS on a form prescribed by the SOS when a county elections official adds or removes the confidential designation to a federal or state elected official's voter registration record.

12) Requires the county elections official to notify an elected official at least 60 days before removing the confidential designation from a federal, state, or local elected official's voter registration record.

13) Provides an elected official or candidate who opts-out of confidential voter status consents to the placement of their voter registration record in the roster of voters.

14) Provides the SOS and county election officials implement the remaining provisions of existing law, as it relates to confidential voter statuses and the provisions of this bill, immediately once the statewide voter registration database and county election management systems have made conforming changes.

15) Provides, for elections through December 31, 2028, county election officials may make best efforts to manually implement the provisions of existing law as it relates to confidential voter statuses and the provisions of this bill to the maximum degree possible before the completion of conforming changes to the statewide voter registration database and their own county election management systems. This is not to be construed to authorize any reduction in current, ongoing implementation efforts.

16) Provides that the confidential voter program does not override and cannot revoke confidentiality ordered by a county or confidentiality granted by another specified program.

17) Requires, notwithstanding any other law and no later than September 30, 2027, the SOS, in consultation with county election officials, to develop and implement a process that permits a person with confidential voter status to vote at a polling place or vote center and retain confidential voter status. The SOS may adopt regulations to ensure compliance and uniformity with the developed procedure.

18) Makes corresponding changes to other confidential voter programs for confidential voter status to apply to a voter's registration record unless certain conditions are met.

Background

Voter Registration Information. Under existing law, all voter registration information is confidential, except in specified circumstances. These circumstances include the release of voter registration records for approved election, scholarly, journalistic, political, or governmental purposes. A voter's driver's license number, ID number, partial Social Security number, and signature are not disclosed under these provisions.

To access permitted information, individuals or organizations must apply to the SOS or a county elections official, provide specific identifying information, the specific information requested, and include a statement of the intended use of the information. The elections official verifies the applicant's identity before providing any information and completed applications must be retained by the elections official for five years.

In certain situations, state law provides a higher level of confidentiality for voter registration records, prohibiting the release of a voter's residence address, phone number, and email address even for election, scholarly, journalistic, political, or governmental purposes. Individuals enrolled in California's Safe at Home program, which includes two address confidentiality programs for those at higher risk of threats or violence, are eligible for these protections. Additionally, a voter may request a court to declare their address and contact information confidential, if they can show that a life-threatening circumstance exists for the voter or a household member. Similar protections are also available to public safety officers and individuals who perform election-related work for state or county election officials who attest to such threats affecting them or their families.

Assembly Bill 1392 (Sharp-Collins). In response to increasing threats against public officials, including the shooting of two Minnesota legislators and their spouses in June of 2025, the Legislature approved and Governor Newsom signed AB 1392 (Sharp-Collins, Chapter 300, Statutes of 2025) making the voter registration records of elected officials and candidates for elective office confidential. The bill was largely structured as an "opt-out" program and eligible individuals are added to the program automatically unless they opt-out.

Comments

Author's Statement. As counties began administering the program, elections officials identified areas where additional statutory clarity was needed around eligibility, procedures, and timelines. At a time when threats and harassment

against public officials are increasing nationwide, it is critical that the protections authorized by the Legislature work as intended.

Definition of Immediate Family Member. This bill defines "immediate family member" as an elected official's, but not a candidate's, spouse, domestic partner, parent, or child who lives at the same residence. This bill permits an elected official's immediate family, with the consent from each family member, living at the residence to have their voter registration made confidential. It is possible a family member outside of the definition prescribed by this bill lives at the elected official's residence, such as an in-law or grandparent. This may create a situation where someone could still find an elected official's residence through another family member.

Definition of "Elected Official or Candidate." This bill redefines "elected official or candidate" as a federal, state, or local elected official or a candidate who has qualified to appear on the ballot for an elected federal, state, or local office. While this includes the vast majority of candidates, write-in candidates would no longer be included because they do not appear on a ballot. There are circumstances where a write-in would appear on a future ballot, such as in a two-top election, where the candidate would receive confidential voter status, but that would only happen after the candidate qualifies to appear on a ballot instead of qualifying as a candidate.

What Happens to the Current Program? Elected officials and candidates are currently enrolled in this confidential voter status program unless the individual opts-out. This bill changes the system from an opt-out to an opt-in system. It is unclear what happens to the individuals currently enrolled in the program when this bill takes effect because individuals currently enrolled in the program may not have taken the action required by this bill to opt-in. Coordination between the SOS and county elections officials is important to ensure there is a uniform and consistent transition for elected officials and candidates currently with confidential voter status to learn about the changes this bill prescribed should this bill become chaptered.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Committee on Appropriations:

- The SOS would incur one-time General Fund costs of $134,000 modify (1) VoteCal, the statewide voter registration database system, and (2) the Election Management System, to ensure data synchronization between the two platforms needed to implement this bill's information sharing procedures with counties. SOS would incur unknown one-time costs,

potentially in the hundreds of thousands of dollars, to develop the process permits a person with confidential voter status to vote at a polling place or vote center and retain confidential voter status.

- By requiring counties to comply with this bill's information sharing procedures, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on local agencies, counties could claim reimbursement of those costs. The magnitude is unknown, but could exceed $50,000 per year (General Fund).

SUBJECT: Health care services: artificial intelligence

SOURCE: California Nurses Association
California Federation of Labor Unions

DIGEST: This bill requires a health facility and other health providers that use or deploy a clinical decision support system for patient care to make information about these systems available to any licensed health care professional or other

person that views outputs from a clinical decision support system. Prohibits an employer from retaliating or discriminating against a worker based solely on the worker's override of, or reliance on, the output of a clinical decision support system. Prohibits the failure of a health care worker to override an output of a clinical decision support system from being asserted as a superseding cause severing the defendant's liability for the alleged harm in a civil action against a defendant who developed or deployed a clinical decision support system that is alleged to have caused harm.

Senate Floor Amendments of 8/21/2026 move provisions out of CDPH's jurisdiction and instead to the Business and Professions Code, and align the definition of Clinical Decision Support Systems with other bills.

Senate Floor Amendments of 8/20/26 permit a health provider to satisfy the requirements relating to making information available about a clinical decision support system by using information supplied by the vendor, limit the enforcement of the information disclosure provisions to whether the information has been provided rather than the accuracy of the information, and exclude a policy that requires a worker to accept, defer to, or refrain from overriding the output of a clinical decision support system from being considered a duty that a health care employer can enforce without it being considered retaliation or discrimination.

ANALYSIS:

Existing law:

1) Requires a health facility, clinic, physician's office, or office of a group practice that uses generative artificial intelligence (AI) to generate written or verbal patient communications pertaining to patient clinical information to ensure that those communications include a disclaimer, as specified, that indicates to the patient that the communication was generated by generative AI, and clear instructions describing how a patient may contact a human health care provider, employee, or other appropriate person. Exempts communications generated by generative AI from this requirement if it is read and reviewed by a human licensed or certified health care provider. [Health and Safety Code §1339.75]

2) Defines the following terms for purposes of 1) above:
   a) "Artificial intelligence" means an engineered or machine-based system that varies in its level of autonomy and that can, for explicit or implicit objectives, infer from the input it receives how to generate outputs that can influence physical or virtual environments; and,

b) "Generative artificial intelligence" means AI that can generate derived synthetic content, including images, videos, audio, text, and other digital content.

3) Requires the Department of Technology to conduct, in coordination with other interagency bodies as it deems appropriate, a comprehensive inventory of all high-risk automated decision systems that have been proposed for use, development, or procurement by, or are being used, developed, or procured by, and state agency. Defines "high-risk automated decision system" as an automated decision system that is used to assist or replace human discretionary decisions that have a legal or similarly significant effect, including decisions that materially impact access to, or approval for, housing or accommodations, education, employment, credit, health care, and criminal justice. [Government Code §11546.45.5]

This bill:

1) Defines "artificial intelligence" and "generative artificial intelligence" as having the same meaning as definitions described in Existing Law 5) above.

2) Defines "automated decision system" as a computational process derived from machine learning, statistical modeling, data analytics, or AI that issues simplified output, including a score, classification, or recommendation, that is used to assist or replace human discretionary decision-making and materially impacts natural persons. Excludes from this definition a spam email filter, firewall, antivirus software, identify and access management tools, calculator, database, dataset, or other compilation of data.

3) Defines "clinical decision support system" as an artificial intelligence system that produces a prediction, classification, recommendation, evaluation, or analysis that aids clinical decisionmaking related to timing of care, diagnosis or treatment. Specifies that it does include booking, canceling, and rescheduling appointments, appointment reminders, patient education and previsit materials and preparation, and payment processing, to the extent the independent performance of these activities by the system does not require a professional license.

4) Requires, on or before July 1, 2027, a health facility, clinic, physician's office, or office of a group practice that uses or deploys a clinical decision support system for patient care to make available, upon request from a person using a clinical decision support system, an inventory of all clinical decision support systems currently in use, and requires this inventory to be updated annually.

5) Requires, on or before July 1, 2027, a health facility, clinic, physician's office, or office of a group practice to make available, upon request from a person using a clinical decision support system, information about the system, including all of the following:
   a) A summary of the clinical decision support system, including developer and description of the output produced by the system;
   b) Intended use of the clinical decision support system, including intended patient population, intended users, and intended role in supporting clinical decisionmaking;
   c) Cautioned out-of-scope use of the clinical decision support system, including known risks and limitations;
   d) Summary of how the clinical decision support system generates outputs;
   e) Summary of the training set or clinical research underlying recommendations, including demographic representativeness and known biases based on protected characteristics;
   f) Summary of the validation process;
   g) Summary of quantitative measures of performance; and,
   h) A link to the Certified Health IT Product List produced by the Office of the National Coordinator for Health Information Technology at the United States Department of Health and Human Services.

6) Permits a health facility, clinic, physician's office, or office of a group practice to satisfy the requirement in 5) above by providing information supplied by the developer or vendor, if that information is accompanied by the developer's written attestation as to the accuracy of that information.

7) Requires, on or before July 1, 2027, a health facility, clinic, physician's office, or office of a group practice to notify a person whose duties including using a clinical decision support system, upon hire and annually, of their right to request the inventory of all clinical decision support systems currently in use.

8) Exempts from the written notice requirements the use of a clinical decision support system for documentation, communication, or other administrative tasks that do not involve the application of professional judgment by a licensed health care professional, including, but not limited to, automated messages to inform patients of their health records.

9) Specifies that a violation of the notice and disclosure requirements by a physician is subject to the jurisdiction of the Medical Board of California or the Osteopathic Medical Board of California, as appropriate.

10) Provides that it is the public policy of the State of California that a worker providing direct patient care be free to use their professional judgment to make assessments and decisions within their scope of practice as appropriate for their patients.

11) Prohibits an employer from retaliating or discriminating against a worker providing direct patient care using their professional judgment to make an assessment or decision within their appropriate scope of practice based solely on the worker's override of, or reliance on, the output of a clinical decision support system.

12) Specifies that the protection in 11) above against employer retaliation or discrimination does not affect a worker's duty do any of the following:
   a) Meet the applicable standard of care;
   b) Act within their scope of practice;
   c) Exercise independent judgment in providing direct patient care;
   d) Follow standard operating procedures or other policies established by the employer or by a California governmental department; or,
   e) Comply with regulations governing the planning and implementation of patient care.

13) Excludes a policy, procedure, or protocol that requires a worker to accept, defer to, or refrain from overriding the output of a clinical decision support system, from being considered a duty for purposes of 15) above.

14) Requires a worker who is subject to retaliation or discrimination in violation of this bill to have the right to file a complaint with the Labor Commissioner against an employer who retaliates or discriminates against the worker.

15) Requires the Labor Commission to enforce the anti-retaliation and discrimination provisions of this bill, including investigating an alleged violation, ordering appropriate temporary relief to mitigate a violation or maintain the status quo pending the completion of a full investigation or hearing, issuing a citation to an employer, and filing a civil action.

16) Requires the Labor Commissioner to determine whether an employer retaliated or discriminated against a worker, and to consider evidence relevant to the reasons the employer took the action alleged to be retaliation or discrimination, including evidence supporting the alternate reasons for the action, such as an alleged failure by the worker to satisfy a duty described in 12) above.

17) Specifies that the Labor Commissioner is not required to adjudicate or make a final determination of whether a worker met or failed to meet a duty described in 12) above. Specifies that a determination under these provisions is not determinative of any legal action for professional negligence or malpractice or disciplinary action against a professional license, and these provisions do not limit the authority of an appropriate licensing authority or a court.

18) Prohibits using as a defense, in an action against a defendant who developed, modified, selected, or deployed a clinical decision support system that is alleged to have caused harm to the plaintiff, and prohibits a defendant from asserting, that the failure of a licensed health care professional or other health care worker to override an output of a clinical decision support system is a superseding cause severing the defendant's liability for the alleged harm.

19) Specifies that the provision in 17) above does not limit or preclude a defendant from presenting any other affirmative defense, including evidence relevant to causation or foreseeability, or presenting other evidence relevant to the comparative fault of any other person or entity, including evidence that the defendant took reasonable precautions to prevent harm, as specified.

20) Specifies that the provision in 17) above does not apply to an action for injury or death against a licensed health care provider based upon professional negligence, as specified.

Background

According to the author of this bill:

> Healthcare workers are facing new challenges as AI is integrated into their workplaces. They are pressured by employers to defer to AI systems that may be opaque, erroneous, or systemically biased. They face an added risk of professional and legal blame when they follow algorithmic recommendations that fail. This bill preserves healthcare workers' ability to follow their professional judgment by prohibiting employer retaliation when a worker overrides or follows a recommendation. This bill requires transparency for AI tools so that providers understand how they work and what the risks are. Overall, this bill requires that AI tools are used to support clinical judgement—not replace it, ensuring that human expertise and patient safety remain the focus of California's healthcare system.

Generative AI in health care. According to a July 25, 2023 viewpoint article in the *Journal of the American Medical Association*, "Generative AI in Health Care and

Liability Risks for Physicians and Safety Concerns for Patients," generative AI is being heralded in the medical field for its potential to ease the long-lamented burden of medical documentation by generating visit notes, treatment codes, and medical summaries. This article stated that to date, no court in the U.S. has considered the question of liability for medical injuries caused by relying on AI-generated information. The article warned that to minimize risks, even medical professionals must exercise caution when relying on AI-generated information, due to the "black-box" nature of how these systems generate output, because it may be impossible for the physician to independently evaluate the accuracy of the AI's output. An article in *Implement Science*, published in March 2024, stated that the utility and impact of generative AI in healthcare remain poorly understood, with concerns about ethical and legal implications, integration into healthcare service delivery, and workforce utilization. The American Medical Association (AMA) published "Principles for Augmented Intelligence Development, Deployment, and Use," which was approved by the AMA Board of Trustees on November 14, 2023. According to this AMA document, as the number of AI-enabled health care tools and systems continue to grow, these technologies must be designed, developed, and deployed in a manner that is ethical, equitable, responsible, and transparent. The AMA notes that while the U.S. Food and Drug Administration (FDA) regulates AI-enabled medical devices, many types of AI-enabled technologies fall outside the scope of FDA oversight, including AI that may have clinical applications, such as some clinical decision support functions. The AMA report specifically looked at transparency in use of AI-enabled systems, and stated that it is essential that use of AI in health care be transparent to both physicians and patients, and disclosure should contribute to physician and patient knowledge and not create unnecessary administrative burden. The AMA report states that when AI is utilized in health care decision-making, that use should be disclosed and documented in order to limit risks to, and mitigate inequities for, both physicians and patients. The AMA noted that while transparency does not necessarily ensure AI-enabled tools are accurate, secure, or fair, it is difficult to establish trust if certain characteristics are hidden. According to the AMA, when AI is used in a manner which directly impacts patient care, access to care, or medical decision-making, that use of AI should be disclosed and documented to both physicians and patients. The opportunity for a patient to request additional review from a licensed clinician should be made available upon request. The AMA policy also states that AI tools or systems cannot augment, create, or otherwise generate records, communications, or other content on behalf of a physician without that physician's consent and final review.

Disclosure requirements at least partially based on federal standards for health information technology developers. The author and sponsors have pointed to standards adopted by the Office of the National Coordinator for Health Information Technology (ONC), which is part of the federal Department of Health and Human Services. As part of the final rule implementing the Electronic Health Record Reporting Program provision of the 21st Century Cures Act, on January 9, 2024, the ONC adopted certification requirements for a "decision support intervention (DSI)," which revised the "clinical decision support" criterion. According to the ONC, this final rule directly responds to the emergence of AI and machine learning-based predictive algorithms used to aid decision-making in health care. The ONC requirements apply to Predictive DSIs that are supplied by Certified Health IT developers. Predictive DSIs that are developed by a health system, or a third-party technology company are not subject to the requirements unless or until a Certified Health IT developer supplies a Predictive DSI as part of a Certified Health IT module. While the certification program is technically a voluntary program, health providers are required to use certified electronic health record technology to participate in incentive programs such as the Medicare Promoting Interoperability Program. Among the certification requirements for a Predictive DSI, are a list of source attributes that include many of the disclosure requirements in this bill, including funding source, description of output, intended use and population target, cautioned out-of-scope use, process used to ensure fairness, and description of the validation process, among other overlaps.

Racial bias in algorithms and AI. Several studies have identified risks of racial bias in algorithms and AI. An October 2019 article in the journal *Science*, "Dissecting racial bias in an algorithm used to manage the health of populations," found that Black patients assigned the same level of risk by the algorithm are sicker than White patients. The study estimated that this racial bias reduces the number of Black patients identified for extra care by more than half. According to the study, bias occurs because the algorithm uses health costs as a proxy for health needs, and because less money is spent on Black patients who have the same level of need, the algorithm falsely concludes that Black patients are healthier than equally sick White patients. The journal *NPJ Digital Medicine* published a study in 2023, "LLMs propagate race-based medicine," that assessed four LLMs used in healthcare systems. The study found that all models had examples of perpetuating race-based medicine in their response to questions. Models were not always consistent in their response when asked the same question repeatedly, and that based on their findings, these LLMs could potentially cause harm by perpetuating debunked, racist ideas.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee,

- Unknown ongoing costs, ranging in the low millions, for the Labor Commissioner's Office for state administration (Labor Enforcement and Compliance Fund). The actual costs would depend on a number of factors, including, but not limited to, the volume and nature of the complaints filed.
- Minor and absorbable costs for the Osteopathic Medical Board of California to oversee complaints.
- Minor costs for the Medical Board of California resulting from an increase in complaints (Medical Board Contingent Fund).
- Unknown ongoing costs for the University of California (UC) health centers, potentially low tens of millions (costs would be covered by UC health center revenues), for compliance.
- No significant fiscal impact to the California Department of Justice.
- Unknown, potential workload costs to the courts related to enforcement of civil penalties (Trial Court Trust Fund, General Fund). While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to increase the amount appropriated for trial court operations.

ARGUMENTS IN SUPPORT: This bill is co-sponsored by the California Nurses Association/National Nurses United (CNA) and the California Federation of Labor Unions. According to CNA, as hospitals rapidly adopt AI-driven technologies that influence clinical decisions and working conditions, California must ensure that these tools support safe patient care rather than undermine professional standards or patient protections. CNA states that hospitals and clinics now use AI tools in electronic health records, clinical decision-support systems, remote monitoring platforms, staffing management software, and administrative workflows. California currently lacks clear guardrails governing the use of AI in health care settings, and evidence increasingly shows that many AI tools used in health care algorithms raise serious safety and accuracy concerns. CNA also argues that lack of transparency prevents clinicians and patients from understanding how AI systems influence care decisions, and that health care entities often provide little or no information about when AI tools are used, how they generate outputs, what data they rely on, or what limitations they carry. Without this information, nurses cannot fully evaluate the reliability of automated recommendations that appear in clinical workflows. CNA asserts that existing federal guidance has already demonstrated that developers can disclose key information about algorithm design, training data, and system limitations through standardized document such as "model cards." According to CNA, the disclosure requirements in this bill align with previously established federal standards by the ONC, which required developers of clinical decision support tools to provide information about a tool's design, purpose, and limitations. Hospitals require nurses and other health care workers to rely on technologies chosen by their employers, yet when those systems make mistakes, clinicians often bear the consequences. CNA states that nurses increasingly spend hours reviewing, correcting, and verifying AI-generated documentation that may contain errors or missing information. CNA nurses support tested and regulated technology that strengthens our ability to provide safe,

high-quality care. However, we cannot allow technology to override professional judgment, justify unsafe staffing, or shift responsibility for corporate technology failures onto frontline caregivers. The California Federation of Labor Unions makes similar arguments, and points to a recent Virginia Tech study that found that AI systems designed to predict patient risk of death are failing to recognize critical inductions much of the time, demonstrating the risk that reliance on AI tools could mislead providers. However, the California Labor Federation states health care workers have few protections if they choose to disregard automated recommendations.

ARGUMENTS IN OPPOSITION: This bill is opposed by a large coalition of health care provider organizations, and business organizations, including the California Hospital Association, the California Medical Association, the California Chamber of Commerce, Advanced Medical Technology Association, and others. Opponents state that AI utilized in clinical decision support systems has the potential to improve nearly every aspect of health care, and that these systems are the latest in a series of innovative resources that trained and experienced health care providers use to help their patients. Opponents point to a number of examples, including AI-assisted imaging tools that help radiologists identify suspicious findings in mammograms, chest scans, and pathology slides; tools that provide sepsis alerts, flag concerning imaging results, and offer clinical decision support to enable clinicians to better assess a patient's condition; and, AI-generated clinical summaries that are used to help with handoffs between nurses, physicians, and other licensed professionals. Opponents state that before any AI tool is deployed, it undergoes an extensive review process, including via multidisciplinary committees from the health care workers who will use it, standardized privacy and security assessments, and review of AI registries. No AI platform is continued for use in patient care without a thorough assessment and ongoing monitoring for effectiveness and safety. At every stage of clinical care, opponents state that health care professionals retain full oversight and responsibility. Health care providers do not deploy AI or related technologies to make care decisions; instead, they are used to assist and free up resources for patient care, reduce clinician burnout, and expand early warning systems. Opponents state that this bill would undermine patient-centric policies and conflict with medical staff rules and regulations by protecting any worker who provides direct patient care from reprimand or discipline. This bill would essentially create a new protected class of workers, allowing them to make independent, subjective decisions about patient care without accountability, so long as those decisions fall within their scope of practice. Opponents argue that this would effectively give any worker who provides care unfettered authority, even when the subjective judgment causes patient harm. If a patient were to suffer harm, or even if harm is averted after a

clinician "overrides" a tool's output, the health facility would be unable to take corrective action, as doing so would be considered retaliation under this bill. Opponents state that this bill would force health providers to pull back AI tools that patients and clinicians currently rely on, and point to a 2025 review of 92 published studies that found AI tools are delivering meaningful improvements across the health care system, in real clinical settings. Opponents state that this bill's disclosure requirements include details that may not be available for all tools or even to the deployer of the technology. Further, the content list applies to everything meeting the definition of a clinical decision support system, so a decades-old interaction checker or assessment score carries the same burden as a new diagnostic tool. Opponents state that AI is not an aspiration in health care, but is a reality that is currently saving lives. We have a shared obligation to ensure that these tools continue to be developed and deployed responsibly, equitable, and transparently. This bill would not achieve those goals, but would bury health care providers in unworkable disclosure requirements, create perverse liability incentives, undermine patient safety systems, impair clinical quality oversight, increase costs, and ultimately reduce patient access to beneficial technology.

SUBJECT: Lobbyist ethics

SOURCE: California Fair Political Practices Commission

DIGEST: This bill transfers from the Legislature to the Fair Political Practices Commission (FPPC) the duty to provide statutorily required training to lobbyists and prohibits a person from serving as a lobbyist for 12 years after a conviction for a crime of public corruption.

Senate Floor Amendments of 8/20/26 add the contents of AB 1560 (Tangipa) of 2026 to this bill to prohibit a person from serving as a lobbyist for 12 years following conviction of specified crimes.

ANALYSIS:

Existing law:

1) Regulates lobbyists through the Political Reform Act (PRA), including by requiring lobbying firms and lobbyist employers to register with the Secretary of State (SOS) and file periodic reports disclosing their activities.

2) Requires, as part of the registration process, that each lobbyist submit a lobbyist certification with the SOS. This certification shall include:

   a) A recent photograph;

   b) The full name, business address, and telephone number of the lobbyist;

   c) A statement that the lobbyist understands the statutory gift limit; and

   d) A statement that the lobbyist has or will complete an ethics course.

3) Prohibits a person from being a candidate for office or serving in elected office in California if the person has been convicted of a felony involving accepting, giving or offering to give any bribe, the embezzlement of public money, extortion or theft of public money, perjury, or conspiracy to commit any of these crimes.

4) Requires the appropriate legislative ethics committees of each house of the Legislature to conduct, at least semiannually, an orientation course on the relevant ethical issues and laws related to lobbying, in consultation with the FPPC to satisfy the ethics course requirement. This course must include information on each house of the Legislature's policies against harassment, including sexual harassment, in connection with lobbying activities.

5) Requires the committees to impose fees on lobbyists for attending the course in 4) of existing law and requires the fees to be set at an amount to enable the lobbyist's participation to be funded from those fees, to the fullest extent possible.

6) Requires lobbyists to attend an ethics training course at least once during each two-year legislative session as a condition of registering as a lobbyist.

7) Specifies administrative, civil, and criminal penalties for violating provisions of the PRA, including making any person who knowingly or willingly violates the PRA guilty of a misdemeanor. Conviction of a misdemeanor under the PRA precludes a person from being a candidate for office or acting as a lobbyist for four years, unless the court at sentencing determines this provision is not applicable.

This bill:

1) Prohibits a person from serving as a lobbyist for 12 years after a felony conviction for a crime of public corruption, defined in 3) of existing law. If a person is already a registered lobbyist and is convicted of such a crime, then the person's certification as a lobbyist shall be void upon the conviction, and the lobbyist is required to terminate their registration immediately upon conviction.

2) Requires a lobbyist certification submitted to the SOS to include a statement that the lobbyist has not been convicted of a crime of public corruption within the previous 12 years.

3) Prohibits the SOS from accepting a lobbying certification from a person who has indicated on the lobbying certification that they have been convicted of a crime of public corruption within the previous 12 years.

4) Repeals, effective January 1, 2029, the requirements in existing law for the legislative ethics committees to conduct training for registered lobbyists and to impose fees to fund that lobbyist training.

5) Requires the FPPC, beginning in 2029, to develop, maintain and offer a training course for registered lobbyists on ethical issues and laws relating to lobbying, and on the Legislature′s policies against harassment, including sexual harassment, in connection with lobbying activities.

6) Requires the FPPC to consult with the appropriate legislative ethics committees in developing the training course curriculum and gives the legislative ethics committees final approval over content relating to the Legislature′s policies against harassment.

7) Requires the FPPC-provided training course to be available on-demand through an online platform, internet webpage, or application.

8) Permits the FPPC to impose beginning in 2029 a $50 fee per lobbyist for taking the training course and to adjust that fee for inflation in every odd-numbered year, rounded to the nearest $10.

9) Requires funds collected by the Assembly and Senate Legislative Ethics Committees from lobbyist training that are unused before January 1, 2029, to be transferred to the FPPC for purposes of developing the lobbyist training.

Background

Proposition 9, which appeared on the June 1974 ballot, created the California Political Reform Act (PRA) and established California's system of regulating lobbying activity, campaign finance, and conflicts of interest for public officials. Proposition 9 created the FPPC to implement, administer, and enforce the PRA. The PRA regulates lobbyists, including requiring lobbyists, lobbying firms, and lobbyist employers to register with the SOS and to file periodic reports disclosing their activities.

The PRA requires any person who qualifies as a lobbyist, and thus works for a lobbying firm or a lobbyist employer, to submit a lobbyist certification and include a recent photograph of the lobbyist. The SOS makes a list, with photographs, of all lobbyists publicly available on its website, which also provides lists of registered lobbying firms and lobbyist employers. The SOS publishes a directory of registered individual lobbyists, lobbying firms, and lobbyist employers.

SB 1738 (Roberti, Chapter 84, Statutes of 1990), also known as the "Ethics in Government Act of 1990," enacted a comprehensive ethics reform package. Among other provisions, SB 1738 required legislators, designated employees of the Legislature, and lobbyists to take periodic ethics orientation courses, conducted by the legislative ethics committees in the Assembly and Senate.

Comments

Author's Statement. This bill strengthens ethics and accountability in California's lobbying process. Transferring lobbyist training to the FPPC will ensure consistent, standardized instruction from the state's primary authority on political ethics and campaign finance. The bill also reinforces the integrity of the lobbying profession by prohibiting individuals convicted of crimes of public corruption from serving as lobbyists for 12 years. Together, these reforms promote compliance, accountability, and public trust in California's governmental processes.

Crimes of Public Corruption. Existing law in Elections Code Section 20 prohibits a person from being a candidate for office or serving in elected office in California if the person has been convicted of a felony involving accepting, giving or offering to give any bribe, the embezzlement of public money, extortion or theft of public money, perjury, or conspiracy to commit any of these crimes. This bill refers to those crimes and that code section to define "crimes of public corruption" that make a person ineligible to lobby for 12 years conviction.

AB 2691 (Addis) of 2026 amends Elections Code Section 20 to expand the crimes that prohibit a person from running for office to include sexual assault and human trafficking. Thus, if both bills pass and become law, then a lobbyist would be ineligible to lobby for 12 years following the conviction of a crime of public corruption or specified sexual assault and human trafficking crimes.

Related/Prior Legislation

AB 1560 (Tangipa) of 2026 prohibits a person from serving as a lobbyist for 12 years after a conviction for a crime of public corruption.

AB 1789 (Boerner) of 2026 requires candidates and campaign treasurers beginning in 2029 to take an FPPC-provided training course on the requirements of the PRA.

AB 2055 (Levine, Chapter 964, Statutes of 2018) requires that lobbying ethics courses include information on the policies against harassment, including sexual harassment, established by each house of the Legislature.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Committee on Appropriations:

> FPPC indicates that it would require (1) one new analyst, at an ongoing annual cost of $107,000, and (2) annual software licensing costs of $80,000, to implement the provisions of the bill (General Fund). FPPC estimates $60,000 in revenue from the fee it may charge to each lobbyist that takes the training course (General Fund).

SUPPORT: (Verified 8/20/26)

California Fair Political Practices Commission (source)
California Common Cause

OPPOSITION: (Verified 8/20/26)

None received

ARGUMENTS IN SUPPORT: Writing in support, the FPPC, this bill's source, states:

> While Assembly and Senate Ethics Counsel do an excellent job conducting the training, the FPPC is more appropriately suited to provide this training as the experts on the state's lobbying laws and the agency charged with

> advising on the lobbying rules outside of this training. Shifting to an on-demand model will also assist lobbyists in fulfilling their training duty.

California Common Cause says shifting lobbyist training to the FPPC "makes a practical and important update to California's ethics framework" and represents a thoughtful and well-calibrated improvement to California's ethics infrastructure.

In addition, Common Cause writes of the prohibition on lobbying after a conviction for specified crimes:

> California Common Cause strongly supports efforts to protect the integrity of governmental decision-making and ensure that individuals who seek to influence public policy are held to appropriate ethical standards. Individuals convicted of serious public corruption offenses, such as bribery, embezzlement of public funds, extortion, and perjury, have engaged in conduct that undermines public trust in government and the democratic process. (This bill) addresses these concerns by establishing meaningful restrictions on lobbying activity for individuals convicted of such offenses.

SUBJECT: Health care facilities: notification of next of kin

SOURCE: Author

DIGEST: This bill 1) requires a hospital or a skilled nursing facility, if a person dies while in the facility, to make a reasonable attempt to notify any known next of kin, or if next of kin cannot be located, to notify the public administrator of the county within two business days; and 2) makes a violation of this requirement punishable by a civil penalty of $200 per day, up to $50,000, measured until the actual knowledge by the next of kin or the county public administrator of the decedent's death.

