OPPOSITION: (Verified 8/26/22)

None received

ARGUMENTS IN SUPPORT: According to the sponsors, "Existing law requires school and community college employers to correctly report collectively bargained pension-eligible compensation to CalSTRS. Unfortunately, clear and accurate guidance on what is and is not creditable has not been provided, causing incorrect information to be reported to CalSTRS. When this happens, it is typically found during an audit that may take place years after this took place and ultimately results in the former employee who is retired being forced to pay back the overpaid amount and suffer a permanent reduction in future retirement payments. This places retirees in a precarious fiscal situation as they met with a CalSTRS counselor to verify all information was correct prior to retirement, and subsequently made permanent retirement decisions based upon this information.

"These errors may not only be quire costly for the retiree, through no fault of their own, but the errors can be costly both fiscally and administratively to school and community college districts. By minimizing future errors by ensuring more accurate and transparent information is available, we believe overall savings may be achieved at the district level, which will also save retirees from bearing a fiscal cost for mistakes they did not make."

SUBJECT: Vehicles: parking violations

SOURCE: Author

DIGEST: This bill requires processing agencies to forgive at least $1,500 in parking tickets for individuals who are verified to be homeless.

Senate Floor Amendments of 8/25/22*:*

1) Replace the requirement that processing agencies report information on the amount of their forgiveness to the California Interagency Council on Homelessness (CICH) with the lesser requirement that the agencies simply collect that information.

2) Authorize the CICH to request forgiveness information from processing agencies.

3) Exempt from the Administrative Procedures Act any revision the CICH makes to its rules to implement these provisions.

ANALYSIS:

Existing law:

1) Provides several options to processing agencies collecting unpaid parking penalties for tickets, including filing an itemization of unpaid parking penalties and service fees with Department of Motor Vehicles (DMV) for collection with the registration of a vehicle, so long as the processing agency:

   a) Provides a payment plan option for indigent persons, as defined, that allows unpaid parking fines and fees to be paid off in monthly installments of no more than $25 for total amounts due that are $500 or less, in a period within 24 months. No prepayment penalty for paying off the balance prior to the payment period may be accessed;

   b) Waives all late fees and penalty assessments, exclusive of any state surcharges, as defined, if an indigent person enrolls in the payment plan. Waived late fees and penalty assessments may be reinstated if the person falls out of compliance with the payment plan;

   c) Limits the processing fee to participate in a payment plan to $5 or less for indigent persons and $25 or less for all other persons. The processing fee may be added to the payment plan amount at the discretion of the payee; and,

   d) Allows the application for indigency determination for a period of 120 calendar days from the issuance of a notice of parking violation, or 10 days after the administrative hearing determination, whichever is later.

2) Requires a processing agency to allow a registered owner or lessee who falls out of compliance with a payment plan a one-time extension of 45 calendar days from the date the plan becomes delinquent to resume payments before the processing agency files an itemization of unpaid parking penalties and service fees with DMV.

3) Requires a processing agency to include information regarding its payment plan option above on its public website, and a web page link and telephone number to more information on the program.

4) Defines "indigent" for the purposes of this section to mean anyone who meets the income requirements for or is currently on several public assistance programs, including: Supplemental Security Income (SSI), Supplemental Nutrition Assistance Program (SNAP, or more commonly known as food stamps), Medi-Cal or IHSS.

5) Establishes the California Interagency Council on Homelessness (CICH) with the purpose of coordinating the state's response to homelessness by utilizing Housing First Practices.

This bill:

1) Provides that for unpaid parking penalties issued on and after July 1, 2023, the processing agency may not request that vehicle registration be withheld unless all of the following conditions are met by the agency:

   a) The agency has created a parking forgiveness program for the homeless.

   b) An applicant who is verified to be homeless shall have any outstanding parking fines and fees forgiven no less than 30 days after their application is received by the processing agency. The agency may limit the forgiveness to $1,500 per calendar year and limit the number applications to four times a year.

   c) Authorizes a processing agency to verify an applicant's status through a continuum of care or a homeless services provider, including, but not limited to, a health care provider, legal services provider, or other entity that services people experiencing homelessness and makes referrals to other homeless services providers, that is connected to the coordinated entry system and is contracting with a continuum of care. A legal services provider or health care provider may require an applicant to be a client in order to make the verification.

   d) Provides that an area in which the availability of homeless services providers is limited, as determined by the continuum of care in the form and manner prescribed by CICH, the CICH shall develop an alternative low-barrier process to determine an applicant's status as homeless.

e) Requires processing agencies to inform parking ticket recipients of this forgiveness program, as specified.

f) The agency shall, by no later than March 1, 2024, collect and have readily available information on the number of applications received and the amount of fines and penalties waived. The California Interagency Council may request copies of this information.

2) Authorizes CICH to develop necessary regulations and exempts those regulations from the Administrative Procedures Act.

Comments

1) *Purpose*. According to the author, "parking enforcement can exacerbate poverty and the cost of enforcement for local governments are often greater than the fines and fees that end up being collected. AB 1685 will waive many parking fees for people who are unhoused. Instead of continuing to penalize poverty, let's save some money with good policy and use it to get people more of the housing and services they really need. Lose your financial stability, lose your house. Lose your house, live in your car. Lose your car, set up an encampment. This cycle of poverty is vicious and AB 1685 creates the policy solution that allows us to do better."

2) *The real cost of a parking ticket for an individual experiencing homelessness.* In Sacramento, the fine for a parking ticket is $52. If the individual is unable to pay that ticket on time, the late fee adds an additional $52. If the city then requires the DMV to collect the unpaid debt, DMV would add the entire cost of the outstanding parking ticket and fines to vehicle registration fees. If unable to pay this amount all at once on top of their vehicle registration fees, late fees for vehicle registration increase by 60% of the original fee for payments over 30 days late, which can increase the registration fee as much as $100. If a person is then pulled over for having an unregistered vehicle, the fine for driving unregistered vehicles is currently $285. All totaled, these fines add up to $489.

   Many individuals experiencing homelessness live in their vehicles. Cal Matters estimates that there is roughly 161,000 people experiencing homelessness in California based on the latest tally taken in 2020 before COVID-19. Similarly, Cal Matters estimates that 16,528 of the 161,000 people experiencing homelessness own and live in their vehicle. Parking tickets accumulate quickly and create a cycle of debt wherein they are unable to pay back parking fines. As the tickets pile up, costs rise to include late fees, making it more likely that the individual's car will be towed. Having five or more unpaid parking tickets

allows law enforcement to tow someone's car, essentially towing away the individual's home, and potentially their only place of safety.

3) *Towing costs*. *Towed into Debt: How Towing Practices in California Punish Poor People,* a report issued by the sponsors of this bill, notes that the average tow fee in California is $189, with a $53 storage fee per day and a $150 administrative fee. After three days of storage, a towing fee could come out to $499. The cost of five unpaid parking tickets in Sacramento would result in a total cost of $520 with late fees. The cost of a three day tow plus the costs of the five unpaid parking tickets ($1,019) would amount to all but $400 of an indigent person's monthly income if they made the maximum amount to make them eligible for Medi-Cal.

   The Legislature has addressed the impact of parking fines on the homeless. In 2017 the Legislature passed and the Governor signed AB 503 (Lackey: Chapter 741) to reduce parking penalties for indigent individuals by requiring the offering of a payment plan and the waiver of penalties. Subsequent legislation has been enacted to close loopholes in the original legislation and to increase the cap on the amount that can be subject to a payment plan.

   This bill builds on existing law by requiring that processing agencies waive unpaid parking ticket balances of up to $1,500 waived for individuals verified as experiencing homelessness. Supporters expect that this will reduce the likelihood of their vehicle being towed and further exacerbating their indigence.

4) *Where do the expenses go*? Waiving fees does not mean that the costs simply go away. Upon issuance of parking tickets, towing and storage of the vehicle may be appropriate and this is often done by a private company. If the owner of the vehicle does not pay these fees, will the city be required to pay them, and if that is the case will the city be less likely to tow a vehicle that could be presenting a safety hazard? This bill does not specify how these additional expenses will be handled.

5) *Opposition*. The California Mobility and Parking Association (CMPA) writes in opposition to this bill citing their concerns for the scope of the fine forgiveness and concerns that the measure does not restrict the $1,500 amount to a single agency. Other opposition includes cities that want the state to backfill any lost revenue or want to use their existing parking forgiveness program in lieu of the program established by this bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The California Interagency Council on Homelessness (Cal-ICH) estimates costs of approximately $645,000 in the first year and $613,000 annually ongoing for 4.0 PY of staff to develop a process to determine homeless eligibility status, solicit, compile, and collect information from processing agencies, and establish and administer a database to collect and store information. (General Fund)

- Unknown, potentially significant state costs for state parking entities (primarily state institutions of higher education) to establish parking citation forgiveness programs, determine applicants' status as homeless, post information on websites, and report specified information to Cal-ICH. (General Fund, State University Parking Revenue Fund)

- Unknown, significant reduction in state parking citation revenue (for citations issued by state parking entities) related to the mandatory forgiveness of at least $1,500 in parking debt per eligible applicant each year. Staff notes that homeless persons are likely to opt for this forgiveness program rather than entering into a payment plan, as specified in existing law. (State University Parking Revenue Fund, other funds administered by institutions of higher education)

- Unknown significant local costs and revenue losses related to the requirements that processing agencies establish parking citation forgiveness programs for individuals experiencing homelessness, waive fines and fees, provide information on websites, and report specified information to Cal-ICH. It is unclear whether these costs would be reimbursable by the state because local entities appear to have fee authority that disclaims state responsibility for reimbursement. Ultimately, however, whether local costs are reimbursable would be subject to a determination by the Commission on State Mandates, to the extent an eligible local agency files a test claim. (General Fund)

SUBJECT: Education finance: Classified School and Community College Employee Summer Assistance Programs

SOURCE: California School Employees Association
California State Council of Service Employees International Union

DIGEST: This bill adds clarifying language to the existing Classified School Employee Summer Assistance Program (CSESAP) and to the new Classified Community College Employee Summer Assistance Program (CCCESAP) as established recently by AB 183[1].

ANALYSIS:

Existing law:

1) Establishes the Classified School Employee Summer Assistance Program (CSESAP) to provide a participating K-12 classified school employee one

[1] AB 183 (Committee on the Budget), Chapter 54, Statutes of 2022, the Higher Education Budget Trailer Bill, as included in Section 37.

dollar for each one dollar that the classified employee elects to have withheld from the employee's monthly paychecks. (Education Code § 45500 (a) - (b)).

2) Authorizes a K-12 Local Educational Agency (LEA) to elect to participate in the program; requires the LEA to notify classified employees of its participation, as specified; and prohibits the LEA from reversing its decision for the next school year beginning after the end of the fiscal year in which the state appropriates moneys for the program's purpose. (ED § 45500 (c))

3) Requires an eligible employee to notify the LEA in writing of the employee's decision to participate by March 1 during the fiscal year in which the state appropriates moneys for the program; to specify the amount the employer should withhold from the employee's monthly paycheck, up to 10 percent; and choose between receiving the withheld payments and the program match in one or two payments during the summer recess. (ED § 45500 (d) (1))

4) Establishes that an employee is eligible to participate if the LEA has employed the employee for at least one year or the LEA has employed the employee in the employee's regular assignment for 11 months or fewer out of a 12-month period, excluding any hours the employee worked outside of the employee's regular assignment. (ED § 45500 (d) (2)-(3))

5) Requires the LEA to exclude, for the 2020-21, 2021-22, 2022-23, 2023-24, and 2024-25 school years, any hours the employee worked due to an extension of the academic year directly related to the COVID-19 pandemic when determining the employee's eligibility, as specified. ((ED § 45500 (d) (3))

6) Prohibits a classified employee from participating in the program if the employee's regular annual pay received directly from the LEA is more than $62,400 for an entire school year at the time of enrollment, excluding any pay received by the employee during the previous summer recess period. (ED § 45500 (d) (4))

7) Requires an LEA that elects to participate in the program to notify the California State Department of Education (CDE) in writing, by April 1 during a fiscal year in which the state appropriates moneys for the program of its election. The notice shall specify the number of employees participating in the program and the total estimated amount the LEA will withhold from participating employees' paychecks for the applicable school year. (ED § 45500 (e))

8) Requires CDE to notify participating LEAs in writing, by May 1 during the fiscal year in which the state appropriates moneys for the program, of the estimated state matching fund amount that a participating employee can expect to receive, or the prorated amount if state funding is insufficient to provide the dollar-to-dollar match. (ED § 45500 (f))

9) Requires an LEA to notify its participating employees by June 1 of the estimated state match funds that they may receive from the program and provides the employees the option of withdrawing from the program or reducing their withholding amount no later than 30 days after the applicable school year's start of school instruction. (ED § 45500 (g))

10) Specifies other elements of the program that allow employees to withdraw for economic or personal hardship or separation from employment, as well as administrative procedures for CDE and LEAs to apportion and pay out the program funding. (ED § 45500 (h) – (n))

11) Excludes the matching funds from compensation for purposes of retirement benefits in the California Public Employees' Retirement System or the California State Teachers' Retirement System. (ED § 45500 (o))

12) Makes the program's operation contingent upon an appropriation through the annual Budget Act or another statute for the 2020-21 fiscal year and each fiscal year thereafter. (ED § 45500 (p))

13) Defines the following terms:

    a) "Summer recess period" to mean the period that regular class sessions are not being held by the LEA during the months of June, July, and August. Due to this definition, the LEA must include, in determining the employee's eligibility, pay earned by the employee for other work assignments during those months that are not for the summer session. (ED § 45500 (d) (4) (b))

    b) "Local education agency" to mean a school district or county office of education. (ED § 45500 (q) (1))

    c) "Program" to mean the Classified School Employee Summer Assistance Program. (ED § 45500 (q) (2))

    d) "Regular Assignment" to mean a classified employee's employment during the academic school year, excluding the summer recess period. (ED § 45500 (q) (3))

14) Creates a parallel program for community college classified employees. (ED § 88280)

This bill adds clarifying language to CSESAP and CCCESAP as follows:

1) Defines "month" to mean 20 days or 4 weeks of 5 days each, including legal holidays. This language was not included in AB 183.

2) Adds clarifying language that for the 2023-24 fiscal year and each fiscal year thereafter, like the CSESAP, the CCCESAP program's operation shall be contingent upon an appropriation in the annual Budget Act or another statute.

3) Adds conforming language passed in AB 183 which extended the exclusion of hours worked by the result of an extension of the academic school year directly related to the COVID-19 pandemic for the 2023-24 and 2024-25 school years.

4) Adds conforming language from AB 183 that clarifies the Department of Education may use any *unexpended balance* of moneys appropriated in any *prior* fiscal year for the programs.

Background

Earlier versions of this bill expanded the Summer Assistance Program to classified community college employees by establishing the CCCESAP as a new program. The bill also made minor changes to CSESAP. AB 183, which was chaptered on June 30, 2022, included the language establishing CCCESAP. Thus, this bill (AB 1691) now makes only minor, clarifying changes to existing law.

Related/Prior Legislation

AB 183 (Committee on Budget, Chapter 54, Statutes of 2022) was a Higher Education budget trailer bill that included provisions to establish CCCESAP. (Sec. 37.)

SB 75 (Committee on Budget and Fiscal Review, Chapter 51, Statutes of 2019) was a budget trailer bill that made changes to the Education Code to implement the 2019-20 Budget Act. The bill included an appropriation for $36 million in one-time Proposition 98 funding for the CSESAP, created in the 2018-19 budget. The bill also made changes to the program to allow the funds to be available over three years, to increase the minimum salary requirements, and to make other minor and technical changes. (Sec. 27.)

AB 114 (Committee on Budget, Chapter 413, Statutes of 2019) was a budget clean-up trailer bill that made changes to the Education Code to implement the 2019-20 Budget Act. The bill included provisions that amended the School Employees Summer Assistance program to ensure eligible employees were able to participate, including those who worked during previous summer breaks but not within the period for which they applied for the program. Other technical amendments were included to clarify implementation of the program. (Sec. 5.)

AB 1808 (Committee on Budget, Chapter 32, Statutes of 2018) was a budget trailer bill that included $50 million in one-time Proposition 98 funding for the Classified School Employee Summer Assistance Program. (Sec. 133)

AB 1840 (Committee on Budget, Chapter 426, Statutes of 2018) was a budget trailer clean-up bill that included provisions that made clarifying changes to the Classified School Employee Summer Assistance Program. (Sec. 37.)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The California Community College Chancellor's Office indicates that it would incur one-time administrative costs of $55,000, and $11,000 annually thereafter, to implement the provisions of the bill (General Fund).

SUPPORT: (Verified 8/13/22)

California School Employees Association (co-source)
California State Council of Service Employees International Union (co-source)
American Federation of State, County and Municipal Employees, AFL-CIO
California Federation of Teachers AFL-CIO
California Labor Federation, AFL-CIO

OPPOSITION: (Verified 8/13/22)

None received

ARGUMENTS IN SUPPORT: According to the California School Employees Association:

"In 2018, legislators created the Classified School Employee Summer Assistance Program. This program allows eligible, low-wage classified school employees who work for TK-12 school districts to set aside a small portion of their paychecks during the school year to receive up to a dollar-for-dollar match from the state

during the summer when work is not available. School districts must elect to participate in CSESAP.

"CSESAP has helped ease the financial burden for many classified employees, however, many employees still cannot access the program. Under current law, classified employees who work at community colleges are not eligible to participate in CSESAP. This bill would include community college classified employees and create parity between all classified employees in the state."

According to SEIU California, "This bill makes meaningful investments to a workforce that is often overlooked and left behind. Stabilizing the program and expanding it to community college classified workers provide much needed support and greatly enhance workforce retention."

SUBJECT: Affordable housing loan and grant programs: adaptive reuse

SOURCE: AIDS Healthcare Foundation

DIGEST: This bill requires the Department of Housing and Community Development (HCD) to allow for adaptive reuse as an eligible activity for any notice of funding availability (NOFA) for an affordable multifamily housing loan.

Senate Floor Amendments of 8/24/22 add that any affordable housing loan program that allows for homeownership will also include adaptive reuse as an eligible activity. The amendments also state that the definition of "adaptive reuse" stated in this bill applies only to programs that have not already defined it.

ANALYSIS: Existing law establishes the Multifamily Housing Program (MHP) to assist in the new construction, rehabilitation, and preservation of permanent and transitional rental housing for persons with incomes of up to 60% of the area median income (AMI).

This bill:

1) Requires any NOFA issued by HCD for an affordable multifamily housing loan to allow for adaptive reuse as an eligible activity.

2) Defines "adaptive reuse" as the retrofitting and repurposing of an existing building to create new residential units.

Background

California Housing Crisis. The lack of supply for households at all income levels is the primary factor underlying California's housing crunch. The state Department of Housing and Community Development (HCD) estimates that California needs to build 180,000 new homes a year to keep up with population growth. More recently, HCD noted in its statewide housing plan that California must plan for more than 2.5 million homes over the next eight-year cycle, and no less than one million of those homes must meet the needs of lower-income households. This represents more than double the housing planned for in the last eight-year cycle.

The median home price in California is $771,270 in 2022 which is double the nationwide median. It is second to Hawaii, and Washington is third with a median price of $592,400. In terms of rental markets, California has all ten of the top ten most unaffordable counties for a two-bedroom apartment and holds eight of the top ten most unaffordable metropolitan areas. In addition, almost three million enter households, almost half of rental households in California, are low-income (50-80% AMI), very low income (30-50% AMI), or extremely low income (0-30% AMI). As a result, many Californians are rent burdened (spend more than 30% of their income on rent): almost 90% of extremely low-income, 85% of very low-income, and 63% of low-income households.

This bill allows adaptive reuse projects to obtain funding for development, which would create more housing.

Comments

1) *Author's Statement.* According to the author, "It is California's responsibility to address the current affordable housing crisis as it will only continue to grow if it does not make adaptive reuse a substantial part of its housing development mosaic. It is vital that adaptive reuse become a well-regarded and frequently used tool in our ongoing loan and grant housing programs administered by HCD. To help California build desperately-needed affordable housing in a more efficient and cost-effective manner, AB 1695 would require that any notice of funding availability issued by HCD for an affordable multifamily housing loan

and grant program state that adaptive reuse of a property for affordable housing purposes is an eligible activity."

2) *Multifamily Housing Program*. MHP is the state's flagship rental housing program to fund construction of deed-restricted, affordable rental housing for households at or below 60% of AMI. The program provides higher loan amounts for units that are for extremely low income households (those at or below 30% AMI). MHP has $275 million of available funding in this year's funding. In its NOFA, adaptive reuse projects are awarded scoring criteria points. These points are used to grade projects in which higher scores being more likely to receive funding. In this way, MHP incentives adaptive reuse projects.

3) *Similar Trailer Bill.* The Department of Finance proposed a trailer bill that authorizes HCD to provide grants for adaptive reuse projects. The definition in the trailer bill for adaptive reuse is the process of adapting and rehabilitating unutilized or underutilized buildings to other purposes and can serve as a valuable tool to increase the supply of housing. This is slightly different than the definition provided in this bill: the retrofitting and repurposing of an existing building to create new residential units.

SUBJECT: Theft: online marketplaces: reporting

SOURCE: Author

DIGEST: This bill requires the Attorney General's website to contain a feature for the reporting of suspected stolen goods for sale on online marketplaces.

ANALYSIS:

Existing law:

1) Requires, until January 1, 2026, the Department of the California Highway Patrol (CHP) to coordinate with the Department of Justice (DOJ) to convene a regional property crimes task force to identify geographic areas experiencing increased levels of property crimes and assist local law enforcement with resources, such as personnel and equipment. (Pen. Code, § 13899.)

2) States that the task force, until January 1, 2026, shall provide local law enforcement in the identified region with logistical support and other law enforcement resources, including, but not limited to, personnel and equipment,

as determined to be appropriate by the Commissioner of CHP in consultation with task force members. (Pen. Code, § 13899.)

3) Creates, until January 1, 2026, the crime of organized retail theft which is defined as:

   a) Acting in concert with one or more persons to steal merchandise from one or more merchant's premises or online marketplace with the intent to sell, exchange, or return the merchandise for value;

   b) Acting in concert with two or more persons to receive, purchase, or possess merchandise knowing or believing it to have been stolen;

   c) Acting as the agent of another individual or group of individuals to steal merchandise from one or more merchant's premises or online marketplaces as part of a plan to commit theft; or,

   d) Recruiting, coordinating, organizing, supervising, directing, managing, or financing another to undertake acts of theft. (Pen. Code, § 490.4, subd. (a).)

4) Requires a marketplace, as defined, to ensure that its terms and conditions regarding commercial relationships with marketplace sellers meet certain criteria, including that they are drafted in plain and intelligible language. (Civ. Code, § 1749.7.)

This bill:

1) Requires the Attorney General to establish an online marketplace suspected stolen goods reporting location on their website so people can report items found online that they suspect have been stolen.

2) Defines "online marketplace" as any electronically based or accessed platform that may be accessed on an internet website or through an application, and that does both of the following:

   a) Includes features that allow for, facilitate, or enable third-party sellers to engage in the sale, purchase, payment, storage, shipping, or delivery of a consumer product in the state; and,

   b) Hosts one or more third-party sellers.

3) Defines "third-party seller" to mean any individual or business entity, independent of an operator, facilitator, or owner of an online marketplace, who

sells, offers to sell, or contracts to sell a product in the state through an online marketplace.

4) Defines "regional property crimes task force" to mean the CHP regional property crimes task force which was established to identify geographic areas experiencing increased levels of property crimes and assist local law enforcement with resources.

5) Requires, by January 1, 2023, the Attorney General to establish an online marketplace suspected stolen goods reporting location on its internet website for individuals to report items found on online marketplaces that they suspect are stolen goods.

6) Requires the Attorney General to provide information reported about suspected stolen goods to the applicable local law enforcement agencies and regional property crimes task force.

7) Requires, beginning February 1, 2023, an online marketplace to display on its electronically based or accessed platform a link to the online marketplace suspected stolen goods reporting location on the Attorney General's internet website.

8) States that the display shall be clearly, conspicuously, and reasonably designed to be seen by all users of the platform.

Comments

According to the author of this bill:

> Package and retail theft is on the rise. We must be creative in our solutions to combat this problem. Thieves are seizing the opportunity to resell stolen goods on loosely regulated online marketplaces. Enabling users of these platforms to easily report items they suspect of being stolen will aid law enforcement in combatting package and retail theft and provide a disincentive for thieves to sell stolen goods on these platforms.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the DOJ reports costs of up to $451,000 in fiscal year (FY) 2022-23 and $584,000 annually thereafter in increased staff and information technology infrastructure (General Fund).

SUPPORT: (Verified 8/11/22)

Los Angeles County District Attorney's Office
Prosecutors Alliance of California
UPS

OPPOSITION: (Verified 8/11/22)

Chamber of Progress
TechNet

ARGUMENTS IN SUPPORT: According to the Prosecutors Alliance of California:

> As prosecutors, we believe it is imperative to address the drivers of organized retail theft, including the ease with which stolen goods may be anonymously sold through online marketplaces. Through online accounts with little associated personal information that is rarely verified, stolen goods can be sold to unsuspecting consumers. It is estimated that more than $500 billion in stolen items are sold through online marketplaces worldwide, annually.
>
> AB 1700 will help address this problem by providing an accessible platform for the public to report suspected stolen goods that are offered for sale through an online marketplace. This information will facilitate effective law enforcement investigation of stolen goods.

ARGUMENTS IN OPPOSITION: According to TechNet:

> AB 1700 is duplicative as most online marketplaces already provide robust reporting mechanisms for fraud and suspected stolen goods. Our marketplace companies also partner with the Attorney General and local law enforcement agencies to report crimes and suspicious activity on their platforms. By compiling reports from their own reporting mechanisms, companies can efficiently take action, compile pertinent information, and refer it to the proper law enforcement authorities. AB 1700 would require online marketplaces to post a link to a separate reporting mechanism that would undercut those efforts by redirecting user reports and possibly duplicating that information, without any guarantee the appropriate follow-up for the report will be conducted.

SUBJECT: Limited podiatric radiography permits

SOURCE: California Podiatric Medical Association

DIGEST: This bill requires the California Department of Public Health (CDPH) to approve a course in radiation safety and radiologic technology specific to the operation of podiatric x-ray equipment, and permits CDPH to issue a limited permit in podiatric radiography if the person has completed an approved course.

Senate Floor Amendments of 8/22/22 delete the requirement that the course be jointly approved by CDPH and the Podiatric Medical Board, require the course to be provided by a licensed doctor of podiatric medicine who holds a valid radiography supervisor permit, reduce the minimum hours of education from 120 to 60 hours and add additional specific curriculum, limit the application of this bill to a podiatric office as defined, and exempts the initial regulations from the

Administrative Procedures Act while still providing an opportunity for public comment.

ANALYSIS:

Existing law:

1) Establishes the Radiological Technology Act, administered by Radiologic Health Branch (RHB) of CDPH, to establish standards of education, training, and experience for persons who use x-rays on human beings and to prescribe means for assuring that these standards are met. [HSC §114840, et seq.]

2) Prohibits any person from administering or using a diagnostic or therapeutic x-ray on human beings unless that person has been certified or granted a permit by the RHB, as specified. [HSC §106965]

3) Establishes the Radiologic Technology Certification Committee (RTCC) to assist, advise, and make recommendations to the RHB for the establishment of regulations necessary to ensure the proper administration and enforcement of the Radiologic Technology Act, composed of six physicians (three of whom must be certified by the American Board of Radiology), two persons with at least five years' experience in the practice of radiologic technology, on radiological physicist, one podiatrist, and one chiropractor. [HSDC §114860]

4) Requires CDPH to provide for the certification of radiologic technologists, with separate certificates for diagnostic radiologic technology, for mammographic radiologic technology, and for therapeutic radiologic technology. [HSC §114870(b)]

5) Permits CDPH, as it deems appropriate, to grant limited permits to persons to conduct radiologic technology limited to the performance of certain procedures or the application of x-rays to specific areas of the human body, and to prescribe minimum standards of training and experience for those persons, and prescribe procedures for examining applicants for limited permits. Requires the minimum standards to include a requirement that persons granted limited permits to meet those fundamental requirements in basic radiological health training and knowledge similar to those required for persons certified as full-scope radiologic technologists in 3) above, as CDPH determines are reasonably necessary for the protection of the health and safety of the public. [HSC §114870(c)]

6) Provides for the certification of licentiates of the healing arts as a "radiology supervisor and operator," which authorizes the holder of this certification, with

the limitation of the holder's California healing arts license, to actuate or energize x-ray equipment, and to supervise the use of registered x-ray equipment by a certified radiologic technologist, a limited x-ray radiologic technologists, or students in an approved school when the student is operating x-ray equipment. [17 CCR §30460]

7) Establishes the Podiatric Medical Board of California (PMB) to license and regulate doctors of podiatric medicine. Defines "podiatric medicine" as the diagnosis, medical, surgical, mechanical, manipulative, and electrical treatment of the human foot, including the ankle and tendons that insert into the foot, and the nonsurgical treatment of the muscles and tendons of the leg governing the functions of the foot. [BPC §2460, et seq., §2472]

8) Establishes an extensive scope of practice for certified radiologic technologists, along with a minimum of 1,850 hours of clinical training for approved diagnostic radiologic technology schools. [17 CCR §30441, §30421]

9) Establishes a scope of practice for limited permit x-ray technicians as follows:

   a) Chest radiography permit: radiography of the heart and lungs;

   b) Dental laboratory radiography permit: radiography of the intra-oral cavity, skull, and hand and wrist, for dental purposes;

   c) Extremities radiography permit: radiography of the upper extremities, including shoulder girdle, and lower extremities, excluding pelvis;

   d) Leg-podiatric radiography permit: radiography of the knee, tibia and fibula, and ankle and foot;

   e) Skull radiography permit: radiography of the bone and soft tissues of the skull and upper neck;

   f) Torso-skeletal radiography permit: radiography of the shoulder girdle, rib cage and sternum, vertebral column, pelvis and hip joints; and,

   g) DEXA permit: radiography of the total skeleton or body or part thereof, using DEXA. [22 CCR §30443]

10) Prohibits persons with a limited permit, as described above, from operating fluoroscopy equipment during exposure of a patient to x-rays, operating portable or mobile x-ray equipment, performing procedures involving computerized tomography, performing mammography procedures, performing

vascular procedures, or performing procedures involving digital photography. However, limited permit holders may obtain authorization to perform digital radiography with additional training, as specified. [22 CCR §30447]

11) Establishes requirements for schools that teach limited x-ray technician categories, including requiring the programs to be a minimum of six months, including a minimum of 190 hours of general education in radiologic technology and safety, additional hours of specific instruction in anatomy and positioning depending on category (for leg-podiatric, it is five hours of anatomy and five hours of positioning), 38 hours in various types of laboratory training, plus the performance of supervised procedures (for leg-podiatric, it is 50 supervised procedures). [17 CCR §30424]

This bill:

1) Permits CDPH to issue a limited permit in podiatric radiography, authorizing radiography of only the foot, ankle, tibia, and fibula, if the person has completed a course in radiation safety and radiologic technology, approved by CDPH, that is provided by a licensed doctor of podiatric medicine who holds a valid radiography supervisor permit. Permits the course to be online, and requires a minimum of 60 hours of education that includes instruction in radiation protection and safety, principles of radiographic exposure, anatomy and physiology, digital radiography, positioning, and the performance of at least 50 x-ray procedures under supervision.

2) Prohibits the training period from exceeding one year for any one student, and prohibits more than one student per licensed doctor of podiatric medicine who holds a valid radiography supervisor and operator permit.

3) Requires applicants for a limited permit in podiatric radiography to satisfy the eligibility requirements defined in specified regulations, including passing CDPH-approved examinations in radiation protection and safety, and podiatric radiologic technology.

4) Requires an applicant for providing the podiatric radiologic technology course to submit an application, including any required application fees, for approval by CDPH.

5) Specifies that a permit in podiatric radiography only authorizes the holder to operate podiatric x-ray equipment in a podiatric office while under the supervision of a certified supervisor and operator who is a licensed doctor of podiatric medicine. Limits the definition of “podiatric office” to only include

the physical location of the podiatrist's place of private practice or part of a podiatric medical group, and does not include an office of a medical group that includes a podiatrist or an office within a hospital.

6) Specifies that this bill does not increase the scope of practice of a doctor of podiatric medicine or authorize the holder of the permit to perform x-rays beyond the foot, ankle, tibia, and fibula.

7) Requires CDPH to adopt initial regulations implementing this bill by July 1, 2023. Exempts the regulations from the rulemaking provisions of the Administrative Procedures Act, except requires CDPH to post the proposed regulations on its internet website for public comment for 30 days for consideration by CDPH.

Comments

1) *Author's statement.* According to the author, this bill will create an alternate pathway for trained podiatric medical assistants to take a comprehensive course /exam, approved by CDPH, to perform x-rays on specialized podiatric x-ray equipment with built in safety features, specific to the foot and ankle. This bill will enable our doctors to have more narrow, and specialized training for their desired fields.

2) *Issue this bill is addressing.* The only types of x-ray technicians authorized to perform x-rays of the foot in a doctor of podiatric medicine's office is a full-scope certified radiologic technician, or a limited permit x-ray technician in either the "extremities" category, or the "leg-podiatric" category. However, according to the RHB, there are currently no approved leg-podiatric training schools. Going through the list of approved "limited permit" x-ray technician schools on the RHB's website, each of the approved programs teaches a combined course in the categories of "chest," "extremities, and "torso-skeletal," with one approved school also adding "skull" to the other three categories. All of these programs are generally one-year long, with many more hours than the required minimum in regulations, as they are covering multiple permit categories, and often include a certificate in medical assisting. According to the author and sponsor, if a person chooses to obtain one of these more extensive limited permits, such as in the extremity category, their qualifications will far exceed what is necessary to work in a podiatric office, which is limited to the foot and ankle. Therefore, they will end up choosing to work for a full-scope health care facility that allows them to x-ray more than just the foot and ankle.

The author and sponsor state that this has left a dire shortage of individuals available to assist in performing x-rays in podiatric offices, which means x-rays are often not being performed in these offices and patients have to be referred to outside centers, or other inferior modalities are employed. Given the relatively small number of x-rays, podiatric offices don't need full time certified radiologic technicians, but someone like a medical assistant who is trained and qualified to assist in radiography and can also perform other tasks as necessary.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- CDPH estimates costs between $275,500 to $425,000 (General Fund) to promulgate regulations regarding the requirements of the new permit and to configure the existing licensing database to accept a new permit type.
- PMB indicates no fiscal impact.

SUPPORT: (Verified 8/22/22)

California Podiatric Medical Association (source)
Podiatric Medical Board of California

OPPOSITION: (Verified 8/22/22)

California Society of Radiological Technologists

ARGUMENTS IN SUPPORT: This bill is sponsored by the California Podiatric Medical Association (CPMA), which states that the practice of modern podiatric medicine commonly involves the use of plain x-rays, which very frequently requires an immediate read of these images. CPMA states that approximately 20% of patients require an x-ray in a day. Many common pathologies, including trauma, infection, pre- and post-surgical, all require an immediate x-ray reading to determine proper treatment. CPMA states that due to the reality of time management in a typical podiatric practice, it is difficult or impossible for podiatrists to take their own x-rays, and seek assistance from individuals to perform the in-office x-ray, similar to a dental assistant performing dental x-rays. Additionally, CPMA states that the x-ray equipment used in a podiatrist's office, like a dental x-ray, are "low dose" x-ray tubes, mounted on standing platforms, providing the podiatrist with weight bearing images. Apart from fractures, nearly all other aspects of podiatric evaluation rely on weight bearing images, and it is not

appropriate to use full size table unites (which are common in most other imaging centers) for the vast majority of podiatric care. To accommodate this practice, a podiatric-specific limited x-ray permit category, known as “leg-podiatric,” was made available, allowing podiatric medical assistance to become certified. Unfortunately, this existing process has become untenable, as there are currently no schools in California offering courses specific to leg-podiatry. To alleviate the existing barriers to education and to accommodate the specialized podiatric setting, this bill creates a practical pathway for individuals to take a comprehensive course, jointly certified by the RHM and the PMB, that will provide them with the skills and training necessary to take the appropriate exam, receive a permit, and safely perform x-rays with specialized podiatric x-ray equipment specific to the foot and ankle. The PMB also supports this bill, stating that it will allow their licensees to improve the podiatric medical care provided to patients in California.

ARGUMENTS IN OPPOSITION: The California Society of Radiologic Technologists (CSRT) submitted a letter of opposition to the previous version of this bill that would have granted the BPM the ability to issue a permit in leg podiatric radiography. While that has since been amended to instead require the permit to be issued by CDPH, CSRT continues to have concerns, including ensuring the education is provided by an accredited school, that lab training be provided by a licensed physician or a radiologic technician/technologist, and that the exam be provided by CDPH.

SUBJECT: Vehicles: required stops: bicycles

SOURCE: Author

DIGEST: This bill permits a person, 18 years of age or older, to treat stop signs as yield signs when riding a bicycle under certain conditions.

ANALYSIS:

Existing law:

1) Provides that a bicyclist has all the rights and is subject to all laws applicable to drivers of motor vehicles, including stopping at stop lights and stop signs.

2) Requires a driver of a vehicle to stop at the marked limit line for a red light or a stop sign, and allows a driver to proceed with a right hand turn or left hand turn from a one-way street onto a one-way street after stopping, if no vehicles or pedestrians have approached or are approaching the intersection.

3) Requires a driver of a vehicle to obey all official signs and signals, as defined.

4) Requires all pedestrians to obey all official signs and signals, as defined.

5) Requires a vehicle approaching a "yield right-of-way" sign to yield the right-of-way to any vehicles which have entered the intersection, which have entered the intersection, or which are approaching the intersection, and to continue to yield the right-of-way until they can proceed with reasonable safety.

This bill:

1) Requires a person who is 18 years of age or older riding a bicycle upon a two-lane highway when approaching a stop sign at the entrance of an intersection, with another roadway with two or fewer lanes, where stop signs are erected upon all approaches, to yield the right-of-way to any vehicles that have either stopped at or entered the intersection, or that are approaching on the intersecting highway close enough to constitute an immediate hazard, and to pedestrians, as specified, and continue to yield the right-of-way to those vehicles and pedestrians until reasonably safe to proceed.

2) Requires other vehicles to yield the right-of-way to a bicycle that, having yielded as prescribed, has entered the intersection.

3) Provides that the changes made by this bill shall not affect the liability of a driver of a motor vehicle as a result of the driver's negligent or wrongful act or omission in the operation of a motor vehicle.

4) Provides that a bicyclist under 18 that failed to stop at a stop sign shall receive a warning ticket for their first violation.

5) Requires California Highway Patrol (CHP) report to the Legislature on January 1, 2028, on the safety effects of this bill.

6) Repeals the provisions of this bill on January 1, 2029.

Comments

1) *Purpose*. According to the author, "we must do a better job in improving a cyclist's safety at stop signs. This pandemic has resulted in a significant increase of residents opting for bicycling whether for recreation, commuting to work, or getting their shopping done. As ridership continues to increase, it is imperative we make stops at intersections safer for bicyclists. Yielding is already law in California. AB 1713 uses this common understanding of a yield sign to allow bicyclists, 18 year of age or older, approaching an intersection with a stop sign to slow down, evaluate the traffic flow, and yield to any cars and pedestrians already at the intersection. If it is safe to do so, bicyclists can

then proceed through the intersection without making a complete stop. Rolling through a stop sign is illegal now and would continue to be illegal under AB 1713. Rolling through a stop sign is not yielding."

2) *The "Idaho stop*." In the state of Idaho, a bicyclist who approaches a stop sign is permitted to treat the stop sign as a yield sign, to treat a traffic signal as a stop sign when no other traffic is present, and to treat the traffic signal as a yield sign when making a right turn. Idaho codified this rule of the road back in 1982 and it has lived infamously as the "Idaho stop." Other states have followed Idaho's example and codified ideations of the "Idaho stop." In 2017, Delaware changed its laws to allow a bicyclist travelling on a one-lane or two-lane road to treat a stop sign as a yield sign, known colloquially as the "Delaware yield." More recently, Arkansas, Oregon and Washington have adopted rules similar to the "Idaho stop" or the "Delaware yield."

   After Idaho adopted the law, bicyclist injuries from traffic crashes declined by 14.5% the following year. In Delaware, traffic crashes involving bicyclists at stop sign intersections fell by 23% in the 30 months after the law's passage, compared to the previous 30 months.

   However, in California, existing law requires any vehicle, including a bicycle that approaches an intersection with a stop sign, to make a complete stop before entering the intersection. In California, bicyclists are required to abide by all vehicle rules of the road. AB 1713 attempts to increase bicyclist safety in intersections by allowing them to treat the stop sign as a yield sign, aligning the state with Idaho and Delaware.

3) *Take Two*. In 2021, AB 122 (Boerner Horvath), which was substantially similar to AB 1713, was vetoed by Governor Newsom. The veto message stated in part, "while I share the author's intent to increase bicyclist safety, I am concerned this bill will have the opposite effect. The approach in AB 122 may be especially concerning for children, who may not know how to judge vehicle speeds or exercise the necessary caution to yield to traffic when appropriate."

   To address concerns raised by the Governor, AB 1713 only authorizes cyclists over 18 to treat stop signs as a yield signs. Consequently, those under the age of 18 who treat a stop sign as a yield sign will potentially face a $238 ticket from law enforcement. Law enforcement will be required to distinguish the age of a cyclist when enforcing the law. Additionally, AB 1713 is narrower than AB 122 as a cyclist may only yield at a stop sign if they are on a two lane road approaching an intersection with stop signs at every intersection. Delaware's

law only applied to two lane roads, but applied at any stop sign regardless of whether there was a stop sign at every intersection.

4) *Bicyclist habits and safety*. The author contends that changing the law to remove the requirement for cyclists to stop at stop signs recognizes the behavior of cyclists today. Specifically, that when a bicyclists stops for a stop sign they lose their momentum going forward. This contention is supported by research conducted at DePaul University, where it observed the behavior of nearly 900 cyclists in Chicago, only 4% of cyclists come to a full stop at four-way stops. The report also found that 65% of cyclists stop at traffic lights and then proceed through them, regardless of the light, if there is no cross traffic, and that 66% of cyclists yield at stop signs when cross traffic is present. However, in California bicyclists must abide by the rules of the road followed by motorists. Thus, when a bicyclists fails to stop, they break the law.

   According to the National Highway Traffic Safety Administration, from 2011 to 2020, bicyclist and other cyclist fatalities increased by 38% from 682 in 2011 to 938 in 2020. In 2020, 26% of bicyclist and other cyclist fatalities occurred at intersections.

   According to the CHP, since 2015, a total of 3,543 crashes have occurred involving bicycles at an intersection, in which the primary crash factor and cause were failure to stop at a stop sign. In 25 of the 30 crashes (83 percent) in which a fatal injury was sustained, the investigation determined the bicyclist was at fault for failure to stop at a stop sign. In 1,995 of the 3,188 crashes (63 percent) that resulted in injuries, the investigation determined the bicyclist was at fault for failure to stop at a stop sign. This data illustrates that when bicyclists fail to stop at a stop sign and comply with the rules of the road, accidents occur.

5) *Concerns*. Although AB 1713 attempts to align California law with current cycling habits and increase safety, the bill could have the opposite affect and increase bicycling accidents at intersections. If bicyclists have the ability to bend this rule of the road it may lead to bicyclists ignoring other rules. Similarly, because bicyclists are currently required to follow all of the existing rules that motorists need to follow, any one motorist not being privy to this change in the law could lead to potential dangers for the bicyclist. AB 1713 does not provide any public information campaigning to inform California motorists and bicyclists of this change in the law. Moreover, the data from both

Idaho and Delaware are not necessarily applicable to California, as California has more motorists and bicyclists.

6) *Opposition*. The California Association of Highway Patrolmen writes in opposition to this bill stating, "There is a lot going on at intersections and we feel that allowing bicyclists to simply yield rather than stop will create a public safety risk." Similarly the California Coalition for Children's Safety and Health writes in opposition stating, this "bill continues to create unsafe bicycle riding behaviors and will lead to more bicycle crash fatalities, including children and teens. The bill would create opportunities for children and teens to learn dangerous bicycle riding behaviors as they observe adults not stopping at stop signs."

SUBJECT: Space Force

SOURCE: Author

DIGEST: This bill amends certain provisions in state law to include the United States Space Force among the lists of Armed Forces entities.

Senate Floor Amendments of 8/23/22 are clarifying and technical in nature and address chaptering out issues.

ANALYSIS: Existing law defines "Armed Forces" as including the United States Army, Navy, Air Force, Marine Corps, and other entities, and defines "veteran" as including members or veterans of those entities, as specified, for various purposes, including the allocation of merit points for civil service hiring practices and for state aid and protections for veterans.

This bill:

1) Amends Section 23450 of the Business and Professions Code to include Space Force in the definition of "veteran".

2) Amends Section 1791 of the Civil Code to include Space Force in the definition of "Member of the Armed Forces".

3) Amends Section 45294 of the Education Code to include Space Force in the definition of "veteran" and "Armed Forces".

4) Amends Section 66010.99 of the Education Code to include Space Force in the definition of "Armed Forces of the United States".

5) Amends Section 66025.8 of the Education Code to include Space Force in the definition of "Armed Forces of the United States".

6) Amends Section 68075 of the Education Code to include Space Force in the definition of "Armed Forces of the United States".

7) Amends Section 76396.3 of the Education Code to include Space Force in the definition of "Armed Forces of the United States".

8) Amends Section 88113 of the Education Code to include Space Force in the definition of "Armed Forces".

9) Amends Section 18540 of the Government Code to include Space Force in the definition of "Armed Forces".

10) Amends Section 37460 of the Government Code to include airman and guardian in the definition of "veteran".

11) Amends Section 260 of the Military and Veterans Code to include Space Force among the lists of Armed Forces entities.

12) Amends Section 400 of the Military and Veterans Code to include Space Force in the definition of "Armed Forces."

13) Amends Section 422 of the Military and Veterans Code to include Space Force among the lists of Armed Forces entities.

14) Amends Section 502.1 of the Military and Veterans Code to include Space Force among the lists of Armed Forces entities.

15) Amends Section 920 of the Military and Veterans Code to include Space Force in the definition of "veteran".

16) Amends Section 1120 of the Military and Veterans Code to include guardian.

17) Amends Section 2695.5 of the Penal Code to include Space Force in the definition of "veteran".

18) Amends Section 2827 of the Public Utilities Code to include Space Force in the definition of "United States Armed Forces base or facility".

19) Amends Section 205.5 of the Revenue and Taxation Code to include Space Force in the definition of "veteran".

Background

On December 20, 2019, the enactment of the United States Space Force Act, and signing of the National Defense Authorization Act, founded The United States Space Force. The US Space Force is the eighth branch of the United States uniformed services, and is organized under the Department of the Air Force.

The US Space Force is the smallest armed service, consisting of 6,434 military personnel and operating 77 spacecraft. In California, the US Space Force is active in Vandenberg Space Force Base as well as Los Angeles Air Force Base. California statute currently does not include the United States Space Force within the definitions and references when pertaining to the Armed Forces, Armed Services, and Veterans. This bill creates conforming and technical revisions to state code that defines which military branches are included in the encompassing terms of Armed Forces, Armed Services, and veteran, for the protections and benefits of members of this newly created military force.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) Minor and absorbable costs to the California Military Department and the Department of Veterans Affairs (CalVet) to make necessary updates.

2) Unknown costs, but likely minor, to various state entities to make necessary administrative changes and to provide members of the US Space Force with the existing protections and benefits available to members and veterans of the

Armed Forces. Most members of the US Space Force came from other branches of the armed forces, primarily the US Air Force. Accordingly, the cost of providing additional services is expected to be minor.

SUBJECT: Public works: definition

SOURCE: California-Nevada Conference of Operating Engineers

DIGEST: This bill expands the definition of "public works" to include fuel reduction work performed as part of a fire mitigation project, as defined, and require that these projects be subject to prevailing wage requirements.

Senate Floor Amendments of 8/24/22 make the following changes:

1) Clarify that the expansion of "Public Works" to include Fuel Reduction work, as defined, only apply if the following criteria apply: (a) the work must fall within an apprenticeable occupation in the building and construction trades for which an apprenticeship program has been approved; (b) the contract or grants for the project are in excess of $100,000; and (c) the provisions of this bill do not apply to work done on Tribal Lands.

2) Delay implementation of the provisions of AB 1717 until January 1, 2024, and until January 1, 2025, for nonprofit organizations.

3) Incorporate changes from AB 1886 (Cooper) to address chaptering issues.

ANALYSIS:

Existing law:

1) Requires that not less than the general prevailing rate of per diem wages be paid to all workers employed on a "public works" project costing over $1,000 and imposes misdemeanor penalties for violation of this requirement. (Labor Code §1771)

2) Defines "public work" to include, among other things, *construction*, alteration, demolition, installation or repair work done under contract and paid for in whole or in part out of public funds, except work done directly by any public utility company pursuant to an order of the Public Utilities Commission or other public authority**.** [Labor Code §1720(a)]

3) Specifies that for prevailing wage purposes, “construction” includes work performed during the design and preconstruction phases of construction, including, but not limited to, inspection and land surveying work and work performed during the postconstruction phases of construction, including, but not limited to, all cleanup work at the jobsite. [Labor Code §1720(a)]

4) Defines “paid for in whole or in part out of public funds” as, among other things, “Fees, costs, rents, insurance or bond premiums, loans, interest rates, or other obligations normally required in the execution of a contract that are paid, reduced, charged at less than fair market value, waived or forgiven.” (Labor Code §1720(b))

5) Requires that the applicable general prevailing rate of per diem wages be determined by the Director of the Department of Industrial Relations (DIR) for each locality in which the public work is to be performed and for each craft, classification, or type of worker needed to execute the public works project. (Labor Code §1773)

6) Provides that private residential projects built on private property are not subject to the requirements of public works provisions, unless the projects are built pursuant to an agreement with a state agency, redevelopment agency, or local public housing authority. (Labor Code §1720(c)(1))

7) Authorizes the Labor Commissioner, or their designee, to issue civil wage and penalty assessments on a contractor or subcontractor, or both, that fails to pay prevailing wages in connection with a public work. (Labor Code §1741)

This bill:

1) Adds fuel reduction work performed as part of a fire mitigation project to the definition of Public Works.

    a) Fire mitigation project includes, but is not limited to, residential chipping, rural road fuel breaks, fire breaks, and vegetation management.

2) Clarifies that the expansion of "Public Works" to include Fuel Reduction work, as defined, only apply if the following criteria apply:

    a) The work must fall within an apprenticeable occupation in the building and construction trades for which an apprenticeship program has been approved.
    b) The contract or grants for the project are in excess of $100,000.
    c) The provisions of AB 1717 do not apply to work done on Tribal Lands.

3) Delays implementation of the provisions of AB 1717 until January 1, 2024, and until January 1, 2025, for nonprofit organizations.

Comments

Need for this bill? On March 22, 2019, following two of the most devastating years of wildfires in California's history, Governor Newsom issued an Emergency Proclamation directing CalFIRE to take immediate action and implement projects to protect lives and property. This proclamation suspended certain regulations and requirements, to ensure that projects could begin as quickly as possible, to reduce risk.

As California continues to grapple with rapidly accelerating climate change, drought, and longer wildfire seasons, it becomes clear that the state must adjust to a new reality. The 2021 Budget appropriates $200 million from the Greenhouse Gas Reduction Fund *each fiscal year*, for years 2022-23 to 2028-29 for wildfire mitigation projects, in addition to federal funds given to CalFIRE. California is making large state expenditures on these projects and giving every indication that these projects will only expand in number and individual size in the future. Public works and the accompanying prevailing wage laws were designed so that subsidized public projects of a certain size would provide workers with livable wages and safe working conditions.

The concerns of rural districts that many of these projects are headquartered in should be taken seriously; these districts do not have as much infrastructure or public funds with which to fund wildfire mitigation projects. Furthermore, these counties note that other requirements have been waived to ensure that wildfire

mitigation projects are able to start without delay, including environmental and other workforce standards. AB 1644 (Flora), which passed out of the Senate Labor, Public Employment and Retirement Committee earlier this year, specifically exempted particular budget-funded wildfire mitigation projects from workforce standards under the California Jobs Plan Act of 2021 (AB 680, Burke, Chapter 746, Statutes of 2021). To address these concerns, AB 1717 as amended delays implementation for 1 year to allow rural counties to adjust to the new requirements.

As wildfire mitigation projects become more frequent and more permanent, serious discussion must occur on the working conditions and compensation received by workers on these publicly funded projects. AB 1644 (Flora) noted specific programs and included an urgency clause to make sure that in the short-term these projects would be easier to establish. In the longer-term, rural counties and districts will have the time to develop the infrastructure necessary to support these projects, and should adhere to the standards that similar publicly funded projects are subject to.

Related/Prior Legislation

AB 1644 (Flora, 2022) exempts specified wildfire prevention grant programs from increased workforce standards required under the California Jobs Plan Act of 2021. The bill has been sent to the Governor.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, DIR indicates that it would incur first-year costs of $137,000, and $127,000 annually thereafter, for increased oversight of new public works projects (Labor Enforcement and Compliance Fund).

CalFIRE anticipates unknown, but potentially significant costs, to the extent that it is responsible for ensuring grantees comply with public works law (Greenhouse Gas Reduction Fund).

To the extent that prevailing wage requirements increase costs for grantees and results in fewer acres treated, this bill would result in a cost pressure to fund additional fuel reduction projects (General Fund or Greenhouse Gas Reduction Fund).

ARGUMENTS IN SUPPORT: The California-Nevada Conference of Operating Engineers, the sponsor of this bill, writes in support:

Catastrophic wildfires have unfortunately become an annual occurrence in the State of California. In 2021 alone, the State saw 8,786 active wildfires that burned approximately 2,568,941 acres of land, destroyed 3,629 structures, and most devastating of all took the lives of 3 California citizens.

While wildfire mitigation is often a\talked about as a mechanism to protect homes from wildfires, wildfire mitigation is also a critical component of protecting various public works, including transportation infrastructure, public schools, and public buildings. In this sense, wildfire mitigation can and should be seen as a 'maintenance activity' that is heavily needed to ensure the safety and functionality of existing public works.

Additionally, given the importance of these projects to communities and the regular occurrence that they will continue to play in day-to-day life, the state's investment in wildfire mitigation work presents an opportunity for apprentices to learn a trade, while also making a living wage and contributing in a positive manner to the health and safety of their communities.

ARGUMENTS IN OPPOSITION: The Rural County Representatives of California write in opposition:

Over the past several years, California's wildfire seasons have grown both longer and more severe each year, as climate change has exacerbated the decades-overdue need for better vegetation management and fuels treatment strategies around communities in the wildland urban interface (WUI). Many of these communities are socioeconomically disadvantaged, with all 26 of California's economically disadvantaged counties containing lands designated as high or very high fire hazard severity zones, and depend on public funding such as grants from the Greenhouse Gas Reduction Fund (GGRF) to implement community fuels treatment and fire mitigation projects to safeguard their communities from wildfires. One of the most impacted counties is Lake County, which suffers from disastrous wildfire events almost annually, yet has precious little resources to dedicate to fire mitigation efforts.

The ability to utilize GGRF and other public dollars through programs like California Climate Investments has afforded rural local governments the ability to undertake such vital projects as clearing dead and dying trees from critical infrastructure and residential properties during California's recent tree mortality epidemic, as well as completing community wildfire mitigation projects in concert with local fire prevention organizations to help safeguard residents from the impacts of devastating wildfires. Even still, many rural counties in socioeconomically disadvantaged areas could benefit from

assistance accessing public, competitive grant funding to help initiate fire mitigation projects because they lack the staffing and financial ability to compete with more robustly resourced counties.

As fire-prone counties continue to seek ways to maximize their ability to safeguard their residents from the devastation of wildfires, it seems ill-timed to introduce additional barriers to implementation of fire mitigation projects in communities that desperately need public funds to complete these projects. AB 1717 would increase the cost of crucial fire mitigation projects around communities and critical infrastructure by including these projects in the definition of "public works," thus subjecting them to prevailing wage. RCRC has long advocated for increased training and development of a local forest management and wildfire prevention workforce. It is vital that the state focus on creating a more robust forest resilience workforce in rural, disadvantaged communities before pursuing a measure like AB 1717, which would simply drive up costs of the scarce forest workforce currently in place while shrinking the pace and scale of vegetation treatment projects on the ground.

SUBJECT: Housing: Community College Faculty and Employee Housing Act of 2022

SOURCE: San Diego Community College District

DIGEST: This bill establishes the Community College Faculty and Employee Housing Act of 2022.

ANALYSIS:

Existing law:

1) Defines, pursuant to the Teacher Housing Act of 2016, "teacher or school district employee" as any person employed by a unified school district maintaining prekindergarten, transitional kindergarten, and grades 1-12 inclusive, an elementary school district maintaining prekindergarten, transitional kindergarten, and grades 1-8 inclusive, or a high school district employing grades 1-12 inclusive, including but not limited to certificated and classified staff.

2) Creates, pursuant to the Teacher Housing Act of 2016, a state policy supporting housing for teachers and school district employees and further permits school districts and developers in receipt of local or state funds or tax credits designated for affordable rental housing to restrict occupancy to teachers and school district employees on land owned by school districts, so long as that housing does not violate any other applicable laws.

3) Authorizes, pursuant to the Teacher Housing Act of 2016, local public employees and other members of the public to occupy housing authorized by this Act.

4) Enacts the Unruh Civil Rights Act, which specifically outlaws discrimination in California based on sex, race, color, religion, ancestry, national origin, age, disability, medical condition, genetic information, marital status, or sexual orientation.

5) Enacts the Fair Employment and Housing Act, which prohibits the existence of a restrictive covenant that makes housing opportunities unavailable based on race, color, religion, sex, sexual orientation, familial status, marital status, disability, national origin, source of income or ancestry.

This bill:

1) Establishes the Community College Faculty and Employee Housing Act of 2022, which provides that a community college district may establish and implement programs that address the housing needs of community college district employees and faculty who face challenges in securing affordable housing.

2) Creates a state policy supporting housing for community college employees and faculty as described in Section 42(g)(9) of the Internal Revenue Code to allow the following:

    a) A community college district and a developer in receipt of local or state funds or tax credits designated for affordable rental housing to restrict occupancy to community college district employees or faculty on land owned by the community college district; and

    b) A developer in receipt of tax credits designated for affordable rental housing to retain the right to prioritize and restrict occupancy on land owned by

community college district to employees and faculty so long as that housing does not violate any other applicable laws.

Background

In 2016, SB 1413 (Leno, Chapter 732, Statutes of 2016) established the Teacher Housing Act of 2016 to facilitate the acquisition, construction, rehabilitation, and preservation of affordable housing for teachers and school employees. School districts are authorized to establish and implement programs that address the housing needs of teachers and school district employees by leveraging funding sources including state, federal, local, public, private and resources available to housing developers, promoting public and private partnerships, and fostering innovative financing opportunities. SB 1413 also created a state policy supporting the use of federal and state LIHTC to fund housing for teachers and school district employees on land owned by the school district and permitting school districts to restrict occupancy to teachers and school district employees.

The intent of SB 1413 was to provide express state statutory authority to permit school districts to construct housing on their property and limit the occupancy to teachers and school districts employees. As mentioned above, federal law creates an exemption to the "general use" requirement that allows the use of federal and state tax credits if a state establishes a policy or program that supports housing for such a specified group. AB 1413 established this policy by allowing school districts to restrict occupancy of affordable housing on school district land constructed with federal or state low-income housing tax credits to the teachers and school district employees.

By declaring a state policy supporting housing for teachers/school district employees, these housing projects could qualify under federal law as general public housing and therefore be eligible for both federal and state LIHTCs.

AB 3308 (Gabriel, Chapter 199, Statutes of 2020) further amended the Act to make clear that school districts could still access LIHTC if the school district restricts occupancy of housing constructed on their land to their own employees, but at their discretion offers the housing to other public employees.

Comments

1) *Low Income Housing Tax Credits (LIHTC).* Most affordable housing created in the state is funded in part by federal and state LIHTC. LIHTC are used to develop housing for households that make up to 80% of the area median income

(AMI). California receives an allocation of federal tax credits each year based on a per-resident formula. In 2020, the state awarded $1.06 billion in federal tax credits. In 1987, the Legislature authorized the creation of a state LIHTC program to augment the federal tax credit program. The state tax credit program has an ongoing statutory authorization of $70 million. The 2019-20 budget authorized an additional $500 million for state tax credits and the Governor's May budget continues this allocation for the 2020-21 budget year.

Generally under federal Internal Revenue Service (IRS) rules, if a residential unit is provided only for a member of a social organization or provided by an employer for its employees, the unit is not for use by the general public and is not eligible for federal LIHTC. However, federal IRS law also states that a qualified LIHTC project does not fail to meet the general public use requirement solely because of occupancy restrictions or preferences that favor tenants (1) with special needs, (2) who are members of a specified group under a federal program or state program or policy that supports housing for such a specified group, or (3) who are involved in artistic or literary activities.

2) *Community College Faculty and Employee Housing Act of 2022*. This bill gives community college faculty and employees the same benefits as allowed for school districts under the Act. The sponsor of the bill, the San Diego Community College District has land it plans to develop as housing for its faculty and employees and wishes to access LIHTC. This bill does not provide any funding or create any land use enhancements to facilitate the production of housing. Rather, this bill allows a community college district and a developer to use state or local funds or LIHTC to construct affordable rental housing on land owned by the community college district and restrict occupancy to community college district employees or faculty.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown cost pressures by authorizing a new category of affordable housing that would qualify for an award of Low Income Housing Tax Credits (LIHTCs), thereby increasing demand on an oversubscribed funding source, and potentially displacing credit allocations for other affordable housing projects. The State Treasurer’s Office (STO) indicates that LIHTCs are oversubscribed by a 3:1 ratio. (General Fund)

- Unknown potential expenditure of community college district revenues to partially finance the remaining costs of faculty and district employee housing.

This funding could also be financed through a third party developer, equity markets, or other proceeds from benefactors. (various funding sources, including locally-approved bond funds)

San Jose-Evergreen Community College District

OPPOSITION: (Verified 8/11/22)

State Building & Construction Trades Council of California

ARGUMENTS IN SUPPORT: According to the author, "A 2019 study found that of the California Community College students, 60% were housing insecure in the previous year, and 19% were unhoused in the previous year. Community College Districts need new authority to provide affordable housing to those that work and study in their districts. AB 1719 will extends the flexibility afforded to K-12 school districts under current law to community college districts seeking to provide affordable housing options to district faculty, staff, and foster you. This bill will allow community college districts with the appropriate existing land and resources to be active members in addressing California's exasperated housing crisis."

ARGUMENTS IN OPPOSITION: The State Building & Construction Trades Council of California are opposed because the bill does not require prevailing wages or use of a skilled and trained workforce.

SUBJECT: Care facilities: criminal background checks

SOURCE: East Bay Community Law Center

DIGEST: This bill authorizes the California Department of Social Services (CDSS) to process a simplified criminal record exemption for an individual seeking a license to operate, be employed by, or otherwise have contact with clients in a community care facility or be registered as a home care aide, if that individual meets specified criteria. This bill removes the requirement that an individual sign a declaration under penalty of perjury regarding any prior criminal convictions and prohibits CDSS from requiring an individual to disclose their criminal history information prior to the receipt of live scan results.

Senate Floor Amendments of 8/22/22 incorporate changes to Sections 1522, 1568.09, 1569.17, 1596.871, and 1796.24 of the Health and Safety Code proposed by SB 1093 (Hurtado) to resolve conflicts.

ANALYSIS:

Existing law:

1) Establishes the California Community Care Facilities Act, which provides regulatory structure for a coordinated and comprehensive statewide system of care for individuals with mental illnesses, individuals with disabilities, and children and adults who require care or services provided by licensed community care facilities. (HSC §1500 et seq.)

2) Requires an individual to obtain either a criminal record clearance or a criminal record exemption from CDSS before their initial presence in a community care facility, residential care facility for persons with chronic life-threatening illness, residential care facility for the elderly, or child day care facility, as specified. (HSC §1522 et seq.; HSC §1568.09 et seq.; HSC §1569.17 et seq.; HSC §1596.871 et seq.)

3) Defines "registered home care aide" as an affiliated home care aide or independent home care aide, 18 years of age or older, who is listed on the home care aide registry. (HSC §1796.12(o))

4) Requires an individual to obtain either a criminal record clearance or a criminal record exemption from CDSS before they may be listed on the home care aide registry. (HSC §1796.24))

5) Allows the Department of Justice (DOJ) to provide subsequent state or federal arrest or disposition notification to any entity authorized by state or federal law to receive state or federal summary criminal history information as the result of an application for licensing, employment, certification, or approval, as provided. (Penal Code §11105.2(a))

6) Requires DOJ to notify CDSS within 14 calendar days of a person’s criminal record information and, if no criminal information has been recorded, provide a statement of that fact. (HSC §1522(c)(2))

This bill:

1) Removes the requirement that an individual seeking a license to operate, be employed by, or otherwise have contact with clients in a community care facility, including a residential care facility for persons with chronic, life-threatening illness, a residential care facility for the elderly, or a child daycare facility, sign a declaration under penalty of perjury regarding any prior criminal convictions. Retains the requirement an individual be fingerprinted in order to

obtain either a criminal record clearance or an exemption from CDSS prior to employment, residence, or initial presence in a community care facility.

2) Removes the requirement that a person initiating a background examination to be a registered home care aide sign a declaration under penalty of perjury regarding any prior criminal convictions. Retains the requirement that a person initiating a background examination to be a registered home care aide be fingerprinted in order to obtain either a criminal record clearance or an exemption from CDSS prior to becoming a registered home care aide.

3) Prohibits CDSS from requiring an individual described in 1) and 2), above, to disclose their criminal history information prior to the receipt of live scan results.

4) Allows CDSS to process a simplified criminal record exemption for an individual described in 1) and 2), above, excluding an individual applying to operate a foster family home, certified family home, or be a resource family, as provided, if the individual meets all of the following criteria:

   a) The individual has not been convicted of a violent crime.
   b) The individual has not been convicted of a crime within the last five years.
   c) The individual has not been convicted of a felony within the last 10 years.
   d) The individual has five or fewer misdemeanor convictions.
   e) The individual has no more than one felony conviction.
   f) The individual has not been convicted of a crime for which CDSS is prohibited from granting an exemption.

5) Allows CDSS to require, in its discretion, an individual who is otherwise eligible for a simplified exemption described in 4), above, to complete the standard exemption process if CDSS determines that doing so will protect the health and safety of any person who is a client of a community care facility.

6) States that a simplified criminal record exemption does not relieve the person from compliance with other applicable background check provisions.

7) Makes other technical and conforming changes.

Background

Community Care Licensing Division (CCLD). CDSS's CCLD licenses and oversees community care facilities—including child care facilities and residential care facilities for the elderly—throughout California. These facilities typically provide non-medical care and supervision for children and adults in need,

including individuals with disabilities, older adults in residential care, and children in child day care facilities. As of June 2021, there are 67,622 licensed community care facilities in the state with total capacity to serve approximately 1.4 million Californians.

Home Care Aide Registry. The Home Care Services Bureau (HCSB), under CDSS, is responsible for licensing home care organizations, including processing applications, receiving and responding to complaints, and conducting unannounced visits to ensure compliance. HCSB is also responsible for maintaining the Home Care Aide Registry, which is a public online registry for home care aides who have been background checked. The Home Care Aide Registry is intended to promote consumer protection for older adults and individuals with disabilities who hire private aides to come into their homes and provide assistance with activities of daily living.

Criminal Background Checks. To protect the vulnerable populations served by CCLD-licensed facilities, state law requires all applicants, licensees, adult residents, volunteers under certain conditions, and employees of licensed facilities who have contact with clients to be subject to a background check. These background checks are conducted by DOJ and used to determine whether individuals should be allowed to be present in a licensed facility. Registered home care aides are also subject to a background check. If an individual has no history of arrests and convictions, a clearance notice is sent to CDSS. If an individual has a criminal history, a separate process will result in either a denial or exemption.

Criminal Record Exemptions. An exemption is a CDSS-authorized written document that "exempts" the individual from the requirement of having a criminal record clearance. CDSS is prohibited by law from granting exemptions to individuals convicted of certain “non-exemptible” crimes. Currently, there are 60 non-exemptible crimes, including murder, rape, torture, kidnapping, and crimes requiring sex offender registration. If an individual is convicted of a non-exemptible crime, that individual cannot work in any licensed facility or for a health care organization, and an individual’s application will be denied or the license revoked based on the conviction.

When considering an exemption for individuals who have committed crimes that are exemptible, CDSS is required to consider a number of factors, including, but not limited to: the nature of the crime, including whether it involved violence; the period of time since the crime was committed and number of offenses; the circumstances surrounding the crime; activities since conviction, such as employment or participation in therapy or education; pardons granted; character

references; a certificate of rehabilitation from a superior court; and, evidence of honesty and truthfulness. CDSS also has the authority to grant a criminal record exemption that places conditions on the individual's continued licensure and employment or presence in a licensed facility.

Standard and simplified exemption process. Regulations (22 CCR 80019.1) establish criteria for CDSS to grant a criminal record exemption using either a standard exemption process or a simplified exemption process. Pursuant to regulations, CDSS may consider granting a standard exemption for an individual who has not been convicted of any non-exemptible crime or violent felony, as defined, and who provides CDSS with substantial and convincing evidence of good character. Regulations further establish criteria for issuing a standard exemption based on the type of crime and length of time that has passed since the completion of incarceration, probation, or parole.

Under the simplified exemption process, CDSS is required to consider granting, but is not required to process, a simplified criminal record exemption only if the individual meets all of the following criteria:

- Does not have a demonstrated pattern of criminal activity;
- Has one or more convictions arising from a single incident of criminal conduct;
- Each conviction is a misdemeanor and is for a crime that is nonviolent and does not pose a risk of harm to an individual; and
- It has been at least five consecutive years since the date of the conviction.

CDSS is allowed is require an individual who is otherwise eligible for a simplified exemption to go through the standard exemption process if CDSS determines such action will help protect the health and safety of clients.

Comments

Purpose of this bill. According to the author, "the Department of Social Services (CDSS) requires any applicant who has ever been convicted of any crime, other than a minor traffic violation, to obtain a criminal record 'exemption' from CDSS before they can work in a facility (i.e. community care, residential, elderly, child care). CDSS can and does deny exemptions based on conviction, even if the conviction is very old or unrelated to caregivers' work, and even when applicants have shown success as caregivers. While ensuring the safety of the young and elderly should always be of utmost importance, the system CDSS uses is inefficient and has duplicative processes that can disadvantage good applicants, ultimately negatively affecting the caregiving system and those who depend on it. These overly burdensome criminal record screening rules, given the

disproportionate rate of arrests and low-level criminal convictions in communities of color, cause people of color to have a difficult task in advancing in these caregiver roles without the proper licensing. The bill removes a duplicative process by prohibiting CDSS from requiring applicants to disclose any information regarding their criminal history as a condition of employment."

Related/Prior Legislation

AB 1608 (Holden, 2019) would have prohibited CDSS from requiring certain individuals subject to the criminal background check process to self-disclose their criminal history information, would have required CDSS to annually post certain data related to criminal record clearance and exemption approvals and denials on its website, and would have prohibited certain conduct from serving as the basis of a suspension or revocation of a license to operate a community care facility, or as the basis to prohibit an individual from serving in certain administrative capacities over a community care facility, unless certain circumstances exist. AB 1608 was not heard by the Senate Human Services Committee.

AB 3039 (Holden, 2018) would have made numerous changes to the criminal background check process for certain community care facilities, home care aide registry applicants, and home care organizations. AB 3039 was held in the Assembly Appropriations Committee.

SUBJECT: Foster care: rights

SOURCE: Children's Law Center of California

DIGEST: This bill requires, for foster children and youth, the child's case plan, transitional independent living plan (TILP), and court report be provided to the child in their primary language. This bill adds the right to have these documents in their primary language to the Foster Youth Bill of Rights and requires the Foster Youth Bill of Rights be provided to the child in the primary language, as provided.

Senate Floor Amendments of 8/22/22 restructure the bill's provisions to increase clarity and ease with which printed copies of the updated Foster Youth Bill of Rights may be printed. Additionally, Welfare and Institutions Code section 16501.1 was struck and redrafted so that the existing law provisions could be updated to reflect changes made to the code section through the 2022 human services budget trailer bill.

ANALYSIS:

Existing law:

1) Establishes a system of juvenile dependency for children for specified reasons including, but not limited to, children who are, or are at risk of, being physically, sexually, or emotionally abused, being neglected or being exploited, to ensure their safety, protection, and physical and emotional well-being, as specified. *(WIC 300 et seq.)*

2) States that the purpose of foster care law is to provide maximum safety and protection for children who are currently being physically, sexually, or emotionally abused, neglected or exploited, and to ensure the safety, protection, and physical and emotional well-being of children who are at risk of harm. *(WIC 300.2)*

3) Declares the intent of the Legislature to, whenever possible, preserve and strengthen a child's family ties and, when a child must be removed from the physical custody of his or her parents, to give preferential consideration to placement with relatives. States the intent of the Legislature to reaffirm its commitment to children, who are in out-of-home placement, to live in the least restrictive family setting and as close to the child's family as possible, as specified. Further states the intent of the Legislature that all children live with a committed, permanent, nurturing family, and states that services and supports should be tailored to meet the specific needs of the individual child and family being served, as specified. (*WIC 16000*)

4) Requires out-of-home placement of a child in foster care to be based upon selection of a safe setting that is the least restrictive family setting that promotes normal childhood experiences, and the most appropriate setting that meets the child's individual needs, as specified. Further requires the selection of placement to consider, in order of priority, placement with: relatives, nonrelative extended family members, and tribal members; foster family homes, resource families, and approved or certified homes of foster family agencies; followed by intensive services for foster care homes, multidimensional treatment foster care homes, or therapeutic foster care homes; group care placements in the order of short-term residential therapeutic programs, group homes, community treatment facilities, and out-of-state residential treatment, as specified. *(WIC 16501.1(d)(1))*

5) Mandates that at least once every six months, at the time of a regularly scheduled visit with the youth, and at each placement change, a social worker or probation officer inform the youth, the caregiver, and the child and family team of the youth's rights, provide a written copy of the rights to the youth in an age and developmentally appropriate manner, and document in the case plan that the youth has been informed of their rights and has been provided with a written copy of their rights. (*WIC 16501.1(g)(4))*

6) Enumerates 41 separate rights of minors and nonminors in foster care, including but not limited to, the right to: live in a safe, healthy, and comfortable home where they are treated with respect; be free from physical, sexual, emotional, or other abuse, corporal punishment, or exploitation; review their own case plan and plan for permanent placement if they are 10 years of age or older, and receive information about their out-of-home placement and case plan, including being told of changes to the plan; and, be provided with contact information for the Ombudsperson at the time of each placement, and be free from threats or punishment for making complaints. *(WIC 16001.9)*

7) Establishes the Office of the Foster Care Ombudsperson (OFCO) as an autonomous entity within California Department of Social Services (CDSS) for the purpose of providing children who are placed in foster care with a means to resolve issues related to their care, placement, or services. *(WIC 16161)*

8) Requires the OFCO to among other things, disseminate information, and provide training and technical assistance to foster youth and relevant parties on the rights of children and youth in foster care, reasonable and prudent parent standards, and the services provided by the Office. *(WIC 16164)*

9) Establishes the case plan as the foundation and central unifying tool in the child welfare system, and seeks to ensure that the child receives protection and safe and proper care and case management, and that services are provided to the child and parents or other caretakers, as appropriate, in order to improve conditions in the parent's home, to facilitate the safe return of the child to a safe home or the permanent placement of the child, and to address the needs of the child while in foster care. *(WIC 16501.1 et seq.)*

10) Requires the creation of a case plan for foster youth within a specified timeframe after the child is introduced into the foster care system. *(WIC 16501.1(e))*

11) Requires a child who is 12 years of age or older and in permanent placement be given a meaningful opportunity to review their case plan, sign the plan, and receive a copy of the plan. *(WIC 16501.1(g)(13))*

12) Requires the case plan to include, for children who are 16 years or older and nonminor dependents, the Transition to Independent Living Plan (TILP), a description of programs and services that will help the child prepare for the transition from foster care to successful adulthood, and whether the youth has an in progress application pending for Supplemental Security Income benefits, for special immigrant juvenile status, or other application for legal residency. *(WIC 16501.1(g)(16)(A)(ii))*

13) Requires a regional center to communicate and provide written materials in the family's native language during the assessment, evaluation, and planning process for the individualized family service plan (IFSP). *(GOV 95020(g))*

14) Requires a regional center to communicate with the consumer and their family in their native language, including providing alternative communication services, as provided. *(WIC 4643(d))*

15) Requires a regional center to communicate in the consumer's native language, or, when appropriate, the native language of their family, during the planning process for the individual program plan (IPP), and provide a copy of the IPP in the native language of the consumer and their family, as provided. *(WIC 4646(j))*

16) Requires any materials explaining services be available to the public, and notices regarding those materials to be translated into any non-English language spoken by a substantial number of the public served by the agency. Provides discretion to the local agency to determine when these materials are necessary. *(GOV 7295)*

This bill:

1) Adds the following to the Foster Youth Bill of Rights:

    a) For a child who speaks a primary language other than English, the right to be provided a copy of the Foster Youth Bill of Rights in the child's primary language;

b) The right to be provided a copy of the court report, case plan, and TILP in the child's primary language, when a child is entitled to receive a copy of those documents.

2) Requires, for a child who receives a copy of their case plan and who speaks a primary language other than English, that the case plan be translated and provided to the child in their primary language.

3) Requires, for a child who speaks a primary language other than English, that the child's TILP be translated into their primary language.

Background

Child Welfare Services (CWS) System. The CWS system is an essential component of the state's safety net. Social workers in each county receive reports of abuse or neglect, and work to investigate and resolve those reports. When a case is substantiated, a family is either provided with services to ensure a child's well-being and avoid court involvement, or a child is removed from the family and placed into foster care. This system seeks to ensure the safety and protection of these children, and where possible, preserve and strengthen families through visitation and family reunification. It is the state's goal to reunify a foster child or youth with their biological family whenever possible. In 2021, the state's child welfare agencies received 400,313 reports of abuse or neglect. Of these, 61,438 reports contained allegations that were substantiated and 22,004 children were removed from their homes and placed into foster care via the CWS system.

As of January 1, 2022, there were 59,539 children in California's CWS system.

Foster Youth Bill of Rights. In 2001, AB 899 (Lui, Chapter 683, Statutes 2001) consolidated and codified in statute all of the rights existing law provided at the time to foster youth and created the Foster Youth Bill of Rights. AB 899 also required foster care providers and group home operators to provide foster youth with an age and developmentally appropriate orientation to the foster care system that includes an explanation of their rights and provides answers to the youths' questions or concerns. Over time, additional rights have been given to foster youth and added to the Foster Youth Bill of Rights. Most recently, AB 2119 (Gloria, Chapter 385, Statutes 2018) clarified a foster youth's right to gender affirming care, gender affirming behavior health services, and case plans that consider their gender identity, and incorporated these rights into the Foster Youth Bill of Rights.

In 2016, AB 1067 (Gipson, Chapter 851, Statutes 2016) required CDSS to convene a working group of stakeholders from around the state, to be chaired by the OFCO

and include representatives the Bureau of Children's Justice, the County Welfare Directors Association, the Chief Probation Officers of California, the County Behavioral Health Directors Association of California, current and former foster youth, foster parents and caregivers, foster children advocacy groups, foster care providers associations, and other interested parties, to update and improve the Foster Youth Bill of Rights. OFCO held stakeholder meetings and conducted a series of youth focus groups to inform and respond to the work of the working group on this issue, and ultimately the working group submitted a report containing recommendations to the Legislature.

AB 175 (Gipson, Chapter 416, Statutes of 2019) subsequently revised, recast, and expanded the Foster Youth Bill of Rights based on the working group's recommendations. AB 175 clarified that all children placed in foster care, either voluntarily or after being adjudged a ward or dependent of the juvenile court, have their rights delineated in the Foster Youth Bill of Rights. Additionally, it provided that these rights also apply to nonminor dependents except in circumstances when they conflict with nonminor dependents' retention of their legal decision-making authority as an adult. The current list of rights for all minors and nonminors in foster care includes 41 enumerated rights, such as theright to live in a safe, healthy, and comfortable home where they are treated with respect; be free from any abuse, including physical, sexual, emotional, or corporal punishment; receive adequate and healthy food, clothing; receive medical, dental, vision, mental health services, and substance use disorder services; and to be involved in the development of their own case plan.

This bill adds the right to receive a copy of the court report, case plan, and TILP, when the child is entitled to receive those documents, in the child's primary language. This bill also requires the Foster Youth Bill of Rights be made available and provided in languages besides English to children whose primary languages are not English. More information on the case plan and TILP can be found in the Senate Human Services Committee's analysis of this bill.

Comments

According to the author, "of the over 60,000 children and non-minor dependents in California's foster care system, over half are Black, Indigenous, Latinx, and Asian, and a percentage speak a primary language other than English. In Los Angeles alone, 120 of the 600 foster youth of Asian descent list a language other than English as their primary language. Yet, courts are not required to translate critical child welfare documents for these foster youth. As a result, many children and non-minor dependents are navigating our foster care system with limited understanding

of their case plans, rights, and the goals set forth for them. AB 1735 will provide foster youth with the language access tools that they need to comprehend and actively participate in their cases and successfully exit the system."

This bill seeks to give foster children and youth access to important documents in their primary language. Existing law provides that foster children and youth must be provided with information regarding the Foster Youth Bill of Rights and, for youth of certain ages, with copies of their case plan, court report, and TILP. However, if the youth cannot read these documents because they are provided in a language besides the youth's primary language, it is unclear how the youth is expected to know about the important information these documents contain. Additionally, in the case of TILP, it is unclear how a youth is supposed to sign and agree to complete the steps outlined in the TILP when the TILP is only provided in a language outside of the youth's primary language.

In other social services systems, important service plan documents are required to be provided according to certain native language requirements. For example, in the Developmental Disabilities Services system, since 2014, individuals with developmental disabilities and their families who are served by Regional Centers are required to receive copies of the IFSP and Individual Program Plan in the individual's or their family's native language. Additionally, existing law requires the Regional Center to also communicate with the family and individual during those planning processes in their native language. This process recognizes that if these important case plan like documents are not provided in a language that is accessible to the family or the individual, then the information and agreements they contain are not accessible to the family or individual served. This bill seeks grant similar language access rights to foster youth.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CDSS estimates ongoing local costs of $91,000 (General Fund) for social worker time to request translation of documents and one-time state costs of $500,000 (General Fund) to translate and print the updated Foster Youth Bill of Rights.

- To the extent this bill increases county costs already borne by a local agency for programs or levels of service mandated by the 2011 Realignment, this bill would apply to local agencies only to the extent that the state provides annual funding for the cost increases.

SUBJECT: Catalytic converters

SOURCE: Author

DIGEST: This bill requires a core recycler who accepts a catalytic converter to include a written record of the year, make, model, in addition to the vehicle identification number (VIN) of the vehicle and a copy of the title, as specified including the VIN or similar identifying information, of the vehicle from which the catalytic converter was removed. This bill prohibits a core recycler from entering into a transaction to purchase or receive a catalytic converter from any person that is not a commercial enterprise, as defined, or verifiable owner of the vehicle from which the catalytic converter was removed, and requires a core recycler to verify specified information. This bill exempts core recyclers from specified requirements if the core recycler and the seller or commercial enterprise have a written agreement, as specified. This bill makes changes to avoid chaptering out conflicts with other bills amending the same code sections.

Senate Floor Amendments of 8/24/22 include updated definitions, requirements, and provisions contained in SB 986 (Umberg and Portantino) and SB 1067 (Gonzalez) in order to avoid chaptering conflicts.

ANALYSIS:

Existing law:

1) Defines "core recycler" as a person or business, including a recycler or junk dealer, that buys used individual catalytic converters, transmissions, or other parts previously removed from a vehicle. (Business and Professions Code (BPC) § 21610)

2) Clarifies a person or business that buys a vehicle that may contain the parts in 1) is not a core recycler. (BPC § 21610)

3) Requires a core recycler who accepts a catalytic converter for recycling to maintain a written record that contains all of the following:

    a) The place and date of each sale or purchase of a catalytic converter made in the conduct of his or her business as a core recycler.

    b) The name, valid driver's license number, and state of issue, or California-issued identification number, of the seller of the catalytic converter and the vehicle license number, including state of issue of a motor vehicle used in transporting the catalytic converter to the core recycler's place of business. If the seller is a business, the written record shall include the name, address, and telephone number of the business.

    c) A description of the catalytic converters purchased or sold, including the item type and quantity, amount paid for the catalytic converter, and identification number, if any, and the vehicle identification number.

    d) A statement indicating either that the seller of the catalytic converter is the owner of the catalytic converter, or the name of the person from whom he or she has obtained the catalytic converter, including the business, if applicable, as shown on a signed transfer document. (BPC § 21610)

4) Requires a core recycler engaged in the selling or shipping of used catalytic converters to other recyclers or smelters shall retain information on the sale that includes all of the following:

    a) The name and address of each person to whom the catalytic converter is sold or disposed of.

    b) The quantity of catalytic converters being sold or shipped.

c) The amount that was paid for the catalytic converters sold in the transaction.

d) The date of the transaction. (BPC § 21610)

5) Prohibits a core recycler from providing payment for a catalytic converter unless all of the following requirements are met:

a) The payment is made by check and provided to the seller by mail at the address provided or mailed to the seller's business address.

b) Collected by the seller from the recycler on the third business day after the date of sale.

c) A seller that is a business may receive immediate payment. A seller that is a business that has a contract with a core recycler or a seller that is a licensed auto dismantler may receive immediate payment by check or by debit card or credit card.

d) At the time of sale, the core recycler obtains a clear photograph or video of the seller.

e) The core recycler obtains a copy of the valid driver's license of the seller or the seller's agent containing a photograph and an address of the seller or the seller's agent, or a copy of a state or federal government issued identification card containing a photograph and an address of the seller or the seller's agent.

f) If the seller prefers to have the check for the catalytic converter mailed to an alternative address, other than a post office box, the core recycler shall obtain a copy of a driver's license or identification card described above and a gas or electric utility bill addressed to the seller at the alternative address with a payment due date no more than two months prior to the date of sale. For the purpose of this subparagraph, "alternative address" means an address that is different from the address appearing on the seller's driver's license or identification card.

g) The core recycler obtains a clear photograph or video of the catalytic converter being sold.

h) At the time of sale, the core recycler obtains a written statement from the seller indicating how the seller obtained the catalytic converter. (BPC § 21610)

6) States certain requirements shall not apply to a core recycler that buys used catalytic converters, transmissions, or other parts removed from a vehicle if the core recycler and the seller have a written agreement for the transaction. (BPC § 21610)

7) Requires core recyclers accepting catalytic converters from licensed auto dismantlers or from recyclers who hold a written agreement with a business that sells catalytic converters for recycling purposes are required to collect only the following information:

   a) Name of seller or agent acting on behalf of the seller.

   b) Date of transaction.

   c) Number of catalytic converters received in the course of the transaction.

   d) Amount of money that was paid for catalytic converters in the course of the transaction. (BPC § 21610)

8) States a core recycler shall keep and maintain the information required pursuant to this section for not less than two years. (BPC § 21610)

9) States a core recycler shall make the information required pursuant to this section available for inspection by local law enforcement upon demand. (BPC § 21610)

10) States a person who makes, or causes to be made, a false or fictitious statement regarding any information required pursuant to this section is guilty of a misdemeanor. (BPC § 21610)

11) States a person who violates the requirements of this section is guilty of a misdemeanor. (BPC § 21610)

12) States upon conviction, a person who knowingly and willfully violates the requirements of this section shall be punished as follows:

   a) For a first conviction, by a fine of $1,000.

   b) For a second conviction, by a fine of not less than $2,000. In addition to this fine, the court may order the defendant to cease engaging in the business of a core recycler for a period not to exceed 30 days.

   c) For a third and subsequent conviction, by a fine of not less than $4,000. In addition to this fine, the court shall order the defendant to cease engaging in

the business of a core recycler for a period not less than one year. (BPC § 21610)

13) Requires the provisions of this section apply to core recyclers and do not apply to a subsequent purchaser of a catalytic converter who is not a core recycler. Other than subdivision (f), the provisions of this section do not apply to a core recycler who holds a written agreement with a business or recycler regarding the transactions. (BPC § 21610)

This bill:

1) Defines a "commercial enterprise" to include any of the following: a licensed automobile dismantler, a core recycler that maintains a fixed place of business for the purpose of obtaining catalytic converters, a licensed motor vehicle manufacturer, dealer, or lessor-retailer, a licensed automotive repair dealer, or any other licensed business that may reasonably generate, possess, or sell used catalytic converters.

2) Requires a core recycler who accepts a catalytic converter to include a written record of the physical business address, business telephone number, and the business license number or tax identification number if the seller is commercial enterprise, in addition to the the year, make, model, and the VIN of the vehicle from which the catalytic converter was removed, and a copy of the title of the vehicle that shows the VIN matches the number permanently marked on the catalytic converter.

3) Specifies that in order for a core recycler to be exempt from certain requirements in order to provide payment for a catalytic converter, the core recycler and the seller must have a written agreement for the transaction that includes a regularly updated log or record of all catalytic converters received pursuant to the agreement that describes each catalytic converter in detail, as specified.

4) Adds to the information that a core recycler is required to collect in order to accept a catalytic converter from a commercial enterprise if the core recycler holds a written agreement with a business that sells catalytic converters for recycling purposes.

5) Prohibits a core recycler from entering into a transaction to purchase or receiving a catalytic converter from any person that is not a commercial enterprise or verifiable owner of the vehicle from which the catalytic converter was removed, and requires a core recycler to verify the following information:

a) The catalytic converter is permanently marked with a VIN prior to the owner presenting the catalytic converter to the core recycler for sale. A core recycler shall not permanently mark a catalytic converter for the purpose of satisfying this requirement.

b) The owner of the vehicle holds title to the vehicle with a VIN matching the number permanently marked on the catalytic converter subject to the transaction.

6) Exempts core recyclers from specified requirements if the core recycler and the seller or commercial enterprise have a written agreement, as specified.

7) Makes changes to avoid chaptering out conflicts with other bills amending the same code sections.

Background

Today, the prices of metals such as rhodium, platinum, and palladium inside of catalytic converters have increased dramatically in the last few years, both because they were in short supply prior to the COVID-19 pandemic and because of recent supply chain issues. According to the National Insurance Crime Bureau, there has been a ten-fold increase in catalytic converter thefts since 2018, with more than 14,000 reported catalytic converters stolen in 2020, with BeenVerified estimating there were 65,398 thefts nationwide – a 353% increase from reported catalytic converter thefts in 2020. According to media reports, recyclers can pay $50-$200 to legally obtain a failed catalytic converter, or one from a junked vehicle. With high metal prices, though, it is possible for processors to make several hundred per unit selling contents to the refinery. If a catalytic converter is stolen, consumers must generally pay $400-$3,000 for a catalytic converter replacement, depending on the make and model of the vehicle.

Permanent marking, or etching, of catalytic converters is one method by which one could identify a stolen catalytic converter. With the increased interest in catalytic converter VIN etching services, a variety of etching products and techniques have been developed. One of the most common methods of etching a catalytic converter is to use an engraving hand tool to etch the number into the equipment. Manual engraving tools can be purchased from hardware stores or online from a wide range of retailers for $25 – $400+. Chemical etch labels and kits can also be a cost-effective technique (often less than $30) to ensure that even if the label is removed, identification information is still permanently detectable on the equipment. Automated industrial-level VIN etching machines can cost thousands, generally over $1,000 for a small and simple machine and over $5-10,000 for a larger and

more complex machine, but many automotive professionals can still etch catalytic converters rapidly and effectively with manual tools.

While the etching process itself is generally simple and inexpensive, accessing the catalytic converter for etching can be difficult for many newer car models. Catalytic converters are typically located on the underside of the car, but many newer vehicle models incorporate the catalytic converter as a part of the exhaust manifold, essentially making the catalytic converter difficult to access without disassembling a significant portion of the vehicle engine. In these cases, automobile technicians require specialized equipment and additional time to access the catalytic converter for etching.

Traceable catalytic converters may disincentive theft by prohibiting establish businesses from servicing vehicles with stolen goods; however, it does not stop third party selling such as the vendors described above. Overall, this is a step in reducing theft, but it might not fully eliminate it.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, this bill will result in unknown workload cost pressures on the courts to adjudicate charges that are brought under the provisions of this bill.

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: Not relevant

SUBJECT: General plan: annual report

SOURCE: Author

DIGEST: This bill requires local planning agencies to include information in their annual progress report (APR) about the number of new housing units that received their certificate of occupancy in the prior year.

Senate Floor Amendments of 8/22/22 make technical and clarifying changes and resolve chaptering conflicts with AB 2653 (Santiago), AB 2011 (Wicks), and AB 2094 (Rivas).

ANALYSIS:

Existing law:

1) Requires each city and county to provide, by April 1 of each year, an APR to the Department of Housing and Community Development (HCD) that includes the status of their general plan and progress in its implementation, including the progress in meeting its share of regional housing needs.

2) Establishes, pursuant to SB 35 (Wiener, Chapter 366, Statutes of 2017), a streamlined, ministerial approval process, not subject to CEQA, for certain infill multifamily affordable housing projects proposed in local jurisdictions that have not met their RHNA allocation.

3) Requires a local agency to ministerially approve, within 60 days, in an area zoned for residential or mixed-use, an application for a building permit to create an ADU and a Junior Accessory Dwelling Unit (JADU) as follows:

This bill requires the APR to include the number of housing units that have received a certificate of occupancy in the prior year, including the number of units constructed using SB 35 (Wiener, Chapter 366, Statutes of 2017), the number of ADUs constructed, and the number of ADU ordinances adopted. This bill also resolves chaptering conflicts with AB 2653 (Santiago), AB 2011 (Wicks), and AB 2094 (Rivas).

Background

Existing law requires every city and county to prepare a housing element as part of its general plan. This is done every eight years by local governments located within the territory of an metropolitan planning organization (MPO) and every five years by local governments in rural non-MPO regions. Each community's fair share of housing is determined through the regional housing needs allocation (RHNA) process, which is composed of three main stages: (1) the Department of Finance and HCD develop regional housing needs estimates; (2) councils of government allocate housing within each region based on the estimates; and (3) cities and counties incorporate their allocations into their housing elements. The housing element must contain an inventory of land suitable for residential development, which is used to identify sites that can be developed for housing within the planning period and are sufficient to provide for the locality's share of the regional housing need for all income levels.

Each jurisdiction must submit an APR to HCD by April 1st of each year that documents its progress toward meeting its RHNA allocation and the plans outlined in its housing element.

Comments

1) *More data*. The Legislature has approved a number of measures, particularly in recent years, aimed at streamlining and expediting housing development. This

bill requires APRs to include information about how many certificates of occupancy local agencies granted in the prior year. Local agencies would also be required to specify how many of those units were permitted through the streamlined, ministerial processes granted by SB 35 and by ADU law. By requiring this information, cities, counties, and the state will have a better understanding of development within their jurisdictions.

ASSEMBLY FLOOR: 48-18, 5/26/22 - See last page for vote

SUBJECT: Community emissions reduction programs: toxic air contaminants and criteria air pollutants

SOURCE: Author

DIGEST: This bill updates requirements of AB 617 (Cristina Garcia, Chapter 136, Statutes of 2017) to permit an additional year for completion of community emissions reduction programs (CERPs); requires the Air Resources Board (ARB) to identify specified emissions reduction measures; and enhances reporting by local air districts.

Senate Floor Amendments of 8/25/22 clarify that to obtain an extension in implementing a CERP an air district must reach an agreement with the majority of the individuals previously designated by the air district to engage in the development and adoption of the plan.

Senate Floor Amendments of 8/9/22 require an air district to obtain agreement with all the groups that statutorily are required to be engaged in the creation of the CERP in order to delay implementation of a CERP by a year.

ANALYSIS:

Existing law:

1) Sets, through the Federal Clean Air Act (FCAA) and its implementing regulations, National Ambient Air Quality Standards (NAAQS) for six criteria pollutants, designates air basins that do not achieve NAAQS as nonattainment, allows only California to set emissions standards stricter than the federal government, and requires states with nonattainment areas to submit a State Implementation Plan (SIP) detailing how they will achieve compliance with NAAQS. (42 U.S.C. §7401 et seq.)

2) Establishes California Air Resources Board (ARB) as the air pollution control agency in California and requires ARB, among other things, to control emissions from a wide array of mobile sources and coordinate, encourage, and review the efforts of all levels of government as they affect air quality. (Health and Safety Code (HSC) §39500 et seq.)

3) Requires, subject to the powers and duties of ARB, local air pollution control districts and air quality management districts (air districts) to adopt and enforce rules and regulations to achieve and maintain the state and federal ambient air quality standards in all areas affected by emission sources under their jurisdiction, and to enforce all applicable provisions of state and federal law. (HSC §40001)

4) Requires air districts to develop attainment plans detailing how they will attain and maintain state air quality standards, and submit those plans to ARB. (HSC §40910 et seq.)

5) Requires, under AB 617 (Christina Garcia, Chapter 136, Statutes of 2017), ARB to prepare a statewide strategy to reduce emissions of toxic air contaminants (TACs) and criteria pollutants in communities affected by a high cumulative exposure burden, and update the strategy every five years. (HSC §44391.2)

6) Specifies criteria to be included in the strategy for the development of CERPs including:

    a) An assessment and identification of communities with high cumulative exposure burdens for TACs and criteria air pollutants, prioritizing disadvantaged communities (DACs) and sensitive receptor locations;

b) A methodology for assessing and identifying the contributing sources or categories of sources, including stationary and mobile sources, and an estimate of their relative contribution to elevated exposure to air pollution in impacted communities;

c) An assessment of whether a district should update and implement the risk reduction audit and emissions reduction plan for any facility to achieve emission reductions commensurate with its relative contribution, if the facility's emissions significantly contribute to a material impact on a sensitive receptor location or DAC; and

d) An assessment of the existing and available measures for reducing emissions from the contributing sources or categories of sources.

7) Requires ARB to select locations around the state for preparation of CERPs, concurrent with the statewide strategy, with additional locations selected annually thereafter, as appropriate.

8) Requires a district, within one year of ARB selection, to adopt a CERP to achieve emissions reductions using cost-effective measures identified by ARB. The CERP must include emissions reduction targets, specific reduction measures, an implementation schedule, and an enforcement plan. The CERP must be reviewed and approved by ARB, be supported by the concurrent development of mobile source elements by ARB, and result in emission reductions based on monitoring and other data.

9) Requires districts to prepare an annual report summarizing the results and actions taken to further reduce emissions pursuant to a CERP.

10) Requires ARB to provide grants to community-based organizations for technical assistance and to support participation in implementation of a CERP.

This bill:

1) Authorizes an air district, with the agreement of ARB and a majority of the persons who are designated by the district to participate in the development and adoption of the CERP, to take up to one additional year to adopt a CERP.

2) Requires an air district's annual report to include updates to the CERP made to ensure consistency with updates to ARB's statewide strategy.

3) Requires ARB's statewide strategy, the Community Air Protection Blueprint, to identify measures to reduce criteria air pollutants and TACs.

4) Requires each air district with a population over one million to make available in an easily identifiable location on the district's internet website all permits issued by the district for stationary sources of criteria air pollutants or TACs.

Background

1) *National Ambient Air Quality Standards (NAAQS) and attainment.* The FCAA protects public health and environmental quality by limiting and reducing pollution from various sources. Under the FCAA, the US EPA establishes NAAQS that apply to outdoor air throughout the country. In 1969 and 1971, ARB set the first air quality standards for ozone, Particulate Matter (PM), oxides of nitrogen (NOx), oxides of sulfur (SOx), and carbon monoxide due to their negative impacts on public health above specified concentrations. The federal government followed suit and set NAAQS for six "criteria pollutants." These included ground-level ozone, PM, NOx, SOx, carbon monoxide, and added lead. Now, the US EPA reviews each NAAQS at five-year intervals to ensure that the standards are based on the most recent scientific information, and periodically issue more health- protective standards. Regions that do not meet the national standards for any one of the standards are designated "nonattainment areas."

2) *Community Air Protection Program.* ARB established the Community Air Protection Program (CAPP) in response to AB 617 in order to reduce exposure in communities most impacted by air pollution. Under CAPP, ARB has selected 13 communities for the development of additional air pollution monitoring programs or the development of CERPs. After selection by ARB these air districts must form local steering committees, using an open and transparent nomination process, that is composed of community members who live, work, or own businesses within each community. These community steering committees then work with the air district and ARB to develop a CERP designed to focus on health-based air quality objectives for reducing emissions and exposure caused by local sources within and directly surrounding the selected communities. As a part of these CERPs, communities and air districts can benefit from the $704 million appropriated by the Legislature since 2017 for Community Air Protection Incentives. These incentives are directed by local air districts to put advanced technologies to work for cleaner air in the California communities that are most heavily impacted by disproportionate levels of air pollution.

3) *Having pollutant level above a NAAQS can lead to severe health impacts*. The NAAQS are the result of an intensive science assessment process and risk

exposure assessments to determine levels that will protect human and environmental health. When not adequately controlled, air pollution has dire consequences on the health and safety of both people and the environment. Poor air quality causes the lungs to constrict, resulting in wheezing, shortness of breath and chest tightness, especially during exercise or physical activity. Depending on exposure, air pollution alone can cause an increased risk of cardiovascular and respiratory illness, cancerous tumors, birth defects, developmental disorders, central nervous system damage, epilepsy, dementia, and premature death.

4) *Health impacts from air pollution are often concentrated in disadvantaged communities*. The health burden of air pollution depends on several key factors including exposure to the pollutant, susceptibility to its effects, access to healthcare, and psychological stress. Because of redlining and other discriminatory practices and policies people of color are disproportionality located in areas closer to sources of air pollution. There is also evidence that having a low income also increases risk from air pollution due to having fewer resources to relocate away from sources as well as less access to quality and affordable healthcare.

Comments

Purpose of this bill. According to the author, "A study released March 9, 2022 analyzed the effects of the discriminatory practice of redlining, which drove low-income communities and communities of color into housing surrounding or very near high polluting sources, and found that residents in those areas suffer from disproportionately high levels of fine particulate air pollution (PM2.5) which is a known factor in early death. In response to this problem, I authored AB 617 in 2017, which injects the community into the process of how to clean up our air in these communities. However, after several years of the program, there are many issues to be worked out through legislation. AB 1749 provides transparency in permitting by providing said permits online and gives another year for CERP approval if the community agrees, among other things. The way we address the health of people living in frontline communities needs to shift and AB 617 started the process. AB 1749 is continuing to build upon my previous work in this space."

SUBJECT: Workers' compensation: COVID-19: critical workers

SOURCE: Author

DIGEST: This bill extends the sunset date of the workers' compensation COVID-19 presumptions, as specified, to January 1, 2024.

Senate Floor Amendments of 8/25/22:

1) Reduce extension of existing COVID-19 Workers' Compensation presumptions from two years to one year, establishing a sunset date of January 1, 2024.

2) Add employees from the following departments to those covered by COVID-19 presumptions under Labor Code Section 3212.87:

   a) The State Department of State Hospitals.

   b) The State Department of Developmental Services.

   c) The Military Department.

d) The Department of Veterans Affairs.

ANALYSIS:

Existing law:

1) Provides a rebuttable presumption that a peace officer, firefighter, specified frontline employees, and certain health care employees, as defined, who contract COVID-19 were infected with the virus via a workplace exposure. (Labor Code §3212.87)

2) Provides that all of the normal workers' compensation benefits are available to these employees who become presumptively eligible for workers' compensation benefits. (Labor Code §3212.87-3212.88)

3) Provides that the presumptions established by the bill continue for 14 days after the last day of employment with an employer. (Labor Code §3212.86-3212.88)

4) Establishes a presumption of compensability for employees who contract COVID-19 from any employer that experiences an "outbreak" of COVID-19 cases at a particular work location. (Labor Code §3212.88)

5) Defines an "outbreak" as follows:

   a) For employers with 5-100 employees, five or more employees who worked at a specific work location contracted the disease within a 14-day period;

   b) For employers with more than 100 employees, 5% or more of the employees who worked at a specific work location contracted the disease within a 14-day period. (Labor Code §3212.88)

6) Specifies that this presumption is rebuttable, and the evidence to rebut the presumption includes, but is not limited to, evidence of measures in place to prevent transmission of COVID-19 and evidence of an employee's nonoccupational exposure to COVID-19.

7) Provides that the presumptions established under Labor Code Sections 3212.86, 3212.87, and 3212.88 sunset on January 1, 2023.

This bill:

1) Extends the sunset date of the presumptions established under Labor Code Sections 3212.86, 3212.87, and 3212.88 from 2023 to January 1, 2024.

2) Adds employees from the following departments to those covered by COVID-19 presumptions under Labor Code Section 3212.87:

   a) The State Department of State Hospitals.

   b) The State Department of Developmental Services.

   c) The Military Department.

   d) The Department of Veterans Affairs.

3) Clarifies that Community College District Chancellors, School Presidents, and School Superintendents may order a school to close due to risk of infection by COVID-19.

Comments

Need for this bill. COVID-19 continues to be an ongoing risk to California's workers. Given the continued risk of contraction and the ongoing research into the lingering effects of COVID-19 exposure, AB 1751's extension of the existing presumptions could help ensure that injured workers will have access to the workers' compensation benefits they deserve.

Related/Prior Legislation

SB 1159 (Hill, Chapter 85, Statutes of 2020) created a rebuttable presumption for critical workers that illness or death related to COVID-19 (novel coronavirus) are an occupational injury and therefore eligible for workers' compensation benefits.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Department of Industrial Relations indicates that it would incur costs to its Division of Workers Compensation of $11 million over 2026-27 and 2027-28 to extend for two additional years the limited-term positions previously authorized to implement the original presumption (Workers' Compensation Administration Revolving Fund), potentially offset by minor penalty revenue.

Continuing coverage of presumptive injuries to specified employees would likely result in increases to workers compensation premiums, to the extent continuing the presumption results in a higher number of workers' compensation claims being approved among state workers that would have otherwise been denied. Thus, this bill would result in higher workers compensation premium costs for state departments, as the State is a direct employer. The magnitude is unknown, but

potentially significant across all state departments (General Fund and special funds).

ARGUMENTS IN SUPPORT: The California Nurses Association writes in support:

> As of June 3, 2022, local health departments have reported 163,894 confirmed positive COVID-19 cases in health care workers and 581 deaths statewide.
>
> COVID-19 is a global health crisis, but it is also a personal tragedy for healthcare workers and their families. Nurses enter this vocation because they wish to care for the sick and vulnerable among us. We have not done enough as a state to protect our frontline workers, who run toward this danger every day, rather than away from it. While most of the world has been able to shelter in place, nurses, healthcare workers, and first responders courageously enter the front lines putting themselves in harm's way to continue to care for the sick.
>
> Frontline healthcare workers deserve continued protection and security, so they can continue to care for your constituents during this pandemic and beyond. Nurses and health care workers are meeting the daily challenges of this global pandemic, but they cannot do it alone. Now more than ever it is up to lawmakers to ensure they are safe as they carry out their duties.

ARGUMENTS IN OPPOSITION: The California Chamber of Commerce writes in opposition:

> California, early in the pandemic, chose to implement a COVID-19 presumption to ensure that employees would have access to the workers' compensation system in the event of an infection. Employers opposed the imposition of a presumption because, we argued, COVID-19 was a community spread virus, and there was no reason to believe that the employment posed a heightened risk or that a presumption was needed. However, employers worked in good faith with the legislature to develop a temporary policy that would help meet the needs of our employees in the face of a new and unpredictable virus.

According to an ongoing analysis from the California Workers' Compensation Institute, California employers have received over 250,000 workers' compensation claims for COVID-19 since the start of the pandemic. Health care providers and taxpayer-funded public agencies have been especially hard hit, accounting for over 50% of all claims and over 60% of the accepted claims. And the data suggests that employers have accepted most of these claims and provided benefits.

Our coalition believes that the COVID-19 presumption should be allowed to sunset as agreed upon in SB 1159. California is no longer sheltering in place and the workplace does not represent a unique risk in most situations. California has implemented an Emergency Temporary Standard for COVID-19 and for most Californians their place of employment is the safest environment in which they spend time. There are also multiple free vaccines available for Californians who want to protect themselves from the most severe consequence of COVID-19.

SUBJECT: Department of Motor Vehicles: driver's licenses and identification cards

SOURCE: Author

DIGEST: This bill requires the Department of Motor Vehicles (DMV) to issue restricted California identification cards to an undocumented immigrant, if the person is eligible for a California identification card in all other respects.

Senate Floor Amendments of 8/24/22 clarify the notice to be printed on all driver's licenses and California identification (ID) cards be updated, at the time of the next DMV revision on or after January 1, 2023, to include that federally non-compliant driver's licenses and IDs do not establish eligibility for firearms purchases; clarify that no government agency or department, as specified; commercial entity; or other requester shall obtain or use non-criminal history information maintained by the DMV for purposes of immigration enforcement; clarify that immigration enforcement does not constitute an urgent health and safety need that would allow law enforcement to request access to DMV documents without a court order; and incorporate provisions of SB 523 (Leyva) to prevent chaptering out.

ANALYSIS:

Existing law:

1) Requires the DMV to issue an original driver's license to applicants who cannot provide satisfactory proof that their presence in the United States is authorized under federal law if they meet all other qualifications and provide satisfactory proof to the DMV of their identity and California residency.

2) Requires the Department of Corrections and Rehabilitation (CDCR) and the DMV to ensure that all eligible inmates released from state prisons have valid California Identification (ID) cards.

3) Defines "eligible inmate" to mean an inmate who meets all of the following: a) the inmate has previously held a California driver's license or ID card; b) the inmate has a usable photo on file with the DMV that is not more than 10 years old; c) the inmate has no outstanding fees due for a prior California ID card; and d) the inmate has provided, and the DMV has verified, the inmate's true full name, date of birth, social security number, and legal presence in the U.S.

4) Prohibits the DMV from disclosing documents submitted for purposes of obtaining a driver's license or ID card absent a subpoena for individual records in a criminal court proceeding or a court order, or in response to a law enforcement request to address an urgent health or safety need if the law enforcement agency certifies in writing the specific circumstances that do not permit authorities time to obtain a court order. Also establishes that such documents and information is not a public record.

5) Requires the DMV to print on certain non-federally compliant, non-REAL ID driver's licenses the following notice, "This card is not acceptable for official

federal purposes. This license is issued only as a license to drive a motor vehicle. It does not establish eligibility for employment, voter registration, or public benefits."

6) Makes it unlawful to discriminate against a person because the person holds or presents a driver's license issued under specified sections of the Vehicle Code.

7) Prohibits law enforcement agencies (including school police and security departments) from using resources to investigate, interrogate, detain, detect, or arrest people for immigration enforcement purposes.

This bill:

1) Requires the DMV, commencing no later than January 1, 2027, to issue restricted ID cards to eligible applicants who are unable to verify their legal presence in the United States as authorized under federal law.

2) Clarifies that immigration enforcement, as specified, does not constitute an urgent health and safety need that would allow law enforcement to request access to DMV documents submitted for purposes of obtaining a driver's license or ID card without a court order.

3) Revises one of the definitions for an "eligible inmate" for obtaining a driver's license or ID card, to mean the DMV has verified the inmate's legal presence in the U.S. or if the inmate is unable to submit satisfactory proof that their presence in the U.S. is authorized under federal law, the inmate has provided proof of their identity, as specified.

4) Requires ID cards, issued pursuant to this bill, to bear the following notice: "This card is not acceptable for official federal purposes. This identification card is issued only as a means of identification. It does not establish eligibility for employment, voter registration, or public benefits."

5) Requires DMV, at the time of the next schedule revision of the ID cards, to update the notice printed on the ID cards to include, but not be limited to:

    a) For REAL ID identification cards that the identification card is issued only as a means of identification and does not establish eligibility for employment, voter registration, or public benefits.

b) For a non-federally compliant, non-REAL ID identification cards that the identification card is issued only as a means of identification, it does not establish eligibility for employment, firearms purchases, voter registration, or public benefits, and it is not acceptable for official federal purposes.

6) Requires DMV, at the time of the next schedule revision of driver's licenses, to update the notice printed on the driver's license to include, but not be limited to:

   a) For REAL ID driver's license that the license is issued as a license to drive a motor vehicle, and that it does not establish eligibility for employment, voter registration, or public benefits.

   b) For a non-federally compliant, non-REAL ID driver's license that the license is issued as a license to drive a motor vehicle, it does not establish eligibility for employment, firearms purchases, voter registration, or public benefits, and it is not acceptable for official federal purposes.

7) Prohibits discrimination against a person because the person holds or presents an ID card issued under the provisions of this bill.

8) Prohibits the use of an ID card issued under the provisions of this bill from being used as evidence of an individual's citizenship or immigration status for any purpose.

9) Clarifies that no government agency or department, as specified; commercial entity; or other requester shall obtain, access, use, or otherwise disclose, non-criminal history information maintained by the DMV for purposes of immigration enforcement, as specified.

10) Deletes obsolete provisions.

11) Incorporates provisions of SB 523 (Leyva) as both bills amend Section 12926 of the Government Code to prevent chaptering out.

Comments

1) *Purpose*. According to the author, "Identification cards enable inclusion and meaningful participation in our neighborhoods, cities, and our state. IDs allow one to open a bank account, obtain benefits, access healthcare, secure housing, and much more. However, if a person who is

undocumented does not have meaningful access to a car or have the ability to take a driving test, they are rendered ineligible for a government-issued ID. Those individuals may rely on gym memberships or college/university IDs *if* they have access to those institutions. Otherwise, they can use a passport or consular ID to corroborate their identities, however, this is an often risky "outing" process for those who are not legally present in the United States. Individuals with mobility issues, disabilities such as epilepsy, and those who are older and develop degenerative eye, muscular, or cognitive diseases are not able to obtain driver's licenses and thus, do not have access to a state government-issued ID. Additionally, undocumented people leaving incarceration are also unable to obtain an original AB 60 driver's license because they cannot access a driving test in prison. AB 1766 will expand ID access for all, regardless of immigration status. Under this bill, California ID eligibility will be expanded to approximately 1.6 million undocumented people."

2) *AB 60 background*. AB 60 (Alejo, Chapter 524, Statutes of 2013), permitted a person unable to provide a social security number (SSN) to submit several alternative forms of documentation to show proof of identity and obtain a driver's license. AB 60 declared that discrimination against AB 60 license holders is a violation of the Unruh Civil Rights Act, which outlaws discrimination by a business establishment. The law also bars authorities from inferring the citizenship or immigration status of the license holder as a basis for criminal investigation proceedings. The statute has since been amended by AB 1660 (Alejo, Chapter 452, Statutes 2014), and Government Code Section 11135, to include additional anti-discrimination protections and require the California Research Bureau (CRB) to compile and submit to the Legislature and the Governor a report of any violations of these anti-discrimination provisions.

   Likewise, prior to the passage of AB 60, several cities in California passed laws creating a municipal ID card. San Francisco County began issuing ID cards to undocumented immigrants in 2009, followed by the City of Oakland in 2013, and the City of Richmond in 2014.

   AB 1766 requires the DMV, no later than January 1, 2027, to issue ID cards to any person who is unable to submit proof of lawful presence in the United States, as authorized under federal law, if they are otherwise able to demonstrate proof of their identity and California residency. It is important to note that these criteria are now used by DMV to issue driver's licenses (to

individuals who qualify, but are not DACA participants). Current law also contains restrictions on what AB 60 driver's licenses can be used for. A driver's licenses, issued pursuant to AB 60, states, "This card is not acceptable for official federal purposes. This license is issued only as a license to drive a motor vehicle. It does not establish eligibility for employment, voter registration, or public benefits." AB 1766 requires ID cards to state, "This card is not acceptable for official federal purposes. It does not establish eligibility for employment, voter registration, or public benefits." Additionally, to update the restrictions for all federally non-compliant, non-REAL ID driver's licenses and ID cards, the bill requires DMV to update these statements upon the next scheduled revision of the driver's licenses and ID cards, which DMV anticipates could be in the next few years, to also include that they cannot be used to establish eligibility for firearms purchases.

3) *DMV Data and ICE*. In recent years, there has been a concern about Immigration and Customs enforcement (ICE) using the DMV database to find the address of undocumented immigrants. The American Civil Liberties Union (ACLU) and the National Immigration Law Center (NILC) released a report in December 2018 for the purpose of providing "as much information as possible about how and what information is shared with the Department of Homeland Security (DHS) and its agencies, so that California residents can effectively weigh the risks and benefits of obtaining a driver's license." According to the report, between January 1, 2017 and April 10, 2018, DHS agencies made 594 inquiries to the DMV driver's license database and 1,085 inquiries to the DMV vehicle registration database by telephone. In 2017, DHS agencies made 113 inquiries to the driver's license database and 1,149 inquiries to the vehicle registration database through online access; and in the first three months of 2018, those agencies made 80 inquiries to the driver's license database and 341 inquiries to the vehicle registration database.

   To address this issue, the Legislature passed AB 1747 (Gonzalez, Chapter 589, Statutes of 2019), which limited the use of the state's telecommunications system containing criminal history information for immigration enforcement purposes, and for purposes of investigating immigration crimes solely because criminal history includes violation of federal immigration.

   Additionally, like all applicants for a state-issued ID card, undocumented Californians seeking one of the new ID cards would have to present the DMV with satisfactory evidence demonstrating that they are who they say they are. In the case of someone applying for one of the ID cards authorized by this bill,

however, the file would include a tacit admission that the applicant is undocumented and therefore potentially subject to immigration detention and deportation at any time. AB 1766 contains privacy provisions, adding the newly authorized ID cards to the provisions for driver's licenses issued pursuant to AB 60, stating that information and documents provided to the DMV to prove identify or residency for the purpose of the ID card are not public records and shall not be disclosed by DMV except as required by law, or in response to a subpoena for individual records in a criminal proceeding or a court order, or in response to a law enforcement request to address an urgent health or safety need if the law enforcement agency certifies in writing the specific circumstances that do not permit authorities time to obtain a court order. AB 1766 further clarifies that immigration enforcement does not constitute an urgent health and safety need.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DMV indicates that one-time costs to implement this bill by 2027 are not quantifiable at this time because programming will be required on the department's modernized IT platform, which will not be complete until after the 2025-26 fiscal year. Staff estimates one-time costs, likely in the hundreds of thousands of dollars in 2026-27 to promulgate regulations, modify forms and publications, conduct training, and make necessary IT system programming on its modernized systems to implement the provisions of this bill. (Motor Vehicle Account)

- DMV estimates the following ongoing staffing costs (Motor Vehicle Account) to accommodate the anticipated volume of applications for modified ID cards in field offices:

    - $8.6 million and 134.0 PY of staff to process approximately 280,000 applications in 2026-27 (1/2 year costs for first six months of 2024)
    - $2.2 million and 21.0 PY of staff to process approximately 91,000 applications in 2027-28.
    - $1.2 million and 11.5 PY of staff to process approximately 52,500 applications in 2028-29.
    - $845,000 and 8.0 PY of staff to process approximately 39,000 applications in 2029-30 and 38,000 applications in 2030-31.
    - Approximately $500,000 and 5.0 PY ongoing to process an estimated 25,000 applications annually thereafter.

(Staff notes that DMV staffing costs are likely to be fully offset by ID card application fee revenues. Applicants would be charge the regular $33 fee, a reduced-fee of $9, or no fee, as specified below. The bill authorizes DMV to charge an additional fee, as necessary, until 2030 to fully offset its administrative costs)

SUBJECT: Sex trafficking: hotels: actual knowledge or reckless disregard: civil penalty

SOURCE: Author

DIGEST: This bill establishes a cause of action against hotels for failing to report known sexual trafficking within the hotel, as specified, or where an employee benefits from sexual trafficking activity within the hotel, as specified.

Senate Floor Amendments of 8/24/22 cabin the latter basis for liability.

ANALYSIS:

Existing federal law:

1) Authorizes an individual who is a victim of human trafficking, peonage, or slavery, as specified, to bring a civil action against the perpetrator or whoever knowingly benefits, financially or by receiving anything of value from participation in a venture which that person knew or should have known has engaged in such acts, as specified, in an appropriate district court of the United

States and may recover damages and reasonable attorneys' fees. (18 U.S.C.S. § 1595(a).)

2) Authorizes state attorneys general to bring a civil action against persons engaging in sex trafficking, as specified, on behalf of the residents of the State. (18 U.S.C.S. § 1595(d).)

Existing state law:

1) Provides that any person who deprives or violates the personal liberty of another with the intent to obtain forced labor or services is guilty of the crime of human trafficking. (Pen. Code § 236.1.)

2) Authorizes a victim of human trafficking to bring a civil action for actual damages, compensatory damages, punitive damages, injunctive relief, any combination of those, or any other appropriate relief. A prevailing plaintiff may also be awarded attorney's fees and costs, and the plaintiff may be awarded up to three times their actual damages or $10,000, whichever is greater. In addition, punitive damages may be awarded upon proof of the defendant's malice, oppression, fraud, or duress in committing the act of human trafficking. (Civ. Code § 52.5.)

3) Requires specified businesses and establishments to post notices in a conspicuous place near the public entrance of the establishment or in another conspicuous location in clear view of the public and employees where similar notices are customarily posted. (Civ. Code § 52.6.)

4) Requires the notices to include specific language regarding a textline and various hotlines to contact if one is aware of or is a victim of human trafficking. The notice must be printed in English, Spanish, and in one other language that is the most widely spoken language in the county where the establishment is located and for which translation is mandated by the federal Voting Rights Act. The Department of Justice is required to create a model notice that may be used by these businesses. (Civ. Code § 52.6.)

5) Provides that a business or other establishment that operates intercity passenger rail or light rail stations, or bus stations shall provide at least 20 minutes of training to employees who may interact with, or come into contact with, a victim of human trafficking or who are likely to receive, in the course of their employment, a report from another employee about suspected human trafficking, in recognizing the signs of human trafficking and how to report

those signs to the appropriate law enforcement agency. A list of topics that must be covered in such training is further provided. (Civ. Code § 52.6.)

6) Subjects businesses that fail to comply with the notice and training requirements of Section 52.6 of the Civil Code to civil penalties. (Civ. Code § 52.6.)

7) Provides that nothing in Civil Code Section 52.6 prevents local governing bodies from adopting and enforcing a local ordinance, rule, or regulation to prevent slavery or human trafficking. (Civ. Code § 52.6.)

8) Requires hotels and motels to provide at least 20 minutes of classroom or other effective interactive training and education regarding human trafficking awareness to each employee who is likely to interact or come into contact with victims of human trafficking, as specified. A list of topics that must be covered in such training is further provided. (Gov. Code § 12950.3.)

This bill:

1) Subjects a hotel to liability for civil penalties and other relief if either or both of the following conditions are met:

    a) sex trafficking activity occurred in the hotel, a supervisory employee of the hotel either knew of the nature of the activity or acted in reckless disregard of the activity constituting sex trafficking activity within the hotel, and the supervisory employee of the hotel failed to inform law enforcement, the National Human Trafficking Hotline, or another appropriate victim service organization within 24 hours; and/or
    b) an employee of the hotel was acting within the scope of employment and knowingly benefited, financially or by receiving anything of value, by participating in a venture that the employee knew or acted in reckless disregard of the activity constituting sex trafficking within the hotel.

2) Authorizes a city, county, or city and county attorney, if there is reasonable cause to believe there has been a violation of the above, to bring a civil action for injunctive and other equitable relief against a hotel for violation of this section. The prosecuting office can also seek civil penalties in the amount of $1,000 for the first violation in a calendar year, $3,000 for the second violation within the same calendar year, and $5,000 for the third and any subsequent violation within the same calendar year.

3) Permits a court to exercise its discretion to increase the amount of the civil penalty up to $10,000 for any fourth or subsequent violation, considering all of the following factors:
   a) the defendant's culpability;
   b) the relationship between the harm and the penalty;
   c) the penalties imposed for similar conduct in similar statutes; and
   d) the defendant's ability to pay.

4) Provides that the lack of reporting of a sex trafficking case that occurs in a hotel shall not, by itself, without meeting the conditions laid out above, result in the liability of an employer of that establishment to the sex trafficking victim or victims in the case in question or to any other party. A violation, by itself, cannot result in criminal liability against the hotel. Nothing therein affects criminal or civil liability that may arise pursuant to other provisions of law.

5) Clarifies that hotel employees cannot be held liable under this bill.

6) Defines "hotel" as a motel, or any other operator or management company that offers and accepts payment for rooms, sleeping accommodations, or board and lodging and retains the right of access to, and control of, a dwelling unit that is required to provide training and education regarding human trafficking awareness pursuant to Section 12950.3 of the Government Code.

7) Sets a five-year statute of limitations, which runs once a minor victim attains the age of majority, if applicable.

Background

Section 52.6 of the Civil Code (Section 52.6) requires certain establishments to post notices regarding resources for witnesses to and victims of human trafficking and slavery. That section also requires rail and bus stations to train their employees in identifying and reporting incidents of human trafficking. The Fair Employment and Housing Act (FEHA) also requires hotel and motel employers to provide at least 20 minutes of training and education regarding human trafficking awareness to their employees, as provided. Both federal and state law authorize actions by victims of human trafficking, and sex trafficking in particular.

Given the incidence of trafficking in hotels and motels, and the desire to expand the authority of local prosecutors to go after entities that perpetrate or facilitate sex trafficking, this bill establishes a cause of action against hotels when sex trafficking occurs within their establishments. The two bases of liability are where

a supervisory employee knows of or recklessly disregards sexual trafficking that has occurred, or an employee acting within the scope of employment knowingly benefitted from the sexual trafficking, as provided.

The bill is sponsored by the author. The bill is supported by various organizations, including the American Association of University Women. It is opposed by the American Civil Liberties Union (ACLU) California Action based on concerns of involving law enforcement, lack of clarity on what triggers liability, and the potential to disrupt and harm consensual sex work.

Comments

According to the author:

> Human trafficking is the fastest-growing crime in the United States, and it is happening in seedy hotels and motels throughout all parts of California. AB 1788 would give local prosecutors and City Attorneys another tool to fight trafficking and save victims. This important bill makes it clear that California will no longer tolerate hotel and motel operators turning a blind eye towards this type of illegal activity.

Combatting the incidence of human trafficking in hotels and motels

This bill imposes liability on hotels in two circumstances. First, liability attaches where a "supervisory employee" knows of or is in reckless disregard of sex trafficking that occurred within the establishment and failed to inform law enforcement, the NHTH, or another appropriate victim service organization within 24 hours. A "supervisory employee" is one that either holds responsibility for duties that are not substantially similar to those of their subordinates; or any individual, regardless of the job description or title, who holds certain authority, in the interest of the employer, and the exercise of such authority is not of a merely routine or clerical nature, but requires the use of independent judgment.

The second basis for liability is where an employee of the hotel, acting within the scope of employment, knowingly benefited, financially or by receiving anything of value, by participating in a venture that the employee knew or acted in reckless disregard of the activity constituting sex trafficking within the hotel.

This bill bolsters the existing authority to hold entities civilly liable for human trafficking. The federal Trafficking Victims Protection Act (TVPA), 18 U.S.C. § 1581 et seq., provides tools to combat human trafficking. Relevant here, it provides

an individual who is a victim of sex trafficking to bring a civil action against the perpetrator or whoever "knowingly benefits, financially or by receiving anything of value from participation in a venture which that person knew or should have known has engaged in" sex trafficking. The victim is authorized to recover damages and reasonable attorneys' fees. (18 U.S.C. § 1595(a).) The TVPA also authorizes the Attorney General of an affected state to bring an action against a person that engages in sex trafficking on behalf of the residents of the State to "obtain appropriate relief." (18 U.S.C. § 1595(d).)

In California, a victim of human trafficking, as defined, may bring a civil action for actual damages, compensatory damages, punitive damages, injunctive relief, any combination of those, or any other appropriate relief. A prevailing plaintiff may also be awarded attorney's fees and costs, as well as treble and punitive damages, as specified. (Civ. Code § 52.5.)

A civil action for enforcement of violations of this bill can only be brought by a city, county, or city and county attorney, who may seek injunctive and other equitable relief. They can also seek civil penalties of $1,000 for the first violation, $3,000 for the second violation within the same calendar year, and $5,000 for the third and any subsequent violations within the same calendar year. For fourth and subsequent violations, the court is also granted discretion to increase the penalty up to $10,000 based on a consideration of various factors, such as culpability and the defendant's ability to pay. Liability under the bill is imposed on the hotel itself, and the bill specifically provides that no liability arises pursuant to the bill against an employee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Senate Appropriations Committee, "Unknown, potentially-significant workload cost pressures to the courts to adjudicate alleged violations of this measure (Special Fund - Trial Court Trust Fund, General Fund)."

Peace Officers Research Association of California
One individual

OPPOSITION: (Verified 8/23/22)

ACLU California Action
Adult Industry Laborers and Artists Association

ARGUMENTS IN SUPPORT: The American Association of University Women California writes:

> "Hotels are required to provide training and education regarding human trafficking awareness. AB 1788 goes a step further by requiring supervisory employees to use that training and education to report sex trafficking when it occurs on the hotel property. The bill provides important civil penalties up to $5,000 (for a third offense) and $10,000 (for a fourth or greater offense) for hotels when a supervisory employee is aware of, or recklessly disregards sex trafficking occurring on the hotel property. The measure also imposes civil penalties when such an employee financially or otherwise benefits from sex trafficking occurring on the hotel property.

According to World Population Review (https://worldpopulationreview.com/):

> California consistently has the highest human trafficking rates in the United States, with 1,507 cases reported in 2019. 1,118 of these cases were sex trafficking cases, 158 were labor trafficking, and 69 were both sex and labor... Most of the sex trafficking cases reported in California were illicit massage and spa businesses and hotel or motel based.

ARGUMENTS IN OPPOSITION: ACLU California Action argues:

> AB 1788 continues to center a law enforcement response to human trafficking despite trafficking organizations' calls for public health approaches. The Coalition to Abolish Slavery & Trafficking (CAST), for example, has advocated for "[f]ocusing on human trafficking through a public health lens, as opposed to a criminal justice approach," recognizing that the "public health lens informs who intervenes and engages in the fight against human trafficking" and that "we cannot arrest our way out of human trafficking[.]" A recent report from the USC Gould School of Law International Human Rights Clinic also highlights the over-policing of sex trafficking and the need to utilize community and public health responses to trafficking in commercial sex. While the bill allows calling such organizations, as long as informing law enforcement is listed as one of the options to escape liability, that will seem like the easiest call to make for some hotels and will continue to further a law enforcement

response rather than a public health approach to human trafficking. AB 1788 would also harm sex workers and others who are not sex trafficking victims. By making hotels financially liable for not reporting sex trafficking activity, the bill incentivizes over-reporting by hotels to avoid civil penalties. This will undoubtedly put sex workers at jeopardy as hotels will report any suspected incidents of commercial sex activity rather than risk penalties of $1,000 or more. Sex work has been erroneously conflated by some with sex trafficking, further increasing the risk that sex workers will be harmed by this bill.

SUBJECT: Postadoption contact agreements: reinstatement of parental rights

SOURCE: Children's Law Center of California

DIGEST: This bill helps siblings maintain contact with each other when they are in the child welfare system and provides further avenues for some parents to have their parental rights reinstated after they have been terminated.

Senate Floor Amendments of 8/25/22 strike provisions that would allow the reinstatement of parental rights for children who have been adopted when the adoptive parent's parental rights remain intact. Additionally, the amendments clarify and limit when county placing agency shall not be required to convene a sibling contact agreement related meeting within 90 days after the termination of parent rights and prior to finalization of adoption, as specified. These amendments address opposition from the County Welfare Directors Association.

Senate Floor Amendments of 8/18/22 clarify the application of the provisions of this bill to Indian children adopted through a tribal customary adoptions, as well as

clarify the responsibility of adoptive parent(s) when parental rights are reinstated for a child, as provided.

ANALYSIS:

Existing law:

1) Makes legislative findings and declarations regarding the benefit of continuing contact between some adoptive children and their birth relatives and the importance of postadoption contact agreements, which can be beneficial to adoptive children under certain circumstances. States that nothing in California adoption laws shall be construed to prevent adopting parents from entering into a voluntary agreement with the child's birth relatives to permit continuing contact between the child and the birth relatives if the agreement is found by the court to have been executed voluntarily and to be in the best interests of the child at the time the adoption petition is granted. Limits the terms of a postadoption contact agreement to just sharing information about the child for any relative, other than the birth parents, who does not have a preexisting relationship with the child. Provides ways to seek enforcement of a post-adoption contact agreement, but requires the agreement to warn the parties that the adoption will not be set aside due to failure to comply with the terms of the postadoption contact agreement. (Fam. Code § 8616.5.)

2) Allows a court, in an appropriate action, to find that more than two persons with a claim for parentage are parents if the court finds that recognizing only two parents would be detrimental to the child. In determining detriment, requires the court to consider all relevant factors, including the harm of removing the child from a stable placement with a parent who has fulfilled the child's physical and psychological needs for a substantial period of time. Provides that a finding of detriment to the child does not require a finding of unfitness of any person. (Fam. Code § 7612.)

3) Creates an exception to the rule that adoption relieves the existing parents of all parental duties and responsibilities for an adopted child if the existing parents and the prospective adoptive parent sign a waiver at any time prior to finalization of the adoption. (Fam. Code § 8617.)

4) Creates an exception to the rule that adoption relieves the birth parents of all parental duties and responsibilities for the adoption of an adult child if the adult child chooses to sign a waiver of termination of parental duties and responsibilities prior to finalization of the adoption. (Fam. Code § 9306.)

5) Requires states to use "reasonable efforts" to place siblings together, unless such placement is contrary to their safety or well-being. If siblings are not placed together, visitation between them must occur frequently, unless it is contrary to their safety or well-being. (42 U.S.C. Sec. 671 (a).)

6) States that it is the intent of the Legislature to (a) ensure that siblings who are removed from a home will be placed in foster care together unless the placement is contrary to the safety or well-being of any sibling; and (b) when a child has been removed from the child's home and the child has siblings who remain in the custody of a parent subject to the court's jurisdiction, the court has the authority to develop a visitation plan for the siblings, unless it has been determined that visitation is contrary to the safety or well-being of any sibling. (Welf. & Inst. Code § 16002 (a).)

7) Requires the county adoption agency or the Department of Social Services (DSS), if parental rights are terminated and the court orders a dependent child or ward to be placed for adoption, to take steps to facilitate ongoing sibling contact, except in those cases where the court determines by clear and convincing evidence that sibling interaction is contrary to the safety or well-being of the child. Steps include:

   a) Providing training to prospective adoptive parents about the importance of sibling relationships to the adopted child and counseling on methods for maintaining sibling relationships and information about siblings of the child.

   b) To the extent practicable, requires the county placing agency to convene a meeting with the child, the siblings of the child, the prospective adoptive parents, and a facilitator for the purpose of deciding whether to voluntarily execute a postadoption sibling contact agreement after termination of parental rights and prior to finalization of the adoption. Provides that the county placing agency is not required to convene the meeting if the county placing agency determines that such a meeting or postadoption sibling contact agreement would be contrary to the safety and well-being of the child or the child requests that the meeting not occur. Allows the child to petition the court for an order requiring the county placing agency to convene a meeting to decide whether to voluntarily execute a postadoption sibling contact agreement. (Welf. & Inst. Code § 16200 (e).)

8) Sets forth procedures for enforcing postadoption contact agreements between siblings for children adopted through the child welfare system. Provides that the court granting the petition of adoption maintains jurisdiction over the child

for enforcement of the postadoption contact agreement. (Welf. & Inst. Code § 366.29.)

9) Requires a social worker, where possible and appropriate, to place a child, who has been removed from their parents or guardians because of abuse or neglect, together with their siblings or half-siblings also being removed, or to describe continuing efforts to place them together if they are not initially placed together, or to explain why placing them together is inappropriate. (Welf. & Inst. Code § 306.5.)

10) Requires any order placing a child in foster care to provide for visitation between a child and any siblings unless the court finds by clear and convincing evidence that sibling interaction is contrary to the safety and well-being of either child. Allows any person, including a child or nonminor dependent, to petition the juvenile court to assert a sibling relationship of a child or nonminor dependent. (Welf. & Inst. Code § 362.1.)

11) Provides that any order of the juvenile court terminating parental rights, as provided, is conclusive and binding to those with notice, but this does not limit the right to appeal the order. (Welf. & Inst. Code § 366.26 (i)(1).)

12) Allows, notwithstanding 10), a child, who has not been adopted after the passage of at least three years from the date the court terminated their parents' rights, and for whom the court has determined that adoption is no longer the permanent plan, to petition the juvenile court to reinstate parental rights, as provided. Allows the child to file the petition prior to the expiration of the three-year period, provided DSS, or the county child welfare adoption agency, and the child stipulate that the child is no longer likely to be adopted. If it appears that the best interests of the child may be promoted by reinstatement of parental rights, requires the court to order that a hearing be held. Requires the court to grant the petition if it finds by clear and convincing evidence that the child is no longer likely to be adopted and that reinstatement of parental rights is in the child's best interest. (Welf. & Inst. Code § 366.26 (i)(3).)

13) Allows parents, interested persons, and children or nonminor dependents to petition the juvenile court to modify an order issued in a dependency case based on a change of circumstances. (Welf. & Inst. Code § 388.)

14) Provides for the use of tribal customary adoption in the child welfare system to allow Indian children to be adopted without first terminating the birth parents' rights. (Welf. & Inst. Code § 366.24)

This bill:

1) Allows a postadoption contact agreement with birth relatives to include, for siblings, actual contact with the child, even if the siblings do not have a preexisting relationship with the child.

2) Adds siblings of nonminor dependents to the list of those required to get notice of hearings to terminate parental rights in dependency court.

3) Requires, except as provided in 4), if parental rights are terminated and the court orders that a dependent child or ward be placed for adoption, the county placing agency, except when the court determines that sibling interaction is contrary to the safety or well-being of the child, to convene a meeting, within 90 days of the termination of parental rights and prior to finalization of the adoption, with the child, the siblings of the child, the prospective adoptive parents, and a facilitator to execute a postadoption sibling contact agreement.

4) Prohibits, if the child being placed for adoption does not wish to enter into a postadoption sibling contact agreement, the county placing agency from convening the meeting in 3). Further prohibits the county placing agency from convening the meeting in 3) if the court, at the hearing to terminate parent rights, after considering the recommendation, if any, of the county placing agency, determines by clear and convincing evidence that sibling interaction is contrary to the safety or well-being of the child.

5) Allows, in addition to situations permitted in existing law, a child or nonminor dependent to petition the juvenile dependency court for reinstatement of parental rights in any of the following situations:

    a) A child for whom the parental rights of their biological parents were terminated, who was subsequently adopted, and for whom the parental rights of their adoptive parents have been terminated.

    b) A nonminor dependent for whom the court assumed dependency jurisdiction aft they stopped receiving support from their adoptive parents or whose adoptive parents died after the nonminor dependent turned 18 years of age, but before they attained 21 years of age.

    c) A child or nonminor dependent who is an Indian child, as defined, and for whole parental rights of their biological parents are modified by a tribal customary adoption, who was subsequently adopted, and for whom the parent rights of the adoptive parent or parents have been modified,

terminated, or who are in agreement with the reinstatement or modification of parental rights.

6) Requires a nonminor dependent or a child over 12 years of age to sign the petition in 5), absent a showing of good cause why the nonminor dependent or child cannot do so.

7) Requires the court to order a hearing on a petition in 5) if it appears that the best interest of the child or nonminor dependent may be promoted by reinstatement of parental rights. Sets forth notice requirements.

8) Requires, consistent with existing law, the court to grant the petition in 5) if it finds, by clear and convincing evidence, that the child is no longer likely to be adopted and that reinstatement of parental rights is in the child's best interest. Requires the court, if it reinstates parental rights over a child who is under 12 years of age and for whom the new permanent plan will not be reunification with a parent or legal guardian, to specify the factual basis for its findings that it is in the best interest of the child to reinstate parental rights, consistent with existing law. Provides that this provision is intended to be retroactive to any child under the jurisdiction of the juvenile court, consistent with existing law.

Background

This bill is sponsored by the Children's Law Center of California and supported by other organizations that advocate for children and youth in the child welfare system.

Comments

The author writes:

> Ensuring that those in the foster care system have access to the essential bond of a blood relative is a basic right any child deserves. Often, when parental rights are terminated in child welfare cases, the adopted child loses all familial ties, including with siblings. AB 1794 looks to address the gaps and inconsistencies in implementation of current law surrounding siblings who are separated by adoption. This bill would allow children and young adults adopted through the child welfare system to maintain critical connections to their biological family and community. Additionally, in some circumstances, a child/nonminor dependent may re-establish a relationship with their biological parents when an adoption fails. It makes sense for these children, who want to live with their birth parents, to have an option to reinstate the biological parents' rights; however, there is no mechanism for this process to occur.

Unless it has been determined that placement together is contrary to the safety and well being of any sibling. AB 1794 provides a path forward for these families. We have plenty more work to do. But, this is a step toward a better foster care system.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, unknown ongoing cost pressures to the trial courts in increased staff workload for family courts to review additional information pertaining to postadoption agreements and parental termination cases (Special Fund - Trial Court Trust Fund, General Fund)… Although courts are not funded on the basis of workload, increased pressure on the Trial Court Trust Fund and staff workload may create a need for increased funding for courts from the General Fund (GF) to perform existing duties. Numerous trial court operations are funded through the imposition and collection of criminal fines and fees. However, the Legislature has reduced and eliminated criminal fines and fees over the past five years. As a result, the 2022-23 Budget includes an ongoing annual allocation of $151.5 million and a one-time allocation of $10.3 million backfill from the General Fund in order to address declining revenue to the Trial Court Trust Fund.

SUBJECT: Immunization registry

SOURCE: California Immunization Coalition
ProtectUS
San Diego Unified School District

DIGEST: This bill requires, rather than permits, health care providers and specified agencies that have access to immunization information to disclose certain information from a patient medical record or a client record to the California Department of Public Health and local health departments. This bill adds "patient's or client's race and ethnicity" to the list of information collected for purposes of immunization information and reminder systems. This bill adds two purposes that health care providers and education, childcare, and human services agencies may use individual immunization information.

Senate Floor Amendments of 8/17/22 require health care providers to collect an immunization patient's race *and* ethnicity. This bill previously said race *or* ethnicity.

ANALYSIS:

Existing law:

1) Permits local health officers (LHOs) to operate immunization information systems in conjunction with the Immunization Branch of the California Department of Public Health (CDPH) either separately within their individual jurisdictions or jointly among more than one jurisdiction. The largest regional registry is referred to as the California Immunization Registry or "CAIR2." [HSC §120440(b)]

2) Permits health care providers and specified agencies (such as schools, childcare facilities, and human services agencies), unless a refusal to permit record sharing is made, to disclose the information specified in 3) below from the patient's medical record, or the client's record, to local health departments (LHDs) and CDPH. Permits LHDs and CDPH to disclose this information to each other and, upon a request for information pertaining to a specific person, to health care providers taking care of the patient, the Medical Board of California, and the Osteopathic Medical Board of California. Permits LHDs and CDPH to disclose this information to schools, childcare facilities, county human services agencies, family childcare homes, foster care agencies, California Special Supplemental Food Program for Women, Infants, and Children (WIC) service providers, and health plans, as specified. [HSC §120440(c)]

3) Requires information included in the immunization information systems to be:

    a) The name of the patient/client and names of the parents/guardians of the patient/client and their current address and telephone number;

    b) Types and dates of immunizations received by the patient/client;

    c) Manufacturer and lot number for each immunization received;

    d) Adverse reaction to immunizations received;

    e) Nonmedical information necessary to establish the patient's/client's unique identity and record, including their gender, date of birth, place of birth, and

information needed to comply with California's immunization mandates; and,

f) Results of tuberculosis screening.

4) Requires health care providers, LHDs, and CDPH to maintain the confidentiality of this information in the same manner as other medical record information with patient identification that they possess. Subjects providers, LHDs, CDPH, and contracting agencies to civil action and criminal penalties for the wrongful disclosure of this information. Requires providers, LHDs, and CDPH to use this information only for these specified purposes: to provide immunization services; to provide or facilitate provision of third-party payer payments for immunizations; and, to compile and disseminate statistical information of immunization status on groups of patients or clients or populations, as specified. [HSC §120440(d)(1)]

5) Requires schools, childcare facilities, family childcare homes, WIC service providers, foster care agencies, county human services agencies, and health care plans to maintain the confidentiality of this information in the same manner as other client, patient, and pupil information that they possess. Subjects these institutions and providers to civil action and criminal penalties for the wrongful disclosure of the information. Requires these institutions and providers to use the information only for the following purposes:

   a) In the case of schools, childcare facilities, family childcare homes, and county human services agencies, to carry out their responsibilities regarding required immunization for attendance or participation benefits, or both;

   b) In the case of WIC service providers, to perform immunization status assessments of clients and to refer those clients found to be due or overdue for immunizations to health care providers;

   c) In the case of health plans, to facilitate payments to health care providers, to assess the immunization status of their clients, and to tabulate statistical information on the immunization status of groups of patients, without including patient-identifying information in these tabulations; and,

   d) In the case of foster care agencies, to perform immunization status assessments of foster children and to assist those foster children found to be due or overdue for immunization in obtaining immunizations from health care providers. [HSC §120440(d)(1)]

6) Permits a patient or their parent/guardian to refuse to permit record sharing. Requires the health care provider administering an immunization and any other agency possessing any patient/client information, if planning to provide patient or client information to an immunization system, to inform the patient/client, their parent/guardian, the following information:

   a) The information listed in 3) above may be shared with LHDs and CDPH;

   b) Any information shared with LHDs or CDPH will be treated as confidential medical information and will be used only to share with each other, and, upon request, with health care providers specified agencies, which all are required to treat that information confidential;

   c) The patient/client, or their parent/guardian, has the right to examine any immunization-related information or tuberculosis screening results shared to correct any errors in it; and,

   d) The patient/client, or their parent/guardian, may refuse to allow this information to be shared or to receive immunization reminder notifications at any time, or both. After refusal, the patient's/client's physician may maintain access to this information for the purposes of patient care or protecting the public health. After refusal, LHDs and CDPH may maintain access to this information for the purpose of protecting the public health. [HSC §120440(e)]

7) Prohibits this information from being shared if a patient/client, or their parent/guardian, refuses to allow the sharing of immunization information. [HSC §120440(l)]

This bill:

1) Requires, rather than permits, health care providers and specified agencies that have access to immunization information to disclose certain information from a patient medical record or a client record to LHDs and CDPH.

2) Adds "patient's or client's race and ethnicity" to the list of information collected for purposes of local/regional immunization information and reminder systems and CAIR2.

3) Adds the following to the purposes that health care providers, education, childcare, and human services agencies may use immunization information: in the case of schools, childcare facilities, family childcare homes, and county human services agencies; for the COVID-19 public health emergency; and, to

perform immunization status assessments of pupils, adults, and clients to ensure health and safety.

4) Specifies that in the case of schools, this only applies if the school's governing board/body has adopted a policy mandating COVID-19 immunization for school attendance and the school limits the use of the data to verifying immunization status for this purpose.

Comments

1) *Author's statement.* According to the author, this bill updates the use and functionality of CAIR2 to keep schools open and safe during the current pandemic by authorizing and streamlining schools' ability to verify their student's vaccine record. This bill will also bolster data submissions to support health equity and accuracy by ensuring all relevant practitioners are entering immunization data and also requiring race and ethnicity information.

2) *CAIR2.* CAIR2 confidential, statewide immunization information system for California residents. The CAIR2 system consists of 8 regions: Northern California, Greater Sacramento Area, Bay Area, Central Valley, Central Cost, Los Angeles-Orange, Inland Empire, Imperial, and San Diego). According to CDPH, the registry is accessed online to help providers and other authorized users track patient immunization records, reduce missed opportunities, and help fully immunize Californians of all ages. California law allows health care providers to share patient immunization information with an immunization registry as long as the patient (or their parent or legal guardian) is informed about the registry. Patients also have the right to 'lock' the record in CAIR2, so that immunization information is only visible to the patient's provider. Participation in CAIR2 is voluntary and is open to healthcare providers, schools, childcare facilities, county welfare departments, family childcare homes, foster care agencies, WIC service providers, and health care plans. To participate, an organization must enroll in CAIR2 and agree to maintain the confidentiality of the patient immunization information and only use the information to provide patient care or to confirm that childcare or school immunization requirements have been met. Health care providers and other authorized users can access patient immunization information, determine vaccinations due, enter new patients or vaccine doses administered, remind or recall patients due for immunizations, and run patient reports. RIDE is California's only other immunization registry, which serves a similar function in the Central Valley counties of San Joaquin, Stanislaus, Merced, Amador, Calaveras, Alpine, Tuolomne, and Mariposa.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CDPH estimates state staffing costs of approximately $950,170 over the first two years and $303,216 ongoing thereafter (General Fund).
- Unknown costs to local school districts, health departments and other entities to disclose immunization information to LHDs and CDPH. Costs to local agencies and school districts may be reimbursable by the state, subject to a determination by the Commission on State Mandates.

ARGUMENTS IN SUPPORT: The California Immunization Coalition, San Diego Unified School District, ProtectUS are the sponsors of this bill and state that this bill allows access to critical immunization information in a public health emergency to perform immunization status assessments, and to ensure the health and safety of school communities. This bill will ensure that immunization information is available in the event of a public health emergency. This information is already collected and available in county and State data systems. San Diego Unified states that this information is critical during a public health emergency to assess the health and safety of our school sites, and to determine whether there are specific schools that need additional support to access vaccines.

The American Academy of Pediatrics, California, the California Academy of Family Physicians and the California Medical Association state in support that this bill promotes uniform health and safety protocols and aligns with the intent of existing vaccination statutes putting children's health above any non-scientific concerns or considerations. They indicate the proposed updates will require healthcare practitioners to ensure that data on the vaccines they administer is entered into the registry and that the patient's race/ethnicity data is recorded, along with authorizing schools to view data on all vaccines related to student safety.

ARGUMENTS IN OPPOSITION: A Voice for Choice Advocacy is opposed unless amended, and states:

1) The multitude of data discrepancies currently in CAIR2 need to be addressed;

2) Patients and parents of patients should be allowed to opt-in to the immunization registries;

3) Database privacy should be in line with other California medical databases such as the California's Controlled Substance Utilization Review and Evaluation System database; and,

4) Records granted disclosure from the patient should maintain the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and the Family Educational Rights and Privacy Act (FERPA) privacy rights if further shared.

Opponents of this bill, including the Children's Health Defense - California Chapter, argue that current laws and procedures are sufficient to maintain safety in childcare homes, facilities, classrooms and at schools. Opponents are concerned this bill will lead to discrimination and segregation that would be an unnecessary overreach. California already has strict regulations regarding conditions of enrollment regarding immunizations as well as health and safety requirements for attendance. Furthermore, there are concerns receiving basic needs from government human service agencies will be held at ransom from recipients based on vaccine status. The opponents conclude that those who utilize human service agencies in California must be able to receive basic care regardless of vaccine status, and that can only be guaranteed if this bill does not move forward.

SUBJECT: Driver's licenses: bone marrow and blood stem cell registry

SOURCE: Author

DIGEST: This bill requires the Department of Motor Vehicles (DMV) to ask on the driver's license (DL) form whether an applicant wishes to register to be a bone marrow donor and authorizes DMV to share an applicant's contact information with the National Marrow Donor Program.

Senate Floor Amendments of 8/24/22 strengthen the privacy provisions of the bill by prohibiting the National Marrow Donor Program from disseminating information received from the DMV.

ANALYSIS:

Existing law:

1) Authorizes Donate Life California, a non-profit entity, to maintain the registry for people who have identified themselves as organ, eye, and tissue donors upon their death.

2) Requires DMV to ask verbally of all applicants for original or renewal DL or identification (ID) cards if they want to become organ and tissue donors.

3) Requires DMV to enter into a memorandum of understanding (MOU) with Donate Life California regarding the language on the DL form regarding enrollment.

4) Requires DMV to print the word “DONOR” on the face of a DL or ID card to any registrant.

This bill:

1) Requires DMV to ask during the DL application process if the applicant wishes to become a potential bone marrow or blood stem cell donor by enrolling in the National Marrow Donor Program's registry.

2) Requires DMV to enter into a MOU with the National Marrow Donor Program on the language to be included on the DL application form, including definitions of enrollment and donor requirements, as well as legal disclosures.

3) Requires DMV to transmit applicants' full name, mailing address, date of birth, telephone number, and email address on a weekly basis to the National Marrow Donor Program's registry, and prohibit the Program from further disseminating such information.

4) Requires DMV to post the enrollment form on DMV's website.

5) Requires the California Health and Human Services Agency to post the enrollment form on their website.

6) Becomes effective January 1, 2027.

Comments

1) *Purpose of this bill*. According to the author, "In the United States, less than 30% of patients can find a fully matched bone marrow donor in their family or network. It is especially hard for people of color to find a donor due to the lack of diversity in donors. In order to make bone marrow more accessible to save the lives of patients, it is chief that we increase the number of donors. AB 1800 would predictably increase the number of bone marrow donors by expanding awareness for the ability to donate. Educating Californians through the DMV has been proven effective by the increase of organ donors in the United States

following the DMV's option to enroll. Increasing the number of donors will not only save lives but will also increase equality among all recipients."

2) *Anatomical Donations*. The Uniform Anatomical Gift Act (Act) was passed in the US in 1968 and has since been revised in 1987 and in 2006. The Act sets a regulatory framework for the donation of organs, tissues, and other human body parts in the US pursuant to state statutes. An individual who is at least 18 years of age may make an anatomical gift by a signed document on the Donate Life California website or an interested individual can sign up electronically by checking "YES!" at the DMV when applying for or renewing a DL or ID. Since 2001, the DMV has provided Californians the opportunity to register as Organ and Tissue Donors using its DL and ID application forms. Today, there are over 17.5 million Californians registered to be organ donors, over 95% of whom enrolled when they applied for a DMV DL or ID card.

   The National Marrow Donor Program (NMDP) is a nonprofit organization founded in 1986 that operates the Be the Match Registry of volunteer hematopoietic cell donors and umbilical cord blood units in the United States. According to Be the Match, there are 25 million donor registrants, nearly 12.5 million of which are in the United States. 1.1 million are in California. From 2016-2020, 1,691 Californians were donors, while 5,339 California patients were looking for a donor.

   According to *Getting to the Heart of Being the Match: A Quantitative Analysis of Bone Marrow Donor Recruitment and Retention Among College Students*, in the U.S. over 20,000 individuals each year have been diagnosed with severe or life threating diseases that can be treated by a bone marrow or umbilical cord blood transplant from matched donors. Only 30% of people needing a bone marrow transplant are able to get one from a family member. The other 70% have to rely on the registry.

   AB 1800 requires the DMV to include a question during application for a new or renewed DL for the applicant to opt-in to register with the NMDP during the application for a new or renewed drivers' license. AB 1800 is an attempt to facilitate more marrow donors across to the state to keep up with the rising demand.

3) *DMV Modernization*. Currently, the DMV is modernizing their IT systems. This update requires the DMV to place its "core legacy" IT system in "freeze mode," meaning that all new laws that require the DMV to make any IT updates must be delayed to accommodate the modernization efforts. AB 1800 requires the DMV to program into their systems a database of individuals who have

agreed to share their information, including contact information, with Be the Match. As contact information is not currently collected by the DMV during the DL application process, this would cause programming challenges for the DMV. In addition, DMV will need to work with the National Marrow Donor Program to develop an MOU governing the language to be included on the driver's license application. This bill has a delayed operative date of January 1, 2027, to account for this modernization effort.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DMV indicates that one-time costs to implement this bill by 2027 are not quantifiable at this time because programming will be required on the department's modernized platform, which will not be complete until after the 2025-26 fiscal year. Staff estimates one-time minor to moderate costs in 2026-27, potentially up to the low hundreds of thousands of dollars, to modify forms and publications, conduct necessary programming to its electronic driver's license and identification card application, as well as online and kiosk renewal systems, and enter into an MOU with the NMDP. (Motor Vehicle Account)

- DMV would also incur unknown, likely minor to moderate ongoing costs to collect and transmit potential donor information to the NMDP, and for staff time to answer questions in field offices. (Motor Vehicle Account)

SUBJECT: Court fees: ability to pay

SOURCE: Coalition of California Welfare Rights Organizations

DIGEST: This bill exempts a person who meets the criteria for a waiver of court fees and costs from being obligated to pay the filing fee for specified expungement petitions, and prohibits a court from denying expungement relief to an otherwise qualified person, and who meets the criteria, as specified, for a waiver of court fees and costs, solely on the basis that the person has not yet satisfied their restitution obligations.

Senate Floor Amendments of 8/22/22 take care of a potential conflict between this bill and SB 1106 (Wiener) providing that if this bill and SB 1106 are both signed, the overlapping provisions in SB 1106 will take precedence.

ANALYSIS:

Existing law:

1) Requires a court to grant expungement relief, with specified exceptions, for a misdemeanor or felony conviction for which the sentence included a period of probation and the petitioner successfully completed probation or terminated early, and is not serving a sentence for, on probation for, or charged with the commission of any offense. The court has discretion to do so in the interests of justice in other probation cases. (Penal Code § 1203.4 (a) & (b).)

2) Specifies that if expungement relief is granted, the person is released from the penalties and disabilities resulting from the conviction, except as specified. (Penal Code, § 1203.4, (a) & (c).)

3) States that a person who petitions for expungement may be required to reimburse the court for the actual costs of services rendered, whether or not the petition is granted, at a rate to be determined by the court, not to exceed $150. (Penal Code § 1203.4 (d).)

4) States that a person who petitions for expungement may be required to reimburse the county for the actual costs of services rendered, whether or not the petition is granted, at a rate to be determined by the county board of supervisors, not to exceed $150. (Penal Code § 1203.4 (d).)

5) States that a person who petitions for expungement may be required to reimburse the city for the actual costs of services rendered, whether or not the petition is granted, at a rate to be determined by the city council, not to exceed $150. (Penal Code § 1203.4 (d).)

6) Authorizes the court to order reimbursement in any case in which the petitioner appears to have the ability to pay, without undue hardship, all or any portion of the costs. (Penal Code § 1203.4 (d).)

7) Provides that the ability to pay the reimbursement fees for expungement shall not be a prerequisite to a person's eligibility for expungement. (Penal Code § 1203.4 (d).)

8) Provides that the ability to pay the reimbursement fees for expungement shall be determined by the court using the following standards:

    a) The defendant's present financial position;

b) The defendant's reasonably discernible future financial position, as specified;

c) The likelihood that the defendant will be able to obtain employment within a six-month period from the date of the hearing; and

d) Any other factor that may bear upon the defendant's financial capability to reimburse the county for the costs of the legal assistance provided to the defendant. (Penal Code, §§ 1203.4 (d); 987.8(g)(2).)

9) Permits the following persons to proceed without paying court fees and costs because of their financial conditions, in specified court proceedings:

a) A person who is receiving public benefits under one or more specified programs including, Supplemental Security Income (SSI), State Supplementary Payment (SSP), California Work Opportunity and Responsibility to Kids Act (CalWORKs), federal Tribal Temporary Assistance for Needy Families (Tribal TANF) grant program, Supplemental Nutrition Assistance Program (SNAP), the California Food Assistance Program, County Relief, General Relief (GR), or General Assistance (GA), Cash Assistance Program for Aged, Blind, and Disabled Legal Immigrants (CAPI), In-Home Supportive Services (IHSS), and Medi-Cal;

b) A person whose monthly income is 125 percent or less of the current poverty guidelines updated periodically in the Federal Register by the United States Department of Health and Human Services under the authority of paragraph (2) of Section 9902 of Title 42 of the United States Code; and,

c) A person who, as individually determined by the court, cannot pay court fees without using moneys that normally would pay for the common necessaries of life for the person and the person's family, as specified. (Government Code § 68632.)

10) Prohibits the imposition of excessive fines. (Cal. Const., Art. 1, § 17.)

11) States that the Legislature finds and declares that our legal system cannot provide "equal justice under law" unless all persons have access to the courts without regard to their economic means; that California law and court procedures should ensure that court fees are not a barrier to court access for those with insufficient economic means to pay those fees; that fiscal responsibility should be tempered with concern for litigants' rights to access

the justice system; that the procedure for allowing the poor to use court services without paying ordinary fees must be one that applies rules fairly to similarly situated persons, is accessible to those with limited knowledge of court processes, and does not delay access to court services; and that the procedure for determining if a litigant may file a lawsuit without paying a fee must not interfere with court access for those without the financial means to do so. (Gov. Code § 68630.)

12) Requires, in addition to any other penalty imposed, the defendant to pay both, a restitution fine and restitution to the victim, which is enforceable as a civil judgment. (Penal Code, § 1202.4 (a)(3).)

13) Provides that, if the defendant is convicted of a felony, the restitution fine shall not be less than $300 and not more than $10,000. If the defendant is convicted of a misdemeanor, the restitution fine shall not be less than one $150 and not more than one thousand dollars $1,000. (Penal Code § 1202.4 (b)(1).)

14) States that a defendant's inability to pay shall not be considered a reason not to impose a restitution fine. A defendant's inability to pay may be considered as a relevant factor in setting the amount of the restitution fine in excess of the minimum. (Penal Code § 1202.4 (c), (d).)

15) Exempts the restitution fine from various penalty assessments. (Penal Code, § 1202.4 (e).)

16) Allows the county board of supervisors to impose a fee to cover the actual administrative cost of collecting the restitution fine, not to exceed 10 percent of the amount of the restitution fine. (Penal Code § 1204.4 (l).)

17) Provides that a crime victim who incurs an economic loss as a result of the crime shall receive restitution directly from a defendant convicted of the crime. (Penal Code § 1202.4 (a).)

18) Provides that a restitution order shall be of a dollar amount that is sufficient to fully reimburse the victim or victims for every determined economic loss incurred as the result of the defendant's criminal conduct, including but not limited to medical expenses, mental health counseling expenses, wages or lost profits, noneconomic losses, including psychological harm, interest at the rate of 10 percent per annum, actual and reasonable attorney's fees, and relocation fees. (Pena; Code § 1204.5 (f)(3).)

19) Provides that a defendant's inability to pay shall not be a consideration in determining the amount of a restitution order. (Penal Code § 1204.5 (g).)

20) Requires, in every case in which the defendant is granted probation, the court to make the payment of restitution fines and restitution orders a condition of probation. (Penal Code § 1204.4 (m).)

This bill:

1) Provides that person seeking relief pursuant to Sections 1203.4, 1203.41, 1203.42, and 1203.45, and who meets the criteria set forth in Section 68632 of the Government Code shall not be required to reimburse the court, the county, or any city for the actual costs of services rendered, whether or not the petition is granted and records are sealed or expunged.

2) Provides that if a person otherwise qualifies to have their records sealed or expunged pursuant to this chapter, relief under this chapter shall not be denied to a person who meets the criteria set forth in Section 68632 of the Government Code and whose probation was conditioned on making victim restitution, solely on the basis that the person has not satisfied their restitution obligation.

Background

According to the author:

> California courts charge fees and costs in addition to the penalties resulting from criminal convictions. However, these added financial penalties are not reinvested into rehabilitative purposes, and the state has also acknowledged only a *fractio*n of fees can be collected since there are defendants who do not have the means to pay. Adding fees on top of already-served criminal penalties further punishes low-income Californians and impedes access to services, such as petitioning for expungement.
>
> In 2019, a state appeals court ruled that charging defendants fees without first assessing their ability-to-pay violates both the state and U.S. Constitutions. Consequently, individuals who petition for expungement can have their court fees waived if they would face an undue financial hardship. However, petitioners must prove their inability to pay at a separate hearing. This not only adds to courts' operational costs and prolongs the expungement process, but also increases financial burdens to petitioners, such as requiring them to take time off from work or find accommodations for transportation.

By guaranteeing court fee waivers to petitioners who face undue financial hardship, California would eliminate the need to hold a separate ability-to-pay hearing. In doing so, this will bring parity with the current practice of providing financial relief to individuals with low-income, and remove the extra, burdensome time and operational costs associated with holding a hearing that results in the petitioner not having to pay court fees and costs in the first place.

AB 1803 streamlines the ability-to-pay process by guaranteeing court fees are waived if a petitioner seeking expungement meets the requirements of Government Code §68632. This includes individuals receiving: Medi-Cal; Food Stamps, i.e. California Food Assistance Program, CalFresh Program, or SNAP; State Supplemental Payment (SSP) and State Supplemental Security Income (SSI); County Relief (CR), General Relief (GR), or General Assistance (GA); In-Home Supportive Services; Tribal Temporary Assistance for Needy Families (TANF); Cash Assistance Program for Aged, Blind, or Disabled Legal Immigrants; and, Individuals whose monthly income is 125% or less of the current poverty guidelines.

Further, to be clear, this bill does *not* waive restitution payments – it merely waives the administrative court fees. As such, this bill ensures low-income petitioners seeking the fee waiver will still need to meet existing requirements to receive expungement, and petitioners who do receive the fee waiver will still be required by law to continue making restitution payments.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, likely loss of revenue to the judicial branch, potentially in the mid to high hundreds of thousands annually, as a result of fewer fee collections. (Special Fund – Trial Court Trust Fund). Staff notes a potential for increased restitution payments (Special Fund – Restitution Fund).

ARGUMENTS IN SUPPORT: California Attorneys for Criminal Justice support this bill saying:

> In some counties, court clerks refuse to accept petitions for relief unless a fee is paid in advance, or require the petitioner to submit an application for a fee waiver before the petition is officially filed with the court and a hearing is set.
>
> AB 1803 would prevent the court from denying relief based on ability to pay if the petitioner is receiving certain public benefits, such as Supplemental Security Income or Medi-Cal, or has a monthly income of 125% or less of the current poverty guidelines.

SUBJECT: Nursing Facility Resident Informed Consent Protection Act of 2022

SOURCE: California Advocates for Nursing Home Reform

DIGEST: This bill requires a prescriber, prior to prescribing a psychotherapeutic drug for a nursing home resident, to personally examine and obtain the informed written consent of the resident or their representative, and requires specified information to be disclosed when obtaining informed written consent.

Senate Floor Amendments of 8/25/22 add a provision that permits the California Department of Public Health to implement, interpret, or make specific this bill by means of an All Facilities Letter without taking any regulatory action.

ANALYSIS:

Existing law:

1) Licenses and regulates skilled nursing facilities (SNFs) and intermediate care facilities (ICFs) by the California Department of Public Health (CDPH). [HSC §1250 (c) and (d)]

2) Permits an attending physician and a SNF or ICF to initiate a medical intervention for a resident of a SNF or ICF that requires informed consent, when the physician has determined the resident lacks the capacity to make health care decisions and there is no person with legal authority to make those decisions on behalf of the resident. [HSC §1418.8 (d)]

3) Specifies that a resident lacks capacity to make a decision regarding his or her health care if the resident is unable to understand the nature and consequences of the proposed medical intervention, or is unable to express a preference regarding the intervention. Requires the physician, in making a determination regarding capacity, to interview the resident, review the resident's medical records, and consult with SNF or ICF staff, and family members and friends of the resident, if any have been identified. [HSC §1418.8 (b)]

4) Specifies that a person with legal authority to make medical decisions on behalf of a resident is a person designated under a valid Durable Power of Attorney for Health Care, a guardian, a conservator, or next of kin. Requires a physician to interview the resident, review medical records, and consult with SNF or ICF staff, and with family members and friends, if identified, in order to determine the existence of a person with legal authority. [HSC §1418.8 (c)]

Existing regulations:

1) Requires, for purposes of informed consent in SNFs and ICFs, that information material to a decision concerning the administration of a psychotherapeutic drug or physical restraint, to include specified information, including the nature, degree, duration, and probability of side effects and significant risks, and reasonable alternative treatments and risks. [22 CCR §72528(b)]

2) Requires, prior to initiating the administration of psychotherapeutic drugs, SNF or ICF staff to verify that the patient's health record contains documentation that the patient has given informed consent. [22 CCR §72528(c)]

3) Defines "psychotherapeutic drug," for purposes of requirements pertaining to SNFs and ICFs, as a medication to control behavior or to treat though disorder processes. [22 CCR §72092]

This bill:

1) Requires a prescriber, prior to prescribing a psychotherapeutic drug for a nursing home resident, to personally examine and obtain the informed written consent of the resident or the resident's representative.