Senate Floor Amendments of 8/20/2026 incorporated technical assistance amendments provided by the California Department of Public Health, which added a five business day standard for notification of a person's death to the county public administrator, and made a number of technical and clarifying changes.

ANALYSIS:

Existing law:

1) Licenses and regulates health care facilities, including general acute care hospitals and skilled nursing facilities (SNF), under the California Department of Public Health (CDPH). [Health and Safety Code (HSC) §1250]

2) Requires the person in charge of a hospital, convalescent hospital, or board and care facility, if a person dies in the facility without known next of kin, to give immediate notice of that fact to the public administrator of the county in which the hospital or facility is located. Makes a hospital or facility, if this notice is not given, liable for any cost of interment incurred by the estate or the county as a result of the failure, and any loss to the estate or beneficiaries caused by loss, injury, waste, or misappropriation of property of the decedent. [Probate Code (PROB) §7600.5]

This bill:

1) Requires a general acute care hospital or SNF, if a person dies while in the facility, to make a reasonable attempt to notify any known next of kin that the person died in the facility.

2) Requires a hospital, if the body of a person is transferred to the hospital after death, to make a reasonable attempt to notify any known next of kin that the person's body is being held by the hospital.

3) Permits these requirements to be met by the hospital or SNF in either of the following ways:
   a) The facility notifies the designated resident representative of the person who died in the facility or has their body transferred to a hospital after death; or,
   b) The hospital or facility is informed by the person, prior to death and in writing, that they do not want their known next of kin to be notified of their presence or death.

4) Requires the facility, if they cannot locate any next of kin after a reasonable effort, to give notice within two business days of the fact that the person died in the facility or is being held by the hospital, to the public administrator of the county in which the facility is located.

5) Makes a hospital or SNF liable for both of the following if the notice to the next of kin or county public administrator is not given:

a) Any cost of interment incurred by the estate or the county as a result of the failure;
b) Any loss to the estate or beneficiaries caused by loss, injury, waste, or misappropriation of property of the decedent as a result of the failure.

6) Requires the hospital or facility, if it is required to notify the county public administrator, to provide the county public administrator with any identifying information they have available that may assist the county public administrator in identifying the decedent and their known next of kin, including the decedent's full legal name, social security number, driver's license, or other identification, residents at the time of death or last known address, and any available contact information for known next of kin.

7) Makes a general acute care hospital or an SNF that fails to make a reasonable attempt to notify any known next of kin, or to fail to notify the county public administrator within 5 business days, to be liable for a civil penalty in the amount of $200 for each day of the violation, up to $50,000. Specifies that these penalties do not preclude the application of any other existing civil remedies provided by law.

8) Permits a facility, if it disputes the assessment of a civil penalty under this bill, within 10 working days of the receipt of notification of the civil penalty, to request a hearing pursuant to specified provisions of existing law.

9) Defines various terms for purposes of this bill, including "reasonable attempt" as a documented, good-faith effort by the hospital or facility to contact any known next of kin within 72 hours of a person's death using any contact information available to the facility, including leaving a voicemail message and sending a text message or an email to the next of kin.

10) Makes technical changes to ensure that the new penalties established by this bill only apply to general acute care hospitals and SNFs, and that existing law as described in Existing Law 2) above continues to apply unchanged to health facilities that are not general acute care hospitals or SNFs, and board and care facilities.

11) Specifies that the provisions of this bill do not apply to the death of an incarcerated individual in the custody of the Department of Corrections and Rehabilitation, because next of kin notification for incarcerated persons are governed by other provisions of existing law, as specified.

Background

According to the author of this bill:

> No family should have to wait months or years to discover that a loved one has passed away while at a hospital. With clear notification requirements and an enforcement mechanism, this bill ensures that compassion, dignity, and communication remain at the heart of California's healthcare system.

Background from author. This bill is responding to a series of reports by local television station KCRA into cases where Mercy San Juan Medical Center in Sacramento had failed to notify family members and next of kin of multiple deceased individuals. In these cases, there were no public records of the patients' deaths, and family members reported that they received no communication about their deceased family member. In at least four of these cases, the deceased's family contacted local law enforcement, where they ultimately discovered that their family member had passed away months prior. According to KCRA's reporting, the hospital held these individuals remains in an off-site cold storage facility. KCRA also reported that while the problem was most significant at Mercy San Juan Medical Center, the problem spanned across other Dignity Health facilities, including Mercy General Hospital and even one SNF. There were at least 179 patients at the off-site morgues with a delayed death certificate of at least one month. In the most extreme example, a deceased individual had their death certificate and family notification delayed by 3.5 years. According to the author, there are currently multiple lawsuits pending against Dignity Health from family members of the deceased.

CDPH investigated the incident at Mercy San Juan Medical Center and found that the hospital consistently failed to notify patients' families of their death, and issued a statement of deficiency, which requires a plan of correction. The initial state of deficiency for Mercy San Juan, issued in 2022, showed multiple failures to notify next of kin. Although Mercy San Juan subsequently completed a plan of correction, the hospital was issued two more statements of deficiencies in the following years, demonstrating repeated compliance failure. The author argues that this repetitive issue revealed gaps and insufficiencies in California law, and that CDPH needs clear authority to impose a penalty on facilities that have significant delays in notifying next of kin.

Role of Public Administrators. Public Administrators, along with Public Guardians and Public Conservators, are a type of county official who act under the authority granted by the California Superior Court. The Public Administrator

handles the disposition of deceased estates of persons who die with no will or without an appropriate person willing or able to act as administrator. The Public Administrator's primary duties are to protect the decedent's property from waste, loss or theft; make appropriate burial arrangements; conduct thorough investigations to discover all assets; liquidate assets at public sale or distribute assets to heirs; pay the decedent's bills and taxes; and, locate persons entitled to inherit from the estate and ensure that these individuals receive their inheritance.

Under current law, if someone dies without known next of kin at a hospital, convalescent hospital (generally speaking, an outdated term for an SNF), or a board and care facility (typically an adult residential facility), the person in charge of these facilities is required to give immediate notice to the public administrator of the county in which the facility is located. The failure to give this notice makes the facility liable for the cost of interment and loss to the estate or beneficiaries as a result of the failure to notify. However, this requirement is in the Probate Code, and so CDPH does not have direct enforcement authority over this provision of law. Therefore, one of the provisions of this bill adds a provision to the Health and Safety Code giving CDPH the ability to assess penalties for failure to follow the Probate Code requirements when it comes to general acute care hospitals and SNFs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown ongoing costs, likely low hundreds of thousands, for CDPH to verify facility compliance with the updated next of kin requirements, investigate complaints, and conduct administrative proceedings (Licensing and Certification Fund).

Unknown, potential workload costs to the courts related to enforcement of civil penalties (Trial Court Trust Fund, General Fund). While the courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to increase the amount appropriated for trial court operations.

SUPPORT: (Verified 8/20/2026)

California Advocates for Nursing Home Reform

OPPOSITION: (Verified 8/20/2026)

None received

ARGUMENTS IN SUPPORT: California Advocates for Nursing Home Reform (CANHR) state in support that the recent KCRA news story reinforced sporadic accounts CANHR staff have heard over the years of health facilities failing to notify next of kin when a patient has died. This bill provides sensible and righteous requirements to ensure patient deaths are properly reported to the people who need and deserve to know about them.

SUBJECT: Planning and zoning: housing development: streamlined approval and subdivisions

SOURCE: Author

DIGEST: This bill makes several changes to the permitting and subdivision processes for small-scale housing developments.

Senate Floor Amendments of 8/21/2026 are nonsubstantive and do not make policy changes to AB 2601. The amendments address chaptering issues with SB 1090 (Perez), SB 1116 (Caballero) and AB 2005 (Ahrens).

ANALYSIS:

Existing law, pursuant to SB 9 (Atkins, Chapter 162, Statutes of 2021):

1) Requires a city or county to ministerially approve either or both of the following, as specified:

   a) A housing development of no more than two units (duplex) in a single-family zone; or,

   b) The subdivision of a parcel zoned for residential use, into two approximately equal parcels (urban-lot split), as specified.

2) Authorizes a city or county to impose objective zoning, subdivision, and design review standards that do not conflict with state standards, as specified.

Existing law, pursuant to the Starter Home Revitalization Act (SHRA):

3) Requires a local government to ministerially approve, without discretionary review or a hearing, a parcel map or a tentative and final map for a housing development project that meets, among others, the following requirements:

   a) The proposed subdivision will result in 10 or fewer parcels and the housing development project on the lot proposed to be subdivided will contain 10 or fewer units.

   b) The proposed development is located on a lot that meets all of the following sets of requirements:

      i) The lot is zoned for multifamily residential development or the lot is vacant, as defined, and zoned for single-family residential development.

      ii) The lot is no larger than five acres and substantially surrounded by qualified urban uses, as defined.

   c) The parcels created will be no smaller than the following unless the local government allows a smaller minimum parcel size:

      i) 600 square feet for parcels created by subdividing multifamily parcels.

      ii) 1,200 feet for parcels created by subdividing vacant single-family parcels.

   d) The housing units on the lot proposed to be subdivided are one of the following:

      i) Constructed on fee simple ownership lots.

ii) Part of a common interest development.

iii) Part of a housing cooperative, as specified.

iv) Owned by a community land trust.

e) The average total area of floorspace of the proposed units does not exceed 1,750 net habitable square feet.

4) Requires a local agency to ministerially consider an application for a project that meets the specified requirements of the Starter Home Revitalization Act.

Existing law, pursuant to the Davis-Stirling Common Interest Development Act:

5) Establishes rules and regulations governing the operation of Common Interest Developments (CIDs) and the respective rights and duties of a homeowners association (HOA) and its members. Requires the governing documents of a CID, and any amendments to the governing documents, to be adopted through HOA elections in accordance with specified procedures.

This bill:

1) Establishes concurrent processing of ministerial housing development applications and the appliable subdivision map applications for housing developments proposed under SB 9 (Atkins), as well housing developments proposed under the SHRA.

a) Allows, notwithstanding 2), a local agency to condition its issuance of building permits, grading permits, or certificates of occupancy for a proposed housing development upon the applicant first obtaining approval and recording a subdivision map for the lot split.

b) Allows a local agency to deem a building permit or other postentitlement permit for a housing development project incomplete and require revisions in response to any comments from the local agency or other reviewing agencies regarding the subdivision map's compliance with applicable state or local development and building standards.

2) Defines "parcel map" for the purposes of SB 9 (Atkins) to mean a parcel map prepared in accordance with the Subdivision Map Act (SMA) and may include a condominium plan if proposed by the subdivider and ultimately approved in accordance with the Davis-Sterling Act, as specified.

Background

SB 9 (Atkins, 2021). In 2021, the Governor signed SB 9 (Atkins, Chapter 162, Statutes of 2021), which allowed up to four homes on lots where currently only one exists. It did so by allowing existing single-family homes to be converted into duplexes; it also allowed single-family parcels to be subdivided into two lots, while allowing up to two units to be constructed on each newly formed lot. According to the Terner Center, that bill had the potential to allow for the development of nearly 6 million new housing units.

The Terner Center evaluated the use of SB 9 through the end of 2022 (one year from its enacted date of January 1, 2022). Researchers collected data from 13 jurisdictions and found that SB 9 activity was relatively limited. For example, Los Angeles had the most activity, with 211 applications for new units under SB 9 in 2022. The state's other large cities all reported few applications for lot splits or new units. For example, the City of San Diego reported receiving just seven applications for new SB 9 units in 2022[1].

Despite these initial reports, it is too early to draw any conclusions about SB 9's overall impact, as homeowners and local governments are still learning about the provisions in the bill. Similarly, it took a several years for accessory dwelling unit application and construction to increase after reforms took effect on January 1, 2017.

Ministerial subdivisions for smaller projects. In 2023, the Governor signed SB 684 (Caballero, Chapter 783, Statutes of 2023), which established the SHRA and streamlined small lot subdivisions to help promote their development. The statutory provisions created by that bill require local governments to ministerially approve a parcel map or tentative and final map with 10 or fewer units on sites zoned multifamily that are no larger than five acres and substantially surrounded by qualified urban uses. Projects must meet minimum density requirements and comply with existing setback and height requirements. Units can be no greater than 1,750 net habitable square feet. The project must also comply with any local inclusionary requirements. If the project receives a tentative or parcel map pursuant to this bill, the local agency must issue the building permit based on the approved map under specified circumstances. Two years ago, SB 1123 (Caballero, Chapter 294, Statutes of 2024) revised the statute to expand its scope, most notably extending the streamlining provisions to vacant lots zoned for single-family developments that meet specified conditions.

---

[1]Muhammad Alameldin and David Garcia, "State Law, Local Interpretation: How Cities Are Implementing Senate Bill 9," *Terner Center for Housing Innovation*, June 8, 2022, accessed April 9, 2025, **https://ternercenter.berkeley.edu/research-and-policy/state-law-local-interpretation-senate-bill-9/**.

Comments

Author's Statement. "This bill proposes to allow developments to be eligible for concurrent review of parcel map splits associated with specified development types, including ADU, condos, and SB 9 splits. By allowing concurrent review of different aspects of a single project, the development may be able to be approved faster, without imposing new deadlines on approving agencies, and provide greater certainty for project financing."

SB 9. Under SB 9, the total number of units that can be built on a formerly single-family zoned lot is capped at four. Under existing law, accessory dwelling units (ADUs) may be built in combination with SB 9 so long as the total number of units on a lot does not exceed four. Property owners may use both SB 9 and ADUs to achieve the maximum allowed density in a configuration that best suits their site and circumstances, for example, two primary units under SB 9 and one ADU per unit. Furthermore, SB 9 explicitly prohibits the owner of the parcel being subdivided from also subdividing the adjacent parcels under SB 9 in order to limit its applicability to a two-lot, four-unit cap.

This bill requires local agencies to allow concurrent processing of applications for urban lot splits and associated SB 9 duplexes. While this bill allows these approvals to proceed in parallel, it preserves existing sequencing requirements by authorizing local agencies to condition the issuance of building permits, grading permits, or certificates of occupancy on the prior approval and recordation of the parcel map for the urban lot split. This bill also makes targeted changes to facilitate the delivery and sale of small-scale ownership housing.

SB 684/ SB 1123. SB 684/1123 established a streamlined, ministerial pathway for small-scale housing development on subdivided lots. Specifically, these laws require local agencies to ministerially approve qualifying subdivisions of up to 10 parcels and associated housing development projects of up to 10 units on lots zoned for multifamily or on lots that are vacant and zoned for single-family residential developments. SB 684/1123 projects are required to meet specified objective standards related to site eligibility, density, affordability (if it is located on a site identified for lower-income housing in the most recent housing element), and environmental constraints. The statutes limit local discretion to objective zoning, subdivision, and design standards, prohibit standards that would physically preclude development at required densities, and impose firm timelines for approval. Together, these provisions are intended to facilitate "missing middle" housing by enabling smaller, by-right projects in urbanized areas.

This bill requires local agencies to allow concurrent processing of subdivision maps and ministerial housing development and building permit applications for projects authorized under SB 684/1123. While this bill allows these approvals to proceed in parallel, it preserves existing sequencing requirements by authorizing local agencies to condition the issuance of building permits, grading permits, or certificates of occupancy on the prior approval and recordation of the applicable parcel map or final map.

SUBJECT: Elections: ballot curing

SOURCE: California Voter Foundation
Protect Democracy United

DIGEST: This bill requires the Secretary of State (SOS) to implement and make available to county election officials a system that allows voters to access electronic signature curing.

ANALYSIS:

Existing law:

1) Requires every active registered voter to receive a vote by mail (VBM) ballot for any election. A VBM ballot is timely cast if it is received by the voter's elections official by mail no later than seven days after Election Day and is postmarked or time/date stamped on or before Election Day.

2) Requires election officials to compare the voter's signature on the identification envelope with the voter's signatures on file upon receiving a VBM ballot. If the

elections official determines the signature on a VBM ballot return envelope does not compare to the signatures in the voter's registration record or is missing, a voter is mailed a notice and a form detailing how to remedy the issue. This process is also known as "curing" a signature.

3) Provides a voter's VBM ballot is not rejected if the voter submits a signature cure form by 5 p.m. on the day of the applicable receipt deadline and the signature on that form compares to a signature in the voter's registration record.

4) Permits a voter to submit their completed statement by email, facsimile transmission, or by other electronic means made available by the local elections official.

5) Requires a local elections official offering other electronic means for submission of a signature verification or unsigned VBM envelope statement to establish appropriate privacy and security protocols that ensure the information transmitted is received directly and securely by the elections official and is only used for the stated purposes of verifying the signature on the voter's ballot.

This bill:

1) Requires the SOS to implement and make available to county election officials a system allowing voters to access electronic signature curing to mitigate issues related to a voter's missing or noncomparing signature on the voter's VBM ballot envelope.

2) Provides that any electronic signature curing service ensures data privacy and security for voters.

3) Requires the SOS to publish electronic signature curing data on its website. This data includes, by county, the number of voters who cured missing or noncomparing signatures using electronic signature curing and the number of voters to whom electronic signature curing was offered.

4) Permits the SOS to combine an electronic signature curing system with existing ballot tracking notifications.

Background

Curing Signatures Electronically. Under existing law, a voter may submit their signature cure form by mail, in person, via a ballot dropbox, a voting location, email, or fax. In addition to these methods, AB 1037 (Berman, Chapter 673,

Statutes of 2023) allowed voters to return a completed signature cure form by electronic means if service was made available by the elections official.

Some counties have implemented an electronic signature cure process that allows a voter to cure using a text platform, also known as a text-to-cure system. Voters sign the screen of their phone or tablet and submit it using a secure platform.

The Contra Costa County Registrar of Voters (ROV) implemented a text message signature cure process during the 2024 primary election. In the 2025 statewide special election, the Contra Costa ROV sent 3,643 cure letters for noncomparing signatures and voters cured 971 signatures, including 284 using text-to-cure and 58 using email.

Comments

Author's Statement. In the last general election in November 2024, over 69% of rejected VBM ballots were for either a missing signature or for a signature that did not compare to the signature associated with the voter's registration record. This amounted to nearly 85,000 ballots. Current law provides that if there is a missing or noncomparing signature on the VBM ballot envelope, our election officials notify the voter of the problem and how to correct the issue. In response to AB 1037, several counties have chosen to offer voters electronic curing as a secure, effective, and voter-friendly option to correct a missing or a signature that does not compare to the one on the voter's registration record. Unfortunately, far too many curable ballots are still not corrected. Accordingly, this bill simply provides for statewide adoption of electronic ballot curing, thereby making it more likely that eligible ballots are counted and less likely that voters are disenfranchised.

Electronic Signature Curing. Changing the wording from "text-message-based signature curing" to "electronic signature curing," allows for other methods, beyond text messaging, to be used for signature curing. For example, in Los Angeles County, a voter currently has the ability to return their signature cure form by mail, email, fax, text message, delivering the form in-person, or dropping off the form at a ballot dropbox or vote center. The change in wording does not limit a county to only text messages and allows for other electronic means.

The expanded wording is also aligned with the author's intent. The author sees this bill as a way to streamline the curing process and help get more ballots cured faster by facilitating statewide adoption of electronic ballot curing, in particular by having access to electronic ballot curing for all California voters.

Alternatively, "electronic" could also be interpreted with a narrow meaning. For example, the SOS could implement these provisions to only apply to facsimile submissions.

Related/Prior Legislation

AB 1037 (Berman, Chapter 673, Statutes of 2023) permits a voter to return a completed signature cure form by electronic means, if such means are made available by the elections official.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Committee on Appropriations:

> SOS indicates that it would incur annual costs in the millions of dollars to implement a statewide text-message-based ballot curing system (General Fund, see Staff Comments).

OPPOSITION: (Verified 8/19/26)

Secretary of State Shirley N. Weber, Ph.D.

ARGUMENTS IN SUPPORT: In a letter supporting this bill, Verified Voting stated, in part, the following:

> Several counties have already demonstrated that mobile curing is an effective, secure, and voter-friendly tool. [This bill] would build on that success by enabling the SOS to implement or support a uniform statewide system, improving cure rates and reducing the number of ballots that go uncounted.
>
> [...]
>
> Providing a mobile ballot curing solution allows California voters to use technology that they are already familiar with to cure their ballot. Benefits of adopting a solution statewide, rather than the current county-by-county approach, also include significant cost savings.

ARGUMENTS IN OPPOSITION: In a letter opposing this bill, SOS Shirley N. Weber, Ph.D., suggested amendments for this bill. Below is a summary of their proposed amendments:

- Replace specific provisions in the bill and insert language that adopts and publishes signature curing technology standards and regulations governing the certification and use of signature verification and signature curing technology. This includes technology capable of capturing digital signatures.

- Provide language that signature verification and/or signature curing technology must not be used unless it has been certified by the SOS. This includes a prohibition of certifying signature verification and signature curing technology by the SOS unless it meets the SOS' standards and regulations.

- Require counties, instead of the SOS, to collect and publish data required by this bill.

SUBJECT: Criminal procedure: prohibited violations

SOURCE: Author

DIGEST: This bill adds exercising any rights protected by the First Amendment of the United States Constitution to the list of prohibited violations for which an order for a warrant for the interception of a wire may not be issued.

Floor Amendments of 8/20/26 clarify that this bill's provisions do not prevent the interception of wire or electronic communications related to specified criminal offenses solely because the communications may also involve expression protected by the First Amendment to the United States Constitution.

ANALYSIS:

Existing Law:

1) Provides that Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof or abridging the freedom of

speech or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances. (U.S. Const., 1st Amend.)

2) Defines "legally protected health care activity" as any of the following:

   a) The exercise and enjoyment, or attempted exercise and enjoyment, by a person of rights to reproductive health care services, gender-affirming health care services, or gender-affirming mental health care services secured by the Constitution or laws of California or the provision by a health care service plan contract or a policy, or a certificate of health insurance, that provides for such services.

   b) An act or omission undertaken to aid or encourage, or attempt to aid or encourage, a person in the exercise and enjoyment or attempted exercise and enjoyment of rights to reproductive health care services, gender-affirming health care services, or gender-affirming mental health care services secured by the Constitution or laws of California.

   c) The provision of reproductive health care services, gender-affirming health care services, or gender-affirming mental health care services by a person duly licensed under the laws of California or the coverage of, and reimbursement for, those services or care by a health care service plan or a health insurer, if the service or care is lawful under the laws of California, regardless of the patient's location. (Penal (Pen.) Code, § 1549.15, subd. (b)(1)(A)-(C).)

3) Authorizes the Attorney General, chief deputy attorney general, chief assistant attorney general, district attorney, or the district attorney's designee to apply to the presiding judge of the superior court for an order authorizing the interception of wire or electronic communications under specified circumstances. (Pen. Code, § 629.50, et seq.)

4) Defines, for the purposes of wiretapping, "prohibited violation" to mean any violation of law that creates liability arising for, or arising out of, either of the following:

   a) Providing, facilitating, or obtaining a legally protected health care activity that is lawful under California law; or,
   b) Intending or attempting to provide, facilitate, or obtain a legally protected health care activity that is lawful under California law. (Pen. Code, § 629.51)

5) Authorizes that the court may grant oral approval for an emergency interception of wire, electronic pager, or electronic cellular telephone communications without an order as specified. Requires that approval for an oral interception be conditioned upon filing with the court, within 48 hours of the oral approval, a written application for an order. States that approval of the ex parte order shall be conditioned upon filing with the judge within 48 hours of the oral approval. (Pen. Code, § 629.56.)

6) States that no order entered under this chapter shall authorize the interception of any wire, electronic pager, or electronic cellular telephone or electronic communication for any period longer than is necessary to achieve the objective of the authorization, nor in any event longer than 30 days. (Pen. Code, § 629.58.)

7) Requires that written reports showing what progress has been made toward the achievement of the authorized objective, including the number of intercepted communications, be submitted at least every 10 days to the judge who issued the order allowing the interception. (Pen. Code, § 629.60.)

8) Requires the Attorney General to prepare and submit an annual report to the Legislature, the Judicial Council, and the Director of the Administrative Office of the United States Court on interceptions conducted under the authority of the wiretap provisions and specifies what the report shall include. (Pen. Code, § 629.62.)

9) Prohibits a California corporation that provides electronic communication services or remote computing services from complying with a warrant issued by another state if it is related to a prohibited violation. (Pen. Code, § 1524.2.)

10) Prohibits a California corporation or a corporation whose principal offices are located in California that provides electronic communications services from, in California, providing information or assistance with the terms of a warrant, court order, subpoena, or wiretap order that relates to the investigation or enforcement of a prohibited violation. (Pen. Code, § 1546.5.)

This bill:

1) Expands the definition of a prohibited violation, for which an order for a warrant for the interception of a wire may not be issued, to include any

violation of law that creates liability arising for, or arising out of, exercising any rights protected by the First Amendment of the United States Constitution.

2) Clarifies that a California corporation that provides electronic communication services or remote computing services shall not produce records when served with a warrant seeking a prohibited violation by a federal court as well as a state court.

Background

Recently, federal administrative subpoenas have been sent to technology companies in an attempt to obtain the content of communications as well as subscriber information and other user information regarding people who have accounts tracking Immigration Customs and Enforcement (ICE) agents or criticizing their activities. Administrative subpoenas do not require a court order review, and they do not need to be complied with, but some companies have responded or are unsure of how to act because there is no clear statutory basis on which they can rely. This bill clarifies that they should not release information relating to a prohibited violation.

Under existing California law, the Attorney General or a district attorney may make an application to a judge of the superior court for an order authorizing the interception of a wire, electronic pager, or electronic cellular telephone. (Pen. Code, § 629.50, et. seq.) The law regulates the issuance, duration, and monitoring of these orders and imposes safeguards to protect the public from unreasonable interceptions. The law also limits the crimes for which an interception may be sought to the following:

- Importation, possession for sale, transportation or sale of controlled substances;
- Murder or solicitation of murder or commission of a felony involving a destructive device;
- A felony in violation of prohibitions on criminal street gangs;
- Possession or use of a weapon of mass destruction;
- A violation of human trafficking;
- Sexual exploitation of a minor under Penal Code Sec. 311.4; or
- An attempt or conspiracy to commit any of the above.

Existing law states that no magistrate shall enter an order authorizing interception of wire or electronic communications for the purpose of investigating or recovering

evidence of a "prohibited violation." The law also prohibits a corporation from complying with a warrant that
seeks information relating to a prohibited violation. "Prohibited violation" is currently defined to mean any violation of law that creates liability for providing, facilitating, or obtaining—or attempting or intending to provide, facilitate or obtain—a legally protected health care activity.

Existing law defines "legally protected health care activity" as any of the following:

- The exercise and enjoyment, or attempted exercise and enjoyment, by a person of rights to reproductive health care services, gender-affirming health care services, or gender-affirming mental health care services secured by the Constitution or laws of California or the provision by a health care service plan contract or a policy, or a certificate of health insurance, that provides for such services.

- An act or omission undertaken to aid or encourage, or attempt to aid or encourage, a person in the exercise and enjoyment or attempted exercise and enjoyment of rights to reproductive health care services, gender-affirming health care services, or gender-affirming mental health care services secured by the Constitution or laws of California.

- The provision of reproductive health care services, gender-affirming health care services, or gender-affirming mental health care services by a person duly licensed under the laws of California or the coverage of, and reimbursement for, those services or care by a health care service plan or a health insurer, if the service or care is lawful under the laws of California, regardless of the patient's location. (Pen. Code, § 1549.15, subd. (b)(1)(A)-(C).)

This bill expands the definition of a prohibited violation, for which an order for a warrant for the interception of a wire may not be issued, to include any violation of law that creates liability for, or arising out of, exercising any rights protected by the First Amendment of the United States Constitution. This bill additionally clarifies that a California corporation that provides electronic communication services or remote computing services shall not produce records when served with a warrant seeking a prohibited violation by a federal court as well as a state court.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

The Senate Appropriations Committee writes:

Minor, absorbable costs to the Department of Justice to apply the expanded "prohibited violation" definition in wiretap order applications. Cases are expected to be few. (General Fund). Minor to modest cost pressure to the courts to adjudicate matters under the bill.

SUPPORT: (Verified 8/12/26)

Electronic Frontier Foundation
Oakland Privacy

OPPOSITION: (Verified 8/12/26)

None received

ARGUMENTS IN SUPPORT: Oakland Privacy writes:

> While nominally First Amendment activities are protected by the federal constitution for all Americans, and no state should be attempting to criminalize fundamental rights protected by the federal constitution, in practice we have seen some erosion in those rights around certain controversial issues, in particular immigration. Such efforts have been incited by disturbing language from the executive branch seeking to redefine protected activities, like protesting the way the federal government is carrying out immigration enforcement, into "terrorism" or other dangerous and illegal activities.
>
> In particular, executive order NSPM-7 equates a litany of beliefs with political violence and domestic terrorism including:
>
> Anti-Americanism, anti-capitalism, and anti-Christianity," "support for the overthrow of" the federal government, "extremism on migration, race, and gender," and opposition to "traditional American views on family, religion, and morality."
>
> This profound muddying of the waters of basic Constitutional freedoms that Americans have taken for granted for centuries, as well as the implicit encouragement in the memo to go after any civil

society institutions perceived to embrace any of these beliefs creates a dangerous situation for public dissent and First-Amendment protected acts of protest. It is basically a red flag for more conservative states to act to enforce limitations on the First Amendment.

Assembly Bill 2631 seeks to ensure that California will not be complicit with any attempts to criminalize First Amendment protections for freedom of speech and assembly.

SUBJECT: Secondhand dealers

SOURCE: California Pawnbrokers Association

DIGEST: This bill 1) requires all entities doing business in the scope of a secondhand dealer to have a valid California secondhand dealer's license; 2) exempts from secondhand dealer requirements tangible personal property that has been acquired from a nonprofit organization or as a bulk purchase of donated items; 3) deletes the definition of significant class of stolen goods; and 4) prohibits a local jurisdiction or any other state agency from issuing a license or permit to allow any entity to conduct business as a secondhand dealer without the entity having a state secondhand dealer license, among other changes.

Senate Floor Amendments of 8/21/26 delete adding all secondhand jewelry, items, or objects to the definition of tangible personal property and exempts tangible personal property acquired from a nonprofit organization or as a bulk purchase of donated items from secondhand dealer requirements.

ANALYSIS:

Existing law:

1) Defines a "secondhand dealer" to mean any person, copartnership, firm, or corporation whose business includes buying, selling, trading, taking in pawn, accepting for sale on consignment, accepting for auctioning, or auctioning secondhand tangible personal property. However, a "secondhand dealer" does not include a "coin dealer" or participants at gun shows, as specified. (Business and Professions Code (BPC) § 21626)

2) Defines "tangible personal property" to mean all secondhand tangible personal property that bears a serial number or personalized initials or inscription or that, at the time it is acquired by the secondhand dealer, bears evidence of having had a serial number or personalized initials or inscription, as specified. (BPC § 21627(a)(b))

3) Defines the California Pawn and Secondhand Dealer System (CAPPS), which is a single, statewide, uniform electronic reporting system that receives secondhand dealer reports and is operated by the California Department of Justice (DOJ). (BPC § 21627.5)

4) Requires every secondhand dealer or coin dealer, as specified, to report daily to CAPPS all tangible personal property (except firearms), which they have purchased, taken in trade, taken in pawn, accepted for sale on consignment, or accepted for auctioning, as specified. (BPC § 21628)

This bill:

1) Eliminates the exemption for coin dealers, as defined, from the provisions of the secondhand dealer's act and requires every entity acting as, and engaging in the actions of a secondhand dealer to have a valid secondhand dealer's license.

2) Clarifies that every entity acting as a secondhand dealer is required to report to CAPSS, as specified.

3) Deletes the definition of "significant class of stolen goods".

4) Clarifies that firearms are not subject to daily reporting requirements, as specified.

5) Removes a coin dealer from the reporting requirements under the secondhand dealer's act.

6) Prohibits a city, county, or city and county or any other state agency from issuing a license or permit to allow any entity to conduct business as a secondhand dealer without the entity having a secondhand dealer license, as specified.

7) Requires any person conducting business as a secondhand dealer to report receipt or purchase of secondhand tangible personal property to CAPSS, as specified.

8) Exempts from secondhand dealer requirements tangible personal property acquired from a nonprofit organization or as a bulk purchase of donated items.

9) Makes technical, clarifying and conforming changes.

Background

Secondhand Dealers. Regulation of secondhand dealers, which include pawnbrokers, began in 1980. The intent of regulation was to provide law enforcement agencies with a means to limit the selling of stolen property and to facilitate its recovery by way of a uniform statewide, state administered secondhand dealer licensing and reporting program. Secondhand dealers include those whose business comprises buying, selling, trading, taking in pawn, accepting for sale on consignment, accepting for auctioning or auctioning secondhand tangible personal property; however, coin dealers are exempt from the current definition of a secondhand dealer.

The CAPSS is a statewide electronic reporting system administered by the DOJ. Secondhand dealers across the state report their daily transaction to this database which allows access to law enforcement across the state. To help alleviate the unintentional acquisition of stolen property, in addition to strict reporting requirements about the tangible personal property received, secondhand dealers must also collect and retain seller or pledger information. Secondhand dealers currently report only those items that constitute a significant class of stolen goods which is further defined as "those items determined through the DOJ's most recent OpenJustice Web portal update to constitute more than 10% of property reported stolen in the calendar year preceding the annual posting of the list of significant classes of stolen goods". The sponsors of this bill note that the current definition of

significant classes of stolen goods is difficult to determine, so they have requested to strike the definition.

Secondhand dealers are licensed through local law enforcement. Persons, entities, or corporations wishing to conduct business as a secondhand dealer, must first apply for a specific license to conduct the business with the local licensing agency (chief of police or sheriff) who then receives background check results and a license number issued by the DOJ's Secondhand Dealer and Pawnbroker Unit.

Under current law, the secondhand dealer laws and reporting requirements exempt coin dealers as the definition of tangible personal property does not include coins, monetized bullion, or commercial grade ingots of gold, silver, or other precious metals. This bill clarifies that only a licensed secondhand dealer may buy, sell, trade, take in pawn, accept for sale on consignment, accept for auction, or auction secondhand tangible personal property. Additionally, this bill requires any entity acting as a secondhand dealer to report to CAPSS. This bill also prohibits a local jurisdiction or any other state agency from issuing a license or permit that allows any entity to conduct business as a secondhand dealer without a state secondhand dealer license. The changes proposed by this bill are intended to ensure that individuals and businesses operating as secondhand dealers and handling tangible personal property items, as defined in current law, are subject to all applicable licensing, reporting, and holding requirements. As recently amended, this bill would exempt tangible personal property acquired from a nonprofit organization or as a bulk purchase of donated items from the secondhand dealer requirements.

Comments

As recently amended, this bill adds an exemption to the definition of tangible personal property to include those items that have been acquired from a nonprofit organization or as a bulk purchase of donated items. It is unclear how this broad exemption will impact on the current secondhand dealer act and if this unintentionally create a new pathway to move stolen items and avoid reporting through CAPSS. The broad applicability of this exemption with limited clarification on the impact could undermine the intent of the secondhand dealer act which is to curtail the dissemination of stolen property and help facilitate the recovery of stolen property.

Internet Works and Protecting America’s Small Sellers note concerns and write, “…Our organizations take no issue with the goal of addressing operators that buy

gold directly from the public and may quickly melt or move the property before law enforcement can recover stolen goods.

“The language in print, however, goes far beyond that objective. It is not limited to temporary events, direct purchasers, out-of-state operators, or even gold. By adding “all secondhand jewelry, items, or objects” to tangible personal property and broadly applying licensing and reporting requirements across secondhand transactions, the bill creates substantial uncertainty for ordinary e-commerce and recommerce activity.

“Third-party marketplaces connect independent buyers and sellers; they generally do not purchase the item, acquire title, set the price, or possess the property. A Californians may simply be selling a personally owned watch, inherited jewelry, or another item never acquired for resale. Yet the current language could be read to treat casual sellers, marketplaces, and multiple service providers as secondhand dealers—and subject them to licensing, CAPSS reporting, fingerprinting, and physical holding requirements they cannot reasonably perform.

“The consequences are real. This uncertainty would increase compliance costs, discourage ordinary resale, reduce consumer choice, and burden casual sellers, microbusinesses, and small technology companies, while doing little to address the temporary gold-buying events that prompted the bill.”

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Committee on Appropriations, the bill will result in unknown, potentially significant workload cost pressures to the state funded trial court system to adjudicate any misdemeanor violations resulting from this bill. DOJ does not anticipate a significant fiscal impact.

California Pawnbrokers Association (source)

OPPOSITION: (Verified 8/24/26)

One individual

ARGUMENTS IN SUPPORT: California Pawnbrokers Association writes in support and notes, “AB 2633 clarifies existing statute to make it clear to event centers and hotels who host gold buying events, local government entities who issue permits to hold them, and local law enforcement agencies who police them, that all gold dealers ARE second-hand dealers and must follow the laws intended

to protect the public and help law enforcement trace and recover stolen property. This bill will close the loophole and close an avenue for the purchase and sale of stolen gold jewelry."

SUBJECT: Gambling Control Act

SOURCE: Author

DIGEST: This bill requires the Governor to notify the Legislature of the removal of any member of the California Gambling Control Commission (Commission).

ANALYSIS:

Existing law:

1) Provides, under the Gambling Control Act (Act), for the licensure and regulation of various legalized gambling activities and establishment by the Commission and the investigation and enforcement of those activities and establishments by the Department of Justice (DOJ).

2) Provides that the Commission consists of five members appointed by the Governor, subject to confirmation of the Senate, and requires the Governor to designate one member to serve as chairperson.

3) Requires that the Commission collectively include individuals with diverse professional backgrounds, such as experience in finance or accounting, law with regulatory expertise, law enforcement or criminal investigation, business or government, and representation of the general public.

4) Authorizes the Governor to remove any member of the Commission for incompetence, neglect of duty, or corruption upon first giving the member a copy of the charges and an opportunity to be heard.

5) Requires the Governor to fill any vacancies on the Commission, subject to confirmation by the Senate, within 60 days of the date of the vacancy.

6) Provides that a person is ineligible for appointment to the Commission if, within two years prior to appointment, the person was employed by, retained by, or derived substantial income from, a gambling establishment.

This bill:

1) Requires the Governor to notify the Legislature of the removal of a member of the Commission.

2) Makes other technical, nonsubstantive changes.

Background

Author Statement. According to the author's office, "the bill aims to ensure the prompt enforcement of gambling laws by addressing vacancies and enabling the Commission to operate efficiently. When seats are unfilled, even a single absence or recusal can hinder decision-making, leaving the industry without effective oversight and causing delays. The bill seeks to strengthen enforcement, improve dispute resolution, and expedite licensing."

Gambling Control Act. The Act provides the Commission with jurisdiction over the operation of gambling establishments in California. The Act requires every owner, lessee, or employee of a gambling establishment to obtain and maintain a valid state gambling license. The Act assigns the Commission the responsibility of

assuring that gambling licenses are not issued to, or held by, unqualified or disqualified persons, or by persons whose operations are conducted in a manner that is harmful to the public health, safety, or welfare.

The Act directs the Commission to issue licenses only to those persons of good character, honesty and integrity, whose prior activities, criminal record, if any, reputation, habits and associations do not pose a threat to the public interest of this state. The DOJ conducts background and field investigations and enforces the provisions of the Act in this regard.

California Gambling Control Commission. The Commission is composed of five members, all of whom are appointed by the Governor and confirmed by the California State Senate. State law establishes several requirements to ensure professional expertise and political balance on the Commission. For example, no more than three of the five commissioners may belong to the same political party. The statute also requires that the Commission collectively include individuals with diverse professional backgrounds, such as experience in finance or accounting, law with regulatory expertise, law enforcement or criminal investigation, business or government, and representation of the general public.

Current law authorizes the Governor to remove a member of the Commission for incompetence, neglect of duty, or corruption upon first giving the member a copy of the charges and an opportunity to be heard. This bill simply requires the Governor to notify the Legislature of the removal of a member of the Commission.

Prior/Related Legislation

SB 1235 (Senate Committee on Governmental Organization, 2026) requires the Governor to notify the Senate and Assembly Committees on Governmental Organization of the removal of a member of the Commission. (Pending on the Assembly Floor)

AB 2173 (Wallis, 2026) requires the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Pending on the Senate Floor)

AB 2793 (Assembly Committee on Governmental Organization, 2026) modifies existing law to require that one member of the Commission, among other criteria, to be an attorney with regulatory or gaming law experience. (Pending on the Senate Floor)

SB 864 (Padilla, 2025) would have required the Commission to post a public record of every vote on its Internet website no later than two business days after the meeting at which the vote was taken. (Gutted and Amended to an Unrelated Issue)

SB 1154 (Alvarado-Gil, 2024) would have required the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Never Heard in the Senate Governmental Organization Committee)

SB 346 (Ochoa-Bogh, 2023) would have required the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Never Heard in the Assembly Governmental Organization Committee)

SB 899 (Senate Committee on Governmental Organization, 2022) would have required the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Held on the Assembly Floor Inactive File)

SB 302 (Senate Committee on Governmental Organization, 2021) would have required the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Gutted and Amended to an Unrelated Issue)

SB 869 (Senate Committee on Governmental Organization, 2020) would have required the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Gutted and Amended to an Unrelated Issue)

SB 286 (Senate Committee on Governmental Organization, 2019) would have required the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Gutted and Amended to an Unrelated Issue)

AB 1827 (Assembly Committee on Governmental Organization, 2019) would have required the Commission to post a public record of each of its votes on its Internet Web site. (Died in the Senate Inactive File)

SUBJECT: Places of religious worship: unlawful activities

SOURCE: Jewish California

DIGEST: This bill prohibits a person, within a radius of 100 feet from an entrance or exit of a place of religious worship, from intentionally and nonconsensually approaching another person seeking to enter or exit a place of religious worship within 8 feet of that person to engage in specified conduct with that person.

Senate Floor Amendments of 8/20/26 clarify the definition of "place of religious worship" with regard to parking lots and specify that the above prohibition protects only those seeking to enter or exit a place of religious worship.

ANALYSIS:

Existing law:

1) Provides that Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof. (U.S. Constitution (Const.), 1st Amend.)

2) Provides that the free exercise and enjoyment of religion without discrimination or preference are guaranteed, and that the Legislature of the State of California shall make no law respecting an establishment of religion. (California (Cal.) Const, art. I, § 3.)

3) Establishes a legislative finding and declaration that it is the right of every person regardless of actual or perceived disability, gender, gender identity, gender expression, nationality, race or ethnicity, religion, sexual orientation, or association with a person or group with these actual or perceived characteristics, to be secure and protected from fear, intimidation, and physical harm caused by the activities of violent groups and individuals. (Penal [Pen.] Code, §11410, subd. (a).)

4) Establishes that the Legislature recognizes the constitutional right of every citizen to harbor and express beliefs on any subject whatsoever and to associate with others who share similar beliefs, but also that the advocacy of unlawful violent acts by groups against other persons or groups under circumstances where death or great bodily injury is likely to result is not constitutionally protected, poses a threat to public order and safety, and should be subject to criminal and civil sanctions. (Ibid.)

5) Provides that, except as provided, any person who willfully threatens, by any means, including, but not limited to, an image or threat posted or published on an internet web page, to commit a crime that will result in death or great bodily injury to another person or persons at any number of specified locations, including a house of worship, with specific intent that the statement is to be taken as a threat, even if there is no intent of actually carrying it out, if the threat on its face and under the circumstances in which it is made is so unequivocal, unconditional, immediate, and specific as to convey to the person or persons threatened a gravity of purpose and an immediate prospect of execution of the threat, and if that threat causes a person or persons to reasonably be in sustained fear for their own safety or the safety of others at these locations, shall be guilty of a crime, punishable as a wobbler. (Pen. Code, § 422.3.)

6) Provides, via the California Freedom of Access to Clinic and Church Entrances (FACE) Act, that every person who, except a parent or guardian acting towards

his or her minor child or ward, commits any of the following acts shall be subject to criminal punishment, as specified:

a) By force, threat of force, or physical obstruction that is a crime of violence, intentionally injures, intimidates, interferes with, or attempts to injure, intimidate, or interfere with, any person or entity because that person or entity is a reproductive health services client, provider, or assistant, or in order to intimidate any person or entity, or any class of persons or entities, from becoming or remaining a reproductive health services client, provider, or assistant; or

b) By force, threat of force, or physical obstruction that is a crime of violence, intentionally injures, intimidates, interferes with, or attempts to injure, intimidate, or interfere with any person lawfully exercising or seeking to exercise the First Amendment right of religious freedom at a place of religious worship; or

c) By nonviolent physical obstruction, intentionally injures, intimidates, or interferes with, or attempts to injure, intimidate, or interfere with, any person or entity because that person or entity is a reproductive health services client, provider, or assistant, or in order to intimidate any person or entity, or any class of persons or entities, from becoming or remaining a reproductive health services client, provider, or assistant; or

d) By nonviolent physical obstruction, intentionally injures, intimidates, or interferes with, or attempts to injure, intimidate, or interfere with, any person lawfully exercising or seeking to exercise the First Amendment right of religious freedom at a place of religious worship; or

e) Intentionally damages or destroys the property of a person, entity, or facility, or attempts to do so, because the person, entity, or facility is a reproductive health services client, provider, assistant, or facility; or

f) Intentionally damages or destroys the property of a place of religious worship. (Pen. Code, § 423.2, subds. (a)-(f).)

7) Makes a first violation involving nonviolent physical obstruction a misdemeanor, punishable by imprisonment in a county jail for a period of not more than six months and a fine not to exceed $2,000. (Pen. Code, § 423.3, subd. (a).)

8) Makes a second or subsequent violation involving violation involving nonviolent physical obstruction a misdemeanor, punishable by imprisonment in

a county jail for a period of not more than six months and a fine not to exceed $5,000. (Pen. Code, § 423.3, subd. (b).)

9) Makes a first violation involving force, threat of force, or physical obstruction that is a crime of violence or intentional property damage a misdemeanor, punishable by imprisonment in a county jail for a period of not more than one year and a fine not to exceed $25,000. (Pen. Code, § 423.3, subd. (c).)

10) Makes a second or subsequent violation involving force, threat of force, or physical obstruction that is a crime of violence or intentional property damage a misdemeanor, punishable by imprisonment in a county jail for a period of not more than one year and a fine not to exceed $50,000. (Pen. Code, § 423.3, subd. (d).)

11) Provides that a person aggrieved by a violation of the FACE Act may bring a civil action to enjoin the violation, for compensatory and punitive damages, and for the costs of suit and reasonable fees for attorneys and expert witnesses, except that only a person lawfully exercising or seeking to exercise the First Amendment right of religious freedom in a place of religious worship, or the entity that owns or operates a place of religious worship, may bring an action under provisions of the FACE Act related to conduct at a place of worship. (Pen. Code, § 423.4, subd. (a).)

12) Provides that courts in which a criminal or civil proceeding is filed for violations of the FACE Act shall take all action reasonably required, including granting restraining orders, to safeguard the health, safety, or privacy of specified parties that are parties to the proceeding, witnesses, victims, potential victims and others. (Pen. Code, § 423.5, subd. (a).)

13) Makes it a wobbler for a person to burn or desecrate a cross or other religious symbol, knowing it to be a religious symbol, on the property of a place of worship for the purpose of terrorizing a person who attends it, works at it, or is otherwise associated with it. (Pen. Code, § 11411, subd. (d).)

14) Provides that any person who, with intent to cause, attempts to cause or causes another to refrain from exercising his or her religion or from engaging in a religious service by means of a threat, directly communicated to such person, to inflict an unlawful injury upon any person or property, and it reasonably appears to the recipient of the threat that such threat could be carried out is guilty of a felony. (Pen. Code, § 11412.)

15) Defines "hate crime" as a criminal act committed, in whole or in part, because of one or more specified actual or perceived characteristics of the victim, including the victim's religion., where "religion" is defined as including all aspects of religious belief, observance, and practice and includes agnosticism and atheism. (Pen. Code, §§ 422.55, 422.56, subd. (g).)

16) Provides that a person, whether or not acting under color of law, shall not, by force or threat of force, willfully injure, intimidate, interfere with, oppress, or threaten any other person in the free exercise or enjoyment of a right or privilege secured by the Constitution or laws of this state or by the Constitution or laws of the United States in whole or in part because of one or more of the actual or perceived characteristics of the victim, including the victim's religion. (Pen. Code, § 422.6, subd. (a).)

17) Provides that a person, whether or not acting under color of law, shall not knowingly deface, damage, or destroy the real or personal property of any other person for the purpose of intimidating or interfering with the free exercise or enjoyment of a right or privilege secured by the Constitution or laws of this state or by the Constitution or laws of the United States, in whole or in part because of one or more of the actual or perceived characteristics of the victim, including the victim's religion. (Pen. Code, § 422.6, subd. (b).)

18) Provides that every person who intentionally disturbs or disquiets any assemblage of people met for religious worship at a tax-exempt place of worship, by profane discourse, rude or indecent behavior, or by any unnecessary noise, either within the place where the meeting is held, or so near it as to disturb the order and solemnity of the meeting, is guilty of a misdemeanor punishable by a fine not exceeding $1,000, or by imprisonment in a county jail for a period not exceeding one year, or by both that fine and imprisonment. (Pen. Code, § 302, subd. (a).)

This bill:

1) Provides that, within a 100-foot radius from an entrance or exit from a place of worship a person shall not, without consent, intentionally approach another person seeking to enter or exit a place of religious worship within 8 feet of that person to do either of the following:

   a) Pass a leaflet or handbill to, display a sign to, or engage in oral protest or education with the other person.

   b) Harass, obstruct, threaten, or intimidate the other person.

2) Provides that 8 feet shall be measured from the body of the person seeking to enter or exit a place of religious worship, or the exterior of a motor vehicle seeking to enter or exit a parking lot, to the body of, or any sign or object held by, another person.

3) Defines "place of religious worship" as any building, structure, or space that is used primarily for religious worship activities or to provide religious education or instruction. A "place of religious worship" shall include the parking lot and parking lot entrances, if the primary entrance to the building is through the parking lot, and the driveway and driveway entrances of any such building, structure, or space.

4) Provides that 100 feet shall be measured from the entrance or exit of the place of religious worship to the body of, or any sign or object held by, a person.

5) Provides that a first violation of the prohibition above is a misdemeanor, punishable by a fine not exceeding one $1,000, imprisonment in a county jail not exceeding six months, or by both that fine and imprisonment.

6) Provides that a second or subsequent violation of this section is punishable by a fine not to exceed $5,000, by imprisonment in a county jail for a period of not more than one year, or by both that fine and imprisonment.

7) Includes a severability clause.

Comments

California law safeguards the free exercise of religion and religious worship through a robust and well-established set of criminal statutes addressing a wide range of conduct. In 2001, the Legislature enacted AB 780 (Ortiz, Chapter 899, Statutes of 2001) which established a California FACE Act modeled closely after its federal counterpart, and as such included criminal penalties for conduct interfering with both religious and reproductive rights. Substantively, the California FACE Act sets forth 8 distinct crimes, three of which specifically apply to interference with persons or property damage at places of worship, and punishable as either misdemeanors or felonies depending on specified factors.

Perhaps the most comprehensive and well-defined criminal protections for religious freedom in California are its hate crime statutes, which include both standalone offenses and sentencing enhancements for specific conduct. Existing law defines "hate crime" as a criminal act committed, in whole or in part, because of one or more specified actual or perceived characteristics of the victim, including the victim's religion, where "religion" is defined as including all aspects of

religious belief, observance, and practice and includes agnosticism and atheism. The criminal statutes include a standalone wobbler prohibiting the use of force or threat of force to willfully injure, intimidate, interfere with, oppress, or threaten any other person in the free exercise or enjoyment of a constitutional right, as well as an enhancement that allows other misdemeanors, if motivated by religious animus (or any other desire to interfere with constitutional rights), to be charged as felonies. Yet another provision adds up to three additional years to felony hate crime sentences for specified aggravating conduct, such as acting in concert, using a firearm in the commission of the offense, or having a prior hate crime conviction.

Citing an uptick in antisemitism and violence driven by religious animus, the author seeks to add to this body of law aimed at protecting the free exercise of religion. Specifically, this bill prohibits a person, within a 100-foot radius from an entrance or exit of a place of religious worship, from intentionally and nonconsensually approaching within eight feet of another person seeking to enter or exit a place of religious worship to do either of the following: (1) pass a leaflet, display a sign, or engage in oral protest or education with another person; or (2) harass, obstruct, threaten, or intimidate the other person or occupant. It is already generally unlawful to harass, threaten, or intimidate another person. A violation of this provision is a misdemeanor, punishable by a fine of up to $1000 and 6 months in jail for a first offense, and by a fine of up to $5,000 and a year in jail for a second or subsequent offense. The bill defines “place of religious worship” as any building, structure, or space that is used primarily for religious worship activities or to provide religious education or instruction, including their parking lots, parking lot entrances, if the primary entrance to the building is through the parking lot, and the driveway and driveway entrances of such building. Moreover, this bill specifies that 100 feet shall be measured from the entrance or exit of the place of religious worship to the body of, or any sign or object held by, a person, and 8 feet shall be measured from the body of the person seeking to enter or exit a place of religious worship, or the exterior of the occupied motor vehicle seeking to enter or exit a parking lot, to the body of, or any sign or object held by, another person.

This bill includes a legislative intent section stating that its substantive provisions are “aimed at making clear that conduct that intentionally obstructs a person’s lawful exercise of that person’s religious freedom under the California Constitution and United States Constitution is unlawful.” To that end, this bill’s findings go on to state that “the protection of persons from deliberate and physical interference with their access to places of worship may be accomplished without infringing on constitutionally protected speech or activity,” and is not intended to “seek to favor one viewpoint over another or to limit speech regarding any specific topic.” While these findings have no bearing on the measure’s ultimate constitutionality, they do

foreshadow the First Amendment analysis that is likely to be dispositive in that regard.

For a discussion of this issue, please see the analysis prepared by the Senate Committee on Public Safety.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

> Unknown, potentially significant court costs to adjudicate the new misdemeanor offense.
>
> The fiscal impact will depend on the number of people charged with the new offense and the factors unique to each case. An eight-hour court day costs approximately $10,500. Although the courts are not funded on the basis of workload, increased pressure on the Trial Court Trust Fund may create demand for increased funding. The 2026-27 Budget provides $70 million to help pay for increased trial court operation costs (Trial Court Trust Fund, General Fund).
>
> Unknown cost pressure on the counties depending on how the misdemeanor sentence is imposed. Actual costs will depend on the number of convictions and whether the punishment is incarceration, a fine, or both. The average annual cost to incarcerate one person in county jail is approximately $77,250. In 2021 Los Angeles County budgeted $1.3 billion for jail costs, including $89,580 per incarcerated person. Generally, county incarceration costs are not reimbursable state mandates pursuant to Proposition 30 (2012).

SUBJECT: Vape products: household hazardous waste: advertising

SOURCE: Rural County Representatives of California

DIGEST: This bill requires the Department of Toxic Substances Control (DTSC) to evaluate opportunities for the safe management of confiscated vape pens at a school; authorizes the management of confiscated vapes from schools; and prohibits anyone from selling, marketing, advertising, or distributing a vape product if the vape product appeals to minors, as specified.

Senate Floor Amendments of 8/21/2026 would exempt schools transporting vapes to authorized hazardous waste management facilities from registration and manifest requirements, authorize household hazardous waste collection facilities to

accept a specified amount of acutely hazardous waste, remove the authorization for household hazardous waste collection facilities to disassemble vapes, and add contingency provisions with respect to AB 762 (Irwin) to add vape products, as described, to existing enforcement frameworks.

ANALYSIS:

Existing federal law establishes the federal Resource Conservation and Recovery Act (RCRA) to authorize the United States Environmental Protection Agency (US EPA) to manage hazardous and non-hazardous wastes throughout the wastes' life cycle. (42 United States Code (USC) §§ 6901 et seq.)

Existing state law:

1) Establishes the Hazardous Waste Control Law (HWCL) to authorize DTSC to regulate the management of hazardous wastes in California. (Health and Safety Code (HSC) §§ 25100 et seq.)

2) Defines "hazardous waste" as waste, that, because of its quantity, concentration, or physical, chemical, or infectious characteristics:
   a) Causes, or significantly contributes to, an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or
   b) Poses a substantial present or potential hazard to human health or the environment, due to factors including, but not limited to, carcinogenicity, acute toxicity, chronic toxicity, bio accumulative properties, or persistence in the environment, when improperly treated, stored, transported, disposed of, or otherwise managed. (HSC § 25141(b))

3) Defines hazardous waste as a federal RCRA hazardous waste if it meets any of the following criteria:
   a) It exhibits any of the characteristics of ignitability, corrosivity, reactivity, or toxicity, as defined;
   b) It is listed as a hazardous waste under federal regulation; or
   c) It is identified as a hazardous waste under state regulation, as specified. (22 California Code of Regulations (CCR) § 66261.100)

4) Defines "household hazardous waste" (HHW) as hazardous waste generated incidental to owning or maintaining a place of residence, but does not include waste generated in the course of operating a business at a residence. (HSC § 25218.1(e))

5) Establishes that counties and cities will provide services for the collection of HHW and that the state will provide an expedited and streamlined regulatory structure to facilitate the collection of HHW. (HSC § 25218)

6) Requires a household hazardous waste collection facility (HHWCF) to obtain a hazardous waste facilities permit, unless the HHWCF is a recycle-only facility that meets specified conditions. (HSC § 25218.8)

7) Enacts the Electronic Waste Recycling Act of 2003 (EWRA), which established a program for consumers to return, recycle, and ensure the safe and environmentally sound disposal of video display devices, such as televisions and computer monitors that are hazardous waste when discarded. (Public Resources Code (PRC) §§ 42460 et seq.)

8) Adds battery-embedded products to the EWRA. (PRC § 42463)

This bill:

1) Authorizes a HHWCF to rely on federal guidance and other provisions for the management of acutely hazardous waste for the purposes of determining how many vape pens and devices are accepted from very small quantity generators.

2) Authorizes a public agency, contractor of a public agency, or a registered hazardous waste transporter to transport vape pens and devices that were confiscated from students from a school that is a VSQG pursuant to an agreement between the school and local HHWCF.

3) Exempts a school transporting vape pens and devices confiscated from students from hazardous waste management registration and manifest requirements.

4) Authorizes a household hazardous waste collection facility to accept no more than 1 kilogram of acutely hazardous waste from a very small quantity generator (VSQG).

5) Authorizes a household hazardous waste collection facility to accept no more than 1 kilogram of extremely hazardous waste from a VSQG at a single time as long as it accepts a total of no more than 1,200 kilograms of non-acute hazardous waste and 12 kilograms of extremely hazardous waste from that VSQG in a calendar year.

6) Authorizes specified and separate accounting of non-acutely hazardous waste and acutely hazardous waste contained in vapes until DTSC adopts superseding

guidance or regulations and requires DTSC to provide written notice of the adoption of superseding guidance or regulations to Legislative Counsel.

7) Requires DTSC to evaluate opportunities to increase safety and convenience related to the management and disposal of vape pens and devices confiscated from students by a school, ensure the evaluation is consistent with RCRA, and identify recommendations that require future legislative action.

8) Defines "vape pen and device" to mean an electronic device that is powered by one or more removable or embedded batteries and that delivers solely, or a combination of, nicotine, cannabis, or other vaporized liquids to the person inhaling from the device, including, but not limited to, an electronic cigarette, cigar, pipe, hookah, or other delivery mechanism.

9) Prohibits a person from marketing, promoting, labeling, branding, advertising, distributing, offering for sale, or selling a vape product in this state by doing either of the following:
   a) Imitating a product that is not a vape product to conceal the nature of the vape product from adults, as specified; or
   b) Including interactive videogame capabilities within a vape product.

10) Authorizes a city, county, a city and county, or the state to enforce the prohibition on vape products, as specified, and impose civil liability on a person or entity in violation of this section in the amount of $1,000 for the first violation, $2,500 for the second violation, and $5,000 for the third and any subsequent violations.

11) Authorizes a city, county, a city and county, or the state to impose civil liability on a distributor, as defined, who violates the prohibition on vape products, as specified, in the amount of $50,000 per violation

12) Requires any civil penalties collected to be paid to the office of the city attorney, city prosecutor, district attorney, or Attorney General (AG), whichever office that brought the action.

13) Authorizes the penalties collected by the AG to be expended by the AG to enforce the prohibition on vape products, as specified, upon appropriation by the Legislature.

14) Requires that any person in violation of these provisions is guilty of an infraction punishable by a fine of not more than $500.

15) Authorizes an enforcement agency to seize a product at a retail location or any other person's location and for that product to be deemed forfeited to the state if the enforcement agency discovers that a tobacco retailer or any of its agents or employees sell, offer for sale, or possess with the intent to sell or offer for sale a vape product prohibited by these provisions.

16) Requires the California Department of Tax and Fee Administration (CDTFA) to suspend a license to engage in the sale of cigarettes or tobacco products of any person with a license who is in violation of these provisions upon a second seizure and forfeiture and revoke a license upon a third seizure and forfeiture.

17) Provides contingent enactment provisions referencing AB 762 (Irwin), which bans disposable, battery-embedded vapor inhalation devices, to include disposable, battery-embedded vapor inhalation devices and the vape products prohibited by this bill in the existing enforcement framework for prohibited flavored tobacco products.

Background

Vapes as hazardous waste. Hazardous waste is a waste with properties that make it potentially dangerous or harmful to human health or the environment. Hazardous waste is prohibited from being disposed of in the trash and must be properly transported and disposed of at permitted treatment, storage, and disposal facilities or at an authorized recycling facility.

Vapes are handheld, single-use or reusable electronic devices, typically powered by lithium-ion batteries, that vaporize a liquid containing nicotine or cannabis products. Vapes are known to carry and emit a variety of harmful substances, including polycyclic aromatic hydrocarbons (PAHs), heavy metals, aldehydes, carbon monoxide, and per- and polyfluoroalkyl substances (PFAS).[1] Vapes are considered hazardous waste under RCRA at their end of life due to both the corrosive properties of the embedded lithium-ion battery and the residual substances in the cartridge if filled with liquid nicotine. Liquid nicotine is considered to be acutely hazardous, thus more stringent requirements for management apply. For vapes containing cannabis products, residue left in the cartridges is considered hazardous waste under California law.

When improperly disposed of, vapes can release these hazardous substances into the environment. The embedded lithium-ion batteries may also pose a fire or explosion risk when damaged. The processes associated with solid waste

[1] Constantin, A. and Mihălțan, FD. (2025). E-Cigarette and Environment.

collection, recycling and disposal during transport and at facilities can apply various stressors to lithium-ion batteries, increasing this risk.[2] The California Prodcut Stewardship Council conducted a survey on fires at waste management facilities in 2018 and found that 40% of reported fires were caused by lithium-ion batteries.[3] While evidence that lithium-ion batteries in vapes directly cause the fires experienced by refuse trucks and waste management facilities is difficult to come by, it is generally recognized that lithium-ion batteries have been responsible for some of these incidents and that vapes have the potential to ignite or explode.[3,4,5] State law requires vapes to be disposed of at a household hazardous waste collection facility (HHWCF), or other authorized hazardous waste facility.