2) Defines terms for purposes of this bill, including that "psychotherapeutic drug" means a drug to control behavior or to treat thought disorder processes but excludes antidepressants; and "representative" means an individual who has authority to act on behalf of the resident, including a conservator, guardian, person authorized as agent in the resident's advanced health care directive, the resident's spouse, registered domestic partner, or family member, a person designated by the resident, or other legally designated individual.

3) Requires the prescriber to communicate, and the written consent form to contain, in a language the resident understands, the information a reasonable person in the resident's condition and circumstances would consider material to a decision to accept or refuse the drug.

4) Requires the written consent form to be signed by the resident or their representative, and to also be signed by a health care professional who declares the resident or resident representative has been provided the material information. Requires copies of the signed consent form to be given to the resident and their representative.

5) Permits the use of remote technology, including, but not limited to, telehealth, to allow a prescriber to examine and obtain informed written consent, and permits the prescriber, the resident, or the resident's representative to use electronic signatures.

6) Specifies that if the signature of the resident or resident's representative cannot be obtained, requires a licensed nurse to sign the form and verify that they confirmed informed consent with the resident or resident's representative and to state the name of the person with whom they verified consent and the date.

7) Requires the SNF or ICF, within six months after the consent form is signed and every six months thereafter during which the resident receives a psychotherapeutic drug, to provide a written notice to the resident and the resident's representative, of any recommended dosage adjustments and the resident's right to revoke consent and to receive gradual dose reductions and behavioral interventions in an effort to discontinue the psychotherapeutic drug.

8) Requires the prescriber to provide, in addition to the information required in specified regulations governing informed consent in SNFs and ICFs, the following additional information material to an informed consent decision concerning the administration of a psychotherapeutic drug:

    a) Possible nonpharmacologic approaches that could address their needs;

b) Whether the drug has a boxed warning label along with a summary and information on how to find the contraindications and warnings required by the United States Food and Drug Administration (FDA);

c) Whether a proposed drug is being prescribed for a purpose that has not been approved by the FDA;

d) Possible interactions with other drugs the resident is receiving; and,

e) How the facility and prescriber will monitor and respond to any adverse side effects and inform the resident of side effects.

9) Requires facility staff, before initiating treatment with psychotherapeutic drugs, to verify that the resident's health record contains a written consent form with the required signatures. Requires facility staff, for a prescription written prior to the admission and encompassing the admission of the resident, to verify that the resident provided informed consent or refused treatment or a procedure pertaining to the administration of psychotherapeutic drugs.

10) Requires residents' rights policies and procedures established pursuant to this bill concerning informed consent to specify how the facility will verify that the resident provided informed consent or refused treatment or a procedure pertaining to the administration of psychotherapeutic drugs.

11) Requires CDPH to inspect SNFs and ICFs for compliance with this bill during required periodic inspections and, as appropriate, during complaint investigations. Prohibits this inspection requirement from limiting CDPH's authority in other circumstances to cite for violations or to inspect for compliance with this bill.

12) Deems a violation of the requirement for facility staff to verify that a resident has a signed written consent form prior to the administration of psychotherapeutic drugs to have caused the affected residents harm and to constitute a class "B," "A," or "AA" violation pursuant to the standards under existing law for these violations.

13) Specifies that in addition to any other penalties, the willful or repeated violation of this bill is punishable as a misdemeanor unless there is an emergency as described in specified regulations.

14) Requires CDPH, upon appropriation by the Legislature, to use funds from the State Health Facilities Citation Penalties Account to develop an informed consent form, a model disclosure statement for providing material information

necessary to providing informed consent for use of psychotherapeutic medication, a model notification statement of the resident's right to withdraw informed consent, and provide related education and training to health care providers in the use of the form and required notifications. Specifies that providers using these forms and notifications are presumed to be in compliance with this bill. Permits CDPH to enter into a contract with organizations with expertise in long-term care medicine and geriatrics to develop the forms.

15) Specifies that SNFs and ICFs are not required to comply with this bill until the informed consent form is available as developed by CDPH in conjunction with the California Association of Long Term Care Medicine or other clinical organizations as determined by CDPH. Requires CDPH to have a final informed consent form available to SNFs by July 1, 2023.

16) Adds requirements to the Skilled Nursing and Intermediate Care Facility Patient's Bill of Rights related to the right to receive information material to a decision about whether to accept or refuse a proposed treatment, and related to the right to be free from psychotherapeutic drugs.

Comments

1) *Author's statement.* According to the author, nursing homes have increasingly turned to psychotherapeutic drugs to sedate and control residents, especially those who display confused or agitated behaviors caused by dementia. While these drugs are sometimes appropriately prescribed to treat mental health conditions, many of the psychotherapeutic drugs being used in nursing homes, particularly antipsychotic drugs designed to treat serious psychiatric disorders, are dangerous and used without medical justification. This bill addresses these concerns by codifying existing regulations that establish a nursing home resident's right to informed consent concerning the use of psychoactive drugs, strengthening requirements for informed consent verification, and clarifying that CDPH shall inspect for compliance with informed consent requirements. This bill will not create any new costs as physicians are already required to obtain informed consent, nursing facilities are already required to verify consent, and CDPH is already required and funded to inspect for compliance with these requirements. This bill will help ensure that these existing duties are carried out in an appropriate manner.

2) *Current informed consent requirements at SNFs and ICFs.* Under existing regulations for both SNFs and ICFs, there are a number of requirements governing informed consent, including specific requirements governing the administration of a psychotherapeutic drug or physical restraint. First, the

regulations state that it is the responsibility of the attending physician to determine what information a reasonable person in the patient's condition and circumstances would consider material to a decision to accept or refuse a proposed treatment or procedure, and that the disclosure of the material information and obtaining informed consent is the responsibility of the licensed healthcare practitioner, acting within their scope of practice, orders the treatment for which informed consent is required. For the administration of a psychotherapeutic drug or a physical restraint, the material information required to be disclosed in order for the patient or the patient's representative to provide informed consent includes the following:

a) The reason for the treatment and the seriousness of the patient's illness;

b) The nature of the procedures to be used in the proposed treatment, including their probable frequency and duration;

c) The probable degree and duration (temporary or permanent) of improvement or remission, expected with or without such treatment;

d) The nature, degree, duration and probability of the side effects and significant risks, commonly known by the health professions;

e) The reasonable alternative treatment and risks, and why the health professional is recommending this particular treatment; and,

f) That the patient has the right to accept or refuse the proposed treatment, and has the right to revoke his or her consent for any reason at any time.

3) *Psychotherapeutics, antipsychotics, and black box warning on the use of antipsychotics in the elderly.* This bill imposes enhanced informed consent procedures when a proposed treatment involves "psychotherapeutic drugs," which is defined to mean a drug to control behavior or to treat thought disorder processes, excluding antidepressants. Psychotherapeutic drug is a general term that can encompass a number of medications that affect brain chemistry. It can include antidepressants (which are specifically excluded from this bill), anti-anxiety medications such as benzodiazepines, stimulants such as medication to treat attention-deficit/hyperactivity disorder, and antipsychotic medicines, which are used to manage psychosis. Antipsychotic drugs are used to treat conditions such as schizophrenia and bipolar disorder. There are older, first generation antipsychotics, also called "typical" antipsychotics, which include chlorpromazine and haloperidol, and newer "atypical" antipsychotics such as risperidone, olanzapine, and quetiapine. Going back to 2003, the FDA began

warning about increased risk of "cerebrovascular adverse events including stroke" in dementia patients treated with the atypical antipsychotic drug risperidone. Following a meta-analysis, the FDA issued a black-box warning citing an increased risk of mortality for patients receiving atypical antipsychotics versus placebo, which was applied to all atypical antipsychotics as a class. In 2008, the FDA updated this black box warning to apply to conventional first generation, or typical, antipsychotics as well. The warning states that conventional or atypical antipsychotic drugs are not FDA-approved for the treatment of dementia-related psychosis. The warning states that use of conventional or atypical antipsychotic drugs in elderly patients with dementia-related psychosis is associated with an increased risk of death, and that prescribers who institute antipsychotic drug use in the regimen of an elderly patient with dementia-related psychosis should discuss the increased risk of mortality with the patient, caregivers, and family members. Since there is no FDA-approved medication for the treatment of dementia-related psychosis, other management options should be considered by health care providers.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, CDPH estimates one-time costs over several years, of $605,000 (State Health Facilities Citation Penalties Account), for staffing to develop a form and provide training to health care providers.

ARGUMENTS IN SUPPORT: This bill is sponsored by the California Advocates for Nursing Home Reform (CANHR), which states that for decades, regulations that ensure the rights of nursing home residents to give informed consent before being administered psychotropic drugs have become less meaningful as enforcement and compliance have diminished. Today, overdrugging is once again at crisis levels for nursing home residents, and refreshing and codifying informed consent protections for residents would ameliorate this problem. According to CANHR, following a number of studies showing severe side effects, including death, the FDA issued public health advisories that the treatment of dementia with antipsychotic medications was contra-indicated. Antipsychotics are associated with increased stroke, heart attack, pneumonia, extrapyramidal side effects and a host of other serious conditions. According to CANHR, the FDA now requires that all antipsychotics be accompanies by a black box warning label, cautioning the user that the drugs nearly double the risk of death for elderly patients with dementia.

SUBJECT: Reentry Housing and Workforce Development Program

SOURCE: Corporation for Supportive Housing
Housing California
Los Angeles Regional Reentry Partnership
Western Center on Law & Poverty

DIGEST: This bill creates the Reentry Housing and Workforce Development Program (Program) under HCD which helps recently incarcerated people exit homelessness and remain stably housed.

ANALYSIS:

Existing law:

1) Requires all housing programs in California to comply with "Housing First" principles.

2) Establishes the Long Term Offender Reentry Recovery Program, Specialized Treatment for Optimized Programming, Integrated Services for Mentally Ill

Parolees, and Parolee Service Centers under the California Department of Corrections and Rehabilitation (CDCR).

3) Establishes the Adult Reentry Grant Program under the Board of State and Community Corrections.

4) Establishes the Prison to Employment Grant Initiative under the Workforce Development Board.

This bill:

1) Establishes the Program to provide five-year renewable grants to counties to fund evidence-based housing, housing based services, and employment interventions to allow people with recent histories of incarceration to exit homelessness and remain stably housed.

2) Requires HCD, upon appropriation from the Legislature, to do all of the following to create the Program:

   a) Establish a process for referral of eligible participants to the program;

   b) Work with the CDCR to establish protocols to prevent discharges from prison into homelessness;

   c) Issue guidelines and a Notice of Funding Availability (NOFA) for five-year renewable grants;

   d) Establish scoring criteria, as specified.

3) Specifies, among other things, the following eligible activities for funding:

   a) Long-term rental assistance in permanent housing;

   b) Interim interventions;

   c) Operating subsidies in new and existing affordable or supportive housing units;

   d) Incentives to landlords, including, security deposits, holding fees, and incentives for landlords to accept rental assistance or operating subsidies;

e) Innovative or evidence-based services to assist participants in accessing permanent housing, including supportive housing, and to promote stability in housing;

f) In-reach services to assist eligible participants at least 90 days before release from prison, to include any of the other services in this subdivision;

g) Parole discharge planning;

h) Wraparound services, including linkage to Medi-Cal funded mental health treatment, substance use disorder treatment, and medical treatment, as medically necessary.

4) Specifies the following services must be provided to participants in their home or made as easily accessible as possible:

a) Case management services;

b) Parole discharge planning;

c) Linkage to other services including education and employment services;

d) Benefit entitlement application and appeal assistance;

e) Transportation assistance to obtain services and health care;

f) Assistance obtaining appropriate identification; and

g) Linkage to Medi-Cal funded mental health treatment, substance use disorder treatment, and medical treatment.

5) Provides that for participants identified prior to release from prison, an intake coordinator or case manager shall:

a) Receive all pre-release assessment and discharge plans;

b) Draft a plan for the participant's transition into affordable or supportive housing;

c) Engage the participant to actively participate in services upon release on a voluntary basis;

d) Assist in obtaining identification for the participant; and

e) Assist in applying for any benefits for which the participant is eligible.

6) Requires recipients and providers to adhere to the core components of Housing First.

7) Requires grant recipients to report specified data annually to HCD.

8) Requires HCD to design an evaluation and hire an independent evaluator to assess outcomes from the program.

Background

Background on Incarceration and Homelessness. According to a 2020 report by the Council of Criminal Justice and Behavioral Health, formerly incarcerated people are 10 times more likely to be homeless than the general public and 20 times if the individual has a mental illness. Seventy percent of people experiencing homelessness have a history of incarceration, according to a survey of the three most populous counties in the state. In addition, behaviors associated with homelessness are criminalized, and a criminal history serves as a barrier to housing and employment. Thus, people often cycle through homelessness and incarceration. This exacerbates health concerns; around 30% of inmates suffering from a mental health condition, and, during the first two weeks of reentry, drug use and risk of death increases 12-fold. Because of these issues facing formerly incarcerated people, supportive housing and employment programs can help people exit the cycle of prison and homelessness.

Comments

1) *Author's Statement.* "AB 1816 directs Department of Housing and Community Development to establish a Reentry Housing and Workforce Development program, working with community-based organizations and other relevant stakeholders. Using evidence-based housing and wraparound services, this program will bring comprehensive resources to bear to directly address the critical transition from incarceration back into the community and beyond, helping people find stable housing and jobs by providing permanent housing for this vulnerable population. This approach does not just improve community safety - it saves taxpayers money and helps address the state goals of reducing homelessness at the same time. It's the right idea, at the right time."

2) *Housing First.* This bill requires the program to practice Housing First, which the State adopted as policy in 2017. Housing first approaches homelessness by

providing permanent, affordable housing for families and individuals as quickly as possible, then providing supportive services to prevent their return to homelessness. This strategy is an evidence-based model that focuses on the idea that homeless individuals should be provided shelter and stability before underlying issues can be successfully addressed. Under the housing first approach, anyone experiencing homelessness should be connected to a permanent home as quickly as possible, and programs should remove barriers to accessing the housing, like requirements for sobriety or absence of criminal history. It is based on the "hierarchy of need:" people must access basic necessities—like a safe place to live and food to eat—before being able to achieve quality of life or pursue personal goals. Housing first values choice not only where to live, but whether to participate in services. This approach contrasts to the "housing readiness" model where people are required to address predetermined goals before obtaining housing. In other words, housing readiness means housing is "earned" and can also be taken away, thus returning to homelessness.

3) *Existing Programs.* There are a few programs that target this population for housing or employment. CDCR offers the Long Term Offender Reentry Recovery Program, Specialized Treatment for Optimized Programming, and Parolee Service Centers, among other to offer housing help or employment services, or both, for 180 days, with the possibility of an additional 185 days. The Board of State and Community Corrections administers the Adult Reentry Grant Program which offers rental assistance, warm handoff reentry services, and funds for rehabilitation of existing property and buildings that organizations can apply for. The Workforce Development Board administers the Prison to Employment Grant Initiative which tries to improve the process for reentering the labor force. In its 2021 interim report, the Workforce Development Board reported that the median wage in the 2nd quarter after exit was $7,175. However, this is for the 239 people who voluntarily revealed their wage. Better data will be in their final report. These programs indicate that providing housing and employment services can help reentry of prisoners into their communities. This bill proposes such a program.

   In particular, the State Auditor audited CDCR's Integrated Services for Mentally Ill Parolees Program (ISMIP) in 2020. The report notes that CDCR performed little oversight, paid housing invoices without verification, lacked data of program participation, among other issues. In light of this report, this program no longer has funding.

4) *Cost Savings.* According to the Legislative Analyst's Office, it costs over $100,000 annually to incarcerate and inmate. A report in 2009 that studied Los Angeles found that, for a typical homeless person, the public cost is around $34,700 ($47,900 today), compared to $20,400 ($27,500 today) for someone in supportive housing. There is a 19% decrease in cost for individuals with serious problems (jail histories with substance abuse issues and received minimal assistance in the form of temporary housing). This bill aims to prevent recidivism and homelessness among a particularly vulnerable population and, in return, be fiscally responsible.

5) *Budget.* This bill creates a program that would cost a significant amount of money. It is unlikely that this program will be funded in the budget this year. However, this bill can act as a framework for a program of this nature.

6) *HCD and CDCR.* The program proposed by this bill will be administered by HCD, but HCD must work with CDCR. Given that HCD has expertise in housing development and providing supportive services, and this program's main goal is to house and support people, while CDCR provides perspective in programming for this particular population.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- HCD estimates ongoing administrative costs of approximately $3.27 million annually for 17 PY of new staff to establish and implement the RHWD Program, including establishing a referral process with CDCR, developing program guidelines, issuing a notice of funding availability (NOFA), scoring and ranking applications, preparing agreements with grant recipients, providing technical assistance, disbursing grant funds, and conducting ongoing monitoring activities. HCD also estimates one-time costs of approximately $1 million for a consulting contract with an independent evaluator to assess program outcomes. (General Fund)

- CDCR indicates that workload and costs to collaborate on the establishment of a referral process for RHWD Program participants are unknown, but potentially significant. Depending on the number of program participants, costs for the design and implementation of the referral process, establishing protocols for preventing discharges from prison into homelessness, and making any necessary administrative and systems changes, could be in the low millions. (General Fund)

- CDCR also estimates ongoing costs of approximately $476,000 for 4.0 PY of new staff for parole agents to establish and administer a process to coordinate with service providers and to manage the provision of prerelease assessment and discharge plans to those providers. CDCR also notes there could be additional systems costs if it is determined that the release of prerelease assessments and discharge plans requires information technology solutions. (General Fund)

- Unknown, major cost pressures, at least in the tens of millions annually, to provide grant funding for the RHWD Program. Staff notes that the HCD and CDCR administrative costs noted above would only be incurred to the extent that funds are appropriated for the RHWD Program. (General Fund)

SUBJECT: Product safety: textile articles: perfluoroalkyl and polyfluoroalkyl substances (PFAS)

SOURCE: Breast Cancer Prevention Partners
Clean Water Action
Natural Resources Defense Council

DIGEST: This bill prohibits, beginning January 1, 2025, any person from manufacturing, distributing, selling, or offering for sale any textile articles that contain intentionally added per- and polyfluoroalkyl substances (PFAS), except for textiles used for personal protective equipment or certain other regulated products. This bill requires manufacturers to use the least toxic alternative when complying with this prohibition and to provide distributers with certification of compliance.

Senate Floor Amendments of 8/24/22 remove a target threshold for the reduction of PFAS in textiles to 10 parts per million by 2029, add exemptions to the PFAS prohibition for aircraft, off-highway vehicles, and architectural fabrics, delay implementation of the prohibition for severe weather textiles to 2029, and clarify some definitions.

ANALYSIS:

Existing law:

1) Requires, under the Safer Consumer Products statutes the Department of Toxic Substances Control (DTSC) to adopt regulations to establish a process to identify and prioritize chemicals or chemical ingredients in consumer products that may be considered chemicals of concern, as specified. (Health and Safety Code (HSC) § 25252)

2) Requires DTSC to adopt regulations to establish a process to evaluate chemicals of concern in consumer products, and their potential alternatives, to determine how to best limit exposure or to reduce the level of hazard posed by a chemical of concern. (HSC § 25253 (a))

3) Specifies, but does not limit, regulatory responses that DTSC can take following the completion of an alternatives analysis, ranging from no action, to a prohibition of the chemical in the product. (HSC § 25253)

4) Requires, under the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65), the Governor to publish a list of chemicals known to cause cancer or reproductive toxicity and to annually revise the list. The Office of Environmental Health Hazard Assessment (OEHHA) has listed perfluorooctanoic acid (PFOA) and perfluorooctane sulfonate (PFOS), which are members of the per- and polyfluoroalkyl substances (PFAS) class, as chemicals known to the state to cause developmental toxicity. (HSC § 25249.8)

5) Requires, commencing January 1, 2022, a person that sells firefighter personal protective equipment to provide a written notice to the purchaser if the firefighter personal protective equipment contains intentionally added PFAS chemicals. (HSC § 13029)

6) Prohibits, commencing January 1, 2022, a manufacturer of class B firefighting foam from manufacturing, or knowingly selling, offering for sale, distributing for sale, or distributing for use, and a person from using, class B firefighting foam containing intentionally added PFAS chemicals. (HSC § 13061)

7) Prohibits, on and after July 1, 2023, a person, including, but not limited to, a manufacturer, from selling or distributing in commerce in this state any new, not previously owned, juvenile product that contains regulated PFAS chemicals. (HSC § 108946)

8) Prohibits, commencing on January 1, 2023, a person from distributing, selling, or offering for sale in the state any food packaging that contains regulated PFAS. (HSC § 109000)

9) Authorizes the State Water Resources Control Board (State Water Board) to order a public water system to monitor for PFAS, requires community water systems to report detections, and where a detected level of these substances exceeds the response level, to take a water source out of use or provide a prescribed public notification. (HSC §116378)

This bill:

1) Defines for the purpose of this bill:

   a) "Apparel" as clothing items intended for regular wear or formal occasions or use in outdoor activities, excluding personal protective equipment or clothing items for exclusive use by the United States military;

   b) "Outdoor apparel" as clothing items intended primarily for outdoor activities including hiking, camping, skiing, climbing, bicycling, and fishing;

   c) "Outdoor apparel for severe wet conditions" as outdoor apparel that are extreme and extended use products that provide protection against wet conditions and that are not marketed for general consumer use;

   d) "Personal protective equipment" as equipment worn to minimize exposure to hazards that cause serious workplace injuries and illnesses that may result from contact with chemical, radiological, physical, biological, electrical, mechanical, or other workplace or professional hazards;

   e) "Perfluoroalkyl and polyfluoroalkyl substances" (PFAS) as fluorinated organic chemicals containing at least one fully fluorinated carbon atom;

   f) "Regulated PFAS" as PFAS that a manufacturer has intentionally added to a product or that are intentional breakdown products of a product, or the presence of PFAS in a product or product component at or above the following thresholds as measured in total organic fluorine:

      i) Commencing January 1, 2025, 100 parts per million (ppm); and

      ii) Commencing January 1, 2027, 50 ppm.

   g) "Textile" as any item made in whole or part from a natural, manmade, or synthetic fiber, yarn or fabric including leather, cotton, silk, jute, hemp,

wool, viscose, nylon, or polyester. “Textile” does not include single-use paper hygiene products, such as, toilet paper, paper towels, tissues, or single-use absorbent hygiene products; and

h) “Textile articles” as textile goods of a type and ordinarily used in household and businesses including apparel, accessories, handbags, backpacks, draperies, shower curtains, furnishing, upholstery, beddings, towels, napkins, and tablecloths. “Textile articles” does not include:

i) Carpets and rugs;

ii) Treatments containing PFAS for use on converted textiles or leathers;

iii) Vehicles or their component parts, including off-highway motor vehicles;

iv) Vessels or their component parts, including boat covers;

v) Filtration media and filter products used in industrial applications;

vi) Textile articles used in or for laboratory analysis and testing;

vii) An aircraft or its component parts;

viii) Stadium shades or other architectural fabric structures – fabric structures that are intrinsic to a building’s design or construction.

2) Prohibits the manufacturing, distribution, or selling in the state any new, not previously used, textile articles that contain regulated PFAS after January 1, 2025.

3) Exempts outdoor apparel for severe wet conditions from this prohibition until January 1, 2028.

4) Requires, commencing January 1, 2025, new, not previously used, outdoor apparel for severe wet conditions that contain regulated PGAS must be sold with a legible and easily discernable disclosure with the statement “Made with PFAS chemicals.”

5) Requires manufacturers to use the least toxic alternative, including alternative design, when removing regulated PFAS in textile articles to comply with this prohibition.

6) Requires manufacturers of textile articles to provide retailers and distributers a signed certificate of compliance stating that a textile article is in compliance with this prohibition.

7) Specifies that a distributer or retailer shall not be in violation of this prohibition if they relied in good faith on the provided certificate.

Background

1) *Perfluoroalkyl and polyfluoroalkyl substances (PFAS).* PFAS are a class of man-made chemical compounds that contain multiple fluorine atoms bonded to a single carbon atom. These carbon-fluorine bonds are extremely stable and chemically unreactive, which makes PFAS very useful in creating long-lasting and resistant products. As such PFAS have been produced and used in consumer products since the 1940s, often as surface coatings to repel water, dirt, oil, and grease. They have been used in food packaging, stain- and water-repellent fabrics, nonstick products such as Teflon, and in fire-fighting foams.

   Unfortunately, PFAS' stability also means that these compounds are resistant to being metabolized by organisms or otherwise degraded and so have slowly built up in the environment. Their chemical properties also make many PFAS highly mobile – able to travel long distances, move through soil, seep into groundwater, or be carried through the air far from their point of production or use. These factors combined with their widespread use have made PFAS so ubiquitous that almost every person on Earth has been exposed to PFAS and scientists have found these toxins in the blood of nearly all people tested.

2) *PFAS, don't you know that you're toxic?* Several PFAS have been shown to bioaccumulate significantly in animals or plants and emerging evidence points to their phytotoxicity, aquatic toxicity, and terrestrial ecotoxicity. The Agency for Toxic Substances and Disease Registry (ATSDR) and the US EPA developed the toxicologic profile of 14 PFAS chemicals. Based on a number of factors, including the consistency of findings across studies, the available epidemiology studies suggest associations between perfluoroalkyl exposure and several adverse health effects, including liver damage, increased risk of thyroid disease, decreased antibody response to vaccines, increased risk of asthma, risk of decreased fertility, and small decreases in birth weight.

3) *PFAS are a diverse class of chemical compounds*. Because PFAS have been so industrially useful, many different types of PFAS have been created. As of September 2020, more than 9,000 PFAS chemicals were included in the US EPA's Master List of PFAS Substances. Each one has variations in their

chemical properties, but all share a resistance to chemical reactivity and to environmental and biological degradation. Perfluorooctanesulfonic acid (PFOS), used to create Teflon, and perfluorooctanoic acid (PFOA), previously used in Scotchgarde, have been the most extensively studied.

Because of extensive research demonstrating the health risks of these PFAS have been phased out of production and replaced with new PFAS touted as safer alternatives based on the idea that they linger for a shorter time in human bodies. Unfortunately, further research has shown that many of these alternatives are associated with similar adverse health effects as the original PFAS and can travel even more easily in the environment.

4) *To meaningfully regulate PFAS they must be treated as a chemical class*. Performing a complete assessment of the health impacts of all 9,000 PFAS is impractical. As such, DTSC has adopted a rationale for regulating PFAS chemicals as a class, concluding, "It is both ineffective and impractical to regulate this complex class of chemicals with a piecemeal approach." This rationale was presented in the February, 2021, Environmental Health Perspectives article, "Regulating PFAS as a Chemical Class under the California Safer Consumer Products Program." The authors of the article state, "The widespread use, large number, and diverse chemical structures of PFAS pose challenges to any sufficiently protective regulation, emissions reduction, and remediation at contaminated sites. Regulating only a subset of PFAS has led to their replacement with other members of the class with similar hazards, that is, regrettable substitutions… Regulating PFAS as a class is thus logical, necessary, and forward-thinking."

5) *PFAS make textiles harder, better, faster, stronger*. A study commissioned by the European Commission Directorate-General for Environment found that PFAS have been used for a wide range of functional applications within textiles, upholstery, leather, apparel, and carpets in both the consumer and industrial segments. The study reports that water, oil, and dirt repellence were the primary functions for use of PFAS in textiles. Thermal resistance and 'breathability' were other uses of PFAS identified in certain types of clothing applications. According to industry representatives, PFAS are essential to the durability and functioning of many textiles designed to withstand harsh conditions or extended use, including personal protective equipment, some medical equipment, and extreme weather gear.

6) *Textiles are a major source of PFAS pollution.* According to the US EPA 2009 perfluorinated chemicals action plan, globally, coatings for textiles represent

50% of the total use of fluorotelomers, a broad class of PFAS that covers most PFAS used at large scale in industry. The US EPA is currently in the process of evaluating the PFAS content of wastewater from major industry sectors, including the textile industry.

DTSC states, "Most waste or end-of-life converted textiles or leathers in California are disposed of in landfills, where they become sources of PFASs to the environment via leachates and gaseous emissions. Wastewater treatment plants that collect landfill leachates, surface runoff, and residential and commercial wastewater do not effectively remove PFASs. As a result, when wastewater effluent is discharged into surface waters, PFASs are released into the environment, contaminating aquatic ecosystems and drinking water sources. Sewage sludge also contains PFASs, thus the application of biosolids on soil can contaminate terrestrial ecosystems, drinking water, and human food supplies. Carpets, rugs, upholstery, clothing, shoes, and other consumer products to which treatments containing PFASs have been applied become major sources of exposure for infants and children via direct contact and incidental indoor dust ingestion."

7) *Alternatives to PFAS in textiles*. According to the Washington State Department of Ecology, there are a number of ways to meet the function of stain, oil, and water resistance in textiles and furnishings, including by using PFAS chemistries, non-PFAS "drop in" alternatives, or fibers that are inherently stain resistant. Non-PFAS "drop in" solutions include siloxane polymers, polyurethanes, sulfonation, and silicate clay-based repellent. Inherently stain resistant fibers include wool, polypropylene, polyethylene terephthalate, and polytrimethylene terephthalate. These alternatives require further study to ensure that there are no toxic impacts, and to consider their other environmental impacts, but they should not share the same exposure hazards as PFAS chemicals.

The Danish Environmental Protection Agency published a report in 2015 on alternative to PFAS that can be used to treat textiles to achieve similar effects. They list paraffin, stearic acid-melamine, silicone, dendrimer, and nano-material based repellant chemistries as currently used viable alternatives, though they do note these treatments only provide water resistance and not the oil and stain-resistance properties of PFAS.

While safer, less environmentally toxic alternatives to PFAS exist for many functions in textiles, many will not perform as well in all circumstances. In phasing out PFAS to protect the environment, a reduction in the performance

of certain treated clothing will likely occur. As such this bill exempts critical classes of treated textiles where performance is essential to protecting human health in workplace, medical, and military settings.

Comments

According to the author, "Perfluoroalkyl and polyfluoroalkyl substances (PFAS) are a class of "forever" chemicals that are widely used, extremely persistent, and can lead to adverse health outcomes. While PFAS has been banned in a variety of consumer products, these chemicals are still utilized in textiles, including clothing, predominantly for stain and water repellency. The use of PFAS in textiles not only impacts the health of consumers, but contaminates our environment when PFAS-containing fabrics get washed. In California, water systems serving up to 16 million people have already been found to have PFAS contamination, and it is more prevalent in disadvantaged communities. California has already enacted a series of laws to protect consumers and the environment from the hazardous impacts of PFAS, including AB 1200, which I championed and was signed into law just last year, prohibiting the use of PFAS in paper-based food packaging. These laws were passed on the premise that prevention is the best cure, and eliminating PFAS in consumer products is the best way to reduce the adverse health impacts of these chemicals on California residents. AB 1817 would extend this same logic to the textile industry by banning the sale of textiles that contain PFAS by 2025. By forcing manufactures to use safer alternatives, AB 1817 ensures California consumers and the environment are protected the toxic impacts of these forever chemicals."

ARGUMENTS IN SUPPORT: According to the sponsors of the bill, "PFAS are a class of approximately 9,000 man-made chemicals used for a wide range of purposes, including in clothes and textiles. PFAS are called "forever chemicals"

because they are extremely resistant to breaking down or break down into other toxic PFAS. Consequently, they persist in the environment indefinitely and bioaccumulate in our bodies and other living organisms. They also move around easily through the environment, making them difficult to control. Virtually all Americans have PFAS in their bodies. PFAS have been linked to severe health problems, including but not limited to breast and other cancers, hormone disruption, kidney and liver damage, thyroid disease, harm to developing infants and children, and immune system disruption. Indeed, health organizations such as the International Federation of Gynecology and Obstetrics, IFIGO, have called for phasing out all unnecessary uses of PFAS…

"Recognizing the health and environmental concerns about PFAS in textiles, many leading companies, like Levi's, Gap, H&M, Puma, Keen, Osprey, Patagonia, Jack Wolfskin, Ikea, and Zara, have either eliminated or made commitments to eliminate PFAS from their products. It's time to require the rest of the industry to phase out this unnecessary use of PFAS, just as California has required the elimination of PFAS in paper-based food packaging, children's products, and fire-fighting foam, to protect our health, drinking water, and environment."

ARGUMENTS IN OPPOSITION: According to the industry coalition opposed to the bill, "Our industries support the responsible production, use and management of fluorinated substances, including regulatory requirements that are protective of human health and the environment. PFAS have varying physical and chemical properties and their environmental and health profiles are not all the same. It is important to consider this point when seeking to regulate a diverse set of products and articles.

"Given global supply chain constraints that have hit apparel retailers particularly hard, product availability for replacements is not assured and is likely to further exacerbate the economic impact on this sector. Additionally, a rigid compliance deadline without appropriate sell through provisions could have unintended consequences both from an economic and environmental perspective. Replacement of durable products, proven to provide long service life (years) with lower performing, much shorter lifetime (months) products will require consumers to replace those products more frequently, significantly increasing aggregated greenhouse gas (GHG) emissions output during production of the replacements. Unsold items may be disposed of in landfills or shipped to neighboring states for sale, incurring additional solid waste management, transportation and re-packaging material GHG impacts to the environment."

SUBJECT: Division of Labor Standards Enforcement: Labor Trafficking Unit

SOURCE: Sunita Jain Anti-Trafficking Policy Initiative
Western Center on Law & Poverty

DIGEST: This bill establishes the Labor Trafficking Unit within the Department of Occupational Safety and Health to investigate and prosecute complaints alleging labor trafficking, and report specified data.

Senate Floor Amendments of 8/22/22 clarify that the new Labor Trafficking Unit created by the bill will coordinate with the California Civil Rights Department. These amendments reflect the renaming of the former Department of Fair Employment and Housing (DFEH).

ANALYSIS:

Existing law:

1) Establishes the Division of Occupational Safety and Health (Cal/OSHA) within the Department of Industrial Relations (DIR), and gives Cal/OSHA the power,

jurisdiction, and supervision over every place of employment in this state which is necessary to enforce and administer all laws requiring places of employment to be safe, and requiring the protection of the life, safety, and health of every employee.

2) Establishes the Labor Enforcement Task Force (LETF) under the direction of DIR to enforce activities regarding labor, tax, and licensing law violators operating in the underground economy.

3) Establishes the Joint Enforcement Strike Force on the Underground Economy under the direction of the Employment Development Department to combat the underground economy by combining resources and sharing information among the state agencies that enforce tax, labor, and licensing laws.

4) Establishes the Tax Recovery in the Underground Economy Criminal Enforcement Program in the Department of Justice (DOJ) to combat underground economic activities through a multiagency collaboration and recover state revenue lost to the underground economy.

5) Provides that any person who deprives or violates the personal liberty of another with the intent to obtain forced labor or services is guilty of the crime of human trafficking. (Penal Code § 236.1)

6) Requires specified businesses and establishments, including hotels, motels, and bed and breakfast inns, to post notices in a conspicuous place near the public entrance of the establishment or in another conspicuous location in clear view of the public and employees where similar notices are customarily posted. (Civil Code §52.6)

7) Requires the notices to include specific language regarding telephone numbers to contact if one is aware of or is a victim of human trafficking. This includes the National Human Trafficking Resource Center and the California Coalition to Abolish Slavery and Trafficking. (Civil Code §52.6)

8) Requires DOJ to create a model notice that can be used by businesses and establishments to meet the posting requirement. (Civil Code §52.6.)

9) Requires hotels and motels, but not bed and breakfast inns, to provide human trafficking awareness training and education to employees who interact with the public, as defined and specified. (Gov. Code §12950.3)

This bill:

1) Establishes the Labor Trafficking Unit (LTU) within Cal/OSHA to receive, investigate, and prosecute complaints alleging labor trafficking and take steps to prevent labor trafficking.

    a) Requires the LTU to coordinate with LETF, the Bureau of Investigation within the DOJ, and the Civil Rights Department to combat labor trafficking. The unit may also coordinate with local law enforcement or district attorney's offices when investigating criminal actions relating to labor trafficking.
    b) Requires the LTU to follow protocols to ensure that survivors of labor trafficking are not victimized by the process of prosecuting traffickers and are informed of the services available to them. Allows the LTU to coordinate with both state and local agencies to connect survivors with services available.

2) Requires the LTU to submit a report to the Legislature that includes the following information pertaining to the prior calendar year:

    a) The number of complaints or referrals received.
    b) The number and type of complains or referrals received.
    c) The number of complaints referred to DOJ.
    d) The number of complaints referred to the Civil Rights Department.
    e) The number of referrals and coordinations with local law enforcement agencies and district attorney's offices.
    f) The outcome of each complaint.
    g) Sunsets this reporting requirement on January 1, 2035.

Comments

Need for this bill? The United States remains one of the widely regarded destination countries for human trafficking; federal reports estimate that 14,500 to 17,500 victims are trafficked into the US annually. This does not include trafficking victims within the United States itself and, due to the clandestine nature of the underground economy, is almost certainly an underestimate. Human trafficking can take a number of forms, but generally involves compelling or coercing a person to provide labor or services, or to engage in commercial sex acts. As highlighted by the Attorney General's website on human trafficking, "the

coercion can be subtle or overt, physical or psychological, and may involve the use of violence, threats, lies, or debt bondage."[1]

In California specifically, there were 1,656 cases of human trafficking reported in 2018. Of these cases, 1,226 cases were sex trafficking cases, 151 cases were labor trafficking and 110 involved both labor and sex trafficking.

There is obviously a notable amount of overlap between labor and sex trafficking, but there is a slight distinction. Labor trafficking involves the recruitment, harboring, or transportation of a person for labor services, through the use of force, fraud, or coercion. It is, in many ways, modern day slavery. Labor trafficking also takes many forms, including domestic servitude, restaurant work, janitorial work, factory work, migrant agricultural work, and construction. It is often distinguished by unsanitary and overcrowded living and working conditions, nominal or no pay for work that is done, debt bondage, and document servitude.

Though existing law provides for training, workplace postings advising employees of their rights, and harsh penalties for human trafficking, the incentives to coerce people into servitude still exist. The creation of a specific unit that can coordinate between the multiple agencies tasked with finding and protecting victims could be effective; furthermore, the reporting requirements will bring valuable and specific data that can direct resources into sectors that experience higher numbers of these heinous crimes.

Triple Referral. This bill was triple-referred and was heard in the Senate Public Safety Committee. Due to ongoing COVID-19 concerns affecting normal hearing scheduling, there was not enough time for AB 1820 to be heard in the Senate Judiciary Committee. Instead, the following paragraph from the Senate Judiciary Committee has been included, to ensure that their policy opinions are reflected:

"This bill does not appear to raise any issues of concern with respect to policy within the jurisdiction of the Senate Judiciary Committee. The proposed Labor Trafficking Unit should facilitate more effective enforcement of labor laws in California, which is to the benefit of both impacted workers and all employers whose competitive position in the marketplace is undermined by these abhorrent labor practices."

[1] "What is Human Trafficking?" Office of the Attorney General of California, **https://oag.ca.gov/human-trafficking/what-is**.

Related/Prior Legislation

SB 970 (Atkins, Chapter 842, Statutes of 2018) required that hotels and motels provide human trafficking education to employees who interact with the public, as defined**.**

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DIR indicates that it would incur first-year costs of $4.3 million, and $4 million annually thereafter, to implement the provisions of the bill (Labor Enforcement and Compliance Fund). All of these amounts reflect additional workload to DLSE to (1) receive and investigate complaints alleging labor trafficking, and then (2) refer them for criminal prosecution by the DOJ or for civil action by DFEH.

- The bill would result in initial costs of $2.6 million and ongoing annual costs of approximately $3.9 million to DOJ (General Fund). The Criminal Law Division's Special Prosecutions Section anticipates increased litigation workload, necessitating seven new staff. The Division of Law Enforcement's Bureau of Investigation anticipates increased investigative workload in coordination with the other LTU partners, requiring an additional nine positions, initial funding for software and hardware systems, and ongoing funding for travel expenses.

- DFEH anticipates General Fund costs of $3.2 million annually, beginning in 2023-24 as a result of the bill. These costs would result from LTU referring matters to DFEH's Civil Rights Division (CRD) for investigation, mediation, and potential prosecution. The Department assumes that 250 matters could be referred to CRD per year, which would need additional staff to accommodate the increased workload. DFEH indicates that costs to coordinate with LTU would be minor and absorbable.

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: The Western Center on Law & Poverty writes in support:

"Human trafficking is the world's fastest-growing criminal enterprise and is an estimated to be a $150 billion annual global industry. On a global scale, the International Labour Organization estimates that of the 20.9 million forced laborers worldwide, 68 percent are victims of forced labor exploitation. Unfortunately, COVID - 19 has worsened the current status quo. A State Department report underscored that COVID 19 increased the number of people at risk of human trafficking and highlighted "monumental" challenges laid bare by the pandemic, which "may be long lasting, requiring sustained collaboration among governments, civil society organizations, private sector leaders, survivor leaders, and other anti-trafficking actors to adjust and respond aptly to overcome these challenges.

"California has the highest number of human trafficking cases in the nation reported to the National Human Trafficking Hotline. Despite its prevalence, human trafficking is a "hidden crime." Many victims do not self-identify or self-report, and many do not even recognize they are being trafficked. A report published by the Little Hoover Commission concluded that California's efforts to prevent labor trafficking are fragmented and a major issue is a lack of a directive to current state agencies to lead efforts to prevent labor trafficking and coordinate with other agencies such as California Department of Justice (DOJ) and Department of Fair Employment and Housing (DFEH) to stop trafficking before it starts.

"AB 1820 (Arambula) - the California Labor Trafficking Prevention Act - seeks to protect California's most vulnerable and exploited workers from being taken advantage of by unscrupulous individuals and businesses who force them to work under duress with little to no pay. This bill will provide the Department of Industrial Relations (DIR) with statutory authority to investigate and prosecute claims of human labor trafficking and create a Labor Trafficking Unit to take necessary steps to properly prevent, investigate, and coordinate state efforts to put a stop to the abuses of workers."

SUBJECT: Student health insurance

SOURCE: California Department of Insurance

DIGEST: This bill defines student health insurance as individual health insurance and specifies federal Affordable Care Act (ACA) requirements that apply to student health insurance, such as coverage of essential health benefits, rating factors consistent with existing law, the annual limit on maximum out-of-pocket expenses as specified, and the prohibition against annual and lifetime limits. This bill includes legislative intent to encourage self-funded student health coverage offered by the University of California Student Health Insurance Plan and the University of California Voluntary Dependent Plan to maintain or exceed coverage standards of the ACA and to comply with provisions of this bill. This bill requires all other student health coverage offered by an institution of higher education in California to comply with this bill.

Senate Floor Amendments of 8/24/22 refine the intent language regarding the University of California and indicate that all other student health coverage offered by an institution of higher education in California must comply with this bill; delay the implementation date to 2024; make it clear that any reference to insured in a

blanket disability insurance policy that meets the definition of student health insurance coverage refers to the individual students and dependents insured under those policies; make it clear for specified sections of the law, reference to policyholder refers to the individual students; clarify the large group rate review requirements that student health insurance must comply with; require the rating period to be the policy year and not vary during the rating period; and, exempt student health insurance coverage from specified provisions of California health insurance law.

ANALYSIS:

Existing law:

1) Establishes the California Department of Insurance (CDI) to regulate health insurance, and other forms of insurance. [INS §106, et seq.]

2) Permits as a type of blanket insurance providing benefits to students without necessarily any restriction as to activity, time, or place, or to teachers or employees while performing actions incident to special duties, such as at camps, at summer playgrounds, or during tours or excursions; and providing benefits to students, teachers, or employees, and spouses and dependents of students, teachers, and employees, for death or dismemberment resulting from accident, or for hospital, medical, surgical, drug, or nursing expenses resulting from accident or sickness. Blanket insurance is a form of insurance providing coverage for specified circumstances and insuring by description all or nearly all persons within a class of persons defined in a policy issued to a master policyholder, a college, school, or other institution of learning, a school district or districts or school jurisdictional unit, or to the head, principal, or governing board of an educational unit who or which shall be deemed the policyholder. [INS §10270.2(a)(2)]

3) Requires an individual or small group health insurance policy to include, at a minimum, coverage for essential health benefits, pursuant to the ACA, and describes the benefits and benchmark plan which comprise California's essential health benefits. [INS §10112.27]

4) Defines student health insurance, under federal regulations, as a type of individual health insurance coverage that is provided pursuant to a written agreement between an institution of higher education (as defined in the Higher Education Act of 1965) and a health insurance issuer, and provided to students enrolled in that institution of higher education and their dependents, that does not make health insurance coverage available other than in connection with

enrollment as a student (or as a dependent of a student) in the institution of higher education; does not condition eligibility for the health insurance coverage on any health status-related factor relating to a student (or a dependent of a student); and meets any additional requirement that may be imposed under State law. [45 CFR §147.145]

5) Exempts 4) above from ACA requirements on guaranteed availability and guaranteed renewability, levels of coverage, single risk pool. [45 CFR §147.145]

6) Establishes the federal Paul Wellstone and Pete Dominici Mental Health Parity and Addiction Act of 2008 (MHPAEA). [42 U.S.C. §300gg-26]

This bill:

1) Requires, for policy years beginning on or after January 1, 2024, a blanket disability insurance policy that meets the definition of student health insurance coverage to be considered individual health insurance coverage, as specified.

2) Defines "student health insurance coverage" as a blanket disability policy that covers hospital, medical, or surgical benefits, that is provided pursuant to a written agreement between an institution of higher education, as defined in the federal Higher Education Act of 1965, and a disability insurance issuer, and provided to students enrolled in that institution of higher education and their dependents, that meets all of the following conditions:

   a) Does not make coverage available other than in connection with enrollment as a student, or as a dependent of a student, in the institution of higher education;
   b) Does not condition eligibility for the insurance coverage on any health status-related factor relating to a student or a dependent of a student; and,
   c) Does not condition eligibility, an offer, issuance, a sale, or a renewal for the insurance coverage on any factor other than enrollment as a student or dependent of a student in the institution of higher education.

3) Requires, a blanket disability insurance policy that meets the definition of student health insurance coverage to comply with the provisions of Insurance Code that are applicable to nongrandfathered individual health insurance, including, but not limited to, essential health benefits requirements, rating factors consistent with existing law, the annual limit on maximum out-of-pocket expenses as specified, and the prohibition against annual and lifetime limits.

4) Exempts a disability insurance issuer that offers student health insurance coverage from being required to renew or continue in force coverage for individuals who are no longer students or dependents of students. However, requires the student health insurance coverage to be renewable with respect to all eligible students or dependents of students at the option of the student.

5) Exempts student health insurance coverage from the requirement to provide specific levels of coverage as required in existing law for insurers not participating in Covered California. However, requires the benefits provided by student health coverage to provide at least 60% actuarial value. Requires the issuer to specify in any plan materials summarizing the terms of the coverage the actuarial value and level of coverage, or the next lowest level of coverage, and how the coverage would otherwise satisfy requirements of existing law.

6) Specifies that student health insurance coverage is not subject to single-risk pool requirements in existing law. Permits a health insurance issuer that offers student health insurance coverage to establish one or more separate risk pools for an institution of higher education if the distinction between or among groups of students or dependents of students who form the risk pool is based on a bona fide school-related classification and not based on a health factor. However, requires student health insurance rates to reflect the claims experience of individuals who comprise the risk pool, and any adjustments to rates within a risk pool to be actuarially justified.

7) Exempts student health insurance coverage from nongrandfathered individual health insurance rate review, but requires it to be subject specified nongrandfathered large group market rate review requirements. Requires if CDI determines that a rate is unreasonable or not justified the insurer to notify the policyholder of this decision, including to a student certificate holder in addition to the policyholder.

8) Exempts student health insurance from specified sections of the Insurance Code related to open enrollment periods, coordination of benefits, large group MHPAEA requirements, open enrollment and dependent coverage for dependents under 26 years of age. However, requires individual and small group MHPAEA requires to apply, as well as other depending coverage requirements related to dependent under 26 years of age.

9) Requires the following notice to be provided in the student health insurance enrollment materials provided to a student or a dependent of a student in clear, conspicuous, 14-point bold type, and permits the notice to be provided on website of the institution:

California requires residents and their dependents to obtain, and maintain, health coverage or pay a penalty, unless they qualify for an exemption. Enrolling in student health insurance offered by the college or university you are attending is one way to meet this requirement.

You may be eligible to get free or low-cost health coverage through Medi-Cal regardless of immigration status. In addition, you may be eligible for free or low-cost health coverage through Covered California. Visit Covered California at www.coveredca.com to learn about health coverage options that are available for you and your dependents, and how you might qualify to get financial assistance with the cost of coverage.

If you are under 26 years of age, you may be eligible for coverage as a dependent in a group health plan of your parent's employer or under your parents' individual market coverage. In addition, you may be eligible to buy individual health insurance directly from a health insurer or health plan, regardless of immigration status.

Please examine your options carefully to see if other options are more affordable and whether you are currently eligible to enroll in these other forms of coverage pursuant to an open or special enrollment period.

10) Defines a "student administrative health fee" as a fee charged by the institution of higher education on a periodic basis to students of the institution of higher education to offset the cost of providing health care through health clinics regardless of whether the students utilize the health clinics or enroll in student health insurance coverage. This fee is not considered a cost-sharing requirement with respect to specified recommended preventive services.

11) Defines "health factor" as, in relation to an individual, any of the following health status-related factors:

    a) Health status
    b) Medical condition, including both physical and mental illnesses;
    c) Claims experience;
    d) Receipt of health care;
    e) Medical history;
    f) Genetic information;
    g) Evidence of insurability, including conditions arising out of acts of domestic violence;
    h) Disability; and,

i) Any other health status-related factor as determined by any federal regulation, rule, or guidance issued pursuant to federal Mental Health Parity and Addiction Equity Act.

Background

According to the federal Centers for Medicare and Medicaid Services (CMS), student health plans are often purchased when family coverage is not available. According to some estimates, as many as three million students are covered through student health plans offered by colleges, universities, or other institutions of higher education. Not all student health plans are the same. Some plans are comprehensive but others offer limited benefits, which can put students and their families at risk for catastrophic medical bills. In addition, these plans are treated differently depending on how and where they are offered. This has created a patchwork system of regulation for these plans that makes it difficult for students and their families to understand their coverage and rights. The federal Department of Health and Human Services (HHS) finalized regulations effective April 20, 2012, that would ensure students enrolled in these plans benefit from important consumer protections created by the ACA, and clarified that these plans are defined as "individual health insurance coverage." There have been updates since 2012. Many commenters to the 2012 CMS rule urged CMS to extend these requirements also to self-funded student plans. The response by CMS included the following, "It is estimated that approximately 200,000 students (less than 1% of the market) are enrolled in coverage offered through self-funded health plans. As discussed earlier in the preamble, these self-funded student plans are not subject to the requirements of the [ACA] because they are neither health insurance coverage nor group health plans, as those terms are defined in the [ACA]." The preamble states that while HHS has no authority to regulate self-funded student insurance, self-funded student health plans may be regulated by the States. The University of California (UC) offers a self-funded student insurance plan in California.

Comments

According to the author, "there are over 140,000 college students and their dependents in California who rely on student blanket coverage provided through the student's university for healthcare benefits. Though these students receive coverage through their university's student blanket insurance, this coverage in practice acts as a form of individual health insurance—a fact that is already recognized federally through the ACA. Yet, here in California, we still define student blanket coverage as a type of disability insurance, rather than as individual health insurance. Because of this, many of our state's consumer protections and

regulations, which ensures better benefits and accessibility for consumers, do not technically apply to student blanket insurance and the 140,000 people that it covers. This bill would fix this by redefining student blanket coverage as a form of individual health insurance, thereby bringing it in compliance with our state's high health insurance standards and ensuring that students and their dependents are receiving the quality of healthcare that is guaranteed to them by the state."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CDI estimates state operations costs of $69,000 in 2022-23, $146,000 in 2023-24, and $125,000 ongoing thereafter (Insurance Fund).

- University of California indicates no fiscal impact.

SUPPORT: (Verified 8/22/22)

California Department of Insurance (source)
California Insurance Commissioner Ricardo Lara
University of California Student Association

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: California Insurance Commissioner Ricardo Lara and CDI, sponsors this bill and write it would align the definition of student blanket policies with federal law, which considers student blanket policies to be individual health insurance and, thus, subject to more regulator oversight and increased consumer protections available under existing federal and state law. Blanket insurance is a type of disability insurance issued to a master policyholder that provides coverage in specific circumstances for persons that fall into a defined group. Colleges and universities often purchase student insurance blanket policies to provide health benefits for their enrolled students, including DACA (Deferred Action for Childhood Arrivals) recipients and refugee students. As of December 2020, nearly 140,000 students and their dependents rely on their college or university for their health benefits. Federal law defines student blanket coverage as student health insurance coverage, and that coverage is generally subject to the individual market requirements found in the ACA. The current California law definition of "health insurance" fails to sweep in student blanket coverage because that definition only applies to group or individual coverage, and blanket coverage is neither. Even though student blanket policies may provide the same benefits as

health insurance -- and federal law requires that these policies comply with individual requirements under the ACA -- state law currently does not require student blanket policies to provide all of the protections that students and dependents would be afforded if they purchased individual health insurance coverage due to existing definitions. This bill defines student blanket coverage as individual health insurance coverage under California law. This definition is taken directly from federal law, and will ensure that student health coverage is subject to the state protections afforded to individual coverage. This alignment will remove ambiguity when state statutes use the term “health insurance.”

SUBJECT: Residential real property: foreclosure

SOURCE: California Community Land Trust Network

DIGEST: This bill makes anti-fraud modifications and other operational improvements to the SB 1079 (Skinner, Chapter 727, Statutes of 2020) process, an existing legal mechanism giving tenants, prospective owner-occupants, non-profit affordable housing providers, and public entities a window of opportunity to buy a home in foreclosure by matching or beating the winning foreclosure auction bid.

ANALYSIS:

Existing law:

1) Sets forth comprehensive procedures for conducting a foreclosure sale through an auction. (Civ. Code §§ 2924g and 2924h.)

2) Establishes a statutory system whereby eligible bidders may acquire properties consisting of one to four residential dwelling units offered at a foreclosure auction by matching or exceeding the last and highest offer made at the auction. (Civ. Code § 2924m.)

3) Defines "eligible bidder," for purposes of (**Error! Reference source not found.**, above, to include all of the following:
   a) a prospective owner-occupant, defined as a natural person who will occupy the property within 60 days of when the trustee's deed upon sale is recorded and for at least one year thereafter;
   b) an eligible tenant buyer; defined as a natural person who is occupying the property as a primary residence under a rental or lease agreement entered into before a notice of default was recorded against the property;
   c) a nonprofit association, nonprofit corporation, or cooperative corporation in which an eligible tenant buyer or a prospective owner-occupant is a voting member or director;
   d) an eligible nonprofit corporation based in California whose primary activity is the development and preservation of affordable rental housing;
   e) a limited partnership or a limited liability company in which the managing general partner or managing member, respectively, is an eligible nonprofit corporation based in California whose primary activity is the development and preservation of affordable housing;
   f) a community land trust;
   g) a limited-equity housing cooperative;
   h) the state, the Regents of the University of California, a county, city, district, public authority, or public agency, and any other political subdivision or public corporation in the state. (Civ. Code § 2924m(a).)

4) Empowers an individual or entity to bid on the purchase of residential property that has gone up for auction sale provided that the individual or entity presents to the foreclosure trustee a declaration or affidavit stating that the individual or entity is an eligible bidder. (Civ. Code § 2924m; Code Civ. Proc. § 2015.5.)

5) Establishes a procedure for eligible bidders to meet or beat the last and highest foreclosure auction bid during a specified period after the auction. (Civ. Code § 2924m(c).)

6) Establishes a comprehensive schedule of fees that can be charged by foreclosure trustees for their services. (Civ. Code § 2924d.)

This bill:

1) Requires eligible tenant buyers to attach a copy of their dated and signed rental or lease agreements, if available, to the affidavits in which they affirm their status or, if the rental or lease agreement is not available, then either:

   a) evidence of rent payments corresponding to the six months prior to the notice of default; or
   b) copies of utility bills for the rental property corresponding to the six months prior to the notice of default.

2) Specifies that in order to qualify as an eligible tenant bidder, the bidder cannot:
   a) be acting as the agent of any other person or entity, except as to the submission of a collective bid;
   b) have filed for bankruptcy, as specified, in the 45 day period after the trustee's sale.

3) Alters the categories of affordable housing providers that qualify as eligible bidders, including by requiring that, to be eligible, nonprofit corporations must:
   a) have their principal place of business in California;
   b) have all of their board members' primary residence in California;
   c) have one of their primary activities be the development and preservation of affordable rental or homeownership housing in California;
   d) be registered and in good standing with the Attorney General's Registry of Charitable Trusts, as specified; and
   d) have a determination letter from the Internal Revenue Service affirming their tax-exempt status as a 501(c)(3) corporation.

3) Declares that bids are limited to a single bid amount and may not include instructions for successive bid amounts.

4) Requires that the affidavit or declaration of the winning bidder that it is an eligible bidder and the category of bidder which it falls under to be attached to the trustee's deed and recorded.

5) Specifies that title to the property remains with the mortgagor or trustor until the property sale is deemed final.

6) Requires the trustee, within 15 days of any sale in which the winning bidder is an eligible bidder, to send information about the sale to the Attorney General electronically, including the name of the winning bidder, the address and assessor's parcel number of the property, and a copy of the trustee's deed, together with the attached affidavit or declaration.

7) Requires the Department of Justice (DOJ) to include a summary of the information set forth in (5), above, in a searchable repository on the DOJ's website.

8) Authorizes the Attorney General, a city attorney, county counsel, or district attorney to bring an action for specific performance or any other remedy at equity or law to enforce the requirements of the SB 1079 bid process.

9) Permits the trustee, in order to cover costs associated with handling post-foreclosure auction bids by eligible bidders, to deduct from the foreclosure sale proceeds a fee which may not exceed the greater of $200 or one-sixth of one percent of the unpaid principal of the loan that was secured by the property being foreclosed on. However, a trustee may claim this fee only if, within the first 15 days after a foreclosure auction, at least one eligible tenant buyer or eligible bidder submits a bid or a nonbinding written notice of intent to place a bid on the property.

10) Requires, beginning on January 1, 2023, that any property purchased by an eligible bidder that is a private entity (i.e., not a prospective owner-occupant, a tenant buyer, or a public entity) through the SB 1079 process be subject to a recorded covenant ensuring that the property will be maintained as affordable housing for lower income households for a period of 30 years from the date the trustee's deed is issued.

11) Permits the imposition of requirements to maintain property as affordable housing for lower income householders for periods longer than 30 years if specified conditions are met.

12) Extends the existing sunset date on the SB 1079 process from January 1, 2026 until January 1, 2031, applies this extended sunset date to this bill's provisions, and makes corresponding changes to relevant code sections.

Background

California enacted SB 1079 (Skinner, Chapter 727, Statutes of 2020) as one strategy for trying to reduce the transfer of residential property into the hands of large institutional investors through the foreclosure process. SB 1079 introduced a new step into the foreclosure sale process. The new step has the effect of opening up a window of time in which the current tenants, prospective owner occupants, affordable housing providers, and public entities all have the opportunity to try to

acquire the home. Under the old pre-foreclosure procedures, when it came time for the property to be sold off, the foreclosure trustee simply convened a public auction, took bids from those present, and awarded ownership of the property to the highest bidder upon payment. Under SB 1079, the same basic process unfolds except that, once the amount of the winning bid has been established, the foreclosure trustee waits an additional period of time. During this additional time, any "eligible bidder" – meaning a current tenant, a prospective owner occupant, an affordable housing provider, or a public entity – all have the opportunity to match or exceed the winning bid from the auction.

Preventing people from gaming the SB 1079 system

SB 1079's first year in effect revealed some flaws. The author and sponsors of this measure report that some real estate speculators have taken advantage of SB 1079's definition of who qualifies as an eligible bidder to bid on homes during the SB 1079 window of opportunity, purchase those homes, and then immediately resell them at a significant markup. The author and sponsors also report cases in which auction bidders have been observed fraudulently invoking the SB 1079 process by submitting documentation to the foreclosure trustee that falsely assert an intent to reside at the property.

To close these loopholes and generally make it more difficult for anyone to try to take advantage of the SB 1079 process, this bill makes a series of revisions to that process, detailed further in the Senate Judiciary Committee analysis.

Compensation for foreclosure trustees' additional time in the SB 1079 process

In addition to its anti-fraud measures, the bill also provides for modest additional compensation for foreclosure trustees if an eligible bidder makes an eligible bid triggering the SB 1079 process. Specifically, the foreclosure trustee could claim an additional fee of one-sixth of one percent of the outstanding principal balance secured by the foreclosed-upon loan. This payment comes as acknowledgment that the SB 1079 process does require additional time and effort from the trustees and, accordingly, a higher level of compensation is appropriate.

Extending the life of the SB 1079 process

As a final component, the bill pushes out the applicable sunset date for the statutes that establish the SB 1079 process. Under the present law, the SB 1079 process is scheduled for repeal in 2021. This bill would extend it for an additional five years.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, the California Department of Justice reports costs of $97,000 in Fiscal Year (FY) 2022-23 and $158,000 in FY 2023-24 and annually thereafter for additional staff resources and operating expenses and equipment (General Fund).

ARGUMENTS IN SUPPORT: According to the author, "In 2020, we passed landmark legislation to ensure that investor corporations were not allowed to capitalize on a foreclosure crisis by creating a fairer process under which non-profits or prospective homeowners could outbid corporations. However, for-profit actors have found ways to exploit this important consumer bill. […] AB 1837 will close these existing loopholes […] [and] create a fairer and more affordable path to housing for prospective homeowners, not corporations."

As sponsor of the bill, the California Community Land Trust Network writes, "In 2021, housing advocates became aware that for-profit actors were finding ways to defy SB 1079 and even manipulate it in their favor. […] AB 1837 (Bonta) would strengthen the law and deter those who would misuse it."

ARGUMENTS IN OPPOSITION: According to a coalition of eight organizations, "AB 1837 creates an excessive legal burden for an already-vulnerable low income population and risks entrenching prospective low- and moderate income homeowners in a cycle of poverty by removing their ability to build equity from their primary residence."

SUBJECT: Public works: prevailing wage: hauling

SOURCE: California Teamsters Public Affairs Council

DIGEST: This bill expands the definition of "public works" to include on-hauling of materials used for paving, grading, and fill onto a public works site and requires workers performing this work to be subject to prevailing wage requirements.

Senate Floor Amendments of 8/22/22 clarify that the intent of this bill is to restore the holdings of *OG Santone* and its subsequent interpretations, as it relates to the on hauling of materials used for paving, grading, and fill onto a public works site.

ANALYSIS:

Existing law:

1) Requires that not less than the general prevailing rate of per diem wages be paid to all workers employed on a "public works" project costing over $1,000 dollars and imposes misdemeanor penalties for violation of this requirement. (Labor Code §1771)

2) Defines "public work" to include, among other things, *construction*, alteration, demolition, installation or repair work done under contract and paid for in whole or in part out of public funds, except work done directly by any public utility company pursuant to an order of the Public Utilities Commission or other public authority. [Labor Code §1720(a)]

3) Specifies that for prevailing wage purposes, "construction" includes work performed during the design and preconstruction phases of construction, including, but not limited to, inspection and land surveying work and work performed during the postconstruction phases of construction, including, but not limited to, all cleanup work at the jobsite. [Labor Code §1720(a)]

4) Defines "paid for in whole or in part out of public funds" as, among other things, "Fees, costs, rents, insurance or bond premiums, loans, interest rates, or other obligations normally required in the execution of a contract that are paid, reduced, charged at less than fair market value, waived or forgiven." [Labor Code §1720(b)]

5) Requires that the applicable general prevailing rate of per diem wages be determined by the Director of the Department of Industrial Relations (DIR) for each locality in which the public work is to be performed and for each craft, classification, or type of worker needed to execute the public works project. (Labor Code §1773)

6) Provides that private residential projects built on private property are not subject to the requirements of public works provisions, unless the projects are built pursuant to an agreement with a state agency, redevelopment agency, or local public housing authority. [Labor Code §1720(c)(1)]

7) Authorizes the Labor Commissioner, or their designee, to issue civil wage and penalty assessments on a contractor or subcontractor, or both, that fails to pay prevailing wages in connection with a public work. (Labor Code §1741)

This bill adds the on-hauling of materials used for paving, grading, and fill onto a public works site to the definition of Public Works, if the project in question involves a contract with a state agency, the California State University, the University of California, or any political subdivision of the state.

Comments

Need for this bill? Mendoza (2019) and Busker (2018). Recent court findings have created a certain amount of uncertainty on the applicability of public works laws, in particular prevailing wage, to the moving of certain materials on to and off of a

public works site. The question in *Mendoza* was "whether offsite mobilization work conducted in connection with a public works project is performed 'in the execution of [a] contract for public work' such that it entitles workers to prevailing wage."[1] Similarly, the question in *Busker* centered on "whether work installing electrical equipment of locomotives and rail care (i.e. the 'on-board work' for Metrolink's PTC project) falls within the definitions of public works under California Labor Code 1720 (a) (1) either as constituting 'construction' or 'installation' under the statute or as being integral to other work performed for the PTC project on the wayside."[2]

In both of the above decisions, the court found that the plaintiffs were engaged in work that was not subject to prevailing wage law. However, as noted in *Busker* "the text of the prevailing wage law is susceptible to both of the opposing interpretations offered by the parties… We do not find the answer to the issues of state law presented by this case to be obvious."

OG Sansone Co. (1976). These rulings can be seen as somewhat of a departure from previous case law in *OG Sansone Co. v. Department of Transportation*. The plaintiffs in the case "hauled Class 3 aggregate subbase materials from locations not on the project site, but located adjacent to and established exclusively to serve the project site pursuant to private borrow agreements between plaintiffs and parties."[3] The finding in *OG Sansonse* can be seen as more liberally construed to allow for work that is integral to the project, but might take place outside of the site to be considered part of the public works project.

Related/Prior Legislation

AB 1717 (Aguiar-Curry, 2022) expands the definition of "public works," for the purpose of the payment of prevailing wages, to also include fuel reduction work paid for in whole or in part out of public funds performed as part of a fire mitigation project, including, but not limited to, residential chipping, rural road fuel breaks, fire breaks, and vegetation management.

AB 1886 (Cooper, 2022) expands the definition of "public works" for the purpose of the payment of prevailing wages to include street sweeping maintenance performed for the preservation, protection, and keeping of any publicly owned or publicly operated street, road, or highway done under contract and paid for in whole or in part out of public funds.

[1] "*Mendoza v. Fonseca McElroy Grinding CO., Inc"* No. 17-15221, US Court of Appeals, Ninth Circuit
[2] "*Busker v. WABTEC Corporation"* No. 17-55165, US Court of Appeals, Ninth Circuit
[3] "*OG Sansone Co. v. Department of Transportation"* Docket No. 45232, Court of Appeals of California, Second District, Division Three.

AB 2231 (Kalra, Chapter 346, Statutes of 2020) defined a public subsidy as de minimis for the purpose of paying the prevailing wage in private projects if it is both less than $600,000 and less than 2% of the total project cost for bids advertised or contracts awarded after July 1, 2021. If the subsidy is for a residential project consisting entirely of single family dwellings, the subsidy is de minimis so long as it is less than 2 % of the total project cost.

AB 2765 (O'Donnell, Chapter 355, Statutes of 2020) expanded the definition of "public works," for the purpose of the payment of prevailing wages, to also include any construction, alteration, demolition, installation, or repair work done under private contract on a project for a charter school, as defined, when it is paid for, in whole or in part, with the proceeds of conduit revenue bonds issued on or after January 1, 2021.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, DIR indicates that it would incur first year costs of $1.9 million, and $1.8 million annually thereafter, to implement its provisions of this bill (Labor Enforcement and Compliance Fund). Cost drivers would include additional oversight of public works activities compared to current law. Specifically, DIR's Division of Labor Standards Enforcement would experience additional investigations of complaints, and resulting enforcement activities. The department would likely see an increase in workload related to appeals as well.

The California Department of Transportation has yet to develop a fiscal estimate for the current version of this bill. However, annual costs would likely be, minimally, in the millions of dollars annually (special fund). Relative to current law, this bill would result in increased project expenses (specifically higher bids driven by increased wages) related to on-hauling materials, on-site verification of work performed by hauling contractors and other prevailing wage compliance activities. The department's DIR-delegated labor compliance program would likely require increased staff to inspect hauling activities and enforce prevailing wage requirements.

ARGUMENTS IN SUPPORT: The California Teamsters Public Affairs Council, the sponsor of this bill, writes in support:

"Unfortunately a series of recent California Supreme Court decisions found that because on-haul trucking is not specifically mentioned in statute as comprising part of a public works project it is unclear whether it is eligible for prevailing wages. As a result, the Department of Industrial Relations could benefit from clarity over whether on-haul truckers at public works projects are to be paid at prevailing wage.

"Prevailing wages standards ensure more projects are built by well-trained local workers who know how to get the job done right the first time. In turn, this benefits taxpayers and the economy. For example, California's prevailing wage law creates 17,500 jobs annually; and boosts the economy by $1.4 billion, every year. Likewise, studies consistently show that prevailing wage has no impact on total construction costs. This is because utilizing higher skilled local workers on dangerous construction jobs increases productivity and job site efficiency. By stabilizing the wage floor, it also reduces reliance on taxpayer funded welfare programs. As such, prevailing wage requirements can help ensure that workers earn a living wage, close racial and gender pay gaps, and ultimately save money by guaranteeing high-quality work and boosting worker productivity."

SUBJECT: Community colleges: part-time employees

SOURCE: California Federation of Teachers

DIGEST: This bill increases the maximum amount of instructional hours that a *part-time* California Community College (CCC) faculty member may teach at any one community college district.

ANALYSIS:

Existing law:

1) Defines "faculty" as those employees of Community College Districts (CCD) who are employed in academic positions that are not designated as supervisory or management, as specified. Faculty include, but are not limited to, instructors, librarians, counselors, community college health services professionals, handicapped student programs and services professionals, and extended opportunity programs and services professionals (Education Code (EC) Section 87003).

2) Establishes Legislative intent that the rights of part-time, temporary faculty shall be included as part of the usual and customary negotiations between the CCD and the exclusive representative for part-time, temporary faculty;

3) Establishes Legislative intent that the CCD establish minimum standards for the terms of reemployment preference for part-time, temporary faculty, through the negotiation process, which complies with all of the following:

   a) The standards include all of the following:

      i) The length of time the faculty have served at the college or CCD;

      ii) The number of courses faculty have taught at the college or CCD;

      iii) The evaluations of faculty required pursuant to existing law and any other related methods of evaluation that can be reliably used to assess educational impact of faculty as it relates to student success; and,

      iv) The availability, willingness, and expertise of faculty to teach specific classes or take on specific assignments that is necessary for student instruction or services.

   b) Additional standards may be considered and established through the negotiation process, as necessary;

4) Requires, as a condition of receiving Student Success and Support Program (SSSP) funding, a CCD and the exclusive representative of the part-time, temporary faculty to negotiate in good faith all of the following:

   a) The terms of reemployment preference for part-time, temporary faculty assignments based on the minimum standards established, up to the range of 60 to 67% of a full-time equivalent load; and,

   b) A regular evaluation process for part-time, temporary faculty;

5) Requires a CCD that has a collective bargaining agreement in effect as of July 1, 2017, that has satisfied the aforementioned requirements, and that executes a signed written agreement with the exclusive representative of the part-time, temporary faculty acknowledging implementation shall be deemed to be in compliance with this section while the bargaining agreement is in effect (EC 87482.3).

6) Defines any person who is employed to teach at a CCD for not more than 67% of the hours per week considered a full-time assignment to be a part-time, temporary employee (EC Section 87482.5).

7) The Board of Governors (BOG) of the CCC has had a longstanding policy (commonly referred to as "75/25") that at least 75% of the hours of credit instruction in the community colleges, as a system, should be taught by full-time instructors. Existing law requires the BOG to adopt regulations regarding the percent of credit instruction taught by full-time faculty and authorizes districts with less than 75% full-time instructors to apply a portion of their "program improvement" funds toward reaching a 75% goal. However, the state has stopped providing program improvement funds and the BOG has since required CCDs to provide a portion of their growth funds to hire more full-time faculty (EC 87482.6).

This bill:

1) Updates, as follows, existing provisions requiring CCDs, as a condition of receiving funding allocated for the Student Equity and Achievement Program (SEAP), to negotiate with bargaining representatives specified conditions of employment for part-time faculty:

   a) For a district without a collective bargaining agreement with part-time faculty in effect as of January 1, 2023, to commence negotiations on that date;

   b) For a district with a collective bargaining agreement in effect as of January 1, 2023, to commence negotiations no later than the expiration date of that agreement; and,

   c) The terms of reemployment preference for part-time faculty assignments shall be based on the minimum standards not exceeding the range of 80 to 85% (instead of a range of 60 to 67%) of a full-time faculty member's equivalent load, and the district shall not restrict the negotiated terms to less than the range of 80 to 85% unless explicitly agreed upon for an individual part-time faculty member by that faculty member and the district.

2) Increases, from 67% to 85%, the proportion of hours per week of a full-time faculty assignment that a part-time CCC instructor may teach and still be classified as a temporary employee.

3) Stipulates that, if (2), as enumerated above, is in conflict with any collective bargaining agreement already entered into as of January 1, 2023, the terms of that agreement shall govern until its expiration.

4) States it is not the intent of the Legislature to require a community college district to increase the number of available part-time, temporary faculty assignments as a result of any increase to the minimum standards as a result of this measure.

Comments

1) *Need for the bill.* According to the author, "Under the 67% threshold, many faculty members teach in multiple California Community College districts at the same time to piece together a full-time schedule, limiting their ability to participate in the campus community and be a resource to students. Current law requires that an individual employed to teach adult or community college course for 67% or less of the hours per week is considered a full-time assignment, excluding substitute service, be classified as a temporary employee and not become a contract employee."

   The author contends that "Faculty, both full- and part-time are instrumental in creating a college environment that fosters student success. Increasing the hours part-time faculty members are permitted to work helps ensure students have better access to their professors."

2) *How would this bill help part-time faculty?* Current law limits part-time faculty to 67 percent of the hours that constitute a full-time faculty assignment for a particular district. A full-time teaching load, which earns the employee a full salary, benefits, and tenure, is determined through collective bargaining and is 15 units on average. Part-time faculty are considered temporary employees and many teach in multiple districts at the same time to piece together a full-time schedule (earning them the nickname "freeway flyers"). As a result, part-time faculty are limited in their ability to participate in a campus community and be a resource for students.

   By allowing up to 85 percent of a full-time load, this bill could allow part-time faculty to spend more time at a given district and reduce the amount of time spent driving from campus to campus. The reduced drive time would mean more time to do the proper class prep, get needed rest, or be with their families. According to the sponsors of this bill, it is not uncommon for adjuncts with

small children to go days without seeing their children awake, having to leave for work early in the morning before they wake and come home at night after they have gone to bed.

According to the CCC Chancellor's Office (CCCCO), for Fall 2020, the CCC employed 16,294 full-time faculty and 33,661 part-time faculty.

3) *Student Success and Support Program (SSSP).* The SSSP provided ongoing funding to CCDs for student support in admissions, orientation, assessment, counseling and student follow up. However, according to the Legislative Analyst's Office, the Committee on Budget (AB 1809), Chapter 33, Statutes of 2018, consolidated the SSSP and another program, the Student Success for Basic Skills, into a block grant, known as the SEAP. Funding for the new block grant program ($475 million statewide in 2017-2018) was based on CCDs' 2017-18 fiscal year allocations for the consolidated programs. As a condition of receiving funds, CCDs are required to develop student equity plans, deliver student matriculation services and adopt assessment and placement policies, as specified under current law.

   To note, as of 2021-2022, the SEAP funding level is $498 million; the Governor's 2022-2023 Budget Proposal does not include an increase to SEAP.

4) *Similar measure vetoed last year.* The author carried a substantively similar bill, AB 375 (Medina, 2021) which was vetoed by Governor Newsom. The veto message read, in part "Our system of community colleges could not operate without part-time faculty. Even though they carry an enormous amount of the teaching load across the system, these qualified instructors must often teach at multiple campuses in order to piece together higher wages, and do not receive the same salary or benefits as their full-time colleagues.

   "While I understand the objectives of this legislation, this bill would create significant ongoing cost pressures on the state and community college districts, potentially in the hundreds of millions of dollars. Such a high expenditure is better addressed in the State Budget process, which is why I am committed to considering options to support our community college part-time faculty in my forthcoming January budget proposal."

   The Governor's 2022-2023 budget includes a $200 million ongoing augmentation for the Part-Time Faculty Health Insurance Program, a 400-fold increase to a program that is currently funded at $490,000 dollars. According to

information from the sponsor of AB 1856, "These additional funds will more than pay for the very limited number of part-time faculty that could trigger any new health care cost obligation for districts by raising the cap on hours part-time faculty can teach."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Chancellor's Office estimates that this bill could result in $200 million to $403.5 million in ongoing Proposition 98 General Fund costs each year for community college districts to offer health insurance benefits to part-time faculty, depending on the exact number of faculty who qualify. This estimate assumes that the bill would trigger Affordable Care Act (ACA) requirements due to the additional unit load and potential increase in office hours and other workload requirements. This estimate also assumes an annual employer contribution of $11,000 for 18,384 to 36,768 part-time faculty employed by community college districts throughout the state. To the extent that districts are already providing health benefits to these employees, this estimate could be lower. Staff notes that the 2022 Budget Act includes a $200 million Proposition 98 General Fund increase for the Part-Time Faculty Health Insurance Program (above its current funding level of $490,000). This augmentation expands health care coverage provided to part-time faculty.

This bill could also result in one-time Proposition 98 General Fund costs of between $360,000 and $720,000 for community college districts to update or create collective bargaining agreements with part-time faculty. This estimate assumes a cost of about $5,000 to $10,000 for each of the state's 72 districts.

SUPPORT: (Verified 8/12/22)

California Federation of Teachers (source)
California Labor Federation
California Part-time Faculty Association
Faculty Association of California Community Colleges
GenUP

OPPOSITION: (Verified 8/12/22)

Association of Community and Continuing Education
Contingent Faculty for Equality
Mt. San Antonio College
North Orange County Community College District

ARGUMENTS IN SUPPORT: According to the California Federation of Teachers, the sponsor of the bill, "…existing law, known as the "67% law" caps the teaching load of part-time temporary faculty to 67% of the hours that constitute a full-time faculty assignment. A full-time teaching load is defined as the number of in-class hours that a contract/full-time faculty member must fulfill in order to earn a full salary, benefits, and tenure. These required teaching hours vary according to the teaching discipline. A full-time teaching load for each discipline is negotiated by the local community college district; however, on average, a full-time load is 15 units."

The CFT contends that, "due to the 67% law, many part-time faculty must teach in multiple community college districts at the same time to piece together a full-time schedule - so called "Freeway Flyers." This limits their ability to participate in the campus community and be a resource to students. AB 1856 (Medina) would increase the cap on part-time faculty workloads to the range of 80% to 85% of a full-time faculty load. This would apply to any new collective bargaining agreement, or upon expiration of any negotiated agreement in effect on January 1, 2023. This bill is a crucial first step in improving the working conditions for part-time faculty in [CCCs]."

ARGUMENTS IN OPPOSITION: According to Mt. San Antonio College, "Some districts and their employee groups have already bargained and opted to provide this benefit, while others have jointly determined that it is not the best use of financial resources of the district and have made other employee compensation decisions as a result. This bill would restrict the flexibility that community college districts need to ensure that all of their employees have adequate benefits for a variety of scenarios beyond the scope of what is in this legislation.

As currently written, this bill would create a new costly mandate while districts are already facing tightened budgets and increased cost pressures as we begin to transition out of the COVID-19 pandemic."

SUBJECT: Solid waste

SOURCE: Californians Against Waste
EarthJustice
East Yard Communities for Environmental Justice
Valley Improvement Projects

DIGEST: This bill repeals the provision of law that allows jurisdictions to count up to 10 percent of the waste sent to transformation toward their 50 percent diversion requirement and creates the Zero-Waste Equity Grant Program to support strategies and investments in communities transitioning to a zero-waste circular economy.

Senate Floor Amendments of 8/23/22 make changes to the Zero-Waste Equity Grant program, including making qualifying tribal entities eligible for the grant program, giving priority to communities most impacted by transformation or that contribute to significant amounts of transformation, and limiting the grant program to programs that result in the reuse, repair, and sharing of goods and materials; specify that grants shall not be provided for a project that results in incineration, energy generation, and fuel production, or other forms of disposal; and require the

Department of Resources Reduction and Recycling (CalRecycle) to consult with the Department of Industrial Relations, instead of the Division of Occupational Safety and Health, when submitting policy recommendations on how to increase job opportunities and improve labor standards and worker pay related to the zero-waste job sector.

ANALYSIS:

Existing law, under the Integrated Waste Management Act (IWMA):

1) Establishes a state recycling goal of 75% of solid waste generated by diverting from landfill disposal by 2020 through source reduction, recycling, and composting. (Public Resources Code (PRC) § 41780.01)

2) Requires each local jurisdiction to prepare and adopt a source reduction and recycling element (SRRE) with primary emphasis on implementation of all feasible source reduction, recycling, and composting programs while identifying the amount of landfill and transformation capacity that will be needed for solid waste that cannot be reduced at the source, recycled, or composted. (PRC §§41000 et seq, 41300 et seq)

3) Requires each local jurisdiction's SRRE to include an implementation schedule that diverts 50% of solid waste from landfill disposal through source reduction, recycling, and composting. The amount diverted is known as the jurisdiction's "diversion rate." Since 2008, this requirement has shifted to a 50% disposal rate based on per capita disposal. (PRC §§41780, 41780.05)

4) Allows jurisdictions to count up to 10 percent of the waste that they send to transformation facilities toward the 50 percent diversion obligation if specified conditions are met, including that the facility began operating before January 1, 1995. (PRC §41783)

5) Defines "transformation" as incineration, pyrolysis, distillation, or biological conversion other than composting, but does not include composting, gasification, engineered municipal solid waste (EMSW) conversion, or biomass conversion. (PRC §40201)

6) Defines "biomass conversion" as the production of heat, fuels, or electricity by the controlled combustion of, or the use of other noncombustion thermal conversion technologies (e.g., gasification or pyrolysis) of specified types of biomass, such as agricultural, forestry, and yard wastes. (PRC §40106)

7) Defines "engineered municipal solid waste conversion" (EMSW conversion) as the conversion of solid waste that meets specified conditions. (PRC §40131.2)

This bill:

1) Repeals the provision of law that allows jurisdictions to count waste sent to transformation for up to 10 percent of their 50 percent diversion requirement and makes other conforming changes.

2) Requires CalRecycle, upon appropriation, to establish and administer the Zero-Waste Equity Grant Program as a competitive grant program for local public agencies, cities, counties, nonprofit organizations and qualifying tribal entities to support targeted strategies and investments in communities transitioning to a zero-waste circular economy. Requires programs result in the reuse, repair, and sharing of goods and materials. Requires CalRecycle, within a year of the appropriation for the grant program, to conduct at least two public workshops, as specified, including an online virtual option for participation, and to prepare and adopt guidelines and procedures for evaluating competitive grant applications.

   a) In evaluating a grant application, requires CalRecycle to prioritize communities most impacted by transformation or that contribute to significant amounts of transformation. In giving this priority, requires CalRecycle to consider all of the following:

      i) A community's proximity to a transformation facility that was in operation on January 1, 2018.

      ii) The potential amount of solid waste that is expected to be diverted from transformation facilities through the proposed project.

      iii) A community's proximity to an EMSW facility.

   b) Prohibits grants from being provided for a project that will result in combustion, incineration, energy generation, and fuel production, or any other form of disposal, as specified.

   c) Requires CalRecycle to post on its website and submit to the Legislature a report on all eligible zero-waste projects funded, as specified.

3) Requires, within two years of the appropriation for the Zero-Waste Equity Grant Program, CalRecycle, in consultation with the California Workforce Development Board and the Department of Industrial Relations, to submit

policy recommendations to the Legislature on how to increase job opportunities and improve labor standards and worker pay related to the zero-waste job sector.

Background

Transformation. Transformation includes the incineration of solid waste to produce heat or electricity. Under the Act, transformation also includes pyrolysis, distillation, or biological conversion other than composting; however, it excludes biomass conversion. Transformation facility operators are required to report tonnages and origins of waste transformed and report the information to CalRecycle's Disposal Reporting System, maintain compliance with all applicable laws and permit requirements, and test ash quarterly for hazardous materials and manage it appropriately. There are two transformation facilities, both incinerators, in California: Covanta Stanislaus Inc. in Stanislaus County and Southeast Resource Recovery in Long Beach.

Comments

Purpose of this bill. According to the author, "AB 1857 corrects a deficiency in waste management law that has caused harm in overburdened communities for over three decades. The Integrated Waste Management Act "Act" (AB 939 in 1989) mandates that jurisdictions must divert at least 50% of their waste away from landfills and into source reduction, recycling, reuse, and composting activities. However, the Act permits jurisdictions to count up to 10% of the waste ("Diversion Credit") that they send to municipal solid waste incinerators towards their obligation to divert at least 50% of their waste away from landfills. It is past-due that the legislature update state-wide policy on municipal incinerators to better advance equity and sustainability in waste management law and make it clear that burning trash isn't recycling once and for all. Municipal waste incinerators are a reminder of how environmental racism can become normalized as a policy neutral solution when the story is always more complicated. It is hard to ignore the 30 years of lived experiences from frontline communities which live near an incinerator and the scientific data that shows the harmful health impacts from these facilities. Our state needs to turn away from municipal incineration as a viable option. Moreover, California needs to support zero-waste strategies with funding and policy changes to better leverage our investments going forward."

Pros and Cons of Transformation. Proponents of transformation state that it reduces greenhouse gas (GHG) emissions over landfilling by avoiding methane emissions, recovers the metals from solid waste that would otherwise be landfilled, and provides a reliable energy source. Transformation reduces the volume of

material by about 90%, and the remaining 10% is ash that is either landfilled in a solid waste landfill or a hazardous waste facility. According to information provided by the City of Long Beach, the Southeast Resource Recovery Facility operates up to 99% below federal emissions standards and its emissions are lower when compared to other local air emissions in the South Coast Air Quality Management District. Transformation facilities are used by a number of law enforcement agencies to destroy controlled substances, evidence, and seized firearms; some local governments have raised concerns about finding alternative disposal options for these materials if the facilities were to close.

However, because a transformation facility operates within or below what is required of the facility by federal law, does not mean it is without environmental impacts to the surrounding communities. According to the United States Environmental Protection Agency, solid waste incinerators typically emit hazardous air pollutants, including dioxin, furan, mercury, lead, cadmium, and other heavy metals. Other emissions from transformation facilities include nitrogen oxides, volatile organic compounds, particulate matter, and carbon monoxide. For this reason, they are required to have air pollution controls, such as afterburners to reduce carbon monoxide emissions, scrubbers to remove particulates and acid gases, filters to remove particulates, and dry sorbent injection for acid gas control. The types of pollution controls used depend on the composition of the wastes burned and on the design of the solid waste incinerator.

In addition to air emissions, incinerator ash is also an environmental concern. Ash should be disposed of in a solid waste landfill or in a hazardous waste facility, if testing determines it is hazardous. In March 2018, both the Los Angeles County Department of Public Health and CalRecycle inspection reports noted ash concerns at Southeast Resource Recovery, including ash accumulation along the roads at and near the site, and nearby drain grates were clogged with ash, posing health concerns for nearby residents and potential impacts to waterways.

The claim that transformation reduces GHG emissions over landfilling is disputed by a number of organizations and relies on the assumption that the portion of waste that is “biogenic” (e.g., food scraps, paper, wood, etc.) should not be counted towards the transformation facility’s GHG emissions because it is "carbon neutral" since plants and trees regrow. However, even without including the biogenic portion of the waste steam, transformation facilities emit more carbon dioxide per megawatt hour than coal power plants. According to a report by Earthjustice, East Yard Communities for Environmental Justice, and the Valley Improvement Projects, incinerators emit more carbon dioxide per unit of energy than coal-fired power plants.

Transformation facilities in California are located in environmental justice communities. According to the report by EarthJustice, East Yard Communities for Environmental Justice, and the Valley Improvement Projects, the population within a 5-mile radius of Southeast Resource Recovery Facility is 81% people of color with a per capita income of $28,312; the population within a 5-mile radius of Covanta Stanislaus is 80% people of color with a per capita income of $23,534. According to the City of Long Beach, the nearest resident to the Southeast Resource Recovery Facility is 1.7 miles away.

Should transformation be considered recycling? The IWMA permits jurisdictions to claim waste sent to certain transformation facilities for up to 10% of a jurisdiction's diversion requirement. Jurisdictions claiming the transformation credit must ensure that all recyclable materials are removed from their solid waste before it burns and send the portion of their solid waste claimed as transformation to one of two CalRecycle-permitted active facilities in California. Both of those facilities are incinerators.

Of the state's 419 jurisdictions, 249 claim *some* level of diversion credit (not all claim the full 10 percent) for waste sent to transformation. Thus, opponents of the bill argue that removal of this credit would undermine a jurisdiction's ability to meet the diversion requirements and could potentially subject them to enforcement action by CalRecycle. Of the 249 jurisdictions claiming a credit, four jurisdictions (the cities of Industry, Paramount, Lawndale, and Bellflower) would not have met their diversion requirement without the transformation credit. However, a jurisdiction's failure to achieve the 50% diversion requirement can only result in enforcement action if CalRecycle determines that the jurisdiction did not make a "good faith effort" to implement its waste reduction and recycling programs.

The state has allowed incineration to be counted as recycling since 1989. At that time, recycling was not widely available statewide. In the last three decades, California has developed a robust recycling infrastructure that continues to grow and innovate. Allowing material sent to transformation to count as recycling provides an incentive for jurisdictions to continue to rely on this technology instead of supporting existing recycling systems and investing in cleaner source reduction, recycling, and composting alternatives. This bill would end the diversion credit for solid waste sent to transformation.

Will more solid waste be sent to landfills? Opponents of this bill , such as League of California Cities, Los Angeles Division, argue that without the credit, jurisdictions in Los Angeles County that currently utilize South East Resource

Recovery will have to transport the solid waste to other landfills throughout the state instead of sending to South East Recovery for transformation.

This bill does not prohibit jurisdictions from sending solid waste to incinerators for transformation and may continue to do so; the jurisdiction will not receive a credit for that solid waste to be applied towards their diversion requirements. This bill does not change the requirement that jurisdictions divert 50% of their solid waste away from landfills.

Additionally, opponents argue that, for those jurisdictions that do not rely on the 10% diversion credit to meet diversion requirements, jurisdictions will begin sending more solid waste to landfills because landfills are less expensive than transformation facilities. It is unknown what the disposal rates are of Covanta Stanislaus Inc. and Southeast Resource Recovery and how they compare to nearby landfills.

Impacts to transformation facilities. Opponents of the bill argue that removing the diversion credit will reduce the amount of material that is sent to transformation facilities and jeopardize its vitality, affecting the facilities' workers. This bill does not prohibit or eliminate transformation; it only removes the ability of local jurisdictions to count incineration as recycling.

Opponents also argue that transformation facilities are further affected by the implementation of SB 1383 regulations due to less material going to transformation facilities for incineration and instead will go to the new composting facilities. It is unknown what effect SB 1383 regulations will have on transformation facilities.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CalRecycle estimates ongoing costs of about $1.2 million in 2022-23 and $1.1 million annually thereafter [IWMA] to administer and oversee the new grant program.

- Unknown but likely significant cost pressure, possibly in the tens of millions of dollars (General Fund, special fund, or bond funds), to provide funding for the new grant program.

- Unknown but likely minor costs for the California Workforce Development Board and the Division of Occupational Safety and Health to consult with CalRecycle as needed.

- To the extent that the Commission on State Mandates determines that this bill establishes a reimbursable mandated local program, unknown costs (General Fund) for the state to provide such reimbursement."

OPPOSITION: (Verified 8/23/22)

City of Bellflower
City of Industry
City of Long Beach
City of Paramount
Covanta Energy Corporation
IBEW Local 11
League of California Cities, Los Angeles County Division
Los Angeles County Solid Waste Management Committee/Integrated Waste Management Task Force
Solid Waste Association of North America's Legislative Task Force, California Chapters

ARGUMENTS IN SUPPORT: According to the San Fernando Valley Climate Reality Project, "We must acknowledge that a 10% 'waste diversion credit' is not actual diversion if solid waste is simply sent from landfills to incinerators. It is also important to note that the Integrated Waste Management Act (1989) requires CalRecycle to 'maximize' source reduction, recycling, composting and other options to reduce solid waste, but does not provide certification for the term 'maximize'.

"We know that there are long-standing practices of siting waste facilities in low-income communities. As such, it becomes even more essential that we stop playing a numbers game with "diversion" and "maximization", and actually reduce our waste. We cannot expect to achieve true waste reduction or lower greenhouse gas emissions unless we have accountability and real progress toward zero waste.

"Achieving zero waste should be the truest definition of waste management. We strongly encourage the passage of this bill to eliminate Diversion Credits … ."

ARGUMENTS IN OPPOSITION: According to the League of California Cities, Los Angeles County Division, "Approximately 65 jurisdictions in Los Angeles County and the immediate sounding area utilize the SERFF to responsibly dispose of solid waste without having to transport it to landfills throughout California or

other states. By undermining waste-to-energy as a viable alternative to landfilling, AB 1857 would negatively impact air quality in Southern California and the Los Angeles Basin.

“The SERRF is also an environmentally responsible tool for waste management that produces well over 200,000 megawatt hours of electricity per year, representing more than one-quarter of the annual residential electric load for Long Beach. Baseload energy produced at SERRF is sold and becomes part of the regional grid, providing a local renewable energy source.
…

“Finally, we can’t overlook how the SERFF bolsters the local economy by providing dozens of well-paid, union jobs at the facility. Waste-to-energy is a leading technology helping to advance sustainability and union job opportunities.”

ASSEMBLY FLOOR: 73-0, 5/23/22 - See last page for vote

SUBJECT: Substance abuse treatment: registration and certification

SOURCE: California Association of Alcohol and Drug Program Executives

DIGEST: This bill exempts specified individuals from being registered with or certified by an approved certifying organization when providing substance use disorder counseling services. This bill requires the Department of Health Care Services to determine core competencies for registered or certified counselors, as specified.

Senate Floor Amendments of 8/22/22 incorporate language from AB 2473 (Nazarian, 2022) to avoid chaptering out issues. The amendments also contain technical, nonsubstantive changes.

ANALYSIS:

Existing law:

1) Grants the Department of Health Care Services (DHCS) sole authority in state government to determine the qualifications, including the appropriate skills, education, training, and experience, of personnel working within alcoholism or

drug abuse recovery and treatment programs under DHCS's purview, as specified, and to approve certifying organizations (COs) that register and certify counselors. [HSC §11833]

2) Requires DHCS to require that an individual providing counseling services, except for licensed professionals as defined by the department, who is working within a specified program be registered with or certified by a DHCS-approved CO. [HSC §11833]

3) Prohibits DHCS from approving a CO that does not, prior to registering or certifying an individual, contact other DHCS-approved COs to determine whether the individual has ever had their registration or certification revoked. Requires a CO to deny the request for registration and to send the counselor a written notice of denial if a counselor's registration or certification has been previously revoked. [HSC §11833]

This bill:

1) Exempts, in addition to licensed professionals in current law, graduate students affiliated with university programs in psychology, social work, marriage and family therapy, or counseling, who are completing their supervised practicum hours to meet postgraduate requirements, and associates registered with the California Board of Behavioral Sciences (BBS), from being registered with or certified by a DHCS-approved CO.

2) Requires a program providing practicum for graduate students exempted from registration to notify DHCS if a graduate student is removed from the practicum as a result of an ethical or professional conduct violation, as determined by either the university or the program.

3) Requires DHCS to report a graduate student who is removed from the practicum due to a specified violation to all DHCS-approved COs, in a manner to be determined by DHCS.

4) Prohibits DHCS from also approving a CO that does not contact other DHCS-approved COs to determine whether an individual has ever been removed from a postgraduate practicum for specified violations, prior to registering or certifying an individual.

5) Requires a CO to also deny a request for registration from an individual who has previously been removed from a postgraduate practicum for specified violations.

6) Requires DHCS to adopt regulations to implement the provisions in this bill by December 31, 2025.

7) Requires DHCS to determine required core competencies for registered or certified substance use disorder (SUD) counselors. Requires DHCS to consult with affected stakeholders in developing the requirements.

8) Requires core competency requirements to align with national certification domains and competency exams. Requires hours completed for the core competency requirements to count toward the education requirements for SUD certification. Prohibits hour requirements for registered counselors from being lower than the hour requirements approved by DHCS for certified peer support specialists.

9) Requires counselors to have six months from the time of registration to complete the core competency requirements and to provide their respective CO proof of completion of the required hours within that timeframe.

10) Prohibits DHCS from implementing the core competency requirements, and from specifying and implementing the hour requirements, before July 1, 2025.

Comments

1) *Author's statement.* According to the author, California is facing a critical shortage of the substance use disorder (SUD) treatment workforce able to handle the increase of individuals needing treatment. Community-based organizations are down 20-30% of their staff, and the inability to recruit and retain a capable workforce impacts the ability to deliver good services. The current SUD counselor registration system is duplicative of requirements for students in their graduate program and discourages students from gaining work experience in SUD programs. This bill will make student participation in SUD programs much easier than it currently is by removing this barrier to do field work or a practicum in a SUD program.

2) *SUD counselor certification.* To meet current counselor requirements, individuals must be registered with or certified by a DHCS-approved CO. In order for a CO to issue certification, individuals must meet requirements established in regulations, which include completion of at least 155 hours of formal classroom education, as defined; have documented completion of at least 160 hours of supervised alcohol or other drug program counseling and 2,080 or more hours of work experience; and received a score of at least 70% on an approved exam. Certification is valid for two years and a counselor is required

to complete 40 hours of continuing education every two years for renewal. Regulations allow for individuals who are registered with a CO to provide counseling services while working toward completion of certification requirements. Regulations also exempt licensed professionals (such as physicians licensed by the Medical Board of California, psychologists licensed by the Board of Psychology, those licensed by or registered as an intern with the BBS or the California Board of Psychology) from certification for providing SUD counseling services at facilities and programs under DHCS's purview.

3) *California's Current and Future Behavioral Health Workforce*. While there has not been a comprehensive assessment solely of the SUD workforce needs, a report issued by the Healthforce Center at the University of California in 2018 entitled "California's Current and Future Behavioral Health Workforce" stated that one in six adults suffers from mental illness and one in fourteen children has a serious emotional disturbance. Despite access to public and private insurance coverage for behavioral health services, many Californians with mental illness or SUD do not receive treatment. To increase the likelihood that better coverage for behavioral health services will yield better access to treatment, California needs an adequate supply of behavioral health workers who are distributed equitably across the state and who reflect the demographic characteristics of the state's population. These workers must also possess the skills and credentials necessary to deliver the type of behavioral health care (e.g., prescribing/medication management, counseling) that people need. Key findings of the report include:

   a) Ratios of behavioral health professionals to population vary substantially across California's regions, with the lowest ratios in the Inland Empire and San Joaquin Valley;

   b) Blacks and Latinos are underrepresented among psychiatrists and psychologists relative to California's population. Latinos are also underrepresented among counselors and clinical social workers;

   c) Forty-five percent of psychiatrists and 37% of psychologists are over age 60 years and are likely to retire or reduce their work hours within the next decade;

   d) Wages vary widely across behavioral health occupations, as do the settings in which people are employed. SUD counselors have the lowest mean annual earnings while psychiatrists have the highest mean annual earnings;

e) California's behavioral health trainees are not distributed evenly across the state. There are no residency programs for psychiatrists and no educational programs for psychiatric mental health nurse practitioners or psychologists north of Sacramento. There are no doctoral programs in psychology in the Central Coast and San Joaquin Valley regions; and,

f) If current trends continue, California will have 41% fewer psychiatrists than needed and 11% fewer psychologists, licensed marriage and family therapists, licensed professional clinical counselors, and licensed clinical social workers than needed by 2028. Additional behavioral health professionals will be needed to care for Californians with unmet needs for behavioral health services.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown ongoing costs for the Department of Health Care Services, likely hundreds of thousands of dollars, for state operations to ensure compliance.

OPPOSITION: (Verified 8/22/22)

Department of Finance

ARGUMENTS IN SUPPORT: The California Association of Alcohol and Drug Program Executives, sponsor of this bill, and other supporters who provide and advocate for behavioral health services state that in 2021 the federal Centers for Disease Control and Prevention reported there were over 100,000 overdose deaths in the United States between May 2020 and April 2021. Over 75,000 of those deaths were a result of synthetic opioids/fentanyl, and 10,585 of those overdoses occurred in California. At the same time, California is facing a critical shortage of SUD treatment workforce able to handle the increase of individuals needing

treatment. Current law disincentivizes and discourages qualified marriage and family therapist students and other master-level clinicians completing their required graduate school practicums from working in SUD treatment programs by having to also register with a certifying organization as if they were on the career path to become a certified SUD counselor. They must pay a fee, sign a code of ethics, and take a nine-hour course before they can do their fieldwork in a SUD program. It reduces the available workforce at SUD treatment programs and also prevents the pipeline of marriage and family therapists, professional clinical counselors, and social workers from gaining key experience in treating SUD conditions. As the state strives towards integrated care for co-occurring mental health and SUD conditions, it is critical that the workforce have competencies in care of both conditions. It is imperative that the state support more than just an SUD counselor career path, but also an SUD licensed professional of the healing arts career path.

ARGUMENTS IN OPPOSITION: The Department of Finance is opposed to this bill because it results in General Fund impacts not included in the Administration's spending plan, and does not establish a means to recoup the costs of enforcing its requirements via fees.

SUBJECT: Animal welfare: Dog and Cat Bill of Rights

SOURCE: Social Compassion in Legislation

DIGEST: This bill requires each public animal control agency, shelter, or specified rescue group to provide a notice related to essential needs and care for dogs and cats, establishes penalties for non-compliance, and makes finding and declarations.

Senate Floor Amendments of 8/25/22 delay the implementation of the fine for a violation of the provisions of this bill by one year, until January 1, 2024, and reduce the fine amount from $250 to $150.

ANALYSIS: Existing law requires a public animal control agency or shelter to microchip a cat or dog with current information before releasing a cat or dog to an owner seeking to reclaim the animal, adopt out, sell, or rehome to a new owner. Allows a shelter or rescue group that does not have microchipping capability on location to enter into an agreement with the owner or new owner to present proof, within 30 days, that the cat or dog is microchipped. (FAC §§ 31108.3; 31752.1)

This bill:

1) Requires each public animal control agency or shelter, society for the prevention of cruelty to animals shelter, humane society shelter, or rescue group to make a copy of the following notice:

   "Dogs and cats deserve to be free from exploitation, cruelty, neglect, and abuse.

   Dogs and cats deserve a life of comfort, free of fear and anxiety.

   Dogs and cats deserve daily mental stimulation and appropriate exercise considering the age and energy level of the dog or cat.

   Dogs and cats deserve nutritious food, sanitary water, and shelter in an appropriate and safe environment.

   Dogs and cats deserve regular and appropriate veterinary care.

   Dogs and cats deserve to be properly identified through tags, microchips, or other humane means.

   Dogs and cats deserve to be spayed and neutered to prevent unwanted litters."

2) Requires the notice to be posted on the facility's website in a clear and conspicuous manner; posted in the facility where it is accessible to public view and; posted on the application for adoption in a clear and conspicuous manner.

3) Beginning January 1, 2024, requires a fine to not be assessed after the first time offense for failure to comply with the notice requirement and each additional violation occurring after 60 days from the first offense is punishable by a fine not to exceed $150.

4) Authorizes the Attorney General, district attorney, or city attorney in whose jurisdiction the violation is alleged to have occurred to bring a civil action to enforce a violation.

5) States that this bill does not create a private right of action for a violation of the posting requirement, as specified, and does not create a crime or penalty other than specified in 3) above.

Background

This bill requires public and private shelters to post a notice on their website, at the physical shelter site in a conspicuous location, or on the adoption application that enumerates certain expectations about pet care and pet ownership responsibility, especially as it pertains to dogs and cats only. The notice is to include statements about the care dogs and cats deserve including, nutritious food, sanitary water, veterinary care, mental stimulation, and that they deserve to be free from exploitation. However, shelters, both private and public, care for and adopt out other animals including rabbits and guinea pigs. This would be the first such requirement for uniform notice requirements for rescue shelters related to animal well-being. The Author and Sponsor note this bill arose out of the COVID-19 pandemic where the acquisition of animals reportedly increased.

The American Society for the Prevention of Cruelty to Animals (ASPCA) noted in a May 2021 press release of a survey conducted by the ASPCA, that one in five households acquired an animal during the pandemic, or estimated to be close to 23 million Americans. However, the study did not delineate how those animals were acquired, (adoption, pet breeder sale, or other retail methods). At the time, the press release also noted, "Despite alarmist headlines tied to regional reports of a surge in owner surrenders, this trend is not currently evident on a national level with many organizations simply seeing a return to pre-pandemic operations and intake." However, the headlines are beginning to transition from empty shelters, to shelters that are once again full.

Animal Welfare Requirements. California has established a variety of animal welfare laws regarding the care and well-being of animals. Recent laws have been implemented to ensure the welfare of animals is maintained in pet stores, by pet dealers and at pet boarding facilities. In addition, California also established the Animal Control Officer Standards Act, which created a voluntary certification program for animal control officers (AB 1125 Cooley, Chapter 622, Statutes of 2019). Multiple bills under consideration by the Legislature this year address animal welfare. AB 1781 (Blanca Rubio) which establishes safe transportation standards for public shelters, AB 1901 (Nazarian) which requires disclosure for purchasers or dog training services, AB 2723 (Holden) specifies microchip registration requirements for shelters as part of the adoption process. The above-mentioned bills, including AB 1881, are applicable to animal shelters specifically, and not private or online animal purchase, with the exception in AB 1901, that would be applicable to both private providers that offer dog training services.

ARGUMENTS IN SUPPORT: Social Compassion in Legislation sponsors this bill and writes, "Animal shelters and adoption agencies are not currently required to inform the potential adopter of the standards of care dogs and cats deserve. To ensure dogs and cats are treated appropriately, potential owners must understand that dogs and cats deserve certain standards of treatment prior to making a commitment to adoption."

A Passion for Paws – Akita Rescue, Ashley & Hobie Animal Welfare, Inc., Animal Alliance Network, Bella and Buddies Animal Rescue, Castillo Animal Veterinary Corp., Compassionate Bay, Direct Action Everywhere, Los Angeles Alliance for Animals, Our Honor, Plant-Based Advocates – Los Gatos, Poison Free Malibu, Project Counterglow, Recycled Love Dog Rescue, Grassroots Coalition, Starfish Animal Rescue, Start Rescue, Take Me Home, and Women United for Animal Welfare write in support and note, "Nearly 1 in 5 Americans have adopted a pet during the pandemic. Pet owners have responsibilities of taking care for their pet that goes beyond just feeding and grooming. Dogs and cats also need to be respected as living beings that have physical, mental, and emotional health needs. Studies cited in the Journal of Medical Ethics have shown that dogs can experience positive emotions as well as other similar empathic responses. Cats also experience their own emotions that need to be supported."

ARGUMENTS IN OPPOSITION: The California Animal Welfare Association and the Humane Society of the United States write in opposition and note, "Our shelters are staffed by trained professionals and dedicated volunteers that work each and every day to help animals in need. They work with adopters to help them select the right pet, provide counseling to help ensure a smooth transition to the new home, and provide ongoing support. When pets are returned to the shelter, it is

usually either because the pet is not the right match, or the adopter experiencing some unexpected financial or housing hardship. People should not be shamed for having to make these difficult decisions."

Opponents state that AB 1881's focus on shelters and rescue groups sends a deliberately judgmental and unsupportive message to, not only the folks working on the front-line, but to struggling families and to the good people of California who choose to provide homeless pets a place in their families. Lastly, the mechanisms for enforcement are a terrible use of local law enforcement resources to even contemplate shelters and rescue organizations being fined for not having this posting up at all times.

SUBJECT: Cannabis and cannabis products: animals: veterinary medicine

SOURCE: Author

DIGEST: This bill authorizes a veterinarian to recommend the use of cannabis on an animal for potential therapeutic effect or health supplementation purposes, as current law only allows a veterinarian to discuss the use of cannabis on an animal. This bill requires the Veterinary Medical Board (VMB or Board) to adopt guidelines for veterinarians to follow when recommending cannabis by January 1, 2024. This bill expands the purpose and intent of the Medicinal and Adult-Use Cannabis Regulation and Safety Act (MAUCRSA) to include the control and regulation of cannabis and cannabis products for use in animals, and requires the Department of Cannabis Control (Department) to promulgate regulations for animal product standards by July 1, 2025.

Senate Floor Amendments of 8/24/22 expand control and regulation of cannabis and cannabis products under MAUCRSA to include these products intended for use in animals, revise various definitions under MAUCRSA to include products intended for use in animals, require the Department to promulgate regulations for animal product standards by July 1, 2025, and address chaptering conflicts with SB

1495 (Senate Committee on Business, Professions and Economic Development) in BPC § 4883.

ANALYSIS:

Existing law:

1) Establishes the Board, responsible for licensing and regulating veterinarians, registered veterinary technicians, veterinary assistant substance controlled permit holders, and veterinary premises. (Business and Professions Code (BPC) §§ 4800 et seq.)

2) Requires a veterinarian, each time they initially prescribe, dispense, or furnish a dangerous drug to an animal patient in an outpatient setting, to offer to provide to the client responsible for the animal patient, a consultation, as specified. (BPC § 4829.5)

3) Prohibits a licensee from dispensing or administering cannabis or cannabis products to an animal patient. (BPC § 4884(a))

4) States that, notwithstanding any other law and absent negligence or incompetence, a licensed veterinarian shall not be disciplined by the Board solely for discussing the use of cannabis on an animal for medical purposes. (BPC § 4884(b))

5) Requires the Board on or before January 1, 2020, to adopt guidelines for veterinarians to follow when discussing cannabis within the veterinarian-client-patient relationship and post the guidelines on the Board's website. (BPC § 4884(c))

6) Authorizes the Board to deny, revoke, or suspend a license or registration or assess a fine for:

    a) Accepting, soliciting, or offering any form of remuneration from or to a cannabis licensee if the veterinarian or the veterinarian's immediate family have a financial interest with the cannabis licensee;

    b) Discussing cannabis with a client while the veterinarian is employed by, or has an agreement with, a cannabis license; and

    c) Distributing any form of advertising for cannabis in California. (BPC §§ 4883(p), 4883(q), and 4883(r))

7) Establishes the Medicinal and Adult-Use Cannabis Regulation and Safety Act (MAUCRSA) to regulate the cultivation, distribution, transport, storage, manufacturing, processing, and sale of both medicinal and adult-use cannabis. (BPC §§ 26000 et seq.)

8) Defines "cannabis concentrate" as cannabis that has undergone a process to concentrate one or more active cannabinoids, thereby increasing the product's potency. Further clarifies that cannabis concentrate is not considered food or a drug. (BPC § 26001(g))

9) Defines "cannabis product" as cannabis that has undergone a process whereby the plant material has been transformed into a concentrate, including, but not limited to, concentrated cannabis, or an edible or topical product containing cannabis or concentrated cannabis and other ingredients. Further clarifies that a cannabis product is not considered food, a drug, or a cosmetic. (BPC § 26001(h); Health and Safety Code (HSC) § 11018.1)

10) Defines "edible cannabis product" as a cannabis product that is intended to be used, in whole or in part, for human consumption, excluding food products, as specified. Further clarifies that an edible cannabis product is not considered food or a drug. (BPC § 26001(u))

11) States that the Department must promulgate regulations governing the licensing of cannabis manufacturers and standards for the manufacturing, packaging, and labeling of all manufactured cannabis products. (BPC § 26130 (a))

12) Defines "livestock" as all animals, poultry, and bees, and aquatic and amphibian species which are raised, kept, or used for profit. It does not include those species which are usually kept as pets, such as dogs, cats, and pet birds. (Food and Agriculture Code (FAC) § 14205)

13) Defines a "processed pet food" as a food for pets that has been prepared by heating, drying, semidrying, canning, or by a method of treatment prescribed by regulation of the department. The term includes, special diet, health foods, supplements, treats and candy for pets, but does not include fresh or frozen pet foods subject to the control of the Department of Food and Agriculture (CDFA) of this state. (HSC § 113025)

14) Defines an "industrial hemp product" or "hemp product" as a finished product containing industrial hemp that meets the following conditions:

    a) Is a cosmetic, food, food additive, dietary supplement, or herb.

b) Is intended for human or animal consumption, and specifies that "animal" does not include livestock or food animals as defined in BPC Section 4825.1.

c) Does not include THC isolate as an ingredient. (HSC § 111920(g)(1))

This bill:

1) Adds recommending cannabis for use with a client while the veterinarian is employed by, or has an agreement with, a cannabis licensee to the list of actions for which the Board may deny, revoke, or suspend a license or registration or assess a fine.

2) Prohibits the Board from disciplining or denying, revoking, or suspending the license of a veterinarian solely for discussing or recommending the use of cannabis on an animal for potential therapeutic effect or health supplementation purposes.

3) Requires the Board by January 1, 2024, to adopt guidelines for veterinarians to follow when recommending cannabis within the veterinarian-client-patient relationship and requires the guidelines to be posted on the VMB website.

4) Expands the purpose of the comprehensive system established by MAUCRSA to include the control and regulation of the cultivation, distribution, transport, storage, manufacturing, processing, and sale of cannabis products intended for use on, or consumption by, animals.

5) Specifies that for the purposes of this bill, "animal" does not include a food animal as defined or livestock, as defined.

6) Specifies that cannabis concentrate and edible cannabis products are not considered processed pet food, as defined.

7) Adds to the definition of "A-license" and "A-licensee" to include a state license or licensee for cannabis or cannabis products that are intended for use on, or consumption by, animals.

8) Adds to the definition of a "cannabis product" and "edible cannabis product" to also include cannabis products intended for use on, or consumption by, an animal.

9) Requires a cannabis product intended for therapeutic effect or health supplementation use on, or for consumption by, an animal, to conform with

any additional relevant standards, including, but not limited to, an alternative standardized concentration, established by DCC through regulations.

10) Requires the Department to promulgate regulations for animal product standards no later than July 1, 2025. Cannabis products shall not be marketed or sold for use on, or consumption by, animals before these regulations for animal standards take effect.

11) Incorporates additional changes to BPC § 4883 proposed by SB 1495 (Senate Committee on Business and Professions to resolve chaptering conflicts with this bill, and specifies the conditions which would cause these additional changes to be enacted.

Background

Veterinarians in California are prohibited from dispensing or prescribing cannabis for animals, but are currently allowed to discuss the use of cannabis products for animals. However, veterinarians in California may not recommend cannabis products, or given recommendations for how a pet owner can safely administer cannabis to their companion animal. In addition, California does not allow cannabis products to be marketed for animals, and all cannabis products are required to be labeled with a warning to keep out of reach of children and animals. According to the author and supporters of this bill, this has led to pet owners in California needing to guess an appropriate dosage for their pet or turning to unreliable sources of information online to find product recommendations.

In California, the Board has established guidelines for veterinarians to follow when discussing cannabis with pet owners. These guidelines state that veterinarians must conduct a physical exam and collect relevant clinical history. Documentation of discussions with pet owners should include the indication and safety of the use of cannabis, including advice about potential risks of medical use of cannabis.

There are no cannabis-derived products approved for use in animals by the Food and Drug Administration (FDA). While the Animal Medicinal Drug Use Clarification Act of 1994 does allow for certain products approved by the FDA for use in humans to be used in animals by veterinarians, only a very small number of cannabis-derived drugs have received FDA approval for treatment of epilepsy, chemotherapy-induced nausea, and cancer or AIDS-related loss of appetite in humans. The vast majority of cannabis-derived products marketed for pets or humans are not FDA-approved.

Cannabis for Use in Animals. With the legalization of human medicinal and adult-use cannabis in California, veterinarians in the state have seen a rise in cases of accidental cannabis intoxication in pets. THC especially is considered toxic to pets, and can cause hyperactivity, excessive drooling, vomiting, gastrointestinal upset, urinary incontinence, seizures, disorientation, and difficulty maintaining balance. In addition, many edible cannabis products may include added ingredients that are dangerous for cats and dogs, such as chocolate and xylitol.

While the FDA does not recognize cannabis, cannabis products, THC, or CBD (whether derived from cannabis or industrial hemp) as a treatment for any illness or conditions in animals, many pet owners have reported benefits to using these products in pets. Pet owners report that cannabis products can help with pain, nausea, loss of appetite, anxiety, and other conditions.

NOTE: See the Senate Business, Professions, and Economic Development Committee analysis for detailed background of this bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, DCC estimates costs of $159,124 in the first year and $126,126 ongoing for one additional staff to research and develop the manufacturing requirements, prepare guidance documents and trainings for licensees, and provide ongoing technical assistance on the new standards. VMB estimates a one-time cost of $8,600 for staff time and workload related to supporting a two-member subcommittee of the VMB's Multidisciplinary Advisory Committee in making recommendations on cannabis guidelines.

California Cannabis Industry Association
California NORML
California Veterinary Medical Association
Good Farmers Great Neighbors
Pet Cannabis Coalition
The Parent Company
VetCBD
Veterinary Medical Board
Women United for Animal Welfare

OPPOSITION: (Verified 8/23/22)

Lovingly & Legally

ARGUMENTS IN SUPPORT: The Veterinary Medical Board writes in support and notes, "Although the Board appreciates the stakeholder concerns with allowing pet owners, without any veterinarian consultation, let alone a recommendation, to purchase cannabis for use on animals at adult-use retailers, and the Board wishes animal cannabis research funding could be obtained, the Board took a support position on AB 1885. Pet owners are increasingly purchasing cannabis products for their pets to treat a variety of ailments. While veterinarians currently are allowed to discuss with pet owners the use of cannabis on an animal for medicinal purposes, veterinarians are not authorized to make any recommendations for the appropriate use and safe dosage for the pet. This leads to pet owners either guessing appropriate dosages to treat their pet's medical conditions or seeking product recommendations from cannabis dispensary clerks, who likely are not educated or trained in the use of cannabis on animal patients.

"By allowing veterinarians to recommend animal cannabis products for potential therapeutic purposes, AB 1885 provides a safer environment for pet owners to make well-informed decisions for their pets."

Supporters note that it will be important for veterinarians to not only be allowed to discuss cannabis administration to animals with clients, but also to recommend safe practices for cannabis administration to animals. In addition, supporters assert that it will be important for cannabis products intended for use in animals to be included in the MAUCRSA regulatory framework to ensure safe and effective cannabis products for pets.

ARGUMENTS IN OPPOSITION: Lovingly & Legally writes in opposition and notes, "The bill prevents the Veterinary Medical Board from disciplining a veterinarian for recommending cannabis. The recommendation that's laid out in AB-1885 does not carry any weight upon entering a medical only cannabis dispensary. In other words, it doesn't give parity with medical doctors and simply makes the veterinarian a passive salesperson for the products that will flood the cannabis marketplace.

"Numerous products will enter the marketplace with our recommended amendments but if the marketplace were the only thing to be considered, this bill (as currently written) would be a good thing. However, the health and well-being of the animals should be the prime concern. Veterinarians have been hoping for this ability to respond to their clients and recommend for so long that they're willing to take anything so they can speak to their clients about the effective use of cannabis as medicine. While AB-1885 is better than nothing, as written currently, it is a dangerous introduction due to the lack of safety concerns."

SUBJECT: Public works: definition

SOURCE: International Union of Operating Engineers, CAL-NEVADA Conference

DIGEST: This bill expands the definition of "public works," for the purpose of the payment of prevailing wages, to also include street sweeping maintenance performed for the routine cleaning of any publicly owned or publicly operated street, road, or highway done under contract and paid for in whole or in part out of public funds.

Senate Floor Amendments of 8/24/22 (1) clarify that the expansion applies to street sweeping performed for routine cleaning of streets, roads or highways in which the area swept is primarily used for vehicle travel; and (2) add double-jointing language to avoid chaptering out issues between this bill and AB 1717 (Aguiar-Curry).

ANALYSIS:

Existing law:

1) Requires that not less than the general prevailing rate of per diem wages be paid to all workers employed on a "public works" project costing over $1,000 and

imposes misdemeanor penalties for violation of this requirement. (Labor Code §1771)

2) Defines "public work" to include, among other things, construction, alteration, demolition, installation or repair work done under contract and paid for in whole or in part out of public funds, including contracts for maintenance work, as specified in state regulations. (Labor Code §1720(a) & §1771)

3) Defines “paid for in whole or in part out of public funds” as, among other things, “Fees, costs, rents, insurance or bond premiums, loans, interest rates, or other obligations normally required in the execution of a contract that are paid, reduced, charged at less than fair market value, waived or forgiven.” (Labor Code §1720(b))

4) Requires that the applicable general prevailing rate of per diem wages be determined by the Director of the Department of Industrial Relations (DIR) for each locality in which the public work is to be performed and for each craft, classification, or type of worker needed to execute the public works project. (Labor Code §1773)

5) Provides that private residential projects built on private property are not subject to the requirements of public works provisions, unless the projects are built pursuant to an agreement with a state agency, redevelopment agency, or local public housing authority. (Labor Code §1720(c)(1))

6) Authorizes the Labor Commissioner, or their designee, to issue civil wage and penalty assessments on a contractor or subcontractor, or both, that fails to pay prevailing wages in connection with a public work. (Labor Code §1741)

This bill:

1) Expands the definition of “public works,” imposing the payment of prevailing wage requirements, to also include street sweeping maintenance performed for the routine cleaning of any publicly owned or publicly operated street, road, or highway done under contract and paid for in whole or in part out of public funds.

2) Defines “street sweeping” to mean the sweeping of streets, roads, or highways in which the area being swept is primarily used for vehicle travel.

3) Includes provisions double-jointing this bill with AB 1717 (Aguiar-Curry), which applies prevailing wage requirements on fire mitigation work, in order to avoid chaptering out issues.

Background

"Public Works" and Prevailing Wage

Existing law requires that not less than the general prevailing wage rate of per diem wages, as determined by the director of the DIR, be paid to all workers employed on a "public works" projects. The prevailing wage rate is the basic hourly rate paid on public works projects to a majority of workers engaged in a particular craft, classification or type of work within the locality and in the nearest labor market area. The determination of whether a project is deemed a "public work" is important because the Labor Code requires (except for projects of $1,000 or less) that the prevailing wage be paid to all workers employed on public works projects. Prevailing wage creates a level playing field by requiring an across-the-board rate for all bidders on publically subsidized projects.

In general, "public works" is defined to include construction, alteration, demolition, installation or repair work done under contract and "paid for in whole or in part out of public funds." Almost 20 years ago, there was much administrative and legislative action over what constituted the term "paid for in whole or in part out of public funds." These debates culminated in the enactment of SB 975 (Alarcón, Chapter 938, Statutes of 2001), which codified a definition of "paid for in whole or in part out of public funds" as well as exempted certain affordable housing, residential and private development projects, as specified. Currently, "paid for in whole or in part out of public funds" is defined as, among other things, "fees, costs, rents, insurance or bond premiums, loans, interest rates, or other obligations normally required in the execution of a contract that are paid, reduced, charged at less than fair market value, waived or forgiven."

Recent DIR Determinations Regarding Street Sweeping

Existing Labor Code Section 1773.5 authorizes the Director of DIR to establish rules and regulations for carrying out the requirements of the labor code, including the issuance of determinations on whether a specific project or type of work awarded or undertaken by a political subdivision is considered a public work, important for purposes of prevailing wage requirements.

As noted above, "public works" is defined as including construction, alteration, demolition, installation, or repair work done under contract and paid for in whole or in part out of public funds. Further, Labor Code Section 1771 specifies that the payment of prevailing wage on public works "is applicable to contracts let for maintenance work." State regulations expand upon the definition of public works maintenance to provide that maintenance is "routine, recurring, and usual work for

the preservation, protection and keeping of any publicly owned or publicly operated facility" (Cal. Code of Regulations, Title 8, §16000).

Recently there has been confusion among awarding bodies, contractors, and labor entities regarding whether public street sweeping constitutes "maintenance" under the state's prevailing wage laws. Various prior DIR determinations have found that street sweeping is in fact considered a public works maintenance project, and thus requires the payment of prevailing wage. In an October 2021 determination, the Director of DIR (DIR Public Works Case No. 2020-005) found that street sweeping is a routine and recurring work that keeps public streets and facilities in a safe and continually usable condition for public use, and therefore is subject to prevailing wage requirements.[1] This bill codifies this determination.

Comments

Need for this bill? According to the author, "Street sweeping is a critical public safety and road maintenance task that involves the clearing of debris from public streets and roadways. Street sweeping maintenance ensures that our roads and drains are clear of a variety of materials that accumulate in our public streets, including but not limited to: Sand, gravel, glass, bottles, cans, leaves, silt, mud, litter, trash, small tree limbs, palm fronds and other debris. In an effort to bring clarity to awarding bodies, contractors, and labor organizations, AB 1886 codifies the DIR recent prevailing wage determination to ensure that street sweeping maintenance services are included in the definition of "public works" and thus require the payment of prevailing wage."

Related/Prior Legislation

AB 1717 (Aguiar-Curry, 2022) expands the definition of public works to include fuel reduction work done under contract and paid for in whole or in part out of public funds performed as part of a fire mitigation project, as specified.

AB 1851 (R. Rivas, 2022) expands the definition of public works for the purpose of the payment of prevailing wages to include the on-hauling of materials used for paving, grading, and fill onto a public works site.

AB 2231 (Kalra, Chapter 346, Statutes of 2020) defined a public subsidy as de minimis for the purpose of paying the prevailing wage in private projects if it is both less than $600,000 and less than 2% of the total project cost for bids advertised or contracts awarded after July 1, 2021. If the subsidy is for a

[1] Department of Industrial Relations. *Public Works Case No. 2020-005 Street Sweeping Maintenance Services City of Elk Grove.* October 4, 2021.

residential project consisting entirely of single family dwellings, the subsidy is de minimis so long as it is less than 2 % of the total project cost.

AB 1066 (Aguiar-Curry, Chapter 616, Statutes of 2017) expanded the meaning of the term "public works" to include specific types of tree removal work.

AB 26 (Bonilla, Chapter 864, Statutes of 2014) expanded the definition of "public works" to include work performed during the design and preconstruction phases of construction, including, but not limited to, inspection and land surveying work, and work performed during the post-construction phases of construction, including, but not limited to, all cleanup work at the jobsite.

AB 514 (Roger Hernández, Chapter 676, Statutes of 2011) expanded the definition of "public works" to include the hauling of refuse, as defined, from a public works site to an outside disposal location.

ARGUMENTS IN SUPPORT: According to the sponsor, the International Union of Operating Engineers, CAL-NEVADA, and proponents, "Recently there has been confusion among awarding bodies, contractors, and labor entities regarding whether public street sweeping constitutes "maintenance" under the states prevailing wage laws. Various prior coverage determinations have found that street sweeping is in fact considered a public works maintenance project, and thus

requires the payment of prevailing wage. Most recently, DIR Public Works Case No. 2020-005 found that street sweeping is a routine and recurring work that keeps public streets and facilities in a safe and continually usable condition for public use, and therefore is subject to prevailing wage requirements. Various other cases over the years have found that street sweeping falls under the definition of maintenance."

Proponents conclude by stating that, "AB 1886 is needed to ensure that street sweeping maintenance is clearly designated as a public work and thus entitled to the payment of prevailing wage. This change will provide clarity for awarding entities, contractors and labor compliance groups who regularly ask for clarification on this issue from the Department of Industrial Relations."

SUBJECT: Integrated cannabis vaporizer: packaging, labeling, advertisement, and marketing

SOURCE: California NORML
National Stewardship Action Council

DIGEST: This bill prohibits, commencing July 1, 2024, cannabis cartridges and integrated cannabis vaporizers packages from implying the product is disposable and adds advertisement and marketing requirements.

Senate Floor Amendments of 8/24/22 revise the required text on all advertisements and marketing material and clarify the definition of "authorized facility".

Senate Floor Amendments of 8/16/22 address chaptering conflicts with AB 1646 (Chen) and add "empty" to the required language on all cannabis cartridges advertisements.

ANALYSIS:

Existing law:

1) Establishes the Medicinal and Adult-Use Cannabis Regulation and Safety Act (MAUCRSA) to regulate the cultivation, distribution, transport, storage, manufacturing, processing, and sale of both medicinal cannabis and adult-use cannabis. (Business and Professions Code (BPC) § 26000)

2) Prohibits a cannabis licensee from including on the label of any cannabis or cannabis product or publishing or disseminating advertising or marketing containing any health-related statement that is untrue in any particular manner or tends to create a misleading impression as to the effects on health of cannabis consumption. (BPC § 26154)

3) Requires the State Controller, after tax collected for purposes of administrative functions, must disburse the sum of ten million dollars to a public university or universities in California annually until the 2028–29 fiscal year to research and evaluate the implementation and effect of the Control, Regulate and Tax Adult Use of Marijuana Act, and shall, if appropriate, make recommendations to the Legislature and Governor regarding possible amendments to the Control, Regulate and Tax Adult Use of Marijuana Act. Requires the recipients of these funds shall publish reports on their findings at a minimum of every two years and shall make the reports available to the public. States the Department of Cannabis Control (DCC) shall select the universities to be funded. (Revenue and Taxation Code (RTC) § 34019(b))

4) Requires that all advertisements and marketing accurately and legibly identify the licensee responsible for its content, by adding, at a minimum, the licensee's license number, and prohibits an outdoor advertising company from displaying an advertisement by a licensee unless the advertisement displays the license number. (BPC § 26151)

5) Prohibits a cannabis licensee from doing any of the following:

    a) Advertising or marketing in a manner that is false or untrue in any material particular, or that, irrespective of falsity, directly, or by ambiguity, omission, or inference, or by the addition of irrelevant, scientific, or technical matter, tends to create a misleading impression.

    b) Publishing or disseminating advertising or marketing containing any statement concerning a brand or product that is inconsistent with any statement on its labeling.

c) Publishing or disseminating advertising or marketing containing any statement, design, device, or representation which tends to create the impression that the cannabis originated in a particular place or region, unless the label of the advertised product bears an appellation of origin, and such appellation of origin appears in the advertisement.

d) Advertising or marketing on a billboard or similar advertising device located on an Interstate Highway or on a State Highway which crosses the California border.

e) Advertising or marketing cannabis or cannabis products in a manner intended to encourage persons under 21 years of age to consume cannabis or cannabis products.

f) Publishing or disseminating advertising or marketing that is attractive to children.

g) Advertising or marketing cannabis or cannabis products on an advertising sign within 1,000 feet of a day care center, school providing instruction in kindergarten or any grades 1 to 12, inclusive, playground, or youth center.

h) Publishing or disseminating advertising or marketing while the licensee's license is suspended. (BPC § 26152)

6) Provides the following restrictions on advertising and marketing placed in broadcast, cable, radio, print, and digital communications:

a) Must be displayed after a licensee has obtained reliable up-to-date audience composition data demonstrating that at least 71.6 percent of the audience viewing the advertising or marketing is reasonably expected to be 21 years of age or older;

b) Must not use any depictions or images of minors or anyone under 21 years of age;

c) Must not contain the use of objects, such as toys, inflatables, movie characters, cartoon characters, or include any other display, depiction, or image designed in any manner likely to be appealing to minors or anyone under 21 years of age; and

d) Must not advertise free cannabis goods giveaways of any type of products, including non-cannabis products. (California Code of Regulations (CCR) § 15040)

7) Establishes the Rechargeable Battery Recycling Act, which requires every retailer to have a system in place, on or before July 1, 2006, for the acceptance and collection of used rechargeable batteries for reuse, recycling, or proper disposal. (Public Resources Code (PRC) §§42451-42456)

This bill:

1) Prohibits cannabis cartridge and integrated cannabis vaporizer packaging and labels from indicating these products are disposable or implying the product may be thrown in the trash or recycling streams.

2) Adds the following advertising and marketing requirements:

   a) Integrated cannabis vaporizer advertisements must clearly and legibly state: "*An empty integrated cannabis vaporizer shall be properly disposed of as hazardous waste at a state permitted household hazardous waste collection facility or other approved facility*".

   b) Cannabis cartridge advertisements must clearly and legibly state: "*A spent integrated cannabis vaporizer shall be properly disposed of as hazardous waste at a state permitted household hazardous waste collection facility or other approved facility."*

   c) Cannabis cartridge and an integrated cannabis vaporize cannot indicate that a cannabis cartridge or an integrated cannabis vaporizer is disposable nor imply that it may be thrown in the trash or recycling streams.

3) Defines an authorized facility as facility authorized under the hazardous waste control laws Chapter 6.5 of Division 20 of the Health and Safety Code.

4) Provides a July 1, 2024 implementation date.

5) Addresses chaptering issues with AB 1646 (Chen).

Background

Current labeling and cannabis education efforts. The DCC issued emergency regulations to implement consolidation efforts. As a part of the regulatory process, the DCC must propose permanent regulations. The DCC released proposed regulations to make the emergency consolidated regulations permanent on March 4, 2022, and anticipate them to be effective by fall 2022 to further define labeling requirements. The regulations are substantially similar, but contain some amendments.

In addition to cannabis specific requirements, the California Environmental Protection Agency's Office of Environmental Health Hazard Assessment (OEHHA) is currently working with cannabis licensees to ensure packaging is consistent with Proposition 65 which requires the listing of any potential cancer causing substance.

The DCC currently oversees two public awareness campaigns ("This is California Cannabis" and "#weedwise") aimed to educate on the legal market and specifically, "educate consumers about buying from licensed retailers, encourage unlicensed businesses to get licensed, and promote California's legal cultivation market." DCC is not currently doing any outreach or campaigns on recycling of cannabis vape products. The California Department of Resources Recycling and Recovery (CalRecycle) has limited information on its website educating consumers about lithium battery recycling and does not have a public campaign about battery recycling, including cannabis vape products.

Cannabis advertising requirements. Cannabis licensees have strict advertising and marketing rules they must follow, particularly when it comes to situations involving children. Licensees may not advertise or market cannabis or cannabis products in a manner intended to encourage persons under 21 years of age to consume cannabis or cannabis products; publish or disseminate advertising or marketing that is attractive to children; advertise or market cannabis or cannabis products on an advertising sign within 1,000 feet of a day care center, school providing instruction in kindergarten or any grades 1 to 12, inclusive, playground, or youth center.

The proposed regulations referenced above also seek to make advertisement regulations permanent with additional changes. Once finalized, proposed regulations will require advertisements placed in broadcast, cable, radio, print, and digital communications may be displayed only after a licensee has obtained reliable up-to-date audience composition data demonstrating that at least 71.6 percent of the audience viewing the advertising or marketing is reasonably expected to be 21 years of age or older. These advertisements also cannot show images of minors, images that are attractive to children such as cartoons, phrases that are popularly used to advertise to children, imitation of candy packaging or reference candy and/or any variants of the word candy. This bill adds environmental safety to existing requirements.

Recycling hazardous batteries. Integrated Cannabis Vaporizers are also known as single-use vapes and are increasing in popularity. The majority of cannabis vaping products are cartridges that are inserted into reusable vaporizers or vape pens.

However, approximately 10 percent of vaping products are vaporizers that combine both the cannabis product and a built-in electronic device that creates the aerosol or vapor, essentially constituting a single-use, all-in-one product. The batteries used in the cartridges and the single-use vapes are considered hazardous waste because they highly flammable. Under current law, it is illegal to dispose of hazardous waste in the garbage, down storm drains, or onto the ground. Most portable electronic devices use rechargeable batteries, and millions of rechargeable batteries are sold in California each year.

Current law requires retailers to have a mechanism to accept all rechargeable batteries for recycling and only applies to large chain supermarkets, which does not encompass cannabis retailers. Additionally, sales of rechargeable batteries that are contained in, or packaged with, a battery-operated device are not subject to this law. There is no laws specially addressing cannabis products. In fact, most laws pertaining to battery recycling specifically exempt equivalent tobacco products such as e-cigarettes. This bill only speaks to single-use vapes and does not speak to cartridges which also use similar hazardous waste batteries and are more widely used.

Current state programs do not collect single-use batteries and lithium-ion battery embedded products that are not cell phones. Call2Recycle's program, which collects rechargeable batteries, cell phones, and single-use batteries, allows consumers to drop off their used batteries at collection sites at no cost. However, the program is voluntary, making the availability of collection sites dependent on the willingness of an entity to operate a collection site. For instance, according to Call2Recycle's website, the closest collection site for single-use batteries to the California State Capitol is in Roseville, and the second closest location is in Stockton. In Los Angeles and Chico, there are not any collection sites for single-use batteries within 50 miles of those cities; in comparison to San Francisco which has an abundance of collection sites for single-use batteries. It is unclear how labeling single-use vapes to dispose properly will educate consumers how or where to properly dispose.

Currently, there are two measures moving through the legislature establishing a battery recycling program, SB 1215 (Newman, 2022) and AB 2440 (Irwin, 2022). The Senate Environmental Quality Committee analysis for AB 2440 notes that there are laws requiring rechargeable batteries to be collected; however, recent information suggests that collection efforts are not succeeding. The hazardous waste batteries are ending up in the solid waste stream where they can be damaged or crushed, which can result in fires in solid waste trucks and solid waste facilities.

According to the author's office and the sponsor, this bill is intended to be complimentary to these two bills which is the rationale provided for the vagueness of language in this bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/23/22)

California NORML (co-source)
National Stewardship Action Council (co-source)
California Cannabis Industry Association
California Society of Addiction Medicine
Republic Services - Western Region
STIIIZY
The Parent Company

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: California NORML writes, "Vaporizers are a valuable harm-reduction tool for users wishing to avoid hazardous respiratory toxins in cannabis smoke. However, integrated vaporizers as defined in BPC 26122 have electronic components such as batteries that can be hazardous if not properly disposed of. For the sake of public safety and the environment, it's important for cannabis consumers to understand that this is the case."

According to the National Stewardship Action Council, "Vaping devices have become an increasingly popular method of consuming cannabis. Powered by a battery, these electronics are considered hazardous waste in California and banned from disposal in the trash or recycling. However, many brands instruct consumers to simply throw them away, which results in vapes being improperly disposed of in our materials management system where they have the potential to cause explosions and fires that can endanger people, expensive infrastructure, and the environment. These fires have become more commonplace in the industry, and operators are at risk of losing their insurance coverage.

"California has become a leader in advocating for "truth in labeling" by requiring brands to truthfully label their products and packaging for proper disposal or recycling. Manufacturers of products with lithium-ion batteries, such as cannabis vaping devices, can help by ensuring that they are not promoting or implying their products belong in the trash, which could result in fires. Consumers deserve the

ability to make informed purchasing decisions and have accurate information for end-of-life disposal."

SUBJECT: Gamete banks

SOURCE: Author

DIGEST: This bill requires gamete banks to provide specified information to individuals obtaining donor gametes in order to conceive children, including the limitations of donor screening, and that some donor-conceived persons are or may be interested in contact with the donor whose gametes were used for their conception. In addition, this bill requires gamete banks to provide specified information to prospective gamete donors, including information regarding the potential of direct-to-consumer genetic testing to reveal the relatedness of the donor to children conceived with the donor's gametes, even if the donor has chosen not to reveal their identity. This bill requires the California Department of Public Health (CDPH) to develop the guidance to be provided in consultation with specified stakeholders and to post that guidance on their website. This bill requires CDPH to develop a tiered penalty system to be used prior to suspending or revoking the license of a gamete bank for a violation of these provisions.

Senate Floor Amendments of 8/24/22 are largely technical language changes regarding the disclosure of information to gamete donors, donor-conceived persons, and intended parents. The key substantive changes are that gamete banks

will not be required to disclose the required information verbally to intended parent, but still do so in writing, and CDPH will be required to develop a tiered penalty system for gamete banks that violate the provisions of this bill prior to suspending or revoking a gamete bank's license. Some of the information required to be disclosed to gamete donors and intended parents has been modified for a more neutral tone.

ANALYSIS:

Existing federal law:

1) Establishes procedures to prevent the introduction, transmission, and spread of communicable diseases by human cells, tissues, and cellular and tissue-based products (HCT/Ps), including semen or other reproductive tissue through regulation by the Food and Drug Administration (FDA). Requires, before the completion of a donor-eligibility determination screening of a donor's medical records for specified risk factors for, and clinical evidence of, relevant communicable disease agents and diseases; quarantining semen from anonymous donors for at least six months after the date of donation; and retesting of anonymous semen donors by collecting a new specimen from the donor and testing it for evidence of infection due to human immunodeficiency virus (HIV), agents of viral hepatitis (HBV and HCV), syphilis, and human T lymphotropic virus (HTLV). [21 C.C.R.§1271.1, et seq.]

2) Establishes the Health Insurance Portability and Accountability Act of 1996 (HIPAA) which sets standards for privacy of individually identifiable health information and security standards for the protection of electronic protected health information, including, through regulations, known as the Privacy Rule, that a HIPAA covered entity may not condition the provision of treatment, payment, enrollment in the health plan, or eligibility for benefits on the provision of an authorization, except under specified circumstances. Provides that if HIPAA's provisions conflict with state law, the provision that is most protective of patient privacy prevails. [42 U.S.C. §300gg, 29 U.S.C. §1181, et seq., and 42 U.S.C. §1320d, et seq.]

Existing state law:

1) Requires every tissue bank operating in California to have a current and valid tissue bank license issued or renewed by CDPH, except as specified. Authorizes CDPH to revoke or suspend the license of any tissue bank that violates licensing standards pertaining to tissue banks. [HSC §1635.1, §1639.2, §1639.3]

2) Defines "tissue bank" to mean a place, establishment, or institution that collects, processes, stores, or distributes tissue for transplantation into human beings. Defines "gamete bank" to mean a tissue bank that collects processes, or distributes gametes, including a facility that provides professional reproductive services, other than those facilities exempt from tissue bank licensure. [HSC §1635]

3) Requires gamete banks licensed in this state to comply with the following requirements for gametes collected after January 1, 2020, except when the donor's identity is known to the recipients of the gametes at the time of donation:

   a) Requires gamete banks to collect and retain from a gamete donor the donor's identifying information and medical information at the time of the donation. Requires a gamete bank that receives gametes from a donor collected by another gamete bank to collect and retain the name, address, telephone number, and email address of the gamete bank from which the gametes were received. [HSC §1644.1]

   b) Requires gamete banks to provide the donor with information in a record about the donor's choice regarding identity disclosure. Requires gamete banks to obtain a declaration from the donor regarding whether or not the donor agrees to disclose the donor's identity to a child conceived by assisted reproduction with the donor's gametes, on request, once the child attains 18 years of age. Requires gamete banks to permit a donor who has signed a declaration that the donor does not agree to disclose the donor's identity to withdraw the declaration at any time by signing a declaration that the donor agrees to disclose the donor's identity. Permits gamete banks to not collect gametes from donors who do not agree to disclose their identity. Requires the gamete bank to maintain identifying information and medical information about each gamete donor, maintain records of gamete screening and testing, and comply with state and federal reporting requirements. [HSC §1644.2]

   c) Requires gamete banks to, upon request of a child conceived by assisted reproduction using donor gametes who attains 18 years of age, provide the child with identifying information of the donor who provided the gametes, unless the donor signed a declaration that the donor does not agree to disclose their identity. Requires the gamete bank to make a good faith effort to notify the donor if the donor signed and did not withdraw the declaration, so that the donor may elect to withdraw the declaration and agree to release

the their information. Requires the gamete bank to provide a child conceived using donor gametes who attains 18 years of age, or, if the child is a minor, by a parent or guardian of the child, access to nonidentifying medical information provided by the donor. Requires a gamete bank that received gametes from another bank used in the assisted reproduction of a child to disclose the name, address, telephone number, and email address of the gamete bank from which the gametes were received upon the request of that child who has attained 18 years of age. [HSC §1644.3]

4) Defines "identifying information" as the full name of the donor, the donor's date of birth, and the permanent address or other contact information, or both, given at the time of donation, or, if different, the current address or other contact information, or both, of the donor retained by the gamete bank. [HSC §1644]

5) Prohibits, under the state Confidentiality of Medical Information Act, a provider of health care, a health plan, a contractor, a corporation and its subsidiaries and affiliates, or any business that offers software or hardware to consumers, from intentionally sharing, selling, using for marketing, or otherwise using any medical information, as defined, for any purpose not necessary to provide health care services to a patient, except as expressly authorized by the patient, enrollee, or subscriber, or as otherwise required or authorized by law. States that a violation of these provisions that results in economic loss or personal injury to a patient is a crime.

This bill:

1) Requires a gamete bank to provide information on the following topics to individuals obtaining donor gametes in order to conceive a child starting January 1, 2024:

   a) That telling a donor-conceived child at an early age, in an age-appropriate manner, that the child is donor-conceived is associated with improved family functioning and well-being of the donor-conceived child;

   b) The ability of and tools available to a donor-conceived person (DCP) to learn the identity of the donor whose gametes were used in their conception and the importance of understanding that many, but not all, DCPs have a strong desire to know the identity of the donor and of other DCPs born using the same donor's gametes;

c) That the personal medical and family history of the gamete donor may influence some health conditions and inform medical care for DCPs and their children;

d) The limitations of donor screening, including screening for genetic diseases and genetic disease risk factors;

e) The possibility of one or more disease genes or genetic disease risk factors to be inherited by a DCP from a gamete donor;

f) That some DCPs may be interested in contact with their gamete donor or other persons born from the same donor's gametes;

g) The ability of a limit on the number of families that can be established with an individual donor's gametes, to improve the well-being of DCPs and gamete donors and to further the ability of DCPs to establish contact with their gamete donor, as well as other persons born using the same donor's gametes;

h) Whether or not the gamete bank attempts to meet a limit on the number of persons that can be born or the number of families that can be established with an individual donor's gametes. Requires, if the gamete bank has a policy or limit, to additionally disclose them; and,

i) Whether or not the gamete bank requests medical history updates from the donor and provides these updates to DCPs. If the gamete bank has such a policy, requires that policy to be disclosed.

2) Requires a gamete bank to provide information on the following topics verbally and in writing to individuals donating gametes in the state prior to the donation of gametes by a donor on the following topics, starting January 1, 2024:

a) The potential emotional and social impacts of donating gametes;

b) That it is important to many DCPs to know the identity of the donor whose gametes were used in their conception and that some DCPs may be interested in contact with the donor or other persons born using the same donor's gametes;

c) What information will be disclosed to intended parents and the potential of direct-to-consumer testing to reveal the identity of the donor and other persons born using the same donor's gametes even if the donor has chosen not to disclose their identity;

d) The potential for the birth of one or more children in multiple families using the donor's gametes;

e) Whether or not the gamete bank attempts to meet a limit on the number of persons that can be born or the number of families that can be established with an individual donor's gametes. Requires, if the gamete bank has a policy or limit, to additionally disclose them; and,

f) Whether or not the gamete bank requests medical history updates from the donor and provides these updates to DCPs. If the gamete bank has such a policy, requires that policy to be disclosed.

3) Requires CDPH to consult with experts and stakeholders, including organizations of DCPs demonstrably involved in the representation of other DCPs, organizations representing gay,lesbian, bisexual and transgender persons and families, organizations representing gamete donors or individuals with prior experience as gamete donors, licensed mental health professionals with prior documented experience counseling intended parents and DCPs, genetic counselors, licensed medial geneticists, licensed physicians with experience in third-party assisted reproduction, and representatives of gamete bank operating in the state, and to develop information and guidance required in 1) and 2) above, except the statement on whether the gamete bank places a limit on the number of persons that can be born or families that can be established established with an individual donor's gametes, and the statement on whether the gamete bank requests medical history updates from donors.

4) Requires CDPH to provide the information and guidance developed in 3) on its website.

5) Requires CDPH to establish a tiered penalty system allowing the gamete banks to cure violations of the above requirements prior to suspending or revoking the license of a gamete bank.

6) Prohibits this bill as being construed to require a physician to perform reporting, tracking, or mitigation of the risks outlined in 1) and 2), including, but not limited to, tracking gamete donors, reporting gamete donor usage, or determining if a child was born with a donor's gametes.

7) Makes legislative findings regarding the need to consider the health and welfare of gamete donors, intended parents, and DCPs; the medical and family history of a gamete donor can impact the medical care of DCPs and their children; the interest many DCPs place in knowing the identity of their gamete donor and

meeting their gamete donor or other DCPs conceived with the same donor's gametes; the psychosocial harm that can occur upon discovery of a large number of persons born using the same donor's gametes. Makes additional findings that early disclosure of donor conceptions is beneficial to DCPs; people considering using donated gametes should have access to resources about DCPs; access to direct-to-consumer genetic testing makes donor identification and the identification of other DCPs using the same gametes possible; gamete donors may experience psychosocial harm upon the discovery of a number of DCPs born as a result of their gametes; and donors should have access to information about the interests of DCPs and information that may be shared with intended parents and DCPs.

Comments

1) *Author's statement.* According to the author, for too long, discussions around assistive reproductive technologies have left out those who have the least say in the matter, but are most impacted: DCPs. A lack of regulation and data collection has meant that sperm banks are using donations to produce many dozens, at times upward of 100, children. When DCPs discover they have an unknown number of half-siblings, often through genetic tests like 23andMe, they report facing significant psychosocial burdens. Donors who may have wanted to remain anonymous at time of donation also face difficulty when contacted by a large number of biological offspring who desire to feel connected. Critically, large donor-sibling groups greatly increase the risks of unwitting relationships between half-siblings. Their children are at serious risk of suffering from severe genetic disorders. This bill takes a first step to address these issues by requiring gamete banks to provide key information to recipient parents and donors on the risks and harms faced by DCPs and the capability of direct-to-consumer genetic tests to connect DCPs to their donors and half-siblings.

2) *CDPH oversight of tissue banks*. CDPH licenses and surveys several types of tissue facilities, including assisted reproductive technology facilities, such as sperm banks, autologous tissue storage facilities, as well as fertility clinics. However, while various types of facilities are considered tissue banks, each may interact and use the tissue for different purposes. For instance, an assisted reproductive technology facility, like a sperm bank, may collect donor tissue and send it to a fertility clinic, where the tissue will be used. FDA regulations require the sperm bank to collect relevant donor information, conduct tests on the tissue, and make a determination of donor-eligibility. When the sperm bank sends the tissue to a fertility clinic for use, certain information must follow the

tissue. However, the sperm bank is generally not permitted to send the donor's personal information to the fertility clinic along with the tissue. The sperm bank will retain the donor's personal information along with a declaration of whether or not the donor wishes to disclose their identity.

3) *New awareness of large donor conceived sibling groups.* Direct-to-consumer genetic testing (e.g., 23andMe, AncestryDNA) and genealogy-based registries have revealed cases of large donor-sibling groups (many dozens to hundreds) and helped DCPs connect with each other. Given that conceptions using donor insemination have increased and donor sperm can be sold to recipient parents or distributed to other gamete banks without tracking of or limits on resultant births, the number and size of donor-sibling groups remains indeterminate.

   Current guidance from the American Society for Reproductive Medicine (ASRM) on single-donor conception states that institutions, clinics, and sperm banks should maintain sufficient records to allow a limit to be set for the number of pregnancies for which a given donor is responsible. The guidance states it is difficult to provide a precise number of times that a given donor can be used because one must take into consideration the population base from which the donor is selected and the geographic area that may be served by a given donor. ASRM further states that it has been suggested that in a population of 800,000, limiting a single donor to no more than 25 births would avoid any significant increased risk of inadvertent consanguineous conception. The guidance adds that this suggestion may require modification if the population using donor insemination represents an isolated subgroup or if the specimens are distributed over a wide geographic area. By comparison, many countries either forbid anonymous donations or have limits on the number of conceptions permitted per donor, usually ranging from three to 25.

   However, consanguineous conception is not the only consideration; there are also psychological factors for the DCP to consider. Meeting a few donor-linked families can be a positive experience; the impact of meeting 25 to 50 families may be more challenging or a negative experience. In a 2020 survey conducted by We Are Donor Conceived of 481 DCPs, 92% of respondents supported a limit on the number of offspring from a single donor. 94% of respondents agreed that they should have the option to know the number of half-siblings; 71% experienced negative emotions associated with their method of conception; and 43% expressed concern they may unwittingly enter a romantic relationship with a half-sibling.

There are no requirements in state law that address the genetic risks of consanguinity between related donor conceived people and any other related information that consumers may find useful. ASRM does include psychoeducational counseling as part of its recommendations for both the donor and the recipient on topics such as the challenges of anonymity because of direct-to-consumer DNA testing, technological advances, social media, and implications for donor-conceived families and future implications for the children of having persons who are linked through the same donor. Colorado recently passed legislation that will eventually give DCPs the ability to obtain the identity of the donor used to conceive them and set an enforceable limit of 25 families for any one gamete donor. The legislation also contains similar informational requirements for donors and recipients to those in this bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, CDPH estimates costs of $375,000 (Tissue Bank Fund) over 3 years to develop the information specified in the bill and to oversee the implementation of clarifying regulations.

SUPPORT: (Verified 8/10/22)

California Catholic Conference
U.S. Donor Conceived Council

OPPOSITION: (Verified 8/10/22)

American Society for Reproductive Medicine
Department of Finance

ARGUMENTS IN SUPPORT: U.S. Donor Conceived Council, a group that advocates on behalf of the interests of DCPs writes that this bill ensures that recipient parents and gamete donors receive basic information on the potential genetic risks and psychosocial burdens created by the lack of regulation of the uses of gamete donations. DCPs have been vocal about these issues, which have been substantiated with data by subject matter experts. Of particular concern is the continually growing number of large donor-sibling groups. DCPs face significant psychosocial harm as their donor-sibling group continues to grow and it becomes apparent that half-siblings could live globally and no data on the actual number of half-siblings may ever be known. The unrestricted use of sperm donations also leads to an unusually large number of half-siblings close in socioeconomic background, age, and location – influential determinants of partner selection among U.S. adults. DCPs who are half-siblings may therefore go on to unwittingly

have children together who would then be at a greatly elevated risk of genetic disease. Finally, they add, parents of DCP may fear the stigma they or their children may encounter as a result of the use of sperm donations. Parents may also not know how or when to best communicate with their children about their method of conception or the presence of an unknown number of half-siblings in other parts of the state, country, and beyond. Parental education and transparency are key and will set the stage for more awareness of the unique circumstances lived daily by DCP.

The California Catholic Conference writes that a sea change has recognized the rights of adoptees to documents about identity and origins. Yet DCPs face genealogical bewilderment at an even higher rate than adoptees, expressing this sense of loss on support sites like Anonymous Us and the Donor Sibling Registry. Donor conceived children are far more likely than children raised by their biological parents to say they feel no one understands them, to describe a lack of trust with their parents, to wonder about their donor and his family, if they have siblings, to worry about their health history, and wish for a connection to their ancestry, heritage and familial traits. In one study, nearly all donor-conceived adults sought to know any half-siblings they might have and to find their sperm donor, most seeing him as their biological father.

ARGUMENTS IN OPPOSITION: The American Society for Reproductive Medicine writes they are opposed because this bill would put an undue burden on physicians, who would be required to provide information on possible risks of unintentional consanguinity, risks that are unquantifiable by medicine or science. There is always some risk to reproduction, regardless of the method. Singling out donor-conception reproduction is not an effective mitigation strategy to combat those risks.

The Department of Finance writes that it is opposed to this bill as it creates additional cost pressure on the Tissue Bank License Fund, which is currently operating at a structural deficit, and this bill will exacerbate the fund's structural imbalance. Finance notes that additional expenditures from the Tissue Bank License Fund may expedite the need for a fee increase.

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 76-0, 5/25/22 - See last page for vote

SUBJECT: Traffic safety: speed limits

SOURCE: Author

DIGEST: This bill authorizes, if the speed limit needs to be rounded down to the nearest five miles per hour (mph) increment of the 85th-percentile speed, the California Department of Transportation (Caltrans) or a local authority to lower the speed limit by five mph from the nearest five mph of the 85th percentile, as specified.

Senate Floor Amendments of 8/18/22 make minor clarifications to the bill at the request of the Administration by codifying intent language and clarifying that speed limits established in AB 43 (Friedman, Chapter 690, Statutes of 2021), which authorized lower speed limits under specified conditions, can be enforced using electronic devices, the same as in school zones and senior zones.

ANALYSIS:

Existing law:

1) Prohibits driving at a speed greater than is reasonable or prudent having due regard for weather, visibility, traffic, and the surface and width of the highway, and in no event at a speed which endangers the safety of persons or property. This is known as California's Basic Speed Law.

2) Establishes a maximum speed of 65 mph under most circumstances and allows for lower speed limits under numerous specified conditions.

3) Defines "engineering and traffic survey" (ETS) as a survey of highway and traffic conditions in accordance with methods determined by Caltrans for use by state and local authorities. An ETS must consider prevailing speeds, accident records, and conditions not readily apparent to the driver. An ETS may consider residential density and bicycle and pedestrian safety.

4) Authorizes Caltrans and local authorities to establish a speed limit on most streets of between 25 mph to 60 mph in five mph increments on the basis of an ETS.

5) Authorizes a local authority to lower the speed limit from the level established by an ETS under specified conditions.

6) Prohibits the use of speed traps, as defined, in arresting or prosecuting any violation of the Vehicle Code including speeding.

This bill clarifies the circumstances where and how much a local authority may lower the speed limit below that indicated by an ETS.

Comments

1) *Author's Statement.* "Last year the Governor signed my bill AB 43 to give cities more flexibility to lower speed limits. Unfortunately, some have interpreted AB 43 in a manner that removed pre-existing authority to deviate from the 85th percentile speed, an interpretation that would give cities less, not more flexibility on setting speed limits. AB 1938 simply codifies the pre-existing authority on setting speed limits and clarifies that the additional authority granted by AB 43 was meant to supplement, not supplant, that authority."

2) *Speed Limit Setting*. Last year the Legislature enacted major reforms, in the form of AB 43 (Friedman, Chapter 690, Statutes of 2021), to the process for setting speed limits with the intent of giving local governments specified authority to lower speed limits to reduce crashes and accidents. The implementation of those reforms has hit a speed bump with the Administration requesting a clarification in the law to implement the bill as intended. Without this change local government supporters of AB 43 are concerned that they will be required to increase speed limits rather than decrease them.

SUBJECT: Community colleges: funding: instructional service agreements with public safety agencies

SOURCE: Author

DIGEST: This bill authorizes a community college district that participate in an instructional service agreement (ISA) with a public safety entity to submit a copy of their most up to date ISAs and other specified information to the Chancellor's Office for review.

Senate Floor amendments of 8/25/22 (1) delete the requirement that, beginning with the 2024-25 fiscal year, instruction provided under an ISA be funded under the apportionment formula used for instruction in career development and college preparation and that the funding rate for career development and college preparation to be used to calculate allocations for instruction provided under an ISA; (2) authorize rather than require community college districts to agreements to the Chancellor's Office for review; (3) authorize rather than require community college districts to submit specified data to the Chancellor's Office; (4) include an additional academic year for which specified data may be submitted to the Chancellor's Office; (5) delays the date by which the Chancellor's Office is to issue recommendations from beginning with the 2024-25 fiscal year to on or

before December 31, 2024; and, (6) delete the requirement that the Chancellor's Office's recommendations be submitted on an annual basis.

ANALYSIS:

Existing law:

1) Adopts a Community College Student Success Funding Formula for California Community Colleges (CCC) general purpose apportionments for credit instruction intended to encourage access for underrepresented students, provide additional funding in recognition of the need to provide additional support for low-income students, reward colleges' progress on improving student success metrics, and improve overall equity and predictability so that community college districts may more readily plan and implement instruction and programs.

2) Provides that prior to adoption of 1), general purpose apportionments for credit instruction were funded based on an annual allocation based on the number of colleges and off-campus centers in a community college district and, principally, on a rate per full-time equivalent student (FTES) for enrollment in credit courses. The rate, which is adjusted annually for changes in the cost of living, is $5,907 per FTES in 2021-22.

3) Provides that career development and college preparation courses shall be funded at the same level as the credit rate, as established pursuant to 2).

4) Stipulates that the following career development and college preparation courses and classes, for which no credit is given, and that are offered in a sequence of courses leading to a certificate of completion, that lead to improved employability or job placement opportunities, or to a certificate of competency in a recognized career field by articulating with college-level coursework, completion of an associate of arts degree, or for transfer to a four-year degree program, and that meet funding criteria established by the CCC Board of Governors, shall be eligible for funding at the credit rate as established in 3):

    a) Classes and courses in elementary and secondary basic skills;

    b) Classes and courses for students eligible for educational services in workforce preparation classes, in the basic skills of speaking, listening, reading, writing, mathematics, decision-making, and problem solving skills that are necessary to participate in job-specific technical training;

c) Short-term vocational programs with high-employment potential, as determined by the chancellor in consultation with the Employment Development Department utilizing job demand data provided by that department; and

d) Classes and courses in English as a second language and vocational English as a second language. Districts offering courses described above, but not eligible for funding at the credit rate are eligible for funding at the noncredit rate.

5) Funds the following noncredit courses and classes at an established rate per-FTE student (currently $3,552) and adjusts the rate annually for the change in the cost of living:

a) Parenting, including parent cooperative preschools, classes in child growth and development, and parent-child relationships;

b) Elementary and secondary basic skills and other courses and classes such as remedial academic courses or classes in reading, mathematics, and language arts;

c) English as a second language;

d) Classes and courses for immigrants eligible for educational services in citizenship, English as a second language, and workforce preparation classes in the basic skills of speaking, listening, reading, writing, mathematics, decision making and problem solving skills, and other classes required for preparation to participate in job-specific technical training;

e) Education programs for persons with substantial disabilities;

f) Short-term vocational programs with high employment potential;

g) Education programs for older adults;

h) Education programs for home economics; and

i) Health and safety education.

6) Establishes, until January 1, 2022, the Community College Student Success Funding Formula Oversight Committee for the purpose of continuously evaluating and reviewing the implementation of the student success funding formula established pursuant to 1). A priority of the committee shall be to review and make recommendations to the Legislature and the Department of

Finance, by June 30, 2021, as to whether noncredit instruction and ISAs should be incorporated into the base and supplemental allocations of the formula.

7) Stipulates that, for purposes of computing a community college district's FTES, attendance shall also include student attendance and participation in in-service training courses in the areas of police, fire, corrections, and other criminal justice system occupations that conform to all apportionment attendance and course of study requirements otherwise imposed by law, if the courses are fully open to the enrollment and participation of the public. Prerequisites for such courses shall not be established or construed so as to prevent academically qualified persons who are not employed by agencies in the criminal justice system from enrolling in and attending the courses.

8) Stipulates that in the event in-service training courses are restricted to employees of police, fire, corrections, and other criminal justice agencies, attendance for the restricted courses shall not be reported for purposes of state apportionments. A community college district which restricts enrollment in in-service training courses may contract with any public agency to provide compensation for the cost of conducting such courses.

This bill:

1) Defines a public safety agency to include, but not necessarily limited to, a fire department, a police department, a sheriff's office, a public agency employing paramedics or emergency medical technicians, the Department of the California Highway Patrol, and the Department of Corrections and Rehabilitation.

2) Specifies that, beginning with the 2022-23 academic year, community colleges may submit a copy of their most up to date ISAs to the Chancellor's Office for review. If contracts are renewed or updated, they may be submitted to the Chancellor's Office.

3) Authorizes, beginning December 31, 2023, colleges with ISAs with public service agencies to annually submit to the Chancellor's Office data on course offerings, student enrollment and FTES, and completion, including data from the 2020-2021, 2021-2022, and 2022-23 academic years.

4) Requires the Chancellor's Office to issue recommendations to the Department of Finance and the Legislature on the ISA FTES apportionment districts are eligible to claim, on or before December 31, 2024.

Comments

1) *Need for the bill.* According to the author, "California public safety agencies have ongoing, mandated training through their respective state agencies which is critical to training public safety personnel critical to all communities. AB 1942 ensures these public safety agencies are able to receive their ongoing training through the California Community College system."

2) *Student Centered Funding Formula overview.* Prior to 2018-19, the state based community college general purpose apportionment funding for both credit and noncredit instruction almost entirely on full-time equivalent (FTE) enrollment. In 2018, the state changed the credit-based apportionment formula, now known as the Student Centered Funding Formula (SCFF), to include the following three main allocations:

   a) *Base Allocation.* As with the prior apportionment formula, the base allocation gives each district certain amounts for each of its colleges and state-approved centers. It also gives each district funding for each credit FTE student.

   b) *Supplemental Allocation.* The SCFF provides additional funding for every student who receives a Pell Grant, receives a need-based fee waiver, or is undocumented and qualifies for resident tuition. Student counts are "duplicated," such that districts receive twice as much supplemental funding for a student who is included in two of these categories.

   c) *Student Success Allocation.* The formula also provides additional funding for each student achieving specified outcomes—obtaining various degrees and certificates, completing transfer-level math and English within the student's first year, and obtaining a regional living wage within a year of completing community college. Each of the specified outcomes have different funding amounts.

   The formula does not apply to credit enrollment generated from incarcerated students, high school students, or to any noncredit enrollment. Apportionments for these students remain based entirely on enrollment.

3) *New formula protects districts from funding losses.* The new formula includes several hold harmless provisions for community college districts that would have received more funding under the former apportionment formula than the

new formula. For 2018-19, 2019-20, and 2020-21, these community college districts receive their total apportionment in 2017-18, adjusted for cost-of-living increases for each year of the period. Beginning in 2020-21, districts are to receive no less than the per-student rate they generated in 2017-18 under the former apportionment formula multiplied by their current full-time equivalent (FTE) student count. To help districts with declining enrollment, the state also retained its longstanding one-year hold harmless provision that allows districts to receive the greater of their calculated current-or prior-year allotments.

4) *This bill partially aligns with the funding formula oversight committee recommendation but lacks important data collection.* AB 1840 (Committee on Budget, Chapter 426, Statutes of 2018) established the Student Centered Funding Formula (SCFF) Oversight Committee, charged with continuously evaluating and reviewing the implementation of the funding formula. The 12 members of the committee are appointed equally by the Administration, Senate and Assembly. The Oversight Committee was charged to make recommendations by January 1, 2020, regarding the inclusion of first-generation college students, whether the definition of low-income students should be adjusted to regions of the state, and incoming students' level of academic proficiency. By June 30, 2021, the Oversight Committee was required to provide recommendations on whether the formula should include noncredit instruction and instructional service agreements and how district's allocations should be adjusted in a recession.

   The Oversight Committee recommended changing the funding rate for FTES enrollment in credit courses taught through ISAs to be the same rate as is used for Special Admit students in credit courses.

   However, the Oversight Committee also noted that the Chancellor's Office does not specifically collect data on courses taught through ISAs or on the students enrolled within these courses because districts are not required to indicate whether a given course is taught through an ISA. The Oversight Committee recommended that the Chancellor's Office collect data on courses taught through ISAs in order to better understand how these courses are serving students in the state and to be able to model the impact of any changes in funding on districts in the CCC system.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Chancellor's Office indicates that this bill would result in additional Proposition 98 General costs of

about $27.7 million each year to fund the courses offered through an instructional service agreement with public safety agencies. This estimate assumes there are approximately 16,682 FTES in those programs statewide, and that the credit rate per FTES would increase from $4,737 to $6,642 as a result of this measure. Total costs would increase from the current funding level of $69 million to $96.7 million.

The Chancellor's Office also estimates one-time General Fund costs of about $141,000 to update financial applications to collect additional apportionment data, develop new guidance on reporting requirements, and provide technical assistance to local colleges. There would be additional ongoing General Fund costs of at least $12,000 to comply with this bill's reporting requirements regarding funding for ISA's.

SUBJECT: Employees: bereavement leave

SOURCE: California Employment Lawyers Association
Crime Survivors for Safety & Justice
Equal Rights Advocates
Legal Aid at Work

DIGEST: This bill provides specified California workers with up to five days of job-protected leave from work to grieve and to attend to logistical matters in the event of the death of a close family member, as defined.

Senate Floor Amendments of 8/16/22 clarify that an employer has the discretion to pay an employee during a bereavement leave, even in the absence of an existing

paid bereavement leave policy and where the employee has no other form of paid leave available.

ANALYSIS:

Existing law:

1) Establishes the Department of Fair Employment and Housing (DFEH) to combat discrimination in housing and employment. Specifies that DFEH has the power to receive, investigate, conciliate, mediate, and prosecute complaints alleging practices made unlawful by the Fair Employment and Housing Act (FEHA). (Gov. Code §§ 12900-12930.)

2) Makes it an unlawful employment practice, under the California Family Rights Act (CFRA), for an employer to refuse to grant a request by a qualified employee to take up to a total of 12 workweeks in any 12-month period for family care and medical leave. Defines "family care and medical leave" for this provision to mean taking leave to care for a new child; to care for a child, parent, grandparent, grandchild, sibling, spouse, or domestic partner who has a serious health condition; or to take leave because of the employee's own serious health condition, as specified. (Gov. Code § 12945.2.)

3) Requires the DFEH to create a small employer family leave mediation pilot program for employers with between five and nineteen employees. Allows an employer or employee, within a specified time after DFEH has issued a right-to-sue notice to an employee, to request to participate in the mediation pilot project. Specifies that if either the employer or the employee requests mediation, as prescribed, the employee may not pursue a civil action until mediation is deemed complete, as specified. (Gov. Code § 12945.21.)

4) Grants public employees, with specified exceptions, up to three days of paid bereavement leave if the death occurs in California, and up to an additional two days, paid or unpaid, if the death occurred outside of the state. (Gov. Code § 19859.3.)

This bill:

1) Defines "employee" to mean a person employed by the employer for at least 30 days prior to the commencement of leave except for certain exempt state employees.

2) Defines "employer" to mean either of the following:

a) a person who employs five or more persons to perform services for a wage or salary; or
b) the state and any political or civil subdivision of the state, including, but not limited to, cities and counties.

2) Defines “family member” to mean a spouse or a child, parent, sibling, grandparent, grandchild, domestic partner, or parent-in-law, as defined.

3) Provides that it is an unfair labor practice for an employer to refuse to grant an employee’s request to take up to five days of bereavement leave upon the death of a family member.

4) Provides that days of bereavement leave need not be consecutive and the leave must be taken within three months of the date of the death of the person prompting the need for the leave.

5) Authorizes an employee with no existing bereavement policy to take up to five unpaid days of bereavement leave. This leave may be substituted with vacation, personal leave, accrued and available sick leave, or compensatory time off, as specified.

6) Provides that an employer may request documentation, as specified, of the death of the family member and the employee shall provide that documentation within 30 days of the first day of the leave.

7) Prohibits an employer from refusing to hire, discharging, demoting, firing, suspending, expelling, or discriminating against an individual because of the following:

a) an individual’s exercise of the right to bereavement leave; or
b) an individual’s giving information or testimony as to their own bereavement leave, or another person's bereavement leave, in an inquiry or proceeding related to rights guaranteed under the bill.

8) Provides that it is an unlawful employment practice for an employer to interfere with, restrain, or deny the exercise of, or the attempt to exercise, any of the above rights.

9) Requires an employer to maintain the confidentiality of the employee requesting the leave and any related documents received regarding violations of this section.

10) Exempts from the bill's provisions an employee who is covered by a valid collective bargaining agreement if the agreement expressly provides for bereavement leave equivalent to that required in 6), above, and for premium and regular rate of pay, as specified.

11) Requires DFEH to add to its small employer family leave mediation pilot program violations of the above provisions.

Comments

Federal and California law recognize that there are times in life when an employee must miss work in order to attend to the health and welfare of a family member. Of particular note, the California Family Rights Act (CFRA) allows employees to take up to 12 weeks of family leave to care for a newborn child or to care for family members suffering from a serious medical condition. (Gov. Code § 12945.2.) Similarly, the federal Family Medical Leave Act (FMLA) grants most employees the right to take up to 12 weeks unpaid time off work to care for a qualifying family member with a serious health condition. (29 U.S.C. § 2612.) However, under both CFRA and FMLA, an employee's right to take job-protected time off to care for a qualifying family member only applies while the qualifying family member is alive. There are no existing laws that allow private sectors employees to take time off to grieve or deal with the myriad and complex logistical matters that arise when a close family member passes away. As a result, private employees are generally at the mercy of their employers when a family member dies.

To give California workers greater assurance that they will have the time they need to mourn the loss of a close family member and put their affairs in order, this bill would establish a right to job-protected bereavement leave. To protect small businesses who must have everyone present in order to operate, the bill only covers employers with five or more workers. This is consistent with CFRA's scope as well. Employees would not be eligible immediately upon hire; they would have to accumulate 30 days of service first. Once they qualified for the leave, employees would be able to take up to five days off for the death of close family member, defined, as in CFRA, to mean a spouse, child, parent, sibling, grandparent, grandchild, domestic partner, or parent-in-law. In recognition of the fact that wrapping up the affairs of a family member cannot necessarily be done in a neat and orderly schedule, the bill specifies that the five days need not be taken

consecutively, but a worker cannot drag things out indefinitely: the bill requires the leave to be taken within three months of the family member's passing.

The bill proposes to place the right to bereavement leave alongside CFRA in the Fair Employment and Housing Act (FEHA). (Gov. Code §§ 12900-12930.) An employer's failure to allow a worker to take bereavement leave as required would constitute an unlawful employment practice. So would any adverse action taken against an employee for exercising their right to bereavement leave. Aggrieved workers could bring administrative complaints about violations to DFEH for investigation and resolution. After filing their administrative complaint, employees would also have the option of requesting a right to sue letter from DFEH and initiating a complaint in court. When employees complain to DFEH that an employer with between five and 19 employees has violated CFRA, the small business has the option of requesting that DFEH attempt to mediate the matter. (Gov. Code § 12945.21.) This bill makes the same mediation program available to small businesses in the event that an employee alleges a violation of the new bereavement leave law.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The Department of Fair Employment and Housing (DFEH) estimates that it would incur first-year General Fund costs of $470,000, and $464,000 annually thereafter, to investigate and enforce new complaints alleging a violation of bereavement leave rights. The Department assumes that 100 complaints would be filed per year, a figure derived from (1) the number of family and medical leave complaints DFEH receives, and (2) the fact that a large majority of employers already provide bereavement leave at some level.

- The bill would additionally result in increased staffing costs for state departments by increasing the minimum days available for excluded employees to take bereavement leave. The magnitude of the increased costs is unknown, but potentially significant. Currently, an excluded employee is entitled to three days of paid bereavement leave and, if the death occurs out of state, two additional days of leave using unpaid time or accrued sick leave. This bill would effectively guarantee all bereaved state employees a minimum of five days.

National Federation of Independent Business - California

ARGUMENTS IN SUPPORT: According to the author:

> This legislation will ensure workers are entitled to take job-protected, unpaid bereavement leave to mourn the loss of their immediate family member. AB 1949 guarantees workers up to 5 business days of unpaid leave. It does not affect existing collective bargaining agreements that provide for this minimum level of bereavement leave. No person should fear losing their job by taking time to grieve the death of their loved one. We cannot expect people to work at full productivity while they are mourning the death of a loved one, regardless of cause. AB 1949 will protect Californians during moments of immense hardship.

As sponsor of the bill, California Employment Lawyers Association, Crime Survivors for Safety & Justice, Equal Rights Advocates, and Legal Aid at Work collectively write:

> [I]n 1968, when the Vietnam War death toll was at its peak, the U.S. government passed funeral leave for federal employees to

> take time off for the combat-related deaths of family or 'any individual related by blood or affinity whose close association with the employee is the equivalent of a family relationship.' We must act with the same kind of compassion to protect the Californians who have lost a family member during this pandemic or for other reasons. Because no one worker should ever have to choose between their employment and grieving the loss of a loved one.

ARGUMENTS IN OPPOSITION: In opposition to the bill, the National Federation of Independent Business - California writes:

> We acknowledge that AB 1949 has undergone numerous change from last year's AB 95 which makes the bill less onerous; however, California has a multitude of leaves available to employees. Many businesses do include unpaid leave on their own for employees to attend funerals and other related services. That said, the layering of various leaves makes it especially difficult for small businesses to comply and continue the operation of a small business. We support the rights of employers to provide bereavement leave on a voluntary basis. However, California simply cannot continue to burden employers with the thread of new mandates as small businesses continue to claw back after two years of COVID-instilled slowdowns.

SUBJECT: California Antihunger Response Act of 2022

SOURCE: California Association of Food Banks
Western Center on Law and Poverty

DIGEST: This bill requires the California Department of Social Services (CDSS) to establish the California Antihunger Response Act of 2022 (CARE) to provide state-funded food assistance benefits to persons no longer eligible for CalFresh due to the federal able-bodied adult without dependents (ABAWD) time limits or ineligibility for other exemptions, as specified.

Senate Floor Amendments of 8/23/22 remove references to "employment and training," remove the July 1, 2024 operative date for the CARE Act benefit, and instead delay implementation of CARE Act benefits until one year after Welfare and Institutions Code Section 18930 (as amended), becomes operative.

ANALYSIS:

Existing law:

1) Establishes in federal law the Supplemental Nutrition Assistance Program (SNAP) within the US Department of Agriculture (USDA) to promote the general welfare and to safeguard the health and wellbeing of the nation's population by raising the levels of nutrition among low-income households. It establishes SNAP eligibility requirements, including income that is at or below 130 percent of the federal poverty level and is determined to be a substantial limiting factor in permitting a recipient to obtain a more nutritious diet. *(7 Code of Federal Regulations (CFR) 271.1; 7 CFR 273.9)*

2) Establishes eligibility criteria for SNAP benefits to include participation in SNAP employment and training (E&T), among other criteria. *(7 CFR 273.7)*

3) Requires, as a condition of eligibility for SNAP benefits, each non-exempt household member to comply with work requirements, which may include, registering for work, participating in an employment and training program, or participating in a workfare program. *(7 CFR 273.7(a)(1)(iii))*

4) Establishes the SNAP time limit for ABAWDs, which states that an individual is limited to receive SNAP for up to three months within a three-year period, unless the individual has met certain work participation requirements, as specified. *(7 CFR 273.24)*

5) Permits the USDA to waive the applicability of the three-month time limit for ABAWDs if the unemployment rate in which the ABAWD resides is 10 percent or higher. *(7 CFR 273.24 (6)(o))*

6) Establishes in California statute the CalFresh program to administer the provisions of federal SNAP benefits to low-income families and individuals meeting specified criteria. *(WIC 18900 et seq.)*

7) Requires CDSS annually, to the extent permitted by federal law, to seek a federal SNAP waiver to the three-month limit in a three-year period of CalFresh benefits for an ABAWD, unless that participant has met the work participation requirement, as provided. *(WIC 18926)*

This bill:

1) Makes a number of legislative findings and declarations regarding SNAP, the need to prioritize anti-hunger programs, and the federal 2018 Farm Bill's effect on the ABAWD time limit.

2) Requires CDSS to use appropriated state funds to establish the CARE program to provide food assistance benefits for a person who has been determined ineligible for CalFresh benefits, or for whom CalFresh benefits have been discontinued as a result of the federal ABAWD time limits, and for individuals who are also ineligible for a discretionary exemption, as specified.

3) Requires CDSS to provide CARE benefits as state discretionary exemptions, in addition to utilizing discretionary exemptions under federal law, as provided.

4) Requires an ABAWD or person ineligible for a discretionary exemption to receive CARE benefits in the same amount as they would have received in the CalFresh program but for the ABAWD time limit making them ineligible.

5) Requires benefits to be issued through the state-administered and state-funded electronic benefits transfer (EBT) system developed pursuant to the Electronic Benefits Transfer Act.

6) Allows for the EBT system used to issue the CARE program to also be used to issue other state-funded food assistance benefits.

7) Provides that the CARE program is only applicable during a period of time in which a statewide time limit waiver is not granted, and in such periods of time, only in those areas not granted an area time limit waiver by the federal government.

8) Requires the CARE benefit to be operable one year after the California Food Assistance Program (CFAP) expansion starts, as provided.

9) Requires CDSS by April 1, 2023, to develop guidance in consultation with the Office of Systems Integration, county human services agencies, and other relevant stakeholders on maximizing the use of discretionary exemptions available under federal law related to SNAP.

10) Permits CDSS guidance to include redistribution of discretionary exemptions between counties if necessary, to maximize the use of discretionary exemptions to prevent hunger among persons subject to the federal ABAWD time limits.

11) Provides that if the Commission on State Mandates determines that this act contains other costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made, as provided.

Comments

According to the author, "Access to food is critical to the health of our communities. The time limits for Able-Bodied Adults Without Dependents (ABAWDs) to access CalFresh benefits [disproportionately] affect people of color, former foster youth, the re-entry population, veterans, and people without a high school or bachelor's degree. The loss of CalFresh eligibility and benefits due to these strict rules increases hunger and poverty. AB 1965 provides support to individuals who would lose CalFresh eligibility due to the ABAWD rules and helps ensure that they are supported during challenging times."

Poverty in California. According to the official poverty measure, nearly 4.5 million (11.8 percent) Californians lived in poverty in 2020. According to the supplemental poverty measure, a more refined measure that takes into account cost of food, clothing and shelter and utilities and other factors, a little over 6 million (15.4 percent) Californians lived in poverty in 2020, which is the highest rate in the nation. Using a slightly different methodology, the California Poverty Measure (CPM), the Public Policy Institute of California (PPIC) found that 16.4 percent of Californians, or about 6.3 million people, lacked enough resources to meet their basic needs in 2019. An additional 16.4 percent of Californians were not in poverty but lived fairly close to the poverty line. This means that more than a third, or 34 percent, of Californians were poor or near poor in 2019. The PPIC also noted that although poverty in California had declined from 2019 to 2020, the effects of COVID-19 Pandemic on poverty are still unclear.

At this time, the most recent CPM data does not take the COVID-19 pandemic into consideration, because the most recent year for which we have data is 2019. The PPIC indicates that it is likely that COVID-19 increased poverty due to severely constrained employment opportunities. However, as noted by PPIC, there were various state and federal responses above and beyond the existing safety net, such as the CARES Act in 2020 and American Rescue Plan Act in 2021, which may have mitigated some poverty surges by providing economic support to those impacted. This seems to be reflected in the 2020 Census Bureau data, which shows an overall decline in poverty, in part due to COVID-19 relief measures such as the federal stimulus payments and unemployment insurance, which helped keep an estimated 1.7 million and 1 million Californians out of poverty, respectively. This initial data highlights the ability of government action to alleviate poverty. A more

nuanced picture of the overall poverty levels during the pandemic, and the impact of safety net provisions, will be available when CPM data for 2020 is available later this year.

CalFresh. CalFresh, California's version of federal SNAP benefits, provides monthly food benefits to qualified low-income individuals and families to assist with the purchase of the food they need to maintain adequate nutrition levels. CalFresh is the largest nutrition assistance program in California, with 2.8 million households and over 4.9 million people receiving benefits in June of 202s. The program is administered by CDSS at the state level and California's 58 counties are responsible for administering CalFresh at the local level. CalFresh benefits are federally funded and national income eligibility standards and benefit levels are established by the federal government. Although benefits are federally funded, costs to administer the program are shared by state, county, and federal governments.

California determines CalFresh eligibility by seeing if the applicant's gross monthly income is 200 percent of the federal poverty level (FPL) or less for their household size. That means for a household of three in California, the maximum gross monthly income for CalFresh eligibility is $3,464. For a household of one in California, the maximum gross monthly income for CalFresh eligibility is $2,024. Households with seniors or disabled members are not subject to the gross income criteria; however, their net monthly income must be 100 percent of FPL or below.

Able Bodied Adults Without Dependents. According to federal SNAP rules, all recipients must meet work requirements unless they are exempt due to age, disability, or another specific reason. There are special rules that apply to ABAWDs, who are between 18 and 49 years of age, have no dependents and are not disabled. As established with the federal Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) of 1996, under the ABAWD time limit, ABAWDs can only receive SNAP (CalFresh) benefits for three months in three years unless they work at least 80 hours per month, participate in a qualifying education and training activity for at least 80 hours per month, or comply with a workfare program. ABAWDs can also satisfy these requirements by participating in the CalFresh E&T program.

Due to high unemployment rates, California has been designated a 'work surplus area' and therefore, has been operating with a waiver to the ABAWD time limit rules. This allows ABAWDs to receive CalFresh benefits without being subject to the time limit and without fulfilling the work requirement rule. Though in recent years, some counties in the state would no longer be eligible for the waiver due to

lower overall unemployment rates. Under current state law, CDSS is annually required to apply for a federal exemption to the ABAWD rule if it meets certain federal criteria related to high unemployment. The USDA Food and Nutrition Services has approved California for a statewide ABAWD waiver, which is set to expire on June 30, 2023. Absent another statewide or county-specific waiver, ABAWDs will need to comply with federal work requirement rules or they will be subject to the three month within three years limit on food benefits.

2018 Farm Bill and Federal ABAWD Rule Changes. On December 20, 2018, the Agriculture Improvement Act of 2018 or federal Farm Bill, was signed into law by then President Trump, ushering in major changes to the United States food and agriculture programs. The USDA began implementation of key program changes to SNAP around work requirements for ABAWDs, who make up about 8.8 percent of SNAP participants. Specifically, the USDA published a final rule (Rule) on December 5, 2019, that effective April 1, 2020, would have restricted food assistance benefits under the SNAP/CalFresh program for unemployed ABAWDs. The Rule also revised the conditions under which the USDA would waive the ABAWD time limit in areas that have an unemployment rate of over 10 percent or a lack of sufficient jobs. The Rule also significantly restricted states' ability to carry forward unused discretionary exemptions, which was reduced from 15 percent to 12 percent of the state's ineligible caseload. However, the waiver percentage reduction was offset with changes to the employment and training programs aimed at increasing ABAWDs' ability to obtain regular employment.

California, along with 13 other states and two cities, filed a lawsuit against the USDA on January 16, 2020, to block implementation of the rule, as it was estimated that it would eliminate food assistance benefits for 688,000 to 850,000 people nationally, including about 400,000 Californians. While the case was being heard, the Rule was not implemented, and on October 18, 2020, a federal judge vacated USDA's proposed rule changes to ABAWD eligibility and states' ability to request certain waivers. On March 24, 2021, the USDA Secretary under the Biden Administration released a statement on the D.C. Circuit Court's decision regarding the ABAWD rule stating that the USDA voluntarily moved to dismiss their appeal on the ABAWD Final Rule, which the court accepted. The USDA has since waived all ABAWD rules until the end of the Covid-19 pandemic for all states. This means that even if California's statewide waiver request expires on June 30, 2022, or a new request is not approved by the USDA, ABAWDs rules will still be waived until the end of the federal public health emergency declaration related to Covid-19.

This bill establishes the CARE Act benefit, to provide a nutrition benefit that is equivalent to CalFresh for people ineligible for CalFresh and delays implementation of the CARE Act benefit until one year after the CFAP expansion become operative as provided, for the periods of time when the state is not eligible to receive a federal waiver for unemployed ABAWDs to receive SNAP/CalFresh. The bill requires CDSS to use appropriated state funds to provide food assistance benefits to persons who have been determined ineligible for SNAP/CalFresh due to federal ABAWD rules or who are ineligible for a discretionary exemption. This bill also requires CDSS to develop and issue guidance by April 1, 2023, in consultation with the Office of Systems Integration, county human services agencies, and other relevant stakeholders to maximize the use of discretionary exemptions available under federal law related to SNAP, as provided.

Related/Prior Legislation

SB 609 (Hurtado, Chapter 606, Statutes of 2021) included adult education and career technical education among the list of programs that may allow a student to qualify for an exemption to the CalFresh student eligibility rule.

AB 2413 (Ting, 2020) would have required CDSS to streamline certain aspects of the semi-annual reporting process through system changes to prepopulate the semiannual reporting process forms. AB 2413 was substantially amended on July 1, 2020, such that it no longer fell in the jurisdiction of the Human Services Committee.

AB 1022 (Wicks, 2019) would have established the California Anti-Hunger Response and Employment Training Act of 2019, requiring CDSS to provide a state-funded food benefit to individuals who are deemed ineligible for CalFresh due to the ABAWD time limit. AB 1022 was substantially amended on June 29, 2020, such that it no longer fell in the jurisdiction of the Human Services Committee.

AB 1229 (Wicks, 2019) would have required CDSS to issue guidance to county human services departments that requires counties to, among other things, establish a self-initiated workfare program for former foster youth that will enable them to meet the ABAWD work requirement. AB 1229 was held in the Senate Appropriations Committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriation Committee:

- CDSS estimates $121 million General Fund ongoing, for state-funded benefits and administration of the program.

- Costs to counties may be reimbursable by the state, subject to a determination by the Commission on State Mandates.

SUBJECT: Kindergarten: minimum schoolday

SOURCE: Author

DIGEST: This bill phases in a requirement for school districts and charter schools offering a kindergarten program to offer at least one full-day kindergarten class at each schoolsite, as specified.

ANALYSIS: Existing law establishes the Local Control Funding Formula (LCFF) which provides per-pupil funding targets, with adjustments for different student grade levels and includes supplemental funding for local educational agencies (LEAs) serving students who are low-income, English learners, or foster youth. The LCFF replaced almost all sources of state funding for LEAs, including most categorical programs, with general purpose funding including few spending restrictions. The largest component of the LCFF is a base grant generated by each student. Current law establishes base grant target amounts for the 2013-14 fiscal year, which are increased each year by the Implicit Price Deflator for State and Local Government Purchases of Goods and Services for the United States.

This bill:

1) Requires, from the 2027-28 school year to the 2029-30 school year, a school district or charter school providing a kindergarten program, and that has an enrolled unduplicated pupil percentage of 50 percent or more, to provide a full-day kindergarten class at each schoolsite.

2) Requires, beginning in the 2030-31 school year, every school district or charter school providing a kindergarten program to provide a full-day kindergarten class at each schoolsite.

3) Specifies that this requirement does not apply to transitional kindergarten (TK) attendance.

Background

In 2013, the LCFF was enacted. The LCFF establishes per-pupil funding targets, with adjustments for different student grade levels, and includes supplemental funding for LEAs serving students who are low-income, English learners, or foster youth. The LCFF replaced almost all sources of state funding for LEAs, including most categorical programs, with general purpose funding including few spending restrictions.

The largest component of the LCFF is a base grant generated by each student. Current law establishes base grant target amounts for the 2013-14 fiscal year, which are increased each year by the Implicit Price Deflator for State and Local Government Purchases of Goods and Services for the United States.

The base grant target rates for each grade span for the 2021-22 fiscal year are as follows:

1) $8,935 for grades K-3 (includes a 10.4 percent adjustment for class size reduction);

2) $8,215 for grades 4-6;

3) $8,458 for grades 7-8;

4) $10,057 for grades 9-12 (includes a 2.6 percent adjustment for career technical education).

The K-3 base grant amount above includes a 10.4 percent increase, which districts receive for maintaining an average class enrollment of not more than 24 pupils for each schoolsite in kindergarten and grades 1 to 3, inclusive unless a collectively

bargained alternative annual average class enrollment for each schoolsite in those grades is agreed to.

For each disadvantaged student, a district receives a supplemental grant equal to 20 percent of its adjusted base grant. A district serving a student population with more than 55 percent of disadvantaged students receives concentration grant funding equal to 50 percent of the adjusted base grant for each disadvantaged student above the 55 percent threshold.

In 2013, the LCFF was enacted. The LCFF establishes per-pupil funding targets, with adjustments for different student grade levels, and includes supplemental funding for local educational agencies (LEAs) serving students who are low-income, English learners, or foster youth. The LCFF replaced almost all sources of state funding for LEAs, including most categorical programs, with general purpose funding including few spending restrictions.

For each disadvantaged student, a district receives a supplemental grant equal to 20 percent of its adjusted base grant. A district serving a student population with more than 55 percent of disadvantaged students receives concentration grant

funding equal to 50 percent of the adjusted base grant for each disadvantaged student above the 55 percent threshold.

Comments

1) *Need for this bill.* According to the author, "Full-day kindergarten gives students the time they need to engage in meaningful learning and play, resulting in greater school readiness, self-confidence, and academic achievement compared to part-day programs. However, some school districts only offer part-day programs, leaving students without access to the benefits of full-day kindergarten. AB 1973 requires school districts and charter schools to offer full-day kindergarten programs, giving all students the opportunity to participate in a full-day program, which will prepare them with the skills they need to thrive in school and beyond."

2) *Research on the impact of full-day kindergarten is mixed.* While many argue that a large body of research demonstrates that full-day kindergarten programs benefit children, a 2009 Public Policy Institute of California study states that "research to date…has provided little evidence of long-term academic benefits beyond kindergarten or first grade." Further, an analysis done by the Research and Development (RAND) Corporation titled "Ready for School: Can Full-Day Kindergarten Level the Playing Field" found that "This study reinforces the findings of earlier studies that suggest full-day kindergarten programs may not enhance achievement in the long term. Furthermore, this study raises the possibility that full-day kindergarten programs may actually be detrimental to mathematics performance and to nonacademic readiness skills."

3) *Most school districts already operate full-day kindergarten programs.* According to the Legislative Analyst Office (LAO), as of 2017-18, 71 percent of school districts in California ran only full-day kindergarten programs, 19 percent ran only part-day programs, and 10 percent ran a mix of full-day and part-day programs. The LAO estimates that approximately 70 percent of kindergarten students attend a full-day program and roughly 30 percent attend a part-day program. Enrollment in full-day programs has grown significantly since 2007-08 when 43 percent of students were attending full-day kindergarten programs. A recent study conducted by the University of California, Los Angeles (UCLA), on behalf of the California Department of Education (CDE) found that the average full-day kindergarten session was 5.6 hours and the part-day sessions averaged 3.5 hours.

4) *Why do some districts not offer full-day kindergarten?* School districts determine the length of their kindergarten programs. Part-day programs operate

between three to four hours per day, and full-day programs operate for more than four hours per day. Schools operating part-day programs typically run a morning session and afternoon session in the same classroom using two teachers—one teacher in the morning and another in the afternoon. Full-day programs, in contrast, require a separate classroom and are typically assigned one full-time teacher who leads the class throughout the day. The state funds kindergarten through the Local Control Funding Formula, which provides districts the same per student funding rate for part-day and full-day programs ($8,235 per student in 2018 19).

When surveyed by the LAO for their reasons for not operating full-day kindergarten programs, school districts reported a variety of reasons, including limited classroom space, teachers preferring part-day programs because they receive additional support from another teacher throughout the day, and parent preference for a shorter school day for their children.

According to the 2017 UCLA study, lack of classroom space has been a primary barrier to offering full-day kindergarten. In order to address this problem and facilitate the expansion of full-day kindergarten, the state has invested $890 million over the last 4 years in grant funding to support full-day kindergarten programs ($100 million in 2018-19, $300 million in 2019-20, and $490 million in 2021-22).

California is experiencing a significant shortage of teachers overall. A 2020 research brief by the Learning Policy Institute (LPI) notes that "When California students returned to school in fall 2019, hundreds of thousands returned to classrooms staffed by substitutes and teachers who were not fully prepared to teach. In recent years, California has experienced widespread shortages of elementary and secondary teachers as districts and schools seek to restore class sizes and course offerings cut during the Great Recession." The LPI report goes on to say that "Analysis of statewide teacher supply and demand factors indicates that there are three main factors driving shortages in California: the decline in teacher preparation enrollments, increased demand for teachers, and teacher attrition and turnover. However, the relative weight of supply and demand factors can vary from district to district."

The expansion of TK is expected to exacerbate this need as it is projected that full implementation of TK with reduced staffing ratios will require up to 12,000 or more additional credentialed teachers, as well as up to 25,000 teacher assistants.

5) *Charter schools would be required to comply.* As summarized above, the LCFF currently provides a 10.4 percent adjustment to the K-3 base grant for school districts that maintain an average class enrollment of not more than 24 pupils for each schoolsite in kindergarten and grades 1 to 3, inclusive, unless a collectively bargained alternative annual average class enrollment for each schoolsite in those grades is agreed to. Charter schools also receive this adjustment, however, they are not required to comply with the class size requirement.

   As currently drafted, this bill would eventually require all charter schools providing a kindergarten program to offer at least one full-day kindergarten class at each schoolsite.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, by requiring schools to offer at least one full-day kindergarten class at each school site, this bill could result in a state reimbursable mandate. The extent of the resulting Proposition 98 General Fund costs is unknown but likely to be significant, potentially in the low hundreds of millions of dollars just for one-time facilities related costs. School districts that currently do not offer full-day programs may have limited classroom space and typically run a morning session and afternoon session in the same classroom. To facilitate the expansion of full-day kindergarten, the state has provided $890 million over the last four years in grant funding to support full-day kindergarten programs ($100 million in 2018-19, $300 million in 2019-20, and $490 million in 2021-22). The 2022 Budget Act provides an additional $650 million in one-time General Fund towards the California Preschool, Transitional Kindergarten and Full-Day Kindergarten Facilities Grant Program. To the extent that the Commission on State Mandates deems the bill's requirements to be a mandate, these funds may be considered as offsetting revenues.

SUPPORT: (Verified 8/11/22)

California Association for Bilingual Education
California School Employees Association
California State PTA
Early Edge California
First 5 California
The Education Trust-West

OPPOSITION: (Verified 8/11/22)

Association of California School Administrators
California School Boards Association

ARGUMENTS IN SUPPORT: First 5 California states, "Research shows that full-day kindergarten programs are associated with greater growth in cognitive, reading, and math skills compared to part-day programs – crucial academic building blocks that prepare children for first grade. Full-day kindergarten programs also improve school-readiness by giving children more opportunities for social-emotional and behavioral development, resulting in greater self-confidence and ability to work and play with others.

"While the number of districts providing full-day programs has increased in recent decades, many students are still left out of this opportunity because they attend school districts that only offer part-day programs. Recognizing the need to expand access, the state has invested $890 million in grant funding to support the construction of facilities to support full-day kindergarten over the last three years.

"AB 1973 sets California's youngest learners up for success in school and beyond by requiring school districts and charter schools to offer full-day kindergarten programs to all children starting in the 2025-26 school year. This bill will give students the time they need to engage in meaningful learning and play, resulting in greater school readiness, self-confidence, and academic achievement compared to part-day programs."

ARGUMENTS IN OPPOSITION: The California School Boards Association states, "Many kindergarten programs operate on a half-day schedule, primarily due to logistical challenges and lack of facility capacity. As a result, many offer separate morning and afternoon kindergarten programs not for policy reasons, but rather because they lack adequate facility capacity and/or teachers to meet demand. As such, this enables school districts to assign one teacher to a kindergarten classroom but serve twice as many students by providing separate morning and afternoon kindergarten classes in the same classroom. AB 1973 would also present increased challenges to our smaller and more rural school districts, which already struggle to a greater degree with staffing shortages and lack of adequate school facilities.

"Furthermore, there is no additional funding identified in this measure to fund the expansion of full-day kindergarten. Without additional funding to help school districts of all sizes offer full-day kindergarten, many districts will be faced with the unenviable task of choosing between offering full-day kindergarten or

foregoing their class size reduction (CSR) funding and increasing class sizes for some of our youngest students. Although we appreciate the intent of the bill to provide full-day kindergarten, we believe additional funding separate and apart from the CSR program is a better approach to achieving this goal."

SUBJECT: Telehealth: dental care

SOURCE: California Dental Association

DIGEST: This bill requires health plan contracts and insurance policies that offer dental service via telehealth through a third-party corporate telehealth provider to report to regulators on specified information and disclose to enrollees and insureds the impact of third-party telehealth visits on the patient's benefit limitations, including frequency limitations and the patient's annual maximum.

Senate Floor Amendments of 8/23/22 redefine "third-party corporate telehealth provider" to mean a corporation that provides dental services exclusively through a telehealth technology platform and has not physical location at which a patient can receive services, and is directly contracted with a health plan, including a specialized health plan that issues, sells, renews, or offers a plan contract covering dental services.

ANALYSIS:

Existing law:

1) Establishes the Department of Managed Health Care (DMHC) to regulate health plans under the Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene Act); California Department of Insurance (CDI) to regulate health and other insurance; and, the Department of Health Care Services (DHCS) to administer the Medi-Cal program. [HSC §1340, et seq., INS §106, et seq., and WIC §14000, et seq.]

2) Establishes requirements for health plans, including that services are readily available at reasonable times consistent with good professional practice and to the extent telehealth services are appropriately provided that they be considered in determining compliance with timely access regulations. [HSC §1367]

3) Requires, as part of existing reports submitted to DMHC, a health plan to submit, in a manner specified, data regarding network adequacy, including, but not limited to, the following:

   a) Provider office location;
   b) Area of specialty;
   c) Hospitals where providers have admitting privileges, if any;
   d) Providers with open practices;
   e) The number of patients assigned to a primary care provider or, for providers who do not have assigned enrollees, information that demonstrates the capacity of primary care providers to be accessible and available to enrollees; and,
   f) Grievances regarding network adequacy and timely access that the health care service plan received during the preceding calendar year. [HSC § 1367.035]

4) Requires CDI to promulgate regulations applicable to health insurers to ensure access to health care in a timely manner, and designed to ensure adequacy of the number of locations of institutional facilities and professional providers, adequacy of number of professional providers, and license classifications, consistent with standards of good health care and clinically appropriate care, and that contracts are fair and reasonable. Requires health insurers to report annually on complaints received by the insurer regarding timely access to care. Requires CDI to review these complaints and any complaints received

regarding timeliness of care and make this information public. [INS §10133.5]

5) Requires a health insurer, including a specialized plan that covers dental expenses, to provide or arrange for the provision of covered health care services in a timely manner appropriate for the nature of the insured's condition, consistent with good professional practice. Requires an insurer to establish and maintain provider networks, policies, procedures, and quality assurance monitoring systems and processes sufficient to ensure compliance with this clinical appropriateness standard. [INS 10133.54]

6) Requires contracts between health plans/insurers and health care providers to specify that reimbursement and coverage for services appropriately delivered through telehealth are on the same basis and to the same extent as services provided in person. Prohibits coverage from being limited only to services delivered by select third-party corporate telehealth providers. Permits a health plan/insurer to offer a contract containing a copayment or coinsurance for telehealth services that does not exceed the copayment or coinsurance applicable through those same services delivered in-person. [HSC §1374.14 and INS §10123.855]

7) Requires, if a health plan/insurer offers a service via telehealth through a third-party corporate telehealth provider, certain conditions to be met including a disclosure notice of the availability of receiving the service on an in-person basis or via telehealth, if available, from the enrollee's or insured's primary care provider, treating specialist, or from another contracting individual health professional, contracting clinic, or contracting health facility consistent with the service and existing timeliness and geographic access standards law and regulations. Additionally, requires a reminder that if the enrollee or insured has coverage for out-of-network benefits, of the availability of receiving the service either via telehealth or on an in-person basis using the enrollee's or insured's out-of-network benefits, the cost sharing obligation for out-of-network benefits compared to in-network benefits, and balance billing protections for services received from contracted providers. [HSC § 1374.141 and INS § 10123.856]

8) Requires a health plan/insurer to include in its reports submitted to DMHC/CDI pursuant to network adequacy law and regulations, in a manner specified by DMHC/CDI, all of the following for each product type:

a) By specialty, the total number of services delivered via telehealth, including the number provided by contracting individual health professionals and the number provided by third-party corporate telehealth providers;
b) The names of each third-party corporate telehealth provider contracted with the plan and, for each, the number of services provided by specialty;
c) For each third-party corporate telehealth provider with which it contracts, the percentage of the third-party corporate telehealth provider's contracted providers available that are also contracting individual health professionals; and,
d) The types of telehealth services utilized by enrollees\insureds, including frequency of use, gender, age, demographic information, and any other information as determined by the DMHC/CDI. [HSC § 1374.141 and INS § 10123.856]

9) Requires, before the delivery of health care via telehealth, the health care provider initiating the use of telehealth to inform the patient about the use of telehealth and obtain verbal or written consent from the patient for the use of telehealth as an acceptable mode of delivering health care services and public health. Requires the consent to be documented. [BPC §2290.5]

This bill:

1) Requires a health plan/insurer that issues, sells, renews, or offers a plan contract or insurance policy covering dental services, including a specialized health plan contract or health insurance policy covering dental services that offers a service via telehealth to an enrollee or insured through a third-party corporate telehealth provider, to report to DMHC and CDI in a manner specified by DMHC and CDI, all of the following for each product type:

   a) The total number of services delivered via telehealth by a third-party corporate telehealth provider;
   b) For each third-party corporate telehealth provider with which it contracts, the percentage of the third-party telehealth provider's contracted providers available to the plan's or insurer's enrollees or insureds that are also network providers; and,
   c) For each third-party corporate telehealth provider with which it contracts, the types of telehealth services utilized, including information on the gender and age of the enrollee or insureds, and any other information as determined by DMHC and CDI.

2) Requires a health plan/insurer that issues, sells, renews, or offers a plan contract covering dental services, including a specialized health plan contract or health insurance policy covering dental services that offers a service via telehealth through a third-party corporate telehealth provider, to disclose the impact of third-party telehealth visits on the patient's benefit limitations, including frequency limitations and the patient's annual maximum.

3) Excludes specialized health plans and insurance policies that cover dental services from requirements in existing law related to third-party corporate telehealth providers.

4) Defines "third-party corporate telehealth provider" as a corporation that provides dental services exclusively through a telehealth technology platform and has not physical location at which a patient can receive services, and is directly contracted with a health plan, including a specialized health plan that issues, sells, renews, or offers a plan contract covering dental services.

Comments

According to the author, in 2021, AB 457 (Santiago, Chapter 439, Statutes of 2021) was signed into law, which established the Protection of Patient Choice in Telehealth Provider Act, to ensure patients receive adequate and efficient telehealth services. AB 457 provided ease and protections of telehealth services at a time we needed it most and continues to provide the same protections and oversight toward medical plans. Unfortunately, dental plans were exempt from AB 457, despite being encouraged to seek telehealth services at a time COVID-19 was peaking. As a result, telehealth triage appointments, for example, could impact a patient's visit frequency limitations and annual maximum once the patient was referred to an in-person dentist for the care they needed. This bill would simply close the gap created in AB 457 and continue to provide holistic protections to constituents using telehealth for medical and now dental services.

Related/Prior Legislation

AB 457 (Santiago, Chapter 439 Statutes of 2021) established requirements on health plans and insurers that offer telehealth through a third-party corporate telehealth provider, including disclosing the availability of receiving the services on an in-person basis or via telehealth from the enrollee's or insured's primary care provider, treating specialist or other contracting health professional, clinic, or health facility, and, reminders of cost-sharing for services from noncontracted providers.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- DMHC estimates state operations costs of approximately $163,000 in 2022-23, $357,000 in 2023-24, $203,000 in 2024-25, and $167,000 annually thereafter (Managed Care Fund).

- CDI estimates state operations costs of $3,000 in 2022-23, $13,000 in 2023-24, and $3,000 ongoing thereafter (Insurance Fund).

ARGUMENTS IN SUPPORT: The California Dental Association is the sponsor of this bill and writes that the use of telehealth services has significantly increased since the onset of the COVID-19 pandemic. While telehealth has proven to be an effective mode of delivering care, third-party corporate telehealth providers operate in a completely virtual environment and generally have no relationship or interaction with a patient's in-network provider. Dental plans were exempt from the provisions in AB 457, despite also steering patients to use third-party telehealth providers in lieu of in-person services. Telehealth can be a useful tool in dentistry to triage patients experiencing pain or discomfort, but almost no actual dental treatment can be provided remotely. These telehealth triage appointments can impact a patient's visit frequency limitations and annual maximum once the patient is referred to an in-person dentist for the care they need. This bill would remove the dental exemption from statute and direct dental plans to provide a disclosure explaining the impact of third-party corporate telehealth visits on the patient's benefit limitations, including frequency limitations and the patient's annual maximum. This bill is necessary to ensure dental patients have the ability to make an informed decision about how to access their dental care as they do for their medical care.

The Association of Regional Center Agencies writes it is eminently reasonable to require health plans to ensure their enrollees are fully aware of how such services (in this case, through third-party providers for dental services) affect their coverage. People with developmental disabilities are a population that is particularly well-served by telemedicine, particularly in dentistry, in certain cases. Their unique needs make it so that telemedicine can expand their ability to connect to needed care.

SUBJECT: Community colleges: nonresident tuition fees: Western Undergraduate Exchange

SOURCE: Palo Verde Community College District

DIGEST: This bill (1) authorizes the Board of Governors (BOG) of the California Community Colleges (CCC) to enter into the Western Undergraduate Exchange (WUE) through the Western Interstate Commission for Higher Education (WICHE); (2) allows small community college districts located near a bordering state to charge a lower tuition rate to out-of-state students from WUE participating states; and (3) decreases the per-unit fee for eligible resident students from three to one and one-half times the amount established for resident students.

Senate Floor Amendments of 8/24/22 include double-joining language to avoid chaptering issues with AB 1232 (McCarty).

ANALYSIS:

Existing law:

1) Establishes the CCC, a postsecondary education system in this state, under the administration of the BOG; and, specifies that the CCC consists of community college districts (Education Code (EC) Section 70900).

2) Authorizes the CCC BOG to enter into an interstate attendance agreement with any statewide public agency of another state that is responsible for public institutions of postsecondary education providing the first two years of college instruction, and that is an agency of a state that is a member of WICHE (EC Section 66801).

3) Authorizes a community college district to admit non-resident students and requires that these students be charged a tuition fee that is twice the amount of the fee established for in-state resident students, with certain specified exemptions. State statute prescribes a formula for the calculation of the non-resident fee. State law requires the non-resident tuition fee be increased to a level that is three times the amount of the fee established for in-state resident students (EC Section 76140).

4) Prohibits non-resident students from being reported as full-time equivalent students (FTES) for state apportionment purposes, except where: (a) the CCD has less than 1,500 FTES and is within 10 miles of another state and has a reciprocity agreement with that state; or, (b) if a community college district has between 1,501 and 3,000 FTES and is within 10 miles of another state and has a reciprocity agreement with that state, they can claim up to 100 FTES for state apportionment purposes (EC Section 76140(h)(i)).

5) Exempts no more than 200 students in any academic year from paying non-resident tuition fees if they attend the Lake Tahoe Community College (LTCC) and reside in specified communities in the State of Nevada; and, permits the LTCC District to count these persons as resident FTES for purposes of determining California apportionment funding (EC Section 76140 (a)(6)).

6) Provides that specified nonresident students exempted from paying nonresident tuition may be reported as resident FTES for purposes of state apportionment. These students are required to pay three times the amount of resident fees, and the apportionment rate is adjusted down accordingly (EC Section 76140(j)).

This bill:

1) Authorizes the BOG of the CCC to enter into the WUE through the WICHE.

2) Expands the conditions for which a community college district that has fewer than 1,500 FTES and whose boundaries are within 10 miles of another state can

exempt nonresident students from the nonresident fee requirement to include students from WUE participating states.

3) Expands the conditions for which a community college district that has more than 1,500 FTES but fewer than 3,000 FTES and whose boundary is within 10 miles of another state can exempt nonresident students (capped at 100 FTES per year) to also exempt, as specified, students from states that participate in the WUE.

4) Decreases the per-unit fee that eligible nonresident students must pay, from three times the per-unit fee established for residents, to one and one-half times the per-unit fee established for residents. *Current law requires districts that claim state apportionment for nonresident students from states participating in an exchange program to charge those students (regardless of the exemption) a higher rate than the rate charged to residents*.

5) Stipulates that except as provided, agreements shall contain the provision that no additional state funds shall be required to carry out the provisions of this chapter.

6) Makes technical and clarifying changes to existing law.

Comments

1) *Need for this bill.* According to a letter of support submitted by Lake Tahoe Community College, "AB 1998 (Smith) which would authorize the California Community Colleges Board of Governors to enter the Western Undergraduate Exchange (WUE) through the Western Interstate Commission for Higher Education (WICHE) and ensure that small, rural colleges located near state borders can provide an affordable and high-quality educational pathway for students within their community who reside across state lines.

   "The existing California-Nevada Interstate Attendance Agreement (CNIAA) provides access to LTCC for Nevada students who reside in the Tahoe Basin. Under the provisions of the CNIAA, Nevada residents in the Tahoe Basin can attend LTCC and pay fees below the traditional non-resident tuition rate. CNIAA students pay $93/unit, which is three times the resident tuition rate; as compared to the non-resident tuition rate of $205/unit.

"AB 1998 builds upon the CNIAA by allowing the California Community Colleges to participate in the WUE and offer students from other participating Western States access to the college for a further reduced tuition rate (150% of resident tuition). In return, California students will have similar access to Western State colleges at the same tuition discount. AB 1998 expands opportunities for students who reside near our border community."

2) *Western Interstate Commission for Higher Education*. California, Arizona, Oregon, and Nevada, along with a number of other states and territories (16 total), participate in WICHE. The WICHE oversees three student reciprocal exchange programs allowing students to attend out of state universities at a reduced rate.

   Through its exchange programs, more than 45,000 Western students saved $451 million in academic year 2019-20 through the WUE, Western Regional Graduate Program (WRGP), and Professional Student Exchange Program. These WICHE programs provide significant student savings on nonresident tuition at over 160 Western U.S. public colleges and universities and select private healthcare programs. Additionally, 18,544 California residents saved $196.5 million in academic year 2019-20 through the WUE and WRGP. These WICHE programs provide significant student savings on nonresident tuition at over 170 Western U.S. public colleges and universities.

   However, the CCC system does not participate in the WUE, which is the WICHE exchange program that serves undergraduates. This bill authorizes the BOG of the CCC to enter into the student exchange program through the WICHE.

3) *Western Undergraduate Exchange.* The WUE is an agreement among WICHE's member states and territories, through which 160 participating public colleges and universities provide nonresident tuition at a reduced rate. Through WUE, eligible students can attend an undergraduate program outside their home state and pay no more than 150 percent of that institution's resident tuition rate. Full nonresident tuition rates can exceed 300 percent of resident rates. WUE helps facilitate a fair exchange of students among participating states for purposes of lowering tuition costs for students who would otherwise pay more. Under the agreement, institutions and states can limit the number of students awarded the WUE tuition rate. Under current law, participation in any reciprocity agreement allows small border colleges to exempt eligible students from paying nonresident tuition, if, however, state apportionment is claimed for

those students the college must charge a rate of 300 percent of resident tuition. This bill drops that number to 150 percent, which mirrors the tuition rate agreed upon by states in the WUE program. As a WUE participating state, California students benefit from the same tuition reduction when attending colleges within one of the member western states. The bill would allow a limited number of border CCCs to both participate in WUE's student exchange program while claiming apportionment for a limited number of out-of-state residents enrolled at these CCC.s

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriation Committee, the Chancellor's Office estimates Proposition General Fund costs for increased apportionments in the low to mid hundreds of thousands of dollars each year. These costs would make up the difference between the tuition currently being paid and the lower tuition that would authorized by this bill. This bill will be limited to the Lake Tahoe and Palo Verde community college districts since they are the only districts located within ten miles of another state border. Additionally, since these districts both have more than 1,500 but fewer than 3,001 FTES as if 2020-21, each district would be permitted to exempt up to 100 FTES per year for out-of-state students from paying nonresident tuition, for a total of 200 FTES. The Chancellor's Office estimates up to $387,800 for this purpose, although actual costs would depend on the number of out-of-state students that enroll and qualify for the fee reduction.

SUBJECT: Affordable Housing and High Road Jobs Act of 2022

SOURCE: California Conference of Carpenters
California Housing Consortium

DIGEST: This bill authorizes specified housing development projects to be a use by right on specified sites zoned for retail, office, or parking, as specified.

Senate Floor Amendments of 8/25/22 (1) resolve chaptering conflicts with AB 1743 (McKinnor), AB 2094 (Rivas), and AB 2653 (Santiago); (2) exempt development on vacant sites in very high fire severity zones; (3) exempt development within 3,200 feet of an oil or gas refinery; (4) authorize a local government to exempt a site for a 100% affordable housing project if the local government identifies an alternative site, as specified; (5) preclude heights of 65 feet in the coastal zone; and (6) make technical, clarifying changes.

ANALYSIS:

Existing law:

1) Requires a local government to submit an annual progress report (APR) tracking, among other things, its progress towards meeting its regional housing needs.

2) Requires a local jurisdiction to give public notice of a hearing whenever a person applies for a zoning variance, special use permit, conditional use permit, zoning ordinance amendment, or general or specific plan amendment.

3) Requires the board of zoning adjustment or zoning administrator to hear and decide applications for conditional uses or other permits when the zoning ordinance requires.

4) Establishes, pursuant to SB 35 (Wiener, Chapter 366, Statutes of 2017), a streamlined, ministerial approval process, for certain infill multifamily affordable housing projects proposed in local jurisdictions that have not met their regional housing needs allocation (RHNA) allocation.

5) Requires cities and counties, to prepare and adopt a general plan, including a housing element, to guide the future growth of a community.

6) Requires that cities and counties produce, and the Department of Housing and Community Development (HCD) certify, a housing element to help fulfill the state's housing goals. In metropolitan areas, these housing elements are required every eight years. Each housing element must contain:
   a) An assessment of housing needs and an inventory of resources and constraints relevant to meeting those needs;
   b) A statement of the community's goals, quantified objectives, and policies relative to the maintenance, preservation, improvement, and development of housing;
   c) An implementation plan that identifies any particular programs or strategies being undertaken to meet their goals and objectives, including their RHNA target; and
   d) An inventory of land suitable and available for residential development, including vacant sites and sites having realistic and demonstrated potential for redevelopment during the planning period.

7) Requires a local government to determine whether each site in the site inventory can accommodate some portion of the jurisdiction's share of the RHNA by income category during the housing element planning period. A

community either must use the "default zoning densities" or "Mullin densities" to determine whether a site is adequately zoned for lower income housing or must provide an alternative analysis. Current Mullin densities:

a) 15 units/acre—cities within non-metropolitan counties; nonmetropolitan counties with metropolitan areas
b) 10 units/acre—unincorporated areas in all non-metropolitan counties not included in the 15 units/acre category
c) 20 units/acre—suburban jurisdictions
d) 30 units/acre—jurisdictions in metropolitan counties

This bill:

1) Establishes the Affordable Housing and High Road Jobs At of 2022.

Affordable Housing Developments in Commercial Zones

2) Provides that a housing development project may submit an application for a housing development that shall be a use by right and subject to a streamlined ministerial review in a zone where office, retail, or parking are a principally permitted use and subject to a streamlined ministerial review if the following apply:
   a) It is a legal parcel that is either in a city where the boundaries include some portion of an urbanized area or urban cluster, or in an unincorporated area, the parcel is wholly within the boundaries of an urbanized area or urban cluster.
   b) At least 75% of the perimeter of the site adjoins parcels that are developed with urban uses.
   c) It is not on a site or adjoined to any site where more than 1/3 of the square footage of the site is dedicated to industrial use.
   d) It is not on a specified environmentally sensitive site.
   e) For a vacant site: (i) it does not contain tribal cultural resources that could be affected by the development that were found prior to a tribal consultation and the effects of which cannot be mitigated; and (ii) is not located in a very high fire hazard severity zone.
   f) The project has at least 2/3 of the square footage designated for residential use.
   g) The residential density will meet or exceed the Mullin Densities.
   h) The project complies with specified objective zoning standards.
   i) The development proponent completes a Phase 1 environmental assessment, as specified.
   j) None of the housing on the site are located within 500 feet of a freeway.

k) None of the housing on the site is located within 3,200 feet of a facility that actively extracts or refines oil or natural gas.

3) Requires a project to meet the following affordability requirements:
   a) 100% of the units are affordable to lower income households.
   b) The units are subject to a recorded deed restriction for 55 years for rental and 45 years for owner-occupied units.

Mixed-Income Housing Developments Along Commercial Corridors

4) Provides that a housing development project may submit an application for a housing development that shall be a use by right within a zone where office, retail, or parking are a principally permitted use and shall be subject to a streamlined ministerial review if the proposed housing development abuts a commercial corridor and has a frontage along a commercial corridor of a minimum of 50 feet, is a site that is less than 20 acres, and meets the following requirements:
   a) It is a legal parcel that is either in a city where the boundaries include some portion of an urbanized area or urban cluster, or in an unincorporated area, the parcel is wholly within the boundaries of an urbanized area or urban cluster.
   b) The site would not require the demolition of housing subject to a recorded covenant, rent control, or occupied by tenants in the last 10 years.
   c) The site would not require the demolition of a historic structure placed on a national, state, or local historic register.
   d) The property contains one to four units.
   e) The property is vacant and zoned for housing but not for multifamily residential use.
   f) It is not on a site or adjoined to any site where more than 1/3 of the square footage of the site is dedicated to industrial use.
   g) It is not on a specified environmentally sensitive site.
   h) For a vacant site: (i) it does not contain tribal cultural resources that could be affected by the development that were found prior to a tribal consultation and the effects of which cannot be mitigated; and (ii) is not located in a very high fire hazard severity zone.
   i) The project is at least 2/3 of the square footage is designated for residential use.
   j) The project complies with specified objectives zoning standards.
   k) The project completes a phase I environmental assessment, as specified.
   l) None of the housing on the site are located within 500 feet of a freeway.

m) None of the housing on the site is located within 3,200 feet of a facility that actively extracts or refines oil or natural gas.

5) Requires a project to meet the following affordability requirements:
   a) For rental units either of the following: (i) 15% of the units are affordable to lower-income households for 55 years; or (ii) 8% of the units for very low-income households and 5% for extremely low income households for 55 years.
   b) For owner-occupied units, 30% of the units affordable to moderate-income or 15% affordable to lower-income households for 45 years.

6) Requires that if the local government has an affordable housing requirement, the housing development project shall comply with all of the following:
   a) The development project shall include the higher percentage between this bill and the local housing requirement;
   b) The project shall meet the lowest income targeting in either policy;
   c) If the local requirement requires at least 15% of the units for lower income, but does not require units affordable to extremely low-income or very low-income households, the development shall do both of the following:
      i) Include 8% of the units for very low income households, and 5% for extremely low income households, and
      ii) Subtract 15% from the percentage required by the local policy.

7) Requires that, if a local government has an affordable housing requirement the housing development project shall comply with both of the following:
   a) The project shall include the higher percentage of affordable units between this bill and the local requirement;
   b) The project shall meet the lowest income targeting in either policy.

8) Provides that the following density requirements shall apply:
   a) In a metropolitan jurisdiction, the development shall meet or exceed the greater of the following:
      i) The residential density allowed on the parcel by the local government;
      ii) For sites of less than one acre, 30 units per acre;
      iii) For sites greater than one acre located on a commercial corridor of less than 100 feet, 40 units per acre;
      iv) For sites of one acre in size or greater located on a commercial corridor of 100 feet or greater in width, 60 units per acre; or
      v) For sites within ½ mile of a major transit stop, 80 units per acre.
   b) In a nonmetropolitan jurisdiction, the development shall meet or exceed the greater of the following:

i) The residential density allowed on the parcel by the local government;
ii) For sites of less than one acre, 20 units per acre;
iii) For sites greater than one acre located on a commercial corridor of less than 100 feet, 30 units per acre;
iv) For sites of one acre in size or greater located on a commercial corridor of 100 feet or greater in width, 50 units per acre; or
v) For sites within ½ mile of a major transit stop, 70 units per acre.

9) Provides that the height shall be the greater of the following:
   a) The height allowed on a parcel by the local government;
   b) For sites located on a commercial corridor of less than 100 feet in width, 35 feet;
   c) For sites located on a commercial corridor of 100 feet or greater in width, 45 feet;
   d) For sites within ½ mile of a major transit stop and within a city with a population of greater than 100,000, 65 feet. This requirement does not apply in the coastal zone.

10) Provides that the following setback requirements apply:
   a) For the portion that fronts a commercial corridor: (i) no setbacks are required; (ii) all parking must be set back at least 25 feet; and (iii) on the ground floor, a building must be within 10 feet of the property line for at least 80% of the frontage.
   b) For the portion that fronts a side street, a building or buildings must abut within 10 feet of the property line for at least 60% of the frontage.
   c) For the portion that abuts an adjoining property but also abuts the same commercial corridor, no setbacks required unless the adjoining property contains a residential use, as specified.
   d) For the portion of the street line that does not abut a commercial corridor, a side street, or an adjoining property that also abuts the same commercial corridor as the property, the following shall occur:
      i) Along property lines that abut a property that contains a residential use, the following shall occur:
         (1) The ground floor shall be set back at 10 feet.
         (2) Starting on the second floor, each subsequent floor shall be stepped back an amount equal to seven feet multiplied by the floor number.
         (3) Along property lines that abut a property that does not contain a residential use, the development shall be set back 15 feet.

11) Provides that no parking is required except for bike parking, electrical vehicle equipment installed, or parking spaces accessible for persons with disabilities.

Additional Provisions

12) Defines "neighborhood plan" as a specific plan, area plan, precise plan, or master plan that has been adopted by a local government. Provides that if the site is within a "neighborhood plan," the site satisfies both of the following:
    a) As of January 1, 2022, there was a neighborhood plan applicable to the site that permitted multifamily housing development on the site; and
    b) As of January 1, 2024, there was a neighborhood plan applicable to the site that permitted multifamily housing development on the site and all of the following occurred: (i) a notice was issued before January 1, 2022; (ii) the neighborhood plan was adopted on or after January 1, 2022, and before January 1, 2024, and (iii) the environmental review was completed before January 1, 2024.

13) Authorizes a local government to exempt a parcel from the requirements in this bill before a development proponent submits an application if the local government makes written findings, as specified.

14) Requires the development proponent to provide written notice of the pending application to each eligible tenant located on the site and provide relocation assistance as specified. The funds shall be used to pay for the business to relocated or for costs of a new business.

15) Permits a local government to adopt an ordinance to implement the provisions of this bill, and exempts that ordinance from the California Environmental Quality Act.

16) Requires a local agency to include in its APR data related to this bill.

17) Requires HCD to conduct two studies on the outcomes of this bill, as specified.

18) Establishes July 1, 2023, as the implementation date and imposes a sunset date of January 1, 2033.

Labor Standards

19) Provides that a proponent of a development project approved pursuant to the provisions of this bill must require, in contracts with construction contractors, that all of the labor provisions of this bill's standards will be met in project construction. The proponent must certify this to the local government;

20) Provides that a development that is not in its entirety a public work, as specified, must be subject to all of the following wage provisions:

a) All construction workers employed in the execution of the development must be paid at least the general prevailing rate of per diem wages for the type of work and geographic area, as specified, except that apprentices registered in programs approved by the Chief of the Division of Apprenticeship Standards may be paid at least the applicable apprentice prevailing rate;
b) The development proponent must ensure that the prevailing wage requirement is included in all contracts for the performance of the work for those portions of the development that are not a public work; and
c) All contractors and subcontractors for those portions of the development that are not a public work must maintain and verify payroll records, as specified, and make those records available for inspection and copying. This requirement does not apply if all contractors and subcontractors performing work on the development are subject to a project labor agreement that requires the payment of prevailing wages to all construction workers employed in the execution of the development and provides for enforcement of that obligation through an arbitration procedure.

21) Provides that the obligation of the contractors and subcontractors to pay prevailing wages pursuant to this bill are subject to the following enforcement provisions: (a) they may be enforced by The Labor Commissioner, an underpaid worker, and a joint labor-management committee through a civil action, as specified; and (b) these enforcement provisions do not apply if all contractors and subcontractors performing work on the development are subject to a project labor agreement that requires the payment of prevailing wages to all construction workers employed in the execution of the development and provides for enforcement of that obligation through an arbitration procedure.

22) Provides that the requirement that the employer pay prevailing wages does not apply to those portions of development that are not a public work if otherwise provided in a bona fide collective bargaining agreement covering the worker;

23) Provides that for a development of 50 or more housing units, the development proponent must require in contracts with construction contractors, and must certify to the local government, that each contractor of any tier who will employ construction craft employees or will let subcontracts for at least 1,000 hours must ensure all of the following:
a) A contractor with construction craft employees must either participate in an apprenticeship program approved by the State of California Division of Apprenticeship Standards, as specified, or request the dispatch of

apprentices from a state-approved apprenticeship program, as specified. A contractor without construction craft employees must show a contractual obligation that its subcontractors meet these requirements.

b) Each contractor with construction craft employees must make health care expenditures for each employee, as specified. A contractor without construction craft employees must show a contractual obligation that its subcontractors comply with this requirement. Qualifying expenditures are credited toward compliance with prevailing wage payment requirements.
c) A construction contractor is deemed in compliance with the requirements of A and B, above, if it is signatory to a valid collective bargaining agreement that requires utilization of registered apprentices and expenditures on health care for employees and dependents; and
d) The development proponent is subject to reporting requirements, as specified.

24) Resolves chaptering conflicts with AB 1743 (McKinnor), AB 2094 (Rivas), and AB 2653 (Santiago).

Background

Housing needs and approvals generally. Every city and county in California is required to develop a general plan that outlines the community's vision of future development through a series of policy statements and goals. A community's general plan lays the foundation for all future land use decisions, as these decisions must be consistent with the plan. General plans are comprised of several elements that address various land use topics. Seven elements are mandated by state law: land use, circulation, housing, conservation, open-space, noise, and safety. Each community's general plan must include a housing element, which outlines a long-term plan for meeting the community's existing and projected housing needs. The housing element demonstrates how the community plans to accommodate its "fair share" of its region's housing needs, which is completed through the RHNA process.

Zoning ordinances generally. Cities and counties enact zoning ordinances to implement their general plans. Zoning determines the type of housing that can be built. In addition, before building new housing, housing developers must obtain one or more permits from local planning departments and must also obtain approval from local planning commissions, city councils, or county board of supervisors. A zoning ordinance may be subject to the California Environmental Quality Act (CEQA) if it will have a significant impact upon the environment. The adoption of ADU ordinances, however, are explicitly exempt from CEQA. There

are also some several statutory exemptions that provide limited environmental review for projects that are consistent with a previously adopted general plan, community plan, specific plan, or zoning ordinance.

In addition, before building new housing, housing developers must obtain one or more permits from local planning departments and must also obtain approval from local planning commissions, city councils, or county board of supervisors. Some housing projects can be permitted by city or county planning staff ministerially or without further approval from elected officials. Projects reviewed ministerially, or by-right, require only an administrative review designed to ensure they are consistent with existing general plan and zoning rules, as well as meet standards for building quality, health, and safety. Most large housing projects are not allowed ministerial review. Instead, these projects are vetted through both public hearings and administrative review. Most housing projects that require discretionary review and approval are subject to review under the CEQA, while projects permitted ministerially generally are not.

Comments

1) *COVID-19 and impacts to brick-and-mortar retail*. According to an April 24, 2020 brief published by McKinsey and Company, the onset of COVID-19 has aggravated the existing challenges that the retail sector faces, including (a) a shift to online purchasing over brick-and-mortar sales; (b) customers seeking safe and healthy purchasing options; (c) increased emphasis on value for money when purchasing goods; (d) movement towards more flexible and versatile labor; and (e) reduced consumer loyalty in favor of less expensive brands.

   With several large retailers such as Neiman Marcus, J.C. Penney, J. Crew, and Pier 1 filing for bankruptcy, store closings have already been announced or are expected in the future. According to the research and advisory firm Coresight Research, 2020 saw the closures of 8,741 stores, and 2021 could bring as many as 10,000 additional closures. The investment firm UBS estimates that by 2025, 100,000 stores in the United States will close as online sales grow from 15% to 25% of total retail sales.

   This bill helps facilitate the production of more housing by providing that specified housing developments would be a use by right in a zone where office, retail, or parking are a principally permitted use. Eligible infill sites must be in an urbanized area or urban cluster, not near a freeway or a, and not adjoined to a site with more than 1/3 of the uses are dedicated to industrial use. Streamlined approval is limited to projects with 100% of the units affordable to lower income families, subject to Mullin densities; approval is not limited to

any specified site size. On sites that are less than 20 acres and on a commercial corridor, mixed income projects are eligible for streamlined approval. These projects must contain at least 15% of the units affordable to lower income renters, or a combination of 8% very low-income and 5% extremely low income, or alternatively, ownership units in which to 15% are affordable to lower income households or 30% are affordable to moderate income households. These projects are subject to specified density requirements depending on the size of the site and size of the commercial corridor, minimum height requirements depending on the size of the commercial corridor, specified setback requirements, and no parking minimums except for bike parking, electrical vehicle equipment or spaces for persons with disabilities. This bill takes effect on July 1, 2023 and will sunset on January 1, 2033.

2) *Senate Appropriations Amendments*. Author's amendments taken in the Senate Appropriations Committee make the following changes:
   a) Imposes a sunset date of January 1, 2033;
   b) Delays the enactment date by 6 months (beginning July 1, 2023);
   c) Requires developers to provide relocation assistance for displaced small businesses;
   d) Directs HCD to perform at least two studies of the outcomes of the bill;
   e) Requires rental projects to include either 15% lower income units or 8% very low and 5% extremely low, and associated conforming changes;
   f) Requires a specified environmental assessment and mitigation of any hazards identified;
   g) Excludes housing within 2,500 feet of an oil or gas extraction facility or refinery;
   h) Allows local governments to adopt an ordinance to implement the bill, which is not subject to CEQA; and
   i) Makes other technical and clarifying changes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- HCD estimates ongoing costs of $204,000 annually for 1.0 PY of staff to coordinate with local governments, provide guidance and technical assistance, and manage enforcement activities. HCD estimates additional costs of $102,000 in contract costs each year in 2023-24 and 2025-25 to develop and revise guidelines for developers and local jurisdictions related to the new streamlining and ministerial approval provisions. (General Fund)

- The Department of Industrial Relations estimates costs of approximately $3.8 million in the first year and $3.6 million annually ongoing for oversight and enforcement activities related to prevailing wage and apprenticeship standards on projects constructed pursuant to the provisions of this bill. There would also be penalty revenue gains, potentially in the hundreds of thousands of dollars annually, to partially offset these costs. Actual costs and penalty revenues would depend upon the number of qualifying projects constructed under this bill and the number of complaints and referrals to the Division of Labor Standards and Enforcement that require enforcement actions, investigations, and appeals. (State Public Works Enforcement Fund)

- Unknown local mandated costs. While the bill could impose new costs on local agencies to revise planning requirements for certain developments, and providing for streamlined and expedited review of those projects, these costs are not state-reimbursable because local agencies have general authority to charge and adjust planning and permitting fees to cover their administrative expenses associated with new planning mandates. (Local funds)

ARGUMENTS IN SUPPORT: According to the author, this bill "combines some of the best ideas advanced in the Legislature over the last several years for promoting affordable housing development with a requirement to create 'high road' jobs. To effectively take on our state's housing issues, I firmly believe we need to do both. This legislation gives us all the opportunity to work together toward our shared goal: Building more affordable housing for struggling Californians, while also growing the thriving, high-wage construction workforce every community needs."

ARGUMENTS IN OPPOSITION: According to the State Building & Construction Trades Council and affiliated groups, they "remain opposed to any effort that would create a statewide right to develop mostly market-rate and luxury housing without, at a very minimum, basic community protections, including the requirement to use a skilled and trained workforce and pay area prevailing wages."

The cities in opposition to this bill argue that it would remove local control and the ability of cities to determine the adequacy of sites for housing and the ability to provide affiliated infrastructure. They also express concern over a potential reduction in tax revenue from the loss of commercial properties.

A coalition of low-income housing and equity organizations are opposed unless amended to (1) provide deeper targeted affordability levels commensurate with the benefits to developers, only grant density bonus benefits if the developer includes additional affordable units, and affordability requirements above existing inclusionary ordinances; (2) limiting the benefits in the bill to high opportunity areas to ensure new development does not exacerbate the risk of gentrification and displacement in vulnerable communities, (3) protect and build upon existing local programs to increase housing production while protecting residents from displacement; and (4) exempt sites with existing small businesses.

SUBJECT: County of Fresno Citizens Redistricting Commission

SOURCE: Dolores Huerta Foundation

DIGEST: This bill establishes the County of Fresno Citizens Redistricting Commission (CFCRC) and requires the CFCRC to establish the supervisorial district lines for Fresno County following the decennial census, as specified.

ANALYSIS:

Existing law:

1) Requires the board of supervisors of each county, following each federal decennial census, to adopt boundaries for all of the supervisorial districts of the county so that the supervisorial districts are substantially equal in population as required by the United States Constitution. Requires population equality to be

based on the total population of residents of the county as determined by the most recent federal decennial census for which specified redistricting data are available, as specified.

2) Requires the board of supervisors to adopt supervisorial district boundaries using a specified criteria and process.

3) Authorizes a county, general law city, school district, community college district, or special district to establish an independent redistricting commission, an advisory redistricting commission, or a hybrid redistricting commission by resolution, ordinance, or charter amendment, subject to certain conditions and as specified.

4) Establishes a procedure for a government of a county to adopt a charter by a majority vote of its electors voting on the question. Generally provides greater autonomy over county affairs to counties that have adopted charters. Provides that counties that have adopted charters are subject to statutes that relate to apportioning population of governing body districts.

5) Establishes a Citizens Redistricting Commission in Los Angeles County and an Independent Redistricting Commission in San Diego County, and charges the commissions with adjusting districts of supervisorial districts after each decennial federal census, as specified.

This bill:

1) Provides for the creation of the CFCRC, and tasks the CFCRC with adjusting the boundary lines of Fresno County's supervisorial districts in the year following the year in which the decennial federal census is taken. Requires the CFCRC to be created no later than December 31, 2030, and in each year ending in the number zero thereafter.

2) Requires the CFCRC to consist of 14 members who meet specified requirements. Requires at least one CFCRC member to reside in each of the five existing county supervisorial districts. Requires the political party preferences of the CFCRC members to be as proportional as possible to the total number of voters who are registered with each political party in Fresno County, or who decline to state or do not indicate a party preference, as determined by registration at the most recent statewide election, as specified.

3) Establishes a process for interested individuals to submit an application to become a CFCRC member, as specified. Creates a process for the county elections official to narrow the application pool, as specified.

4) Requires, at a regularly scheduled meeting of the board of supervisors, the Auditor-Controller of Fresno County to conduct a random drawing to select one commissioner from each of the five subpools established by the county elections official, and to then conduct a random drawing from all of the remaining applicants to select three additional commissioners.

5) Requires the eight selected commissioners to review the remaining names in the subpools of applicants and to appoint six additional applicants to the CFCRC, as specified.

6) Provides the term of office of each member of the CFCRC expires upon the appointment of the first member of the succeeding commission.

7) Requires the board of supervisors to provide for reasonable funding and staffing for the CFCRC. Requires each CFCRC member to be a designated employee for purposes of the conflict of interest code adopted by Fresno County, as specified.

8) Provides that nine members of the CFCRC constitute a quorum and that nine or more affirmative votes are required for any official action.

9) Prohibits the CFCRC from retaining a consultant who would not be qualified as a CFCRC applicant due to any of the disqualifying criteria, as specified.

10) Requires the CFCRC to establish single-member supervisorial districts for the board of supervisors pursuant to a mapping process using a specified criteria and requirements. Requires the CFCRC to adopt a redistricting plan adjusting the boundaries of the supervisorial districts and to file the plan with the county elections official by the map adoption deadline set forth in existing law for county supervisorial maps, as specified. Requires the CFCRC to issue, with the final map, a report that explains the basis on which the CFCRC made its decisions in achieving compliance with the specified criteria and requirements provided by this bill.

11) Requires the CFCRC, prior to drawing a draft map, to conduct at least seven public hearings, to take place over a period of no fewer than 30 days, with at least one public hearing held in each supervisorial district, as specified.

12) Requires the CFCRC, after drawing the draft maps, to post the map for public comment on Fresno County's website and conduct at least two public hearings to take place over a period of no fewer than 30 days.

13) Requires the CFCRC to establish and make available to the public a calendar of all public hearings, requires the hearings to be scheduled at various times and days of the week to accommodate a variety of work schedules to reach as large an audience as possible, and requires the CFCRC to arrange for the live translation of a hearing if requested, as specified. Requires the CFCRC to post the agenda for the public hearings at least seven days before the hearings. Requires the agenda for a meeting conducted after the CFCRC has drawn a draft map to include a copy of that map.

14) Requires the CFCRC to take steps to encourage county residents to participate in the redistricting public review process, as specified.

15) Requires the board of supervisors to take steps necessary to ensure that a complete and accurate computerized database is available for redistricting, and that procedures provide the public with access to redistricting data and software equivalent to what is available to the CFCRC members, as specified.

16) Requires all records of the CFCRC relating to redistricting, and all data considered by the CFCRC in drawing a draft map or the final map, to be public records.

17) Provides for various prohibitions for CFCRC members beginning from the date of appointment to the CFCRC, as specified.

18) Makes findings and declarations that a special law is necessary because of the unique circumstances facing Fresno County.

Background

Local Redistricting and Previous Legislation. Prior to 2017, state law generally permitted a county or a city to create an advisory redistricting commission, but did not expressly permit local jurisdictions to create commissions with the authority to establish district boundaries. The authority to establish district boundaries for a

local jurisdiction generally was held by the governing body of that jurisdiction. Additionally, while charter cities could establish redistricting commissions that had the authority to establish district boundaries, charter counties did not have that authority in the absence of express statutory authorization.

In 2016, the Legislature passed and Governor Brown signed SB 1108 (Allen, Chapter 784, Statutes of 2016). SB 1108 permitted a county or a general law city to establish an advisory or independent redistricting commission, subject to certain conditions. SB 1108 generally provided cities and counties with the discretion to determine the structure and membership of an advisory or independent redistricting commission. However, it did establish minimum qualifications for commission membership. While SB 1108 imposed few restrictions and requirements on advisory commissions, it did subject members of independent commissions to extensive eligibility requirements and post-service restrictions.

At the same time that SB 1108 was being considered in the Legislature, SB 958 (Lara, Chapter 781, Statutes of 2016) was signed into law and required the establishment of a Citizens Redistricting Commission in Los Angeles County and charged it with adjusting the boundaries of supervisorial districts after each decennial federal census, as specified.

In 2017, the Legislature approved and Governor Brown signed AB 801 (Weber, Chapter 711, Statutes of 2017) replaced San Diego County's Independent Redistricting Commission established by SB 1331 (Kehoe, Chapter 508, Statutes of 2012) with a commission similar to the commission established by SB 958.

In 2018, the Legislature passed and Governor Brown signed SB 1018 (Allen, Chapter 462, Statutes of 2018). SB 1018 extended the authority to adopt redistricting commissions to school districts, community college districts, and special districts. SB 1018 also allowed for the creation of hybrid commissions where a commission recommends to a legislative body multiple maps for that legislative body and legislative body must adopt one of those maps without modification, unless certain conditions are met. Furthermore, SB 1018 relaxed some of the eligibility requirements for members of independent commissions and eased one of the post-service restrictions on those members in an effort to expand the pool of individuals who are available to serve on such commissions.

Who Draws the Lines in Fresno County? The Fresno County Board of Supervisors is charged with redrawing the boundary lines for supervisorial districts after each decennial federal census using specified criteria outlined in existing law.

According to the Fresno County's website, Fresno County established an Advisory Redistricting Commission (ARC) for the 2021 redistricting process that was responsible for developing the 2021 decennial redistricting map recommendations for consideration by the Fresno County Board of Supervisors. The ARC held public hearings to receive public input, drafted proposed maps, and presented their recommendations for the Fresno County Board of Supervisors to consider before adopting the final redistricting maps.

Comments

1) According to the author, Assembly Bill 2030 will put Fresno voters first by removing the inherent conflict of interest when Board of Supervisors are involved in decisions on redrawing political district lines. AB 2030 will establish the County of Fresno Citizens Redistricting Commission to draw district boundaries and create a truly independent process in the next redistricting cycle in 2030.

   The need for AB 2030 was evidenced in the public outcry during the process of redrawing district lines in Fresno County. Although an advisory committee was appointed by the Board of Supervisors, many aspects of the process continued to have evidence of political influence.

Related/Prior Legislation

AB 1307 (Cervantes, 2022) creates a Citizens Redistricting Commission in Riverside County, as specified.

AB 2494 (Salas, 2022) creates a Citizens Redistricting Commission in Kern County, as specified.

SB 1269 (Allen, 2022) makes various changes to the composition and operations of the Los Angeles County Citizens Redistricting Commission.

SB 139 (Allen, 2019) would have required a county with a population of 400,000 or more to establish an independent redistricting commission to adopt the county supervisorial districts after each federal decennial census, as specified. This would have included Fresno County. Governor Newsom vetoed SB 139 stating, in part:

> *While I agree these commissions can be an important tool in preventing gerrymandering, local jurisdictions are already authorized to establish*

independent, advisory or hybrid redistricting commissions. Moreover, this measure constitutes a clear mandate for which the state may be required to reimburse counties pursuant to the California Constitution and should therefore be considered in the annual budget process.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- This bill would not have a fiscal impact to the Secretary of State's Office.

- By requiring Fresno County to create and operate a redistricting commission as specified, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on Fresno County, the County could claim reimbursement of those costs (General Fund). The magnitude of these costs is unknown, but minimally in the hundreds of thousands on a decennial basis.

OPPOSITION: (Verified 8/12/22)

California State Association of Counties
County of Fresno

ARGUMENTS IN SUPPORT: In a letter supporting AB 2030, the California Labor Federation states, in part, the following:

District maps should be drawn by an independent commission to help eliminate potential biases. The current system allows whatever political party is in power at the time to manipulate the map to favor their own candidates. Letting

politicians redraw their own district boundaries is a gross conflict of interest, and yet it is perfectly legal.

In our elections, every voice should be heard, and every vote should count equally. AB 2030 will ensure that the voices in Fresno County accurately reflect the community and that the supervisorial districts are drawn fairly.

ARGUMENTS IN OPPOSITION: In a letter opposing AB 2030, the County of Fresno states, in part, the following:

AB 2030 proposes to usurp local control and discretion of the County of Fresno's elected representatives, while other counties with similar demographics and population base would maintain local control and discretion over the redistricting process. Existing law already provides local jurisdictions with the option of establishing an independent redistricting commission to change district boundaries. Future elected representatives should be allowed to exercise their discretion to establish a redistricting process that meets the particular needs of the County and reflects local priorities and the values of all County residents.

SUBJECT: University of California, Merced, and University of California, Riverside

SOURCE: Author

DIGEST: This bill requires moneys appropriated by the Legislature in the annual Budget Act during the 2022-23 to 2024-25 fiscal years to directly support campus expansion projects and University of California (UC) climate initiatives at the UC, Riverside (UCR) and the UC, Merced (UCM) supplement and not supplant any current or future funding.

Senate Floor Amendments of 8/22/22 remove provisions that establish an independent fund for purposes of allocating moneys to UC for projects at UCR and UCM, and instead provide for a direct appropriation from the Budget Act made for these purposes comply with the bill's provisions.

ANALYSIS:

Existing law:

1) Establishes the UC as a public trust to be administered by the Regents of the UC; and, grants the Regents full powers of organization and government,

subject only to such legislative control as may be necessary to insure security of its funds, compliance with the terms of its endowments, statutory requirements around competitive bidding and contracts, sales of property and the purchase of materials, goods and services (Article IX, Section (9)(a) of the California Constitution).

2) Authorizes the UC to proceed with General Fund capital expenditures, as specified, upon signed certification that during the subsequent fiscal year and each year thereafter, that all cleaning, maintenance, grounds keeping, food service or other work traditional performed are by UC employees at each facility, building or property. This excludes construction work and other types of work, including carpentry, electrical, plumbing, glazing, painting and other craft work designed to preserve, protect or keep facilities in a safe and usable condition. Current law also specifies that starting with the 2021-22 fiscal year, the Department of Finance shall approve each new and ongoing capital expenditure only after the UC has demonstrated compliance with the above. (EC Section 92495 et. al.)

This bill:

1) Requires moneys appropriated by the Legislature in the annual Budget Act during the 2022-23 to 2024-25 fiscal years to directly support one or both of the following at UCR, and UCM supplement and not supplant any current or future funding:

   a) Campus expansion projects, which may include, but are not limited to, related capital projects.

   b) UC climate initiatives, which may include, but are not limited to, related capital projects.

2) Provides that projects that receive funding, pursuant to the bill, are a public work for which prevailing wages shall be paid.

3) Requires, for projects that receive funding, as provided, the UC obtain an enforceable commitment from any contractor performing work in an apprenticeable occupation in the building and construction trades that the contractor and its subcontractors at every tier will individually use a skilled and trained workforce to complete the work. This bill provides that this is not applicable if all contractors and subcontractors at every tier performing the work will be bound by a project labor agreement that requires the use of a

skilled and trained workforce and provides for enforcement of that obligation through an arbitration procedure.

4) Authorizes the use of moneys appropriated pursuant to the bill for capital expenditures or projects only if, for any affected project, facility, building, or other property, the UC complies with the specified requirements in current law relative to UC employees.

5) Requires, commencing July 1, 2023, UC submit an annual report to the Legislature and the Department of Finance on the amount of moneys allocated, pursuant to the bill, to UCR, and UCM, how these funds were used, and outcomes resulting from the use of these funds.

Comments

1) *Need for this bill.* According to the author, "California is the fifth largest economy, but these economic benefits are not shared equally by all regions of the state. Most notably, the Inland Empire and Central Valley are among the lowest in educational attainment levels and per capita income. A timely, transformational investment at UC's two most diverse campuses –UCR and UCM – is key to spurring economic development in the Inland Empire and San Joaquin Valley."

   The author further states "Through AB 2046, California will expand access to medical education, healthcare, and advance climate change solutions."

2) *Use of funds*. This bill seeks to support campus expansion projects and climate initiatives at two UC campuses. This bill's legislative findings and declarations provide some direction around the desired outcomes for these funds such as, accelerating economic development and innovation in the areas of air pollution, clean technology, and sustainable agriculture, and significantly improving health outcomes in Inland Empire and central valley as a means of increasing overall equity and per-capita income in these regions of the state. UC is required to report on how funds are ultimately used.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, while this bill's provisions would be subject to an appropriation, it could result in General Fund costs pressures ranging from the tens of millions to low hundreds of millions of dollars each year to fund campus expansion projects and climate initiatives at UCR and UCM.

The 2022 Budget Act includes one-time funds of $51.5 million for UCR and $31.5 million for UCM to support campus expansion projects, with legislative intent that these amounts be provided in the Budget Act of 2023 and the Budget Act of 2024 to support these projects. The 2022 Budget Act provides additional one-time funds of $47 million for UCR and $18 million for UCM to support climate initiatives at those campuses.

SUBJECT: Bar pilots: pilotage rates

SOURCE: Cruise Lines International Association
Pacific Merchant Shipping Association
San Francisco Bar Pilots Author

DIGEST: This bill revises and recast the current pilot boat surcharge provisions, including specifying that the costs of obtaining new pilot boats includes preliminary design and engineering and the costs of repowering existing pilot boats or the acquisition of new pilot boats in order to meet the requirements of any rule governing the emissions of commercial harbor craft adopted ty the California State Air Resources Board (CARB), as specified.

Senate Floor Amendments of 8/22/22 make technical and clarifying changes.

ANALYSIS:

Existing law:

1) Establishes the Board of Pilot Commissioners (Board) for the Bays of San Francisco, San Pablo, and Suisun for the purpose of regulating bar pilotage.

2) Prescribes the rates of bar pilotage required to be charged by pilots and paid by vessels inward and outward bound through the above mentioned bays.

3) Requires the Board to recommend that the Legislature, by statute, adopt a schedule of pilotage rates providing fair and reasonable return to pilots engaged in movements other than bar pilotage.

4) Imposes a board operations surcharge of up to 7.5% of all pilotage charges, which is paid by pilots to the Board.

5) Imposes, among other things, an incremental rate of additional mills per high gross registered ton as is necessary and authorized by the Board to recover a pilot's costs of obtaining new pilot boats and of funding design and engineering modifications.

6) Requires all moneys received by the Boar to be paid into the State Treasury to the credit of the Board's Special Fund, moneys in which are continuously appropriated for the payment of the compensation and expenses of the Board and its officers and employees.

7) Requires the Board, from time to time, to review pilotage expenses and establish guidelines for the evaluation and application of these expenses regarding its recommendations for adjustment rates.

8) Authorizes party directly affected by pilotage rates to petition the Board for a public hearing, as prescribed.

9) Provides that a pilot who is carried to sea against the pilot's will or unnecessarily detained on board a vessel, as provided, is entitled to receive $600 per day, plus expenses, from the owner, operator, or agents of the detaining vessel.

This bill:

1) Revises and recasts the current pilot boat surcharge provisions, including specifying that the costs of obtaining new pilot boats includes preliminary design and engineering and the costs of repowering existing pilot boats or the acquisition of new pilot boats in order to meet the requirements of any rule governing the emissions of commercial harbor craft adopted ty the State Air Resources Board.

2) Imposes related requirements on the Board, including, among others, auditing or causing to be audited all pilot boat surcharges.

3) Authorizes the pilot boat surcharge to be collected prospectively before the imposition of certain costs, as prescribed.

4) Authorizes the Board to adjust the amount of the surcharge as necessary to efficiently administer the pilot boat surcharge.

5) Requires the moneys charged and collected each month from the pilot boat surcharge to be paid to the Board Special Fud and used credited to the Pilot Boar Surcharge Account (Account), which the bill would establish in the Board's Commissioners' Special Fund.

6) Continuously appropriates the moneys in the Account to fund the pilot boat costs of obtaining new pilot boats and funding design and engineering modifications for the purpose of extending the service of existing pilot boats, except as prohibited.

7) Establishes maximum expenditure levels, as specified, at specified monetary amounts for the Account based on fiscal year.

8) Increases the rates of bar pilotage required to be charged by pilots and paid by vessels to a minimum of $3,000 on and after January 1, 2024, for each vessel piloted.

9) Increases pilotage rates providing fair and reasonable return to pilots engaged in movements other than bar pilotage by 15% on January 1, 2023, except as otherwise established by the bill for certain types of ship movements, and would delete the requirement that the Board recommend a schedule of those pilotage rates by the legislature.

10) Establishes, in addition to other charges for pilotage, temporary transit charges at specified amounts for all vessels moved across the bar, with specified exceptions, and for all bay moves and river moves.

11) Makes inoperative the temporary transit charges as of the date the Boar publishes the first pilotage tariff pursuant to the provisions of this bill.

12) Repeals current provisions in law that requires Board, from time to time, to review pilotage expenses and establish guidelines for the evaluation and application of these expenses regarding its recommendations for adjustment rates and that authorizes party directly affected by pilotage rates to petition the Board for a public hearing, as prescribed.

13) Requires the Board, pursuant to prescribed procedures, to adopt, and caused to be published, a pilotage tariff that establishes fair, just, reasonable, and sufficient rates for the provision of a safe, competent, reliable, and efficient pilotage service.

14) Establishes procedures to request a change in the established pilotage rates, including procedures for petitions, notice, comment, hearings and orders, and review.

15) Authorizes the adopted pilotage tariff to include the reasonable costs for the setting of tariff rates of the Office of Administrative Hearings and would require those moneys to be paid into, and continuously appropriated from, the Board Commissioners' Special Fund.

16) Provides that pilotage rates imposed pursuant to specified existing law are subject to adjustments, as specified.

17) Requires the Board, after the adoption of the first pilotage tariff, to convene a committee to review the effectiveness of the revised rate setting process and to present and submit a related report to the Legislature, the Governor, and the Secretary of Transportation, as specified.

18) Changes the amount for when a pilot who is carried to sea against the pilot's will or unnecessarily detained on board a vessel, as provided, is entitled to receive $600 per day, plus expenses to $5,000 per day plus expenses.

19) Contains an urgency statute.

Background

Purpose of this bill. According to the author's office, "AB 2056 revises and recasts the pilot boat surcharge to meet the requirements of CARB emission regulations. By authorizing these surcharges, this will ensure that pilot vessels are able to meet the proposed Commercial Harbor Craft (CHC) regulation amendments, whilst contributing to the state's overall emission reduction goals. Additionally, AB 2056 makes several changes to the pilot boat surcharge to streamline and ensure fiscal stability for San Francisco Bar Pilots whilst ensuring that rates are fair and reasonable whilst not being unduly burdensome for oceangoing vessels."

The Board of Pilot Commissioners. The Board is the oversight body that licenses and regulates approximately 60 maritime pilots who make up the San Francisco Bar Pilots. The Board was established in California's first Legislative Session and has been in continuous existence since 1850. The Board is a "tax neutral" agency as all of its expenses are paid for by the shipping industry through surcharges on pilotage fees and not by state or local taxes.

Specifically, San Francisco bar pilots are responsible for steering large commercial vessels through the Golden Gate of San Francisco Bay and adjoining navigable waters, which include San Pablo Bay, Suisun Bay, the Sacramento River, and associated tributaries. When a vessel arrives at a point eleven miles west of the Golden Gate Bridge, a San Francisco bar pilot boards the ship, takes navigational control, and guides the ship to its berth. The same process occurs in reverse as ships depart from the San Francisco Bay. The San Francisco bar pilot's primary function is to ensure that large commercial vessels are navigated safely through the San Francisco Bay's confined waters. They provide service for all types of commercial vessels, from 100-foot tugs to 1000-foot supertankers.

CARB Regulations. CARB adopted the Airborne Toxic Control Measure for Diesel Engines on CHC in 2008 to reduce emissions of diesel particulate matter, oxides of nitrogen, and reactive organic gases from diesel engines used on commercial harbor craft operated in regulated California waters. CARB amended the original regulation in 2010 to include additional vessel categories, including crew and supply, barge, and dredge vessels. The current regulation will be fully implemented by the end of 2022. At the end of 2021, CARB proposed to amend the current regulation to further reduce emissions from harbor craft in impacted communities.

The proposed regulations accelerate the bar pilots' new build program to a schedule that requires the construction of three vessels by year-end 2024, one by year-end 2025 and one by year end 2028. Compliant equipment adds an additional $10.5 million in construction costs resulting in a $45 million build program.

Current law provides for cost recovery of acquisition or life-extension modifications to pilot boats through the imposition of a pilot boat surcharge. The pilot boat surcharge was established to be recovered upon completion of delivery of the new boats. Delivery is required prior to setting an actual amount to be recovered or a timeframe for recovery. This process is administered by the Board per a regulatory process that includes industry participation and oversight, and has been used for the past two decades with little controversy and pilot-industry collaboration.

According to the author, "this bill authorizes the [Board] to adjust the pilot boat surcharge to include the costs associated with the acquisition of new pilot boats or repowering existing boats in order to meet CARB emissions requirements. By authorizing these surcharges, this will ensure that pilot vessels are able to meet the proposed commercial harbor craft amendments, whilst contributing to the state's overall emission reduction goals."

Rate setting Reform. AB 2056 reflects a compromise between the San Francisco Bar Pilots, the Pacific Merchant Shipping Association, the Western States Petroleum Association, and the Cruise Lines International Association. After many failed attempts, it became clear that no new rates would be likely to pass the Legislature without consensus from all the stakeholders mentioned above.

The new rate setting process established by this bill removes the Legislature and establishes an independent administrative process similar to processes in other states like Oregon and Washington. The new process would be conducted by an independent Administrative Law Judge (ALJ) with review and oversight by the Board. The rate determination would be formulaic and would include evidentiary proceedings involving impacted parties. The ALJ's rate order would be considered final and only under certain circumstances can the Board make technical changes or refer elements to the ALJ for further review or reject the order in its entirely.

According to supporters, "the new process emphasizes that joint petitions and stipulated agreements are preferred and is stakeholder driven."

Rate Charges & Temporary Transit Fees. The bill also increase various charges that have not been revised since 2006 and institutes a set of temporary transit fees (TTF), considered to be extraordinary in the wake of the COVID-19 pandemic and

resulting supply chain crisis. These fees were negotiated by all parties and represent the first major consensus on rate increases in the SF Bay for pilotage in 15 years.

The TTFs will range from $1,000 to $750, depending on the vessel type and destination with the pilot's service area. These TTFs are specified as short-term and pandemic related revenue measures and are required to sunset when new pilot rates are established under the process described above. Regarding the changes in the inland rates and minimum charges across the bar, these are proposed to be revised similar to the consensus revisions included in AB 807 (Grayson, Chapter 172, Statutes of 2021) which were approved by the Legislature last year.

According to supporters of this bill, "by revising these rates to be compensatory such that they reflect the actual minimum costs of providing service by pilots. This in turn eliminates ratepayer and industry cross-subsidization within the system."

Related/Prior Legislation

AB 807 (Grayson, Chapter 172, Statutes of 2021) deleted the authority of the Board to adjust pilotage fees due to catastrophic cost increases and instead required a surcharge to be imposed per each movement of a vessel as is necessary and authorized by the Board to recover the cost of the pilot associated with a catastrophic event, as specified.

AB 1432 (Bonta, Chapter 119, Statutes of 2016) authorized, until January 1, 2021, a technology surcharge, not to exceed a cumulative amount of $1.2 million, to recover a pilot's costs for the purchase or lease of navigation hardware and software to enhance navigation safety.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown, potentially significant fiscal impact to the Board of Pilot Commissioners (BOPC) (BOPC's Special Fund). This includes:

- One-time cost in the hundreds of thousands of dollars for activities related to rulemaking for the adoption of the new tariff. This would include staff time and resources to hold public meetings and review and collect stakeholder feedback.
- One-time cost to convene the committee and create and submit the required rate setting report.

- Ongoing, but not annual costs in the mid-tens of thousands of dollars to facilitate rate setting hearings with an Administrative Law Judge. These costs will materialize only in the event that rates will need to be adjusted.
- Ongoing administrative costs in the tens of thousands of dollars annually related to auditing and accounting activities.

BOPC's administrative costs and expenses are covered by an existing indirect surcharge of five percent on all moneys collected on various fees paid by harbor crafts and the BOPC does not receive any state or General Fund moneys. To the extent that the above workload related to new activities required in the bill is not absorbable within BOPC's existing resources, additional staff or resources may be required. For context the 2022-23 Budget includes 4.0 PYs for the BOPC with a total budget of approximately $3.1 million.

Unknown, ongoing increased revenue in the millions of dollars from increased pilotage fees and surcharges, to be deposited into the newly created Pilot Boat Surcharge Account and BOPC's Special Fund.

SUPPORT: (Verified 8/12/22)

Cruise Lines International Association (co-source)
Pacific Merchant Shipping Association (co-source)
San Francisco Bar Pilots (Co-source)

OPPOSITION: (Verified 8/12/22)

None received

ARGUMENTS IN SUPPORT: According to supporters of the bill, "the proposed [CARB] regulations accelerate our [the Bar pilots'] build program to a schedule that, as a practical matter, is unattainable; requiring the construction of three vessels by year-end 2024, one by year-end 2025 and one by year end 2028. Schedule and sourcing challenges aside, compliant equipment adds additional $10.5 million in construction costs, 25% higher, resulting in a $45 million program that creates significant financial hurdles given all these constraints. AB 2056 will specifically include the cost of the updated regulation and new build program for pilot boats in the existing Pilot Boat Surcharge."

Additionally, supporters of the bill argue that "the compromise reached in AB 2056 would implement changes to the rate setting process and remove the Legislature from decisions by establishing and independent administrative process built around the Oregon and Washington models. As a result, the new proposed

process would be conducted by an ALJ with review and oversight by the Board. The rate determination will be formulaic and will include evidentiary proceedings involving impacted parties."

SUBJECT: Department of Transportation: goods movement data

SOURCE: Author

DIGEST: This bill requires the California State Transportation Agency (CalSTA) to collect and consolidate data related to goods movement in the transportation supply chain from specified sources.

Senate Floor Amendments of 8/25/22 replace CalSTA with the California Department of Transportation and eliminate the requirement that the Labor Commission shall have access to data from the Department of Industrial Relations.

ANALYSIS:

Existing law:

1) Requires the South Coast Air Quality Management District (SCAQMD) to adopt a plan to achieve and maintain the state and federal ambient air quality standards for the South Coast Air Basin. Authorizes SCAQMD to adopt indirect sources in those areas of the district in which there are high-level, localized concentrations of pollutants or with respect to any new source that will have a significant effect on air quality in the South Coast Air Basin.

2) Requires the State Air Resources Board (CARB), in consultation with the Bureau of Automotive Repair and the Department of Motor Vehicles, to adopt and implement a regulation for a Heavy-Duty Vehicle Inspection and Maintenance Program for non-gasoline heavy-duty on-road motor vehicles that weigh more than 14,000 pounds.

3) Requires owners of heavy duty diesel drayage trucks that transport cargo to and from California ports and rail yards to register in the Drayage Truck Registry with CARB.

4) Provides for CARB to administer programs, such as the Hybrid and Zero Emission Truck and Bus Voucher Program (HVIP) and the Carl Moyer Program, to subsidize the purchase of clean medium- and heavy-duty trucks, including drayage trucks.

This bill:

1) Requires California Department of Transportation (Caltrans) to create a page on its website that contains links to existing registries and databases related to drayage trucks from all the following sources:

   a) The CARB online truck reporting systems.

   b) The Port Drayage Truck Registry that is part of the Clean Trucks Program at the Port of Los Angeles and Port of Long Beach.

   c) Data maintained by the California Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project regarding drayage truck subsidy recipients.

   d) Truck make and model reported pursuant to the SCAQMD Warehouse Indirect Source Rule.

e) Compliance status of trucks under the Heavy-Duty Vehicle Inspection and Maintenance Program.

f) Data from ports and the Department of Industrial Relations (DIR), as specified below, and other data related to drayage trucks, as specified.

2) Requires all maritime ports with annual cargo volumes of greater than one million 20-foot equivalent units to anonymously survey trucking companies every two years on the number of drivers classified as independent contractors and the number of drivers classified as employee drivers.

3) Requires DIR to provide to Caltrans links to existing public registries and databases related to drayage trucks. As well as links to public databases that may include information related to employers who are committing workers' compensation fraud or information on health and safety enforcement activity.

Comments

1) *Author's Statement*. "California is home to some of the largest and busiest ports in the nation and can lead in the effort to improve data and transparency. Trucks and truck drivers are a key part of the logistics chain at the ports, yet there is no central entity tracking data on the number of trucks dispatched by each company, the types of vehicles (ZEV) used, job quality, employment status, and other data points. AB 2057 would increase transparency in the goods movement and transportation supply chain by allowing for data sharing with relevant state agencies to increase supply chain resilience and sustainability. Recent supply chain delays highlight the struggle to maintain efficient goods movement at our nation's ports. President Biden's infrastructure plan will invest billions on modernizing ports and his Administration has called for increased transparency and data collection to improve efficiency and identify bottlenecks. This bill attempts to do just that."

2) *Which Ones?* This bill requires large ports to anonymously survey trucking companies every two years on the number of drivers classified as independent contractors and the number classified as employee drivers. The threshold of one million 20-foot equivalent units limits this to the Ports of Los Angeles, Long Beach and Oakland. This bill provides that the ports shall not condition entry into their facilities on the basis of survey responsiveness by the trucking company or on the information provided by that company.

3) *What Data*? This bill requires Caltrans to consolidate and display data from a variety of government sources on its website. This data should already be

available from the agencies administering the referenced programs. Therefore, it should not be proprietary nor should it be expensive to gather and consolidate. Perhaps clever data scientists will be able to deduce which, if any, trucking companies are misclassifying their drivers based on this data and the port surveys required by this bill.

4) *Opposition Addressed*. The opponents raised concerns about the prior version of this bill. The current version of this bill addresses their concerns and the opposition has been removed.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Unknown minor to moderate CalSTA costs, depending on the details of implementation, including the amount and size of data and the frequency of reporting information to the Agency. Costs to simply post lists and links to existing data would likely be minor, but CalSTA indicates that updating data more frequently may require additional staff resources to compile, format, and post information on a regular basis. (State Highway Account)

- DIR estimates costs of approximately $1.26 million in the first year and $1.19 million ongoing for 6.0 PY of staff for the Division of Labor Standards and Enforcement (DSLE) to collect, compile, vet, and to quarterly post specified data on its website. There would be additional estimated costs of approximately $112,000 in the first year and $68,000 ongoing for the Division of Occupational Safety and Health to verify and compile data. DIR indicates that there could be additional significant costs, to the extent DSLE were required to act as a data-clearance agency to ensure the reliability and accessibility of the data. (General Fund)

- Unknown, potentially significant mandated local costs for maritime ports to conduct specified biennial surveys of trucking companies. Staff assumes that these costs would not be state-reimbursable because ports have general authority to charge fees on port users to offset administrative and operating costs. (local costs)

SUBJECT: Transportation electrification: electric vehicle charging infrastructure

SOURCE: ChargeHelp!
FLO

DIGEST: This bill requires the California Energy Commission (CEC) to establish definitions to calculate the "uptime" during which an electric vehicle (EV) charger is operational. This bill also requires the CEC to adopt reporting and recordkeeping requirements for public and ratepayer-funded chargers to assess the uptime and accessibility of these chargers. This bill also authorizes the CEC to adopt certain tools to encourage EV charger reliability.

Senate Floor Amendments of 8/23/22 require the CEC to adopt definition of terms it will use to calculate EV charger uptime and adopt recordkeeping and reporting requirements for ratepayer- and publicly-funded chargers. The amendments make

adoption of tools to improve charger accessibility permissive instead of mandatory and sunset this bill on January 1, 2035.

ANALYSIS:

Existing law:

1) Establishes the Clean Transportation Program (CTP), which is administered by the CEC to provide grants, loans, and other funding opportunities to projects that develop and deploy alternative and renewable fuels, zero-emission vehicle (ZEV) infrastructure and technologies, programs that help commercialize ZEV and alternative fuel vehicles and workforce development projects that transition workers from fossil fuel industries to clean transportation jobs. (Health and Safety Code §44272 et. seq.)

2) Allocates a portion of smog abatement fees to fund the CTP and sunsets the fee on January 1, 2024. (Health and Safety Code §44060.5)

3) Requires the CEC to assess whether charging station infrastructure is disproportionately deployed by population density, geographical area, or population income level, including low-, middle-, and high-income levels. To the extent that the CEC finds that charging infrastructure in inequitably distributed, the CEC must target CTP funding opportunities to address identified disparities. (Public Resources Code §25231)

4) Requires the CEC to conduct a statewide assessment every two years of EV charging infrastructure needed to support the levels of EV adoption required for the state to meet its goals of putting at least five million ZEVs on California roads by 2030, and of reducing emissions of greenhouse gases (GHG) to 40 percent below 1990 levels by 2030. (Public Resources Code §25229)

5) Authorizes the California Air Resources Board (CARB) to adopt interoperability billing standards for EV charging stations' network roaming payment methods if a national standards organization has not adopted similar standards by January 1, 2015. If CARB adopts interoperability billing standards, all EV chargers requiring payment for use must meet those standards within a year. Any standards adopted by CARB must consider other governmental or industry-developed interoperability billing standards, and CARB may adopt standards developed by an outside authoritative body. (Health and Safety Code §44268.2)

This bill:

1) Requires the CEC to conduct a public workshop process to define "uptime" for the purpose of calculating when an EV charger is operational and functioning. This bill specifies factors the CEC must consider when developing this uptime definition.

2) Requires the CEC to adopt uptime recordkeeping and reporting requirements, which must do all the following:

   a) Apply only to EV chargers that received a public- or ratepayer-funded incentive.
   b) Apply for at least six years – or a longer period determined by the CEC.
   c) Apply to EV chargers installed on or after January 1, 2024.

3) Authorizes the CEC to adopt different recordkeeping and reporting requirements for different types of charging stations, including, but not limited to, non-networked charging stations, different levels of charging stations, and mobile solar charging stations. This bill enables the CEC to reduce reporting requirements until feasible and cost-effective reporting mechanisms are established.

4) Exempts charging stations at residential properties with four or fewer dwelling units from this bill's reporting requirements.

5) Requires the CEC to work with the California Public Utilities Commission (CPUC) to determine what events make a charger inoperable, constituting excluded time that is exempt from the calculation of a charger's uptime, including events that are beyond the charger operator's control.

6) Requires the CEC, starting January 1, 2025, to conduct a biennial assessment of EV chargers, which must include the following:

   a) An assessment of the uptime of EV charging infrastructure
   b) An assessment of equitable access to reliable charging stations based on community income.
   c) The ability of companies submitting information to request that the CEC keep submitted data confidential.

7) Authorizes the CEC to adopt additional tools to encourage uptime, including operations and maintenance standards and incentives, uptime requirements, and operation and maintenance requirements.

8) Sunsets this bill on January 1, 2035.

Background

ZEV deployment goals have accelerated, emphasizing the need for infrastructure. In recent years, California has accelerated its goals for ZEV adoption. Existing law establishes a goal of putting at least five million ZEVs on state roads and reducing GHG emissions to 40 percent below 1990 levels by 2030. In January 2018, Governor Brown issued Executive Order B-48-18, which established a goal of installing 200 hydrogen-fueling stations and 250,000 battery-electric vehicle chargers, including 10,000 direct-current fast chargers, by 2025. In September 2020, Governor Newsom issued Executive Order N-79-20, which established a goal that 100 percent of in-state sales of new passenger cars and trucks will be zero emission by 2035. The order also stated the goal that 100 percent of medium- and heavy-duty vehicles in the state be zero emission by 2045 for all operations where feasible.

ZEV adoption influences the availability of charging and refueling infrastructure, and infrastructure availability influences ZEV adoption. Generally, a higher ZEV adoption rate corresponds with greater investments in infrastructure for those ZEVs. The absence of needed infrastructure can discourage ZEV purchases and the decline in purchases further disincentives the deployment of infrastructure. To the extent that California intends to reach its ZEV adoption goals, the state will need to make a commensurate effort to deploy infrastructure to ensure that drivers are incentivized to use ZEV vehicles.

Bill addresses lack of data about EV charger reliability. As part of its duties to assess opportunities to encourage EV adoption and more equitable distribution of EV chargers, the CEC has opened a proceeding (Docket 21-TRAN-03) to assess zero emission vehicle infrastructure barriers and opportunities. In March 2022, the CEC held a workshop and solicited comments from stakeholders about barriers to EV adoption and issues the CEC should address in its Zero Emission Vehicle Infrastructure Plan. Stakeholders identified a variety of barriers to EV adoption and opportunities to incentivize adoption. Several of these stakeholders, including companies that provide software and hardware management services for EV charger providers, identified EV charger outages as a barrier to consumer confidence in EV charging. These stakeholders have recommended that the CEC

to develop reliability standards for EV chargers to ensure that fewer service outages occur.

In April 2022, the CEC released its draft staff report for the Zero Emission Vehicle Infrastructure Plan. While the plan acknowledges that state agencies and private entities need to collaborate to address the reliability of EV infrastructure, the plan does not identify downtime barriers directly related to EV chargers. The CEC's report primarily identifies downtime and station reliability as a concern for hydrogen fuel cell electric vehicle (FCEV) adoption.

Anecdotally, EV charger outages may be a barrier for EV use; however little data has been collected to identify the extent to which these outages deter EV adoption. While some chargers my experience outages due to factors outside a provider's control (e.g. vandalism, electric power outages, accidents), other charger outages may be caused by a lack of maintenance. An April 2022 report by researchers at the University of California at Berkeley indicates that charger outages and malfunctions reduce charger availability significantly. The report studied all publicly accessible direct current fast chargers (DCFCs) in the greater Bay Area and found that only 72.5 percent of the chargers had functional electric vehicle service equipment (EVSE). The report states that the following were causes of nonfunctional DCFCs in the study: "The cable was too short to reach the EV inlet for 4.9 percent of the EVSEs. Causes of 22.7 percent of EVSEs that were non-functioning were unresponsive or unavailable screens, payment system failures, charge initiation failures, network failures, or broken connectors." Without more information about the reasons for outages, it is not clear how widespread these outages are and how they can be avoided. To the extent that this bill provides the CEC with sufficient data to identify outages that could be avoided, this bill may improve transparency about EV outages.

Bill focuses on state and ratepayer EV charger investments. This bill's data reporting requirements apply only to entities that receive state or ratepayer funds to deploy chargers. State and ratepayer funded chargers comprise a significant number of publicly available chargers and chargers at certain workplaces and residential locations. This bill exempts chargers at residences with four or fewer units from the data reporting requirements. However, publicly-funded or ratepayer-funded chargers at private commercial properties and larger multifamily dwellings would report uptime data to the CEC under this bill. To the extent that this bill helps better enforce adequate maintenance and functionality of state and ratepayer-funded investments, this bill could help improve ratepayer and taxpayer benefits associated with transportation electrification investments.

Related/Prior Legislation

AB 2703 (Muratsuchi, 2022) would have required the CEC to develop a program to provide financial assistance for EV charging by low-income drivers and those who reside in disadvantaged communities. The bill also would have authorized the CEC to establish reliability standards for EV chargers that receive state funds. The bill was held in the Senate Appropriations Committee.

AB 1424 (Berman, 2019) would have required CARB to modify its EV billing standards to allow a person to pay via a toll-free telephone number to process a credit card payment or via an onsite capacity for credit card payment by a contactless credit card, EMV chip, or magstripe card reader. The bill would have also delayed the adoption of specified interoperability standards for network roaming payment methods for EV charging stations until January 1, 2021. The bill was held in the Senate Appropriations Committee.

SB 1000 (Lara, Chapter 368, Statutes of 2018) required the CEC to assess whether charging station infrastructure is disproportionately deployed by population density, geographical area, or population income level, including low-, middle-, and high-income levels. The bill also required the CEC to target CTP funds address inequities found by the CEC regarding equitable distribution of EV infrastructure.

AB 2127 (Ting, Chapter 365, Statutes of 2018) required the CEC to conduct a statewide assessment every two years of EV charging infrastructure needed to support the levels of EV adoption required for the state to meet its goals of putting at least five million ZEVs on California roads by 2030, and of reducing emissions of GHG to 40 percent below 1990 levels by 2030.

SB 454 (Corbett, Chapter 418, Statutes of 2013) established the Electric Vehicle Charging Stations Open Access Act, which prohibits EV charger owner-operators from requiring individuals to join clubs or pay subscription fees to use a charger. The bill also authorized the CARB to establish interoperable billing standards for EV chargers if a national organization has not adopted such standards by 2015.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- CEC estimates ongoing costs of $300,000 annually (Alternative and Renewable Fuel and Vehicle Technology Fund).

- CPUC anticipates no fiscal impact from this bill.

ARGUMENTS IN SUPPORT: According to the author, "Access to reliable charging stations is the driving force that will lead to greater EV adoption, which is key to meeting our climate goals. Consumers need to know they won't be stranded and will be able to plug in wherever they travel in our state. California has been investing billions in charging infrastructure over the last decade and we need a holistic understanding of station reliability and if any steps are necessary to improve overall reliability. We need to understand the state of the charging infrastructure in order to address issues and better direct resources to fix them. This bill bolsters existing reporting requirements and expands data collected by the Energy Commission on all charging stations by July 1, 2023. AB 2061 creates a policy framework to track station reliability and assess if there are underlying equitable access issues beginning January 1, 2025."

SUBJECT: Disclosure of information: reproductive health and foreign penal civil actions

SOURCE: Equity California
Planned Parenthood Affiliates of California

DIGEST: This bill prohibits the validation of foreign subpoenas pertaining to a foreign penal civil action, as defined. This bill prohibits the sharing of specified information in response to subpoenas related to out-of-state anti-abortion statutes or foreign penal civil actions. This bill authorizes the Insurance Commissioner to issue civil penalties against health insurers who violate the confidentiality of an insured's medical information. This bill also prohibits prison staff from disclosing identifying medical information related to an incarcerated person's right to seek and obtain an abortion if the information is being requested is based on out-of-state

anti-abortion statutes or foreign penal civil actions. This bill declares it is to take effect immediately as an urgency statute.

Senate Amendments of 8/24/22 clarify the bill applies to enforcement of another state's law that interferes with a person's right under the Reproductive Privacy Act, includes non-gendered terms, and add chaptering out amendments with SB 107 (Wiener, 2022).

ANALYSIS: Existing federal law provides that full faith and credit must be given in each state to the public acts, records, and judicial proceedings of every other state, and that the United States Congress may by general laws prescribe the manner in which such acts, records, and proceedings must be proved, and the effect thereof. (U.S. Const. art. IV, sec. 1.)

Existing state law:

1) Holds that the state constitution's express right to privacy extends to an individual's decision about whether or not to have an abortion. *(People v. Belous* (1969) 71 Cal.2d 954.)

2) Provides that a court of this state may exercise jurisdiction on any basis not inconsistent with the Constitution of this state or of the United States. (Code of Civ. Proc. § 410.10.)

3) Establishes the Reproductive Privacy Act, provides that the Legislature finds and declares that every individual possesses a fundamental right of privacy with respect to personal reproductive decisions and, therefore, it is the public policy of the State of California that every individual has the fundamental right to choose or refuse birth control and every individual has the fundamental right to choose to bear a child or to choose to obtain an abortion, with specified limited exceptions. (Health & Safe. Code § 123460 et. seq., § 123462.)

4) Requires a health insurer to recognize the right of a protected individual to exclusively exercise rights regarding medical information related to sensitive services that the protected individual has received, including reproductive health services. (Ins. Code § 791.29 (a)(2).)

5) Provides that a court of this state may exercise jurisdiction on any basis not inconsistent with the Constitution of this state or of the United States. (Code of Civ. Proc. § 410.10.)

6) Provides, under the Interstate and International Depositions and Discovery Act, the procedure for obtaining discovery in California for purposes of a case pending in a jurisdiction outside of California. (Code of Civ. Proc. § 2029.100 et seq.)

7) Provides specified rights and medical care requirements for incarcerated pregnant persons, including the right to seek and obtain an abortion. (Pen. Code § 3408 et seq.)

This bill:

1) Makes various findings and declarations, including that abortion care is a constitutional right; California is committed to building upon existing protections that preserve the right to abortion; actions against California abortion providers, patients and supporters based on hostile antiabortion statues in other states would interfere with protected rights under the Reproductive Privacy Act; and that California must protect the confidentiality of medical records related to abortion.

2) Prohibits a provider of health care, a health care service plan, a contractor, or employer from releasing medical information related to an individual seeking or obtaining an abortion in response to a subpoena or request if that subpoena or request is based on either: (a) another state's laws that interferes with a person's rights under the Reproductive Privacy Act; or (b) a foreign penal civil action, as defined. Also prohibits them from releasing that information to law enforcement for specified purposes.

3) Defines "foreign penal civil action" to mean a civil action authorized by the law of a state other than this state in which the sole purpose is to punish an offense against the public justice of that state.

4) Prohibits the superior court or an attorney licensed in California from issuing a subpoena based on a foreign subpoena that relates to a foreign penal civil action and requires disclosure of information related to sensitive services, as defined.

5) Prohibits compelling a person in a state, county, city, or other local criminal, administrative, legislative, or other proceeding to identify or provide information that would identify or is related to an individual who sought or obtained an abortion if the information being requested is based on either: a) another state's law that interferes with a person's rights under the Reproductive Privacy Act, or b) a foreign penal civil action, as defined.

6) Provides that, if the Insurance Commissioner determines that an insurer has violated specified rights and requirements providing for the privacy and confidentiality of an insured person, the Commissioner may, after appropriate notice and opportunity for a hearing, assess a civil penalty not to exceed $5,000 for each violation, or $10,000 for a willful violation.

7) Provides the provisions of this bill are severable and declares it is to take effect immediately as an urgency statute.

Comments

The California Supreme Court held in 1969 that the state constitution's express right to privacy extends to an individual's decision about whether or not to have an abortion. (People v. Belous (1969) 71 Cal.2d 954.) Existing California statutory law provides, under the Reproductive Privacy Act, that that the Legislature finds and declares every individual possesses a fundamental right of privacy with respect to personal reproductive decisions; therefore, it is the public policy of the State of California that every individual has the fundamental right to choose or refuse birth control and the right to choose to bear a child or to choose to obtain an abortion. (Health & Safe. Code § 123462(a)-(b).) The Act further provides that it is the public policy of the state that the state shall not deny or interfere with a person's fundamental right to choose or obtain an abortion prior to viability of the fetus or when the abortion is necessary to protect the life or health of the pregnant person. (Health & Safe. Code § 123462(c) & § 123466.) In 2019, Governor Newsom issued a proclamation reaffirming California's commitment to making reproductive freedom a fundamental right in response to the numerous attacks on reproductive rights across the nation.

Roe v. Wade is the landmark U.S. Supreme Court decision that held the implied constitutional right to privacy extends to a person's decision whether to terminate a pregnancy; while allowing that some state regulation of abortion access could be permissible. ((1973) 410 U.S. 113.) Roe has been one of the most debated Supreme Court decisions, and its application and continued validity have frequently been challenged in the courts. On June 24, 2022 the Court published its official opinion in Dobbs v. Jackson Women's Health and voted 6-3 to overturn the holding in Roe, overturning almost 50 years of precedent.

Texas recently enacted a law that essentially places a near-categorical ban on abortions beginning six weeks after a person's last menstrual period. This law has far-reaching implications, not solely for a person obtaining an abortion or performing abortion services, as it prohibits anyone from "aiding and abetting" a

person in obtaining an abortion. (Tex. Health & Safety Code § 171.208.) This potentially implicates and imposes significant civil liability upon a person providing transportation to or from an abortion clinic, a person donating to a fund to assist individuals receiving an abortion, or even a person who simply discusses getting an abortion with someone. The Texas law provides that any person, other than an officer or employee of a state or local governmental entity in Texas, may bring a civil action to enforce its provisions, which includes liability of $10,000 plus costs and fees if a plaintiff prevails while a defendant is prohibited from recovering their own costs and fees if they prevail. (Id. at § 171.201(b) & (i).)

This bill seeks to further the public policy of this State that access to abortion is a fundamental right by providing protection to individuals seeking to exercise that right and to ensure their privacy. This bill prohibits a provider of health care, health care service plan, a contractor, or employer from releasing medical information related to an individual seeking or obtaining an abortion in response to a subpoena or request if that subpoena or request is based on either: a) another state's laws that interfere with a person's rights under the Reproductive Privacy Act, or b) a foreign penal civil action, as defined. This bill prohibits a person from being compelled in a state, county, city, or other local criminal, administrative, legislative, or other proceeding to identify or provide information that would identify or that is related to an individual who has sought or obtained an abortion if the information is being requested based on either of those instances. This bill prohibits the issuance of a subpoena by a state court or an attorney licensed in this state based on a foreign subpoena that relates to a foreign penal civil action and would require disclosure of information related to sensitive services.

Article IV, Section 1 of the U. S. Constitution, known as the Full Faith and Credit Clause, requires every state to give full faith and credit to the public acts (statutes), records, and judicial proceedings of every other state. As this bill requires certain orders and judgments of other states to not be enforced in California, it implicates the Full Faith and Credit Clause. Current legal scholarship regarding the Full Faith and Credit Clause posits that the clause applies differently to public acts (statutes), records, and judicial proceedings. The Court has generally held, dating back to 1813, that states must recognize and enforce the judicial determinations of another state. (Mills v. Duryee (1813) 7 Cranch 481, 484-485.) However, the Court has intimated that there may be exceptions to this general rule, stating that states are not automatically required to enforce civil judgments of another state that are based on that state's civil statutes when the goal or purpose of the civil statute is punishing a person for an offence against the "public justice." (Huntington v Attrill (1892) 146 U.S. 657, 673-674.)

It can be plausibly argued that the Texas statute, and others like it, are designed to punish an offense against the public justice. They do not require any actual harm or violation of personal rights for a plaintiff to bring a civil suit to enforce its provisions. As such, the $10,000 civil penalty cannot be intended to compensate the plaintiff for a personal injury or remedy a specific harm. Statutes regulating abortion have historically been enforced through criminal prosecutions or by state regulatory agencies as public health measures. Further evidence that the purpose of the Texas law is penal is found in statements made by John Seago, the legislative director of Texas Right to Life, which was a sponsor of the Texas bill, where he stated one motivation for enacting the law was because district attorneys publicly signed a letter stating they will not enforce laws that criminalize abortion. If in-state district attorneys refuse to enforce laws to punish an offense against the public justice of that state, it seems even more absurd to require courts of another state to, especially when the out-of-state policy is diametrically opposed to the public policy of this state and would require California to undermine fundamental rights.

ARGUMENTS IN SUPPORT: The author writes:

> States throughout the U.S. have been targeting and restricting abortion access. With the U. S. Supreme Court likely to overturn the protections granted under *Roe v. Wade*, it is essential for states like California to double down on abortion access and strong abortion related privacy protections. Regressive abortion laws, like we most recently saw in a Texas law that allows private citizens to sue anyone who even utters the word abortion, are a huge infringement on a person's constitutional right to an abortion. We know that people are coming to California to seek reproductive care. However, we worry that private citizens will demand the medical records of those who seek care here in California, in order to punish them. No one should be able to manipulate California's legal system to target and punish people who seeks care and refuge here. My bill will ensure out of state subpoenas, which seek information related to a patient who received reproductive healthcare here in California, are not granted. By doing this, California will protect the medical privacy of those patients who may be targeted under these hostile states' laws. California must proactively protect the confidentiality of medical records, related to abortion care, especially as we see states around the country paving the way to use those records to enforce their own state's anti-abortion laws.

Planned Parenthood Affiliates of California, a sponsor of this bill, write:

> […The Texas law relies on private citizens, even those who have no connection to the person seeking the abortion, to enforce the abortion ban by filing civil lawsuits against abortion providers and those who assist people in obtaining abortions. Unfortunately, the U.S. Supreme Court has upheld this scheme to circumvent judicial review of an unconstitutional state law and lawmakers in 18 states have now introduced or announced they will introduce legislation to ban abortion modeled after the Texas law. As people in these

states travel out of state to seek abortion care, more and more patients will turn to California for care – putting abortion providers and patients at risk of civil liability.

AB 2091 takes specific steps to protect patient privacy by prohibiting health plans, health care providers, and their contractors from disclosing medical information of a person seeking an abortion in response to a subpoena based on the violation of another state's law and by ensuring that an out of state subpoena is not immediately granted as it relates to a patient who received an abortion in California. The bill also protects an individual from being compelled to disclose information that would identify an individual who sought or obtained an abortion. Additionally, it authorizes the Insurance Commissioner to assess a civil penalty against an insurer that has disclosed an insured's confidential medical information. These actions are just a few steps necessary to protect patient privacy for all patients seeking care in California. […]

ARGUMENTS IN OPPOSITION: The Right to Life League writes in opposition:

[…] [A]B 2091 will effectively grant immunity from foreign subpoenas to sexual abusers and human traffickers who coerce women and minors into pregnancy termination in other states then flee to California to avoid the legal consequences. SB 2091 is dangerous because it declares another state's court orders to have no effect, thwarting enforcement of foreign laws against abusers and human traffickers who may hide in California, denying justice to victims.

[A]B 2091 would remove consequences for proven abuse and neglect by extending legal protection to abusers fleeing other states, thereby covering the tracks of abortion coercion. The bill will embolden bad actors to exploit women. […]

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 65-0, 5/9/22 - See last page for vote

SUBJECT: General plan: annual report: extremely low-income housing

SOURCE: Author

DIGEST: This bill requires cities to include progress towards meeting their share of regional housing needs for extremely low-income (ELI) households in their annual progress report (APR).

Senate Floor Amendments of 8/24/22 resolve chaptering conflicts with AB 1743 (McKinnor), AB 2653 (Santiago), and AB 2011 (Wicks).

ANALYSIS:

Existing law:

1) Defines "extremely low income households" to mean persons and families whose incomes do not exceed the qualifying limits for extremely low-income families as established U.S. Department of Housing and Urban Development. Generally, this level is approximately 30% of area median income, adjusted for family size and revised annually.

2) Requires each city and county to draft and adopt a general plan, which must include a housing element, to shape the future growth of its community.

3) Requires each city and county to submit an APR to the Governor's Office of Planning and Research (OPR) and HCD by April 1 of each year. The report is to evaluate the general plan's implementation, including the housing element. The housing element evaluation includes a qualitative assessment of progress towards implementing programs that facilitate housing, and quantitative assessments of progress towards meetings its regional housing needs, including number of applications for housing and number of units permitted, by income level (very low-income, low-income, moderate-income, and above moderate-income).

This bill requires cities to include progress towards meeting their share of regional housing needs for ELI households in their APR.

Comments

1) *Author's statement.* "Many extremely low-income (ELI) households are dealing with widening income inequality, which is compounded by a severe housing shortage. About half of the people considered ELI are children and seniors, and almost half of working-age adults with extremely low incomes are essential workers. As the state continues to focus on addressing our housing and investing state dollars, we need to have a better understanding how these efforts help our extremely low-income households. The additional data AB 2094 will provide will help ensure that state policymakers are able to make the most informed decisions possible in this regard."

2) *Housing crisis and ELI households.* California's housing affordability crisis disproportionately affects lower income residents. This is because most lower income households are "cost burdened," in that the high cost of housing leaves insufficient money to pay for other household necessities, such as food, transportation, and health care. In California, nearly 90% of the state's nearly 2.4 million ELI residents are cost burdened. By comparison, 42% of moderate-income households (making between 80 to 120% of the area median income (AMI)) are cost burdened, and that figure drops to 11% of households making over 120% AMI. Further, because they are prone to housing insecurity, ELI residents are highly at risk of becoming homeless, or are already among the state's over 160,000 unhoused individuals.

3) *Housing elements and APRs.* Existing law requires every city and county to prepare a housing element as part of its general plan. This is done every eight years by local governments located within the territory of a metropolitan planning organization (MPO) and every five years by local governments in rural non-MPO regions. Each community's fair share of housing is determined through the regional housing needs allocation (RHNA) process, which is composed of three main stages: (1) the Department of Finance and HCD develop regional housing needs estimates; (b) councils of government (COGs) allocate housing within each region based on the estimates; and (c) cities and counties incorporate their allocations into their housing elements. The housing element must contain an inventory of land suitable for residential development, which is used to identify sites that can be developed for housing within the planning period and are sufficient to provide for the locality's share of the regional housing need for all income levels. Each jurisdiction must submit an APR to HCD documenting its progress toward meeting its RHNA allocation and the plans outlined in its housing element.

   This bill requires locals to include their progress towards meeting their share of regional housing needs for ELI households in their APR, which would add to the requirements to track progress for very low-income, low-income, moderate-income, and above moderate-income households.

SUBJECT: Residential, commercial, or other development types: parking requirements

SOURCE: Abundant Housing LA
Bay Area Council
California YIMBY
Council of Infill Builders
San Francisco Bay Area Planning and Urban Research Association

DIGEST: This bill prohibits public agencies from imposing or enforcing parking minimums on developments within ½ mile of a major transit stop, as specified.

Senate Floor Amendments of 8/24/22 prohibit a local agency from requiring that voluntarily provided parking must be provided to residents free of charge, make other technical changes, and include chaptering amendments.

ANALYSIS:

Existing law:

1) Allows a city or a county to "make and enforce within its limits, all local, police, sanitary and other ordinances and regulations not in conflict with general laws." It is from this fundamental power (commonly called the police power) that cities and counties derive their authority to regulate behavior to preserve the health, safety, and welfare of the public, including land use authority.

2) Requires each city or county to adopt a general plan for the physical development of the city or county and authorizes the adoption and administration of zoning laws, ordinances, rules, and regulations by cities and counties.

3) Defines "Major transit stop" and "high-quality transit corridor" as follows:

   a) "Major transit stop" means a site containing any of the following:

      i) An existing rail or bus rapid transit station.

      ii) A ferry terminal served by either a bus or rail transit service.

      iii) The intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.

   b) "High-quality transit corridor" means a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.

This bill:

1) Prohibits a public agency, including charter cities, from imposing or enforcing any minimum parking requirement on a residential, commercial, or other development project if the project is located within one-half mile of a major transit stop, as defined.

2) Allows, notwithstanding 1), a city or county to impose or enforce parking requirements if the local government demonstrates that not imposing parking requirements would have a substantially negative impact, supported by a preponderance of the evidence in the record, on any of the following:

a) The city's or county's ability to meet its share of the regional housing need for low- and very low income households.

b) The city's or county's ability to meet any special housing needs for the elderly or persons with disabilities, as specified.

c) Existing residential or commercial parking within one-half mile of the housing development project.

3) Provides, for a housing development project, that the ability to require parking in 2) does not apply to a project that satisfies either of the following:

a) The development dedicates a minimum of 20 percent of the total number of housing units to very low, low-, or moderate-income households, students, the elderly, or persons with disabilities.

b) The development contains fewer than 20 housing units.

c) The development is not subject to parking requirements based on the provisions of any other state law.

4) Excludes from the definition of "project" a project where any portion is designated for use as a hotel, motel, or other type of transient lodging, as specified.

5) Requires an event center, as defined, to provide parking as required by local ordinance for employees and other workers.

6) Provides that the bill does not reduce the requirement to provide electric vehicle supply equipment-installed parking spaces or accessible parking spaces that would have otherwise been required.

7) Provides that the bill does not apply to commercial parking requirements if it conflicts with an existing contractual agreement to provide parking spaces as of January 1, 2023, as specified.

8) States that a project may voluntarily build additional parking that is not shared with the public, and clarifies that public agencies may impose specified restrictions on voluntary parking, but specifies that a public agency may not require that voluntarily provided parking is provided to residents free of charge.

9) Adds the provisions of this bill to the list of laws that may be enforced by the Department of Housing and Community Development (HCD) and the Attorney General, as specified.

10) Defines its terms, incorporates chaptering amendments, and includes findings and declarations to support its purposes.

Background

Cities and counties generally establish requirements for a minimum amount of parking that developers must provide for a given facility or use, known as parking minimums or parking ratios. Local governments commonly index parking minimums to conditions related to the building or facility with which they are associated. For example, shopping centers may have parking requirements linked to total floor space, restaurants may be linked to the total number of seats, and hotels may have parking spaces linked to the number of beds or rooms.

In 2019, the California Air Resources Board (CARB) reviewed over 200 municipal codes and found that for nonresidential construction, an average of at least one parking space is installed for every 275 square feet of nonresidential building floor space. Accounting for the fact that approximately 60 percent of reviewed municipal codes already allow developers to reduce parking by an average of 30 percent, CARB staff estimated that between 1.4 million and 1.7 million new nonresidential parking spaces may be constructed from 2021-2024.

CARB also conducted a limited review of minimum parking requirements and found that parking requirements often result in an over-supply of parking. In reviewing 10 developments in Southern California, CARB noted that while most sites built exactly the minimum parking required by the local agency, the peak parking utilization at these sites ranged from 56 percent to 72 percent at each development, suggesting that the minimum requirements established by the local agency created an oversupply of parking.

Research on parking and its impacts. A number of sources have documented the harms associated with imposing parking requirements. Of particular interest given California's housing challenges is that parking requirements can increase the cost of production and render infeasible some projects, whether financially due to the cost of constructing parking or physically due to capacity limitations of some sites. For example, a recent study by Santa Clara University found that the cost of garage parking to renter households is approximately $1,700 per year, or an additional 17% of a housing unit's rent. Research has documented other harms associated

with parking minimums outside the housing context. According to the Terner Center for Housing Innovation:

> "Parking requirements have also been linked to a variety of negative secondary impacts, in particular the environmental costs for cities. Parking contributes to the urban heat island effect and does not support any biodiversity. Land coverage by asphalt increases stormwater runoff, which raises the risk of flooding and causes higher pollution levels in freshwater systems. Chemical compounds used to seal parking lots can seep into groundwater and freshwater systems, which contributes to pollution and decreases the health of these ecosystems. Because it encourages automobile usage, parking also hinders the effectiveness and usage of alternative forms of transit (public transportation, biking, etc.), increases congestion, and causes externalities like air pollution, noise pollution, and greenhouse gas emissions."

Various advocates want the Legislature to prohibit parking minimums near transit.

Comments

1) *Purpose of the bill.* According to the author, "It seems that for years California has been trading housing for parking. We're in the midst of a housing crisis, desperately looking for a solution, and we need to consider all options to reduce the overall cost of housing. There are plenty of communities in our state that have access to high-quality transit, or where cars are underutilized, that need housing far more than they need parking. Yet, many cities in California require new residential or commercial development to provide on-site parking spaces. Often, apartments must include one or two parking spots per unit, and commercial properties must provide one space for every 100-200 square feet (frequently causing more space to be provided for parking than for the business itself). These one-size-fits-all mandates are often imposed even in areas that are close to transit.

   "Mandatory parking requirements have led to an oversupply of parking spaces; Los Angeles County alone has 18.6 million parking spaces, or almost two for every resident. Experts believe that this policy encourages car dependence and discourages mass transit usage, increasing vehicle miles traveled. California needs to reduce vehicle miles traveled by 15% in order to meet its SB 32 climate goals, even in a scenario with full vehicle electrification. Mandatory parking requirements also worsen California's severe housing shortage by

raising the cost of housing production. On average, a garage costs $24,000-$34,000 per space to build, a cost that is passed on to households regardless of whether they own a car. Additionally, on-site parking takes up space that could otherwise be used for additional apartment units.

"AB 2097 does not prohibit property owners from building on-site parking. Rather, it would give them the flexibility to decide on their own how much on-site parking to provide, instead of requiring them to comply with a one-size-fits-all mandate."

2) *Home rule.* Development generates externalities: impacts to third parties that are not captured in the prices paid for goods and services. Developers have a profit motive to only include parking where it helps them sell or rent their properties to willing buyers or renters. Local officials, on the other hand, are elected to represent the interests of all their constituents and to look broadly at how new development might impact their community. For example, concerns over the encroachment of wildfire may prompt some local governments to impose parking requirements to ensure that streets are open for evacuation and emergency response. In other areas, particularly rural communities, public transit may not be a realistic option for many trips, even near major transit stops, due to the transit times required or lack of transit options near the final destination. And the state's Density Bonus Law, which is one of the main ways statute currently limits local parking requirements, allows a local government to impose higher parking requirements if the local government has funded an independent, jurisdiction-wide parking study in the past seven years. AB 2097 limits the ability of local governments to take into account the unique needs of their communities by constraining when they can impose parking requirements.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The Department of Housing and Community Development (HCD) estimates cost of approximately $178,000 annually for 1.0 PY of staff to coordinate with local governments, provide guidance and technical assistance, investigate complaints, conduct enforcement actions, and make referrals to the Attorney General. (General Fund)

- Unknown, likely minor costs for the Attorney General (AG) to take enforcement actions against non-compliant cities and counties that fail to take corrective actions, to the extent HCD refers violations to the AG. (General Fund)

- Unknown local mandated costs. While the bill could impose new costs on local agencies to revise planning requirements for certain developments, these costs are not state-reimbursable because local agencies have general authority to charge and adjust planning and permitting fees to cover their administrative expenses associated with new planning mandates. (local funds)

SUBJECT: Physicians and surgeons: unprofessional conduct

SOURCE: California Medical Association

DIGEST: This bill makes disseminating misinformation, as defined, or disinformation related to COVID-19, including false or misleading information regarding the nature and risks of the virus, its prevention and treatment; and the development, safety, and effectiveness of COVID-19 vaccines, by a physician and surgeon unprofessional conduct.

Senate Floor Amendments of 8/22/22 update the definition of "misinformation".

ANALYSIS:

Existing law:

1) Regulates the practice of medicine under the Medical Practice Act (Act), which establishes the Medical Board of California (MBC) to administer and enforce the Act. (Business and Professions Code (BPC) § 2000 *et. seq.*)

2) Enacts the Osteopathic Act, which provides for the licensure and regulation of osteopathic physicians and surgeons. (BPC §§ 2450 et seq.)

3) Provides that protection of the public shall be the highest priority for both the MBC and the Osteopathic Medical Board of California (OMBC) in exercising their respective licensing, regulatory, and disciplinary functions, and that whenever the protection of the public is inconsistent with other interests sought to be promoted, the protection of the public shall be paramount. (BPC § 2001.1; § 2450.1)

4) Provides that all proceedings against a licensee for unprofessional conduct, or against an applicant for licensure for unprofessional conduct or cause, shall be conducted in accordance with the Administrative Procedure Act. (BPC § 2230)

5) Establishes various violations that constitute unprofessional conduct. (BPC §§ 725 *et. seq)*

6) Requires the MBC to take action against any licensee who is charged with unprofessional conduct, which includes, but is not limited to, the following:

   a) Violating or aiding in the violation of the Medical Practice Act.
   b) Gross negligence.
   c) Repeated negligent acts.
   d) Incompetence.
   e) The commission of any act involving dishonesty or corruption that is substantially related to the qualifications, functions, or duties of a physician.
   f) Any action or conduct that would have warranted the denial of a certificate.
   g) The failure by a physician, in the absence of good cause, to attend and participate in an investigatory interview by the MBC. (BPC § 2234)

7) Provides that a physician shall not be subject to discipline solely on the basis that the treatment or advice they rendered to a patient is alternative or complementary medicine if that treatment or advice was provided after informed consent and a good-faith prior examination; was provided after the physician provided the patient with information concerning conventional treatment; and the alternative complementary medicine did not cause a delay in, or discourage traditional diagnosis of, a condition of the patient, or cause death or serious bodily injury to the patient. (BPC § 2234.1)

This bill:

1) Provides that it is unprofessional conduct for a physician and surgeon to disseminate misinformation or disinformation related to COVID-19, including:

false or misleading information about the nature and risks of the virus; COVID-19 prevention and treatment; and the development, safety, and effectiveness of COVID-19 vaccines.

2) Defines the following:

   a) ”Board” means the MBC or OMBC.
   b) “Disinformation” means misinformation that the licensee deliberately disseminated with malicious intent or an intent to mislead.
   c) “Disseminate” means the conveyance of information from the licensee to a patient under the licensee’s care in the form of treatment or advice.
   d) “Misinformation” means false information that is contradicted by contemporary scientific consensus contrary to the standard of care.
   e) “Physician and surgeon” means person licensed by the MBC or OMBC.

3) Specifies that violators of these provisions are not guilty of a misdemeanor.

4) Makes findings and declarations about the impacts of COVID-19, information about COVID-19 vaccines, and impacts of misinformation and disinformation about COVID-19 vaccines

Background

COVID-19 Misinformation and Disinformation. In March 2020, Governor Newsom declared a State of Emergency due to the COVID-19 pandemic that was beginning to spread widely. In December 2020, an emergency-approved COVID-19 vaccine began to roll out first to the aging population and healthcare professionals and eventually to all adults, and now all children. While scientists began working on creating the vaccine, misinformation and disinformation spread widely. CDC makes the distinction that misinformation is shared by people who not intend harm and disinformation is false information to deliberately disseminate with malice. This bill makes a distinction, but does not differentiate consequences for doctors.

Misinformation has resulted in less than desired vaccine rates, continued unnecessary spread and risk to communities. Reports show that as of June 21, 2022, only 75.6% of people 5 and older are fully vaccinated. Yale Medicine reports that a community needs 95% of the population to reach herd immunity. Part of the low vaccine rate is attributed to misinformation causing fear about potential side effects. Researchers at the Center for Health Security at the Johns Hopkins Bloomberg School of Public Health recently estimated that two million to

12 million people in the US were unvaccinated against COVID-19 because of misinformation or disinformation.

In November 2021, the American Medical Association adopted a new policy to combat misinformation because "[health professional] using their professional license to validate the disinformation they are spreading has seriously undermined public health efforts". The CDC and State Public Health Officials have published a myths and facts page to clarify misinformation. Origination of misinformation is not clear; however, the White House reported in 2021 that much of the COVID-19 vaccine misinformation began with a number of online social media users.

Physicians and healthcare professionals play a critical role in keeping communities healthy. A physician's recommendation and information sharing will educate and inform decisions made by their patients. As such, providing accurate information will ultimately impact patient's health. NPR reported that, "The Center for Countering Digital Hate, which tracks vaccine misinformation online, says that even though the number of doctors involved in spreading this sort of bad information is tiny, they're having an outsized influence." This bill explicating holds physicians accountable for providing misinformation or disinformation about COVID-19 vaccines. This bill does not, however, include other healthcare professionals which have also been reported as spreading misinformation and disinformation.

Comments

According to MBC, it "faces considerable challenges investigating cases involving a violation of the [Act] related to COVID-19. Oftentimes, complaints received by the Board pertaining to COVID-19 are made by a member of the public and not the patient of the physician. In some COVID-19 related investigations, the Board is unable to identify any specific patients who have been treated by the physician in question. Without a patient's name, it is impossible to obtain their consent for records and the Board will be unable to identify what patient records to seek in an investigative subpoena." MBC notes that its request for enhanced authority to inspect medical records would assist in overcoming this challenge.

Physicians and surgeons are not the only licensed health care providers licensed who may engage in practices that this bill seeks to address. In 2022, the Senate Business, Professions, and Economic Development Committee, in coordination with the Assembly Committee on Business and Professions, asked questions through the sunset review oversight process about efforts health care licensing programs are undertaking in order to curb the spread of medical misinformation. One example was highlighted in a staff prepared background paper for the sunset

review oversight of the Board of Chiropractic Examiners noting that in Spring 2020, that board reported that several complaints were received about licensed doctors of chiropractic who were advertising that chiropractic care can help patients reduce their risk of COVID-19 infection. That board investigated the complaints, and the licensees subsequently removed advertisements from their websites. Given that many additional licensed health care providers also have a "high degree of public trust and therefore must be held accountable for the information they spread", as the author notes for physicians and surgeons in identifying the rationale for this bill, it is unclear why only one category of professional would be specified through statue designating their activities as unprofessional conduct.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, OMBC estimates a fiscal impact of $10,000 and MBC anticipates any fiscal impact to be absorbable within existing resources as the board currently implements an allegation code for COVID-19 related complaints and tracks discipline related to unprofessional conduct. Actual enforcement costs to the MBC and OMBC are indeterminate and would depend on the volume of complaints received specific to COVID-19 misinformation and disinformation, as well as the complexity of any subsequent investigations. The Office of Information Services within the Department of Consumer Affairs estimates $1,600 for workload associated with making information technology changes.

ARGUMENTS IN SUPPORT: Supporters write that licensed physicians possess a high degree of public trust and therefore have a powerful platform in society. When they choose to spread inaccurate information, physicians contradict their responsibilities and further erode public trust in the medical profession. By passing this bill, California will demonstrate its unwavering support for a scientifically informed populous to protect ourselves from COVID-19. The California Medical Association notes that "While the MBC may have the ability to discipline licensees for unprofessional conduct under Business and Professions Code section 2234, AB 2098 makes clear that the MBC has the statutory authority to take such actions against physicians that spread COVID-19 misinformation or disinformation."

Supporters state that health misinformation is a serious threat to public health that can cause confusion, sow mistrust, harm people's health, and undermine public health efforts.

ARGUMENTS IN OPPOSITION: According to A Voice for Choice Advocacy, "While we agree that physicians and surgeons should be disciplined for maliciously sharing misinformation and disinformation, there are already measures in place for the California Medical Board to discipline for such offenses. Furthermore, AB 2098 is overly broad and would be impossible to implement because there is no definition and no established 'standard of care' or 'contemporary scientific consensus' for treating SARS-COV-2/COVID-19." Opponents also note that doctors should be allowed to voice their medical and professional opinions freely and state that an unintended consequence of this bill might be that the healthcare provider shortage would be exacerbated. Opponents also express concerns about unconstitutional restrictions on free speech.

SUBJECT: Water quality: permits

SOURCE: California Coastkeeper Alliance

DIGEST: This bill requires the State Water Resources Control Board (State Water Board) to update its stormwater data collection systems and software and, contingent upon appropriation by the Legislature, to establish a statewide commercial, industrial, and institutional (CII) national pollutant discharge elimination system (NPDES) order.

Senate Floor Amendments of 8/24/22 specify that the statewide CII NPDES order applies to CII facilities with impervious surfaces, require the State Water Board to develop a model memorandum of understanding (MOU) detailing the necessary components for an agreement between CII permittees and municipalities for offsite stormwater capture and use, and require the State Water Board to issue the model MOU with the draft order.

ANALYSIS:

Existing law:

1) Establishes the federal Clean Water Act (CWA) to regulate discharges of pollutants into the waters of the United States and to regulate quality standards for surface waters. The federal CWA makes it unlawful to discharge any pollutant from a point source into navigable waters, unless a permit was obtained, and establishes a structure for regulating discharges of pollutants into the waters of the United States and regulating quality standards for surface waters. (33 United States Code (U.S.C.) §1251 et seq.)
   a) Establishes the National Pollutant Discharge Elimination System (NPDES) permit program which regulates point source discharges of pollutants into US waters. An NPDES permit sets specific discharge limits for point sources discharging pollutants into US waters and establishes monitoring and reporting requirements as well as special conditions. Point sources are discrete conveyances such as pipes or man-made ditches. (Individual homes that are connected to a municipal system, use a septic system, or do not have a surface discharge do not need an NPDES permit; however, industrial, municipal, and other facilities must obtain permits if their discharges go directly to surface waters.).
   b) States are authorized to implement and enforce the NPDES permit program as long as the state's provisions are as stringent as the federal requirements. In California, the State Water Resources Control Board (State Water Board) is the delegate agency responsible for the NPDES permit program. (22 U.S.C. Sec. 1251 et seq.)

2) Establishes, under the Porter-Cologne Water Quality Control Act (Porter-Cologne), the State Water Board and regional water quality control boards (regional boards) to preserve, enhance, and restore the quality of California's water resources and drinking water for the protection of the environment, public health, and all beneficial uses, and to ensure proper water resource allocation and efficient use, for the benefit of present and future generations. (Water Code (Wat. C.) § 13000 et seq.)

3) Requires the State Water Board to develop minimum standard monitoring requirements for municipalities subject to a stormwater permit and industries that are subject to the General Permit for Stormwater Discharges Associated with Industrial Activities Excluding Construction Activities, which is known as the Industrial General Permit (IGP).

This bill:

1) Requires the State Water Board, by December 31, 2025, to update its stormwater data collection systems and software to do the following:
   a) Reduce regulatory costs associated with permittee reporting requirements and data entry.
   b) Improve efficient enforcement and track permittee compliance through increased accessibility to permit requirement, compliance data, and permittee compliance status.
   c) Include permittee-level and site- and facility-level tracking and accounting of how best management practices reduce pollutant loading to receiving waters.
   d) Include geographic information system data to elevate progress toward stormwater program compliance.

2) Requires the State Water Board, after making specific findings and contingent upon appropriation by the Legislature, to establish a statewide CII NPDES order regulating stormwater and authorized nonstormwater discharges from facilities with impervious surfaces that are significant contributors of pollutants to federally protected surface waters and to publish a draft order of the statewide order for public comment on or before December 31, 2026, or 18 months after the reissuance of the Statewide General Permit for Stormwater Discharges Associated with Industrial Activities, as specified.
   a) Requires the State Water Board to contemporaneously develop a model memorandum of understanding to issue with the publication of the draft statewide order for public comments that details the necessary components of an agreement between CII permittees and local municipalities for achieving offsite stormwater capture and use within the adopted final statewide CII NPDES order.
   b) Prohibits regulated stormwater permittees from being subject to more than one stormwater NPDES order for the same facility. Requires all effluent limitations applicable to stormwater discharges associated with industrial activities to be incorporated into the statewide CII order. Does not apply these provisions to stormwater discharges associated with construction activities.

3) Requires, on or before January 31, 2025, the State Water Board to initiate a series of board workshops to evaluate the California stormwater program and the state's progress toward attainment of beneficial uses and compliance with water quality standards as they pertain to permits issued pursuant to the federal CWA.

4) Requires, on or before December 31, 2026, the State Water Board to develop and submit to the Legislature a report evaluating the state's progress toward, and recommendations to achieve, attainment of beneficial uses and compliance with water quality standards. Requires the report to include recommendations to ensure permitting of stormwater discharges protects and supports attainment of beneficial uses and results in water quality objectives. For purposes of developing these recommendations, limits the State Water Board's evaluation to the following:
   a) Strategies to ensure stormwater permit requirements are simple and objective, focusing on improving water quality, and determine permittee compliance.
   b) Mechanisms to ensure stormwater programs address environmental justice and racial inequities within the state's water quality policies and permits to ensure disadvantaged and tribal communities are not disproportionately impacted by poorly managed stormwater.
   c) Source control measures the state could implement including a stakeholder working group to evaluate the potential for a statewide program, as specified.
   d) Strategies to reduce the compliance costs created by unnecessary permit requirements that do not result in improved water quality or are not necessary to demonstrate permit compliance.
   e) Policies to regulate or incentivize the one-water concept, as defined by the bill.
   f) A dedicated source of stormwater funding and increasing supplemental funding opportunities for local stormwater programs.
   g) The use of spatially based stormwater information management systems to manage, visualize, and report program compliance data.
   h) Opportunities to better identify and enroll nonfilers into the applicable stormwater NPDES order.
   i) Solutions to identify unknown sources of water quality impairments.

Background

1) *Protecting Water Quality in California.* Porter-Cologne, enacted in 1969, established the State Water Board, along with nine regional boards, and gave those agencies primary responsibility for the coordination and control of water quality. The State Water Board establishes statewide policy. The regional boards formulate and adopt water quality control plans and issue permits governing the discharge of waste.

Porter-Cologne requires any person discharging, or proposing to discharge, waste that could affect the quality of state waters to file a report with the appropriate regional board. The regional board then prescribes requirements as to the nature of the discharge, implementing any applicable water quality control plans.

CWA, enacted in 1972, established the NPDES permit system. CWA is a comprehensive water quality statute designed to restore and maintain the chemical, physical, and biological integrity of the nation's waters. CWA prohibits pollutant discharges unless they comply with: (a) a permit; (b) established effluent limitations or standards; or (c) established national standards of performance. CWA allows any state to adopt and enforce its own water quality standards and limitations, so long as those standards and limitations are not less stringent than those in effect under CWA.

2) *Regulation of stormwater discharge*. Stormwater is defined by the US EPA as the runoff generated when precipitation from rain and snowmelt flows over land of impervious surfaces such as paved streets, parking lots, and building rooftops, without percolating into the ground. Water runoff from cities, highways, industrial facilities, and construction sites can carry pollutants, such as oil, pesticides, herbicides, sediment, trash, bacteria, and metals, that harm water quality and impair the beneficial uses of California waters. The State Water Board and US EPA regulate the runoff and treatment of stormwater in industrial, municipal, and residential areas of California. In most cases, stormwater flows directly to water bodies through sewer systems, contributing to a major source of pollution to rivers, lakes, and the ocean. Most stormwater discharges are considered point sources and require coverage by an NPDES permit.

   The State Water Board and regional boards are responsible for regulating stormwater discharges under CWA and the NPDES permit program. The NPDES stormwater program regulates some stormwater discharges from three potential sources: municipal separate storm sewer systems (MS4s), construction activities, and industrial activities. The Industrial General Permit (IGP) regulates industrial storm water discharges and authorized non-stormwater discharges from industrial facilities in California. The IGP is called a general permit because many industrial facilities are covered by the same permit, but comply with its requirements at their individual industrial facilities.

   Dischargers whose projects disturb one or more acres of soil or whose projects disturb less than one acre but are part of a larger common plan of development

that in total disturbs one or more acres, are required to obtain coverage under the General Permit for Discharges of Storm Water Associated with Construction Activity. Construction activity subject to this permit includes clearing, grading and disturbances to the ground such as stockpiling, or excavation, but does not include regular maintenance activities performed to restore the original line, grade, or capacity of the facility. The Construction General Permit requires the development of a Storm Water Pollution Prevention Plan (SWPPP) by a certified Qualified SWPPP Developer (QSD).

The Municipal Storm Water Program regulates storm water discharges from MS4s throughout California. US EPA defines an MS4 as a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) owned or operated by a state (40 CFR 122.26(b)(8)).

The State Water Board also manages an online database, the Stormwater Multiple Application and Report Tracking System (SMARTS), that allows permittees to electronically submit permit compliance data, and allows the public to view reports and information on water quality control efforts with stormwater.

3) *Why Is Stormwater Pollution A Problem?* Stormwater pollution is a major environmental and public health issue. It leads to unsanitary living environments, unhealthy surface waters, such as lakes, creeks and rivers, unhealthy ocean and beach conditions, and street and neighborhood flooding during the rainy season. It's created when trash, cigarette butts, animal waste, pesticides, motor oil, and other contaminants left on the ground are washed or thrown directly into storm drains. This toxic soup mixes with millions of gallons of rainwater and flows untreated into local creeks, rivers, and the ocean - polluting our waterways, as well as degrading neighborhoods and other natural resources. However, stormwater can also act as a resource and recharge groundwater when properly managed.

4) *Federal court case on stormwater pollution and regulation.* In *Los Angeles Waterkeeper v. Pruitt* (320 F.Supp.3d 1115), various environmental organizations brought a suit against the Environmental Protection Agency (EPA) for EPA's failure to engage in NPDES Permitting process with regard to unpermitted stormwater discharges from privately-owned CII sources that were contributing to violations of water quality standards in the Dominguez Channel and Los Angeles/Long Beach Inner Harbor watershed, and the Los Cerritos Channel and Alamitos Bay watershed. In the Central District, United States

District Court opinion, the court stated "once EPA determined 'there are sufficient data available to demonstrate that stormwater discharges are continuing to the water quality impairments in the [Watersheds], the statute *required* EPA to engage in the permitting process or prohibit the discharge. … But EPA left the stormwater discharges at issue unregulated in violation of the Clean Water Act' " (emphasis included) (Id. at pp. 1123). The court went on to state that "the [CWA] unambiguously requires EPA to engage in the permitting process where it has determined that stormwater discharges contribute to a water quality violation." (Id).

Currently, the Los Angeles Regional Water Board and the US EPA are considering regulatory requirements for stormwater runoff from certain CII facilities in the Dominguez Channel/Greater Los Angeles and Long Beach Harbor Watershed and the Los Cerritos Channel/Alamitos Bay Watershed to reduce pollutant levels in stormwater runoff that flows from these facilities.

Comments

1) *Purpose of Bill.* According to the author, "AB 2106 will modernize California's stormwater program by making several key changes to improve water quality while also reducing the compliance burden on permittees.

*"*First, AB 2106 will require the State Water Board to conduct a holistic review of the state's stormwater program aimed at improving environmental outcomes while lowering compliance costs. This process will incorporate feedback from all interested stakeholders and put the state back on track to restore our waterways.

*"*Second, AB 2106 will improve the State Water Board's data collection systems. The status quo puts the onus on permittees to collect large amounts of data, which can be expensive and time-consuming. But because the Water Board's existing data collection systems are so outdated, a large amount of that data can't ultimately be used. AB 2106 will create a simplified, streamlined data collection system that will reduce costs but improve results.

*"*Finally, AB 2106 will require the State Water Board to issue a new order regulating stormwater from facilities with large parking lots, rooftops, or other paved surfaces that are not currently regulated. A federal court ordered the Los Angeles region to address the toxic metals, oil, and grease coming off these parking lots in 2018, but the problem persists, leaving municipalities unfairly responsible for addressing pollution that they did not cause. Regulation of

stormwater from all sources will ensure that costs of compliance are distributed evenly across permittees and achieve better results for the environment.

"Together, these changes will ensure reductions in water pollution in California's most disadvantaged communities while simplifying the stormwater permitting process and reducing compliance costs on many permittees."

2) *Expanding stormwater management*. Currently, the State Water Board regulates stormwater discharge of MS4s, construction activities, and industrial activities under a NPDES permit. AB 2106 requires the State Water Board, contingent upon appropriation, to establish a statewide CII NPDES order for CII facilities with impervious surfaces that are significant contributors to pollutants to federally protected surface areas.

   Stakeholders point to the potential for overlap between industrial activities that are currently covered by a GPI permit and the industrial activities that would be covered by the CII permit. This will likely be resolved by the State Water Board through the regulatory process, which includes stakeholder participation. Additionally, the bill explicitly prohibits stormwater permittees from being regulated by more than one permit for the same facility.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- One-time costs of in the low millions of dollars (Waste Discharge Permit Fund [WDPF]) for the State Water Board to implement modernization of stormwater data collection systems, update existing stormwater permits for compliance, and report to the Legislature.

- One-time cost pressure in the low millions of dollars (General Fund or WDPF) for State Water Board staff resources to develop and implement the statewide CII permit, including administrative and legal support as well as staff resources to support the workshops as well as to conduct research and analyze the effects of existing stormwater permits on water quality compliance. The WDPF is supported by fee revenue from municipal local governments as well as businesses and other organizations undertaking certain construction and/or industrial activities. Existing law requires the State Water Board to adjust the fees annually to conform to the revenue levels set forth in the Budget Act. This bill could potentially result in future fee increases in order to offset Water Board costs. It could also create General Fund cost pressures to offset fee increases.

- To the extent the implementation and enforcement of the statewide CII order results in non-absorbable workload at the State Water Board, this bill could result in additional ongoing costs (WDPF and General Fund). Costs and any related fee increases could potentially be at least partially offset by revenue from fees on the new CII permits once issued. Staff also notes that the recommendations of the report that would be required by this bill are likely to result in ongoing cost pressures, especially given the requirement to include a recommendation on dedicated stormwater funding to supplement local programs.

ARGUMENTS IN SUPPORT: According to the Santa Clara Valley Water District, "Currently, California's stormwater program does not regulate discharge from commercial, industrial, and institutional sources, even though the effluent from these large commercial and industrial facilities largely contribute to stormwater pollution. Establishing a statewide order would bring greater enforcement and regulation of pollution, would further contribute to the sustainable management and use of stormwater, would promote source control, and would help to identify sources of dedicated and supplemental stormwater funding."

ARGUMENTS IN OPPOSITION: According to the California Chamber of Commerce, "The permit required by AB 2106 will apply to an unknown number of entities, but likely hundreds of private and public entities throughout the state. The scope of affected entities is unbounded. This, in turn, means that the State Water Board will be burdened with an enormous regulatory program that would need to be developed from the ground up, implemented, and enforced. This program will bring a huge number of entities and facility types that were not previous permitted by the State water Board and will require significant resources to administer."

SUBJECT: Clinical laboratory testing

SOURCE: Author

DIGEST: This bill proposes an urgency measure which to expand the clinical laboratory practice of licensed clinical genetic molecular biologist scientists to include molecular biology techniques to perform a clinical laboratory test or examination for the detection of any disease affecting humans.

Senate Floor Amendments of 8/23/22 remove language authorizing a trained adult to perform CLIA-waived infectious disease tests, and allow a person licensed as a clinical genetic molecular biologist scientist, instead of a person licensed as a clinical genetic molecular biologist, to use molecular biology techniques to perform a clinical laboratory test or examination for the detection of any disease affecting humans. Amendments also resolve chaptering conflicts with SB 1267 (Pan).

ANALYSIS: Existing federal law establishes CLIA and defines a clinical laboratory as a facility for the analysis of materials derived from the human body

in order to assess the health of, or to diagnose, prevent, or treat disease of, human beings. (42 United States Code (USC) § 263a(a))

Existing state law:

1) Provides for the licensure, registration, and regulation of clinical laboratories and various clinical laboratory personnel by the California Department of Public Health (CDPH), with specified exceptions. (BPC §§ 1200-1327)

2) Defines "CLIA" as the federal Clinical Laboratory Improvement Amendments of 1988 (United States Code, Title 42, § 263a; Public Law 100-578) and the regulations adopted by the federal Health Care Financing Administration (HFCA) that are effective on January 1, 1994, or later when adopted by the CDPH after being deemed equivalent to or more stringent than California laws or regulations, as specified. (BPC §§ 1202.5(a), 1208(b))

3) Defines "clinical laboratory" as any place used, or any establishment or institution organized or operated, for the performance of clinical laboratory tests or examinations or the practical application of the clinical laboratory sciences. (BPC § 1206(a)(8))

4) Prohibits any person from performing a clinical laboratory test classified as waived under CLIA unless performed under the overall operation and administration of the laboratory director and the test is performed by specified licensees or individuals outlined in statute. (BPC § 1206.5)

5) Defines "clinical chemist scientist," "clinical microbiologist scientist," "clinical toxicologist scientist," "clinical immunohematologist scientist," "clinical genetic molecular biologist scientist," "clinical cytogeneticist scientist," and "clinical histocompatibility scientist" means any person, other than a person licensed to direct a clinical laboratory, or licensed as a clinical laboratory scientist or trainee, licensed by the CDPH to engage in, or to supervise others engaged in, limited to the person's area of specialization. (BPC § 1210)

6) Specifies the limitation of each category of specialty or subspecialty, including:

    a) For a person licensed as a clinical microbiologist scientist, the specialty of microbiology and the subspecialties of bacteriology, mycobacteriology, mycology, parasitology, virology, or molecular biology and serology for diagnosis of infectious diseases, or other specialty or subspecialty specified by regulation adopted by CDPH. (BPC § 1210(b)(2))

b) For a person licensed as a clinical genetic molecular biologist scientist, the subspecialty of molecular biology related to the diagnosis of human genetic abnormalities within the specialty of genetics, or other specialty or subspecialty specified by regulation adopted by CDPH. (BPC § 1210(b)(4))

This bill:

1) Authorizes a clinical genetic molecular biologist scientist to additionally use molecular biology techniques to perform clinical laboratory testing or examination for the detection of any disease affecting humans.

2) Adds a section to this bill which also incorporates amendments to BPC § 1210 proposed by both this bill and SB 1267. This section of this bill shall only become operative if (a) both bills are enacted and become effective on or before January 1, 2023, (b) each bill amends BPC § 1210, and (c) this bill is enacted after SB 1267, in which case Section 1 of this bill shall not become operative.

3) Specifies that this act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the California Constitution and shall go into immediate effect. This urgency statute is required in order to maintain the health care workforce necessary to continue to administer and process tests for the COVID-19 virus if the Governor's Emergency Order relating to the COVID-19 global pandemic expires or is rescinded, it is necessary for this act to take effect immediately.

Background

Federal and State Regulation for Clinical Laboratory Testing. A facility that performs laboratory tests on human specimens for diagnosis or assessment must be certified under CLIA. CLIA certification requirements vary depending on the complexity of the laboratory tests performed.

Clinical laboratories or other testing sites need to know whether each test system used is waived, moderate, or high complexity. In general, the more complicated the test, the more stringent the requirements, including increased training and licensing of laboratory personnel. At a minimum, all laboratories must have a licensed clinical laboratory director. The FDA determines the complexity of CLIA laboratory tests. Waived tests are simple tests with a low risk for an incorrect result. They include tests listed in the CLIA regulations, tests cleared by the FDA for home use, and tests approved for waiver by the FDA using the CLIA criteria. Tests not classified as waived are assigned a moderate or high complexity category

based on seven criteria given in the CLIA regulations, including ease of use, knowledge required, and types of materials tested. For commercially available FDA-cleared or approved tests, the test complexity is determined by the FDA during the pre-market approval process.

While CLIA establishes minimum federal standards, it allows states to enact more stringent state law requirements. At the federal level and in California, anyone may perform a waived test in a licensed laboratory or as part of a nondiagnostic health assessment program under the overall direction of a laboratory director, unless otherwise limited. In applying for a CLIA certificate of waiver, the laboratory director must list the types of analytes to be tested, the tests performed, and the test manufacturer.

According to the American Society for Clinical Laboratory Science (ASCLS), 11 states, including California, and Puerto Rico require licensure of clinical laboratory personnel. In California there are around 28,500 licensed laboratory personnel, with a projected increase to 34,400 by 2028.

California Department of Public Health (CDPH) and Laboratory Field Services. CDPH regulates clinical laboratories that analyze human specimens such as blood, tissue and urine through Laboratory Field Services (LFS). The mission of LFS is to "ensure quality standards in clinical and public health laboratories and laboratory scientists through licensing, examination, inspection, education, and proficiency testing." This branch of CDPH is a fee-supported program that sets requirements for education and training, including the approval of training programs and national certification examinations. Also included in their duties is the issuing of licenses for clinical laboratory: trainees, technicians, scientists, and laboratory directors.

Molecular Biology and Microbiology. California law limits the practice of clinical laboratory licensees to the specific scientific disciplines outlined by their license type, rather than by testing technique. This bill would authorize a licensed clinical genetic molecular biologist scientist to perform laboratory tests related to molecular biology within microbiology, which is currently limited to licensed clinical microbiologist scientists.

Molecular biology studies biology on a molecular level, including the structure, function, and makeup of biologically important molecules such as proteins (enzymes, antibodies, structural proteins, etc.), neurotransmitters, hormones, genes and genetic material, and other molecules of interest.

Genetic molecular biology is a subspecialty of molecular biology which focuses on the study of genes and genetic material such as DNA and RNA, its cellular activities such as DNA replication, and its influence in determining the overall makeup of an organism. In clinical laboratories, genetic molecular biologists assess biological specimens such as blood, saliva, tissues, etc. to detect genetic abnormalities, genetic indicators for disease risk, and monitoring of genetic changes due to disease. Genetic molecular biologists use techniques such as polymerase chain reaction (PCR), genetic sequencing, and other biological assays.

Microbiology is the study of microscopic organisms, such as bacteria, viruses, archaea, fungi, protozoa, and parasites. Clinical microbiology studies infectious organisms so that infections can detected, prevented, and treated in patients. Many of the laboratory tests used by microbiologists are molecular tests to detect biologically relevant molecules associated with a pathogen or other infectious organism. For example, PCR tests are commonly used to detect the presence of genetic material associated with viruses, such as the SARS-CoV-2 virus which causes COVID-19, and high-throughput PCR testing protocols (such as real-time PCR) can also be used to spot mutations and genetic variants in a virus.

Despite both genetic molecular biologist scientists and microbiologist scientists using similar clinical laboratory techniques, California law stipulates that these two licensee types may only engage in, or supervise others engaged in, tests relevant to their specific type, rather than testing technique. Therefore, a microbiologist scientist may perform or supervise techniques such as PCR only in the context of microbiology, and a genetic molecular biologist scientist may only perform or supervise PCR to diagnose human genetic abnormalities.

Executive Order N-25-20. To increase the testing capacity of the clinical laboratory workforce during the COVID-19 pandemic, the Governor waived the certification and licensure requirements relating to public health microbiology and, among other things, the limitations related to specialties and subspecialties, allowing anyone qualified to perform high-complexity tests under CLIA to perform high complexity tests within any specialty. This order specifically allowed all such qualified clinical laboratory personnel who are performing analysis of samples to test for SARS-CoV-2, the virus that causes COVID-19, in any certified public health laboratory or licensed clinical laboratory. Once the order is lifted, clinical genetic molecular biologists will no longer be able to perform molecular testing ordinarily limited to microbiologists, such as testing for the SARS-CoV-2 virus.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, CDPH anticipates costs of approximately $260,000 to develop regulations.