Youth vaping. The use of vapes is prevalent amongst youth.[6] In 2024, it was reported that over 1.6 million minors partake in vaping.[7] In a state-wide survey of youth vaping in schools, of nearly 8,000 staff from 255 middle and high schools, 31.9% reported seeing students vaping at school.[8] Vapes are said to be aggressively marketed to young people, as many vapes exhibit features that can be appealing to minors.[9] There are a myriad of adverse physical and mental health impacts associated with vaping, and studies show that there is an increased risk for youth in developing these negative health outcomes.[9] Additionally, vapes that were intended to target minors present additional waste management challenges. To combat the risk that these vapes pose to minors and waste management facilities, this bill would ban vapes that imitate a product that is not a vape to conceal its nature, as specified, and vapes that include interactive videogame capabilities.

Confiscation of vapes in schools. Because the use of tobacco products and controlled substances are prohibited at schools, school staff are expected to confiscate vapes from students. Because waste vapes are considered hazardous waste, the school becomes a generator of hazardous waste. Typically waste vapes are required to be disposed of at a HHWCF, however, because schools are not classified as "households" under federal regulation (40 CFR 261.4 (b)(1)), it is understood that schools cannot dispose of vapes at HHWCFs and must abide by federal regulations as a hazardous waste generator. When vapes are treated as

hazardous waste instead of HHW, the required handling, transportation, storage, and management of that vape pen is more intensive than if it were classified as HHW.

The U.S. EPA has issued guidance for schools and businesses on how to safely dispose of e-cigarettes (vapes containing nicotine), and depending on the amount of vapes collected, designates the hazardous waste generator categories.[10] While this information can serve as a resource for entities that may inevitably possess vapes, it can be very challenging and expensive for schools to manage the vapes they collect in this manner. Previous legislation (AB 998, Hadwick, 2025) would have authorized schools to transport and manage confiscated vapes as household hazardous waste (HHW), but it is possible that this would have conflicted with federal regulations. The bill was held on the suspense file in the Senate Appropriations Committee.

Because it may be challenging for schools to manage vapes as hazardous waste, this bill requires DTSC to evaluate opportunities that increase the safety and convenience for schools that need to manage and dispose of vapes, and identify recommendations that require future legislative action. Floor amendments would authorize HHWCFs to accept 1 kilogram of acutely hazardous waste (which allows for the acceptance of nicotine vapes), exempt schools from hazardous waste registration and manifest requirements, and adds contingency provisions to include AB 762 (Irwin) prohibited vape products, as described, in the existing enforcement framework for prohibited flavored tobacco products. Floor amendments also remove the authorization for HHWCFs to disassemble vape pens.

Comments

Purpose of Bill. According to the author, "Manufacturers are deceptively designing and marketing vapes to children. These vapes are disguised as everyday items, like school supplies or clothing. Some have features intentionally designed to increase dependency and addiction, like built-in video games. Schools are increasingly confiscating these vapes, yet they lack practical options to safely manage and dispose of them. Similarly, local household hazardous waste facilities receiving these vapes are unable to identify them and disassemble them, increasing costs and fire hazards.

[10] U.S. Environmental Protection Agency. (2026). How to Safely Dispose of E-Cigarettes: Information for Schools and Small Businesses.

Assembly Bill 2667 cracks down on these dangerous devices by banning disguised and interactive vapes. It also gives schools and local governments the tools to safely manage and dispose of vape waste. This bill protects kids, supports schools, and ensures hazardous materials are handled responsibly."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The Department of Toxic Substances Control (DTSC) estimates ongoing costs of approximately $440,000 annually (Electronic Waste Recovery & Recycling Account) to evaluate opportunities for the collection and disposal of vapes confiscated from students by a school, identify legislative or regulatory recommendations, update its Permit by Rule regulation (which creates a process that allows generators of hazardous waste to treat certain wastes without having to go through the formal permitting process) to explicitly authorize vape disassembly, coordinate with and provide oversight to the state's Certified Unified Program Agencies (who administer the Permit by Rule program at the local level), coordinate with U.S. EPA, and other associated tasks.

- The California Department of Tax and Fee Administration (CDTFA) estimates ongoing costs ranging from $239,000 to $463,000 annually (Cigarette and Tobacco Products Compliance Fund) to notify licensees of the vape product prohibition in this bill, seize and destroy newly prohibited vape products that do not fall under CDTFA's existing authority for flavored tobacco products, suspend or revoke licenses, and handle appeals. CDTFA notes this bill may also result in a reduction in cannabis excise tax and cigarette and tobacco product tax revenues of an unknown amount due to a reduction in available vape products and an increase in untaxed black market sales of prohibited products, a reduction in electronic cigarette excise tax and sales and use tax revenues of an unknown amount due to seizures of prohibited vape products by enforcement agencies from tobacco retailers, and a reduction in licensing fee revenues due to an unknown number of suspensions or revocations of cigarette and tobacco products licenses for noncompliance with the vape product prohibition (Cannabis Tax Fund, Cigarette and Tobacco Products Compliance Fund, Cigarette and Tobacco Products Tax Funds, General Fund, Local Revenue Fund 2011, Local Revenue Fund 1991, and Public Safety Fund).

- Forgone cannabis product license fee revenue as well as costs to the Department of Cannabis Control of an unknown but potentially significant amount (Cannabis Control Fund).

- The Department of Justice reports minor and absorbable costs.

SUBJECT: Low-income housing tax credits: lease nonrenewal: good cause

SOURCE: Author

DIGEST: This bill provides for the Low Income Housing Tax Credit (LIHTC) program, for any low income building that is subject to an enforceable regulatory agreement with a government entity, good cause for a nonrenewal of a lease includes when both a household's income exceeds 140% of the area median income (AMI) for at least two years and the 30% of the households monthly income fair market rent, as specified.

ANALYSIS:

Existing law:

1) Authorizers, under the tax on the gross premiums of insurers, the personal income tax (PIT) Law, and the corporate tax (CT) Law, a state LIHTC that is calculated in partial conformity with the federal LIHTC and may only be claimed over a period of four years.

2) Allocates $70 million on an ongoing basis to the California Tax Credit Allocation Committee (CTCAC) for the purposes of administering the LIHTC and adjusts this amount for inflation beginning in the 2002 calendar year, plus any unused amounts for the preceding calendar year and any amount returned in the calendar year.

3) Provides that an owner of a property financed using LIHTCs shall continue to be treated as occupied by a lower income household for purposes of the property tax welfare exemption if the occupants qualified as lower income (80% or less of AMI) when they first occupied the unit even if their income increases to 140% of AMI, adjusted for family size. However, the unit shall cease to be treated as a lower income unit if the income of the occupants of the unit increases above 140% of AMI, adjusted for family size.

This bill:

1) Provides for the LIHTC program, for any low income building that is subject to an enforceable regulatory agreement with a government entity, good cause for a nonrenewal of a lease includes when both a household's income exceeds 140% of AMI for at least two years and the 30% of the households monthly income exceeds the fair market rent for the county or the for the ZIP code, in which the unit is located.

2) Requires a property owner to provide specified notice to a tenant whose income exceeds 140% of AMI.

2) Requires a property owner to provide 90 days' notice prior to the expiration of the lease term if the basis for non-renewal of a lease is that a household's income has exceeded 140% of the AMI for two consecutive years and 30% of the household's monthly income exceeds the fair market rent for the county or the for the ZIP code, in which the unit is located.

Background

LIHTC. State and federal law allow a LIHTC to qualified taxpayers for incurring certain costs related to the construction, rehabilitation, or acquisition of low-income rental housing. In practice, low-income rental housing developers design projects and apply to the CTCAC for credits. If the CTCAC authorizes credits, the CTCAC enters a regulatory agreement with the housing developer that stipulates

income and rent restrictions. The CTCAC then reserves the credit amount for that application. Subsequently, the developer forms a partnership with investors that exchange equity financing for the credits, and the investors may then claim the credit over the authorized period. Rather than expecting the investment in a LIHTC project to produce income, investors rely on the credit to realize a return in the form of reducing their tax liabilities. The equity raised from this exchange lowers the financing costs for developers such that they can feasibly charge lower rents, thereby potentially expanding the supply of affordable rental housing.

There are two types of the LIHTC, the 9% credit and the 4% credit, which are awarded to projects that are non-federally subsidized or federally subsidized, respectively. The 9% credit is subject to a federally prescribed annual ceiling based on the population of a state; whereas, the 4% credit must have 50% of the project financed by federally tax-exempt bonds.

Comments

Author's statement. "Millions of Californians struggle to find and afford housing. However, the demand far outweighs the supply. Waitlists for public housing or federal housing voucher units can be extensive, with families often waiting months and even years before there is an open unit. Furthermore, current law does not provide a transition for tenants in deed-restricted units who begin to earn significantly more in annual income. AB 2689 would establish good cause for nonrenewal in households at 100% affordable housing sites for those tenants whose income exceeds 140% of the area median income (AMI) for at least 2 consecutive years. Tenants whose income grows to 140% of AMI would only have their leases not renewed if they could afford fair market rent, while paying 30% toward their rent. This in return would allow 100% affordable housing managers to transition higher income tenants out of units intended for the low-income families. This bill does not require affordable housing managers to transition over-income tenants – it only provides dignified metrics should they choose to do so. AB 2689 is about providing a fair, dignified process for affordable housing managers to transition units from over-income tenants to families who desperately need them."

Property Tax Welfare Exemption. Article XIII, Section 4(b) of the California Constitution authorizes the Legislature to exempt property used exclusively for religious, hospital, or charitable purposes, as specified, from taxation. Stemming from this authority, the Legislature implemented this "welfare exemption." To exempt certain activities from property taxes, AB 2144 (Filante, Chapter 1469, Statutes of 1989) added low-income housing developments operated by non-profit

organizations to this exemption because property tax funds "could better be used in furtherance of the goals of providing low-income housing." Generally, to qualify for the welfare exemption, the law requires that the rental housing be financed with specified tax-exempt bonds, government loans, or grants, or that the property's owner receives LIHTC. The welfare exemption extends to "units serving lower income households." To qualify, the State Board of Equalization has noted that a unit must be occupied by a lower income household (with a maximum income of 80% AMI).

In 2017, AB 1193 (Gloria, Chapter 756, Statutes of 2017) provided that, in cases where a property owner is eligible for the LIHTC, a unit shall continue to be treated as occupied by a lower income household if the occupants was lower income on the lien date in the fiscal year in which occupancy began and the unit continues to be rent restricted, notwithstanding an increase in the income of the occupants to 140% of AMI. However, under AB 1193, if the occupants' income increases over this threshold, the unit ceases to be treated as a lower income unit. This law was designed to provide income flexibility roughly in line with federal law governing the LIHTC.

Income Qualifying. The average income of a LIHTC project is 60% of AMI. To qualify for a LIHTC unit, tenants must income-qualify when first renting the unit. There are no federal tax laws limiting how much a tenant's income can increase once they are in a LIHTC unit. In addition, a developer can receive the property tax welfare exemption on any units where the tenant's income when first occupying the unit was 80% of AMI or less. State law allows a property owner to continue to receive the welfare exemption until the tenant's income reaches 140% of AMI. Once a tenant's income exceeds 140% of AMI, a property owner can no longer receive the property tax welfare exemption. There are no financial penalties in federal tax law governing LIHTC if a tenant's income exceeds 140% of AMI.

In a LIHTC project where there is a mix of lower income units and market rate units, federal law dictates the "The Available Unit Rule" (Rule). Under the Rule, a property owner is required to maintain the level of affordability agreed to receive the LIHTC. If development is required to have 20% of the unit's deed restricted to lower income units and a tenant in a deed-restricted units income exceeds 140% of AMI, the property owner must move that person to a market rate unit when one is available and replace the lower income unit with an income qualified tenant. In developments that are 100% affordable, developers cannot move tenants because all of the units are deed restricted to lower-income and a property owner cannot raise the rent if the tenant's income exceeds 140% of AMI because the unit is deed restricted to lower income. As a result, the property owner loses the property tax

welfare exemption on that unit. Forfeiting this subsidy can compromise the nonprofit's ability to support the operation on the development because the rents remain below market rent.

This bill gives a developer the option not to renew a tenant's lease if, for two years, their income exceeds 140% of AMI and they can rent a unit in the county or ZIP code in which they live and only pay 30% of their income toward rent. Housing costs are considered affordable if an individual pays 30% of their income toward the cost of housing. This policy would give property owners the option to fill a deed restricted lower income unit with an income qualified tenant, only if an existing tenant's income has grown to above moderate income and renting a unit in the private market allows them to continue to keep their housing costs at an affordable level. The intent of this bill is to ensure that scarce, state-subsidized units are made available to tenants who are lower-income, while ensuring that tenants whose incomes grow to more than triple the income required to initially qualify for a lower income unit are not displaced in high-cost markets. Tenants whose income grows to 140% of AMI would only have their leases not renewed if they could afford fair market rent, while paying 30% toward their rent. This ensures that tenants' housing costs remain affordable. Owners would notify tenants when their income reaches 140% of AMI so they can begin preparing for a market rate rental, including saving up for a security deposit and any other moving expenses.

SUBJECT: Public postsecondary education: community colleges: statewide baccalaureate degree program

SOURCE: Author

DIGEST: This bill 1) modifies the existing community college district baccalaureate degree program by authorizing program duplication if there is no substantially similar program offered at the California State University (CSU) or University of California (UC) within the geographic region; and 2) makes several technical changes, increasing required demonstration by an applicant of specified academic performance benchmarks, decreasing the percentage of baccalaureate programs that may be offered by a community college district, and requiring annual reporting to the Legislature.

ANALYSIS:

Existing law:

1) Differentiates the missions and functions of public and independent institutions of higher education. Under these provisions:

a) The primary mission of the CSU is to offer undergraduate and graduate instruction through the master's degree in the liberal arts and sciences and professional education, including teacher education. The CSU is authorized to establish two-year programs only when mutually agreed upon by the Trustees and the California Community Colleges (CCC) Board of Governors (BOG). The CSU is also authorized to jointly award the doctoral degree with the UC and with one or more independent institutions of higher education.

b) The UC provides undergraduate and graduate instruction and has exclusive jurisdiction in public higher education over graduate instruction in the professions of law, medicine, dentistry, and veterinary medicine. The UC is also the primary state-supported academic agency for research.

c) The independent institution of higher education requires undergraduate and graduate instruction and research in accordance with their respective missions.

d) The mission and function of the CCC are to offer academic and vocational instruction at the lower division level, and the CCC is authorized to grant the associate degrees. The CCCs are also required to offer learning supports to close learning gaps, English as a Second Language instruction, and adult noncredit instruction, and support services which help students succeed at the postsecondary level. (Education Code (EC) § 66010.4)

2) Authorizes the CCC BOG, in consultation with the CSU and the UC, to establish baccalaureate degree programs that do not duplicate a baccalaureate degree program offered by the CSU or UC. Allows for the approval of 30 CCC baccalaureate degree programs per academic year. Current law further requires the CCC Chancellor to consult with and seek feedback from the CSU Chancellor, the UC President, and the President of the Association of Independent California Colleges and Universities on proposed baccalaureate degree programs, as specified, and establishes a mechanism for the assessment, consultation, and approval of programs where duplication is identified, as specified. (EC § 78040 et seq.)

3) Requires the CSU Trustees to ensure that any changes in the admission criteria for campus admission comply with specified consultation, public meeting, notification and disclosure requirements, and prohibits any change from becoming effective until one year has elapsed, or six months, if the change is based upon the resources of the local service area of the affected campus.

Applies these requirements to all changes in the admission criteria that affect eligibility of local service area applicants, including changes to transfer requirements and determinations regarding impaction of majors. (EC § 89030.5)

This bill:

1) Modifies the eligibility and approval process for a community college district participating in the statewide CCC baccalaureate degree program.

2) Adds conditions for eligibility for a district participating in the CCC baccalaureate degree program to additionally satisfy either of the following:

   a) Demonstrate, in its application, that it meets or exceeds performance benchmarks and goals for associate degree and certificate completion, as established by the CCC BOG.

   b) If the district has not yet met the required benchmarks and goals for associate degree programs, submit a board-adopted improvement plan with measurable milestones consistent with the district's obligations under the strategic plan of the CCCs.

3) Prohibits a district from offering a baccalaureate degree program or program curricula *substantially similar*, instead of *already* offered, to a program offered by the CSU or the UC.

4) Allows the offering of a CCC baccalaureate degree program that is substantially similar where the CSU or UC does not enroll students from that geographic region in the same degree pathway or where documented unmet regional workforce needs justify the program.

5) When seeking authorization, includes in the list of information required for submission for review by the California Community Colleges Chancellor's Office (CCCCO) and CCC BOG, documentation demonstrating that the district meets the attainment eligibility requirements including the performance benchmarks and goals for associate degree and certificate completion for the community college district, or where applicable, the board-adopted improvement plan.

6) Reduces the total number of baccalaureate degree programs that may be offered by a district, at any time, from less than 25%to 15% of the total number of associate degree programs offered by the district.

7) Removes the requirement that the CCCCO notify and send materials to the CSU Chancellor, UC President, and the President of the Association of Independent California Colleges and Universities about the proposed baccalaureate degree program.

8) Removes the current process by which CSU or UC may assess and object to a program that they believe duplicates a UC or CSU existing degree program and instead requires that the CCC Chancellor consult with and seek feedback from the CSU Chancellor and UC President regarding proposed baccalaureate degree programs that may be substantially similar to CSU or UC programs offered within the geographic region of the proposing district. If the CSU or UC believes there is substantial similarity within the geographic region, they may submit a written objection with supporting evidence. Upon receipt of an objection, the CCCCO is required to convene the applicant and the objector to establish a written agreement before the program is approved.

9) Requires the CCCCO to annually report to the Legislature, no later than March 1, on the status of all approved baccalaureate degree programs, the approved information for each approved program, including student outcome data and evidence of achieving the specified attainment goals.

10) Defines all of the following terms for purposes of the bill:

    a) "Documented unmet regional workforce need" means evidence, showing demand for graduates in the field that is not met by existing baccalaureate degree programs within the geographic region, as demonstrated through labor market analyses prepared by the California Community Colleges Center of Excellence for Labor Market Research using labor market information and analyses published by the Labor and Workforce Development Agency. The labor market analyses shall consider projected employment demand, annual job openings, workforce supply, employer demand, wage data, and other indicators relevant to the proposed baccalaureate degree program.
    b) "Geographic region" means the primary service area of the community college district as defined by Title 5 of the California Code of Regulations or as otherwise defined by the CCCCO.

c) "Substantially similar" means that the proposed baccalaureate degree program's curriculum, learning outcomes, and program objectives are materially overlapping with those of an existing CSU or UC baccalaureate degree program offered within the geographic region of the community college district such that the programs serve indistinguishable academic and workforce purposes.

Comments

Need for the bill. According to the author, "California's economic future depends on our ability to meet regional workforce demands while expanding equitable access to higher education. AB 2694 ensures that community college bachelor's degree programs remain responsive, affordable, and aligned with local labor market needs. By clarifying outdated statutory barriers, this bill helps students—especially those who are place-bound or underserved—access high-quality, four-year degree opportunities in their communities."

Differentiation of mission. The state has four segments of higher education: three public and one private. Each plays a vital and unique role for the state and its students. Their mission statements are outlined in state statute. The CCCs are to have an open admission policy and bear the most extensive responsibility for lower-division undergraduate instruction. Its primary area of mission includes academic and vocational instruction leading to associate degrees and university transfer, career technical education, and remedial education. The primary mission of the CSU is undergraduate and graduate instruction through the master's degree. The UC was granted the sole authority to offer doctoral degrees and is the state's primary research institution. Despite the differentiation of mission, the Legislature has authorized the CSU and CCCs to go beyond their original mission to offer doctoral degrees and baccalaureate degree programs, respectively, so long as programs do not duplicate those offered by the other segments with primary jurisdiction. This bill would narrow the prohibition on duplication by permitting substantially similar programs under specified circumstances, raising the broader policy question of how much flexibility should be afforded before the distinction between segment missions begin to erode. Further expansion of CCC baccalaureate degree authority, as proposed in this bill, would signal the Legislature's willingness to allow CCCs to potentially deviate further from their core mission and duplicate programs offered by a segment with primary jurisdiction.

Existing CCC Bachelor's program. SB 850 (Block, Chapter 747, Statutes of 2014) authorized the BOG, in consultation with the CSU and the UC, to establish a CCC baccalaureate degree pilot program. The pilot program included 15 participating CCC districts to offer one baccalaureate degree program each to meet local workforce needs, as long as it did not duplicate a baccalaureate degree program already offered by the CSU or the UC. The original pilot led to the statewide authorization established by AB 927 (Medina, Chapter 565, Statutes of 2021), which allows the CCC BOG to approve qualifying programs twice a year. Today, as reported on the CCCCO website, there are more than 50 approved CCC baccalaureate programs statewide, primarily in applied and workforce-related fields such as health care, industrial technology, and public safety. Specific degree offerings include respiratory care, mortuary science, industrial automation, and public safety management. These programs are intended to address unmet regional workforce needs rather than broad expansion into traditional academic fields of study. Since 2017, approximately 1,893 students have attained a CCC bachelor's degree, with 293 completed in the 2023-24 academic year. This bill broadens the circumstances under which community colleges may offer programs that overlap with CSU or UC offerings.

Growing tension over duplication. This bill modifies the existing consultation process by eliminating the requirement that the CCCCO provide application materials to the Association of Independent California Colleges and Universities and replacing the current duplication review process with one requiring the CCCCO to consult with the CSU and UC and convene the parties to reach a written agreement when an objection is raised. These changes shift the process from a formal review of potential duplication to one that places greater emphasis on consultation and negotiated resolution across the public higher education segments.

The debate surrounding CCC baccalaureate degrees has increasingly moved away from the administrative approval process established in statute to the legislative process. Existing law establishes an administrative process intended to evaluate proposed CCC baccalaureate degree programs based on objective criteria, including workforce need and program duplication. Since enactment of the statewide program, disagreements regarding program duplication have resulted not only in formal objections during the Chancellor's review process, but also in district-specific legislation seeking authority to establish individual baccalaureate degree programs. In addition, community college districts have increasingly sought letters of support from Members of the Legislature as part of their applications, reflecting the growing role legislative advocacy has played in what was originally

intended to be an evidence based administrative review process. The issue is not whether CCCs should continue offering bachelor's degrees, but rather how duplication, workforce need, and student access should be evaluated.

Changes to program duplication standard. As mentioned, existing law generally prohibits a CCC from offering a baccalaureate degree that duplicates one already offered by CSU or UC. That prohibition serves two purposes. First, it preserves the differentiated missions established within California's higher education system. Second, it encourages public institutions to coordinate program offerings instead of competing for the same students. This bill would replace the current statewide duplication standard with one based largely on geographic region, allowing substantially similar programs where the CSU or UC does not enroll students from that region or where documented regional workforce need exists. The bill defines "substantially similar" to mean programs whose curriculum, learning outcomes, and objectives are materially overlapping such that they serve indistinguishable academic and workforce purposes. Under current law, "already offered" is undefined, establishing a statutory definition for "substantially similar" provides greater clarity regarding the standard applied during implementation. As a result, a CCC could be authorized to offer a degree that is already available elsewhere in the state so long as the statutory conditions are satisfied.

Workforce evidence. This bill would allow a community college district to offer a baccalaureate degree program that is substantially similar to a CSU or UC program where documented unmet regional workforce needs justify the program. A prior version of the bill defined documented unmet regional workforce need as evidence determined by the CCCCO. Given that this determination may be used to justify approval of a program that is substantially similar to one offered by the CSU or UC, those determinations should be based on objective workforce information. Senate Education Committee amendments made changes to the bill so that determinations regarding unmet regional workforce need rely on labor market information produced by the Labor and Workforce Development Agency as a neutral workforce entity, rather than solely left to CCCCO's discretion.

Defining "geographic region." The bill replaces the existing statewide duplication standard with one based on whether a substantially similar CSU or UC program exists within the "geographic region" served by the proposing CCC district. The bill defines geographic region as the primary service area of the CCC district, as defined in Title 5 in the California Code of Regulations or as otherwise defined by the CCCCO. CSU and UC campuses often serve students from multiple CCC districts and throughout the state. Given that duplication analysis depends on how a

geographic region is defined, the proposed definition may benefit from clearer parameters for defining that region.

Conditions eligibility on student attainment. Existing law focuses primarily on whether a proposed baccalaureate degree program addresses an unmet workforce need while avoiding duplication. This bill adds a new CCC district eligibility requirement by conditioning participation in the statewide baccalaureate degree program on a CCC district demonstrating that it meets specified associate degree and certificate completion benchmarks or alternatively, adopting a board approved improvement plan with measurable milestones. In doing so, the bill links expansion of baccalaureate degree authority to a district's performance in carrying out its existing community college mission. The inclusion of an alternative improvement plan recognizes that districts may be at different stages of improving student outcomes while still seeking to expand bachelor's degree opportunities. It ensures that CCC districts demonstrate success in serving students through their existing associate degree and certificate programs before expanding into upper-division instruction. The practical effect of the eligibility requirement will depend largely on how board adopted improvement plans are evaluated during the approval process.

Impact on CCCs core mission. In previous discussions around authorizing the offering of CCC baccalaureate degrees, concerns were raised that broadening the CCC mission would diminish attention to transfer, associate degree completion, remedial education goals, and career technical education. In an effort to address this concern and limit potential impacts on the CCCs' core mission of the CCC, as well as on existing associate degree programs at local campuses, existing law established by AB 927 limits the number of programs a CCC may offer to no more than 25% of the number of associate degree programs offered at the college. This bill reduces that cap from 25% to 15% of a district's associate degree programs, reflecting an effort to balance additional bachelor's degree authority with preservation of the CCCs critical mission.

Alternative solutions to expand access. If it is the desire of the Legislature to expand access to baccalaureate degree programs, more effective and efficient alternatives do not require a departure from the CCC's mission to expand and streamline bachelor's degree pathways between CCCs and public or nonprofit universities. There are numerous examples of successful CCC/CSU pathway partnerships across the state, including Sonoma State University's (SSU) liberal studies bachelor's degree completion program, which provides upper-division instruction to transfer students taught by SSU faculty on the Mendocino

Community College campus. This model brings the university to CCC students, building on the strengths of each segment. Further, in its recommendation for alternatives to the original CCC baccalaureate degree pilot program, the LAO's analysis notes that improving alignment between CCC and the universities could increase the number of CCC students who ultimately obtain a bachelor's degree and reduce the amount of time students take to obtain their degree. The Legislative Analyst's Office (LAO) report asserts that CCC and university pathways could not only be more cost-effective but also benefit more students (including place-bound students), thereby having a more widespread impact. Such models may address geographic access concerns without requiring CCCs to independently replicate university programs.

Higher education coordination. All of California's public education institutions share a commitment to work together to ensure that the various parts of the system work for all Californians. The assignment of distinct missions is important as it helps to justify allocation of state resources for three separate public university systems (CCC, CSU, and UC), contain growth in costs, and facilitate college access for all eligible California students. Although the Legislature recently established the California Education Interagency Council to improve coordination across California's education systems, California no longer has an entity charged with statewide higher education planning and coordination of institutional missions, academic program development, and long-range postsecondary policy following the elimination of the California Postsecondary Education Commission in 2011. As a result, significant changes to California's higher education framework are increasingly considered through individual legislative proposals rather than through a comprehensive statewide planning process, which could result in an uncoordinated and fragmented system. As the Legislature considers changes to the statewide approval process, continued coordination among the segments will remain important to ensuring that expansion of CCC baccalaureate programs complements, rather than fragments, California's broader system of higher education.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee analysis, this bill would have the following fiscal impact:

- The Community College Chancellor's Office indicates that the bill would not result in additional Proposition 98 General Fund costs to participating community college districts (CCDs) as the bill would operate within the fiscal conditions already established in statute for baccalaureate degree

programs offered at community colleges. Additionally, the Community College Chancellor's Office indicates that while the bill may lead to an overall increase in the number of new baccalaureate degree programs being approved, it cannot increase per-student costs as current statute ties funding for these programs to the current community college marginal rate for a full-time equivalent student. Further, community college districts must demonstrate full financial and operational capacity, including staffing, student supports, and long-term sustainability, before receiving authorization to offer a baccalaureate degree program.

- Depending on the number of new community college baccalaureate programs that are authorized as a result of this bill, it could impact enrollment across UC and CSU campuses and pose significant General Fund cost pressures.

- The Community College Chancellor's Office may incur minor General Fund costs to complete the annual report and provide technical assistance.

OPPOSITION: (Verified 8/14/26)

California Faculty Association
California State University, Office of the Chancellor
University of California

ARGUMENTS IN SUPPORT: The CCCCO states in their letter of support submitted to this Committee, in part, "AB 2694 recognizes that many community college students are place-bound learners, including working adults, caregivers, and first-generation students who cannot relocate or commute long distances to pursue a bachelor's degree. For these students, the existence of a program elsewhere in the state does not necessarily translate into meaningful access. Current transfer pathways remain critically important, but they alone have not been sufficient to address persistent workforce shortages. AB 2694 expands opportunities for students who may otherwise stop out, delay completion, or leave the state altogether, allowing them to advance their education while remaining connected to their communities.

"By expanding affordable and accessible baccalaureate degree opportunities, AB 2694 also helps address the financial barriers that prevent many students from pursuing a bachelor's degree. Community college baccalaureate degree programs provide one of the most affordable pathways to a four-year degree in California, helping reduce tuition costs and student borrowing while addressing access barriers for low-income students. Expanding lower-cost bachelor's degree pathways through community colleges can help increase statewide degree attainment and economic mobility without imposing the same level of financial burden often associated with traditional university pathways."

ARGUMENTS IN OPPOSITION: In their letter in opposition submitted to this Committee the CSU, argues, in part, "CSU believes that any proposal that significantly expands the Community Colleges' baccalaureate degree authority should include, at minimum, statewide duplication standards to ensure the efficient use of state resources, demonstration of meeting a clear workforce need, and a prohibition on substantially similar programs where CSU or UC programs are already accessible and effectively serving the region. Community colleges should demonstrate that they are meeting performance benchmarks for their core mission, including associate degree completion and transfer to four-year institutions, before offering new baccalaureate degree programs. We should also require annual reporting on the status and completion rates of these programs. Finally, proposals should include a full fiscal analysis across higher education segments and K-12 to understand how these degree expansions will impact Prop. 98 funding distributions and each segment's core mission. Legislators should consider whether Prop. 98 funding should be used for bachelor's degree programs, and if so, whether the CSU should also be able to access Prop. 98 funding for its own baccalaureate degree program. The state should support the expansion of baccalaureate degree programs through partnership programs, including clear limits and written agreement when

programs are substantially similar, while continuing to bolster each segment's core mission."

SUBJECT: Cannabis: drive-throughs

SOURCE: Author

DIGEST: This bill permits a local jurisdiction to allow a cannabis retailer or microbusiness licensee who conducts storefront retail sales to sell cannabis or cannabis products in a drive-through, located at the retail establishment if specified conditions are met.

ANALYSIS:

Existing law:

1) Enacts the Medicinal and Adult-Use Cannabis Regulation and Safety Act (MAUCRSA) to provide for a comprehensive regulatory framework for the cultivation, distribution, transport, storage, manufacturing, processing, and sale of medicinal and adult-use cannabis. (Business and Professions Code (BPC) §§ 26000 *et seq.*)

2) Establishes the Department of Cannabis Control (DCC) within the Business, Consumer Services, and Housing Agency for purposes of administering and enforcing MAUCRSA. (BPC § 26010)

3) Requires the DCC to make rules and regulations as necessary to implement, administer, and enforce its duties under MAUCRSA, as specified. (BPC § 26013)

4) Authorizes the DCC to issue a citation to a licensee or unlicensed person for violating any provision of MAUCRSA. (BPC § 26031.5)

5) Permits a local jurisdiction, if specified conditions are met, to allow for any of the following:

   a) Smoking, vaporizing, and ingesting of cannabis or cannabis products on the premises of a licensed retailer or microbusiness that has been granted authority by a local jurisdiction to engage in onsite cannabis consumption

   b) Preparation or sale of noncannabis food or beverage products in compliance with all applicable provisions of the California Retail Food Code, by a licensed retailer or microbusiness in the area where the consumption of cannabis is allowed.

   c) Live musical or other performances on the premises of a licensed retailer or microbusiness in the area where the consumption of cannabis is allowed, and the sale of tickets for those performances. (BPC § 26200(g)(1))

6) Prohibits cannabis or cannabis products purchased by a customer from leaving a licensed retail premises unless they are placed in an opaque package. (BPC § 26070.1)

This bill:

1) Authorizes a local jurisdiction to permit a retailer or microbusiness licensee that conducts storefront retail sales from a premises to sell cannabis or cannabis products to a customer in a motor vehicle in a drive-through on the premises.

2) Requires drive-through sales to occur through a fixed-pane security window with a security drawer or similar secure transfer mechanism that is part of a

building located within the premises.

3) Exempts a retailer or microbusiness licensee that conducted retail sales through a drive-through in compliance with state and local law before January 1, 2027, from the provisions of this bill.

4) States that the provisions of this bill do not apply to a licensee that conducts retail sales exclusively through delivery, or a licensee that does not maintain a premises open to the public for retail sales.

5) Requires any retail cannabis or cannabis product sales through a drive-through comply with the requirements of MAUCRSA and any regulations adopted by the DCC.

6) States that the provisions of this bill do not limit the authority of a local jurisdiction to regulate drive-through sales, as specified.

Comments

Retail sales of Cannabis and Cannabis Products. To sell cannabis or cannabis products, an individual must be a licensed retailer or microbusiness. There are two types of retail licenses: Type 9) non-storefront retailer which is delivery only and Type 10) a storefront retailer. A storefront retailer is one that has a physical location where cannabis goods are sold. Storefront retailers can also deliver cannabis goods if all DCC regulations and requirements are met. A microbusiness license holder is one that combines three or more of the following activities: cultivation, manufacturing, distribution, or retail sales (storefront or non-storefront). This bill would authorize a licensed retailer or microbusiness that conducts retail sales, to sell cannabis or cannabis products through a drive through, which must be located on the licensed retails premises. Retail sales of cannabis via a drive-through will only be permitted if a local jurisdiction allows it. This bill does not create a new license type, simply adds to the existing methods of providing consumers with access to legally purchased cannabis or cannabis products.

DCC currently permits a non-storefront retailer to conduct sales exclusively by delivery. Delivery of cannabis goods must be performed by a delivery employee of the licensed retailer. Cannabis deliveries must abide by the same requirements for retail sales including age/customer verification, restricted sale hours, among others. Curbside delivery, a valuable relief during the COVID-19 pandemic, was formally

adopted in regulations in 2022; thereby permanently allowing curbside delivery of cannabis or cannabis products from a licensed retailer or microbusiness authorized to engage in storefront sales. Curbside delivery is authorized if the cannabis goods that have been purchased by a customer are delivered to the customer in a vehicle parked immediately outside the licensed retail premises. Curbside delivery of cannabis goods must occur under video surveillance. Retail employees engaging in curbside delivery must verify each customer's age. Licensed retailers who are only authorized to engage in retail sales through delivery only may not conduct sales through curbside delivery.

DCC's current regulations expressly prohibit the sale of cannabis goods through a pass-out window or a slide-out tray to the exterior of the licensed premises. However, the regulations provide an exemption for those commercial cannabis businesses that were approved by their local jurisdiction to have a drive-in or drive-through window or had applied for and subsequently received approval prior to June 1, 2018.

This bill would expressly authorize a licensed retailer or microbusiness who conducts retail cannabis sales to conduct retail cannabis sales through a drive-through window located on the premises. Sales must occur through a fixed-pane security window with a security drawer. Similar to delivery only retail sales, this bill would prohibit a non-storefront retailer from providing sales through a drive-through window. This bill would authorize, but not require, the DCC to establish regulations regarding the sales of cannabis through drive-throughs if necessary. Because there was a period, when prior iterations of regulators in the cannabis legal market were silent on the drive-through authorization, there are a handful of retailers that have previously been authorized by their local jurisdictions to provide retail sales through a drive-through window. The number of retailers with drive-throughs is likely not tracked by the DCC, as no separate license is required for a retail establishment with a drive-through. As currently drafted, this bill would grant a cannabis retailer with a drive-through that was locally authorized prior to January 1, 2027, to be exempt from the requirements that the sales occur through a fixed-pane window with a security drawer.

Prevention Policy Group
Public Health Institute

ARGUMENTS IN SUPPORT: Supporters note "Adding drive through would create another consumer-friendly option for California consumers to access safe and legal cannabis, provided the local jurisdiction that approves the storefront retail operation further approves that retail location to offer this option. Further, it would allow a cannabis storefront retailer to provide the same level of service as curbside pickup, with the added benefit of not having employees exit the perimeter of the secured retail location."

ARGUMENTS IN OPPOSITION: Opponents note, "This proposal would normalize and further commercialize cannabis sales in a manner that encourages convenience-based and impulse purchasing. Drive-through retail is specifically designed to reduce friction in the purchase process. It contributed to the massive increases in fast-food consumption that have contributed to the obesity epidemic. For an intoxicating product, making purchases easier, faster, and more automatic risks increasing consumption and undermining the careful safeguards California has tried to build around cannabis sales. State regulatory rules established after Proposition 64 had banned marijuana drive-thrus unless a dispensary had a permit application submitted before June 2018."

SUBJECT: California AI Transparency Act: system provenance data

SOURCE: Author

DIGEST: This bill reworks certain provisions of the recently enacted California AI Transparency Act (CAIT) that apply to large online platforms.

Senate Floor amendments of 8/21/26 refine provisions related to the user interface that must be provided by large online platforms and clarify the requirements as they relate to downloading of personal information.

ANALYSIS:

Existing law:

1) Establishes the California AI Transparency Act, which becomes operative, in part, on August 2, 2026, and requires certain "covered providers" to make an artificial intelligence (AI) detection tool available at no cost by which a person can assess whether content was created or altered by the provider's GenAI system. (Business (Bus.) & Profession (Prof.) Code § 22757 et seq.)

2) Requires a "covered provider," a person that creates, codes, or otherwise produces a generative artificial intelligence (GenAI) system that has over 1

million monthly visitors or users and is publicly accessible within the geographic boundaries of the state, to offer users the option to include in AI-generated image, video, or audio content created by its own generative AI system a manifest disclosure that meets specified criteria, including that it identifies the content as AI-generated content. (Bus. & Prof. Code § 22757.3(a).)

3) Requires a covered provider to include in AI-generated image, audio, and video content created by its generative AI system a latent disclosure that is detectable by the tool specified above and is, to the extent technically feasible, permanent or extraordinarily difficult to remove. (Bus. & Prof. Code § 22757.3(b).)

4) Prohibits a covered provider from doing any of the following in carrying out the duties above:

   a) Collect or retain personal information when a person utilizes the covered provider's AI detection tool, except that it may collect and retain the contact information of a person who submitted feedback.
   b) Retain any content submitted to the AI detection tool for longer than is necessary to comply with this law. (Bus. & Prof. Code § 22757.2(c).)

5) Requires a large online platform, starting January 1, 2027, to do one of the following:

   a) Detect whether any provenance data that is compliant with widely adopted specifications adopted by an established standards-setting body is embedded into or attached to content distributed on the large online platform.
   b) Provide a user interface to disclose the availability of system provenance data that reliably indicates that the content was generated or substantially altered by a GenAI system or captured by a capture device. The user interface shall make clearly and conspicuously available to users information sufficient to identify the content's authenticity, origin, or history of modification, including specified information such as whether provenance data is available.
   c) Allow a user to inspect all available system provenance data that is compliant with widely adopted specifications adopted by an established standards-setting body in an easily accessible manner by any of several specified means. (Bus. & Prof. Code § 22757.3.1(a).)

6) Prohibits, starting January 1, 2027, a large online platform from, to the extent technically feasible, knowingly stripping any system provenance data or digital signature that is compliant with widely adopted specifications adopted by an established standards-setting body from content uploaded or distributed on the large online platform. (Bus. & Prof. Code § 22757.3.1(b).)

7) Provides that violators of the above provisions are liable for a civil penalty in the amount of $5,000 per violation to be collected in a civil action filed by the Attorney General, a city attorney, or a county counsel. Each day in violation is deemed a discrete violation. (Bus. & Prof. Code § 22757.4.)

8) Provides that the CAIT Act does not apply to any product, service, website, or application that provides exclusively non-user-generated video game, television, streaming, movie, or interactive experiences. (Bus. & Prof. Code § 22757.5.)

This bill:

1) Reworks provisions of the CAIT Act that apply to large online platforms, making stylistic and technical changes.

2) Allows a large online platform to permit users to download content provenance data directly from the platform, in a format that cannot be easily integrated into unrelated content, rather than downloading content with provenance data attached as currently provided in the CAIT Act.

3) Clarifies that the obligations imposed on these platforms shall not be construed to require them to maintain, display, or allow a user to download personal information.

4) Prohibits a large online platform from knowingly stripping system provenance data or a digital signature from content a user *downloads* from the large online platform.

Background

The rapid advancement of AI technology, specifically the wide-scale introduction of GenAI models, has made it drastically cheaper and easier to produce synthetic content, audio, images, text, and video recordings that are not real, but that are so realistic that they are virtually impossible to distinguish from authentic content. One method that has been increasingly relied upon is embedding into content

certain "provenance data," which is data that is embedded into digital content, or that is included in the content's metadata, for the purpose of verifying the digital content's authenticity, origin, or history of modification.

Last session, the Legislature passed the CAIT Act, which, beginning August 2, 2026, regulates provenance data disclosure in AI-generated content. "Covered providers" are required to embed latent provenance disclosures in content generated by their GenAI systems and to offer manifest disclosures. Providers are required to make available an AI detection tool at no cost to the user that meets certain criteria, including that it allows a user to assess whether content was created or altered by the covered provider's system. Last year, AB 853 (Wicks, Chapter 674, Statutes of 2025) bolstered the CAIT Act by establishing similar transparency requirements on large online platforms, capture device manufacturers, and GenAI system hosting platforms.

This bill reworks provisions added by AB 853 that apply to large online platforms. The bill is author-sponsored and supported by the Center for AI and Digital Policy. No timely opposition was received.

Comments

Last session, the Legislature responded to some of these issues by passing the CAIT Act, SB 942 (Becker, Chapter 291, Statutes of 2024), which is set to become operative, in part, later this year. The CAIT Act imposes obligations on "covered providers," persons that create, code, or otherwise produce a GenAI system that has over 1 million monthly visitors or users and is publicly accessible within the geographic boundaries of the state. It requires such providers to make an AI detection tool available at no cost by which a person can assess whether content was created or altered by the provider's GenAI system.

Covered providers are required to include a latent disclosure in AI-generated image, video, or audio content that is created by their GenAI system that is detectable using the above tool, and that is, to the extent technically feasible, permanent or extraordinarily difficult to remove. This latent disclosure must identify the provider, the tool, and the time and date of the content's creation or alteration. Covered providers are also required to provide users making such content with their system with the option to include a manifest disclosure that identifies it as AI-generated content.

Last year, AB 853 bolstered the CAIT Act by establishing similar transparency requirements on large online platforms, capture device manufacturers, and GenAI system hosting platforms.

This bill seeks to rework provisions of the Act added by AB 853 that apply to large online platforms and respond to some concerns raised by stakeholders. It includes a number of technical and clarifying amendments, including extension of the disclosure requirements to provenance data embedded into or attached to content, and provenance data otherwise associated with the content.

Currently, the law provides several options for platforms to disclose content provenance data to users. This bill amends one of those options and permits large online platforms to meet their obligations by allowing users to download provenance data attached to content rather than allowing them to download the content itself with the attached system provenance data. This must be provided in a format that cannot be easily embedded into, attached to, or associated with unrelated content. This comes in the wake of concerns about potential copyright issues and piracy of protected materials posted to these platforms.

In addition, the law currently prohibits a large online platform, to the extent technically feasible, from knowingly stripping any system provenance data or digital signature from content uploaded or distributed on the platform. This bill extends this prohibition to content downloaded from the platform.

According to the author:

> New and emerging developments of generative AI (GenAI) tools have made it easier to create, edit, and doctor images, video, and audio. GenAI technologies can create and manipulate content to look realistic and convincing, which allow bad actors to create harmful content and spread disinformation. With the passage of AB 853, there would be more transparency of AI-generated content in the digital information ecosystem, and users would have more information to understand the source of content. AB 2713 would provide additional clarification within existing law in order that any requirements to share provenance information on large online platforms would have to be operationalized in a way that protects content creators and allow for large online platforms to provide meaningful information for users on their platforms.

Motion Picture Association of America
Recording Industry Association of America

OPPOSITION: (Verified 8/23/26)

None received

ARGUMENTS IN SUPPORT: The Center for AI and Digital Policy writes, "AB 2713 takes a lifecycle approach and requires that provenance data persists with synthetic content. Without this requirement, disclosures and labels collapse into formalities that fail at the point of greatest exposure, when content leaves controlled device environments and circulates in the broader information ecosystem. California's existing AI Transparency Act requires large online platforms to "provide a user interface that reliably indicates whether content was generated or substantially altered by a GenAI system" but its anti-stripping prohibition reaches only content uploaded or distributed on the platform. AB 2713 closes this gap by extending the anti-stripping prohibition to content downloaded from the platform."

SUBJECT: Outdoor advertising displays: arenas: exemptions

SOURCE: Los Angeles Dodgers LLC

DIGEST: This bill extends, commencing January 1, 2028, a previously issued authorization for outdoor advertising displays for designated professional sports arenas, as defined, until January 1, 2032, as specified.

Senate Floor Amendments of 8/21/26 make various changes to the existing measure.

ANALYSIS:

Existing law:

1) Creates the Outdoor Advertising Act (OAA), a regulatory framework administered by the California Department of Transportation (Caltrans) to govern installation and operation of outdoor advertising displays (i.e., billboards) that are visible from state highways. OAA and related regulations determine the size, illumination, orientation, and location of advertising

displays adjacent to and within specified distances of interstate or primary highways, and, with some exceptions, specifically prohibit any advertising display from being placed or maintained on property adjacent to a section of landscaped highway.

2) Regulates, as an “off-premises advertising display,” a display along a highway that generally advertises business conducted or services rendered or goods produced or sold at a location other than the property where the display is located. The Act does not apply to “on-premises advertising displays,” which generally advertise business conducted or services rendered or goods produced or sold at the location where the display is located and which are separately regulated.

3) Exempts advertising displays associated with sports arenas (capacity of 15,000 or more seats), as defined, from specific provisions of OAA, provided that advertising display only includes products, goods, or services sold within that area on a regular basis, or marketed or promoted in that area pursuant to a sponsorship marketing plan, provided that the display is authorized by January 1, 2021, by, or in accordance with, a local ordinance, as specified. Advertising for distilled spirits, tobacco, firearms, or sexually explicit material is not permitted.

4) Defines a "sponsorship marketing plan" as an agreement between the property owner, facility owner, facility operator, or occupant of the premises of an arena and a sponsor pursuant to which the sponsor is allowed to include its logo, slogan, and that the agreement for a duration of not less than 120 days.

5) Requires Caltrans, when renegotiating an agreement with the Federal Highway Administration (FHA) relating to advertising signs, displays, and devices in areas adjacent to federally identified highway systems that specifies the state’s obligations for receipt of unreduced federal aid highway funds under federal law, to include among its priorities support for advertising displays at arenas.

6) Provides, by contractual agreement, for Caltrans to administer the federal Outdoor Advertising Control (OAC) program under the federal Highway Beautification Act of 1965 (HBA), which has restrictions similar to California’s OAA program, including maximum sign size, sign spacing, location, illumination, and content. If the state fails to properly administer the federal program, the state is subject to lose 10% of its federal highway funding.

7) Requires that if an advertising display associated with a sports arena is subject to a notice from the federal government that the display will result in the reduction of federal highway funds, the authorization of the display shall cease. Failure to remove the advertising will result in a fine of $10,000 per day until the advertising is removed.

8) Provides that responsibility for ensuring that the signs are compliant with the law is responsibility of the city or county which authorized the signs and that the city or county shall indemnify Caltrans for all costs incurred to ensure compliance.

This bill:

1) Commencing January 1, 2028, extends an authorization date for advertising displays for designated professional sports arenas, as defined, with a capacity of 15,000 or more seats to January 1, 2032, by, or in accordance with, a local ordinance or other discretionary approval, including, but not limited to, a specific plan or sign district adopted in connection with the approval of the arena that benefits the arena and that is adopted by the city, county, or city and county, bears the name or logo of the arena, and is visible when approaching offramps from the interstate, primary, or state highways used to access the premises of the arena. An arena shall not be permitted more than two advertising displays allowed under this measure.

2) Provides the exemption would be limited to an arena fully constructed or under construction before January 1, 2027, as specified.

3) Provides the advertising displays are exempt from specific provisions of OAA, provided that the billboards are used exclusively either to advertise products, goods, or services sold by persons on the premises of an arena on a regular basis, or to advertise products, goods, or services marketed or promoted on the premises of an arena pursuant to a sponsorship marketing plan, as specified.

4) Requires Caltrans to make a determination that an outdoor advertising display approved by the provisions specified in this bill does not cause a reduction in federal funds or is inconsistent with any federal requirements, as specified. Further requires Caltrans to request FHA to make and submit the abovementioned determination if Caltrans is unable to make the determination.

5) Provides, this bill would require certain advertising displays placed pursuant to the exemption for one arena to be located at least 5,000 feet from an advertising display authorized pursuant to the exemption for another arena.

6) Defines "Premises of an arena" means either of the following:

   a) A venue for indoor or outdoor sports, concerts, or other events.
   b) Any development project or district encompassing the venue, adjacent to it, or separated from it only by public or private rights-of-way, the boundaries of which have been set by the city, county, or city and county in which the arena is located. The development project or district shall be contiguous and shall not extend more than 1,000 feet beyond the arena structure or any structure physically connected to the arena structure.

7) Defines "Sponsorship marketing plan" means an agreement between the property owner, facility owner, facility operator, or occupant of the premises of an arena and a sponsor pursuant to which the sponsor is allowed to include its logo, slogan, or advertising on advertising displays and that meets both of the following conditions:

   a) The sponsorship marketing plan is for a period of not less than 120 days.

   b) The sponsorship marketing plan grants the sponsor the opportunity to display its logo, slogan, or advertising in the interior of structures on the premises of an arena, or conduct promotions, public relations, or marketing activities on the premises of an arena.

Comments

Purpose of the bill. According to the author, "California is home to some of the most iconic sports and entertainment venues in the world—from stadiums like Dodger Stadium to Levi's Stadium—but many facilities need updated tools to remain competitive in today's modern landscape. AB 2717 extends the existing sunset provision to January 1, 2032, ensuring that professional sports arenas can continue seeking local government approval to install off-site advertising displays tied to their operations. As California prepares to host major global events like the 2028 Summer Olympics, it is critical that our stadiums and arenas are equipped to meet the moment. Beyond economic benefits, these displays can serve the public good—supporting civic uses like voting centers and community events, and delivering critical information such as Amber Alerts and emergency notifications.

AB 2717 ensures our venues remain both economically viable and responsive to the needs of the communities they serve."

OAA: A history. Since 1933, Caltrans has enforced OAA which contains comprehensive standards and regulations for outdoor advertising displays. Caltrans regulates the placement of outdoor advertising displays visible from California highways. Outdoor advertising displays require a permit from Caltrans if they are within 660 feet from the edge of the right-of-way and viewed primarily by persons traveling on the main-traveled way of the freeway. In order to enforce the requirements for outdoor advertising under HBA and the State's OAA, Caltrans regularly inspects freeways and highways that are part of the National Highway System.

The OAA regulates the size, illumination, orientation, and location of advertising displays adjacent to and within specified distances of interstate or primary highways, and, with some exceptions, specifically prohibits any advertising display from being placed or maintained on property adjacent to a section of landscaped highway.

The Act generally does not apply to "on premises" advertising displays, which include those advertising the sale of the property upon which it is placed or that advertise the business conducted, services rendered, or goods produced or sold on the property. Local governments regulate on-premises displays, except for certain safety requirements. Lastly, existing law includes a number of exceptions to OAA and assigns Caltrans the responsibility of reviewing and permitting signs that qualify for these exceptions.

OAA exemptions for arenas. The basis for the professional sports arena (capacity of 15,000 or more seats) exemption governing permitted off-site billboard advertising was established in 2013 (SB 31, Padilla, Chapter 542, Statutes of 2013). The intent was to support the financing of sports arenas by creating alternatives to public funding. The exemption was later clarified to limit advertising displays to products, goods, or services that are either sold within the arena on a regular basis or marketed and promoted there under a sponsorship marketing plan of at least one year. This clarification was viewed as a compromise addressing concerns from both arena developers—seeking to maximize advertising revenue—and traditional outdoor advertising companies, which faced newly funded competition from arena-based displays in locations previously unavailable to the outdoor industry and advertisers.

Over the years, several attempts were made to extend the 2021 exemption sunset. Most recently, in 2022, SB 1309 (Durazo) would have extended the authorization date for advertising displays for designated professional sports arenas with a capacity of 15,000 or more seats to January 1, 2028. The exemption would have been limited to arenas constructed or under construction before January 1, 2023, and would have required that the display be in accordance with a local ordinance or other discretionary approval. SB 1309 was ultimately vetoed by the Governor. Many of the provisions specified in this bill, AB 2717, mirror the provisions included in SB 1309.

HBA of 1965. The HBA was created to protect the public investment, promote the safety and recreational value of public travel, and to preserve the natural beauty of highways in the nation. The HBA specifies that states have the responsibility to enforce provisions regarding the placement and maintenance of outdoor advertising signs, displays and devices along the Interstate and National Highway System. The state of California enforces the provisions of federal law through a compact that was developed between the state and the federal government in 1967. Federal law also includes a penalty for states that violate the HBA by reducing all federal highway transportation funds by a designated percentage – thus, if the state fails to properly administer the federal program, the state is subject to a sanction that would reduce its federal highway funding allocations by 10%.

In attempt to avoid any federal violations, this bill contains provisions that requires Caltrans to determine if an outdoor advertising display locally approved under this measure violates federal requirements. An outdoor advertising display would be prohibited from being constructed / erected if Caltrans makes a determination that the display violates federal requirements.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Caltrans estimates costs in the range of $150,000 for additional staff resources to review whether a proposed display conforms with local ordinances or other discretionary approvals and with state and federal law. Specifically, Caltrans must determine whether proposed displays conform with federal requirements or agreements and will not cause a reduction in federal funds, and/or make requests to the Federal Highway Administration (FHWA) to make those determinations. Actual Caltrans administrative costs would depend upon the number of reviews and associated inspections that are conducted in a given

year. (State Highway Account)

- Caltrans further notes the potential risk of federal sanctions that would reduce federal highway allocations by up to $580 million, to the extent Caltrans does not maintain effective control of outdoor advertising. Staff notes that this bill includes a provision requiring Caltrans, before authorizing a display to be placed, to make a determination that a proposed display will not cause a reduction in federal aid funds, or to request that FHWA make that determination, which should mitigate the risk of federal sanctions.

SUBJECT: Catastrophe modeling: distressed areas

SOURCE: Author

DIGEST: This bill requires the California Department of Insurance (CDI) to review and update distressed areas, on or before July 1, 2027, and yearly thereafter. Establishes additional requirements for public input and awareness of areas classified as distressed.

Senate Floor Amendments of 8/20/26 1) Revise findings and declarations. 2) Create new intervals for the payment of non-compliance penalties regarding the submission of reports by certain admitted insurers to the Insurance Commissioner (Commissioner) every two years related to their residential property policies' fire risk. 3) State that by July 1, 2027, and annually thereafter, CDI must conduct a review and update of distressed areas, pursuant to Section 2644.4.8 of Title 10 of the California Code of Regulations, based on updates of WUI-designated areas. 4) Specify as part of that review, CDI must consult with the Department of Forestry and Fire Protection (Cal FIRE) regarding wildfire hazard and WUI-designated areas. The review must also consider analysis of ZIP Codes based on the number of properties insured by the California Fair Access to Insurance Requirements Plan Association (FAIR Plan) and by admitted insurers. The review must contain a

process for public participation, as specified. 5) Require CDI to publish the review's findings by January 1, 2028, and annually thereafter with required information on ZIP Codes in WUI areas. These findings must also be provided to the Senate and Assembly Insurance Committees. 6) Allow these findings to be published every other year if the percentage of homes in WUI-designated areas on the FAIR Plan or uninsured homes reduces by 20% or more from the preceding year.

ANALYSIS:

Existing law:

1) Creates the CDI, headed by the Commissioner, and generally regulates the business of insurance in the state.

2) Establishes the FAIR Plan to assure the stability of the property insurance market, to assure the availability of basic property insurance, as defined, to encourage maximum use of the normal insurance market in obtaining basic property insurance provided by admitted insurers and licensed surplus line brokers.

3) States under Section 2644.4.8 of Title 10 of the California Code of Regulations, that "distressed areas" include:

    a) Undermarketed ZIP Codes. An Undermarketed ZIP Code shall mean a ZIP Code, as determined by the Commissioner, which at least partially overlaps with a high or very high fire hazard severity zone as shown on current maps published by Cal FIRE and in which ZIP Code either:

        i) At least 15% of the sum, as specified, are insured by the FAIR Plan.

        ii) The average premium per $1,000.00 of Coverage A in the ZIP Code is at least four dollars while the median income of the ZIP Code is no higher than the fiftieth percentile for the state.

    b) Distressed counties. A county is considered distressed if the percentage of structures situated in that county that are at high or very high wildfire risk is no lower than the 50th percentile of counties in the state, as determined by the Commissioner.

This bill:

1) Requires CDI to review and update distressed areas, through the following methods:

   a) Consult with Cal FIRE.

   b) Consider ZIP Codes with at least 10 percent of the sum of the following that are insured by the FAIR Plan:

      i) The number of residential properties in the ZIP Code that are insured by the FAIR Plan.

      ii) The number of residential properties in the ZIP Code that are insured in the voluntary market by admitted insurers under a policy of qualifying residential property insurance.

   c) Develop and implement a process that allows for meaningful public participation that includes, at a minimum, both of the following:

      i) Holding at least one public meeting to allow interested persons to submit suggestions for distressed areas.

      ii) Making available the proposed distressed areas for public review and comment.

2) Requires CDI to publish a bulletin on or before January 1, 2028, and yearly thereafter, with a list of ZIP Codes in distressed areas, on CDI's website, and provide the information to the Assembly Committee on Insurance and the Senate Committee on Insurance.

3) Makes related findings and declarations.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

CDI estimates costs of $84,000 in Fiscal Year (FY) 2026-27, $148,000 in FY 2027-28, and $136,000 in FY 2028-29 and ongoing to manage regulatory updates, coordinate distressed area reviews, and conduct public meetings (Insurance Fund).

Unknown costs for the California Department of Forestry and Fire Protection (CAL FIRE) to provide consultation on distressed areas.

SUPPORT: (Verified 8/14/26)

California State Association of Counties (CSAC)
Contra Costa County
Lafayette; City of
League of California Cities
Orinda; City of
Rural County Representatives of California (RCRC)

OPPOSITION: (Verified 8/14/26)

Insurance Commissioner Ricardo Lara / California Department of Insurance

ARGUMENTS IN SUPPORT:

A coalition of cities and counties states:

"Under the Catastrophe Modeling Regulations adopted in January 2025, insurance companies are required to offer insurance to 85% of their statewide market share in distressed areas identified by the Insurance Commissioner. Distressed areas are defined by zip codes that have 15% or more property owners enrolled in the FAIR Plan and counties that have 20% or more properties that are in a high-risk area.

During the public comment period of the Catastrophe Modeling, our organizations noted our concern with the 15% statistic and noted that even with this requirement it was unclear whether insurance companies would provide coverage to all communities experiencing high insurance policies or the ability to obtain coverage.

This bill would require CDI to specifically consider the number of residential properties in the ZIP Code that are insured by the FAIR Plan, and the number of residential properties in the ZIP Code that are insured in the voluntary market by admitted insurers under a policy of qualifying residential property insurance. By reviewing the distressed areas definition this could allow more jurisdictions to have access to insurance under the Catastrophe Modeling regulations."

ARGUMENTS IN OPPOSITION:

According to the California Department of Insurance:

"The Department, under the leadership of Insurance Commissioner Ricardo Lara, supports the goal of improving insurance availability in wildfire-affected communities, including those in the wildland-urban interface, and ensuring the calculation of distressed areas is transparent. However, your bill does not reflect the same level of analysis and coordinated regulatory development underlying the Department's existing legal framework. The current distressed area framework was

developed through extensive coordination across multiple Department branches and divisions, with input from subject matter experts both within and outside the Department, in addition to receiving significant public input from across the state, as part of the broader Sustainable Insurance Strategy (SIS). The goal of the SIS is consistent with the goals of Proposition 103: to increase the availability and affordability of homeowners insurance in high-risk areas.

AB 2724 risks disrupting that established regulatory framework and raises serious concerns under Prop. 103. As you know, in order to amend Prop. 103, legislation must further the purposes of Prop. 103 which are, among other things, to increase the affordability and availability of insurance. The voters delegated that responsibility to the elected Insurance Commissioner when Prop. 103 was adopted. AB 2724 does not demonstrate that it would further the purposes of Prop. 103. Not only does the bill improperly substitute the Legislature's judgment for that of the Department's technical and legal expertise, but the bill also presents significant litigation risk as an improper amendment to Prop. 103."

SUBJECT: Water: affordability and system stabilization

SOURCE: Irvine Ranch Water District
Rancho California Water District

DIGEST: This bill establishes the Water Affordability and System Stabilization Trust as a charitable trust to fund the Community Water Affordability Program administered by the Department of Water Resources (DWR) and the Water Rate Affordability Assistance Fund administered by the State Water Resources Control Board (SWRCB).

Senate Floor amendments of 8/21/26 provide DWR and the State Treasurer's Office (STO) with some flexibility to carry out this bill's provisions and shift certain responsibilities from the STO to the State Controller's Office (SCO).

ANALYSIS:

Existing law:

1) Gives DWR broad authority to manage and oversee various aspects of water management in California, including dams, flood control projects, the State

Water Project, sustainable groundwater management, and the California Water Plan.

2) Declares it is the responsibility of the state to help local governments when state or joint state and federal water resource construction projects create an undue burden on a local area's ability to provide certain services and facilities.

3) Defines a "community water system" as a public water system serving at least 15 service connections used by yearlong residents or one that regularly serves at least 25 yearlong residents of the area.

This bill:

1) Enacts the Water Affordability and System Stabilization Act (Act).

2) Creates the Water Affordability and System Stabilization Fund (Trust Fund) to hold the trust property of the Water Affordability and System Stabilization Trust (Trust). The primary purpose of the Trust is to provide perpetual source of funding to the Water Rate Assistance Fund (WRAF) and Community Water Affordability Assistance Fund (CWAAF).

3) Creates the CWAAF, but does not create the WRAF, which does not exist in statute.

4) Transfers distributions by the trustee (the State Treasurer's Office (STO)) from the income of the Trust to the SWRCB and DWR for deposit into, and expenditure from, the WRAF and the CWAAF. Includes requirements to:

   a) Prohibit Trust Fund money from being used for any purpose not established by the Act;

   b) Require the trustee to hold, manage, and invest the principal of the Trust in accordance with existing law to proving a growing perpetual source of annual funding to the WRAF and the CWAAF.

   c) Transfer specific percentages of money to the WRAF and the CWAAF, and invest a specific percentage of money at specified time intervals.