SUPPORT: (Verified 8/22/22)

Biocom California
California Life Sciences
Helix
Invitae Corporation
Primary.Health
Public Health Institute

OPPOSITION: (Verified 8/22/22)

California Association for Medical Laboratory Technology

ARGUMENTS IN SUPPORT: Biocom California and Helix write in support and note, "Executive Order N-25-20 suspended the Business and Professions Code provisions to permit all persons who meet the requirements for high complexity testing and who are performing analysis of samples to test for SARS-CoV-2, the virus that causes COVID-19, in any certified public health laboratory or licensed clinical laboratory. Now with the public health emergency coming to a close, we know that we must have a ready workforce to respond during surges in testing but we cannot support a workforce dedicated solely to COVID-19 testing alone….

"To be able to quickly respond to surges and maintain baseline COVID-19 testing for employers, schools, large events, and even community-based testing, codifying the executive order to allow Clinical Genetic Molecular Biological Scientists (CGMBS) to continue to have the authority to process and supervise molecular testing, is a responsible next step. CGMBS have the same academic credentials and are highly trained in all aspects of clinical molecular testing. This separates them from microbiologists and generalists in their ability to design, run and control molecular assays, which is necessary for core work in human genetics.

"Anticipating the need to perform molecular testing during surges and to continue baseline testing, without the need to maintain two separate workforces–one for COVID and one for core business lab operations is a critical part of the continued response to COVID-19. Updating the Business and Professions Code to include molecular testing under the licensure of Clinical Genetic Microbiologists is a simple, yet significant step to keep us prepared and reflect the way modern lab testing is conducted."

Supporters also note that with the rise of COVID-19 and the need for preparedness for future waves and pandemics, this bill will allow for trained scientists to step in to assist with necessary laboratory testing.

ARGUMENTS IN OPPOSITION: The California Association for Medical Laboratory Technology (CAMLT) wrote in opposition to a previous version of this bill, and stated, "The molecular assays for infectious diseases are likely to be the exact same test methods (in most cases PCR or qPCR) that are high complexity for human genetic diseases. It would seem reasonable that the Clinical Genetic Molecular Biologist (CGMB) scientist scope of practice be expanded to include the performance of all clinically relevant molecular biology tests such as infectious disease testing by molecular techniques if in fact their education, training and exam are equivalent with respect to Molecular Biology when compared to other licensed scientist categories currently permitted to perform such testing. However, current amendments to BPC 1207 do not expand the CGMB scientist scope of practice to include the performance of molecular tests for infectious agents of disease but in fact would expand their scope of practice to direct a microbiology laboratory. CGMB scientists are not qualified to direct clinical microbiology laboratories. Therefore, CAMLT opposes the proposed amendments to BPC 1207.

"CAMLT proposes that amendments to BPC 1210 be made instead that would allow CGMB scientists to perform molecular tests for infectious agents of disease but not allow for directorship of clinical microbiology laboratories.

"CAMLT opposes all amendments to BPC 1206.5. According to the Assembly bill analysis dated March 31, 2022, Public Health Institute (PHI) argues that parents of school children unable to self-swab are prohibited from collecting and performing tests on their own children. That is simply not true. Under BPC 1241(b)(7), any individual is authorized to perform clinical laboratory tests or examinations, approved by the federal Food and Drug Administration for sale to the public without a prescription in the form of an over-the-counter test kit, on their own bodies or on their minor children or legal wards."

SUBJECT: Water policy: environmental justice: disadvantaged and tribal communities

SOURCE: California Coastkeeper Alliance

DIGEST: This bill requires the California State Water Resources Control Board (State Water Board) to make programmatic findings on potential environmental justice, tribal impact, and racial equity considerations when issuing regional or statewide plans or policies, waste discharge requirements, or waivers of waste discharge requirements and to hire environmental justice and tribal coordinators to assist with this work.

Senate Floor Amendments of 8/25/22 remove the requirement for the State and Regional Water Boards to ensure at least one of their members have specialized

experience with environmental justice and tribal communities. They also made minor clarifying changes to the requirements for programmatic findings.

ANALYSIS:

Existing law:

1) Creates, within the California Environmental Protection Agency (CalEPA), the State Water Resources Control Board (State Water Board) consisting of five members appointed by the Governor and subject to confirmation by the State Senate. One of the members appointed must be an attorney qualified in the fields of water supply and water rights, one must be a registered civil engineer qualified in the fields of water supply and water rights, one must be a registered professional engineer who is experienced in sanitary engineering and is qualified in the field of water quality, and one only must be qualified in the field of water quality. One of the appointed members must also be qualified in the field of water supply and quality relating to irrigated agriculture. One member shall not be required to have specialized experience. (Water Code (WC) § 175)

2) Requires, pursuant to the California Safe Drinking Water Act (SDWA), State Water Board to administer provisions relating to the regulation of drinking water to protect public health, including conducting research and demonstration programs relating to the provision of a dependable, safe supply of drinking water, enforcing the federal SDWA, adoption of enforcement regulations, and conducting studies and investigations to assess the quality of water in domestic water supplies. (Health and Safety Code (HSC) § 116275 et seq.)

3) Prohibits the discharge of pollutants to surface waters unless the discharger obtains a permit from State Water Board. (WC § 13000, et seq.)

4) Creates nine Regional Water Boards each of which consist of seven members appointed by the Governor, and subject to confirmation by the State Senate. Each member shall be appointed on the basis of their demonstrated interest or proven ability in the field of water quality, including water pollution control, water resource management, water use, or water protection. (WC § 13201)

5) Delegates to California's Regional Water Boards the ability to adopt water quality standards within their region of jurisdiction. (WC § 13240)

6) Requires a Regional Water Board to prescribe requirements for any proposed discharge, existing discharge, or material change in an existing discharge, except discharges into a community sewer system, with relation to the

conditions existing in the disposal area upon or receiving waters into which the discharge is made or proposed. (WC § 13269 et seq.)

7) Defines "environmental justice" as the fair treatment and meaningful involvement of people of all races, cultures, incomes, and national origins, with respect to the development, adoption, implementation, and enforcement of environmental laws, regulations, and policies. (Public Resources Code § 30107.3)

8) Defines "disadvantaged community" as the entire service area of a community water system, or a community therein, in which the median household income is less than 80 percent of the statewide annual median household income level. (HSC § 116275)

This bill:

1) Defines, for the purpose of this legislation:

   a) "Meaningful civic engagement" to include:

      i) Providing opportunities for people to participate in decision making processes about activities that may affect their environment or health and to contribute to the State Water Board's and Regional Water Boards' decision making;
      ii) Seeking out and facilitating the involvement of people potentially affected by the decisions and taking into account community concerns; and
      iii) Informing disadvantaged and tribal community members of opportunities to be appointed to advisory or decision making bodies.

   b) "Tribal community" as a community within a federally recognized California Native American tribe or nonfederally recognized Native American Tribe on the contact list maintained by the Native American Heritage Commission.

2) Requires that outreach to identify issues of environmental justice should begin as early as possible in State or Regional Water Board planning, policy, and permitting processes.

3) Requires the State Water Board and Regional Water Boards to engage in equitable and culturally relevant community outreach and engagement to promote meaningful civic engagement from potentially impacted communities

of proposed discharges of waste that may have disproportionate impacts on water quality in disadvantaged and tribal communities.

4) Requires the State Water Board and Regional Water Boards to hire environmental justice and tribal community coordinators, upon appropriation by the Legislature, responsible for:

   a) Adhering to environmental justice goals, policies, and objectives;
   b) Promoting meaningful civic engagement in the public decision-making process;
   c) Informing water quality control plans and state policies for water quality control and waste discharge requirements or waivers of waste discharge requirements that address water quality impacts that occur disproportionately in disadvantaged communities; and
   d) Soliciting community recommendations for future projects to be listed on the Regional Water Boards' supplemental environmental project lists.

5) Requires the State Water Board, contingent to a specific appropriation, to:

   a) Direct resources for training of state and Regional Water Board staff to advance adherence to environmental justice goals and policies adopted by the State Water Board and Regional Water Boards;
   b) Establish a community capacity-building stipend program to promote meaningful civic engagement by disadvantaged and tribal communities in the State Water Board and Regional Water Boards' decision-making process; and
   c) Develop program-specific tools to better identify, and State Water Board and Regional Water Boards' compliance assessment and enforcement actions in, disadvantaged communities.

6) Requires the State Water Board and Regional Water Boards to make a concise programmatic findings on potential environmental justice, tribal impact, and racial equity considerations when adopting or amending water quality control plans or state policies for water control. The finding shall:

   a) Be based on readily available information identified by staff or raised during the public review process;
   b) Include a concise summary of the anticipated water quality impact on these communities as well as any environmental justice concerns previously raised by to the applicable Water Board that are within the Board's authority;

c) Identify measures available and within the Water Boards' authority to address the impacts of the activity or facility in a disadvantaged or tribal community.

7) Requires a finding with the same components as the ones in 7) when issuing or reissuing regional or statewide waste discharge requirements or individual waivers if it may impact a disadvantaged or tribal community and includes a time schedule for achieving an applicable water quality objective or other permit exemption for achieving applicable water quality objectives.

Background

1) *Many disadvantaged communities have difficulty accessing the policy-making process, reducing its efficacy.* Meaningful public participation is essential to good governing because it can provide new and more comprehensive information and enhances the democratic legitimacy and accountability of the process. California has several good-governance policies in place to encourage meaningful civic engagement during the rulemaking and legislative process.

However, many of these mechanisms require expenditures of time or acquisition of expertise that can be difficult for disadvantaged communities to access. As described in the 2018 report "Public Engagement with Agency Rulemaking" by the Administrative Conference of the United States (ACUS), research has shown it is primarily regulated entities, industry groups, professional societies, and public interest organizations that have sufficient resources to make full use of these engagement opportunities. For example, a 2011 study of U.S. Environmental Protection Agency (EPA) records from 1994 to 2009 found that, on average, industry groups engaged in 170 times more informal communications with EPA than public interest players.

These barriers are particularly difficult for disadvantaged communities to overcome, both due to lack of resources and differences in the types of expertise that have historically been valued by decision makers. In order to address this problem, ACUS provides several recommendations including targeted outreach to communities to facilitate participation by both experts and members of the public who do not typically participate in rulemaking. The report also suggests "agencies should consider using personnel with public engagement training and experience to participate in both the development of their general public engagement policies as well as in planning for specific rules."

2) *State Water Board Racial Equity Resolution.* The State Water Board adopted its Racial Equity Resolution (#2021-0050) by a unanimous five to zero vote on November 16, 2021. The Racial Equity Resolution cites the California Environmental Protection Agency's 2021 Pollution and Prejudice StoryMap and CalEnviroScreen data that demonstrate that historically redlined neighborhoods are "generally associated with worse environmental conditions and greater population vulnerability to the effects of pollution today" and that Black, Indigenous, and people of color are overrepresented in the neighborhoods that are the most environmentally degraded.

   The Resolution acknowledged that historically redlined neighborhoods are generally associated with worse environmental conditions and greater population vulnerability to the effects of pollution today, and that Black, Indigenous, and people of color are overrepresented in the neighborhoods that are the most environmentally degraded. In the resolution, the State Water Board committed to making racial equity, diversity, inclusion and environmental justice central to its work, and reaffirmed its commitment to the protection of public health and beneficial uses of water bodies in all communities, and particularly in disadvantaged communities.

Comments

1) *Purpose of this bill.* According to the author, "Environmental justice requires that all communities are actually represented by their government, that decision makers genuinely engage with and consider community interests, and enforcement is equal for all. When communities are deprived of these opportunities, they are unable to advocate for themselves or guard against harmful environmental consequences. As a result, low-income communities of color that have historically been disregarded and bear disproportionately larger environmental burdens.

   "Through AB 2108, environmental justice will have a permanent home at the State and Regional Water Boards. This bill will reduce barriers to community engagement, and will mandate transparent environmental justice considerations at key steps in permitting processes. These changes will ensure that the interests of environmental justice and tribal communities are considered at the state and regional Water Boards. For too long, underserved Californians have disproportionately suffered from polluted waters. This bill will help put California on the path to achieve clean water for all."

2) *Will fee payers shoulder the costs if appropriations end?* The environmental justice and tribal community coordinator positions and other environmental

justice activities added by this bill is contingent upon appropriation. The State Water Board is largely a fee-supported agency. While it currently receives some general fund monies, history has shown that when general fund revenues are short, general fund monies in Natural Resources and Environmental Protection Agencies are among the first to be cut. This calls into question the permanence of such programs should they be initially funded.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The Water Board estimates ongoing costs of $13.5 million annually (General Fund or special funds) for the preparation and review of the environmental justice, tribal impact, and racial equity findings to be required for waste discharge requirements and plans and policies involving water quality control; and, community outreach required under AB 2108.

- The Water Board estimates additional one-time costs of $15.6 million over five years (General Fund or special funds) to develop program-specific enforcement tools to prioritize actions in disadvantaged communities.

- Enactment of this bill would result in unknown ongoing cost pressure, likely in the hundreds of thousands to low millions of dollars (General Fund or special funds), for the Water Board to create environmental justice and tribal community coordinator positions and a community capacity-building stipend program.

ARGUMENTS IN SUPPORT: According to the California Coastkeeper Alliance, "AB 2108 will continue to improve environmental justice at California's water boards through three approaches: (1) requiring that one member of the State Water Board and each regional board has environmental justice or tribal expertise, (2) ensuring that waterboards proactively reduce barriers to meaningful community engagement by increasing outreach and reprioritizing enforcement in low-income areas, and (3) requiring transparency regarding environmental justice considerations at key steps in the planning and permitting processes.

"By requiring one member of the State Water Board and each regional board has environmental justice or tribal expertise, AB 2108 will ensure that environmental justice principals and tribal advocacy are permanently housed within the waterboard decision-making bodies. Similarly, building community capacity lowers barriers to civic engagement and increase representation at the water boards. And, by requiring early environmental justice considerations for project

planning and permitting, AB 2108 will carry environmental justice issues throughout water board decision-making processes."

ARGUMENTS IN OPPOSITION: According to the Agricultural Council of California, "As a preliminary matter, AB 2108 seeks to require the appointment of a disadvantaged or tribal community candidates with experience in advocating for the disadvantaged communities or tribal rights of communities before the State Water Resources Control Board (State Board) and the regional water quality control boards (Regional Boards) (collectively, Water Boards). The organizations below take no position on these proposed amendments. However, it is worth noting that such amendments are not necessary as the Governor already maintains discretion to ensure that such appointments are made to all Water Boards.

"The imposition of new requirements and positions on the Water Boards are ongoing expenses, thus require continuous appropriations. As drafted, AB 2108 includes a contingency upon appropriation, but fails to include a continuous appropriation. If these positions and programs fail to be continuously appropriated by the Legislature, water quality fees would be increased to cover these new positions and programs, which are for the public benefit and not directly associated with the Water Board's primary responsibilities in administering the water quality permitting programs."

SUBJECT: Mobile stroke units

SOURCE: Los Angeles County Board of Supervisors

DIGEST: This bill defines "mobile stroke unit" as a multijurisdictional mobile facility that serves as an emergency response critical care ambulance under the direction and approval of a local emergency medical services agency, and as a diagnostic, evaluation, and treatment unit, providing radiographic imaging, laboratory testing, and medical treatment under the supervision of a physician in person or by telehealth, for patients with symptoms of a stroke, to the extent consistent with any federal definition of a mobile stroke unit, as specified in federal law.

Senate Floor Amendments of 8/25/22 move the definition of "mobile stroke units" from the licensing provisions of the California Department of Public Health to the Emergency Medical Services Act under the jurisdiction of the Emergency Medical Services Authority.

ANALYSIS:

Existing federal law:

1) Requires, for purposes of payment under the Medicare program, payment for telehealth services that are furnished via a telecommunications systems by a practitioner. For purposes of treatment of stroke via telehealth services, permits an "originating site," which is the site at which the eligible telehealth individual is located at the time the service is furnished, to include any mobile stroke unit. [42 USC §1395(m)(6)]

2) Defines "originating site," for purposes of Medicare payment of telehealth services, as including a "mobile stroke unit" only for purposes of diagnosis, evaluation, or treatment of symptoms of an acute stroke. [42 CFR §410.78(b)(3)(xi)]

Existing state law:

1) Establishes the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act (EMS Act) to provide for a statewide system for emergency medical services (EMS), and establishes the Emergency Medical Services Authority (EMSA), which is responsible for the coordination and integration of all state activities concerning EMS, including the establishment of minimum standards, policies, and procedures. [HSC §1797, et seq.]

2) Authorizes counties to develop an EMS program and designate a local EMS agency (LEMSA) responsible for planning and implementing an EMS system, which includes day-to-day EMS system operations. [HSC §1797.200, et seq.]

3) Requires every LEMSA to have a licensed physician as medical director, to assure medical accountability throughout the planning, implementation, and evaluation of the EMS system. Requires the medical direction and management of an EMS system to be under the medical control of the medical director. [HSC §1797.202, HSC §1798]

4) Requires every 911 system to include police, firefighting, and emergency medical and ambulance services. Requires every 911 system, in those areas in which a public safety agency provides ambulance emergency services, to

include such public safety agencies. Permits 911 systems to incorporate private ambulance services. [GOV §53110]

5) Establishes the Department of Managed Health Care to regulate health plans under the Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene Act) and the California Department of Insurance to regulate health insurance. [HSC §1340, et seq. and INS §106, et seq.]

6) Requires health plans and health insurers to provide basic health care services, including: physician services; hospital inpatient and ambulatory care services; diagnostic laboratory and diagnostic and therapeutic radiologic services; home health services; preventive health services; emergency health care services; including ambulance and ambulance transport services and out of area coverage; and, hospice care. Defines basic health care services to include ambulance and ambulance transport services provided through the "911" emergency response system. HSC §1345, INS §10112.281]

This bill defines "mobile stroke unit" as a multijurisdictional mobile facility that serves as an emergency response critical care ambulance under the direction and approval of a local emergency medical services agency, and as a diagnostic, evaluation, and treatment unit, providing radiographic imaging, laboratory testing, and medical treatment under the supervision of a physician in person or by telehealth, for patients with symptoms of a stroke, to the extent consistent with any federal definition of a mobile stroke unit, as specified in federal law.

Comments

1) *Author's statement.* According to the author, when a stroke comes, every second counts. The obstruction of traffic, construction, or adverse weather conditions can make the difference between life and death. In areas with MSUs, 911 dispatchers operate in tandem with healthcare providers to route first responders to callers. If a caller indicates that they are exhibiting stroke-like symptoms, an MSU team is sent to triage patients before they arrive at a hospital. This is essential to minimizing health complications for patients, as the longer a clot obstructs oxygen, the less likely it is that they will make a full recovery. Those who are above the age of 50 are more prone to having a stroke. These being are family members and friends that are aging. Or sometimes bad health falls upon us before old age. We need to normalize these services with our current health care system. These are the services that will provide for underserved areas and more that need attention to medical services. Opening the door for more well-rounded care as a whole.

2) *Background on strokes.* According to the National Institutes of Health, a stroke happens when there is a loss of blood flow to part of the brain. Your brain cells cannot get the oxygen and nutrients they need from blood, and they start to die within a few minutes. This can cause lasting brain damage, long-term disability, or even death. There are two types of stroke: the most common type is an ischemic stroke (more than 80% of strokes), which is when a blood clot blocks a blood vessel in the brain. Less common is a hemorrhagic stroke, which is caused by a blood vessel that breaks and bleads into the brain. A related condition is a transient ischemic attack, also called a "mini-stroke," when the blood supply is blocked for a short time. The damage to the brain cells isn't permanent, but a person who experiences a transient ischemic attack is at much higher risk of having a stroke. The primary risk factor for a stroke is high blood pressure, with other risk factors including diabetes, heart disease, smoking, family history, age, and race and ethnicity.

   For the more common ischemic strokes, medication can be given to dissolve the blood clot, known as tissue plasminogen activator (tPA). However, tPA is underutilized because the window for administering intravenous tPA is three hours, and many patients do not arrive to the hospital in time for this treatment. If this medication is given to someone suffering a hemorrhagic stroke, administering this medication could be fatal. Because of this, the standard of care is to immediately transport a patient experiencing stroke symptoms to a hospital, so that a CT scan can diagnose the type of stroke. This is where mobile stroke units can speed up care: by diagnosing an ischemic stroke while on the way to a hospital, allowing health care professionals to administer tPA immediately.

3) *Background on mobile stroke units.* There are currently two mobile stroke units (MSUs) operating in California. The UCLA Health MSU, and the Mills-Peninsula MSU operated by Sutter Health in San Mateo County. According to UCLA, its MSU was brought into service in 2017, and was the first of its kind on the west coast. The MSU is a specially-equipped ambulance, built with a mobile CT scanner, point-of-care lab tests, telehealth connection with a hospital, and stroke medications, all designed to deliver proven stroke therapies to patients faster than ever before. When a patient is having a stroke, every minute counts, and the faster patients are treated with appropriate medications, the better their health outcomes will be. The MSU is designed to take all of the care traditionally given in the emergency department of a hospital, and deliver it directly to stroke patients where they are, all before transporting the patient to

an approved stroke center for further care. UCLA states that MSUs first began in Germany in 2011, where it was shown that MSUs could deliver the same kind of safe, effective treatment to stroke patients, but nearly 30 minutes faster than through the traditional method of an ambulance transporting a patient to a hospital for their initial care. The Mills-Peninsula MSU was brought into service in December of 2018.

4) *CHBRP analysis of previous bill.* As introduced, this bill required health insurance coverage of MSU services, which was later amended out while the bill was still in the Assembly. A prior bill, AB 1254 (Gipson of 2021), which also would have required health insurance coverage of MSUs, was introduced in 2021, and while it was never set for hearing, a review was conducted by the California Health Benefits Review Program (CHBRP). AB 1996 (Thomson, Chapter 795, Statutes of 2002), requests the University of California to assess legislation proposing a mandated benefit or service and prepare a written analysis with relevant data on the medical, economic, and public health impacts of proposed health plan and health insurance benefit mandate legislation. CHBRP was created in response to AB 1996. CHBRP stated the following in its analysis of AB 1254:

   a) *Policy context.* California's 33 LEMSAs exercise most direct authority over the day-to-day operation of the state's EMS. LEMSAs set the maximum cost of ambulance transportation. The two LEMSAs with current MSU operations (Los Angeles County and San Mateo County) include policies that specify how MSUs operate within the local EMS delivery system.

   b) *Impact on expenditures.* CHBRP estimates no measurable fiscal impact or expected utilization increase due to this bill in the short term. CHBRP notes that: (1) the availability of MSUs in California will likely remain low; and, (2) existing MSUs have been largely reliant on grants and philanthropy. Even with the passage of this bill, their ability to recover costs may be constrained by the fee schedules set at the local level for emergency ground medical transport (EGMT). In addition, the population affected (mostly under age 65 years) has a low stoke incidence rate; therefore, CHBRP expects very low utilization over the long term even if MSUs were to increase. CHBRP considered the current use of MSUs with the understanding that of the 20 presently in the United States, few if any, presently bill commercial insurers. Medicare provides limited coverage for MSUs beyond the normal reimbursement for EGMT (under the telehealth benefit) and 66% of stroke hospitalizations occur in people over the age of

65. Presently, there are about 20 MSUs operating in the United States. CHBRP is aware of two MSUs currently in operation in California. The costs following enactment of this bill are a function of the increased supply and increased use of MSUs for non-Medicare stroke patients. CHBRP believes the increased supply of MSUs will be constrained by their initial investment and operating costs in relation to the reimbursement rate. Estimates of initial costs for MSUs are approximately $1 million each. Annual operating costs for each MSU are approximately $500,000 to $1.2 million. Limited reimbursement rates (with the likely finite number of eligible stroke patients) appear unlikely to cover the expected annual financial costs. For example, if emergency transport rates, controlled by each county in California, were similar to those for usual emergency transport rates, an MSU would not cover its costs. With current Medicare reimbursement, there are only a couple of MSUs in California. It seems unlikely that new reimbursement will be high enough to make investing in new MSUs attractive for the additional 34% of stroke patients (the non-Medicare stroke population). There may be other reasons to invest in more MSU capacity (e.g., a healthcare system might use it for advertising or as a loss leader), but this suggests modest investments in the supply of MSUs, congruent with no estimated impact on utilization or overall costs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Senate Appropriations Committee:

- The CA Department of Public Health (CDPH) estimates a one-time cost of $444,000 ((Licensing and Certification Fund) over three years to develop regulations outlining the mobile stroke unit definition.

- The Emergency Medical Services Authority (EMSA) estimates one-time General Fund costs of at least $182,000 in the first year and $175,000 in the second year to develop necessary regulatory changes.

SUPPORT: (Verified 8/11/22)

Los Angeles County Board of Supervisors (source)
American Heart Association
California Hospital Association

OPPOSITION: (Verified 8/11/22)

None received

ARGUMENTS IN SUPPORT: The Los Angeles County Board of Supervisors, sponsor of this bill, writes that throughout the United States, it is estimated that someone experiences a stroke every 40 seconds and providing care within the first hour can save a person's life. Strokes are the fifth leading cause of death in the nation and can contribute to long-term disability and reduce an individual's quality of life. MSUs are specially equipped ambulances that provide the care traditionally given in hospital emergency departments, and have built-in mobile CT scanners, point-of-care lab tests, and provide stroke medications. The MSU Care Team consists of a physician, often a neurologist specializing in stroke care, a critical care nurse, and a paramedic. There are an estimated 20 MSUs in the United States, and only two in California. UCLA Health is the first medical system in the Western United States to operate an MSU. When an individual within the MSU's response area calls 911 about a stroke, or with stroke-like symptoms, the MSU is immediately dispatched. Once treatment has been administered, the patient is transported to the emergency department with an approved stroke center for further care. The Los Angeles County MSU operates with support from UCLA Medical Center, philanthropic grants, private donations, and funding from Los Angeles County. MSUs provide lifesaving, cost effective care but face financial challenges because health insurance plans provide limited or no reimbursement, though reimbursement would be provided if the patient were directly transported to a hospital ED. Further, the specialized treatment stroke victims receive in the field may even reduce their hospitalization stay as well as the need for additional care, such as in a skilled nursing facility, thereby resulting in reduced costs to health plans.

SUBJECT: Reproductive health care

SOURCE: Ricardo Lara, California Insurance Commissioner
ACCESS Reproductive Justice
Essential Access Health
NARAL Pro-Choice California
National Health Law Program
Planned Parenthood Affiliates of California

DIGEST: This bill establishes the California Reproductive Health Equity Fund, and specifies that its purpose is to provide grant funding to safety net providers of abortion and contraception services through the California Reproductive Health Equity Program (Program) and to ensure affordability of and access to abortion

and contraception to anyone who seeks care in California, regardless of their ability to pay. This bill requires health plans and health insurers that provide coverage to employees of a religious employer that does not include coverage and benefits for abortion and contraception to provide enrollees with information regarding that lack of coverage and that services are available through the Program.

Senate Floor Amendments of 8/24/22 clarify that reduced cost services are required to be provided under the Program, in addition to no-cost services.

ANALYSIS:

Existing law:

1) Establishes the Reproductive Privacy Act, which prohibits the state from denying or interfering with a woman's right to choose or obtain an abortion prior to viability of the fetus, or when the abortion is necessary to protect the life or health of the woman. [HSC §123460, et seq.]

2) Replaces the Office of Statewide Health Planning and Development with the Department of Health Care Access and Information (HCAI), and requires HCAI to conduct a number activities related to workforce development, health planning, and data collection and dissemination related to pharmaceutical prices and health care payments. [HSC §127000, et seq.]

3) Establishes the Department of Health Care Services (DHCS) to administer the Medi-Cal program, which provides comprehensive medical coverage to low-income persons, and the Family PACT program, which provides comprehensive clinical family planning services and sexually transmitted disease (STD) screening and treatment to low income persons. [WIC §14000, et seq., WIC §14132, et seq.]

4) Establishes the State-Only Family Planning Program to provide family planning services for men and women, including emergency and complication services directly related to the contraceptive method and follow-up, and consultation and referral services. [WIC §24007]

5) Establishes the Department of Managed Health Care (DMHC) to regulate health plans under the Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene Act) and the California Department of Insurance (CDI) to regulate health and other insurance. [HSC §1340, et seq. and INS §106, et seq.]

6) Requires health plans and health insurers, except for a specialized health plan contract or a specialized health insurance policy, to provide coverage for all of the following services and contraceptive methods for women: (a) all Food and Drug Administration (FDA) approved contraceptive drugs, devices, and other products for women, including all FDA-approved contraceptive drugs, devices, and products available over the counter, as prescribed by the enrollee's or insured's provider; (b) voluntary sterilization procedures; (c) patient education and counseling on contraception; and, (d) follow-up services related to the drugs, devices, products, and procedures, including, but not limited to, management of side effects, counseling for continued adherence, and device insertion and removal. [HSC §1367.25 and INS §10123.196]

7) Prohibits a health plan or disability insurer from imposing a deductible, coinsurance, copayment, or any other cost-sharing requirement on the coverage provided pursuant to 6) above, except in the case of a grandfathered health plan. Prohibits cost sharing from being imposed on Medi-Cal beneficiaries for family planning services. [HSC §1367.25, INS §10123.196, WIC 14134(a)(5)]

8) Permits a religious employer to request a health plan contract or disability insurance policy without coverage for FDA-approved contraceptive methods that are contrary to the religious employer's religious tenets, and requires a health plan contract or disability insurance policy to be provided without coverage for contraceptive methods, if requested. HSC §1367.25 and §10123.196]

9) Requires health plans and health insurers that cover hospital, medical, and surgical benefits to include a statement in a prominent location on any provider directory and in a conspicuous place in other forms as follows:

> Some hospitals and other providers do not provide one or more of the following services that may be covered under your plan contract and that you or your family member might need: family planning; contraceptive services, including emergency contraception; sterilization, including tubal ligation at the time of labor and delivery; infertility treatments; or abortion. You should obtain more information before you enroll. Call your prospective doctor, medical group, independent practice association, or clinic, or call the health plan at (insert the health plan's membership services number or other appropriate number that individuals can call for assistance) to ensure that you can obtain the health care services that you need. [HSC §1363.02 and INS §10604.1]

This bill:

California Reproductive Health Equity Fund and Program

1) Establishes the California Reproductive Health Equity Fund (Fund), and specifies that the purpose of the fund is to provide grant funding to safety net providers of abortion and contraception services through the Program and to otherwise ensure affordability of and access to abortion and contraception to anyone who seeks care in California, regardless of their ability to pay for care. Requires the Fund to also be used to pay for the cost of administering the Program and for any other purpose authorized under this bill. Requires the level of expenditure by HCAI for administrative support of the Program to be subject to review and approval annually through the annual budget process. Permits HCAI to receive private donations to be deposited into the Fund. Continuously appropriates the money in the Fund to HCAI for the purposes of this bill and requires HCAI to manage the Fund prudently in accordance with the law.

2) Specifies that the purpose of the Program is to ensure abortion and contraception are affordable for and accessible to all patients, regardless of their ability to pay, and to provide financial support for safety net providers of these services to offset the costs of providing uncompensated care to patients with low incomes who would otherwise lack access to care.

3) Permits Medi-Cal providers to apply for a grant, and a continuation award after the initial grant, if they agree to provide abortion and contraception services in accordance with the following:

    a) The abortion and contraception services provided are within the provider's scope of practice and licensure;

    b) The provider agrees to be identified, in a manner determined by HCAI, as a participating provider in the Program. Prohibits an institutional provider from being required to identify any individual who is an abortion provider as a condition of a grant;

    c) Requires the services, to the extent they are covered by Medi-Cal, to be provided at no cost, or a reduced cost, to an individual with a household income at or below 400% of the federal poverty level (FPL) who meets both of the following criteria: (i) is uninsured or has health care coverage that does not include both abortion and contraception; and, (ii) is not

otherwise eligible to receive both abortion and contraception at no cost through the Medi-Cal and Family PACT programs.

4) Requires an individual's self-declaration of income and source of health care coverage made to the provider at the time of service to be all that is required to determine whether the individual may be able to access no-cost or reduced-cost services pursuant to this bill.

5) Provides that this bill does not require a provider to accept additional patients if, in the reasonable professional judgment of the provider, accepting additional patients would endanger access to, or continuity of, care for existing patients.

6) Requires HCAI to work with DHCS to notify Medi-Cal enrolled providers of the availability of this funding, including any pertinent deadlines and other requirements.

7) Requires HCAI to develop an application form and begin accepting applications for grants by January 1, 2023. Requires an application for a grant, and any continuation award, to be made on the form developed by HCAI. Requires an application to include:

   a) A justification of the amount of grant funds requested, including both of the following:

      i) The cost of uncompensated abortion and contraceptive services the applicant provided to patients with household incomes at or below 400% FPL in the previous 12 months; and,

      ii) The anticipated cost of uncompensated abortion and contraception services to be provided to patients with household incomes at or below 400% FPL in the upcoming 12 months; and,

   b) Other pertinent information that HCAI requires.

8) Requires the cost of uncompensated abortion and contraception services to:

   a) Be calculated based on the amount the provider would expect to receive for providing these services to a patient enrolled in the Medi-Cal program; and,

   b) Include those services provided through prescription, including laboratory and pharmaceutical, as well as services that are the result of complications related to services, to the extent they would be covered by Medi-Cal.

9) Prohibits HCAI from requiring the submission of personal information about individuals receiving uncompensated abortion and contraception services as part of an application. Requires information to only include information in summary, statistical, or other forms that do not identify particular individuals. Exempts applications for grants and continuation awards from disclosure under the California Public Records Act.

10) Permits HCAI, within the limits of funds available, to award grants that best promote the purposes of the Program, taking into account:

    a) The extent to which abortion and contraception services are needed locally;

    b) The ability of the applicant to advance health equity; and,

    c) The relative need of the applicant.

11) Requires HCAI to determine the amount of an award on the basis of the amount of funds requested. Requires an initial grant to be for a 12-month period, unless otherwise specified by HCAI. Requires the determination of a grant award to be made within 60 days of receipt of a completed application.

12) Requires decisions regarding continuation awards and the funding level of those awards to be made after consideration of factors that include the recipient's anticipated level of need and the availability of funds. Requires a continuation award to be for a 12-month period, unless otherwise specified by HCAI.

13) Requires awarded funds to be expended solely for the purpose for which they were awarded, in accordance with the approved application and budget, implementation guidance issued by HCAI, and the terms and conditions of the grant or continuation award.

14) Requires HCAI to consult with interested parties, including the DHCS, DMHC, CDI, abortion and contraception providers, consumer advocates, and other stakeholders it deems appropriate.

15) Requires HCAI to conduct an evaluation of the Program and report its findings to the Legislature by July 1, 2024, and on an annual basis no later than each July 1 thereafter, as specified. Permits HCAI to use funds in the Fund for the evaluation of the program.

Health care coverage provisions

16) Requires health plans and health insurers that provide coverage to the employees of a religious employer that does not include coverage and benefits for both abortion and contraception to provide, in writing upon initial enrollment and annually thereafter upon renewal, each enrollee with information regarding:

    a) Abortion and contraception benefits or services that are not included in the enrollee's or health plan contract; and,

    b) Abortion and contraception benefits or services that may be available at no cost through the Program, which is established under this bill at HCAI.

17) Requires the Department of Industrial Relations (DIR), beginning January 1, 2023, to post on its website information regarding abortion and contraception benefits that may be available at no cost through Program to employees whose employer-sponsored health coverage does not include coverage for both abortion and contraception.

Miscellaneous

18) Includes a severability clause, so that if any provision of this bill is held invalid, that invalidity does not affect other provisions that can be given effect without the invalid provision.

19) Makes a finding and declaration that this bill imposes a limitation on the public's right of access to the meetings of public bodies or the writings of public officials and agencies and a finding that to protect confidential and personal medical information, it is necessary that grant applications be protected from public disclosure.

Comments

Author's statement. According to the author, this bill continues California's commitment to being a Reproductive Freedom State and a national leader in safeguarding and advancing reproductive freedom. This bill ensures that health care providers who provide abortions are fully compensated for their services. This bill is essential for ensuring that all people in California can access abortion care regardless of their insurance type and providers are supported. With the U.S. Supreme Court set to decide a case that could overturn *Roe v. Wade* later this year, it is critical that California has policy in place to meet this moment.

(NOTE: Please see policy committee analyses for more detailed background information.)

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Unknown General Fund costs, potentially tens of millions of dollars, to provide the grant funding. By creating a continuously appropriated fund, the bill would make an appropriation.

- HCAI estimates state operations costs of approximately $2 million General Fund over three years for a vendor to administer the program and $37,530 - $75,060 General Fund for staff to develop the contract and oversee the vendor.

- Minor and absorbable costs to DIR, DMHC and CDI.

OPPOSITION: (Verified 8/11/22)

California Catholic Conference
Concerned Women for America Legislative Action Committee
Department of Finance
Fieldstead and Company
Right to Life League

ARGUMENTS IN SUPPORT: Planned Parenthood Affiliates of California (PPAC), co-sponsor of this bill, writes that despite insurance coverage for abortion services, a gap still exists for employees of religious employers and employees of self-funded plans which may exclude these benefits. And many Californians without employer-based coverage earn too much to qualify for Medi-Cal, but not enough to make coverage under Covered California an option. While those with no insurance must still pay out-of-pocket. In 2022, there have been over 500 abortion restrictions introduced across 41 states. Also this year, the U.S. Supreme Court will decide on a case that directly challenges the constitutional right to abortion established under *Roe v. Wade*. If the Court upholds Mississippi's abortion ban, thereby overturning *Roe*, people in over half of the states across the country, over 36 million women and other people who may become pregnant, will lose access to abortion. In fact, millions of Texans are already experiencing this lack of access. Since Texas' SB 8 went into effect last fall, Texans needing abortion have been denied. The ban in Texas disproportionately impacts Black, Brown, Indigenous and other people of color, people with low-income, people living in rural areas, and other historically marginalized communities who are most likely to be forced to continue pregnancies against their will, rather than be able to travel to already overburdened clinics in neighboring states, like Oklahoma, making matters worse. Oklahoma politicians have since introduced several extreme abortion bans. According to a report released by the Guttmacher Institute, if *Roe v. Wade* is overturned, as many legal and health experts now anticipate, 26 states are certain or likely to ban abortion almost immediately, increasing the number of out-of-state patients who would find their nearest abortion provider in California from 46,000 to 1.4 million, an increase of nearly 3,000%. As California prepares to see patients seeking abortion services and reproductive health care in our state, we must invest in the providers and organizations that are assisting in access and already providing that care. For those that cannot afford the out-of-pocket cost for services, providers often offer sliding-fee scales and charity care as an option. In 2019, Planned

Parenthood health centers in California provided about $9 million of uncompensated care to patients. To support California's health care providers, this bill seeks to create the Program to provide financial support to safety net providers who offer reproductive and sexual health care services, specifically abortion and contraception, to people in California who are unable to pay out-of-pocket for services. PPAC is proud to offer reproductive health care to anyone who walks through the health centers doors. For providers to remain financially stable and available to Californians, particularly during a time when patients are forced to come to California, displaced by cruel restrictions in other states, the cost of uncompensated care must be addressed. With the support of state funded grants, California can continue to lead as a reproductive freedom state.

Ricardo Lara, California Insurance Commissioner, co-sponsor of this bill, writes that the issue of access to reproductive health and abortion services becomes even more urgent when discussing women of color. Women of color's access to abortion care is even more critical when considering the pervasive health disparities they face in comparison to white women. In nearly all aspects of reproductive health, women of color face poor health outcomes than white women, from maternal mortality rates to endometrial and cervical cancer. Additionally, women of color, particularly Black women, frequently have negative experiences in the health care system due to institutionalized racism and a history of control, coercion, and lack of bodily autonomy when it comes to their reproductive health and decision making. Health care providers and the system more broadly, must embrace a larger equity approach to reduce these disparities.

ARGUMENTS IN OPPOSITION: The California Catholic Conference (CCC) is opposed to abortion since it always takes the life of an innocent human being, with more than 132,000 lives lost each year in our state. Women deserve to be empowered with non-violent solutions to the challenges they face during pregnancy. However, this bill should also be rejected because it forces employers who object to abortion in conscience to pay yet another tax for abortion, beyond those paid into Medi-Cal and Family PACT. A majority of Americans oppose using tax dollars to pay for abortions. Furthermore, this bill compels speech from religious and non-religious employers by forcing them to advertise the options for abortion and contraception to their employees annually. The many employers who conscientiously object to abortion will have to advertise this very same moral violation against their most deeply held convictions. The right of conscience should not be abridged. There is no lack of access to abortion in California. The state already funds abortions through tax dollars, with over 400 facilities performing abortions, and abortions offered by nurse practitioners, nurse midwives, physician assistants, via telehealth, on college campuses, and through a

dozen sources by mail. CCC contends what California needs is equity for the choices of pregnant and parenting women as they pursue motherhood. California women face critical issues, including maternal mortality, infant mortality, lack of prenatal and postpartum care, housing, nutrition, transportation, childcare, immigration services, intimate partner violence, and unemployment. According to CCC, this bill further prejudices the choice of abortion over the choice of birth and parenting, serving to coerce marginalized, economically challenged women to have abortions they do not want.

ASSEMBLY FLOOR: 55-18, 5/25/22 - See last page for vote

SUBJECT: Net energy metering: construction of renewable electrical generation facilities: prevailing wage

SOURCE: California State Association of Electrical Workers
Coalition of California Utility Employees

DIGEST: This bill applies, after December 31, 2023, public works project requirements, specifically prevailing wages, for renewable energy installations that receive service through an electric utility's net energy metering (NEM) tariff, except as specified.

Senate Floor Amendments of 8/25/22 exempt existing public works project from the provisions of this bill, further exempt modular homes and multi-unit housing, and specify that a violation of the provisions of this bill must be "willful" in order to disqualify an eligible customer-generator from receiving service under the NEM tariff.

ANALYSIS:

Existing law:

1) Establishes and vests the California Public Utilities Commission (CPUC) with regulatory authority over public utilities, including electrical corporations. (Article XII of the California Constitution)

2) Requires every electric utility, defined to include; electrical corporations, local publicly owned electric utilities, and electrical cooperatives, to develop a standard contract or tariff for NEM, for generation by a renewable electrical generation facility, and to make this contract or tariff available to eligible customer-generators, until the total rated generating capacity used by eligible customer generators exceeds five percent of the electric utility's aggregate customer peak demand. (Public Utilities Code §2827)

3) Requires the CPUC, for a large electrical corporation, as defined, to have developed a second standard contract or tariff to provide NEM to additional eligible customer-generators in the electrical corporation's service territory and imposes no limitation on the number of new eligible customer-generators. (Public Utilities Code §2827.1)

4) Imposes various requirements on public works projects, including a requirement that, at minimum, all workers employed on a public works project be paid the general prevailing rate of per diem wages for work of a similar character in the locality in which a public work is performed. Defines "public work" to include, among other things, construction, alteration, demolition, or installation or repair work done under contract and paid for, in whole or in part, out of public funds. (Labor Code §1720)

5) Requires that not less than the general prevailing rate of per diem wages be paid to all workers employed on a "public works" project costing over $1,000 dollars and imposes misdemeanor penalties for violation of this requirement. (Labor Code §1771)

6) Requires that the applicable general prevailing rate of per diem wages be determined by the Director of the Department of Industrial Relations (DIR) for each locality in which the public work is to be performed and for each type of worker needed to execute the public works project. (Labor Code §1773)

7) Defines "Skilled and trained workforce" to mean a workforce where all the workers performing work in an apprenticeable occupation, as defined, in the

building and construction trades are either skilled journeypersons or apprentices registered in an apprenticeship program approved by the chief of the Division of Apprenticeship Standards. (Public Contract Code §2601)

8) Requires the CPUC to submit various reports to the Legislature. (Public Utilities Code §910, *et seq.*)

This bill:

1) Applies public works project requirements to the construction of any renewable electrical generation facility, and any associated battery storage, after December 31, 2023, that receives service pursuant to the 2nd standard contract or tariff for NEM, except a residential facility that will have a maximum generating capacity of 15 kilowatts (kW) or less of electricity or that will be installed on a single family home (2) a project that is already a public work under existing law, or (3) a facility that serves only a modular home, a modular home community, or multiunit housing that has 2 or fewer stories.

2) Requires a contractor who enters into a contract to perform work on the renewable electrical generation facility or associated battery storage to pay each construction worker employed in the execution of the work, at minimum, the general prevailing rate of per diem wages and each apprentice, at minimum, the applicable apprentice prevailing rate.

3) Authorizes enforcement mechanisms of the wage requirements.

4) Provides that, if a willful violation of this bill's requirements has been enforced against a contractor for the construction of a renewable electrical generation facility that was constructed in violation of the bill's requirements using those mechanisms, the facility is not eligible for to receive service pursuant to those standard contracts and tariffs.

5) Requires the CPUC to annually publish on its internet website and submit to the Legislature a report on the progress made to grow the use of distributed energy resources among residential customers in disadvantaged communities and in low-income households, and an aggregated list of all renewable electrical generation facilities that began to receive service pursuant to a NEM contract or tariff during the preceding calendar year.

Background

Net Energy Metering. Electric utility customers have long helped fund the cost of customer-sited electricity generation from renewable resources, which is largely

electricity generated by rooftop solar. The vast majority of rooftop solar customers are enrolled in NEM (NEM 1.0) or NEM Successor (NEM 2.0) tariffs, established under Public Utilities Code §§2827 and 2827.1, respectively. The NEM program supports onsite renewable energy (largely rooftop solar) installations designed to offset a portion, or all, of the customer's electrical energy usage. Under NEM, customers receive a bill credit (in dollars) based on the retail rate of electricity (including generation, transmission, and distribution rate components) for any excess generation (in kWh) that is exported back to the electric grid. In time periods when a customer's bill is negative (because the amount of energy the solar system exported to the electric grid exceeded the amount of energy consumed by the customer), the utility bill credits are carried forward up to one year, at which point customers may elect to receive net surplus compensation for any electricity produced in excess of on-site energy usage. Customers taking service under NEM 2.0 pay the cost to connect to the grid, take service on a "time-of-use" rate plan, and pay "non-bypassable" charges that are not offset with surplus energy credits.

New NEM tariff CPUC decision still pending. On August 2020, the CPUC initiated Rulemaking (R. 20-08-020) to develop a successor to the NEM 2.0 tariff, as part of the requirement in statute and a commitment in a previous decision to review the current tariff to address the shift in costs to nonparticipating customers. The CPUC released a proposed decision in December 2021. However, a revised proposed decision is pending as the CPUC is currently soliciting additional stakeholder comments.

Public works projects. Public works projects are, generally, those funded in part by public funds. All workers employed on public works projects must be paid the prevailing wage determined by the Director of the DIR, according to the type of work and location of the project. In California, the prevailing wage rate is an hourly rate paid on public works projects that is often set in the terms of a collective bargaining agreement. Prevailing wage creates a level playing field by requiring an across-the-board rate for all bidders on publically subsidized projects.

Rooftop solar wages. Residential rooftop solar installation does not currently require payment of the prevailing wage, as such, rooftop solar installers are generally making below the wage rate paid to other building and construction trade workers. According to the Bureau of Labor Statistics, Occupational Employment Statistics, the median hourly wage in 2015 for a solar installer was a little under $21 an hour. According to a UC Berkeley Labor Center report on solar jobs: "residential rooftop solar companies, whether they directly employ workers or subcontract out the work to other installation crews, essentially compete in the residential construction market where barriers to entry are low, unionized

contractors are absent, and contractors who comply with employment laws and building codes must compete with many who skirt these regulations. All of this puts downward pressure on wages."

Comments

AB 2143. This bill expands the application of "public works" definition to include NEM solar and associated battery storage installations greater than 15 kW that are not located on a single family home, modular home, two-story multi-unit housing, or is an existing public work project. This bill requires specified reporting by contractors to the CPUC and specified payroll reporting by the CPUC and enforcement mechanisms by the Labor Commissioner, workers, and others. This bill also requires the CPUC to report on the progress made to grow the use of distributed energy resources among residential customers in disadvantaged communities and low-income households.

Defining public works projects. As noted above, the mostly solar rooftop renewable energy projects subject to this bill compensate customers through a utility NEM tariff paid for by other electric utility customers. Although these projects are not necessarily funded by public dollars, the proponents of this bill argue that applying public works project definition and prevailing wage requirements is warranted as NEM projects over 15 kW tend to be the larger, commercial projects and rooftop solar installers should be compensated prevailing wages. Those in opposition to this bill argue that such an expansion of the application of public works definition will have a myriad of consequences, including misapplying public works to non-public funded projects, and slowing down California's clean energy goals by increasing costs of NEM projects. In data provided by a solar installation company for projects located in inland southern California, they allege that the potential costs increases of applying public works prevailing wages could result in quadrupling the contractors' costs associated with some of these projects. As currently drafted, this bill would expand the application of public works prevailing wage requirements mostly to commercial projects not currently subject to prevailing wage requirements, given that projects that receive public funding (such as schools, government buildings, etc.) would likely already defined as public works projects which require prevailing wages. In the case of non-public buildings, such as commercial buildings or multi-family residential buildings (greater than two-stories) it is not clear whether application of public works is warranted for projects that receive no explicit public funding, though they do receive a utility tariff compensation that is collected from other customers in the corresponding utility service territory.

NEM renewable energy systems over 15 kW. Based on data collected as part of the California Solar Initiative, the interconnection of all customer-sited renewable generating facilities has been tracked and updated on a regular basis. Based on this data, about three percent of the NEM systems interconnected to the three large electric investor-owned utilities are greater than 15 kW in size, with 3.6 percent in Pacific Gas & Electric (PG&E) service territory, and 2.5 percent in each of the territories of Southern California Edison (SCE), and San Diego Gas & Electric (SDG&E). In aggregate, across all three of these utilities, there are nearly 40,000 NEM connected systems greater than 15 kW of the nearly 1.3 million NEM connected systems.

Inland areas may require larger energy systems. California Solar and Storage Association notes that inland areas in California experience hotter temperatures and, therefore, average larger solar energy systems. They cite a statewide average of 7 kW for solar rooftop energy systems, but 8 kW for areas such as Fresno. They express concerns that the increased costs for prevailing wages will make solar rooftop energy less accessible to inland communities.

Buyer beware. Among its enforcement provisions, this bill prohibits a customer with a renewable electrical generation facility for which a willful violation of this bill has been enforced from receiving service as part of the NEM tariff. While customers select what contractors they use for solar installations, they may not have full knowledge regarding any subcontract work or other aspects of a contractor's installation that could violate the requirements of this bill. However, these customers could be left in a position to pay for the installation of a renewable energy system that will not deliver as intended. Recent amendments attempt to mitigate these incidents by narrowing the application of this enforcement to only willful violations.

Related/Prior Legislation

AB 2316 (Ward, 2022) requires the CPUC to establish a new community renewable energy program that meets specified criteria, including prevailing wage requirements. The bill is pending on the Senate Floor.

AB 2667 (Friedman, 2022) establishes the Integrated Distributed Energy Resources Fund as a special fund in the State Treasury to fund, upon appropriation, incentives to support statewide customer adoption of clean distributed energy resources, with specified requirements including prevailing wage requirements. The bill is pending on the Senate Floor.

AB 1385 (Cortese, 2022) would have required the CPUC to establish a new multifamily housing local solar program, with specified requirements, including applying public works project requirements. The bill was held in the Assembly Committee on Appropriations.

AB 841 (Ting, Chapter 372, Statutes of 2020) required that all electric vehicle charging infrastructure and equipment located on the customer side of the electrical meter that is funded or authorized, in whole or in part, by state entities shall be installed by a contractor with the appropriate license and at least one electrician on each crew.

SB 350 (De León, Chapter 547, Statutes of 2015) specified that construction, alteration, demolition, installation, or repair work on the electric transmission system located in California constitutes a public works project, subjecting these projects to prevailing wage.

AB 327 (Perea, Chapter 611, Statutes of 2013) instituted several rate reforms and required the CPUC to adopt a successor NEM tariff no later than December 31, 2015.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, CPUC estimates one-time costs of about $1 million (ratepayer funds) for workshop planning and facilitation, contract solicitation and management, and construction of an online intake portal and database, among other things. In addition, CPUC estimates ongoing costs of about $1 million annually (ratepayer funds) to perform research for the Disadvantaged Communities/Low-Income DER report, depose of implementation advice letters, establish data intake processes for contractor payroll data, and provide quality control and compliance tracking, and perform other activities. Of that amount, $750,000 for management and maintenance of the payroll database would no longer be needed after five years.

SUPPORT: (Verified 8/25/22)

California State Association of Electrical Workers (co-source)
Coalition of California Utility Employees (co-source)
BlueGreen Alliance
California Labor Federation

OPPOSITION: (Verified 8/25/22)

California Solar + Storage Association

Desert Valleys Builders Association
Silicon Valley Leadership Group

ARGUMENTS IN SUPPORT: The California State Association of Electrical Workers and the Coalition of California Utility Employees argue that the requirements for prevailing wages for NEM connected renewable energy systems will "stop large corporations and wealthy homeowners from taking advantage of rooftop solar installers, while ensuring the highest level of competence and safety over the lifetime of the project." They also argue that the reporting requirements of this bill will help address "the exclusion of lower income communities from participating in rooftop solar."

ARGUMENTS IN OPPOSITION: In opposition to this bill, the California Solar + Storage Association argues that this bill will: (1) slow down California's clean energy goals by increasing costs; (2) increase the use of fossil fuels (especially fossil fueled generators); (3) establishes a bad precedent by defining independent, behind-the-meter solar projects contracted by and for individual consumers "public works projects;" (4) kill small businesses which represent over 80 percent of California's solar contractors; (5) hurt the state's affordable housing and commercial solar market; (6) create unnecessary red tape as "most solar installers do not have teams of lawyers to sort through California's prevailing wage rules."

SUBJECT: Neonicotinoid pesticides: prohibited nonagricultural use

SOURCE: Author

DIGEST: This bill prohibits, beginning January 1, 2024, a person from selling, possessing, or using a neonicotinoid pesticide. Exemptions are provided for use on an agricultural commodity and other specified uses.

Senate Floor Amendments of 8/25/22 exempt fruit and nut tree applications of a neonicotinoid pesticide by certified qualified applicators from the provisions of the bill and make other nonsubstantive changes based on the Department of Food and Agriculture (CDFA) technical assistance.

ANALYSIS:

Existing law:

1) Provides, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), for federal regulation of pesticide distribution, sale, and use. Requires

that all pesticides distributed or sold in the United States be registered (licensed) by the United States Environmental Protection Agency (US EPA). (7 United States Code (U.S.C.) §136 et seq)

2) Authorizes the state's pesticide regulatory program and mandates California's Department of Pesticide Regulation (DPR) to, among other things, provide for the proper, safe, and efficient use of pesticides. (Food and Agriculture Code (FAC) § 11401 et seq.)

3) Regulates the use of pesticides and authorizes the director of DPR (director) to adopt regulations to govern the registration, sale, transportation, or use of pesticides, as prescribed. (FAC §11501, et. seq)

4) Authorizes, the director after a hearing, to cancel the registration of, or refuse to register, any pesticide that meets a certain criteria. (FAC § 12825)

5) Requires, if during or after the registration of a pesticide the registrant has factual or scientific evidence of any adverse effect or risk of the pesticide has not been previously submitted to DPR, the registrant to submit the evidence to DPR. Authorizes the director of DPR to adopt regulations to carry out the reevaluation process. (FAC § 12825.5)

6) Requires DPR to issue a determination with respect to its reevaluation of neonicotinoids by July 1, 2018, and to adopt control measures necessary to protect pollinator health within two years after making the determination. (FAC § 12838)

This bill:

1) Prohibits, beginning January 1, 2024, a person from selling, possessing, or using a neonicotinoid pesticide, as defined, for application to outdoor ornamental plants, trees, or turf, except for use on, or for the protection of, an agricultural commodity, as defined.

2) Authorizes the director, in consultation with the CDFA, to authorize, by written order, the sale, possession, or use of a neonicotinoid pesticide that is prohibited by the provisions of this bill if he or she finds:

   a) A valid environmental emergency exists;

   b) The pesticide would be effective in addressing the environmental emergency; and,

c) There are no other, less harmful pesticides or pest management practices that would be effective in addressing the environmental emergency.

3) Defines "environmental emergency" as an occurrence of a pest that presents a significant risk of harm or injury to the environment or human health, or significant harm, injury, or loss to agricultural crops, including, but not limited to, an exotic or foreign pest that may need preventative quarantine measures to avert or prevent that risk, as determined by the DPR, in consultation with the CDFA.

4) Authorizes a certified qualified applicator to possess or use a neonicotinoid pesticide and a licensed pest control dealer to sell a neonicotinoid pesticide as provided.

5) Provides that these provisions do not apply to certain actions and applications of these pesticides.

Background

1) *What are neonicotinoid pesticides, who uses them, and how long have they been around?* Neonicotinoids are synthetic compounds similar in structure to nicotine. They have a common mode of action that affects the central nervous system of insects (binding to nicotinic acetylcholine receptors), making them active against a broad spectrum of insects.

   Neonicotinoids are also systemic insecticides, which means they can be taken up through the roots of plants and translocate to their leaves, flowers, and pollen. Due to their systemic activity, neonicotinoids are ideal candidates for seed coatings. Seed coatings are used for a variety of crops including maize (corn), soybeans, sunflowers, oilseed rape (canola), and cotton. Neonicotinoids are applied in agricultural areas as foliar sprays, in-furrow treatments (e.g., soil drenches), and granules. In urban or forested areas, neonicotinoids are applied as tree soil drenches or injections. Plants grown in garden centers and nurseries are often treated with neonicotinoid foliar sprays, drenches, and/or granular applications.

   Neonicotinoids have a variety of other home uses including lawn and garden applications, topical flea medicines for pets such as dogs and cats, and in bait formulations for use against cockroaches and ants. Currently, neonicotinoids are the most widely used class of insecticides in the world, representing 25% of the global insecticide market.

2) *How neonicotinoids affect the environment.* As described in the Environmental Science and Technology article, neonicotinoids are not volatile, somewhat persistent in water and soils, and highly soluble in water, meaning they can easily be transported away from the area of initial application. Neonicotinoids have been frequently detected in waterways around the world, including surface water runoff (rivers, streams), groundwater, and wetlands. Imidacloprid is detected in 89–100% of water samples collected during monitoring studies of global surface waters. DPR's report, "Urban Monitoring in Southern California Watersheds Fiscal Year 2017-2018," shows neonicotinoid contamination in over 90% urban surface water samples taken in Los Angeles, Orange, and San Diego counties, which may indicate extensive outdoor, non-agricultural use. The source of neonicotinoids in water can vary from overspray to particulates (such as dust from treated seeds) to runoff from seed coatings or soil applications. Neonicotinoids have been detected in wildflowers adjacent to agricultural areas, indicating their potential to move away from the point of application and be taken up by other non-target plants.

3) *How neonicotinoids impact pollinators, such as bees.* The Food and Agriculture Organization (FAO) is a specialized agency of the United Nations that leads international efforts to defeat hunger. According to its May 2018 report "Why Bees Matter," close to 75% of the world's crops producing fruits and seeds for human consumption depend, at least in part, on pollinators for sustained production, yield and quality.

   The report found pollination is the highest agricultural contributor to yields worldwide, contributing far beyond any other agricultural management practice. Pollinators affect 35% percent of global agricultural land, supporting the production of 87 of the leading food crops worldwide. Plus, pollination-dependent crops are five times more valuable than those that do not need pollination. The price tag of global crops directly relying on pollinators is estimated to be as much as $577 billion a year and rising – the volume of agricultural production dependent on pollinators has increased by 300% percent in the last 50 years.

   Since neonicotinoids affect the central nervous system of insects, they do not discriminate between target (e.g., corn rootworm, flea beetle) and non-target insects (e.g., bees).

   The impact of neonicotinoid use on bees, and other pollinators (moths, flies, wasps, beetles, butterflies and others), has been of particular concern. The three most commonly detected neonicotinoids (clothianidin, imidacloprid, and

thiamethoxam) are classified as being highly toxic to bees. As neonicotinoids are systemic within the crop, pollinators can be exposed when they consume the nectar or pollen of a treated crop that flowers and through the dust from seed coatings. Additionally, neonicotinoids frequently contaminate the pollen and nectar of wildflowers growing in the vicinity of treated crops, increasing the likely duration and extent of pollinator exposure to neonicotinoids. In laboratory and semi-field studies, exposure to field realistic doses has been shown to impair learning and the accuracy of navigation, decrease foraging success, suppress immune response, reduce the viability of sperm stores in queens, reduce queen longevity, reduce growth of bumblebee colonies, and reduce the number of new queens they produce.

4) *How neonicotinoids impact other animals.* An important mechanism of neurotoxicity for neonicotinoids is the almost irreversible binding to nicotinic acetylcholine receptors in insects, making low-level continual exposures to neonicotinoids likely to lead to cumulative effects. Non-target organisms expected to be exposed to neonicotinoids at levels of concern include pollinators, aquatic insects, and birds.

5) *Can neonicotinoid exposure impact humans?* An article published in Environmental Health Perspectives in 2017, "Effects of Neonicotinoid Pesticide Exposure on Human Health: A Systematic Review," cites four general population studies that reported associations between chronic neonicotinoid exposure and adverse developmental or neurological outcomes, including neural tube defects and autism spectrum disorder. The findings of animal studies support the biological plausibility for such associations. The European Food Safety Authority concluded that acetamiprid and imidacloprid adversely affect the development of neurons and brain structures associated with functions such as learning and memory. The Environmental Health Perspectives article concludes, "Given the widespread use of neonicotinoid pesticides in agricultural and household products, and its increasing detection in United States food and water, more studies on the human health effects of neonicotinoid exposure are needed."

Comments

Purpose of Bill. According to the author, “Our pollinators are threatened. California beekeepers lost 41.9% of their colonies last year, one of the worst years on record. These pollinators are critical to California's agriculture, worth $50 billion annually. A huge body of research links adverse health impacts and the decline in pollinator populations to the use of pesticides, particularly

neonicotinoids. Though we have seen steps to regulate these pesticides in our commercial fields, there has been little movement on non-agricultural uses. The European Union, Maine, New Jersey, and many other states have already banned many of these pesticides for many uses. It's time to catch up to the rest of the world in protecting bee and human health. AB 2146 will curb harmful neonic contamination without limiting farmers, and will secure our food system for generations to come."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The DPR estimates ongoing costs of about $159,000 annually (Department of Pesticide Regulation Fund [DPRF]) to determine if an environmental emergency exists by evaluating data and consulting with CDFA.

- The CDFA estimates ongoing costs of about $40,000 annually (CDFA Ag Fund) to perform the consultative role as outlined in this bill.

- Unknown, potentially significant revenue loss (DPRF) due to an overall reduction in the mill assessment, registration, and renewal fees collected on neonicotinoid pesticides.

- Unknown, potentially significant costs for CDFA to possibly provide additional emergency treatment responses to an increase in general pest infestations that would have been mitigated absent this bill. (See staff comments.)

- Unknown, potentially significant cost pressure for DPR and CDFA to analyze new chemistries or applications for pest mitigation as alternatives to the neonicotinoid pesticides that would be banned by this bill. Currently, it costs CDFA approximately $200,000 to analyze a new chemistry or application situation, and use of the same chemistry in different situations or for different pests requires separate analyses. CDFA notes that although it is not possible to identify a specific fiscal impact as a result of this prohibition, there would be costs associated with eliminating pest mitigating tools.

- Unknown, potentially significant ongoing cost pressure (Legal Services Revolving Fund) for the Attorney General's office to enforce provisions of this bill.

ARGUMENTS IN SUPPORT: According to a coalition letter signed by Environment California, the Natural Resources Defense Council, and the California Native Plant Society, "Scientists first became concerned about neonics roughly fifteen years ago, when beekeepers across the country saw losses of honey bee colonies suddenly spike from an average of 10-15% to 30-40% per year. In California, beekeepers have lost between 35% and 45% of their hives annually for most of the last decade, as populations of native bees and other pollinators also

experience dramatic declines. These losses threaten California's ecosystems and more than $15 billion in state agricultural production that depends on bees and other pollinators. A lack of pollinators is already responsible for lower yields of many crops nationwide.

"Animal studies also connect neonics to birth defects and higher rates of death in white-tailed deer fawns and neurological and reproductive harms in other mammals. Widespread water contamination in urban areas shows that non-agricultural uses of neonics are a major source of neonic contamination. Uses such as those on lawns and gardens present a high risk of exposure for children and pets who play in these areas. Nearly all of these preventative uses are unnecessary or easily replaceable with less harmful alternatives."

ARGUMENTS IN OPPOSITION: According to a coalition letter signed by the Agriculture Council of California, the California Chamber of Commerce, and more than 20 other groups, "In California, neonicotinoids are a critical tool used to protect specialty crops from invasive pests and plant diseases. For example, neonicotinoids are necessary to control for the spread of the Asian Citrus Psyilid (ACP), the vector for Huanglongbing (HLB), a disease that kills citrus trees and has no known cure. Since 2009, California citrus producers have assessed themselves a per carton fee to support a program at the California Department of Food and Agriculture to monitor residential, backyard citrus trees to detect ACP. When an ACP is found, a control program begins that notifies homeowners within a specific radius and provides them information about the most effective means to prohibit the spread of ACP, which includes the use of neonicotinoids. These residential treatment actions protect neighborhood citrus trees thereby, protecting commercial citrus groves throughout the state. If these products are no longer available at the consumer level, this program will be negatively impacted and the threat to California's citrus industry will be significant. If these products are no longer available at the consumer level, this program will be negatively impacted and in turn threaten the existence of California's $2 billion citrus industry."

SUBJECT: Agricultural labor relations: elections

SOURCE: United Farm Workers

DIGEST: This bill (1) allows agricultural employers to choose whether to enroll into a "Labor Peace Election", as defined, as an alternative to the existing selection process for exclusive representation; (2) establishes a mail ballot election process by which agricultural employers may select their collective bargaining representation, if their employer agrees to a Labor Peace Agreement, as defined; (3) imposes a new penalty as specified for employers who engage in unfair labor practices, as defined; and (4) requires an employer who petitions for a writ of review in a court of appeal or who otherwise seeks to overturn or modify any order

of the ALRB to post a bond in the amount of the entire economic value of the order as determined by the ALRB.

Senate Floor Amendments of 8/22/22 provide for an alternative "Labor Peace Election" where each agricultural employer would indicate in the last month of the year whether they agree to a labor peace compact for the coming year, as defined; allow agricultural employees to choose their collective bargaining representatives by mail ballot election, described below, if their employer agrees to a Labor Peace Election; and establish a sunset date of January 1, 2028 for the mail-in ballot and Labor Peace Election provisions of AB 2183.

ANALYSIS:

Existing law:

1) Defines "agriculture" to include farming in all its branches, the cultivation and tillage of the soil, dairying, the production, cultivation, growing, and harvesting of any agricultural or horticultural commodities and any practices by a farmer or on a farm in conjunction with farming operations, including preparation for market and delivery to storage. (Labor Code §1140.4)

2) Clarifies that the bargaining unit is all agricultural employees of an employer. If these employees are employed in two or more noncontiguous areas, the Agricultural Labor Relations Board (ALRB) determines the appropriate unit or units of agricultural employees. (Labor Code §1156.2)

3) Allows an agricultural employee or labor organization acting on behalf of agricultural employees to submit a petition to the ALRB. The petition must allege all of the following:

    a) That the number agricultural employees currently employed by the employer named in the petition is not less than 50 percent of the employer's peak agricultural employment for the current calendar year.
    b) That no valid election has been conducted by employees of the named employer within the 12 months immediately preceding the filing of the petition.
    c) That no labor organization is currently certified as the exclusive collective bargaining representative of the agricultural employees of the named employer.
    d) That the petition is not barred by an existing collective bargaining agreement. (Labor Code §1156.3 (a))

4) Requires, upon receipt of a petition signed by at least a majority of the agricultural employees in the employ of the named employer, the ALRB immediately investigate the petition. If the board determines that a bona fide question of representation exists, a representation election by secret ballot must be held within 7 days. (Labor Code §1156.3 (b))

5) Requires that representatives selected by secret ballot by a majority of agricultural employees for the purposes of collective bargaining be considered the exclusive representatives of that bargaining unit with respect to rates of wages, hours of employment or other conditions of employment. (Labor Code §1156)

6) Allows any person to file a signed petition with the ALRB asserting that allegations within the original petition were incorrect, that the ALRB improperly determined the geographic scope of a bargaining unit or objecting to the conduct of the election. The ALRB may refuse to certify the election if it finds that any of the assertions made in such a petition are correct or if it finds that the election was not conducted properly. (Labor Code §1156.3 (2))

7) Requires that the ALRB decertify a labor organization if either of the following occur:

    a) The Department of Fair Employment and Housing finds that the labor organization engaged in discrimination based on a protected class.
    b) The United States Equal Employment Opportunity Commission finds that the labor organization engaged in discrimination on the basis of a protected class.

8) Requires that the ALRB certify a labor organization as an exclusive representative if an employer is found to have engaged in misconduct that would diminish the chance that a new election would be free and fair. (Labor Code §1156.3 (f))

9) Allows the ALRB, upon finding reasonable cause to believe that any person has engaged in or is engaging in an unfair labor practice, petition the superior court in the county where the unfair labor practice occurred for appropriate temporary relief or restraining order. (Labor Code §1157.3)

10) Requires that employers maintain accurate payroll lists that contain the names and addresses of all their employees and make such lists available to the ALRB upon request. (Labor Code §1160.4)

This bill:

1) Designates the election procedure outlined within Labor Code §1156.3 to be called a Polling Place Election.

2) Allows each Agricultural Employer to indicate to the ALRB whether they agree to a labor peace compact, as defined by this bill. This choice is made in the 30 days prior to Jan 1 of each year.

3) Allows an employer to, as an alternative to the above Polling Place Election, enroll in a Labor Peace Election or a Non-Labor Peace Election. As part of a Labor Peace Election, an employer agrees to the following:

   a) A bargaining unit may select a labor organization as its representation without holding a polling place election.
   b) The employer will make no statements for or against union representation to its employees or publicly, including not disparaging a union in any written or verbal communications.
   c) The employer will voluntarily allow labor organizations access to private worksites, as specified.
   d) The employer will not engage in "captive audience meetings", as defined.
   e) The employer will not express preference for one union over another union.

4) Allows agricultural employees to make a choice regarding union representation through a mail ballot election, if their employer agrees to a labor peace election. To that end, allows a labor organization to submit a petition for representation ballot card election to the ALRB. The petition must allege all of the following:

   a) That the number agricultural employees currently employed by the employer named in the petition is not less than 50 percent of the employer's peak agricultural employment for the current calendar year.
   b) That no valid election has been conducted by employees of the named employer within the 12 months immediately preceding the filing of the petition.

c) That the petition is not barred by an existing collective bargaining agreement.

The petition must be supported by individually sealed mail ballots representing at least 50% of currently employed employees, as defined. The labor organization must serve the employer on the same day the petition is filed with the ALRB and the employer must respond within 48 hours. As part of this response, the employer must provide a complete and accurate list of the full names, current street addresses, telephone numbers, job classifications, and crew or department of all currently employed employees in the bargaining unit employed as of the payroll period immediately preceding the filing of the petition, as specified.

5) Allows an agricultural employee or their authorized labor representative to submit a Voting Kit Request Form prior to the submission of a petition for mail ballot election. Only labor organizations which have filed LM-2 forms for the preceding 2 years may request kits for employees. This request form must include the following information:

a) The name, phone number, physical address, and mailing address of the agricultural employee.
b) The name, phone number, physical address, and mailing address of the person submitting the request form.
c) The name of an agricultural employer or farm labor contractor to be associated with the voting kit.
d) A physical or post office box address where the board will mail the voting kit.

Any labor organization representative submitting a Voting Kit Request Form must also submit a document specifying that the agricultural employer has authorized them to submit the request form. This document must be signed by the agricultural employer.

6) Requires each voting kit to be mailed to the designated recipient within 2 business days of ALRB receipt of a Voting Kit Request Form. Each voting kit must contain instructions for mail ballot elections, a standardized mail ballot, and postage paid envelopes with the ALRB's return address. Each mail ballot will be titled "Mail Ballots for Certification of a Labor Organization" and include the following:

a) The opportunity to vote for representation by a labor organization, designated by "Yes Union", followed by a statement indicating that the employee signing it wishes to have a specified labor organization as the employee's collective bargaining representative.
b) The opportunity to vote against representation by a labor organization, designated by "No Union".
c) Sufficient space for the following:

    i) The name of the labor organization.
    ii) The name of the agricultural employer or farm labor contractor used by the agricultural employer.
    iii) The employee's name.
    iv) The signature of the employee.
    v) The date.
    vi) The signature of the person witnessing that the employee signed the ballot card or assisting them in filling out the ballot card, or both.

7) Requires that for a mail ballot described above to be valid, it must be placed in the sealed envelope provided by the ALRB, be signed on the outside by the employee, and be submitted directly to the ALRB. A labor organization representative may fill out the information, except for the employee signature. Each valid ballot remains valid for 180 days.

8) Requires the ALRB to make an administrative decision pertaining to the validity of a submitted petition and whether the requisite number of ballots have been submitted within 5 days of that petition being submitted. Requires the ALRB to notify the labor organization if they fail to submit the requisite number of ballots and allow 30 days from that notification for the collection of additional ballots.

9) Allows any person to file a complaint with the ALRB within 5 days of the certification of a labor organization that alleges one of the following bases for objection:

    a) Allegations in the non-labor peace petition were false.
    b) The ALRB improperly determined the geographical scope of the bargaining unit.
    c) The non-labor peace election was conducted improperly.
    d) Improper conduct affected the results of the non-labor peace election.

10) Requires that the ALRB choose to either rule administratively or conduct a hearing to rule on a petitioner's objection to an election within 14 days of filing. If the board finds the allegations in the objection to be true, the election certification must be revoked.

11) Prohibits another mail ballot election petition from being considered by the ALRB with the same agricultural employer until the board determines whether the labor organization that filed the pending representation ballot card election petition should be certified. Allows the ALRB to consider a second petition only if the second petition alleges that the first petition was filed because of the employer's unlawful assistance, support, creation, or domination of the labor organization that filed the first petition.

12) Requires that the ALRB certify a labor organization as the exclusive representative of an agricultural bargaining unit if it is found that the agricultural employer committed an unfair labor practice during the organization's campaign.

13) Establishes a sunset date of Jan 1, 2028 for provisions 1)-12) of this bill.

14) Imposes a maximum $10,000 penalty on an employer who commits an unfair labor practice, as defined.

    a) This penalty is doubled if it involves a violation of subdivision (c) or (d) of Labor Code Section 1153, up to a maximum of $25,000
    b) In determining the amount of the civil penalty, the ALRB must consider the following:

        i) The gravity of the unfair labor practice.
        ii) The impact of the unfair labor practice on the charging party.
        iii) The financial circumstances of the employer.

15) Creates a rebuttable presumption that an employer who disciplines, suspends, demotes, lays off, terminates, or otherwise takes adverse action against a worker during a labor organization's campaign that the action was retaliatory and illegal. The employer may rebut this by providing clear, convincing, and overwhelming evidence that the adverse action would have been taken in the absence of the campaign.

16) Requires an employer who petitions for a writ of review in a court of appeal or who otherwise seeks to overturn or modify any order of the ALRB involving make-whole, back-pay or other monetary award to post a bond in the amount of the entire economic value of the order as determined by the ALRB.

17) Requires the bond required above to consist of an appeal bond and orders that bond forfeited if the employer fails to pay the amount owed due to a final judgment following appeal within 10 days.

Comments

Need for this bill? The agricultural sector of California remains one of the most profitable industries in the world, generating more than $49 billion in 2020, while agricultural workers frequently suffer from higher rates of poverty, compared to other professions.. After amendments, AB 2183 provides for an alternative path to the current collective bargaining representative election process. As described above, each December an agricultural employer will have the opportunity to enroll in a labor peace compact, which is an agreement not to disparage unions in written or verbal statements and to allow union organizers more leeway to speak to employees.

As referenced in this bill, the case of Cedar Point Nursery v. Hassid, is especially relevant to the fate of AB 2183. Many question how labor unions can effectively organize in the wake of a ruling that so drastically curtails their ability communicate with employees; more still wonder if that is by design.

AB 2183 does add a new penalty to employers who engage in unfair labor practices, as defined, and require employers to post a bond in order to challenge an ALRB ruling involving a monetary award. These are positive changes and hopefully will curb employer attempts to adversely affect unionization campaigns that are demonstrably common. However, huge incentives to stop employees from collective bargaining remain, combined with the vanishingly small chance that employers will ever be investigated or caught.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

“ALRB estimates that, based on current election activity, costs to implement the bill would likely be absorbable. However, if election activity increases in the future, ALRB notes that it would require staff resources to ensure timely processing and review of representation ballot card election petitions. Additionally,

the current version of the bill contains provisions (in particular, those related to personal liability and civil penalties) that versions of the bill in previous years did not, potentially leading to additional workload. Thus, the bill could result in costs exceeding $50,000 in a future year (General Fund). Additionally, the bill could result in penalty revenues to the State; the magnitude is unknown but probably minor."

ARGUMENTS IN SUPPORT: The United Farm Workers, the sponsor of the bill, write in support:

"The ALRA acknowledged from its inception the imbalance of power and the inherent unfairness between the agricultural employer and a farm worker. The ALRA is and always was meant for the benefit and protection of a farm worker. In fact, the ALRA explicitly encourages and protects: "the right of agricultural employees to full freedom of association, self-organization, and designation of representatives of their own choosing, to negotiate the terms and conditions of their employment, in the designation of such representatives or in self-organization or in other concerted activities for the purpose of collective bargaining or other mutual aid or protection." (Labor Code Section 1140.2)

"While ballots will continue to remain secret, farm workers will have a choice in voting at a "polling place" as they do now, or they can receive assistance in filling out and returning their "representation ballot card" as long as the person who assists them co-signs the representation ballot card and returns it to the ALRB in a sealed and signed envelope.

"National approval for unions is the highest it has been since 1965 at 68% but workers face many obstacles to forming a union at their workplace. We need to

make it easier, not harder, for workers to vote in union elections and have the representation they are legally entitled to. AB 2183 is a step in the right direction and would allow farmworkers to vote in union elections like Californians vote in elections."

ARGUMENTS IN OPPOSITION: The California Chamber of Commerce writes in opposition:

> The August 22, 2022 amendments confirm that the bill proponents' goal has never really been about mail-in voting, it has always been to implement card check and force unionization in the agriculture industry. AB 2183 now simply provides that a labor organization will be certified through card check as long as the union shows "proof of majority support," which can be achieved with any "appropriate proof" the union chooses. The only means of not being subject to card check is forced union submission for employers and farmworkers through an involuntary submission to a position of labor neutrality. The employer would be forced to: Not make any statements for or against union representation to its employees or publicly, voluntarily allow labor unions access to its property, not engage in any meetings with employees at which there is any discussion of unions, not disparage any union, and not express preference for a union.
>
> This forced labor neutrality is merely to leverage employers to waive significant rights. For example, a recent Supreme Court decision1 struck down a California law mandating union access to employerproperty as an unconstitutional taking absent just compensation. Rather than providing that just compensation, this workaround is coercing employers into voluntarily letting the unions onto their property. The employer must also waive its First Amendment rights to speak about the union. These requirements are also unrealistic to implement. An employer would never be allowed to mention unions at all to their employees. This means an employer cannot convey any policies concerning unions or organization activity or respond at all if asked about unions or organizing. The employer could also never raise union misconduct without violating the forced labor neutrality. The employer is also required to make a decision about whether to waive these rights each year, even if there is no interest in unionization. Their decision will be posted on a public website for unions to view. Worse, even if the employer submits to this neutrality position, there is still no secret ballot election required. Instead, a union would be installed as a

bargaining unit's representative merely by submitting a petition to the ALRB along with "ballot cards" signed by a majority of affected workers. As in AB 616, vetoed last year by Governor Newsom, this is being portrayed as mail-in voting, but in actuality the union would have the right to request these cards for workers and fill out the cards for them. That language makes clear that the unions have no intention of workers filling these ballots out privately at home or having the ALRB be the ones overseeing the election – the union wants complete control. Unlike in a secret ballot election where employees enter a private booth without any coercion to cast their vote and under the protection of ALRB oversight, the very candidate they are voting for can fill out their ballot for them and turn it in. It is evident that the proposed 2028 sunset is to force the Legislature to consider full card check in all scenarios in five years, regardless of the existence of any labor neutrality.

SUBJECT: Discrimination in employment: use of cannabis

SOURCE: California NORML

DIGEST: This bill makes it unlawful for an employer to discriminate against a person in hiring or any term or condition of employment, if the discrimination is based upon the person's use of cannabis off the job and away from the workplace or an employer-required drug screening test that has found the person to have nonpsychoactive cannabis metabolites in their urine, hair, or bodily fluids.

Senate Floor Amendments of 8/25/22 add Assemblymember Jones-Sawyer as a co-author, and make clarifying, non-substantive wording changes.

ANALYSIS:

Existing law:

1) Makes it an unlawful employment practice, under the Fair Employment and Housing Act (FEHA), for an employer to refuse to hire, discharge from employment, or otherwise discriminate against a person in compensation or in the terms, conditions, or privileges of employment on account of that person's race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or veteran or military status. (Gov. Code § 12940 (a))

2) Defines employer under FEHA to mean any person regularly employing five or more persons, or any person acting as an agent of an employer, directly or indirectly, the state or any political or civil subdivision of the state, and cities except a religious organization or a corporation not organized for private profit. (Gov. Code § 12926.)

3) States that nothing in the Adult Use of Marijuana Act (AUMA) amends or affects the rights and obligations of employers to maintain a drug and alcohol free workplace or require an employer to permit or accommodate the use, consumption, possession, transfer, display, transportation, sale, or growth of cannabis in the workplace, or affect the ability of employers to have policies prohibiting the use of cannabis by employees and prospective employees, or prevent employers from complying with state or federal law. (Health & Saf. Code § 111362.45.)

This bill:

1) Provides it is unlawful for an employer to discriminate against a person in hiring, termination, or any term or condition of employment, or otherwise penalize a person if the discrimination is based upon any of the following:

   a) The person's use of cannabis off the job and away from the workplace;

   b) An employer-required drug screening test that has found the person to have *nonpsychoactive* cannabis metabolites in their urine, hair, or bodily fluids.

2) Exempts from the above section, pre-employment drug testing conducted using methods other than screening for nonpsychoactive cannabis metabolites.

3) Specifies that the provisions of this bill *do not:*

a) Apply to an employee working in the building and construction trades;

b) Permit an employee to be impaired by, use, or possess cannabis on the job;

c) Prohibit an employer from discriminating in hiring, or any term or condition of employment, or otherwise penalize a person based on *scientifically valid pre-employment drug screening* conducted through methods that do not screen for nonpsychoactive cannabis metabolites;

d) Affect the rights or obligations of an employer to maintain a drug and alcohol free workplace, as specified under the Control, Regulate and Tax Adult Use of Marijuana Act;

e) Supersede state or federal laws requiring applicants or employees to be tested for controlled substances, including laws and regulations requiring applicants and employees to be tested, or a specific manner of testing, as a condition of receiving federal funding, receiving federal licensing-related benefits, or entering into a federal contract; or

f) Apply to applicants or employees hired for positions that require a federal government background investigation or security clearance, as specified.

4) Delays implementation of the provisions of AB 2188 until January 1, 2024.

5) Makes findings and declarations about the unreliability of cannabis metabolite tests to identify impairment on the job.

Comments

1) *Need for this bill?*

Recreational use of cannabis has been legal in California since 2016 when a majority of voters approved it. In many circumstances, however, California employers can still lawfully refuse to hire someone because they use cannabis, and workers can still be disciplined or fired for cannabis use, even when that use takes place off the job, away from the worksite, and does not jeopardize safety or otherwise impair the worker's performance. With some specified exceptions, this bill instead prohibits employers from discriminating against applicants or employees on the basis of this kind of cannabis use. In a similar vein, this bill prohibits employers from holding the results of a drug test against an applicant or employee if all that the test reveals is evidence of past cannabis use. Employees could still be fired or disciplined for using cannabis at work. Likewise, applicants and employees could still be disciplined or fired based on

test results showing impairment or the presence of psychoactive chemical compounds from cannabis

2) *State Cannabis Legal Infrastructure*

Proposition 215, the Compassionate Use Act, first legalized cannabis in California for medical consumption in 1996. The initiative shielded qualified patients and primary caregivers from prosecution related to the possession and cultivation of cannabis for medicinal purposes. However, this experiment faced challenge from a skeptical Supreme Court and a hostile Bush Justice Department. In two decisions, *US v. Oakland Cannabis Buyers Collective (2001)* and *Gonzalez v. Raich (2005)*, the Supreme Court demonstrated that citizens, and even medical patients, complying with California law could not expect to do so without federal interference.

These decisions largely froze cannabis regulation in its place until 2015, when the Legislature passed the Medical Cannabis Regulation and Safety Act (MCRSA). MCRSA established, for the first time, a comprehensive statewide licensing and regulatory framework for the cultivation, manufacture, transportation, testing, distribution, and sale of medicinal cannabis to be administered by the Bureau within Department of Consumer Affairs, the Department of Public Health, and the Department of Food and Agriculture, with implementation relying on each agency's area of expertise.

From here, cannabis legal infrastructure gains significant momentum. California Voters passed Proposition 64, which legalized adult-use cannabis in 2016. The Legislature, in response, allocated money over several budgets to fund the regulatory agencies tasked with monitoring cannabis and the Governor eventually consolidated these agencies under a single Department of Cannabis Control (DCC). Establishment of a standalone department with an enforcement arm was intended to centralize and align critical areas to build a successful legal cannabis market, by creating a single point of contact for cannabis licensees and local governments. The goal was to ultimately simplify and centralize State regulatory efforts; improve coordination, including enforcement; reduce barriers to participation in the legal market; and incentivize greater local participation.

However, all of this state infrastructure exists under the shadow of the continuation of the War on Drugs. The Controlled Substances Act still makes the sale and distribution of cannabis illegal under federal law, and *Raich* and *Oakland CBC* are clear evidence that adherence to state laws are not a guarantee of safety. Furthermore, many federal contracts include drug-free

clauses within them, which can jeopardize employers who aren't inclined to test their employees, but who would lose contracts without a compliant drug testing policy. The Biden Administration has demonstrated only studious evasion of the issue, and future Administrations may be more hostile, as they have been in the past

3) *Cannabis Testing*

AB 2188 is designed to ensure that adults cannot be punished at work for exercising their legal right to use cannabis, so long as that use has no impact on the workplace. To accomplish that intent, this bill prohibits employers from discriminating against applicants or employees for use of cannabis off of the job and away from work.

To this end, this bill prohibits employers from taking adverse action against applicants or employees based exclusively on the results of a drug test that detects nothing more than the presence of nonpsychoactive cannabis metabolites in the applicant or worker's urine, hair, or bodily fluids. While such a test result does suggest whether or not the worker has used cannabis at some point in the recent past, it does not tell the employer anything at all about whether the worker is presently impaired from cannabis. According to the Mayo Clinic, metabolites can be detected in a user's body for up to three days after a single use of cannabis, and for up to 10 days for regular users, despite the user no longer being under the influence of cannabis.[1]

However, there is a recognition for the need to strike a balance between the realities of rapidly widening cannabis acceptance and hostile federal laws. Under this bill, employers would be able – where otherwise lawful – to use tests for cannabis use that detect the presence of any chemical compounds that are still psychoactive. In particular, tests that can detect the presence of tetrahydrocannabinol (THC) in saliva or in the bloodstream. Because THC, unlike cannabis metabolites, is a psychoactive chemical compound, its presence can be indicative of current impairment.

Related/Prior Legislation

AB 1256 (Quirk, 2021) would have prohibited employers from discriminating against an applicant or employee based on the result of a drug screening test that has found the person to have nonpsychoactive cannabis metabolites in their urine, hair, or bodily fluids. The bill died in the Assembly Labor Committee.

---

[1] Marijuana – Tetrahydrocannabinol (THC). Mayo Clinic https://www.mayocliniclabs.com/testcatalog/drug-book/specific-drug-groups/marijuana (as of Jun. 15, 2022).

AB 2355 (Bonta, 2020) would have prohibited employers from discriminating against applicants or employees for medicinal cannabis use that can be reasonably accommodated. The bill died in the Assembly Labor Committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- *DFEH*: DFEH reports ongoing costs of $3.1 million in Fiscal Year (FY) 2023-24 and annually thereafter to receive, investigate, mediate, and prosecute complaints filed under the provisions of AB 2188 (General Fund).

- *Judicial Branch*: Unknown cost pressures due to increased court workload to adjudicate alleged complaints that are filed under the provisions of AB 2188 (Special Fund – Trial Court Trust Fund, General Fund).

ARGUMENTS IN SUPPORT: The United Food and Commercial Workers, Western States Council writes in support:

> Adult cannabis consumption is legal in California, and employees have the right to engage in legal behaviors when they are off-the-job without interference or discrimination from their employers. Yet many employers in California still discriminate against employees and prospective employees who consume cannabis when they are not at work. Cannabis metabolites testing, or the threat of cannabis metabolites testing, is the most common way that employers threaten or harass employees or prospective employees who may consume cannabis on their own time. Urine and hair tests are common types of metabolite testing.

AB 2188 clarifies that employers may not discriminate against employees or prospective employees who consume cannabis when they are not at work. This bill also prohibits cannabis metabolites testing for all employers who are not required to conduct cannabis metabolites testing under federal law.

Cannabis metabolites are the non-psychoactive substances that can be detected in a person's bodily fluids for up to several weeks after they have consumed cannabis. Testing positive for cannabis metabolites has no scientific value in establishing that a person is impaired or "high." When employers use cannabis metabolites tests to discriminate against employees or prospective employees, they are most likely discriminating against people who are not impaired at work and who consumed cannabis when they were off the job.

This bill does not bar employers from maintaining that employees may not be impaired or "high" on-the-job. And it does not prohibit other forms of testing, such as performance-based impairment testing or tetrahydrocannabinol testing. Tetrahydrocannabinol (THC) is the impairing substance in cannabis, and there are readily available tests for THC via bodily fluids such as saliva and blood. These forms of testing may establish that a person has consumed cannabis in the past several hours. This bill does not prohibit employers from testing for THC, or taking action against employees or prospective employees who test positive for THC or who fail a performance-based impairment test.

ARGUMENTS IN OPPOSITION: The California Chamber of Commerce writes in opposition:

Even with these new amendments, AB 2188 will create a protected status for marijuana use in FEHA and California employers may face liability when they take legitimate disciplinary measures against their employees. Put simply: marijuana use is <u>not</u> the same as protecting workers against discrimination based on race or national origin and should not be in FEHA. California employers should not have to fight out proper, impairment-based terminations in FEHA. Moreover, employers <u>must</u> be able to keep their workplace safe by disciplining employees who arrive at work impaired.

If California policymakers wish to force a shift towards newer testing technologies – that is one thing. But we do not believe marijuana should be elevated to a legally-protected status above comparable drugs (like alcohol).

SUBJECT: Birthing Justice for California Families Pilot Project

SOURCE: Black Women for Wellness Action Project

DIGEST: This bill establishes the Birthing Justice for California Families Pilot Project, upon an appropriation, to be administered by the Department of Public Health (CDPH) that includes a three-year grant program to fund specified entities to provide doula care to members of communities with high rates of negative birth outcomes who are not eligible for Medi-Cal, including incarcerated people. This bill sunsets the provisions on January 1, 2029.

Senate Floor Amendments of 8/25/22 incorporate technical assistance from CDPH and do the following:

- Strike references to "full spectrum doula care" and only use "doula care";
- Strike the definition of "full spectrum doula care" and instead reference the definition of doula care used by the Department of Health Care Services (DHCS);

- Make changes to the process for awarding grants for those providing doula care, including extending the date for an application by six months, and requiring grant recipients to submit data to evaluate a project;

- Increase from five to 15% the amount of funds allowed to be used for administrative costs;

- Clarify allowable uses for grant funds;

- Specify that doulas who receive grant funds must comply with the core competencies required to provide services under the Medi-Cal program's doula benefit;

- Extend the requirement for CDPH to submit a report by two years; and,

- Extend the sunset date of the program created by this bill by one year.

ANALYSIS:

Existing law:

1) Establishes the Medi-Cal program, which is administered DHCS under which qualified low-income individuals receive health care services. [WIC §14000, et seq.]

2) Requires DHCS to convene a workgroup to examine the implementation of the doula benefit provided under the Medi-Cal program no later than April 1, 2022, and until December 31, 2023. Requires the workgroup to be comprised of doulas, health care providers, consumer and community advocates, health plans, county representatives, and other stakeholders with experience with doula services as determined by DHCS. [WIC §14132.24]

3) Establishes the California Department of Public Health (CDPH) to be vested with all the duties, powers, purposes, functions, responsibilities, and jurisdiction as they relate to public health. [HSC §131050]

4) Requires CDPH to develop and maintain a statewide comprehensive community-based perinatal services program and enter into contracts, grants, or agreements with health care providers, in medically underserved areas or areas with demonstrated need, to deliver these services in a coordinated effort to the extent permitted under federal law and regulation, as specified. [HSC §123490]

5) Requires CDPH to maintain a program that addresses the special needs of high-risk pregnant women and infants, as specified. Defines "high-risk pregnant woman" as a woman considered highly likely for any reason to suffer personal mortality or morbidity from her pregnancy, or to deliver a defective, disabled, high-risk, or stillborn infant. [HSC §123560, 123565]

This bill:

1) Establishes the Birthing Justice for California Families Pilot Project, upon an appropriation by the Legislature, to be administered by CDPH that includes a three-year grant program to fund community-based doula groups, local public health departments, and other organizations to provide doula care to members of communities with high rates of negative birth outcomes who are not eligible for Medi-Cal, including incarcerated people.

2) Requires CDPH, in awarding grants, to do all of the following:

   a) On or before January 1, 2024, post applications for grants on its website and solicit applications;

   b) On or before July 1, 2024, award grants to selected entities based on the eligibility criteria; and,

   c) Require grant recipients to submit data to evaluate the pilot project, as determined by CDPH, and establish standard metrics to ensure consistency in data collection.

3) Requires all of the following entities to be eligible to apply for grant funding under the pilot program:

   a) Community-based doula groups;

   b) Community-based organizations serving pregnant, birthing, and postpartum people with accurate information that is generally accepted and approved of within the doula profession;

   c) Birthing centers;

   d) Local public health departments; and,

   e) Public and district hospitals with programs serving birthing people.

4) Requires a grant recipient to use grant funds to pay for costs associated with providing doula care to specified individuals and establishing, managing, or

expanding doula services. Specifies costs associated with providing doula care include, but are not limited to, all of the following:

a) Payment for doulas;

b) Travel expenses that are related to the provision of doula care for doulas and their clients;

c) Educational materials;

d) Incidental costs that a doula incurs in providing for the needs of families including, but not limited to, meals, diapers, baby formula, and household items; and,

e) Administrative costs, capped at 15% of grant funds, associated with providing doula care.

5) Creates requirements for a grant recipient in setting the payment rate for a doula who is being paid with grant funds, such as including payment for perinatal care; setting the rate at an amount that is not less than the Medi-Cal reimbursement rate for doulas; and considering such things as the cost of living in communities served by the grant recipient, the market rate for doula care, and the minimum sustainable living wage in the community.

6) Permits grants recipients to provide doula care for pregnant and birthing people in communities that experience high rates of birth disparities with incomes less than 600% of the federal poverty level who do not qualify for Medi-Cal, including incarcerated people; pregnant and birthing people from communities that experience high rates of negative birth outcomes; and pregnant and birthing people who would be eligible for Medi-Cal but for their immigration status.

7) Requires doulas who are paid with grant funds to demonstrate core competencies required under the Medi-Cal program's doula benefit.

8) Requires CDPH, on or before January 1, 2029, to submit a report to the appropriate policy and fiscal committees of the Legislature on the expenditure of funds and relevant outcome data for the pilot project. Requires the report to examine the impact of the pilot program on a range of outcomes, including those focused on client and client family experience, prenatal and postpartum care engagement, doula workforce retention, cost savings, and clinical outcomes.

9) Sunsets the provisions of this bill on January 1, 2029.

Comments

1) *Author's statement.* According to the author, doulas provide physical, emotional, and informational support to birthing people during labor, birth, and in the immediate postpartum period. Studies have shown that doula care is associated with improved birth outcomes. California has taken significant steps in expanding access to doula care, but there are still underserved communities that experience adverse maternal and infant health outcomes and cannot access doula services. This bill will increase access to doula services in order to reduce barriers to healthy pregnancies, and will establish a three-year pilot program to provide grants to fund community-based doula groups and other organizations to provide doula care to communities with high negative birth outcomes who are not eligible for Medi-Cal, such as incarcerated people.

2) *Doulas.* According to the Maternal Health Task Force at Harvard Chan School Center of Excellence in Maternal and Child Health website, a doula is a non-clinical professional who provides educational, emotional, and physical support to clients during pregnancy, labor and delivery, and postpartum. Currently, there is no federal regulation of the doula profession, and therefore, no universally accepted competencies. In the United States, there are over 80 organizations and programs that train or certify doulas, and each has its own approach, scope of practice, and educational content. According to a Cochrane Review published in 2017, continuous support during childbirth is linked to benefits for birthing people including higher patient satisfaction, increased likelihood of spontaneous vaginal delivery, and shorter labors while posing no risk of harm to parent or baby. Some studies have also found that doula care is associated with decreased risks of preterm birth and postpartum depression, better infant Apgar scores, and higher breastfeeding rates in some populations. More rigorous research is needed to better understand how doula care impacts short- and long-term maternal and newborn health outcomes in different populations. Reductions in C-sections and preterm births in particular can lead to substantial cost savings for health care systems, pointing to a potential return on investment from doula care. In addition to reducing costs, doulas offer an opportunity for health care systems to reduce workloads for nurses and frontline providers with many simultaneous responsibilities, retain patients for future pregnancies and other services, and attract new patients by providing a unique, valuable service. In 2017, the American College of Obstetricians and Gynecologists reaffirmed their position on continuous labor support, such as that provided by doulas, stating that evidence suggests, in addition to regular nursing care, continuous one-to-one emotional support provided by support personnel, such as a doula, is associated with improved outcomes for women in

labor. Benefits found in randomized trials include shortened labor, decreased need for analgesia, fewer operative deliveries, and fewer reports of dissatisfaction with the experience of labor.

3) *Perinatal and pregnancy services for the incarcerated.* A January 2016 ACLU of California report, "Reproductive Health Behind Bars in California," states that pregnant people housed in incarceration settings face significant barriers to accessing adequate pregnancy care. Once an incarcerated person finds out they are pregnant, they have a decision to make, just as pregnant people outside of jails and prisons do. They must decide whether to carry the pregnancy to term and either parent the child or choose adoption, or whether to terminate the pregnancy through abortion. The National Commission on Correctional Health Care states that incarcerated people who learn they are pregnant should be provided comprehensive and unbiased options counseling that includes information about prenatal care, adoption, and abortion. While this bill is not specific only to incarcerated persons who are or may become pregnant, information provided by the author's office cites that approximately 210,595 women were in state or federal prison or jail in the U.S. at the end of 2015, a 645% increase since 1980. Almost three-quarters of incarcerated women fall within the prime childbearing age range of 18 to 44, although not all persons who are of childbearing age identify as women. Additionally, the Minnesota Prison Doula Project discovered that incarcerated participants had healthier pregnancies and babies than those who did not participate, finding that doula care promoted a more satisfying birthing experience overall. In California, AB 732 (Bonta, Chapter 321, Statutes of 2020) requires, among other things, incarcerated pregnant persons to be given access to community-based programs serving pregnant, birthing, or lactating inmates, and permits an incarcerated pregnant person to elect to have a support person present during childbirth.

4) *Doula coverage under Medi-Cal.* SB 65 (Skinner, Chapter 449, Statutes of 2021), known as the "California Momnibus Act," requires DHCS to convene a workgroup to examine the implementation of doula services as a Medi-Cal benefit. As a result, doula services will be available to birthing people who qualify for Medi-Cal and want access to doula care. DHCS is currently working on implementing this benefit through its workgroup. According to its website, DHCS states doula services will be added to the list of preventive services covered under the Medi-Cal program starting January 1, 2023, which include personal support to women and families throughout a woman's pregnancy, childbirth, and postpartum experience. This includes emotional and physical support, provided during pregnancy, labor, birth, and the postpartum period. Pursuant to federal regulations, doula services must be recommended by a

physician or other licensed practitioner. DHCS states that in order to allow for the successful implementation of the doula benefit, it adjusted the launch date from July 1, 2022, to January 1, 2023. DHCS states this change was needed to allow it to continue working with stakeholders to further define and develop the benefit, implement needed changes to the Provider Application and Verification for Enrollment system to allow doulas to enroll as Medi-Cal providers, seek and obtain federal approval, and give Medi-Cal managed care plans additional time to plan for and implement the benefit. The new effective date will also allow for a more robust stakeholder engagement process to assist DHCS with implementation.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Costs for the grants would be limited to the amount provided in an appropriation.
- Costs for state staffing to administer the program would be dependent on the amount of grant funding. However, costs to administer two to four grants would be about $1.2 million for each year of the pilot program.
- Staff to develop regulations.
- Costs to administer the required training component to ensure doula competencies. CDPH estimates costs of several million dollars to either contract with a training entity or to provide the services through the program.

OPPOSITION: (Verified 8/11/22)

None received

ARGUMENTS IN SUPPORT: The Black Women for Wellness Action Project, sponsor of this bill, and other supporters state that although California's overall maternal mortality rate has declined by 65% since 2006, mortality and morbidity for Black and Indigenous/Native-American birthing people and babies remain considerably higher than the state's average. Research indicates that racism and implicit bias, among other inequities, are root causes of the disparities in birth outcomes that Black, Indigenous, and other birthing people of color face. In California, the pregnancy-related mortality ratio for Black women is now four to six times greater than that of other racial/ethnic groups, indicating a widening disparity. Data indicates that even after controlling for education and socioeconomic status, Black women and birthing people remain at disproportionately higher risk for maternal mortality. In California, the rate of

preterm births among Black and Native-American birthing people is 40% higher than preterm births for their white counterparts, and Latinx birthing people have the second highest rate of low birthweight babies in the state.

SUBJECT: Groundwater sustainability agency: groundwater extraction permit: verification

SOURCE: Author

DIGEST: This bill prohibits local agencies from approving permits for new or altered wells unless specified conditions are met.

ANALYSIS:

Existing law:

1) Provides the Department of Water Resources (DWR) is responsible for issuing standards for constructing, altering, maintaining, and destroying wells to protect

groundwater quality. DWR issues standards for four types of wells – water wells, monitoring wells, cathodic protection wells, and geothermal heat exchange wells. (Water Code (WC) §§ 13800 *et seq.*)

DWR published those standards in Bulletin 74-81, and issued a supplement in June 1991. Those standards are currently being revised. The target for completion is December 2022.

2) Requires, each county, city, or water agency, where appropriate, to adopt a water well, cathodic protection well, and monitoring well drilling and abandonment ordinance that meets or exceeds the standards contained in Bulletin 74-81. (WC §13801(c))

3) Provides, under the California Environmental Quality Act (CEQA), as recently interpreted by the California Supreme Court (*Protecting Our Water and Environmental Resources v. County Of Stanislaus* (2020) 10 Cal.5th 479):

   a) The authorization of water well construction is a project subject CEQA.
   b) The authorization may be a ministerial or discretionary action, depending on the specifics of the underlying ordinance and the facts associated with the authorization.
   c) Discretionary projects require some level of environmental review; ministerial projects do not.

4) Provides, under the Sustainable Groundwater Management Act (SGMA):

   a) DWR is required to categorize each basin as one of the following priorities: High priority, medium priority, low priority, or very low priority. (WC §10722.4)

      i) California has 515 groundwater basins and subbasins that provide about 40 percent of the state's water supply. Of these 515 basins, DWR has designated 127 basins as high- or medium-priority basins. These 127 basins account for about 96 percent of the state's groundwater use and are overlain by about 88 percent of the population served by groundwater. Additionally, 21 of these basins have been identified by DWR as being in a condition of critical overdraft.
      ii) SGMA requires the formation of groundwater sustainability agencies (GSAs) in medium- and high-priority groundwater basins.

iii) GSAs are authorized but not required to be formed in low and very low priority basins.

b) Each high- and medium-priority basin is required to have one or more GSA. GSAs must then develop and implement a groundwater sustainability plan (GSP) to achieve groundwater sustainability. (WC §10727)
c) "Sustainable groundwater management" means the management and use of groundwater in a manner that can be maintained during the 50 year planning and implementation horizon without causing undesirable results, as defined. (WC §10721 (v) & (x))
d) SMGA does not apply to the adjudicated areas or a local agency that conforms to the requirements of an adjudication of water rights for specified adjudicated areas (WC § 10720.8)
e) In enacting SGMA, it is the intent of the legislature, among other things, to manage groundwater basins through the actions of local governmental agencies to the greatest extent feasible, while minimizing state intervention to only when necessary to ensure that local agencies manage groundwater in a sustainable manner. (WC §10720.1(h))

5) Includes, pursuant to the Governor's March 28, 2022 executive order regarding drought, provisions requiring:

a) During this drought emergency, a county, city, or other public agency shall not:

i) Approve a permit for a new groundwater well or for alteration of an existing well in a basin subject to SGMA and classified as medium- or high-priority without first obtaining written verification from the appropriate GSA that groundwater extraction by the proposed well would not be inconsistent with any sustainable groundwater management program established in any applicable GSP adopted by that GSA and would not decrease the likelihood of achieving a sustainability goal for the basin covered by such a plan; or
ii) Issue a permit for a new groundwater well or for alteration of an existing well without first determining that extraction of groundwater from the proposed well is (1) not likely to interfere with the production and functioning of existing nearby wells, and (2) not likely to cause subsidence that would adversely impact or damage nearby infrastructure.

b) This requirement does not apply to permits for wells that will provide less than two acre-feet per year of groundwater for individual domestic users, or that will exclusively provide groundwater to public water supply systems as defined in Section 116275 of the Health and Safety Code. (EO N-7-22, Paragraph 9)

This bill:

1) Requires counties to forward well permit applications to the relevant GSA.

2) Prohibits a county, city, or any other water well permitting agency from approving a permit for a new groundwater well or for alteration of an existing well in a basin subject to SGMA and classified as medium or high priority unless all of the following conditions are met:

   a) The well permitting agency obtains written verification from a GSA managing the basin or area of the basin where the well is proposed to be located that groundwater extraction by the proposed well meets both of the following conditions:

      i) The proposed well would not be inconsistent with any sustainable groundwater management program established in any applicable GSP or alternate plan approved or under review by the department; and
      ii) The proposed well would not decrease the likelihood of achieving a sustainability goal for the basin covered by such a plan.

   b) The permit applicant has provided the permitting agency a written report prepared by a professional engineer or geologist that indicates the extraction by the proposed well is unlikely to cause well interference, as defined; and
   c) The permitting agency posts the well permit application on its internet website for at least 30 days.

3) Excludes from these provisions:

   a) Permits for wells that will provide less than two acre-feet per year of groundwater for individual domestic users;
   b) Permits for wells that will exclusively provide groundwater to public water supply systems or state small water systems, as defined in existing law;
   c) Maintenance of a well;
   d) Alterations, replacement, or maintenance to a well pump; and
   e) Permits for wells in adjudicated basins.

4) Includes findings and declarations to support its purposes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, "Unknown costs, but likely in excess of $150,000 (Special Fund), to the State Water Resources Control Board (State Water Board) in instances where the State Water Board might need to make determinations for permits in unmanaged areas or probationary basins. The board may be able to recover costs for its activities via fees imposed on groundwater extractors."

ARGUMENTS IN SUPPORT: The authors of SGMA, former Senator Fran Pavley and former Assemblymember Roger Dickinson write "A central pillar of SGMA has been local implementation. Specifically, those who are closest to the basins are best equipped to sustainably manage the basins, namely through the formation of new local Groundwater Sustainability Agencies (GSAs) and Groundwater Sustainability Plans (GSPs). However, a clear gap has been identified

between land use and groundwater management for local GSAs entrusted to manage the basin. GSAs currently do not have uniform mechanisms to verify the alignment of new groundwater wells with their GSPs, which will directly impact the groundwater basin they manage. Currently, the responsibility and authority to issue well permits lie solely at the county level. However, counties are not tasked with reaching groundwater sustainability and typically issue permits without considering the prevention of undesirable impacts or permanent damage to aquifers, communities, and infrastructure. More recently, Governor Newsom issued an Executive Order to prevent new wells from being approved unless they are consistent with groundwater sustainability and do not adversely impact domestic wells or public infrastructure. However, it is our belief that this long-standing gap must be addressed with a long-term solution beyond declared drought emergencies. AB 2201 offers a legislative solution to help protect groundwater for communities."

ARGUMENTS IN OPPOSITION: A coalition of agricultural and other business interests raise a number of objections. These include:

Untimely. The EO was issued "on March 28, 2022, which imposes substantially similar requirements on counties and GSAs related to new well permitting. Counties and GSAs are currently struggling to determine how to best implement the Executive Order's requirements. Keep in mind that the Executive Order is tied to the declaration of a drought emergency. Thus, the Executive Order may address current drought concerns, but is not a permanent change in law. AB 2201 would codify the Executive Order at a time when it is not appropriate."

Applies To Sustainable Basins. "This bill creates mandates for all medium- and high-priority basins; it is not limited to those basins subject to critical overdraft. SGMA treats critically overdrafted basins differently than other medium- or high-priority basins, the vast majority of which are being sustainably managed. The process for prioritizing basins is based more on population and the relative reliance on groundwater for water supply than how sustainably the basin is managed."

SUBJECT: Clean energy: Labor and Workforce Development Agency: Deputy Secretary for Climate

SOURCE: Author

DIGEST: This bill establishes, upon appropriation by the Legislature, the position of Deputy Secretary for Climate within the Labor and Workforce Development Agency (LWDA), as specified.

Senate Floor Amendments of 8/22/22 make a technical change to correct an erroneous reference to the statutory division from "part" to the correct reference "chapter".

ANALYSIS:

Existing law:

1) Establishes the Labor and Workforce Development Agency (LWDA) to serve California workers and businesses by improving access to employment and training programs; enforcing California labor laws to protect workers and create an even playing field for employers; and administering benefits that include workers' compensation, unemployment insurance, disability insurance, and paid family leave. (Government Code § 15550 et seq.)

2) Establishes the California Global Warming Solutions Act of 2006 (AB 32, Núñez, Chapter 488, Statutes of 2006), which requires the California Air Resources Board (CARB) to adopt a statewide greenhouse gas (GHG) emissions limit equivalent to 1990 levels by 2020 and to adopt rules and regulations to achieve maximum technologically feasible and cost-effective GHG emission reductions. Requires CARB to ensure the state reduces California GHG emissions to at least 40% below the 1990 level by 2030. (Health and Safety Code § 38500 et seq.)

3) Requires the California Workforce Development Board (CWDB) to publish a report outlining recommendations on workforce development and training to help communities adapt to the economic and labor-market changes resulting from California's transition to a carbon neutral economy. (HSC § 38591.3)

4) Establishes the 100 Percent Clean Energy Act of 2017 which increases the Renewables Portfolio Standard (RPS) requirement from 50% by 2030 to 60%, and creates the policy of planning to meet all of the state's retail electricity supply with a mix of RPS-eligible and zero-carbon resources by December 31, 2045, for a total of 100% clean energy. (Public Utilities Code § 454.53)

5) Establishes the Greenhouse Gas Reduction Fund (GGRF) and requires all moneys, except for fines and penalties, collected by CARB from the auction or sale of allowances pursuant to a market-based compliance mechanism to be deposited in the GGRF and available for appropriation by the Legislature. (GC §16428.8)

6) Establishes the California Jobs Plan Act of 2021, which requires CARB to work with the LWDA to update, by July 1, 2025, the funding guidelines for administering agencies to ensure that all applicants to grant programs funded by the GGRF meet fair and responsible employer standards and provide inclusive procurement policies. (GC § 38599.10 et seq.)

This bill:

1) Establishes, upon appropriation by the Legislature, the position of Deputy Secretary for Climate within LWDA, appointed by the Governor, to assist in the oversight of California's workforce transition to a sustainable and equitable carbon neutral economy.

2) Requires the Deputy Secretary to coordinate with relevant state agencies to track the progress of the state moving toward 100 percent clean energy, as defined, and create or coordinate programs with other state agencies to retrain and upskill workers for clean energy jobs and jobs in related fields.

3) Provides that the chapter established by this bill shall become operative only upon an appropriation by the Legislature in the annual Budget Act or another statute for the purposes of implementing the chapter.

4) Repeals these provisions on January 1, 2046.

5) Makes legislative findings and declarations and defines "Agency", "Clean energy", "Deputy secretary", and "Energy commission", as specified.

Comments

Need for this bill? The author states the following:

"According to a 2021 report, there are about 113,000 people employed in the 14 fossil fuel and ancillary industries in California. It is estimated that in a steady closure of the fossil fuel sector, about 3,200 workers per year will be displaced and require re-training."

"At the state level, recent efforts have been made to prioritize a just transition. In September 2020, Governor Newsom signed Executive Order N-79-20, which directed OPR to design the state's first Just Transition Roadmap to provide a framework for the state's economic recovery that recognizes global and statewide shifts in key industries and regional economies likely to result from a transition to carbon neutrality. The roadmap has yet to be published.

"In 2021, a budget trailer bill was enacted that establishes the Community Economic Resilience Fund (CERF) Program to build an equitable and sustainable economic recovery from the impacts of COVID-19 on California's industries, workers, and communities, and to provide for the durability of that recovery by fostering long-term economic resilience in the overall transition to a carbon-neutral economy.

"There are different efforts happening statewide to work on "just transition" projects. There should be one entity who is specifically responsible for coordinating, monitoring, and reporting on these activities and the funding approved by the State for these purposes."

Related/Prior Legislation

AB 1634 (Boerner Horvath, 2022) declares that it is the Legislature's intent to enact subsequent legislation to create the Office of Just Transition in the Labor and Workforce Development Agency to help communities and workers transition to carbon neutrality jobs that build a robust clean economy in which all Californians prosper. The Assembly Rules Committee has not referred the bill.

AB 1966 (Muratsuchi, 2022) declares that it is the Legislature's intent to subsequently amend this measure to include provisions that would establish the California Equitable Just Transition Fund to assist fossil fuel-dependent workers with wage replacement, wage insurance, pension guarantees, health care, retraining, peer counseling, and relocation support for fossil fuel workers who face layoffs due to closure of operations. The Assembly Rules Committee has not referred the bill.

AB 680 (Burke, Chapter 746, Statutes of 2021) established the California Jobs Plan Act of 2021 which requires the CARB to work with the LWDA to update, by July 1, 2025, the funding guidelines for administering agencies to ensure that all applicants to grant programs funded by the Greenhouse Gas Reduction Fund meet fair and responsible employer standards and provide inclusive procurement policies.

AB 1453 (Muratuchi, 2021) would have established the Just Transition Advisory Commission and tasked it with developing and adopting a Just Transition Plan, containing recommendations to transition the state to a climate-resilient and low-carbon economy while protecting specified workers and communities. The Assembly Appropriations Committee held the bill in committee.

AB 398 (E. Garcia, Chapter 135, Statutes of 2017), among its many provisions, required CWDB to publish a report outlining recommendations on workforce development and training to help communities adapt to the economic and labor-market changes resulting from California's transition to a carbon neutral economy

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, this bill would result in an annual cost pressure of $250,000 to LWDA to create and fund the new position.

Silicon San Francisco Peninsula Coast Energy Services
Valley Clean Energy

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: According to the California Environmental Voters, "One of the major hurdles of transitioning away from fossil fuels towards clean energy is the economic impact to workers and communities in those industries. Tasking a specific entity to plan, set goals, and conduct ongoing assessments of clean energy projects and programs will ensure an equitable transition to a carbon-neutral economy while bringing transparency and accountability to the process."

SUBJECT: Nonattainment basins: employee parking: parking cash-out program

SOURCE: Author

DIGEST: This bill requires commercial landlords that are currently required to offer a parking cash-out program, to provide any of their tenants who are large employers with information about the cost of any parking provided as part of the lease.

Senate Floor Amendments of 8/22/22 require that the California Air Resources Board annually adjust the value of the parking cash-out program by the California Consumer Price Index and recast the bill provisions for clarity.

ANALYSIS:

Existing law:

1) Defines a "parking cash-out program" as an employer-funded program under which an employer offers to provide a cash allowance to an employee which is equivalent to the parking subsidy that the employer would otherwise pay to provide the employee with a parking space.

2) Defines a "nonattainment air basin" as an air basin that does not meet specified state ambient air quality standards.

3) Defines "parking subsidy" as the difference between the out-of-pocket amount paid by an employer on a regular basis in order to secure the availability of an employee parking space not owned by the employer and the price, if any, charged to an employee for use of that space.

4) Requires an employer of 50 or more people who is located in a nonattainment air basin and who provides a parking subsidy to its employees to offer those employees a parking cash-out program.

5) Exempts from the parking cash-out program any employer whose lease does not permit the employer to reduce, without penalty, the number of parking spaces subject to the lease.

6) Authorizes the California Air Resources Board (CARB) to impose specified civil penalties on an employer for failure to provide a parking cash-out program when required to do so.

7) Authorizes a city, county, or air district to adopt, by ordinance or resolution, a penalty or other mechanism to ensure that employers within its jurisdiction are compliant with the parking cash-out law, so long as specified mechanism for ensuring due process are included.

8) States that it is the intent of the Legislature that cash-out requirements apply only to an employer that can reduce the number of paid parking spaces it maintains and instead provide its employees with the cash-out option.

This bill:

1) Revises the parking cash-out program requirements on employers of 50 or more employees in nonattainment air basins by establishing a formula for the amount

of the cash-out benefit and requiring that the California Air Resources Board annually adjust the subsidy for inflation based on the change to the California Consumer Price Index.

2) Specifies that the formula for the cash-out benefit be the difference, if any, between the amount the employer charges employees for a parking space and the market rate for a parking space, which for purposes of this formula is capped at $350 per month.

3) Specifies if the market rate for a parking space cannot be determined than it shall be deemed to be the greater of $50 per month or the monthly price of the lowest priced transit serving with one-quarter mile of the employer.

4) Requires that if an employee receives a parking subsidy, the employer shall maintain a record of communication with the employee that they have the right to receive the cash equivalent of the parking subsidy (e.g. the cash-out option).

Comments

1) *Purpose*. According to the author, “The parking cash-out program was approved by this very Legislature three decades ago and is still not being implemented properly, which has detrimental environmental impacts. One reason that parking cash-out is not being implemented is due to the difficult nature of calculating the value of employee parking when it is included with the total cost of office rental space. Many owners of commercial real estate “bundle” the cost of parking with the cost of office space into a single lease price. This practice makes it difficult for employers to separate the cost of parking spaces associated with the commercial space that is being leased. Without that information, employers are unable to offer employees cash in lieu of parking subsidies. AB 2206 simply helps facilitate compliance with existing law by requiring parking owners to provide employers subject to parking cash-out with unbundled parking costs."

2) *Parking cash-out programs*. Existing law requires certain employers who provide subsidized parking for their employees to offer a cash allowance in lieu of a parking space. The intent is to reduce vehicle miles traveled (VMTs) and reduce emissions by offering employees the option of "cashing out" their subsidized parking space and incentivizing them to get to work using a more active form of travel or carpooling. However, a limiting factor in the law's reach is the criteria that parking must be leased separately from the building.

This condition exempts the majority of businesses from the parking cash-out requirement, reducing the law's potential impact. If the employer's savings on leasing fewer spots cannot be calculated and deducted from the lease, the employer is not required to comply with the parking cash-out law. This creates a bundling problem, the problem of bundled commercial real estate leases, which makes it difficult to calculate the cost of parking spaces and therefore the parking cash-out benefit for eligible employees.

This bill attempts to resolve the bundling issue by providing employers with greater clarity on how to calculate the value of the parking cash-out option. Specifically, this bill provides a formula for determining the value of the cash-out option based on market prices, as defined, and sets a ceiling of $350. If a market price cannot be determined than the market price shall be deemed to be the greater of $50 or the monthly cost of the lowest cost transit providing service nearby. The value of the parking cash-out is therefore the difference between the market price and the price the employer charges for parking.

It should be noted that the exemption for employers whose lease doesn't allow for a reduction of parking spaces remains.

3) *Opposition Removed*. Recent amendments taken in the Senate Judiciary Committee have removed the opposition to the bill.

SUBJECT: Cannabis: state temporary event licenses: venues licensed by the Department of Alcoholic Beverage Control: unsold inventory

SOURCE: Author

DIGEST: This bill prohibits the Department of Cannabis Control (DCC) from denying an application for a state temporary event license solely on the basis that there is a license issued pursuant to the Alcoholic Beverage Control Act (ABC Act) for the proposed premises of the event.

Senate Floor Amendments of 8/22/22 update code section cross-references and resolve chaptering conflicts with SB 1186 (Weiner).

ANALYSIS:

Existing law:

1) Enacts the Medicinal and Adult-Use Cannabis Regulation and Safety Act (MAUCRSA) to establish a comprehensive system to control and regulate the cultivation, distribution, transport, storage, manufacturing, processing, and sale of both medicinal cannabis and cannabis products, and adult-use cannabis and cannabis products for adults 21 years of age and over. (Business and Professions Code (BPC) § 26000, et seq.)

2) Expresses that state cannabis laws shall not be interpreted to supersede or limit the authority of a local jurisdiction to adopt and enforce local ordinances to regulate cannabis businesses. (BPC § 26200(a))

3) Prohibits cannabis licensees from selling alcoholic beverages or tobacco products on their premises. (BPC § 26054)

4) Authorizes the DCC to issue a state temporary event license to a licensee authorizing onsite cannabis sales to, and consumption by, persons 21 years of age or older at a county fair event, district agricultural association event, or at another venue expressly approved by a local jurisdiction for the purpose of holding temporary events of this nature, provided that the activities comply with the following:

    a) Access to the area where cannabis consumption is allowed is restricted to persons 21 years of age or older, cannabis consumption is not visible from any public place or nonage-restricted area, and the sale or consumption of alcohol or tobacco is not allowed on the premises.

    b) All participants who are engaged in the onsite retail sale of cannabis or cannabis products at the event are licensed to engage in that activity.

    c) The activities are otherwise consistent with regulations promulgated and adopted by the DCC governing state temporary event licenses.

    d) A state temporary event license shall only be issued in local jurisdictions that authorize such events.

    e) A licensee who submits an application for a state temporary event license shall, 60 days before the event, provide to the DCC a list of all licensees

that will be providing onsite sales of cannabis or cannabis products at the event. (BPC § 26200(e))

5) Provides that the ABC Act, which is administered by ABC, regulates the application, issuance, and suspension of alcoholic beverage licenses. (BPC §§ 23000 et seq.)

6) Prohibits an alcoholic beverage licensee from selling, offering, or providing cannabis or cannabis products at its licensed premises. (BPC § 25621.5)

7) Prohibits a cannabis licensee from selling, offering, or providing a cannabis product that is an alcoholic beverage, as specified. (BPC § 26070.2)

This bill:

1) Prohibits the DCC from denying an application for a state temporary event license solely on the basis that there is a license issued pursuant to the ABC Act for the proposed premises of the event.

2) Provides that all on- and-off sale privileges of alcoholic beverages at the venue shall be suspended the day of the DCC licensed event and shall not resume until 6 a.m. on the day after the event has ended.

3) Provides alcohol consumption on the venue premises shall be strictly prohibited the day of the event and shall not resume until 6 a.m. on the day after the event has ended.

4) Allows a state temporary event licensee, upon completion or cessation of the temporary event, to reconcile unsold inventory of cannabis or cannabis products and return it to the licensee's retail premises, as specified.

5) States all unsold inventory of cannabis or cannabis products from the temporary event shall be noted in track and trace prior to transport and be in its original packaging, as defined.

6) States that the ABC shall not take any disciplinary action against a person licensed pursuant to the Act on the basis of a state temporary event license issued by the DCC to a retail licensee that utilizes the same premises as the person licensed pursuant to the ABC Act.

7) Addresses chaptering out issues with SB 1186 (Weiner) by adding double-jointing language.

Background

State Regulation of Cannabis. In 1996, California first legalized cannabis for medical consumption via Proposition 215, also known as the Compassionate Use Act (the Act). Proposition 215 protected qualified patients and primary caregivers from prosecution related to the possession and cultivation of cannabis for medicinal purposes. In 2003, the Legislature authorized the formation of medical marijuana cooperatives—nonprofit organizations that cultivate and distribute marijuana for medical uses to their members through dispensaries.

In 2015, the Legislature passed the Medical Cannabis Regulation and Safety Act (MCRSA). For the first time, MCRSA established a comprehensive, statewide licensing and regulatory framework for the cultivation, manufacture, transportation, testing, distribution, and sale of medicinal cannabis.

Shortly following the passage of MCRSA in November 2016, California voters passed Proposition 64, the "Control, Regulate and Tax Adult Use of Marijuana Act" (Proposition 64), which legalized adult-use cannabis. Less than a year later in June 2017, the California State Legislature passed a budget trailer bill, SB 94 (Senate Committee on Budget and Fiscal Review, Chapter 27, Statutes of 2017), that integrated MCRSA with Prop 64 to create MAUCRSA, the current regulatory structure for both medicinal and adult-use cannabis. Beginning in 2018, Proposition 64 permitted adults 21 years of age or older can legally grow, possess, and use cannabis for nonmedical purposes, with certain restrictions.

Cannabis Events. MAUCRSA allowed for issuance of licenses for state temporary cannabis events at a fair grounds or district agricultural grounds. These licenses allowed for retail or consumption of cannabis at the event, provided that the event is approved by the relevant local jurisdiction. One of the issues behind the drafting of this legislation was that fairgrounds was not always convenient or preferable to hold temporary cannabis events. For example, in the case of Alameda County, the fairgrounds are in Pleasanton, not in the population center of Oakland. As a remedy to these challenges, AB 2020 (Quirk, Chapter 749, Statutes of 2018) was introduced. The bill authorized the Bureau of Cannabis Control, now known as DCC, to issue a temporary state license to provide on-site sales and consumption of cannabis at a temporary event located at a fairground, district agricultural association event, or at another venue expressly approved by a local jurisdiction.

In the same legislative year, AB 2641 (Wood, 2018) attempted to allowed temporary cannabis retailer licenses for cannabis manufacturers and cultivators to sell their own products at temporary cannabis events.

Today, only cannabis event organizers licensed by the DCC are authorized to hold in-person temporary cannabis events. They must be relicensed on an annual basis and are responsible for applying for a temporary cannabis event license for each individual event, maintaining the event space, hiring security, posting required signage, and providing the DCC with a list of participants and a diagram showing the layout of the event and where participants will be set up. Only licensed retailers can sell cannabis goods during an event and must abide by the following:

- The sale and consumption of cannabis must be on-site;
- Use existing and DCC approved packaging;
- Sell and admit only persons over 21 years of age;
- Not provide any free samples;
- Record sales in the Track and Trace system;
- Allow only licensed distributors to transport cannabis goods to and from an event;
- Not allow cannabis consumption to be visible from any public place or nonage-restricted area; and
- Prohibit the sale or consumption of alcohol or tobacco on the premises.

This bill is consistent with the existing framework and intent of temporary event licenses while expanding existing venues to allow for more events. This bill maintains current local approval requirements.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/19/22)

California Cannabis Industry Association
Cal NORML

OPPOSITION: (Verified 8/19/22)

None received

ARGUMENTS IN SUPPORT: According to the California Cannabis Industry Association, "AB 2210 follows AB 2020 (Quirk, Chapter 749, Statutes of 2018)

which authorized the then Bureau of Cannabis Control (BCC) to issue temporary cannabis sales and consumption licenses when permitted by the appropriate local government. This hard-fought legislation was carefully negotiated with local governments, law enforcement and public health advocates to address concerns. To that end, AB 2020 included provisions to safeguard against the consumption of cannabis, alcohol and tobacco on the same premises and other important public safety protocols aimed deterring youth access and protecting public health and safety.

"What was not contemplated was how the ABC would interpret the bill's provisions - specifically that any venue with an existing ABC license is not allowed to be used for a temporary cannabis event - even when cannabis and alcohol is sold and consumed in separate and distinct areas within the same venue. This has had the effect of severely limiting where temporary events can occur, as most event venues maintain an active ABC license."

Cal NORML writes, "AB 2210 clarifies that temporary events at ABC licensed premises are permissible provided that alcohol is not served at the same time. This is consistent with the intent of Prop 64 and advances the intent of AB 2020 (Chapter 749, Statutes of 2018) authorizing local governments to grant temporary cannabis event permits. AB 2210 also clarifies that retailers at special events can return their unsold product to inventory, rather than be obliged to wastefully destroy it."

SUBJECT: Accessory dwelling units

SOURCE: California YIMBY

DIGEST: This bill clarifies and expands requirements for approval of accessory dwelling units (ADUs) and junior accessory dwelling units (JADUs).

Senate Floor Amendments of 8/24/22 address chaptering issues with other ADU bills (SB 897 and AB 916).

ANALYSIS:

Existing law:

1) Requires a local agency to ministerially approve, within 60 days, in an area zoned for residential or mixed-use, an application for a building permit to create an ADU and a JADU as follows:

a) The ADU or JADU that is within a proposed or existing structure, or the same footprint as the existing structure, provided the space has exterior access from the proposed or existing structure and the side and rear setbacks are sufficient for fire and safety.

b) One detached ADU that is within a proposed or existing structure or the same footprint as the existing structure, along with one JADU, that may be subject to a size limit of 800 square feet, a height limit of 16 feet, and side and rear yard setbacks of four feet.

2) Requires a local agency to ministerially approve, within 60 days, on a lot with a multifamily dwelling:

a) Multiple ADUs within the existing structures that are not used as livable space, if each unit complies with state building standards for dwellings.

b) Two detached ADUs that are subject to a height limit of 16 feet and rear and side yard setbacks of four feet.

This bill:

1) Requires a permitting agency to specifically "approve or deny" an application to serve an ADU or a JADU within the same timeframes.

2) Specifies the requirement for a permitting agency to act on an application means either to return the approved permit application or to return in writing, within the prescribed time period, a full set of comments to the applicant with a list of items that are defective or deficient and a description of how the application can be remedied.

3) Defines "permitting agency" to mean any entity that is involved in the review of an ADU or JADU permit and for which there is no substitute, including, but not limited to, applicable planning departments, building departments, utilities, and special districts.

4) Adds front setbacks to the list of local development standards that local governments cannot impose if they would preclude construction of an attached or detached ADU.

5) Specifies, in ministerially approving an application for a building permit to create one detached, new construction ADU on a lot with a single-family dwelling in a zone that allows residential use, a local agency must not impose

any objective planning standards that conflict with the ability for the ADU to meet the standards listed in 3) above.

6) Clarifies the following:

   a) An ADU can be attached to or located in a detached garage.

   b) Local ADU ordinances do not supersede state ADU laws.

Background

According to the Department of Housing and Community Development (HCD), "ADUs are an innovative, affordable, effective option for adding much needed housing in California." ADUs, also known as accessory apartments, accessory dwellings, mother-in-law units, or granny flats, are additional living spaces on single-family or multifamily lots that have a separate kitchen, bathroom, and exterior access independent of the primary residence. These spaces can either be attached to, or detached from, the primary residence. Local ADU ordinances must meet specified parameters outlined in existing state law.

Local governments may also adopt ordinances for JADUs, which are no more than 500 square feet and are bedrooms in a single-family home that have an entrance into the unit from the main home and an entrance to the outside from the JADU. The JADU must have cooking facilities, including a sink and stove, but is not required to have a bathroom.

The cost of constructing an ADU, however, can still be high. According to the State Treasurer's Office, many lower income homeowners, as well as homeowners who have not yet built up significant equity in their homes, are struggling to obtain loans to construct ADUs.

Comments

1) *Housing Crisis*. California's housing crisis is a half century in the making. Decades of underproduction underscored by exclusionary policies have left housing supply far behind need and costs soaring. California currently has 13 of the 14 least affordable metropolitan areas for homeownership in the nation; it also has the second highest rate of renter households paying more than 30% of their income for housing at 52%. According to the 2022 Statewide Housing Plan, published by HCD, California must plan for more than 2.5 million homes over the next eight-year cycle, and no less than one million of those homes must meet the needs of lower-income households. This represents more than double

the housing planned for in the last eight-year cycle. The lack of housing supply is the primary factor underlying California's housing crisis.

During the 1990s, California averaged only 110,000 new housing units per year. During the early 2000s, production increased significantly, reaching a peak of 212,000 units in 2004 before plummeting to historic lows during the recession. Unfortunately, the downward trend continues; the fact is that California has under-produced housing every single year since 1989.

As a result, millions of Californians, who are disproportionately lower income and people of color, must make hard decisions about paying for housing at the expense of food, health care, child care, and transportation—one in three households in the state doesn't earn enough money to meet their basic needs.

2) *Encouraging ADU construction.* According to a UC Berkeley study, *Yes in My Backyard: Mobilizing the Market for Secondary Units,* second units are a means to accommodate future growth and encourage infill development in developed neighborhoods. Despite state law requirements for each city in the state to have a ministerial process for approving second units, local regulations often impede development. In response, several bills, including SB 1069 (Wieckowski, 2016), SB 13 (Wieckowski, 2019) and AB 68 (Ting, 2019), have relaxed multiple requirements for the construction and permitting of ADUs and JADUs.

   According to a 2020 UCLA Working Paper, "state ADU and JADU legislation has created the market-feasible potential for nearly 1.5 million new units." Since 2013, the number of permitted ADUs increased from 799 to 12,813 in 2020, for a total of almost 44,000 ADUs permitted statewide. With localities across the state facing large regional housing needs allocations for the sixth housing element cycle, ADUs and JADUs represent a key tool in the housing production toolbox.

3) *Challenges in Implementing ADU Law.* It has been slightly more than five years since the state made ADUs and JADUs permitted by right. In that time, a substantial amount of knowledge and expertise has been developed by invested parties, such as ADU developers, financiers, and regulators such as local planning and permitting staff, special districts, and utilities, and HCD. Not surprisingly, these parties have been able to identify areas of the law that could benefit from clarification or where existing law does not facilitate the timely permitting of ADUs and JADUs envisioned by the enabling legislation.

   This bill provides multiple measures to address some of the identified tension points. First, it specifies what it means for a permitting agency to "act" on an

application. Currently, the law says that a permitting agency must act within 60 days, but does not specify what it means to act. This bill clarifies that to "act," a permitting agency must approve the permit or return a full set of comments, within the specified time period, in writing with a list of items that are defective or deficient and a description of how the application can be remedied by the applicant. This change will help reduce the time spent by all sides reviewing and revising applications.

Next, this bill would define "permitting agency" to mean any entity that is involved in the review of an ADU permit and for which there is no substitute, including, but not limited to, applicable planning departments, building departments, utilities, and special districts. In practice, the concept of "permitting agency" has centered on the local agency that receives the ADU building permit, making the local agency responsible for the existing timelines in the law.

However, a building permit for an ADU or JADU often needs approval from additional bodies, including special districts and utilities that have separate governance structures and operations from the local agency. These entities are often not held to the same 60-day timeline as local agencies, which can result in delays for ADU and JADU projects and present a challenge for local governments to manage entities beyond their control. By including special districts and utilities in the definition of permitting agency, this bill would require that these entities meet the timelines specified in the bill.

Finally, this bill clarifies the ways in which a local government can and cannot use objective standards to regulate ADUs. Specifically, the bill says that local governments cannot apply front setback requirements if they would preclude construction of an attached or detached ADU.

4) *Another ADU bill?* Earlier this year, the Senate Housing Committee heard SB 897 (Wieckowski), another bill that makes changes to the law governing ADUs. The primary overlap between this bill and SB 897 are in the provisions relating objective standards, an act by an agency, and allowable ADU footprint. A third bill making changes to ADU law, AB 916 (Salas), is also making its way through the legislature.

California YIMBY (source)
California Association of Realtors
Councilmember Zach Hilton, City of Gilroy
People for Housing - Orange County
Southern California Rental Housing Association
Urban Environmentalists
YIMBY Action

OPPOSITION: (Verified 8/23/22)

City of Pleasanton

ARGUMENTS IN SUPPORT: According to the author, "Before the COVID 19 pandemic, our state was facing the nation's worst housing crisis and in the last two years we have seen several families become housing insecure. Some Californians have had their homes foreclosed on, while others are at a greater risk of homelessness. Homeownership rates in California are the second lowest in the nation. Last year, California broke the $800,000 median home price mark for the first time in history. Accessory dwelling units (ADUs) can play an important role in solving California's complex housing crisis. AB 2221 would make it easier to build ADUs by clarifying elements of existing law."

ARGUMENTS IN OPPOSITION: The City of Pleasanton submitted the only opposition for AB 2221, in which they express concern about the expansion of ADU law, parking, and local control issues.

SUBJECT: Reproductive health

SOURCE: ACLU California Action
Black Women for Wellness
California Latinas for Reproductive Justice
If/When/How: Lawyering for Reproductive Justice
NARAL Pro-Choice California
Planned Parenthood Affiliates of California

DIGEST: This bill prohibits a person from being subject to civil or criminal liability, or otherwise deprived of their rights, based on their actions or omissions with respect to their pregnancy or actual, potential, or alleged pregnancy outcome or based solely on their actions to aid or assist a pregnant person who is exercising

their reproductive rights. This bill authorizes a party aggrieved by a violation of the Reproductive Privacy Act (Act) to bring a civil action against an offending state actor, as provided, and also authorizes a person so aggrieved to bring a civil action pursuant to the Tom Bane Civil Rights Act (Bane Act). This bill deletes the requirement that a coroner hold inquests for deaths related to or following known or suspected self-induced or criminal abortion and the requirement that an unattended fetal death be handled as a death without medical attendance.

Senate Floor Amendments of 8/25/22 add chaptering out amendments with AB 2091 (Mia Bonta, 2022) and co-authors.

ANALYSIS:

Existing law:

1) Holds that the state constitution's express right to privacy extends to an individual's decision about whether or not to have an abortion. *(People v. Belous* (1969) 71 Cal.2d 954.*)*

2) Establishes the Act and provides that the Legislature finds and declares that every individual possesses a fundamental right to privacy with respect to personal reproductive decisions. (Health & Saf. Code § 123460 et. seq., § 123462.)

3) Provides that the state may not deny or interfere with a person's right to choose or obtain an abortion prior to viability of the fetus or when the abortion is necessary to protect the life or health of the person. (Health & Safe. Code § 123466.)

4) Provides that it shall be the duty of the coroner to inquire into and determine the circumstances, manner, and cause of all specified types of death, including deaths related to or following known or suspected self-induced or criminal abortion. Inquiries pursuant to this provision do not include those investigative functions usually performed by other law enforcement agencies. (Gov. Code § 27491.)

5) Requires the coroner, within three days after examination of the fetus, to state on the certificate of fetal death the time of fetal death, the direct causes of the fetal death, the conditions, if any, that gave rise to these causes, and other medical and health section data as may be required on the certificate, and shall sign the certificate in attest to these facts. (Health & Saf. Code § 103005.)

6) Provides that public employees are not liable for injury caused by their instituting or prosecuting any judicial or administrative proceeding within the scope of their employment, even if they act maliciously and without probable cause. (Gov. Code § 821.6.) Provides that public employees are not liable for their acts or omissions, exercising due care, in the execution or enforcement of any law, but are liable for false arrest or false imprisonment. (Gov. Code § 820.4.)

7) Allows any individual whose exercise or enjoyment of rights secured by the Constitution or laws of the United States or of this state that have been interfered with, or attempted to be interfered with by threat, intimidation, or coercion, to institute and prosecute in their own name and on their own behalf a civil action for damages and other appropriate equitable relief to protect the peaceable exercise or enjoyment of the right or rights secured. (Civ. Code § 52.1(c).)

This bill:

1) Provides a person shall not be subject to civil or criminal liability or penalty, or otherwise deprived of their rights under the Act, based on their actions or omissions with respect to their pregnancy or actual, potential, or alleged pregnancy outcome, including miscarriage, stillbirth, or abortion, or perinatal death due to causes that occurred in utero. Specifies that a person who aids or assists a pregnant person in exercising their rights under the Act shall not be subject to civil or criminal liability or penalty, or otherwise be deprived of their rights, based solely on their actions to aid or assist a pregnant person in exercising their rights under this article with the pregnant person's voluntary consent.

2) Authorizes a party aggrieved by conduct or regulation in violation of the Act to bring a civil action against an offending state actor in a state superior court for actual damages and a civil penalty a civil penalty of $25,000.

    a) Authorizes preventive relief, including permanent or temporary injunction, restraining order, or other order against the person or persons responsible for the conduct, as the complainant deems necessary to ensure the full enjoyment of the rights described in this article.

    b) Provides that, upon a motion, a court shall award reasonable attorney's fees and costs, including expert witness fees and other litigation expenses, to a plaintiff who is a prevailing party in such an action.

3) Authorizes a party whose reproductive rights are protected and whose reproductive rights are interfered with by conduct or by a statute, ordinance, or other state or local rule, regulation, or enactment in violation of those protections to also bring a civil action pursuant to the Bane Act.

4) Includes, specifically, the right to make and effectuate decisions about all matters relating to pregnancy, including prenatal care, childbirth, postpartum care, contraception, sterilization, abortion care, miscarriage management, and infertility care under legislative findings and declarations that every individual possesses a fundamental right of privacy with respect to reproductive decisions.

5) Deletes the existing duty of the coroner to inquire into and determine the circumstances, manner, and cause of all deaths related to or following known or suspected self-induced or criminal abortion. Clarifies that existing law requiring a coroner to examine a fetus and state on the certificate of fetal death certain things may not be used to establish, bring, or support a criminal prosecution or civil cause of action seeking damages against any person, as provided. Repeals a provision of law requiring all other fetal deaths required to be registered under provisions of law related to registering fetal deaths to be handled as deaths without medical attendance.

6) Clarifies that an abortion is unauthorized if it meets all of the criteria specified in existing law and it is performed by someone other than the pregnant person.

7) Changes gendered terminology in various code sections and eliminates the phrase "crime against nature" from existing code.

Comments

Even though existing state law does not criminalize a person's own actions that might result in a pregnancy loss, two women were recently charged and imprisoned for their pregnancy losses in California. In response to this, the bill reaffirms and strengthens protections in existing state law that prohibit civil or criminal liability for the acts of a pregnant person in relation to their pregnancy outcomes. Additionally, On June 24, 2022, the U.S. Supreme Court published its official opinion in *Dobbs v. Jackson Women's Health* and voted 6-3 to overturn the holding in *Roe,* overturning almost 50 years of precedent that the right to an abortion was protected under the U.S. Constitution. Texas recently enacted a law that essentially places a near-categorical ban on abortions beginning six weeks after a person's last menstrual period. This law has far-reaching implications, not solely for a person obtaining an abortion or performing abortion services, as it

prohibits anyone from "aiding and abetting" a person in obtaining an abortion. (Tex. Health & Safety Code § 171.208.)

In response to all of these issues, this bill seeks to ensure that no one in the State of California is investigated, prosecuted, or incarcerated from ending a pregnancy or experiencing a pregnancy loss and that their right to reproductive freedom is protected. This bill authorizes a civil action against an offending state actor in state superior court for violating rights protected under the Act, with the goal of allowing persons who have had their rights violated by a state actor to seek some accountability. Additionally, this bill specifically includes the right to make and effectuate decisions about all matters relating to pregnancy, including prenatal care, childbirth, postpartum care, contraception, sterilization, abortion care, miscarriage management, and infertility care within the legislative findings and declarations of the Act that every individual possesses a fundamental right of privacy with respect to reproductive decisions. This bill also restates in the Act that a person shall not be subject to civil or criminal liability or penalty, or be otherwise deprived of their rights under that act, based on their actions or omissions with respect to their pregnancy or actual, potential, or alleged pregnancy outcome, including miscarriage, stillbirth, or abortion, or perinatal death due to causes that occurred in utero.

This bill specifically authorizes a person to bring an action under the Bane Act for violations of the Act. A person could bring such an action already; however, the bill makes several changes to the existing provisions of the Bane Act to address the unique circumstances the bill is trying to address. First, this bill specifies that, for purposes of establishing liability, the criminal investigation, arrest, or prosecution, or threat of investigation, arrest, or prosecution, of a person with respect to their pregnancy or actual, potential, or alleged pregnancy outcome, constitutes "threat, intimidation, or coercion" pursuant to the Bane Act. Second, this bill provides that notwithstanding the existing immunities in Section 821.6 of the Government Code, a civil action pursuant to the Bane Act may be based upon instituting or prosecuting any judicial or administrative proceeding in violation of the Act.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee

- The Department of Justice reports costs of $27,000 in Fiscal Year (FY) 2022-23, $57,000 in FY 2023-24 and FY 2024-24, and $27,000 in FY 2025-26 (General Fund).

- *Judicial Branch*: Unknown, potentially significant cost pressures due to increased court workload to adjudicate civil actions that are filed as a result of this bill (Special Fund – Trial Court Trust Fund, General Fund).

ARGUMENTS IN SUPPORT: The author writes:

> A critical part of realizing reproductive justice for people in California is clarifying that nobody will be investigated, prosecuted, or incarcerated for their actual, potential, or alleged pregnancy outcomes. Pregnancy criminalization is a widespread, national problem, and California is not exempt from this issue. Despite clear law that ending or losing pregnancy is not a crime, prosecutors in this state have charged people for homicide offenses for pregnancy loss.
>
> AB 2223 protects reproductive freedom and decisionmaking by ensuring that no one in the State of California will be prosecuted for ending a pregnancy or experiencing a pregnancy loss. As other states that are hostile to abortion rights are attempting to impose criminal or civil penalties on people who assist others in obtaining an abortion, California must reinforce existing state protections against the criminalization and prosecution of abortion and pregnancy outcomes.

The sponsors of this bill—ACLU California Action, Black Women for Wellness, California Latinas for Reproductive Justice, If/When/How: Lawyering for Reproductive Justice, NARAL Pro-Choice California, and Planned Parenthood Affiliates of California—write in support:

> AB 2223 protects reproductive freedom by clarifying that the Reproductive Privacy Act affirms people's right to be free from investigation, prosecution, and incarceration based on their pregnancy outcomes: whether they have an abortion or experience a pregnancy loss.

> It curbs the misuse of state power by eliminating out-of-date provisions that give coroners a duty to investigate certain abortions and pregnancy losses. This helps prevent the harmful investigations and even unlawful prosecutions that happen when abortions and pregnancy losses are reported as though they were crimes. It also ensures that information collected about pregnancy loss is not used to target people through criminal or civil legal systems. […]

ARGUMENTS IN OPPOSITION: The Right to Life League writes in opposition:

> In its attempt to protect women from prosecution for abortion, AB 2223's overbroad language creates a host of unforeseen legal ramifications. The bill potentially de-regulates abortion and overrides existing medical protections for women by creating a class of cooperating individuals unaccountable to state licensing agencies or regulations.
>
> AB 2223 goes much further than simply shielding pregnant people from prosecution; it provides total civil and criminal immunity for the actions (whether legal or illegal) of anyone who aids and assists the pregnant person from civil and criminal liability - so long as the pregnant person consents.
>
> AB 2223 will chill proper investigations of abortion cooperators (not just the pregnant person) by granting penalties, including attorney's fees against anyone who even threatens an investigation including law enforcement, medical professionals and mandated reporters. (emphasis omitted)

ASSEMBLY FLOOR: 57-13, 5/25/22 - See last page for vote

SUBJECT: CalWORKs: temporary shelter and permanent housing benefits

SOURCE: Coalition of California Welfare Rights Organizations
Western Center on Law and Poverty

DIGEST: This bill requires families receiving temporary shelter assistance through the CalWORKs Homeless Assistance (HA) program to receive 16 days of temporary shelter assistance in the form of a one-time payment, instead of receiving 16 days of temporary shelter assistance in the form of an initial payment of three days that can be extended in one-week increments.

Senate Floor Amendments of 8/25/22 delay the operative date to July 1, 2024, or on the date the California Department of Social Services notifies the Legislature that the Statewide Automated Welfare System can perform the necessary automation to implement this section, whichever is later; and incorporate changes to Section 11450 of the Welfare and Institutions Code proposed by SB1083 (Skinner) to resolve conflicts.

ANALYSIS:

Existing law:

1) Establishes the CalWORKs program to provide cash assistance and other social services for low-income families through the federal Temporary Assistance for Needy Families (TANF) program. (*WIC 11200 et seq.*)

2) Provides temporary shelter benefits for a homeless family that is eligible for CalWORKs aid. Makes the temporary shelter benefit $85 per day for families up to four members and $15 per day for each additional family member, up to $145. Allows county human services agencies to increase the daily amount available for temporary shelter as necessary to secure the additional bed space needed by the family. *(WIC 11450(f)(3)(A); WIC 11450(f)(4)(A)(i))*

3) Requires temporary shelter benefits to be available for an initial period of three days, which can be extended in increments of one week for a total of 16 days. Requires this extension of benefits to be based upon: searching for permanent housing, which must be documented on a housing search form; good cause; or other circumstances defined by the California Department of Social Services (CDSS). *(WIC 11450(f)(4)(A))*

4) Allows a county to waive the three-day limit and provide increments of more than one week for a family that becomes homeless as a direct and primary result of a state or federally declared disaster. *(WIC 11450(f)(4)(A)(iv))*

5) Provides, in the case of domestic abuse, for expanded HA benefits in the form of two 16-day periods of temporary shelter assistance within the applicant's lifetime. *(WIC 11450(f)(4)(I)(ii))*

This bill:

1) Requires a family receiving CalWORKs HA to receive temporary shelter benefits for the allowable 16 days in the form of a one-time payment.

2) Makes this change operative on July 1, 2024, or on the date CDSS notifies the Legislature that the Statewide Automated Welfare System (SAWS) can perform the necessary automation, whichever date is later.

3) Makes other technical and conforming changes.

Background

CalWORKs Homeless Assistance (HA). The CalWORKs HA program assists families in the CalWORKs program secure or maintain permanent housing and provides emergency shelter when a family is experiencing or at risk of homelessness. The program is an entitlement benefit available in all 58 counties. Assistance can be temporary or permanent. Temporary assistance provides a daily payment for families to secure housing for up to 16 days in a 12-month period. Permanent assistance provides a security deposit or up to two months of rent. In 2020-21, the program approved temporary assistance for 30,863 families and permanent assistance for 1,683 families.

Existing law requires an initial three days of temporary HA benefits to be granted to an eligible family on the same day of the family's application. During this three-day period, the family provides a sworn statement that they are homeless. After the county human services agency verifies that the family is homeless, the county extends the temporary HA benefits in increments of one week, not to exceed the maximum of 16 days of assistance. This extension of benefits is based on a documented search for housing, good cause, or other circumstances defined by CDSS. This bill removes the three-day waiting period and subsequent one-week incremental payments, and instead provides all 16 days of temporary HA benefits in a one-time payment. Applicants who are eligible for expanded HA because of domestic abuse can receive benefits for two 16-day periods for a total of 32 days; in this case, the family would receive a one-time payment for each 16-day period.

Comments

According to the author:

> While I commend the tremendous help that the CalWORKs Homeless Assistance (HA) Program has provided in getting countless families through tough situations, with still a rising homeless population, California is in need of strengthened solutions. The issue with this assistance is that it is currently fragmented, creating immense barriers for families experiencing homelessness, thus continuing the pervasive struggles that local governments face in helping those experiencing homelessness transition into a path toward stable housing. How it works: temporary assistance is issued for 3 days, then another 7 days and finally 6 days (a 16 day total). That is multiple times which a homeless family has to go down to a county welfare office, often waiting for hours, before they are issued their next 3/7/6 days worth of temporary assistance. A reduction in barriers toward benefits provided by these programs

will better serve the needs of families currently receiving benefits, and for those who still or may need them in the future.

Related/Prior Legislation

SB 1083 (Skinner, 2022) makes various changes to CalWORKs HA, including expanding the number of days eligible families may receive temporary shelter assistance and extending CalWORKs HA benefits for families that include a pregnant person. The bill is currently on the Assembly Floor.

SB 1065 (Hertzberg, Chapter 152, Statutes of 2020) made various changes to CalWORKs HA, including removing liquid resource limits, simplifying verification of homelessness, and expanding eligibility as a result of a state or federally declared disaster, among other changes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Unknown ongoing General Fund costs, likely millions of dollars, from changing the HA payment schedule; unknown one-time General Fund automation costs, likely hundreds of thousands of dollars.
- Cost to counties for administration would be potentially reimbursable by the state, subject to a determination by the Commission on State Mandates.

SUBJECT: School facilities: heating, ventilation, and air conditioning systems

SOURCE: Author

DIGEST: This bill requires a school district, county office of education (COE), charter school, private school, the California Community Colleges (CCC), the California State University (CSU), and requests the University of California (UC), to ensure that facilities, including classrooms for students, have heating, ventilation, and air conditioning (HVAC) systems that meet minimum ventilation rate requirements, as specified, and to install filtration that achieves minimum efficiency reporting values (MERV) levels of 13 or higher. Requires the Division of the State Architect (DSA) to propose for adoption mandatory standards for carbon dioxide monitors in classrooms of a covered school and the UC.

ANALYSIS:

Existing law:

1) Defines "good repair" as a facility that is maintained in a manner that assures that it is clean, safe, and functional. Requires the school facility inspection and evaluation instrument and local evaluation instruments to include specified criteria, including the criterion that mechanical systems, including HVAC systems, are functional and unobstructed and appear to supply adequate amount of air to all classrooms, workspaces, and facilities.

2) Requires the State Allocation Board (SAB) to require school districts to make all necessary repairs, renewals, and replacements to ensure that a project funded by state bond funds is at all times maintained in good repair, working order, and condition. Requires a school district to establish a restricted account within the school district general fund for the purpose of providing moneys for ongoing and major maintenance of school buildings.

3) Requires the local control and accountability plan (LCAP) to include actions that address eight state priorities, including ensuring that school facilities are maintained in good repair.

4) Authorizes the Occupational Safety and Health Standards Board to adopt, amend or repeal occupational safety and health standards and orders.

This bill:

1) Establishes the following definitions:

   a) "Covered school" means a school district, a COE, a charter school, a private school, the CCCs, or the CSU;
   b) "HVAC" means heating, ventilation, and air conditioning; and
   c) "MERV" means minimum efficiency reporting values.

2) Requires a covered school to, and the UC is requested to, ensure that facilities, including, but not limited to, classrooms for students, have HVAC systems that meet the minimum ventilation rate requirements set forth in Table 120.1-A of Part 6 (commencing with Section 100.0) of Title 24 of the California Code of Regulations unless the existing HVAC system is not capable of safely and efficiently providing the minimum ventilation rate.

3) Requires that, if a school's existing HVAC system is not capable of safely and efficiently providing the minimum ventilation rate as proposed to be required, the covered school to, and the UC is requested to, ensure that its HVAC system meets the minimum ventilation rates in effect at the time the building permit for installation of that HVAC system was issued.

4) Requires a covered school to, and the UC is requested to, document the HVAC system's inability to meet the current ventilation standards in the annual HVAC inspection report required by Title 8 of the California Code of Regulations Section 5142, and make this information available to the public upon request.

5) Requires a covered school to, and the UC is requested to, install filtration that achieves MERV levels of 13 or higher where feasible with the existing HVAC system.

6) Requires, during the next triennial update of the California Building Standards Code (Title 24 of the California Code of Regulations), the DSA to research, develop, and propose for adoption mandatory standards for carbon dioxide monitors in classrooms of a covered school and the UC.

7) Specifies that this bill shall apply to the UC only to the extent that the Regents of the UC, by resolution, make it applicable.

Comments

1) *Need for the bill.* According to the author, "Poor air quality in classrooms is a pervasive problem that negatively impacts student health and learning. Despite laws requiring schools to maintain functional HVAC systems to supply adequate ventilation and safe indoor air quality, poor indoor air quality remains an extensive problem. Additionally, poor installment of HVAC systems substantially increase energy costs and fail to maintain good indoor air quality. AB 2232 will require comprehensive HVAC inspections and air monitors in classrooms to ensure the wellbeing and learning of California students are protected from the harmful effects of poor air quality."

2) *HVAC requirements.* Various sections of the law require school facilities to be in good working order and well maintained, including specified inspections. In 2004, the state settled the *Williams v. California* lawsuit and agreed to a number of initiatives intended to provide equal access to instructional materials, safe and decent school facilities, and qualified teachers. The settlement resulted in

an agreement to provide funds to low-performing schools, including $800 million for emergency repair of school facilities. COEs were charged with inspection of the low-performing schools based on criteria of schools in good repair. "Good repair" is defined as a facility that is clean, safe, and functional. The settlement also includes a lengthy list of facilities components required to be inspected, including gas pipes, doors and windows, fences, fire sprinklers, fire extinguishers, alarm systems, electrical systems, lighting, drinking fountains, roofs, gutters, and mechanical systems, which includes HVAC systems.

Under the Labor Code, the Occupational Safety and Health Standards Board (Board) is authorized to develop health and safety requirements for the protection of workers. Regulations adopted by the Board require HVAC systems to be maintained and operated in accordance with the State Building Standards Code and continuously functioning during working hours with some exceptions (e.g., during scheduled maintenance). The regulations also require the HVAC system to be inspected at least annually and problems found during the inspections to be corrected within a reasonable time. The employer is required to document in writing the name of the individual inspecting or maintaining the system, the date of the inspection and/or maintenance, and the specific findings and actions taken. The records are required to be retained for at least five years and made available for examination and copying, within 48 hours of a request, to the Division of Industrial Relations, any employee of the employer, and to any designated representative of employees.

3) *Carbon dioxide monitors.* Studies have found a link between low ventilation rates (supply of outdoor air) in classrooms and attendance, health, and student performance. Adequate ventilation helps students be more alert and focused and is associated with fewer respiratory symptoms and absences due to illness. Ventilation standards are specified in Title 24 regulations. In a 2020 article, researchers at the Lawrence Berkeley National Laboratory and the Western Cooling Efficiency Center at UC Davis reported findings of a study of 11 K-12 schools, monitoring 104 classrooms, with ventilation rates of a majority of the classrooms exceeding the Title 24 level. Carbon dioxide monitors can be used as a proxy for the level of ventilation in a classroom. When classrooms are empty, carbon dioxide levels will be lower. When classrooms are occupied, carbon dioxide levels will be higher as carbon dioxide is exhaled by the people in the room.

The construction of school district, COE, and CCC facilities is required to comply with Title 24 regulations. Beginning January 1, 2023, Title 24 requires carbon dioxide monitors to be installed in all new classrooms. According to the DSA, during the next Title 24 regulatory code cycle, carbon dioxide monitors for existing schools doing repairs or alterations may be considered. Charter and private schools are required to comply with local building codes and not Title 24 regulations.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- This bill could result in unknown, but potentially significant costs for school districts and community colleges to inspect and ensure that their HVAC systems meet the minimum ventilation rate requirements. However, it is unclear how many school and community college districts statewide need to install new filtration as a result of the inspections. The associated costs for these activities could be deemed to be reimbursable by the state.

- This bill could also result in additional, state reimbursable mandated costs for school and community college districts to install new carbon dioxide monitors classrooms. The amount would depend on the number of classrooms that do not already have carbon dioxide monitors installed (that meet the new standards to be adopted) and the extent of the installation costs, but the one-time costs could be in the hundreds of thousands to low millions of dollars of dollars.

- The CSU indicates that its campuses have already taken steps to improve filtration on their existing HVAC systems to bring them into compliance with COVID era safety era rules and regulations. Therefore, any additional costs as a result of this measure will be minor and absorbable within existing resources. The bill's costs for UC are also likely to be minor and absorbable within existing resources.

California Federation of Teachers
California Teachers Association
Community Action to Fight Asthma

Natural Resources Defense Council
Western States Council Sheet Metal, Air, Rail and Transportation

OPPOSITION: (Verified 8/12/22)

None received

ARGUMENTS IN SUPPORT: The United States Green Building Council states, "Under-ventilated schools are associated with increased transmission of infection, asthma exacerbation, cognitive impairment, and health impacts. This, in turn, affects how students learn. Students who attend schools with poor ventilation rates find it more challenging to learn, perform simple and complex tasks, and make decisions. Setting a minimum ventilation rate requirement would set the expectation that fresh air is not something that is nice to have, but rather is necessary for students and teachers to function at school."

ASSEMBLY FLOOR: 57-1, 5/23/22 - See last page for vote

SUBJECT: Excess state land: development of affordable housing

SOURCE: Author

DIGEST: This bill requires the Department of General Services (DGS) to develop, in consultation with the California Department of Housing and Community Development (HCD), a plan to facilitate the development of affordable housing on state-owned excess land, as specified.

Senate Floor Amendments of 8/25/22 (1) require DGS to consult with HCD in developing a set of criteria to consistently evaluate state-owned parcels for suitability as affordable housing site and (2) delete various provisions in the bill,

including the requirement that following each review, DGS issue a report on its review.

ANALYSIS:

Existing law:

1) Establishes DGS for purposes of, among other things, planning, acquiring, constructing, and maintaining state buildings and property.

2) Authorizes DGS, subject to legislative approval, to sell, lease, exchange, or transfer various specified properties for current market value, or upon such other terms and conditions that DGS determines are in the best interest of the state.

3) Requires, by executive order, DGS to, among other things, create a digitized inventory of all excess state land, create screening tools for prioritizing affordable housing development on excess state land, and issue requests for proposals and select affordable housing developments on excess state land, as described.

4) Establishes criteria for state agencies to use in determining and reporting excess lands. A state agency must report land as surplus that is:

    a) Not currently utilized, or is underutilized, for any existing or ongoing programs;
    b) Land for which the agency cannot identify a specific utilization relative to future needs; and,
    c) Land not identified by the state agency within its master plan for facility development.

5) Requires DGS to dispose of surplus state real property in a specified manner, and prescribes the priority of disposition of the property before DGS may offer it for sale to private entities or individuals.

6) Authorizes DGS to sell surplus real property to a local agency or to a nonprofit affordable housing sponsor for affordable housing projects at a sales price less than fair market value if DGS determines that such a discount will enable housing for persons and families of low or moderate income.

7) Authorizes the Department of Transportation, if it determines that real property or an interest therein acquired by the state for highway purposes is no longer necessary for those purposes, to sell to DGS surplus property at less than the property's current fair market value, to the extent permissible, if the property is used for the development of affordable housing.

This bill:

1) Requires DGS, no later than September 1, 2023 and in consultation with HCD, to develop a set of criteria to consistently evaluate state-owned parcels for suitability as affordable housing sites.

2) Requires DGS, on or before July 1, 2024, and every four years thereafter, DGS to do all of the following:

   a) Conduct a review of all state-owned property and identify state-owned parcels that are potentially viable for affordable housing based on the established criteria developed by DGS.
   b) Following each review, contact all related state agencies to determine excess state land.
   c) Collaborate with HCD to prioritize excess state lands for development.

3) Requires DGS, on or before January 1, 2024, and every four years thereafter to update the digitized inventory created pursuant to Executive Order No. N-06-19 with all excess state land suitable for affordable housing identified pursuant to this bill.

4) Requires DGS and HCD, no later than June 1, 2023, and annually thereafter, to evaluate and update the screening tools jointly developed pursuant to Executive Order No. N-06-19.

5) Requires DGS, in consultation with HCD, to pursue the development of affordable housing on excess state properties, including those in the digitized inventory.

6) Requires all state agencies to respond to DGS' request for information to satisfy the requirement of this bill.

7) Provides that all state agencies shall consider exchanging excess state land with local governments for other parcels for purposes of affordable housing

development and preservation, if the exchange is appropriate and maximizes regional capacity to build and preserve affordable housing units.

8) Provides that all state agencies shall use all existing legal and financial authority, subject to the direction of the Governor, to expedite and prioritize the developments described in this bill.

9) Requires DGS, on or before January 1, 2024, and annually thereafter, to report to the Legislature on the status of the excess state properties identified pursuant to the provisions of this bill, including, but not limited to, whether the property has been released and, if so, for what purpose.

Background

Purpose of the Bill. According to the author's office, "before the COVID-19 pandemic, our state was facing the nation's worst housing crisis and in the last two year we have seen several families become housing insecure. Some Californians have had their homes foreclosed on, while others are on the brink of homelessness. AB 2233 will require DGS and HCD to carry out duties prescribed in Executive Order N-06-19 to identify improvements and establish criteria in order to maximize the use of excess state property for affordable housing."

Current Process for Disposal of surplus property. DGS is currently responsible for the disposition of state-owned property that has been declared surplus to future state needs. The Legislature must declare the property to be surplus and must authorize the Director of DGS to sell, exchange, lease, or transfer the surplus property according to specified procedures set forth in law.

Generally, current law requires surplus property to be transferred or sold at market value, or upon such other terms and conditions that DGS determines are in the best interest of the state. Current law gives right of first refusal on any surplus property to a local agency and then to a nonprofit affordable housing sponsor, prior to being offered for sale to private entities or individuals in the open market. In addition, DGS is authorized to sell surplus property to a local agency or to a nonprofit affordable housing sponsor at a sales price less than fair market value if DGS determines that such a discount will enable housing for individuals or families of low or moderate income.

Executive Order N-06-19. In January 2019, Governor Newsom issued Executive Order (EO) N-06-19, which directed DGS and HCD to identify and inventory

excess state-owned property for affordable housing projects. Within the required three months, DGS reviewed over 44,000 parcels, and identified 92 properties that were potentially suitable for housing. As of March 2022, DGS had offered 19 of these properties for affordable housing development, each of which is proceeding through the planning, development, or construction phase. The properties will provide approximately 1,700 affordable housing units.

State Audit Report. In March of 2022, the State Auditor issued an audit titled *State Surplus Property: the State Should Use Its Available Property More Effectively to Help Alleviate the Affordable Housing Crisis.* The audit was mostly positive about the EO, stating that the audit had "found that the executive order has proven effective in its intent, and we estimate that it could ultimately make way for more than 32,000 housing units." It also found that the EO has resulted in the pace of converting excess state property to affordable housing has accelerated from less than one per year to more than six.

However, the audit went on to identify a number of issues with implementation of the EO, including that:

1) At current staffing levels, it will take DGS seven more years to offer up the remaining 73 properties identified in the initial analysis;
2) Given the expedited nature of the initial review, DGS missed sites that would have been identified using more rigorous search criteria; and
3) That the EO did not create an ongoing process for reviewing, identifying, and disposing of surplus land for possible development of affordable housing.

The audit concludes with recommendations for the Legislature, DGS, and HCD. The audit recommended that the Legislature pass legislation to put the provisions of the EO permanently into statute. This bill would implement some the audit's recommendations regarding codifying the EO and related policies.

Related/Prior Legislation

SB 561 (Dodd, 2022) requires DGS to develop criteria to evaluate the suitability of state-owned parcels determined to be used for affordable housing and to conduct a comprehensive survey of state-owned parcels using that criteria by January 1, 2024, and every four years thereafter. (Pending on the Assembly Floor)

AB 2592 (McCarty, 2022) requires DGS to prepare and report to the Legislature a streamlined plan to transition underutilized multistory state buildings into housing, as specified. (Pending on the Senate Floor)

FISCAL EFFECT: Appropriation: No Fiscal Com.:Yes Local:No

According to the Senate Appropriations Committee:

- DGS estimates a one-time cost of $250,000 to screen out certain categories of properties and ongoing annual costs of $631,000 to solicit affordable housing developers and award leases. DGS also notes additional costs of $200,000 every four years for consulting costs to conduct the review of all state-owned property and identify state-owned parcels that are potentially viable for affordable housing. DGS further notes that while it has received two additional positions through this year's budget, additional staffing may also be necessary as more leases are awarded, in order to monitor the lessees' compliance with the lease terms and progress toward fulfilling their affordable housing goals.
- The California Housing Finance Agency (CalHFA) does not anticipate a fiscal impact.
- Unknown fiscal impact to other state agencies to use all legal and financial authority to prioritize and expedite affordable housing projects on state land.

SUPPORT: (Verified 8/24/22)

Aids Healthcare Foundation
California Apartment Association
California Housing Partnership Corporation

OPPOSITION: (Verified 8/24/22)

State Building and Construction Trades Council, AFL-CIO

ARGUMENTS IN SUPPORT: According to the California Apartment Association, "California is in the midst of a housing crisis. One critical solution to the crisis is increasing the state's supply of affordable housing. By requiring DGS, in consultation with HCD, to issue requests for proposals on individual state-owned parcels and accept proposals from affordable housing developers interested in entering into low-cost, long-term ground leases, AB 2233 creates an important step to increasing California's supply of affordable housing."

ARGUMENTS IN OPPOSITION: According to the State Building and Construction Trades Council, AFL-CIO, "while we agree with the idea that

studying and repurposing public properties for the production of affordable housing is an idea worth enacting, this bill will provide new properties for developers at reduced cost on which to build housing but includes no requirements that developers or contractors use apprentices or journeymen or women who are graduate of state-approved apprenticeship programs. These projects will be large and should be so that the state can make a real dent in our affordable housing backlog, so it should be a given that a skilled and trained workforce should be used. By not ensuring that workers be graduates of state-approved apprenticeship programs, it further emboldens developers to find their workers in the underground economy which widely exploits workers in residential construction."

SUBJECT: Optometry: certification to perform advanced procedures

SOURCE: California Optometric Association

DIGEST: This bill adds advanced procedures that an optometrist is authorized to perform pursuant to the Optometric Practice Act (Act) if specified education and training conditions are met. This bill authorizes the Board of Optometry (Board) to charge a fee to issue a certificate to an optometrist who is authorized to perform advanced procedures.

Senate Floor Amendments of 8/25/22 clarify reference to "board" in the bill means the Board; delete a provision that permitted a course administrator, on a case-by-case basis to certify competency if not all specified procedures are completed and instead allows an optometrist seeking initial certification to, once, substitute completion of training in one type of procedure for a similar procedure; delete the requirement that a qualified educator notify their respective licensing board of their participation as a qualified educator; clarify the requirements for renewing an advanced procedure certificate and; resolve chaptering conflicts.

ANALYSIS:

Existing law:

1) Requires an optometrist diagnosing or treating eye disease to be held to the same standards of care for physicians and surgeons and osteopathic physicians and surgeons, as specified. (Business and Professions Code (BPC) § 3041.1)

2) Requires an optometrist seeking certification to use therapeutic pharmaceutical agents, diagnose, and treat specified conditions to apply for a certificate from the Board and meet additional education and training requirements. (BPC § 3041.3)

This bill:

1) States that an optometrist certified to treat glaucoma, as specified, is certified to perform certain advanced procedures after meeting specified requirements, which include graduating from an accredited school of optometry. Requires an optometrist to satisfy the following to perform the advanced procedures

    a) Complete a Board-approved course of at least 32 hours that is designed to provide education on the advanced procedures, including, but not limited to, medical decision-making that includes cases that would be poor surgical candidates, an overview and case presentations of known complications, practical experience performing the procedure including a detailed assessment of the optometrist's technique and a written examination for which the optometrist obtains a passing score, and pass both sections of the National Board of Examiners in Optometry's Laser and Surgical Procedures Examination, unless waived as specified, within two-years prior to beginning the requirements in b) below.

    b) Within three years, complete a board-approved training program in California, which includes all of the required procedures, which involve sufficient direct experience with live human patients to permit certification of competency by an accredited California school of optometry and contain hands-on instruction and performing at least 43 complete surgical procedures on live human patients. The training required must include at least a certain percent of the 43 procedures performed in a cohort model where, for each patient and under the direct supervision of a qualified educator, each member of the cohort independently assesses the patient, develops a treatment plan, evaluates the clinical outcome post treatment, develops a plan to address any adverse or unintended clinical outcomes, and

discusses and defends medical decision-making. The board-approved program is responsible for determining the percentage of the required procedures.

c) Any procedures not completed under the terms above may be completed under a preceptorship model where, for each patient and under the direct, in-person supervision of a qualified educator, the optometrist independently assesses the patient, develops a treatment plan, evaluates the clinical outcome post-treatment, develops a plan to address any adverse or unintended clinical outcomes, and discusses and defends medical decision-making.

d) The qualified educator must certify the competent performance of procedures completed on a form approved by the Board. Upon the optometrist's completion of all certification requirements, the course administrator, who must be a qualified educator for all procedures authorized, on behalf of the program and relying on the certifications of procedures by qualified educators and certify that the optometrist is competent to perform advanced procedures using a form approved by the Board. Permits one time per optometrist seeking initial certification to substitute a procedure that imparts similar skills to achieve the total number of complete procedures, as specified but does not apply to a corneal crosslinking procedure, as specified.

2) Requires an optometrist to make a timely referral of a patient and all related records to an ophthalmologist, or in an urgent or emergent situation and an ophthalmologist is unavailable, a qualified center to provide urgent or emergent care, after stabilizing the patient to the degree possible, if either the optometrist makes an intraoperative determination that a procedure being performed does not meet specified criterion or if he optometrist receives a pathology report for a lesion indicating the possibility of malignancy.

3) States that the provisions of this bill do not authorize performing blepharoplasty or any cosmetic surgery procedure, including injections, with the exception of removing acrochordons that meet other qualifying criteria.

4) Requires an optometrist to monitor and report specified information to the Board including information about advanced procedures and adverse outcomes. Requires with each subsequent licensure renewal after being certified to perform the advanced procedures, as specified, the optometrist shall attest that they have performed at least two each of the advanced procedures required for certification during the period of licensure preceding the renewal

which may include procedures performed during a certification process and within the timeframe.

5) Subjects an advanced procedures certification to restriction in the category for which the optometrist did not complete the required advanced procedures and specifies the requirements to cure the deficiency, as specified.

6) Requires the Board to review adverse treatment outcome reports in a timely manner, requesting additional information as necessary to make decisions regarding the need to impose additional training, or to restrict or revoke certifications based on patient safety authority. Further requires the Board to compile a report summarizing the data collected, including, but not limited to, percentage of adverse outcomes, distributions by unidentified licensee and Board interventions and make the report available on its website.

7) Permits the Board to adopt regulations, as specified, and permits the Board to set the fee for a certificate authorizing advanced procedures.

8) Defines a "complete procedure" to mean all reasonably included steps to perform a surgical procedure, including, but not limited to, preoperative care, informed consent, all steps of the actual procedure, required reporting and review of any specimen submitted for pathologic review, and postoperative care, and multiple surgical procedures performed on a patient during a surgical session, is to be considered a single surgical procedure.

9) Defines a "qualified educator" to mean a person nominated by an accredited California school of optometry as a person who is believed to be a suitable instructor, is subject to the regulatory authority of that person's licensing board in carrying out required responsibilities and is either a California licensed optometrist, as specified or a California licensed physician and surgeon, as specified.

10) Makes other technical and conforming changes.

Background

Optometrists and the Board of Optometry. Optometrists examine, diagnose, treat, and manage diseases, injuries, and disorders of the visual system, the eye, and associated structures, as well as identify related systemic conditions affecting the eye. The Board is responsible for issuing optometry certifications for Diagnostic Pharmaceutical Agents, Therapeutic Pharmaceutical Agents, Lacrimal Irrigation and Dilation, and Glaucoma. The practice of optometry is specified in BPC Section 3041, and includes the prevention and diagnosis of disorders and

dysfunctions of the visual system and the treatment and management of certain disorders and dysfunctions of the visual system, as well as the provision of rehabilitative optometric services, and any or all of the acts further specified in BPC Section 3041. To obtain an optometry license in California, an individual must have a degree of optometry issued by an accredited school or college of optometry, pass the three –part National Board of Examiners in Optometry (NBEO) examination and the California Laws and Regulations Examination, and not have been convicted of a crime, or disciplined for acts substantially related to the profession. There are currently three accredited schools of optometry located in California.

Current Practice of Optometry. A "scope of practice" typically specifies what a healthcare provider can and cannot do for their patients, and generally how they can operate within their profession. As currently drafted, this bill modifies the current scope of practice for optometrists by allowing an optometrist who meets additional training and certification requirements, as prescribed in this bill, to perform specific advanced optometric procedures including laser trabeculoplasty, laser peripheral iridotomy for a defined purpose, laser posterior capsulotomy after cataract surgery, and excision and or drainage of noncurrent lesions of the adnexa, as specified, which is less than five millimeters in diameter, closure of wounds for excision, injections for treatment of chalazia, and corneal crosslinking procedure, as specified.

As part of the certification requirements to be eligible to perform the advanced procedures noted above, an optometrist would need to be licensed in California and certified to treat glaucoma as prescribed in existing law, complete a minimum 32-hour, board-approved course that is designed to provide education on the advanced procedures and pass the NBEO's, Laser and Surgical Examination. Within three years of completing that course and passing the examination, the individual would additionally be required to complete a board-approved training program in California that includes the performance of 43 specified procedures on a live human patient.

The training, which is to include live patients, must include a percentage of procedures be performed in a cohort model. That percentage required is to be determined by the board-approved education program. For those procedures not completed under the cohort model, those procedures are completed under a preceptorship model. A qualified educator, as defined in this bill is a person nominated by an accredited school of optometry who is believed to be a suitable instructor and is either a California-licensed optometrist who is certified to perform advance procedures or a California-licensed physician and surgeon. As stated in

this bill, the qualified educator will be responsible for certifying the competent performance of the procedures completed.

In order to implement the educational and training requirements prescribed by this bill, an additional education course will need to be developed, and the Board will need to approve the education program.

Other States. There are reportedly 10 other states that allow optometrists to utilize lasers for the treatment of certain eye conditions including Alaska, Wyoming, Colorado, Oklahoma, Arkansas, Mississippi, Louisiana, Kentucky, Mississippi, and Virginia.

This bill requires an optometrist who is certified to perform advanced procedures to provide specified reports to the Board, including adverse treatment reports. In addition, as part of the optometrist license renewal, those certified to perform advance procedures will be required to provide an attestation to the Board, that they have completed specified procedures in the past two years. For those areas where the required number of procedures were not completed, the optometrists advance procedure certification may be restricted for those specified procedures.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, this bill will result in unknown fiscal impact to the Board, likely ranging in the high-hundreds of thousands to low-millions of dollars. The analysis also notes that the Board would likely need a delayed implementation date to fully stand-up the new certification and that absent delayed implementation, there will be additional Board cost and workload pressures.

SUPPORT: (Verified 8/25/22)

California Optometric Association (source)
American Optometric Student Association
Western University of Health Sciences
One individual

OPPOSITION: (Verified 8/25/22)

American Medical Association
California Academy of Eye Physicians and Surgeons
California Medical Association
California Society of Plastic Surgeons
Union of American Physicians and Dentists

ARGUMENTS IN SUPPORT: Supporters note that optometrist are already trained to perform these procedures as part of their education in school and this bill provides additional training that will be more rigorous than any other state and that this bill requires additional testing to ensure competency.

ARGUMENTS IN OPPOSITION: Opponents note concerns with the proposed training and education requirements for optometrists to provide additional procedures, and further note concerns of patient harm.

SUBJECT: Extreme heat: statewide extreme heat ranking system

SOURCE: Author

DIGEST: This bill requires the California Environmental Protection Agency (CalEPA), in coordination with the Integrated Climate Adaptation and Resiliency Program (ICARP), the California Department of Public Health (CDPH), and the California Department of Insurance (CDI), to develop a statewide extreme heat ranking system.

Senate Floor Amendments of 8/24/22 delay implementation of the extreme heat ranking system, and require CalEPA, in coordination with the ICARP, the CDPH, and CDI to periodically review and update the ranking system.

ANALYSIS:

Existing law:

1) Establishes the Office of Planning and Research (OPR) to serve the Governor as staff for long-range planning and research including management of state planning grants and coordination of federal grants for environmental goals. (Government Code (GOV) §65040)

2) Establishes within OPR the Integrated Climate Adaptation and Resiliency Program (ICARP) to develop a cohesive and coordinated response to the impacts of climate change across the state. The program includes the State Adaptation Clearinghouse which serves as a centralized source of information and resources for planning and implementing climate adaptation projects. (Public Resources Code (PRC) §71350-71360)

3) Requires the commissioner of the California Department of Insurance (CDI), under SB 30 (Lara, Chapter 614, Statutes of 2018), to convene a working group to identify, assess, and recommend risk transfer market mechanisms that promote investment in natural infrastructure to reduce the risks of climate change related to catastrophic events. (Insurance Code § 12922.5)

This bill:

1) Directs CalEPA to, in coordination with ICARP, CDPH, and CDI, on or before January 1, 2025, develop a statewide extreme heat ranking system, as specified.

2) Requires CDI to, on or before January 1, 2024, report to the Legislature, CalEPA, and ICARP, their findings from a study identifying past extreme heat events, drawing information, and developing recommendations, as specified.

3) Directs CalEPA to, in coordination with ICARP and CDI, on or before January 1, 2024, develop a statewide extreme heat ranking system, as specified, considering information included in the CDI report above.

4) Requires ICARP to, once the extreme heat ranking system is finalized, to develop a public communication plan, recommended partnerships to prepare for extreme heat events, and recommend specific heat adaptation measures that

could be triggered by the ranking system.

5) Directs CalEPA, in coordination with ICARP, CDPH, and CDI, to periodically review and update the extreme heat ranking system, as appropriate.

Background

1) *Extreme heat kills, but how many?* Record-breaking heatwaves and increasing temperatures pose a direct threat to public health; however, there is little information available about the number of heat-related deaths in the state. Various reports have found that heat-related deaths are significantly underreported and that the information that is available lags, sometimes by years, making it impossible for public agencies to respond to heat emergencies in a timely manner. The state does not collect real-time data on heat illness from hospitals or require counties to track and report incidents of heat illness. Research has shown that heat-related health impacts almost exclusively affect lower income and disadvantaged communities, persons with disabilities and seniors. Wealthier Californians who have access to air conditioning in their cars, homes and offices do not generally suffer the most serious effects of extreme heat. A 2021 study by the Luskin Center for Innovation identified significant policy gaps and fragmented state regulation of extreme heat. There is no state entity responsible for managing extreme heat and little coordination of the various departments that administer the state's extreme heat policies.

   In 2013, the state issued guidance and more than 40 recommendations to better prepare the state for extreme heat events, but the state did little to implement the recommendations.

2) *Taking action in California.* Last year, the state renewed its efforts to combat the impacts of extreme heat. The 2021 Climate Adaptation Strategy released by the California Natural Resources Agency includes an Extreme Heat Action Plan (Plan), which serves as an update to the 2013 report. The Plan includes "strategic and comprehensive" state actions that can be taken to address extreme heat, including:
   - Implementing a statewide public health monitoring system to identify heat illness events early, monitor trends, and track illnesses and deaths;
   - Cooling schools in heat-vulnerable communities and support climate smart planning;
   - Accelerating heat readiness and protection of low-income households and expanding tree canopy in communities most impacted by extreme heat;

- Protecting vulnerable populations through increased heat risk-reduction strategies and codes, standards, and regulations;
- Building a climate smart workforce through training partnerships and apprenticeships in jobs and careers that address extreme heat;
- Increasing public awareness to reduce risks posed by extreme heat;
- Supporting local and regional extreme heat action;
- Protecting natural systems, including fish and wildlife, from the impacts of extreme heat.

The state adopted a $15 billion climate package in 2021 to combat the climate crisis, including $800 million over three years to address the impacts of extreme heat and $300 million over two years to support the implementation of the Plan. Programs to address the impacts of extreme heat include urban greening, energy assistance for low-income families, community resilience centers, and low-income weatherization. The Governor's proposed 2022-23 budget includes approximately $175 million in the second year of investments for extreme heat programs.

A 2021 study by UCLA's Luskin Center for Innovation identified significant policy gaps and fragmented state regulation of extreme heat. The authors point out that there is no state entity responsible for managing extreme heat, and little coordination of the various departments that administer the state's extreme heat policies. The study notes that in addition to the obvious health impacts, heat also affects mental health, makes it harder for students to learn, and harder for workers to do their jobs safely. The report's main findings include:

- Most existing California heat-exposure standards are inadequate or have limited compliance;
- Most existing state programs do not make investments that explicitly target heat-vulnerable places or quantify heat risk-reduction benefits;
- Local planning efforts may not prepare cities adequately for extreme heat; and,
- Improving thermal comfort in public spaces and reducing urban heat island effects rely largely on voluntary state guidance.

The Climate Insurance Report, developed by the California Climate Insurance Working Group, identifies four key elements of resilience – risk assessment, risk communication, risk reduction, and risk transfer. Risk assessment and risk communication support community preparation and enable public policies to anticipate events. Early investment in risk reduction reduces future losses, and the expansion of risk transfer options could lead to more affordable and

effective insurance concepts. The report applies these elements of risk to three impacts of climate change: wildfire, flood, and extreme heat. The report provides specific recommendations for preventing and managing the risks associated with these impacts, to reduce climate risks to communities.

The report includes a recommendation to rank heat waves to provide a statewide early warning system to communities and avoid deaths and significant costs, which are often uninsured.

Comments

Purpose of Bill. According to the author, "California's most vulnerable communities disproportionately suffer from the impacts of climate change, and extreme heat events. To better help local governments and residents prepare for these life-threatening weather events, early and advanced warning is needed. Much like the ranking of severe storms, a ranking system for extreme heat waves would provide a clear communication tool for warning vulnerable communities of impending and dangerous heat events. A heat wave ranking system would help local and state governments better target resources and prepare their response efforts.

"Advance warnings provide local governments the opportunity to properly deploy their response efforts and provide a window of opportunity for protecting property, avoiding harm, and ultimately saving lives. For example, early warning of an approaching hurricane often prompts boarding up windows and placing sandbags. California's "red flag" warnings for wildfire conditions and the National Oceanic and Atmospheric Association's tropical storm and hurricane naming system could serve as templates for the state to rank heat waves

"California is uniquely positioned to lead the nation in establishing the first ever-ranking system for heat waves, a system that will be used to proactively protect people's lives and property."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown ongoing costs, likely in the hundreds of thousands of dollars annually (General Fund), for CalEPA to develop and maintain the statewide extreme heat ranking system.
- Unknown one-time costs, likely in the millions of dollars spread over several years (General Fund) for the Office of Planning and Research for additional

communications workload, contracting costs to support language access, and funding for guidelines and heat adaptation measures, as well as resources to support the development and design of the bill's envisioned communications plan.

- Unknown one-time costs, potentially in the hundreds of thousands of dollars, for the California Department of Insurance (CDI) to produce the report required by this bill. Unknown but likely minor ongoing costs for CDI and the California Department of Public Health (CDPH) to consult with CalEPA on the extreme heat ranking system.

SUBJECT: Mental health services

SOURCE: Author

DIGEST: This bill (1) requires individuals who have been involuntarily detained for purposes of evaluation and treatment, and placed under a conservatorship, to receive a care coordination plan developed by specified entities; (2) requires the Department of Health Care Services (DHCS) to convene a stakeholder group to create a model care coordination plan to be followed when discharging those held under temporary holds or a conservatorship; and, (3) permits county mental health plans to pay for the provision of services for individuals placed under involuntary detentions and conservatorship using specified funds, including Mental Health Services Act funds, as specified.

Senate Floor Amendments of 8/25/22 incorporate technical assistance from DHCS and do the following:

1) Specify that care coordination plans for those leaving involuntary detentions must be implemented upon enactment of this bill without waiting for DHCS to develop a model care coordination plan to be used by all facilities authorized to involuntarily detain individuals;

2) Extend the timeframe by which DHCS is required to convene a stakeholder group to create a model care coordination plan from July 1, 2023, to December 1, 2023;

3) Require the care coordination plan to include a scheduled first appointment with specified entities to whom an individual being released from an involuntary detention is referred;

4) Extend the timeframe by which all facilities are required to implement the model care coordination plan developed by DHCS from February 1, 2024, to August 1, 2024; and,

5) Delete the requirement for the Mental Health Services Oversight and Accountability Commission (MHSOAC) to develop, implement, and oversee a framework for tracking and reporting spending on mental health programs and services from all major fund sources and of program- and service-level and statewide outcome data.

ANALYSIS:

Existing law:

1) Establishes the Lanterman-Petris-Short (LPS) Act to end the inappropriate, indefinite, and involuntary commitment of individuals with mental health disorders, developmental disabilities, and chronic alcoholism, as well as to safeguard an individual's rights, provide prompt evaluation and treatment, and provide services in the least restrictive setting appropriate to their needs. Permits the involuntary detention of an individual who is found to be a danger to self or others, or gravely disabled, for various periods of time for evaluation and treatment. [WIC §5000, et seq.]

2) Establishes the MHSOAC to oversee the implementation of the Mental Health Services Act (MHSA), enacted by voters in 2004 as Proposition 63, to provide funds to counties to expand services, develop innovative programs, and integrate service plans for mentally ill children, adults, and seniors through a 1% income tax on personal income above $1 million. [WIC §5845]

3) Requires each county mental health program (CMHP) to prepare and submit a three-year program and expenditure plan, and annual updates, as specified, to the MHSOAC and the Department of Health Care Services (DHCS) within 30 days after adoption by the county board of supervisors, including the establishment and maintenance of a prudent reserve, not to exceed 33% of specified funds, to ensure the CMHP will continue to be able to serve the populations that it is currently serving. [WIC §5847 and §5892]

4) Requires MHSA funding to be utilized to expand mental health services. Prohibits MHSA funds from being used to supplant existing state or county funds utilized to provide mental health services. [WIC §5891]

5) Requires programs and services funded by the MHSA to be designed for voluntary participation. Prohibits persons from being denied access to services solely based on their voluntary or involuntary legal status. [9 CCR §3400]

6) Requires CMHPs to use MHSA funds only to establish or expand mental health services and/or supports for the following specified components: Community Services and Supports (CSS); Capital Facilities and Technological Needs (CFTN); Workforce Education and Training (WET); Prevention and Early Intervention (PEI); Innovative Programs (INN); and the No Place Like Home (NPLH) Program. [WIC §5849.1, et seq. and 9 CCR §3310]

This bill:

1) Requires an individual who has been involuntarily detained for purposes of evaluation and treatment under a 5150 hold and an initial up-to 14-day hold, and placed under a conservatorship, to receive, prior to release, a care coordination plan, even before DHCS creates a model care coordination plan, as specified.

2) Requires the care coordination plan to be developed by, at a minimum, the individual, the facility, the county behavioral health department, the health care payer, if different from the county, and any other persons designated by the individual, as appropriate. Requires, for individuals placed under a 5150 hold, the care coordination plan to also include input and recommendations from the facility.

3) Requires the care coordination plan to include a first follow-up appointment with the health plan, mental health plan, primary care provider, or another appropriate provider to whim the person has been referred. Requires the

appointment information to be provided to the individual before being released.

4) Prohibits an individual who is on involuntary detention or conservatorship from being detained beyond when they would otherwise qualify for release. Requires all care and treatment after release to be voluntary.

5) Requires, for purposes of care coordination and to schedule a follow-up appointment, the health plan, mental health plan, primary care provider, and other appropriate provider to whom the individual has been referred to make a good faith effort to contact the referred individual no fewer than three times, either by email, telephone, mail, or in-person outreach, whichever method or methods are most likely to reach them.

6) Requires DHCS, on or before December 1, 2023, to convene a stakeholder group to create a model care coordination plan to be followed when discharging those held under temporary holds or a conservatorship. Requires the stakeholder group to include, at a minimum, the County Behavioral Health Directors Association (CBHDA), the California Chapter of the American College of Emergency Physicians, the California Hospital Association, Medi-Cal managed care plans, private insurance plans, other organizations representing the various facilities where individuals may be detained under temporary holds or a conservatorship, other appropriate entities or agencies as determined by DHCS, and advocacy organizations representing those who have been involuntarily detained or conserved, as well as individuals who have been detained or conserved.

7) Requires the model care coordination plan and process to outline who will be on the care team and how the communication will occur to coordinate care, and to specify that the care coordination is a shared responsibility between, at a minimum, the county, the facility, and the health care payer, if different from the county, as specified.

8) Requires each CMHP to ensure that a care coordination plan that ensures continuity of services and care in the community for all individuals exiting holds or a conservatorship under this bill is established. States Legislative intent that counties and hospitals be required to implement the model care coordination plan on or before August 1, 2024.

9) Permits CMHPs to use MHSA funds to pay for services provided under this bill, including to those who are being treated on an involuntary basis.

Comments

1) *Author's statement.* According to the author, it is inhumane to be a bystander when we have the power to do something to save lives. It is agonizing to see the high number of individuals who are homeless and have a mental health illness that are dying on the streets. Many of these deaths could have been prevented with adequate care. This bill improves how California provides care to individuals facing a mental illness by creating a more coordinated, accountable and comprehensive mental health system that ensures people receive the adequate care if placed on a hold.

2) *California State Auditor (CSA) audit on the LPS Act.* The CSA released *LPS Act: California Has Not Ensured That Individuals with Serious Mental Illnesses Receive Adequate Ongoing Care* on July 28, 2020. The audit focused on the issues in Los Angeles, San Francisco, and Shasta Counties. Relative to this bill, the CSA concluded that the state does not know the extent to which billions in funding has assisted individuals with mental illness. Realignment funds, according to the CSA, require some reporting but generally does not allow for the public to easily know how the funds are being spent or if they are helping those with mental illness. One report is not designed for public reporting, and another does not include all realignment funds. Likewise, the CSA stated that DHCS's reporting for Medi-Cal funds includes some legislatively mandated performance outcome reports, but that this reporting is insufficient for providing a comprehensive understanding of services offered by CMHPs because they are limited to the services for which Medi-Cal pays. (For instance, Medi-Cal does not pay for services provided at state hospitals for those being treated under the LPS Act.) The CSA highlighted the MHSA as containing the most comprehensive public reporting requirements but identified some issues that make it difficult for stakeholders to determine the balance of unspent funds that CMHPs maintain. For example, the CSA found that CMHPs' unspent funds after FY 2018-19, excluding funds they are permitted to reserve, represented between 73-175% of their respective 2018-19 MHSA revenues. The CSA stated that while some CMHPs argued that most of those funds were already allocated, it is still important for stakeholders to be able to access information about those unspent balances. One complication in knowing that information is a result of DHCS changing its template it provides to CMHPs for the yearly MHSA revenue and expenditure reporting, which no longer asks CMHPs to provide their total unspent funds. Additionally, according to the CSA, DHCS adopted regulations that effectively prohibit DHCS from changing the content of the yearly CMHP reports without revising its regulations. Without that information, stakeholders and the MHSOAC are unable to completely understand MHSA

funding and expenditures. As a result, the CSA recommended that the Legislature assign primary responsibility to the MHSOAC for comprehensive tracking of spending on mental health programs and service from major fund sources, and of program and service level and statewide outcome data, including CMHPs directly reporting to the MHSOAC.

NOTE: For a more extensive analysis, see the Senate Health Committee analysis.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- DHCS estimates state operations costs of $298,000 in 2023-24 and $280,000 ongoing thereafter (50 percent General Fund and 50 percent federal funds).
- The MHSOAC estimates operations costs of between $800,000 and $1 million ongoing (MHSA Fund).

- Costs to counties may be reimbursable by the state, subject to a determination by the Commission on State Mandates.

ARGUMENTS IN SUPPORT: The Association of Regional Center Agencies state that developing a model care coordination plan for people being discharged from a LPS Act hold is part of a long history of changes, refinements, and reforms that both directly and indirectly impact their service system. It will help improve the lives of people with developmental disabilities, and by virtue of benefiting them, it will strengthen the service system. Other supporters cite the CSA's findings in the LPS Act audit report and state that individuals often do not receive a continuum of care after being released from an involuntary hold and may continue to cycle through homelessness, incarceration, and hospitalization, and public reporting remains disjointed and incomplete. Supporters further argue that some who oppose this bill wrongly assert that the MHSA only funds voluntary treatment. While MHSA contains aspirational language favoring voluntary treatment (which they also favor), it has always mandated payment for medically necessary mental health services, medications, and supportive services not otherwise covered by private insurance or other state/federal funds; has always authorized building locked facilities with MHSA funds when the needs of the people to be served cannot be met in a less restrictive or more integrated setting; and, has always mandated funding for programs similar to the Mentally Ill Offender Crime Reduction Grant Program for the seriously mentally ill headed into and out of local jails, which are virtually never voluntary programs. Supporters also state that DHCS has repeatedly clarified that MHSA funds may be used for involuntary services, including LPS hospitalization.

The California Hospital Association (CHA) states they worked with the author's office on several issues, both technical and substantive, that enabled them to remove opposition and move to support. CHA states this bill would enhance accountability, data reporting, and continuity of care for individuals involuntarily detained because they may, due to a mental disorder, be gravely disabled or a danger to themselves or others.

ARGUMENTS IN OPPOSITION: A coalition of opponents (California Alliance of Child and Family Services, California Association of Mental Health Peer-Run Organizations, Catholic Charities East Bay, County Behavioral Health Directors Association (CBHDA), Humannovations-U, Mental Health America of California, National Association of Social Workers California Chapter, Peers Envisioning & Engaging in Recovery Services, Racial & Ethnic Mental Health Disparities Coalition, The Village Project, and one individual) argue that the relevant existing MHSA statute requires each CMHP to plan MHSA services consistent with the recovery vision for mental health consumers, including to promote concepts key to the recovery of individuals, such as hope, personal empowerment, respect, social connections, self-responsibility, and self-determination. The coalition states that the recovery vision is inconsistent with funding involuntary services and that existing law requires programs and/or services provided with MHSA funds be designed for voluntary participation, but individuals cannot be denied access to these programs based solely on their voluntary or involuntary legal status. The coalition and other opponents argue this provision makes clear that the MHSA is to fund voluntary services; however, if a conservatee seeks to voluntarily receive an MHSA service, the conservatee cannot be denied access to this service solely because of their status as a conservatee. Opponents further cite existing law that clarifies that a CMHP can only pay for short-term acute inpatient treatment for clients in full-service partnerships, a program with a "whatever it takes" approach to addressing a client's need. Opponents say these funds currently are used to pay for services that seek to prevent an individual from becoming a conservatee in the first place, and diverting MHSA dollars to pay for the most expensive, restrictive, segregated level of care at the expense of voluntary, community-based programs that are proven to work is the wrong path for California to take.

In a separate letter, CBHDA, the Rural County Representatives of California, and the Urban Counties of California state that county behavioral health agencies must report Medi-Cal specialty mental health and substance use disorder services billing data to DHCS to secure federal financial participation. CMHPs must also report client demographic information to DHCS and annually report MHSA expenditures to DHCS, as well as extensive MHSA three-year plans and annual updates, which include program level outcome data. In turn, this MHSA information is already shared with the MHSOAC. Annual fiscal submissions to DHCS include MHSA expenditures and remaining funds, which is again shared with the MHSOAC. This group states that although they agree with the goal of reporting outcomes that show the extent to which the state's entire mental health system is helping people in need, it is unclear why an overboard data collection requirements by the MHSOAC is included in this bill because of its main focus on involuntary care. This group

further argues that the MHSOAC has oversight authority and tremendous expertise in MHSA and needs to be a collaborator in any new reporting framework for the public behavioral health delivery system. However, since the MHSOAC has no role in the delivery of involuntary behavioral health services and lacks expertise in Medi-Cal and substance use disorder services, this group expresses concerned that an attempt for the MHSOAC to collect, analyze, and report on the broader behavioral health system would be inappropriate and result in onerous, duplicative reporting requirements for county behavioral health agencies. In addition, because this reporting would only capture county behavioral health mental health services, it would lack the more comprehensive reporting of Medi-Cal non-specialty mental health services, as well as substance use disorder services.

Cal Voices states that when the MHSA was passed six general standards were set forth. One of those standards was that mental health services under the MHSA were to be client-driven. Specifically, it was mandated that the client has the primary decision-making role in identifying their needs, preferences, and strengths, and a shared decision-making role in determining the services and supports that are most effective and helpful for them. Client driven programs/services use clients' input as the main factor for planning, policies, procedures, service delivery, evaluation, and the definition and determination of outcomes. Cal Voices states that transferring these funds to programs that force mental health services, such as those under the LPS Act, would be in clear opposition to this objective. As legislators across California rise to meet the growing need of individuals suffering from mental health issues, it has become increasingly concerning that involuntary, forced, and coerced treatment is now the natural answer to connecting people to care. Time and again, research has proven that effective, recovery-oriented mental health treatment does not occur through involuntary means. Cal Voices states that most notably the CSA's 2020 investigation on the LPS Act concluded that involuntary treatment did not lead to positive recovery outcomes. When it comes to involuntary treatment, the MHSA's intent is clear: voluntary services are its priority.

SUBJECT: Occupational safety and health standards: heat illness: wildfire smoke

SOURCE: Author

DIGEST: This bill: (1) requires that the Division of Occupational Safety and Health revise, and submit to the standards board for consideration, the heat illness prevention and protections from wildfire smoke standards to increase the protection of specified workers exposed to heat and smoke in outdoor settings; (2) reduces the air quality index level at which respiratory protective equipment becomes mandatory in order to increase protections of outdoor workers exposed to wildfire smoke; and (4) requires employers to distribute prevention plan materials.

Senate Floor Amendments of 8/25/22 (1) strike provisions requiring an ultrahigh heat standard for heat in excess of 105 degrees Fahrenheit; (2) specify that the wildfire smoke standard revisions apply to farmworkers; and 3) strike the exemption of personnel directly supporting or engaging in wildland firefighting operations from the wildfire smoke standard as it is redundant because the existing standard already exempts these firefighters.

ANALYSIS:

Existing law:

1) Establishes the Division of Occupational Safety and Health (known as Cal/OSHA) within the Department of Industrial Relations (DIR) to, among other things, propose, administer, and enforce occupational safety and health standards. (Labor Code §175, §6300 et seq.)

2) Establishes the Occupational Safety and Health Standards Board within the DIR to adopt, amend, or repeal occupational safety and health standards and orders and requires the standards to be at least as effective as the federal standards. (Labor Code §140)

3) Authorizes citations to be issued to employers when Cal/OSHA has evidence that an employee was exposed to a hazard in violation of any requirement enforceable by the division, including the exposing, creating and controlling employer. (Labor Code §6400)

4) Prohibits a person from discharging or in any manner discriminating against any employee because the employee, among other things, reported a work-related fatality, injury, or illness, requested access to occupational injury or illness reports and records, or exercised any other rights protected by federal law, as specified. Affords an aggrieved worker with reinstatement and reimbursement rights, as specified. (Labor Code §6310)

5) Provides that a person who, after receiving notice to evacuate or leave, willfully and knowingly directs an employee to remain in, or enter, an area closed due to a menace to the public health or safety as set forth in Section 409.5 of the Penal Code shall be guilty of a misdemeanor. (Labor Code §6311.5)

Existing regulatory law:

6) Establishes the Maria Isabel Vasquez Jimenez heat illness standard (*Heat Illness Prevention in Outdoor Places of Employment standard*), applicable to all outdoor places of employment and requires, among other things, that employees have access to potable water and be encouraged to drink water frequently, that the employer have and maintain one or more areas with shade at all times while employees are present that are either open to the air or provided with ventilation or cooling, and that the employer implement high-heat procedures when the

temperature *equals or exceeds 95 degrees Fahrenheit*, as specified. (California Code of Regulations Title 8 §3395 & Labor Code §6721)

7) Establishes a standard for the protection of employees from wildfire smoke (*Protection from Wildfire Smoke*) when the Air Quality Index (AQI) for PM2.5 is 151 or greater and the employer should reasonably anticipate that employees may be exposed to wildfire smoke. The standard requires, among other things, an employer to control for harmful exposure by implementing: 1) engineering controls such as providing enclosed buildings where the air is filtered; 2) administrative controls such as relocating work to a location where the current AQI for PM2.5 is lower; and 3) control by respiratory protective equipment for voluntary use by employees where the current AQI for PM2.5 is equal to or greater than 151, but does not exceed 500. (CA Code of Regulations Title 8 §5141.1)

This bill:

1) Requires Cal/OSHA, before December 1, 2025, to submit to the Standards Board a rulemaking proposal to consider revising the heat illness prevention and protection from wildfire smoke standards. In preparing the proposals, requires Cal/OSHA to consider revising the standards as follows:

   a) Revise the Maria Isabel Vasquez Jimenez heat illness standard to:

      i) Require employers to distribute a copy of the Heat Illness Prevention Plan to all new employees upon hire and upon training required by the standard, but no more than twice per year to each employee.
      ii) Require employers to distribute a copy of the Heat Illness Prevention Plan to all employees at least once on an annual basis.

   b) With regard to farmworkers, revise the wildfire smoke standard, to reduce the AQI threshold for PM2.5 at which control by respiratory protective equipment becomes mandatory to, at a maximum, an AQI of 301 or more, or lower if determined by the division. For an AQI above 301, the employer need not implement fit testing and medical evaluations or otherwise implement requirements under existing standard.

2) Requires the Standards Board to review the proposed changes and consider adopting revised standards on or before December 1, 2025.

3) Requires Cal/OSHA to consider developing regulations, or revising existing regulations, related to additional protections such as acclimatization to higher temperatures, especially following an absence of a week or more from working in ultrahigh heat settings, including after an illness.

4) Defines "PM2.5" to mean solid particles and liquid droplets suspended in air, known as particulate matter, with an aerodynamic diameter of 2.5 micrometers or smaller.

Background

In California, every employer has a legal obligation to provide and maintain a safe and healthful workplace for their employees. Among other things, employers are required to have a written Injury and Illness Prevention Program (IIPP) with specific elements set forth in the Labor Code and Cal/OSHA regulations including, among other things, a system of communication and procedures for correcting unsafe and unhealthy work conditions. Cal/OSHA has a duty and authority to investigate a workplace for safety and welfare of employees, on its own motion or upon complaints. Additionally, Cal/OSHA has various standards that employers must abide by in order to render employment safe for workers.

The standard for wildfire smoke was adopted as emergency standards and became operative on 7/29/2019. The standard for heat illness prevention was also adopted as emergency standards and became operative on 8/22/2005.

Heat Illness Prevention and Protection Standard: For purposes of this bill, it is important to note that the heat illness prevention standard requires, when temperatures reach 95 degrees or above, the employer to take specific actions including to ensure that the employee takes a minimum ten minute net preventative cool-down rest period every two hours and monitoring for signs or symptoms heat illness. This bill would require the standard to include an ultrahigh heat standard for employees in outdoor places of employment for heat in excess of 105 degrees.

Protection from Wildfire Smoke Standard: The standard establishes a protection from wildfire smoke for instances when the Air Quality Index (AQI) for PM2.5 (particulate matter) is 151 or greater and the employer should reasonably anticipate that employees may be exposed to wildfire smoke. The standard requires specific controls by respiratory protective equipment for voluntary use by employees where the current AQI for PM2.5 is equal to or greater than 151, but does not exceed 500.

The standard finds an AQI level of 301 to 500 to be hazardous. If the AQI rises to 500 or above, respirators are required and employers must force employees to wear N95s.

[NOTE: Please see Senate Labor, Public Employment and Retirement Committee analysis on this bill for more background information on the two standards.]

Comments

Need for this bill? According to the author, "Heat-related deaths are on the rise for all workers, but especially farmworkers. Agriculture is an over $50 billion industry in California, providing more than 13% of total commodities and 40% of all organic production in the United States. A study in the American Journal of Industrial Medicine found that agriculture workers are 35 times more at risk for heat-related mortality than other industries. Studies also show that heat stress leads to farmworkers working fewer hours, which diminishes crop output. By 2030, it is estimated that total working hours lost because of extreme heat events will rise by 2.2%: a total of $2,400 billion. By threatening farmworkers' ability to grow and harvest California's crops, ultra-high heat poses an existential threat to the state and to the nation's food supply."

The author also argues notes that, "Worsening heat waves also affect the air we breathe. Ultra-high heat increases smog formation; exacerbates wildfire conditions that lead to smoke and further air pollution; and causes air masses to remain static, which further builds up smoke, dust, gases, and other industrial air pollution. The Air Quality Index (AQI) is a measure that runs from 0 to 500: the greater the value, the greater the level of air pollution. An AQI value between 1 to 150 indicates the air is "unhealthy for sensitive groups" but as this value rises above 200 this indicates the air is "very unhealthy" or "hazardous" for everyone Unhealthy air quality can cause serious health problems up to and including death. Pollution can irritate the respiratory system, reduce lung function, and cause feelings of chest tightness, wheezing, or shortness of breath."

Related/Prior Legislation

AB 1643 (R. Rivas, 2022) requires the Labor and Workforce Development Agency, on or before July 1, 2023, to establish an advisory committee to study the effects of heat on California's workers, businesses, and the economy.

AB 2076 (L. Rivas, 2022) establishes the Extreme Heat and Community Resilience Program to coordinate state efforts and support local and regional efforts to prevent or mitigate the impact of and public health risks of heat.

AB 2238 (L. Rivas, 2022) requires the CA Environmental Protection Agency, by January 1, 2024, to develop a statewide extreme heat ranking system in coordination with ICARP and the Department of Insurance, as provided.

AB 2420 (Arambula, 2022) requires the Department of Public Health, in consultation with subject matter experts, to review available literature on adverse effects of extreme heat on perinatal health, develop guidance for safe-conditions and health considerations for pregnant individuals and infant children.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Department of Industrial Relations (DIR) anticipates increased costs from the bill related to rulemaking and investigations/enforcement. The annual magnitude is unknown, but likely significant (special fund). Specifically, CalOSHA and DIR's Occupational Safety and Health Standards Board (OSHSB) would incur costs to revise and adopt new heat illness and wildfire smoke standards, which must undergo a standardized regulatory impact analysis (SRIA), potentially generating substantial workload.

ARGUMENTS IN SUPPORT: According to California Environmental Voters, "Many farmworkers are paid based on how much they harvest (a piece-rate pay system), which could lead to workers continuing to work during unsafe conditions while their bodies are telling them to stop. Pushing farmworkers' bodies through

strenuous outdoor activity for prolonged periods of time is dangerous in any elevated heat condition, even when temperatures do not meet California's regulated heat thresholds. As ultra-high heat days increase, California's current regulatory thresholds for employee protections – including access to shade, cool water, and cooling breaks – are inadequate."

ARGUMENTS IN OPPOSITION: A coalition of employer organizations, are opposed and write, "We are primarily opposed to AB 2243 because there is no demonstrated need for this bill. AB 2243's proposed changes to the regulations can already be achieved through the existing process provided in law whereby sponsors of this bill could petition the board directly for the amendments they seek. Notably, the petition process is very simple, and does not require any special legal expertise to begin. In addition, the petition process would involve expert review by health safety experts. To date, no such petition has been filed and neither has there been a health safety expert examination of this bill. In addition, both regulations covered by AB 2243 were relatively recently adopted, and do not need an update."

SUBJECT: Perfluoroalkyl and polyfluoroalkyl substances (PFAS) and PFAS products and product components: publicly accessible data collection interface

SOURCE: California Association of Sanitation Agencies
Clean Water Action
Environmental Working Group

DIGEST: This bill requires, on or before July 1, 2025, a manufacturer of per- and polyfluoroalkyl substances (PFAS) or a product or product component containing intentionally added PFAS that is sold, offered for sale, or distributed into the state to register the PFAS or the product or product component containing intentionally added PFAS on the publicly accessible reporting platform created by the Department of Toxic Substances Control (DTSC) and the Interstate Chemicals Clearinghouse (ICC).

Senate Amendments of 8/25/22 delay the requirement to submit information to the database by a year to 2026, give the Department of Toxic Substances Control

(DTSC) further authorization to implement this bill, and clarify the acceptable methods for identifying a PFAS in the database.

ANALYSIS:

Existing law:

1) Requires, under the Safer Consumer Products statutes the Department of Toxic Substances Control (DTSC) to adopt regulations to establish a process to identify and prioritize chemicals or chemical ingredients in consumer products that may be considered chemicals of concern, as specified. (Health and Safety Code (HSC) § 25252)

2) Establishes the Safer Consumer Products (SCP) Program and requires DTSC to adopt regulations to establish a process to evaluate chemicals of concern in consumer products, and their potential alternatives, to determine how to best limit exposure or to reduce the level of hazard posed by a chemical of concern. (HSC § 25252 et seq.)

3) Authorizes DTSC to request information from product or chemical manufacturers, importers, assemblers, or retailers that it determines necessary to implement the SCP Program's framework regulations, via an informational call-in. (California Code of Regulations, title 22, section 69501.4(b))

4) Requires, under the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65), the Governor to publish a list of chemicals known to cause cancer or reproductive toxicity and to annually revise the list. The Office of Environmental Health Hazard Assessment (OEHHA) has listed perfluorooctanoic acid (PFOA) and perfluorooctane sulfonate (PFOS), which are members of the per- and polyfluoroalkyl substances (PFAS) class, as chemicals known to the state to cause developmental toxicity. (HSC § 25249.8)

5) Prohibits, on and after July 1, 2023, a person, including, but not limited to, a manufacturer, from selling or distributing in commerce in this state any new, not previously owned, juvenile product that contains regulated PFAS chemicals. (HSC § 108946)

6) Prohibits, commencing on January 1, 2023, a person from distributing, selling, or offering for sale in the state any food packaging that contains regulated PFAS. (HSC § 109000)

7) Authorizes the State Water Resources Control Board (State Water Board) to order a public water system to monitor for PFAS, requires community water systems to report detections, and where a detected level of these substances exceeds the response level, to take a water source out of use or provide a prescribed public notification. (HSC §116378)

This bill:

1) Defines, for the purposes of this legislation:

    a) "Perfluoroalkyl and polyfluoroalkyl substances" od "PFAS" as a class of fluorinated organic chemicals containing at least one fully fluorinated carbon atom;
    b) "Intentionally added PFAS" as PFAS that a manufacturer has intentionally added to a product, or its components or ingredients that have a functional or technical effect in the product. This includes PFAS components of intentionally added chemicals and PFAS that are intentional breakdown products of an added chemical that also have a functional or technical effect in the product;
    c) "Manufacturer" as:

        i) A person or entity who manufactures PFAS or imports PFAS into the state;
        ii) A person or entity who manufactures or imports a product or product component containing intentionally added PFAS, or whose name appears on the product label;
        iii) A person or entity for whom the PFAS or PFAS-containing product is manufactured or imported, as identified pursuant to the federal Fair Packaging and Labeling Act; and
        iv) Is not a state agency.

2) Requires DTSC to work with an existing multistate data collection entity that is used by other states and jurisdictions to implement, by January 1, 2025, a publicly accessible data collection interface that manufacturers shall use to report data on PFAS-containing products.

3) Authorizes DTSC to enter into any necessary contracts and promulgate necessary regulations to implement the collection interface. Such contracts are exempted from the requirements of the California State Contract Registry,

oversight from the Department of Technology, and other aspects of the Public Contract Code.

4) Requires, to the extent reasonable and feasible, the data collection interface shall streamline and facilitate data reporting required with similar data reporting required by other states and jurisdictions.

5) Authorizes DTSC to provide technical assistance to manufacturers in complying with this requirement.

6) Requires on July 1, 2026 or on or before July 1 of each year thereafter, a manufacturer of PFAS or of a product or product component containing intentionally added PFAS that is sold, offered for sale, distributed, or offered for promotional purposes in the state during the prior calendar year, to register the product in the data collection interface along with:

    a) The name and type of product or component;
    b) The universal product code of the product or component;
    c) The purpose or function for which intentionally added PFAS are used in the product or product component;
    d) The identity and amount of all PFAS compounds in the product or product components. The identity can be reported either as the Chemical Abstracts Service Registry number if known, or the brand name of the formulation that contains PFAS and the name of the formulation manufacturer. The amount of PFAS shall be reported as the amount by weight of each compound, if known, or the total organic fluorine in the product or component;
    e) The amount or numbers of the product or component sold, delivered, or imported into the state; and
    f) The name and address of the manufacturer and the name, address, and phone number of a contact person for the manufacturer.

7) Allows that if two or more entities qualify as a manufacturer of the same PFAS-containing product, only one entity shall be responsible for registering the product. The entities may decide which entity will provide the required information.

8) Specifies that violation of these requirements is subject to civil penalties and not subject to criminal penalties.

9) Exempts from this requirement any product that is regulated as a drug, medical device, dietary supplement, or medical equipment regulated by the U.S. Food and Drug Administration and any medical related products administered to or used to treat animals.

Background

1) *Perfluoroalkyl and polyfluoroalkyl substances (PFAS).* PFAS are a class of man-made chemical compounds that contain multiple fluorine atoms bonded to a single carbon atom. These carbon-fluorine bonds are extremely stable and chemically unreactive, which makes PFAS very useful in creating long-lasting and resistant products. As such PFAS have been produced and used in consumer products since the 1940s, often as surface coatings to repel water, dirt, oil, and grease. They have been used in food packaging, stain- and water-repellent fabrics, nonstick products such as Teflon, and in fire-fighting foams.

   Unfortunately, PFAS' stability also means that these compounds are resistant to being metabolized by organisms or otherwise degraded and so have slowly built up in the environment. Their chemical properties also make many PFAS highly mobile – able to travel long distances, move through soil, seep into groundwater, or be carried through the air far from their point of production or use. These factors combined with their widespread use have made PFAS so ubiquitous that almost every person on Earth has been exposed to PFAS and scientists have found these toxins in the blood of nearly all people tested.

2) *PFAS, don't you know that you're toxic?* Several PFAS have been shown to bioaccumulate significantly in animals or plants and emerging evidence points to their phytotoxicity, aquatic toxicity, and terrestrial ecotoxicity. The Agency for Toxic Substances and Disease Registry (ATSDR) and the US EPA developed the toxicologic profile of 14 PFAS chemicals. Based on a number of factors, including the consistency of findings across studies, the available epidemiology studies suggest associations between perfluoroalkyl exposure and several adverse health effects, including liver damage, increased risk of thyroid disease, decreased antibody response to vaccines, increased risk of asthma, risk of decreased fertility, and small decreases in birth weight.

3) *PFAS are a diverse class of chemical compounds*. Because PFAS have been so industrially useful, many different types of PFAS have been created. As of September 2020, more than 9,000 PFAS chemicals were included in the United States Environmental Protection Agency's (U.S. EPA's) Master List of PFAS Substances. Each one has variations in their chemical properties, but all share a

resistance to chemical reactivity and to environmental and biological degradation. Perfluorooctanesulfonic acid (PFOS), used to create Teflon, and perfluorooctanoic acid (PFOA), previously used in Scotchgard, have been the most extensively studied.

Because of extensive research demonstrating the health risks of these PFAS have been phased out of production and replaced with new PFAS touted as safer alternatives based on the idea that they linger for a shorter time in human bodies. Unfortunately, further research has shown that many of these alternatives are associated with similar adverse health effects as the original PFAS and can travel even more easily in the environment.

4) *To meaningfully regulate PFAS they must be treated as a chemical class*. Performing a complete assessment of the health impacts of all 9,000 PFAS is impractical. As such, the Department of Toxic Substances Control (DTSC) has adopted a rationale for regulating PFAS chemicals as a class, concluding, "it is both ineffective and impractical to regulate this complex class of chemicals with a piecemeal approach." This rationale was presented in the February, 2021, Environmental Health Perspectives article, "Regulating PFAS as a Chemical Class under the California Safer Consumer Products Program." The authors of the article state, "The widespread use, large number, and diverse chemical structures of PFAS pose challenges to any sufficiently protective regulation, emissions reduction, and remediation at contaminated sites. Regulating only a subset of PFAS has led to their replacement with other members of the class with similar hazards, that is, regrettable substitutions… Regulating PFAS as a class is thus logical, necessary, and forward-thinking."

5) *The Interstate Chemicals Clearinghouse (ICC).* The ICC is an association of state, local, and tribal governments that promotes a clean environment, healthy communities, and a vital economy through the development and use of safer chemicals and products. The goals of the ICC are to: avoid duplication and enhance efficiency and effectiveness of agency initiatives on chemicals through collaboration and coordination; build governmental capacity to identify and promote safer chemicals and products; and, ensure that agencies, businesses, and the public have ready access to high quality and authoritative chemicals data, information, and assessment methods.

One of the functions of the ICC is sharing data and information on use, hazard, exposure, and alternatives to chemicals. They maintain a High Priority Chemicals Data System (HPCDS); an online platform that supports reporting

of information on the presence of chemicals of concern in children's products required by the Oregon and Washington. They also maintain a searchable online list of candidate chemicals that DTSC uses to identify priority products for regulation in California.

Comments

1) *Purpose of Bill.* According to the author, "PFAS are harmful to the health and wellbeing of all Californians. It's unconscionable that PFAS are polluting our drinking water systems and impacting some of our most vulnerable communities. AB 2247 will help us accurately identify how much PFAS is coming into the State of California and will enable us to explore how best to mitigate its harmful impacts. Without this information, we cannot take meaningful steps toward protecting the health of Californians and our environment in the long-term."

2) *Will it be possible for all businesses to comply?* Opponents to the bill have raised concerns that as California cannot control out-of-state suppliers of components, they may not be able to obtain this information from members of their supply chain. A provider of a component could refuse, possibly on the basis of trade secrets, and the Californian manufacturer or importer will be in violation with little recourse to access the information. In this case the bill provides an option to instead provide the amount of organic fluorine in the product, which can serve as a very rough auxiliary for the potential for the compound to persist due to the high stability of fluorine-carbon bonds, without revealing proprietary information. However testing a component to determine the total organic fluorine levels can cost thousands of dollars, which may be prohibitively expensive for many smaller businesses. Small businesses also will likely face challenges in dealing with the regulatory burden of tracing the full complicated supply chain for any multi-component products, especially as they will likely have less leverage in contract negotiations to obtain required information from their suppliers.

3) *It is important to monitor "safe" products.* Several groups in opposition to this bill are seeking exemptions under the arguments that their products are already well-regulated or are unlikely to result in direct exposure to humans due to being installed in inaccessible components. However the focus of the reporting in this bill is not to address the potential for direct exposure, it is to understand and trace the source of PFAs that accumulate in the environment. While PFAS in certain products may pose little to no health risk while in use, eventually those products will make their way to landfills or other disposal sites. They will

break down over time and the highly mobile PFAS will make their ways into the broader environment. Being able to track where the PFAS comes from is essential to developing policies to address their spread, such as collection and disposal programs for particularly problematic sources.

FISCAL EFFECT: Appropriation: No Fiscal Com.:Yes Local:No

According to the Senate Appropriations Committee:

- DTSC estimates one-time costs of $2 million (General Fund) for the creation of the new reporting system. Staff notes that the bill could also generate cost pressures of an unknown amount (General Fund) to operate and maintain the reporting system

ARGUMENTS IN SUPPORT: According to the sponsors of the bill, "PFAS are among the most persistent toxic compounds in existence, contaminating everything from drinking water to food and, because of their grease and water proof qualities are used widely in consumer products, such as food packaging, personal care products, and textiles, as well as industrial products and processes. They are found in the blood of virtually everyone on earth, including newborn babies. Very low doses of PFAS chemicals in drinking water have been linked to suppression of the immune system, interference with vaccines, and are associated with an elevated risk of cancer, increased cholesterol, and reproductive and developmental harms, among other serious health concerns.

"While we know that some products contain PFAS, we don't know how PFAS is being used throughout the marketplace or in industrial processes. Such knowledge is key to ensuring that our state and local regulators can manage PFAS pollution, implement meaningful source control, and ensure that the public isn't unnecessarily exposed to the chemicals…

"Therefore, it is critical for the state and the public to understand how PFAS chemicals are used and how much of the chemicals are imported into California. AB 2247 will ensure that manufacturers have to report their PFAS use to the state, and the bill will create a modest, but straightforward, method for the state to manage this information. This is a key first step to understanding and ultimately managing PFAS contamination in California.

ARGUMENTS IN OPPOSITION: According to the coalition of industry groups opposed to this bill, "Collectively, we support the responsible production, use and management of fluorinated substances, including regulatory requirements that are protective of human health and the environment, taking into consideration the diversity of physical and chemical properties and the environmental and health profiles of these substances.

"With respect to AB 2247, we have several concerns including:

- An overly broad definition of PFAS that does not consider differing health/safety profiles, uses or potential for exposure.

- Overlap and redundancy with new PFAS reporting requirements underway at the U.S. Environmental Protection Agency (USEPA).
- Ability for the Dept. of Toxic Substances Control (DTSC) to address these types of issues under existing authority and the potential for expanded authority under legislation currently moving in the Legislature.
- Lack of clarity on how this information will presented to the public to ensure information is presented in an unbiased, scientifically sound manner that does not cause unnecessary concern.
- Lack of any confidential business information/trade secret protections.
- Impractical implementation timelines.

"For these reasons, we must respectfully oppose AB 2247. We look forward to continuing to engage on this important issue."

SUBJECT: Water quality: California-Mexico cross-border rivers

SOURCE: Author

DIGEST: This bill provides $100 million to the State Water Resources Control Board (Water Board) from the General Fund, upon appropriation by the Legislature, to address water quality problems arising in California-Mexico cross-border rivers.

ANALYSIS:

Existing law:

1) Establishes the Porter-Cologne Water Quality Control Act, which prohibits the discharge of pollutants to surface waters unless the discharger obtains a permit from the State Water Board. (Water Code § 1300 et seq.)

2) Requires the California-Mexico Border Relations Council (Council) to establish the New River Water Quality, Public Health, and River Parkway Development Program to coordinate funding for, and the implementation of the strategic plan developed by the Council. (Public Resources Code § 71103.6)

This bill:

1) Makes $100 million available from the General Fund, upon appropriation by the Legislature in the annual Budget Act or another statute, to the Water Board for grants and direct expenditures to address water quality problems arising in California-Mexico cross-border rivers.

2) Requires the funding to be available for purposes consistent with the New River Water Quality, Public Health, and River Parkway Development Program and water quality projects for the Tijuana River.

3) Makes 5% of the funding available for the administrative costs of the Water Board in implementing these provisions and 5% available for the costs of the Office of the Attorney General in enforcing these provisions.

4) Requires the Water Board, in consultation with the California Environmental Protection Agency, the San Diego Regional Water Quality Control Board, and the Colorado River Basin Regional Water Quality Control Board, to administer the funding, as specified.

5) Requires expenditures to be consistent with the work of the California Environmental Protection Agency Border Affairs Program, and requires priority for the funding to be given to projects that have funding committed by the United States, the Republic of Mexico, the State of Baja California, or the City of Tijuana or Mexicali.

6) Authorizes grant funding to be conditioned on enforceability and accountability mechanisms agreed upon by the Water Board and the recipient, as prescribed, and authorizes funding to be provided for activities or projects in the State of Baja California under certain circumstances.

7) Requires the Water Board and the California Environmental Protection Agency to notify the leadership office in each house of the Legislature on cross-border collaboration and the expenditure of the funding.

Background

1) *Tijuana River Watershed*. The Tijuana River Watershed is an approximately 1,700-square mile area that straddles the U.S./Mexico border. While nearly three-quarters of the watershed are located in Mexico, it drains to the Pacific Ocean through the 8-square mile Tijuana River Valley (Valley) north of the

border. The Valley is home to tidally flushed wetland, riparian, and upland habitats supporting a broad range of organisms, including threatened and endangered species, and includes a number of federally-listed historical and archaeological sites.

Land uses in the watershed are diverse, from largely undeveloped open space in the upper watershed to highly-urbanized, residential, commercial, military, and industrial areas in the lower watershed. Rapid urbanization has occurred over the past several decades, most dramatically in the city of Tijuana where more than 2.7 million people currently reside. Several large dams (Barrett and Morena in the U.S., and Rodríguez and El Carrizo in Mexico) control a large majority of the surface water flow in the watershed. While these dams provide reservoirs of potable water to support residents and associated infrastructure on both sides of the border, they also serve as traps for the downstream movement of sediment and trash to the lower watershed. Therefore, the sediment and trash produced in the 462-square mile area downstream of the dams are responsible for impacts to the Valley.

While significant improvements in wastewater treatment have, in recent years, improved water quality on both sides of the border, stormwater flows continue to bring substantial amounts of sediment, trash, and other contaminants into the Valley. The sediment and trash pollutants cause water quality impairments, threaten life and property from flooding, degrade valuable habitats, and impact recreational opportunities for residents and visitors.

2) I*nternational Boundary & Water Commission (IBWC).* Bi-national concerns about Tijuana River water quality date back to 1934, when the United States and Mexican governments instructed the International Boundary Commission (predecessor to IBWC) to prepare a report on the Tijuana sewage problem. When the United States and Mexico signed the Water Treaty of 1944, Article III made the use of cross-border waters subject to "sanitary measures or works." The two governments also agreed to give preferential attention to the solution of all border sanitation problems.

In light of continued cross-border sanitation issues, the U.S. and Mexico created a binational interagency "Clean Water Partnership." In 1990, IBWC authorized construction of a treatment plant on the Tijuana River, north of the border, called the South Bay International Water Treatment Plant. This treatment plant has current capability of treating 25 million gallons per day (MGD), but has an expansion capability of up to 100 MGD. Once treated,

water from the plant flows through a 4.5-mile, 11-foot pipe leading to the South Bay Ocean Outfall.

3) *Tijuana River Recovery Team.* The Tijuana River Recovery Team (Recovery Team) is a collaboration of more than 30 federal, state, and local agencies and other interested parties from both sides of the U.S./Mexico border focused on addressing sediment, trash, and associated environmental issues. The mission of the Recovery Team is to bring together the governmental, administrative, regulatory, and funding agencies in tandem with advice from the scientific community, the environmental community, and affected stakeholders to protect the Valley from future accumulations of trash and sediment, identify, remove, recycle or dispose of existing trash and sediment, and restore the Tijuana River floodplain to a balanced wetland ecosystem.

4) *Recent Developments on the Tijuana River*. Water quality in the Tijuana River has deteriorated significantly in recent years. As the San Diego Union-Tribune reported last year, Tijuana River water pollution required closing of beaches north of the border on 295 days in 2020. Deteriorating water quality has led to both conflict and increased effort to address water quality in the Tijuana River.

5) *New River*. The New River is a transboundary river that flows from Mexicali, Mexico into the City of Calexico and drains into the Salton Sea. The New River's pollution problem dates back to the late 1940s. By the 1970's, the New River had acquired the reputation for being one of the most polluted rivers in the U.S., with many of the pollutants posing serious human health hazards. Pollution sources have included untreated municipal sewage, trash, treated and untreated industrial discharges, treated effluent from municipal wastewater treatment plants, urban storm drainage and a variety of agricultural irrigation runoff on both sides of the border.

6) *Binational Technical Committee*. As part of the US/Mexico Water Treaty of 1944, the Binational Technical Committee (BTC) was established in 1994. The IBWC established teams of technical personnel and technical advisers from agencies of each country with expertise in wastewater infrastructure. The BTC serves to help identify pollution problems, oversees development and implementation of the binational sanitation projects agreed upon by Mexico and the U.S., and makes project and policy recommendations to address New River pollution from Mexico.

7) *Pollution problems in Mexicali*. A series of quick fix sanitation projects were implemented in various locations in Mexicali in 1992 and 2007 as part of the US/Mexico Water Treaty. These projects focused on improvements to the collection system and rehabilitation of pumping plants in 1992, and the construction of a new wastewater treatment plant in 2007. Pollution worsened due to the rapid population growth and industrial development in Mexicali. The projects implemented back in 2007 did not consider the boom in population and the capacity of the wastewater treatment plants wasn't large enough.

   In 2013, new problems began to emerge in Mexicali due to collection system pipes aging, inadequate oversight of operations and maintenance, and continued sewage spills. Improvements needed in Mexicali include: rehabilitation of the wastewater treatment plants and the sewage collection system.

   The failing sanitation system in Mexicali continues to discharge raw sewage and other waste into the New River, which in turn threatens the health of Calexico residents, harms wildlife and the ecosystem, and undermines Salton Sea management and restoration efforts. The proposed improvements, including installing a trash screen, piping the dirty water around the city, and pumping a portion of the treated water back into the channel to restore some of the flow, are intended to protect Calexico residents and address threats to ecosystems.

8) *New River Improvement Project Strategic Plan.* Other efforts to help address the New River pollution at the border include the New River Improvement Project Strategic Plan. AB 1079 (Perez, 2009), required the California-Mexico Border Relations Council (IBWC) to create a strategic plan to study, monitor, remediate and enhance the New River's water quality to protect human health. One of the strategies proposed is the New River Improvement Project, Calexico. The design of the New River improvement Project essentially reroutes the New River over a two mile stretch to minimize the community's exposure to the polluted river. Unlike the “fixes” to Mexicali’s sanitation system that were completed by 2007 and funded by both countries, the New River Improvement Project currently is a California undertaking.

9) *California Legislature’s Work on Border River Water Quality.* The California Legislature has been considering and addressing water quality in its border rivers (Tijuana River and New River) for the last 20 years, as water quality issues have evolved. It has passed bills to require state agency projects to

improve water quality and has held informational hearings on the work of all those who strive to improve border river water quality.

The Legislature's budget committees have reviewed programs and projects on border river water quality. State Budgets since 2017 have included appropriations for border river water quality as follows:

a) 2017: Reappropriated $2.1 million from a 2014 California Wildlife, Coastal and Park Land Conservation Fund of 1988 for acquisition of lands in the Tijuana River Valley;
b) 2019: Appropriated $15 million for Tijuana River pollution control;
c) 2020: Appropriated $18 million from the General Fund and $10 million from Proposition 68 water bond funds for the New River Project; and
d) 2021: Appropriated $20 million to improve water quality in border rivers.
e) 2022: Appropriation of $15 million for Border rivers cleanup (pending).

10) *U.S.-Mexico-Canada Agreement*. When Congress approved the US-Mexico-Canada Agreement (USMCA) in 2019, California Congressional representatives succeeded in adding $300 million to identify infrastructure solutions to address significant negative impacts to water quality, public health, and the environment of water pollution in cross-border rivers. In 2020, the US government committed the funding to the US EPA to be used to address Tijuana River water quality problems. In November 2021, US Ambassador Ken Salazar and US EPA Administrator Michael S. Regan met with Mexican officials and stakeholders at the Tijuana border to discuss the results of the US EPA's alternatives analysis for solutions to Tijuana River water quality issues. The results outlined a plan to address water quality on both sides of the border, throughout the watershed. The plan identifies an estimated capital cost of approximately $627 million and approximately $25 million for operations and maintenance.

Comments

1) *Purpose of this bill.* According to the author, "In order to advance on the commitments the state has made and build off of the funding we have already committed to the Tijuana and New Rivers, we need to provide a substantive commitment to improving the water quality coming from our border region into our communities for years to come. While we will continue to work with our partners in Mexico, we need to ensure that we are not jeopardizing public health and are able to fully tackle the problem through infrastructure investments in our own backyard."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Cost pressure of $100 million (General Fund) for the Legislature to provide an appropriation to the Water Board. Of this amount, the Water Board estimates costs of up to $2.475 million for State Water Board and Regional Water Board efforts to administrate the fund and provide project oversight.
- The Department of Justice (DOJ) indicates that its costs are unknown but could potentially be significant (General Fund). The Department anticipates there may be unfunded enforcement-related costs (above the 5% earmarked for cost reimbursement to the Department) pertaining to the outlined funding agreements. Actual DOJ costs would depend on several factors, including the number and complexity of resulting funding agreements the Department would need to enforce, the nature of the legal dispute at issue, and the involved parties.

ARGUMENTS IN SUPPORT: According to the Surfrider Foundation, "Surfrider is in strong support of AB 2248 because it addresses water quality in California Mexico Rivers which affects public health, coastal recreation, and unique wetland habitat in California and Baja. Beaches in San Diego are closed more than two thirds of the year regularly (including in 2021) as they are considered unsafe for recreating by Environmental Protection Agency standards for 'safe' coastal recreation. Extreme pollution in places like Goat Canyon mean that areas near

border rivers are so toxic that our volunteers used to wear protective suits to conduct cleanups and now often don't even try to clean these areas because volunteers were frequently getting sick. Additionally, U.S. Border Patrol and Navy conduct patrols and training in contaminated environments that put agents and sailors at risk. We urge the Assembly to pass AB 2248 in advance of public health and coastal recreation needs near the border."

SUBJECT: Charles James Ogletree, Jr. Courthouse

SOURCE: Merced County NAACP
NAACP California Hawaii State Conference

DIGEST: This bill names the Merced County main courthouse of the Superior Court of California as the Charles James Ogletree, Jr. Courthouse. This bill contains an urgency clause.

Senate Floor Amendments of 8/25/22 add an urgency clause and co-authors.

ANALYSIS:

Existing law:

1) Grants counties designated authorities and responsibilities with regard to court facilities located in those counties, including managing shared-use buildings the title to which is held by counties. (Gov. Code § 70393.)

2) Grants the Judicial Council full responsibility, jurisdiction, control, and authority over trial court facilities the title to which is held by the State. (Gov. Code § 70391 (a).)

This bill names the Merced County main courthouse of the Superior Court of California as the Charles James Ogletree, Jr. Courthouse and includes findings and declarations about the remarkable life of Charles James Ogletree, Jr. and his extraordinary contributions to California and the United States. This bill contains an urgency clause.

Background

This bill honors the life and work of Charles James Ogletree, Jr., by naming the main courthouse in Merced County after him. This bill details the incredible impact Professor Ogletree has made to our state and nation. A bill is necessary to effectuate naming the courthouse after Professor Ogletree because the current Judicial Council courthouse naming policy prohibits naming courthouses after people who are still alive. This bill is sponsored by the Merced County NAACP and NAACP California Hawaii State Conference; supported by the California Legislative Black Caucus, and Pamela A. Ogletree; and has no registered opposition.

The Judicial Council's Courthouse Naming Policy was adopted in 2009 and prohibits the naming of a courthouse after a person who has not been deceased for 10 years. The policy specifies that Courthouses are rarely named after people. However, a "courthouse may be named after a deceased person" if the "person made recognizable, significant contributions to the state or national justice system" and the person has been "deceased a minimum of 10 years." The Legislature does have the authority to rename courthouses without Judicial Council's consent. However, that authority must be exercised through a bill rather than a resolution because of the authority the Legislature vested in the judicial branch through the Trial Court Facilities Act. (Gov. Code § 70391.)

Comments

According to the author:

> From humble beginnings in his hometown of Merced, Professor Ogletree went on to earn a Master's Degree from Stanford and his Juris Doctor from Harvard before embarking on a prolific career focused on the advancement of civil rights, racial justice, and social tolerance. In addition to his influential writings

as a legal scholar, Professor Ogletree inspired generations of law students as a professor at Harvard, including former President and First Lady Barack and Michelle Obama. As a public defender and civil rights attorney, Professor Ogletree notably represented survivors of the 1921 Tulsa Race Massacre and acted as legal counsel to Professor Anita Hill during the Clarence Thomas Senate confirmation hearings. Professor Ogletree received countless prestigious awards throughout his career including being named one of the 100 Most Influential Lawyers in America by the National Law Journal. Both Harvard Law School and UC Merced have established endowed positions named in his honor.

Professor Ogletree founded The Charles Hamilton Houston Institute for Race and Justice in honor of the legendary civil rights lawyer and mentor to such influential figures as Thurgood Marshal and Oliver Hill. He has been a leader pushing the national conversation on race and justice forward including as an author of such works as Life without Parole: America's New Death Penalty, The Presumption of Guilt: The Arrest of Henry Louis Gate, Jr. and Race, Class, and Crime in America, and The Road to Abolition: The Future of Capital Punishment in the United States.

As one of Merced County's proudest native sons who has made incredible contributions towards the advancement of racial justice in the American legal system, there is no more deserving individual on whom to bestow this honor than Professor Ogletree. As the criminal justice system reexamines practices that have resulted in the over-incarceration of minority communities, and in particular black men, it would be fitting for more judges to conduct their work in facilities named for leaders like Professor Ogletree.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The Judicial Council reports one-time costs of approximately $175,000 to support the acquisition and installation of appropriate signage to reflect the courthouse name change (Special Fund – State Court Facilities Construction Fund,* General Fund).

  *Structurally imbalanced.

SUBJECT: Digital financial asset businesses: regulation

SOURCE: Consumer Federation of California

DIGEST: This bill establishes a licensing and regulatory framework, administered by the Department of Financial Protection and Innovation (DFPI) for digital financial asset business activity, as specified.

Senate Floor Amendments of 8/22/22 make clarifying and technical changes by (1) extending licensure deadline from January 1, 2024, to January 1, 2025; (2) sunsetting the prohibition on certain types of unbacked stablecoins on January 1, 2028, which turns this prohibition into a temporary moratorium; and clarifiying the application of California Financial Information Privacy Act (Cal FIPA) to digital

financial business activity. (Note: AB 2269 was previously amended to apply CalFIPA to AB 2269 licensees, this amendment just adds additional clarification.)

ANALYSIS:

Existing law:

1) Prohibits, pursuant to the Money Transmission Act, a person from engaging in the business of money transmission, as defined, without a license from the Commissioner of Financial Protection and Innovation.

2) Regulates, pursuant to the California Financial Information Privacy Act, the disclosure by a financial institution, as defined, of a consumer's nonpublic personal information.

This bill:

1) Establishes the Digital Financial Assets Law to be administered by DFPI.

2) Exempts from the new division activities covered by existing federal and state laws related to securities and electronic fund transfers; banks and credit unions; and persons providing only specified computing, network, data storage or security services, and persons whose digital financial asset business activity is reasonably expected to be valued at $50,000 or less, among other specified exemptions.

3) Prohibits a person from engaging in digital financial asset business activity without a license with DFPI, as specified.

4) Establishes requirements of an application for licensure, authorizes DFPI to charge a fee to cover the reasonable costs of regulation, and requires DFPI to investigate specified characteristics of the applicant before making a decision on the application.

5) Requires a licensee to maintain a surety bond or trust account for the benefit of its customers in a form and amount as determined by DFPI for the protection of the licensee's customers, as specified.

6) Requires a licensee to maintain capital in an amount and form as DFPI determines is sufficient to ensure the financial integrity of the licensee and its ongoing operations based on an assessment of specific risks applicable to the licensee, as specified.

7) Establishes a process for a licensee to renew its license on an annual basis.

8) Authorizes DFPI to adopt rules necessary to implement the division and issue guidance as appropriate.

9) Authorizes DFPI to conduct any time and from time to time, examine the business and any office, within or outside this state, of any licensee, registrant, or any agent of a licensee or registrant in order to ascertain whether the business is being conducted in a lawful manner and whether all digital financial asset business activity is properly accounted for.

10) Requires a licensee to file with DFPI a report related to a material change in information provided in the application for licensure, a material change in the licensee's digital financial asset business activity, or a change of an executive officer, responsible individual, or person in control of the licensee.

11) Provides specified applicable rules in determining whether a person has control over a licensee; requires that, at least 30 days prior to a proposed change in control of a licensee, the proposed person to be in control submit an application with information required by this division for an application for licensure, as applicable; and requires DFPI to decide whether to approve the application, as specified.

12) Provides a process similar to an application related to a proposed change in control for an application of a proposed merger or consolidation of a licensee with another person.

13) Defines "enforcement measure" as an action that contains, but is not limited to the following: (a) suspend or revoke a license; (b) order a person to cease and desist from doing digital financial asset business activity; and (c) request the court to appoint a receiver for the assets of a person doing digital financial asset business activity.

14) Authorizes DFPI to take an enforcement measure against a person as specified.

15) Specifies processes related to enforcement actions, including a person's rights to notice and opportunity for a hearing as appropriate, when a revocation of a license is effective, and when a suspension of a license is effective.

16) Authorizes DFPI to enter into a consent order with a person regarding an enforcement measure and permits the order to provide that it does not constitute an admission of fact.

17) States that the chapter of the bill related to enforcement does not provide a private right of action, but does not preclude an action by a person to enforce rights related to property interests described in #22 of this section.

18) Requires a licensee to provide disclosures, as specified, to its customers. Information required to be disclosed includes but is not limited to the following, as specified: (a) a schedule of fees and charges; (b) whether the product or service provided is covered by insurance or other guarantee from loss; (c) a description of specified terms related to their customers' rights and responsibilities and processes associated with transfers or exchanges; (d) that no digital financial asset is currently recognized as legal tender by California or the United States; and (e) a list of instances over the past 12 months when the licensee's service was unavailable to 10,000 or more customers due to a service outage, as specified.

19) Requires a licensee to provide a transaction confirmation record, as specified.

20) Provides that a licensee may not exchange, transfer, or store a digital financial asset or engaging in digital financial asset administration, whether directly or through an agreement with a digital financial asset control services vendor, if that digital financial asset is a stablecoin unless the issuer of the stablecoin is licensed pursuant to this bill or is a bank and the issuer at all times owns eligible securities having an aggregate market value calculated in accordance with generally accepted accounting principles of not less than the amount of its outstanding stablecoins issued or sold in the United States.

21) Amends definition of "financial institution" in the California Financial Information Privacy Act to include licenses under this division.

22) Provides a definition of "digital financial asset" as "a digital representation of value that is used as a medium of exchange, unit of account, or store of value, and that is not legal tender."

Comments

1) *Purpose of this bill*. According to the author, "AB 2269 will promote a healthy and sustainable cryptocurrency market by licensing and regulating businesses that help Californians buy and sell cryptocurrencies. While cryptocurrency has the potential to empower consumers and disrupt the financial sector in unexpected ways, its high volatility and the prevalence of fraud, illicit behavior, and technical and security vulnerabilities expose California consumers to significant financial harm. As a recent Wall Street Journal report

explains, the cryptocurrency market is "often little more than a casino, with weak regulation and few means for recourse for the losers." AB 2269 strikes a balance between protecting consumers from harm and fostering a responsible innovation environment by establishing clear rules for those companies that help Californians buy, sell, and exchange cryptocurrency."

2) *Origins of this bill.* This bill was gut-and-amended on June 6, 2022, to propose the regulation of business activity in the digital financial asset industry. The bill represents the Legislature's first effort to broadly regulate this set of activities since AB 1489 (Calderon) was introduced in 2019.[1] A large majority of the provisions of this bill were borrowed and adapted from AB 1489, which was based on a model law drafted by the Uniform Law Commission (ULC).[2]

In July 2017 the ULC adopted the Uniform Regulation of Virtual-Currency Businesses Act ("the act") after an extensive stakeholder process and multiple rounds of drafting, review, and amendments.[3] The ULC articulated two key motivations for approving and recommending that states adopt the act. First, the ULC asserted that regulations that are predictable and tailored to this emerging industry would provide assurance (i) to persons using digital financial asset products and services and (ii) to providers that they will in fairness be regulated like other providers of financial products and services. Secondly, the ULC believed that the model act would serve to clarify which state laws – whether existing money transmitter laws or a law specially tailored to digital financial assets – would govern a business' activities. In summary, the act is intended to provide basic protections for users and regulatory clarity for providers.

The act defines several key terms that govern whether a business' activity are subject to regulation and establishes a licensing framework for businesses with covered activities greater than $35,000 annually, subject to specified exceptions. The act establishes criteria for approval of a license application,

---

[1] AB 1489 was not heard in any legislative committees, and the bill died when it failed to meet the constitutional deadline to advance out of its house of origin. The introduction of the bill motivated the Assembly Banking Committee to hold an informational hearing on regulating this emerging industry in October 2019. Materials from that hearing, including submitted testimony from witnesses, can be accessed at: **https://abnk.assembly.ca.gov/20112012oversighthearing**.

[2] The ULC is a non-profit association, comprised of more than 300 commissioners from across the country who promote the principle of uniformity by drafting and proposing specific statutes in areas of the law where uniformity between the states is desirable. See: **https://www.uniformlaws.org/aboutulc/overview**

[3] See here for final act documents, stakeholder comment letters, and other materials related to the model law: **https://www.uniformlaws.org/committees/community-home?communitykey=e104aaa8-c10f-45a7-a34a-0423c2106778**. Note that the ULC model law uses the phrase "virtual currency" where this bill uses "digital financial asset."

provides examination and enforcement authority to a state regulatory agency, mandates disclosures and other protections for users, and mandates compliance programs and policies.

In addition to the ULC licensing framework, the author has borrowed and adapted into this bill frameworks from federal and state laws that apply to other financial services and products, with the intent of addressing particular risks and harms to consumers and retail investors using digital financial assets. These other laws and the risks they intend to mitigate are discussed further in subsequent comments.

3) *How AB 2269 will Protect Consumers and Bring Stability to the Industry*

The financial services industry is among the most regulated in the American economy. The regulatory approach developed intensely in the first half of the 20th century as state and federal legislators and regulators addressed the persistence of bank panics and speculation and fraud in securities markets, which contributed to the Great Depression. The creation of regulatory institutions and legal frameworks related to banking and securities established a foundation for our financial system upon which the United States became the dominant financial and economic global powerhouse in the latter half of the 20th century.

The author of this bill recognizes that appropriately balanced regulation can serve as a foundation for healthy and sustainable markets. This bill borrows from existing regulatory approaches in traditional financial markets and applies them to providers of digital financial asset products and services.

Licensing framework: This bill requires businesses that engage in specified activities related to digital financial assets to first obtain a license from the state. A licensure requirement for financial services businesses is the most common regulatory approach at the state level, and DFPI administers licensing laws for a range of companies, including, but not limited to, banks, credit unions, money transmitters, lenders and brokers, mortgage loan originators, student loan servicers, and debt collectors. As required in similar licensing laws, this bill establishes an upfront application process, requires businesses to maintain adequate financial security to provide assurance that the business can meet its obligations to its customers, and authorizes DFPI to routinely examine businesses for compliance with the law and take enforcement actions when businesses violate those laws.

A licensed business subject to regulatory exams is less likely than an unlicensed business to engage in outright fraud, given the greater scrutiny over their business practices. If consumers believe that licensed businesses are safer, market activity will generally gravitate away from unlicensed businesses and towards licensed ones. This dynamic provides a competitive advantage to licensed businesses and provides consumers with more confidence that they can transact safely.

a) *Financial security*: This bill requires businesses to maintain a surety bond or monies held in trust for the benefit of its customers in the event the business fails. The bill also requires a business to maintain a minimum net worth to retain its license. These types of financial security requirements are common in licensing laws and serve to protect consumers from doing business with a company that may fail and be unable to fulfill its obligations to its customers, such as returning funds held by the business on their customers' behalf. The bill provides flexibility for DFPI to set limits that are appropriate to the size and nature of a given business, so that smaller businesses do not have the same requirements as larger ones.

b) *Protecting customers' property interests in digital financial assets*: Many consumers who own digital financial assets allow a third-party to store the assets in custodial wallets. Some third-parties structure these arrangements in a manner that transfers the ownership of the assets to the third party, and the third party provides a contractual promise to the beneficial owner of the assets to return an equivalent value of the digital financial asset upon request. If a third party using this arrangement were to enter bankruptcy, the beneficial owner of the digital financial asset (i.e., the consumer) would likely be classified as an unsecured creditor of the third party, and the consumer would likely receive only a fraction of their claim, which would be paid months or years after the third party initially files for bankruptcy. This bill establishes a requirement that licensees holding digital financial assets on behalf of customers do so in a manner that protects those assets from bankruptcy proceedings. The requirement is modelled after an existing legal framework that applies to securities intermediaries.[4]

c) *Best Interest standard*: Businesses that offer to exchange digital financial assets serve a critical role in the digital financial asset economy. These businesses are often the gateway through which consumers discover, buy, and sell assets and are the primary intermediary with whom many consumers interact. Serving in this trusted role, these businesses must be

[4] See Chapter 5 of Division 8 of the Commercial Code (commencing with Section 8501).

held to a high standard. Modeled after federal Regulation Best Interest that applies to securities broker-dealers, this bill requires such businesses to serve the best interests of their customers by disclosing and mitigating conflicts of interest, forming a reasonable basis for any recommendations made to customers, exercising reasonable diligence to evaluate specified criteria before listing any specific digital financial asset as available for exchange, and taking efforts to prevent insider trading from occurring on their platforms.

d) *Best Execution standard*: When customers place an order to buy or sell a digital financial asset, they do not have the requisite information to determine whether the business to whom they submit the order is executing their trade at the best price for the consumer. Modeled after FINRA Rule 5310 that applies to securities broker-dealers, this bill requires licensees that exchange a digital financial asset on behalf of a consumer to use reasonable diligence to find the best deal for the consumer and execute the consumer's order in a manner as favorable as possible under prevailing market conditions.

e) *Customer service requirement*: Many digital financial asset businesses operate exclusively online, and some customers have had issues contacting businesses when they have customer service needs, such as being locked out of their accounts.[5] Based on a new requirement in the Money Transmission Act enacted by AB 1320 (Bauer-Kahan, Chapter 453, Statutes of 2021), this bill requires licensees to maintain a toll-free telephone line through which a customer can contact the licensee and receive live customer assistance.

f) *Prohibition on unbacked stablecoins*: The total market cap of digital financial assets has fallen by more than 50% since early May 2022, and one of the catalysts that sparked the recent downturn was the implosion of a purported "stablecoin" called Terra USD. The issuers of Terra USD aimed for the asset to maintain a 1:1 peg with the US dollar primarily by designing through software code a mechanism that incentivized traders to balance supply and demand at a price of $1.00. This mechanism failed, the price of Terra USD dropped far below $1.00, and the asset is essentially worthless today. The failure erased $40 billion of market value in a matter of days, leaving consumers and investors with substantial losses.

[5] **https://www.cnbc.com/2021/08/24/coinbase-slammed-for-terrible-customer-service-after-hackers-drain-user-accounts.html**

One of the biggest consumer protection concerns is calling an asset "stable" when it relies on a poorly tested mechanism to keep it truly stable. This bill prohibits licensees from making a so-called "stablecoin" available for exchange, transfer, or storage unless the stablecoin's value is backed by reserve assets. Recent amendments further clarify the qualities of permissible stablecoins with the intent of providing a reasonable assurance to consumers that such assets can be considered stable.

The concepts of failure and innovation are inextricably intertwined. While some may view "innovation" as only a good thing, the practitioners who engage in actual innovating fundamentally understand this linkage.[6] Some industry representatives may claim that regulations will stifle innovation. The corollary of that argument, however, is that regulation will prevent failures that harm consumers who are unaware of risks being taken with their money by the innovators. Regulation does not intend to stifle innovation, but rather, to limit how broadly untested products can be marketed to and used by consumers. Regulations related to driverless cars, for example, do not prohibit experimentation and testing of driverless car technology; they do, however, prevent untested technologies from being deployed at a mass scale in a manner that jeopardizes the safety of the public. Just as government protects the public from potential failures of innovation that jeopardize their physical health, this bill would protect the public from failures of innovation that jeopardize their financial health.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown, significant one-time and ongoing costs likely in the low- to mid-tens of millions of dollars for DFPI to stand-up and maintain the new licensing program for digital financial asset business activity. Costs to stand-up the new program would include equipment, software, other IT operating expenses, and workload related to promulgating regulations and training for DFPI staff. Ongoing costs would include additional staffing resources to conduct licensing, examination, investigation, and enforcement activities. Given the size and complexity of the proposed new program, DFPI would likely need specialized staff with technical expertise to support the program's operations.

Revenue from the new fees may offset DFPI's administrative and enforcement costs to some extent. Any actual increase in revenue to the DFPI will depend on

[6] See, e.g., "Failure and innovation are inseparable twins." – Jeff Bezos; and "Failure is an option here. If things are not failing, you are not innovating." – Elon Musk

the number of entities that would seek a license to engage in this type of business activity beginning January 1, 2024.

OPPOSITION: (Verified 8/12/22)

Blockchain Advocacy Coalition

ARGUMENTS IN SUPPORT: Consumer Federation of California, as sponsor, writes, "Proper regulation and consumer protections are vitally important when it comes to the arena of cryptocurrency, an extremely volatile area of financial mechanisms where a consumer's financial wellbeing can be on the line. The cryptocurrency market has expanded dramatically over the past decade, with thousands of new virtual currencies going into circulation. This trend was accelerated during the pandemic, as more and more consumers bought into the cryptocurrency market, spurred on by easily accessible trading applications, high profile Super Bowl ads, and internet hype. Despite this growing usage, regulation and consumer protections have not kept up…AB 2269 fills the regulatory gap by creating a clear path that would put consumers first and lead to some important 'rules of the road' for licensing and regulation in this area."

ARGUMENTS IN OPPOSITION: The Blockchain Advocacy Coalition writes in an *oppose unless amended* position, "We are concerned that AB 2269 in its current form could benefit from greater clarity and flexibility to avoid unintended consequences leading to the stifling of a nascent yet promising industry...
The coalition goes on to describe general concerns related to definitions and registration requirements and a specific concern that unbacked stablecoins should not be prohibited."

SUBJECT: The California Age-Appropriate Design Code Act

SOURCE: 5Rights Foundation
Common Sense

DIGEST: This bill establishes the California Age-Appropriate Design Code Act, placing a series of obligations and restrictions on businesses that provide online services, products, or features likely to be accessed by children.

Senate Floor Amendments of 8/22/22 refine definitions within the bill, exempt a variety of online products and services, amend timelines, and expand the right to cure.

ANALYSIS:

Existing law:

1) Establishes the federal Children's Online Privacy Protection Act (COPPA) to provide protections and regulations regarding the collection of personal information from children under the age of 13. (15 U.S.C. § 6501 et seq.)

2) Requires, pursuant to the Parent's Accountability and Child Protection Act, a person or business that seeks to sell a product or service in California that is illegal to sell to a minor to, notwithstanding any general term or condition, take reasonable steps, as specified, to ensure that the purchaser is of legal age at the time of purchase or delivery, including, but not limited to, verifying the age of the purchaser. (Civ. Code § 1798.99.1(a)(1).)

3) Establishes the Privacy Rights for California Minors in the Digital World (PRCMDW), which prohibits an operator of an internet website, online service, online application, or mobile application ("operator") from various activities, including knowingly using, disclosing, compiling, or allowing a third party to use, disclose, or compile, the personal information of a minor with actual knowledge that the use, disclosure, or compilation is for the purpose of marketing or advertising specified products or services to that minor, where the website, service, or application is directed to minors or there is actual knowledge that a minor is using the website, service, or application. (Bus. & Prof. Code § 22580.)

4) Establishes the California Consumer Privacy Act (CCPA), which grants consumers certain rights with regard to their personal information. (Civ. Code § 1798.100 et seq.) Establishes the California Privacy Rights Act of 2020 (CPRA), which amends the CCPA. (Civ. Code § 798.100 et seq.; Proposition 24 (2020).)

5) Prohibits a business from selling or sharing the personal information of consumers if the business has actual knowledge that the consumer is a minor under 16 years of age, unless the consumer has authorized the sale or sharing. A business that willfully disregards the consumer's age shall be deemed to have had actual knowledge of the consumer's age. (Civ. Code § 1798.120.)

This bill:

1) Requires a business that provides an online service, product, or feature likely to be accessed by children ("covered business") to take specified actions, including to:
   a) undertake a Data Protection Impact Assessment for any online service, product, or feature likely to be accessed by children, as specified;
   b) estimate the age of child users with a reasonable level of certainty appropriate to the risks that arise from the data management practices of the

business, or apply the privacy and data protections afforded to children to all consumers;
   c) provide any privacy information, terms of service, policies, and community standards concisely, prominently, and using clear language suited to the age of children likely to access that online service, product, or feature;
   d) if the online service, product, or feature allows the child's parent, guardian, or any other consumer to monitor the child's online activity or track the child's location, provide an obvious signal to the child when the child is being monitored or tracked;
   e) enforce published terms, policies, and community standards established by the business, including, but not limited to, privacy policies and those concerning children; and
   f) provide prominent, accessible, and responsive tools to help children, or if applicable their parent or guardian, exercise their privacy rights and report concerns.

2) Provides that a covered business shall not engage in specified activity, including:
   a) using the personal information of any child in a way that the business knows or has reason to know is materially detrimental to the physical health, mental health, or well-being of a child;
   b) profiling a child by default, except as specified;
   c) collecting, selling, sharing, or retaining any personal information that is not necessary to provide an online service, product, or feature with which a child is actively and knowingly engaged, except as specified;
   d) using the personal information of a child for any reason other than a reason for which that personal information was collected, except as specified;
   e) collecting, selling, or sharing any precise geolocation information of children by default unless the collection of that precise geolocation information is strictly necessary to provide the service, product, or feature requested and then only for the limited time that the collection of precise geolocation information is necessary to provide the service, product, or feature; and
   f) collecting, selling, or sharing any precise geolocation information without providing an obvious sign to the child for the duration of that collection that precise geolocation information is being collected.

3) Exempts from the definition specified broadband internet access services, telecommunications services, and the delivery or use of a physical product.

4) Delays operative date of the above to July 1, 2024.

5) Establishes the Children's Data Protection Working Group to report on the best practices for the implementation of the bill. The working group members are to be appointed as specified. The Attorney General may adopt regulations.

6) Provides for enforcement through civil actions brought by the Attorney General. The bill provides businesses in violation with a 90-day right to cure, as specified.

Comments

The General Data Protection Regulation (GDPR) is a regulation in European Union law on data protection and privacy. The law that implemented the GDPR in the United Kingdom included an amendment that effectuated the requirement to offer children-specific protections and required the Information Commissioner to introduce an Age Appropriate Design Code to set standards that make online services' use of children's data "age appropriate": "The Children's code (or the Age appropriate design code) contains 15 standards that online services need to follow. This ensures they are complying with [their] obligations under data protection law to protect children's data online."

This bill, modeled after the Age Appropriate Design Code recently enacted in the United Kingdom, institutes a series of obligations and restrictions on businesses that provide an online service, product, or feature likely to be accessed by a child. The bill additionally establishes a working group to evaluate best practices for the implementation of the bill's provisions. The bill grants the Attorney General sole authority to bring enforcement actions and to adopt regulations.

According to the author, "While existing federal and state privacy laws offer important protections that guard children's privacy, there is no coherent, comprehensive law that protects children under 18 from goods, services, and products that endanger their welfare. As a result, online goods, services, and products that are likely to be accessed by kids have been loaded with adult design principals that do not factor in the unique needs of young minds, abilities, and sensibilities, nor offer the highest privacy protections by design and by default. As a result, children under 18 face a number of adverse impacts due to their interactions with online world, including bullying, mental health challenges, and addictive behaviors."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DOJ: The Department of Justice (DOJ) reports costs of $2.4 million in Fiscal Year (FY) 2024-25 and $2.3 million in FY 2025-26 and annually thereafter (General Fund). The bill would also generate revenue to the DOJ in an unknown amount, resulting from penalty assessments of up to $7,500 per affected child, to be deposited into the Consumer Privacy Fund with the intent they be used to offset costs incurred by the DOJ.

- CCPA: The CCPA reports total costs of $1.05 million the first year, and $752 thousand ongoing to convene the task force, issue and update regulations, and review Data Protection Impact Assessments (General Fund).

- Judicial Branch: Unknown cost pressures due to increased court workload (Special Fund – Trial Court Trust Fund, General Fund).

California Chamber of Commerce
California Manufacturing and Technology Association
Entertainment Software Association
MPA - the Association of Magazine Media
TechNet

ARGUMENTS IN SUPPORT: One of the two individuals in support, Tim Kendall, the first Director of Monetization at Facebook, writes:

"I know from experience that tech workers want to innovate and design products differently to prioritize well-being over profit. But until the profit motive changes, design will be at the expense of our collective well-being, especially our kids'. To

change the incentives, we need our political leaders to act. And we need solutions that work.

The world's largest tech companies have already said that the Age Appropriate Design Code, law in the United Kingdom, is spurring positive change. Just last month, a senior Google official told the UK Parliament, "The Age Appropriate Design Code has helped us determine new ways to keep our users safe."

Wouldn't they want to ensure California kids, kids in the United States, are safe as well? By taking some very basic steps – like restricting the collection of kids' data, requiring high privacy settings by default, and providing young people clear resources to report abusive users or block unpleasant content – the State of California can protect the health and wellbeing of millions of young people in our state.

We need lawmakers to regulate in order to shift the incentive structure of the tech industry. Historically, the regulation and enforcement of laws has been a primary catalyst in spurring innovation in virtually every new technology this country has seen. There is no doubt that regulating safer children's experiences online will lead to all kinds of technological innovation.

The California Age Appropriate Design Code Act – already in practice in the UK – gives us the opportunity to usher in a new era of innovative product design that considers, rather than monetizes, the next generation."

ARGUMENTS IN OPPOSITION: A coalition of industry groups, including the Entertainment Software Association, argues:

"In order to ensure our companies are able to implement this bill effectively we suggest aligning the scope of AB 2273 with existing law and definitions, namely by changing "likely to be accessed by a child" to "directed to children". "Likely to be accessed by a child" is an overinclusive standard and would capture far more websites and platforms than necessary and subject them to this bill's requirements. It is also an unfamiliar standard that will present problems for companies trying to determine whether they are in the scope of the bill.

"Directed to children" on the other hand is a term and scope that online services are familiar with as it is defined in COPPA, which companies have been implementing and complying with since its passage over 20 years ago. Similarly,

we suggest aligning the definition of "child" with COPPA as a person under the age of 13."

SUBJECT: Mental health: involuntary commitment

SOURCE: Author

DIGEST: This bill makes various clarifications and changes to the processes for involuntary detentions under the Lanterman-Petris-Short (LPS) Act, including specifying timeframes for when involuntary holds begin and for conducting certification review hearings and judicial reviews.

Senate Floor Amendments of 8/25/22 modify the timelines for certification review hearings for individuals detained and/or certified for intensive under the LPS Act, require that the individual receive certain information about the hearing and their rights at specified certification review hearings, and require an attorney or patients' advocate to meet with the individual prior to specified certification review hearings.

ANALYSIS:

Existing law:

Involuntary Detention

1) Establishes the LPS Act to end the inappropriate, indefinite, and involuntary commitment of individuals with mental health disorders, developmental disabilities, and chronic alcoholism, as well as to safeguard their rights, provide prompt evaluation and treatment, and provide services in the least restrictive setting appropriate to their needs. Permits involuntary detention of an individual deemed to be a danger to self or others, or "gravely disabled," as defined, for periods of up to 72 hours (known as "5150 holds") for evaluation and treatment; for up-to 14 days after certification of the need for initial intensive treatment; and up-to 30 days for additional intensive treatment in counties that opt in to provide additional intensive treatment. [WIC §5000, et seq.]

Certification Review Hearing

2) Requires, when an individual is certified for intensive treatment for up-to 14 or 30 days, a certification review hearing be held, unless judicial review has been requested, as specified, within four days of the date on which they are certified for a period of intensive treatment, unless postponed by request of specified persons. [WIC §5256]

Judicial Review

3) Requires every individual detained by certification for intensive treatment to have a right to a hearing by writ of habeas corpus for their release after they or any person acting on their behalf has made a request for release to either the person delivering the copy of the notice of certification to the individual certified at the time of the delivery, or to any member of the treatment staff of the facility providing intensive treatment, at any time during the period of intensive treatment, beyond an initial 72-hour detention. [WIC §5275]

Conservatorship

4) Permits a conservator of an individual, or the estate, or of both the individual and the estate, to be appointed for someone who is gravely disabled as a result of a mental health disorder or impairment by chronic alcoholism, and who remains gravely disabled after periods of intensive treatment. Requires a court or jury trial to commence within 10 days of the date of a demand, as specified. [WIC §5350]

County Patients' Rights Advocates (PRAs)

5) Requires the Department of State Hospitals (DSH) and the Department of Health Care Services (DHCS) to enter into a memorandum of understanding and to contract with a single nonprofit agency to ensure that mental health laws, regulations, and policies on the rights of recipients of mental health services are observed and protected in state hospitals and in licensed health and community care facilities. Requires the contractor to demonstrate the capability to provide statewide advocacy services for individuals with mental disabilities and to have no direct or indirect responsibility for providing services to individuals, except for advocacy services. [WIC §5510, 5370.2]

Definitions

6) Defines "gravely disabled," for purposes of evaluating and treating an individual who has been involuntarily detained or for placing an individual in conservatorship, as a condition in which they, as a result of a mental disorder or impairment by chronic alcoholism, are unable to provide for their basic personal needs for food, clothing, or shelter. [WIC §5008]

7) Defines a "designated facility" or "facility designated by the county for evaluation and treatment" as a facility that is licensed or certified as a mental health treatment facility or a hospital, as specified, by the Department of Public Health, and includes a licensed psychiatric hospital, a licensed psychiatric health facility, and a certified crisis stabilization unit. [WIC §5008]

This bill:

Involuntary Detention

1) Clarifies that the up-to 72-hour involuntary detention time limit begins at the time when an individual is first detained. Clarifies that designated facilities are prohibited from detaining individuals for longer than 72 hours from the time they were first detained.

PRAs

2) Requires a facility to which an individual, who is involuntarily detained for up-to 72 hours, is transported to notify the county's patients' right advocate if they have not been released within 72 hours of the initial involuntary detention.

Certification Review Hearing

3) Eliminates the ability to postpone a certification review hearing for persons certified for intensive treatment.

4) Requires a certification review hearing when a person has been detained under the 72-hour hold and has not been certified for additional intensive treatment; the hearing must be held within seven days of the date the person was initially detained unless judicial review has been requested.

5) Requires, for a hearing under 4), the professional person in charge of the facility or a person designated by the county to inform the detained person of their rights with respect to a hearing and an attorney or county patients' rights advocate to meet with the person to discuss the commitment process and assist in preparing for the certification review hearing.

Judicial Review

6) Expands the judicial review requirement in existing law from just individuals detained by certification for intensive treatment to all individuals detained under the LPS Act, which would include those detained for up-to 72 hours.

Conservatorship

7) Specifies that failure to commence a trial within the time required in existing law is grounds for dismissal of conservatorship proceedings.

8) Requires an officer conducting a conservatorship investigation to include all alternatives available to place individuals, including all less restrictive alternatives when the officer recommends either for or against conservatorship.

Comments

1) *Author's statement.* According to the author, the past several years have seen an intensified focus on the LPS Act and its effectiveness in serving the most seriously mentally ill. The dramatic increase in substance use and homelessness has only exacerbated the concern that our systems of treatment and care are failing to adequately and appropriately serve those most in need. Attempts to modify or expand the LPS Act have grown year by year with little consensus being obtained around what is truly in the best interest of the people the LPS Act is intended to serve. At the center of this issue is the nexus of how to provide involuntary care or treatment while ensuring that individuals' civil liberties are not violated. In December 2021, a joint hearing by the Assembly

Health and Judiciary Committees revealed that there is significant room for improvement. The hearing also noted that there is a significant lack of consistency in implementing the act across the state. However, in trying to discern where to begin to improve the LPS Act, it was revealed that there is little or no data upon which to base improvements to the system. This bill provides some clarity around the most fundamental aspects of the LPS Act, such as when a hold begins and when due process entitlements begin. This bill also establishes a framework for meaningful data collection beyond those that currently exist.

2) *LPS Act.* The LPS Act provides for involuntary commitment for varying lengths of time for the purpose of treatment and evaluation, provided certain requirements are met. Additionally, the LPS Act provides for LPS conservatorships, resulting in involuntary commitment for the purposes of treatment if an individual is found to meet the grave disability criteria. Typically one first interacts with the LPS Act through a 5150 hold, which allows a designated facility to involuntarily commit an individual for up-to 72 hours for evaluation and treatment if they are determined to be, as a result of a mental health disorder, a threat to self or others, or gravely disabled. The peace officer or other authorized person who detains the individual must determine and document that the individual meets this standard. When making the determination or determining that an individual should be placed on a 5150 hold, the peace officer or other authorized person may consider information about an individual's historical course of a mental disorder, which includes evidence presented by a person who has provided or is providing mental health or related support services to the individual on the 5150 hold; evidence presented by one or more members of the family of the individual on the hold; and, evidence presented by the individual on the hold, or anyone designated by that person, if the historical course of their mental disorder has a reasonable bearing on making a determination that they require a 5150 hold.

   Following an initial 5150 hold, an individual may be certified for intensive treatment, which initially permits a person to be held for an additional up to 14-days, without court review, if they are found to still be a danger to self or others, or gravely disabled. When determining whether the individual is eligible for a 14-day detention, the professional staff of the agency or facility providing evaluation services must find that the individual has been advised of the need for, but has not been willing or able to accept, treatment on a voluntary basis. A notice of certification is required for all individuals certified for intensive treatment, and a copy of the notice for certification is required to be personally delivered to the individual certified, their attorney, or the attorney or advocate,

as specified. If after the initial 14 days an individual is still found to remain gravely disabled and unwilling or unable to accept voluntary treatment, they may be certified for an additional period of not more than 30 days of intensive treatment in counties that have opted to provide additional intensive treatment. An individual cannot be found at this point to be gravely disabled if they can survive safely without involuntary detention with the help of responsible family, friends, or others who indicate they are both willing and able to help.

The LPS Act provides for a conservator of an individual, of the estate, or of both the individual and the estate if they are gravely disabled as a result of a mental health disorder or impairment by chronic alcoholism or use of controlled substances. The individual for whom such a conservatorship is sought has the right to demand a court or jury trial on the issue of whether they meet the gravely disabled requirement. The purpose of an LPS conservatorship is to provide individualized treatment, supervision, and placement for the gravely disabled individual. Current law also deems an individual cannot be deemed gravely disabled for purposes of a conservatorship if they can survive safely without involuntary detention with the help of responsible family, friends, or others who indicate they are both willing and able to help.

3) *California State Auditor (CSA) audit on the LPS Act.* The CSA released *LPS Act: California Has Not Ensured That Individuals with Serious Mental Illnesses Receive Adequate Ongoing Care* on July 28, 2020. The audit focused on the following issues in three counties (Los Angeles, San Francisco, and Shasta):

   a) Criteria for involuntary detention for those who are a danger to self or others or gravely disabled, due to a mental health condition, and criteria for conservatorship, and whether the counties have consistently followed those criteria;

   b) Differences in approaches among the counties in implementing the LPS Act, if any;

   c) Funding sources, and whether funding is a barrier to implementing the LPS Act; and,

   d) Availability of treatment resources in each county.

   Relative to this bill, the CSA stated that counties are largely unable to access information about when individuals are placed on or discharged from short-term holds. Treatment facilities do not always share information with county mental health plans (CMHPs) about short-term holds. Because counties and

treatment facilities do not uniformly coordinate, counties lack information that might enable them to provide adequate ongoing care to individuals with mental illnesses once they are released from the treatment facilities. While information is not shared with the county CMHPs, the treatment facilities are required to report certain short-term holds to the Department of Justice (DOJ) so that DOJ can determine whether individuals are prohibited from having firearms. Although DOJ has both express permission to and a valid business reason for possessing information about involuntary holds, state law deems this information confidential unless it is relevant to a court proceeding regarding an individual's right to own or possess a firearm, and DOJ has not entered into any interagency agreements with other state agencies or CMHPs to share this data. The CSA recommended that to ensure counties are able to access important data about individuals who have been placed on involuntary holds under the LPS Act, the Legislature should amend state law to do the following:

a) Require the information that designated mental health facilities report to DOJ about involuntary holds to be made available to DHCS;

b) Require treatment facilities to report to DHCS all short-term holds that result from the grave disability criterion; and,

c) Direct DHCS to obtain daily mental health facility information from DOJ and make that information, as well as the information that facilities report directly to it, available to CMHPs for county residents, and for a limited time for nonresidents, on an involuntary hold within the county.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Costs to counties may be reimbursable by the state, subject to a determination by the Commission on State Mandates.

- Unknown costs, likely minor, to the state.

ARGUMENTS IN SUPPORT: Supporters of this bill state that it makes important clarifications to the LPS Act that will improve access to due process and ensure collection of more complete data to track outcomes and demographics of people subject to involuntary treatment. Some counties do not begin running the 72-hour clock until a person is actually admitted to an LPS-designated facility. When that occurs, many people on holds statewide remain in hospital emergency departments for excessive periods of time while they wait for placement in LPS-designated facilities. The waiting time often comes unnecessarily close to 72 hours and sometimes exceeds the legally permitted maximum. This practice results in different treatment of similarly-situated people placed on holds across county lines, infringes upon liberty by prolonging involuntary detentions, and prevents access to timely due process. Disability Rights California states that the standardization proposed by this bill is long overdue, and creating additional reporting requirements for demographic information including race, ethnicity, gender identity, age group, veteran status, housing status, and Medi-Cal enrollment status will enable the state and counties to begin identifying trends that indicate bias or discrimination in the placement of LPS Act holds.

SUBJECT: Diversion for repeat retail theft crimes

SOURCE: Author

DIGEST: This bill authorizes a city attorney, district attorney, or county probation department to create a diversion or deferred entry of judgment program for individuals committing a theft offense or repeat theft offenses, as specified.

Senate Floor Amendments of 8/17/22 recast one of the provisions in the bill into a different Penal Code section in order to avoid chaptering issues with SB 1106 (Wiener).

ANALYSIS:

Existing law:

1) States that every person who steals, takes, carries, leads, or drives away the personal property of another, or who fraudulently appropriates property which has been entrusted to them, or who knowingly and designedly, by any false or fraudulent representation or pretense, defrauds any other person of money,

labor or real or personal property, is guilty of theft. (Pen. Code, § 484, subd. (a).)

2) Divides theft into two degrees, petty theft and grand theft. (Pen. Code, § 486.)

3) Defines grand theft as when the money, labor, or real or personal property taken is of a value exceeding $950 dollars, except as specified; other cases of theft are petty theft. (Pen. Code, §§ 487-488.)

4) Punishes grand theft as an alternate felony-misdemeanor ("wobbler"). (Pen. Code, § 487.)

5) Punishes petty theft as a misdemeanor. (Pen. Code, § 490.)

6) Creates, until January 1, 2026, the crime of organized retail theft which is defined as:

   a) Acting in concert with one or more persons to steal merchandise from one or more merchant's premises or online marketplace with the intent to sell, exchange, or return the merchandise for value;

   b) Acting in concert with two or more persons to receive, purchase, or possess merchandise knowing or believing it to have been stolen;

   c) Acting as the agent of another individual or group of individuals to steal merchandise from one or more merchant's premises or online marketplaces as part of a plan to commit theft; or,

   d) Recruiting, coordinating, organizing, supervising, directing, managing, or financing another to undertake acts of theft. (Pen. Code, § 490.4, subd. (a).)

7) Punishes, until January 1, 2026, organized retail theft as follows:

   a) If violations of the provisions directed at acting in concert or as an agent are committed on two or more separate occasions within a one-year period, and if the aggregated value of the merchandise stolen, received, purchased, or possessed within that period exceeds $950, the offense is punishable as a wobbler;

   b) Any other violation of the provisions directed at acting in concert or as an agent is punishable as a misdemeanor by imprisonment in a county jail not exceeding one year; and,

c) A violation of the recruiting, coordinating, organizing, supervising, directing, managing, or financing provision is punishable as a wobbler. (Pen. Code, § 490.4, subd. (b).)

8) Requires, until January 1, 2026 the Department of the California Highway Patrol (CHP) to coordinate with the Department of Justice (DOJ) to convene a regional property crimes task force to identify geographic areas experiencing increased levels of property crimes and assist local law enforcement with resources, such as personnel and equipment. (Pen. Code, § 13899.)

9) States that the task force shall provide local law enforcement in the identified region with logistical support and other law enforcement resources, including, but not limited to, personnel and equipment, as determined to be appropriate by the Commissioner of CHP in consultation with task force members. (Pen. Code, § 13899.)

10) States that pretrial diversion refers to the procedure of postponing prosecution of an offense filed as a misdemeanor either temporarily or permanently at any point in the judicial process from the point at which the accused is charged until adjudication. (Pen. Code, § 1001.1.)

11) Authorizes the prosecution to approve a pretrial diversion program for misdemeanor offenses. (Pen. Code, §§ 1001.2, subd. (b) & 1001.50, subd. (b).)

12) Provides that to be eligible for a prosecution-approved misdemeanor diversion program, all of the following must apply to the defendant:

a) The defendant has not ever had probation or parole revoked without thereafter being completed;

b) The defendant has not participated in a diversion program within the previous five years; and,

c) The defendant has never been convicted of a felony, and has not been convicted of a misdemeanor within the previous five years. (Pen. Code, § 1001.51, subd. (a).)

13) Authorizes a superior court judge to offer pretrial diversion to a person charged with a misdemeanor, over the objection of a prosecuting attorney (court-initiated misdemeanor diversion), except that a defendant may not be offered diversion for any of the following currently charged offenses:

a) Any offense for which a person would be required to register as a sex offender;

b) A domestic violence or domestic battery offense; and,

c) Stalking. (Pen. Code, § 1001.95, subds. (a) & (e).)

14) States that if the defendant has complied with the imposed terms and conditions, at the end of the diversion period, the judge shall dismiss the action against the defendant. (Pen. Code, § 1001.95, subd. (c).)

15) Requires a peace officer to release persons arrested for misdemeanors with a written notice to appear in court, containing the name and address of the person, the offense charged, and the time when, and place where, the person shall appear in court, except in specified circumstances. (Pen. Code, § 853.6.)

16) Specifies that if the following reasons exist a peace officer may choose to take into custody a person charged with a misdemeanor upon a written notice to appear in court:

a) The person arrested was so intoxicated that he or she could have been a danger to himself or herself or to others;

b) The person arrested required medical examination or medical care or was otherwise unable to care for his or her own safety;

c) The person was arrested for a Vehicle Code violation and the person fails to present identification, refuses to give his or her promise to appear in court, or demands and immediate appearance before a magistrate;

d) There were one or more outstanding arrest warrants for the person;

e) The person could not provide satisfactory evidence of personal identification;

f) The prosecution of the offense or offenses for which the person was arrested, or the prosecution of any other offense or offenses, would be jeopardized by immediate release of the person arrested;

g) There was a reasonable likelihood that the offense or offenses would continue or resume, or that the safety of persons or property would be imminently endangered by release of the person arrested;

h) The person arrested demanded to be taken before a magistrate or refused to sign the notice to appear;

i) There is reason to believe that the person would not appear at the time and place specified in the notice and the basis for this determination is specifically stated; or,

j) The person is arrested for certain violent crimes requiring a hearing in open court before release. (Pen. Code, § 853.6, subd. (a)(2).)

17) Authorizes a court to issue a bench warrant whenever a defendant fails to appear in court as required by law, and as specified. (Pen. Code, § 978.5.)

18) Establishes the Board of State and Community Corrections (BSCC). (Pen. Code, § 6024, subd. (a).)

19) Requires the BSCC to do the following, among other things:

a) Develop recommendations for the improvement of criminal justice and delinquency and gang prevention activity throughout the state;

b) Identify, promote, and provide technical assistance relating to evidence-based programs, practices, and promising and innovative projects consistent with the mission of the board;

c) Receive and disburse federal funds, and perform all necessary and appropriate services in the performance of its duties as established by federal acts;

d) Develop procedures to ensure that applications for grants are processed fairly, efficiently, and in a manner consistent with the mission of the board;

e) Identify delinquency and gang intervention and prevention grants that have the same or similar program purpose, are allocated to the same entities, serve the same target populations, and have the same desired outcomes for the purpose of consolidating grant funds and programs and moving toward a unified single delinquency intervention and prevention grant application process in adherence with all applicable federal guidelines and mandates;

f) Cooperate with and render technical assistance to the Legislature, state agencies, local governments, or other public or private agencies, organizations, or institutions in matters relating to criminal justice and delinquency prevention;

g) Develop incentives for units of local government to develop comprehensive regional partnerships whereby adjacent jurisdictions pool grant funds in order to deliver services, to a broader target population and maximize the impact of state funds at the local level;

h) Conduct evaluation studies of the programs and activities assisted by the federal acts.

i) Identify and evaluate state, local, and federal gang and youth violence suppression, intervention, and prevention programs and strategies, along with funding for those efforts. (Pen. Code, § 6027, subd. (b).)

This bill:

1) Authorizes a city or county prosecuting authority or county probation department to create a diversion or deferred entry of judgment program for persons who commit a theft offense or repeat theft offenses.

2) Defines "repeat theft offenses" to mean being cited or convicted for misdemeanor or felony theft from a store or from a vehicle two or more times in the previous 12 months and failing to appear in court when cited for these crimes or continuing to engage in these crimes after release or after conviction.

3) Provides that if a county creates a diversion or deferred entry of judgment program for individuals committing a theft offense or repeat theft offenses, on receipt of a case or at arraignment, the prosecuting attorney shall either refer the case to the county probation department to conduct a prefiling investigation report to assess the appropriateness of program placement or, if the prosecuting attorney's office operates the program, determine if the case is one that is appropriate to be referred to the program.

4) States that in determining whether to refer a case to the program, the probation department or prosecuting attorney shall consider, but is not limited to, all of the following factors:

   a) Any prefiling investigation report conducted by the county probation department or nonprofit contract agency operating the program that evaluates the individual's risk and needs and the appropriateness of program placement.

   b) If the person demonstrates a willingness to engage in community service, restitution, or other mechanisms to repair the harm caused by the criminal activity and address the underlying drivers of the criminal activity.

c) If a risk and needs assessment identifies underlying substance abuse or mental health needs or other drivers of criminal activity that can be addressed through the diversion or deferred entry of judgment program.
d) If the person has a violent or serious prior criminal record or has previously been referred to a diversion program and failed that program.

e) Any relevant information concerning the efficacy of the program in reducing the likelihood of participants committing future offenses.

5) States that on referral of a case to the program, a notice shall be provided, or forwarded by mail, to the person alleged to have committed the offense with both of the following information:

a) The date by which the person must contact the diversion program or deferred entry of judgment program in the manner designated by the supervising agency; and,

b) A statement of the penalty for the offense or offenses with which that person has been charged.

6) Specifies that the prosecuting attorney may enter into a written agreement with the person to refrain from, or defer, prosecution on the offense or offenses on the following conditions:

a) Completion of the program requirements such as community service or courses reasonably required by the prosecuting attorney; and,

b) Making adequate restitution or an appropriate substitute for restitution to the establishment or person from which property was stolen at the face value of the stolen property, if required by the program.

7) Includes within the reasons for nonrelease that the person has been cited, arrested, or convicted for misdemeanor or felony theft from a store in the previous 6 months and that there is probable cause to believe that the person arrested in guilty of committing organized retail theft.

8) Authorizes the court to issue a bench warrant when the defendant has failed to appear and the defendant has been cited or arrested for misdemeanor or felony theft from a store and has failed to appear in court in connection with that charge or those charges in the previous 6 months.

9) Requires, upon appropriation, BSCC to award grant funding to 4 or more county superior courts or county probation departments to create demonstration

projects to reduce the recidivism of high-risk misdemeanor probationers, as specified.

10) States that he demonstration projects shall evaluate the probation completion and recidivism rates for project participants and may compare them to control groups to evaluate program efficacy.

11) Requires BSCC to determine criteria for awarding the grants on a competitive basis that shall take into consideration the ability of a county to conduct a formal misdemeanor probation project for high-risk misdemeanor probationers, including components that align with evidence-based practices in reducing recidivism, including, but not limited to, risk and needs assessment, programming to help with drug or alcohol abuse, mental illness, or housing, and the support of the superior court if the application is from a county probation department.

12) Requires BSCC to develop reporting requirements for the participating entities and requires those entities to report the results of the demonstration project to BSCC.

13) Requires BSCC to report to the Legislature and county criminal justice officials two years after the appropriation by the Legislature.

14) Contains a severability clause so in the event that any provision or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application.

15) Sunsets its provisions on January 1, 2026.

Comments

According to the author of this bill:

> Organized retail crime is defined as theft/fraudulent activity conducted with the intent to convert illegally obtained merchandise, cargo, cash, or cash equivalent into financial gain, often through subsequent online or offline sales. These operations typically involve a criminal enterprise that organizes multiple theft rings at a number of retail stores and employs a fencing operation to sell the illegally-obtained goods for financial gain.

In December of 2020, the NRF released their Organized Retail Crime study and found that organized retail theft continues to be pervasive within the industry. The study surveyed loss prevention executives from large and mid-sized retailers and found that retail crime had increased 68% with losses averaging over $700,000 for every $1 billion in sales.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, "Unknown, significant cost pressure, likely in the millions of dollars, to fund grants to counties that offer diversion programs for "high risk" misdemeanants (General Fund). The BSCC reports ongoing costs of $220,000 annually in order to implement and oversee the grant program. Funds would be used to hire 1.0 permanent position and for operating expenses and equipment."

SUBJECT: Local educational agencies: housing development projects

SOURCE: California School Boards Association
cityLAB-UCLA

DIGEST: This bill deems a housing project, beginning January 1, 2024 and until January 1, 2033, to be an allowable use on property owned by a local educational agency (LEA) if it meets specified affordability criteria and planning standards.

Senate Floor Amendments of 8/25/22 require LEAs to offer housing to employees of adjacent LEAs before offering housing to other public employees, and require any housing built to be located on property that is entirely located within any applicable urban limit line or urban growth boundary.

ANALYSIS:

Existing law:

1) Allows, under the California Constitution, cities and counties to "make and enforce within its limits, all local, police, sanitary and other ordinances and

regulations not in conflict with general laws." It is from this fundamental power (commonly called the police power) that cities and counties derive their authority to regulate behavior to preserve the health, safety, and welfare of the public—including land use authority.

2) Requires cities and counties to develop general plans that include seven (sometimes eight) elements. The land use element must designate the location of various land uses, including education.

3) Requires, general, other local agencies to comply with city and county zoning ordinances, but allows school districts to override local zoning with a 2/3rds vote for classroom uses.

4) Establishes the Teacher Housing Act of 2016, which provides that:

   a) It is state policy to support housing for teachers and school district employees.

   b) School districts and developers in receipt of local or state funds or tax credits designated for affordable rental housing may restrict occupancy to teachers and school district employees on land owned by school districts.

   c) School districts may allow local public employees or other members of the public to occupy housing created through the Teacher Housing Act.

   d) A majority of the units must be rented at an affordable rent to lower income or moderate-income households.

This bill:

1) Deems, beginning January 1, 2024, a housing development project an allowable use on any real property owned by an LEA as of January 1, 2023, and deems it consistent with local development standards, zoning codes or maps, and the general plan, if the project satisfies all of the following:

   a) The housing development consists of at least 10 housing units;

   b) The majority of the units of the housing development are offered at an affordable rent to lower income or moderate-income households, with at least 30 percent of the units affordable to lower income households, for 55 years;

c) Housing units are offered first to the LEA's employees, then to employees of directly adjacent LEAs, next to local public employees within the jurisdiction of the LEA, and finally to members of the public, as specified.

d) The residential density for the housing development meets the greater of the following:

e) The residential density allowed on the parcel by the city or county, as applicable; or

f) The applicable density deemed appropriate to accommodate housing for lower income households in that jurisdiction, as specified in existing law for calculating the jurisdiction's regional housing need for lower income households.

g) The height limit for the housing development is the height limit allowed on the parcel by the city or county, or 30 feet, whichever is greater;

h) The property is adjacent to a property that permits residential uses;

i) The property is an infill site, as defined;

j) Any housing built must be located on property that is entirely contained within any applicable urban limit line or urban growth boundary;

k) The housing development complies with all infrastructure-related requirements, including impact fees that are existing or pending at the time the application is submitted, imposed by a city or county or a special district that provides service to the parcel; and

l) The project meets other local objective zoning standards, objective subdivision standards, and objective design review standards, as defined, that do not preclude the housing development from achieving the residential density or the height permitted by this bill. If a local agency has not adopted objective standards applicable to residential development on the parcel, the housing development is subject to local zoning, parking, design, and other ordinances, local code requirements, and procedures applicable to the processing and permitting of a housing development on the nearest parcel in a multifamily zone that meets or exceeds the density and height provided in the bill.

2) Requires the LEA to maintain ownership of a housing development that meets the requirements of this section for the length of the 55-year affordability

requirement, but allows any land used for the development of a project under the bill to be jointly used or jointly occupied by the local educational agency and any other party, consistent with existing law.

3) Provides that any land used for housing under the bill is exempt from the requirements of the Surplus Land Act and specified provisions of law that govern disposal of school properties.

4) Requires, on or before January 31, 2023, the Department of Housing and Community Development to provide written notice to the planning agency of each county and city that this section becomes effective on January 1, 2024.

5) Defines its terms, includes findings and declarations to support its purposes, and sunsets on January 1, 2033.

Background

According to a December 2021 report, *Education Workforce Housing in California: Developing the 21st Century Campus*, by CityLAB at the University of California Los Angeles (cityLAB-UCLA), there are more than 1,000 LEAs in California that collectively own more than 150,000 acres of land. Of that land, there are 7,068 properties with potentially developable land of one acre or more, totaling 75,000 acres statewide. At a density of 30 dwelling units per acre, such properties could contain 2.3 million units of housing—more than enough to house the state's 300,000 teachers and 350,000 other LEA employees.

Since June 2018, eight California LEAs have put a proposition or measure before local voters to fund education workforce housing development, with six of these measures passing. Recent research identified 46 LEAs pursuing housing projects on 83 different sites. However, to date, California is home to just four completed education workforce housing developments by Los Angeles Unified School District and Santa Clara Unified School District.

The cityLAB-UCLA report included numerous recommendations to improve the ability of LEAs to construct workforce housing on their property, including to:

- Increase land use flexibility and streamline approvals process;
- Expand financing tools available; and
- Build the capacity of LEAs to develop housing.

CityLAB-UCLA wants the Legislature to authorize housing as a use on LEA-owned properties.

Comments

1) *Purpose of this bill.* According to the author, "School districts in California own 10,900 properties with over 150,000 acres of land, half of which are potentially suitable for housing. By easing the administrative and bureaucratic hurdles, AB 2295 will help LEAs feasibly construct enough housing to meet the current demand and help address teaching shortages—ultimately helping keep quality teachers and staff in the classroom."

2) *Home rule.* Cities and counties develop zoning ordinances to control where residential development occurs in their jurisdictions. Under current law, school districts may develop housing on their properties for their employees if allowed by the local zoning. School districts that want to build housing can ask their city or county to make the zoning changes necessary to do so. AB 2295 overrides the local general plan and zoning processes that are the venue ensuring that the needs of the community can be balanced with the needs of the school district by making housing an allowable use on school district properties across the state.

3) *Who is this really for?* While AB 2295 is intended to enable school districts to construct housing for their employees, it merely requires the educational agency to prioritize their employees, after which it can offer units in the development to other local agency employees and the general public. This is inconsistent with the Teacher Housing Act, which requires any programs to construct housing to be restricted to teacher or school district employees, or local public employees subject to applicable laws and regulations. AB 2295 requires 30 percent of the units to be affordable to lower-income households, but nothing in the bill prohibits a developer from approaching a school district that had no intention of constructing housing for its workers purely so that the developer can disregard local zoning. Furthermore, because the project can contain units for the general public, a school district may be incentivized to develop a larger project than is needed to serve their employees.

SUBJECT: Task Force to Study and Develop Reparation Proposals for African Americans

SOURCE: Author

DIGEST: This bill extends the sunset on the Task Force to Study and Develop Reparation Proposals for African Americans, with Special Considerations for African Americans who are Descendants of Persons Enslaved in the United States (Task Force) to give the Task Force an additional year to complete its work; clarifies that reports published by the Task Force are within the public domain; and modifies provisions relating to the removal of appointees, the election of officer, and the creation of advisory bodies and subcommittees.

ANALYSIS:

Existing law:

1) Establishes, within the Government Code, Chapter 4.5 of Division 1 in Title 2, entitled "Reparations for the Institution of Slavery." (Gov. Code, tit. 2, div. 1, ch. 4.5, §§ 3801 et seq.)

2) Establishes the Task Force to Study and Develop Reparation Proposals for African Americans, with Special Considerations for African Americans who are Descendants of Persons Enslaved in the United States. (Gov. Code, § 8301.1(a).)

3) Requires the Task Force to perform all of the following duties:

   a) Identify, compile, and synthesize the relevant corpus of evidentiary documentation of the institution of slavery that existed within the United States and the colonies that became the United States from 1619 to 1865, inclusive, including specified components of that institution.

   b) Recommend appropriate ways to educate the California public of the Task Force's findings.

   c) Recommend appropriate remedies in consideration of the Task Force's findings, and address factors such as how the remedies comport with international standards of remedy for wrongs and injuries caused by the State, how the State will offer a formal apology for its perpetration of slavery, how to eliminate California laws and policies that continue to disproportionately and negatively affect African Americans, and what forms of compensation should be awarded. (Gov. Code, § 8301.1(b).)

4) Requires the Task Force to submit a written report of its findings and recommendations to the Legislature no later than the date that is one year after the date of the first meeting of the Task Force, as defined. (Gov. Code, § 8301.1(c).)

5) Provides for the composition of the Task Force, the term of office for members, and compensation for members, as specified, and for the Task Force to appoint personnel or otherwise procure assistance and supplies. (Gov. Code, §§ 8301.2, 8301.4.)

6) Authorizes the Task Force to take specified actions for the purpose of carrying out its duties, including hold hearings, request the production of documents, and seek a court order to compel the presence of witnesses or compliance with a subpoena. (Gov. Code, § 8301.3)

7) Provides that the chapter in 1), containing the duties and obligations in 2)-6), will sunset on July 1, 2023. (Gov. Code, § 8301.7.)

This bill:

1) Authorizes the Task Force to submit at least one written report of its findings.

2) Provides that any report submitted to the Legislature by the Task Force pursuant to 1) is within the public domain and that the State of California retains to copyright or other proprietary interest in the information.

3) Eliminates the provision establishing the Task Force's members' term of office as the life of the Task Force, and specifies instead that an appointee may be removed at the pleasure of their appointing authority.

4) Eliminates the provision providing that the Task Force's elected chair and vice chair's terms of office are for the life of the Task Force, and provides instead that the members of the Task Force, by majority vote, may elect officers and create advisory bodies and subcommittees to accomplish its duties.

5) Extends the sunset date on the chapter enacting the Task Force until July 1, 2024.

Comments

According to the author:

> AB 2296 seeks to extend the California Task Force to Study and Develop Reparation Proposals for African Americans sunset to July 1, 2024 and clarifies the Task Force's ability to establish officers and subcommittees to accomplish its work using best practices of good governance.
>
> The continued legacy of discrimination and structural inequality plagues Black Americans to this very day. The vestiges of United States chattel slavery permeate through the lives of slave-era descendants and federal efforts to look at the very real harms and avenues for redress have stalled. In 2020, Governor Newsom signed AB 3121 (S. Weber) into law, establishing the California Task Force to Study and Develop Reparation Proposals for African Americans. The bill requires the task force to gather and synthesize documentary evidence of slavery and its ongoing legacy, develop ways to educate Californians about its findings, and recommend appropriate remedies in a report to the Legislature.
>
> This monumental task is not being taken lightly. The members of the task force are working to ensure that we gather as much evidence as humanly possible and produce a framework that can be used as a starting point for other

states and the nation. This work takes time and even after the report is published, there will undoubtedly be work to do beyond the current July 1, 2023 sunset date. By expressly waiving the State's copyright and ensuring the scholarly work produced by the Task Force is in the public domain, all Californians and beyond will be able to freely disseminate the body of evidentiary information without unnecessary hurdles.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, costs of approximately $1.5 million to continue to fund the Task Force for an additional year (General Fund).

SUPPORT: (Verified 8/11/22)

California Nurses Association/National Nurses United
California Teachers Association

OPPOSITION: (Verified 8/11/22)

None received

ARGUMENTS IN SUPPORT: According to the California Nurses Association/National Nurses United (CNA), writing in support:

CNA is an ardent supporter of racial justice and advocates for policies that lead to an end of institutional racial discrimination. Over 4 million Africans were enslaved for the benefit of the American economy and likely the largest driving force to America's rise as a superpower in the modern era. Utilizing free labor, held under the threat of death, has beyond a doubt made it possible for America to become one of the wealthiest nations of the world…

Slavery also broadly impacted the conditions of Black life within California. For example, during the era of slavery, the California Legislature, which was dominated by pro-slavery Democrats hoping to curtail Black social and political power within the state, passed a series of laws prohibiting "blacks and mulattoes" from voting and from testifying against whites in court—in both criminal and civil cases. The California Legislature stripped Black citizens of political power while empowering White people to broadly commit crime without consequence against Black persons. This type of systematic state complicity in the construction of racial harm and inequality continued into the twentieth and twenty-first centuries.

Surely these facts are worth the time and energy to continue to study, at a minimum, a policy for reparations for these descendants of this population.

SUBJECT: Recreational water use: wave basins

SOURCE: Author

DIGEST: This bill requires wave basins to be subject to regulation as a permanent amusement ride under the Permanent Amusement Ride Safety Inspection Program and requires the California Department of Public Health (CDPH) to adopt regulations for the sanitation and safety of wave basins.

Senate Floor Amendments of 8/25/22:

1) Require CDPH to develop the regulations in consultation with the Division of Occupational Safety and Health;

2) Permit CDPH to consider specific federal guidance in developing the regulations, rather than requiring the regulations to be consistent with specified federal guidance;

3) Give local health officers the authority to enforce wave basin sanitation and safety regulations in their jurisdiction; and,

4) Prohibit anything in this bill from relieving a wave basin operator from its obligation to comply with applicable sanitation and safety requirements until the wave basin regulations are adopted.

ANALYSIS:

Existing law:

1) Requires CDPH to supervise the sanitation, healthfulness, and safety of public swimming pools. Requires local health officers (LHOs) to enforce the building standards relating to swimming pools and the other regulations adopted by CDPH. [HSC §116035 and §116053]

2) Defines "public swimming pools" as any public swimming pool, bathhouse, public swimming and bathing place, and all related properties. Exempts any artificially constructed swimming facility that is 20,000 square feet of surface area or greater from the construction standards required of public swimming pools. [HSC §116025 and §116030]

3) Requires every person operating or maintaining a public swimming pool to do so in a sanitary, healthful and safe manner. Requires public swimming pools, including swimming pool structure, appurtenances, operation, source of water supply, amount and quality of water recirculated and in the pool, method of water purification, lifesaving apparatus, measures to insure safety of bathers, and measures to insure personal cleanliness of bathers to be such that the public swimming pool is at all times sanitary, healthful, and safe. [HSC §116040-116043]

4) Establishes the Wave Pool Safety Act, under which "wave pool" is defined as a swimming pool designed for the purpose of producing breaking wave action in the water and that is not primarily designed for standup surfing or bodyboarding. Under the Wave Pool Safety Act, wave pool operators must provide life vests, children under 42 inches in height are required to be accompanied by an adult, an audible signal is required to be used prior to resuming wave action to warn patrons of impending waves, lifeguards are required to be assigned to guard a wave pool, an emergency stop for the wave equipment is required to be easily accessible to the lifeguards and other pool officials, wave pool operators are required to ensure that the wave pool has regular periods without breaking waves being produced, and signs with clearly legible letters and, if appropriate, symbols, that communicate these requirements are required to appear at the ticket booth or entrance gate to the park or other facility where the wave pool is located. [HSC §115950, et seq.]

5) Establishes the Permanent Amusement Ride Safety Inspection Program to create a state system for the inspection of permanent amusement rides. [LAB §7920, et seq.]

This bill:

1) Requires wave basins to be subject to regulation as a permanent amusement ride under the Permanent Amusement Ride Safety Inspection Program. Defines "wave basin" as an artificially constructed body of water within an impervious water containment structure incorporating the use of a mechanical device principally designed to generate waves for surfing on a surfboard or analogous surfing device commonly used in the ocean and intended for sport. Specifies that "wave basin" does not include wave pools.

2) Permits the Division of Occupational Safety and Health (DOSH) to inspect and otherwise oversee the operation of a wave basin to ensure compliance with those standards and requirements.

3) Requires CDPH, in consultation with DOSH, to adopt regulations for the sanitation and safety of wave basins. Permits CDPH to consider federal Centers for Disease Control and Prevention guidance, including, but not limited to, the guidance outlined in the Model Aquatic Health Code during the rulemaking process. Permits the regulations to be modeled upon the sanitation and safety regulations for swimming pools, but to consider the unique characteristics of a wave basin, including the volume of water, chemical dispersion caused by wave action, and the size of a typical wave basin.

4) Gives local health officers the authority to enforce wave basin sanitation and safety regulations in their jurisdiction.

5) Prohibit anything in this bill from relieving a wave basin operator from its obligation to comply with applicable sanitation and safety requirements until the wave basin regulations are adopted.

Background

According to information provided to the Senate Health Committee by the author of AB 1161 (Calderon, 2020), which sought to regulate wave basins, there are several key characteristics that differentiate wave basins from wave pools. "Wave pool" means a swimming pool designed for producing breaking wave action in the water and is not primarily designed for standup surfing or bodyboarding. A wave basin is a constructed large body of water with a wave generation system used for surfing related activities with more than 100,000 square feet of surface area that is

suitable for standup surfing. Wave basins are substantially larger sized and hold greater volume of water than traditional wave pools.

Based on the volume of water in wave basins, the current requirement on water treatment turnover rate is excessive and would require significant equipment and capacity to pump, filter, sanitize, and return the entire water volume multiple times per day. The wave basin already generates frequent turbulence and mixing of basin water that would enhance circulation and disbursement of sanitization treatment placed in water basins. The author further states that another notable difference is the bather capacity is substantially less than traditional public pool facilities. Bather capacity at a wave basin is anticipated to be less than 30 occupants at any given time of operation. Due to the low number of bathers, there is minimal impact on the chlorine disinfection demand as required for traditional swimming facilities.

Surf Ranch. According to a November 2017 article in *Science* magazine, wave pools for surfing date back more than 50 years, but do not produce waves comparable to ocean waves. In the ocean, storms create surface gravity waves that roll along in deep water and only interact with the bottom, or shoal, when the water depth is about half the length of the distance between successive crests (the wavelength). Three things then happen: The wavelength shortens, the height increases, and the crest moves faster than the wave's lowest point, the trough. When the height of the wave is about the same as the water's depth, the wave breaks. Surf Ranch in Lemoore, Kings County attempts to recreate ocean waves, and appears to be the only wave basin in the state (and the only entity that this bill would apply to). Surf Ranch contains a 700 meter-long artificial lake with a system that drags a metal blade called a hydrofoil through the water. As the resulting swell sweeps over the lakebed, which have been precisely contoured, it is transformed into a surfing wave.

Forthcoming guidance. The Model Aquatic Health Code (MAHC), first issued by the Centers for Disease Control and Prevention (CDC) in 2014, is a voluntary set of guidelines to prevent injury and illness at public aquatic venues, such as pools, hot tubs, and water playgrounds. According to the Council for the MAHC (CMAHC), these guidelines bring together the latest science and best practices to help jurisdictions save time and resources when they develop and update pool codes. The MAHC outlines specific rules that designers, builders, and managers of public aquatic venues must follow to maximize the fun and the health benefits of water-based activities. The MAHC serves as a voluntary model and guide for local and state agencies needing to update or implement swimming pool and spa code, rules, regulations, guidance, law, or standards governing the design, construction, operation, and maintenance of public swimming pools, spas, hot tubs, and other

disinfected aquatic facilities. It is updated every three years by the CMAHC membership in consultation with the CDC. According to CMAHC, it is working with CDC to draft guidance language for Surf Venues and Artificial Swimming Lagoons, with the intent that CDC will release interim guidance on these venues by the end of this year. The end goal is an update to the MAHC that includes model code language for these facilities in 2025.

Comments

Author's statement. According to the author, the emergence of artificial wave technology used for wave basin venues has made it possible to replicate an ocean wave hundreds of miles away from the coast giving inland residents the opportunity to experience the sport of surfing. Not only do wave basins provide access to a sport once only accessible by visiting the coast, but they are also generating economic activity in the tourism and hospitality industries. Surfing is an integral part of California's culture, and it is important for the Legislature to promote the sport and encourage its growth. If wave basin venues are going to flourish in California they will need health and safety standards that make sense for operators while ensuring the well-being of the venue's visitors and employees. This bill will go a long way in providing operators the certainty needed to continue to grow in the state.

Related/Prior Legislation

AB 441 (Mayes, 2021) and AB 1161 (Calderon and Salas, 2020) stated that specified regulations governing public swimming pools do not apply to wave basins, and instead would have established standards for the operation and maintenance of wave basins. AB 441 was held on the Senate Appropriations Committee suspense file. AB 1161 was vetoed by Governor Newsom, who stated "…this bill lacks necessary public health and safety protections. It would exempt wave basins from a number of health and safety regulations, including worker protections overseen by the Department of Industrial Relations."

SB 107 (Alquist, Chapter 335, Statutes of 2008) created the Wave Pool Safety Act, which establishes guidelines for wave pool facilities.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- CDPH estimates state operations costs of approximately $1,346,000 over the first five years and $193,000 ongoing thereafter (General Fund).

- The Department of Industrial Relations estimates that the fiscal impact would be absorbable in the immediate future. However, additional resources would be needed if the number of wave basins in the state were to increase and result in additional inspections and challenges to their jurisdiction.

SUPPORT: (Verified 8/25/22)

World Surf League

OPPOSITION: (Verified 8/25/22)

None received

ARGUMENTS IN SUPPORT: The World Surf League states that recent innovations and technological advances in artificial wave generation have made it possible to recreate the experience of surfing an ocean wave in newly constructed land locked wave basins. Like in most cases of transformative technology, current laws and regulations on the books can quickly become outdated or no longer apply. This problem of inapplicable health and safety standards is most demonstrable at the Surf Ranch in Lemoore, California. The volume of water, the amount of turbulence created by the wave, and the occupancy rate create a different set of factors to be considered when making judgements on water quality, safety protocols, and sanitation. This bill simply requires CDPH to take these unique characteristics into consideration when developing health and safety standards specific to wave basins.

SUBJECT: Foster care: Independent Living Program

SOURCE: County Welfare Directors Association of California

DIGEST: This bill expands and modernizes the Independent Living Program (ILP) to include current and former foster youth up to 22 years of age, and, subject to an appropriation and federal approval, up to age 23, and expands the services for which counties can provide stipends to assist youth with specified independent living needs to include former foster youth up to 25 years of age, as specified.

Senate Floor Amendments of 8/22/22 delay the operation any provisions of this bill that requires automation to implement until July 1, 2024, as specified.

ANALYSIS:

Existing law:

1) Establishes a state and local system of child welfare services, including foster care, for children who have been adjudged by the court to be at risk of abuse and neglect or to have been abused or neglected, as specified. *(WIC 202*)

2) Establishes a system of juvenile dependency for children, and designates that a child who meets certain criteria is within the jurisdiction of the juvenile court

and may be adjudged as a dependent child of the court, as specified. *(WIC 300 et seq.)*

3) Provides for extended foster care (EFC) funding for youth until age 21, as well as adopts other changes to conform to the federal Fostering Connections to Success Act. *(WIC 241.1; 303; 366.3; 388; 391;450;11400;11402;11403)*

4) Defines "nonminor dependent" (NMD) as a youth who is between 18 and 21 years of age, in foster care under the responsibility of the county welfare department, county probation department, or Indian tribe, and participating in a transitional independent living plan (TILP), as specified. *(WIC 11400(v))*

5) Delineates responsibilities for the California Department of Social Services (CDSS) in the development and administration of the ILP. *(WIC 10609.4)*

6) Defines "supervised independent living setting" as including all of the following: a supervised independent living placement, a transitional housing unit, a residential housing unit, and a transitional living setting approved by the county to support youth who are entering or reentering foster care or transitioning between placements, as specified. *(WIC 11400(x))*

7) Requires CDSS, with the approval of the federal government, to permit all eligible children to be served by the ILP until age 21. *(WIC 10609.3(d))*

8) Requires counties to maintain a stipend, to supplement and not supplant the ILP, as specified. *(WIC 10609.3(e)(1))*

This bill:

1) Finds and declares that under Continuum of Care Reform (CCR), the intent of the state to implement a continuum of foster care services and programs that meet the needs of foster children, youth, and families, and that CCR established the importance of ensuring that foster youth have a voice in decision being made on where they are placed and services they receive through a Child and Family Team process.

2) Declares that many youth are transitioning to the EFC program, under which youth can live independently or with a foster family, receive a monthly stipend, and pursue education, training, and work with the continued support of the child welfare system.

3) Requires CDSS, subject to an appropriation for this purpose and with the approval of the federal government, to amend the child welfare services (CWS)

state plan to permit all eligible current and former foster youth to be served by the ILP up to 22 years of age.

4) Provides that it is the intent of the Legislature upon receipt of a report, as described, to enact legislation to expand eligibility for the ILP to current and former foster youth up to 23 years of age.

5) Expands the list of items a county stipend may provide to assist youth who have exited the foster care system at or after 18 years of age to also include the following independent living needs:

   a) Other assistance to facilitate access to transportation besides bus passes;
   b) Other housing-related costs necessary to obtain or maintain housing besides housing utility deposits;
   c) Basic household necessities to establish or retain housing;
   d) Assistance with securing or retaining communications equipment, including, but not limited to, a cell phone; and,
   e) Education-related equipment costs, including, but not limited to, tuition, school fees, and equipment.

6) Requires counties, subject to an appropriation by the Legislature, to also provide stipends to assist former foster youth up to 25 years of age, with their independent living needs, as specified.

7) Requires the annual county ILP report that each county department of social services is required to submit to CDSS to also include program purposes related to providing training in daily living skills that include financial management, including tax preparation and filing.

8) Permits ILP participants to take part in postsecondary education, as specified.

9) Requires the ILP provide participants training on financial management, including tax preparation and filing.

10) Makes findings and declarations related to the ILP, and how California's program has largely remained unchanged despite the implementation of the EFC program and the unique challenges faced by California's transition-aged youth and NMDs, specifically, the high cost of housing and cost of living, compounded by their unique trauma, lived experience, and disproportionate representation of persons of color in the child welfare system.

11) Requires CDSS, in consultation with County Welfare Directors Association of California (CWDA), the Chief Probation Officers of California (CPOC), and other stakeholders, to do all of the following:

    a) Update and expand the standards and requirements for the ILP to increase consistency in ILP programs across counties, while retaining some flexibility in services and supports delivered by local ILPs based on the needs of current and former foster youth and NMDs served by ILPs;
    b) Establish guidelines for county ILP plans;
    c) Identify a minimum set of specific core services and supports that all county ILPs are required to provide and best practices for county ILPs. Requires the best practices identified to be informed by promising practices in California and other states that remove barriers to services and supports in ILP service delivery;
    d) Provide guidance on the allowable uses of federal and state funds for stipends and direct supports for ILP participants; and,
    e) Develop statewide procedures to annually collect and post on the CDSS website, information relating to ILP participation rates, services offered, and outcomes.

12) Requires at a minimum, the core services and supports to include all of the following:

    a) Supporting transition-aged youth (TAY) and young adults in developing or maintaining connections to family, family-like adults, or other important adults, as well as peer connections, to increase well-being and decrease isolation. Requires this support to include consideration of how the ILP can link TAY and young adults to specialty mental health services or other health and mental health services through use of peer support specialist services;
    b) Direct services or linkage to programs and services that will reduce the incidence of homelessness;
    c) Outreach and education through social media and other technologies utilized by current and former foster youth and NMDs to increase outreach, engagement, and connection to supportive services. Requires CDSS to provide counties with technical assistance and guidance to facilitate access to technologies in compliance with all applicable privacy laws;
    d) Stipends or incentives that are universally available to ILP program participants to facilitate participation in ILP activities;

e) Supporting transition-aged youth and young adults in entering and completing postsecondary education and pursuing employment and career goals; and,
f) Referring transition-aged youth and young adults to services that provide free tax filing and tax literacy resources.

13) Requires counties to submit a plan for the operation of its ILP that complies with the established guidelines, within nine months of CDSS' issuance of an all-county letter and county fiscal letter, and to fully implement their ILP plans within 12 months, as provided. Further, permits CDSS to extend the deadlines if a county has good cause.

14) States legislative intent that funds appropriated for the purposes of expanding ILP services be allocated to counties prior to CDSS' completion of activities, as specified.

15) Requires, CDSS, in consultation with the CWDA, to determine the funding necessary to expand eligibility for the ILP and the stipends for emancipated youth as specified, to include former foster youth up to 23 years of age, and to submit a report with this analysis to the Legislature during budget hearings for the 2023–24 fiscal year budget, as provided.

16) Requires CDSS to implement these changes to the ILP changes listed above through all-county letters or similar instructions until regulations are adopted.

17) Provides that the implementation of the core ILP services and supports identified in the county plan for the operation of its ILP and related reporting requirements are contingent on an appropriation by the Legislature for those purposes.

18) Delays the operation any provisions of this bill that require automation to implement until July 1, 2024, or the date the department notifies the Legislature that the statewide child welfare information system can perform the necessary automation to implement the ability to identify the ILP core services and supports, whichever is earlier.

Comments

According to the author, "AB 2306 would expand ILP eligibility and update standards of care and services offered to better meet the needs of this unique TAY population and set them up for success. By requiring CDSS to revise these standards, in consultation with child welfare stakeholders, we will be able to best determine the acute needs of these youth and the needed resources for

implementation. Our state's greatest asset and future is its youth and we now have the opportunity to greatly support our most vulnerable young people as they transition into adulthood."

Child Welfare Services. The CWS system is an essential component of the state's safety net. Social workers in each county receive reports of abuse or neglect, and work to investigate and resolve those reports. When a case is substantiated, a family is either provided with services to ensure a child's well-being and avoid court involvement, or a child is removed from the family and placed into foster care. This system seeks to ensure the safety and protection of these children, and where possible, preserve and strengthen families through visitation and family reunification. It is the state's goal to reunify a foster child or youth with their biological family whenever possible. As of January 1, 2022, there were 59,539 children in California's CWS system.

Continuum of Care Reform Efforts. The CCR is a system-wide effort to institute a series of reforms to California's CWS program. It is designed out of an understanding that children who must live apart from their biological parents do best when they are cared for in committed nurturing family homes. For more than a decade, researchers have documented poor outcomes for foster children. These outcomes have been especially pronounced for those placed in group or congregate care settings. CCR intends to reduce the number of foster children placed in congregate care settings by improving the assessments of children and families and establishing a child and family team for each child in foster care.

Independent Living Program. Authorized through the federal Foster Care Independence Act of 1999 (Public Law 106-169), and later renamed the John H. Chafee Foster Care Independence Program (Chafee), the ILP provides training, services, and benefits to assist current and former foster youth in achieving self-sufficiency prior to, and after leaving, the foster care system. In California, each county is able to design services to meet a wide range of individual needs and circumstances, and to coordinate services with other federal and state agencies engaged in similar activities. To be eligible to receive ILP services, a youth must be at least 16 and can remain eligible until the day before the youth turns 21 years of age, provided one of the following criteria is met:

- The youth was/is in foster care at any time from their 16th to their 19th birthday.

- The youth was placed in out-of-home care by a tribe or tribal organization between their 16th and 19th birthdays.

- The youth is a former dependent who entered into a kinship guardianship at any age and is receiving or received Kinship Guardianship Assistance Payments between the ages of 16 and 18.

- The youth is a former dependent who entered into a Non-Related Legal Guardianship after attaining age eight, and is receiving or received permanent placement services.

Services provided to TAY in the program include: living skills, money management, decision making, building self-esteem, financial assistance with college or vocational school attendance, educational resources, housing (such as Transitional Housing), and employment services. Up to 30 percent of federal funds may be used to support housing needs such as room and board for eligible youth. Additionally, counties can provide stipends to support the independent living needs of the youth so they can participate fully in the offered ILP services.

This bill seeks to expand the ILP to better support current and former foster youth. In particular, this bill expands access to certain supports until the youth turns 22 years old, and seeks to determine how much it would cost to provide support to the youth until they turn 23 years old, with the goal of expanding support to age 23. This bill also requires counties, subject to an appropriation by the Legislature, to provide stipends to assist former foster youth up to 25 years of age with their independent living needs.

Families First Prevention Services Act (FFPSA). The FFPSA, enacted as part of Public Law 115–123 in 2018, authorized a new, optional use of title IV-E funding for states and tribes to utilize on services that would prevent the entry of children into foster care. Prior to FFPSA, states were only permitted to use federal Title IV-E funds for children once they were placed in the child welfare system, to reimburse costs such as: foster care maintenance for eligible children; administrative expenses to manage the program; training for staff, foster parents and certain private agency staff; adoption assistance; and kinship guardianship assistance.

Under FFPSA, states may claim federal reimbursement for approved prevention services prior to a child being placed in foster care in order to allow "candidates for foster care" to remain with their parents or kin caregivers. To be considered a "candidate for foster care" under federal law, a child must have a prevention plan, be at imminent risk of entering foster care, and be able to remain safely in their home or in a placement with kin, so long as prevention services to keep the child out of foster care are provided. FFPSA also allows prevention services to be provided to a child in foster care who is pregnant or parenting, as well as the

parents or kin caregivers of pregnant/parenting foster youth and candidates for foster care. Services can include mental health, substance use disorder treatment, and in-home parent skill-based programs for children or youth who are candidates for foster care.

Under FFPSA, states are also authorized to provide services to youth up to age 23, who have aged out of foster care. To date, there are 22 states that have currently extended the eligibility for the ILP, while California has not. This bill seeks to implement that extension of ILP services to TAY in California.

Related/Prior Legislation

AB 640 (Cooley, Chapter 622, Statutes of 2021) allowed counties to make a redetermination of a foster youth's eligibility for Title IV-E federally funded foster care when the youth is entering EFC.

AB 403 (Stone, Chapter 773, Statutes of 2015), AB 1997 (Stone, Chapter 612, Statutes of 2016), AB 404 (Stone, Chapter 732, Statutes of 2017), AB 1930 (Stone, Chapter 910, Statutes of 2018), AB 819 (Stone, Chapter 777, Statutes of 2019) and AB 2944 (Stone, Chapter 104, Statutes of 2020) implemented CCR to better serve children and youth in California's child welfare services system.

AB 12 (Beall, Chapter 559, Statutes of 2010) created California's EFC program to allow foster youth to remain in foster care until 21 years of age.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CDSS estimates local assistance costs of $16.2 million General Fund ongoing and one-time state automation costs of $165,000 General Fund.

- To the extent this bill increases county costs already borne by a local agency for programs or levels of service mandated by the 2011 Realignment, this bill would apply to local agencies only to the extent that the state provides annual funding for the cost increases.

SUBJECT: Guardianships

SOURCE: Alliance for Children's Rights
California Alliance of Caregivers

DIGEST: This bill simplifies the procedures for a juvenile court to appoint a guardian for a child under its jurisdiction when the parent has informed the court that they are not interested in reunification services and the relevant parties agree to the appointment; and requires the California Department of Social Services (CDSS) to submit a report to the Legislature relating to child welfare voluntary placement agreements and care plans, as specified.

ANALYSIS:

Existing law:

1) Provides that a child may become a dependent of the juvenile court and be removed from their parents or guardian on the basis of abuse or neglect, as specified. (Welf. & Inst. Code, § 300.)

2) Requires, whenever a social worker has cause to believe that a child is a victim of abuse or neglect, to immediately make any investigation they deem necessary to determine whether child welfare services should be offered to the family and whether proceedings in the juvenile court should be commenced. (Welf. & Inst. Code, § 328.)

3) Requires a juvenile court to hold a jurisdictional hearing within 15 judicial days of the filing of a petition to take the child into temporary custody to determine whether the court has jurisdiction to adjudicate the child a dependent of the court. (Welf. & Inst. Code, § 334.)

4) Allows a juvenile court, after hearing evidence at the dispositional hearing, to order a guardianship for the child in addition to or in lieu of adjudicating the child a dependent child of the court, if all of the following circumstances are met:
   a) The court finds that the parent is not interested in family maintenance or family reunification services.
   b) The court determines that the guardianship is in the best interest of the child.
   c) The parent and child agree to the guardianship, unless the child's age or physical, emotional, or mental condition prevents the child's meaningful response.
   d) The court advises the parent and the child that no reunification services will be provided as a result of the establishment of a guardianship.
   e) If the child is an Indian child, a specified assessment has been performed and considered by the court. (Welf. & Inst. Code, § 360(a).)

5) Requires the court, at a dispositional hearing, to order a social worker to provide child welfare services to a child who has been removed from their parents' custody and the parents in order to support the goal of reunification, for a specified time period, except under certain circumstances. Children and families in the child welfare system should typically receive at least six months of reunification services if the child is under three years of age, and at least twelve months if the child is over three years of age, which may be extended up to 18 or 24 months, as provided. These services need not be ordered if the parent has voluntarily relinquished the child or the court has ordered a guardianship pursuant to 5). (Welf. & Inst. Code, § 361.5(a).)

6) Provides that a court, when making a final order to terminate parental rights or establish guardianship of a child for a child adjudged a dependent of the juvenile court, may appoint a relative or nonrelative as the guardian of the child. (Welf. & Inst. Code, § 366.26.)

This bill:

1) Requires CDSS to submit a report to the Legislature on or before July 1, 2025, that includes all of the following data, to be collected beginning no later than January 1, 2025, or 15 months after the date CDSS notifies the Legislature that the Child Welfare Services—California Automated Response and Engagement System can perform the necessary automation to implement the new data fields required to gather the data:
   a) The number of children in the care and custody of all county placing agencies placed pursuant to a voluntary placing agreement, as defined.
   b) The number of child welfare agency investigations that resulted in a written plan for the care of a child outside the home of the parent that is not a voluntary placement agreement.
   c) The number of children in 1)(a) and (b) for whom a subsequent report is made by child protective services within one year of initial contact with the county agency, including whether the reports were substantiated, unsubstantiated, or inconclusive.

   d) The number of children identified in 1)(a) and (b) for whom a dependency court petition is filed within one year of the date of the voluntary placement agreement or written plan for care.

2) Requires CDSS's report pursuant to 1) to include the data stratified by a variety of demographic characteristics, including, at a minimum, by race and income level to the extent allowable to protect confidentiality.

3) Provides that, if (a) a parent has advised the court that they are not interested in family reunification services and designated a specific person to be the child's guardian, (b) the child does not object to the appointment, and (c) the proposed guardian agrees to appointment, the court must appoint the proposed guardian after hearing evidence at the dispositional hearing unless the court finds by a preponderance of the evidence that the appointment would be contrary to the best interests of the child. If the child is an Indian child, existing specified placement preferences apply.

Comments

Author's statement. "Research demonstrates that children who have experienced abuse or neglect and cannot immediately return home to a parent have better educational and behavioral health outcomes when they live with relatives, compared to children placed in non-family settings. Relative caregivers (including "non-relative extended family members," who are not related to the child but have

a family-like role in the child's life) help children to grow up more connected to community and cultural identity.

"AB 2309 allows the juvenile court to order a guardianship with a caregiver of the family's choice earlier in a juvenile court case instead of ordering a child into foster care placement. In addition, the bill requires the Department of Social Services to collect demographic and outcome data of children living with relative caregivers in and out of the juvenile court system, so that we can have a better understanding of all types of kinship settings statewide."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, this bill has a fiscal impact of one-time costs to CDSS of approximately $550,000, of which $275,000 would come from the General Fund (General Fund, Federal Funds).

ARGUMENTS IN SUPPORT: According to the Alliance for Children's Rights, the sponsor of the bill:

> Welfare and Institutions Code section 360(a) (hereafter Section 360(a)) provides an opportunity early in a juvenile court case to ensure that a child can live with a relative or other known caregiver of the family's choice. Specifically, Section 360(a) permits the juvenile court to order guardianship in lieu of ordering a child into foster care placement when parents do not wish to receive reunification services and want an alternative plan for their child…
>
> Although Section 360(a) guardianships were created "to give some deference to the parent's *own* plan for his or her child at an early stage of the dependency

proceedings,"[1] this intent is not fully realized in practice. There is no requirement that the court consider the parents' choice of guardian prior to ordering a Section 360(a) guardianship. Without this protection, the parents' proposed guardian often gets overlooked, and the children are placed in foster care even though a safe and permanent family option is available…

AB 2309 addresses families' reported challenges with the Section 360(a) guardianship process in three ways:

- Allowing parents to designate an individual of their choice to serve as the guardian if the child's safety is not jeopardized;

- Requiring the juvenile court to hold a dispositional hearing on an expedited timeline when the parent requests a Section 360(a) guardianship and the child is already placed in the home of the proposed guardian; and

Requiring the Department of Social Services to collect demographic and outcome data of children living with relative caregivers in and out of the juvenile court system.

SUBJECT: Public Utilities Commission: customer renewable energy subscription programs and the community renewable energy program

SOURCE: Coalition for Community Solar Access

DIGEST: This bill requires the California Public Utilities Commission (CPUC) to evaluate existing customer community renewable energy programs in order to modify and/or terminate programs. This bill also requires the CPUC to determine whether it is beneficial to ratepayers to develop a new or modify a tariff or program for community renewable energy by an electrical corporation, based on specified criteria, including ensuring at least 51 percent of the energy capacity serves low-income customers.

Senate Floor Amendments of 8/24/22 narrow the application of criteria exclusively to the new proposed program, address program eligibility to access federal incentives, delete the sunset on program reporting requirement, and delete unnecessary definitions for low-income eligibility for the program.

ANALYSIS:

Existing law:

1) Requires every electric utility, defined to include electrical corporations (IOUs), local publicly owned electric utilities (POUs), and electrical cooperatives, to develop a standard contract or tariff for net energy metering (NEM), for generation by a renewable electrical generation facility, and to make this contract or tariff available to eligible customer-generators until the time that the total rated generating capacity used by eligible customer generators exceeds five percent of the electric utility's aggregate customer peak demand. (Public Utilities Code §2827)

2) Requires the CPUC, for large electric IOUs, as defined, to have developed a second standard contract or tariff to provide NEM to additional eligible customer-generators in the IOU's service territory and imposes no limitation on the number of new eligible customer-generators. Requires the CPUC, in developing the second standard contract or tariff, to include specific alternatives designed for growth among residential customers in disadvantaged communities. (Public Utilities Code §2827.1)

3) Establishes the Green Tariff Shared Renewables Program (GTSR) with 600 megawatts (MW) of renewable resources available to customers of the three largest electric IOUs on a proportional basis to which a participating customer can subscribe. Requires the CPUC to ensure that charges and credits for the GTSR are set in a manner that ensures nonparticipant ratepayer indifference for the remaining bundled service, direct access, and community choice aggregation (CCAs) customers, and ensures that no costs are shifted from participating customers to nonparticipating ratepayers. (Public Utilities Code §2831, et seq.)

4) Imposes various requirements on public works projects, as defined, including a requirement that, at minimum, all workers employed on a public works project be paid the general prevailing rate of per diem wages for work of a similar character in the locality in which a public work is performed, as specified. (Labor Code §1720)

This bill:

1) Requires the CPUC, on or before March 31, 2024, to evaluate each customer renewable energy subscription program to determine if the program meets specified goals, to authorize the termination or modification of a program that does not meet those goals, and to determine whether it would be beneficial to ratepayers to establish a community renewable energy-program.

2) Requires the CPUC, on or before July 1, 2024, to establish that program if doing so would be beneficial to ratepayers and to require each electrical corporation to participate in that program.

3) Requires each CCA and energy service provider (ESP), within 180 days of the establishment of the program, to notify the CPUC whether it will participate in the program. Authorizes a CCA or ESP to begin participating in, or end its participation in, the program at any time by notifying the CPUC.

4) Requires each customer renewable energy subscription program and the community renewable energy program, if established, to:
   a) be complementary to, and consistent with, the requirements of the California Building Standards Code (Title 24 requirements for community solar);
   b) ensure at least 51 percent of its capacity serves low-income customers, (3) prohibit its costs from being paid by nonparticipating customers;
   c) require that the construction of its community renewable energy facilities comply with specified prevailing wage requirements; and
   d) provide bill credits to subscribers.

5) Requires the CPUC, on or before March 31, 2024, to report to the Legislature on actions taken as a result of its evaluation of each customer renewable energy subscription program, its justification for terminating, modifying, or retaining each program, and whether it would be beneficial to ratepayers to establish the community renewable energy program.

6) Requires the CPUC within 24 months of establishing the community renewable energy program and annually thereafter for four years, to submit a report to the Legislature on the facilities deployed, and customers subscribed, pursuant to the program.

Background

What is Community Solar? The U.S. Department of Energy defines community solar as any solar project or purchasing program, within a geographic area, in which the benefits of a solar project flow to multiple customers such as includes from various customer classes: residential, commercial, etc. Community solar can be designed in several ways, but the ultimate goal is to provide residents more options to participate in solar projects. In most cases, customers are benefitting from energy generated by solar panels at an off-site array; however, there are also on-site multifamily community solar options where occupants of apartment and condominium buildings each benefit from the energy produced from the rooftop solar project. Additionally, who pays to plan, construct, and operate the solar project varies across the different community solar modes – such as when a utility may own or operate a project that is open to voluntary ratepayer participation, or when customers themselves may collectively sign a contract with a third-party developer and be treated as departing load from their utility.

Community solar customers typically receive a bill credit for electricity generated by their share of the community solar system – similar to someone who has rooftop panels installed on their home and receives the NEM tariff. However, the value of that customer bill credit can also vary widely between community solar programs, with some more generous than others. Community solar can be a great option for people who do not own their homes, have financial constraints, or have insufficient roof conditions, such as shading, roof size, or other factors and who desire to participate in a solar project.

Existing Community Solar Programs. There are four main community solar programs currently in place for eligible customers of California's large electric IOUs: Disadvantaged Communities-Green Tariff (DAC-GT) program; Community Solar Green Tariff (CSGT) program; and GTSR program, which is comprised of two subprograms: the Green Tariff (GT) option, and the Enhanced Community Renewables (ECR) option.

GTSR program. SB 43 (Wolk, Chapter 413, Statutes of 2013) directed the CPUC to establish the GTSR program. GTSR has the overall objective of expanding customer access to renewable energy and to build up to 600 MW in additional renewable facilities. GTSR includes both a GT option and an ECR option. Pursuant to statute, the costs of GTSR may not be borne by nonparticipants. The two GTSR programs are similar in structure to the two disadvantaged communities (DAC) community solar programs mentioned previously.

The GT program provides a renewable facility is utility-scale and utility procured and is open to all customers of the three largest electric IOUs. GT customer pays the difference between their current charge for generation on their electric bill and the cost of procuring either 50 or 100 percent renewables. As of September 2019, 153 MW of new renewable capacity had been built.

The ECR program provides generation from a local solar project with a size limited to 20 MW. The facility developers must fulfill a "community interest requirement," where customers agree to purchase a share of a local solar project directly from a solar developer, and in exchange, the customer will receive a credit from their utility for the customer's avoided generation and for their share of the benefit of the solar development to the utility. As of September 2019, 10 MW of new renewable capacity had been built, six in Southern California Edison's (SCE's) territory and four in Pacific Gas & Electric's (PG&E's).

Community solar for disadvantaged communities. AB 327 (Perea, Chapter 611, Statutes of 2013) directed the CPUC to develop specific alternatives designed to increase adoption of renewable generation in disadvantaged communities. In 2018, the CPUC created several programs (Decision 18-06-027) aimed at increasing access to solar energy for residents of DAC located in one of the three large electric IOU distribution service territories. In order to offset the high costs of these projects, electric IOU greenhouse gas (GHG) auction proceeds and public purpose funds from non-participating ratepayers are utilized.

Solar ready buildings in the Title 24 Regulations. In May of 2018, as part of its regulation of building energy efficiency, the California Energy Commission (CEC) adopted a requirement for the installation of solar system capacity on all new low-rise residential buildings. The CEC regulations require (1) installation of a certain sized solar system on a newly constructed, low-rise residential building; (2) successful exemption from the installation requirement in the event of excessive shade, roof design or other defined factors; or (3) development of a community solar project that offsets the load of the newly constructed, low-rise residential building.

The Avoided Cost Calculator (ACC). The ACC is a complex determination of the benefits resources provide to the grid and all ratepayers. It calculates a monetary amount in $/kWh to value a resource. The ACC calculates the avoided costs of electricity resources based on generation energy, generation capacity, ancillary services, transmission and distribution capacity, GHG, and high global warming potential gases. The ACC is updated annually to improve the accuracy of how

benefits are calculated, taking inputs from various CPUC proceedings and California Independent System Operator (CAISO) wholesale market data.