   5) Creates a number of responsibilities for and imposes a number of limitations on the trustee, and allows the trustee to accept donations to the Trust.

6) Requires DWR to develop and adopt program guidelines and project solicitation documents, and exempts those from the Administrative Procedure Act.

7) Requires DWR to develop and administer the Community Water Affordability Program to provide grants to community water systems to improve water supplies, resiliency, or quality, and reduce energy costs.

8) Establishes a methodology for DWR to evaluate grant applications and requires grant applicants to cover at least 25% of the cost of any project, though DWR can waive or reduce this amount based on a showing of extreme financial hardship.

9) Requires DWR to hold public hearings and allow for public comment on its proposed program guidelines and requires DWR to post an annual report on the operations, spending, and benefits of the program.

Background

Water Service. California residents are served by various types of water utilities or water systems, including publicly owned utilities (POUs), investor-owned utilities (IOUs), and small community water systems (CWS). Most of California's residential water customers are served by cities, special districts, and mutual water companies. These utilities are governed by the city council, or other local governing body, which sets the water rates, which in the vast majority of cases are subject to 1996's Proposition 218 that ties the rates to the cost of providing water *service*. This restriction limits an agency's ability to increase rates to fund low-income *rate relief programs* for customers.

Affording The Cost of Water. A 2020 SWRCB report to the Legislature, *Recommendations for Implementation of a Statewide Low-Income Water Rate Assistance*, found California households "…find it increasingly difficult to satisfy … [the need for water] … as the retail cost of water has risen substantially over the last decade and is expected to rise significantly over the coming years … adjusting for inflation, the average Californian household paid around 45% more per month for drinking water service in 2015 than in 2007."

A 2025 SWRCB needs assessment found there was a steady increase in drinking water rates across the state from 2020 to 2023, concluding larger water systems saw the highest increase since 2020, 17% on average, even though smaller systems generally charge more per unit of water than larger systems. The affordability challenge is even more acute in poorer communities. Of the water systems assessed, 45% are experiencing a low affordability burden, 12% are experiencing a medium affordability burden, and 3% are experiencing a high affordability burden (40% of systems are experiencing no affordability burden).

Comments

Purpose of the bill. According to the author, "Water affordability and system stability are increasingly interconnected challenges across California. Rising costs associated with infrastructure modernization, climate resilience, regulatory compliance, and energy continue to place pressure on water systems and the communities they serve, which is especially true for households living at or near poverty.

"The California Water Affordability and System Stabilization Act proposes a durable, California-based solution by addressing affordability at the household, system, and community levels. The Act advances a sustainable funding solution to support a statewide Low-Income Rate Assistance (LIRA) program for water while also supporting strategic investments that stabilize water systems and help reduce cost pressures before they are passed on to ratepayers."

Tracking cost avoidance. This bill creates the Community Water Affordability Program to provide grants to community water systems for local water infrastructure projects. It also requires DWR to annually post on its website a report on the revenues, expenditures, and benefits of the fund, including the "estimated amount of cost the program has caused to be avoided." The goal is to help fund projects that – absent grant funding – would lead to ratepayer increases to finance the projects. So, the "estimated amount of cost the program has caused to be avoided" refers to what the project would have cost ratepayers had they been required to finance the infrastructure project.

Referring to a fund that doesn't exist. The primary purpose of the trust created by this bill is to provide an ongoing source of funding to the Water Rate Assistance Fund (WRAF) and the Community Water Affordability Assistance Fund (CWAAF). While this bill creates CWAAF, the WRAF does not exist. Rather it would be created by SB 1125 (Menjivar), which is pending on the Assembly Floor.

If this bill is enacted, with reference to the WRAF and SB 1125 – which creates the WRAF – is not signed into law, references to the WRAF in this bill will likely cause confusion and it is unclear how the bill will be implemented.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee's analysis, the bill creates General Fund cost pressure of an unknown but significant amount, potentially in the millions of dollars (one-time or annually).

SUBJECT: State Property: San Pasqual Battlefield State Park

SOURCE: Author

DIGEST: This bill would require the Department of Parks and Recreation to quitclaim, forthwith, the state-owned land in the San Pasqual Battlefield State Historic Park.

Senate Floor Amendments of 8/21/26 add a coauthor.

ANALYSIS: Existing Law:

1) Encourages and authorizes all state agencies to cooperate with federally recognized California Indian tribes on matters of economic development and improvement for the tribes (Government Code § 11019.8).

2) Encourages the State of California and its agencies to consult on a government-to-government basis with federally recognized tribes, and to consult with nonfederally recognized tribes. Requires government-to-government consultation training (Government Code § 11019.81).

3) Encourages the California Natural Resources Agency (CNRA), and its departments, boards, conservancies, and commissions, to enter into co-

governance and co-management agreements with federally recognized tribes. Permits the Secretary of CNRA or a delegate to enter into co-governance and co-management agreements with federally recognized tribes for the purposes of shared responsibility, decision-making, and partnership in resource management and conservation within a tribe's ancestral lands and waters (Government Code § 11019.82).

4) Establishes the California state park system and vests State Parks with control of the state park system and responsibility for administering, protecting, developing, and interpreting state parks for the use and enjoyment of the public [Public Resource Code (PRC) §§ 5001 *et seq*.).

5) Prohibits the commercial exploitation of resources in units of the state park system, with some exceptions (PRC § 5001.65).

This bill:

1) Requires State Parks to quitclaim, forthwith, all interests of the state in the land owned within the San Pasqual Battlefield State Park, to the San Pasqual Band of Mission Indians, at no cost to the tribe.

    a) Require the state to publish public notice of the quitclaim in a County of San Diego newspaper and at the intersection of the public right-of-way and the property.

2) Places conditions on the quitclaim deed including:

    a) The termination of all agreements, including but not limited to leases, that the state is a counterparty and which concerns the land subject to the quitclaim, upon conveyance to the tribe.

    b) Restricting the San Pasqual Band of Mission Indians' commercial use of the lands solely to operating a educational or cultural center.

        i) The educational center shall include artifacts, displays, and information relating to the 1846 Battle of San Pasqual, including the role of the Mormon Battalion in that battle and in the Mexican-American War, and the lasting impacts of the battle on surrounding communities.

        ii) No other commercial use or development, including, but not limited to, gaming, shall be permitted on the lands.

iii) Authorizes the tribe to operate commercial uses related to the enjoyment of educational and cultural experiences tied to the San Pasqual Band of Mission Indians' culture and history or related to the San Pasqual Band of Mission Indians' operation of a cultural or educational center, including, but not limited to, a gift shop, snack bar, parking lot, or other similar use.

c) Prohibiting the subsequent sale or transfer of these lands and improvements on those lands, except as necessary for the United States to hold the lands in trust on behalf of the San Pasqual Band of Mission Indians.

d) Prohibiting the encumberance of these lands and improvements on those lands.

i) "Encumbered" includes, but is not limited to, mortgaging the property, pledging the property as collateral, or any other transaction where the property would serve as security for borrowed funds.

ii) Any lease of the land and improvements shall be consistent with the purposes for which the land and improvements are granted.

e) Prohibiting these lands from being subject to real property taxation, and establishing that no documentary transfer tax shall apply with respect to any deed, instrument, or writing effectuating the transfer.

f) Establishing that the grant of lands shall be valid only if the San Pasqual Band of Mission Indians' Tribal Council adopts a resolution pursuant to its tribal law accepting the fee title grants in accordance with these conditions.

g) The authorization of public access, subject to reasonable regulations adopted by the San Pasqual Band of Mission Indians, pursuant to its inherent sovereign authority as landowner, provided that public recreation activities shall be limited to existing trails and roads, and that the use of off-road vehicles and e-bicycles shall be prohibited.

3) Requires the state, if the City of San Diego agrees to transfer the land that it owns within the San Pasqual Battlefield State Park to the San Pasqual Band of Mission Indians, to, at no cost to the tribe, relinquish or transfer to the San Pasqual Band of Mission Indians all rights and interests that the state has in those lands through lease, permit, or otherwise, and take any and all other actions necessary to effectuate the City of San Diego's transfer of the land to the San Pasqual Band of Mission Indians.

4) Finds and declares that a special statute is necessary and that a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution because of the unique circumstances surrounding the history of the ancestral lands of the San Pasqual Band of Mission Indians and the state's attempt rectify the recognized wrongs of the state by returning the land to the San Pasqual Band of Mission Indians.

5) Finds and declares that this bill serves a public purpose of attempting to rectify the recognized wrongs of the state in discriminating against Native Americans and to heal the relationship between the state and the San Pasqual Band of Mission Indians, and also serves a public purpose of allowing the San Pasqual Band of Mission Indians to operate a public park to educate the public on the tribe's history and contributions to the community, and for all of these reasons, does not constitute a gift of public funds within the meaning of Section 6 of Article XVI of the California Constitution.

Background

San Pasqual Battlefield State Historic Park (SHP). The San Pasqual Battlefield SHP highlights the rich cultural history of the San Pasqual Valley, featuring exhibits on the Kumeyaay people, the region's Indigenous inhabitants, and commemorates the 1846 Battle of San Pasqual during the Mexican-American War. In recognition of the Kumeyaay ancestry, State Parks is working closely with the San Pasqual Band of Mission Indians to incorporate the robust history, culture, and traditional ecological knowledge of the Kumeyaay people into the park's visitor center, trails, and programs.

San Pasqual Battlefield SHP spans 50 acres in the San Pasqual Valley. Only 3.68 acres is owned by State Parks and the rest is owned by the City of San Diego. Currently, this state park is closed to the public for day use, but special events continue to be hosted. There is no MOU between the San Pasqual Band and State Parks regarding this property.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

- The Department of Parks and Recreation (State Parks) has identified one-time General Fund implications of approximately $278,000 if the department's 3.68 acres of property were transferred to the tribe. DGS would charge State Parks for the land conveyance, estimated between $100,000–$200,000, and contingent upon the details of the transaction. State Parks has an existing lease with the San Diego Archaeological Society and anticipates lease termination costs approximately $5,000. Additionally, the Archaeological Center houses

some of the department's and other entities' collections. State Parks estimates costs of approximately $30,000 for specialized packing, and $43,000 for temporary storage of the Curatorial Collection, with additional significant costs for moving and long-term storage at the Statewide Museum Collections Center in Sacramento. The City of San Diego has indicated they would be unable to transfer the property they own, approximately 65 acres, therefore, costs associated with effectuating the City's transfer of land have not been included in the above total but would include $5,000 for terminating the lease with the City, and $38,000 for additional relocation of materials and collections.

- One-time revenue loss of an unknown amount, potentially in excess of $150,000, to the state by quitclaiming SPB State Park at no cost to the tribe, thus foregoing a future sale of the property by the state (General Fund). At the time this analysis was prepared, the committee did not know the current estimated value of the property. To the extent there is deferred maintenance on the property, requiring the state to quitclaim the park may also result in potential one-time costs and ongoing cost savings of an unknown amount to State Parks, as State Parks may need to undertake maintenance activities prior to the transfer, but would no longer need to continue maintenance afterward.
- One-time local costs, likely minor, to the City of San Diego to exempt the transferred lands from property taxation. These costs are potentially reimbursable by the state, subject to a determination by the Commission on State Mandates, although it is unlikely the city would submit a claim. And while the bill exempts transferred lands, and improvements on those lands, from real property and documentary transfer taxes, the bill states that the state shall not reimburse any local agency for lost property tax revenue.

SUPPORT: (Verified 8/21/26)

Tolowa Dee-Ni' Nation
San Pasqual Band of Mission Indians

OPPOSITION: (Verified 8/21/26)

None received

ARGUMENTS IN SUPPORT: According to the author, "AB 2770 is a critical step toward justice for the San Pasqual Band of Mission Indians, whose ancestral lands in the San Pasqual Valley were stripped from them through a legacy of state and federal failures. This bill rectifies a historic wrong by returning state-owned parcels within the San Pasqual Battlefield State Park—land that holds profound cultural and spiritual significance, including a tribal cemetery—to the tribe at no

cost. For too long, this park has sat closed and unused, a symbol of erasure rather than education. By transferring these 3.68 acres, we honor the tribe's unbroken connection to this land and align with California's commitment to reconciliation with Native communities.

"The San Pasqual Band of Mission Indians envisions a public park that celebrates their history and contributions—a space for healing and learning that benefits all Californians. AB 2770 is not just about land; it's about seizing this opportunity to turn empty promises into meaningful progress and demonstrate that California's path forward includes honoring its past."

ARGUMENTS IN OPPOSITION: None received.

SUBJECT: Hazardous materials

SOURCE: Author

DIGEST: This bill makes various technical changes to the unified hazardous waste and hazardous materials management regulatory programs that are overseen by the Certified Unified Program Agencies (CUPAs) and adds reporting authorizations for the Board of Environmental Safety (BES).

Senate Floor Amendments of 8/18/2026 make technical and clarifying changes to the exemption of the compaction of hazardous waste from the definition of treatment and the requirements therein.

ANALYSIS:

Existing federal law:

1) Establishes the Resource Conservation and Recovery Act (RCRA) to authorize the United States Environmental Protection Agency (U.S. EPA) to manage hazardous and non-hazardous wastes throughout its life cycle. (Title 42 United States Code (USC) §§ 6901 et seq.)

2) Enacts the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986, which was created to help communities plan for chemical emergencies. EPCRA requires industry to report on the storage, use, and releases of hazardous substances to federal, state, and local governments; and requires state and local governments, and Indian tribes to use this information to prepare their community for potential risks. (Title 42 United States Code (USC) §§ 11001 et seq.)

3) Establishes standards and requirements for generators of hazardous waste and lists conditions for permit exemptions. (Title 40 Code of Federal Regulations (CFR) §§ 262 et seq.)

Existing state law:

1) Creates the Hazardous Waste Control Law (HWCL), which authorizes the Department of Toxic Substances Control (DTSC) to regulate the management of hazardous wastes in California. (Health and Safety Code (HSC) §§ 25100 et seq.)

2) Defines "Certified Unified Program Agency" or "CUPA" as the agency certified by the Secretary of the California Environmental Protection Agency (CalEPA) to implement the unified program within a jurisdiction. (HSC § 25404(a)(1)(A))

3) Defines "Unified Program Agency" or "UPA" as the CUPA to implement or enforce a particular Unified Program element. UPAs have the responsibility and authority to implement and enforce the unified program requirements and implementing regulations. (HSC § 25404(a)(1)(C))

4) Requires the Secretary of CalEPA to adopt implementing regulations and implement a unified hazardous waste and hazardous materials management regulatory program, known as the Unified Program. (HSC § 25404(b))

5) Defines "treatment" to mean any method, technique, or process that is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or that removes or reduces its harmful properties or characteristics and provides specified activities that treatment does not include. (HSC § 25135.5(a))

6) Defines "aboveground storage tank" as a tank or container that has a capacity to store 55 gallons or more of petroleum that is substantially above the surface of the ground; and provides that "aboveground storage tank" does not include a

specified list of things including oil filled electrical equipment or a tank in an underground area that has capacity to store less than 55 gallons of petroleum, has secondary containment, and is inspected monthly. (HSC § 25270.2 (a)(4), (a)(8))

7) Specifies various requirements for the owner/operator of an aboveground petroleum storage tank facility. (HSC § 25270.4.5 (b)(1); HSC § 25270.6 (a)(1).

8) Requires a permit holder of an underground storage tank (UST) to, within 60 days of receiving a compliance report or special inspection report, file with the CUPA a plan to implement all recommendations contained in the compliance report or demonstrate to the satisfaction of the CUPA why the recommendations should not be implemented. (HSC § 25288(d))

9) Requires vacuum, pressure, or hydrostatic (VPH) monitoring for USTs for all product piping, including aboveground piping. (HSC § 25290.1(e))

10) Requires businesses to establish and implement a business plan for emergency response to a release or threatened release of a hazardous material, as described, if the business meets specified conditions, including handling specified hazardous materials at defined quantities, including gases.

11) Establishes the Board of Environmental Safety (BES) within DTSC with five voting members that represent the general public interest and act to protect public health and reduce risks of toxic exposure with a particular focus on disproportionately burdened and vulnerable communities. (HSC § 25125)

This bill:

1) Removes the exclusion for biohazardous waste, that meets specified conditions, from the requirements of the HWCL.

2) Precludes a small quantity generator from the requirements of a storage facility if the generator complies the requirements of 22 California Code of Regulation (CCR) § 66262.16.

3) Exempts the "compaction of hazardous waste" from the definition of "treatment", including nonliquid waste materials and provides that the compaction of hazardous waste applies to the compaction of nonliquid waste materials, as specified, if none of the following conditions apply:
   a) The waste is a free liquid, as specified, or a semisolid or solid that produces a free liquid, or a solid that contains a free liquid;

b) The waste being compacted is a solid that exhibits the characteristic of ignitability, as defined, or the characteristic of reactivity, as defined;

c) The compaction alters the physical, chemical, or biological character or composition of the waste, and results in a physical change beyond those inherent to compaction, such as reduction in volume, increase in density, or changes in shape or form; and

d) The compaction results in the production of fugitive dust, fire, or explosion.

4) Amends the exclusions to "aboveground storage tank", oil-filled electrical equipment to specify a single piece of equipment; and a tank in an underground area that has the capacity to store less than 55 gallons of petroleum to specify that the secondary containment includes contents of the tank, associated piping, and ancillary equipment, until cleanup occurs and that such equipment are inspected monthly.

5) Requires a permitholder of an underground tank system to return to compliance within 30 days, instead of 60 days, after receiving a compliance or special inspection report, as described, except if the local agency approves a plan to return to compliance in excess of 30 days and the local agency receives the plan within 30 days of the permitholder receiving the compliance or special inspection report.

6) Clarifies that VPH monitoring of a UST only applies to UST components beneath the surface of the ground.

7) Clarifies that businesses that handle specified gases in a quantity of less than 1,000 cubic feet are precluded from establishing and implementing a business plan for emergency response to a release or threatened release of a hazardous material, as described.

8) Requires an owner or operator of a tank facility to immediately notify the Office of Emergency Services and the CUPA, as specified, of the occurrence of a discharge of any petroleum into or upon any waters of the state.

9) Requires the Board of Environmental Safety (BES) to annually prepare, post on its internet website, and transmit to the Secretary of the CalEPA an annual review of DTSC's performance and authorizes, to the extent feasible using existing resources, the review to include any of the following:
   a) A review of DTSC's performance as measured by the performance metrics, as specified;

b) Recommendations regarding the analysis of the fee structure that supports the activities of DTSC;

c) Legislative, regulatory, and budgetary changes that BES has identified as necessary to improve the performance of any of the department's programs; and

d) Findings from the subcommittees of the BES and the ombudsperson of the BES that the chairperson deems significant.

10) Prohibits specified components of the review from resulting in an increase in facility and generator fees.

11) Makes non-substantive, clarifying, and technical amendments.

Background

1) *Certified Unified Program Agencies (CUPAs).* CUPAs are local agencies certified by the Secretary of CalEPA to implement and enforce 6 "unified hazardous waste and hazardous materials management" regulatory programs (Unified Program). Currently, there are 81 CUPAs in California tasked with implementation and enforcement of the following:
   a) Hazardous Materials Release Response Plans and Inventories (Business Plans);

   b) California Accidental Release Prevention Program (CalARP);

   c) Underground Storage Tank Program (USTP);

   d) Aboveground Petroleum Storage Act (APSA);

   e) Hazardous Waste Generator and Onsite Hazardous Waste Treatment Programs; and,

   f) California Uniform Fire Code: Hazardous Material Management Plans and Hazardous Material Inventory Statements.

2) *Underground Storage Tank Program (UST Program).* The statewide UST Program works to protect public health and safety and the environment from releases of petroleum and other hazardous substances from USTs. A UST is defined by law (HSC § 25299.32) as "any one or combination of tanks, including pipes connected thereto, that is used for the storage of hazardous

substances and is substantially or totally beneath the surface of the ground." CUPAs enforce UST regulations within their jurisdiction.

3) *Hazardous Waste Generator and Onsite Hazardous Waste Treatment Programs.* State and federal law and regulation require businesses to manage their hazardous waste from the point of generation until proper disposal or recycling. This includes labeling and storage requirements and ensuring it is properly transported to a facility authorized to receive hazardous waste. Additionally, there are requirements for entities that treat their hazardous waste on-site. CUPAs enforce hazardous waste generator requirements as well as onsite hazardous waste treatment requirements within their jurisdiction.

4) *Aboveground Petroleum Storage Tank Act (APSA).* APSA regulates tank facilities that are subject to federal regulation or tank facilities with an aggregate storage capacity of 1,320 gallons or more of petroleum in aboveground storage containers or tanks with a shell capacity equal to or greater than 55 gallons. APSA also regulates tank facilities with less than 1,320 gallons of petroleum if they have one or more stationary tanks in an underground area (TIUGA). CUPAs enforce APSA within their jurisdiction.

5) *The Board of Environmental Safety (BES).* BES was established by SB 158 (Committee on Budget and Fiscal Review, Chapter 73, Statutes of 2021) as part of the reform for the Department of Toxic Substances Control (DTSC). BES is a five-member board that advances key governance and fiscal measures to improve transparency, accountability, and fiscal stability of DTSC. Members of BES represent the general public interest, protect public health, and reduce risks of toxic exposure with a particular focus on disproportionately burdened and vulnerable communities. SB 158 gave BES various mandates, including setting generator and permitted facility fees, hearing and deciding permit appeals, reviewing the priorities of the director of DTSC, and conducting an analysis on the fee structure that supports the activities of DTSC. BES is required to submit an annual review of DTSC's performance to the Secretary of CalEPA.

Comments

1) *Purpose of Bill.* According to the author, "CUPAs meet routinely to discuss implementation of the six statewide programs they oversee and occasionally discover inconsistencies in interpretation of the law. In order to maintain a unified program, the CUPAs bring any potential inconsistencies to state regulators (CalEPA, the Department of Toxic Substances Control (DTSC),

State Water Resources Control Board (State Water Board)) and to the regulated community. AB 2776 reflects suggestions brought forward from the discussions with the CUPAs, state regulators, and the regulated community"

Amended: 6/9/26 in Senate
Vote: 27 - Urgency

SENATE AGRICULTURE COMMITTEE: 4-0, 6/16/26
AYES: Caballero, Alvarado-Gil, McNerney, Padilla
NO VOTE RECORDED: Ashby

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 66-0, 5/7/26 (Consent) - See last page for vote

SUBJECT: Food labeling: quality dates, safety dates, and sell-by dates

SOURCE: Author

DIGEST: This bill 1) provides that a food item for human consumption does not include a dietary supplement, as defined, and 2) includes an urgency statute for immediate preservation of the public peace, health, or safety within the meaning of Article IV of the California Constitution and shall go into immediate effect.

ANALYSIS:

Existing federal law:

1) Establishes the Federal Food, Drug, and Cosmetic Act under the U.S. Food and Drug Administration (FDA) that provides quality standards and labeling standards for food, drugs, medical devices, and cosmetics manufactured and sold in the United States (21 Code of Federal Regulations (CFR) 101 et seq.).

Existing state law:

1) Establishes the Sherman Food, Drug, and Cosmetic Law to regulate the packaging, labeling, and advertising of food, including dietary supplements, cosmetics, drugs, and medical devices in California (Health and Safety Code Section 109875- 110040).

2) Requires eggs being sold for human consumption to be labeled with all of the following (Food and Agricultural Code Section 27644):
   a) The words “Sell-by” immediately followed by the month and day in bold type.
   b) The “Sell-by” date shall not exceed 30 days from the date on which the eggs were packed, excluding the date of packing.

3) Requires milk and cream, at the time of sale to the consumer by a retail store, to have on the container a date established by the processor as the date upon which, in order to ensure consumer quality, the product is normally removed from the shelf or similar location from which the product is offered for sale to the consumer (Food and Agricultural Code Section 36004).

4) Requires raw shucked shellfish to bear a label that includes a “Sell by” date or a “Best if used by” date for packages with a capacity of less than one-half gallon, or the date shucked for packages with a capacity of one-half gallon or more (Health and Safety Code Section 114039).

5) Limits the refrigerated shelf life of packages of food using a reduced-oxygen packaging method where Clostridium botulinum is identified as a microbiological hazard to no more than 30 calendar days from packaging to consumption, except the time the product is maintained frozen, or the original manufacturer’s “Sell by” or “Use by” date, whichever occurs first (Health and Safety Code Section 114057.1).

6) Requires food manufacturers, processors, and retailers responsible for the labeling of food items, beginning July 1, 2026, to use "BEST if Used by" to indicate quality, and "Use by" to indicate safety of a food item, and prohibits the use of the term "sell by” (Food and Agricultural Code Section 82001).

This bill:

1) Provides that a food item for human consumption does not include a dietary supplement, as defined.
   a) This bill would exempt dietary supplements from the labeling requirement that requires food manufacturers, processors, and retailers responsible for the labeling of food items, beginning July 1, 2026, to use "BEST if Used by" to indicate quality, and "Use by" to indicate safety of a food item, and prohibits the use of the term "sell by."

2) Places an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the California Constitution and shall go into immediate effect. The facts constituting the necessity are:
   a) To ensure the correct implementation of the statute and to minimize the disruption to California's food industry it is necessary for this act to go into immediate effect.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 6/29/26)

Council for Responsible Nutrition
Natural Products Association

OPPOSITION: (Verified 6/29/26)

None received

ARGUMENTS IN SUPPORT: According to the author:

> "AB 660 established a standardized statewide food date-labeling framework to help consumers better distinguish between food quality and food safety while reducing unnecessary food waste. However, dietary supplements were not intended to be included within the scope of that legislation. Unlike conventional foods, dietary supplements use expiration dates and other dating systems to communicate shelf life and ingredient potency in accordance with federal requirements and established industry practices.
>
> AB 2779 provides a clarification by expressly excluding dietary supplements from AB 660's date-labeling requirements. The bill also

provides additional implementation flexibility by allowing manufacturers to use either capitalized or all-capitalized versions of the standardized date labels. AB 2779 will help ensure AB 660 is implemented as intended while providing regulatory certainty to manufacturers and avoiding consumer confusion."

SUBJECT: Judiciary omnibus

SOURCE: Author

DIGEST: This bill makes various noncontroversial changes to existing law, including clarifying existing law, deleting obsolete statutes, modernizing certain statues, updating cross-references, and making various other nonsubstantive changes.

ANALYSIS:

Existing law:

1) Authorizes a petitioner seeking a default judgment in a dissolution of marriage proceeding to waive the final declaration of disclosure requirements in dissolution proceedings. (Family (Fam.) Code § 2110.)

2) Requires each party to a dissolution proceeding to serve on the other party a preliminary declaration of disclosure. (Fam. Code § 2104(a).)

3) Requires each party, or the attorney for each party, in a dissolution proceeding to serve on the other party a final declaration of disclosure and a current income and expense declaration, except by court order for good cause, before or at the

time the parties enter into an agreement for the resolution of property or support issues. (Fam. Code § 2105(a).)

4) Requires a fiduciary to allocate the receipt from interests in minerals, water, or other natural resources as a business under Probate Code Section 16432 in a specified manner. (Probate (Prob.) Code § 16350(a).)

5) Provides guidelines for allocation of receipts for a business or other activity conducted by a fiduciary if the fiduciary determines that it is in the interests of the beneficiaries to account separately for the business or other activity, as specified. (Prob. Code § 16342.)

6) Establishes the Automobile Sales Finance Act (or the Rees-Levering Motor Vehicle Sales Finance Act) to regulate the sales of automobiles pursuant to conditional sales contracts. (Civil (Civ.) Code §§ 2981 et seq.)

7) Establishes the California Combating Auto Retail Scams (CARS) Act. (Civ. Code §§ 1784.20 et seq.)

8) Defines "homestead" to mean a principal dwelling in which a judgment debtor or their spouse resided on the date the judgment creditor's lien attached to the dwelling and in which the judgment debtor or their spouse resided continuously thereafter until the date of a court determination that the dwelling is a homestead. (Code Civ. Proc. § 704.710(c).)
   a) A homestead is exempt from a sale to enforce a money judgment, except pursuant to a court order for sale if certain conditions are met. (Code Civ. Proc. § 704.720.)
   b) The amount of a homestead exemption is the greater of: (1) the countywide median price for a single-family home in the calendar year prior to the calendar year in which the judgment debtor claims the exemption, not to exceed $600,000; or (2) $300,000. (Code Civ. Proc. § 704.730(a).)
   c) The amount of a homestead exemption is to be adjusted annually for inflation, as specified. (Code Civ. Proc. § 704.730(b).)

This bill:

1) Exempts a petitioner and respondent in a dissolution of marriage proceeding in the case of a default judgment from the requirement that the parties exchange declarations of disclosures regarding property in a dissolution of marriage or registered partnership if the parties have an existing enforceable judgment of

legal separation that adjudicates or reserves jurisdiction over the division of property.

2) Corrects and updates cross-references in the Probate Code.

3) Deletes a vehicle contract cancellation option agreement from the definition of "cash price" under the Automobile Sales Finance Act.
   a) Removes the requirement that a conditional sale contract disclose the amount charged for a contract cancellation option agreement.
   b) Removes the requirement that the seller provide to a buyer prior to the execution of a conditional sale contract a description and the price of a vehicle contract cancellation option agreement.

4) Specifies that the homestead exemption ceiling amount is $746,350 for the 2026 calendar year, and the floor amount is $373,175 for the 2026 calendar year.
   a) The ceiling and floor amounts are to be adjusted annually for inflation, beginning on January 1, 2027, by applying the multiplier produced by the change in the annual California Consumer Price Index (CPI) for All Urban Consumers, published by the Department of Industrial Relations, during the prior fiscal year. On January 1, 2027, and annually thereafter, this multiplier shall be calculated by dividing the CPI for the June ending the prior fiscal year by the CPI for the June immediately preceding the prior fiscal year.
   b) Each ceiling and floor amount adjusted under a) is to be rounded to the nearest $25.

Comments

This bill is the Assembly Judiciary Committee omnibus bill that makes various noncontroversial changes to existing law with the purpose of increasing efficiencies in the legislative process, conserving legislative resources, and eliminating the need to unnecessarily hear a number of technical, clarifying, or modest stand-alone bills that might otherwise have to be introduced and require individual consideration by the Legislature.

1) Makes updates to the Automobile Sales Finance Act to account for changes made in SB 766 (Allen, Chapter 354, Statutes of 2025).

   In 2005, The Legislature sought to curb abusive practices by car dealers in AB 68 (Montañez, Ch. 128, Stats. 2005), known as the Car Buyer's Bill of Rights.

The Car Buyer's Bill of Rights established a two day return window for used cars, capped at a valuation of $40,000. Under this statute, a dealer was able to (and many did) require the customer to pre-pay for the ability to return the car. SB 766 expanded this option for customers to a three day right to cancel a vehicle purchase or lease under $50,000, as long as the vehicle has fewer than 400 miles while in the customer's possession. (Civ. Code § 1784.43.) A dealer cannot require a customer to pre-buy this option, but may charge a fee not to exceed $600 plus $150. In lieu of this fee, a dealer that charged the customer a shipping fee for transporting the vehicle may retain the cost the dealer actually incurred for shipping. The bill also included disclosure requirements to notify customers of these options.

This bill makes changes to the Automobile Sales Finance Act to account for the above changes made in SB 766.

2) Makes clarifying changes to how the homestead exemption is to be adjusted.

The homestead exemption protects the value of a homeowner's primary residence in the event of a bankruptcy. Specifically, it provides that a specified portion of equity in a homestead is exempt from execution to satisfy a judgement debt. (Code Civ. Proc. § 704.730.) Effective January 1, 2021, the homestead exemption was set at the greater of the following: the countywide median sale price for a single-family home in the calendar year prior to the calendar year in which the judgment debtor claims the exemption, not to exceed $600,000; or $300,000. These amounts were to be adjusted annually for inflation beginning on January 1, 2022.