Net Energy Metering (NEM). The vast majority of rooftop solar customers are enrolled in NEM (NEM 1.0) or NEM Successor (NEM 2.0) tariffs, established under Public Utilities Code §§2827 and 2827.1, respectively. The NEM program supports onsite renewable energy (largely rooftop solar) installations designed to offset a portion, or all, of the customer's electrical energy usage. Under NEM, customers receive a bill credit (in dollars) based on the retail rate (including generation, transmission, and distribution rate components) for any excess generation (in kWh) that is exported back to the grid. On August 27, 2020, the CPUC initiated Rulemaking (R. 20-08-020) to develop a successor to the NEM 2.0 tariff, as part of the requirement in statute and a commitment in a previous decision to review the current tariff to address the shift in costs to nonparticipating customers. The CPUC released a proposed decision in December 2021. However, a revised proposed decision is pending as the CPUC is currently soliciting additional stakeholder comments.

Comments

Another community solar program? This bill proposes another community solar program. The proponents point to short-comings of the numerous programs noted above. Under this bill, renewable energy projects interconnected to the distribution system will receive monetary credits that can be applied to the utility bills of customers who subscribe to the project. This bill credit rate would be based upon the project's value to the grid at the time of generation. The program would be open to any customers of an electric IOU, but, unlike GTSR, this bill authorizes CCA and ESP providers the option to provide the program to their energy load customers. Each eligible project would need to subscribe at least 51 percent of its capacity to low-income customers.

Requires evaluation of existing programs before initiating a new program. On June 1, 2022, the three electric IOUs filed applications with the CPUC for review of their community solar programs. The proceedings that will be initiated by these applications are expected to review the programs' goals, budget, capacity, design, implementation, and consumer protections. This bill requires the CPUC to complete its evaluation of existing community solar programs, and modify or terminate those programs, prior to initiating a new program. As such, this bill will help prevent duplicative programs.

Title 24 community solar compliance option. Builders are struggling to comply with the CEC's requirement and are looking to develop community solar projects

as a means of compliance, which builders note are much cheaper to develop than rooftop solar. The CEC's community solar compliance option is conceptually analogous to the ECR component of GTSR. The ECR component of the GTSR has been unsuccessful, to date, with only 10 MW (of a possible 600 MW) developed.

NEM proceeding and community solar. Coalition for Community Solar Access (CCSA), the sponsors of this bill, filed a proposal into the CPUC's NEM proceeding with some similarities to what is included in this bill. The CPUC's December 2020 proposed decision on NEM declined to adopt CCSA's proposal, stating it was premature and reiterating the CPUC's intent to review the broader aspects of community solar across the various programs. Nonetheless, the CPUC has not issued a final (or updated proposed) decision on NEM, so it is unclear whether the CPUC intends to address the interest from proponents of this bill to include a community solar option.

Prevailing wages for community renewable energy. In California, the prevailing wage rate is an hourly rate paid on public works projects that is often set in the terms of a collective bargaining agreement. Prevailing wage creates a level playing field by requiring an across-the-board rate for all bidders on publically subsidized projects. Residential rooftop solar installation does not currently require payment of the prevailing wage, as such, rooftop solar installers are generally making below the wage rate paid to other building and construction trade workers. This bill would require prevailing wages for the installation of the community renewable energy projects.

Related/Prior Legislation

AB 2838 (O'Donnell, 2022) authorizes the CPUC, beginning April 1, 2023, to authorize IOUs to terminate the GTSR programs. The bill is pending before the Governor.

SB 1385 (Cortese, 2022) establishes, by January 1, 2024, a new 1,500 MW multifamily housing local solar program that requires each large electrical corporation, as specified, to construct solar and storage systems in front of the customers' meters on or near multifamily housing. The bill sunsets the program as of January 1, 2027. The bill was held in the Assembly Appropriations Committee.

AB 693 (Eggman, Chapter 582, Statutes of 2015) created the Multifamily Affordable Housing Solar Roofs Program, to provide financial incentives for qualified solar installations at multifamily affordable housing properties funded from IOU's GHG allowances.

SB 43 (Wolk, Chapter 413, Statues of 2013) established, until January 1, 2019, a Shared Renewable Self Generation Program allowing IOU customers to purchase an interest in a "community renewable energy facility" and receive a bill credit for the generation component of the customer's electrical service.

AB 327 (Perea, Chapter 611, Statutes of 2013), among other provisions, required the CPUC to develop specific alternatives to the NEM tariff to ensure that customer-sited renewable distributed energy is available to residential customers in disadvantaged communities.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriation Committee:

- Unknown ongoing costs, likely in the millions of dollars annually, and unknown one-time costs, likely in the hundreds of thousands of dollars, (ratepayer funds) for the CPUC to implement the provisions of this bill.

- Unknown, potentially significant costs to the state as an electrical ratepayer. The State of California is an electrical customer, purchasing roughly one percent of the state's electricity. As such, the state incurs costs when rates increase. This bill could result in higher costs on the state as a ratepayer.

OPPOSITION: (Verified 8/24/22)

California Solar & Storage Association
Pacific Gas and Electric Company

ARGUMENTS IN SUPPORT: According to the author, "California has some of the most ambitious renewable energy goals in the world, including being powered by 60% renewable energy by 2030 and 100% carbon-free electricity by 2045. Equal access to solar and equality in the clean energy economy are essential to achieving these goals. Unfortunately, of the majority of California households do not have access to local solar power, including some of California's most disadvantaged communities. Assembly Bill 2316 would create a cost-effective community renewable energy program that leverages the ability to combine distributed renewable resources with energy storage to provide all Californians with an option to access the benefits of distributed generation."

ARGUMENTS IN OPPOSITION: In opposition this bill, the California Solar & Storage Association contends this bill would undermine the standard to require solar on all new buildings. They suggest explicit statutory limitations to limit the buildings that would be eligible to utilize this compliance option.

Pacific Gas and Electric Company opposes this bill due to potential costs on their customers, both participating and nonparticipating. They also express concerns that the proposed program is not necessary and duplicative of existing related programs.

ASSEMBLY FLOOR: 64-3, 5/25/22 - See last page for vote

SUBJECT: Surplus land: former military base land

SOURCE: City of Alameda

DIGEST: This bill establishes a new category of exempt surplus land for the former military base Alameda Naval Air Station (Alameda Point).

Senate Floor Amendments of 8/22/22 require at least 25 percent of the initial 1,400 residential units developed at the site to be affordable to lower income households, as specified; require that the recipient of land must negotiate a project labor agreement consistent with an existing project stabilization agreement resolution prior to disposal; and make other technical changes.

ANALYSIS:

Existing law:

1) Establishes procedures for disposal of land surplus to the needs of local agencies, under Surplus Land Act, including to:

a) Require local officials that want to dispose of public property to declare that the land is no longer needed for the agency's use in a public meeting and declare the land either "surplus land" or "exempt surplus land."

b) Designate certain types of land as "exempt surplus land," which doesn't have to meet the requirements of the Surplus Land Act.

c) Require local agencies to follow the procedures laid out in the Act before surplus land can be sold, including to:

   i) Send a written notice of availability to various public agencies and nonprofit groups, referred to as "housing sponsors," notifying them that land is available for the following purposes:

      (1) Low- and moderate-income housing;
      (2) Park and recreation, and open space;
      (3) School facilities; or
      (4) Infill opportunity zones or transit village plans.

   ii) Negotiate in good faith for 90 days with housing sponsors that respond.

d) Allows the local agency to dispose of the property on the private market if agreement isn't reached with a housing sponsor.

e) Requires that, if a property sold as surplus is not sold to a housing sponsor, but housing is developed on it later, 15 percent of the units must be sold or rented at an affordable cost to lower income households.

f) Imposes specified penalties for violations of the Surplus Land Act.

This bill:

1) Establishes a new category of exempt surplus land for Alameda Point, provided that all of the following conditions are met:

   a) The former military base has an aggregate area greater than five acres, is expected to include a mix of residential and nonresidential uses, and is expected to include no fewer than 1,400 residential units upon completion of development or redevelopment of the former military base;

   b) The affordability requirements for residential units are governed by a settlement agreement entered into prior to September 1, 2020, and at least 25

percent of the initial 1,400 units developed are restricted to lower income households, as specified;

c) Prior to disposition of the surplus land, the agency adopts an written finding that the land is exempt surplus land;

d) Prior to the disposition of the surplus land, the recipient has negotiated a project labor agreement consistent with the local agency's project stabilization agreement resolution, as adopted on February 2, 2021, and any succeeding ordinance, resolution, or policy, regardless of the length of the agreement between the local agency and the recipient; and

e) The agency includes in its Annual Progress Report to the Department of Housing and Community Development (HCD), the status of development of residential units on the former military base, including the total number of residential units that have been permitted and what percentage of those residential units are affordable to moderate and lower-income households.

2) Provides that violations of the provisions added by the bill are subject to the penalties under the Surplus Land Act, and that these penalties are in addition to any remedy a court may order for violation of the settlement agreement.

3) Includes findings and declarations to support its purposes.

Background

The end of the Cold War forced the Department of Defense to adjust to new geopolitical realities. Federal officials closed or realigned nearly three dozen military bases in California. Upon their closure, the Department of Defense along with local agencies designated local reuse authorities to guide the future use of the base. In one case, an entirely new state entity was created to guide the development of Ford Ord. In other cases, like the Mare Island Naval Shipyard in the City of Vallejo, the city took responsibility for repurposing the base. These former bases have become homes to higher education institutions like California State University, Monterey Bay, and others serve important affordable housing purposes, like the Bay Public Works Center on Alameda Island.

The Alameda Naval Air Station (Alameda Point) is among the nearly 30 military bases in California closed by the federal government at the end of the Cold War. In 1996, the Legislature designated the City of Alameda as the "local reuse entity" to manage the conversion of Alameda Point to civilian uses (AB 3129, Lee, 1996).

Alameda officials adopted their redevelopment plan on March 2, 1998. The plan calls for mixed-use development that includes up to 2,300 units of housing.

In the spring of 2000, an action commenced in Alameda Superior Court (*Renewed Hope Housing Advocates and Arc Ecology v. City of Alameda*, et al.) challenging the Environmental Impact Report for the reuse of Alameda Point. The parties eventually settled in March of 2001 on multiple matters, including the construction of affordable housing on the base. The agreement stipulated that 25 percent of all newly constructed housing units at Alameda Point must be made permanently affordable, as specified.

This requirement applies to each residential development project at Alameda Point, and the City of Alameda cannot approve any residential development projects on the base that do not comply.

Surplus Land Act and military base reuse. The recent amendments to the Surplus Land Act have come into conflict with local agencies' plans and obligations to redevelop former military bases. Specifically, at Alameda Point, pursuant to the recent changes to the Surplus Land Act, the City of Alameda is obligated to make the former military base available to various entities for possible development of housing, open space, etc. This obligation conflicts with the federally-approved reuse plan and the prior agreement the City had entered into with the Navy to redevelop Alameda Point because the base reuse plan identifies specific uses for properties, including economic development purposes. Accordingly, developing housing where it is not designated in the base reuse plan would be inconsistent with the plan and violate the conditions place on the property as a result of the transfer from the federal government to the City.

In addition, HCD has interpreted the Surplus Land Act to include leases in the definition of disposal. This interpretation has limited the City's ability to lease vacated military buildings for interim uses, an essential component of the reuse plan as well as the City's economic revitalization plan to offset the loss of jobs and tax revenue from the closure of Alameda Point. The interim lease of vacant buildings for economic revitalization helps finance ongoing cleanup and development over the lifetime of the Alameda Point project. An example of the conflict is the inability of the Alameda Point Collaborative (APC) to move forward with a project that will replace dilapidated units now housing homeless people and build an additional 112 units for the homeless.

To address these conflicts, the City of Alameda wants the Legislature to exempt Alameda Point from the Surplus Land Act.

Comments

1) *Purpose of the bill*. According to the author, "AB 2319 will expedite the construction of low-, very low- and moderate-income housing at Alameda Naval Air Station (Alameda Point). These critical projects have been dramatically slowed due to the state's interpretation of how the Surplus Land Act should apply to the project. The construction of low-, very low- and moderate-income units at this former Naval base is particularly beneficial to this community. There is an existing settlement agreement between the City of Alameda and a local nonprofit, Renewed Hope, requiring 25% of all housing units at the former Naval base to be low-, very low- or moderate-income housing, which is higher than the 15% inclusionary zoning requirement in the remainder of the City of Alameda. Due to the unique circumstance the City of Alameda finds itself, AB 2319 is narrowly tailored to just apply to the former Naval base in Alameda."

2) *Broader changes needed?* AB 2319 is one of a parade of bills attempting to address issues with the Surplus Land Act that have come to light since the enactment of AB 1486. Several of these bills have enacted, or would create, exemptions to the Surplus Land Act to enable the development of worthy causes, including the development of affordable housing on an important transit corridor in the San Diego Area (SB 51, Durazo, 2021), the Metro North Hollywood Joint Development project (AB 175, Committee on Budget, 2021), the Tustin military base (SB 719, Min, 2021), and several economic development projects in the City of Los Angeles (SB 1373, Kamlager, 2021). In the case of Alameda Point, the affordable housing requirements imposed through the settlement agreement actually exceed the requirements of the SLA: at least 16 percent of the units developed on the former base must be affordable to lower-income households under the settlement agreement (plus an additional 9 percent moderate-income housing) rather than 15 percent under the Surplus Land Act. Accordingly, the sponsor of AB 2319 is seeking an exemption not because they oppose affordable housing, but because the Surplus Land Act conflicts with their federally-approved base reuse plan. This conflict has stalled their ability to dispose of the property for development—including development of affordable housing that the Surplus Land Act attempts to encourage. Broader conversations may need to be had concerning the efficacy of the Surplus Land Act in producing affordable housing versus the impacts to local government plans for affordable housing and other development in their jurisdiction.

SUBJECT: Pupil health: eye examinations: schoolsites

SOURCE: Los Angeles Unified School District

DIGEST: This bill authorizes a local education agency (LEA) and charter schools to enter into a memorandum of understanding (MOU) with a nonprofit vision examination provider, including, but not limited to, a nonprofit mobile vision examination provider; requires notification to parents; and deems that informed medical consent has been given if the parent does not opt-out of the examination in writing.

Senate Floor Amendments of 8/25/22/ make technical amendments.

ANALYSIS:

Existing law:

1) Requires the governing board of any school district to provide for the testing of the sight and hearing of each pupil enrolled in the schools of the district. The

test shall be adequate in nature and shall be given only by duly qualified supervisors of health employed by the district; or by certificated employees of the district or of the county superintendent of schools who possess the qualifications prescribed by the Commission for Teacher Preparation and Licensing; or by contract with an agency duly authorized to perform those services by the county superintendent of schools of the county in which the district is located. (Education Code 49452)

2) States during the kindergarten year or upon first enrollment or entry in a California school district of a pupil at an elementary school, and in grades 2, 5, and 8, the pupil's vision shall be appraised by the school nurse or other authorized person. (Education Code § 49455(a))

3) Specifies that school districts are not precluded from utilizing community-based service providers, including volunteers, individuals completing counseling-related internship programs, and state licensed individuals and agencies to assist in providing pupil personnel services, provided that such individuals and agencies are supervised in their school-based activities by an individual holding a pupil personnel services authorization. (California Code of Regulations, Title 5, Section 80049.1(c))

4) States a parent or guardian having control or charge of any child enrolled in the public schools may file annually with the principal of the school, in which he is enrolled, a statement in writing, signed by the parent or guardian, stating that he will not consent to a physical examination of his child. Thereupon the child shall be exempt from any physical examination, but whenever there is a good reason to believe that the child is suffering from a recognized contagious or infectious disease, he shall be sent home and shall not be permitted to return until the school authorities are satisfied that any contagious or infectious disease does not exist. (EC § 49451)

This bill authorizes a LEA and charter schools to enter into a MOU with a nonprofit vision examination provider, including, but not limited to, a nonprofit mobile vision examination provider; requires notification to parents; and deems that informed medical consent has been given if the parent does not opt-out of the examination in writing. Specifically, this bill:

1) Authorizes a public school maintaining kindergarten or any of grades 1 to 12, inclusive, to enter into an MOU with a nonprofit mobile vision examination provider to provide vision examinations to pupils at the schoolsite of the public school.

2) Clarifies that vision examinations provided by a nonprofit mobile vision examination provider under this section shall be supplemental to, and shall not replace, the vision screenings as specified in current law.

3) Clarifies a vision examination provided by a nonprofit mobile vision examination provider shall be noninvasive and provided exclusively for the purpose of providing vision examinations and eyeglasses.

4) Specifies that a mobile vision examination provider providing vision examination pursuant to this section shall provide reports to parents and guardians as specified.

5) Requires a schoolsite of a public school to have an MOU in place with a nonprofit mobile vision examination provider before a vision examination is provided.

6) Requires a public school to notify parents and guardians of the upcoming provision of vision examinations at the schoolsite.

7) Specifies that a notification to parents and guardians shall include a form in which a parent or guardian may indicate that they do not consent to a vision examination being provided to their child and, upon a parent or guardian completing and submitting that form to the public school, may opt-out of their child receiving a vision examination.

8) Clarifies that notwithstanding the submittal of a written statement exempting a child from any physical examination, a parent or guardian having control or charge of any child enrolled in the public school may consent to a vision examination by submitting a written consent to the examination to the public school.

9) States that no later than March 1, 2023, the California Department of Education (CDE) shall develop and post on appropriate department internet websites a model opt-out form.

10) Clarifies participating licensed health care professionals, including independent contractors of those professionals, shall have immunity from civil and criminal liability, and shall not be subject to disciplinary action by a licensing board, for providing services that are authorized by this section without parent or guardian consent.

11) Clarifies a participating public schools shall have immunity from civil and criminal liability for providing services that are authorized by this section without parent or guardian consent

12) Specifies a public school, the State of California, or a participating licensed health care professionals, including independent contractors of those professionals, who provide services on the behalf of a mobile vision examination provider may be subject to the following:

    a) A person's liability for damages caused by an act or omission that constitutes gross negligence or willful or wanton misconduct.

    b) A person's culpability for an act that constitutes a crime and is not specifically authorized by the MOU between the school and a nonprofit mobile vision examination provider.

    c) The ability of a licensing board to take disciplinary action against a licensed health care professional for an act not specifically authorized by the MOU between the school and a nonprofit mobile vision examination provider.

    d) The ability of a parent or guardian, having control or charge of a pupil enrolled in the public school stating that they do not consent to a physical examination of their child, thereby exempting the pupil from any physical examination, including, but not limited to, the vision examination unless the parent or guardian have provided written consent to the school.

13) States that vision examination providers providing vision examinations to pupils at a public school are subject to, and shall comply with existing law as specified.

14) Requires any nonprofit mobile vision examination provider, participating licensed health care professional, including independent contractors of these professionals, or other entity providing services to have a background check prior to interacting with any pupils.

Comments

1) *Need for the bill.* According to the author "According to the American Optometric Association, a child trying to cope with untreated vision problems is likely to experience learning difficulties, which lead to disengagement in the classroom, physical education, and extracurricular activities. They may even experience physical symptoms, such as headaches and fatigue. Vision is critical to classroom learning. In fact, up to 80% of the information that a child

learns at school is from visual presentations. A 2021 1 study showed that addressing a pupil's vision problem, between third and seventh grade, had an immediate and meaningful positive impact on reading scores. Specifically, this bill would authorize a public school to enter into a memorandum of understanding with a nonprofit mobile vision provider to offer noninvasive vision exams and eyeglasses to students at the school site. It would also provide parents with an opportunity to opt out of their child receiving these vision care services through a form developed by the State Department of Education."

2) *CDE Guidelines (2019).* California public schools are committed to providing equal educational opportunities to all students. The school vision screening program has a vital role in the early identification of serious vision problems that may contribute to academic disparities. A vision screening program meets state requirements when it is provided under the direction of qualified personnel. The major objectives of the vision screening program are to:

   a) Identify students with potential vision deficits through:

      i) Administration of selected vision screening tools.

      ii) Planned procedures of observation.

   b) Notify parents of each student identified as having a possible vision deficit and encourage further examination through a professional comprehensive eye and vision evaluation.

   c) Establish follow-up procedures that will ensure that each identified student receives appropriate follow-up care.

   d) Inform teachers of students who have vision deficits about vision eye care professionals' recommendations and assist them in planning for needed adjustments in the educational program.

   Personnel Authorized to Conduct Screening. Only the following persons shall conduct vision screening:

   a) Duly qualified supervisors of health employed by the school district or county offices of education (COE).

   b) A registered nurse who holds both (i) a license from the appropriate California board or agency; and (ii) a health and development credential, a standard designated service credential with a specialization in health, a

health services eight credential as a school nurse, or a school nurse services credential.

c) Certificated school district or county employees who hold a teaching credential and are qualified by training, including satisfactory completion of one six hours of vision screening or an accredited college or university course in vision screening of at least one-semester unit.

d) Contracting agents who have met the requirements noted above and who have been authorized by the County Superintendent of Schools in which the district is located to perform tests.

Legal Requirements for Periodicity of the School Screening Program.

Grade Level	Distance Vision	Near Vision	Color Vision Deficiency
Transitional Kindergarten/Kindergarten	Required	Required	Not Required
Grade 1	Not Required	Not Required	Required
Grade 2	Required	Required	Required in subsequent years only if not screened in grade 1
Grade 5	Required	Required	See Above
Grade 8	Required	Required	See Above
Special Education	Required	Required	Required

While the education code does not require vision screening of preschool students, the National Expert Panel to the National Center for Children's Vision recommends vision screening for children ages three, four, and five years for eye and visual system disorders. Best practice for this age group is screening at least once (accepted minimum standard) or optimally, annually. Preschoolers at risk for vision disorders and those with noticeable eye abnormalities, i.e., strabismus, and ptosis, should be referred directly to an eye care professional. Personnel in a school district or COE who may be required or permitted to screen vision shall be qualified to conduct such tests.

3) *Los Angeles County Pilot Program.* In an effort to determine whether children's access to and utilization of, vision care services can be increased by providing vision care services at schools, existing law required the California Department of Health Care Services to establish a pilot program in the County of Los Angeles that enables school districts to allow students enrolled in Medi-Cal managed care plans to receive vision care services at the schoolsite through the use of a mobile vision service provider. The vision care services available

under this pilot program were limited to vision examinations and providing eyeglasses and are supplemental to the vision testing required by schools in the Education Code. The pilot program operated for two years from January 1, 2015, to January 1, 2017. The Budget Act of 2018 appropriated $1 million to reimburse a qualifying mobile vision service provider for furnishing mobile vision care services previously covered under the pilot program and not otherwise reimbursable under the Medi-Cal program for dates of service on or after July 1, 2018, through December 31, 2018.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/25/22)

Los Angeles Unified School District (source)
California Federation of Teachers, AFL-CIO
Communities in Schools of Los Angeles
Los Angeles Trust for Children's Health
National Association of Pediatric Nurse Practitioners

OPPOSITION: (Verified 8/25/22)

None received

ARGUMENTS IN SUPPORT: According to the sponsors "On average, pre-pandemic, Los Angeles Unified provided between 13,000 and 16,000 student vision examinations per semester by various district partners. All students are screened at each school and a consent is not required for screening; however, parent consent is required for an eye examination. The goal of AB 2329 is to provide more students access to no-cost vision exams. School districts will need to enter into a memorandum of understanding with a vision examination provider regarding their partnership and scope of the program, and then provide a reasonable amount of time to allow parents to opt-out of the scheduled vision exam. This bill is permissive in nature for school districts that desire to offer these programs, but it is not mandatory. Through AB 2329, Los Angeles Unified seeks to narrow opportunity gaps and to decrease the burdens of poverty as we continue to focus on addressing the academic, social-emotional, and health needs of every student. AB 2329 achieves this goal, and has the potential of providing opportunities for tens of thousands of students across the state"

ASSEMBLY FLOOR: 49-22, 5/26/22 - See last page for vote

SUBJECT: Density Bonus Law: affordability: incentives or concessions in very low vehicle travel areas: parking standards: definitions

SOURCE: Author

DIGEST: This bill allows a housing development project to receive added height and unlimited density if the project is located in an urbanized very low vehicle travel area in specified counties, at least 80% of the units are restricted to lower income households, and no more than 20% are for moderate-income households.

Senate Floor Amendments of 8/24/22 resolve chaptering conflicts with AB 682 (Bloom).

Senate Floor Amendments of 8/18/22 update the definition of maximum allowable residential density and clarify that these maximum residential controls on density only apply to those counties identified in this bill.

ANALYSIS:

Existing law:

1) Requires each city and county to submit an annual progress report (APR), annually by April 1, to the legislative body, the Office of Planning and Research, and the Department of Housing and Community Development that includes data points and updates on housing plans and approvals.

2) Requires each city and county to adopt an ordinance that specifies how it will implement state Density Bonus Law (DBL). Requires cities and counties to grant a density bonus when an applicant for a housing development of five or more units seeks and agrees to construct a project that will contain at least one of the following:

   a) 10% of the total units of a housing development for lower income households;
   b) 5% of the total units of a housing development for very low-income households;
   c) A senior citizen housing development or mobile home park;
   d) 10% of the units in a CID for moderate-income households;
   e) 10% of the total units for transitional foster youth, disabled veterans, or homeless persons;
   f) 20% of the total units for lower-income students in a student housing development; or
   g) 100% of the units of a housing development for lower-income households, except that 20% of units may be for moderate-income households.

3) Requires a city or county to allow an increase in density on a sliding scale from 20% to 50%, depending on the percentage of units affordable to low- and very low-income households, over the otherwise maximum allowable residential density under the applicable zoning ordinance and land use element of the general plan. Requires the increase in density on a sliding scale for moderate-income for-sale developments from 5% to 50% over the otherwise allowable residential density.

4) Provides that upon the request of a developer, a city or county shall not require a vehicular parking ratio, inclusive of disabled and guest parking, that meets the following ratios:

   a) Zero to one bedroom — one onsite parking space.
   b) Two to three bedrooms — one and one-half onsite parking spaces.

c) Four and more bedrooms — two and one-half parking spaces.

5) Provides, notwithstanding 4) above, that a city or county shall not impose a parking ratio higher than 0.5 spaces per unit, nor any parking standards, for a project that is:

   a) Located within one-half mile of a major transit stop and the residents have unobstructed access to the transit stop; or
   b) A for-rent housing development for individuals who are 62 years or older and the residents have either access to paratransit service or unobstructed access, within one-half mile, to fixed bus route service that operates at least eight times per day.

6) Provides, notwithstanding 4) and 5) above, that a city or county shall not impose any minimum parking requirement on a housing development that consists solely of rental units for lower income families and the is either a special needs or a supportive housing development.

7) Provides that the applicant shall receive the following number of incentives or concessions:

   a) One incentive or concession for projects that include at least 10% of the total units for moderate-income households, 10% of the total units for lower-income households, or at least 5% for very low-income households.
   b) Two incentives or concessions for projects that include at least 20% of the total units for moderate-income households, 17% of the total units for lower income households, or least 10% for very low income households.
   c) Three incentives or concessions for projects that include at least 30% of the total units for moderate-income households 24% of the total units for lower-income households, or at least 15% for very low-income households.
   d) Four incentives or concessions for projects where 100% of the units of a housing development for lower-income households, except that 20% of units may be for moderate-income households, as well as a height increase up to 33 feet if the project is located within one-half mile of a transit stop.

8) Resolves chaptering conflicts with AB 682 (Bloom).

This bill:

1) Defines "very low vehicle travel area" to mean an urbanized area, as defined by the Census Bureau, where the existing residential development generates vehicle miles traveled (VMT) per capita that is below 85% of either regional or

city VMT per capita. "Region" is the entirety of incorporated and unincorporated areas governed by a multicounty or single-county metropolitan planning organization (MPO), or the entirety of the incorporated and unincorporated areas of an individual county that is not part of an MPO.

2) Expands the following provisions, which currently apply to housing developments within one-half mile of a major transit stop that restrict at least 80% of units for lower income households and no more than 20% of units for moderate income households, to developments that are located in an urbanized low vehicle travel area:

   a) A height increase of up to three additional stories, or 33 feet; and
   b) No imposition of maximum controls on density by the local government.

3) Requires the rents for specified units in housing development projects that receives a density bonus to be consistent with the maximum rent levels for lower income households as determined by the California Tax Credit Allocation Committee.

4) Provides that as part of an equity sharing agreement a local government may defer to the recapture provisions of a public funding source.

5) Updates the definition of maximum allowable residential density.

6) Provides that if the density under the zoning ordinance is inconsistent with the density allowed under the land use element of the general plan or specific plan, the greater shall prevail.

7) Changes the resident age requirement for a specified development to receive an elimination of parking minimums from the current 62 years of age or older to instead be 55 years or older.

8) Applies the provisions of this bill only to the counties of Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, Sonoma, Los Angeles, Orange, Riverside, San Bernardino, San Diego, Ventura, Sacramento, and Santa Barbara.

Background

Given California's high land and construction costs for housing, it is extremely difficult for the private market to provide housing units that are affordable to low- and even moderate-income households. Public subsidy is often required to fill the financial gap on affordable units. DBL allows public entities to reduce or even

eliminate subsidies for a particular project by allowing a developer to include more total units in a project than would otherwise be allowed by the local zoning ordinance, in exchange for affordable units. Allowing more total units permits the developer to spread the cost of the affordable units more broadly over the market-rate units.

Under existing law, if a developer proposes to construct a housing development with a specified percentage of affordable units, the city or county must provide all of the following benefits: a density bonus; incentives or concessions; waiver of any development standards that prevent the developer from utilizing the density bonus or incentives; and reduced parking standards.

To qualify for benefits under DBL, a proposed housing development must contain a minimum percentage of affordable housing (see 2) under "Existing law"). If one of these options is met, a developer is entitled to a base increase in density for the project as a whole (referred to as a density bonus) and one regulatory incentive. Under DBL, a developer is entitled to a sliding scale of density bonuses, up to a maximum of 50% of the maximum zoning density and up to four incentives, as specified, depending on the percentage of affordable housing included in the project. At the low end, a developer receives 20% additional density for 5% very low-income units and 20% density for 10% low-income units. The maximum additional density permitted is 50%, in exchange for 15% very low-income units and 24% low-income units. The developer also negotiates additional incentives, reduced parking, and design standard waivers, with the local government. This helps developers reduce costs while enabling a local government to determine what changes make the most sense for that site and community.

Comments

Incentivizing Affordable Infill Housing. California has taken a number of steps to promote more sustainable urban infill housing including through the use of density bonus law. Specifically, in 2019 the Legislature passed and Governor Newsom signed into law AB 1763 (Chiu, Chapter 666, Statutes of 2019), a bill that allowed for an enhanced density bonus for certain affordable housing projects located within one-half mile of a major transit stop. AB 1763 gives affordable housing projects the ability to receive unlimited density and a height increase of 33 feet or three stories. To receive this enhanced density bonus at least 80% of the units must be reserved for lower-income households and no more than 20% can be for moderate-income individuals and families.

While AB 1763 made it easier to build dense, affordable housing near transit, many parts of the state lack the level of public transportation service necessary to

qualify for the enhanced density bonus the legislation allowed. Within these areas of the state it is still important to promote housing in urbanized areas that allow residents to reduce their reliance on vehicle travel. This bill proposes to expand AB 1763's enhanced density bonus provisions to cover very low vehicle travel areas in urbanized areas where existing residential development generates VMT that is below 85% of either the region or city's per capita VMT.

In the coming months the Governor's Office of Planning and Research will be releasing maps that indicate very low VMT areas within certain regions. Additionally, under SB 743 (Steinberg, Chapter 386, Statutes of 2013), guidelines for evaluating transportation impacts under the California Environmental Quality Act were updated to better assess transportation-related environmental impacts of proposed development projects.

OPPOSITION: (Verified 8/8/22)

Association of California Cities - Orange County
Catalysts for Local Control
City of Newport Beach
Livable California

ARGUMENTS IN SUPPORT: According to the author, "we have seen firsthand the essential role affordable housing has played during the pandemic, providing shelter, support, and community to some of our state's most vulnerable groups—including seniors and veterans, teachers and firefighters, disabled persons and the far too many working families that cannot afford the rising cost of market rents. With a gap of 1.2 million homes affordable to low income households and roughly 150,000 people experiencing homelessness every day, the state must continue to strengthen policies that increase the number of affordable units being constructed. AB 2334 promotes housing construction by expanding the California's Density Bonus Law creating opportunities for 100% affordable housing developments to earn an enhanced density bonus in areas with low vehicle miles traveled."

ARGUMENTS IN OPPOSITION: The Association of California Cities - Orange County and the City of Newport Beach are opposed due to the loss of local control. Community groups are opposed to reductions in parking requirements and unrelated housing laws.

SUBJECT: Housing element: emergency shelters: regional housing need

SOURCE: California Rural Legal Assistance Foundation
Public Interest Law Project
Western Center on Law & Poverty

DIGEST: This bill makes changes to housing element law with regards to where shelters may be zoned, as specified.

Senate Floor Amendments of 8/25/22 provide clarity regarding calculations for site capacity for persons experiencing homelessness.

ANALYSIS:

Existing law:

1) Requires cities and counties to prepare and adopt a general plan, including a housing element, to guide the future growth of a community. The housing element shall consist of an identification and analysis of existing and projected housing needs and a statement of goals, policy objectives, financial resources,

and scheduled programs for the preservation, improvement, and development of housing.

2) Requires the housing element to contain an inventory of land suitable and available for residential development, including vacant sites and sites having realistic and demonstrated potential for redevelopment during the planning period to meet the locality's housing need for a designated income level.

3) Requires the housing element to contain a program that sets forth a schedule of actions during the planning period that will be taken to make sites available with appropriate zoning and development standards to accommodate that portion of the city's or county's share of the regional housing need for each income level that could not be accommodated on sites identified in the inventory of sites without rezoning.

4) Requires the housing element to contain the identification of a zone or zones where emergency shelters are allowed as a permitted use without a conditional use or discretionary permit. Shelters may be subject to development and management standards that apply to residential and commercial development within the same zone except that a local government may apply written, objective standards that include all of the following:

    a) The maximum number of beds or persons permitted to be served nightly by the facility.
    b) Off-street parking based upon demonstrated need, provided that the standards do not require more parking for emergency shelters than for other residential or commercial uses within the same zone.
    c) The size and location of exterior and interior onsite waiting and client intake areas.
    d) The provision of onsite management.
    e) The proximity to other emergency shelters, provided that emergency shelters are not required to be more than 300 feet apart.
    f) The length of stay.
    g) Lighting.
    h) Security during hours that the emergency shelter is in operation.

This bill:

1) Changes the requirements regarding identification of zones and sites for emergency shelters in housing elements, as follows:

a) Expands the definition of "emergency shelters" to include other interim interventions, including but not limited to, navigation centers, bridge housing, and respite or recuperative care;
b) Requires that zoning designations identified to allow emergency shelters ministerially must allow residential uses;
c) Requires the zoning designations that allow emergency shelters to have sufficient sites to accommodate the need for shelters;
d) Specifies that the zoning designations where emergency shelters are allowed must include sites that meet at least one of the following standards:

    i) Vacant sites zoned for residential use;
    ii) Vacant sites zoned for nonresidential use that allow residential development, if the local government can demonstrate how the sites with the is zoning designation are located near amenities and services that serve people experiencing homelessness, which may include health care, transportation, retail, employment, and social services, or that the local government will provide free transportation to services or offer services onsite; and
    iii) Nonvacant sites zoned for residential use or for nonresidential use that allow residential development that are suitable for use as a shelter in the current planning period or which can be redeveloped for use as a shelter in the current planning period. A nonvacant site with an existing use is presumed to impede emergency shelter development unless the local agency finds that the use is likely to be discontinued during the planning period, as specified.

e) Narrows the potential development and management standards that a local government can apply to emergency shelters to those written, objective standards already contained in existing law.
f) Authorizes a local government to accommodate the need for emergency shelters on sites owned by the local government if it demonstrates with substantial evidence that the sites will be made available for emergency shelter during the planning period, they are suitable for residential use, and the sites are located near amenities and services that serve people experiencing homelessness, which may include health care, transportation, retail, employment, and social services, or that the local government will provide free transportation to services or offer services onsite.

2) Amends the "no net loss" policy in housing element law to factor in sites that the local government rezoned in the current planning period because they failed to rezone them in the prior planning period.

Comments

1) *Inadequate housing and shelter for California's homeless*. Homelessness in California is no longer confined to urban corridors; it pervades both urban and rural communities across the state and puts stress on local resources, from emergency rooms to mental health and social services programs to jails. The homelessness crisis is driven in part by the lack of affordable rental housing for lower income people. In the current market, 2.2 million extremely low-income and very low-income renter households are competing for 664,000 affordable rental units. Of the 6 million renter households in the state, 1.7 million are paying more than 50% of their income towards rent. The National Low Income Housing Coalition estimates that the state needs an additional 1.5 million housing units affordable to very-low income Californians.

2) *Housing elements and approvals generally*. Every city and county in California is required to develop a general plan that outlines the community's vision of future development through a series of policy statements and goals. General plans are comprised of several elements that address various land use topics. Each community's general plan must include a housing element, which outlines a long-term plan for meeting the community's existing and projected housing needs. The housing element demonstrates how the community plans to accommodate its "fair share" of its region's housing needs. To do so, each community establishes an inventory of sites designated for new housing that is sufficient to accommodate its fair share. State law requires cities and counties to update their housing elements every five or eight years.

   Cities and counties enact zoning ordinances to implement their general plans. Zoning determines the type of housing that can be built. In addition, before building new housing, housing developers must obtain one or more permits from local planning departments and must also obtain approval from local planning commissions, city councils, or county board of supervisors. Some housing projects can be permitted by city or county planning staff ministerially or without further approval from elected officials. Projects reviewed ministerially, or by-right, require only an administrative review designed to ensure they are consistent with existing general plan and zoning rules, as well as meet standards for building quality, health, and safety. Most large housing

projects are not allowed ministerial review. Instead, these projects are vetted through both public hearings and administrative review. Most housing projects that require discretionary review and approval are subject to review under the California Environmental Quality Act (CEQA), while projects permitted ministerially generally are not.

3) *By-right for shelters in the housing element*. SB 2 (Cedillo, Chapter 633, Statues of 2007) required a local government, in its housing element, to accommodate its need for emergency shelters on sites by right, or ministerially and without a conditional use permit, and requires cities and counties to treat transitional and supportive housing projects as a residential use of property. Local governments must treat supportive housing the same as other multifamily residential housing for zoning purposes, and may only apply the same restrictions as multifamily housing in the same zone to supportive housing. Current law is silent as to where these shelters may be located, and as a result, local governments often identify shelters in industrial areas far from services designed to move people experiencing homelessness from the streets and into permanent housing. Additionally, current law does not require a local government to identify zones with sufficient capacity to accommodate emergency shelters. As a result, some emergency shelter zones are not actually capable of accommodating a shelter on any of the identified sites.

   This bill clarifies housing element law with regards to where by-right zones for emergency shelters may be identified. Current law is not clear as to the types of standards that a jurisdiction may apply to a shelter project in an identified by right zone. This bill makes it clear that a local government shall only be subject to those development and management standards that apply to residential or commercial development within the same zone, except that a local government may apply the specified objective standards. Additionally, this bill requires local governments to identify by-right shelters in zones that allow residential uses, including mixed-use. Lastly, this bill requires that an emergency shelter zone must include vacant sites or sites that are adequate for a shelter.

4) *No Net Loss.* As discussed above, housing element law requires local governments to plan to accommodate their share of the regional housing need. Throughout the housing element planning period, as housing gets developed, local governments must ensure that there is still capacity to accommodate their share of the regional housing need on sites that have not yet been developed. This requirement is referred to as "Not Net Loss" law. In housing element law, if the city or county failed to zone for its full share of regional housing in the

prior planning period, then within the first year of the planning period of the new housing element, the local government must rezone adequate sites to accommodate the amount it failed to zone for in the prior planning period. In housing element law, it is clear that this "carryover portion" that makes up for failure to rezone in the prior housing element is part of what HCD considers the city or county's share of the regional housing. No Net Loss law is ambiguous as to whether local governments need to account for the carryover portion when determining remaining capacity to accommodate growth. This bill rectifies this ambiguity by clearly aligning No Net Loss law with housing element law. Specifically, it requires that local governments must account for the carryover portion when calculating both the amount of housing they must plan for and the amount of capacity that must be available at any given time.

OPPOSITION: (Verified 8/25/22)

City of Thousand Oaks

ARGUMENTS IN SUPPORT: According to the author, "AB 2339 strengthens the requirements for the identification of sites for homeless shelters and ensures cities are properly rezoning for their fair share of housing. Every day, more people are falling into homelessness than we are able to house. Tackling this humanitarian crisis will take all cities doing their part in helping build emergency shelters and removing the barriers that have delayed the production of much needed housing."

ARGUMENTS IN OPPOSITION: The City of Thousand Oaks is opposed because locals should determine what areas are most suitable for emergency shelters in their housing element.

SUBJECT: Board of State and Community Corrections

SOURCE: North County Equity
Racial Justice Coalition
Racial Justice Coalition of San Diego
San Diego County Board of Supervisors
SEIU Local 221

DIGEST: This bill requires the Board of State and Community Corrections (BSCC) to develop standards for mental health care in local correctional facilities, beginning on July 1, 2023.

Senate Floor Amendments of 8/25/22 specify that safety checks of incarcerated persons be sufficiently detailed to determine the safety and well-being of the person but do not require staff to disturb or wake incarcerated persons during sleeping hours; remove the requirement that random audits of safety checks include no fewer than two safety checks from each prior shift; specify that review of video footage only occur if it is available; remove the requirement that a record

of audits be maintained and that management staff conduct monthly audits of supervisory audits; and remove the requirement that health care and mental health care providers employed by or regularly working in a county jail receive no fewer than 12 hours of continuing education annually that is related to correctional health care and mental health care.

ANALYSIS:

Existing law:

1) Establishes the BSCC. (Pen. Code, § 6024, subds. (a).)

2) Provides that the mission of the BSCC is to provide statewide leadership, coordination, and technical assistance to promote effective state and local efforts and partnerships in California's adult and juvenile criminal justice system, including addressing gang problems. Provides that this mission reflect the principle of aligning fiscal policy and correctional practices, including, but not limited to prevention, intervention, suppression, supervision, and incapacitation, to promote a justice investment strategy that fits each county and is consistent with the integrated statewide goal of improved public safety through cost-effective, promising, and evidence-based strategies for managing criminal justice populations. (Pen. Code, § 6024, subd. (b).)

3) Provides that as of July 1, 2013, the BSCC consists of 13 members, as specified. (Pen. Code, § 6025, subd. (b).)

4) Provides that it is the duty of the BSCC to collect and maintain available information and data about state and community corrections policies, practices, capacities, and needs. (Pen. Code, § 6027, subd. (a).)

5) Requires the BSCC to establish minimum standards for local correctional facilities. Requires the BSCC to review those standards biennially and make any appropriate revisions. (Pen. Code, § 6030, subd. (a).)

6) Requires that the minimum standards include, but not be limited to, health and sanitary conditions, fire and life safety, security, rehabilitation programs, recreation, treatment of persons confined in local correctional facilities, and personnel training. (Pen. Code, § 6030, subd. (b).)

7) Requires the BSCC to seek the advice of the State Department of Public Health, physicians, psychiatrists, local public health officials, and other interested person in establishing minimum standards related to health and sanitary conditions. (Pen. Code, § 6030, subd. (g)(1).)

8) Requires the BSCC to adopt minimum standards for the operation and maintenance of juvenile halls for the confinement of minors. (Welf. & Inst. Code, § 210.)

9) Requires the BSCC to inspect each local detention facility in the state biennially, at a minimum. (Pen. Code, § 6031, subd. (a).)

This bill:

1) Increases the number of members on the BSCC to add a licensed health care provider and a licensed mental health care provider, both to be appointed by the Governor, and subject to confirmation by the Senate Rules Committee. Provides that the 15-member board begin July 1, 2023.

2) Requires the board to develop and adopt regulations setting minimum standards for mental health care at local correctional facilities that meet or exceed the standards for health services in jails established by the National Commission on Correctional Health Care commencing July 1, 2023. Requires the minimum standards to include the following:

   a) Safety checks of incarcerated persons must be sufficiently detailed to determine that the inmate is alive.

   b) Correctional officers must be certified in cardiopulmonary resuscitation (CPR) and be required, when safe and appropriate to do so, to begin CPR on a nonresponsive person without obtaining approval from supervisors or medical staff.

   c) Jail supervisors are required to conduct random audits in a defined housing unit of no fewer than two safety checks from each prior shift. Requires a supervisory audit to include a review of logs and video footage to ensure that safety checks are properly performed. Requires a record of audits performed to be maintained in information management platforms. Requires management staff, at least monthly, conduct an audit of supervisory audits.

   d) In-service training of correctional officers requires no fewer than four hours of training on mental and behavioral health annually. Requires training requirements to be developed BSCC standards of training for corrections.

   e) Health care and mental health care providers employed by, or regularly working within, a county jail be required to receive no fewer than 12 hours of continuing education annually that is relevant to correctional health care and mental health care. Requires continuing education requirements to be

developed in conjunction with applicable licensing authorities for health care and mental health care providers.

f) Mental health screening or evaluation conducted at booking or intake must be conducted by a qualified mental health care professional, if available. Requires mental health screening or evaluation that is conducted by anybody other than a qualified mental health care professional to be reviewed by a qualified mental health care professional as soon as reasonably practicable.

g) Jail staff must review the medical and mental health history and the county electronic health record, if available, of any person booked or transferred into the jail to determine any history of mental health issues.

3) Defines a "qualified mental health care professional" to mean a physician, physician assistant, nurse, nurse practitioner, psychologist licensed by the Board of Psychology, registered psychologist, postdoctoral psychological assistant, postdoctoral psychology trainee, as defined, marriage and family therapist, associate marriage and family therapist, licensed clinical social worker, associate clinical social worker, licensed professional clinical counselor, associate professional clinical counselor, or other person who, by virtue of their credentials, is permitted by law to evaluate and care for patients, and who, by virtue of their credentialing, or in addition to their credentialing, has received instruction, training, or expertise in identifying and interacting with persons in need of mental health services.

4) Includes uncodified legislative findings and declarations.

Background

The BSCC was established in 2012 and is responsible for providing statewide leadership, coordination, and technical assistance to promote effective state and local efforts and partnerships in California's adult and juvenile justice systems. The BSCC has four primary responsibilities: setting standards for and inspecting local detention facilities; setting standards for the selection and training of local correctional staff; administering various grant programs related to recidivism and reduction strategies; and administering the state's construction financing program for local detention facilities. The 2021-2022 Budget provides the BSCC with $617 million ($349 million General Fund) to carry out those responsibilities. (<https://www.ebudget.ca.gov/budget/publication/#/e/2021-22/ExpendituresPosistions/5227)

Current law requires the BSCC to maintain minimum standards for the construction and operation of local detention facilities inspect each local detention facility biennially to assess compliance with BSCC standards, and prepare, distribute, and publish inspection reports. Notably, although the BSCC is required to inspect local detention facilities to determine compliance with the standards and to report noncompliance, the BSCC is not authorized under state law to enforce the standards (e.g., by fining a local detention facility).

The BSCC's standards and inspection program is one of the primary ways that the state exercises oversight of local detention facilities. Growing concerns over conditions inside of the state's local detention facilities, including isolation of mentally ill inmates, violence, suicide, use of force, and lack of transparency have led to the introduction of a number of bills in recent years aimed at increasing transparency and accountability as they relate to county jails. In early 2020, Governor Newsom directed the BSCC to strengthen the state's oversight of county jails, and the BSCC has since developed an enhanced jail inspection process, which began in 2021. (<https://www.bscc.ca.gov/wp-content/uploads/Info-Item-6-Targeted-Inspections-FINAL.pdf)

State Auditor's Report

This bill was introduced in response to a State Auditor report published this year on in-custody deaths of incarcerated individuals under the care and custody of the San Diego County Sheriff's Department. (State Auditor, *San Diego County Sheriff's Department It Has Failed to Adequately Prevent and Respond to the Deaths of Individuals in Its Custody* (February 3, 2022), Report 2021-109 <http://auditor.ca.gov/pdfs/reports/2021-109.pdf [as of Jun. 22, 2022].) Between 2006 and 2020, 185 people died in San Diego County's jails—one of the highest totals among counties in the state. Due to the high number of in-custody deaths, the Joint Legislative Audit Committee requested an audit of the San Diego County Sheriff's Department. The report noted:

> Significant deficiencies in the Sheriff's Department's provision of care to incarcerated individuals likely contributed to the deaths in its jails. For example, studies on health care at correctional facilities have demonstrated that identifying individuals' medical and mental health needs at intake—the initial screening process—is critical to ensuring their safety in custody. Nonetheless, our review of 30 individuals' deaths from 2006 through 2020 found that some of these individuals had serious medical or mental health needs that the Sheriff's Department's health staff did not identify during the intake process.
>
> (*Id*. at p. 1.)

The audit additionally revealed several instances of individuals who requested or required medical and mental health care and did not receive it at all or in a timely manner. (*Id*. at p. 2.) For example, one individual requested mental health services shortly after entering the jail. However, the intake nurse did not identify any significant mental health issues and determined that the individual did not qualify for an immediate appointment. The individual committed suicide two days later.

The audit also found that deputies performed inadequate safety checks to ensure the well-being of incarcerated persons. (*Ibid*.) State law requires hourly checks through direct visual observation, which is the department's most consistent means of monitoring for medical distress and criminal activity. The audit further found that some of deficiencies of the Sheriff's Department are the result of statewide corrections standards that are insufficient for maintaining the safety of incarcerated individuals. (*Id*. at pp. 2-3.) For example, regulations established by the BSCC do not explicitly require that mental health professionals perform the mental health screenings during the intake process and do not describe the actions that constitute an adequate safety check.

The Auditor's report concluded with several key recommendations, including that the BSCC should require mental health evaluations to be performed by mental health professionals at intake, and that it should clarify and improve procedures for safety checks. (*Id*. at p. 56.) This bill requires the BSCC to develop and adopt regulations setting minimum standards for mental health care at local correctional facilities, including mental health screenings by a qualified mental health professional at intake, and sufficiently detailed regulations on safety checks.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown, potentially reimbursable costs, possibly in the millions of dollars, for counties to provide a higher level of mental health care to inmates in county jail (General Fund). Actual General Fund costs will depend on whether the duties imposed by this bill are considered a reimbursable state mandate by the Commission on State Mandates. The BSCC reported no costs to expand its board membership and develop/adopt regulations that meet or exceed national standards.

OPPOSITION: (Verified 8/25/22)

California State Sheriffs' Association

ARGUMENT IN SUPPORT: The San Diego County Board of Supervisors, one of this bill's sponsors, writes:

> The BSCC provides statewide leadership, coordination, and technical assistance to county jails and establishes standards for county jails and correctional officers. AB 2343 would require the BSCC to develop and adopt standards of care for incarcerated persons with mental health issues in county jails, including requirements for training of correctional staff, requirements for mental health screening, and requirements for safety checks of at-risk incarcerated persons.
>
> At the direction of the California State Joint Legislative Audit Committee, the Auditor of the State of California ('State Auditor) conducted an audit of the San Diego County Sheriff's Department ('Sheriff's Department') to determine the reasons for the high number of in-custody deaths. The State Auditor issued a report in February 2022 that raised concerns about systemic issues with the Sheriff's Department's policies and practices related to its provision of medical and mental health care and its performance of visual checks to ensure the safety and health of individuals in its custody.
>
> To address the State Auditor's report, the San Diego County Board of Supervisors unanimously approved recommendations to sponsor state legislative action to ensure that the Sheriff's Department implements changes in accordance with the State Auditor's recommendations.

ARGUMENT IN OPPOSITION: According to the California State Sheriffs' Association:

> Historically, we have had concerns with growing the size of the BSCC. We feel this board has an appropriate current composition and worry that adding to it, notwithstanding the importance of the delivery of medical and mental

health care services to incarcerated persons, will dilute the operational efficacy of the body.

Further, while the BSCC is the appropriate venue for setting minimum standards for detention facilities, AB 2343 goes too far by installing specific standards and requirements in statute. BSCC board members, practitioners, and other stakeholders participate in a near-constant revision of Title 15 standards for both adult and juvenile incarcerated populations. This process generally results in well-negotiated and achievable standards that are subject to the scrutiny and review of experts and those who will be asked to implement and abide by them. Statutorily setting these standards interferes in this process and will preclude the BSCC and those it oversees from being nimble when changes are necessary.

Finally, several of the changes required by this bill will likely result in costly mandates and the need for more staff but fails to provide for any funding to accomplish what the bill seeks.

SUBJECT: Wildlife connectivity: transportation projects

SOURCE: Center for Biological Diversity
Wildlands Network

DIGEST: This bill requires that the State Department of Transportation (Caltrans), in consultation with the California Department of Fish and Wildlife (CDFW), develop and prioritize an inventory of projects to address wildlife connectivity needs, and establishes the Transportation Wildlife Connectivity Remediation Program to improve wildlife connectivity across transportation systems, as provided, among other things.

Senate Floor Amendments of 8/24/22 rearrange elements of, and expand upon or provide more explicit requirements to the proposed collaboration and coordination between Caltrans and CDFW for wildlife connectivity projects; add additional

evaluation criteria; provide for the use of compensatory mitigation credits; remove the wildlife connectivity action plan; add the Transportation Wildlife Connectivity Remediation Program; require Caltrans to update the Highway Design Manual for wildlife passage features; consolidate legislative reporting into one report; and delay certain bill deadlines, among other things.

ANALYSIS:

Existing law:

1) Provides for the establishment of the Department of Fish and Wildlife (CDFW), and vests CDFW with jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species.

2) Requires CDFW to investigate, study, and identify those areas in the state that are most essential as wildlife corridors and habitat linkages, as well as the impacts to those wildlife corridors from climate change, as provided.

3) Authorizes CDFW to approve compensatory mitigation credits for wildlife connectivity actions taken under specified programs.

4) Provides that the State Department of Transportation (Caltrans) has full possession and control of the state highway system, and requires Caltrans to make improvements to and maintain the state highway system.

This bill requires that Caltrans, in consultation with CDFW, develop and prioritize an inventory of projects to address wildlife connectivity needs, and establishes the Transportation Wildlife Connectivity Remediation Program to improve wildlife connectivity across transportation systems, as provided, among other things. Specifically, this bill:

1) Requires Caltrans, in consultation with CDFW and others, to establish an inventory of connectivity needs on the state highway system where the implementation of wildlife passage features could reduce wildlife-vehicle collisions or enhance wildlife connectivity.
   a) Provides factors to consider in developing the inventory, such as adding climate-resiliency, among others.
   b) Requires Caltrans no later than July 1, 2024, to develop and publish online the inventory and a list of funded transportation projects with wildlife passages features that address wildlife connectivity needs. Requires Caltrans to update the project list and inventory at least biennially.

2) Requires Caltrans for any project on the state highway systems located in a connectivity area beginning the project initiation phase on or after July 1, 2025 to perform an assessment, in consultation with CDFW, before commencing project design and through the development and implementation of the project to identify potential wildlife connectivity barriers and any needs for improved permeability subject to certain exclusions, as provided.
   a) Requires Caltrans to consider factors affecting wildlife connectivity that provide scalable solutions for all defined species needs, as provided.
   b) Authorizes the assessment to incorporate relevant guidelines and standards, as specified.
   c) Requires Caltrans to submit the assessment to CDFW. Requires the implementing agency to remediate barriers to wildlife connectivity in conjunction with the project, as provided.
   d) Requires Caltrans to publish online a list of all transportation projects that require remediation and information regarding whether wildlife passage features are include in those projects or mitigation credits are applied, as specified. Requires Caltrans to update the project list at least biennially.

3) Authorizes Caltrans to use or receive compensatory mitigation credits, as provided.

4) Establishes the Transportation Wildlife Connectivity Remediation Program (program) at Caltrans, in consultation with CDFW, for the purposes of improving wildlife connectivity across transportation systems, as provided.
   a) Requires Caltrans, upon appropriation of funds, to develop a program of projects that support the remediation and improvement of wildlife connectivity, as specified.
   b) Requires Caltrans, in concurrence with CDFW, to develop guidelines for the implementation of the program, as provided. Requires program guidelines to establish selection criteria for funding wildlife connectivity improvements, as provided.

5) Requires Caltrans on or before July 1, 2025 to update appropriate design guidance, including the Highway Design Manual to incorporate design concepts for wildlife passage features, as provided.

6) Requires Caltrans on or before July 1, 2028 to submit a report to the Legislature regarding the implementation of this bill, as specified, including recommendations, and a list of significant accomplishments or obstacles to meeting wildlife connectivity goals, as provided. Sunsets the reporting requirement on July 1, 2032.

7) Establishes state policy and state legislative intent related to wildlife connectivity. Makes extensive relevant legislative findings and declarations, and defines various relevant terms.

Comments

A comment on letters. Letters in support and opposition to an earlier version of this bill are included as the Senate Floor amendments revise and build upon the content of the earlier version.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee for a previous bill version:

- Caltrans estimates ongoing costs in the low hundreds of millions of dollars annually (various funds) to develop the action plan and project list, and to enable Caltrans to implement at least 10 projects annually and fulfill the other requirements of this bill. Actual costs would depend, among other factors, on the size and scope of individual projects and on the needs of particular wildlife.

- CDFW estimates ongoing costs of $2.2 million in 2022-23, $5.5 million in 2023-24, and $4.3 million annually thereafter (General Fund) for permitting and wildlife staff in each region to participate with Caltrans on connectivity project proposals, assessments, and research, as well as headquarters and management staff to oversee and coordinate these activities at the state level.

OPPOSITION: (Verified 8/25/22)

Riverside County Transportation Commission

ARGUMENTS IN SUPPORT: According to the author, "The lack of wildlife connectivity on California's highway system poses a major threat, not only to drivers and passengers, but to the imperiled species that contribute to the state's rich biodiversity. In 2018, reported wildlife-vehicle collisions resulted in 314 injuries and an estimated five deaths. Many more crashes with wildlife are believed to go unreported. Wildlife-vehicle collisions also take an economic toll. The reported collisions in 2018 alone resulted in more than $230 million in economic and social costs. Wildlife crossings have been shown to reduce wildlife vehicle collisions by up to 98% and facilitate wildlife movement. AB 2344 requires

Caltrans and the California Department of Fish & Wildlife to identify areas with high rates of wildlife-vehicle collisions and implement priority projects that improve connectivity with passage features like overpasses, underpasses and directional fencing. These projects will make roads and highways much safer while giving mountain lions, desert tortoises, California tiger salamanders and other iconic species of California a chance at survival."

ARGUMENTS IN OPPOSITION: The Riverside County Transportation Commission, also writing in opposition, expresses concern about ensuring the development of the wildlife connectivity action plan does not result in duplicative assessment efforts where planning efforts protective of wildlife – for example, natural community conservation plans, have already been undertaken.

The opponent requested amendments, and it is unknown if Senate Floor amendments addressed their concerns.

SUBJECT: Prescription drug coverage

SOURCE: California Chronic Care Coalition

DIGEST: This bill requires certain health plans and insurers to furnish prescription drug information in specified electronic formats, as prescribed, upon request of an enrollee/insured or their prescribing provider.

Senate Floor Amendments of 8/24/22 delay implementation to contracts issued, amended, renewed, or delivered after July 1, 2023, and, clarify that cost-sharing information is provided based on any variance with the enrollee's or insured's preferred dispensing pharmacy

ANALYSIS:

Existing law:

1) Establishes the Department of Managed Health Care (DMHC) to regulate health plans under the Knox-Keene Health Care Service Plan Act of 1975

(Knox-Keene Act) and the California Department of Insurance (CDI) to regulate health insurance. [HSC §1340, et seq., and INS §106, et seq.]

2) Establishes as California's essential health benefits (EHBs) benchmark the Kaiser Small Group Health Maintenance Organization, existing California mandates, and ten Affordable Care Act (ACA) mandated benefits, including prescription drugs. Requires nongrandfathered individual and small group plan contracts and insurance policies to cover EHBs. [HSC §1367.005 and INS §10112.27]

3) Requires every health plan that provides prescription drug benefits and maintains one or more drug formularies to provide to members of the public, upon request, a copy of the most current list of prescription drugs on the formulary of the plan by major therapeutic category, with an indication of whether any drugs on the list are preferred over other listed drugs. Requires, if the plan maintains more than one formulary, to notify the requester that a choice of formulary lists is available. [HSC§1367.20]

4) Requires a health plan, in addition to 3) above, and a health insurer that provides prescription drug benefits and maintains one or more drug formularies to post the formulary or formularies for each product offered on the plan's website in a manner that is accessible and searchable by potential enrollees, enrollees/insureds, providers, the general public, DMHC, CDI and federal agencies as required by federal law or regulations; update the formularies on a monthly basis; and, use a DMHC and CDI template to display the formulary or formularies for each product offered by the plan. [HSC §1367.205 and INS §10123.192]

5) Requires a pharmacy to inform a customer at the point of sale for a covered prescription drug whether the retail price is lower than the applicable cost-sharing amount for the prescription drug, unless the pharmacy automatically charges the customer the lower price. [BPC § 4079]

6) Establishes the Confidentiality of Medical Information Act (CMIA), which prohibits a health care provider, health care service plan, or contractor from disclosing medical information regarding a patient without first obtaining authorization. [CIV §56, et. seq.]

7) Establishes, under federal law, the Health Insurance Portability and Accountability Act of 1996 (HIPAA), which among various provisions, mandates industry-wide standards for health care information on electronic billing and other processes; and, requires the protection and confidential

handling of protected health information. [42 U.S.C. §300gg, 29 U.S.C. §1181, et seq., and 42 U.S.C. §1320d, et seq.]

This bill:

1) Requires a health plan contracts or health insurance policies issued, amended, delivered, or renewed on or after July 1, 2023, that provides prescription drug benefits and maintains one or more drug formularies to do all of the following:

   a) Upon request of an enrollee/insured or an enrollee's/insured's prescribing provider, furnish all of the following information regarding a prescription drug to the enrollee/insured or the enrollee's/insured's health care provider:

      i) The enrollee's/insured's eligibility for the prescription drug;

      ii) The most current formulary or formularies;

      iii) Cost-sharing information for the prescription drug and other formulary alternatives, consistent with cost-sharing requirements as set forth in the contract and accurate at the time it is provided, including any variance in cost sharing based on the patient's preferred dispensing pharmacy, whether retail or mail order, or the health care provider; and,

      iv) Applicable utilization management requirements for the prescription drug and other formulary alternatives.

   b) Respond in real time to a request made through a "Standard Application Programming Interface (API)," as defined;

   c) Allow the use of an interoperability element to provide the required information;

   d) Ensure that the information provided is current no later than one business day after a change is made and is provided in real time; and,

   e) Provide the information if the request is made using the drug's unique billing code and National Drug Code.

2) Prohibits a health plan or insurer from doing any of the following:

   a) Denying or delaying a response to a request for the purpose of blocking the release of the information;

b) Restricting, prohibiting, or otherwise hindering a prescribing provider from communicating or sharing information to an enrollee, including additional information on any lower cost or clinically appropriate alternative drugs, whether or not they are covered under the enrollee's health plan contract or insured's health insurance policy, and, information about the cash price of the drug;

c) Except as required by law, interfering with, preventing, or materially discouraging access, exchange, or use of the information in 1) above, which includes charging fees for access to the information, not responding to a request at the time made consistent with this bill, or instituting enrollee/insured consent requirements;

d) Penalizing a prescribing provider for disclosing the information, which includes an action intended to punish a provider for disclosing the information set forth in this bill or intended to discourage a provider from disclosing this information in the future; and,

e) Penalizing a prescribing provider for prescribing, administering, or ordering a lower cost or clinically appropriate alternative drug, which includes an action intended to punish a provider who has prescribed, administered, or ordered a lower cost or clinically appropriate alternative drug, or intended to discourage a provider from prescribing, administering, or ordering a lower cost or clinically appropriate alternative drug in the future.

3) Establishes the following definitions:

a) "Cost-sharing information" is the actual out-of-pocket amount an enrollee or insured would be required to pay a dispensing pharmacy or prescribing provider for a prescription drug under the terms of the enrollee's contract or insured's policy;

b) "Interoperability element" means integrated technologies or services necessary to provide a response to an enrollee/insured or an enrollee's/insured's prescribing provider;

c) "Prescribing provider" is a health care provider authorized to write a prescription to treat a medical condition including prescriptions to treat mental health and substance use disorders, for a health plan enrollee or insured; and,

d) "Standard API" means an application interface that is standardized for vendors to conform to in order to access the information, pursuant to federal regualtions.

4) Prohibits this bill from being construed to authorize further disclosure inconsistent with HIPAA and CMIA.

Comments

According to the author, the reason for this bill is quite simple. Information about prescription drugs will help consumers make better-informed choices about their costs and will certainly allow pharmacy benefit managers (PBM) to have a better handle on how they negotiate prices, which hopefully should increase options for consumers and reduce the cost of prescription drugs.

21st Century Cures Act and related rules. The 21st Century Cures Act (Cures Act) was signed into law on December 13, 2016, and was designed to help accelerate medical product development and bring new innovations and advances to patients who need them faster and more efficiently. While there were a number of provisions in this law, the sections on payer capability related to interoperability, provider directories, and patient access are relevant to this bill. On March 9, 2020, final rules were published implementing the Cures Act. The Interoperability and Patient Access Final Rule is "focused on driving interoperability and patient access to health information by liberating patient data" using the regulatory authority of the Centers for Medicare and Medicaid Services (CMS) over Medicare Advantage, Medicaid managed care plans, and Exchange plans under the ACA. The requirements of this bill apply more broadly than the federal rule to also include health plan and health insurance products that are not subject to these CMS requirements. This rule required CMS-regulated payers to implement and maintain a secure, standards-based API that allows patients to easily access their claims and encounter information, including cost, as well as a defined subset of their clinical information through third-party applications of their choice. Drug formulary data is included in the patient access requirements. The rule also requires CMS-regulated payers to make provider directory information publicly available via a standards-based API, and implement a process for a payer-to-payer clinical data exchange to allow patients to take their information with them as they move from payer to payer over time to help create a cumulative health record.

API. According to IBM's website, APIs simplify software development and innovation by enabling applications to exchange data and functionality easily and securely. An API is a set of defined rules that explain how computers or applications communicate with one another. APIs sit between an application and

the web server, acting as an intermediary layer that processes data transfer between the systems. An API enables companies to open up their applications' data and functionality to external third-party developers and business partners to allow services and products to communicate with each other and leverage each other's data and functionality through a documented interface. Pursuant to federal regulations described in 2) directly above the API standards and associated implementation specifications as adopted by the Secretary of the federal Department of Health and Human Services under §170.215 are as follows:

1) Standard. HL7® Fast Healthcare Interoperability Resources (FHIR ®) Release 4.0.1. Implementation specification. HL7 FHIR® US Core Implementation Guide STU 3.1.1.

2) Implementation specification. HL7 SMART Application Launch Framework. Implementation Guide Release 1.0.0, including mandatory support for the "SMART Core Capabilities."

3) Implementation specification. FHIR Bulk Data Access (Flat FHIR) (v1.0.0: STU 1), including mandatory support for the "group-export" "OperationDefinition."

4) Standard. OpenID Connect Core 1.0, incorporating errata set 1.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- DMHC estimates the total costs for state resources to be approximately $526,000 in 2022-23, $418,000 in 2023-24, and $319,000 annually thereafter (Managed Care Fund).

- CDI estimates no fiscal impact.

OPPOSITION: (Verified 8/11/22)

America's Health Insurance Plans
Association of California Life and Health Insurance Companies
California Association of Health Plans
Department of Finance

ARGUMENTS IN SUPPORT: This bill's sponsor, the California Chronic Care Coalition writes this bill will make prescription drug cost information available at the point-of-care, preventing delays in care and medication non-adherence for the patient while reducing administrative burden on providers. This bill will improve access to quality, affordable health care for people with chronic conditions and diseases. Patients make decisions about their healthcare based on what they can afford. Yet oftentimes, this information is not available until after they reach the pharmacy counter, where they may realize the treatment is unaffordable and may abandon the medication altogether. Delays in care not only worsen the patient's state of health, but also lead to increased utilization of more costly healthcare services thereafter. This is a system that does not work for patients or healthcare providers, who are then burdened with added administrative responsibilities. At a time when families are struggling financially due to the impact of the COVID-19 pandemic, it is critical to adopt practical changes that improve affordability by freeing up existing drug cost data for patients while reducing strain on pharmacists and physicians. This bill moves prescription drug cost and coverage information

upstream to physicians' offices into workflow at the time of prescribing. Physicians are then able to have meaningful conversations with their patients about affording their treatment plan or other appropriate alternatives. This bill enables decision-making to occur where it should, between a patient and their physician. Patients would be central, active stakeholders in their own health and would be more likely to stick with their treatment plan. This bill is both critical and timely, it will ameliorate time-consuming and frustrating processes that weigh on patients and providers, and improve access to quality care for people with chronic disease.

ARGUMENTS IN OPPOSITION: The California Association of Health Plans, the Association of California Life and Health Insurance Companies, and America's Health Insurance Plans write that they are not opposed to the idea of providing useful information to consumers, especially as it relates to assisting them in making important decisions about which prescription drugs would be the most efficacious and cost effective. Consumers should be empowered with the information they need to make smart decisions about their health care. Many of their members currently provide much of the information required under this bill to providers in their network. In addition to technical workability issues that need to be ironed out, this bill currently suffers from a lack any shared responsibility. There is no requirement for providers to actually access or go over the specified information with their patients at the initial point of contact. Health plans and insurers would thus be required to expend the effort of making the information available without any corresponding requirement for providers to utilize or share the material. If it is not mandatory for providers to use these costly information systems, then the purpose of this bill is unclear at best. These opponents also have questions about whether out-of-network providers should have access to the same information and resources as those providers that agree to participate in plan networks. Given the importance of keeping health care affordable, it is more important than ever to ensure that we are putting our health care premium dollars toward programs that will best serve our enrollees and insureds. If the Legislature determines that accessing this information during a patient's visit is critical to the patient's experience, then providers should be required to utilize the system and include the information in their patient consult.

SUBJECT: Domestic Violence Prevention Act: attorney's fees and costs

SOURCE: Family Violence Appellate Project

DIGEST: This bill modifies the fee-shifting statute under the Domestic Violence Prevention Act (DVPA) to require a court to award attorney fees and costs to a prevailing protected party and permit a court to award attorney fees and costs to a prevailing party who was sought to be restrained if the court finds the petition was brought in bad faith.

Senate Floor Amendments of 8/17/22 add a co-author to the bill and clarify that a court award of attorney fees and costs may be made after a request from a party, rather than as a matter of course.

ANALYSIS:

Existing law:

1) Establishes the DVPA (Fam. Code, §§ 6200 et seq.) which sets forth procedural and substantive requirements for the issuance of a protective order to, among other things, enjoin specific acts of abuse or prohibit the abuser from coming within a specified distance of the abused person. (Fam. Code, §§ 6218, 6300 et seq.)

2) Permits a court to issue a short-term, ex parte domestic violence protective order enjoining a party from, among other things, molesting, attacking, striking, stalking, threatening, sexually assaulting, battering, credibly impersonating, falsely personating, harassing, telephoning, destroying personal property, contacting, coming within a specified distance of, or disturbing the peace of the other party, and, in the discretion of the court, on a showing of good cause, of other named family or household members. (Fam. Code§§ 6320 et seq.)

3) Permits a court, after notice and a hearing, to issue any domestic violence restraining order that could be issued ex parte. The order can last up to five years, at which point it can be renewed for successive five-year terms or permanently. (Fam. Code, § 6340.)

4) Permits a court, after a noticed hearing pursuant to 3), to issue an award for the payment of attorney fees and costs to the prevailing party. (Fam. Code, § 6344(a).)

5) Provides that, where the petitioner is the prevailing party and cannot afford to pay for attorney fees and costs, the court shall, if appropriate based on the parties' abilities to pay, order that the respondent pay the petitioner's attorney fees and costs for commencing and maintaining the proceeding. This determination shall be based on:

   a) The respective incomes and needs of the parties; and

   b) Any factors affecting the parties' respective abilities to pay. (Fam. Code, § 6344(b).)

6) Requires, if a court orders a party to pay attorney fees or costs under the Family Code, the court shall first determine that the party is or is reasonably likely to have the ability to pay. (Fam. Code, § 270.)

This bill:

1) Repeals the existing attorney fee statute set forth in Family Code Section 6344.

2) Adds a new Family Code Section 6344, which provides:

   a) After notice and a hearing, a court, upon request, shall issue an order for the payment of attorney fees and costs for the prevailing petitioner.

   b) After a notice and hearing, the court, upon request, may issue an order for the payment of attorney fees and costs for the prevailing respondent only if

the respondent establishes by a preponderance of the evidence that the petition or request is frivolous or solely intended to abuse, intimidate, or cause unnecessary delay.

3) Provides that a court cannot issue an order for attorney fees and costs under 2)a) or b) unless it first determines that the party ordered to pay has, or is reasonably likely to have, the ability to pay.

ARGUMENTS IN SUPPORT: According to this bill's sponsor, the Family Violence Appellate Project:

> AB 2369 would help to promote these legislative policies that are not currently being realized; and would reduce the chilling effect under the current law, which has led survivors [of domestic violence] having to pay the other side's fees, even if the court finds abuse has occurred, just because the survivor could not overcome some evidentiary or procedural barriers to fully present their case.
>
> As an example of how the current law could play out against survivors, say a survivor is of moderate income and can afford to pay for their own attorney—not all that common, but it happens—or, perhaps more commonly, say a survivor is of low or no income and they somehow are able to scrounge up enough to pay for an attorney. If they win and get a restraining order, under

Family Code section 6344 as currently written…the court could still refuse to give them attorney's fees simply because the statute gives them that discretion, for almost any reason. And, in fact…some courts interpret to mean the court should always consider the survivor's needs and ability to pay, and will deny them attorney's fees on that basis, even if they win.

With the current law, then, the court could say, for instance, that the survivor could afford to pay for their attorney on their own, because they had in fact already retained the attorney. In these situations, survivors essentially mist fund their own abuse. If passed, AB 2369 would change the outcome. In this kind of scenario, AB 2369 would require the court to order the respondent to pay for the survivor's attorney's fees, after taking into consideration the respondent's ability to pay.

SUBJECT: Light pollution control

SOURCE: Santa Clara Audubon Society

DIGEST: Requires state agencies, with certain exceptions, to ensure that outdoor lighting fixtures installed or replaced on or after January 1, 2023, on a structure or land that is owned, leased, or managed by the state agency is shielded, as defined, and meets additional minimal illuminance criteria, as specified.

Senate Floor Amendments of 8/22/22 add additional definitions for "correlated color temperature" and "light trespass," as specified; clarify the definition of "shielded;" expand exceptions to the shielded requirement; and, add legislative findings and declarations, as specified.

ANALYSIS:

Existing law:

1) Establishes the California Building Standards Commission, within the Department of General Services (DGS), and tasks it with approval and adoption of building standards and codification of those standards into the California Building Standards Code.

2) Requires the State Energy Resources Conservation and Development Commission to adopt, among other regulations, lighting and other building design and construction standards that increase efficiency in the use of energy for new residential and nonresidential buildings to reduce the wasteful, uneconomic, inefficient, or unnecessary consumption of energy, including energy associated with the use of water, and to manage energy loads to help maintain electrical grid reliability.

3) Defines "state agency" to include every state office, officer, department, division, bureau, board, and commission. State agency does not include the California State University unless explicitly provided for.

This bill:

1) Requires state agencies to ensure that an outdoor lighting fixture that is installed or replaced on or after January 1, 2023, on a structure or land that is owned, leased, or managed by the state agency is shielded and meets all of the following criteria:

    a) Uses a lamp with a correlated color temperature that does not exceed 2700 Kelvin.
    b) Uses the minimal illuminance required for the intended purpose of the outdoor lighting fixture, with consideration to recognized building and safety standards, including, but not limited to, recommended practices adopted by the Illuminating Engineering Society.
    c) Is either dimmable to no more than 50% of its maximum possible brightness, is extinguishable by an automatic or manual shutoff device, or is motion-activated with a duration fewer than 15 minutes, as specified.

2) Makes the following circumstances exempt from the above requirements:

    a) A federal law or regulation that preempts state law.

b) A local municipal or county ordinance that more stringently control light trespass or glare or conserve the natural night sky.
c) The outdoor lighting fixtures are advertisement signs or other fixtures on interstate highways or federal primary highways.

3) Exempts the following situations from the bill for the purposes of a compelling safety interest or if an existing legal requirement requires such lighting:

a) Navigational lighting for aircraft safety.
b) Outdoor lighting needed for the safe navigation of watercraft, including, but not limited to, lighthouses and outdoor lighting in marinas.
c) Outdoor lighting fixtures necessary for worker health and safety or public health and safety, as specified.
d) Lighting that is used by law enforcement officers, firefighters, medical personnel, or correctional personnel, as specified.
e) Lighting intended for tunnels and roadway underpasses.
f) Outdoor lighting used for programs, projects, or improvements of a state agency relating to construction, reconstruction, improvement, or maintenance of a street, highway, or state building, structure, or facility.
g) Outdoor lighting on historic sites or structures, to the extent necessary to preserve the historic appearance.
h) Lighting sources of less than 1,000 lumens, including, but not limited to, seasonal and decorative lighting.
i) Other circumstances where a significant interest exists to protect safety or state property that cannot be feasibly addressed by another method, including, but not limited to, lighting needed to discourage vandalism of state agency buildings, structures, and facilities.

4) Requires a state agency, if an exemption applies, to make reasonable efforts to install fixtures and employ light management practices that conserve energy, minimize light trespass, and preserve the dark sky while still fully meeting the purposes and requirements of the light fixtures.

5) Defines “correlated color temperature” to mean the temperature, measured in Kelvin, of a radiating black body that presents the same apparent color to the human eye as the light source.

6) Defines “light trespass” to mean light emitted by an outdoor lighting fixture that shines beyond the boundary of the property on which the fixture is located.

7) Defines "outdoor lighting fixture" to mean an outdoor artificial illuminating device or luminaire, whether permanent or portable, including, but not limited to, artificial illuminating devices installed on a building or structure and used for illumination or advertisement, including, but not limited to, searchlights, spotlights, and floodlights, used for architectural lighting, parking lot lighting, landscape lighting, billboards, or street lighting. "Outdoor lighting fixture" does not include artificial illuminating devices that are worn or held in the hand, including flashlights, lanterns, and headlamps.

8) Defines "shielded" to mean all of the light rays emitted by an outdoor lighting fixture in its installed position, either directly from the lamp or indirectly from the fixture, are projected below a horizontal plane running through the lowest point on the fixture where the light is emitted and effectively obscures visibility of the lamp.

9) Includes legislative findings and declarations related to lighting fixtures and light pollution, as specified.

Comments

Purpose of the Bill. According to the author's office, "increased light pollution throughout California and globally is disrupting the circadian rhythms and migratory patterns of animals, which is harming our ecosystems. According to the National Audubon Society, 80% of birds that migrate do so at night using the dark skies to help them navigate to and from their breeding grounds. In addition to disrupting circadian rhythms, excessive artificial light at night (ALAN) can also disorient birds, which can result in fatal collisions. To address this issue, AB 2382 will require outdoor lighting fixtures on state buildings and structures to have an external shield to direct light to where it is needed or be equipped with a shutoff device. This sensible reform promotes safety for migratory birds, ecosystems, and people."

Light Pollution. Light pollution, also known as ALAN, is caused by increasingly large urban areas and the excessive and inefficient use of lights. Light pollution is characterized by sky glow (brighter sky in urban areas), light trespass (shining of lights in unneeded or unwanted areas), and glare (brightness resulting in visual discomfort).

Light pollution can directly impact human health by interfering with natural circadian rhythms caused by a decrease in the amount of melatonin produced in the body. Sleep disorders, depression, cancer, and other adverse health conditions have been linked to circadian disruption. Studies have demonstrated that light

pollution can also alter the behavior of wildlife, often resulting in the death or decline of species such as turtles, birds, fish, reptiles, and other wildlife.

Other States. Nineteen states, the District of Columbia, and Puerto Rico have enacted laws to reduce light pollution. "Dark skies" laws typically require outdoor lighting fixtures to be shielded so that light is emitted downwards only, to use low-glare or low-wattage lightbulbs, or to be restricted during certain hours.

California Green Building Standards Code. In 2007, the Building Standards Commission developed green building standards for non-residential structures and any other buildings or structures that are not under the jurisdiction of another state agency. The California Green Building Standards Code (CALGreen) currently imposes specific light pollution reduction standards for non-residential buildings. Outdoor lighting systems must be designed and installed to prevent light escaping in unwanted or unnecessary directions from an outdoor light fixture. CALGreen specifies that if a local ordinance is more stringent than the CALGreen requirements, the building owner must comply with the local ordinance. CalGreen currently exempts a variety of light fixtures, including but limited to those used for aviation; landscaping; temporary use outdoors; sports and athletic fields, and children's playgrounds; tunnels, bridges, stairs, and ramps; and lighting for industrial sites. CALGreen also exempts emergency lighting; building façade meeting specified requirements; and some custom lighting features.

This bill requires state agencies to ensure that outdoor lighting fixtures installed or replaced on or after January 1, 2023, on a structure or land that is owned, leased, or managed by the state agency is shielded, as defined, and meets additional minimal illuminance criteria. The bill includes a number of exemptions from the requirement including when federal law or regulation preempts state law, a local ordinance establishes more stringent requirements, or the outdoor lighting fixtures are advertisement signs or other fixtures on interstate highways or federal primary highways.

Additionally, the bill exempts situations where a compelling safety interest or existing legal requirement requires such lighting, including any of the following: navigational lighting for aircraft safety; outdoor lighting needed for the navigation of watercraft; fixtures necessary for worker health and safety or public health and safety; for use by law enforcement, firefighters, medical personnel, or correctional personnel; lighting for tunnels and underpasses, historic sites or structures; and seasonal and decorative lighting, as specified.

This bill requires state agencies to consider cost efficiency, energy conservation, minimization of light trespass and glare, and preservation of the natural night environment.

Related/Prior Legislation

AB 1710 (Lee, 2022) would have stated the intent of the Legislature to enact legislation relating to the regulation of residential and outdoor light-emitting diodes fixtures that create artificial light pollution at night, which causes harmful environmental and public health effects, as specified. (Never referred to an Assembly Committee)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown General Fund costs, likely in the millions of dollars, to replace light fixtures for over 24,000 state-owned buildings and structures according to the criteria specified in this bill. These costs will likely be spread out over an unknown amount of time based on a replacement schedule to be determined by DGS. Actual costs will be job specific and depend on the type and number of fixtures being replaced and installed for each building.

- Unknown, potentially significant General Fund costs to replace light fixtures on leased buildings. State costs will vary from minor to significant, to the extent that a lessor requires the state to cover costs associated with replacing light fixtures.

- Unknown, potentially significant costs to include light fixtures meeting the specified criteria on newly constructed buildings. Generally, DGS notes that new construction is covered by the California Green Building Standards Code's (CALGreen) backlight, uplight, and glare regulations. Any costs for compliant light fixtures in regard to new construction would be absorbed by existing project resources and included in the overall costs of construction.

OPPOSITION: (Verified 8/22/22)

California Sign Association

ARGUMENTS IN SUPPORT: In support of this bill, the Santa Clara Valley Audubon Society writes that, "[e]xcessive night light attracts nocturnal-migratory birds and diverts them from safe migration routes to human environments, where they are more susceptible to collisions with buildings and other human-made structures. A study found that reducing indoor artificial night light by half can result in roughly 60% fewer bird collisions. Insects are attracted to light as well, and when caught in a light plume of a light fixture, they circle around it until they die or the light is extinguished."

ARGUMENTS IN OPPOSITION: Opponents of the bill state that the "California Sign Association, serving California since 1959, has serious concerns about the ramifications of this legislation. We are not opposed to feasible and practicable measures that reduce light pollution, provided signage restrictions do not adversely affect the advertising message, that illumination is sufficient to convey the message, and the legislation actually does what it seeks to do."

SUBJECT: Medi-Cal: continuous eligibility

SOURCE: Children Now
First 5 Association of California
First 5 Center for Children's Policy
March of Dimes
Maternal and Child Health Access
National Health Law Program
The Children's Partnership

DIGEST: This bill requires the Department of Health Care Services to seek federal authority to allow children to remain on the County Children's Health Initiative Programs until age five, without the need for a redetermination of eligibility, except in specified circumstances, starting no sooner than January 1, 2025.

Senate Floor Amendments of 8/18/22 align the date and conditions for implementation with those that were included in SB 184 (Committee on Budget and Fiscal Review, Chapter 47, Statutes of 2022) for Medi-Cal and Medi-Cal Access Program (MCAP).

ANALYSIS:

Existing federal law:

1) Requires, through regulation, that states renew eligibility for Medicaid or the Children's Health Insurance Program (CHIP) once every 12 months and not more than every 12 months for individuals whose income is determined under the Modified Adjusted Gross Income methodology (MAGI), and at least every 12 months for individuals whose income is not determined using MAGI methodology. Provides state options to continue eligibility for 6 or 12 month periods for some populations, including some children based on age or family income after the family is no longer income eligible. [42 U.S.C. §1396a(e), 42 U.S.C. §1396r–6, 42 C.F.R. §435.916]

2) Permits the Secretary of Health and Human Services to waive certain state plan requirements by approving experimental, pilot, or demonstration projects that are found by the Secretary to be likely to assist in promoting the objectives of the Medicaid or CHIP programs. [42 U.S.C. §1315, 42 U.S.C. §1397gg]

Existing state law stablishes the County Health Initiative Matching Fund to allow counties, local initiatives, and county organized health systems to apply for funding for County Children's Health Initiative Programs (C-CHIP) to provide comprehensive health insurance coverage to any child who meets citizenship and immigration requirements of the CHIP program and whose family income is at or below 317% FPL or, at or below 411% FPL, in specific geographic areas. Permits DHCS to set program rules and allows DHCS to do so via guidance prior to issuing any necessary regulations. [WIC §15850, et seq., §15858]

This bill:

1) Requires C-CHIP programs to provide continuous eligibility for a child under five years old if the child is not Medi-Cal eligible during that time, unless DHCS or the county possesses facts indicating that the family has requested the child's voluntary disenrollment, the child is deceased, the child is no longer a state resident, or the child's original enrollment was based on a state or county error or on fraud, abuse, or perjury attributed to the child or the child's representative, starting no sooner than January 1, 2025.

2) Conditions implementation of this bill on upon the Department of Health Care Services (DHCS) obtaining all necessary federal approvals, an appropriation by the Legislature, and a determination by DHCS that all systems have been programmed to implement this bill.

Background

This bill originally provided for continuous coverage for Medi-Cal, the Medi-Cal Access Program, and C-CHIP programs, meaning that eligibility redeterminations for these programs would be suspended for young children until they reach age five in order to reduce gaps in coverage. The continuous coverage pieces for Medi-Cal and the Medi-Cal Access Program were included in the 2022-2023 health trailer bill, SB 184 (Committee on Budget and Fiscal Review, Chapter 47, Statutes of 2022). The implementation of these pieces is not until January 1, 2025, and is contingent on the following: all necessary federal approvals have been obtained by DHCS, the Legislature has appropriated funding to implement this section after a determination that ongoing General Fund resources are available to support the ongoing implementation of this section in the 2024–25 fiscal year and subsequent fiscal years, and DHCS has determined that systems have been programmed to implement this section. The exclusion of the C-CHIP program in the trailer bill was not intentional. DHCS estimates that in the next fiscal year there will be just over 4,000 enrollees in the entire C-CHIP program and this would only apply to those children under age five.

Comments

Author's statement. According to the author, this bill will provide continuous health coverage for California's C-CHIP eligible population up to age five. Under current law, paperwork errors or minor fluctuations in household income can result in children becoming disenrolled from Medi-Cal. For children, there is no more important time in their development than the first five years, when 90% of brain development occurs. During this period, the American Academy of Pediatrics recommends 14 well-child visits to administer critical preventive care like immunizations and track developmental milestones. Continuous coverage will improve health outcomes while addressing the disproportionate impact of the COVID-19 pandemic on communities of color.

[Note: For complete analysis of the continuous eligibility issue, please see the Senate Health Committee analysis.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, unknown ongoing General Fund costs, likely millions of dollars, for continuous coverage of cases in the C-CHIP program.

OPPOSITION: (Verified 8/18/22)

Department of Finance

ARGUMENTS IN SUPPORT: This bill is sponsored by a number of children's health advocacy organizations. Co-sponsor The Children's Partnership writes that only a very small fraction of children with coverage gaps are terminated due to income ineligibility and that the first years of a child's life is a paramount opportunity to set them up for healthy outcomes throughout their lifetime.

ARGUMENTS IN OPPOSITION: The Department of Finance writes that it is opposed to this measure because it is duplicative of efforts to provide continuous Medi-Cal coverage for children up through four years of age in the 2022 Budget Act. This opposition predates the current language removing the Medi-Cal and MCAP programs that were included in the 2022 Budget Act.

SUBJECT: Juveniles: Youth Bill of Rights

SOURCE: Anti-Recidivism Coalition
California Association of Student Councils
California Youth Connection
Equality California
Human Rights Watch
National Center for Lesbian Rights
National Center for Youth Law
Pacific Juvenile Defender Center
W. Haywood Burns Institute
Young Women's Freedom Center

DIGEST: This bill makes the Youth Bill of Rights applicable to youth confined in any juvenile justice facility.

Senate Floor Amendments of 8/24/22 add double-jointing language to address potential chaptering issues between this bill, AB 207 (Committee on Budget), and SB 124 (Committee on Budget and Fiscal Review), and state that the rights included in the bill are declaratory of existing law.

Senate Floor Amendments of 8/22/22 eliminate a provision of existing law authorizing the Ombudsperson of the Office of Youth and Community Restoration (OYCR) and other parties to use standardized information regarding a youth's rights in carrying out their responsibilities to inform youth of their rights; specify that the demographic information of complainants that the Ombudsperson is required to collect for its annual report only needs to be included in the report to the extent that its available; and conform the bill's language to SB 187 (Senate Budget and Fiscal Review Committee) regarding the Ombudsperson's responsibilities.

ANALYSIS:

Existing law:

1) Provides that the purpose of the juvenile court system is to provide for the protection and safety of the public and each minor under the jurisdiction of the juvenile court. Requires minors under the jurisdiction of the juvenile court as a consequence of delinquent conduct to receive care, treatment, and guidance that is consistent with their best interest, that holds them accountable for their behavior, and that is appropriate for their circumstances. (Welf. & Inst. Code, § 202, subds. (a) & (b).)

2) Provides that juvenile halls shall not be deemed to be, nor be treated as, penal institutions. Requires that a juvenile hall be safe and supportive homelike environments. (Welf. & Inst. Code, § 851.)

3) Establishes the Youth Bill of Rights, which applies to youth confined at Division of Juvenile Justice (DJJ), and provides that these youth have the following rights:

    a) To live in a safe, healthy, and clean environment conducive to treatment and rehabilitation and where they are treated with dignity and respect.
    b) To be free from physical, sexual, emotional, or other abuse, or corporal punishment.
    c) To receive adequate and healthy food and water, sufficient personal hygiene items, and clothing that is adequate and clean.
    d) To receive adequate and appropriate medical, dental, vision, and mental health services.
    e) To refuse the administration of psychotropic and other medications consistent with applicable law or unless immediately necessary for the preservation of life or the prevention of serious bodily harm.

f) To not be searched for the purpose of harassment or humiliation or as a form of discipline or punishment.
g) To maintain frequent and continuing contact with parents, guardians, siblings, children, and extended family members, through visits, telephone calls, and mail.
h) To make and receive confidential telephone calls, send and receive confidential mail, and have confidential visits with attorneys and their authorized representatives, ombudspersons and other advocates, holders of public office, state and federal court personnel, and legal service organizations.
i) To have fair and equal access to all available services, placement, care, treatment, and benefits, and to not be subjected to discrimination or harassment on the basis of actual or perceived race, ethnic group identification, ancestry, national origin, color, religion, sex, sexual orientation, gender identity, mental or physical disability, or HIV status.
j) To have regular opportunity for age-appropriate physical exercise and recreation, including time spent outdoors.
k) To contact attorneys, ombudspersons and other advocates, and representatives of state or local agencies, regarding conditions of confinement or violations of rights, and to be free from retaliation for making these contacts or complaints.
l) To participate in religious services and activities of their choice.
m) To not be deprived of any of the following as a disciplinary measure: food, contact with parents, guardians, or attorneys, sleep, exercise, education, bedding, access to religious services, a daily shower, a drinking fountain, a toilet, medical services, reading material, or the right to send and receive mail.
n) To receive a quality education that complies with state law, to attend age-appropriate school classes and vocational training, and to continue to receive educational services while on disciplinary or medical status.
o) To attend all court hearings pertaining to them.
p) To have counsel and a prompt probable cause hearing when detained on probation or parole violations.
q) To make at least two free telephone calls within an hour after initially being placed in a facility of the Division of Juvenile Facilities following an arrest. (Welf. & Inst. Code, § 224.71)

4) Requires every DJJ facility to provide each youth who is placed in the facility with an age and developmentally appropriate orientation that includes an

explanation and a copy of the rights of the youth. (Welf. & Inst. Code, § 224.72, subd. (a).)

5) Requires the Office of the Ombudspersons of DJJ to design posters and provide the posters to each DJJ facility. Requires that these posters include the toll-free phone number of the Office of the Ombudspersons of DJJ. (Welf. & Inst. Code, § 224.72, subd. (b).)

6) Requires the Office of the Ombudsperson of DJJ to investigate and attempt to resolve complaints made by or on behalf of youth in the custody of DJJ, related to their care, placement, or services, or in the alternative, refer appropriate complaints to another agency for investigation. (Welf. & Inst. Code, § 224.74, subd. (a).)

7) Requires the Office of the Ombudsperson of DJJ to compile and make available to the Legislature and the public all data collected over the course of the year, regarding the complaints made. (Welf. & Inst. Code, § 224.74, subd. (a).)

8) Requires all DJJ facilities to ensure the safety and dignity of all youth in their care and to provide care, placement, and services to youth without discriminating on the basis of actual or perceived race, ethnic group identification, ancestry, national origin, color, religion, sex, sexual orientation, gender identity, mental or physical disability, or HIV status. (Welf. & Inst. Code, § 224.73.)

9) Provides that a minor or ward may be held up to four hours in room confinement in a juvenile facility, as specified. (Welf. & Inst. Code, § 208.3.)

10) Establishes the OYCR, to support the juvenile justice realignment and to promote trauma responsive, culturally informed services for youth involved in the juvenile justice system that support the youths' successful transition into adulthood and help them become responsible, thriving, and engaged members of their communities. (Welf & Inst. Code, § 2200.)

This bill:

1) Makes the Youth Bill of Rights applicable to youth confined in any juvenile justice facility and eliminates references to DJJ.

2) Defines "juvenile facility" to mean a place of confinement that is operated by, or contracted for, the county probation department or juvenile court for the purpose of confinement of youth who are taken into custody.

3) Adds rights to the Youth Bill of Rights, including but not limited to, the following:

   a) The right to receive clean water at any time, have timely access to toilets, access to daily showers, clean bedding, and requires that clothing, grooming, and hygiene products be adequate and respect the child's culture, ethnicity, and gender identity and expression;
   b) The right to timely reproductive care;
   c) The right not to be searched to verify the youth's gender, and to searches that preserve the privacy and dignity of the person;
   d) Specifies that youth may be provided with access to computer technology to maintain contact with family members and guardians as an alternative to but not replacement for in-person visits;
   e) Extends the anti-discrimination provisions to also prohibit discrimination on the basis of a youth's language, gender expression, and immigration status;
   f) The right to daily opportunities for physical education and recreation;
   g) The right to exercise the religious or spiritual practice of their choice and to refuse to participate in religious services and activities;
   h) The right to not be deprived of clean water, toilet access, or hygiene products as a disciplinary measure and to not to be subject to room confinement as a disciplinary measure;
   i) Expands the right of youth to receive an education to the right to receive a rigorous education that prepares them for high school graduation, career entry, and postsecondary education; to attend age-appropriate appropriate level school classes; to have access to postsecondary academic and career technical education courses and programs; to have access to computer technology and the internet for the purposes of education; and to have access to information about the educational options available to youth; and
   j) Adds family and reproductive rights including, the right to information about their rights as parents, including available parental support, reunification advocacy, and opportunities to maintain or develop a connection with their children; to access educational information or programming about pregnancy, infant care, parenting, and breast-feeding, and childhood development; to proper prenatal care, diet, vitamins, nutrition, and medical treatment; to counseling for pregnant and post-partum youth; to not be restrained by the use of leg irons, waist chains, or

handcuffs behind the body while pregnant or in recovery after delivery; to not be restrained during a medical emergency, labor, delivery, or recovery unless deemed necessary for their safety and security, and to have restraints removed when a medical professional determines removal is medically necessary; and to access written policies about pregnant, post-partum, and lactating youth.

4) Requires OYCR to develop standardized information explaining these rights by July 1, 2023.

5) Makes related and conforming cross-references to the ombudsperson of OYCR, including to review, investigate, and attempt to resolve complaints made by or on behalf of youth in the custody of any juvenile facility and to compile and make available to the Legislature and the public all data collected over the course of the year, regarding the complaints made.

6) Prohibits discrimination against youths confined at juvenile facilities on the basis of gender, gender expression, or immigration status.

7) Requires the ombudsperson of OYCR to notify the complainant, if the ombudsperson decides to investigate the complaint or refer the complaint to another body for investigation, in writing of the intention to investigate or refer the complaint within 15 days of receiving the complaint.

8) Requires the ombudsperson to provide written notice to the complainant of the final outcome, steps taken during the investigation, basis for the decision, and any action to be taken as a result of the complaint.

9) Requires the ombudsperson's reports to the Legislature to include disaggregated data by gender, sexual orientation, race, and ethnicity of the complainants.

Background

This bill makes the existing Youth Bill of Rights applicable to youth confined at all juvenile justice facilities and would expand these rights to include, among other things, extending the anti-discrimination provisions to also prohibit discrimination on the basis of a youth's ethnicity, gender, gender expression, and immigration status; adding family and reproductive rights; and adding the right of youth to receive a rigorous education, including access to postsecondary education. This bill also makes other conforming changes to reflect the closure of DJJ in 2023 and the role of the Ombudsperson in the newly established OYCR.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- OYCR: The OYCR, within the Department of Health and Human Services, reports ongoing annual costs of $490,000 for contract and staffing resources and operations (General Fund).

- Local Reimbursements: Unknown, ongoing, potentially reimbursable costs to county probation departments to offer a possibly higher level of educational services and computer technology to wards (Local Funds, General Fund). General Fund costs will depend on whether this bill imposes a reimbursable mandate as determined by Commission on State Mandates.

SUBJECT: Crimes: Justice Data Accountability and Transparency Act

SOURCE: American Civil Liberties Union
Congregations Organized for Prophetic Engagement
Prosecutor's Alliance California
San Francisco District Attorney's Office
Yolo County District Attorney's Office

DIGEST: This bill requires, according to specified timeframes, state and local prosecution offices to collect and transmit various data regarding criminal cases to the Department of Justice (DOJ), which is required to verify and publish the data. Additionally, this bill requires the DOJ to establish the Prosecutorial Transparency Advisory Board, as specified.

Senate Floor Amendments of 8/25/22 make several clarifying changes, including reorganizing the measure's privacy protection provisions, requiring DOJ to develop regulations for protecting personal identifying information, adding specifications regarding the format in which data will be published, and making the operation of the bill's provisions contingent on an adequate appropriation by the Legislature.

ANALYSIS:

Existing law:

1) Provides that it is the duty of the DOJ to:

    a) Collect data necessary for the work of the department from specified persons and agencies as specified and from any other appropriate source.
    b) Prepare and distribute to all those persons and agencies cards, forms, or electronic means used in reporting data to the department.
    c) Recommend the form and content of records that must be kept by those persons and agencies in order to ensure the correct reporting of data to the department.
    d) Instruct those persons and agencies in the installation, maintenance, and use of those records and in the reporting of data therefrom to the department.
    e) Process, tabulate, analyze, and interpret the data collected from those persons and agencies.
    f) Supply to federal bureaus or departments engaged in the collection of national criminal statistics data they need from this state at their request.
    g) Make available to the public, through the department's OpenJustice Web portal, information relating to criminal statistics, to be updated at least once per year.
    h) Periodically review the requirements of units of government using criminal justice statistics, and to make recommendations for changes it deems necessary, as specified. (Pen. Code, § 13010.)

2) Requires DOJ to collect data pertaining to the juvenile justice system for criminal history and statistical purposes. (Pen. Code, 13010.5.)

3) Provides that the information published on the OpenJustice Web portal shall contain statistics showing all of the following:

    a) The amount and the types of offenses known to the public authorities.
    b) The personal and social characteristics of criminals and delinquents.
    c) The administrative actions taken by law enforcement, judicial, penal, and correctional agencies or institutions, including those in the juvenile justice system, in dealing with criminals or delinquents.
    d) The administrative actions taken by law enforcement, prosecutorial, judicial, penal, and correctional agencies or institutions, including those in the juvenile justice system, in dealing with minors who are the subject of a petition in the juvenile court to transfer their case to an adult criminal court

or whose cases are directly filed or otherwise initiated in an adult criminal court.
   e) Specified data regarding civilian complaints. (Pen. Code, § 13012(a).)

4) Provides that the DOJ shall give adequate interpretation of the above statistics and present the information so that it may be of value in guiding the policies of the Legislature and of specified criminal justice system actors. This interpretation shall be presented in clear and informative formats. (Pen. Code, § 13012(b).)

5) Provides that the DOJ shall maintain a data set, updated annually and made available on the OpenJustice Web portal, which contains the number of crimes reported, number of clearances, and clearance rates in California as reported by individual law enforcement agencies. (Pen. Code §13013.)

6) Imposes a duty on every person or agency dealing with crimes or criminal defendants or with delinquency or delinquent minors, when requested by the Attorney General:

   a) To install and maintain records needed for the correct reporting of statistical data required by him or her
   b) To report statistical data to the department at those times and in the manner that the Attorney General prescribes
   c) To give to the Attorney General, or his or her accredited agent, access to statistical data for the purpose of carrying out this title. (Pen. Code, § 13020.)

This bill:

1) Establishes several objectives and mandates for the DOJ related to the provisions of this bill, including:

   a) The collection of specified data elements from state and local prosecutor offices, as specified. Under this provision, DOJ shall develop consistent and clear guidelines for how agencies are to define data elements transmitted to the department.
   b) The transmission and aggregation of data elements as defined.
   c) The development and publication of metrics, as defined, and ensuring that personal identifying information is not published except as allowed by law.

2) Includes guidance for the department in carrying out its objectives and mandates, including what technology, processes and practices to employ.

3) Requires the DOJ, by October 1, 2023, to establish the Prosecutorial Transparency Advisory Board (Board) for the purpose of ensuring transparency, accountability, and equitable access to prosecutorial data, whose primary responsibilities are to provide guidance to the department on draft rules, regulation, policies, plans, reports, or other decisions made by the department with regard to this bill.

4) Specifies the composition of the Board.

5) Provides that, by July 1, 2024, the DOJ, in consultation with the Board, shall develop a data dictionary that includes standardized definitions for each data element so that data elements transmitted to the department are uniform across all jurisdictions, taking into account any technical and practical limitations on the collection of that data element.

6) Requires the DOJ, upon completion of the data dictionary, to share the dictionary with all agencies statewide.

7) Provides that, beginning March 1, 2027, every agency statewide shall collect every specified data element for cases in which a decision to reject charges or to initiate criminal proceedings by way of complaint or indictment has been made by that agency from that date forward.

8) Provides that each data element shall be collected according to specified definitions with any ambiguity to be resolved by the DOJ, and shall be submitted in a format designated by the department, as specified.

9) Provides that, beginning June 1, 2027, every agency statewide, at the direction of the DOJ, shall begin transmitting its required data elements to the department, which shall occur on a quarterly basis until June 1, 2028, after which data elements shall be transmitted on a monthly basis.

10) Provides that, beginning June 1, 2027, the DOJ shall begin collecting data elements from all agencies as specified, and shall aggregate data elements for all agencies in order to publish this data by June 1, 2028. This publication shall continue on a quarterly basis for one year, and then the publication shall occur on a monthly basis thereafter.

11) Allows DOJ to obtain information from sealed and expunged records and in other circumstances that may normally be prohibited from being disclosed, but provides that the DOJ shall not publish the name, birthdate, or Criminal Identification and Information number assigned by the department of any defendant or victim.

12) Specifies the 54 discrete data elements that each prosecuting agency is responsible for collecting and transmitting to the DOJ.

13) Provides that each prosecuting agency that only has select divisions that prosecute crimes must provide specified information each year by July 1.

14) Specifies that the information contained in the prescribed data elements shall be public records for the purposes of the California Public Records Act, but that any personal identifying information may be redacted prior to disclosure.

15) Specifies that operation of this bill's provisions is contingent upon an appropriation by the Legislature.

16) Includes various findings and declarations related to the importance of data collection and transparency.

Comments

According to the author, "District attorneys are constitutionally elected county officials responsible for the prosecution of criminal violations of state law and county ordinances. They not only determine the crimes with which people are charged, but also play a central role in whether people are detained or released pretrial, whether people are convicted of the crimes they were charged with, which sentences people receive, how people's prior criminal history may impact their treatment in the system, and who is in prison and jail. Despite the extraordinary power they wield, elected district attorneys report very little public data on critical decisions such as charging rationale, the length of time it takes for a case to move through the criminal justice process, and the number of certain crimes that have been charged, to name a few examples. This lack of transparency has only allowed racial bias to proliferate within the criminal legal system."

California has long been a national leader on criminal justice reform and innovation, but only in the last several years has the state refocused its attention to aggregating and publishing crime data for the purposes of self-assessment and transparency. Recent efforts to modernize statewide systems of data collection and representation began in earnest with the DOJ's creation of the OpenJustice portal in 2015, and the Legislature's passage of the OpenJustice Data Act of 2016 (AB 2524, Irwin, Chapter 418, Statutes of 2016). These reforms leveraged statistical data maintained by the DOJ and other public datasets to create a dynamic, user-friendly dashboard that presented crime statistics in a more digestible format. Local governments have followed the state's lead in embracing data transparency

Despite these reforms, critics argue that the state's data transparency policies remain flawed on many fronts. A recent report from Stanford Law School's Criminal Justice Center highlighted the deficiencies of the current system:

> In stark contrast to California's culture and history, its criminal justice data are not readily available to the public. There is also significant confusion among practitioners and local policy makers about what data can be shared and with whom. This confusion creates daunting barriers to criminal justice data sharing and, in turn, needed criminal justice research. In addition, differing legal interpretations regarding whether court records fall within the Criminal Offender Record Information (CORI) statutory scheme create ambiguity regarding access to criminal court records from California Superior Courts, despite court records being presumptively open to the public. In particular, California Rules of Court are regularly interpreted to limit—and often prevent—the sharing of court records, without any exceptions for bona fide research efforts. This means that researchers and the public are already fighting an uphill battle to access criminal justice data before they even start. […] Numerous research efforts have been stymied by gaps in criminal justice data infrastructure, varying interpretation of data sharing laws and regulations, or both. Collectively, these challenges translate to both missed opportunities and concerning roadblocks to transparency.

This bill seeks to address these and other issues related to California's data collection and transparency systems. Specifically, this bill creates a new framework of data collection and reporting by California's criminal prosecution agencies, and establishes several objectives and mandates for DOJ related to that effort and publishing the data collected. Moreover, this bill requires every prosecution agency in California to collect more than 50 specified data elements, and transmit them to DOJ in a standardized format as prescribed by the department. This bill includes a delayed implementation for its data collection, aggregation and publication provisions: agencies would not be required to start collecting until March 1, 2027, and the first data would not be published until June 1, 2028.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Total costs in the hundreds of millions and ongoing annual costs of more than $10 million, to aggregate, verify and publish the data provided by each of the prosecutorial agencies in the State, and to establish the Prosecutorial Transparency Board (General Fund).

- Unknown, potentially reimbursable costs, possibly in the tens of millions for prosecuting agencies to provide detailed information to the DOJ regarding all misdemeanor and felony prosecutions (Local Funds, General Fund). Costs to the General Fund will depend on whether the duties imposed by this bill are considered a state reimbursable mandate by the Commission on State Mandates.

SUBJECT: Transportation funding: guidelines and plans

SOURCE: Author

DIGEST: This bill requires various state transportation programs to incorporate strategies from the Climate Action Plan for Transportation Infrastructure (CAPTI) into program guidelines. Also requires various state agencies to establish new transparency and accountability guidelines for certain transportation funding programs, as specified.

Senate Floor Amendments of 8/25/22 incorporate provisions of AB 2514 (M. Dahle) to prevent chaptering out.

ANALYSIS:

Existing law:

1) Vests the California Department of Transportation (Caltrans) with the full possession and control of all state highways and all property and rights in property acquired for state highway purposes.

2) Creates the California State Transportation Agency (CalSTA) and vests it various responsibilities including, but not limited to, the implementation and programming of the Transit and Intercity Rail Capital (TIRCP) program, which is a competitive program to fund transformative transit capital improvements that will modernize California's intercity, commuter, and urban rail systems and bus and ferry transit systems; and the State Rail Assistance (SRA) programs, which allocates revenue annually, on a formula basis, to intercity rail and commuter rail for capital and operations.

3) Creates the California Transportation Commission (CTC) and vests it with various responsibilities, including programming and allocating funds for the construction of highway, passenger rail, transit, and active transportation improvements through various transportation programs.

4) Requires Caltrans to prepare a State Highway System Management Plan (SHSMP) that consists of both a 10-year state highway rehabilitation plan and a 5-year maintenance plan. Requires Caltrans to submit the draft plan to the CTC for review and comment by February 15 of each odd-numbered year, and to transmit the final plan to the Governor and the Legislature by June 1 of each odd-numbered year.

5) Requires Caltrans to develop the State Highway Operations and Protection Program (SHOPP) based on the Transportation Asset Management Plan, to guide expenditures of federal and state funds for major capital improvements to preserve and maintain the state highway system. Limits SHOPP projects to capital improvements relative to maintenance, safety, and rehabilitation of state highways and bridges that do not add a new lane to the system.

6) Enacts the Road Repair and Accountability Act of 2017, SB 1 (Beall), Chapter 5, Statutes of 2017, which provides roughly $5.2 billion annually to fund the state's highways, local streets and roads, public transportation, and active transportation programs. SB 1 created new transportation competitive programs, to be allocated by the CTC, including: (a) Local Partnership Program

(LPP), funded at $200 million annually, for local or regional transportation agencies that have sought and received voter approval of taxes or that have imposed certain fees, for which those taxes or fees are dedicated solely to transportation improvements. (b) Trade Corridor Enhancement Program (TCEP), funded at $300 million annually, for infrastructure improvements on federally designated Trade Corridors of National and Regional Significance, on the Primary Freight Network, and along other corridors that have a high volume of freight movement. (c) Solutions for Congested Corridors (SCCP), funded at $250 million annually, for projects that implement specific transportation performance improvements and are part of a comprehensive corridor plan, by providing more transportation choices while preserving the character of local communities and creating opportunities for neighborhood enhancement.

7) Provides for the funding of projects for state highway improvements, intercity rail, and regional highway and transit improvements, through the State Transportation Improvement Program (STIP), which consists of two broad sub-programs: the Regional Transportation Improvement Program (RTIP) and the Interregional Transportation Improvement Program (ITIP).

8) Requires Caltrans to produce, and update every five years, the California Transportation Plan (CTP), a long-range transportation planning document intended to integrate state and regional transportation planning while considering specified pertinent subject areas. Requires, Caltrans to update the CTP, as specified, and requires the Strategic Growth Council (SGC), by January 31, 2022, to submit a report to the Legislature on interactions of the CTP and SCS/APS plans, and a review of the potential impacts and opportunities for coordination between specified programs.

9) Establishes the California Air Resources Board (ARB) as the air pollution control agency in California and requires ARB, among other things, to control emissions from a wide array of mobile sources and coordinate, encourage, and review the efforts of all levels of government as they affect air quality. Requires ARB to determine the 1990 statewide greenhouse gas (GHG) emissions level, and achieve that same level by 2020 (AB 32), and achieve a 40% reduction from that level by 2030 (SB 32).

This bill:

CalSTA

1) Requires CalSTA to, no later than January 1, 2024, to establish guidelines to ensure transparency and accountability, including the project selection processes, for the TIRCP and SRA programs.

2) Requires the guidelines to do all of the following: (a) ensure project application summaries is publicly available for public review before a decision to award funds; (b) ensure the project selection process incorporates strategies established in the CAPTI, adopted by CalSTA in July 2021 that are applicable to the program; (c) require that a recommendation for a project to be funded be released in an accessible format before a decision to award funds; and (d) include any other best practices identified through public input solicited, as specified.

3) Requires CalSTA to hold public workshops to solicit public input prior to developing the guidelines to ensure that they will provide the public with the information necessary for meaningful participation in CalSTA's actions to award funds for the transportation funding programs that it administers.

4) Stipulates that this shall not supersede any conflicting provision of an existing guideline process or existing maintenance and rehabilitation requirements.

Caltrans

5) Requires Caltrans to, no later than January 1, 2024, to establish guidelines to ensure transparency and accountability, including the project selection processes, for the ITIP and the SHOPP.

6) Requires the guidelines to do all of the following: (a) ensure project nomination information are publicly available for public review before a decision to award funds; (b) ensure the project selection process incorporates strategies established in the CAPTI, adopted by CalSTA in July 2021, that are applicable to the programs; (c) require that a recommendation for a project to be funded be released in an accessible format at least 20 days before a decision to award funds; and include any other best practices identified through public input solicited, as specified.

7) Requires Caltrans to hold public workshops to solicit public input prior to developing the guidelines to ensure that they will provide the public with the information necessary for meaningful participation in Caltrans' actions to award funds for the transportation funding programs that it administers.

8) Stipulates that this shall not supersede any conflicting provision of an existing guideline process or existing maintenance and rehabilitation requirements.*CTC*

7) Requires CTC to, no later than January 1, 2024, to establish guidelines to ensure transparency and accountability, including the project selection processes, for LPP, TCEP, and SCCP.

8) Requires the guidelines to do all of the following: (a) ensure project nomination information is publicly available for public review before a decision to award funds; (b) ensure the project selection process incorporates strategies established in the CAPTI, adopted by CalSTA in July 2021 that are applicable to the program; (c) require that a recommendation for a project to be funded be released in an accessible format at least 20 days before a decision to award funds; and (d) include any other best practices identified through public input solicited, as specified.

9) Requires CTC to hold public workshops to solicit public input prior to developing the guidelines to ensure that they will provide the public with the information necessary for meaningful participation in CTC's actions to award funds for the transportation funding programs that it administers.

10) Stipulates that this shall not supersede any conflicting provision of an existing guideline process or existing maintenance and rehabilitation requirements.

Transportation Programs

11) Requires, that no later than January 1, 2024, program guidelines include the strategies established in CAPTI as adopted by CalSTA in July 2021, for the following state transportation programs: ITIP, SHSMP, LPP (competitive component), TCEP, and SCCP.

12) Clarifies that the comprehensive corridor plans required for projects to receive funding from the SCCP be "multimodal" corridor plans.

CTP

13) Requires the CTP to include a financial element that contains: (a) a summary of the full cost of the implementation of the plan; (b) a summary of available revenues through the planning period; (c) an analysis of what is feasible within the plan if constrained by a realistic projection of available revenues; and (d) an evaluation of the feasibility of any policy assumptions or scenarios included in the plan. The financial element may also include a discussion of tradeoffs within the plan considering financial constraints.

14) Incorporates provision of AB 2514 (M. Dahle) to prevent chaptering out.

Comments

1) *Purpose of the bill.* According to the author, "AB 2438 requires the state's largest transportation funding sources to incorporate the administration's Climate Action Plan on Transportation Infrastructure (CAPTI) into the guidelines process for project selection for transportation funding. The strategies and principles of CAPTI are something we have been trying to accomplish at the state and federal level in order to build a more connected transportation infrastructure based on efficient land use, equity, and reducing greenhouse gas emissions. We cannot ignore that a $30 billion sector of state funding is directly tied to 40% of California's greenhouse gas emissions. It is time for California to reassess our transportation funding and planning system to put people before the car."

2) *Transportation and climate change.* California's transportation network consists of streets, highways, railways, bicycle routes, and pedestrian pathways. Funding for the network comes from federal, state, and local taxes, fees and assessments, private investments and tribal investments. Currently, roughly $35 billion (federal, state, and local funds combined) is spent annually in California on building and maintaining the transportation network. Additionally, with the passage of the federal Infrastructure Investment and Jobs Act (IIJA, P.L. 117-58), California is expected to receive approximately $40 billion over five years.

   Emissions from the transportation sector, the state's largest source of GHGs, are still on the rise despite statewide GHG emission reduction efforts and increasingly ambitious targets. According to ARB's GHG emission inventory, transportation sector emissions have grown to 41% of California's total

emissions as of 2017. California has targeted a 22% reduction in vehicle miles travelled (VMT) per capita below 2019 levels by 2045 as part of its larger strategy to reduce GHG emissions.

3) *What is the CAPTI*? On September 20, 2019, Governor Newsom issued Executive Order (EO) N-19-19, which called for actions from multiple state agencies to reduce GHG emissions and mitigate the impacts of climate change. Specifically, the EO empowered CalSTA to leverage more than $5 billion in annual state transportation spending for construction, operations, and maintenance to help reverse the trend of increased fuel consumption and reduce GHG emissions associated with the transportation sector. The EO directed CalSTA to work to align transportation spending with the state's Climate Change Scoping Plan, where feasible; direct investments to strategically support smart growth to increase infill housing production; reduce congestion through strategies that encourage a reduction in driving and invest further in walking, biking, and transit; and ensure that overall transportation costs for low-income Californians do not increase as a result of these policies.

   To that end, CalSTA adopted the CAPTI in July 2021. The CAPTI is the action plan to implement the EO. Specifically, the CAPTI is "a framework and statement of intent for aligning state transportation infrastructure investments with state climate, health, and social equity goals, built on the foundation of the 'fix-it-first' approach established in SB1". Additionally, CalSTA notes that CAPTI is a living document that can "adapt, pivot, and modify approaches and actions, as needed." The CAPTI contains an overall transportation investment framework and specific strategies to implement the plan through state agency actions. In August 2021, the CTC endorsed CAPTI's framework and strategies and began a process of incorporating it into program guidelines for the programs they administer.

4) *AB 285 report says we need to better align traditional funding programs with state climate goals.* AB 285 (Friedman, Chapter 605, Statutes of 2019), required the SGC to develop a report to look at various aspects of state and regional transportation planning and funding. The *California Transportation Assessment Report* was developed through work of the University of California Institute for Transportation Studies (UCITS). The report includes findings and provides recommendations to help the state align transportation funding with state climate goals. Specifically, the report suggest this could be done through, "the reviewing and prioritizing various state goals within transportation funding program guidelines or statute. For example, the statute that governs State

Highway Operation and Protection Program (SHOPP) and State Transportation Improvement Program (STIP) funding has its goals based on rehabilitation and maintenance, safety, operations, and expansion, but no reference to climate or equity. This revisiting of goals could also involve ensuring that additional funds or future funds (including federal infrastructure funds) are spent in ways that align with priority goals."

The AB 285 process is still ongoing as SGC is in final stages of meeting with stakeholders to discuss the findings of the report and ultimately produce recommendations for the administration and lawmakers to fully consider.

5) *SB 1 and "fix it first."* In 2017, the Legislature passed and Governor Brown signed into law, SB 1 (Beall, Chapter 5, Statutes of 2017), which provides roughly $5.2 billion annually for highways, local streets and roads, public transit, and bicycle and pedestrian facilities. SB1's guiding principle was "fix it first," or focusing the state's transportation spending to maintain a state of good repair of the existing system. Specifically, SB 1 included performance outcomes for Caltrans to meet for the state highway system by 2027, through investments in the SHOPP and maintenance programs. SB 1 also created new competitive programs to focus on key areas, including 1) TCEP, funded at $300 million annually, for infrastructure improvements on federally designated Trade Corridors of National and Regional Significance, on the Primary Freight Network, and along other corridors that have a high volume of freight movement; 2) SCCP, funded at $250 million annually, for projects that implement specific transportation performance improvements and are part of a comprehensive corridor plan, by providing more transportation choices while preserving the character of local communities and creating opportunities for neighborhood enhancement; and 3) LPP, funded at $200 million annually, for local or regional transportation agencies that have sought and received voter approval of taxes or that have imposed certain fees, for which those taxes or fees are dedicated solely to transportation improvements.

The state's climate goals are already reflected in some of the SB 1 programs criteria, especially the SCCP, which includes "furtherance of state and federal ambient air standards and GHG emissions reduction standards," as scoring criteria for project awards. Additionally, both the TCEP and SCCP require that nominated projects must be included in a regional transportation plan, including a sustainable communities strategy if in an MPO area.

6) *AB 2438 codifies the CAPTI.* One of the recommendations of the AB 285 report is to "align existing funding programs with state goals." AB 2438 tries to implement this goal by requiring numerous state funding programs, including the ITIP, which is 25% of the STIP; the SHSMP, which informs the development of the SHOPP; and the SB 1 competitive programs, LPP, TCEP, and SCCP, to incorporate strategies established by the CAPTI.

   As mentioned, the CAPTI details specific strategies relevant to various state transportation programs. For example, the CAPTI recommends Caltrans, "update the 2023 SHSMP's SHOPP and maintenance investment strategies and performance outcomes to align with CAPTI investment framework. The update will include the following approaches or considerations, at a minimum: active transportation, climate resiliency, nature-based solutions, greenhouse gas emission reduction, and climate smart decision-making."

   Further, for TCEP, the CAPTI recommends, "pursue updated TCEP Guidelines to prioritize projects that improve trade corridors by demonstrating a significant benefit to improving the movement of freight and also reduce emissions by creating or improving zero-emission vehicle charging or fueling infrastructure either within the project itself or within the larger trade corridor."

   Additionally, some of the CAPTI strategies are cross cutting, such as, updating SHOPP and SB 1 competitive program guidelines to incentivize climate adaptation and climate risk assessments/strategies. Specifically, "CalSTA and CTC will evaluate OPR/Caltrans Climate Risk Assessment Planning and Implementation Guidance and pursue inclusion in SHOPP, TIRCP, and SB 1 Competitive Program Guidelines."

   As previous noted, the CalSTA describes the CAPTI a living document that can "adapt, pivot, and modify approaches and actions, as needed." It is unclear how codifying the specific 2021 version of the CAPTI may affect the agency's ability to update and modify the plan and how that would be incorporated into these programs.

7) *The work has already begun.* Much of the work required by AB 2438 has already begun or been adopted. As noted, in August 2021, the CTC endorsed CAPTI's framework and strategies. As such, it has already begun to incorporate CAPTI into the update for the guidelines of the SB 1 competitive programs. For example, the guidelines now state that the CTC encourages projects that align with the state's climate goals. As part of the evaluation criteria for LPP,

CTC will give higher priority to projects that, among other things, "address how a proposed project will reduce GHG emissions and criteria pollutants and advance the state's air quality and climate goals; and how a proposed project will minimize VMT while maximizing person throughput." For TCEP, CTC is requiring each project applicant to, "communicate a project's benefits related to advancing climate change resilience, by identifying both the climate change impacts that are occurring or anticipated, and the adaptive strategies."

TCEP will also be informed by the Clean Freight Corridor Efficiency Assessment required by SB 671 (Gonzalez, Chapter 769, Statues of 2021), which is now being developed by the CTC. The assessment will identify freight corridors and the infrastructure needed to support the deployment of zero-emission medium and heavy-duty vehicles. CTC, and other relevant state agencies, are required to then incorporate the recommendations into their respective programs for freight infrastructure.

The CTC gave an update on its incorporation of CAPTI into the SB1 program guidelines at their upcoming meeting on June 29, 2022. Of the three programs named in the bill, SCCP, LPP, and TCEP, CTC reports they have incorporated 11 recommended short-term implementation strategies, with working beginning on the medium-term strategies. Additionally, at its March 2022 CTC meeting, changes to the SHOPP guidelines were presented, which include a requirement that, "Caltrans shall take Climate Action Plan for Transportation Infrastructure (CAPTI) strategies as well as the Caltrans Equity Statement into consideration in the development and implementation of the State Highway System Management Plan."

8) *Increased transparency*. AB 2438 also includes provisions aimed at increasing transparency and accountability. Specifically, the bill requires CalSTA, Caltrans, and CTC to establish guidelines to ensure transparency and accountability for the programs named in the bill. The bill requires that prior to the guidelines being developed each of the departments must hold public workshops to solicit public input to ensure the guidelines will provide the pubic with the information necessary for meaningful participation in the department's actions to award transportation funding.

The CTC already conducts extensive year-long stakeholder outreach, including numerous workshops, as part of the guidelines process for all of the programs they administer. Additionally, they publish staff recommendations of awards prior to adoption by the commissioners in a public meeting. The SHOPP

statute requires Caltrans to provide a draft SHOPP program to regional transportation agencies and the CTC, and requires the CTC to hold at least one hearing in northern California and one hearing in southern California regarding the proposed program. Finally, the SHOPP is adopted at a public CTC meeting. To recognize this work, the bill states that the requirements shall not supersede any conflicting provision of existing guideline processes or existing maintenance and rehabilitation requirements. It is unclear how this will be interpreted by the implementing departments.

9) *Fiscally constrain the CTP.* Approved in February of 2021, the latest update of the California Transportation Plan, CTP 2050, is the state's statutorily fiscally unconstrained long-range transportation roadmap for policy change. CTP 2050 is designed to provide a unifying and foundational policy framework for making effective, transparent, and transformational transportation decisions in California and identify a timeline, roles, and responsibilities for each plan recommendation. The CTP does not contain specific projects, but rather policies and strategies to close the gap between what regional plans aim to achieve and how much more is required to meet 2050 goals. The CTP is seen as an aspirational document and is difficult to evaluate when compared to regional plans are required to provide an assessment of expected future funding to implement the plan. One of the recommendations of the AB 285 report that is universally supported by stakeholders is "updating and better aligning among existing state and regional plans," including adding a fiscal analysis to the CTP. AB 2438 requires the CTP to include a financial element that summarizes the full cost of plan implementation constrained by a realistic projection of available revenues. Additionally, the financial element may include a discussion of tradeoffs with the plan considering financial constraints.

10) *Climate goals vs. Fix it First.* According to the author, AB 2438 is attempting to implement the recommendations of both CAPTI and the AB 285 report. Adding CAPTI goals to existing transportation funding programs may set up a difficult debate about state priorities for funding transportation. As noted in the AB 285 report, some transportation funding programs are considered "older programs" that prioritized rehabilitation and maintenance, safety, operations, and expansion, however, most of the programs covered by the bill were created and updated in the last few years. These programs, specifically those created by SB 1, were debated by the Legislature with a full understanding of the state's climate goals at that time, which is why some of these contain climate criteria. As discussed, Governor Newsom, through executive actions, has amplified the state's commitment to combat climate

change. Even with the infusion of new federal money and historic state investment in transportation, the SHSMP shows us that there is still a great need. Pending legislation, SB 1121 (Gonzalez), calls for the CTC develop a needs assessment, covering a 10 year horizon, of the cost to operate, maintain, and provide for the future growth and resiliency of the state and local transportation system. The assessment, which includes a look at climate change impacts to infrastructure, will help inform the conversation.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Caltrans estimates ongoing costs of approximately $572,000 annually and 3.0 PY of staff for work associated with the development of a fiscally constrained financial element as part of the California Transportation Plan (CTP) and associated recommendations for funding allocations. In addition, Caltrans estimates costs of $2 million on a permanent biennial basis for a consultant contract to prepare the financial element with every update to the Plan. (State Highway Account)

- Minor and absorbable costs for Caltrans, the California Transportation Agency (CalSTA), and the California Transportation Commission (CTC) to update their respective specified transportation program guidelines. (State Highway Account)

- Unknown, potentially significant redirection of transportation funding, to the extent incorporating CAPTI strategies directs allocations to projects and facilities primarily focused on improving greenhouse gas emissions, public health, and equity. This could lead to significant cost pressures to provide additional funding for projects and facilities that would have otherwise received funding under a "fix it first" model, absent the bill. (General Fund, various special funds, federal funds, bond funds)

ARGUMENTS IN SUPPORT: According to a coalition of clean air advocates, such as the American Lung Association, "California is home to the most difficult air pollution challenges in the United States, and climate change impacts our clean air progress through more extreme heat, drought and wildfire smoke impacts. A recent report from the Strategic Growth Council found that there remains significant misalignment between State-funded transportation projects and our climate standards. California's ability to reach climate standards (and clean air standards) is significantly impacted by continued investment in land use and transportation projects that increase our dependence on vehicle travel. We must focus transportation investments on projects and programs that increase affordable, clean mobility choices for all communities that clean our air and reduce greenhouse gases.

"AB 2438 would support transportation investments that align with California climate standards by requiring state transportation funding guidelines to be updated to align with the California Transportation Plan (CTP), the Climate Action Plan for Transportation Infrastructure (CAPTI) and state clean air and climate standards. The bill would also require relevant state agencies (CalSTA, Caltrans, CTC) to include CAPTI strategies in funding program guidelines by January 1, 2024, and ensure accountability and transparency measures for those programs and project selection."

ARGUMENTS IN OPPOSITION: According to the State Building and Construction Trades Council, AFL-CIO, "AB 2438 subverts the fundamental purpose for which all projects in the State Highway Operation and Protection

Program (SHOPP) were authorized. At the same time, it is not clear how these maintenance, rehabilitation, and safety programs interfere with achievement of the state's climate goals. Even under a scenario where vehicles are zero-emission and significant majorities of Californians shift from single occupancy vehicles to biking, walking, and taking transit, Californians will still need highways, streets and roads, and bridges in a safe and well-maintained condition. And the shift to these alternative modes of transportation are still years away, necessitating ongoing maintenance of our existing infrastructure and creation of new roads, bridges, and highways to handle the state's current transportation needs."

SUBJECT: Responsible Battery Recycling Act of 2022

SOURCE: Californians Against Waste
California Product Stewardship Council
RethinkWaste

DIGEST: This bill establishes the Responsible Battery Recycling Act of 2022 (Act), which establishes a stewardship program for the collection and recycling of certain batteries, as defined.

Senate Floor Amendments of 8/25/22 update the definition of "covered battery" and clarify that producers of products are not responsible for loose batteries that

are a part of an existing stewardship organization; establish the definition of a "program operator" to be a producer, or a stewardship organization on behalf of a group of producers, that is responsible for implementing a stewardship program; update the definition of "producer"; clarify that the bill only applies to batteries sold in California; extend the timeline for the adoption of regulations and provides additional time for program operators to respond; strike the requirement that damaged, defective, or recalled batteries be collected by program operators; adjust the number of collection sites required in counties with a population smaller than 100,000 people; add a minimum recycling efficiency rate for rechargeable and primary batteries; provide anti-trust provisions; and makes numerous technical, clarifying, and non substantive changes.

ANALYSIS:

Existing law:

1) Establishes the Rechargeable Battery Recycling Act, which requires every retailer to have a system in place, on or before July 1, 2006, for the acceptance and collection of used rechargeable batteries for reuse, recycling, or proper disposal. (Public Resources Code (PRC) §§42451-42456)

2) Establishes the Electronic Waste Recycling Act to create a program for consumers to return, recycle, and ensure the safe and environmentally-sound disposal of "covered devices" (i.e., video display devices) that are hazardous wastes when discarded. (PRC §§42460 et seq.)

3) Establishes the Cell Phone Recycling Act, which requires all retailers of cellular phones to have a system in place for the collection, reuse, and recycling of cell phones and requires the Department of Toxic Substances Control (DTSC) to provide information on cell phone recycling. (PRC §§42490-42499)

4) Establishes the Hazardous Waste Control Law (HWCL) and requires DTSC to oversee the management of hazardous waste. (Health & Safety Code (HSC) §§25100 et seq.)

5) Establishes the Integrated Waste Management Act and requires the Department of Resources Recycling and Recovery (CalRecycle) to oversee the management of solid waste. (PRC §§40050 et seq.)

This bill:

1) Enacts the Responsible Battery Recycling Act of 2022, which would require producers, as defined, either individually or through the creation of one or more stewardship organizations, to establish a stewardship program for the collection and recycling of covered batteries, as defined.

2) Specifies that a "covered battery" includes any of the following:

    a) A loose battery that is either sold separately from a product or that is designed to be easily removed from the product with no more than common household tools.
    b) A battery that is packed with, but not installed in, the product that the battery is intended to power, when the product is offered for sale by the producer.

3) Provides that "covered battery" does not include, a medical device (as defined), a battery that has been recalled, a battery contained in a motor vehicle, a lead-acid battery (as defined), and certain rechargeable batteries.

4) Requires individual producers, no later than 180 days after the effective date of the Act, to provide CalRecycle a list of covered batteries and brands of covered batteries that the producer sells, distributes for sale, imports for sale, or offers for sale in or into the state and update the list annually thereafter.

5) Requires a program operator (i.e., a producer or a stewardship organization) to develop and submit to CalRecycle for review and approval as specified, a stewardship plan for the collection, transportation, and recycling of covered batteries, as prescribed.

6) Requires CalRecycle, in consultation with DTSC, to adopt regulations to implement the Act with an effective date no earlier than April 1, 2025.

7) Requires a program operator to have a complete stewardship plan approved by CalRecycle no later than 24 months after the effective date of the regulations adopted by CalRecycle and requires each producer be subject to an approved stewardship plan, in order to be in compliance with the Act.

8) Prohibits, on and after the date that a stewardship plan is approved by CalRecycle, a retailer, importer or distributor from selling, distributing,

offering for sale, or importing a covered battery in or into the state for sale in the state unless the producer of the covered battery is listed as in compliance with the Act, except as specified.

9) Requires a program operator to be audited annually, and submit a report and budget to CalRecycle, as prescribed, and requires a program operator to provide CalRecycle and DTSC with relevant records necessary to determine compliance with the Act.

10) Requires reports and records provided to CalRecycle be provided under penalty of perjury, thereby creating a state-mandated local program by expanding the crime of perjury.

11) Restricts public access to certain information collected for the purpose of administering a stewardship program.

12) Preempts all rules, regulations, codes, ordinances, or other laws adopted by a city, county, city and county, municipality, or a local agency on or after January 1, 2023, regarding stewardship programs for covered batteries.

13) Requires CalRecycle, within 24 months of the effective date of regulations, and each year thereafter, to post on its internet website a list of producers that are in compliance with the Act, including the reported brands and names of covered batteries of each producer.

14) Requires CalRecycle to remove from the list any producer, including its noncompliant brands and covered batteries, that is not in compliance with the Act.

15) Requires a program operator to reimburse CalRecycle and DTSC for their respective actual and reasonable regulatory costs that are directly related to implementing and enforcing the Act.

16) Requires CalRecycle and DTSC to deposit those moneys into the Covered Battery Recycling Fund, which the bill establishes, and authorizes CalRecycle and DTSC to expend those moneys, upon appropriation by the Legislature, to implement and enforce the Act.

17) Provides for enforcement of the Act, including authorizing CalRecycle to impose an administrative civil penalty on a program operator, stewardship organization, producer, manufacturer, distributor, retailer, importer, recycler, or collection site in violation of the Act not to exceed $10,000 per day, unless the violation is intentional, knowing, or reckless, then in that case not to exceed $50,000 per day.

18) Makes findings that changes proposed by this bill address a matter of statewide concern rather than a municipal affair and, therefore, apply to all cities, including charter cities.

19) Makes the Rechargeable Battery Recycling Act of 2006 and the Cell Phone Recycling Act of 2004 inoperative as of September 30, 2027, and would repeal those acts as of January 1, 2028.

Background

1) *Regulation of batteries*. The state's hazardous waste control law prohibits the disposal of batteries in the trash or household recycling collection bins intended to receive other non-hazardous waste and/or recyclable materials. Many types of batteries, regardless of size, exhibit hazardous characteristics and are considered hazardous waste when they are discarded. These include single use alkaline and lithium batteries and rechargeable lithium metal, nickel cadmium, and nickel metal hydride batteries of various sizes (AAA, AA, C, D, button cell, 9-Volt, and small sealed lead-acid batteries). These batteries, sold individually, would be "covered batteries" under AB 2440.

   If batteries end up in the trash or a recycling bin, owners/operators of solid waste transfer stations, municipal landfills, and recycling centers who discover batteries in the waste or recyclable materials are required to remove and manage the batteries separately. The facility that removes the batteries from the municipal solid waste stream or recyclable materials becomes the generator of the hazardous waste batteries and must comply with hazardous waste management regulations. Facilities that do not properly manage hazardous waste may be subject to regulatory enforcement and may be liable for monetary penalties.

2) *Battery fires*. Some batteries, particularly lithium ion, are extremely flammable and can combust or explode if they are damaged. When these batteries enter the waste stream, they are likely to be damaged during normal solid waste handling activities. When that happens, the batteries can ignite, causing fires

in solid waste vehicles and facilities and posing a risk to the health and safety of solid waste workers and the public. When a battery ignites in a solid waste facility, it is surrounded by flammable materials, allowing the fire to grow quickly. Even with advanced fire suppression equipment, fires shut down operations, impact workers and affect the air quality of nearby residents.

The increasing frequency of fires has also impacted solid waste operators' ability to find insurance. Insurance premiums and deductibles rise dramatically after a fire, if the facility can find insurance at all. At the San Carlos facility, insurance premiums increased from $180,000 per year to $1.5 million, and the facility's deductible rose exponentially, from $5,000 to $1.5 million. The costs associated with the fires caused by batteries are passed on to ratepayers.

3) *Product stewardship (stewardship)*. Product stewardship, also known as Extended Producer Responsibility (EPR), is a strategy to place a shared responsibility for end-of-life product management on the producers, and all entities involved in the product chain, instead of the general public. Product stewardship encourages product design changes that minimize the negative impact on human health and the environment at every stage of the product's lifecycle. This allows the costs of treatment and disposal to be incorporated into the total cost of a product. It places primary responsibility on the producer, or brand owner, who makes design and marketing decisions. It also creates a setting for markets to emerge that truly reflect the environmental impacts of a product, and to which producers and consumers respond. CalRecycle has developed a product stewardship framework and checklists to guide statutory proposals that would allow CalRecycle and other stakeholders to implement product stewardship programs.

4) *Successful collection of batteries remains out of reach*. Even though there are laws on the books to require the collection of some rechargeable batteries, recent information suggests that collection efforts are not succeeding. As a result, these hazardous waste batteries are ending up in the solid waste stream where they can be damaged or crushed, which can result in fires in solid waste trucks and solid waste facilities. The fact that current collection efforts are falling short does not seem to be disputed.

5) *This bill*. AB 2440 establishes a product stewardship program for loose batteries in order to improve the collection and recycling of these batteries and keep them out of the solid waste stream. Proper collection and management of batteries will reduce the number of fires at solid waste handling operations,

which will protect the health and safety of solid waste facility employees and the public and reduce air emissions associated with solid waste facility fires, and ensure that these collected batteries are managed in accordance with hazardous waste laws and regulations.

Comments

1) *Purpose of Bill.* According to the author, "Many Californians don't realize that all batteries are hazardous waste; and that throwing batteries, and products embedded with batteries, in curbside waste bins poses a threat to recycling facilities and human life. With more of our everyday items running off of batteries, it is imperative that we take swift action to stamp out the risk of devastating fires at our waste facilities and safely allow recovery of the valuable minerals inside batteries. AB 2440 will establish a comprehensive program to address this crisis and protect our communities from battery fires."

Related/Prior Legislation

SB 1215 (Newman, 2022) expands the definition of a "covered electronic device" in the existing electronic waste recycling program to include covered battery-embedded products. This bill is pending in the Assembly.

SB 289 (Newman, 2021) would have enacted the Battery and Battery-Embedded Product Recycling and Fire Risk Reduction Act of 2021, which would have required the producers of batteries and battery-embedded products to establish a stewardship program for those products, with full implementation on or before June 30, 2025. This bill was held on the suspense file in the Senate Appropriations Committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Ongoing costs of up to approximately $2 million annually (Covered Battery Recycling Fund) for the Department of Resources, Recycling, and Recovery (CalRecycle) to establish a new extended producer responsibility program. These costs would be reimbursable from the stewardship organization.
- Unknown ongoing costs for the Department of Toxic Substances Control to consult with CalRecycle, review stewardship plans, and provide inspection and enforcement.

SUBJECT: California Disaster Assistance Act: climate change

SOURCE: The Nature Conservancy

DIGEST: This bill adds "climate change" to the definition of the term "disaster," for the purposes of the California Disaster Assistance Act (CDAA); and, specifies that mitigation measures for climate change and disasters related to climate, may include, but are not limited to, measures that reduce emissions of greenhouse gases (GHGs) and investments in natural infrastructure, as specified.

Senate Floor Amendments of 8/11/22 replace the term "open space" with "natural and working lands," as specified, and add coauthors.

ANALYSIS:

Existing law:

1) Specifies that the CDAA requires the Director of the Office of Emergency Services (OES) to provide financial assistance to local agencies for their personnel costs, equipment costs, and the cost of supplies and materials used during disaster response activities, incurred as a result of a state of emergency proclaimed by the Governor, subject to certain criteria.

2) Requires the Director to authorize the replacement of a damaged or destroyed facility, whenever a local agency and the director determine that the general public and state interest will be better served by replacing a damaged or destroyed facility with a facility that will more adequately serve the present and future public needs than would be accomplished merely by repairing or restoring the damaged or destroyed facility.

3) Authorizes the Director to implement mitigation measures when the director determines that the measures are cost effective and substantially reduce the risk of future damage, hardship, loss, or suffering in any area where a state of emergency has been proclaimed by the Governor.

4) Defines "disaster" to mean a fire, flood, storm, tidal wave, earthquake, terrorism, epidemic, or other similar public calamity that the Governor determines presents a threat to public safety.

5) Defines "natural infrastructure" to mean using natural ecological systems or processes to reduce vulnerability to climate change related hazards, or other related climate change effects, while increasing the long term adaptive capacity of coastal and inland areas by perpetuating or restoring ecosystem services, as specified.

6) Defines "working landscapes" to include farms, ranges, and forest lands; and, "natural lands" to include wetlands, watersheds, wildlife habitats, and other wildlands.

This bill:

1) Expands, for the purposes of the CDAA, the definition of "disaster" to include "climate change."

2) Provides that, for climate change and disasters related to climate, mitigation measures may include, but are not limited to, measures that reduce emissions of

GHGs and investments in natural infrastructure, as defined, including, but not limited to, the preservation of natural and working lands, as specified, improved forest management, and wildfire risk reduction measures.

Background

Purpose of this bill. According to the author's office, "current law is inconsistent as to whether climate change is a hazard in and of itself, or whether it is merely a 'hazard modifier' that increases the risks associated with existing hazards like storms or floods. Assembly Bill 2442 will clarify that climate change is itself a hazard as well as a hazard modifier, which will enable better integration of climate mitigation and adaptation planning at the state and local levels as well as open up new sources of state and federal funding for climate resilience."

California Emergency Services Act. The California Emergency Services Act (ESA) grants the Governor the authority to proclaim a state of emergency in an area affected or likely to be affected when: a) conditions of disaster or extreme peril exist; b) the Governor is requested to do so upon request from a designated local government official; or c) the Governor finds that local authority is inadequate to cope with the emergency. Local governments may also issue local emergency proclamations, which is a prerequisite for requesting the Governor's Proclamation of a State of Emergency.

The ESA grants the Governor certain special powers during a declared state of emergency, which are in addition to any other existing powers otherwise granted. For example, the ESA empowers the Governor to expend any appropriation for support of the ESA in order to carry out its provisions, as well as the authority to make, amend, and rescind orders and regulations necessary to carry out the ESA. The orders and regulations shall have the force and effect of law.

Additionally, the ESA authorizes the director of OES, when the director determines there are mitigation measures that are cost effective and that substantially reduce the risk of future damage, hardship, loss, or suffering in any area where a state of emergency has been proclaimed by the Governor, to authorize the implementation of those mitigation measures. This bill, for climate change and disasters related to climate, provides that mitigation measures may include, but are not limited to, measures that reduce emissions of GHGs and investments in natural infrastructure, including, but not limited to, the preservation of natural and working lands, improved forest management, and wildfire risk reduction measures, as specified.

Local Government General Plans. Every county and city must adopt a general plan with seven mandatory elements: land use, circulation, housing, conservation, open space, noise, and safety. Except for the housing elements, state law does not require counties and cities to regularly revise their general plans. Most cities' and counties' major land use decisions—subdivisions, zoning, public works projects, use permits—must be consistent with their general plans. Development decisions must carry out and not obstruct a general plan's policies.

The Planning and Zoning Law says that the safety element's purpose is to protect the community from unreasonable risks from geologic hazards, flooding, and wildland and urban fires. In 2007, the Legislature expanded the safety elements' contents for flood hazards AB 162 (Wolk, Chapter 369, Statutes of 2007). Similarly, in 2012, the Legislature expanded the safety elements' contents for fire risks on land classified as state responsibility areas and very high fire hazard severity zones SB 1241 (Kehoe, Chapter 311, Statutes of 2012). These bills required safety elements to contain:

- Specified information about flood hazards and fire hazards.
- Based on that information, a set of comprehensive goals, policies, and objectives to protect against unreasonable flood risks and fire risks.
- To carry out those goals, a set of feasible implementation measures.

In recent years, local officials have started to focus more attention on the risks posed to communities throughout California by the potential effects of global climate change, including increased temperatures, sea level rise, a reduced winter snowpack, altered precipitation patterns, and more frequent storm events. Many local governments have adopted a local hazard mitigation plan (LHMP) to identify all of the natural hazards that threaten a community and strategies to mitigate those hazards. The Federal Emergency Management Agency (FEMA) reviews and approves every LHMP, and the LHMP expires five years after it's approved, unless amended and recertified.

Seeking to ensure that cities and counties consider risks associated with climate change, the Legislature passed SB 379 (Jackson, Chapter 608, Statutes of 2015), which requires cities and counties to review and update their general plans' safety elements to address climate adaptation and resiliency. SB 379 required the safety element to contain specified information on climate adaptation and resiliency strategies applicable to that city or county, including:

- A vulnerability assessment that identifies the risks that climate change poses to the local jurisdiction and the geographic areas at-risk from climate change impacts, including existing and planned development in identified at-risk areas.

- A set of adaptation and resilience goals, policies, and objectives for the protection of the community based on the identified climate risks.

- A set of feasible implementation measures designed to carry out those goals, policies, and objectives.

Under SB 379, cities and counties must revise their safety elements to include this information upon the next update of a city or county's LHMP after January 1, 2017, or by January 1, 2022, if the city or county has not adopted a LHMP. If the city or county has adopted a LHMP or other planning document that meets those requirements, a city or county can incorporate the LHMP or other plan by reference in the general plan instead of revising the safety element.

Cities and counties must also review and revise the information in their safety element along with each update of the housing element or LHMP, but no less than once every eight years, to identify new information relating to flood and fire hazards and climate adaptation and resiliency strategies applicable to the city or county that was not available during the previous revision of the safety element.

Natural Infrastructure. The state has various programs to ensure that California is adapting appropriately to the changing climate. The California Natural Resources Agency develops and regularly updates the "Safeguarding California Plan," which lays out the steps that all state agencies are taking to protect California's communities, infrastructure, services, and environment from climate change. The Safeguarding California Plan was last updated in 2018. Consistent with the plan, state agencies must promote the use of the plan to inform planning decisions and ensure that state investments consider climate change impacts, as well as promote the use of natural systems and natural infrastructure, when developing physical infrastructure to address adaptation.

As noted above, local agencies must also, where feasible, identify natural infrastructure that can be used in adaptation projects. They must also use existing or restored natural features and ecosystem processes where feasible. Natural infrastructure is defined to mean using natural ecological systems or processes to reduce vulnerability to climate change related hazards, or other related climate change effects, while increasing the long-term adaptive capacity of coastal and inland areas by perpetuating or restoring ecosystem services. This includes, but is not limited to, the conservation, preservation, or sustainable management of any

form of aquatic or terrestrial vegetated open space, such as beaches, dunes, tidal marshes, reefs, seagrass, parks, rain gardens, and urban tree canopies. It also includes systems and practices that use or mimic natural processes, such as permeable pavements, bioswales, and other engineered systems, such as levees that are combined with restored natural systems, to provide clean water, conserve ecosystem values and functions, and provide a wide array of benefits to people and wildlife.

California Disaster Assistance Act. The CDAA authorizes the Director of OES to administer a disaster assistance program that provides financial assistance from the state for costs incurred by local governments as a result of a disaster event. Funding for the repair, restoration, or replacement of public real property damaged or destroyed by a disaster is made available when the director concurs with a local emergency proclamation requesting state disaster assistance. Currently "disaster" is defined to include a fire, flood, storm, tidal wave, earthquake, terrorism, epidemic, or other similar public calamity that the Governor determines presents a threat to public safety.

When there is a federal declaration, FEMA pays 75%, and the state may pay up to 75% of the remaining 25% of eligible costs for any state-declared emergency (18.75%of the total). For some statutorily specified disasters, the state may pay up to 100% of the non-federal eligible disaster mitigation costs. Existing law prohibits the state share for any eligible project from exceeding 75% of state eligible costs unless the local agency has adopted a local hazard mitigation plan as part of the safety element of its general plan.

AB 2442 expands the definition of "disaster," for the purposes of the CDAA, to include "climate change."

Related/Prior Legislation

SB 558 (Caballero, 2021-22) establishes the Farmworker Disaster Relief Planning Task Force in OES, as specified. (Held on the Assembly Appropriations Committee Suspense File)

SB 462 (Borgeas, 2021) would have required the state share be up to 100% of total state eligible costs associated with the Creek Fire that started on September 4, 2020, in the Counties of Fresno and Madera. (Held on the Senate Appropriations Committee Suspense File)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/14/22)

The Nature Conservancy (source)
California Native Plant Society
CivicWell
Defenders of Wildlife

OPPOSITION: (Verified 8/14/22)

Western States Petroleum Association

ARGUMENTS IN SUPPORT: In support of this bill, The Nature Conservancy writes that, "AB 2442 will clarify that climate change is itself a hazard as well as a hazard modifier, which will enable better integration of climate mitigation and adaptation planning at the state and local levels. The lack of clarity in current law has caused confusion among state and local government officials tasked with hazard mitigation planning. For example, several counties (including San Francisco and Santa Cruz) have identified climate change as a standalone hazard in their most recent Local Hazard Mitigation Plans, while the rest treat it as a hazard modifier. The result is inconsistent approaches to climate mitigation and adaptation planning across the state, which can lead to state and local government agencies missing opportunities to integrate climate mitigation and adaptation planning, maximize benefits, and access new funding sources to fund climate resiliency."

ARGUMENTS IN OPPOSITION: In opposition to this bill, the Western States Petroleum Association writes that, "AB 2442 seems to try to drive clarity and consistency within local jurisdictional hazard mitigation plans with regards to how they address disasters that may be exacerbated by climate change. By including 'climate change' in the definition of 'disaster,' it is likely to achieve the opposite effect due to the fact that all other examples used in the definition of 'disaster' are specific events in time for which a governor could declare a disaster after the event occurs. This definition includes fire, floods, storms, tidal waves, earthquakes, terrorism, and epidemics. In order to drive consistency with the current definition of disaster under the CDAA, AB 2442 would be better served by including additional types of events which can be exacerbated by climate change to be more inclusive of the types of disasters a local jurisdiction should be preparing for. This could include examples such as extreme heat and/or cold events, droughts, etc. This change would provide significantly more direction to local jurisdictions that are designing measures in hazard mitigation plans because it would allow them to address specific disasters."

SUBJECT: Judges' Retirement System II: benefits

SOURCE: California Judges Association

DIGEST: This bill authorizes Judges' Retirement System II members to elect to retire at an earlier age or with fewer years of service than the plan's "full retirement age" factors if they defer receipt of their retirement allowance (1) until they meet full retirement age, whereupon their 3.75 benefit factor would be reduced as specified; or (2) they defer beyond the time they meet the full retirement age, as specified, whereupon they would receive their 3.75 benefit factor.

Senate Floor Amendments of 8/24/22 delete provisions related to IRC aggregation limit testing and the JRS II early retirement allowance option; and make clarifying and conforming amendments to the bill's remaining two JRS II deferred retirement options related to post-retirement health care coverage and survivor allowances.

ANALYSIS:

Existing law:

1) Provides that the CalPERS Board of Administration also serves as the board of administration for the Legislators' Retirement System (LRS), the Judges'

Retirement System (JRS I) I, and the Judges' Retirement System II System (JRS II). (GC § 9350.3, § 75005, and § 75502 (h))

2) Establishes JRS II to provide a defined benefit retirement plan for judges first elected or appointed to the bench *on or after* November 9, 1994. JRS II requires that a judge be at least 65 years of age with at least 20 years of service, or 70 years of age with at least five years of service to qualify for a JRS II defined benefit (DB) service retirement allowance equal to 3.75 percent of final compensation, multiplied by the number of years of service, up to a maximum of 75 percent of final compensation. A judge eligible for a DB monthly allowance may opt to receive the alternative lump sum benefit under the Monetary Credit Plan in lieu of the DB monthly allowance. (GC 75500 et seq.)

3) Authorizes the Monetary Credit Plan, an alternative JRS II benefit for judges who leave office prior to qualifying for a DB retirement allowance but after accruing five or more years of service. Under the plan, a judge receives a lump sum equal to the amount of his or her monetary credits plus an amount credited at the JRS II net earnings rate from the preceding year. Monetary credits are the judge's accumulation of contributions equal to 18 percent of the judge's monthly salary. (GC 75520, 75521)

4) Provides that a judge who leaves office before accruing at least five years of service shall receive only a lump sum equal to the amount of his or her contributions to JRS II. (GC 75521(a)).

This bill:

Deferred Allowance Retirement Election (DARE)

1) Authorizes judges, on and after January 1, 2024, who are not eligible to retire under the existing JRS II plan to make an election to retire at an earlier age or with fewer years of service than the plan's currently required full retirement age and service factors if they are at least 60 years of age and have 15 years or more of service, or 65 years of age with a minimum of 10 years of service as follows:

    - Deferred Allowance Retirement Election 1 (DARE 1) authorizes a judge to retire prior to full retirement age and receive a retirement allowance when the judge reaches full retirement age with a reduction to the full retirement benefit factor of 3.75 percent. The reduction would equal .07 percent for each year before full retirement age the judge retired.

- Deferred Allowance Retirement Election 2 (DARE 2) authorizes a judge to retire prior to full retirement age and still receive the full retirement benefit factor of 3.75 percent but requires the judge to wait an additional time beyond full retirement age to receive the retirement allowance. The additional time required is .22 years for each year prior to full retirement age the judge retired.

2) Requires CalPERS to treat a DARE retirement like a normal service retirement for the purposes of the code's restrictions on postretirement work and for the exception to reinstating that allows retired judges to continue to work in courthouses through the Judicial Council's Temporary Assigned Judges Program.

3) Makes the office of a judge who takes a DARE retirement vacant on the date of the judge's retirement.

4) Requires a judge who elects to take a DARE retirement to elect, within 30 days after the effective date of the retirement, DARE 1 or DARE 2. Under rules adopted by the board, the time for the election may be extended in cases of illness or other hardship, but once made, the election shall be final and irrevocable.

5) Deems a judge who takes a DARE but fails or refuses to make an election between DARE 1 and DARE 2 within the time allowed, to have elected DARE 1, the option that begins the allowance upon reaching full retirement age but reduces the 3.75% benefit factor by .07 % for each year the judge deferred prior to full retirement age.

6) Defines "full retirement age" for purposes of the DARE options to mean the age and years of service at which a judge would have become eligible to retire under the current plan's requirements if the judge had continued to accrue years of service credit rather than retire pursuant to the DARE options.

7) Prohibits a DARE retirement allowance from exceeding 75 percent of the judge's final compensation.

8) Prohibits the calculation of DARE retirement allowance from including more than 20 years of service.

9) Sets a sunset date of January 1, 2029, for the DARE options and provides for the restoration of existing law upon the sunset date.

Health Benefit Plan Provisions

10) Authorizes a judge who elects one of the DARE options to continue receiving health care coverage for themselves and their family members, as specified, provided the judge assumes payment of all contributions, including those provided by the employer, and pays an additional 2 % of the premium amount for reasonable administrative expenses incurred by CalPERS or CalHR.

11) Provides that when the judge begins receiving their DARE retirement allowance they become a plan annuitant and thereupon become eligible to receive the employer's contribution toward the premium to continue their health coverage enrollment, enroll in a health benefit plan within 60 days, or enroll in a health benefit plan during future open enrollment periods, as specified.

12) Provides that the surviving spouse of a deceased judge who retired under a DARE option but had not begun receiving their allowance before their death may continue receiving health care coverage for themselves and their family members, as specified, provided the surviving spouse assumes payment of all contributions, including those provided by the employer and pays an additional 2 % of the premium amount for reasonable administrative expenses incurred by CalPERS or CalHR.

13) Provides that when the surviving spouse begins receiving their retirement allowance they become a plan annuitant and thereupon become eligible to receive the employer's contribution toward the premium to continue their health coverage enrollment, enroll in a health benefit plan within 60 days, or enroll in a health benefit plan during future open enrollment periods, as specified.

14) Provides that the bill's DARE option continuing health benefit plan provisions become operative January 1, 2024, and sunset January 1, 2029, whereupon the bill provides for the restoration of existing law upon the sunset date.

Survivor Allowances

15) Provides that a surviving spouse of a judge who was not eligible to retire under the full retirement age formula but was eligible to retire under a DARE option shall, within 90 days after the judge's death, elect to receive either of the following:

- A monthly retirement allowance equal to one-half of the judge's benefit factor computed as specified under DARE 1 as of the date of death,

multiplied by the judge's final compensation multiplied by the number of years of service credit. CalPERS shall adjust this allowance for changes in the cost of living as specified.

- The judge's lump sum monetary credits, as specified.

16) Changes the amount that a surviving spouse of a judge who was eligible to retire under the full retirement age formula and who *retired for disability* receives. Current law provided the surviving spouse 50 percent of the deceased judge's *last monthly retirement* allowance. This bill would provide the surviving spouse 50 percent of the judge's last *unmodified* allowance.

17) Provides that a surviving spouse of a retired judge who was receiving a retirement allowance under a DARE option shall receive a monthly allowance equal to 50 percent of the deceased judge's unmodified monthly retirement allowance, which CalPERS shall adjust for changes in the cost of living as specified.

18) Provides that a surviving spouse of a judge who elected to retire and receive a retirement allowance under a DARE option, but who died before receiving the retirement allowance, shall receive a monthly allowance equal to 50 percent of the unmodified monthly retirement allowance the deceased judge would have received under the DARE option had the judge been living and receiving the retirement allowance, beginning the date the judge would have been eligible to receive the benefits. CalPERS shall adjust this allowance for changes in the cost of living as specified.

19) Clarifies that a monthly allowance payable to a surviving spouse is payable commencing upon the death of the judge and continuing until the death of the surviving spouse except where a judge died before receiving an allowance under a DARE option. In that event, the surviving spouse's allowance will commence when the judge would have begun receiving an allowance had he lived.

20) Provides that the bill's DARE survivor allowance provisions become operative January 1, 2024, and sunset January 1, 2029, whereupon the bill provides for the restoration of existing law upon the sunset date.

Background

JRS II Early or Deferred Retirement Option

The existing JRS II plan requires a judge to remain on the bench until the judge obtains the mandatory minimum age and service (age 65 with 20 or more years of service or age 70 with less than 20 but at least 5 years of service) to receive a monthly pension allowance and the associated post-retirement health care benefit. The system, known colloquially as "cliff vesting", means a member who does not meet vesting requirements receives no pension allowance nor post- retirement health care benefits but rather receives the alternative, lump sum Monetary Credit benefit based on the member's contributions and a defined interest rate.

The author contends that the benefit design causes many judges facing job burnout or a serious family or health crisis in their later years to remain on the bench when not emotionally or physically able to do the work, lest they lose their DB retirement allowance, their post-retirement health benefits, and the derivative benefits that would flow to their survivors or beneficiaries upon the judge's death.

This bill would allow JRS II members to choose to retire and defer receipt of their retirement allowance pursuant to the DARE options, as specified, so that they could retire at an earlier age or with fewer years of service than required by existing law without losing their right to eventually receive a monthly retirement allowance along with the associated health care and survivor allowance benefits.

Interaction with Post-Retirement Rules/ Opportunities

Under existing law, retired judges are exempt from Public Employees' Pension Reform Act post-retirement employment limitations. Retired judges may apply to the Judicial Council's Temporary Assigned Judges Program and upon approval of the Chief Justice work as assigned judges in the state's courts, as needed and requested by presiding judges. Under the program, retired judges are not required to reinstate and may receive their retirement allowance plus a statutory specified rate of pay for their service approximating 92% of the court's pay for its judge of record. This program would be available to judges who retired under this bill's DARE options.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee analysis of the prior version:

- CalPERS would incur minor and absorbable costs to revise the application of IRC Section 415 benefit limits for impacted members. According to CalPERS,

any benefit costs resulting from the bill are already accounted through existing contributions; consequently, there is no projected change in the state's contribution rate for PERS, LRS, JRS or JRS II.

- CalPERS anticipates one-time administrative costs to implement three additional retirement benefit frameworks for the JRS II plan. The magnitude would be in the low millions of dollars (special fund). Cost drivers would include system changes to process and administer the new benefit frameworks, staff training, publication revisions, and member education and outreach. Ongoing costs would be minor or absorbable.

SUPPORT: (Verified 8/25/22)

California Judges Association (source)

OPPOSITION: (Verified 8/25/22)

None received

ARGUMENTS IN SUPPORT: According to the author:

"AB 2443 allows judges that are currently ineligible to retire at 60 years of age with 15 years or more of service, or 65 years of age with a minimum of 10 years of service, by electing for an alternative specified monthly allowance."

"The bill will base the retirement allowance on the judge's final compensation and years of service credit adjusted by certain percentages that vary in relation to full retirement age and specifies that the allowance not exceed 75% of a judge's final compensation. Thus, providing new options that do not constitute an enhanced benefit, but provide additional flexibility."

SUBJECT: Civil rights: businesses: discrimination and harassment of customers: pilot program

SOURCE: Stop AAPI Hate

DIGEST: This bill directs the California Civil Rights Department (CRD, formerly known as the Department of Fair Employment and Housing or DFEH) to establish a pilot program that recognizes businesses for creating safe and welcoming environments free from discrimination and harassment of customers.

Senate Floor Amendments of 8/24/22 clarify that certification under the pilot program does not shield a business establishment against liability for civil rights violations and may not be used as evidence in court to defend against an allegation of violating civil rights laws.

ANALYSIS:

Existing law:

1) Prohibits, pursuant to the Unruh Civil Rights Act, all business establishments of any kind whatsoever from discriminating against customers on the basis of the actual or perceived sex, race, color, religion, ancestry, national origin, disability, medical condition, marital status, or sexual orientation, and on any other arbitrary basis. (Civ. Code § 51(b), (g); *In re Cox* (1970) 3 Cal.3d 205, 216.)

2) Establishes the CRD to combat discrimination in housing and employment. Specifies that the CRD has the power to receive, investigate, conciliate, mediate, and prosecute complaints alleging practices made unlawful by, among other things, the Unruh Civil Rights Act. (Gov. Code §§ 12900-12930.)

This bill:

1) Directs CRD to establish a pilot program that recognizes businesses for creating safe and welcoming environments free from discrimination and harassment of customers, and to establish criteria that a business must meet in order to qualify for recognition under the program, including, but not limited to:

    a) compliance with consumer civil rights laws;
    b) offering additional training to educate and inform employees or build skills;
    c) informing the public of their rights to be free from discrimination and harassment and how to report violations;
    d) outlining a code of conduct for the public that encourages respectful and civil behavior; and
    e) any other actions designed to prevent and respond to discrimination and harassment regardless of the identity of the perpetrator.

2) Instructs the CRD to provide a certificate to qualifying businesses that may be prominently displayed on site and publish on its internet website a database of businesses receiving that certificate.

3) Specifies that receipt of a certificate under the pilot program does not establish and is not relevant to any defense against claims brought under existing law.

4) Directs CRD, on or before January 1, 2028, to evaluate whether that recognition is effective, including, at a minimum, whether it affects customer behavior,

incentivizes compliance among businesses with consumer civil rights protections or reduces the incidence of discrimination and harassment at businesses.

5) Sunsets on July 1, 2028.

Comments

Evidence of the problem the bill is intended to address

Disturbingly, there is ample evidence of a large increase in hate-motivated harassment and violence over the past several years. The data suggests that a significant part of this harassment and violence takes place at business establishments. The author points to the following reports, among other sources, as evidence of the need for this bill:

- The sponsor of this bill reports receiving nearly 11,000 reports of hate incidents nationwide since March 2020, including over 4,100 reports from California. The vast majority of what has been reported does not meet the definition of a hate crime. Two-thirds of the reports include verbal harassment.[1]
- In California, over a quarter of the hate incidents reported to the sponsor of this bill took place at a business. A majority of these incidents took place in service or retail establishments, such as grocery stores, restaurants, big box retailers, and their parking lots. In the majority of cases, customers reported being verbally harassed by another customer or passerby.[2]
- A late 2021 survey of AAPI individuals in Los Angeles, found that half of respondents experienced racial discrimination, with 40 percent reporting racial discrimination in a grocery store.[3]
- More than a third of Black Americans surveyed in 2021 responded that they personally were treated unfairly while shopping during the last 30 days, representing about a 10 percent increase beyond previously reported levels.[4]

Certificate program for good actors

This bill establishes a new certification program within CRD. Under this program, CRD would give recognition to businesses that adopt policies and practices designed to create safe and welcoming environments free from discrimination and harassment of customers. CRD would be tasked with developing the details of the certification program, but the bill explains that it would include elements like offering employees additional training, informing the public of their civil rights in relation to the business, and outlining a code of conduct for patrons of the business that encourages respectful and civil behavior.

The purpose of the certificate is, of course, to operate as a carrot: businesses receiving the certificate could display it as a point of pride and a way of gaining favor with customers.

As the state's promoter of civil rights, CRD makes sense as the agency to carry out this certification program. On the other hand, because CRD's role includes prosecuting civil rights violations, it may still be wise to include a provision in the bill underscoring that receipt of a certificate from CRD under the program would not provide the business with any particular immunity or defense against an enforcement action by CRD.

Related legal duties of businesses

Business establishments in California have certain legal duties in relation to discrimination and harassment. In relation to their customers, the Unruh Civil Rights Act prohibits businesses from discriminating against their customers for arbitrary reasons including race, ethnicity, national origin, gender, and sexual orientation, among other things. (Civ. Code § 51.) In relation to their employees, the Fair Employment and Housing Act prohibits businesses from discriminating on account of a similar set of characteristics. (Gov. Code § 12940.)

In the context of employment discrimination, the law treats harassment as a form of discrimination when the harassment is based on the target's protected characteristics, when the harassing behavior is offensive or unwelcome to the target, and when the harassment reaches the point of becoming so severe or pervasive that a reasonable person would find that it creates a hostile environment. (*Meritor Savings Bank v. Vinson* (1986) 477 U.S. 57; *Aguilar v. Avis Rent A Car System, Inc*. (1999) 21 Cal.4th 121.) Employment discrimination law applicable in

---

[4] Jones and Lloyed. *Black Americans' Reports of Mistreatment Steady or Higher* (July 27, 2021) Gallup **https://news.gallup.com/poll/352580/black-americans-reports-mistreatment-steady-higher.aspx** (as of Jun. 11, 2022).

California also specifies that a business' legal duty to protect its employees against discriminatory harassment extends to situations in which the source of the harassment is a third party, at least to the degree to which the employer has control or legal responsibility over the third party. (Gov. Code § 12940(j)(1).)

The employment discrimination law just described is firmly established. In contrast, it is less clear what legal duty, if any, a business has to prevent discriminatory harassment of a customer by a third party on the business premises. Courts might well draw an analogy to the housing and employment discrimination contexts and conclude that the law imposes some duty on businesses to take action to prevent a customer from having to endure discriminatory harassment at the hands of a third party, at least where the harassment is sufficiently severe or pervasive that a reasonable customer would perceive it as hostile and offensive and where the business has at least some control over the customer. However, there do not appear to be any decisions that have yet addressed the issue directly.

Even if the courts held that businesses have a legal duty to prevent discriminatory harassment by third parties, only severe and persistent behavior would be actionable. There would still be no legal recourse for the many incidents that the courts would not consider severe or pervasive enough to constitute discriminatory harassment in the legal sense, but that nonetheless operate to marginalize and oppress their targets in a way that should not be acceptable in a society that values equality and inclusion. The certificate program proposed by this bill incentivizes businesses to take proactive steps to prevent such incidents.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, costs in the high tens of thousands through 2027-2028 to CRD to establish a pilot program to recognize businesses for their activities aimed at reducing customer-on-customer harassment in the marketplace.

ARGUMENTS IN SUPPORT: According to the author, "California has seen a rise in hate against Asian Americans and Pacific Islanders (AAPI) during the COVID-19 pandemic, from brutal attacks against elderly Asian Americans to the ongoing verbal harassment of AAPI women. Many AAPIs continue to fear being in public spaces, and many hate incidents occur at retailers and other businesses. More needs to be done to ensure that individuals can go into the public without fearing for their safety or that they will be discriminated against."

As sponsor of this bill, Stop AAPI Hate writes, "This bill will promote the safety and well-being of customers at businesses by […] recognizing businesses that

foster safe and welcoming environments. AAPIs are not alone in experiencing this harassment and discrimination. Black customers have long reported unfair treatment while shopping, according to more than two decades of Gallup polling. Black, Asian, and Hispanic adults have reported heightened racialized harassment during the pandemic at rates higher than white adults."

SUBJECT: Postsecondary education: student housing: data collection

SOURCE: Author

DIGEST: This bill requires the office of the Chancellor of the California State University (CSU) and the Office of the Chancellor of the California Community Colleges (CCC), and requests the Office of the President of the University of California (UC), to require each campus that provides student housing to post on its external and internal Internet websites specified information about the campus housing stock, the number of students requesting housing, and how many students are on waitlists.

ANALYSIS:

Existing law:

1) Requires the CSU, and request the UC, to conduct a needs assessment to determine the projected student housing needs, by campus, from the 2022–23 fiscal year (FY) to the 2026–27 FY and create a student housing plan, with a focus on affordable student housing. (Education Code § 66220)

2) Establishes basic needs centers and basic needs coordinators on CCC campuses by July 1, 2022, to support students in finding resources to alleviate their basic needs including food and housing insecurities, and requires CCC campuses to report data to the office of the CCC Chancellor's Office on basic needs services and the number of students who are served. Existing law requires this report to be made available to the Legislature annually beginning on May 1, 2023. (EC § 66023.5)

3) Requires each campus of the CSU, and requests each campus of the UC, to post on its website annually by February 1, information about the market cost of a one-bedroom apartment in the areas surrounding that campus where its students commonly reside. Existing law requires campuses to exercise due diligence and to consult bona fide and reliable sources of current information about local housing market costs, as specified. Existing law requires that the information be posted in the same location on the campus website where the housing cost estimates for off-campus students are posted. (EC § 66014.2)

4) Requires, the United States Secretary of Education to make publicly available on the College Navigator website specified information about each institution of higher education that participates in federal financial aid programs, which includes, among many other things, the cost of attendance for first-time, full-time undergraduate students who live on campus and for those who live off-campus. (United States Code, Title 20, § 1015a)

This bill:

1) Requires the Office of the Chancellor of the CSU and the Office of the Chancellor of the CCC, and requests the Office of the President of the UC, to require each campus that provides campus-owned, campus-operated, or campus- affiliated student housing to post on its external and internal internet websites, at least twice each academic year, all of the following information:

   a) The number of enrolled students.

   b) Existing campus housing stock, including, but not limited to, the number of available beds on campus.

   c) The number of students on the campus housing waiting list, and how many students have removed themselves from the waiting list since the last report.

d) If available, the number of students who request campus-owned, campus-operated, or campus- affiliated student housing once they are no longer eligible for guaranteed housing.

e) If available, the number of incoming freshmen, transfer students, and international students requiring campus-owned, campus-operated, or campus- affiliated student housing.

2) Requires this data to be collected by the on-campus department or center that is tasked with providing on-campus and off-campus housing assistance to students.

3) Requires the Office of the Chancellor of the CSU and the Office of the Chancellor of the CCC, and requests the Office of the President of the UC, to submit an annual report with the information described in 1) above (each segment submits one report compiled of all campus-level data) to the Legislature, with the first report being due by October 15, 2023.

Comments

Need for this bill. According to the author, "The State has generally regarded meeting student housing needs as the responsibility of higher education institutions. However, since campuses do not routinely provide data on campus occupancy rates and waitlists for student housing, we are unaware of whether our public institutions of higher learning are meeting those housing needs. By providing information on the number of available beds and the number of students on housing waitlists at each campus, AB 2459 will allow the Legislature to exercise proper oversight and accurately assess student housing needs. It will also provide students, particularly under-resourced students, with more complete and accurate information to make housing decisions at their campuses."

What do we know about student housing needs? According to the 2021 Public Policy Institute of California (PPIC) report, "Keeping College Affordable for California Students," living expenses, housing, books, and food expenses have outpriced the cost of tuition. The report noted that housing expenses are now the largest cost associated with attending college and is a barrier preventing many students from seeking higher education. In October 2019, the PPIC reported in "Making College Affordable," on-campus housing at the UC made up 45 percent of the total cost of attendance, and at the CSU, housing costs made up 53 percent of the total cost of attendance. In 2019, the California Student Aid Commission published the results of the Student Expenses and Resources Survey (SEARS),

which found 35 percent of students experienced one or more conditions of housing insecurity and established a correlation between housing insecurity and lower completion, persistence to degree, and credit attainment.

What housing information is currently available? Each CSU campus is required, and each UC campus is requested, to annually post on its website information about the market cost of a one-bedroom apartment in the areas surrounding that campus where its students commonly reside.

Recently enacted legislation requires the CSU, and requests the UC, to conduct a needs assessment to determine the projected student housing needs, by campus, from 2022–23 to 2026–27, and create a student housing plan with a focus on affordable student housing. Housing plans are to outline how the segment will meet the projected student housing needs, by campus, and include the specific actions to be taken each year. The students housing plans are to be reviewed and updated every three years after July 1, 2022, and include the specific actions to be taken in the next five years.

This bill applies only to campuses that provide student housing and would provide additional information specific to on-campus housing and about the pool of the student body that is seeking on-campus housing. Committee staff believes that all of the information this bill requires to be posted is currently being collected by campuses. This could provide a broader perspective of the overall housing situation for students at each campus and across postsecondary education segments. This bill requires campus-based data to be compiled into systemwide reports, thereby allowing housing information about each segment, and each campus of the segments, to be available on one site. *It is possible, but not certain, that the student housing plans to be developed for 2022-23 through 2026-27 will include the information specified in this bill.*

As noted by the author, "campuses set their own housing goals, and campus goals vary. Many campuses aim to house all interested first-year students. Some campuses aim to house first- and second-year students. In addition to single undergraduate students, university campuses typically have goals to accommodate a particular share of graduate students and students with families." The author cites the need to understand how California's public postsecondary education campuses and segments are meeting students' current and future housing needs.

Budget trailer bill language established the Higher Education Student Housing Grant Program in 2021, to increase capacity and expand the inventory of student housing at public postsecondary education institutions, particularly to help foster

future enrollment growth and affordability by reducing the cost of student housing, especially for lower-income students. The program is to receive a total of $2 billion over three years for three rounds of grants. Of the total $2 billion, statute specifies $400 million (20 percent) is for UC, $600 million (30 percent) is for CSU, and $1 billion (50 percent) is for CCC. Additionally, up to $25 million of the total $2 billion is available for initial planning and feasibility studies at community colleges. Most notably, statute specifies rents for the state-funded on-campus housing units cannot exceed 30 percent of 50 percent of a campus's area median income. **[**The 2022-23 Budget: Student Housing (cccco.edu)]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

1) This bill requires campus-based data to be compiled into systemwide reports, thereby allowing housing information about each segment, and each campus of the segments, to be available on one site. While all of this information is likely already being collected by community college campuses, they may now be eligible to seek reimbursement for the related costs if the Commission on State Mandates determines that the activities constitute a state mandate. The extent of the costs is unknown, but could be in the tens of thousands to low hundreds of thousands of dollars statewide. (Proposition 98 General Fund).

2) The UC and CSU indicate that while some of the bill's provisions need clarification, the costs resulting from the bill should be minor and absorbable within existing resources.

3) The Chancellor's Office estimates one-time General Fund costs of $10,000 to establish the data element and add it to its NOVA reporting system and ongoing staffing costs of $18,000 to produce the report.

SUBJECT: Rehabilitation services: persons with vision loss

SOURCE: California Council of the Blind

DIGEST: This bill expands independent living services provided by the Department of Rehabilitation (DOR) that are currently available to adults over age 55 to all adults who are blind or have low vision (B/VI). This bill allows DOR to provide independent living services through grants to private organizations with demonstrated expertise in serving B/VI adults, including current grantees under the Older Individuals who are Blind (OIB) program, as provided.

ANALYSIS:

Existing federal law:

1) Defines an "older individual who is blind" to mean an individual age 55 or older whose significant visual impairment makes competitive employment extremely difficult to attain but for whom independent living goals are feasible. *(29 United States Code (USC) 796(j))*

2) Establishes a formula grant program for states to provide independent living services to older individuals who are blind. (*29 USC 796(k))*

3) Establishes vocational rehabilitation services to empower individuals with disabilities to maximize employment, economic self-sufficiency, independence, and inclusion and integration into society through statewide workforce development systems, as provided. *(29 USC 701 et seq.)*

Existing state law:

1) Provides that any individual with a disability, as defined, who requires vocational rehabilitation services to prepare for, enter, engage in, or retain gainful employment, is eligible for vocational rehabilitation services. *(WIC 19103)*

2) Authorizes DOR to establish orientation centers for the blind to provide intensive residential services designed for maximum vocational and personal rehabilitation and for the preparation of blind persons for useful and remunerative work in trades, professions, private business, private industry, or public service. *(WIC 19500 et seq.)*

3) Authorizes DOR to appoint counselor-teachers to provide individual guidance and training to the adult blind of the state. *(WIC 19525)*

4) Establishes the Business Enterprises Program for the Blind program, which authorizes blind persons to operate vending facilities on state property for the purpose of providing remunerative employment, enlarging the economic opportunities, and stimulating independence. *(WIC 19625)*

This bill:

1) Requires DOR to establish a grant program to provide services to promote independent living to adults who are B/VI, and who are not eligible to receive vocational rehabilitation services pursuant to federal law.

2) Requires the grant program to assist adults who are B/VI, including those individuals who may be at risk of institutionalization or who wish to transition into the community from an institutionalized setting, by providing vision rehabilitation services that will enable them to live independently.

3) Requires DOR to implement the program subject to an appropriation of funds in the annual Budget Act or through the use of any other funds made available for the purposes of the program.

4) Requires DOR to implement the program by awarding grants to private organizations with demonstrated expertise in serving adults who are B/VI. Allows DOR to select private organizations awarded grants under the most recent solicitation of grantees under the OIB program without using a competitive award process.

5) Removes language allowing a counselor-teacher to teach "typing" and "household arts and crafts" to an adult individual who is blind, and allows a counselor-teacher to teach "independent living skills and provide assistive technology training" to an adult individual who is blind.

6) Makes other technical changes.

Background

Department of Rehabilitation. DOR provides vocational rehabilitation and independent living programs for individuals with disabilities in California. Vocational rehabilitation services are designed to help job seekers with disabilities obtain competitive employment in integrated work settings. Independent living services may include peer support, skill development, systems advocacy, referrals, assistive technology services, transition services, housing assistance, and personal assistance services.

DOR Programs for B/VI Individuals. DOR offers several specialized programs for individuals who are B/VI through the Specialized Services Division. The Blind Field Services program provides specialized and comprehensive vocational rehabilitation services to B/VI Californians and implements the federal Workforce Innovation and Opportunity Act (WIOA) by providing pre-employment transition services to students with disabilities. The Business Enterprises Program provides training and support to enhance self-employment for B/VI individuals through operating vending facilities such as cafeterias and stores on public property. The Orientation Center for the Blind is a DOR-owned and operated residential training facility located in Albany, California that assists B/VI individuals with adjusting to vision loss, preparing for success in post-secondary education and vocational training, and obtaining competitive integrated employment.

Discontinuation of the "Homemaker" employment outcome. Prior to the implementation of the federal WIOA of 2014, DOR provided independent living services to some B/VI individuals through its vocational rehabilitation program by using the employment outcome known as "homemaker." WIOA significantly amended the Rehabilitation Act of 1973 to place a heightened emphasis on

competitive integrated employment, forcing the discontinuation of the "homemaker" employment outcome and leaving those B/VI individuals under age 55 who provide unpaid family care in the home or otherwise do not have a competitive employment goal ineligible to receive independent living services.

Older Individuals who are Blind Program. The OIB program provides services to B/VI individuals ages 55 and older to assist them with independent living, as well as providing training and skill building for professionals serving the older B/VI population. The OIB program awards federal funding to partner organizations in 56 counties. Services provided by partner organizations include: orientation and mobility, adaptive equipment/assistive technology, transportation, activities of daily living or independent living skills, adjustment counseling, self-advocacy, low vision training, and other services to enhance participation in and integration with the larger community.

This bill, subject to an appropriation or through the use of funds made available for the purpose, expands the services that are currently available to Californians who are over age 55 through the OIB program to any B/VI adult who is not eligible for vocational rehabilitation services. As a part of this expansion, this bill allows DOR to select private organizations already providing services to adults over age 55 through the OIB program, without using a competitive process. Services may include the provision of eyeglasses and other visual aids; mobility training, Braille instruction, guide services, reader services, transportation, independent living skills training, peer counseling, and other independent living services, as defined.

Comments

According to the author, "Persons who lose all or most of their vision face a variety of challenges if they are to continue to live independently. Consider the challenges that an individual experiencing vision loss faces—the need to relearn how to navigate their daily routine without the use of sight. The simple tasks of walking around their home environment, cooking a meal in their kitchen, cleaning their home all need to be adjusted. Many services offered by our state to individuals who are blind focus on future employment and not the immediate needs they face. AB 2480 will establish a grant program to provide transitional services to all adults who are blind. Providing these vital services for all adults experiencing vision loss will support these individuals in addressing the challenges they face and support maintaining their independence."

Related/Prior Legislation

SB 105 (Burton, Chapter 1102, Statutes of 2002) established the Division of Services for the B/VI and the Deaf and Hard of Hearing within DOR.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown General Fund cost pressures, likely millions of dollars, to provide expanded services.

- No fiscal impact to DOR.

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 61-0, 5/5/22 (Consent) - See last page for vote

SUBJECT: Fairs: district agricultural associations: sponsorship fees

SOURCE: Author

DIGEST: This bill authorizes a district agricultural association to pay sponsorship fees and join and participate in affairs of any similar organization that deals with subjects related to the powers and duties of the association.

ANALYSIS:

Existing law:

1) Establishes district agricultural associations *(Business and Professions Code Section 19622.1).*

2) Authorizes an association to pay membership fees to participate in affairs of any organization that has the following purposes *(Food and Agriculture Code Section 4056)*:

   a) Interchange of information that relates to livestock, poultry, and other agricultural animals and products.

   b) Conduct and manage fairs.

c) Conduct horseracing meetings.

3) Authorizes an association to pay membership fees, join, and participate in affairs of any similar organization that deals with subjects related to powers and duties of the association *(Food and Agriculture Code, Section 4056).*

This bill authorizes an association to pay sponsorship fees and join and participate in affairs of any similar organization that deals with subjects related to the powers and duties of the association.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/1/22)

None received

OPPOSITION: (Verified 8/1/22)

None received

ARGUMENTS IN SUPPORT: According to the author:

> California's fairs operate under the guidelines of the Department of Food and Agriculture - Division of Fairs and Expositions. Collectively they host events that are attended by nearly ten million Californians and tourists annually. While current law authorizes fairs to pay membership fees to an association that manages a fair, horse racing program, or livestock show, AB 2487 clarifies that fairs can also pay sponsorship fees which are fees collected from the sale of any and all title, signage, billboard, and secondary advertisements.

SUBJECT: County employees' retirement: disallowed compensation: benefit adjustments and calculations

SOURCE: Association of Orange County Sheriff's Department
California Professional Firefighters

DIGEST: This bill makes several changes to the County Employees Retirement Law of 1937 ('37 Act or CERL) regarding pension calculation adjustments arising from erroneous inclusion of disallowed compensation, including requiring participating county employers to do the following: (1) reimburse their respective retirement system for pension overpayments made to peace officer and firefighter retirees arising from erroneous employer reporting of disallowed compensation, and (2) pay affected retirees a lump sum amount equal to 20 percent of the actuarial equivalent present value of a retiree's "lost" pension going forward due to the system's recalculation of the retiree's benefit to exclude the disallowed compensation.

Senate Floor Amendments of 8/17/22:

1) Amend the definition of "compensation earnable" to provide that, to the extent

a retirement system has not defined "grade" when considering whether an employer has provided compensation to a group of like employees, the system may define "grade," to mean a number of employees considered together because they share similarities in job duties, schedules, unit recruitment requirements, work location, collective bargaining unit, or other logical work-related grouping. Thus, a system that has not already defined "grade' may, under this definition, subdivide groups of employees and include the pay provided to a subgroup in the subgroup's employee pensionable earnings, if applicable.

2) Narrow the exception that excludes from the bill's mandates those county retirement systems that have already initiated a process to adjust pensions and recover pension overpayments resulting from the reporting of disallowed compensation by defining "initiated a process" to mean the system must have already begun collecting overpayments or adjusted the retirement allowance of a retired member. Thus, systems that have already developed adjustment and recovery plans but not have yet begun collections or adjustments would have to follow the bill's mandates.

3) Require an employer to have reported compensation and made contributions thereon for at least two instead if threw years prior to the member's final compensation for that member to be eligible for the bill's replacement benefits.

4) Provide the employer up to four instead of three years to complete payment of the replacement benefit to the retiree.

ANALYSIS:

Existing law:

1) Provides, among other things under the California Constitution that, "the members of the retirement board of a public pension or retirement system shall discharge their duties with respect to the system solely in the interest of, and for the exclusive purposes of providing benefits to, participants and their beneficiaries, minimizing employer contributions thereto, and defraying reasonable expenses of administrating the system." (Section 17, Art. XVI, Cal. Const.)

2) Establishes the County Employees Retirement Law (CERL) that governs 20 independent county retirement associations and provides for retirement systems for county and district employees in those counties adopting its provisions. Currently, 20 counties operate retirement systems under the CERL and these systems are commonly referred to as "1937 Act system" or "'37 Act

systems." These systems are regulated by, and administer the CERL, that is also commonly referred to as the "'37 Act." (Government Code § 31450 et seq.)

3) Establishes that the purpose of the CERL is to recognize a public obligation to county and district employees who become incapacitated by age or long service in public employment and its accompanying physical disabilities by making provision for retirement compensation and death benefit as additional elements of compensation for future services and to provide a means by which public employees who become incapacitated may be replaced by more capable employees to the betterment of public service without prejudice and without inflicting a hardship upon the employees removed. (GC §31451)

4) Establishes the Public Employees' Pension Reform Act of 2013 (PEPRA) – a comprehensive reform of public employee retirement that, among other things, increased contributions towards retirement, decreased benefit formulas, and increased the age of retirement that apply to new members of the system first hired on or after January 1, 2013, and made changes that apply to all members towards resolving unfunded liabilities, the manipulation of compensation for purposes of calculating a retirement allowance (i.e., pensions spiking), double-dipping, and other prescribed best practice measures. (GC § 7522.02 et seq.)

5) Defines, under the CERL, "compensation" to mean the remuneration paid in cash out of county or district funds, plus any amount deducted from a member's wages for participation in a deferred compensation plan, as provided, but does not include the monetary value of board, lodging, fuel, laundry, or other advantages furnished to the member. (GC § 31460)

6) Defines, pursuant to the CERL, "compensation earnable" by a member to mean the average compensation as determined by the board, for the period under consideration upon the basis of the average number of days ordinarily worked by persons in the same grade or class of positions during the period, and the same rate of pay. Among other things, "compensation earnable" expressly does not include certain types or forms of compensation paid to, and when they were paid that, enhance a member's retirement benefit under the system. (GC § 31461)

7) Establishes that when a county or district reports compensation to the system, it must identify the pay period in which the compensation was earned regardless of when it was reported or paid, and prescribes the reporting requirements and limitations on compensation earnable. (GC § 31542.5)

8) Establishes that "compensation earnable" must not include overtime premium pay other than premium pay for hours worked within the normally scheduled or regular working hours that are in excess of the statutory maximum workweek or work period applicable to the employee under federal law, as specified. (GC § 31461.6)

9) Defines "final compensation" to mean the average annual compensation earnable by a member during any three years elected by a member at or before the time they file an application for retirement, or, if they fail to elect, during the three years immediately preceding their retirement. If a member has less than three years of service, their final compensation must be determined by dividing their total compensation by the number of months of service credited to them and multiplying by 12. (GC § 31462)

10) Prescribes how a '37 Act system determines final compensation, including final compensation based on compensation for one year (if adopted by a county), and in relation to intermittent members, subject to certain conditions where applicable. (GC §§ 31462.05, 31462.1, and 13462.2)

This bill:

1) Amends the definition of "compensation earnable" in the '37 Act to provide that, to the extent a retirement system has not defined "grade" when considering whether an employer has provided compensation to a group of like employees, it may define "grade," to mean a number of employees considered together because they share similarities in job duties, schedules, unit recruitment requirements, work location, collective bargaining unit, or other logical work-related grouping. Thus, a system that has not already defined "grade' may, under this definition, subdivide groups of employees and include the pay provided to a subgroup in the subgroup's employee pensionable earnings, if applicable.

2) Defines the following terms for purposes of the bill's provisions:
   a) "Agreement" means a memorandum of understanding or collective bargaining agreement.
   b) "Alameda" means the Supreme Court case of Alameda County Deputy Sheriff's Association v. Alameda County Employees' Retirement Association (2020) 9 Cal.5th 1032 or its holding.
   c) "Disallowed compensation" means compensation reported for a sworn peace officer or firefighter of the retirement system that the system subsequently determines is not in compliance with PEPRA, Alameda,

Section 31461, or the system's administrative regulations, through no fault of the sworn peace officer or firefighter.

d) "Employer" means the appropriate applicable county, agency, or district standing in relationship between the employee and the system.
e) "Initiated a process" means a system has begun collecting any portion of an overpayment from any affected retired member, survivor, or beneficiary or adjusted the retirement allowance of any affected retired member, survivor, or beneficiary due to a determination of disallowed compensation.
f) "PEPRA" means the California Public Employees' Pension Reform Act of 2013 (Article 4 (commencing with Section 7522) of Chapter 21 of Division 7 of Title 1).
g) "System" means a retirement association or system established by the 1937 County Employees Retirement Act.

3) Mandates a '37 Act retirement system require a system-participating employer to discontinue reporting disallowed compensation if the system determines that the compensation the employer reported for a sworn peace officer or firefighter is disallowed compensation.

4) Provides that for *active* peace officer or firefighters, all contributions made on disallowed compensation must be credited against future contributions to the benefit of the employer or agency that reported the disallowed compensation, and any paid by, or on behalf of, that member must be returned to the member by the employer or agency that reported the disallowed compensation, except as specified.

5) Allows a system that has initiated a process prior to July 1, 2022, to recalculate an *active* sworn peace officer's or firefighter's reportable compensation to exclude disallowed compensation and return contributions, either directly to the member, indirectly through the employer, or by some other reasonable manner, to continue to use that process provided that it is consistent with PEPRA as it read on July 1, 2022, and with Alameda, in lieu of the process provided by this bill.

6) Provides that for *retired* sworn peace officers or firefighters, their survivors, or beneficiaries, whose final compensation at the time of retirement was predicated upon the disallowed compensation, the contributions made on the compensation must be credited against future contributions, to the benefit of the employer or agency that reported the disallowed compensation and the retirement system must permanently adjust the benefit of the affected retired member, survivor, or beneficiary to reflect the exclusion of the disallowed

compensation, and includes repayment and notice requirements provided that the following conditions are satisfied: (a) the employer reported the compensation to the system and made contributions on that compensation while the sworn peace officer or firefighter was actively employed for at least two years prior to the member's final compensation; (b) the system determined after the date of retirement that the compensation was disallowed; and (c) the sworn peace officer or firefighter was not aware that the compensation was disallowed at the time the employer reported it.

7) Requires the employer to do the following if the disallowed compensation meets the above conditions:
   a) Pay to the system, as a direct payment, the full cost of any overpayment of the prior paid benefit made to an affected retired member, survivor, or beneficiary resulting from the disallowed compensation.
   b) Pay to the affected retired member, survivor, or beneficiary, as appropriate, 20 percent of the amount calculated by the system representing the actuarial equivalent present value of the difference between the monthly allowance that was predicated on the disallowed compensation and the adjusted monthly allowance calculated excluding the disallowed compensation for the duration the system projects to pay that allowance to the retired member, survivor, or beneficiary.

8) Requires the employer to begin payment within six months of notice from the system but permits the employer up to four years to complete the payment.

9) Requires the system to provide a written notice to the employer that reported contributions on the disallowed compensation and to the affected retired member, survivor, or beneficiary, including, at a minimum, all of the following: (a) the overpayment amount that the employer shall pay to the system; (b) the actuarial equivalent present value that the employer owes to the retired member, survivor, or beneficiary; and (c) written disclosure of the employer's obligations to the retired member, survivor, or beneficiary pursuant to this section.

10) Allows a system that has initiated a process prior to July 1, 2022, to permanently adjust the benefit of the affected *retired* member, survivor, or beneficiary to reflect the exclusion of the disallowed compensation to continue to use that process provided that it is consistent with PEPRA as it read on July 1, 2022, and with Alameda, in lieu of the process provided by this bill.

11) Requires the system to, upon the employer's request, provide the employer or agency with contact information or data in its possession of a retired member,

their survivors, or beneficiaries, so that the employer or agency can fulfill its obligations to those individuals, and that the contact information remain confidential.

12) Authorizes an employer to submit to the system for review an additional compensation item that a party to a proposed agreement requests be included, contained, adopted, or a entered into that agreement, on and after January 1, 2022, that is intended to form the basis of a pension benefit calculation, in order for the system to review consistency of the proposal with PEPRA, Alameda, Section 31461, and the system's administrative regulations.

13) Requires the employer to include with the submission to the system all supporting documents or requirements the system deems necessary to complete its review.

14) Requires the system to provide guidance regarding the submission within 90 days of the receipt of all information required to make a review.

15) Authorizes, but does not require, the system to periodically publish a notice of the proposed compensation language submitted to the system pursuant to this section for review and the guidance it provided.

16) Clarifies that the bill does not alter or abrogate an employer's responsibility to meet and confer in good faith with the employee organization regarding the impact of the disallowed compensation or the effect of any disallowed compensation on the rights of the employees and the obligations of the employer to its employees, including any employees who, due to the passage of time and promotion, may have become exempt from inclusion in a bargaining unit, but whose benefit was the product of collective bargaining.

17) Provides that the bill does not affect or otherwise alter a party's right to appeal any determination regarding disallowed compensation made by the system after July 30, 2020.

18) Makes legislative findings and declarations relating to the necessity of limiting public access to information that may be shared among public agencies to effect the bill's purpose.

19) Prohibits the bill from being interpreted to alter the Legislature's intent in enacting the California Public Employees' Pension Reform Act of 2013 (Article 4 (commencing with Section 7522) of Chapter 21 of Division 7 of Title 1) of, and Section 31461 of, the Government Code, to alter a retirement system's corresponding implementing administrative regulations, or to alter the holding

in Alameda County Deputy Sheriff's Association v. Alameda County Employees' Retirement Association (2020) 9 Cal.5th 1032. States that the Legislature intends this bill to be consistent, not in conflict, with those laws, regulations, and the Alameda holding.

ARGUMENTS IN SUPPORT: According to the California Professional Firefighters, "These important protections align with recently enacted legislation to protect retirees from disallowed compensation at CalPERS. That law, SB 278 by Senator Leyva, has started to provide important protection to retirees and this measure will provide that same level of protection to retirees in 1937 Act Retirement Systems.

"It is patently unfair to force a retiree who has dedicated a lifetime of service to the people of California to lose a large portion of their fixed income over a disallowed pay item that was not their fault. If the employer promises and pays for a benefit that is disallowed after the fact, the retiree living on a fixed income who is budgeting according to that fixed income should not have to pay the price for that broken promise."

According to the Association of Orange County Deputies, "Oftentimes retirees make the decision to retire based on the retirement dollar amount provided to them. Retirees should not bear the heavy burden from errors that, through no fault of their own, result in a clawback of retirement funds as well as significantly reduced monthly payments going forward. This creates a substantial hardship for retirees that budget based on fixed income. AB 2493 would protect the retirement security of sworn peace officers and firefighters by ensuring that any compensation agreed to by their employer and paid for by the employer and the retiree cannot be subsequently and retroactively deducted from the retired member's pension allowance because of a disallowed pay item."

ARGUMENTS IN OPPOSITION: According to the California State Association of Counties, "Over the last two years, the impacted '37 Act systems have been working to comply with Alameda and recalculate retirement benefits for members who retired after January 1, 2013.

"AB 2493 unfairly places the financial consequences of the Court's decision on counties by requiring '37 Act system employers to pay a "penalty" equal to 20 percent of the current actuarial value of retiree benefits deemed unlawful. The penalty, which will result in affected counties owing tens of millions of dollars in unbudgeted dollars to retirees for what the Court found to be an illegal benefit, implies counties made the decision to misapply the law. In reality, counties simply complied with the pension agreements established between employees, employers, and retirement systems.

"For the reasons stated above, we must oppose AB 2493. The fiscal impact on affected counties will place a significant strain on general fund dollars, resulting in

reductions to critical programs including public safety, transportation, and behavioral health."

According to the San Bernardino County Retirement System, "The language of AB 2493 takes aim at all pay items that were disallowed as a direct result of Alameda. These are not "once in a blue moon" errors; these are numerous corrections that range from very small to large adjustments. The SBCERA Board did not require the recoupment of any overpaid amounts from retirees for the period preceding Alameda. Should AB 2493 pass as currently written, SBCERA anticipates that over 2,000 actuarial calculations will need to be performed for public safety members at a potential costs of millions of dollars.

"In addition, the language of AB 2493 imposes additional duties for the retirement systems to meet and confer with employee organizations regarding the impact of disallowed compensation items. The retirement systems are not parties to labor negotiations between employers and their employees. Finally, AB 2493 requires county retirement systems to follow CalPERS regulations that define 'compensation earnable.' Some of those rules are different from those authorized under the County Employees' Retirement Law, both regarding their inclusions in, and exclusions from, retirement allowance determinations, and is unclear from AB 2493 how those differences are to be reconciled."

SUBJECT: County of Kern Citizens Redistricting Commission

SOURCE: Dolores Huerta Foundation

DIGEST: This bill establishes the County of Kern Citizens Redistricting Commission (CKCRC) and requires the CKCRC to establish the supervisorial district lines for Kern County following the decennial census, as specified.

ANALYSIS:

Existing law:

1) Requires the board of supervisors of each county, following each federal decennial census, to adopt boundaries for all of the supervisorial districts of the county so that the supervisorial districts are substantially equal in population as

required by the United States Constitution. Requires population equality to be based on the total population of residents of the county as determined by the most recent federal decennial census for which specified redistricting data are available, as specified.

2) Requires the board of supervisors to adopt supervisorial district boundaries using a specified criteria and process.

3) Authorizes a county, general law city, school district, community college district, or special district to establish an independent redistricting commission, an advisory redistricting commission, or a hybrid redistricting commission by resolution, ordinance, or charter amendment, subject to certain conditions and as specified.

4) Establishes a procedure for a government of a county to adopt a charter by a majority vote of its electors voting on the question. Generally provides greater autonomy over county affairs to counties that have adopted charters. Provides that counties that have adopted charters are subject to statutes that relate to apportioning population of governing body districts.

5) Establishes a Citizens Redistricting Commission in Los Angeles County and an Independent Redistricting Commission in San Diego County, and charges the commissions with adjusting districts of supervisorial districts after each decennial federal census, as specified.

This bill:

1) Provides for the creation of the CKCRC, and tasks the CKCRC with adjusting the boundary lines of Kern County's supervisorial districts in the year following the year in which the decennial federal census is taken. Requires the CKCRC to be created no later than December 31, 2030, and in each year ending in the number zero thereafter.

2) Requires the CKCRC to consist of 14 members who meet specified requirements. Requires at least one CKCRC member to reside in each of the five existing county supervisorial districts. Requires the political party preferences of the CKCRC members to be as proportional as possible to the total number of voters who are registered with each political party in Kern County, or who decline to state or do not indicate a party preference, as

determined by registration at the most recent statewide election, as specified.

3) Establishes a process for interested individuals to submit an application to become a CKCRC member, as specified. Creates a process for the county elections official to narrow the application pool, as specified.

4) Requires, at a regularly scheduled meeting of the board of supervisors, the Auditor-Controller of Kern County to conduct a random drawing to select one commissioner from each of the five subpools established by the county elections official, and to then conduct a random drawing from all of the remaining applicants to select three additional commissioners.

5) Requires the eight selected commissioners to review the remaining names in the subpools of applicants and to appoint six additional applicants to the CKCRC, as specified.

6) Provides the term of office of each member of the CKCRC expires upon the appointment of the first member of the succeeding commission.

7) Requires the board of supervisors to provide for reasonable funding and staffing for the CKCRC. Requires each CKCRC member to be a designated employee for purposes of the conflict of interest code adopted by Kern County, as specified.

8) Provides that nine members of the CKCRC constitute a quorum and that nine or more affirmative votes are required for any official action.

9) Prohibits the CKCRC from retaining a consultant who would not be qualified as a CKCRC applicant due to any of the disqualifying criteria, as specified.

10) Requires the CKCRC to establish single-member supervisorial districts for the board of supervisors pursuant to a mapping process using a specified criteria and requirements. Requires the CKCRC to adopt a redistricting plan adjusting the boundaries of the supervisorial districts and to file the plan with the county elections official by the map adoption deadline set forth in existing law for county supervisorial maps, as specified. Requires the CKCRC to issue, with the final map, a report that explains the basis on which the CKCRC made its decisions in achieving compliance with the specified criteria and requirements provided by this bill.

11) Requires the CKCRC, prior to drawing a draft map, to conduct at least seven public hearings, to take place over a period of no fewer than 30 days, with at least one public hearing held in each supervisorial district, as specified.

12) Requires the CKCRC, after drawing the draft maps, to post the map for public comment on Kern County's website and conduct at least two public hearings to take place over a period of no fewer than 30 days.

13) Requires the CKCRC to establish and make available to the public a calendar of all public hearings, requires the hearings to be scheduled at various times and days of the week to accommodate a variety of work schedules to reach as large an audience as possible, and requires the CKCRC to arrange for the live translation of a hearing if requested, as specified. Requires the CKCRC to post the agenda for the public hearings at least seven days before the hearings. Requires the agenda for a meeting conducted after the CKCRC has drawn a draft map to include a copy of that map.

14) Requires the CKCRC to take steps to encourage county residents to participate in the redistricting public review process, as specified.

15) Requires the board of supervisors to take steps necessary to ensure that a complete and accurate computerized database is available for redistricting, and that procedures provide the public with access to redistricting data and software equivalent to what is available to the CKCRC members, as specified.

16) Requires all records of the CKCRC relating to redistricting, and all data considered by the CKCRC in drawing a draft map or the final map, to be public records.

17) Provides for various prohibitions for CKCRC members beginning from the date of appointment to the CKCRC, as specified.

18) Makes findings and declarations that a special law is necessary because of the unique circumstances facing Kern County.

Background

Local Redistricting and Previous Legislation. Prior to 2017, state law generally permitted a county or a city to create an advisory redistricting commission, but did not expressly permit local jurisdictions to create commissions with the authority to

establish district boundaries. The authority to establish district boundaries for a local jurisdiction generally was held by the governing body of that jurisdiction. Additionally, while charter cities could establish redistricting commissions that had the authority to establish district boundaries, charter counties did not have that authority in the absence of express statutory authorization.

In 2016, the Legislature passed and Governor Brown signed SB 1108 (Allen, Chapter 784, Statutes of 2016). SB 1108 permitted a county or a general law city to establish an advisory or independent redistricting commission, subject to certain conditions. SB 1108 generally provided cities and counties with the discretion to determine the structure and membership of an advisory or independent redistricting commission. However, it did establish minimum qualifications for commission membership. While SB 1108 imposed few restrictions and requirements on advisory commissions, it did subject members of independent commissions to extensive eligibility requirements and post-service restrictions.

At the same time that SB 1108 was being considered in the Legislature, SB 958 (Lara, Chapter 781, Statutes of 2016) was signed into law and required the establishment of a Citizens Redistricting Commission in Los Angeles County and charged it with adjusting the boundaries of supervisorial districts after each decennial federal census, as specified.

In 2017, the Legislature approved and Governor Brown signed AB 801 (Weber, Chapter 711, Statutes of 2017) replaced San Diego County's Independent Redistricting Commission established by SB 1331 (Kehoe, Chapter 508, Statutes of 2012) with a commission similar to the commission established by SB 958.

In 2018, the Legislature passed and Governor Brown signed SB 1018 (Allen, Chapter 462, Statutes of 2018). SB 1018 extended the authority to adopt redistricting commissions to school districts, community college districts, and special districts. SB 1018 also allowed for the creation of hybrid commissions where a commission recommends to a legislative body multiple maps for that legislative body and legislative body must adopt one of those maps without modification, unless certain conditions are met. Furthermore, SB 1018 relaxed some of the eligibility requirements for members of independent commissions and eased one of the post-service restrictions on those members in an effort to expand the pool of individuals who are available to serve on such commissions.

Who Draws the Lines in Kern County? The authority to establish district boundaries for local jurisdictions generally is held by the governing body of that

jurisdiction. Consequently, the Kern County Board of Supervisors is charged with redrawing the boundary lines for supervisorial districts after each decennial federal census using specified criteria outlined in existing law.

Comments

According to the author, AB 2494 is a continuation of the state's work to improve the health and integrity of our democracy and protect everyone's constitutional right to an equal vote. This bill will protect taxpayer money and prevent future lawsuits against Kern County like there have been in the past. Establishing an independent redistricting commission in Kern County will help ensure that all voices throughout our community will be heard and that the constitutional rights of voters are protected.

Related/Prior Legislation

AB 1307 (Cervantes, 2022) creates a Citizens Redistricting Commission in Riverside County, as specified.

AB 2030 (Arambula, 2022) creates a Citizens Redistricting Commission in Fresno County, as specified.

SB 1269 (Allen, 2022) makes various changes to the composition and operations of the Los Angeles County Citizens Redistricting Commission.

SB 139 (Allen, 2019) would have required a county with a population of 400,000 or more to establish an independent redistricting commission to adopt the county supervisorial districts after each federal decennial census, as specified. Kern County, which had an estimated population of over 900,000 at the time that SB 139 was being considered by the Legislature, would have been covered by that bill. Governor Newsom vetoed SB 139 stating:

> *This bill requires a county with more than 400,000 residents to establish an independent redistricting commission tasked with adopting the county's supervisorial districts following each federal decennial census.*
>
> *While I agree these commissions can be an important tool in preventing gerrymandering, local jurisdictions are already authorized to establish independent, advisory or hybrid redistricting commissions. Moreover, this measure constitutes a clear mandate for which the state may be required to*

reimburse counties pursuant to the California Constitution and should therefore be considered in the annual budget process.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- This bill would not have a fiscal impact to the Secretary of State's Office.
- By requiring Kern County to create and operate a redistricting commission as specified, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on Kern County, the County could claim reimbursement of those costs (General Fund). The magnitude of these costs is unknown, but minimally in the hundreds of thousands on a decennial basis.

League of Women Voters of California
Planned Parenthood Mar Monte
Services, Immigrant Rights and Education Network
United Food and Commercial Workers Local 770

OPPOSITION: (Verified 8/12/22)

Kern County Board of Supervisors
One individual

ARGUMENTS IN SUPPORT: In a letter sponsoring AB 2494, the Dolores Huerta Foundation states, in part, the following:

> Creating fair district lines is a critical tool our communities have to reclaim their voting power. For many communities of color throughout the nation, gerrymandering has historically allowed elected representatives to choose the voters in their district, rather than allowing the voters to elect their representatives in fair and lawful elections. This practice of gerrymandering has disenfranchised underrepresented communities and diluted their voting power.

ARGUMENTS IN OPPOSITION: In a letter opposing AB 2494, the Kern County Board of Supervisors states, in part, the following:

> It is disturbing that a redistricting process mandated by the State Legislature, on the supposed basis of impartiality and fairness, requires a partisan commission to draw district boundaries for non-partisan supervisorial districts, injects state edicts into local governance in a manner that seems to favor members of its own governing body in seeking local political office, and disenfranchises communities by stripping them of their community identity.

SUBJECT: Vehicles: exhaust systems

SOURCE: Author

DIGEST: This bill requires a court, beginning January 1, 2027, to notify the Department of Motor Vehicles (DMV) to place a registration hold on a vehicle found to have a noncompliant modified muffler or muffler installed with a whistle tip until the court has been presented with a certificate of compliance from a referee authorized to test the vehicle.

Senate Floor Amendments of 8/24/22 make a technical change to a technical reference.

ANALYSIS:

Existing law:

1) Prohibits a person from modifying the exhaust system of a motor vehicle in a manner that would amplify or increase the noise emitted by the motor vehicle

so that the motor vehicle does not have excessive noise or is equipped with a cutout, bypass or similar device.

2) Allows an officer to issue a written notice containing a violator's promise to correct an alleged violation involving a registration, license, all-terrain vehicle safety certificate, or mechanical requirement in lieu of a ticket unless the officer finds any of the following:

   a) There is evidence of fraud or persistent neglect,

   b) The violation presents an immediate safety hazard,

   c) The violator does not agree to, or cannot, promptly correct the violation; or,

   d) The violation cited is of subdivision (a) of Section 27151 for a motorcycle.

3) Allows a court to dismiss the charges for a corrective ticket if the violator presents, by mail or in person, proof of correction on or before the date on which the violator has promised to appear.

4) Allows a violator to prove they corrected a violation with a proof of correction certificate from the following sources:

   a) The DMV for a violation involving a driver license and registration.

   b) A licensed station or licensed adjuster that is licensed by the Bureau of Automotive Repair for a violation involving a brake, lamp, smog device, or muffler; and,

   c) A police department, the California Highway Patrol (CHP), sheriff, marshal or other law enforcement agency regularly engaged in enforcement of the vehicle code.

5) Authorizes stations providing referee functions to provide for the testing of vehicle exhaust systems and issue certificate of compliance for vehicles issued violations for modified or inadequate mufflers.

6) Authorizes the certificate of compliance to be issued if the vehicle, other than motorcycles, has a gross vehicle weight rating of less than 6,000 pounds and emits no more than 95 weighted decibels when tested in accordance with Society of Automotive Engineers (SAE) standards,

7) Prohibits operation of a motorcycle that does not have a properly labelled exhaust system. Violations are subject to specified fines.

This bill:

1) Requires, beginning January 1, 2027, a court to notify DMV to place a registration hold on a vehicle found to have a noncompliant modified muffler or muffler installed with a whistle tip until the court has been presented with a certificate of compliance from a referee authorized to test the vehicle.

2) Requires, beginning January 1, 2027, stations providing the referee function to provide for the testing of exhaust systems and the issuance of certifications for compliance for motorcycles that have received a citation for modifying a muffler or installing a whistle tip. Those stations shall also provide certifications for compliance for vehicles with a gross vehicle weight rating of between 6,000 and 14,000 pounds that comply with the noise standard established under current law in Section 27204 of the Vehicle Code when tested under current SAE standards.

Comments

1) *Author's statement.* "Noise pollution from illegally modified vehicles is a significant problem in our local communities. AB 2496 will prevent drivers from continuing to operate vehicles with illegally modified exhausts by requiring drivers ticketed for illegal modifications to prove that they have fixed the modification within three months or face a hold on their registration. This will provide our communities with an important tool to reduce noise pollution from intentionally modified vehicles, protecting public health and ensuring a higher quality of life for local residents."

2) *Buy your way out.* The author is concerned that current law, which allows for a fix it ticket, is being rendered ineffective by individuals who elect to pay a higher bail rather than fix the exhaust system. A fix it ticket can be cleared with proof that the equipment violation has been fixed and payment of a $25 fee. It can also be cleared with a payment of a $192.74 fee without fixing the equipment violation. Under this bill an individual would have to fix their exhaust system or else be unable to renew their vehicle registration.

3) *Opposition*. The opponent is concerned about enforcing noise restrictions on motorcycles. They contend that current law and practice, which focusses on ensuring that motorcycles have the proper exhaust system equipment, is

effective. They're concerned that if a motorcycle is cited for a noise violation, there are few places which can test that the motorcycle complies with the law and therefore clear the fix-it ticket.

4) *Can it be done?* The Department of Consumer Affairs is aware of the provisions of this bill. While they take no position on the bill itself, the Department doesn't foresee the provisions being a significant burden on the referee stations, although it expects an increase in volume as the referee stations do not currently test motorcycles. The four year implementation delay of the bill provides time for the industry and agencies to adapt.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

From the Senate Appropriations Committee:

- DMV indicates that one-time costs to implement this bill by 2027 are not quantifiable at this time because programming will be required on the department's modernized platform, which will not be complete until after the 2025-26 fiscal year. Staff estimates one-time minor to moderate costs, potentially up to the low hundreds of thousands of dollars conduct necessary programming to its modernized vehicle registration systems to provide for a registration hold. (Motor Vehicle Account)

- The Bureau of Automotive Repair (BAR) estimates minor and absorbable costs of approximately $11,000 to develop test specifications and certify updated test equipment to accommodate the testing of motorcycles. BAR indicates that any increased staff costs to test motorcycles would be fully offset by fees charged for inspections. (Vehicle Inspection and Repair Fund)

SUBJECT: Vehicles: vehicle license fee and registration fees: exemptions

SOURCE: Author

DIGEST: This bill exempts Purple Heart recipients and their surviving spouse from various vehicle fees.

Senate Floor Amendments of 8/22/22 delay implementation of the fee exemption in the bill until January 1, 2027, and clarify the exemption also applies to the Vehicle License Fee and Transportation Improvement Fee.

ANALYSIS:

Existing law:

1) Waives all vehicle fees, including the vehicle registration fee, the California Highway Patrol (CHP) fee, vehicle license fee, and the Transportation Improvement Fee (TIF), fee for:

a) Disabled veterans.

b) Former American prisoners of war.

c) The surviving spouse of a former American prisoner of war who has elected to retain the special license plates issued under Section 5101.5 of the Vehicle Code.

d) A Congressional Medal of Honor recipient.

e) The surviving spouse of a Congressional Medal of Honor recipient who has elected to retain the special license plates issued under Section 5101.6 of the Vehicle Code.

2) Limits the vehicle fee exemptions for the above parties to no more than one vehicle owned by an American prisoner of war, disabled veteran, Congressional Medal of Honor recipient, or a surviving spouse.

This bill requires the Department of Motor Vehicles (DMV) to waive all vehicle fees, including the vehicle registration fee, the CHP fee, vehicle license fee, and TIF, for Purple Heart recipients and the surviving spouse of a Purple Heart recipient who elect to retain a special license plate, as specified.

Comments

1) *Purpose*. According to the author, "Veterans dedicate their lives to serve our country. They defend the freedoms we enjoy. They fight for us. Veterans leave their families to protect our freedoms. They make sacrifices to serve our country, and when they are injured during their service, they should be afforded every accommodation possible upon returning home. Vehicle registration and license fees are added burdens on veterans that the state can help ease. Waiving DMV license and registration fees will also create consistency amongst other veterans that already have these costs waived."

2) *Vehicle Fees and Purple Heart Recipients*. Current law allows Purple Heart recipients to apply for a specialized license. However, unlike disabled veterans, former American prisoners of war and Congressional Medal of Honor recipients, Purple Heart recipients are not eligible for vehicle fee waivers. Surviving spouses of Purple Heart recipients are currently not eligible for vehicle fee waivers, inconsistent with the exemptions for surviving spouses of former American prisoners of war and Congressional Medal of Honor recipients.

3) *Potential Impact.* Supporters of this bill argue that due to the small number of covered veterans, this bill's impact on revenues from vehicle registration fees would be de minimis. Veterans receive similar small benefits, such as discounted fishing licenses and free admission to California state parks. Unlike programs that enhance veterans' access to education, health care, housing, or employment, these small benefits do not substantively improve veterans' opportunities or quality of life.

   However, these waivers do deprive public agencies of funds. While any such benefit taken in isolation may seem de minimis, the more that are permitted, the greater the cost to the rest of California's citizens, who must make up the difference. The DMV estimates that there are currently over 5,506 Purple Heart plates in circulation. The DMV forecasts that there would be a $1.4 million loss to the Motor Vehicle Account (MVA). Thus, this exemption could pose a significant revenue loss for the state.

4) *MVA Concerns*. The MVA which is the primary funding source for DMV and CHP has been on the brink of insolvency for many years. The current estimates from the Department of Finance show that it is solvent, but only barely and because most capital outlay costs have been shifted from the MVA, where they were historically funded from, to the General Fund. Any lost revenue associated with implementing this bill would potentially contribute towards the insolvency of the MVA and potentially negatively impact DMV and CHP.

Related/Prior Legislation

SB 1259 (Runner, 2016) would have exempted veterans with specialized license plates to be exempt from toll payments. The bill died in the Assembly at the request of author.

SB 386 (Cogdill, Chapter 357, Statutes of 2007) extended vehicle registration exemptions to surviving spouses of former American prisoners of war and Congressional Medal of Honor recipients.

AB 160 (Cogdill, 2005) would have extended vehicle registration exemptions to surviving spouses of former American prisoners of war and Congressional Medal of Honor recipients. The bill was held on suspense in the Senate Appropriations Committee.

AB 279 (Cohn, Chapter 201, Statutes of 2004) allowed the un-remarried, surviving spouse of a person issued Purple Heart special license plates to retain the special plates upon the death of a Purple Heart recipient.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DMV indicates that costs to provide for exempt registration for new applicants for a Purple Heart special license plate would be minor because it can assign existing fee codes for those vehicle registration records. Costs to revise vehicle registration records for 5,506 existing Purple Heart plate holders to allow for the fee exemptions are unknown, but potentially significant, to the extent programming is required. See staff comments for a discussion of the current challenges regarding DMV's IT systems upgrades that drive abnormally high costs. (MVA)

- DMV estimates the following annual revenue losses (foregone revenues) as a result of the vehicle registration fee exemption, based on the 5,506 vehicles that currently have Purple Heart specialized license plates:

  - $357,890 from the general $65 registration fee. (MVA)

  - $159,674 from the $29 CHP fee. (MVA)

  - $512,058 from the VLF, based on the average VLF amount of $93 charged for automobile registrations. (Local Revenue Fund, allocated to cities and counties)

  - $385,420 from TIF, based on the average amount of $70 charged for automobile registrations. (Road Maintenance and Rehabilitation Account or RMRA).

  - Unknown minor fee revenues associated with certain special fees that vary by county and air quality district (local revenues), as well as minor revenues associated with the $100 Road Improvement Fee, which applies to electric vehicles with a model year of 2020 or newer (RMRA)

  Staff notes that these revenue losses could be higher, to the extent Purple Heart recipients who are not specialized license plate holders seek the fee exemption.

SUBJECT: Vehicles: driver's licenses

SOURCE: Author

DIGEST: This bill waives the driver's license renewal fee for a person experiencing homelessness.

Senate Floor Amendments of 8/22/22 delay the implementation until January 1, 2027.

ANALYSIS:

Existing law:

1) Requires a person who drives a vehicle upon a highway to have a valid driver's license (DL).

2) Prescribes specified fees that shall be collected by the Department of Motor Vehicles (DMV) for the issuance and renewal of a driver's license.

3) Waives the identification card (ID) fee for unhoused persons.

This bill:

1) Waives the DL fee for a homeless person, as defined.

2) Defines "homeless person" the same as a homeless person under the federal McKinney-Vento Homeless Assistance Act, which includes the following:

   a) An individual or family who lacks a fixed, regular, and adequate nighttime residence.

   b) An individual or family with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground.

   c) An individual or family living in a supervised publicly or privately operated shelter designated to provide temporary living arrangements (including hotels and motels paid for by Federal, State, or local government programs for low-income individuals or by charitable organizations, congregate shelters, and transitional housing).

3) Defines a "homeless services provider" as:

   a) A governmental or nonprofit agency receiving federal, state, or county or municipal funding to provide services to a "homeless person" or "homeless child or youth," or that is otherwise sanctioned to provide those services by a local homeless continuum of care organization.

   b) An attorney licensed to practice law in this state.

   c) A local educational agency liaison for homeless children and youth designated as such pursuant to Section 11432 (g)(1)(J)(ii) of Title 42 of the United States Code, or a school social worker.

   d) A human services provider or public social services provider funded by the State of California to provide homeless children or youth health services, mental or behavioral health services, substance use disorder services, or public assistance or employment services.

   e) A law enforcement officer designated as a liaison to the homeless population by a local police department or sheriff's department within the state.

f) Any other homeless services provider that is qualified to verify an individual's housing status, as determined by the department.

4) Becomes effective on January 1, 2027.

Comments

1) *Purpose*. According to the author, "it is important that individuals who are experiencing homelessness are protected and have resources to guide them toward stability. They deserve access to the same resources and opportunities that they would have if they weren't homeless. This includes access to an updated driver's license, which, if were expired, could result in accrued parking violations and unaffordable car towing fees. Safe Parking Santa Barbara has made significant progress in helping individuals avoid violations and towing fees by giving them a safe place to park their cars overnight. AB 2510 aims to further support homeless individuals by waiving the fees associated with renewing a driver's license. Having a current driver's license would allow these individuals to apply for jobs and take the steps necessary to improve their lives."

2) *Need for this bill*. An individual experiencing homelessness needs a DL for the same reasons that a housed person needs a DL. This includes access to benefits and services and to prove who they are. Housed individuals generally do not leave their homes without their DL card, especially if they will be operating a vehicle on a California roadway. Yet, many individuals experiencing homelessness cannot afford the DL fee, which at $39 is nearly one-fourth of the monthly allowance the state provides to a single low income individual under CalFresh benefits for food.

   AB 1733 (Quirk Silva, Chapter 764, Statutes of 2014) created a process for DMV to waive the fee for an ID card for homeless individuals. Having an identification card is imperative in accessing services and benefits. However, a DL is far more useful as it not only opens the doors for public benefits including CalFresh and SSI, it permits the holder to explore employment opportunities which could further aid them in escaping poverty by obtaining a job.

   According to the Legislative Analyst's Office, California now has an estimated 151,000 people experiencing homelessness, more than any other state in the nation. Similarly, according to the Homeless Policy Research Institute, 27% of

the national homeless population is in California. 72% of those who are homeless in California are also unsheltered, the highest share of unsheltered homeless of any state. In fact, half of the people experiencing unsheltered homelessness reside in California.

According to a survey from the National Law Center on Homelessness and Poverty, in a given month in 2004, 54% of homeless people without photo ID were denied access to shelters or housing services, 53% were denied food stamps, and 45% were denied access to Medicaid or other medical services. These unsettling numbers make it imperative to help facilitate access to services and benefits for individuals experiencing homelessness. AB 2510 attempts to remove another fiscal barrier so that an individual experiencing homelessness may renew their DL without paying the $39 fee.

Waiving the DL renewal fee for a person experiencing homelessness is consistent with other actions taken by the Legislature this year. Specifically, AB 1685 (Bryan, 2022 – pending on the Senate Floor) requires processing agencies to forgive at least $1,500 in parking tickets for individuals who are verified to be homeless. Likewise, AB 2775 (Quirk-Silva, 2022 – pending on the Senate Floor) permits a person who has been verified to be experiencing homelessness to waive payment of their vehicle registration fees.

3) *How Many*? According to the DMV, the DMV has issued the following number of ID cards for unhoused individuals:

   a) 2016 – 60,908
   b) 2017 – 105,283
   c) 2018 – 121,676
   d) 2019 – 137,888
   e) 2020 - 75,314
   f) 2021 – 100,721
   g) 2022 – 39,049 (through April)

4) *Delayed Implementation*. The implementation date of the bill is delayed until January 1, 2027 due to DMV's preference that any new requirements be delayed until after their computer system upgrades are completed. Many other bills establishing new requirements on the DMV have a similar delayed implementation date.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DMV indicates that one-time costs to implement this bill by 2027 are not quantifiable at this time because programming will be required on the department's modernized platform, which will not be complete until after the 2025-26 fiscal year. Staff estimates one-time minor to moderate costs, potentially up to the low hundreds of thousands of dollars in 2026-27, to promulgate regulations and conduct necessary IT system programming to account for waiving fees for a driver's license renewal for eligible homeless persons. (Motor Vehicle Account)

- Unknown annual revenue losses (foregone revenues), beginning in 2026-27, as a result of the reduced collection of driver's license renewal fees. Actual revenue losses would depend upon the number of homeless persons who hold driver's licenses that are expiring in a given year, and are verified as eligible for the fee waiver. Absent reliable data, these costs are unquantifiable, but for illustrative purposes, for every 10,000 persons eligible for a renewal fee waiver in a given year, the bill would result in revenue losses of $390,000. Revenue losses may exceed $1 million annually. Since driver's license fees are adjusted annually for inflation, the revenue losses would likely increase each year. (Motor Vehicle Account)

- Ongoing annual DMV administrative costs beginning in 2026-27, primarily for field office time to verify applicant eligibility for fee waivers, are expected to be minor and absorbable. (Motor Vehicle Account)

SUBJECT: Health care coverage: human papillomavirus

SOURCE: Author

DIGEST: This bill requires health insurance coverage without cost-sharing for the human papillomavirus vaccine (HPV), and, includes HPV as a covered benefit in the Family Planning, Access, Care, and Treatment program (Family PACT).

Senate Floor Amendments of 8/22/22 are nonsubstantive and correct a chaptering out issue with several other bills.

ANALYSIS:

Existing law:

1) Establishes the Department of Managed Health Care (DMHC) to regulate health plans under the Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene Act); California Department of Insurance (CDI) to regulate health and other insurance; and, the Department of Health Care Services (DHCS) to administer the Medi-Cal program. [HSC §1340, et seq., INS §106, et seq., and

WIC §14000, et seq.]

2) Requires nongrandfathered health plan contracts and insurance policies, at a minimum to provide coverage for and prohibits any cost-sharing requirements for several preventive services including, but not limited to evidence-based items or services that have in effect a rating of "A" or "B in the recommendations of the United States Preventive Services Task Force and immunizations that have in effect a recommendation from the Advisory Committee Immunization Practices (ACIP) of the Centers for Disease Control and Prevention. Nongrandfathered refers to coverage post the enactment of the Affordable Care Act (ACA). [HSC §1367.002 and INS §10112.2]

3) Establishes, at DHCS, the Family PACT, which provides comprehensive clinical family planning services to any person who has family income at or below 200% of the federal poverty level, as revised annually, and who is eligible to receive these services pursuant to a waiver of federal law, as specified. [WIC § 14132aa]

This bill:

1) Requires a health plan contract, except for a specialized health plan, and a disability insurance policy that provides coverage for hospital, medical, or surgical benefits issued, amended, or renewed on or after January 1, 2023, to provide coverage for HPV for enrollees for whom the vaccine is approved by the federal Food and Drug Administration (FDA). Prohibits a health plan contract or health insurance policy from imposing a deductible, coinsurance, copayment, or any other cost-sharing requirement on the coverage provided pursuant to this bill.

2) Adds to Family PACT benefits coverage for the HPV vaccine for persons for whom it is approved by the FDA.

Comments

According to the author, the HPV vaccine can prevent cancer and save lives. It protects against nine variants of the virus and is expected to prevent more than 90% of HPV-related cancers. This essential healthcare service should be accessible to all eligible Californians. We must continue to increase awareness and education, all while reducing any and all cost barriers. This bill will ensure that every patient who wants to receive the HPV vaccine can access it without cost.

California Health Benefits Review Program (CHBRP) analysis. AB 1996 (Thomson, Chapter 795, Statutes of 2002) requests the University of California to assess legislation proposing a mandated benefit or service and prepare a written analysis with relevant data on the medical, economic, and public health impacts of proposed health plan and health insurance benefit mandate legislation. CHBRP was created in response to AB 1996, and reviewed this bill. Key findings include:

1) *Coverage impacts and enrollees covered*. CHBRP estimates that, at baseline, 99.6% of enrollees in DMHC-regulated plans and CDI-regulated policies have coverage of the HPV vaccine without cost sharing. Enrollees without coverage or coverage with cost sharing for the HPV vaccine have DMHC-regulated plans or CDI-regulated policies that are "grandfathered" under the provisions of the ACA, and so are able to retain cost sharing for vaccinations. Postmandate, 100% of enrollees would have coverage for HPV vaccines with no cost sharing.

2) *Medical effectiveness.* CHBRP examined literature on the clinical effectiveness of the HPV vaccine for preventing HPV-related cancers and HPV-related genital warts in both females and males. CHBRP found there is: Clear and convincing evidence that the HPV vaccine is effective at preventing high-grade cervical intraepithelial neoplasia, adenocarcinoma in situ, and cervical cancer for females vaccinated at age 26 or younger, and at preventing HPV-related anogenital warts for both females and males vaccinated at age 26 or younger. A preponderance of evidence that the HPV vaccine is effective at preventing HPV-related anogenital disease for males vaccinated at age 26 or younger. Limited evidence that the HPV vaccine is effective at preventing cervical lesions for females vaccinated at age 27 or older. Insufficient evidence that the HPV vaccine is effective at preventing oral or oropharyngeal HPV infections for females and males vaccinated at any age, as well as for preventing genital warts for females males vaccinated at age 27 or older.

3) *Utilization*. At baseline, there are 120.9 HPV vaccine shots per 1,000 female enrollees aged 9 to 26 years, and there are 113 HPV vaccines per 1,000 male enrollees aged 9 to 26 years. Among those aged 27 to 45 years, there are 6.1 HPV vaccines per 1,000 female enrollees and 4.4 HPV vaccines per 1,000 male enrollees. Postmandate, utilization for females and males aged 9 to 26 years would increase slightly, as the utilization rate for the 0.4% of enrollees in DMHC-regulated plans or CDI-regulated policies who previously had cost sharing would increase to match those who did not have cost sharing at baseline. CHBRP estimates that the resulting new average utilization would increase by 1.5 per 1,000 enrollees from 120.9 to 122.3 for females aged 9 to 26

years and by 1.3 from 113 to 114.4 for males aged 9 to 26 years. CHBRP estimates that the change in benefit coverage and reduction in cost sharing for those aged 27 to 45 years would result in no measurable impact on utilization since the medical guidelines for shared clinical decision-making will keep utilization down to those who are both medically eligible and want to obtain the series of HPV vaccination shots. Postmandate, the average utilization rate for the HPV vaccine for both males and females aged 27 to 45 years will have no measurable change. Among enrollees with coverage at baseline, cost sharing was present for 0.7 vaccine injections per 1,000 females aged 9 to 26 years, 1.1 vaccines per 1,000 males aged 9 to 26 years, 0.1 vaccines per 1,000 females aged 27 to 45 years, and 0.2 vaccines per 1,000 males aged 27 to 45 years. Postmandate, no enrollees would have cost sharing for HPV vaccine shots. This equates to approximately 9,400 vaccine shots that had cost sharing for HPV vaccines at baseline.

4) *Medi-Cal.* Medi-Cal provides coverage without cost sharing for the HPV vaccine at baseline. As such, no impact on this population by this bill is projected.

5) *Impact on expenditures*. This bill increases total net annual expenditures by $3,834,000 or 0.0026% for enrollees with DMHC-regulated plans and CDI-regulated policies. This is due to a $3,975,000 increase in total health insurance premiums paid by employers and enrollees for newly covered benefits, adjusted by a decrease of $141,000 in enrollee expenses for covered and/or noncovered benefits. Changes in expenditures are due to (1) a shift of cost sharing for enrollees with cost sharing at baseline to no cost sharing postmandate and (2) new utilization of the HPV vaccine. For enrollees with cost sharing at baseline, average annual out-of-pocket expense reductions range between $102 and $262. Cost sharing amounts are dependent upon an enrollee's plan or policy design. For the enrollees with cost sharing, on average, 81% is due to deductible, 17% is due to coinsurance, and 2% is due to copayments.

6) *Public health.* In the first year postmandate, CHBRP projects this bill will have no measurable impact on public health. Postmandate, approximately 4,078 additional vaccinations would occur among male enrollees and 4,367 additional vaccinations would occur among female enrollees aged 9 to 26 years because of increased coverage and reduced cost sharing. Although the HPV vaccine is found to be medically effective, CHBRP concludes that passage of this bill would have no measurable short-term public health impact due to minimal change in overall utilization and lack of manifest of vaccine effects in the short

term. For this reason, CHBRP also concludes that this bill would have no measurable impact on disparities in vaccination status or health outcomes (by sex, race/ethnicity, or sexual orientation/gender identity). It also would have no measurable impact on premature death and societal economic losses. At the person level, one potentially detectable vaccine impact in the first year following vaccination would be a potential reduction in genital warts. While elimination of cost sharing eliminates a barrier for a small group of enrollees who currently are subject to cost sharing, other barriers to HPV vaccination may continue to persist postmandate. These may include prior authorization requirements, transportation issues to complete the entire vaccine series, parental disagreement about whether or not a minor enrollee should receive the vaccine, or individual decisions not to receive the vaccine.

7) *Essential health benefits (EHBs)*. The HPV vaccine is currently covered by California's EHB benchmark plan and is recommended by ACIP. Therefore, this bill appears not to exceed the definition of EHBs in California.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- DHCS estimates total costs of $8 million ($4.6 million General Fund and $3.4 million federal funds) to include coverage of the HPV vaccine in Family PACT.

- Minor and absorbable costs to DMHC and CDI.

SUPPORT: (Verified 8/22/22)

American College of Obstetricians and Gynecologists District IX
American Society for Reproductive Medicine
Association for Clinical Oncology
California Academy of Family Physicians
California Life Sciences
California Medical Association
Color Health
County Health Executives Association of California

Teens for Vaccines
University of California

OPPOSITION: (Verified 8/22/22)

America's Health Insurance Plans
Association of California Life and Health Insurance Companies
California Association of Health Plans

ARGUMENTS IN SUPPORT: The American College of Obstetricians and Gynecologists District IX (ACOG) writes that under the ACA, private insurers are required to cover vaccinations recommended by the Center for Disease Control's ACIP, which includes the HPV vaccine. While many comprehensive health insurers will cover the HPV vaccine, some do not provide it or require patients to cover up to the full cost of more than $250 per dose. The amount paid by the patient is influenced by many factors, but most often is determined by the provider and insurance coverage. The uninsured and underinsured are most vulnerable to a lack of access to the vaccine or face higher co-pays which can be barriers to taking advantage of the HPV vaccine. Even when there are public programs available to assist with cost, those programs depend upon continued state or federal funding. Vaccinating against HPV is incredibly important, as it is known for high morbidity and mortality in women and men. HPV vaccines are among the most effective vaccines available worldwide, with unequivocal data demonstrating greater than 99% efficacy when administered to women who have not been exposed to that particular type of HPV. ACOG strongly recommends HPV vaccination to eligible patients and stress the benefits and safety of the HPV vaccine.

The Medical Oncology Association of Southern California and the Association for Clinical Oncology write that receiving an HPV vaccine is the most effective way of protecting against HPV-related cancers. According to a 2016 Policy Statement on HPV for Cancer Prevention by their affiliate, the American Society of Clinical Oncology, cervical cancer is the most prevalent HPV-related cancer and the fourth most common cancer in women. HPV-related cancers seem to disproportionately affect lower income patients; the incidence rate of cervical cancer is higher in Hispanic and African American women than in white women. HPV vaccines are extremely effective; according to studies, they can protect against nine variants and are believed to prevent more than 90% of HPV-related cancers. However, only approximately 36% of girls and 14% of boys have received all three doses of the HPV vaccine. Lowering financial barriers to the vaccine can improve uptake.

ARGUMENTS IN OPPOSITION: The California Association of Health Plans, the Association of California Life and Health Insurance Companies, and America's Health Insurance Plans state that this bill, taken together with AB 1859 (Levine, related to mental health treatment) and AB 2024 (Friedman related to breast

imaging), will increase premiums on Californians by nearly $123 million. California has been a national leader in maintaining a stable market despite rising costs and uncertainty at the federal level over the individual and employer market. Opponents write that now is not the time to inhibit competition with proscriptive mandates that reduce choice and increase costs. California needs to protect the coverage gains made and stay focused on the stability and long-term affordability of our health care system. Benefit mandates impose a one-size-fits-all approach to medical care and benefit design driven by the legislature, rather than consumer choice. State mandates increase costs of coverage especially for families who buy coverage without subsidies, small business owners who cannot or do not wish to self-insure, and California taxpayers who foot the bill for the state's share of those mandates. These bills will lead to higher premiums, harming affordability and access for small businesses and individual market consumers.

SUBJECT: California Coordinated Neighborhood and Community Services Grant Program

SOURCE: California Cradle to Career Coalition
California Promise Neighborhood Network
End Child Poverty in California
GRACE
StriveTogether

DIGEST: This bill, the It Takes a Village Act, creates the California Coordinated Neighborhood and Community Services Grant Program. Subject to an appropriation, this bill requires the California Department of Social Services (CDSS) or another department to fund competitive grants to nonprofit organizations, tribes or tribal organizations, or institutions of higher education, which, together with local educational and social service agencies, would plan and implement a comprehensive, integrated continuum of cradle-to-career solutions at the neighborhood level.

Senate Floor Amendments of 8/25/22 require the California Department of Education (CDE) to consult with CDSS in the development of a core set of

academic results and indicators by which grant recipients will be measured, and make other technical changes.

ANALYSIS:

Existing law:

1) Establishes the federal Promise Neighborhood program, which provides grants to nonprofit organizations, tribal organizations, or institutions of higher education, which, together with partners, develop and implement plans to significantly improve outcomes of children living in a given neighborhood. *(20 United States Code 7274))*

2) Establishes the "California Cradle-to-Career Data Systems Act," which expresses legislative intent to build a data system that identifies and tracks predictive indicators to enable parents, teachers, health and human services providers, and policymakers to provide appropriate interventions and supports to address disparities in opportunities and improve outcomes for all students. (*Education Code* 10850 *et seq.*)

This bill:

1) Makes various findings and declarations relative to the need to ensure that children and families, especially those in economically disadvantaged communities, have full access to opportunities and services from before birth to career; the ability of neighborhood-based and regional-based networks to improve social outcomes; and the role that community and regional networks can play in recovery from the pandemic.

2) Establishes the California Coordinated Neighborhood and Community Services Grant Program, administered by the California Department of Social Services (CDSS) or another department within the California Health and Human Services Agency (CHHS), as designated by the Secretary of CHHS. The purpose of the grant program is to award competitive grants to eligible entities to do either of the following:

    a) Implement a comprehensive, integrated continuum of cradle-to-career solutions at the neighborhood level; or,

    b) Support the civic infrastructure and backbone of cradle-to-career networks to accomplish systems change.

3) Requires grants to be awarded to eligible entities that are Promise Neighborhoods, other community-based networks, or multi-neighborhood, regional cradle-to-career networks. Eligible entities include a nonprofit organization, public or nonprofit institution of higher education, or an Indian tribe or tribal organization. Eligible entities are required to work in partnership with at least one local educational agency and one social service agency located within the identified geographic boundaries.

4) Requires solutions funded by the grant program to include academic, health, social programs, and family and community supports identified by a needs assessment or indicators such as poor health for children; disparity gaps in school performance based on income or racial or ethnicity disaggregation; high rates of juvenile delinquency, adjudication, or incarceration; or high rates of foster care placement.

5) Requires an applicant to identify solutions that tackle systemic inequities and work toward community transformation.

6) Requires the department, in consultation with the California Department of Education (CDE), to develop an application process for eligible entities to apply for the grants.

7) Requires the department to aim to achieve geographic equity by giving priority to applicants serving remote communities, including rural and tribal communities, through the selection process.

8) Specifies information which an applicant must include in their application for a grant, including: plans to improve academic, health, and social outcomes for children living in an identified economically disadvantaged neighborhood; short- and long-term goals for each year of the grant; an analysis of neighborhood needs and assets; a detailed data plan; and an explanation of how the applicant will evaluate and improve the continuum of cradle-to-career solutions, among other information.

9) Requires an applicant, before receiving a grant, to perform an analysis of community assets available to the neighborhood, such as early learning and after school programs, community centers, and parks, as provided.

10) Requires an applicant to submit a preliminary memorandum of understanding, signed by each partner entity, which includes each partner's commitment and contribution to planning and implementing a comprehensive, integrated continuum of cradle-to-career solutions at the neighborhood level, including an

aligned theory of improvement and a proposed data governance plan, among other things.

11) Requires the department, for the 2023-24 through 2025-26 fiscal years, to competitively award grants as follows:

    a) Planning grants to Promise Neighborhoods or similar community-based networks and neighborhood regional cradle-to-career networks over three fiscal years.

    b) Implementation grants to Promise Neighborhoods or similar community-based networks and multi-neighborhood regional cradle-to-career networks over three fiscal years.

12) Requires each grantee to contribute a 100 percent match, or at least a 50 percent match for a Promise Neighborhood or other community-based network located in a rural or tribal community, as provided.

13) Requires each implementation grant recipient to use the funds to implement cradle-to-career services based on results of the needs analysis described in the application and plans to build system and organizational capacity; and to continuously evaluate and improve the program based on data and outcomes.

14) Requires grantees developing new or expanded longitudinal data systems to coordinate and align their data collection and reporting with the Cradle-to-Career Data System.

15) Requires the department to establish performance standards to measure progress on indicators and results used to evaluate the grant program.

16) Requires CDE, in consultation with CDSS, to establish a core set of academic results and indicators by which the grant recipients will be measured, as provided.

17) Requires the department to establish a core set of family and community support results and indicators by which the grant recipient will be measured, as provided.

18) Requires the department, in consultation with CDE, to establish at least two indicators related to health, social and emotional development, mental health, and wellness, as provided.

19) Requires each grant recipient to prepare and submit an annual report to the department that includes information regarding the number and percentage of children, family members, and community members served by the grant recipient, as specified.

20) Requires the department, in consultation with CDE, to establish an appropriate method for grant management, including contracting with other entities, as provided.

21) Makes implementation subject to appropriation in the Annual Budget Act.

22) Creates definitions for the purpose of implementing these provisions.

Background

Promise Neighborhoods. Promise Neighborhoods are a holistic, place-based approach to reducing poverty and improving economic, social, and academic outcomes in disadvantaged communities by developing "cradle to career" solutions that support children and families.

Federal Promise Neighborhood Initiative. In 2010, the United States Department of Education implemented the Promise Neighborhoods program, with the vision of significantly improving the educational and developmental outcomes of children in impoverished communities. With the second round of federal grants, three cities in California—Fresno, San Diego, and Hayward—became the first in the state to be awarded funding to develop Promise Neighborhoods.

According to the California Lifting Children and Families out of Poverty Task Force Report, data from the Hayward Promise Neighborhood showed that their services contributed to the significant improvement of graduation rates at Hayward High School, from 76 percent in 2011 to 89 percent in 2016. In addition, LA Promise Neighborhood high schools have more than doubled the proportion of students who graduate high school "college ready" (meeting admission requirements for the UC/CSU system) from 31 percent in 2013 to 68 percent in 2017.

This bill establishes the California Coordinated Neighborhood and Community Services Grant Program, administered by CDSS, modeled after the federal Promise Neighborhoods program.

Pursuant to AB 178 (Committee on Budget, Chapter 45, Statutes of 2022), the Legislature allocated $12 million to support existing Promise Neighborhoods in Chula Vista, Corning, Hayward, and Mission.

Comments

According to the author:

> A strong understanding of the community and regional context, as well the effective coordination of services and supports aligned with the needs of the community, are essential to achieving better outcomes for children and families at every stage of life – from cradle to career. Over the last 10 years, Promise Neighborhoods, Cradle to Career (C2C) networks, and similar entities have worked in disadvantaged communities. Utilizing a place-based, equity-focused approach, these networks coordinate services and supports across the public and private sectors and collect and share data to maximize the efficiency and efficacy of programming. Areas where these networks have operated have seen substantial improvements in healthcare access, literacy, and college and career readiness, as well as reduced child welfare and juvenile justice involvement. To scale these proven cradle to career solutions, the state must invest in the "It Takes A Village" strategy.

(NOTE: See the Senate Human Services Committee analysis for detailed background of this bill.)

Related/Prior Legislation

AB 932 (Levine, 2021) would have established the Cradle to Career Grant Program to administer public and private funds to address child poverty and achievement gaps in California children. AB 932 was held on the Assembly Appropriations Committee suspense file.

AB 686 (Allen, 2019) would have enacted the California Promise Neighborhoods Act of 2019, which would provide grants, administered by the Department of Education, to implement a comprehensive integrated continuum of cradle-to-college-to-career solutions, including academic, health, and social programs. AB 686 was set to be heard in the Assembly Education Committee, but the hearing was canceled at the request of the author.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown General Fund cost pressures, likely in the tens of millions of dollars, to fund the grants proposed in this bill.

- CDSS estimates General Fund costs, likely several million dollars, for state operations which would include costs for a contractor.

- CDE estimates costs for state operations, at least hundreds of thousands of dollars.

SUBJECT: Santa Clara Valley Transportation Authority: employee relations

SOURCE: American Federation of State, County and Municipal Employees

DIGEST: This bill transfers jurisdiction over labor disputes between the Santa Clara Valley Transportation Authority (the VTA) and its employees to the Public Employment Relations Board (PERB).

Senate Floor Amendments of 8/24/22 (1) clarify that the union's selection of PERB jurisdiction over unfair labor practices (ULPs) is irrevocable for the respective bargaining unit; (2) require the union to file notification of its selection for PERB jurisdiction with PERB's general counsel, or designee, and serve notice to one or more of the following: (a) the VTA's general manager, CEO, or the equivalent, (b) the VTA's general legal counsel, or the equivalent, or (c) to the VTA pursuant to

applicable regulations; (3) clarify that *if the union makes a selection for PERB jurisdiction* of ULPs, then PERB has exclusive jurisdiction of the initial determination as to whether the ULP charge is justified and, if so, the appropriate remedy; and (4) make minor grammatical changes.

ANALYSIS:

Existing law:

1) Governs collective bargaining in the private sector under the federal National Labor Relations Act (NLRA) but leaves to the states the regulation of collective bargaining in their respective public sectors. While the NLRA and the decisions of its National Labor Relations Board (NLRB) often provide persuasive precedent in interpreting state collective bargaining law, public employees generally have no collective bargaining rights absent specific statutory authority establishing those rights (29 United State Code § 151 et seq.).

2) Provides several statutory frameworks under California law to provide public employees collective bargaining rights, govern public employer-employee relations, and limit labor strife and economic disruption in the public sector through a reasonable method of resolving disputes regarding wages, hours and other terms and conditions of employment between public employers and recognized public employee organizations or their exclusive representatives. These include the Meyers-Milias-Brown Act (MMBA) which provides for public employer-employee relations between local government employers and their employees, including some, but not all public transit districts. (Government Code § 3500 et seq.)

3) Establishes PERB, a quasi-judicial administrative agency charged with administering certain statutory frameworks governing employer-employee relations, resolving disputes, and enforcing the statutory duties and rights of public agency employers and employee organizations, but provides the City and County of Los Angeles, respectively, local alternatives to PERB oversight. (GC § 3541)

4) Does not cover California's public transit districts by a common collective bargaining statute. Instead, while some transit agencies are subject to the MMBA, many transit agencies are instead still subject to labor relations provisions found in each district's specific Public Utilities Code (PUC) enabling statute, in joint powers agreements, or in articles of incorporation and bylaws. (e.g., Public Utilities Code § 28500)

5) Vests PERB with jurisdiction over ULP charges for the Orange County Transit District Authority (OCTDA), the San Francisco Bay Area Rapid Transit District (BART), and the Sacramento Regional Transit District (SacRT). (PUC §§ 40122.1 and 40122.2, § 28848 – § 28863; and § 102398 – § 102418)

6) Provides transit employees not under the MMBA with basic rights to organization and representation, but does not define or prohibit ULPs. Unlike other California public agencies and employees, these transit agencies and their employees generally must rely upon the courts to remedy alleged violations. Additionally, they may be subject to provisions of the federal Labor Management Relations Act of 1947 (Taft-Hartley) and the 1964 Urban Mass Transit Act, now known as the Federal Transit Act. (PUC § 24501 et seq.; 49 United State Code § 5333 (b))

7) Provides that the following provisions shall govern disputes between exclusive bargaining representatives of public transit employees and local agencies not covered by the MMBA:

   a) The disputes shall not be subject to any fact-finding procedure otherwise provided by law.

   b) Each party shall exchange contract proposals not less than 90 days before the expiration of a contract, and shall be in formal collective bargaining not less than 60 days before that expiration.

   c) Each party shall supply to the other party all reasonable data as requested by the other party.

   d) At the request of either party to a dispute, a conciliator from the California State Mediation and Conciliation Service shall be assigned to mediate the dispute and shall have access to all formal negotiations. (GC § 3611).

8) Authorizes the establishment of the VTA through the Santa Clara Valley Transportation Act (SCVTA), which includes provisions governing labor relations between the VTA and its employees and which provides for labor organization representation, unit determination, collective bargaining, and retirement benefits. (PUC § 100000 et seq.)

This bill:

1) Makes it a primary purpose of SCVTA to promote the improvement of personnel management and employer-employee relations within the VTA by providing a uniform basis for recognizing the right of employees to join

employee organizations of their own choice, to be represented, to select one employee organization as the exclusive representative of the employees in an appropriate unit, and to afford employees a voice at work.

2) Grants PERB jurisdiction to enforce and apply its regulations to ULPs, as specified, if the exclusive representative makes an irrevocable selection for PERB to have jurisdiction over ULPs for one or more of its bargaining units.

3) Requires PERB to perform its duties consistent with its regulations; and authorizes it to make additional regulations.

4) Authorizes PERB to adopt, amend, or repeal all rules and regulations necessary to carry out the bill's provisions as emergency regulations in accordance with the Administrative Procedure Act.

5) Provides that there is a conclusive presumption that the adoption, amendment, or repeal of regulations is necessary for the immediate preservation of the public peace, health, safety, or general welfare, as specified.

6) Retains the Government Code's exclusive, transit district impasse resolution and injunctive relief procedures (GC § 3610 et seq.) and states that the bill does not displace or supplant them.

7) Allows an exclusive the VTA employees' representative to make an irrevocable selection to move one or more of its represented bargaining units to PERB's jurisdiction for ULPs.

8) Require the exclusive representative to file notification of its selection with PERB's general counsel, or designee, and serve notice to one or more of the following: the VTA's general manager, CEO, or the equivalent; the VTA's general legal counsel, or the equivalent; to the VTA pursuant to applicable regulations.

9) Provides that if the union makes a selection for PERB jurisdiction of ULPs, then PERB has exclusive jurisdiction, as specified, of the initial determination as to whether the ULP charge is justified and, if so, the appropriate remedy except that PERB may not award strike-preparation expenses as damages in an action to recover damages due to an unlawful strike nor damages for costs, expenses, or revenue losses incurred during, or as a consequence of, an unlawful strike.

10) Requires the VTA to give reasonable written notice to an exclusive representative of its intent to make any change to matters within the scope of

representation of the employees represented by the exclusive representative for purposes of providing the exclusive representative a reasonable amount of time to negotiate with the VTA regarding the proposed changes.

11) Makes legislative findings and declarations that a special statute is necessary and that the Legislature cannot make a general statute applicable within the meaning of Section 16 of Article IV of the California Constitution because of the unique need of the Santa Clara Valley Transportation Authority to efficiently and cost-effectively adjudicate ULP complaints.

12) Requires that state mandated costs, if any, be reimbursed according to the Commission on State Mandates process pursuant to Government Code § 17500 et seq.

Comments

Need for this bill? According to the author:

"Public employees have collective bargaining rights and the ability to resolve employer-employee conflicts through the Meyers-Milias Brown Act (MMBA) and/or the Public Employment Relation Board (PERB). The VTA is not covered under the MMBA or included in PERB's jurisdiction. Therefore, when they seek resolution to unfair labor practices (ULP), they must file a writ with the Superior "Court of jurisdiction requesting a judge to review the ULP complaint. The dispute is then assigned to a judge that may or may not have knowledge of or experience with public employer-employee relations or public labor law. The courts, already overburdened and underfunded, can take years to resolve a conflict, contributing to workplace tensions."

Related/Prior Legislation

SB 975 (Laird, 2022) transfers jurisdiction over ULP charges involving the Santa Cruz Metropolitan Transit District from the judicial system to PERB. This bill is pending consideration in the Assembly Public Employment and Retirement Committee.

SB 598 (Pan, Chapter 492, Statutes of 2021) provided exclusive employee organizations the option of transferring jurisdiction over ULPs for their represented bargaining units within SacRT from the judicial system to PERB.

AB 2850 (Low, Chapter 293, Statutes of 2020) granted PERB jurisdiction over disputes relating to employer-employee relations between BART and its employees.

AB 355 (Daly, Chapter 713, Statutes of 2019) required OCTDA and its employees to adjudicate ULP charges before PERB.

AB 2305 (Rodriguez, 2018) would have extended PERB's jurisdiction to include disputes between public agencies and peace officer employee organizations, excluding those under the City and County of Los Angeles employee relations commissions' jurisdiction and disputes between public agencies and individual peace officers, as specified. The Governor vetoed this bill, reasoning:

> "Over the years, the Legislature has expanded the Board's jurisdiction, but the necessary funding for the increased workload has not kept pace. This has resulted in significant backlogs at the Board – both labor and employers have complained about this problem. This Administration has recently increased the Board's funding to help correct this problem. The Board's jurisdiction should not be expanded again until the Board's ability to handle its previously expanded caseload is established."

AB 2886 (Daly, 2018) would have transferred jurisdiction over ULP disputes for the Orange County Transit District Authority and San Joaquin Regional Transit District from the judicial system to the PERB, effective January 1, 2020. The Governor vetoed this bill for the same reason as AB 2305 (Rodriguez, 2018).

AB 3034 (Low, 2018) would have placed BART supervisory, professional, and technical employee units under the MMBA; thereby, granting them certain statutory rights related to the employer-employee relationship. The Governor vetoed this bill for the same reason as AB 2305 (Rodriguez, 2018) and AB 2886 (Daly, 2018).

AB 530 (Cooper, 2017) would have extended PERB's jurisdiction to include Penal Code Section 830 peace officers; authorized a peace officer or labor union representing these peace officers to bring certain actions in court and, excluded employers and employees of the City and County of Los Angeles from its provisions. The Governor vetoed this bill, stating:

> "This bill authorizes peace officers to bring unfair practice charges to the Public Employment Relations Board while preserving their existing right to directly petition a superior court for injunctive relief. No other group has both of these rights and I'm unconvinced that providing such a unique procedure is warranted."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, PERB estimates that it would incur first-year costs of up to $50,000, and up to $19,000 annually thereafter, to implement the provisions of the bill (General Fund).

In addition, by requiring the VTA to represent itself before PERB, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on local agencies, local agencies could claim reimbursement of those costs (General Fund). The annual magnitude of these claims is unknown.

American Federation of State, County and Municipal Employees (source)
California State Legislative Board, Smart - Transportation Division
International Federation of Professional and Technical Employees, Local 21
Service Employees International Union, Local 521
Service Employees International Union, Local 1021

OPPOSITION: (Verified 8/25/22)

None received

ARGUMENTS IN SUPPORT: According to the American Federation of State, County and Municipal Employees:

"PERB is a more timely, accessible, and labor-focused venue to resolve any future ULP conflicts that may arise. Transit agencies should have access to the same well-regarded employer-employee conflict resolution process as most California public employees. Assembly Bill 2524 permits the VTA employee organizations to move to the jurisdiction of PERB for ULP complaints. In moving to PERB, the VTA will join Orange County Transportation Authority, Bay Area Rapid Transit and Sacramento Regional Transit."

SUBJECT: Local public employee organizations

SOURCE: California Professional Firefighters

DIGEST: This bill authorizes a union to charge a local public employee firefighter who is a conscientious objector or who declines membership in the union for reasonable costs of representation if the firefighter requests representation by the union, as specified. This bill also requires a public agency to wait 15 instead of 10 days before the public agency can implement its last, best, and final offer (LBFO), after completing impasse procedures.

Senate Floor Amendments of 8/25/22 limit the union's right to collect the reasonable costs only to instances where the union does not exclusively control the proceeding's process.

ANALYSIS:

Existing law:

1) Governs collective bargaining in the private sector under the federal National Relations Labor Relations Act (NLRA) but leaves it to the states to regulate

collective bargaining in their respective public sectors. (29 United State Code § 151 et seq.) While the NLRA and the decisions of its National Labor Relations Board often provide persuasive precedent in interpreting state collective bargaining law, public employees have no collective bargaining rights absent specific statutory authority establishing those rights.

2) Provides several statutory frameworks under California law to provide public employees collective bargaining rights, govern public employer-employee relations, and limit labor strife and economic disruption in the public sector through a reasonable method of resolving disputes regarding wages, hours, and other terms and conditions of employment between public employers and recognized public employee organizations or their exclusive representatives. These include the *Meyers-Milias-Brown Act* (MMBA) which governs the employer-employee relationship between local public agencies and their employees. (Government Code § 3500 et seq.)

3) Provides a timeframe of *not earlier than 10 day*s in which a local public agency employer may implement its LBFO, after all mediation and factfinding procedures have been exhausted, but excludes charter cities and counties from the factfinding process when binding interest arbitration applies. (GC § 3505.7)

4) Establishes the Public Employment Relations Board (PERB), a quasi-judicial administrative agency charged with resolving disputes and enforcing the statutory duties and rights of public agency employers and employee organizations, but provides the City and County of Los Angeles a local alternative to PERB oversight. (GC § 3541)

5) Prohibits anyone from requiring an employee who is a member of a bona fide religion, body, or sect that has historically held conscientious objections to joining or financially supporting public employee organizations from joining or financially supporting a public employee organization as a condition of employment. (GC 3502.5 (c))

6) Establishes the Firefighters Procedural Bill of Rights Act (FPBRA), which provides firefighters special procedural protections from public agency disciplinary actions, as specified. (GC § 3250)

7) Defines “Firefighter” as any firefighter employed by a public agency, including, but not limited to, any firefighter who is a paramedic or emergency medical technician, irrespective of rank. “Firefighter” also means an employee of the

Department of Forestry and Fire Protection holding a temporary appointment to a firefighter position and employed as a seasonal firefighter. (GC § 3251)

This bill:

1) Authorizes a recognized employee organization to charge a public agency firefighter covered under the FPBRA who holds a conscientious objection, as specified, or who declines membership in the recognized employee organization, for the reasonable cost of representation if the firefighter requests individual representation from the recognized employee organization in a discipline, grievance, arbitration, or administrative hearing.

2) Provides that the right to collect reasonable costs only applies where the union does not exclusively control the proceeding's process.

3) Changes from 10 to 15 days the earliest time a public agency that is not required to proceed to interest arbitration may, after holding a public hearing regarding the impasse, implement its LBFO, as specified.

Comments

Need for this bill? According to the author, "PERB's effective operations are critical to improved public sector employer-employee relations, and for providing timely and cost-effective alternatives for employers, employee organizations, and employees to resolve labor relations disputes.

"This is especially true for firefighters who, unlike other public employees, are statutorily prohibited from striking. Therefore, firefighters rely upon PERB's expertise to impartially, fairly, and rationally settle labor disputes such as securing just compensation for their services, promoting a safe and healthy working environment, and ensuring the establishment of just and reasonable working conditions.

"Additionally, it's imperative that that PERB maintain effective impasse procedures for employers and employee organizations to maintain employee/employer relations. Under current law, after mediation and fact finding, parties are only given 10 days before the public agency can impose their last, best, final offer."

Related/Prior Legislation

AB 2433 (Cooper, 2020) would have changed the period from 10 to 15 days that a public agency could impose its LBFO after completing impasse procedures, as specified. The Assembly Appropriations Committee held the bill in committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, PERB indicates that the bill would have a negligible fiscal impact.

SUPPORT: (Verified 8/26/22)

California Professional Firefighters (source)

OPPOSITION: (Verified 8/26/22)

None received

ARGUMENTS IN SUPPORT: The California Professional Firefighters (CPF) states that existing law authorizes employee organizations representing state firefighters to charge non-union state firefighters for the reasonable costs of representation in a grievance, arbitration, or administrative hearing. According to CPF, "AB 2556 would establish a similar provision for the authorized employee organization of municipal and county fire departments and would not impact or undermine the duty of fair representation and maintains all existing bargaining unit rights regarding determination of representation. Not only will this measure ensure parity among the statutes for firefighters, but it will also ensure that members are not compelled to subsidize those who do not pay for the representation afforded by the recognized employee organization."

ASSEMBLY FLOOR: 61-0, 5/5/22 (Consent) - See last page for vote

SUBJECT: Optometry: ophthalmic and optometric assistants

SOURCE: California Optometric Association

DIGEST: This bill corrects a cross-reference between the clinical laboratory director definition related to optometrists in the Optometry Practice Act (Act), clarifies training requirements for optometric assistants, as specified, reauthorizes and requires an optometrist in an emergency to stabilize, if possible, and immediately refer any patient who has an acute attack of angle-closure glaucoma to an ophthalmologist.

Senate Floor Amendments of 8/22/22 clarify an optometric assistant's required training, add language to avoid a chaptering conflict with AB 2236 (Low), and make other technical and clarifying changes.

ANALYSIS:

Existing law:

1) Defines the practice of optometry to include the diagnosis, prevention, treatment, and management of disorders and dysfunctions of the visual system,

as authorized, as well as the provision of habilitative or rehabilitative optometric services, including laboratory tests or examinations performed in an optometrist office classified as waived under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), as specified. (Business and Professions Code (BPC § 3041(a)(5)(E)(ii))

2) Authorizes an optometrist to treat specified glaucomas using antiglaucoma agents if the optometrist has obtained a therapeutic pharmaceutical agents certification and completed specified glaucoma coursework. (BPC §§ 3041(a)(5)(C), 3041(c), 3041.3)

3) Provides for the licensure, registration, and regulation of clinical laboratories and various clinical laboratory personnel by the California Department of Public Health (CDPH). (BPC §§ 1200-1327)

4) Authorizes an optometrist to serve as the laboratory director for a laboratory classified as waived under the CLIA (42 U.S.C. Sec. 263a; Public Law 100-578) that only performs clinical laboratory tests authorized under the Optometry Practice Act. (BPC § 1209(a)(2)(D))

This bill:

1) Corrects an outdated code reference pertaining to optometrists operating as a laboratory director.

2) Reinstates a provision in the optometry practice act, which requires an optometrist, in an emergency, to stabilize a patient if possible and immediately refer any patient who has an acute attack of angle closure to an ophthalmologist.

3) Clarifies training requirements for an optometric assistant to perform subjective refractions, as specified.

4) Adds language to avoid a chaptering conflict.

5) Makes other technical and clarifying changes.

Background

Federal and State Regulation for Clinical Laboratory Testing. A facility that performs laboratory tests on human specimens for diagnosis or assessment must be

certified under CLIA. CLIA certification requirements vary depending on the complexity of the laboratory tests performed.

Clinical laboratories or other testing sites need to know whether each test system used is waived, moderate, or high complexity. In general, the more complicated the test, the more stringent the requirements, including increased training and licensing of laboratory personnel. At a minimum, all laboratories must have a licensed clinical laboratory director. The US Food and Drug Administration (FDA) determines the complexity of CLIA laboratory tests. Waived tests are simple tests with a low risk for an incorrect result. They include tests listed in the CLIA regulations, tests cleared by the FDA for home use, and tests approved for waiver by the FDA using the CLIA criteria. Tests not classified as waived are assigned a moderate or high complexity category based on seven criteria given in the CLIA regulations, including ease of use, knowledge required, and types of materials tested. For commercially available FDA-cleared or approved tests, the test complexity is determined by the FDA during the pre-market approval process.

Optometrists are authorized to direct a laboratory that performs waived testing. However, the clinical laboratory laws require an update to correct a cross-reference that is no longer applicable due to chaptering language between AB 691 (Chau, Chapter, Statutes of 2021) and AB 407 (Salas, Chapter 652, Statutes of 2021) which amended that code section. This bill makes that update.

Last year, AB 407 (Salas, Chapter 652, Statutes of 2021) revised the current scope of practice for licensed optometrists by authorizing additional tests related to conditions of the eye, authorized the treatment of specified conditions of the eye, authorized the utilization of light therapy, and permitted the use of new FDA-approved technologies. As noted by the Sponsor, there was a drafting error last year, which inadvertently struck out the requirements for emergency treatment by an optometrist related to acute angle closure glaucoma, which stated, *in an emergency, an optometrist shall stabilize, if possible, and immediately refer any patient who has an acute attack of angle closure to an ophthalmologist.* This bill adds that requirement back into the Act.

In addition, that bill authorized optometric assistant to perform subjective refractions, under specified conditions. This bill clarifies how an optometric assistant may acquire the required training hours.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

SUPPORT: (Verified 8/22/22)

California Optometric Association (source)

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: The California Optometric Association writes in support and notes, "The bill reinstates the ability of an optometrist to be a lab director for CLIA waived testing. Without this authority, optometrists will not be able to diagnose certain eye diseases with point of-care testing. They also will not be able to detect/rule out other conditions that effect the eye, like diabetes. The authority to direct CLIA waived labs needs to be restored immediately so that optometrists can continue to use point-of-care testing that they have been doing since 2012. The bill also reinstates the ability to stabilize a patient with an acute attack of angle closure glaucoma. The authority to stabilize a patient with acute angle closure was added in 2008 with SB 1406 (Correa) and there has been no reported issues or concerns. The authority was accidentally deleted in the end-of-session amendments to AB 407."

SUBJECT: Reproductive and sexual health inequities

SOURCE: ACCESS Reproductive Justice
Black Women for Wellness Action Project
California Latinas for Reproductive Justice

DIGEST: This bill establishes the California Reproductive Justice and Freedom Fund (RJ Fund), and specifies that the goal of the RJ Fund is to dismantle historic and standing systemic reproductive and sexual health inequities. Requires the California Department of Public Health (CDPH), upon appropriation by the Legislature, to award grants from the RJ Fund to eligible organizations over a three-year period, and requires grant recipients to use any grant funds to implement a program or fund an existing program that provides and promotes medically accurate, comprehensive reproductive and sexual health education.

Senate Floor Amendments of 8/24/22 (1) delete provisions establishing a working group; (2) require CDPH to solicit grant applications by July 1, 2023, and to commence awarding grants by December 31, 2023; and (3) make changes to the findings and declarations.

ANALYSIS:

Existing law:

1) Establishes the CDPH, directed by a state Public Health Officer, to be vested with all the duties, powers, purposes, functions, responsibilities, and jurisdiction as they relate to public health and licensing of health facilities, as specified. Requires CDPH to maintain a program of maternal and child health. Requires CDPH to track and publish data on severe maternal morbidity and on pregnancy-related deaths, as specified. [HSC §131050, §123225, and §123630.4]

2) Establishes the Office of Health Equity (OHE) within CDPH for the purposes of aligning state resources, decision making, and programs to (a) achieve the highest level of health and mental health for all people, with special attention focused on those who have experienced socioeconomic disadvantage and historical injustice, as specified; (b) work collaboratively with the Health in All Policies Task Force to promote work to prevent injury and illness through improved social and environmental factors that promote health and mental health; (c) advise and assist other state departments in their mission to increase access to, and the quality of, culturally and linguistically competent health and mental health care; and, (d) improve the health status of all populations and places, with a priority on eliminating health and mental health disparities and inequities. [HSC §131019.5 (b)]

3) Sets forth the duties of OHE, including requiring it to serve as a resource for ensuring that programs collect and keep data and information regarding ethnic and racial health statistics, including those statistics described in reports released by Healthy People 2020, and information based on sexual orientation, gender identity, and gender expression, strategies and programs that address multicultural health issues, including, but not limited to, infant and maternal mortality, cancer, cardiovascular disease, diabetes, HIV/AIDS, child and adult immunization, osteoporosis, menopause, and full reproductive health, asthma, unintentional and intentional injury, and obesity, as well as issues that impact the health of racial and ethnic communities, women, and the lesbian, gay, bisexual, transgender, queer, and questioning (LGBTQQ) communities, including substance abuse, mental health, housing, teenage pregnancy, environmental disparities, immigrant and migrant health, and health insurance and delivery systems. [HSC §152(a)(7)]

This bill:

1) Establishes the California Reproductive Justice and Freedom Fund (RJ Fund), and specifies that the goal of the RJ Fund is to dismantle historic and standing systemic reproductive and sexual health inequities through medically accurate, culturally congruent education and outreach, as well as to create innovative strategies that meaningfully address and function to eliminate root causes of reproductive oppression.

2) Requires CDPH, upon appropriation by the Legislature, to award grants from the RJ Fund to eligible CBOs over a three-year period. Requires CDPH to post the grant application on its website and solicit applications by July 1, 2023 and to award grants to selected entities by December 31, 2023.

3) Requires grant recipients to use any grant funds to implement a program or fund an existing program that provides and promotes medically accurate, comprehensive reproductive and sexual health education. Requires a funded program to: (a) promote reproductive justice; (b) provide medically accurate, culturally congruent reproductive and sexual health education that is inclusive of information on abortion rights, care, and services. Requires the education or outreach provided to include information on how to obtain an abortion or provide abortion referrals, especially upon request; and, (c) be targeted at communities that have experienced or continue to experience high reproductive or sexual health inequities or disparities. This includes communities that have experienced reproductive or sexual health inequities or disparities because of historic and systemic oppression, including based on their race and ethnicity, immigration status, sexual orientation, gender expression, foster youth status, or disability.

4) Permits grant recipient organizations to use a portion of grant funds to pay for costs associated with carrying out grant activities. Requires an assessment of associated costs to contemplate the CBO, the community served, and the nature of services it provides, and may include: building staff capacity; development and dissemination of materials; and, travel costs.

5) Prohibits CDPH from spending more than 5% of the funds on administrative costs.

Comments

1) *Author's statement.* According to the author, the U.S. is seeing the most dramatic rollback of reproductive rights since the *Roe v. Wade* ruling. In 2021,

states across the country introduced and passed more anti-choice laws than in the last 30 years. In 2022 over 200 anti-choice bills have been introduced nationwide. Although California unapologetically affirms birthing people's rights to plan if, when, and how they create a family, the reality is that many people of color, particularly Black and Indigenous communities do not have tangible access to wrap around reproductive and sexual health care as well as the complete, medically accurate information necessary to make the best choices for themselves and their families. Additionally, California has not been spared the advancements of the anti-choice movement, as Crisis Pregnancy Centers — organizations that present as medical centers and purport to offer comprehensive reproductive health care information and services, but have been very well documented as promoting false and biased medical claims— outnumber real clinics that provide abortion services. From the lack of targeted innovative approaches to address long-standing disparities in reproductive and sexual health, we now see, over two decades, increasing negative reproductive health outcomes in communities of color. This bill employs long term and immediate strategies that are innovative and responsive, to meaningfully address persistent reproductive and sexual health inequities for all Californians.

2) *Health inequities.* According to a 2018 California Health Care Foundation (CHCF) report, California is the most racially diverse state in the country. Over the last 20 years, California's population has grown more diverse, as Latinos have grown from 32% to 40% of the population and Asians from 12% to 14% while whites have declined from 48% to 37%. Between 2019 and 2040, California's population is expected to increase by 6.5 million. People of color represent 93%, or six million, of the expected increase. People of color continue to face barriers to accessing health care, often receive suboptimal treatment, and are most likely to experience poor outcomes in the health care system. California also has some of the highest rates of immigrants, refugees, and undocumented people when compared to the rest of the country, and people who speak a language not considered a "threshold language" (languages spoken at a high proportional rate within a geographic region) are often unable to receive materials and services in their language. A 2018 study of refugee patients found that language barriers in accessing health care services and insufficient time to meet educational needs of refugees were major challenges outside of the clinic visit setting. Poor health literacy and difficulties communicating health needs and building trust within the interactive triad of refugee, physician, and interpreter impacted clinic visits. And a February 2022 CHCF report states that non-English speakers, people who are low-income, and people living in rural areas experience a "digital divide" that has deepened due to the pandemic and the rise of telemedicine.

3) *California Future of Abortion Council (CA FAB Council).* According to the CA FAB Council website, in September 2021, with the constitutional right to abortion facing the most severe threats since *Roe v. Wade*, the CA FAB Council convened to identify the most pressing barriers to care for patients seeking abortion services in California. More than 40 organizations representing sexual and reproductive health care providers, reproductive rights and reproductive justice advocacy organizations, legal and policy experts, researchers, and advocates, with the support of California policymakers, joined together to recommend policy proposals supporting equitable and affordable access to abortion care for Californians and all who seek care here. The CA FAB Council made 45 policy recommendations relating to seven main areas of focus: (a) Investment in abortion funds, direct practical support, and infrastructure to support patients seeking abortion care; (b) Cost barriers and adequate reimbursement for abortion and abortion-related services; (c) Investment in a diverse California abortion provider workforce and an increase in training opportunities for BIPOC and others historically excluded from health care professions; (d) Reducing administrative and institutional barriers to care; (e) Legal protections for abortion patients, providers, and supporting organizations, and individuals; (f) Addressing misinformation and disinformation and ensuring access to medically accurate, culturally relevant, and inclusive education about abortion and access to care is widely and equitably available; and (g) Efforts to collect data, conduct research, and distribute reports to assess and inform abortion care and education needs in California.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown General Fund cost pressures, likely millions of dollars, to support the grant program.

ARGUMENTS IN SUPPORT: The Black Women for Wellness Action Project (BWWAP) is a co-sponsor of this bill and states that we are currently witnessing a concerted effort to dramatically roll back reproductive rights across the country. In 2021, states across the country passed more anti-choice laws than in the last 30 years and since January, over 500 anti-choice bills have been introduced nationwide. Although California continues to affirm and demonstrate its commitment to reproductive freedom, BIPOC people, particularly young BIPOC people, and gender expansive people bear the burden of reproductive and sexual health inequities. The reality is that BIPOC communities lack tangible access to wrap around reproductive and sexual health care as well as the comprehensive, medically accurate, culturally congruent information necessary to make the best choices for themselves and their families. Black, Indigenous, and other communities of color continue to bear the burden of sexual and reproductive health disparities across California that include: inequitable access to abortion information, care and related services; inequities in sexually transmitted infection rates; and inequities in accessing contraceptive care. BWWAP concludes that these inequities are deeply rooted and compounded by the numerous racial and income-based inequities and forms of oppression that Black, Indigenous and other communities of color experience.

ARGUMENTS IN OPPOSITION: The National Institute of Family and Life Advocates (NIFLA), states that this bill is evidence of state-sponsored content-based restriction abridging the freedom of speech protected by the First Amendment under *NIFLA v. Becerra* and violates both the California state constitution as well as the First Amendment of the U.S. Constitution and should be rejected by this committee.

The California Catholic Conference writes that they are, as always, opposed to abortion expansion since it always takes the life of an innocent human being, with more than 132,000 lives lost each year in our state. Women deserve to be empowered with non-violent solutions to the challenges they face during pregnancy. However, this bill should also be rejected because it prioritizes the expansion of abortion and third-party reproduction over ensuring California women have full spectrum care when they choose to become parents, in the name of marginalized communities.

SUBJECT: Vehicle registration and toll charges

SOURCE: Author

DIGEST: This bill makes numerous changes to the administration of bridge and toll roads.

ANALYSIS:

Existing law:

1) Requires every vehicle using a toll bridge or toll highway to be liable for any tolls or other charges that may be prescribed and prohibits a person from evading or attempting to evade the payment of those tolls or charges.

2) Requires toll operators, or processing agencies, to issue a notice of toll evasion violation to the registered owner of the vehicle within 21 days of the violation if a vehicle is found, by automated devices (including cameras), by visual observation, or otherwise, to have evaded a toll. Prescribes toll evasion penalties to include any late payment penalty, administrative fee, fine, assessment, and costs of collection. Limits toll evasion violation penalties to $100 for the first offense, $250 for a second violation within one year, and $500 for each additional violation within one year.

3) Establishes a process for contesting a notice of toll evasion violation. Within 21 days from the issuance of the notice or within 15 days from the mailing of the notice, whichever is later, a person may contest the notice in which case the toll operator is required to conduct an administrative investigation. If the person is not satisfied with the results of the investigation, he or she may, within 15 days of the mailing of the results and after paying the penalty for toll evasion, request an administrative hearing. If the person is not satisfied with the results, he or she may, within 20 days of the mailing of the results, appeal to the court.

4) Authorizes the Department of Motor Vehicles (DMV) to make vehicle registration contingent upon compliance with a toll evasion violation.

5) Requires a person, if after applying for or receiving a driver's license moves to a new residence, or acquires a new mailing address to notify DMV within 10 days of the address change.

6) Requires the application for an original driver's license or renewal of a driver's license to contain specified information, including the applicant's name, age, gender category, mailing address, and residence address.

7) Defines "pay-by-plate toll payment" as an issuing agencies' use of on-road vehicle license plate identification recognition technology to accept payment of tolls in accordance with policies adopted by the issuing agency.

This bill:

1) Requires, generally, implementation of the provisions of the bill to become operative on July 1, 2024, except as specified.

2) Requires DMV, commencing January 1, 2027, to include a statement as part of an application for an original or renewal driver's license informing the person that they may also need to change their address for purposes of their vehicle registration. Also requires DMV to give the same information orally if the driver's license application or renewal is done in person.

Toll notices for bridges

3) Requires, for toll bridges, an issuing agency that permits pay-by-plate toll payment, as defined, that permits payment by a transponder or other electronic toll payment device to send an invoice by mail for any unpaid toll to the registered vehicle owner. Requires the invoice to include a notice to the registered owner that, unless the registered owner pays the toll by the due date

shown on the invoice, a toll evasion penalty will be assessed. Requires the invoice due date shall not be less than 30 days from the invoice date.

4) Stipulates, for toll bridges, that if a toll invoice is not paid by the due date shown on the invoice, the nonpayment shall be deemed an evasion of tolls and the issuing agency, or processing agency as the case may be, shall mail a notice of toll evasion violation to the registered owner, as specified.

Caps on penalties

5) Limits, for toll bridges, toll penalties to $25 for the notice of violation (1st), $50 for the notice of delinquency of evasion (2nd) for a cumulative total of $50 for each individual toll evasion violation. Allows the penalties to include any administrative fee, fine, or assessment imposed by the state in addition to the cumulative $50 limit per each individual toll evasion violation.

6) Limits, for toll roads and express lanes, toll penalties to $60 for the notice of violation (1st), with a maximum cumulative toll evasion penalty not to exceed $100 for each individual toll evasion violation.

7) Requires that if the registered owner, by appearance or by mail, makes a payment to the processing agency within 15 days of the mailing of the notice, the amount owed shall consist of the amount of the toll without any additional penalties, administrative fees, or charges.

8) Authorizes the toll penalties amounts to be adjusted by the California Consumer Price Index.

9) Requires an issuing agency to waive the toll evasion penalty for a first violation if the person contacts the customer service center within 21 days from the mailing of the notice, and the person is not currently an accountholder with the issuing agency, signs up for an account, and pays the outstanding toll.

Contesting tolls violations

10) Makes changes to existing provisions for contesting tolls violations, including allowing 30 days, instead of 15 days, from the mailing of the notice for a person to contest the toll violation; requires the processing agency or issuing agency to review evidence of the alleged violation, including photographs; allows the agency to email, in addition to mail, the results; requires a person that qualifies under the payment plan only be required to pay the toll amount, not the penalty, while awaiting an administrative review.

Payment Plans

11) Requires issuing agencies to make a payment plan option available to a person whose monthly income is 200% of the current poverty guidelines, or less, as specified.

12) Stipulates that the agency is not be required to offer more than one payment plan to a person at any given time, nor to offer a person more than two payment plans in a six-year period.

13) Requires the issuing agency, for purposes of verifying a person's eligibility, to accept all of the following: an unexpired proof of enrollment of participation in the CalFresh program, Medi-Cal, or another low-income program with the same or more exacting low-income requirement; or an unexpired county benefit eligibility letter. Allows for other evidence of the persons' income may also be accepted, as determined by the issuing agency.

14) Requires the payment plan option apply to toll evasion penalties in excess of $100; the payment of no more than $25 per month for total outstanding toll evasion penalties $600 or less; include no prepayment penalty for paying off the balance prior to the payment period expiring; and include a process for removal of any DMV registration hold. Stipulates that the agency is not be required to offer a payment plan if the person has more than $2,500 in outstanding toll evasion penalties.

15) Requires information regarding the issuing agency's payment plan to be posted on an Internet website.

16) Stipulates that the agency may go above the payment plans required minimums.

17) Contains an operative date, for payment plans, July 1, 2023, for toll bridges, and July 1, 2024, for toll roads.

18) Requires DMV to not make vehicle registration contingent upon compliance with a toll evasion violation if the person is entered into a payment plan, as specified, and has made the first payment. If the person is delinquent on the payment plan for more than 10 business days, requires DMV to refuse to renew vehicle registration until the terms of the payment plan are satisfied, and the toll agency has notified DMV.

Toll collection options and customer service

19) Requires an issuing agency that operates an electronic toll collection system that permits payment by a transponder or other electronic toll payment device to, directly or through a third-party vendor, make the transponder or other electronic toll payment device available for acquisition online, by mail, and in person at a retail outlet, the office of an issuing agency or processing agency, as defined, or customer service center. Requires at least one retail outlet, kiosk, or customer service be located within the jurisdiction of the issuing agency.

20) Requires the issuing agency to post on an internet website related to its electronic toll collection system locations where tolls may be paid with cash, and locations at which a transponder or other electronic toll payment device may be acquired. Requires the price of the transponder or other electronic toll payment device to not exceed the reasonable cost to the issuing agency based on the estimated cost to procure and distribute the device.

21) Defines "retail outlet" to include a store managed by the issuing agency, a cash payment location, or other locations not managed by the issuing agency.

22) Requires that if issuing agency offers a transponder or other electronic toll payment device, a person be allowed to acquire a transponder or other electronic toll payment device with cash, or with a credit or debit card, and be allowed to load a minimum of one hundred dollars ($100) onto the associated account with cash or with a credit or debit card. Stipulates, there shall be no additional transaction fee charged to acquire the transponder or other electronic toll payment device except, as specified. Prohibits issuing agency from assessing any additional transaction fee to the amount a person is charged by a cash payment network company to load funds to an account using cash through a cash payment network.

23) Requires the issuing or processing agency's offices or customer service centers, subject to extenuating circumstances and holidays, to be open at least five hours per week between the hours of 6 a.m. to 8 a.m. or 5 p.m. to 7 p.m., or on a Saturday. Stipulates that a person shall be able to conduct all of the following transactions: (a) acquire the issuing agency's transponder or other electronic toll payment device; (b) load money onto an account with the issuing agency; (c) pay a toll notice, including fines and penalties; and (d) register or remove a license plate to or from a transponder or other electronic toll payment device account with the issuing agency for payment of tolls.

Stipulates the issuing agency cannot charge persons paying cash an additional transaction fee for any transaction listed.

24) Requires at least one issuing or processing agency's office or customer service center within the issuing agency's jurisdiction and have two or more physical locations within each county in which a toll facility operated for purposes of conducting the transactions, as specified.

25) Requires the issuing agency, or through a third-party vendor, subject to extenuating circumstances and holidays directly, to maintain a customer service telephone line that shall be operated by a live person for at least 35 hours per week between the hours of 8 a.m. to 5 p.m. and an additional 5 hours per week between the hours of 6 a.m. to 8 a.m., from 5 p.m. to 7 p.m., or on a Saturday. Requires the customer service telephone line to be available to address questions related to acquiring a transponder or other electronic toll payment device, paying toll notices, disputing tolls and penalties, setting up payment plans, and registering the license plate of a vehicle to a transponder or other electronic toll payment device account. Requires the customer service telephone line to provide language interpreter services and assistance for deaf or hard-of-hearing individuals.

Rental car companies

26) Requires an issuing agency to allow a driver of a rental vehicle to register the rental vehicle to a transponder or other electronic toll payment device account with the issuing agency prior to traveling on the issuing agency's toll facility for the purpose of paying all tolls with a credit or debit card. Authorizes the issuing agency to require the use of a transponder for this purpose.

27) Requires public entities operating or planning to implement a toll facility in this state to cooperate to publish an internet website at which the public and rental car agencies can view and download, or that provides direct links to, information about how to open an account or acquire a transponder or other electronic toll payment device, for use of each issuing agency's toll facility.

28) Requires the rental car agency to provide the customer with a written or electronic notice, including the electronic link for the internet website. Requires the notice to be separate from the rental contract and, if an electronic notice, emailed to the rental customer.

One-time waiver

29) Requires, commencing July 1, 2023, an issuing agency to provide a one-time waiver of outstanding toll evasion penalties for toll evasion violations on a toll bridge occurring from March 20, 2020, to January 1, 2023, inclusive, upon request, for those individuals whose monthly income is 200% of the current poverty guidelines. Requires the issuing agency to verify eligibility using the same criteria as the payment plans, as specified. Requires eligible applicants to pay the total amount of the outstanding tolls, and any related fees, fines, or assessments imposed by DMV; and the agency may require the applicant to open an account and acquire a transponder or other electronic toll payment device. Clarifies that this only applies to vehicles registered in California. Requires the issuing agency to include information about the availability of the one-time waive program on an internet website and direct its customer service center to inform the public about the availability of the program when responding to inquiries about toll evasion violations incurred, as specified.

Comments

1) *Purpose of this bill.* According to the author, "As toll agencies have shifted from in person toll payment to a mailed invoice, the process must change to accommodate this reform. Several circumstances can hinder a person's ability to pay the fines associated with an unpaid toll. One outstanding issue with the switch to electronic payment is its direct impact on people who do not have a debit or credit card to pay their invoice online. The Metropolitan Transportation Commission's (MTC) data shows that between January and August of 2021, 5.1 million second notice violations were sent out and only 12 percent were actually paid. Under current law, agencies have the authority to charge hundreds of dollars in fines. Such penalties create significant financial burden and consequences such as a DMV hold on an individual's vehicle registration. Those most impacted are lower income individuals, people of color, and non-English speaking Californians. AB 2594 provides a comprehensive solution to address toll penalties by creating a process to instill equity in the payment process, and addressing the needs of unhoused and unbanked drivers."

2) *Tolls in California.* Individuals may encounter tolls on bridges, toll roads, and express lanes while driving in California. Revenue from these tolls is used to pay for maintenance and other costs, such as debt service, improvements to the corridor, and seismic retrofitting of bridges. There are 13 tolling agencies in the state that administer at least one and in some cases two types of tolls: (a) tolls to

use bridges and (b) tolls for using express lanes or toll roads. The two types of tolls are distinct from each other in that generally bridges cannot be avoided by choosing an alternate route. In contrast, the use of express lanes is optional, intended to ease congestion, and provides a faster travel option to those who pay the toll.

Toll systems rely on a few methods for registering a person's use of a toll facility and payment of the tolls. First, is via a vehicle-mounted toll tag or sticker transponder that is read by antennae and associated electronically to a person's FasTrak account. Second, license plate readers are cameras that are positioned in various entrances and/or exits to the toll lane or bridge to record images of your license plate as a vehicle passes and tolls are assessed electronically to a person's account or to a one-time payment transaction. Additionally, on a handful of toll bridges, if a person has no transponder, the license plate information can be used to send a toll invoice to the registered owner of the vehicle.

3) *Impact of toll fines and penalties.* The cost of fines and fees associated with tolls has steadily increased over the last few decades. For tolls, after notice of an unpaid toll violation, toll agencies are allowed to use the DMV to collect unpaid debt. DMV can require payment in full for unpaid tolls in order to renew vehicle registration. This can cause the cost of a person's vehicle registration to increase to potentially unaffordable levels. Drivers who do not renew their vehicle registration, lose access to their main commute option or risk breaking the law and driving an unregistered vehicle.

   In November 2021, SPUR released a report called *Bridging the Gap* that looked at tolls in the Bay Area and their impacts on low-income people. According to SPUR, there are four key problems with the current system for dealing with unpaid tolls: mailing address errors, accessibility barriers, high fines and fees, and a lack of payment plan options. SPUR found that in 2019 there were 5 million unpaid tolls resulting in fines and fees in the Bay Area and 70% were sent to the DMV or collection agencies, with each violation accruing at least $70 in fines and fees for a $6 toll.

   The cost from being late on payment of a toll could easily spiral out of control. For example, in Orange County each violation is assessed a $57.50 penalty in addition to the toll amount due, therefore an unpaid $3.50 toll could wind up costing a person $61. If you fail to pay the first violation a second notice would be mailed with an additional $42.50 penalty.

If the Orange County Transportation Authority then were to ask DMV to collect the unpaid debt, DMW would add the entire cost of the outstanding toll and fines ($103.50) to vehicle registration fees. If someone were unable to pay the outstanding amount all at once on top of their vehicle registration fees, then late fees for vehicle registration increase by 60% of the original fee for payments over 30 days late, which can increase the registration fee as much as $100. If a person is then pulled over for having an unregistered vehicle, the fine for driving unregistered vehicles is currently $285.

4) *AB 2594 updates the current toll collection and payment systems.* AB 2594 attempts to address many of the concerns raised by SPUR and others in order to develop more equitable and usable tolling collection and payment systems. Recent amendments to the bill represent the culmination of discussions with the toll agencies, DMV, and reform supporters. As noted, California has no-choice toll facilities, such as bridges, and choice facilities, such as HOT lanes. The bill treats these facilities differently for some of the fines and penalties. Overall, the bill delays implementation for a year and a half, until July 1, 2024. Specifically, the bill addresses the following areas:

   - *Up-to-date contact information.* Ensuring that contact information for drivers is up-to-date could help to reduce the number of inadvertently unpaid tolls. As many of the toll agencies use license plate reader technology, having accurate address is critical. The bill requires DMV, starting January 1, 2027, as part of the application for a new or renewal driver's license, to provide a statement informing the person that they also need to change their address for purposes of vehicle registration. The bill also requires this information to be communicated orally if the driver's license renewal is done in person. The implementation for this piece of the bill is delayed until 2027, as DMV is currently undergoing an update of its legacy IT systems that is expected to be completed by then.

   - *Invoices and notifications.* To allow for an increased amount of time for the payment of bridge tolls before penalties are incurred, the bill provides a process for the mailing of invoices for notification of toll use and violations. Specifically, a person would be mailed an invoice for use of the toll bridge. If it is not paid in 30 days, the person would be sent a second notice, constituting a first notice of toll violation. If that is paid in full within 15 days, the person only has to pay the toll amount. If it is not paid, a penalty of maximum of $25 can be attached to the toll amount. If the person still has not paid, in no less than 30 days, a 3rd notice is sent. Within the first 15 days of receipt of the notice of delinquent toll evasion, only the toll and the second penalty assessed of maximum of $25 would be due. If the total is

not paid in 15 days, the toll agency can charge another fee, capped at $50 cumulative, and the agency may contact the DMV to place a hold on the person's vehicle registration.

- *Penalties.* As mentioned, the bill caps penalties for each individual toll violation for bridges at a maximum of $25 for the first notice of toll evasion and a cumulative total of $50. For toll roads, the bill caps penalties at a maximum of $60 for the first notice of toll evasion and a cumulative total of $100. The bill allows for the penalties to be adjusted by the California CPI.
- *Contesting toll violations.* The bill makes various changes to the existing appeals process for contesting toll violations, including doubling the amount of time, from 15 days to 30 days, to contest the toll. The bill also requires the toll agency to review evidence of the violation, including photographs. It also allows agencies to email, instead of just mail, the results of the process.
- *Toll collection options and customer service.* The bill makes it easier for people to either purchase a transponder or other electronic toll payment device for toll collection or pay tolls and penalties by codifying the location and operating hours of physical locations within a service area and operating hours for customer service telephone lines. Toll agencies would also be required to make the transponders available for purchase online, by mail, or through a third party retail vendor.
- *Payment plans.* The bill requires the toll agencies to set up payment plans for low income individuals, defined as 200% of the federal poverty level to be verified using relevant state program participation. The payment plan must be available for people with at least $100 in toll penalties to a maximum of $2,500. People can pay $25 a month for all outstanding penalties of $600 or less. The bill also puts a stop to a DMV hold on vehicle registration if the person is participating in and keeping up with a payment plan.
- *Rental car and toll payment.* To help make sure people who are renting cars don't inadvertently not pay for the use of toll facilities, the bill requires toll agencies to allow people to register a rental vehicle to their existing transponder or other electronic toll payment device account prior to travel. It also requires the toll agencies to cooperate to publish an internet website at which the public and rental car companies can view and download information about how to open an account or acquire a payment device. The rental car companies would provide customers with written or electronic

notice to direct people to the website or include information regarding the tolls when renting a car.

5) *One time waiver*. In early June 2022, BATA announced it would try to collect more than $180 million in unpaid bridge tolls, about $50 million comes from unpaid tolls and $130 million in late fees, after its Oversight Committee voted to crack down on more than 400,000 drivers. According to the author, "Bay Area drivers should not be penalized because BATA chose to remove their operators from the tolls at Bay Area bridges as a result of the COVID-19 pandemic."

   In reaction to this announcement, the bill requires a one-time waiver of outstanding toll evasion violation penalties on a toll bridge occurring March 20, 2020, to January 1, 2023, for low income people, defined the same as the payment plans, that request the waiver. It requires the applicant to pay the only outstanding toll amount and any related DMV fees.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

SUPPORT: (Verified 8/8/22)

Metropolitan Transportation Commission
Western Center on Law & Poverty, Inc.

OPPOSITION: (Verified 8/8/22)

None received

ARGUMENTS IN SUPPORT: The Western Center on Law & Poverty, Inc. states, "AB 2594 is a very important reform to current state law when it comes to collecting tolls and punishing violators. While toll agencies have expanded in recent decades in California, the law related to collecting tolls and ensuring there is due process have remained stagnant. In short, California has virtually no legal standards when it comes to how toll violations are collected (outside of limited notice requirements). There are no payment plans, no ability to pursue a review without paying up front and excessive fines for relatively small toll amounts. AB 2594 will create statewide, uniform standards and payment levels to insure that low income Californians are not subject to egregious penalties or loss of a vehicle."

SUBJECT: Lunar New Year holiday

SOURCE: Author

DIGEST: This bill recognizes Lunar New Year as a state holiday and authorizes eligible state employees to elect to receive eight hours of holiday credit for that date in lieu of receiving eight hours of personal credit, as specified.

Senate Floor Amendments of 8/25/22 add a coauthor.

ANALYSIS:

Existing law:

1) Designates specific days as holidays in the state; and, requires the Governor annually to proclaim the date corresponding with the second new moon following the winter solstice as the Lunar New Year.

2) Authorizes state employees to elect to receive eight hours of holiday credit for "Native American Day," in lieu of receiving eight hours of personal holiday

credit, and to elect to use eight hours of vacation, annual leave, or compensating time off, consistent with departmental operational needs and collective bargaining agreements, for "Native American Day," as specified.

3) Designates specific days designated as holidays in this state as judicial holidays, except "Admission Day," "Columbus Day," and any other day appointed by the President, but not by the Governor, for a public fast, thanksgiving, or holiday.

This bill:

1) Recognizes the Lunar New Year as a state holiday.

2) Authorizes eligible state employees to elect to receive eight hours of holiday credit for the date corresponding with the Lunar New Year in lieu of receiving eight hours of personal holiday credit, as specified.

3) Excludes "Lunar New Year" from designation as a judicial holiday.

4) Repeals the existing requirement that the Governor annually proclaim the date corresponding with the second new moon following the winter solstice, or the third new moon following the winter solstice should an intercalary month intervene, as the Lunar New Year.

Background

Purpose of this bill. According to the author's office, "the creation of this holiday through AB 2596 will recognize the cultural and historical significance of Lunar New Year and acknowledge Asian Americans and all individuals who celebrate this significant occasion. When we think about the opportunities for us to look at a comprehensive approach to tacking the issue of stopping Asian hate, while also uplifting our community, this will demonstrate California's unwavering support for the fabric of American diversity and be a strong testament of solidarity with the growing Asian American community which has faced marginalization in the past years."

Lunar New Year. In 2022, the Lunar New Year began on Tuesday, February 1. While the official dates encompassing the holiday vary by culture, those celebrating consider it the time of the year to reunite with immediate and extended family. The New Year typically begins with the first new moon that occurs between the end of January and spans the first 15 days of the first month of the lunar calendar—until the full moon arrives. Some of the traditional festivities include street parades, food, music, dancing, and fireworks.

Each year in the Lunar calendar is represented by one of 12 zodiac animals included in the cycle of 12 stations or "signs" along the apparent path of the sun through the cosmos. The 12 zodiac animals are the rat, ox, tiger, rabbit, dragon, snake, horse, sheep, monkey, rooster, dog, and pig. In addition to the animals, the five elements of earth, water, fire, wood, and metal are also mapped onto the traditional lunar calendar. Each year is associated with an animal that corresponds to an element. The 2022 Lunar New Year is the year of the water tiger. The water tiger occurs every 60 years.

Lunar New Year represents the most significant and festive holiday for many of the more than six million Asian American, Native Hawaiian, and Pacific Islander Californians. The celebration in communities throughout California reflects the rich cultural history and commitment to racial, religious, and cultural diversity. Many schools throughout the state organize related activities, and at least one school district, the San Francisco Unified School District, closes its schools in observance of the Lunar New Year.

This bill repeals the existing requirement that the Governor annually proclaim the date corresponding with the second new moon following the winter solstice as the Lunar New Year, and instead, includes that date in the list of state holidays. This bill authorizes eligible state employees to elect to receive eight hours of holiday credit for the Lunar New Year in lieu of receiving eight hours of personal holiday credit, similar to the existing authorization for eligible state employees to elect to use eight hours of their holiday credit for "Native American Day."

Unpaid/Paid holidays. California law does not require a private employer to provide its employees with paid holidays, that it closes its business on any holiday, or that employees be given the day off for any particular holiday. If an employer closes its business on holidays and gives its employees time off from work with pay, that occurred pursuant to a policy or practice adopted by the employer, pursuant to the terms of a collective bargaining agreement, or pursuant to the terms of an employment agreement between the employer and employee, as there is nothing in law that requires such a practice.

At the local level, cities have the liberty to specify by charter, ordinance or resolution what paid holidays the city will provide to its city employees. Similarly, most state workers are bound by the memorandum of understanding that they have negotiated with the Governor.

For all other state employees, they are entitled to the following holidays: January 1, the third Monday in January, the third Monday in February, March 31, the last Monday in May, July 4, the first Monday in September, November 11,

Thanksgiving Day, the day after Thanksgiving, December 25, a personal holiday after six months of work, and every day appointed by the Governor for a public fast, thanksgiving, or holiday.

This bill is similar to two bills approved earlier this legislative session by the Senate Governmental Organization Committee, AB 1655 (Jones-Sawyer, 2022) and AB 1801 (Nazarian, 2022). Each bill seeks to add a new state holiday and authorize eligible state employees to elect to utilize eight hours of personal holiday credit, as specified. Additionally, this bill excludes Lunar New Year from the list of designated judicial holidays.

Related/Prior Legislation

AB 1655 (Jones-Sawyer, 2022) adds June 19, known as "Juneteenth," to the list of state holidays and authorize state employees to elect to take time off with pay in recognition of Juneteenth, as specified. (Pending on the Senate Floor)

AB 1741 (Low, Chapter 41, Statutes of 2022) required the Governor to annually proclaim November 20 as "Transgender Day of Remembrance."

AB 1801 (Nazarian, 2022) adds April 24, known as "Genocide Awareness Day," to the list of state holidays and authorizes state employees to elect to take time off with pay, as specified. (Ordered to Engrossing and Enrolling)

SB 892 (Pan, Chapter 199, Statutes of 2018) required the Governor to annually proclaim the day of Lunar New Year, which occurs between January 21 and February 20, and encouraged all public schools and educational institutions to conduct exercises recognizing the traditions and cultural significance of the Lunar New Year.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown potentially significant General Fund cost pressures, likely in the millions of dollars, to create another negotiable paid holiday for eligible state workers.

ARGUMENTS IN SUPPORT: In support of this bill, the California Commission on Asian and Pacific Islander American Affairs writes that, "AB 2596 aligns with the Commission's mission to recognize the Asian American Californian experience to the forefront of California legislation. AB 2596 is an inclusive bill as it allows all Californians to recognize and celebrate the Lunar New Year as a holiday. Nearly two-thirds of all Asian Americans, mainly of Vietnamese, Chinese, Korean, and Japanese descent, celebrate Lunar New Year. As a societal action in the continued rise in anti-Asian American sentiment, both in hate crime and incident reporting, the CA Legislature can indeed send a powerful message of equity, unity, and solidarity with its Asian Americans, Native Hawaiian, and Pacific Islander communities."

SUBJECT: Pupil rights: restorative justice practices

SOURCE: Disability Rights California

DIGEST: This bill requires the California Department of Education (CDE), on or before June 1, 2024, to develop and post on its website, evidence-based best practices for restorative justice practices for local educational agencies (LEA) to implement to improve campus culture and climate.

Senate Floor Amendment of 8/22/22 encourage the California Department of Education (CDE), to the extent feasible, to take into account resources and best practices that have been identified or developed as part of aligned efforts when developing best practices.

ANALYSIS:

Existing law

1) Specifies a pupil shall not be suspended from school or recommended for expulsion unless the superintendent of the school district or the principal of the school in which the pupil is enrolled determines that the pupil has committed specified acts in subdivision (a) – (r). (EC § 48900)

2) Authorizes the principal of a school or the district superintendent to suspend a pupil from a school for any of the reasons identified above for no more than five consecutive days, and requires that suspension be preceded by an informal conference where the pupil must be informed of the reasons for the disciplinary action, including other means of correction that were attempted before the suspension, and the evidence against them, and must be given the opportunity to present their own version and evidence in their defense. Also requires a school employee to make a reasonable effort to contact the pupil's parent or guardian in person or by telephone, and if the pupil is suspended from school, requires that the parent or guardian be notified in writing. (EC § 48911)

3) Requires that a suspension only be imposed when other means of correction fail to bring about proper conduct. Specifies that other means of correction enumerated in subdivision (a) – (h). may include, but are not limited to, the following: (EC § 48900.5)

4) Requires the principal or superintendent of schools to recommend the expulsion of a pupil for any of the following acts committed at school or at a school activity off school grounds unless it is determined that the expulsion should not be recommended under the circumstances or that an alternative means enumerated in subdivision (a) – (r). (EC § 48915)

5) Requires CDE to assess, among other things, whether an LEA has a policy that prohibits discrimination, harassment, intimidation, and bullying based on the actual or perceived characteristics as specified in Penal Code and disability, gender, gender identity, gender expression, nationality, race or ethnicity, religion, sexual orientation, or association with a person or group with one or more of these actual or perceived characteristics. (EC § 234.1)

6) Requires the Superintendent to post, and annually update the CDE's internet website and provide to each school district a list of statewide resources, including community-based organizations, that provide support to youth, and their families, who have been subjected to school-based discrimination, harassment, intimidation, or bullying, including school-based discrimination, harassment, intimidation, or bullying on the basis of religious affiliation, nationality, race, or ethnicity, or perceived religious affiliation, nationality, race, or ethnicity. (EC § 234.5)

This bill requires the CDE, on or before June 1, 2024, to develop and post on its website, evidence-based best practices for restorative justice practices for LEA to implement to improve campus culture and climate. Specifically, this bill:

1) Requires the CDE, by June 1, 2024, to develop evidence-based best practices for restorative justice practice implementation on a school campus and make these available on the CDE's website for use by LEAs to implement restorative justice practices as part of efforts to improve campus culture and climate.

2) Requires the CDE, in identifying best practices for effective, evidence-based restorative justice practices in elementary and secondary schools, to consult with all of the following:

   a) School-based restorative justice practitioners;

   b) Educators from public schools serving K-12;

   c) Pupils from public schools serving K-12;

   d) Community partners or community members; and

   e) Nonprofit and public entities.

3) Defines "local educational agency" to mean a school district, county office of education, or charter school.

Comments

1) *Need for the bill.* According to the author "Restorative practices and restorative justice methods allow for greater understanding and community healing in addressing youth behavior. These practices also emphasize building strong relationships among students, staff, teachers, administrators, and parents while creating safe, productive learning environments for all. Widespread concern about the climate and culture of our schools has caused some schools to implement restorative justice as an alternative way to deal with student behavior and conflict. However, there is no clear consensus about the best practices in developing, implementing, or measuring the outcomes of a restorative justice school program. AB 2598 would ensure that our educators and schools are equipped to effectively implement Restorative Justice Practices as an alternative to suspensions and expulsions. This bill would help address existing inequities within our public education system and improve school climate, which leads to increased attendance, reduced feelings of isolation, bullying, classroom disruption, truancy, antisocial behavior, and disputes among students."

2) *Restorative Justice in Schools.* In a 2019 study conducted by WestEd**,** *Restorative Justice in U.S. Schools, "*Educators across the United States have been looking to restorative justice as an alternative to exclusionary disciplinary actions. The popularity of restorative justice in schools has been driven in part by two major developments. First, there is a growing perception that zero-tolerance policies, popular in the United States during the 1980s– 1990s, have had a negative impact on students and schools, generally, and a particularly pernicious impact on Black students and students with disabilities. These policies, many argue, have increased the use of suspensions and other exclusionary discipline practices, to ill effect. For example, researchers reviewing data from Kentucky found that, after controlling for a range of other factors, suspensions explained 1/5 of the Black-White achievement gap. Secondly, restorative justice has gained popularity as a means of addressing disproportionalities in exclusionary discipline. For example, it was found that Black students were 26.2 percent more likely to receive out-of-school suspension for their first offense than White students.

   "In this manner, restorative justice is viewed as a remedy to the uneven enforcement and negative consequences that many people associate with exclusionary punishment," according to the study. Exclusionary discipline can leave the victim without closure and can fail to bring resolution to the harmful situation. In contrast, because restorative justice involves the victim and the community in the process, it can open the door for more communication and for resolutions to the situation that do not involve exclusionary punishments like suspension. Unlike punitive approaches which rely on deterrence as the sole preventative measure for misconduct, restorative justice uses community-building to improve relationships, thereby reducing the frequency of punishable offenses while yielding a range of benefits. There are a variety of practices that fall under the restorative justice umbrella that schools may implement. These practices include victim-offender mediation conferences; group conferences; and various circles that can be classified as community-building, peace-making, or restorative."

3) *California Department of Education (CDE).* In recent years there have been other statutory provisions designed to limit the use of suspensions and promote alternatives to suspension. These provisions aim to address the root causes of the student's behavior and to improve academic outcomes:

a) *Minimize Suspension for Attendance Issues:* It is the intent of the Legislature that alternatives to suspension or expulsion be imposed against a pupil who is truant, tardy, or otherwise absent from school activities.

b) *Instead of Suspension, Support:* A superintendent of the school district or principal is encouraged to provide alternatives to suspension or expulsion, using a research-based framework with strategies that improve behavioral and academic outcomes, that are age-appropriate and designed to address and correct the pupil's misbehavior.

   The state has also established a Multi-Tiered System of Supports (MTSS), which includes restorative justice practices, trauma-informed practices, social and emotional learning, and schoolwide positive behavior interventions and support, that may be used to help students gain critical social and emotional skills, receive support to help transform trauma-related responses, understand the impact of their actions, and develop meaningful methods for repairing harm to the school community.

c) *Suspension as a Last Resort:* Suspension shall be imposed only when other means of correction fail to bring about proper conduct and then continues to provide an extensive list of suggested positive, non-exclusionary alternative practices. Other means of correction may include additional academic support, to ensure, for example, that instruction is academically appropriate, culturally relevant, and engaging for students at different academic levels and with diverse backgrounds.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the CDE estimates one-time General Fund costs of approximately $500,000 to develop the evidence-based best practices for restorative justice in schools and make it available online. This estimate also includes the cost to select the advisory committee to advise CDE in the development of the best practices. Depending on the practices that are developed, local school districts may incur additional, unknown costs to implement them on school campuses.

SUBJECT: Long-term care insurance

SOURCE: Association of California Life and Health Insurance Companies
National Association of Insurance and Financial Advisors – California

DIGEST: This bill requires long-term care (LTC) insurance providers certified by the California Partnership for Long-Term Care Program (Partnership) to provide lower-cost inflation adjustment options.

Senate Floor Amendments of 8/24/22 add flexibility to the new inflation escalator this bill would require by allowing the escalator to be either 3% of the policy benefit over the previous year or 5% of the original policy benefit.

ANALYSIS:

Existing law:

1) Establishes the Partnership, administered by the State Department of Health Care Services (DHCS).

2) Provides for the regulation of LTC insurance by the California Department of Insurance (CDI) and prescribes various requirements and conditions governing the delivery of individual or group LTC insurance in the state.

3) Establishes the Medi-Cal program, administered by the DHCS, under which low-income individuals are eligible for LTC services.

4) Requires DHCS to claim against the estate of a deceased Medi-Cal beneficiary an amount equal to the payments for medical and LTC services received up to the value of the estate (known as estate recovery), subject to certain exceptions.

5) Establishes the partnership within the DHCS to link private LTC insurance with Medi-Cal and In-Home Supportive Services (IHSS) program eligibility requirements and Medi-Cal estate recovery.

6) Requires that policies certified by the Partnership program be approved by CDI as compliant with most, but not all, provisions the Insurance Code applicable to LTC insurance.

7) Disregards an equivalent value of qualified benefits received under a certified Partnership policy for the purposes of determining eligibility in the Medi-Cal or IHSS programs and in determining the amount subject to estate recovery (known as “asset protection”).

8) Requires that policies and plans certified by the partnership also contain the following benefits or features:

   a) Individual assessment and case management by a coordinating entity designated and approved by DHCS.

   b) Inflation protection (existing regulations require a minimum 5% annual compound inflation escalator).

c) A periodic explanation of insurance payments or benefits paid that count toward Medi-Cal asset protection.

d) Compliance with applicable regulations adopted by DHCS or DSS.

This bill:

1) Adjusts requirements for policies to get Partnership certification. Specifically adds a lower-cost inflation protection option to provide, at a minimum, protection against inflation that automatically increases benefit levels by 3 percent each year over the previous year, or a fixed amount each year equal to 5% of the original benefit levels.

2) Requires insurers to offer a 1 percent inflation protection adjuster for policyholders who are 70 years or older, as specified.

3) Allows a policy to maintain partnership certification if it is converted to a nonforfeiture benefit or contingent benefit upon lapse of the policy.

4) Requires, if a premium increases, insurers to offer policyholders specified options to reduce coverage or lower premiums. These are:

   a) To reduce the daily benefit to 70 percent of the average daily private pay rate for a nursing facility, as identified by the department, on the date the offer is sent or provided.

   b) Reduce the daily benefit by 25 percent, rounded up or down to the closest daily benefit level on the insurer's approved rate schedule.

   c) Reduce the benefit duration to the lowest duration on the insurer's approved rate schedule, but not below 12 months.

   d) Reduce the benefit duration to the next highest duration on the insurer's approved rate schedule, relative to the current duration, but not below 12 months.

   e) Increase the elimination period to 90 days for a policy or certificate with an elimination period of less than 90 days. (Elimination is the length of time between injury and illness and the beginning of receiving benefit payments.)

   f) Convert a policy or certificate to a minimum coverage policy, if the insurer offers such a policy for sale in California.

g) Reduce the protection against inflation to a lower-cost option that automatically increases benefit levels by 3 percent each year over the previous year. If the policyholder or certificate holder is 70 years of age or older and has experienced a 50-percent or greater increase in premium over the life of the policy or certificate, the insurer shall also offer protection against inflation that automatically increases benefit levels by 1 percent each year over the previous year.

5) Requires an offer made pursuant to #4 above to reduce protection against inflation to allow a policyholder or certificate holder, regardless of the issue date, issue age, or present age, to retain the accrued daily, weekly, monthly, and lifetime benefit amounts in effect at the time of the reduction.

6) Makes other technical changes.

Background

According to the author,

> Expenses related to long-term care often become financially burdensome for individuals and their families. This is especially true for those who do not qualify for Medi-Cal, but who also aren't able to afford long-term care expenses out-of-pocket. AB 2604 clarifies existing law by requiring long-term care insurance providers participating in the Partnership to provide low-cost policies with a 3% compound inflation rider. In addition, AB 2604 provides ways for existing policyholders to mitigate a premium increase while retaining Partnership status.

Partnership. Early in the 1990s, four states (California, Connecticut, Indiana and New York) joined with the federal government to establish the four original partnership programs. The federal Deficit Reduction Act of 2005 opened the door for more states to establish their own programs and currently most states operate partnership programs. In California, the Partnership is jointly administered by CDI and DHCS as stated above under existing law.

Through the Partnership, individuals can purchase LTC insurance that provides certain benefits with respect to the state's Medi-Cal program. LTC insurance policies are issued by participating private insurance companies, not the state.

Partnership policies were intended to target middle-class consumers whose pension and savings are adequate for retirement so long as they do not experience a serious chronic disability. This approach was intended to encourage financial planning and

gave consumers a way to preserve some assets if their LTC insurance coverage runs out and the consumer becomes impoverished and qualifies for Medi-Cal.

Unfortunately, middle class consumers the program was intended to help now have trouble affording the policies. The inflation protection standards required by DHCS regulations make partnership policies unaffordable to all but the most affluent retirees. In 2007, the US Government Accountability Office released a study of the original partnership states and concluded that many of the consumers who could afford to purchase a partnership policy would never qualify for or use Medi-Cal, which undermines the purpose of the Partnership.

Originally, the first four partnership states required a 5% compound escalator to adjust for inflation, but now there are a variety of options in other states. For example, the New York State partnership program, one of the original partnership states, offers a 3% inflation escalator. Recent amendments add flexibility to the 3% inflation escalator this bill would create, by adding an additional option. Instead of a 3% increase an increase equal to 5% of the original benefit level may be offered.

Related/Prior Legislation

SB 1384 (Liu, Chapter 487, Statutes of 2016) established a taskforce to advise DHCS on the operation of the Partnership and revised the requirements for partnership policies. SB 1384 required Partnership policies to provide consumers with at least two inflation protection options (5% annual compound inflation protection or a less expensive inflation protection option). It required insurers offering Partnership policies to provide the consumer with graph illustrations identifying the difference in premium expenses and benefit levels associated with each inflation protection option.

AB 567 (Calderon, Chapter 746, Statutes of 2019) established the Long Term Care Insurance Task Force (Task Force) in the DOI to explore the feasibility of developing and implementing a culturally competent statewide insurance program for LTSS.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified: August 25, 2022)

Association of California Life & Health Insurance Companies (co-source)
National Association of Insurance and Financial Advisors – California (co-source)
AARP
California Department of Insurance
California Retired Teachers Association

OPPOSITION: (Verified: August 25, 2022)

None received

ARGUMENTS IN SUPPORT: The Association of California Life and Health Insurance Companies (ACLHIC) and the National Association of Financial Advisors of California (NAIFA-California), sponsors of the measure, write in a joint letter:

> Existing statutes require California Partnership for Long-Term Care (CA LTC) policies to contain a 5% compound inflation rider. Such policies have become unaffordable for many, especially for lower and middle-income families. The result is that sales have ceased, and many insurance companies have stopped participating in the program.
>
> For the good of existing policyholders and future policyholders, the Partnership needs to provide less expensive inflation options for their policies to become once again saleable and protect Californians. Legislation passed in 2016 (SB 1384) required Partnership policies to offer a lower-cost inflation protection at the time of application, in addition to a minimum 5% compound inflation escalator currently required. However, a question remains as to what is a "lower cost option" and whether these alternative policies will maintain their Partnership status.

Also in support, the California Retired Teachers association, "believes retirees should be given reasonable options if long-term care policy changes are needed. This measure will empower retirees with more options."

SUBJECT: Medical Board of California: licensee discipline: abortion

SOURCE: Author

DIGEST: This bill prohibits the Medical Board of California (MBC), the Osteopathic Medical Board (OMBC), the Board of Registered Nursing (BRN), and the Physician Assistant Board (PAB) from suspending or revoking the certificate, or denying an application for licensure, of a physician and surgeon, nurse practitioner (NP), certified nurse-midwife (CNM), or physician assistant (PA) solely for performing an abortion in accordance with existing California law. This bill would also prohibit these boards from imposing such discipline on the aforementioned licensees if they are disciplined or convicted in another state in which they are licensed or certified solely for performing abortions in that state.

Senate Amendments of 8/23/22 make technical changes to resolve chaptering conflicts with SB 1495 (Senate Committee on Business, Professions, and Economic Development) and add a coauthor.

ANALYSIS:

Existing law:

1) Establishes various practice acts in the Business and Professions Code (BPC) governed by various boards within the Department of Consumer Affairs (DCA) which provide for the licensing and regulation of health care professionals including: physicians and surgeons (under the Medical Practice Act); osteopathic physicians and surgeons (under the Osteopathic Medical Practice Act); NPs and CNMs (under the Nursing Practice Act); and PAs (under the Physician Assistant Practice Act). (BPC §§ 2000 et seq.; 2099.5 et seq.; 2700 et seq.; 3500 et seq.)

2) Establishes the Reproductive Privacy Act which finds and declares that every individual possesses a fundamental right of privacy with respect to personal reproductive decisions, and states that it is the public policy of the State of California that:

   a) Every individual has the fundamental right to choose or refuse birth control;

   b) Every woman has the fundamental right to choose to bear a child or to choose and to obtain an abortion, except as specifically limited by law; and,

   c) The state cannot deny or interfere with a woman's fundamental right to choose to bear a child or to choose to obtain an abortion, except as specifically permitted by law. (Health and Safety Code (HSC) § 123462)

3) Defines the following for purposes of the Reproductive Privacy Act:

   a) "Abortion" means any medical treatment intended to induce the termination of a pregnancy except for the purpose of producing a live birth;

   b) "Pregnancy" means the human reproductive process, beginning with the implantation of an embryo;

   c) "State" means the State of California, and every county, city, town and municipal corporation, and quasi-municipal corporation in the state; and,

   d) "Viability" means the point in a pregnancy when, in the good faith medical judgment of a physician, on the particular facts of the case before that

physician, there is a reasonable likelihood of the fetus' sustained survival outside the uterus without the application of extraordinary medical measures. (HSC § 123464)

4) Provides that the State may not deny or interfere with a woman's right to choose or obtain an abortion prior to viability of the fetus, or when the abortion is necessary to protect the life or health of the woman. (HSC § 123466)

5) Provides that failure to comply with the Reproductive Privacy Act in performing, assisting, procuring or aiding, abetting, attempting, agreeing or offering to procure an illegal abortion constitutes unprofessional conduct. (BPC § 2253 (a))

This bill:

1) Prohibits the MBC and the OMBC from suspending or revoking the certificate of a physician and surgeon solely for performing an abortion in accordance with the provisions of the Medical Practice Act and the Reproductive Privacy Act.

2) Prohibits the BRN and PAB from suspending or revoking the certification or license of an NP, CNM, or PA, solely for performing an abortion so long as they performed the abortion in accordance with the provisions of the Nursing Practice Act or the Physician Assistant Practice Act, and the Reproductive Privacy Act.

3) Prohibits these boards from denying an application for licensure or certification, or from suspending, revoking, or otherwise imposing discipline upon a physician and surgeon, NP, CNM, or PA licensed or certified in California for either of the following:

   a) The individual is licensed or certified to practice medicine, midwifery, nursing, or physician assistantship in another state and was disciplined in that state solely for performing an abortion in that state.

   b) The individual is licensed or certified to practice medicine, midwifery, nursing, or physician assistantship in another state and was convicted in that state for an offense related solely to the performance of an abortion in that state.

4) States that it is an urgency statute necessary to take effect immediately because in response to the draft opinion of the United States Supreme Court stating that it would overrule the *Roe v. Wade* decision, several states around the nation are

poised to allow professional boards to take disciplinary action against a health care provider for coordinating or providing abortion care, and it is to protect physicians, surgeons, CNMs, NPs, and PAs.

Background

The Reproductive Privacy Act codified the constitutional principles of *Roe v. Wade* and replaced in its entirety the Therapeutic Abortion Act. In 1967, Governor Ronald Reagan signed the Therapeutic Abortion Act, which expanded legal abortion in California under very restrictive criteria. Most of those restrictions were subsequently ruled unconstitutional in the 1972 California Supreme Court case, *People v. Barksdale* (1972) 8 Cal.3d 320, 105 Cal.Rptr 1. The United States Supreme Court issued its landmark *Roe v. Wade* (1973) 410 U.S. 959, 35 L.Ed.2d 694, and *Doe v. Bolton*, decisions in 1973, which invalidated two of the three remaining provisions of the Therapeutic Abortion Act.

Although *Roe* and *Barksdale* rendered much of the Therapeutic Abortion Act obsolete, the Therapeutic Abortion Act itself was not repealed by the Legislature until 2003, pursuant to SB 1301 (Kuehl, Chapter 385, Statutes of 2002) the Reproductive Privacy Act. One rationale for the passage of this Act was the concern that the United States Supreme Court may overturn *Roe v. Wade*, and it would, therefore, be important to have a state law which would protect reproductive rights in the State of California. The Reproductive Privacy Act expressly granted every woman in California with the fundamental right to choose to bear a child or to choose and to obtain an abortion. Under the Reproductive Privacy Act, the state may not deny or interfere with a woman's right to choose or obtain an abortion prior to viability of the fetus, or when the abortion is necessary to protect the life or health of the woman.

The Supreme Court ruled to overturn *Roe* in *the Dobbs v. Jackson Women's Health Organization* decision on June 24, 2022, but even prior to this controversial ruling, recent judicial action in the United States cast uncertainty on the security of the protections memorialized in *Roe*. In 2021, the Texas Legislature passed Senate Bill 8, referred to as the Texas Heartbeat Act. This bill criminalized abortion after the detection of embryonic or fetal cardiac activity, essentially banning abortion after approximately six weeks. The constitutionality of this bill was challenged in *Whole Woman's Health v. Jackson*, which sought to enforce the *Roe* precedent and overturn Senate Bill 8. However, the Court declined to enjoin the law, which many pro-choice advocates viewed as portents of the recent decision by the Court

to overturn the protections outlined in *Roe*. Now with *Roe* overturned by the Court, protections for reproductive rights must be decided solely by the states.

Since the overturning of *Roe*, 14 states now have full or six-week abortion bans in place, two states have 15 or 18 week gestational limits for abortion (Florida and Utah), and three states (Idaho, Indiana, and Tennessee) are expected to ban abortion in the near future. Bans on abortion have been temporarily blocked in five states. Abortion is still tentatively legal in seven states, and legally protected in 21 states (including California) and the District of Columbia. In most states where abortion is banned, performing an abortion is considered a punishable felony, where health practitioners may be sued or fined, lose their license, and potentially face imprisonment.

OPPOSITION: (Verified 8/23/22)

Right to Life League

ARGUMENTS IN SUPPORT: Supporters state that this bill is necessary because California medical licensees who perform abortions and hold out-of-state licenses in states with restricted abortion access may face revocation or suspension of their out-of-state medical license. Current California law allows for California healthcare practitioner boards to discipline California licensees for out-of-state discipline. Supporters assert that this bill will ensure that health practitioners are able to continue to provide reproductive health care, such as abortion, in California even if licensees face discipline in other states for providing these services.

Supporters note that "Should the Court overturn Roe, over 36 million women and other people who may become pregnant will lose access to abortion care nationwide. Furthermore, 26 states are certain or more likely to ban abortion, increasing the number of out-of-state individuals of reproductive age who would find their nearest clinic in California from 46,000 to 1.4 million – a nearly 3,000 percent increase. AB 2626 remedies these issues by prohibiting the removal or suspension of medical licenses for performing abortions within California or out-of-state."

ARGUMENTS IN OPPOSITION: The Right to Life League writes in opposition and notes, "AB 2626 treats abortion as a sacred cow, as untouchable. That is because California is fast becoming the Abortion Tourism destination of the nation.

"In the California Senate Business, Professions and Economic Development Committee, on Monday, June 27, 20221, Lori Kime, Vice President of Business Development for Planned Parenthood of the Pacific Southwest, testified that Planned Parenthood operates 19 centers in Imperial, Riverside and San Diego counties, providing 250,000 patient visits each year. She stated that California Planned Parenthood centers are 'seeing on average 1500 patients from out of state every month on top of typical patient volume.'

"Using her figures, we can safely say that Planned Parenthood alone performs at least 18,000 abortions every year just in one region of our state. That's very big

business. Polls show that 58% of Americans oppose or strongly oppose using tax payer dollars to fund abortion on demand."

Immigrant Defense Advocates
Initiate Justice
Next Gen California
Prison Law Office

DIGEST: This bill (1) codifies a definition for "segregated confinement" that applies to the state's prisons, county jails, detention facilities, and private detention facilities; (2) limits the use of segregated confinement to no more than 15 consecutive days and no more than 45 days total in a 180-day period; (3) prohibits the use of segregated confinement if the person belongs to a special population, as defined; (4) establishes procedures related to the use of segregated confinement; and (5) establishes reporting requirements when segregated confinement is used.

Senate Floor Amendments of 8/17/22 add co-authors.

ANALYSIS:

Existing law:

1) Grants all people certain inalienable rights, including pursing and obtaining safety, happiness, and privacy. (Cal. Const., Art. I, § 1.)

2) Prohibits the deprivation of life, liberty, or property without due process of law or the denial of equal protection of the laws. (Cal. Const., Art. I, § 7.)

3) Prohibits the infliction of cruel and unusual punishment. (Cal. Const., Art. I, § 17.)

4) Establishes rights for persons sentenced to imprisonment in a state prison, and provides that a person may, during that period of confinement be deprived of such rights, and only such rights, as is reasonably related to legitimate penological interests. (Pen. Code, § 2600.)

5) Prohibits the use of any cruel, corporal or unusual punishment or to inflict any treatment or allow any lack of care whatever which would injure or impair the health of the prisoner, inmate or person confined. (Pen. Code, § 2652.)

6) Authorizes CDCR to prescribe and amend rules and regulations for the administration of the prisons. (Pen. Code, § 5058.)

7) Requires the Director of CDCR to classify and assign an inmate to the institution of the appropriate security level and gender population nearest the inmate's home, unless other classification factors make such a placement unreasonable. (Pen. Code, § 5068.)

8) Requires the Board of State and Community Corrections (BSCC) to establish minimum standards for local correctional facilities. (Pen. Code, § 6030.)

9) Requires the sheriff to receive all persons committed to jail by competent authority and the board of supervisors to provide the sheriff with necessary food, clothing, and bedding, for those prisoners, which shall be of a quality and quantity at least equal to the minimum standards and requirements prescribed by the BSCC for the feeding, clothing, and care of prisoners in all county, city and other local jails and detention facilities. (Pen. Code, § 4015.)

10) Requires private local detention facilities to follow the minimum standards for local correctional facilitates established by the BSCC. (Pen. Code, § 6031.6, subd. (c).)

11) Limits the confinement of a minor in a locked room or cell with minimal or no contact with persons, as specified, and sets forth the guidelines for the use of room confinement of a minor in a juvenile facility. (Welf. & Inst. Code, § 208.3.)

This bill:

1) Defines "facility" to means any of the following facilities in California: private detention facilities; jails and prisons; detention facilities; and any facility in which individuals are subject to confinement or involuntary detention. Defines "detention facility" to mean any facility in which persons are incarcerated or otherwise involuntarily confined for purposes of execution of a punitive sentence imposed by a court or detention pending a trial, hearing, or other judicial or administrative proceeding. Defines "private detention facility" to mean a detention facility that is operated by a private, nongovernmental, for-profit entity and is operating pursuant to a contract or agreement with a local, state, or federal governmental entity.

2) Defines "segregated confinement" as the confinement of an individual, in a cell or similarly confined holding or living space, alone or with other individuals, with severely restricted activity, movement, or minimal or no contact with persons other than correctional facility staff for more than 17 hours per day. Provides that segregated confinement is determined by time spent in a cell and contact with persons other than correctional facility staff.

3) Provides that segregated confinement does not apply to extraordinary, emergency circumstances that require a significant departure from normal institutional operations, including a natural disaster or facility-wide threat that poses an imminent and substantial risk of harm. Provides that this exception applies for the shortest amount of time needed to address the imminent and substantial risk of harm.

4) Prohibits a facility from holding an individual in segregated confinement for more than 15 consecutive days and no more than 45 days total in a 180-day period. Requires a facility to transfer the individual out of segregated confinement to an appropriate congregate or individual setting on or before the 15th consecutive day in segregated confinement. Requires the facility to allow the individual at least six hours of daily out-of-cell congregate programming, services, treatment, and meals, with an additional minimum of one hour of congregate recreation, whether held in a congregate or individual setting.

5) Prohibits a facility from involuntarily placing an individual in segregated confinement, including for disciplinary reasons, if the individual belongs to a special population. Defines "special population" to mean a person who: is 25 years of age or younger, not including persons protected by Section 208.3 of the Welfare and Institutions Code; is 60 years of age or older; has a mental or physical disability or a serious mental disorder, as defined; or, is pregnant or in the first eight weeks of the postpartum recovery period, or has recently suffered a miscarriage or terminated a pregnancy.

6) Requires every facility to develop and follow written procedures governing the management of segregated confinement that also meet the standards of care of the type of facility.

7) Requires every facility to document the use of segregated confinement, as specified.

8) Requires the facility to do all of the following when an individual is placed in segregated confinement: document the facts and circumstances that led to placing the individual into segregated confinement; document the date and time that the individual was placed into segregated confinement; notify its medical or mental health professionals in writing within 12 hours of placing an individual in segregated confinement; check on the individual involuntarily placed in segregated confinement at least twice per hour and monitor the person every 15 minutes or more frequently if the individual is demonstrating unusual behavior or has indicated suicidality or self-harm, unless a medical or mental health professional recommends more frequent checks; assess the individual placed in segregated confinement every 24 hours by a medical or mental health professional and every 48 hours by a mental health professional for ongoing placement in segregated confinement; provide the individual a clear explanation of the reason they have been placed in segregated confinement, the monitoring procedures that the facility will employ to check the individual, and the date and time of the individual's next court date, if applicable; and offer out-of-cell programming to a person in segregated confinement at least four hours per day, including at least one hour for recreation, as specified.

9) Prohibits a facility from imposing limitation on services, treatment, or basic needs, such as clothing, food, and bedding. Prohibits a facility from imposing restricted diets or any other change in diet as a form of punishment. Prohibits an individual from being denied access to their legal counsel or representative while in segregated confinement. Prohibits a facility from using additional

shackles, legcuffs, double lock leg irons, or other restrictive means when an individual is in segregated confinement, as specified, unless an individual assessment is documented that restraints are required because of an imminent, significant, and unreasonable risk to the safety and security of other detained persons or staff.

10) Prohibits a facility from sending a detained person to segregated confinement as a means of protection from the rest of the detained population or alternative means of separation from a likely abuser. Prohibits a facility from placing a person in segregated confinement solely on the basis of confidential information considered by the facility staff but not provided to the individual placed in segregated confinement or included in required records. Prohibits a facility from placing a person in segregated confinement solely on the basis of the person identifying as lesbian, gay, bisexual, transgender, or gender nonconforming.

11) Allows a facility to use segregated confinement for medical isolation purposes, to treat and protect against the spread of a communicable disease for the shortest amount of time required to reduce the risk of infection, in accordance with state and federal public health guidance and with the written approval of a licensed physician or nurse practitioner.

12) Requires each facility to create reports regarding the use of segregated confinement, as specified.

13) Requires the Office of the Inspector General (OIG) to annually assess each CDCR facility as well as private detention facilities for compliance relating to segregated confinement, and to issue an annual public report, as specified. Requires the BSCC to annually assess each local correctional facility, including private detention facilities, for compliance relating to segregated confinement, and to issue an annual public report with recommendations to the Legislature regarding all aspects of segregated confinement in correctional facilities, as specified.

14) Includes a severability clause.

Background

There are no clear standards or limits on the use of segregated confinement in detention facilities operated by state or local governments which are codified in statute. The use of segregated confinement varies depending on the type of facility in which a person is detained. This bill provides a definition of segregated

confinement that applies to the state's prisons, jails, detention facilities, and private detention facilities, establishes limitations on its use, and requires documentation of its use.

County jails have broad discretion to use segregated confinement. Regulations require each county jail facility administrator to develop written policies and procedures for administrative segregation. (Cal. Code Regs., tit. 15, § 1053.) Administrative segregation consists of separate and secure housing but is prohibited from involving any other deprivation of privileges than is necessary to obtain the objective of protecting the inmates and staff. Regulations allow county jails to take punitive action for a rule infraction, including disciplinary separation. (Cal. Code Regs., tit. 15, § 1082.) If an individual is on disciplinary separation status for 30 consecutive days there must be a review by the facility manager before the disciplinary separation status is continued, and the review must include a consultation with health care staff. (Cal. Code Regs., tit. 15, § 1083.)

CDCR possesses broad discretion regarding the use of solitary confinement, administrative segregated housing, or other forms of isolated placement, including for individuals who violate criminal or administrative statutes or whose presence in an institution's general population presents an immediate threat to the safety of the inmate or others, endangers institution security, or jeopardizes the integrity of an investigation of an alleged serious misconduct or criminal activity.

In 2015, California settled *Ashker v. Governor of California*, a class-action lawsuit brought on behalf of a group of Pelican Bay State inmates who had each spent at least a decade in isolation. (CCR, *Summary of Ashker v. Governor of California Settlement Terms* <https://ccrjustice.org/sites/default/files/attach/2015/08/2015-09-01-Ashker-settlement-summary.pdf .) The settlement was intended to end the practice of isolating prisoners who have not violated prison rules, cap the length of time a prisoner can spend in solitary confinement, and provide a restrictive but not isolating alternative for the minority of prisoners who continue to violate prison rules on behalf of a gang. (*Ibid*.) The *Ashker* agreement was first extended in 2019 by the federal court, based on a finding that CDCR was "effectively frustrating the purpose" of the settlement agreement by systemically violating due process rights. (CCR, *Court Finds Continued Systemic Constitutional Violations in California Prisons* (Feb. 3, 2022) <https://ccrjustice.org/home/press-center/press-releases/court-finds-continued-systemic-constitutional-violations-california .) In February 2022, the court determined that CDCR was continuing to systematically violate the due process rights of inmates despite the *Ashker* agreement and extended the agreement for a second one-year term. (*Ibid*.)