This bill specifies that the ceiling amount for the 2026 calendar year is the countywide median sale price for a single-family home in the calendar year prior to the calendar year in which the judgment debtor claims the exemption, not to exceed $746,350. The floor amount is $373,175 for the 2026 calendar year. The bill revises how these amounts are to be adjusted annually for inflation. The bill provides that the multiplier produced by the change in the annual California Consumer Price Index (CPI) for All Urban Consumers, published by the Department of Industrial Relations during the prior fiscal year, is to be applied. On January 1, 2027, and annually thereafter, this multiplier is to be calculated by dividing the CPI for the June ending the prior fiscal year by the CPI for the June immediately preceding the prior fiscal year. The ceiling and floor amounts adjusted are to be rounded to the nearest $25.

3) Allows parties to a dissolution of marriage or domestic partnership who have an enforceable judgment of legal separation that has either adjudicated the division of property or reserved jurisdiction over the division to waive the preliminary and final declaration of disclosure requirements.

   Married couples or those in a domestic partnership seeking to legally terminate their relationship can do so through either a separation or dissolution of marriage. Under a legal separation, the parties remain legally married allowing them to still benefit from certain aspects of a marriage, such as remaining on their spouse's health insurance, but separate financially. As part of this process, the parties are required to provide "preliminary disclosures" detailing each party's known assets and liabilities, as well as their "final disclosures," unless waived by stipulation or court order. A judgment of a legal separation adjudicates the same issues as a divorce judgment, with the sole exception that the parties maintain their legal relationship.

   In some instances, parties who have legally separated and whose property divisions have been formally adjudicated may later decide to seek a full dissolution of their remaining legal relationship. Under existing law, the parties would once again need to complete their preliminary and final disclosures, despite the fact that a judge has already ordered a division of their property and assets. In recognition that this can be duplicative and unnecessary in some cases, this bill allows parties to a dissolution who have an enforceable judgment of legal separation that has either adjudicated the division of property or reserved jurisdiction over the division to waive the preliminary and final declaration of disclosure requirements.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

SUPPORT: (Verified 6/24/26)

None received

OPPOSITION: (Verified 6/24/26)

None received

ARGUMENTS IN SUPPORT: The author writes:

> This broad measure makes modest updates to several policies falling within the Committee on the Judiciary that are insufficiently substantive to warrant a standalone bill. This bill exempts a petitioner and respondent from the

requirement to exchange declarations of disclosure in default judgment of dissolution proceedings if the parties have an existing enforceable judgment of separation that addresses property concerns, removes confusing reference to a child's "preference" in custody or visitation proceedings, removes reference to a vehicle contract cancellation option agreement, updates the ceiling and floor amounts for the homestead exemption, and corrects cross-references in the Code of Civil Procedure, Labor Code, and Probate Code.

SUBJECT: State Bar of California

SOURCE: Author

DIGEST: This bill requires the Board of Trustees (Board) of the California State Bar to fix the annual license fee for active licensees for 2027 in the same amount as 2026 and makes various other changes to the State Bar Act.

ANALYSIS: Existing law:

1) Requires all attorneys who practice law in California to be licensed by the State Bar and establishes the State Bar, within the judicial branch of state government, for the purpose of regulating the legal profession. (California Constitution, article VI, § 9; Buisness & Profession (Bus. & Prof.) Code §§ 6000 et seq.)
   a) The Legislature sets the annual fees. (Bus. & Prof. Code §§ 6140, 6141.)
   b) The State Bar is governed by the Board. (Bus. & Prof. Code §§ 6010 et seq.; § 6016.)

2) Establishes that protection of the public, which includes support for greater access to, and inclusion in, the legal system, is the highest priority for the State Bar in exercising their licensing, regulatory, and disciplinary functions. Whenever the protection of the public is inconsistent with other interests sought

to be promoted, the protection of the public is to be paramount. (Bus. & Prof. Code § 6001.1.)

3) Authorizes the State Bar to collect $553 in fees from active licensees for the year 2025. (Bus. & Prof. Code §§ 6140, 6140.55, 6140.6, 6140.9, 6140.10, 6140.11, 6140.13, 6140.14.)

4) Authorizes the State Bar to collect $161 in fees from inactive licensees for the year 2025. (Bus. & Prof. Code §§ 6141, 6140.55, 6140.6, 6140.9, 6140.10, 6140.11, 6140.13, 6140.14.)

5) Authorizes the State Bar to provide the California Lawyers Association (CLA) with administrative and support services, including the collection of the CLA's membership dues in conjunction with the collection of the annual licensing fees. (Bus. & Prof. Code § 6031.5.)

6) Specifies the manner in which funds for affinity programs are to be allocated to the CLA. (Bus. & Prof. Code § 6141.3.)

7) Requires the State Bar to administer a Client Security Fund (CSF) to relieve or mitigate pecuniary losses caused by the dishonest conduct of licensees of the State Bar, foreign legal consultants registered with the State Bar, and attorneys registered with the State Bar under the Multijurisdictional Practice Program, arising from or connected with the practice of law. (Bus. & Prof. Code § 6140.5.)

8) Requires the State Bar to transmit to the Legislature an annual report detailing the number of complaints regarding access issues related to the biannual state bar exam. (Bus. & Prof. Code § 6060.10.)

This bill:

1) Makes various findings and declarations of the Legislature related to the State Bar being a state agency.

2) Keeps license fees the same for 2027 as they were for 2026. Authorizes attorneys to file for inactive status through December 31 of the calendar year prior to becoming inactive.

3) Clarifies that a felony conviction, whether or not it involves moral turpitude, and a misdemeanor conviction involving moral turpitude constitutes cause for disbarment or suspension.

4) Provides that once a conviction is final, postconviction proceedings do not change the effect of the conviction for discipline purposes under the State Bar Act unless they result in a finding that the conviction is void for lack of subject matter jurisdiction or that the attorney convicted is factually innocent, in which case the court shall treat the conviction as if it did not occur.

5) Provides that when the State Bar requests records, communications, and documents as part of a disciplinary investigation they must be provided to the State Bar notwithstanding attorney-client privilege or the Attorney Work Product doctrine. Any information provided will not violate, waive, or extinguish the duty to maintain a client's confidence, attorney-client privilege, or the Attorney Work Product doctrine. All documents provided are to remain confidential unless disclosure is needed to fulfill the State Bar's duties under existing law, and these records are not public records under the California Public Records Act.

6) Authorizes the chief trial counsel or their designee to compel, by subpoena, the attorney who is the subject of an investigation.

7) Updates the notice transmitted to attorneys facing discipline to make clear that the failure to respond to the State Bar will result in a default judgment and loss of the right to practice law in California.

8) Provides that failure to reimburse the CSF as part of a license fee is a basis for suspension and repayment is a required condition to transfer the licensee's status from a suspension.

9) Specifies what information a financial institution is to provide the State Bar annually for Interest on Lawyer Trust Accounts (IOLTA).

10) Repeals the requirement of the State Bar to collect fees on behalf of CLA as of January 1, 2030, and makes conforming changes. Removes the requirement that the State Bar assist CLA in receiving recognition from the American Bar Association, as provided.

11) Clarifies that a voluntary association of attorneys may generate low-cost continuing legal education materials, subject to State Bar approval.

12) Authorizes the State Bar to meet in closed session for specified matters.

13) Revises the allocation of moneys from affinity programs, as provided, on and after January 1, 2030.

14) Prohibits a person or entity from holding themselves out as a law school unless they are accredited by the American Bar Association or the State Bar and award a juris doctorate degree.

Comments

Last year license fees remained static. (SB 253 (Umberg, Chapter 405, Statutes of 2025.)) This bill keeps license fees at the same amount in 2027 as they were this year. This bill also authorizes attorneys to file for inactive status through December 31 of the calendar year prior to becoming inactive.

In 2017, the Legislature enacted major reforms to the structure of the State Bar by separating its trade association functions from its regulatory functions. (SB 36 (Jackson, Ch. 422, Stats. 2017.)) The Legislature recognized the inherent conflict of interest in having a unified bar and made it clear that after deunification the State Bar was to focus on its core licensing, regulatory, and discipline functions. The trade association functions were transferred to the California Lawyers Association (CLA), a private, nonprofit corporation established in statute. As it has been almost 10 years since deunification occurred, this bill seeks to make further changes to effectuate the intent of SB 36.

Prior to SB 36, the trade association aspects of the State Bar were housed in what was referred to as the sections of the State Bar. In order to join a section of the State Bar, an attorney would make an election of their annual licensing fee statement. Due to this, SB 36 required that the State Bar collect CLA's dues as part of the annual licensing fee collection process, which at the time seemed prudent to ease the transition. However, this current practice makes the State Bar the only regulatory body in the state that oversees a profession while concurrently collecting dues for a trade association of its licensees. This practice seems incongruent with the role of a licensing and regulatory agency, which is further highlighted by the fact that CLA has the authority to lobby the State Bar. As such, this bill ends the requirement of the State Bar to collect fees on behalf of CLA as

of January 1, 2030, and makes conforming changes. To further complete the process of deunification, the bill removes the requirement that the State Bar assist CLA in receiving recognition from the American Bar Association.

The Assembly Judiciary Committee heard from several local bar associations that the phrasing of existing law relating to the generation of low-cost continuing education course materials may preclude them from developing their own low-cost continuing education program. Although the existing law appears to permit an "incorporated non-profit association of attorneys" to generate continuing education requirements, the law could be read to grant CLA the exclusive right to develop low-cost trainings. To ensure that all attorney associations can produce low-cost continuing education documents, this bill would delete the specific reference to CLA and replace that reference with the phrase "a voluntary association of attorneys." This would not preclude CLA from creating continuing education materials, but will guarantee that all official bar associations can produce such materials as well. Nothing in this bill changes the existing requirement that the State Bar approve a continuing education provider.

As an additional aspect of the deunification of the State Bar was providing for the governance of how various affinity funds that were operated by the former sections of the State Bar would transfer to CLA and be used going forward. Section 6141.3 of the Bus. & Prof. Code requires certain funds to be utilized for "diversity, equity and inclusion, access to justice, and civic engagement efforts." Last year, concerns were raised about a lack of transparency from CLA regarding the use of revenues generated from the State Bar "affinity programs." The affinity programs are offered by CalBar Connect and are designed to provide discounts on services to attorneys, including malpractice insurance and other office management services. Currently, most of the revenue is provided to CLA and California Change Lawyers (the former charitable arm of the State Bar before deunification) with the remainder going to fund legal aid.

To ensure that these funds were being spent in an efficient manner, last year SB 253 (Umberg, Ch. 405, Stats. 2025) required CLA to report on how it spends its affinity revenues. That report, released in January 2026, provided top-line spending numbers but lacked the specificity stakeholders were seeking.

This bill provides that the State Bar act is not to be construed to affect or alter the status of the State Bar of California as a state agency within the judicial branch that serves as the administrative arm of the Supreme Court of California for matters relating to attorney admission, attorney discipline, and the regulation of the

practice of law. This provision is declaratory of existing law and is bolstered by the changes made by the Legislature in SB 36 to separate the bar from its professional association functions and require the State Bar to focus on its core missions of licensing, regulation, and discipline. This bill also makes a number of legislative findings and declarations to this effect, including that that no provision of the State Bar Act is to be construed to establish the State Bar as an entity independent of the State of California.

This bill also makes various other changes to enhance protection of the public including; changes to the discipline system and prohibiting person or entity from holding themselves out as a law school unless they are accredited by the American Bar Association or the State Bar and awards juris doctorate degrees.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

SUPPORT: (Verified 6/24/26)

State Bar of California

OPPOSITION: (Verified 6/24/26)

1 individual

ARGUMENTS IN SUPPORT: The author writes:

"AB 2784 is the annual vehicle to set the licensing fees for attorneys and make policy changes to the State Bar. This year's measure critically holds the licensing fee flat and does not raise fees on attorneys. The bill also formally ends the somewhat awkward legal relationship between the State Bar and the California Lawyers Association where the State Bar was collecting the membership dues of a trade group consisting of the State Bar's regulated community. Recognizing that no other legal trade organization is recognized in statute, the bill removes statutory references to the California Lawyers Association.

Finally, as is typical in the annual bar fee bill, the bill proposes several technical changes to the State Bar Act at the request of the agency to streamline State Bar governance and improve oversight of the legal industry."

SUBJECT: Horse racing: out-of-state thoroughbred races: New York Stakes

SOURCE: Author

DIGEST: This bill adds the New York Stakes to the existing group of thoroughbred horse race meetings that are exempt from the 75 race-per-day limit on imported races into California for wagering.

ANALYSIS:

Existing law:

1) Authorizes, pursuant to Article IV, Section 19(b) of the Constitution of the State of California, the Legislature to provide for the regulation of horse races and grants the California Horse Racing Board the authority to regulate the various forms of horse racing authorized in this state.

2) Authorizes thoroughbred racing associations or fairs to distribute the audiovisual signal and accept wagers on the results of out-of-state and international thoroughbred races during the calendar period the association or

fair is conducting live racing, including days on which there is no live racing being conducted by the association or fair.

3) Limits the number of races that may be imported by associations and fairs to no more than 75 races-per-day on days when live thoroughbred or fair racing is being conducted in this state, with specified exceptions.

4) Exempts from that 75 races-per-day limit any imported races that are part of the race card of the Kentucky Derby, the Kentucky Oaks, the Preakness Stakes, the Belmont Stakes, the Jockey Club Gold Cup, the Travers Stakes, the Pegasus World Cup, the Arlington Million, the Breeders' Cup World Championship, the Dubai World Cup, the Arkansas Derby, the Apple Blossom Handicap, the Blue Grass Stakes, the Whitney Stakes, or the Haskell Invitational.

This bill adds the New York Stakes to the existing group of thoroughbred horse race meetings that are exempt from the 75 race-per-day limit on imported races into California for wagering.

Background

Author Statement. According to the author's office, "this bill would exempt all races imported by a thoroughbred association or fair that are part of the race card of the overall New York Stakes day from the 75-race per day limit as specified in current law. The law has been amended over the years to allow the importation of certain prominent races outside of this cap for promotional and financial reasons."

The author's office further notes that this bill will help increase the wagering handle on this specific day, which will result in higher purses, racetrack revenue, and breeders' awards in California. Purses are critical to California's racing industry because they provide revenue to horse owners for their racing operations. In addition, they provide revenue to breeders through an increase in the value of their breeding stock.

Pari-mutuel Wagering. Horse racing has been active in California since the 1800s, but horse racing as we now know it – under the pari-mutuel wagering system – was not made possible until the electorate passed a constitutional amendment in 1933. The expressed intent of California's Horse Racing Law is to allow pari-mutuel wagering on horse races. Pari-mutuel, from the French term for mutual betting, is a betting system in which all bets of a particular type are placed together in a pool, and payoff odds are calculated by sharing the pool among all winning bets. Pari-mutuel betting differs from fixed-odds betting in that the final payout is not

determined until the pool is closed – in fixed-odds betting, the payout is agreed at the time the bet is sold.

Satellite Wagering. Satellite wagering via an off-track facility has been legal in California since the 1980s when California racetracks began experiencing declining attendance and handle figures. The industry believed that making the product easier to access not only would expose and market horse racing to potential customers but also make it more convenient for the existing patrons to wager more frequently. However, while off-track-betting and simulcasting can open new revenue pathways, they may cannibalize traditional on-track income, putting tracks at further financial risk and potentially contributing to closures.

Simulcasting. Simulcasting is the process of transmitting the audio and video signal of a live racing performance from one facility to a satellite for re-transmission to other locations or venues where pari-mutuel wagering is permitted. Simulcasting provides racetracks with the opportunity to increase revenues by exporting their live racing content to as many wagering locations as possible, such as other racetracks, fair satellite facilities, and Indian casinos. Revenues increase because simulcasting provides racetracks that export their live content with additional customers in multiple locations who would not have otherwise been able to place wagers on the live racing event.

Thoroughbred racing associations and fairs in California can distribute the audiovisual signal and accept wagers on the results of out-of-state thoroughbred races during their own race meetings. This is allowed even on days when no live races are being held at their venues. There is a limit on the number of out-of-state races that can be imported into California for betting purposes. On days when there is live thoroughbred or fair racing happening in California, the total number of races imported from out-of-state must not exceed 75 races-per-day.

However, there are exceptions to this limit. Races that are part of specific major events like the Kentucky Derby, Breeders' Cup, and other specified races can be imported without falling under the 75 race-per-day limit. Additional exceptions are made for importing races into certain geographical zones of California when no local live racing is occurring. Any wagering on these out-of-state races must comply with specific provisions of California's Horse Racing Law that govern how betting should be conducted. Wagers on out-of-state races are not allowed after 7 p.m. Pacific Standard Time unless there is consent from the local harness or quarter horse racing associations conducting live racing in either Sacramento or Orange County.

Advance Deposit Wagering. The California horse racing industry entered into a new era in 2002 with the advent of Advance Deposit Wagering (ADW) which allows customers to deposit funds into an account in order to wager online and/or over the phone. These wagers are commingled into pools at the host track where the races are run, and within the pari-mutuel wagering system regulated by CHRB. Currently, eight ADW providers are operating in the state under a CHRB license. During the 2023-2024 fiscal year (FY), off-track betting within the state provided 13% of the total handle. The balance of the handle comes from out-of-state and ADW wagers – ADW accounted for about 45% or $1.34 billion. ADW remains the only legal form of online wagering in California.

Racetrack Attendance. Prior to the COVID-19 Pandemic, and closure of non-essential businesses in California, the horse racing industry had already been experiencing a general decline in the number of people attending and wagering at live tracks in California. This has been ongoing for more than three decades due to myriad factors including increased competition from other forms of gaming, unwillingness of customers to travel a significant distance to racetracks, and easy access to off-track wagering.

Status of the Horse Racing Industry in California. The California horse racing industry's long-term health is threatened by a combination of factors including competition from racing in other states and overseas, other forms of gaming within California, declining attendance, and the potential for higher value return by redeveloping the track property rather than continuing to operate in the face of declining revenues. As resources shrink, the industry is experiencing deficits in virtually every one of its revenue sources. Traditional take out, allocation, and distribution formulas are no longer able to sustain ongoing operations.

As the value of racing operations declines, track ownership is struggling to maximize the necessary return on the investment and tempted by alternative uses of the property that yield higher returns. Consequently, the racing industry is suffering unprecedented instability and capital flight. Tens of thousands of industry jobs are in immediate jeopardy, along with breeding farms as well as open space in urban centers throughout California. Also at risk is a substantial amount of local and state revenue generated both directly and indirectly by the industry.

Further exacerbating the horse racing industry's woes, the USA Today published an article in June of last year titled, "ICE raid on track workers sends shockwaves around racing, 'puts horses at risk.'" The article notes that federal Immigration and Customs Enforcement (ICE) agents raided the Delta Downs racetrack in

Vinton, Louisiana on June 17, 2025. More than 80 backstretch workers were reportedly detained, which the article notes "should be a wake-up call for an industry that would simply not be able to function without a workforce of grooms and hotwalkers and stall cleaners who are, by some credible estimates, 75% immigrants. They come from places like Venezuela, Panama, Colombia and Mexico, working low-wage jobs but filling indispensable roles, caring round-the-clock for animals worth hundreds of thousands, even millions of dollars."

Prominent trainer Dale Romans told reporters during a Kentucky Derby-week news conference set up to address the threat posed by a potential U.S. Immigration and Customs Enforcement raid at a racetrack, "if we couldn't have an immigrant workforce on the backside, I don't know how horse racing exists."

The New York Stakes. The New York Stakes is a Grade I American thoroughbred horse race for fillies and mares aged four-years-old and older run over a distance of one and one-quarter miles on the turf and scheduled annually in early June at Belmont Park in Elmont, New York. Inaugurated in 1940 as the New York Handicap at Aqueduct Racetrack, it was moved to Belmont Park in 1961 but returned to Aqueduct in 1963, where it remained until 1975, when it was permanently shifted to Belmont Park. Since its inception, it has been contested at various distances on both dirt and turf.

In 2025, the 4-year-old filly She Feels Pretty won the $750,000 New York Stakes providing trainer Cherie DeVaux her first win in the prestigious race. The Eclipse Award-winning filly covered 1 3/16 miles on a yielding turf course in 2:00.76. The race is a headline event on the day before the Belmont Stakes, the final leg of the Triple Crown.

SUBJECT: California Gambling Control Commission

SOURCE: Author

DIGEST: This bill modifies the requirement that one member of the California Gambling Control Commission (Commission) be an attorney and a member of the State Bar of California with regulatory law experience, to instead require that one member of the Commission be a member of the State Bar of California with regulatory *or gaming law* experience.

ANALYSIS:

Existing law:

1) Provides, under the Gambling Control Act (Act), for the licensure and regulation of various legalized gambling activities and establishments by the Commission and the investigation and enforcement of those activities and establishments by the Department of Justice (DOJ).

2) Provides that the Commission consists of five members appointed by the Governor, subject to confirmation of the Senate, and requires the Governor to designate one member to serve as chairperson.

3) Requires that the Commission collectively include individuals with diverse professional backgrounds, such as experience in finance or accounting, law with regulatory expertise, law enforcement or criminal investigation, business or government, and representation of the general Internet public.

4) Authorizes the Governor to remove any member of the Commission for incompetence, neglect of duty, or corruption upon first giving the member a copy of the charges and an opportunity to be heard.

5) Requires the Governor to fill any vacancies on the Commission, subject to confirmation by the Senate, within 60 days of the date of the vacancy.

6) Provides that a person is ineligible for appointment to the Commission if, within two years prior to appointment, the person was employed by, retained by, or derived substantial income from, a gambling establishment.

This bill:

1) Modifies the requirement that one member of the Commission be an attorney and a member of the State Bar of California with regulatory law experience, to instead require that one member of the Commission be a member of the State Bar of California with regulatory *or gaming law* experience.

2) Makes various technical, non-substantive changes.

Background

Author Statement. According to the author's office, "gaming laws are often complex, covering a range of issues such as licensing, taxation, consumer protection, responsible gambling, and anti-money laundering. An expert in gaming law can help navigate these complexities and ensure the laws and regulations are applied correctly."

Furthermore, "one of the main roles of regulatory bodies is to protect consumers and ensure fair play. Someone with expertise in gaming law can help the Commission further create policies that protect players from unfair practices and

ensure their rights are respected. In addition, the gaming industry is evolving quickly with new technologies, such as sports betting, online gaming, e-sports, and mobile platforms. A gaming law expert would help the Commission stay ahead of these trends while making sure new practices are compliant with existing laws or can be properly regulated."

Gambling Control Act. The Act provides the Commission with jurisdiction over the operation of gambling establishments in California. The Act requires every owner, lessee, or employee of a gambling establishment to obtain and maintain a valid state gambling license. The Act assigns the Commission the responsibility of assuring that gambling licenses are not issued to, or held by, unqualified or disqualified persons, or by persons whose operations are conducted in a manner that is harmful to the public health, safety, or welfare.

The Act directs the Commission to issue licenses only to those persons of good character, honesty and integrity, whose prior activities, criminal record, if any; reputation, habits and associations do not pose a threat to the public interest of this state. The DOJ conducts background and field investigations and enforces the provisions of the Act in this regard.

California Gambling Control Commission. The Commission is composed of five members, all of whom are appointed by the Governor and confirmed by the California State Senate. State law establishes several requirements to ensure professional expertise and political balance on the Commission. For example, no more than three of the five commissioners may belong to the same political party. The statute also requires that the commission collectively include individuals with diverse professional backgrounds, such as experience in finance or accounting, law with regulatory expertise, law enforcement or criminal investigation, business or government, and representation of the general public.

Current law authorizes the Governor to remove a member of the Commission for incompetence, neglect of duty, or corruption upon first giving the member a copy of the charges and an opportunity to be heard. This bill modifies the requirement that one member of the Commission be an attorney and a member of the State Bar of California with regulatory law experience, to instead require that one member of the Commission be an attorney and a member of the State Bar of California with regulatory *or gaming law* experience.

Prior/Related Legislation

SB 1235 (G.O., 2026) requires the Governor to notify the Senate and Assembly Committees on Governmental Organization of the removal of a member of the Commission. (Pending in the Assembly Appropriations Committee)

AB 2173 (Wallis, 2026) requires the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Pending on the Senate Floor)

AB 2644 (Rubio, 2026) requires the Governor to notify the Legislature of the removal of any member of the Commission. (Pending in the Senate Appropriations Committee)

SB 864 (Padilla, 2025) would have required the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Gutted and Amended to an Unrelated Issue)

SB 1154 (Alvarado-Gil, 2024) would have required the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Never Heard in the Senate Governmental Organization Committee)

SB 346 (Ochoa-Bogh, 2023) would have required the Commission to post a public record of every vote on its Internet Web site no later than two business days after the meeting at which the vote was taken. (Never Heard in the Assembly Governmental Organization Committee)

SUBJECT: Criminal history information: background checks

SOURCE: Author

DIGEST: This bill makes various changes to existing laws authorizing federal-level background checks to be conducted in relation to employment, volunteering, and licensing, in order to bring state law into compliance with federal law to ensure state entities have access to federal criminal history information.

Senate Floor Amendments of 8/18/26 include language to avoid chaptering issues with SB 1083.

ANALYSIS:

Existing law:

1) Requires the Department of Justice (DOJ) to maintain state summary criminal history information, as defined, and to furnish this information to various state and local government officers, officials, and other prescribed entities, if needed in the course of their duties. (Penal (Pen.) Code, § 11105, subds. (a), (b).)

2) Defines "state summary criminal history information" to mean the master record of information compiled by the Attorney General pertaining to the

identification and criminal history of a person, such as name, date of birth, physical description, fingerprints, photographs, dates of arrests, arresting agencies and booking numbers, charges, dispositions, sentencing information, and similar data about the person. (Pen. Code, § 11105, subd. (a)(2)(A).)

3) Authorizes DOJ to furnish state summary criminal history information and, when specifically authorized by this subdivision, federal-level criminal history information upon a showing of a compelling need to specified entities including peace officers of the United States, other states, or territories or possessions of the United States. (Pen. Code, § 11105, subd. (c).)

4) Specifies that a fingerprint-based criminal history information check that is required pursuant to any statute is to be requested from the DOJ. Requires DOJ, when a government agency or other entity requests such a criminal history check for purposes of employment, licensing, or certification, to disseminate specified information in response to the request, including information regarding convictions and arrests for which the applicant is presently awaiting trial. (Pen. Code, § 11105, subd. (u).)

5) Requires all volunteers, contractors, and subcontractors of a criminal justice agency to undergo a state and federal criminal background check. (Pen. Code, §§ 11105.002, 11105.5.)

6) Authorizes, notwithstanding any other law, a human resource agency or an employer to request from DOJ records of all convictions or any arrest pending adjudication involving specified offenses of a person who applies for a license, employment, or volunteer position, in which they would have supervisory or disciplinary power over a minor or any person under their care. Requires DOJ to furnish the information to the requesting employer and to send a copy of the information to the applicant. (Pen. Code, § 11105.3, subd. (a).)

7) Requires that a request for records pursuant to the above provision include the applicant's fingerprints and any other data specified by DOJ. (Pen. Code, § 11105.3, subd. (b).)

8) Requires that the determination of whether the criminal history record shows that the applicant, employee, or volunteer has been convicted of, or is under the pending indictment for, any crime that bears upon the fitness of the individual to have responsibility for the safety and well-being of children, the elderly, the handicapped, or the mentally impaired, is solely made by the human resource

agency or employer. Provides that DOJ is not required to make such a determination on behalf of any human resource agency or employer. (Pen. Code, § 11105.3, subd. (b)(2)(E).)

9) Requires an application used to determine the eligibility to own a firearm to include two copies of the applicant's fingerprints. (Pen. Code, § 23520.)

10) Requires employees of entities that have contracts with a private school or heritage school and provide services, including schoolsite administrative or grounds, landscape maintenance and instruction, to provide their fingerprints to DOJ, as specified. (Education (Ed.) Code, § 33192.)

11) Requires employees of an entity that contracts with a local educational agency to, if the employee interacts with pupils without the immediate supervision of, among others, a school employee, complete a criminal background check, as specified. (Ed. Code, § 45125.1.)

12) Requires that a county, city, city and county, or special district has specified prospective employees or volunteers complete a background check that inquires as to whether the applicant has been convicted of certain offenses. (Public (Pub.) Resources (Res.) Code, § 5164.)

13) Requires that resource family home environment assessment standards include, but not be limited to, a criminal record clearance search of each applicant and all adults residing in, or regularly present in, the home, and not exempted from fingerprinting, as specified, utilizing a check of the Child Abuse Central Index, and receipt of a fingerprint-based state and federal criminal offender record information search response. Requires the criminal history information to include subsequent notification. (Welfare (Welf.) & Institutions (Inst.) Code, §16519.5, subd. (d)(2)(A)(i).)

14) Requires the State Department of Health Care Services (DHCS) to screen all providers and designate each provider as "limited," "moderate," or "high" categorical risk. Requires DHCS, for all providers designated as a "high" categorical risk, to conduct a criminal background check and require specified individuals to submit a set of fingerprints within 30 days of the DHCS's request in a manner specified by the department. (Welf. & Inst. Code, § 14043.38.)

15) Requires DHCS to require that specified applicants, providers, and individuals submit fingerprint images and related information for purposes of a state and

federal criminal background check and prescribes a procedure for DHCS and DOJ to follow for these purposes. (Health & Safety (Saf.) Code, § 1522.)

16) Requires the State Department of Social Services (CDSS) to license and regulate community care facilities, residential care facilities for persons with chronic, life-threatening illness, residential care facilities for the elderly, and childcare centers. Requires the department to obtain a criminal record for all applicants for licenses for these facilities and services and specified other employees and officers of these facilities, including, among others, adults responsible for the administration or direct supervision of staff, a staff person, volunteer, or employee who has contact with clients, and, if the applicant is a firm, partnership, association, or corporation, the chief executive officer or other person serving in a like capacity. (Health & Saf. Code, §§ 1568.09, 1569.17, 1596.871.)

17) Requires the submission of fingerprints to the department for certifying a massage professional, licensing a professional fiduciary, registering a tax preparer, confirming the appointment of a humane officer, working for a bank or its affiliates, and licensing an escrow agent, as specified. (Bus. & Prof. Code, §§ 4604, 6533.5, 22253.5; Corporations (Corp.) Code, § 14502; Finance (Fin.) Code, §§ 1300, 17331.)

18) Prohibits a person from, among other things, acting as a broker or salesperson for the purchase or sale of a yacht without a license. Authorizes the issuance of a temporary license to a salesperson under specified conditions. Requires an applicant for a broker or salesperson license to undergo a fingerprint-based state and national criminal history background check. (Harbors & Navigation Code, § 725.)

This bill:

1) Specifies that the requirement that all volunteers, contractors, and subcontractors of a criminal justice agency undergo a state and federal criminal background check only applies to a volunteer, contractor, or subcontractor who provides specified services or has direct or remote access to the agency's systems or unescorted access to the agency's facilities.

2) Provides that notwithstanding any other law, any statutory requirement for an entity subject to any statutory requirement for an entity to conduct a federal criminal history information check for licensing, certification, or employment

purposes does not apply if the Federal Bureau of Investigation (FBI) has not authorized the entity to conduct a federal criminal history information check under the applicable federal laws and regulations.

3) Authorizes an entity to make licensing, certification, or employment decisions based on the results of a state criminal history information check until the FBI has authorized them to conduct a federal criminal history information check.

4) States that if the FBI authorizes an entity to conduct the federal criminal history information check, the entity must require an applicant, licensee, certified individual, and employee who did not previously undergo the federal criminal history information check to resubmit their fingerprints for that purpose.

5) Requires DOJ, for purposes of implementing the provisions of the National Child Protection Act of 1993, as amended by the Volunteers for Children Act, to develop the California Volunteer and Employee Criminal History Service Program.

6) Specifies, notwithstanding any other law, a qualified entity may require a covered individual to undergo a fingerprint-based state and national criminal history background check pursuant to the above provision.

7) Provides the following definitions for purposes of the California Volunteer and Employee Criminal History Service Program:

   a) "Care" means the provision of services, treatment, education, training, instruction, supervision, or recreation to children, the elderly, or an individual with a disability.
   b) "Child" means a person under 18 years of age.
   c) "Covered individual" means a person who has or may have access to a person served by a qualified entity, and meets one of the following criteria:
   d) Is a current or prospective employee or volunteer of a qualified entity, or,
   e) Is a current or prospective owner or operator of a qualified entity.
   f) "Elderly" means a person 60 years of age or older.
   g) "Employee" means every person in the service of a qualified entity under any appointment or contract of hire or apprenticeship, express or implied, oral or written.
   h) "Individual with a disability" means a person who has a physical or mental impairment that substantially limits one or more major life activities, a person who has a history or record of a physical or mental impairment, or a

person who is perceived by others as having a physical or mental impairment.

i) "Qualified entity" means a business or organization, whether public, private, for profit, not for profit, or voluntary, that provides care or licenses, certifies, or places others to provide care.

j) "Volunteer" means an individual who performs work without promise, expectation, or receipt of any compensation for any work performed.

8) Deletes DOJ fitness determination provisions from various statutes.

9) Requires an applicant for a certificate of eligibility and a dangerous weapons license or permit issued by DOJ, including, among other weapons, an assault weapon or short-barreled shotgun, to submit to DOJ fingerprint images and related information for purposes of conducting a state and national criminal history background check, as specified, and for the purpose of determining if the applicant is prohibited by state or federal law from possessing, receiving, owning, or purchasing a firearm. Requires DOJ to retain the fingerprint impressions for subsequent arrest notification, as specified.

10) Revises the process to conduct a fingerprint background check for individuals seeking employment with any entity that contracts with a local education agency to provide services.

11) Revises the process to conduct a fingerprint background check for individuals seeking certification as a massage professional, licensing as a professional fiduciary, registering as a tax preparer, confirming the appointment of a humane officer, working for a bank or its affiliates, and licensing as an escrow agent, as specified.

12) Authorizes DOJ to share criminal history information with peace officers of tribes in other states.

13) Includes within the list of persons for whom CDSS is required to obtain criminal background checks for purposes of licensing and regulation of a community care facility, child care facility, residential facilities, an administrator, supervisor, manager, or director of the facility, or an individual acting in those roles, an adult responsible for the operation of the facility, and a person with a 10% or greater financial interest in the applicant.

14) Includes limited liability companies within applicant types for which the above applies.

15) Revises the authority that exists for DHCS to require a Medi-Cal provider or applicant to undergo criminal background checks to additionally authorize the Department of Public Health to require these background checks as an alternative.

16) Defines the following terms for purposes of the provision authorizing background checks for specified Medi-Cal providers and applicants:

    a) "Applicant" means an individual, including an ordering, referring, or prescribing individual, entity, or person with ownership or control interest in the applicant entity, managing employee, or agent that applies for enrollment as a provider in the Medi-Cal program that is subject to federal screening level requirements under Sections 424.518 and 455.450 of Title 42 of the Code of Federal Regulations.
    b) "Person with ownership or control interest," "managing employee," and "agent" have the same meanings as defined in Section 455.101 of Title 42 of the Code of Federal Regulations.
    c) "Provider" means an individual, entity, person with ownership or control interest in the entity, managing employee, or agent that is enrolled in the Medi-Cal program that furnishes, directly or indirectly, including all ordering, referring, and prescribing, any service, good, supply, or merchandise to a Medi-Cal beneficiary whose enrollment is subject to federal screening level requirements under Sections 424.518 and 455.450 of Title 42 of the Code of Federal Regulations.

17) Authorizes the Housing Development and Finance Committee (HDFC) to require an employee, prospective employee, volunteer, contractor, or subcontractor to undergo a fingerprint-based state and national criminal history background check. Requires HDFC or the Department of Housing and Community Development to submit fingerprint images and related information to DOJ for a person subject to a state and national criminal history background check.

18) Authorizes the Deputy Director of Boating and Waterways to extend the term of a temporary license or issue a new temporary license to provide an applicant for a broker or salesperson license time to comply with the criminal history background requirement, as specified.

19) States that the Board of Registered Nursing (BRN) must require an applicant for a registered nurse license, as defined, to undergo a fingerprint-based state and national criminal history background check. Requires the BRN to submit to DOJ fingerprint images and related

20) Information for individuals who are subject to a state and national criminal history background check, pursuant to existing provisions of law. Requires DOJ to provide a state and federal level response pursuant to existing provisions of law.

21) Contains an urgency clause in order for the bill to go into effect immediately.

22) Contains a savings clause so that any other bill enacted by the Legislature during the 2026 calendar year that amends the same section amended by this bill will prevail over this bill, whether it is chaptered before or after this bill. Specifies that this language does not apply to the provisions of this bill that amend Section 45125.1 of the Education Code.

23) Makes other technical and conforming changes.

Background

This is a committee bill to make technical or minorly substantive amendments to existing statutes that authorize federal-level background checks. These changes are needed because the FBI has flagged certain statutes to be out of compliance with PL 92-544 which generally prohibits access to federal criminal history information by a private entity. The provisions of this bill would bring these statutes back into compliance with federal law.

SUBJECT: Government preferences

SOURCE: Author

DIGEST: This Constitutional Amendment, if approved by voters, would amend the California Constitution to replace "public education" with "public higher education admissions and enrollment" in subdivision (a) Section 31, of Article I, which prohibits discrimination and preferential treatment on the basis of race, sex, color, ethnicity, or national origin. The measure requires that it appear on the statewide general election ballot on November 7, 2028.

ANALYSIS:

Existing law pursuant to the United States Constitution:

1) Declares all people born or naturalized in the United States are citizens of the United States and are citizens of the state where they reside. Prohibits any state from making or enforcing any law that abridges the privileges or immunities of citizens of the United States. Prohibits any state from depriving any person of life, liberty, or property, without due process of law. Prohibits any state from denying any person within its jurisdiction the equal protection of the law. (United States Constitution (USC), Amendment 14, the Equal Protection Clause)

Existing Federal law:

2) No person in the United States will, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance except for specified circumstances, including membership of fraternities and sororities. (20 USC 1681-168 Title IX)

3) Prohibits discrimination on the basis of race, color, or/and national origin in programs and activities receiving federal assistance. (42 USC 2000d et seq., Title VI of the Civil Rights Act of 1964)

4) Prohibits discrimination in employment based on race, color, religion, sex, or national origin and prohibits retaliation against employees who invoke their rights under Title VII of the Civil Rights Act of 1964. (42 USC 2000e Title VII of the Civil Rights Act)

Existing law, pursuant to the California State Constitution:

5) States that a person is not to be deprived of life, liberty, or property without due process of law or denied equal protection of the laws. (Section 7 of Article 1 of the California State Constitution)

6) Prohibits the State, in the operation of public employment, public education, or public contracting, from discriminating against or granting preferential treatment to any individual or any group on the basis of race, sex, color, ethnicity, or national origin. States the implementation is to comply with federal laws and the USC and defines the "state" to include the public university system (including the University of California (UC)). Nothing in the aforementioned clause is to be interpreted as:

a) Prohibiting bona fide qualifications based on sex, which are reasonably necessary to the normal operation of public employment, public education, or public contracting.

b) Prohibiting action which must be taken to establish or maintain eligibility for any federal program, where ineligibility would result in a loss of federal funds to the State.

c) Invalidating any court order or consent decree, which is in force as of the effective date of the section. (Section 31 of Article 1 of the California State Constitution (Proposition 209))

Existing State law:

7) Establishes the Donahoe Higher Education Act, setting forth the mission of the UC, California State University (CSU), and California Community Colleges (CCC); and, defines "independent institutions of higher education" as nonpublic higher education institutions that grant undergraduate degrees, graduate degrees, or both, and that are formed as nonprofit corporations in California and are accredited by an agency recognized by the United States Department of Education. (Education Code (EC) Section 66010, et seq.)

8) States that no person is to be subjected to discrimination on the basis of disability, gender, gender identity, gender expression, nationality, race or ethnicity, religion, sexual orientation, or any characteristic listed or defined in Section 11135 of the Government Code or any other characteristic that is contained in the prohibition of hate crimes, as defined in subdivision (a) of Section 422.6 of the Penal Code, including immigration status. States the prohibition on the discrimination on the basis of the listed characteristics is extended to programs or activities conducted by any postsecondary education institution that receives or benefits from, state financial assistance or enrolls students who receive state financial aid. (EC § 66270)

9) States that no person is to be subjected to discrimination on the basis of disability, gender, gender identity, gender expression, nationality, race or ethnicity, religion, sexual orientation, or any other characteristic that is contained in the definition of hate crimes set forth in Section 422.55 of the Penal Code, including immigration status, in any program or activity conducted by an educational institution that receives, or benefits from, state financial assistance, or enrolls pupils who receive state student financial aid. (EC § 220)

This measure:

1) Amends the California State Constitution, upon approval of the voters of California, by replacing "public education" with "public higher education admissions and enrollment" in subdivision (a) Section 31, of Article I, which prohibits discrimination and preferential treatment on the basis of race, sex, color, ethnicity, or national origin. Specifically, it:

   a) Removes "*public education"* from the list of activities which are prohibited from discriminating against or granting preferential treatment to, any individual or group, on the basis of race, sex, color, ethnicity, or national origin.

   b) Adds *"public higher education admission and enrollment"* to the list of activities which are prohibited from discriminating against or granting preferential treatment to, any individual or group, on the basis of race, sex, color, ethnicity, or national origin.

   c) States that the prohibition on discrimination and the granting of preferential treatment only apply to actions of the State after the section's effective date and is limited to the areas of public employment, higher education admission and enrollment, and public contracting.

   d) Requires that the measure appear on the ballot at the November 7, 2028 statewide general election.

   e) Makes various legislative findings and declarations regarding racial equity gaps.

   f) Makes various technical and clarifying changes.

Comments

1) *Need for the bill.* According to the author, "ACA 7 seeks to provide clarity to existing legislation concerning Proposition 209, also known as Article I, Section 31 of the California Constitution. For too long, the provisions of this law have been subject to broad interpretation, leaving Californians without a clear understanding of its intended application. This measure introduces clarifying language and makes an adjustment to focus specifically on "higher

education admissions and enrollment." These changes will help ensure a more accurate interpretation of the state constitution, allowing its provisions to be implemented as originally intended."

2) *Proposition 209.* Proposition 209, approved by voters in 1996, added Article 1, Section 31 to the California Constitution, prohibiting discrimination against or granting preferential treatment to individuals or groups on the basis of race, sex, color, ethnicity, or national origin in public employment, public education, and public contracting. Proposition 209 did not replace broader anti-discrimination protections, as state and federal constitutional equal protection guarantees and other civil rights laws continue to apply independently (outlined in the background section of this analysis). Seemingly, Proposition 209 serves as an additional constitutional limitation rather than the sole source of anti-discrimination protection. As noted in the Assembly Judiciary Committee analysis, "the language prohibiting discrimination was largely superfluous, given that the state and federal law as well as the equal protection clause of 14th Amendment, already prohibited such discrimination. What Proposition 209 effectively did was to prohibit preferential treatment which is generally understood to mean either setting quotas or, considering race as a one factor among many in someone's qualification."

   Proposition 209 restricted affirmative action programs involving preferential treatment in the prescribed areas. According to the Legislative Analyst's Office (LAO) in their review of Proposition 16 in 2020, prior to Proposition 209, state and local entities had policies and programs intended to increase opportunities and representation for people who faced inequalities as a result of their race, sex, color, ethnicity, or national origin. After the adoption of Proposition 209, for higher education, this meant public colleges and universities could no longer consider those characteristics in admission decisions or operate certain programs specifically designed to increase access, representation, or support for historically underrepresented student groups. After voters approved Proposition 209, some public universities created or modified policies and programs to instead consider characteristics not banned by Proposition 209.

3) *Related ballot measure***.** In 2020, the Legislature approved ACA 5 (Weber, Chapter 23, Statutes of 2020), which asked voters for full repeal of Proposition 209. ACA 5 was placed before California voters as Proposition 16 on the November 3, 2020, statewide general election ballot, where it failed passage with 57 percent of voters voting NO. The LAO noted in its fiscal analysis of the ballot measure, that it would have no direct fiscal effect on state and local

entities because the measure would not require any change to current policies or programs. Instead, any fiscal effects would depend on future choices by state and local entities to implement policies or programs that consider race, sex, color, ethnicity, or national origin in public education, public employment, and public contracting.

This measure, ACA 7, proposes a more targeted change to Proposition 209, limiting its application in public education to public higher education admission and enrollment, thereby removing other K-12 and higher education activities from its scope.

According to the Assembly Judiciary Committee Analysis, "While leaving "higher education admissions and enrollment" in Article I, Section 31 is consistent with existing case law, it remains to be seen whether policies permitted under this proposed constitutional provision would violate the equal protection clause of the 14th Amendment. To be clear, this measure would not – indeed, could not – by itself violate the equal protection clause; because it does not by itself discriminate against, or grant a preference to, any individual or group. It simply declares what the state cannot do; it does not say what it can or must do. The opponents of this measure, therefore, are apparently concerned that this proposed change in the state constitution might permit policies that violate the equal protection clause. If the intent of the measure is to permit K-12 to discriminate on the basis of race, or permit colleges and universities to discriminate on the basis of race in everything other than admissions and enrollment, those polices might pass constitutional muster under the state constitution, as revised, but those policies might still violate the equal protection clause of the 14th Amendment, at least as interpreted by the U.S. Supreme Court in Students for Fair Admissions."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee analysis, this bill would have the following fiscal impact:

- This bill could result in additional, unknown Proposition 98 General Fund cost pressures for the state or K-12 local educational agencies (LEAs) to enact policies and programs providing preferential treatment on the basis of race, sex, color, ethnicity, or national origin. However, these costs are difficult to quantify because the bill does not necessarily require any changes to current policies or programs. The exact costs would depend on any decisions that are made by the state or LEAs with respect to the

implementation of policies or programs that consider race, sex, color, ethnicity, or national origin.

- This measure would result in one-time General Fund costs to the Secretary of State (SOS) in the range of $738,000 to $984,000, likely in 2028-29, for printing and mailing costs to place the measure on the ballot in a statewide election. Actual costs may be higher or lower, depending on the length of required elements and the overall size of the ballot.

SUBJECT: The 2026 International Day of Yoga

SOURCE: Author

DIGEST: This resolution recognizes June 21, 2026, as the 2026 International Day of Yoga in California.

ANALYSIS: This resolution makes the following legislative findings:

1) California is home to many yoga teachers, students, studios, and classes that have collectively contributed to the significant growth of yoga throughout the United States. Yoga has become one of the fastest growing wellness practices in the past decade, with approximately 36,000,000 Americans estimated to practice yoga regularly, and one in three Americans have at least tried yoga once.

2) Yoga brings strength, stability, and unity within the body, mind, and emotions. Recent studies suggest that yoga-based interventions can be an effective treatment for various health conditions and mental health disorders and can complement traditional medical interventions and therapy. Regular yoga practitioners report benefits such as reduction in stress, positive increase in temperament, being physically stronger, and reduced inflammation, pain, and stiffness.

3) This year marks the 12th International Day of Yoga and people worldwide use this celebratory day to raise awareness of the history, benefits, and teachings of yoga.

This resolution recognizes June 21, 2026, as the 2026 International Day of Yoga in California.

SUBJECT: Sister state: State of Jalisco

SOURCE: Author

DIGEST: This resolution recommits to formalizing the sister state relationship between the State of Jalisco in Mexico and the State of California.

ANALYSIS:

Existing law establishes, via Senate Concurrent Resolution 82 (Heuso, Resolution Chapter 70, Statutes of 2014) a sister state relationship with the State of Jalisco in Mexico and California, acknowledging the economic opportunities in high technology manufacturing, agriculture, tourism, amongst other important industries.

This resolution:

1) Recognizes the mutually beneficial educational, economic and culture exchanges between the State of Jalisco and State of California.

2) Continues the long-standing cross-national collaboration and goodwill between California and Jalisco in addressing immigration policies while maintaining liberties and due process for all residents in California granted by the state Constitution regardless of immigration status.

3) Promotes mutual respect for the residents of the bordering states.

Background

This resolution recommits to formalizing the sister-state relationship between California and Jalisco by embracing the shared investments in high technology manufacturing, agriculture ties, and cultural traditions and tourism. Recognized as "Mexico's Silicon Valley", Guadalajara, located in the State of Jalisco, is the largest technology center in Mexico, known as a major Latin and North American hub, and is a main producer of software, electronics and digital products. This burgeoning electronics market aligns with California's technology sector promoting job creation and sustainable innovation in both regions. The cultural traditions and heritage that originated in Jalisco have permeated California in displays of mariachi music, charreadas (Mexican rodeos), the Mexican Hat Dance, and the wide brimmed sombrero. The culinary exports from Jalisco to California include a variety of tequilas grown from the indigenous agave plant found in Mexico and a plethora of native dishes, including the meat stew dish of birria.

The historical Unites States Bracero Program brought agricultural laborers from Jalisco to California enriching the economic relationship and encouraging a deep-rooted generational connection between the states that continues to this day, particularly in agricultural areas located in the Central Valley and in the larger urban areas of Los Angeles. Today, this vast migration connects California and Jalisco through established family networks, cultural ties and shared prosperity encouraging Jalisco immigrants and their relatives to integrate into all sectors of business, participate in their community and contribute to their shared heritage and culture through music, the arts, cultural festivals and cuisine.

ACR 173 supports cooperative research by universities in California and Jalisco enriching this bi-national relationship by promoting bilateral economic development and stimulating employment in Mexican immigrant communities benefiting the residents in both states.

This resolution recognizes the vested interests and economic relationship between the States of Jalisco and California, promotes sustained goodwill and collaboration by continuing bilateral cooperation in the face of shifting federal policies on immigration enforcement, while maintaining mutual respect and honoring civil liberties for the residents in both regions.

Asociacion De Jaliscienses Unidos En Accion (AJUA)
Mexican-American Policy Alliance

OPPOSITION: (Verified 6/8/26)

None received

ARGUMENTS IN SUPPORT: Asociacion De Jaliscienses and Unidos En Accion (AJUA) write in support, "The relationship between California and Jalisco simply makes sense. Cross-border economic ties translate into real benefits for workers, businesses, and families on both sides – so investing in local-level collaboration is a practical, high impact approach. ACR 173 truly aligns with our mission to preserve and promote the Mexican roots in the United States, supporting the migrant community through services, education, culture, guidance and social programs that improve their quality of life."

The Mexican-American Policy Initiative notes in support, "This state sisterhood is a natural next step in cementing the strong relationship between Jalisco and California. Over 1 million people of Jalisco origin live in California. Jalisco and California share more than just people-they also share a rich, beautiful history shaped by culture and language. A sister-state relationship between the two would create opportunities to promote and share cultural and tourism experiences, while also encouraging joint business growth and workforce development collaboration."

SUBJECT: Second Chance Month

SOURCE: Author

DIGEST: This resolution proclaims the month of April 2026 as Second Chance Month in California.

ANALYSIS: This resolution makes the following legislative findings:

1) Every individual is endowed with human dignity and value. Redemption and second chances are values of California. Restorative justice through healing and rehabilitation can help uplift society.

2) An estimated 8 million residents of California have a criminal record. About 35,000 Californians return to their communities from prison every year.

3) For individuals returning to their communities from prison or jail, gaining meaningful employment is one of the most significant predictors of successful reentry and has been shown to reduce future criminal activity.

4) Many individuals who have been incarcerated struggle to find employment and access capital to start a small business because of collateral consequences, which are sometimes not directly related to the offenses the individuals committed or any proven public safety benefit.

5) An individual who has been convicted of certain crimes is often barred from receiving the financial aid necessary to acquire additional skills and knowledge through some formal education programs.

6) Those barriers can have an impact on public safety by contributing to recidivism.

7) The designation of April 2026 as Second Chance Month may contribute to increased public awareness about the impact of collateral consequences and the need for closure for individuals with a criminal record who have paid their debt.

This resolution proclaims the month of April 2026 as Second Chance Month in California.

SUBJECT: India's Independence Day

SOURCE: Author

DIGEST: This resolution recognizes August 15, 2026, as India's Independence Day and urge all Californians to join in celebrating India's independence.

ANALYSIS: This resolution makes the following legislative findings:

1) India's Independence Day is celebrated on August 15 of each year to commemorate its independence. It was celebrated by 400 million Indians in 1947 and today is celebrated by over one billion people living in India and many people living in other parts of the world, including California, which is home to the largest population of Asian Indians in the United States.

2) India's Independence Day is one of the most important national holidays in India. The biggest event of the day takes place in Delhi, where the Prime Minister hoists the national flag at the Red Fort, delivers a nationally televised speech that highlights the achievements of the government, discusses current issues and future plans for progress, and pays tribute to the leaders of India's struggle for freedom.

3) The local community of people in California who hail from India, or with ancestral ties to India, continually demonstrate the greatness and beauty of their homeland, and their contributions are notable and reflect success in many industries and community activism.

4) Ever since August 15, 1947, India's nonviolent struggle for freedom, its rejection of terrorism and extremism, and its belief in democracy, tolerance, and the rule of law have been an inspiration and beacon of hope for people around the world.

This resolution recognizes August 15, 2026, as India's Independence Day and urges all Californians to join in celebrating India's independence.

SUBJECT: California Hindu American Awareness and Appreciation Month

SOURCE: Author

DIGEST: This resolution designates the month of October 2026 as California Hindu American Awareness and Appreciation Month. The measure would also recognize and acknowledge the significant contributions made by Californians of Hindu heritage to the state and seek to increase awareness and understanding of the Hindu American community, and would condemn all hate crimes and bias incidents against Hindu Americans, Hindu temples and centers, and places of significance to the Hindu American community.

ANALYSIS: This resolution makes the following legislative findings:

1) California and the nation have been influenced by the extraordinary cultural, ethnic, linguistic, and religious diversity of its residents.

2) The year 2026 marks the 133rd anniversary of when Hinduism was officially introduced to the United States by Swami Vivekananda in 1893 at the World's Parliament of Religions in the City of Chicago, and the 126th anniversary of when he founded the Vedanta Society in the City of San Francisco, California, in 1900.

3) Despite their positive contributions to California and this nation, Hindu Americans face stereotypes and misconceptions about their heritage and have been the targets of bullying, discrimination, hate speech, and bias-motivated crimes.

4) According to the California vs Hate program within the Civil Rights Department, 23 percent of all religiously motivated hate incidents in the state reported to the hotline were directed at Hindus.

This resolution recognizes and acknowledges the significant contributions made by Californians of Hindu heritage to our state, and by adoption of this resolution, seeks to increase awareness and understanding of the Hindu American community.

SUBJECT: Zoot Suit Riots

SOURCE: Author

DIGEST: This resolution commemorates every June as the annual anniversary of the Zoot Suit Riots.

ANALYSIS: This resolution makes the following legislative findings:

1) The Zoot Suit Riots were a series of conflicts that occurred in June 1943 in the City of Los Angeles between United States servicemen and Mexican American youths, the latter of whom wore outfits called zoot suits.

2) Pressures related to the United States involvement in World War II contributed to the racial tensions that preceded the riots. As part of the war effort, by March 1942, the United States had begun rationing various resources. Restrictions on wool had a direct effect on the manufacture of wool suits and other clothing. This exacerbated racial tensions, as Mexican American youths wearing the zoot suits were seen as un-American because they were deliberately ignoring the rationing regulations.

3) During the period from 1942 through 1943, the news media continued to portray the zoot-suiters as dangerous gang members who were capable of murder. It was in this racially charged atmosphere that the conflict between predominantly White servicemen stationed in southern California and Mexican American youths in the area began.

4) The worst of the rioting occurred on the night of June 7, 1943, when thousands of servicemen and citizens prowled the streets of the downtown area of the City

of Los Angeles, attacking zoot-suiters as well as members of minority groups who were not wearing zoot suits.

5) The fact that considerably more Mexican Americans than servicemen were arrested, upward of 600 of the former, according to some estimates, fueled criticism of the Los Angeles Police Department's response to the riots from some quarters.

This resolution commemorates every June as the annual anniversary of the Zoot Suit Riots.

SUBJECT: Child nutrition: federal programs: funding cuts

SOURCE: Author

DIGEST: This resolution calls on the state's representatives in Congress to continue to support investments in the federal Local Food for Schools and Child Care (LFSCC) program and would call on the President of the United States to work with Congress to support family farmers who produce fresh, locally-sourced food for school meals.

ANALYSIS:

Existing federal law establishes the Agricultural Marketing Services Local Food for Schools and Child Care program (LFSCC) under the United States Department of Agriculture (USDA). USDA awards funds to states for food assistance purchases of domestic local foods for distribution to schools and child care institutions. The LFSCC program, among other things, helps states address supply chain disruptions and support local and regional food systems.

This resolution calls on the California Congressional Delegation to continue to support investments in the LFSCC program and work with President Trump and congress to support family farmers who produce fresh, locally-sourced food for school meals.

Background

In December, 2021, LFSCC was part of several COVID relief programs and provided $200 million in non-competitive grant funding to state agencies through cooperative agreements for the purchase of local, unprocessed or minimally processed foods from farmers, ranchers, and small businesses to distribute to schools that participate in the National School Lunch and Breakfast programs.

In October, 2024, USDA announced it would provide $660 million for LFSCC to continue providing these services and add childcare. However, in March 2025, USDA's Agricultural Marketing Service terminated this second round of funding with a 60-day notice that cooperative agreements would be ended because the program "no longer effectuates agency priorities."

ARGUMENTS IN SUPPORT: According to the author:

> "AJR 6 calls on the Trump Administration to restore funding for the Local Food for Schools and Child Care (LFSCC) program. LFSCC provides healthy, locally sourced meals to students while supporting small farmers and food producers. School meal programs play a vital role in ensuring California schoolchildren receive the nutrition needed to thrive academically and physically. Additionally, the LFSCC program strengthens local economies by creating opportunities for California's farmers, their workers, and California's agricultural industry as a whole. Cutting this funding threatens students' well-being, weakens local food systems, and could cause California to lose over $150 million in economic impact. Restoring these investments is essential to protecting California's most vulnerable children, supporting family farmers, and maintaining a strong California economy. Our Congressional Delegation and the Trump Administration should do everything possible to prevent the damage from cutting this program."

The California School Employees Association wrote in support of the resolution stating:

> "The LFSCC program provides federal funding to school food authorities to help increase local food purchases in schools and expand economic opportunities for local farmers and ranchers. The California Department of Education has received over $23 million through this program and distributed that money to schools to purchase local foods. Eliminating this program will hurt both kids and small family farmers, forcing school food authorities to spend limited nutrition funds on cheaper alternatives that are less likely to be locally sourced."

ASSEMBLY FLOOR: 60-11, 5/14/26 - See last page for vote

SUBJECT: Restoration of the Voting Rights Act of 1965

SOURCE: California Legislative Black Caucus

DIGEST: This resolution urges Congress to enact legislation to restore and strengthen the full protections of the Voting Rights Act of 1965 (VRA).

ANALYSIS:

Existing law:

1) Provides, pursuant to the 15th Amendment to the U.S. Constitution, that "[t]he right of citizens of the United States to vote shall not be denied or abridged by the United States or by any state on account of race, color, or previous condition of servitude." The 15th Amendment authorizes Congress to enact legislation to enforce its provisions.

2) Prohibits, pursuant to Section 2 of the VRA, among other provisions, any "voting qualification or prerequisite to voting or standard, practice, or procedure" from being imposed by any "state or political subdivision in a manner which results in a denial or abridgement of the right of any citizen of the United States to vote on account of race or color." Section 5 of the VRA

requires certain states and covered jurisdictions to receive approval for any changes to law and practices affecting voting practices and procedures.

This resolution:

1) Calls upon Congress to act with all deliberate speed to enact legislation to restore and strengthen the full protections of the VRA.

2) Urges Congress to restore a functional preclearance regime, including a modernized coverage formula grounded in contemporary evidence of discrimination, ensuring that jurisdictions with a record of discriminatory practices must obtain federal approval before implementing voting changes.

3) Urges Congress to codify a robust, results-based standard under Section 2 of the VRA to explicitly reject the intent-focused narrowing of the VRA created by the U.S. Supreme Court's decision in *Louisiana v. Callais* and provide meaningful remedies to prevent and redress racial vote dilution and discriminatory districting.

4) Calls on Congress to honor the bipartisan legacy of the VRA by ensuring its protections remain fully effective in the face of contemporary threats.

5) Urges the President to sign such legislation promptly upon its passage.

Background

In 1965, Congress determined that state officials were failing to comply with the provisions of the 15th Amendment. As a result, Congress passed and President Johnson signed the VRA. The VRA, among other provisions, prohibits any "voting qualification or prerequisite to voting or standard, practice, or procedure" from being imposed by any "[s]tate or political subdivision in a manner which results in a denial or abridgement of the right of any citizen of the United States to vote on account of race or color."

Section 2 of the VRA is a nationwide prohibition against voting practices and procedures, including redistricting plans and at-large election systems, poll worker hiring, and voting registration procedures, that discriminate on the basis of race, color, or membership in a language minority group. In *Louisiana v. Callais*, the U.S. Supreme Court ruled in April 2026 that Louisiana's congressional map was unconstitutional because race was used prominently used in its design. The Court held that complying with Section 2 of the VRA did not justify race-based redistricting unless it met strict constitutional limits. The ramifications of this

decision are not fully known, but other states are evaluating how this decision affects a jurisdiction's current boundaries.

Section 2 also allowed the U.S. Attorney General or affected private citizens to bring lawsuits in federal court to challenge practices that may violate the VRA. In 2021, in *Brnovich v. DNC*, the U.S. Supreme Court made it more difficult to bring voter suppression claims through the judicial process.

Section 4 of the VRA set the criteria for determining whether a jurisdiction is covered under certain provisions of the VRA, including the requirement for review of changes affecting voting under Section 5.

Section 5 of the VRA requires certain states and covered jurisdictions to receive approval for any changes to law and practices affecting voting from the U.S. Department of Justice or the U.S. District Court of the District of Columbia to ensure the changes do not have the purpose or effect of "denying or abridging the right to vote on account of race or color." This is also known as a "preclearance" requirement.

The U.S. Supreme Court, in *Shelby County v. Holder* in 2013, held that a coverage formula in Section 4 of the VRA is unconstitutional and can no longer be used as a basis for subjecting jurisdictions to preclearance under Section 5 of the VRA. The Court did not directly strike down Section 5, which contains the preclearance requirements, but without Section 4, no jurisdiction will be subject to Section 5 preclearance unless Congress enacts a new coverage formula.

Comments

Author's Statement. The house is on fire. The systems that were erected to protect minority representation after the unconscionable actions of a nation that violently subjugated its Black citizens, are now again being used as an apparatus of oppression, repression and suppression. The Constitution is not self-executing. A brief journey into the electoral history of much of the nation shows that violence and terror have gone hand in hand with regulatory and legislative restrictions to crush the dreams and steal the future of Black communities by ensuring their voices were ignored and their votes did not count.

If our voice is our power, and voting is the primary expression of that power, the protections of access to the ballot box are the foundations on which we secure a just and fair democratic society.

We have seen these hurdles before—poll taxes, literacy tests, and moral character exams—all facially race-neutral, but all with the clear intent and effect of

suppressing the Black vote. Injustice anywhere is a threat to justice everywhere: California must not be silent. We are more than three-fifths of a human. We are not going back.

Related/prior legislation

SB 1164 (Cervantes) of 2026, among other provisions, repeals and replaces the California Voting Rights Act of 2001 with a state voting rights act that seeks to protect voters from voter suppression and vote dilution. The bill also creates a procedure for preclearance based off of the federal VRA.