This bill also applies to private detention facilities which the bill defines as a detention facility that is operated by a private, nongovernmental, for-profit entity, and is operating pursuant to a contract or agreement with a local, state, or federal governmental entity. As such, this bill applies to private detention facilities that are operated by private, nongovernmental entities pursuant to contracts with the federal government, including but not limited to, the Bureau of Prisons, the U.S. Marshalls Service, and U.S. Immigrations Customs Enforcement. California is permitted to regulate private facilities that are not under the control of the federal government, and can regulate federal detention facilities to the extent that the regulation does not disturb federal arrest or detention decisions. (*United States v. California* (2019) 921 F.3d 865, 885.)

Arguably, California's authority to legislate regarding private detention facilities located within the state and contracted by the federal government remains an open question. In *Geo Grp. Inc. v. Newsom* (2021) 15 F.4th 919, the federal government and a private company contracted by the federal government to operate some of its detention facilities challenged AB 32 (Bonta), Chapter 739, Statutes of 2019, which would have phased out all private detention facilities within California, including those contracted with the federal government. California argued that AB 32 was a valid exercise of its police powers because the well-being of detainees falls within a state's traditional police powers. (*Ibid*.) The Ninth Circuit rejected that argument, explaining that California was not simply exercising its traditional police powers, but rather impeding federal immigration policy. (*Ibid*.) Following this decision, the defendant-appellees filed a petition for a rehearing *en banc* which was granted. The *en banc* rehearing was held on June 21, 2022, and the outcome is pending.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CDCR reports a one-time cost $775 million to double the programming space at each institution and a one-time cost of up to $512 million to expand exercise yards by approximately 50%. CDCR further reported an increase in custody staffing required to effectively implement the bill at $6.5 million at each institution. Across the 31 institutions, this would total approximately $200 million annually and ongoing (General Fund).

- The OIG reports ongoing costs of approximately of $3.8 million to establish 25 new permanent positions within the agency in order to assess CDCR facilities regarding all aspects of segregated confinement and issue an annual report to the Legislature with findings and recommendations (General Fund).

- The BSCC reports ongoing costs of approximately $250,000 annually for additional staff resources to assess compliance with the segregated confinement provisions of this bill and report to the Legislature with findings and recommendations (General Fund).

- Unknown, potentially significant costs to the Civil Law Division and the Correctional Law Section within the DOJ to litigate legal challenges from individuals subjected to segregated confinement against CDCR (Special Fund - Legal Services Revolving Fund). Although this bill will impact the Legal Services Revolving Fund, costs should be offset by direct billings to CDCR.

- *Local Reimbursements:* Unknown, potentially reimbursable costs, possibly in the tens of millions of dollars in increased correctional staff and additional space to counties to ensure compliance with the requirements of this bill (Local Funds, General Fund). Counties may not have enough jail space to accommodate the yard time and programming requirements of this bill and therefore may require additional funds to construct new space.

SUBJECT: Custodial interrogation

SOURCE: Author

DIGEST: This bill prohibits an officer from using threats, physical harm, deception, or psychologically manipulative interrogation tactics when questioning a person 17 years of age or younger about the commission of a felony or misdemeanor.

Senate Floor Amendments of 8/24/22 move these provisions to the Welfare and Institutions Code from the Penal Code because they now only apply to juveniles.

ANALYSIS:

Existing federal law*:*

1) States that no person shall "be compelled in any criminal case to be a witness against himself." (U.S. Const. Amend. V.)

2) States that persons may not be compelled in a criminal case to be a witness against themselves. (Cal. Const., Art. I, Sec. 15.)

Existing state law:

1) Requires prior to a custodial interrogation and before the waiver of any *Miranda* rights, a youth 17 years of age or younger shall consult with legal counsel in person, by telephone, or by video conference. Prohibits waiver of the consultation. (Welf. and Inst. Code, § 625.6(a).)

2) Requires the court, in adjudicating the admissibility of statements of a youth 17 years of age or younger made during or after a custodial interrogation, to consider the effect of failure to comply with the consultation requirement, as well as any willful violation in determining the credibility of a law enforcement officer. (Welf. and Inst. Code § 625.6(b).)

3) Specifies that the consultation requirement does not apply to the admissibility of statements of a youth 17 years of age or younger if both of the following criteria are met:

   a) The officer who questioned the youth reasonably believed the information he or she sought was necessary to protect life or property from an imminent threat; and

   b) The officer's questions were limited to those questions that were reasonably necessary to obtain that information. (Welf. and Inst. Code § 625.6. (c).)

4) Exempts probation officers from complying with the consultation requirement in their normal course of duties, as specified. (Welf. and Inst. Code, § 625.6 (d).)

5) Provides that when a minor is taken into a place of confinement the minor shall be advised of the right to make at least two telephone calls, one completed to a parent or guardian, or a responsible relative, or employer and one to an attorney. (Welf. & Inst. Code § 627.)

6) Defines custodial interrogation as any interrogation in a fixed place of detention involving a law enforcement officer's questioning that is reasonably likely to elicit incriminating responses, and in which a reasonable person in the subject's position would consider himself or herself to be in custody, beginning when a person should have been advised of his or her constitutional rights, including the right to remain silent, the right to have counsel present during any interrogation, and the right to have counsel appointed if the person is unable to afford counsel, and ending when the questioning has completely finished. (Penal Code § 859.5)

7) Requires the custodial interrogation of a juvenile suspected of committing murder to be electronically recorded in its entirety. (Welf. & Inst. Code § 626.8, see also Penal Code § 859.5.)

8) States that when a minor is taken into temporary custody before a probation officer, and it is alleged that the minor has violated a law defining a crime, the probation officer must advise the minor that anything the minor says can be used against him, and shall advise the minor of their constitutional rights, including the right to remain silent and the right to counsel. (Welf. & Inst. Code, § 627.5.)

This bill:

1) Prohibits the use of threats, physical harm, deception, or psychologically manipulative tactics by law enforcement during an interrogation of a young person who is 17 years of age or younger.

2) States that these limitations do not apply to interrogations where the office reasonably believed the information sought was necessary to protect life or property from imminent harm and the questions were limited to those reasonably necessary to obtain information related to that imminent threat.

3) Defines the following terms for purposes of these provisions:

   a) "Deception" includes but is not limited to "the knowing communication of false facts about evidence, misrepresenting the accuracy of the fact, or false statements regarding leniency."

   b) "Psychologically manipulative interrogation tactics" include but are not limited to:

      i) Maximization and minimization and other interrogation practices that rely on a presumption of guilt or deceit, as specified;

      ii) Making direct or indirect promises of leniency, such as indicating the person will be released if they cooperate; and

      iii) Employing the "false" or "forced" choice strategy, where the person is encouraged to select one of two options, both incriminatory, but one is characterized as morally excusable.

4) States that these provisions do not prohibit the use of a lie detector test as long as it is voluntary and not obtained through threats, physical harm, deception, or

psychologically manipulative interrogation tactics, and the officer does not suggest that the lie detector results are admissible in court or misrepresent the lie detector results to the person.

5) Prohibits the use of threats, physical harm, deception, or psychologically manipulative tactics by law enforcement during an interrogation of a young person who is 17 years of age or younger.

6) States that these limitations do not apply to interrogations where the office reasonably believed the information sought was necessary to protect life or property from imminent harm and the questions were limited to those reasonably necessary to obtain information related to that imminent threat.

7) Provides that the limitations on interrogation in this bill do not become operative until July 1, 2024.

8) Provides that within two hours of a minor being takin into custody at a juvenile hall or any other place of confinement, the probation officer must immediately notify the public defender.

9) Provides that the "custodial interrogation" shall be defined the same as in Penal Code Section 859.5.

Background

A growing body of research indicates that adolescents are less capable of understanding their constitutional rights than their adult counterparts, and also that they are more prone to falsely confessing to a crime they did not commit. (Luna, *Juvenile False Confessions*: *Juvenile Psychology, Police Interrogation Tactics, And Prosecutorial Discretion* (2018) 18 Nev. L.J. 291, https://scholars.law.unlv.edu/nlj/vol18/iss1/10/ [as of March 31, 2021].) Research suggests that "[b]ecause adolescents are more impulsive, are easily influenced by others (especially by figures of authority), are more sensitive to rewards (especially immediate rewards), and are less able to weigh in on the long-term consequences of their actions, they become more receptive to coercion." (*Id.* at p. 297, *citing* various scientific journals.) The context of custodial interrogation is believed to exacerbate these risks.

The U.S. Supreme Court has recognized the susceptibility of youth as well. In *J.D.B. v. North Carolina* (2011) 564 U.S. 261, the Court said:

> A child's age is far "more than a chronological fact." It is a fact that "generates commonsense conclusions about behavior and perception." Such conclusions

> apply broadly to children as a class. And, they are self-evident to anyone who was a child once himself, including any police officer or judge.
>
> Time and again, this Court has drawn these commonsense conclusions for itself. We have observed that children "generally are less mature and responsible than adults"; that they "often lack the experience, perspective, and judgment to recognize and avoid choices that could be detrimental to them"; that they "are more vulnerable or susceptible to … outside pressures" than adults; and so on. Addressing the specific context of police interrogation, we have observed that events that "would leave a man cold and unimpressed can overawe and overwhelm a lad in his early teens." Describing no one child in particular, these observations restate what "any parent knows"—indeed, what any person knows—about children generally. (*Id*. at p. 272, citations omitted.)

In light of this susceptibility, this bill explicitly prohibits the use of threats, physical harm, deception, or psychologically manipulative interrogation tactics when questioning a minor or a youth 17 years or younger about commission of a crime.

And while *J.D.B. v. North Carolina*, *supra,* involved the interrogation of a 13-year old (546 U.S. at p. 265), other Supreme Court decisions have recognized that part of the brain responsible for executive functioning is not fully developed until around the age of 25, causing the youth to not fully appreciate the seriousness or consequences of his or her actions. (See *Miller v. Alabama* (2012) 567 U.S. 460, 471-473, citing *Graham v. Florida* (2010) 560 U.S. 48, 68-71 and *Roper v. Simmons* (2005) 543 U.S. 551, 569-570; see also *People v. Caballero* (2012) 55 Cal.4th 262, 268-269.) Limiting these tactics to young people under the age of 17 is consistent with that precedent.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- *DOJ*: Costs in the high tens of thousands to low hundreds of thousands thereafter for additional staff resources to handle appellate litigation (General Fund).

- *Local Reimbursements*: Unknown, potentially reimbursable costs in the low hundreds of thousands for additional staff and/or resources for county probation departments to immediately notify legal counsel every time a minor has been taken into custody (Local Funds, General Fund). General Fund costs would

depend on whether the Commission on State Mandates determines that this bill imposes a reimbursable state mandate.

OPPOSITION: (Verified 8/19/22)

California Statewide Law Enforcement Association
Chief Probation Officers of California
L.A. Sheriff's Department
San Diegans Against Crime
San Diego County Chiefs' & Sheriff's Association
San Diego Deputy District Attorneys Association

ARGUMENTS IN SUPPORT: The Ella Baker Center for Human Rights supports this bill stating:

> According to the Center on Wrongful Convictions of Youth (CWCY), false confessions are one of the leading causes of wrongful convictions, accounting for roughly 25% of all convictions that were later overturned based on DNA evidence. Juries view a confession as a significant piece of direct evidence of one's guilt, yet struggle with understanding how someone might falsely implicate themselves or another in criminal conduct.

The reality is that law enforcements' use of deceptive interrogation methods, such as threats, physical harm, deception, or psychologically manipulative tactics as defined in AB 2644, create an incredibly high risk for eliciting a false confession from anyone, and particularly youth. Research indicates that a person's brain is not fully developed until the age of 25 and that deceptive interrogation methods increase the risk of a false confession even for those older than 18.

AB 2644 recognizes what social scientists, some courts and factions of law enforcement have learned, that is deceptive and manipulative interrogations tactics, that have long been employed by law enforcement, are guilt-centric, coercive, and can force someone to confess to a crime or implicate another despite being entirely innocent. AB 2644 closely follows newly enacted laws in Illinois, the first state to pass legislation that prohibits police officers from using deceptive interrogations tactics on youth, and similar law passed in Oregon.

ARGUMENTS IN OPPOSITION: The California Statewide Law Enforcement Agency opposes this bill stating:

While we understand the author's intention in creating safeguards around the questioning of persons taken into custody, this legislation goes too far by prohibiting the use of longstanding interrogation practices, which are only used when an investigator is reasonably certain of the suspect's involvement in the issue under investigation. By limiting the scope of what members of law enforcement are permitted to discuss with suspects, investigations will grind to a halt.

The courts have long established that physical abuse of the suspect, threats of harm, denial of rights, and making false guarantees of leniency are unacceptable and can render a confession inadmissible. Placing further limitations on law enforcement's means to question suspects will only interfere with timely resolutions of investigations.

SUBJECT: Planning and Zoning Law: housing elements

SOURCE: Author

DIGEST: This bill authorizes the Department of Housing and Community Development (HCD) to reject the housing element portion of a planning agency's annual progress report (APR), as specified. This bill also authorizes HCD to report violations of the provisions of this bill to the Attorney General.

Senate Floor Amendments of 8/25/22 resolve chaptering conflicts with AB 1743 (McKinnor), AB 2011 (Wicks), AB 2094 (Rivas), and AB 2097 (Friedman).

ANALYSIS:

Existing law:

1) Requires every city and county to adopt a general plan that sets out planned uses for all of the area covered by the plan, and requires the general plan to include seven mandatory elements, including a housing element.

2) Requires the housing element to include a review of existing and projected housing needs, determine whether adequate sites with appropriate zoning exist to meet the housing needs of all income levels within the community, and ensure that local regulations provide opportunities for, and do not significantly restrict, the development of housing.

3) Requires that each community's fair share of housing be determined through the regional housing needs allocation (RHNA) process, which involves three main stages: (a) the Department of Finance and HCD develop regional housing needs estimates at four income levels: very low-income, low-income, moderate-income, and above moderate-income; (b) councils of government (COGs) use these estimates to allocate housing within each region (HCD is to make the determinations where a COG does not exist); and (c) cities and counties incorporate their allocations into their housing elements.

4) Establishes HCD oversight of the housing element process, including the following:

   a) Local governments must submit a draft of their housing element to HCD for review.

   b) HCD must review the draft housing element, and determine whether it substantially complies with housing element law, in addition to making other findings.

   c) Local governments must incorporate HCD feedback into their housing element.

   d) HCD must review any action or failure to act by local governments that it deems to be inconsistent with an adopted housing element. HCD must notify any local government, and at its discretion the office of the Attorney General, if it finds that the jurisdiction has violated state law.

5) Requires each city and county to submit an APR to the Governor's Office of Planning and Research (OPR) and HCD by April 1 of each year. The report is to evaluate the general plan's implementation, including how local housing needs have been met (construction of new units, changes to zoning laws, facilitating regulatory hurdles to housing development, etc.).

6) Requires HCD to notify the city or county, and authorizes HCD to notify the state Attorney General, that the locality is in violation of state housing element law or has taken an action in violation of several state housing laws.

This bill:

1) Requires each city and county to also include in their APR data on the net units of housing demolished and data approved for all projects approved to receive density bonus from the city or county.

2) Allows HCD to reject the housing element portion of an APR if it is not in substantial compliance with the requirements specified in local planning law.

3) Requires, if HCD request corrections to the housing element portion of an APR within 90 days of receipt. The local government shall make the requested corrections within 30 days after which HCD may reject the report if the report the housing element portion of an APR, HCD to provide the reasons the report is not in substantial compliance with the statutory requirements.

4) Requires HCD to provide the reasons the report is inconsistent with statutory requirements in writing if HCD rejects the housing element portion of APR.

5) Adds violations of the provisions of this bill to the list of housing law violations for which HCD is required to notify the jurisdiction and is authorized to provide notice to the state Attorney General.

6) Resolves chaptering conflicts with AB 1743 (McKinnor), AB 2011 (Wicks), AB 2094 (Rivas), and AB 2097 (Friedman).

Background

APRs are an important tool for both local governments and the state, as both parties can rely on them to track progress in implementing the housing policy in their housing element, as well as to track outcomes. They also help highlight implementation challenges that may require technical assistance or other support from HCD. Additionally, APRs are important for informing statewide housing policy. The APRs provide the data that, aggregated across the state's 539 cities and counties, convey the amount, type, location, and affordability of housing be produced in California. This bill provides HCD with the authority to reject an APR should a local government not meet the requirements in the APR.

Under existing law, HCD is required to notify a jurisdiction, and is authorized to notify the Attorney General, of specified violations of state housing law, including the Housing Accountability Act, Housing Crisis Act (HCA), no-net-loss zoning in housing element law, density bonus law, land use housing discrimination violations, violations of affirmatively furthering fair housing (AFFH) requirements, violations of SB 35 requirements (streamlined ministerial approval

for certain housing projects), violations of AB 2162 requirements (streamlining for permanent supportive housing), and violations of AB 101 requirements (streamlining for low-barrier navigation centers).

Comments

1) *Planning for Housing and Tracking Outcomes.* Existing law requires each city and county's legislative body to adopt a "general plan" for land use within its jurisdiction. Each general plan must include a "housing element" that details existing housing conditions within the jurisdiction, the need for new housing, and the strategy that the jurisdiction will use to address that need. The need for new housing is determined through the RHNA process, which involves three main stages:

   The Department of Finance and HCD develop regional housing needs estimates at four income levels: very low-income, low-income, moderate-income, and above moderate-income; Councils of Governmetns (COGs) use these estimates to allocate housing within each region (HCD makes the determinations where a COG does not exist); and

   cities and counties plan for accommodating these allocations in their housing elements.

   Local governments must adopt a new housing element every eight years (though some rural jurisdictions must do so every five). These adopted housing elements are approved by HCD and must be in "substantial compliance" with the law.

   Each year, the local government's planning agency must submit an APR to HCD and OPR that documents the jurisdiction's progress towards meeting its general plan goals, including the implementation of its housing element and progress towards meetings its RHNA target. The APR must include information about all proposed and approved development projects, a list of rezoned sites to accommodate housing for each income level, and information on density bonus applications and approvals, among other provisions.

2) *HCD enforcement authority*. Existing law requires HCD to notify the jurisdiction, and authorizes HCD to notify the Attorney General, of specified violations of state housing law. This bill adds to that list any violations of the provisions in this bill.

3) *Senate Appropriations Amendments*. Authors amendments taken in the Senate Appropriations Committee do the following: (a) add additional data points to

the APR, (b) require HCD to notify a local government of a violation of the provisions in this bill, and (c) requires HCD to notify a local government of necessary corrections to the housing element portion of the APR within 90 days, and requires the local government to provide corrections within 30 days.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, HCD estimates costs of approximately $367,000 annually for 2.0 PY of staff to perform a quantitative audit evaluating APRs, identify those with errors, note corrective actions, provide written findings, and provide technical assistance to cities and counties. There could be additional unknown one-time IT costs if HCD determines that the functionality of its housing element tracking system requires updates to incorporate APR tracking. (General Fund)

SUPPORT: (Verified 8/11/22)

California Housing Consortium
California Rural Legal Assistance Foundation
City of Santa Monica
Western Center on Law & Poverty

OPPOSITION: (Verified 8/11/22)

City of Pleasanton

ARGUMENTS IN SUPPORT: According to the author, "Providing HCD the ability to reject non-compliant APRs will improve the caliber of the quantitative and qualitative information included in APRs. This will support better local housing element implementation, help HCD pinpoint where to provide technical assistance to local governments, and ensure robust data sets that facilitate informed statewide policymaking."

ARGUMENTS IN OPPOSITION: Writing on a prior version of the bill, the City of Pleasanton is opposed over the timelines set in the bill for compliance.

SUBJECT: Multicultural health

SOURCE: California Rural Indian Health Board

DIGEST: This bill requires the Department of Public Health (CDPH) enter into a data sharing agreement with the California Tribal Epidemiology Center (CTEC) with access to the California Reportable Disease Information Exchange (CalREDIE) and the California Immunization Registry (CAIR) systems no later than January 1, 2023. This bill prohibits the CTEC from disclosing the information in these systems.

ANALYSIS:

Existing federal law:

1) Establishes the Health Insurance Portability and Accountability Act of 1996 (HIPAA), which among various provisions, mandates industry-wide standards

for health care information on electronic billing and other processes; and, requires the protection and confidential handling of protected health information. [42 U.S.C. §300gg, 29 U.S.C. §1181, et seq., and 42 U.S.C. §1320d, et seq.]

2) Establishes tribal epidemiology centers to collect data, evaluate existing delivery systems that impact Indian health, assist tribes and tribal organizations in identifying high-priority health status objectives and needed services, make recommendations to improve the health care delivery system for Indians, provide technical assistance to tribes and tribal organizations, provide disease surveillance, and assist tribes and tribal organizations to promote public health. [25 U.S.C. § 1621m]

Existing state law:

1) Requires CDPH to establish a list of reportable diseases and conditions to be reported by local health officers (LHOs). Requires CDPH to specify the timeliness requirements related to the reporting of each disease and condition, and the mechanisms required for, and the content to be included in, reports made. Permits the list to include both communicable and non-communicable diseases. Permits the list to be modified at any time by CDPH, after consultation with the California Conference of Local Health Officers. [HSC §120130]

2) Requires, through regulation, every health care provider, knowing of or in attendance on a case or suspected case of any reportable diseases or conditions, to report to the LHO for the jurisdiction where the patient resides. Permits any individual having knowledge of a person who is suspected to be suffering from one of the diseases to make such a report to the LHO for the jurisdiction where the patient resides when there is no health care provider in attendance. Defines "health care provider" as a physician and surgeon, a veterinarian, a podiatrist, a nurse practitioner, a physician assistant, a registered nurse, a nurse midwife, a school nurse, an infection control practitioner, a medical examiner, a coroner, or a dentist. [17 CCR §2500]

3) Requires, through regulation, an administrator of each health facility, clinic, or other setting where more than one health care provider may know of a case, a suspected case or an outbreak of disease within the facility, to establish and be responsible for administrative procedures to assure that reports are made to the LHO. [17 CCR §2500(c)]

4) Requires, through regulation, each clinical laboratory director, or the laboratory director's designee, an approved public health laboratory, or a veterinary laboratory, to report findings of specified communicable diseases and conditions to the LHO of the local health jurisdiction (LHJ) where the health care provider who first submitted the specimen is located. Requires the laboratory, if the patient residence is unknown, to notify the LHO of the jurisdiction in which the health care provider is located. [17 CCR §2505]

5) Requires, through regulation, an administrator of each health facility, clinic, or other setting where more than one health care provider may know of a case, a suspected case or an outbreak of disease within the facility, to establish and be responsible for administrative procedures to assure that reports are made to the LHO. [17 CCR §2500(c)]

6) Requires, through regulation, each clinical laboratory director, or the laboratory director's designee, an approved public health laboratory, or a veterinary laboratory, to report findings of specified communicable diseases and conditions to the LHO of the LHJ where the health care provider who first submitted the specimen is located. Requires the laboratory, if the patient residence is unknown, to notify the LHO of the jurisdiction in which the health care provider is located. [17 CCR §2505]

7) Requires LHOs to immediately report to CDPH every discovered or known case or suspected case of a designated disease. Requires LHOs to make reports that CDPH requires within 24 hours after investigation. [HSC §120190]

8) Allows LHOs to, either separately or jointly with other jurisdictions and in conjunction with CDPH's Immunization Branch, operate immunization information systems containing individuals' immunization information. Further allows the information in these systems to be shared with specified entities, including among other LHOs jointly operating the system. States that individuals have the right to refuse the sharing of their information in these systems and requires that individuals be informed of this right. [HSC §120440]

9) Requires health care providers, local health departments, and CDPH to maintain the confidentiality of patient immunization information in the same manner as other medical record information with patient identification that they possess. Subjects these providers, departments, and contracting agencies to civil action and criminal penalties for the wrongful disclosure of patient immunization information. Limits the use of patient immunization information to providing immunization services to the patient, facilitating provision of

third-party payer payments for immunizations, and compiling and disseminating statistical information of immunization status of groups of patients or populations in California, without patient identifying information. [HSC §120440]

10) Recognizes tribal epidemiology centers as public health authorities pursuant to federal law. [HSC § 128766]

This bill:

1) Requires CDPH to enter into a data sharing agreement with the CTEC for access to and use of the CalREDIE and the CAIR systems no later than January 1, 2023.

2) Prohibits CTEC from disclosing any information it receives pursuant to this section to any person or entity, except in response to a court order, search warrant, or subpoena, or as otherwise required or permitted by the federal medical privacy regulations under HIPAA.

Comments

1) *Author's statement.* According to the author, this bill advances health equity by allowing the CTEC to access CalREDIE. This bill allows the state's only Tribal epidemiology center to access up to the minute public health data through the CalREDIE system in order to inform and alert Tribal communities about important public health issues. During the COVID-19 pandemic, CTEC was forced to continuously submit lengthy requests for "snapshot" data from the CalREDIE system, similar to a research university. As we learned during the pandemic, in order for an epidemiology program to be effective at disease surveillance, data must be as close to "real-time" as possible. Tribal communities were hit unnecessarily hard during the pandemic. CTEC is recognized in state and federal law as a public health authority and should be treated as such by CDPH. This bill makes progress to ensure Tribal communities have the tools needed to protect themselves from future disease outbreaks.

2) *CTEC.* CTEC is housed within the California Rural Indian Health Board, Inc. (CRIHB), and was established in 2005 to assist in collecting and interpreting health information for American Indian Alaska Natives (AIAN) in California. CTEC receives core funding from the Indian Health Service (IHS) and operates on other grants and contracts to provide a full complement of staff. CTEC is one of 12 IHS Division of Epidemiology and Disease Prevention

(DEDP)-funded Tribal Epidemiology Centers (TECs) that provide epidemiologic support to each IHS region and often partner with local IHS area offices to provide these services. TECs were established as part of the federal Indian Health Care Improvement Act (IHCIA) as legislatively mandated and legally required to perform tribal public health activities, including data surveillance and analysis and supporting tribes in their own public health activities. In 2010, when Congress enacted the Patient Protection and Affordable Care Act, it also permanently reauthorized the IHCIA. IHCIA's 2010 reauthorization included a provision designating TECs as public health authorities under HIPAA. As such, TECs have the legal authority to collect, receive, and disseminate public health data as necessary to respond to public health threats, and have the same public health authority designation as the CDC, and state and local health departments.

CTEC's mission is to improve American Indian health in California to the highest level by engaging American Indian communities in collecting and interpreting health information to establish health priorities, monitor health status, and develop effective public health services that respect cultural values and traditions of the communities. CTEC has data sharing agreements with 23 tribal health programs that serve 84 tribes throughout California. CTEC services are available to all tribes in California. CTEC has seven core objectives:

a) Maintain communication and obtain input from the CTEC Advisory Council, CRIHB Board of Directors, California Area Office IHS, CDPH, and AIAN populations;
b) Obtain access to data and assist IHPs in public health activities that are needed to address the AIAN public health priorities;
c) Produce community health profiles for AIAN populations that address two public health priorities;
d) Conduct a Tribal Behavioral Risk Factor Surveillance Survey;
e) Participate in data, research, epidemiology and public health forums and committees;
f) Develop and maintain outbreak response capacity, which is coordinated with the response efforts by local health departments, CDPH and IHS; and,
g) Align CTEC activities to reflect and support IHS priorities.

3) *CalREDIE.* CalREDIE is CDPH's electronic disease reporting and surveillance system, and allows for 24/7/365 reporting and receipt of notifiable conditions. According to CDPH, LHJs and CDPH have access to disease and lab reports in near real-time for disease surveillance, public health investigation, and case

management activities. Coordinated by CDPH's California Disease Emergency Response Program, CalREDIE is used by all 61 of California's LHJs in some capacity, and 58 LHJs use the system for surveillance of all notifiable communicable diseases. Additionally, over 3200 facilities (including clinical and commercial labs, skilled nursing facilities, and schools) electronically submit reportable lab results through CalREDIE Electronic Laboratory Reporting. According to CDPH, although Los Angeles and San Diego Counties do not use CalREDIE for reporting their COVID-19 cases, CDPH captures this data through other mechanisms. In August 2020, the Newsom Administration announced that it would establish a separate data reporting system for COVID-19 cases following issues with CalREDIE that resulted in a backlog and delay in reporting. CDPH entered into a six-month, $15.3 million agreement with OptumInsight, Inc. (using federal funding) to handle the surge in reportable disease cases resulting from the pandemic. The Optuminsight contract was renewed for an additional 12 months, and they continue processing all electronic lab results sent to CalREDIE. CDPH is in the midst of a competitive procurement for CCRS (the system that Optuminsight provides), as the current contract expires in June 2022. CDPH states that they intend to maintain a CCRS system to ensure that CDPH maintains a stable, scalable, modern, sustainable infrastructure for all communicable disease reporting needs ranging from routine to emergency to pandemic. While CalREDIE may have some capacity to identify new viral threats, it remains largely reactive and voluntary, communicating with only a subset of statewide viral surveillance facilities. There is currently no proactive state public health entity communicating automatically and in real-time with all the public, private, and academic labs that conduct some type of viral surveillance.

4) *Immunization Registries.* All 50 states, five cities, the District of Columbia, and eight territories receive immunization program funding through the federal Public Health Services Act *(42 United States Code Section 201 et seq.)*. The immunization information systems are confidential computerized databases that contains all immunization records for individuals within a particular region submitted by participating providers. These systems – commonly known as immunization registries – have varying functionality and are in different stages of maturity. California's immunization registry (CAIR) has recently been updated to consolidate patient records and enable statewide access to immunization records; this new system is called "CAIR2." As originally designed, CAIR only enabled authorized users to access immunization data within their defined region but offered, upon request, authorized users the ability to look up information in other regional registries.

CAIR2 is intended to accomplish certain goals, including consolidating patient data and enabling statewide searches for and retrieval of records.

Use of CAIR is voluntary. Participating health care providers can enter immunization records, so long as the individual or the individual's parent, where applicable, has been notified about the registry and the right to "lock" information in CAIR to ensure that no user, other than his or her health care provider, may access the immunization information. Logging into the registry requires a user identification and password, and users must sign a confidentiality agreement. Individuals authorized to use CAIR include health care providers and plans; schools; county welfare departments; foster care agencies; family child care homes; and child care facilities.

5) *HIPAA Privacy Rule.* The regulations promulgated under HIPAA, known as the Privacy Rule, established requirements for covered entities to protect the privacy of individuals' health information. The Privacy Rule specifies permitted uses and disclosures that allow covered entities to share protected health information. Among the permitted uses that do not require individual authorization for disclosure are public health activities. Covered entities may disclose protected health information, even where there are small numbers, to public health authorities. Public health authorities, including TECs, may collect such information for the purposes of preventing or controlling disease, injury, or disability. The Privacy Rule unequivocally recognizes the importance of public health activities and ensuring that designated public health authorities have access to the data necessary to effectively promote public health. Even HIPAA-covered health departments may share identifiable protected health information with another public health authority for public health purposes, such as for disease reporting, birth and death reporting, public health surveillance, public health investigations and interventions.

6) *Policy comment*. CDPH is still uncertain whether existing privacy laws permit CTEC access to CalREDIE, because the current CalREDIE system cannot limit CTEC access to data for tribal members. CDPH has expressed concern of liability under the California Information Practices Act in particular. If privacy laws prohibit CTEC access to statewide data, then CDPH believes it will not be able to share access to CalREDIE. However, CDPH is currently working on a successor to the CalREDIE system anticipated to go live in early 2026 that will have the flexibility needed to limit data in this manner. There is no such barrier to the CAIR system.

Related/Prior Legislation

AB 1233 (Chesbro, Chapter 306, Statutes of 2013) authorized a tribe, a tribal organization, or a subgroup of such to access the California Healthcare Eligibility, Enrollment, and Retention System (CalHEERS) to facilitate Medi-Cal applications.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 6/28/22)

California Rural Indian Health Board (source)

OPPOSITION: (Verified 6/28/22)

None received

ARGUMENTS IN SUPPORT: The sponsor of this bill, California Rural Indian Health Board, a network of 19 Tribal Health Programs controlled and sanctioned by 59 federally recognized Tribes, writes that historically, Tribal communities have been devastated by communicable diseases. This issue persists today as it relates to COVID-19, HIV, tuberculosis, and hepatitis. This bill would grant CTEC access to the CalREDIE and CAIR to relay real-time updates to Tribal communities regarding threats from communicable diseases. For an epidemiology program to be successful in disease surveillance, it needs as close to real-time data as possible. This bill will improve health equity in Tribal communities and help protect against public health threats.

SUBJECT: Distributed energy resources: incentives

SOURCE: Author

DIGEST: This bill establishes a program to provide incentives for commercially available distributed energy resources (DERs), specifically behind-the-meter energy storage systems or self-generation systems paired with energy storage systems.

Senate Floor Amendments of 8/24/22 clarify the legislative intent that owners and operators of publicly available electric vehicle charging facilities are exempt from the definition of "public utility," and includes a technical amendment.

ANALYSIS:

Existing law:

1) Requires the California Public Utilities Commission (CPUC) to require the administration, until January 1, 2026, of a self-generation incentive program to

increase the development of distributed generation resources and energy storage technologies. Requires the CPUC, in administering the program, to provide an additional incentive of 20 percent from existing program funds for the installation of eligible distributed generation resources manufactured in California. (Public Utilities Code §379.6)

2) Establishes the State Energy Resources Conservation and Development Commission (also known as the California Energy Commission (CEC)) with various responsibilities with respect to developing and implementing the state's energy policies. (Public Resources Codes §§25200-25233.5)

3) Imposes various requirements on public works projects, including a requirement that, at minimum, all workers employed on a public works project be paid the general prevailing rate of per diem wages for work of a similar character in the locality in which a public work is performed. Defines "public work" to include, among other things, construction, alteration, demolition, or installation or repair work done under contract and paid for, in whole or in part, out of public funds. (Labor Code §1720)

This bill:

1) Requires the CEC to use funds appropriated by the Legislature to provide incentives to eligible customers who install behind-the-meter energy storage systems, or self-generation systems paired with energy storage systems, to support statewide customer adoption of clean DERs, as specified.

2) Requires the CEC to establish a system to equitably award incentives to support adoption of commercially available distributed energy resources by eligible customers.

3) Requires the CEC to set incentive levels and require the resource to do one or more of the following:
   a) Support electrical grid reliability through managed operation of the DER.
   b) Reduce the electrical grid's net peak load by shifting onsite energy use to off-peak time periods or reduce demand from the electrical grid through load customer participation in a demand reduction program provided by the customer's load-serving entity.
   c) Support resiliency during periods of power system disruptions via self-islanding with clean onsite generation or backup power technology, with an emphasis on critical facilities.

4) Requires the CEC to prioritize resources that do both of the following:

a) Reduce environmental pollution in disadvantaged communities or provide clean resiliency benefits to vulnerable communities.
b) Facilitate all types of clean vehicle charging with an emphasis on medium- and heavy-duty vehicles co-located at ports, warehouses, and in transit corridors.

5) Authorizes the CEC to authorize incentives for different technology types to be combined within this program and with other state-mandated programs, as provided, and would require the CEC to adopt equipment inspection, operation, and verification procedures, and applicable performance criteria for eligible resources.

6) Requires that any installations, except residential generation of less than 15 kilowatts (kW) or greater, paid in part or in whole with funds provided from this bill to be considered public works.

7) Makes several findings and declarations related to Public Utilities Code §218, known as "the over-the-fence rule."

Background

Self-Generation Incentive Program (SGIP). SGIP was established by statute, AB 970 (Ducheny, Chapter 329, Statutes of 2000), and provides incentives to support existing, new, and emerging DER. SGIP provides rebates for qualifying DER systems installed on the customer's side of the utility meter and sized no larger than what is needed to meet on-site energy needs. Qualifying technologies include wind turbines, waste heat to power technologies, pressure reduction turbines, internal combustion engines, microturbines, gas turbines, fuel cells, and advanced energy storage systems. SGIP has evolved since 2001, with eligibility requirements, program administration, and incentive levels all changing over time in response to California's evolving energy landscape. While SGIP has provided incentives for a variety of DERs, more recently, the program has largely focused on energy storage systems. The program has several goals:

- Environment – reduce GHGs, integrate renewables and reduce criteria air pollutants;
- Grid support – reduce or shift peak demand, reduce grid costs, provide ancillary services;
- Market transformation – support technologies that have the potential to thrive in future years without rebates; and
- Maximize ratepayer value and ensure equitable distribution of costs and benefits.

SGIP funding. Existing law authorizes the CPUC to direct electric investor-owned utilities (IOUs) to collect $166 million annually from ratepayers through 2024 to fund SGIP and requires the CPUC to administer the program until January 1, 2026. As a result, the program is only available to customers located in the service territories of the state's three largest electric IOUs.

SGIP projects. SGIP allocates 85 percent of the funds to energy storage technologies. Based on the 2019 evaluation (published in August 2021), by the end of 2019, the SGIP had provided incentives to 8,875 energy storage systems representing almost 187 megawatts (MW) of rebated capacity. Most energy storage systems rebated by the SGIP program are installed in residential settings (8,061 of 8,875 or slightly more than 90 percent), followed by a variety of nonresidential facilities, including schools and industrial facilities.

CPUC establishes "Equity Budget." In 2018, the CPUC established an "Equity Budget" for SGIP to ensure that a portion of the SGIP budget will be reserved for projects that are located in disadvantaged and low-income communities and for customers that meet specific eligibility requirements. The objectives of the investments are to support economic development opportunities to disadvantaged communities, reduce or avoid the need to operate conventional gas facilities in disadvantaged communities, and ensure that low-income customers have access to energy storage resources.

Governor's 2022 Budget proposals include funding for solar and energy storage DERs. The governor's proposed budget for 2022-23 includes proposals to provide incentives for DER, including nearly $1 billion for solar plus storage incentives via SGIP and funding via the Strategic Electric Reliability Reserve. As of the writing of this analysis, the Legislature had adopted budget action to approve funding ($21 billion) for energy related programs and projects, including those for solar and storage incentives, but had deferred details to future trailer bills. The governor's proposal for solar and storage projects proposes to target 70 percent of the $970 million for residential low-income, Tribal, and disadvantaged communities. The remaining 30 percent of funds would be available for general market incentives for battery storage system deployment. The proposal provides that deployment of these DERs is intended to help improve electric service reliability and resiliency for low-income residential customers who may experience power outages caused by wildfires or others events, contribute to grid reliability, reduce electric sector greenhouse gas (GHG) emissions, create new clean energy jobs, reduce low-income residential customers' electric bills, and create new avenues for Tribes and underrepresented communities to access and benefit from clean energy resources.

The proposal notes that SGIP funding for communities experiencing wildfire threats and proactive power shutoffs is fully subscribed with wait list status for qualifying customers seeking to assess the incentive payments. The budget proposal is intended to address the demand for incentives and capture the benefits to the electric grid. As of the writing of this analysis, the specific proposal to have the CPUC administer funding for solar plus storage had not been adopted and was still subject to budget negotiations.

Comments

Statewide incentive program for DERs. This bill proposes to establish an incentive program for DERs administered by the CEC. The proposed program is similar to the SGIP program in providing incentives for DERs. However, whereas, the SGIP program is funded from distribution rates collected from customers within the state's three large electric IOUs, the proposed program in this bill would be funded from the state budget. As such, this incentive program would be available to residents and businesses across the state, regardless of electric utility provider (though rural electric cooperatives are not explicitly mentioned, they are generally considered electrical corporations since they are privately owned). This program would also require the CEC to prioritize resources that both reduce environmental pollution in disadvantaged communities or provide clean resiliency benefits to vulnerable communities, and facilitate all types of clean vehicle charging with an emphasis on medium- and heavy-duty vehicles collocated at ports, warehouses, and transit corridors.

Who benefits? This bill provides general direction to the CEC to equitably award incentives with consideration for various populations and includes industrial, commercial, and residential sectors. These populations include disadvantaged communities, vulnerable communities, and the access and functional needs population. The governor's budget proposal is targeted to residential customers, specifically targeting 70 percent of funding to low-income residents (without a definition) and 30 percent to any residential customer for new battery storage system installations.

Public works projects. Public works projects are, generally, those funded in part by public dollars. All workers employed on public works projects must be paid the prevailing wage determined by the Director of the Department of Industrial Relations (DIR), according to the type of work and location of the project. In California, the prevailing wage rate is an hourly rate paid on public works projects that is often set in the terms of a collective bargaining agreement. Prevailing wage creates a level playing field by requiring an across-the-board rate for all bidders on

publically subsidized projects. This bill explicitly requires the incentives for DERs over 15 kW are public works projects that must provide prevailing wages.

Public Utilities Code § 218. The findings and declarations of this bill include several statements intended to argue the merits and history of Public Utilities Code (PUC) §218, known as the "over-the-fence-rule." PUC §218 requires any entity who wishes to sell energy to more than two contiguous parcels or across the street to become a regulated electrical corporation, subject to the full regulatory authority of the CPUC, with a few exceptions. The application of PUC §218 is an issue actively debated within the CPUC's Microgrid and Resiliency proceeding (R. 19-09-009). A couple of the parties to the proceeding argued unsuccessfully to relax the limitations imposed by PUC §218 in order to allow a microgrid provider/owner/operator to serve multiple customers or properties, beyond those detailed in the statute. These parties referenced a 1921 court case decision as part of their argument to authorize the relaxation. However, the CPUC very clearly rejected those arguments in D. 21-01-018 of the proceeding, noting the statute can only be changed through legislative action. This bill proposes no changes to PUC §218, as such the statements in the findings and declarations raise concerns about their appropriateness within this bill and are the main concern of most of the entities opposed to this bill.

Related/Prior Legislation

AB 2143 (Carrillo, 2022) applies public works designation and requires prevailing wages are paid for renewable energy installations with a generating capacity of more than 15 kW that receive service pursuant to an electric utility's net energy metering (NEM) tariff. The bill is pending on the Senate Floor.

AB 1144 (Friedman, Chapter 394, Statutes of 2019) required the CPUC to allocate at least 10 percent ($16.6 million) of the 2020 funds from SGIP for the installation of energy storage and other DERs at facilities that provide critical infrastructure to communities in High Fire Threat Districts to support community resiliency.

SB 700 (Wiener, Chapter 839, Statutes of 2018) extended the sunset date for SGIP by five years, requires the CPUC to adopt requirements for storage systems to ensure that they reduce GHG emissions, and prohibits generation technologies using non-renewable fuels from obtaining SGIP incentives as of January 1, 2020.

AB 1637 (Low, Chapter 658, Statutes of 2016) doubled the annual funding authorization for SGIP and revised and extended the NEM program for fuel cells by five years.

AB 1478 (Committee on Budget, Chapter 664, Statutes of 2014) extended the sunset to collect SGIP funds through 2019 and extended the program's sunset to 2021.

SB 861 (Committee on Budget and Fiscal Review, Chapter 35, Statutes of 2014) established SGIP eligibility restrictions for distributed generation resources and required the CPUC to establish a capacity factor for DER technologies.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown one-time and ongoing costs, likely in the millions of dollars (General Fund or special fund) for the California Energy Commission (CEC) to administer incentives for customers who install behind-the-meter energy storage systems or self-generation systems paired with energy storage systems.
- Unknown but likely minor costs for the California Public Utilities Commission and California Air Resources Board to consult with the CEC.
- Unknown but likely significant cost pressure (various funds) to provide funding for the incentives provided for in this bill.

Burbank Water and Power
California State Association of Electrical Workers
ChargePoint
Coalition of California Utility Employees
Environmental Defense Fund
NRG Energy

OPPOSITION: (Verified 8/25/22)

California Alliance for Community Energy
California Solar & Storage Association
Capstone Green Energy
Clean Coalition
East Bay Community Energy
Microgrid Resources Coalition
The Climate Center
ZNE Alliance

ARGUMENTS IN SUPPORT: According to the author, "As California faces climate-triggered extreme weather events, natural disasters, reliability planning challenges, energy market instabilities due to global geopolitical unrest, the state should expand deployment of clean distributed energy resources (DER) as a critical tool to support statewide and economy-wide decarbonization, resiliency, and equity objectives. AB 2667 would create a new incentive program at the CEC to support innovative new approaches to DER adoption based on DER functional attributes in a more technology neutral manner to support the collective needs of the grid."

ARGUMENTS IN OPPOSITION: The entities in opposition to this bill raise concerns regarding: (1) the findings and declarations concerning PUC §218, and (2) defining all DER projects over 15 kW as public works. The Microgrid Resources Coalition, which includes many of the entities opposed to this bill states, "the coalition has serious concerns with this bill and its implications for microgrids and DER deployment within communities across California."

SUBJECT: Planning and zoning

SOURCE: Bay Area Council
SPUR

DIGEST: This bill adds parameters for determining a project's compliance with the streamlined, ministerial process created by SB 35 (Wiener, Chapter 366, Statutes of 2017).

Senate Floor Amendments of 8/25/22 authorize a project to be located on a hazardous waste site if a local government has otherwise determined the site to be suitable for development or the site is an underground storage take site and has received a specified closure letter and resolve chaptering conflicts with SB 6 (Caballero).

Senate Floor Amendments of 8/18/22 provide that amendments related to the calculation of density bonus units in the bill do not constitute a change in law but are declaratory of existing law, and resolve chaptering conflicts with SB 6 (Caballero).

Senate Floor Amendments of 8/10/22 add "charter city" to the definition of "city" for purposes conducting an impact fee study under the Mitigation Fee Act.

ANALYSIS:

Existing law:

Under SB 35 (Wiener, Chapter 366, Statutes of 2017)

1) Allows a development proponent to submit an application for a development that is subject to the streamlined, ministerial approval process, and not subject to a conditional use permit if the infill development contains two or more residential units and satisfies specified objective planning standards.

2) Requires, among other things, for sites subject to ministerial approval to be limited to zones for residential use or residential mixed-use development, with at least two-thirds of the square footage of the development designated for residential use.

3) Specifies, if a local government determines that a development submitted pursuant to the bill's provisions is in conflict with any of the objective planning standards listed in 1) above, that it shall provide the development proponent written documentation of which standard or standards the development conflicts with, and an explanation for the reason or reasons the development conflicts with that standard or standards, as follows:

    a) Within 60 days of submittal of the development to the local government if the development contains 150 or fewer housing units; or,

    b) Within 90 days of submittal of the development to the local government if the development contains more than 150 housing units.

Under the Mitigation Fee Act

4) Requires that, prior to levying a new connection fee or capacity charge, a local agency must evaluate the amount of the connection fee or capacity charge.

5) Specifies that the evaluation must include evidence to support that the fee or charge does not exceed the estimated reasonable cost of providing service as required by law.

This bill:

1) Clarifies that an SB 35 project is not subject to a conditional use permit or any other non-legislative discretionary approval.

2) Provides that the inclusionary requirements apply to the base project, before calculating any density bonus units.

3) Authorizes an SB 35 project to be located on a hazardous waste site if a local government has otherwise determined the site to be suitable for development or the site is an underground storage take site and has received a specified closure letter.

4) Provides that a local government shall not determine that a development seeking to use SB 35 or modify an SB 35-approved project is in conflict with its objective planning standards based on the absence of application materials, provided the application contains substantial evidence that would allow a reasonable person to conclude that the development is consistent with the objective planning standards.

5) Updates cross-references to the California Public Records Act.

6) Requires "charter cities" to evaluate and show specified evidence when imposing or increasing connection fees and capacity charges, and excludes school districts from certain nexus study requirements.

7) Clarifies that affordability requirements apply before the calculation of density bonus units and provide that these amendments do not constitute a change in law but are declaratory of existing law.

8) Resolves chaptering conflicts with SB 6 (Caballero).

Background

SB 35 created a streamlined approval process for infill projects with two or more residential units in localities that have failed to produce sufficient housing to meet their regional housing needs allocation, as defined. To access the streamlined process, a developer must demonstrate that the development meets a number of planning standards including that the development includes a percentage of affordable housing units, meets specified labor standards, is not on an environmentally sensitive site, and would not result in the demolition of housing that has been rented out in the last ten years. Localities that find a proposal is in conflict with one of the SB 35 planning standards must provide written

documentation to the developer within a specified period of time. If the locality does not meet those deadlines, the development is deemed to satisfy the requirements for streamlined approval and must be approved by right.

Comments

1) *Modifications and objective standards.* Prior to submitting an application as described above, a developer must first submit to the local government a notice of intent to submit an application. According to the sponsors, as housing projects evolve, developers sometimes need to make modifications to projects. This is because residential projects by their nature are complex and, for example, can involve building out lobbies, corridors, back of house spaces, storage, parking, amenity facilities, and outdoor areas, in addition to the units themselves. Many of these cannot be figured out until the completion of the design for the project for the building permit and final applications. Additionally, the time between the initial application and the first building permit can take one to two years, sometimes longer, during which time market conditions, which drive project decisions can change.

   For example, some potential changes may include: the cost of materials which may lead to a change in construction type or architecture; building codes; housing financing and securing of public subsidies; and the imposition of impact fees, which may impact the overall project.

   Some jurisdictions use this opportunity to change the planning standards that are applied to a project as a means to invalidate a project. This bill clarifies that a local government cannot determine that a development, or its subsequent modification, is in conflict with the local government's objective planning standards based on the absence of application materials, if the application contains substantial evidence that would allow a reasonable person to conclude that the development is consistent with the objective planning standards.

2) *SB 35 site exception to an exemption*. SB 35 specifically prohibits the streamlined approval process from applying to specific environmentally sensitive sites, such as wetlands, prime farmland, and sites with protected habitats. Additionally, it exempts hazardous waste sites designated by the state, unless the state has cleared the site for residential use. According to the sponsors, this bill provides clarity around underground storage tanks that have leaked. The State Water Board undertook a comprehensive evaluation of tank closure policy and criteria and concluded that petroleum hydrocarbons - unlike other chemicals - present low risks because petroleum hydrocarbons can naturally degrade quickly, depending on soil conditions. For that reason, this

bill limits the exemption to underground storage tanks that leaked petroleum hydrocarbons.

3) *Mitigation Fee Act Amendments.* Concerned that mitigation fees may be increasing the cost of housing, in 2017 the Legislature enacted AB 879 (Grayson, Chapter 374, Statutes of 2017), which required the Department of Housing and Community Development (HCD) to complete a study to evaluate the reasonableness of local fees charged to new developments. On August 7, 2019, HCD released the study, performed by the Terner Center for Housing Innovation (Terner Center). The study's findings concerned three categories: fee transparency; fee structure; and fee design. Among other conclusions, the study argued that fees can be a barrier to development and raise prices of both new and existing homes. However, the study also noted that local governments face substantial fiscal constraints and thus have turned to fees as a source of revenue to fund public services for new developments. The study recommended requiring local governments to post fees and nexus studies online, as well as annual reports on fee collections, and requiring jurisdictions to provide fee estimates. To address transparency concerns, AB 1483 (Grayson, Chapter 662, Statutes of 2019) required cities and counties to post specified housing-related information on their web sites and required HCD to establish a workgroup, as specified, to develop a strategy for state housing data.

   In November 2020, the Terner Center released a report focused on the preparation of nexus studies. The study found that in many cases, nexus studies do not clearly identify the current level of service and do not always use methodologies that tie fees closely to direct impacts of new development. Finally, the study noted that nexus studies and the fee setting process more broadly do not require a review of whether the fee would have negative financial consequences for housing development.

   Based on the information gathered at recent informational hearings and these studies, over the past couple years, legislative staff met with multiple stakeholder groups to assess how to improve the impact fee process. Last year, these efforts culminated in the enactment of AB 602 (Grayson, Chapter 347, Statutes of 2021), which required a city, county, or special district to conduct a nexus study prior to the adoption of an impact fee. AB 2536 (Grayson, Chapter 128, Statutes of 2022) amended the law to require the preparation of nexus studies to follow certain standards and practices. This bill clarifies that "charter cities" are also subject to the requirements in AB 2536 (Grayson).

OPPOSITION: (Verified 8/24/22)

City of Thousand Oaks

ARGUMENTS IN SUPPORT: According to the author, "The legislature has made enormous efforts to dramatically increase our housing supply. However, ambiguities in the law have been exploited by anti-growth community groups to delay and derail desperately needed housing projects. To help close these emergent loopholes, AB 2668 will clarify that a local government shall not determine that a development is in conflict with the objective planning standards on the basis that application materials are not included, if the application contains enough information for a reasonable person to conclude that the development is consistent with the objective standards. This small fix will help ensure that badly-needed housing projects are streamlined as intended under current law."

ARGUMENTS IN OPPOSITION: The City of Thousand Oaks is opposed because "cities should have the ability to determine if the application meets their rules and requirements for ministerial approval."

SUBJECT: Hospice agency licensure: moratorium on new licenses

SOURCE: Author

DIGEST: This bill establishes a moratorium on transferring a hospice agency license during the first five years of licensure, requires a new applicant for licensure to demonstrate unmet need in the region served, requires the California Department of Public Health (CDPH) to conduct surveys of accredited hospices, requires CDPH to adopt emergency regulations to adopt recommendations of the California State Auditor, as specified, extends the moratorium on new hospice licenses until the earlier of two years after the state audit, or the date the emergency regulations are adopted, and updates other hospice agency oversight requirements.

Senate Floor Amendments of 8/22/22 (1) clarify that the bill applies to hospice agencies; (2) indicate that an application may include more than one form; (3) prohibit a license from being transferred; (4) prohibit CDPH from approving a change of ownership within five years of the date a license was initially issued, and clarify only the entity issued the license may use the license during the five year period; (5) permit CDPH to make an exception for extenuating circumstances if the hospice agency demonstrates and provides evidence of the need for continuity of care, or, there is both a financial hardship and an unmet need in the geographic area; (6) require a hospice agency to have an administrator, administrator designee, director of patient care services, director of patient care services designee, and medical director or contracted medical director, and submit to CDPH specified information for each individual on an initial application; (7) require an agency to notify CDPH of any change in any of the those positions within 10 business days of the change; (8) require CDPH to verify the status of professional licensure for hospice agency management personnel, and permit CDPH to also verify other information, as specified; (9) clarify that new applicants must demonstrate and provide evidence of unmet need in the geographic area of service, unless the application is a change of ownership that meets specified conditions; (10) reduce the required CDPH surveys related to licensure to 5% of initial licensees that are approved by accrediting organizations during the previous calendar year, instead of 5% of all accredited hospices annually; (11) clarify that CDPH will make an onsite investigation within 10 days after receiving a complaint, as specified; (12) delete a requirement that CDPH establish requirements for office space, initial inspections, follow up, that the visits are unannounced, and specific requirements such as visiting patients and confirming terminal illness of patients; and, (13) add reasons CDPH may deny an application such as prior termination from government programs such as Medicare and Medi-Cal, or license suspension, a pattern and practice of violating state or federal standards during the last three years of ownership or management, presence on list of excluded individuals/entities published by the federal Office of Inspector General, and failure by management personnel to cooperation with CDPH when conducting an inspection or investigation.

ANALYSIS:

Existing law:

1) Establishes the Hospice Licensure Act of 1990 (Act) which provides CDPH with the authority to license and regulate hospice agencies. [HSC §1745, et seq.]

2) Prohibits a person, political subdivision of the state, or other governmental agency from establishing, conducting, maintaining, or representing itself as a hospice unless a license has been issued, except as specified. Permits multiple locations without a need to obtain a separate license, but requires the locations to be listed on the license of the parent agency and each to pay a licensing fee in the amount prescribed. Requires any person, political subdivision of the state, or other governmental agency desiring a hospice license to file with CDPH a verified application. Requires any hospice that is not required to obtain a license to disclose in all advertisements and information provided to the public all specified information.[HSC §1748]

3) Requires an applicant for hospice licensure to:
   a) Be of good moral character. Requires if the applicant is a franchise, franchisee, firm, association, organization, partnership, business trust, corporation, company, political subdivision of the state, or governmental agency, the person in charge of the hospice for which the application for a license is made to be of good moral character;
   b) Demonstrate ability to comply with licensure requirements and any rules or regulations; and,
   c) File a completed application with CDPH. [HSC §1749]

4) Prohibits CDPH from issuing a new license to operate a hospice, notwithstanding any other law and except as provided in 5) below, on and after January 1, 2022, and until 365 days from the date that the California State Auditor publishes a report on hospice licensure. [HSC §1751.70]

5) Permits CDPH to grant an exception to the moratorium upon making a written finding that an applicant for a new license, or, with a license application pending on January 1, 2022, has shown a demonstrable need for hospice services in the area where the applicant proposes to operate based on the concentration of all existing hospice services in that area, and requires CDPH to issue a new license during the moratorium pursuant to the law, as specified. [HSC §1751.75]

This bill:

1) Prohibits a hospice agency license from being transferred. Prohibits CDPH from approving a change of ownership within five years of the date a license was initially issued, and clarify only the entity issued the license may use the license during the five year period.

2) Permits CDPH to make an exception to 1) above for extenuating circumstances if the hospice agency demonstrates and provides evidence of the need for continuity of care, or, there is both a financial hardship and an unmet need in the geographic area

3) Requires a hospice agency to have an administrator, administrator designee, director of patient care services, director of patient care services designee, and medical director or contracted medical director, and submit to CDPH specified information for each individual on an initial application;

4) Requires an agency to notify CDPH of any change in any of the positions described in 3) above within 10 business days of the change;

5) Requires CDPH to verify the status of professional licensure for hospice agency management personnel, and permit CDPH to also verify other information, as specified;

6) Clarifies that new applicants must demonstrate and provide evidence of unmet need in the geographic area of service, unless the application is a change of ownership that meets specified conditions;

7) Requires CDPH to survey 5% of initial licenses that are accredited hospice agencies that are approved during the previous calendar, and permits CDPH to conduct a survey of an accredited hospices not surveyed as part of the 5% to ensure the accreditation and licensing requirements are met.

8) Requires, by January 1, 2024, CDPH to adopt emergency regulations to implement the recommendations in California State Auditor Report 2021-123 (state audit) on the California Hospice Licensure and Oversight (March 29, 2022), and maintain the general moratorium on new hospice licenses until the regulations are adopted, but in no event later than March 29, 2024. Specifies requirements for the emergency regulations.

9) Exempts hospice facilities licensed under health facility law from the moratorium.

10) Permits any person to request an investigation of an accredited hospice agency making a complaint (orally or in writing) to CDPH. Requires the substance of the complaint to be provided to the licensee no earlier than at the time of the inspection. Unless the complainant specifically requests otherwise, neither the substance of the complaint provided to the licensee nor any copy of the complaint or any record published, released, or otherwise made available to the licensee shall disclose the name of any person mentioned in the complaint

except the name of any duly authorized officer, employee, or agent of CDPH conducting the investigation or inspection. Requires CDPH to make an onsite investigation within 10 business days after receiving a complaint, as specified

11) Adds to the authority CDPH has to deny any application for licensure, or suspend or revoke any license the following:
    a) Improperly certifying a patient as eligible for hospice care;
    b) Failure by hospice management personnel to be present for an inspection or complaint investigation;
    c) Failure by a hospice agency to report a change in owner, hospice management personnel, or location;
    d) Prior termination from government programs such as Medicare and Medi-Cal, or license suspension,
    e) A pattern and practice of violating state or federal standards during the last three years of ownership or management, presence on list of excluded individuals/entities published by the federal Office of Inspector General; and,
    f) Failure by management personnel to cooperation with CDPH when conducting an inspection or investigation.

Comments

According to the author, hospice care is intended to make terminally ill patients as physically and emotionally comfortable as possible, and to support their families and other caregivers throughout the process. Instead, fraudulent actors have used hospice to prey on vulnerable individuals and their families. Draining funds meant for sick Californians is abhorrent and we must address this crisis. This bill will reduce the negligence and fraud that targets the terminally ill by codifying recommendations made by the California State Auditor.

State Audit. California State Auditor Report 2021-123 on California Hospice Licensure and Oversight was published on March 29, 2022, and found multiple indicators of fraud and abuse, in particular in Los Angeles County. The audit contains numerous findings and recommendations, including that growth in the number of hospice agencies in Los Angeles County has vastly outpaced the need for hospice services, and recent growth is almost exclusively in for-profit companies. The audit found numerous indicators suggesting that many of these hospice agencies may have been created to fraudulently bill Medicare and Medi-Cal for services rendered to ineligible patients or services not provided at all.

The state audit finds that the state agencies responsible for overseeing hospice care in California have failed to take adequate measures to prevent such fraud or to protect patients from unqualified and unscrupulous providers. CDPH has yet to issue regulations for its hospice licensing processes, despite having had the authority to do so since 1991. CDPH's current initial licensing process does not require adequate screening to ensure that hospice employees are qualified to provide services to patients. Since 2015 CDPH has not suspended a hospice license and has revoked a hospice license only once. Despite these widespread problems in the hospice program, CDPH and the two state agencies primarily responsible for identifying and investigating hospice fraud in Medi-Cal, the Department of Health Care Services and the Department of Justice, have not sufficiently coordinated their efforts.

License transfer. The audit also brought to light problems with the selling or transferring of hospice licenses. According to the audit, although CDPH requires hospice agencies to report when they change owners or locations, it has not created guidelines for when these changes require a new inspection. CDPH instructs hospice agencies to submit a new application form when such changes take place that asks for the same information as the original licensing application, such as the names of the owners and a copy of the lease, if applicable. However, it does not have a process for enforcing the submission of this application or have a requirement to perform an inspection when these changes take place. Consequently, hospice owners can sell their businesses or move to new locations with little to no oversight for ensuring that patients will continue to receive quality care.

Related/Prior Legislation

AB 1280 (Irwin, Chapter 478, Statutes of 2021) prohibited a hospice referral source from receiving, directly or indirectly, any form of payment in exchange for referring a patient to hospice provider or facility. Required a hospice to provide verbal and written notice of the patient's rights and responsibilities in a language and manner the person understands, before providing care.

SB 664 (Allen, Chapter 494, Statutes of 2021) imposed a moratorium on new hospice licenses until one year from the date that the California State Auditor publishes a report on hospice licensure.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, CDPH estimates state operation costs of $2,076,000 in 2022-23, $2,905,000 in 2023-24, $2,050,000 in

2024-25, $1,990,000 in 2025-26, and $1,909,000 ongoing thereafter (Licensing and Certification Fund).

SUPPORT: (Verified 8/12/22)

California Association for Health Services at Home
California Hospice and Palliative Care Association

OPPOSITION: (Verified 8/12/22)

Department of Finance

ARGUMENTS IN SUPPORT: The California Hospice and Palliative Care Association (CHAPCA) writes that as currently in print, this bill will extend the hospice license moratorium enacted last year. CHAPCA believes the enforcement of the moratorium exceeds the intent and language of the enacting legislation, SB 664; at the same time, CHAPCA recognizes the imperative to ensure the hospice licensure approval process is conducted in a methodical manner and they appreciate the collaboration to provide clarification to the moratorium. Specifically to this issue, CHAPCA appreciates exempting licensed hospice facilities from the moratorium. There are only 18 of these facilities in the state, with several more intending to apply for approval after having spent years in the construction and funding to design and build these health facilities. In addition to the distinction between a licensed hospice program and a health facility that must be regulated by the state, there is no evidence or anecdote that hospice facilities are contributing to diminished quality of care, commoditizing hospice reimbursement, or any other unscrupulous action. Hospice care is needed at a most critical point in the continuum of care. Not just for the individual, but for their loved ones as well. There is no place in this system for those who would exploit the terminally ill, the vulnerable, their families, or to defraud the government or the health care system in the whole. CHAPCA wholeheartedly and enthusiastically embraces this bill and is pleased to work with you and others to address the flaws in this end of the continuum of care.

California Association for Health Services at Home (CAHSAH) writes that they are supportive of the important intent of this measure, but have some concerns regarding how the time and distance requirements will be implemented as well as how to ensure nursing ratios do not impact the continuum of hospice care. CAHSAH states the Medicare Hospice Benefit is specifically designed with reimbursement that is not linked to distance traveled. There is concern about how patients who are already being cared for by a hospice agency will be impacted if that agency is deemed not to be in a newly specified geographic area. Many

factors must be considered when establishing time and distance requirements such as the acuity of the hospice patient. CAHSAH looks forward to working with CDPH on the implementation of this important measure.

ARGUMENTS IN OPPOSITION: The Department of Finance is opposed to this bill because it creates additional cost pressures on the Licensing and Certification Fund, would likely expedite the need for a fee increase, and may be duplicative of similar initiatives in the 2022 Budget Act. Finance also notes concern that CDPH will likely need General Fund resources in 2022-23 or they may not be able to finalize regulations by January 1, 2024, as required by this bill.

The 2022 Budget Act included $1 million General Fund in 2022-23 available over three years to establish and facilitate a Hospice Fraud Task Force that includes representation from the California Health and Human Services Agency, CDPH, the Department of Health Care Services, the Department of Social Services, and the Department of Justice (DOJ) to identify and investigate fraud and refer cases of suspected fraud to the DOJ for prosecution. By January 1, 2025, the task force must also provide a recommendation to the Legislature on whether it should be established permanently to continue its work on an ongoing basis.

SUBJECT: Information Practices Act of 1977

SOURCE: Author

DIGEST: This bill amends the Information Practices Act by updating definitions, bolstering existing protections, applying data minimization principles, limiting disclosure, and increasing accountability.

Senate Floor Amendments of 8/23/22 delay implementation and refine the liability standard for certain unlawful disclosures.

ANALYSIS:

Existing law:

1) Provides, pursuant to the California Constitution, that all people have inalienable rights, including the right to pursue and obtain privacy. (Cal. Const., art. I, Sec. 1.)

2) Establishes the Information Practices Act of 1977 (IPA), which declares that the right to privacy is a personal and fundamental right protected by Section 1 of Article I of the Constitution of California and by the United States Constitution and that all individuals have a right of privacy in information pertaining to them. It further states the following legislative findings:

    a) The right to privacy is being threatened by the indiscriminate collection, maintenance, and dissemination of personal information and the lack of effective laws and legal remedies;
    b) The increasing use of computers and other sophisticated information technology has greatly magnified the potential risk to individual privacy that can occur from the maintenance of personal information; and
    c) In order to protect the privacy of individuals, it is necessary that the maintenance and dissemination of personal information be subject to strict limits. (Civ. Code § 1798 et seq.)

3) Defines "personal information" (PI) for purposes of the IPA as any information that is maintained by an agency that identifies or describes an individual, including, but not limited to, the individual's name, social security number, physical description, home address, home telephone number, education, financial matters, and medical or employment history. It includes statements made by, or attributed to, the individual. (Civ. Code § 1798.3(a).)

4) Defines "agency" to include every state office, officer, department, division, bureau, board, commission, or other state agency. "Agency" explicitly excludes:

    a) The California Legislature;
    b) Any agency established under Article VI of the California Constitution;
    c) The State Compensation Insurance Fund, except as to any records that contain personal information about the employees of the State Compensation Insurance Fund; or
    d) A local agency, as defined. (Civ. Code § 1798.3(b).)

5) Provides that each agency shall maintain in its records only PI which is relevant and necessary to accomplish a purpose of the agency required or authorized by the California Constitution or statute or mandated by the federal government; and requires each agency to maintain all records, to the maximum extent possible, with accuracy, relevance, timeliness, and completeness. (Civ. Code §§ 1798.14, 1798.18.)

6) Requires an agency that collects PI to maintain the source of that information, except as specified; and specifies that each agency shall collect PI to the greatest extent practicable directly from the individual who is the subject of the PI. (Civ. Code §§ 1798.15, 1798.16.)

7) Requires each agency to provide with any form used to collect PI from individuals a notice containing specified information. (Civ. Code § 1798.17.)

8) Requires each agency to establish rules of conduct for persons involved in the design, development, operation, disclosure, or maintenance of records containing PI and to instruct each such person with respect to those rules; and further requires each agency to establish appropriate and reasonable administrative, technical, and physical safeguards to ensure compliance with the provisions of the IPA, to ensure the security and confidentiality of records, and to protect against anticipated threats or hazards to their security or integrity which could result in an injury. (Civ. Code § 1798.20.)

9) Prohibits an agency from disclosing any PI in a manner that would link the information disclosed to the individual to whom it pertains unless the information is disclosed in specified ways, including with the prior written voluntary consent of the individual to whom the PI pertains within the preceding 30 days. (Civ. Code § 1798.24.)

10) Requires each agency to keep an accurate accounting of the date, nature, and purpose of each disclosure of a record made pursuant to specified circumstances; and requires each agency to retain that accounting for at least three years after the disclosure, or until the record is destroyed, whichever is shorter. (Civ. Code §§ 1798.25, 1798.27.)

11) Grants individuals with specified rights in connection with their PI, including the right to inquire and be notified as to whether the agency maintains a record about them; to inspect all PI in any record maintained; and to submit a request in writing to amend a record containing PI pertaining to them maintained by an agency. (Civ. Code § 1798.30, et seq.)

12) Provides that an agency that fails to comply with any provisions of the IPA may be enjoined by any court of competent jurisdiction, and, as specified, the agency may be liable to the individual in an amount equal to the sum of actual damages sustained by the individual, including damages for mental suffering, and the costs of the action together with reasonable attorney's fees as determined by the court. (Civ. Code §§ 1798.46-1798.48.)

13) Provides that the intentional violation of any provision of the IPA, shall constitute a cause for discipline; and further specifies that the intentional disclosure of medical, psychiatric, or psychological information in violation of the IPA is punishable as a misdemeanor if the wrongful disclosure results in economic loss or personal injury to the individual to whom the information pertains. (Civ. Code §§ 1798.55, 1798.57.)

14) Establishes the California Consumer Privacy Act (CCPA), which grants consumers certain rights with regard to their personal information. (Civ. Code § 1798.100 et seq.) Establishes the California Privacy Rights Act of 2020 (CPRA), which amends the CCPA and creates the California Privacy Protection Agency (PPA), which is charged with implementing these privacy laws, promulgating regulations, and carrying out enforcement actions. (Civ. Code § 798.100 et seq.; Proposition 24 (2020).)

15) Requires a business that collects a consumer's personal information to, at or before the point of collection, inform consumers of specified information. (Civ. Code § 1798.100(a).)

16) Defines "personal information" as information that identifies, relates to, describes, is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household. The CCPA provides a nonexclusive series of categories of information deemed to be personal information, including biometric information, geolocation data, and "sensitive personal information." (Civ. Code § 1798.140(v)(1).)

17) Extends additional protections to "sensitive personal information," which is defined as personal information that reveals particularly sensitive information such as genetic data and the processing of biometric information for the purpose of uniquely identifying a consumer. (Civ. Code § 1798.140(ae).)

This bill:

1) Updates the definition of "personal information" to include any information that is maintained by an agency that is reasonably capable of identifying or describing an individual, including, but not limited to, the individual's name, social security number, physical description, address, telephone number, education, financial matters, and medical or employment history. It also includes genetic information, IP address, online browsing history, and location information, if reasonably capable of identifying an individual. It includes statements made by, or attributed to, the individual.

2) Removes the term "system of records" and simplifies the definition of "record" to include any file or grouping of personal information that is maintained by an agency. Includes the Financial Industry Regulatory Authority within the definition of "regulatory agency."

3) Requires the notice accompanying data collection to include all purposes within the agency for which the collected PI is to be used.

4) Requires the rules of conduct to be consistent with the State Administrative Manual and the State Information Management Manual.

5) Prohibits an agency from using records containing PI for any purpose or purposes other than those for which that PI was collected, except as required by federal law, or as authorized or required by state law.

6) Tightens the bases for disclosure of PI that links or reasonably could link it to an individual. This includes removing disclosure to a law enforcement or regulatory agency when required for an investigation of unlawful activity or for licensing, certification, or regulatory purposes, unless the disclosure is otherwise prohibited by law.

7) Requires the notification DMV is required to make to be provided to the person to whom the PI relates.

8) Requires retention of accounting for at least three years.

9) Extends the basis for discipline to negligent violations of the IPA.

10) Removes the condition that in order to be held liable for intentional disclosure of specified medical records there must be resultant economic harm or personal injury. It provides that it must be known or should have been known that the disclosure was in violation of its provisions.

11) Becomes operative on January 1, 2025.

Comments

The IPA and Californians' privacy

Modeled after the Federal Privacy Act of 1974, the Information Practices Act is the statutory scheme that governs the collection, maintenance, and disclosure of personal information by state agencies, specifically excluding local agencies. The IPA places guidelines and restrictions on the collection, maintenance, and disclosure of Californians' PI. State agencies are required to provide notice to

individuals of their rights with respect to their PI, the purposes for which the PI will be used, and any foreseeable disclosures of that PI. Passed over 40 years ago, it has not been meaningfully updated since.

The CCPA, later amended by the CPRA, grants a set of rights to consumers with regard to their personal information. The CCPA defines "personal information" as information that identifies, relates to, describes, is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household. The CCPA provides a nonexclusive series of categories of information deemed to be personal information. However, the modernized protections of the CCPA only apply to businesses. The IPA on the other hand has not been updated in decades, leaving its framework vulnerable.

This bill seeks to bring the IPA into this new era and bolster the protections for Californians' PI that is collected, used, and retained by state agencies, especially in light of increased data insecurity issues at various state agencies. This includes updating the definition of personal information to include information that is reasonably capable of identifying an individual, prohibiting an agency from using records containing personal information for any purposes other than those for which the PI was collected, except as specified, and adjusting penalties for violations of the law to include discipline for negligent violations and to eliminate injury-in-fact requirements for intentional disclosures of sensitive information.

According to the author:

> Despite epochal advances in information technology, the Information Practices Act (IPA), which governs the collection, use, and disclosure of Californian's personal information by state agencies, has not been meaningfully updated since its passage in 1977. As the technology employed by the state to better serve the people has become increasingly sophisticated, the definitions and protections provided by the IPA have fallen out of step with the types of information with which we entrust our government. An update to the IPA to better reflect our changing relationship with information in the 21st Century is long overdue.
>
> In 1977, the passage of the IPA was a landmark moment in this State's commitment to the right to privacy guaranteed by the California Constitution. AB 2677 would renew California's leadership in recognizing the immense importance of privacy rights to the liberty of its people.

[NOTE: For a more thorough discussion of the bill, please see the relevant Senate Judiciary Committee analysis.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CSU: Ongoing costs in the millions of dollars to the California State University to increase staff, and implement training and infrastructure (Special Fund – California State University Trust Fund, General Fund).

- Local Reimbursement: Potentially reimbursable costs, possibly in the millions of dollars to tens of millions of dollars to local agencies, including cities, counties and special districts to comply with the IPA (Local Funds, General Fund). Costs will likely include third-party vendor contracts for consultants to advise on data system compliance with the IPA, significant investment in information technology (IT) infrastructure, extensive employee training, additional staff to liaise with the California Department of Technology (CDT) and numerous form and policy updates. General Fund costs will depend on whether the duties imposed by this bill are considered a reimbursable state mandate by the Commission on State Mandates.

- CDI: The Department of Insurance reports costs of $26,000 in FY 2022-23, $117,000 in FY 2023-24, and $87,000 annually thereafter (Special Fund – Insurance Fund).

- CDT: Unknown, potentially significant costs to the Department of Technology (CDT) in additional staff if CDT is required to hire additional oversight managers to interface with local agencies on IPA compliance issues (General Fund).

ARGUMENTS IN SUPPORT: The League of Women Voters writes, "AB 2677 is an update to the nature of personal information protected by the

Information Practices Act of 1977 (IPA). It also strengthens the rules of conduct of individuals involved in managing these records. These are timely changes, introduced when records including individual information proliferate and privacy is at risk. The prior version of the bill would have applied these provisions to local governmental entities, and we encourage you to pursue those expanded protections next year."

SUBJECT: Nursing

SOURCE: Author

DIGEST: This bill requires the Board of Registered Nursing (BRN) to establish a Nursing Education and Workforce Advisory Committee, requires the BRN's executive officer (EO) to establish a uniform method to evaluate request and grant approvals for schools of nursing, and prohibits payments for clinical placement, extend the operations of the BRN by four years, until January 1, 2027, among other changes related to the BRN's sunset review.

Senate Floor Amendments of 8/25/22 delete the authorization for the Nurse Education and Workforce Advisory Committee to appoint additional subcommittee members, clarify requirements for nurse practitioners to obtain a furnishing certificate, and make other technical and clarifying changes, and resolve chaptering conflicts.

ANALYSIS:

Existing law:

1) Establishes the BRN to provide for the licensure and regulation of the practice of nursing and authorizes the BRN to issue a certificate to practice as a Nurse Practitioner (NP) to a person who meets educational standards established by the BRN or the equivalent of those educational standards until January 1, 2023. (Business and Professions Code (BPC) §§ 2700 et seq.)

2) Defines the practice of nursing to mean those functions including basic health care, that help people cope with difficulties in daily living that are associated with their actual or potential health or illness problems or treatments that require a substantial amount of scientific knowledge or technical skill, as specified. (BPC § 2725(b))

3) Defines an advanced practice registered nurse, as those licensed RNs who have met specified requirements for registration as Nurse Practitioners, Nurse Anesthetists, Nurse Midwives, and Clinical Nurse Specialists, as specified. (BPC § 2725.5)

4) Defines an approved school or an approved nursing program as one that has been approved by the BRN, gives courses of instruction approved by the BRN, covering not less than two academic years, is affiliated or conducted in connection with one or more hospitals and is an institution of higher education, as defined. (BPC § 2786(a))

This bill:

1) Establishes, within the jurisdiction of the BRN, a Nursing Education and Workforce Advisory Committee, which will solicit input from approved nursing programs and members of the nursing and health care professions, to study and recommend nursing education standards and solutions to the BRN, as specified. Authorizes that committee to establish subcommittees to study issues specific to education, workforce, or any other topic relevant to the purpose of the committee, as specified.

2) Requires the BRN's EO to develop a uniform method for evaluating requests and granting approvals for nursing schools and programs, as specified, to which the BRN's Nurse Education Consultants (NEC) must use to grant approvals and approve requests, and requires the BRN to post the uniform method on its website.

3) Clarifies that the appointing authority for BRN board members has the power to remove the member from office for neglect of duties, incompetence or unprofessional or dishonorable conduct.

4) Prohibits an institution of higher education or a private postsecondary school of nursing from paying any clinical agency or facility for clinical experience placements for students enrolled in a nursing program offered by that school of nursing, as specified.

5) Extends specified COVID-19 flexibilities for approved schools of nursing relating to clinical experience, as specified.

6) Establishes a minimum number of direct patient care clinical hours, as specified.

7) States that an approved school of nursing or nursing program is not required to track the minimum clinical hours by individual students for purposes of completing required direct patient care hours, as specified.

8) Revises the BRN's approval process for nursing programs and limit the BRN's utilization of workforce data assessments to determine school approval, as specified.

9) Requires the BRN to utilize data from available regional or institutional databases and place an annual report on their website related to collecting data pertaining to clinical placement slots, as specified.

10) Clarifies requirements for nurse practitioners to obtain a furnishing certificate.

11) Eliminates the fee for continuing approval of a nursing program, as specified, and deletes additional specified fees.

12) Extends the sunset date of the BRN by four years, until January 1, 2027, and makes numerous other technical and conforming changes.

Background

In early 2022, the Senate Business, Professions and Economic Development Committee and the Assembly Business and Professions Committee (Committees) began their comprehensive sunset review oversight of 10 regulatory entities including the BRN. The Committees conducted three oversight hearings in March of this year. This bill and the accompanying sunset bills are intended to implement legislative changes as recommended by staff of the Committees and which are

reflected in the Background Papers prepared by Committee staff for each agency and program reviewed this year.

The BRN regulates over 500,000 nurse-licensees in California. The BRN is responsible for setting educational standards for all nursing programs, approving such programs, approving continuing education providers, evaluating and licensing applicants, administering discipline, managing an intervention program for licensees with substance use disorders or mental illness, and providing stakeholder information and outreach. To be eligible for licensure in California, an individual must complete an education program approved by the BRN. All programs are required to meet the BRN's regulatory requirements for approved programs and curriculum and the BRN must determine the areas of course work required for each program through regulations.

The following are some of the issues pertaining to BRN along with background information concerning the particular issue. Recommendations made by Committee staff regarding the particular issue areas to be addressed.

Issue 20: Education Committee Composition. The BRN has established an Education/Licensing Committee (ELC) to approve and review schools, among other functions. Several stakeholders raised the issue of whether the BRN's ELC should have members with more diverse experiences, such as in curriculum development, accreditation, or management of clinical sites. In response, this bill will establish, within the jurisdiction of the BRN, a Nursing Education and Workforce Advisory Committee, to solicit input from approved nursing programs and members of the nursing and health care professions to study and recommend nursing education standards to the BRN. This bill specifies the committee members to be included and additionally requires the committee to study and recommend standards for simulated clinical experiences based on best practices by specified entities.

Issue 27: Nurse Education Consultants (NEC) Consistency. Stakeholders have reported that when comparing notes, they may receive differing decisions or policies. A large number of these reports were in relation to the implementation of the Governor's COVID-19 waivers. As a result, AB 2288 (Low) specifically required the BRN's EO to develop a uniform standard for approvals so that NECs would be consistent. On this topic, the BRN reports that it has increased the Joint NEC meeting frequency to every other week to provide training and collaboration to ensure rules and regulations are applied consistently. To help address consistency amongst NECs in the education granting of approval and requests related to education providers, this bill will require the EO to develop a uniform

method for evaluating request and granting approvals for education programs. In addition, this bill will require the BRN to make this information available on its website. The BRN's NECs will be required to utilize the uniform method in its approval process.

Issue 28: Clinical Placements. The Committees have previously raised, and continue to work on, the issue of the availability of clinical placements for all nursing students, including RNs and licensed vocational nurses. The availability of student placements for clinical experiences is based on clinical facilities, such as hospitals or clinics that are willing to accept and teach students. While there are no requirements that facilities accept students, many willingly accept students because it is necessary for the workforce and can help with recruitment. The facilities must have staff that is qualified to teach and supervise students, and often develop contracts with partner educational programs to outline responsibilities, liability, and expectations. As a result, clinical placements are often difficult to find, and even more so during the pandemic when partner facilities were turning students away. While the BRN has little to no direct control over the actual availability of placements, it has been a large part of the ongoing discussion. Part of the issue with clinical placement is the fairness in which some academic institutions may find clinical spots at facilities while other cannot. This bill will specifically prohibit an institution of higher education or a private postsecondary school of nursing from making a payment to any clinical agency or facility in exchange for clinical placements spots.

Issue 12: Implementation of Recent Legislation Impacting Advanced Practice Nurses. In 2020, the Legislature passed and the Governor signed into law, two bills that established a framework for the independent practice of advanced practice nurses. AB 890 (Wood, Chapter 265, Statutes of 2020) provided NPs clear pathways to independent practice while SB 1237 (Dodd, Chapter 88, Statutes of 2020) provided parameters for CNM independence. NPs and CNMs are both licensed and certified by the BRN and before obtaining an advance practice certificate; NPs and CNMs must first hold an RN license. This bill adds technical, clarifying and conforming changes to the nurse practice act to assist with implementation of AB 890, which authorized NPs to practice independently of physician supervision if specified requirements are met.

Issue 23: Duplication of Program Review. The State Auditor found that some of BRN's requirements for nursing programs overlap with standards imposed by national nursing program accreditors. The State Auditor recommended, as part of the Legislature's 2021 review of the BRN, that it could consider the

appropriateness of restructuring the BRN's oversight to leverage portions of the accreditors' review to reduce duplication and more efficiently use state resources.

Many of the criteria reviewed by the BRN, including faculty, facilities, and resources, are additionally reviewed by accreditors. Given that the BRN may offer similar services to programmatic accreditation, there may be no reason to seek additional programmatic accreditation. This bill aims to reduce duplication in the accreditation and BRN-approval process for nursing programs and limit the BRN's utilization of workforce data assessments to determine school approval, as specified.

Issue 24: Faculty Approval. As part of its school approval process, the BRN reviews proposed faculty for their qualifications. Some stakeholders have noted that these requirements may be unnecessary or are duplicative of accreditors. The auditor has noted that there are differences in the BRN's approval requirements. However, some stakeholders note that approved program directors should be trusted to select whomever they believe to be most qualified. They have also cited a faculty shortage that they believe they need the flexibility to address. This bill requires the BRN to approve faculty decisions made by an approved program director, as specified.

Issue 25: Clinical Simulation. The use of simulated clinical experiences has increased as educational programs and faculty gain expertise in the use of simulation as a pedagogy. In addition, new technologies allow for simulated experiences that were not possible in the past. Newer high-fidelity laboratories, complex mannequins, computer and online programs, virtual reality, and other modalities allow students to experience cases or scenarios that they may never see in a real clinical setting. Current law requires a percentage of clinical experience be in direct patient care. Instead of a percentage requirement, this bill establishes a minimum number of direct patient care clinical hours that an approved nursing school or nursing program must meet. This bill does not require a school to track the minimum clinical hours by individual students. In addition, this bill allows theory to precede clinical practice if specified conditions are met including when an agency or facility used by an approved nursing program is no longer available or sufficient, as specified.

Issue 37: Technical Edits. As noted in the Staff Background Paper, there may be technical changes to the Nursing Practice Act that are necessary to enhance or clarify the Act or assist with consumer protection. In response, the Author has proposed amendments to this bill to: add technical changes to streamline the BRN's furnishing application process, by consolidating the process into one

application; add technical changes to delete the current floor set for a number of licensing fees, which will provide the BRN with flexibility in reducing fees if the BRN finds it necessary. The changes are not intended to alter the current fee ceilings, raise fees or lower fees in this bill; and, add technical language related to LVN to RN bridge programs.

Issue 38: Sunset Extension. The BRN appears to have made significant progress in its enforcement processes since 2015, and has completed the majority of the State Auditor's recommendations in that regard. However, that progress was undermined by the misconduct of prior BRN executives in addressing the State Auditor's recommendations. There are also a number of outstanding questions relating to the BRN's consumer services and satisfaction; license requirements, procedures, and processing timelines. Further, there are ongoing conversations around many aspects of the BRN's RN prelicensure approval process and the ongoing implementation of the recent JLAC Audit of its enrollment decision processes. This bill adds a four-year sunset extension of the BRN, until January 1, 2027, which subjects the BRN to review by the appropriate policy committees of the Legislature, and extends the BRN's authority to appoint an EO until January 1, 2027.

AB 2288 (Low, Chapter 282, Statutes of 2020) COVID-19 Flexibilities. In response to the reported loss of clinical placements during the pandemic, AB 2288 authorized the director of an approved nursing program, during a state of emergency, or until the end of the 2020–21 academic year, to make requests to the BRN for the following: (1) use a clinical setting without meeting specified requirements; (2) use preceptorships without having to maintain specified written policies; (3) use clinical simulation up to 50% for medical-surgical and geriatric courses; (4) use clinical simulation up to 75% for psychiatric-mental health nursing, obstetrics, and pediatrics courses; and (5) waive concurrency of theory and clinical by one academic term. That flexibility was further extended in the BRN's prior sunset bill, AB 1532 (Committee on Business and Professions), by one academic year. Recognizing that the flexibility has continued to benefit programs, this bill seeks to extend those provisions.

Comments

Various organizations have provided feedback to the Legislature since this bill was last heard in a policy committee in June 2022. The California Association of Private Postsecondary Schools, the Gurnick Academy, Mount Saint Mary's University, Los Angeles, and Unitek College notes their support for this bill if amended to remove the BRN's oversight of nursing school enrollments.

Further, the BRN took a support if amended position and has requested that the provisions of AB 2288 not be extended in perpetuity, that the BRN's ability to conduct up front curriculum reviews be restored, and further BRN expressed concerns with changes in the measure to the BRN's current school approval process related to accepting accreditor approvals.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, this bill will result in costs of $59.88 million to support the continued operation of the BRN's licensing and enforcement activities. The BRN estimates one-time costs of approximately $178,000 in Fiscal Year 2023-24 to establish the Nursing Education Advisory Committee and $671,000 ongoing to support case workload and maintain the committee.

SUBJECT: Speech-language pathologists, audiologists, and hearing aid dispensers

SOURCE: Author

DIGEST: This bill extends the sunset date of the Speech-Language Pathology, Audiology, and Hearing Aid Dispensers Board (Board) by four years, until January 1, 2027, and makes additional changes to the Speech-Language Pathologists and Audiologists and Hearing Aid Dispensers Licensure Act stemming from the recent sunset review oversight for the Board.

Senate Floor Amendments of 8/24/22 resolve chaptering conflicts with SB 1453 (Ochoa Bogh).

Senate Floor Amendments of 8/16/22 repeal the Hearing Aid Dispensing Committee from statute and made additional technical and clarifying changes.

ANALYSIS:

Existing law:

1) Establishes the Speech-Language Pathologists and Audiologists and Hearing Aid Dispensers Licensure Act (Act) for the purposes of regulating speech-language pathologists, audiologists, and hearing aid dispensers and establishes the Board until January 1, 2023 to administer the Act. (Business and Professions Code (BPC) §§ 2530 et seq and 2531.)

2) Establishes the Hearing Aid Dispensing Committee within the jurisdiction of the Board, and specifies that the Committee shall be comprised of two licensed audiologists; the two licensed hearing aid dispensers; one public member of the Board; and the public member of the Board who is a licensed physician and surgeon and who is board certified in otolaryngology. Requires the Committee to review and research the practice of fitting or selling hearing aids and advise the Board about this practice based on that review and research. (BPC § 2531.05)

3) Specifies that the offer, delivery, receipt, or acceptance by any person licensed under provisions of the Business and Professions Code and Chiropractic Initiative Act of any rebate, refund, commission, preference, patronage dividend, discount, or other consideration, whether in the form of money or otherwise, as compensation or inducement for referring patients, clients, or customers to any person, irrespective of any membership, proprietary interest, or coownership in or with any person to whom these patients, clients, or customers are referred is unlawful. (BPC § 650(a))

4) Authorizes the Board to refuse to issue, or issue subject to terms and conditions, a license, or may suspend, revoke, or impose terms and conditions upon the license of any licensee for specified convictions and violations of law.

5) Requires speech-language pathologists and audiologists supervising speech-language pathology or audiology aides to register with the Board the name of each aide working under their supervision. The number of aides who may be supervised by a licensee shall be determined by the Board. The supervising audiologist or speech-language pathologist shall be responsible for the extent, kind, and quality of services performed by the aide, consistent with the Board's designated standards and requirements. (BPC § 2530.6)

6) Requires an applicant seeking licensure as an audiologist to submit evidence of satisfactorily completing 12 months of required professional experience under

the direction of a Board-approved audiology doctoral program and following completion of the didactic and clinical rotation requirements of the audiology doctoral program (BPC § 2532.25(b)(2))

7) Specifies that the Board shall deem a person who holds a valid certificate of clinical competence in speech-language pathology or audiology issued by the American Speech-Language-Hearing Association's Council for Clinical Certification to have met the educational and experience requirements set forth for speech-language pathologists or audiologists. (BPC § 2532.8)

8) Specifies that the Board shall hear and decide a matter, including, but not limited to, a contested case or a petition for reinstatement or modification of probation, or may assign the matter to an administrative law judge in accordance with the Administrative Procedure Act. (BPC § 2533.5(b))

This bill:

1) Extends the Board's sunset date to January 1, 2027.

2) Specifies that a speech-language pathology and audiology aide registration shall expire every two years and is subject to renewal requirements, as specified. In order to renew registration, the supervising speech-language pathologist or audiologist shall update the Board on the duties of the aide and the training and assessment methods used to ensure the aide's competency.

3) Requires an applicant, registrant, or licensee who has an email address to provide the Board with that email address no later than July 1, 2023, and to provide to the Board any and all changes to their email address no later than 30 calendar days after the changes have occurred. Specifies that a licensee's email address shall be considered confidential and not subject to public disclosure.

4) Repeals the Hearing Aid Dispensing Committee from statute.

5) Authorizes each appointing authority to remove from office at any time any member of the Board appointed by that authority.

6) Removes the requirement that the required professional experience for an audiology license application must follow the completion of the didactic and clinical rotation requirements of the audiology doctoral program.

7) Specifies that until January 1, 2027, the Board shall deem a person who holds a valid Certificate of Clinical Competence in Speech-Language Pathology issued by the American Speech-Language-Hearing Association's Council for Clinical

Certification to have met the educational and experience requirements to be an audiologist, and a person who holds a valid Certificate of Clinical Competence in Audiology issued by the American Speech-Language-Hearing Association's Council for Clinical Certification or a valid American Board of Audiology certificate issued by the American Academy of Audiology to have met the educational and experience requirements set forth for audiologists.

8) Authorizes the Board to suspend, revoke, or impose terms and conditions upon the license of any licensee for:

   a) Engaging in any action in violation of BPC § 650;

   b) Disciplinary action taken by any public agency in any state or territory for any act substantially related to the practice of speech-language pathology, audiology, or hearing aid dispensing;

   c) Aiding or abetting any person to engage in the unlicensed practice of speech-language pathology, audiology, or hearing aid dispensing;

   d) Violating or attempting to violate, directly or indirectly, any existing laws related to speech-language pathologists, audiologists, and hearing aid dispensers.

9) Specifies that a person whose license has been revoked or suspended, or who has been placed on probation, may petition the Board for reinstatement or modification of penalty, including modification or termination of probation, after a minimum period time, as specified, has elapsed from the effective date of the decision ordering that disciplinary action. Specifies the process for a person to file this petition and the process for the petition to be heard by the Board. States that no petition shall be considered while the petitioner is under sentence for any criminal offense, as specified. Allows the Board to deny, without a hearing or argument, any such petition for termination or modification of probation filed under specified conditions.

10) Includes a section of this bill which incorporates amendments to BPC Section 2530.2 proposed by both this bill and SB 1453 (Ochoa Bogh). Specifies conditions that would enable this section to become operative to resolve chaptering conflicts with SB 1453.

11) Makes other minor technical and clarifying changes.

Background

In early 2022, the Senate Business, Professions and Economic Development Committee and the Assembly Business and Professions Committee began their comprehensive sunset review oversight of 10 regulatory entities including the Board. The Committees conducted three oversight hearings in March of this year. This bill and the accompanying sunset bills are intended to implement legislative changes as recommended by staff of the Committees and which are reflected in the Background Papers prepared by Committee staff for each agency and program reviewed this year.

The Hearing Aid Dispensers Examining Committee (HADEC) was established under the jurisdiction of the Medical Board of California (MBC) in 1970 (AB 532, Zenovich, Chapter 1514, Statutes of 1970). In 1988, legislation (SB 2250, Rosenthal, Chapter 1162, Statutes of 1988) transferred the enforcement program from MBC to HADEC. SB 1592 (Rosenthal, Chapter 441, Statutes of 1996) authorized HADEC to adopt, amend, or repeal regulations related to the practice of fitting or selling hearing aid devices.

The Speech Pathology and Audiology Examining Committee (SPAEC) was established in 1972 under the jurisdiction of the MBC (SB 796, Whetmore, Chapter 1355, Statutes of 1972). SB 1346 (Business and Professions Committee, Chapter 758, Statutes of 1997) renamed SPAEC to Speech-Language Pathology and Audiology Board.

The Board licenses and regulates more than 35,000 licensees including 19,167 active Speech-Language Pathologists, 1,747 active Audiologists, and 1,154 active Hearing Aid Dispensers, among a total of 11 separate professions. Each profession has its own scope of practice, entry-level requirements, and professional settings, with some overlap in treated pathologies and rehabilitation.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, the fiscal effect of this bill is estimated to be an annual cost of approximately $2.43 million and 12.6 positions to support the continued operation of the Board's licensing and enforcement activities.

SUPPORT: (Verified 8/23/22)

California Academy of Audiology
Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: The Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board writes in support and notes, "This bill would ensure the Board is able to continue to do its important consumer protection work until January 1, 2027, and would make a number of clarifying and technical amendments requested by the Board in its Sunset Review report. This bill would also provide the Board with authority to require applicants and licensees to provide their email address, which would allow the Board to quickly and efficiently communicate new information."

The California Academy of Audiology writes in support and notes, "The Board's professional and public members are actively engaged in their duty to ensure the highest and best practices of the professions regulated for the protection of the consumer. The Board's executive officer brings expertise, focus and a strong commitment to fulfilling the mission of the Board and providing strong support for the Board's members."

SUBJECT: COVID-19: exposure

SOURCE: Author

DIGEST: This bill 1) extends to January 1, 2024, the sunset date on COVID-19 related workplace reporting requirements and for the Division of Occupational Safety and Health's authority to disable an operation or process at a place of employment when the risk of COVID-19 infection creates an imminent hazard; 2) revises and recasts COVID-19 exposure reporting provisions to require employers to display a notice with information on confirmed COVID-19 cases at the worksite; 3) authorizes employers to post this information on an employer portal or continue to provide it in writing; and 4) strikes requirements in existing law pertaining to the reporting by employers of COVID-19 outbreaks to local public health agencies and the public posting of this information by the State Department of Public Health.

Senate Floor Amendments of 8/25/22 (1) strike the requirement that employers provide written notice to all employees when there has been an exposure to COVID-19 and instead requires employers to post the information, as specified; (2) require employers to keep a log of these postings and grant the Labor Commissioner access; (3) strike requirements in existing law pertaining to the reporting of COVID-19 outbreaks to local public health agencies and the public

posting of this information by the State Department of Public Health, as specified; and (4) strike and define relevant terms.

ANALYSIS:

Existing law:

1) Provides that, until January 1, 2023, when in the opinion of Cal/OSHA, a place of employment, operation, or process, or any part thereof, exposes workers to the risk of infection with severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) so as to constitute an imminent hazard to employees, the performance of such operation or process, or entry into such place of employment, as the case may be, may be prohibited by the division, and a notice thereof shall be provided to the employer and posted in a conspicuous place at the place of employment. (Labor Code § 6325)

2) Requires an employer that receives a notice of potential exposure to COVID-19 to take a number of actions within one business day of the potential exposure, including, but not limited to:

    a) Provide a written notice to all employees, as specified, who were on the premises at the same worksite as the qualifying individual within the infectious period that they may have been exposed to COVID-19.

    b) Provide a written notice to the exclusive representative, if any, of the employees in a).

    c) Provide all employees who may have been exposed and the exclusive representative, if any, with information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws. (Labor Code §6409.6)

3) Requires employers who are notified of the number of COVID-19 cases that meet the definition of an outbreak, as defined, to notify the local public health agency in the jurisdiction of the worksite of the names, number, occupation, and worksite of the employees, as specified. (Labor Code §6409.6)

4) Requires the California Department of Public Health, until January 1, 2023, to make workplace industry information received from local public health departments pursuant to employer COVID-19 reporting requirements on its internet website in a manner that allows the public to track the number and frequency of COVID-19 outbreaks and the number of COVID-19 cases and outbreaks by industry reported by any workplace. (Labor Code §6409.6)

This bill:

1) Extends to January 1, 2024, the sunset date for COVID-19 related workplace reporting requirements and for Cal/OSHA's authority to disable an operation or process at a place of employment when the risk of COVID-19 infection creates an imminent hazard.

2) Strikes provisions in existing law that require employers to notify employees in writing when they have been exposed to COVID-19 and instead requires employers to prominently display a notice (in each worksite) in all places where notices to employees concerning workplace rules or regulations are customarily posted stating all of the following:

    a) The dates on which an employee, or employee of a subcontracted employer, with a confirmed case of COVID-19 was on the worksite premises within the infectious period.
    b) The location of the exposures, including the department, floor, building, or other area, but the location need not be so specific as to allow individual workers to be identified.
    c) Contact information for employees to receive information regarding COVID-19 related benefits, per existing law.

3) Requires that the notice described above be posted within one business day from when the employer receives a notice of potential exposure, remain posted for not less than 15 calendar days, and requires that it be in English and the language understood by the majority of employees.

4) Authorizes employers to satisfy this posting requirement by posting the notice in existing employee portals where the employer posts other workplace notices.

5) Authorizes employers, as an alternative to the worksite posting, to provide written notice to all employees, and the employers of subcontracted employees, who were on the premises of their potential exposure in a manner the employer normally uses to communicate employment-related information including, but is not limited to, personal service, email or text message, as specified.

6) Requires employers to keep a log of all the dates the required notice was posted at each worksite of the employer, and shall allow the Labor Commissioner access to these records, per existing law.

7) Limits the required employer notification to the exclusive representative of an employee, if any, to only notifying them of confirmed cases of COVID-19.

8) Strikes existing law references to and definition for "qualifying individuals" and specifies that the exposure notification and other employer requirements apply to confirmed cases of COVID-19.

9) Strikes the current definition of "close contact" and instead defines it as an individual who has been in close contact with a confirmed case of COVID-19, as defined by the Division of Occupational Safety and Health.

10) Provides a definition for "confirmed case of COVID-19," as specified, strikes the term "high-risk exposure period," and modifies the definition of "notice of potential exposure" to be consistent with the focus on confirmed cases of COVID-19.

11) Strikes the requirement in existing law that an employer (and relevant exemptions) notify the local public health agency in the jurisdiction of the worksite when they are notified of the number of cases that meet the definition of a COVID-19 outbreak, as defined.

12) Strikes provisions in existing law requiring the State Department of Public Health to make workplace industry information received from local public health department available on its internet website in a manner that allows the public to track the number and frequency of COVID-19 outbreaks and the number of COVID-19 cases and outbreaks by industry, as specified.

Background

In 2020, AB 685 (Reyes, Chapter 84, Statutes of 2020) was enacted to provide guidelines and requirements around workplace COVID-19 exposure reporting. AB 685 sought to improve our understanding of the disease's transmission and prevalence in the workplace. The bill required employers to provide specified notices to employees and others if an employee is exposed to COVID-19. It was also a response to documented underreporting of COVID-19 cases across many industries. With Cal/OSHA relying on employers to self-report workplace infections, this led to incomplete data about COVID-19 outbreaks putting workers and ultimately their families at risk. AB 685 provided a mechanism for the Department of Public Health to collect and publish COVID-19 outbreaks by workplace industry.

In 2021, AB 654 (Reyes, Chapter 522, Statutes of 2021), among other things, clarified provisions enacted under AB 685 and added a January 1, 2023 sunset date on the COVID-19 notice of exposure provisions.

Comments

Need for this bill? According to the author, "We have seen just how rapidly COVID-19 infections spread in California's workplaces and how workers paid the price for these outbreaks with their health and lives. The least we can do to be prepared for future variants and as we move to an endemic strategy is to continue tracking COVID-19 cases in the workplace. With infections and deaths disproportionately high in the Latino, Black, and Asian Pacific Islander communities, more information about workplace illness and industry clusters can inform policy makers in addressing healthcare disparities and protecting vulnerable workers. We must be prepared to react immediately to future variants of COVID-19. This bill will aid in stopping the spread of future variants and informing workers of workplace exposures so they can protect themselves and their families by extending the sunset on workplace reporting and notification of COVID-19 cases."

ARGUMENTS IN SUPPORT: According to the United Food and Commercial Workers, Western States Council, "California is moving towards a new phase in the COVID-19 fight that places testing, vaccination and support front and center. AB 685's (Reyes, 2020) tracking gives the state key data so we can focus our resources efficiently and effectively. AB 2693 will ensure these protections are kept in place as COVID-19 sadly continues to ravage our state. The next COVID-19 variant can show up any time and we can't wait for the legislature to act or go

through the legislative process every time a new variant arises. We must be prepared to react immediately to stop the spread, and extending the sunset on workplace tracking of COVID-19 cases is critical to doing that."

ARGUMENTS IN OPPOSITION: A coalition of employers are opposed and write, "Thankfully, we are in a different world from the one where these notice requirements were put into place. The vast majority of people in California are vaccinated – and those who are not mostly remain that way by choice. Test availability has improved considerably. Case rates are low – despite the economy re-opening and in-person schooling recommencing. They conclude by stating that, "To be clear: we do not oppose notification of close contacts. However, workplace-wide notices no longer serve the purposes they did early in the pandemic. A COVID-19 case is no longer the same risk it once was due to increased vaccination and immunity in the population. Extending emergency-level notice until 2025 just doesn't make sense."

SUBJECT: Medi-Cal: community health worker services

SOURCE: California Pan-Ethnic Health Network
Latino Coalition for a Healthy California

DIGEST: This bill codifies the requirement that community health worker (CHW) services be a covered Medi-Cal benefit. Requires Medi-Cal managed care (MCMC) plans to engage in outreach and education efforts to enrollees, as determined by the Department of Health Care Services (DHCS), that would Includes specified information to enrollees on what the CHW services are and how to find a CHW. Requires DHCS to inform stakeholders about, and accept input from stakeholders on, implementation of the CHW services benefit.

Senate Floor Amendments of 8/25/22 avoid duplication with language relating to CHWs passed in this year's health trailer bill SB 184 (Committee on Budget and Fiscal Review, Chapter 47, Statutes of 2022) as well as incorporate technical assistance from the Department of Health Care Services (DHCS) that would give DHCS more flexibility in implementation. The amendments also remove

requirements for an evaluation of the implementation of the CHW benefit and pare down provisions requiring that Medi-Cal providers be notified of the CHW benefit.

ANALYSIS: Existing federal law authorizes federal financial participation in the Medicaid program for diagnostic, screening, preventive, and rehabilitative services, including any clinical preventive services that are assigned a grade A or B by the United States Preventive Services Task Force and any medical or remedial services (provided in a facility, a home, or other setting) recommended by a physician or other licensed practitioner of the healing arts within the scope of their practice under state law. [42 U.S.C. §1396d]

Existing state law:

1) Establishes the Medi-Cal program, administered by DHCS, under which low-income individuals are eligible for medical coverage. [WIC §14000, et seq.]

2) Establishes a schedule of benefits under the Medi-Cal program, which includes benefits required under federal law and benefits provided at state option but for which federal financial participation is available. [WIC §14132]

3) Defines CHW as means a liaison, link, or intermediary between health and social services and the community to facilitate access to services and to improve the access and cultural competence of service delivery. States that CHWs include Promotores, Promotores de Salud, Community Health Representatives, navigators, and other nonlicensed health workers, including violence prevention professionals. Requires a CHWs lived experience to align with and provide a connection to the community being served. [WIC § 18998]

4) Requires DHCS to develop statewide requirements for CHW certificate programs in consultation with stakeholders. [WIC § 18998.1]

5) Authorizes DHCS to collect workforce data on CHWs from individuals who have enrolled in or completed CHW certificate programs. [WIC § 18998.3]

This bill:

1) Codifies CHW services as a Medi-Cal covered benefit. Defines CHW as in existing state law.

2) Requires MCMC plans to develop outreach and education efforts to notify their enrollees about the CHW/P benefit that meets cultural and linguistic appropriateness standards, as set forth by DHCS. At a minimum, MCMC plans shall provide the following information to enrollees:

a) A description of the CHW/P benefit including eligibility and coverage criteria;

b) A list of providers that are authorized to refer individuals to CHW/P services, and an explanation of how to request a referral;

c) A list of contracted CHW/P entities, including community-based organizations, clinics, local health jurisdictions, licensed providers, or hospitals available to provide these services, updated at least annually; and,

d) An email address, internet website, and telephone number for enrollees to call to request additional information.

3) Requires MCMC plans to notify providers about the CHW services benefit, in the manner required by DHCS.

4) Requires DHCS to inform stakeholders about, and accept input from stakeholders on, implementation of the CHW services benefit through existing and regular stakeholder processes.

5) Conditions implementation of this bill on receipt of federal approval and federal financial participation.

6) Authorizes DHCS to implement this bill via policy letters or similar without taking further regulatory action.

7) Makes legislative findings that CHW/Ps are critically important in informing communities of color, persons of limited English proficiency, and immigrants about services to prevent disease, disability, and other health conditions or their progression, prolong life, and promote physical and behavioral health and efficiency, and are crucial to providing access to safety net services that are available to communities with the goal of reducing health disparities and improving health outcomes. Also states that CHW/Ps are trusted members of their communities who have personal experience with a health condition, lived experience, and shared language and cultural background, and who help to address chronic conditions, preventive health care needs, and health-related social needs within their communities.

Comments

1) *Author's statement.* According to the author, because both CHWs and promotores usually share ethnicity, language, socioeconomic status, and life

experiences with the community members they serve, it is vital we that continue to provide them with the proper tools and reimbursements. Additionally, since they typically reside in the community they serve, they have the unique ability to bring information where it is needed most, specifically to where patients live, eat, play, work, and worship. This bill will address California's shortage of healthcare workers and growing health needs and disparities for the state's communities of color by supporting the CHW benefit, an equity driven strategy in Medi-Cal.

2) *Federal preventive services rule change.* The ACA changed federal Medicaid law to encourage the provision of preventive care in several respects. One of those changes allows preventive services to be provided by non-licensed individuals under the supervision of a licensed health care provider. Previously, Medicaid regulations limited coverage of preventive services to services that were directly provided by physician or other licensed practitioner. As of January 2014, Medicaid may reimburse for preventive services delivered by a non-licensed health care professional, such as a community health worker, when the service is recommended by a physician or other licensed provider within their scope of practice under state law. The rule change did not make changes to what services may be provided. The services must still be medical or remedial in nature; involve direct patient care; and, be for the express purpose of diagnosing, treating, or preventing illness, injury, or other impairments to an individual's physical or mental health.

3) *Addition of CHWs as a Medi-Cal benefit.* The 2021-2022 Budget Act added CHWs to the class of skilled and trained individuals who are able to provide clinically appropriate Medi-Cal covered benefits and services using the federal preventive services option. CHWs were not initially added to the existing statutory list of Medi-Cal benefits and providers, but were added administratively with funding through the Medi-Cal budget. The CHW benefit was originally set for January 1, 2022 but was delayed until July 1, 2022.

   SB 184 (Committee on Budget and Fiscal Review, Chapter 47, Statutes of 2022) provided additional detail on the definition, requirements, and training of CHWs. CHWs are defined a liaison, link, or intermediary between health and social services and the community to facilitate access to services and to improve the access and cultural competence of service delivery. A CHW is a frontline health worker either trusted by, or who has a close understanding of, the community served. SB 184 outlines the process by which DHCS will create a certification program for CHWs and organizations can provide certification training.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, an unknown General Fund impact to Medi-Cal health care expenditures, likely not significant, since funding for CHW services is included in the Medi-Cal budget.

OPPOSITION: (Verified 8/11/22)

None received

ARGUMENTS IN SUPPORT: This bill is supported by a broad number of community based organizations, health advocacy organizations, and providers, among others. Co-sponsor California Pan-Ethnic Health Network writes that CHWs are an evidence-based equity driven response to the number of growing health disparities for Black, Indigenous, Communities of Color and other historically excluded groups. CHWs unique connection to the communities they serve have made them effective in supporting the state's COVID-19 response, improving chronic conditions and mental health outcomes, and increasing utilization of both health care and vital social safety net programs, such as housing and nutrition. More recently, California is joining other states in uplifting the critical role CHWs play by investing in statewide models for CHWs services and through proposals that seek to recruit nearly 25,000 CHWs across the state by 2025. Co-sponsor Latino Coalition for a Healthy California writes that the effort to increase access to CHWs is a critical first step and this bill will establish the stable foundation for future undertakings that seek to further the role CHWs play in the lives of everyday Californians. This bill will help to ensure an inclusive, community-driven approach to implementation of this new Medi-Cal benefit.

SUBJECT: Transportation electrification: electrical distribution grid upgrades

SOURCE: Natural Resources Defense Council

DIGEST: This bill requires the California Energy Commission (CEC) to gather and report fleet data needed to support utilities' plans for grid reliability and enhanced vehicle electrification. This bill also requires utilities to report how distribution investments made pursuant to this bill support climate goals as part of specified filings with the CEC and California Public Utilities Commission (CPUC).

ANALYSIS:

Existing law:

1) Requires the CPUC to direct investor-owned utilities (IOUs) to file applications for investments to accelerate transportation electrification, reduce reliance on petroleum, and meet certain climate goals. The CPUC may approve or amend applications for transportation electrification investments. IOUs are authorized to recover reasonable costs for approved investments from ratepayers if they are consistent with certain requirements. (Public Utilities Code §740.12(b))

2) Requires the CPUC to review data related to current and future transportation electrification adoption and charging infrastructure prior to allowing an IOU to collect new program costs from ratepayers. (Public Utilities Code §740.12(c))

3) Requires each publicly owned utility (POU) with an annual electrical demand exceeding 700 gigawatt hours to adopt an integrated resources plans (IRP) that helps ensure that the POU will meet climate goals for the electricity sector. An IRP must be updated at least once every five years and must address procurement plans for the following:

   a) Energy efficiency and demand response resources,

   b) Energy storage requirements,

   c) Transportation electrification,

   d) A diversified energy resource procurement portfolio, and

   e) Resource adequacy requirements. (Public Utilities Code §9621)

4) Requires the CPUC to establish EV-grid integration strategies for certain load-serving entities (LSEs). POUs must consider EV-grid integration strategies in their IRPs and community choice aggregators (CCA) must report specified information to the CPUC regarding EV-grid integration activities. (Public Utilities Code §740.16)

5) Requires the CEC to assess whether charging station infrastructure is disproportionately deployed by population density, geographical area, or population income level, including low-, middle-, and high-income levels. To the extent that the CEC finds that charging infrastructure in inequitably distributed, the CEC must target Clean Transportation Program (CTP) funding opportunities to address identified disparities. (Public Resources Code §25231)

6) Requires the CEC to conduct a statewide assessment every two years of EV charging infrastructure needed to support the levels of EV adoption required for the state to meet its goals of putting at least five million zero-emission vehicles (ZEVs) on California roads by 2030, and of reducing emissions of greenhouse gases (GHG) to 40 percent below 1990 levels by 2030. (Public Resources Code §25229)

7) Requires the CEC to adopt an Integrated Energy Policy Report (IEPR) every two years, with updates every other year, to report on specified major energy trends facing the state. Existing law specifies the contents the IEPR must contain, including but not limited to, supply, demand, pricing, reliability, efficiency, and impacts on public health and safety, the economy, resources, and the environment. (Public Resources Code §25300 et. seq.)

This bill:

1) Requires the CEC to annually collect data from state agencies, including the California Air Resources Board (CARB) and the Department of Motor Vehicles (DMV) on the deployment of medium and heavy-duty fleets subject to CARB regulations. This data must include at least the following:

   a) The vehicle or equipment fleet size and fuel type, including battery electric, hybrid, or fuel cell.

   b) The fleet address.

   c) Information that would allow the electrical corporation or POU to estimate the total anticipated charging capacity at each fleet location.

2) Requires the CEC to enter into data sharing agreements as necessary to support the data collection required by this bill.

3) Requires the CEC to share fleet data gathered pursuant to this bill with electrical corporations and POUs to help inform electrical grid planning efforts.

4) Prohibits utilities from disclosing confidential customer data as part of this bill's data sharing requirements.

5) Specifies that the CEC's data collection under this bill is not intended to create any new or duplicate reporting requirements for fleet operators.

6) Requires each electrical corporation and POU to consider the fleet data provided by the CEC during their distribution planning processes to support the

level of electric vehicle charging anticipated in their respective service territories.

7) Requires electrical corporations to identify how investments made pursuant to this bill support specified climate and EV deployment goals as part of their general rate cases.

8) Requires POUs to identify how investments made pursuant to this bill support specified climate and EV deployment goals as part of their integrated resource plans.

Background

Recent policies have accelerated the state's ZEV deployment goals. Prior legislation (AB 2127, Ting, Chapter 365, Statutes of 2018) codified the goal of putting at least five million ZEVs on state roads and reducing GHG emissions to 40 percent below 1990 levels by 2030. In 2018, Executive Order B-48-18 established a goal of installing 200 hydrogen-fueling stations and 250,000 battery-electric vehicle chargers, including 10,000 direct-current fast chargers, by 2025. In 2020, Executive Order N-79-20 established a goal that 100 percent of in-state sales of new passenger cars and trucks will be zero-emission by 2035 and 100 percent of medium- and heavy-duty vehicles in the state will be zero-emission by 2045 where feasible. In response to Executive Order N-79-20, CARB is in the process of adopting the Advanced Clean Fleets rules to establish regulations for medium and heavy-duty zero-emission fleets, encouraging ZEV deployment in the medium and heavy-duty transportation sector.

Bill encourages distribution upgrades to accommodate accelerated transportation electrification. This bill requires the CEC to gather and share information regarding fleets to electric utilities to help utilities plan distribution upgrades to accommodate more EV load demands. Recent assessments show that accelerated EV deployment will require grid upgrades and better charging integration. In addition to codifying ZEV deployment goals, AB 2127 also required the CEC to conduct a biennial assessment of the EV infrastructure needed to meet state EV deployment goals. In its 2021 assessment, the CEC noted that the EV make ready and distribution infrastructure planning for accelerated EV deployment required special attention due to the unpredictable nature of the time and costs required for this infrastructure. The CEC's assessment noted that the deployment of EV fleets under CARB's Advanced Clean Fleets rule may pose specific challenges for distribution infrastructure due to significant electrical load fluctuation from many large vehicles charging at certain times. The CEC's assessment states:

> Moreover, as medium- and heavy-duty electrification progresses (especially with CARB's new Advanced Clean Trucks and Innovative Clean Transit rules), existing make-ready infrastructure may need to serve higher-than-anticipated levels of charging load. Preliminary research suggests that most electric utilities in California have enough capacity in urban areas along the Interstate 5 corridor to support new medium-duty vehicle charging, but many rural areas and most heavy-duty charging stations will require local distribution grid upgrades, often including dedicated substations.

While the CEC may obtain limited data on future fleet EV adoption plans, the CEC already receives data regarding operational EV deployment. The CEC incorporates this data along with other data sources to create projections of EV infrastructure needs in statewide assessments and databases showing geographic-specific needs. The CEC is currently using CTP funds to develop the HEVI-Pro tool with Lawrence Berkeley National Labs (LBNL). The HEVI-Pro tool is intended to help identify charging needs for medium and heavy-duty EV deployment. Both EVI-Pro and HEVI-Pro are data sources that the CEC uses to target EV infrastructure based on vehicle deployment while minimizing impacts to the electrical grid and identifying distribution needs.

Bill requires utilities to specify how investments are linked to goals. IOUs are already making significant transportation electrification investments. As of October 2021, the CPUC authorized over $1.8 billion in ratepayer-funded transportation electrification investments. While the majority of transportation electrification investments may be identified in integrated resource plans (IRPs), distribution investments provide broader benefits. As a result, ratepayer investments from distribution plans are frequently approved as part of IOU general rate cases. This bill requires IOUs to identify how distribution investments made under this bill will support relevant EV deployment and climate policies in their rate case proceedings. Under existing law, POUs also make transportation electrification investments. POUs identify these investments in their IRPs, which are reviewed by the CEC. This bill requires POUs to specify how their investments under this bill will support relevant EV deployment and climate goals during the IRP process. By requiring utilities to specify investments in reports regularly submitted to the CPUC and CEC, this bill ensures that these oversight agencies can track the extent to which investments are adequately supporting state goals and ratepayer needs.

Related/Prior Legislation

SB 676 (Bradford, Chapter 484, Statutes of 2019) required the CPUC to establish EV-grid integration strategies for certain LSEs. The bill also required POUs to consider EV-grid integration strategies in their IRPs and required CCAs to report specified information to the CPUC regarding EV-grid integration activities.

SB 1000 (Lara, Chapter 368, Statutes of 2018) required the CEC to assess whether charging station infrastructure is disproportionately deployed by population density, geographical area, or population income level, including low-, middle-, and high-income levels. The bill also required the CEC to target CTP funds address inequities found by the CEC regarding equitable distribution of EV infrastructure.

AB 2127 (Ting, Chapter 365, Statutes of 2018) required the CEC to conduct a statewide assessment every two years of EV charging infrastructure needed to support the levels of EV adoption required for the state to meet its goals of putting at least five million ZEVs on California roads by 2030, and of reducing GHG emissions to 40 percent below 1990 levels by 2030.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CARB estimates ongoing costs of $850,500 in 2024-25 and $655,000 annually thereafter (Greenhouse Gas Reduction Fund) to collect and provide specified data.

- CEC estimates ongoing costs of $550,000 annually (Energy Resources Program Account [ERPA] or other fund) to develop and maintain a data system, gather data, and regularly conduct analysis.

- CPUC estimates ongoing costs of about $300,000 annually (ratepayer funds) for data warehousing services. CPUC estimates that costs associated with collaborating with the CEC and CARB on data collection as well as reviewing how the utilities utilize the data in their distribution planning process and in their General Rate Cases would be minor and absorbable.

- To the extent that this bill encourages utilities to make ratepayer-funded distribution investments in infrastructure that otherwise would not have occurred, unknown costs to the state as an electrical utility ratepayer (various funds). The State of California is an electrical customer, purchasing roughly one percent of the state's electricity. As such, the state incurs costs when electricity

rates increase. This bill could possibly result in increased rates from the recovery of any additional costs for distribution infrastructure. Staff notes that if fleet and EV deployment policies do not match actual EV adoption trends, it is possible that this bill could inadvertently lead to higher ratepayer costs without a commensurate ratepayer benefit. .

ARGUMENTS IN SUPPORT: According to the author, "California leads the nation in setting and maintaining air quality and emissions standards. However, the transportation sector remains the primary driver of pollution and greenhouse gas (GHG) emissions in the state. Transitioning to zero-emission vehicles (ZEVs) is critical to protect public health and stem the effects of climate change, but it will put new demands on California's electrical grid. AB 2700 is a common-sense step that aligns California's grid planning efforts with the state's ZEV, air quality, and climate goals."

SUBJECT: Juvenile records access

SOURCE: Author

DIGEST: This bill clarifies that the California Department of Social Services (CDSS) can view a juvenile court record without a court order when representing a child in an action to vacate an order of adoption.

Senate Floor Amendments of 8/24/22 change references to a child who is "considered unadoptable" to a child for whom "a plan of adoption is not currently suitable," in response to feedback from CDSS; and incorporate text from SB 1071 (Umberg, 2022) to avoid a chaptering conflict in Welfare and Institutions Code section 827.

ANALYSIS:

Existing law:

1) Authorizes an unmarried minor to be adopted by an adult as provided. (Fam. Code, div. 13, pt. 2, §§ 8600 et seq.)

2) Authorizes an adoptive parent, within five years of the entry of an order of adoption, to file a petition to vacate the order of adoption if the child shows evidence of a developmental disability or mental illness as a result of conditions existing before the adoption but of which the adoptive parent had no knowledge or notice before the entry of the order of adoption, and if the extent of the disability or mental illness is severe enough that the child cannot be relinquished to an adoption agency on the grounds that the child is considered unadoptable. (Fam. Code, § 9100(a), (b).)

3) Requires the clerk of the court in which a petition in 2) was filed to immediately notify CDSS upon the filing the petition, and requires CDSS to file a full report with the court and appear before the court for the purpose of representing the adopted child. (Fam. Code, §§ 9100(c), 9102.)

4) Provides that the court may make an order setting aside the order of adoption pursuant to 2) if the facts set forth in the petition are proved to the satisfaction of the court. (Fam. Code, § 9100(a).)

5) Requires, where an order of adoption is set aside, the court making the order to direct the district attorney, county counsel, and county welfare department to take appropriate action, and authorizes the court to make any order relative to the care, custody, or confinement of the child pending the proceeding as the court sees fit. (Fam. Code, § 9101.)

6) Authorizes a tribal customary adoptive parent, within five years of the issuance of a tribal customary adoption order, to file a petition to vacate the order of adoption if the child shows evidence of a developmental disability or mental illness as a result of conditions existing before the adoption but of which the tribal customary adoptive parent had no knowledge or notice before the entry of the order of adoption, and if the extent of the disability or mental illness is severe enough that the child cannot be relinquished to an adoption agency on the grounds that the child is considered unadoptable. (Welf. & Inst. Code, § 366.26(e)(3).)

7) Requires the clerk to immediately notify CDSS upon the filing of a petition in 6), and requires CDSS to file a full report with the court and appear before the

court for the purpose of representing the adopted child. The court's ruling must take into consideration the best interests of the child. (Welf. & Inst. Code, § 366.26(e)(3).)

8) Provides that the court may make an order setting aside the tribal customary adoption order pursuant to 6) if the facts set forth in the petition are proved to the satisfaction of the court. (Welf. & Inst. Code, § 366.26(e)(3).)

9) Requires, where a final decree of tribal customary adoption has been set aside or vacated, the child to be returned to the custody of the county in which the proceeding for tribal customary adoption was finalized and for the final disposition of the child to be determined in consultation with the child's tribe. (Welf. & Inst. Code, § 366.26(e)(3).)

10) Establishes the juvenile court, which, among other things, has jurisdiction over minors who have been removed from their parents' care and is tasked with securing for such minors custody and care. (Welf. & Inst. Code, § 202.)

11) Requires that the juvenile court's findings in a juvenile case be entered in the form of a written record known as the "juvenile court record." (Welf. & Inst. Code, § 825.)

12) Defines the "juvenile case file" as a petition filed in a juvenile court proceeding, reports of the probation officer, and all other documents filed in that case or made available to the probation officer, judge, referee, or other hearing officer and thereafter retained. (Welf. & Inst. Code, § 827(e).)

13) Provides that, unless a person is authorized to inspect a juvenile case file without a court order, the person seeking access to a juvenile case file must petition the juvenile court for the information. The court must afford due process to all interested parties before releasing a juvenile case file, including notice and an opportunity to file an objection. (Welf. & Inst. Code, § 827(a)(3).)

14) Provides a statutory list of persons and agencies authorized to inspect a juvenile case file without a court order, including CDSS in connection with certain proceedings and duties. (Welf. & Inst. Code, § 827.)

15) Prohibits an agency or a person authorized to receive a juvenile case file from disseminating the file or information relating to its content to persons not authorized to receive the information without prior approval of the presiding judge of the juvenile court, unless it is used in connection with and in the course of a criminal investigation or a proceeding brought to declare a person a

dependent child or ward of the juvenile court. (Welf. & Inst. Code, § 827(a)(4).)

This bill:

1) Replaces, in Welfare and Institutions Code section 9100, the phrase "the child is considered unadoptable" to "a plan of adoption is not currently suitable".

2) Specifies that, when a court clerk notifies CDSS that a petition to vacate an adoption or tribal customary adoption has been filed, CDSS may inspect and copy an adoption case file, including a juvenile case file, for the purpose of completing its duties of filing a report with the court and representing the adopted child.

3) Adds, to the list of entities and individuals authorized to view a juvenile case file, CDSS personnel, for the purpose of carrying out the department's duties under 1).

4) Provides that CDSS personnel may also make copies of a juvenile case file to carry out the department's duties under 1).

5) Includes chaptering-out amendments to avoid a chaptering conflict with SB 1071 (Umberg, 2022).

Comments

Author Comments. AB 2711 clarifies existing law to ensure that the California Department of Social Services is able to carry out their statutorily required duties related to adoption set asides. Even though the Department must participate in the adoption set aside process, they are not explicitly allowed to inspect or copy case files that are needed to fulfill their tasks, which has resulted in some instances of case files not being provided to the Department. This bill removes any ambiguity related to this issue.

SUBJECT: Horse racing: Breeders' Cup World Championship

SOURCE: Author

DIGEST: This bill requires specified funds be made available to a thoroughbred racing association hosting the Breeders' Cup World Championship Series (Breeders' Cup), as specified.

ANALYSIS:

Existing law:

1) Provides, pursuant to Article IV, Section 19(b) of the Constitution of the State of California, that the Legislature may provide for the regulation of horse races and horse race meetings and wagering on the results.

2) Grants the California Horse Racing Board (CHRB) the authority to regulate the various forms of horse racing authorized in this state.

3) Requires, for every year that the Breeders' Cup series in conducted at a race meeting in California, that specified amounts that would have otherwise been

distributed to a purse account be made available to the organization operating the series for the purpose of promoting and supporting the Breeders' Cup.

4) Requires the thoroughbred racing association hosting the Breeders' Cup to enter into a written agreement, in consultation and cooperation with the California Tourism Commission and a specified statewide marketing organization, with the organization that operates the Breeders' Cup regarding the manner in which funds set aside to support and promote the Breeders' Cup are to be expended.

This bill:

1) Requires that specified funds additionally be made available to the thoroughbred racing association hosting the Breeders' Cup as well as the organization operating the series.

2) Deletes existing requirement for participation of a specified statewide marketing organization in an agreement, as specified.

Background

Purpose of the bill. According to the author's office, "existing law requires a thoroughbred racing association hosting the Breeders' Cup to set-aside and make available certain monies generated from the handle on days during which Breeders' Cup races are run in California to promote and support the two-day series, including the payment of purses in Breeders' Cup Championship races. The redirection has proven to be an extreme success to help showcase the prestigious event."

Further, the author's office states that, "this bill would further clarify who the participants shall be in the allocation of the set aside funds to support the Breeders' Cup World Championship when the event is held in California. Specifically, it removes the requirement for participation by the presently defunct statewide marketing organization as to the manner in which the set aside funds are allocated. AB 2736 is intended to help California attract the world's best horses, trainers and owners to participate in the Breeders' Cup World Championships and make California an attractive site for future editions of the richest two-days in horse racing."

The Breeders' Cup World Championship. The Breeders' Cup has established itself as the season-ending championship of Thoroughbred racing. Since the inaugural

races in 1984, the Breeders' Cup has grown from a seven-race, $10 million one-day in purses and awards, to a 14-race, $31 million two-day event which attracts the best horses, trainers, and jockeys from across the globe.
The purses for the races are funded by worldwide nomination fees from the industry's Thoroughbred breeders. In addition, horses are able to earn automatic starting positions into championship races through the Breeders' Cup Challenge, a series of stakes races held around the world. The winning Thoroughbred race horses of these races earn an automatic bid to the Breeders' Cup World Championships.

In 2021, the 38th edition of the Breeders' Cup was held on Friday, November 5, and Saturday, November 6, at the seaside Del Mar racetrack in southern California. The marquee $6 million Breeders' Cup Classic was broadcast in prime time on the East Coast. Last year's event was the second time that Del Mar racetrack was selected to host the event. Total all-sources common-pool handle for the two-day Breeders' Cup World Championships at Del Mar was $182,908,409, a new record for the two-day event. On-track attendance for the two days was 47,089. Due to precautions related to COVID-19, Breeders' Cup and Del Mar reduced ticket capacity for the 2021 event.

The Breeders' Cup World Championships has been staged at 12 different race tracks, including Woodbine Racetrack in Toronto, Canada. The most recent venues have been Santa Anita, Del Mar and Keeneland in Kentucky.

The first ever Breeders' Cup was held at the former Hollywood Park racetrack in 1984 and since then California has played an important role in establishing the Breeders' Cup World Championships as the culmination of the thoroughbred-racing season and the multi-million dollar world renowned event it is today. The two-day event generates significant revenue and tourism for the host state.

The Breeders' Cup Board of Directors directs the affairs of Breeders' Cup Limited, a 501(c)(6) organization. There are 13 Directors on the Breeders' Cup Board. Directors are elected by the Breeders' Cup Members, a body of 48 individuals, 39 of whom are elected by the Breeders' Cup nominators.

Related/Prior Legislation

SB 1403 (Jones, 2022) authorizes a thoroughbred racing association or fair to accept wagers on out-of-country races up to 6:30 p.m., Pacific Standard Time, on the first Saturday in November, as specified. (Pending on the Assembly Floor)

AB 2012 (Aguiar-Curry, 2022) adds the Metro Pace to the list races that a California harness racing association can accept wagers on, as specified. (Pending on the Senate Floor)

AB 2812 (Bigelow, 2022) clarifies that "live" includes "live in-state" races as part of an organization's racing program, as specified. (On the Senate Inactive File)

AB 2969 (Governmental Organization, 2022) exempts the Blue Grass Stakes from the 50-per-day imported race limitation, as specified. (Pending on the Senate Floor)

SUBJECT: Driving privilege: suspension

SOURCE: Prosecutors Alliance California

DIGEST: This bill lowers the penalties for driving without a license and removes the ability for a court to suspend a person's driver's license for failure to appear.

Senate Floor Amendments of 8/22/22 (1) remove the delayed implementation for portions of the bill that do not directly impact the Department of Motor Vehicles (DMV), and (2) clarify all failure to appear driver's license suspensions in effect on January 1, 2027, be terminated, and provisions to have DMV remove suspensions from a person's record.

ANALYSIS:

Existing law:

1) Requires a driver's license (DL) to drive on public roads.

2) Makes it a misdemeanor or an infraction to drive without a DL.

3) Makes it an infraction for a driver to fail to provide a DL to a peace officer when stopped while driving.

4) Requires law enforcement to issue a correction violation for failing to have a DL if charged with an infraction.

5) Makes it a crime to willfully fail to appear in court. If the underlying offense was a misdemeanor or an infraction, the failure to appear is a misdemeanor with a six month jail sentence and a potential $300 civil assessment fine.

This bill:

1) Provides that the first and second offense for driving without a license shall be an infraction with a $100 fine unless the person has prior, safety-related suspensions or revocations on their license.

2) Provides that the Department of Motor Vehicles (DMV) shall not suspend a driver's license for a person failing to appear. Maintains suspensions issued prior to January 1, 2027, at which time any suspensions pending will be terminated and removed from a driver's' record.

3) Repeals the requirement for courts to notify DMV of a violation of a written promise to appear or a lawfully granted continuance of their promise to appear in court.

4) Delays implementation for DMV-related provisions until January 1, 2027.

Comments

1) *Purpose*. According to the author, "California law currently allows driving without possession of a license to be punished as a misdemeanor, even though it is a technical violation and not connected to unsafe driving. Meanwhile, driving-related offenses that carry risk of serious harm to others– such as speeding or unsafe lane changes – can be punished only as infractions. This distinction is significant: People convicted of misdemeanors can face jail time and significant fines, while infractions carry only fines and are not criminal convictions. These more serious sanctions are not only disproportionate with the severity of the offense but also fall disproportionately on low-income people."

2) *Overview*. California law defines a misdemeanor as a crime for which the maximum sentence is no more than one year in jail and can carry a fine of up to $1,000. In contrast, an infraction is considered a lesser violation of the law wherein courts cannot impose jail time for an infraction but can impose a fine of up to $250. California also permits some crimes to be charged as a misdemeanor or a felony, or a misdemeanor or an infraction, these crimes are commonly known as "wobblers."

   Under existing law, it is a misdemeanor or an infraction to drive without a license. If the crime is charged as an infraction, the offense carries a $400 ticket. However, law enforcement officers are required to offer a correction violation to individuals if they are charged with an infraction for driving without a license, unless the driver refused to correct the violation. Under a correction violation, an individual can pay $25 and show proof that they have a valid DL.

   This bill specifies that the first two offenses for driving without a license may be charged as an infraction (only) unless the defendant has had a prior lapsed suspension for safety related reasons, including reckless driving, driving under the influence, or vehicular manslaughter. Because this bill allows the first two offenses to be charged as an infraction, the drivers will be eligible for a fix-it ticket of $25, far less than the $400 penalty they may face if they fail to get a driver's license after the offense.

3) *Recommendation of the Committee on Revision of the Penal Code*. In 2020, the Committee on Revision of the Penal Code released its annual report, which included a recommendation to eliminate incarceration and reduce fines for certain traffic offenses, including failure to appear.[1] A person can be convicted of a misdemeanor and incarcerated for driving without a license or driving with a license suspended for failure to pay a fine or appear in court. The Committee noted that these offenses are primarily financial in nature, not connected to unsafe driving. These violations can also result in other consequences, including serving as the basis for arrest or vehicle impounding. The Committee recommended reducing the punishment for the offenses of driving without a license and driving with a license suspended for failure to pay a fine or appear in court from a misdemeanor to an infraction. The Committee also recommended reducing the fines and fees for the offenses as well as eliminating the DMV "points" associated with the offenses.

[1] http://www.clrc.ca.gov/CRPC/Pub/Reports/CRPC_AR2020.pdf

The report shows that the vast majority of all criminal filings in California are traffic cases — more than 81% or 3.6 million filings a year. Annually, almost 260,000 traffic offenses are charged as misdemeanors and the people arrested and jailed for these offenses are disproportionately people of color. Additional data confirms that license suspensions for failure to appear are correlated with high poverty rates and race, with the highest rates of suspensions in poorer neighborhoods with a high percentage of Black and Latinx residents.

According to data provided to the Committee by the DMV, approximately 600,000 people currently have their licenses suspended solely for failure to appear in court. Further, the number of prosecutions for driving without a license and driving on a suspended license is also large. In Los Angeles County, between 2010 and 2019, there were more than 180,000 charges for driving without a license and more than 92,000 charges filed for driving on a license suspended for failure to appear or pay a fine.

AB 2746 lowers the penalties for driving without a license and remove the ability to suspend a person's driver's license for failure to appear in court. Lowering the penalty for these offenses is consistent with other actions taken by the Legislature in recent years. Specifically, the Legislature has repealed the ability to suspend licenses for reasons unrelated to unsafe driving, including unpaid traffic fines, high school truancy, vandalism, and controlled substance or alcohol use unrelated to driving.

Related/Prior Legislation

AB 907 (Santiago, 2021) would have made it a $100 fine with penalty assessments waived for driving without a license and would have eliminated driver's license suspensions for failure to appear if it stemmed from an infraction offense or from a misdemeanor failure to appear charge. The bill was held on suspense in Assembly Appropriations Committee.

SB 485 (Beall, Chapter 505, Statutes of 2019) repealed various DL suspensions for reasons unrelated to unsafe driving, including vandalism, controlled substance of alcohol use, firearm use, soliciting or engaging in prostitution.

AB 2685 (Lackey, Chapter 717, Statutes of 2018) eliminated license suspensions for minors who are found to be habitually truant.

AB 103 (Committee on Budget, Chapter 17, Statutes of 2017) removed the DL suspension for failure to pay a traffic fine.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DMV indicates that one-time costs to implement this bill by 2027 are not quantifiable at this time because programming will be required on the department's modernized platform, which will not be complete until after the 2025-26 fiscal year. Staff estimates one-time minor to moderate costs, potentially up to the low hundreds of thousands of dollars in 2026-27, to conduct necessary programming to eliminate failure to appear violations in the driver's license/identification card systems. (Motor Vehicle Account)

- The Administrative Office of the Courts (Judicial Council) indicates that court workload costs associated with this bill would be minor and absorbable because it is not expected to materially impact the number of cases for driving without a license. Staff estimates there could be minor court workload cost savings, to the extent there is a reduction in misdemeanor proceedings. (Trial Court Trust Fund)

- Unknown potentially significant loss of penalty fine, fee, and assessment revenue related to lowering the penalties associated with initial and subsequent convictions of driving without a DL. (General Fund, various special funds, local funds)

- The Department of Insurance anticipated minor and absorbable costs in 2026-27 of approximately $25,000 to review and approve any rate plans submitted by insurers to reflect the changes implemented by this bill. (Insurance Fund)

ARGUMENTS IN SUPPORT: According to the California Public Defenders Association (CPDA), "the charging and jailing people with license offenses that are unrelated to safe driving, while imposing only fines on many unsafe drivers is unjust. It is a modern-day version of debtors' prison to jail individuals for being financially unable to pay fines. In representing indigent criminal defendants, public defenders are particularly attuned to the inequitable and disproportionate burdens imposed on their clients by the criminal justice system solely based on their poverty. The poor will never experience the advantages that their wealthier brethren enjoy in the halls of justice, but there is no just cause for them to be treated less favorably due to financial constraints beyond their control. AB 2746 will take a much-needed step toward righting that inequity."

SUBJECT: Deaths while in law enforcement custody: reporting

SOURCE: Author

DIGEST: This bill requires a state or local correctional facility to post specified information on its website within 10 days after the death of a person in custody, and to update that information within 30 days of any change.

Senate Floor Amendments of 8/24/22 give the agency in charge of the correctional facility an additional 10 days to post the information if they are unable to notify the next of kin within 10 days of the death.

ANALYSIS:

Existing law:

1) Establishes a system of state prisons under the jurisdiction of the California Department of Corrections and Rehabilitation (CDCR) (Pen. Code, §2000 et. seq.)

2) Establishes a system of county and city jails under the jurisdiction of the sheriff or chief of police. (Pen. Code, §4000 et. seq.)

3) Provides that in any case in which a person dies while in the custody of any law enforcement agency or while in custody in a local or state correctional facility in this state, the law enforcement agency or the agency in charge of the correctional facility shall report in writing to the Attorney General, within 10 days after the death, all facts in the possession of the law enforcement agency or agency in charge of the correctional facility concerning the death. (Gov. Code, § 12525.)

4) Provides that records by law enforcement reporting deaths in custody to the Attorney General are public records within the meaning of the California Public Records Act and are open to public inspection. (Gov. Code, § 12525.)

5) Requires each law enforcement agency to report to the Department of Justice on a monthly basis a report of all instances when a peace officer employed by that agency is involved in specified incidents, including an incident in which the use of force by a peace officer against a civilian results in serious bodily injury or death. (Gov. Code, § 12525.2, subd. (a)(3).)

This bill:

1) Requires a state or local correctional facility to post the following information on its website within 10 days after the death of a person who died while in custody:

   a) The full name of the agency.

   b) The county in which the death occurred.

   c) The facility in which the death occurred and the location within that facility where the death occurred.

   d) The race, gender, and age of the decedent.

   e) The date on which the death occurred.

   f) The custodial status of the decedent, including, but not limited to, whether the person was awaiting arraignment, awaiting trial, or incarcerated.

   g) The manner and means of death.

2) Provides that if any of the information changes, including, but not limited to, the manner and means of death, the agency shall update the posting within 30 days of the change.

3) Provides that if the agency in charge of the facility seeks to notify the next of kin and is unable to do so within 10 days of the death, the agency shall be given an additional 10 days to make good faith efforts to notify the next of kin before the information must be posted online.

Comments

According to the author, "Recent high-profile killings by police in the USA have prompted calls for government officials to implement laws that will reduce police violence. Lawmakers need accurate data in order to evaluate whether policies effectively address the issue of police violence. However, research has shown that law enforcement-related deaths are undercounted in government data. According to data provided by Public Policy Institute of California, half of deaths by law enforcement officers are misclassified in the California Department of Public Health's system. The absence of accurate and complete information on the number of individuals who die by law enforcement stifles the public trust and the ability to hold law enforcement accountable. […]

The absence of accurate and complete information on the number of people who die in custody and the nature of such deaths stifles policymakers' ability to examine the underlying causes, let alone determine what can be done to lower the incidences. […] A designated field on the death certificate to record when the death occurred while the person was in custody and was precipitated by a law enforcement officer or through officer involvement and timely public notification of deaths will help California's metrics and ensure deaths are more accurately reported and that deaths involving peace officers or those occurring in custody don't continue to go uncounted. This will also improve investigative transparency and community confidence in the medical examinations, as well as help to give more peace to families that have lost loved ones."

Existing law requires law enforcement agencies to report any deaths in custody to the DOJ within 10 days after the death, and specifies that these reports are public records subject to the California Public Records Act. When the details of a death in custody are not readily available during this 10-day time frame, the deaths are listed as "pending investigation," and DOJ requests updates from DOJ twice a year, at which time the case is updated if it has been resolved. Information required

under existing law is readily accessible on the DOJ's OpenJustice Web portal, which currently displays an interactive dashboard representing data on 7,542 deaths collected between 2011 and 2020. According to the website, "these data are utilized to assist in policy development and to inform the public on the nature and volume of death in custody in California."

This bill requires law enforcement agencies with jurisdiction over a state or local correctional facility to post on their websites specified information regarding the death of an individual in custody at such a facility, including the name of the agency, the date and county of death, the name and location of the facility, information about the deceased (race, age, gender) and manner of death, and the custodial status of the decedent. The information must be posted within 10 days of the death, and if there are changes to the information, updates to the posting must be made within 30 days of the change. Opponents argue that this requirement is duplicative of the existing requirement that law enforcement agencies report deaths in custody to the DOJ. However, 10 and 30 day requirements in this bill, and the apparent frequency with which DOJ posts its in-custody death data, this bill would make such data available to the public more quickly than existing law. Additionally, supporters argue that public health organizations developing mortality-based research and policy can more easily access and process death certificate data, presumably through the CA-EDRS system, than data collected by the DOJ.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Minor and absorbable costs to CDCR to post information about in-custody deaths on its website (General Fund).

- Unknown, potentially reimbursable costs local law enforcement agencies to post specific information about the death of a person in custody to their websites (Local Funds, General Fund). General Fund costs will depend on whether the duties imposed by this bill are considered a state reimbursable mandate by the Commission on State Mandates.

SUBJECT: Stops: notification by peace officers

SOURCE: Author

DIGEST: This bill requires, effective January 1, 2024, a peace officer making a traffic or pedestrian stop to state the reason for the stop before asking investigatory questions unless the officer reasonably believes that withholding the reason for the stop is necessary to protect life or property from imminent threat; and adds information regarding this requirement to the Department of Motor Vehicles (DMV) Driver's Handbook, and requires local law enforcement agencies to report additional stop information to the Department of Justice (DOJ).

ANALYSIS:

Existing law:

1) Provides that the right of the people to be secure in their persons, houses, papers and effects, against unreasonable searches and seizures, shall not be violated. (U.S. Const., amend. IV.)

2) Requires DMV to publish a synopsis or summary of the laws regulating the operation of vehicles and the use of highways. This summary is referred to as the California Driver's Handbook (Handbook). (Veh. Code, § 1656.)

3) Requires DMV to include specified information in the handbook, including a section on a person's civil rights during a traffic stop. This section must include information regarding the limitations of a peace officer's authority during a traffic stop and the legal rights of drivers and passengers, including the right to file complaints against a peace officer. (Veh. Code, § 1656.3, subd. (a)(4).)

4) Requires DMV to develop the above section of the Handbook in consultation with the civil rights section of the DOJ, California Highway Patrol (CHP), California Commission on Peace Officer Standards and Training (POST), and civil rights organizations, including community-based organizations. (Veh. Code, § 1656.3, subd. (a)(4).)

5) Provides that the information included in the handbook shall be initially include in the handbook at the earliest opportunity when the handbook is otherwise revised or reprinted, in order to minimize costs. (Veh. Code, § 1656.3, subd. (b).)

6) Requires each state and local agency that employs peace officers to annually report to the Attorney General data on all stops conducted by that agency's peace officers for the preceding calendar year. (Government Code §12525.5(a)(1).)

7) Requires reports on stops submitted to the Attorney General to include, at a minimum, the following information:

   a) The time, date, and location of the stop

   b) The reason for the stop

   c) The result of the stop, such as no action, warning, citation, arrest, etc.

d) If a warning or citation was issued, the warning provided or the violation cited

e) If an arrest was made, the offense charged

f) The perceived race or ethnicity, gender, and approximate age of the person stopped. For motor vehicle stops, this paragraph only applies to the driver unless the officer took actions with regard to the passenger

g) Actions taken by the peace officer, as specified. (Government Code §12525.5(b)(1)-(7).)

8) Provides that law enforcement agencies shall not report personal identifying information of the individuals stopped to the Attorney General, and that all other information in the reports, except for unique identifying information of the officer involved, shall be available to the public. (Government Code §12525.5(d).)

9) Defines "stop," for the purposes of reports sent by law enforcement agencies to the Attorney General, as 'any detention by a peace officer of a person, or any peace officer interaction with a person in which the peace officer conducts a search, including a consensual search, of the person's body or property in the person's possession or control.' (Government Code §12525.5(g)(2).)

10) Finds and declares that pedestrians, users of public transportation, and vehicular occupants who have been stopped, searched, interrogated, and subjected to a property seizure by a peace officer for no reason other than the color of their skin, national origin, religion, gender identity or expression, housing status, sexual orientation, or mental or physical disability are the victims of discriminatory practices (Penal Code §13519.4(d)(4).)

11) Prohibits a peace officer from engaging in racial or identity profiling, as defined. (Penal Code §13519.4(e),(f).)

12) Creates the Racial and Identity Profiling Advisory Board (RIPA), which, among other duties, is required to conduct and consult available, evidence-based research on intentional and implicit biases, and law enforcement stop, search, and seizure tactics. (Penal Code §13519.4(j)(3)(D).)

This bill:

1) Requires a peace officer making a traffic or pedestrian stop, before engaging in questioning related to a criminal investigation or traffic violation, to state the

reason for the stop, unless the officer reasonably believes that withholding the reason for the stop is necessary to protect life or property from imminent threat.

2) Requires the officer to document the reason for the stop on any citation or police report resulting from the stop.

3) Requires that the DMV Driver's Handbook include information regarding the requirement above.

4) Requires local law enforcement agency, in their reports to DOJ regarding stops, to include information regarding the reason given to the person stopped at the time of the stop.

5) Specifies that its provisions do not become operative until January 1, 2024.

Comments

According to the author, "to promote equity and accountability in communities across California — that is my goal. AB 2773 brings transparency to service of protecting our public."

The Fourth Amendment of the United States Constitution provides in part that "the right of the people to be secure in their persons, houses, papers and effects, against unreasonable searches and seizures, shall not be violated." The United States Supreme Court has held that temporary detention of individuals during the stop of an automobile by the police, even if only for a brief period and for a limited purpose, constitutes a 'seizure' of persons within the meaning of this provision. In *Whren v. United States*, decided in 1996, the Court further held that "the temporary detention of a motorist upon probable cause to believe that he has violated the traffic laws does not violate the Fourth Amendment's prohibition against unreasonable seizures, even if a reasonable officer would not have stopped the motorist absent some additional law enforcement objective." The Court's decision in *Whren* has given rise to what have been dubbed "pretext stops," a practice in which a law enforcement officer uses a minor traffic violation as a pretext to stop a vehicle in order to investigate other possible crimes. Given the litany of possible traffic violations, especially in California, the use of pretext stops as an investigative tool has become widespread since the decision in *Whren.*

As use of pretext stops has increased, so too has criticism of the practice. Many argue that pretext stops are a driver of racial bias in law enforcement (discussed further below), while others claim that they subvert the spirit, if not the letter, of the Fourth Amendment by giving officers carte blanche to stop a vehicle. Critics

also point to the difficulty in contesting a pretext stop in court. That is, if an officer stops a driver based on an observed traffic violation – of which there are dozens – the driver bears the burden of producing evidence to refute the officer's testimony, that, for instance, the license plate was obscured or a taillight was not properly illuminated on a specific date and time. All of these issues, critics argue, lead to disparate outcomes, primarily based on race, and undermine police legitimacy in the eyes of the communities they serve.

In 2020, the Stanford Open Policing Project published an analysis of almost 100 million police traffic stops conducted between 2011 and 2017 by 21 state patrol agencies (including the California Highway Patrol) and 29 municipal police departments nationwide. One of the study's central findings was that "police stopped and searched black and Hispanic drivers on the basis of less evidence used in stopping white drivers, who are searched less but are more likely to be found with illegal items." Moreover, these stops based on routine traffic violations often turn violent. A 2021 New York Times investigation found that in the preceding 5 years, police officers killed at least more than 400 unarmed drivers and passengers who were not under pursuit for a violent crime, while about 60 officers died at the hands of motorists who had been pulled over.

In 2015, the Legislature passed AB 953 (Weber, Chapter 466, Statutes of 2015), also known as the Racial and Identity Profiling Act of 2015, which expressly prohibited racial and identity profiling by law enforcement and requires law enforcement agencies to report stop data to the DOJ. RIPA guidelines define a "stop" as **"**any detention by a peace officer of a person or any peace officer interaction with a person in which the officer conducts a search. This data includes both pedestrian and vehicle stops."

RIPA stop data for 2020 showed that the most commonly reported reason for a stop (86.1%) across all racial/ethnic groups was a traffic violation, and that individuals perceived as Black or Hispanic comprised 60% of the stops reported, while just under 32% of the stops involved individuals perceived as White. The 2020 data also reflected a continuation of the previous year's trends as well as a finding that "officers searched, detained on the curb or in a patrol car, handcuffed, and removed from vehicles more individuals perceived as Black than individuals perceived as White, even though they stopped more than double the number of individuals perceived as White than individuals perceived as Black."

In light of the racial disparities in police stops and in an effort to improve police accountability with regard to stops, the Author seeks to enact a requirement that officers communicate the reason for their stop before engaging in investigatory

questioning and document the reason for the stop in their citation or police report. However, a police officer may withhold the reason for the stop if they reasonably believe that it is necessary to protect life or property from imminent threat. This bill also provides that information regarding this requirement must be included in the DMV's Driver's Handbook.

A separate provision of this bill deals with the existing requirement that local law enforcement agencies submit annual reports to DOJ regarding traffic and pedestrian stops, including specified information. This bill requires law enforcement agencies to additionally include, for each stop reported, the reason given to the person stopped at the time of the stop.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- *CHP:* The CHP reports costs of approximately $160,000 for information technology changes that would required to collect and report additional "stop data" information to DOJ (Special Fund – Motor Vehicle Account).

- *DOJ:* The DOJ reports costs of $43,000 in 2022-23 for consulting services for application development and to assist with analysis and design, database modification, web application development, web services development, deployment and follow-up (General Fund).

- *DMV:* Staff notes likely minor and absorbable costs to the DMV to update the Driver's Handbook (Special Fund – Motor Vehicle Account).

- *Local Reimbursements:* Unknown, potentially significant costs for all 608 state and local agencies employing peace officers to update policies regarding pedestrian and traffic stops and provide the training necessary to comply with the reporting requirements of AB 2773 (Local Funds, General Fund). Costs to the General Fund will depend predominantly on whether the duties imposed by this bill constitute a reimbursable state mandate, as determined by the Commission on State Mandates.

SUBJECT: Education finance: local control funding formula: supplemental grants: lowest performing pupil subgroup or subgroups

SOURCE: Author

DIGEST: This bill expands the definition of "unduplicated pupil" for Local Control Funding Formula (LCFF) purposes by adding a pupil who is classified as a member of the lowest performing subgroup or subgroups, as defined, commencing with the 2023-24 fiscal year and contingent on an appropriation in the annual Budget Act.

ANALYSIS:

Existing law:

1) Establishes the LCFF in 2013. The LCFF establishes per-pupil funding targets, with adjustments for different student grade levels, and includes supplemental funding for local educational agencies (LEAs) serving unduplicated pupils—students who are low-income, English learners, or foster youth. The LCFF replaced almost all sources of state funding for LEAs, including most categorical programs, with general purpose funding including few spending restrictions.

2) Provides the largest component of the LCFF is a base grant generated by each student. Current law establishes base grant target amounts for the 2013-14 fiscal year, which are increased each year by the Implicit Price Deflator for State and Local Government Purchases of Goods and Services for the United States. The base grant target rates for each grade span for the 2021-22 fiscal year are as follows:

   a) $8,935 for grades K-3 (includes a 10.4 percent adjustment for class size reduction);

   b) $8,215 for grades 4-6;

   c) $8,458 for grades 7-8;

   d) $10,057 for grades 9-12 (includes a 2.6 percent adjustment for career technical education).

3) Provides, for each unduplicated pupil, a district receives a supplemental grant equal to 20 percent of its adjusted base grant. A district serving a student population with more than 55 percent of unduplicated pupils receives concentration grant funding equal to 50 percent of the adjusted base grant for each unduplicated pupil above the 55 percent threshold.

This bill:

1) Requires, for school districts, charter schools, and county offices of education (COEs), the LCFF definition of "unduplicated pupil" to include a pupil who is classified as a member of the lowest performing subgroup or subgroups.

2) Requires the Superintendent of Public Instruction (SPI) to annually identify the lowest performing subgroup or subgroups based on the most recently available mathematics or English language arts results on the California Assessment of Student Performance and Progress (CAASPP).

3) Excludes the following subgroups from being identified pursuant to this calculation:

   a) A subgroup already identified for LCFF supplemental funding (English learners, low-income pupils, and foster youth); and

   b) Any subgroup specifically receiving supplemental funding on a per-pupil basis through state or federal resources received from a source other than LCFF (pupils with disabilities).

4) Provides that a subgroup identified in the 2023–24 fiscal year as a lowest performing subgroup shall continue to receive supplemental funding until its performance meets or exceeds the highest performing subgroup of pupils in the state.

5) Specifies that these provisions are contingent on an appropriation of funds for these purposes in the annual Budget Act or other statute.

Comments

1) *Need for the bill.* According to the author, "2019 statewide testing data shows that African American students are the lowest performing subgroup with 67% not meeting English Language Arts Standards and 79% not meeting Math Standards. The achievement gap for African American students is pervasive whether they are low-income or not. Low-income White students outperform non-low income Black students in math and science.

   "80,000 African American students, or just over a quarter are not receiving additional supplemental funding or accountability through the LCFF. Unfunded African American students are the only subgroup performing below the statewide average on ELA and Math that is not already receiving an LCFF supplement. That is to say that while the entirety of the current subgroups in the unduplicated pupil count receives supplemental funding, only a portion of the lowest-performing subgroup realizes this benefit.

   "A recent UC Berkeley study found that 'schools in districts receiving concentration grants during the initial two years of Local Control Funding did engage in organizational change that parallels gains in pupil achievement, compared with schools in almost identical districts not receiving concentration grants. These benefits were largely experienced by Latino students and not by other groups at significant levels.' (Lee & Fuller 2017, 2) The authors also note that their 'inability to detect gains for Black students is worrisome.' (Lee & Fuller 2017, 24) These early findings suggest that while LCFF supplements may be improving outcomes for Latino students, as intended, a notable gap remains for African American students.

   "AB 2774 would create a new supplemental grant category in the LCFF to include the lowest performing subgroup of students statewide (currently African American students) that is not already receiving supplemental state or federal funding. This would ensure that every student in the lowest-performing subgroup as defined in AB 2774, is generating additional supplemental funding to provide resources to increase their academic performance. AB 2774 would

additionally ensure that local educational agencies (LEAs) including county offices of education, school districts, and charter schools are held accountable to provide additional services and improve academic performance for these students through their Local Control Accountability Plan where the LEA will describe how they plan to assist these high needs students in order to elevate their performance."

2) *What does this bill do?* This bill adds a pupil who is classified as a member of the lowest performing subgroup, excluding any subgroups that already receive supplemental funding on a per-pupil basis (from the LCFF or other state and federal programs). Based on the bill as currently drafted, the only pupil subgroups not meeting the exclusion are ethnic subgroups.

   The California Department of Education (CDE) reports test scores for the following subgroups:

   a) Black or African American

   b) American Indian or Alaska Native

   c) Asian

   d) Filipino

   e) Hispanic or Latino

   f) Native Hawaiian or Pacific Islander

   g) White

   h) Two or more races

   According to data provided by the California Department of Education (CDE) and the author's office, the lowest-performing ethnic group is Black/African American. Therefore, this bill would add Black/African American pupils to the unduplicated pupil count for LCFF purposes.

3) *The Black-White achievement gap.* Studies show that the Black-White achievement gap has persisted, but changed over time. According to a 2014 Handbook of Research in Education Finance and Policy article, *Patterns and Trends in Racial/Ethnic and Socioeconomic Academic Achievement Gaps*, it narrowed in both reading and math from the early 1970s to the late 1980s, then widened in the early 1990s, but has been narrowing consistently since 1999. Tables 1 and 2 (below) show that the scores of Black/African American pupils

are the lowest among the reported racial subgroups. In addition, even though the Black/African American subgroup includes pupils at all income levels, its scores are below the scores of economically disadvantaged pupils, which suggests that poverty alone does not explain this outcome. According to the 2014 Handbook of Research in Education Finance and Policy article,

"A relatively common question addressed in studies of racial/ethnic achievement gaps (particularly the Black-White gap) is the extent to which the observed gaps can be explained by socioeconomic differences between the groups. [Research shows] that socioeconomic factors explain almost all (85%) of the Black-White math gap, and all of the reading gap at the start of kindergarten.…By the third grade, however, …the same socioeconomic factors account for only about 60 percent of both the math and reading Black-White gaps. This finding suggests that socioeconomic factors explain, in large part, the Black-White differences in cognitive skills at the start of formal schooling, but do not account for the growth of the lack-White gap as children progress through elementary school."

The academic achievement gap has consequences beyond school. According to a 2018 report from the Equality of Opportunity Project at Stanford University, *Race and Economic Opportunity in the United States*, "Black children born to parents in the bottom household income quintile have a 2.5% chance of rising to the top quintile of household income, compared with 10.6% for Whites," and "American Indian and Black children have a much higher rate of *downward* mobility than other groups [emphasis in original]."

4) *Low-Performing Students Block Grant.* The Budget Act of 2018 established the Low-Performing Students Block Grant (LPSBG) as a state education funding initiative with the goal of providing grant funds to LEAs serving pupils identified as low-performing on state English-language arts or mathematics assessments who are not otherwise identified for supplemental grant funding under the LCFF or eligible for special education services as defined in Education Code section 41570(d). For the 2018-19 school year, $300 million in one-time funds was appropriated to establish the block grant, available for expenditure or encumbrance during fiscal years 2018-19, 2019-20, and 2020-21. The final per pupil allocation was $1,998.02.

LEAs were required to use LPSBG funds for evidence-based services that directly supported pupil academic achievement, including professional development activities for certificated staff; instructional materials; and

additional supports for pupils. According to the CDE's legislative report on the LPSBG,

"The CDE reviewed submission data from 10 LEAs that were allocated the largest amount of LPSBG funding. Below is a summary of findings regarding their LPSBG plan implementation, the strategies used, and whether or not those strategies increased the academic performance of the pupils identified.

"LEAs reported on the comprehensiveness of their LPSBG plan and the integration of multiple supports and evidence-based strategies for students and staff. However, once the pandemic began and schools closed, LPSBG plan implementation waned primarily because students became virtual learners, yet most of the planned services and strategies required in-person attendance for both staff and students.

"Even with these challenges and the return to in-person learning in the 2020–21 school year, LEAs reported improvements in culture and climate (increased attendance and a reduction in referrals and suspensions), while others discussed increases in student achievement related to English language arts and mathematics based on LEA local assessment data, reports from computerized programs, and other anecdotal information collected by LEAs. Additionally, LEAs also reported on increased and improved competencies and instructional delivery relating to core subjects and culturally-responsive teaching amongst their staff.

"However, the overarching theme from the submission data was that due to the COVID-19 pandemic and the impact that it had on the implementation of the LPSBG plans, there is little to no comparable assessment data or analyses to truly determine the effectiveness of this block grant on student achievement. Since student eligibility was determined based on the CAASP, comparative data from the 2020–21 school year is not available as the CDE received a waiver from the U.S. Department of Education waiving the requirement to administer the state-wide assessment to all eligible students."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, this bill would create ongoing Proposition 98 General Fund costs in the mid-hundreds of millions of dollars each year to provide additional LCFF funding for the lowest performing subgroup. There would be additional Proposition 98 General Fund costs in the hundreds of millions of dollars each year to the extent that multiple subgroups qualify for

funding in future years. The bill's provisions would be subject to an appropriation in the annual Budget Act.

SUBJECT: Automobiles and recreational vehicles: registration fees

SOURCE: Author

DIGEST: This bill specifies that a person who verifies they are homeless with the Department of Motor Vehicles (DMV) does not have to pay vehicle registration fees on an automobile or a recreational vehicle (RV).

Senate Floor Amendments of 8/22/22 delay the implementation date of the bill until January 1, 2027.

ANALYSIS:

Existing law:

1) Waives the identification card (ID card) fee for unhoused persons.

2) Prohibits a person from driving, moving, or leaving a vehicle or trailer on a highway or in an off-street parking facility unless it is registered with DMV.

3) Requires that a registration fee of $43 be paid to the DMV for an initial vehicle registration or registration renewal.

4) Adds an additional $3 to the above fee to be deposited in the Alternative and Renewable Fuel and Vehicle Technology Fund and the Enhanced Fleet Modernization Subaccount.

5) Adds an additional $25-$175 Transportation Improvement Fee based on the value of the vehicle.

6) Adds an additional $100 fee for zero emission vehicles 2020 model year or later.

7) Requires an additional registration fee, adjusted annually based on the California Consumer Price Index (CPI), be paid to DMV on behalf of the Department of the California Highway Patrol (CHP) at the time of vehicle registration or renewal.

8) Authorizes the collection of certain other fees and surcharges at the time of vehicle registration or renewal to support a variety of state and local programs.

This bill:

1) Defines recreational vehicle as a motor home, travel trailer, truck camper, or camping trailer, with or without motive power, designed for human habitation for recreational, emergency, or other occupancy that meets specified requirements.

2) Waives the vehicle registration fees on an automobile or RV owned by a person that verifies they are homeless.

3) Defines "homeless person" the same as a homeless person under the federal McKinney-Vento Homeless Assistance Act, which includes the following:

   a) An individual or family who lacks a fixed, regular, and adequate nighttime residence.

   b) An individual or family with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground; and,

   c) An individual or family living in a supervised publicly or privately operated shelter designated to provide temporary living arrangements (including hotels and motels paid for by Federal, State, or local government programs for low-income individuals or by charitable organizations, congregate shelters, and transitional housing).

4) Provides that a homeless service provider that has knowledge of the person's housing status may verify the person's status as homeless.

5) Defines a homeless service provider to include a governmental or nonprofit agency receiving government funding to provide homeless services, a public social services provider, a law enforcement officer with certain designations, or any other homeless services provider the DMV determines to have eligibility.

6) Becomes effective on January 1, 2027.

Comments

1) *Purpose*. According to the author, "Our state is facing a severe housing crisis that cannot be solved overnight. People are living on the streets without abode or living in their recreational vehicles, cars, and boats- operational or not, so they can have some shelter from the summer heat or winter cold at night. My bill seeks to provide financial relief for verified homeless people that are using vehicles as their place of residence by exempting them from Department of Motor Vehicle registration fees as many options are needed to help the people facing the brunt of our housing crisis."

2) *Motor Vehicle Account and Vehicle License Fees.* The DMV estimates that the cost to register an automobile or RV in the state of California is $257. Cal Matters estimates that there is roughly 161,000 people experiencing homelessness in California based on the latest tally taken in 2020 before

COVID-19. Based on those numbers, the average loss to the DMV from the registration waiver would be $26 million. The DMV states that they issued 100,000 fee-free IDs to person's experiencing homelessness. The author contends that not all of the persons experiencing homelessness own an automobile or RV. However, Cal Matter estimates that 16,528 of the 161,000 people experiencing homelessness owned an automobile or a RV. This loss would negatively affect the Motor Vehicle Account (MVA), the primary funding source for DMV and the California Highway Patrol, which is already projected to be in deficit in the coming years.

Further, AB 2775 does not exempt a verified person experiencing homelessness from paying the Vehicle License Fee (VLF), a separate fee from the Vehicle Registration Fee which is essentially a property tax that is based on a percentage of the vehicle's value. The DMV estimates that the fee is $93 dollars for an automobile or RV and that they would need to include a regulatory update and an IT update in order to separate the VLF from the registration fees.

3) *Failure to Pay*. Failure to pay those fees can have dire consequences for someone who is unhoused. Under existing law, a vehicle that has expired registration for more than six months can be towed. *Towed into Debt: How Towing Practices in California Punish Poor People*, a 2019 report by various legal services organizations in California, highlighted the potential downstream effects if a vehicle is towed. Recovering a vehicle after it has been towed is expensive. *Towed into Debt* notes that the average tow fee in California is $189, with a $53 storage fee per day and a $150 administrative fee. After three days of storage a towing fee could come out to $499. If someone were unable to pay their vehicle registration fees on time, late fees for vehicle registration increase by 60% of the original fee for payments over 30 days late, which can increase the registration fee as much as $100. If a person is then pulled over for having an unregistered vehicle, the fine for driving unregistered vehicles is currently $285. The vehicle registration fees, late fees, tickets for driving an unregistered vehicle, and the cost of a three day tow could easily cost well over $1000.

   According to *Towed into Debt*, vehicles towed for unpaid registration or unpaid parking tickets are two to six times more likely to be sold at a lien sale than the average towed cars. 50% of the vehicles towed in San Francisco for unpaid parking tickets and 57% of the vehicles towed for lapsed registration were sold

by the tow companies, compared to only 9% of other vehicles that were towed for other reasons.

4) *Vehicles and Homelessness*. For some people experiencing homelessness, their only means of shelter is their vehicle. According to research conducted by the Benioff Homeless and Housing Initiative, there has been a rapid growth of vehicle residency over the last decade, especially during the pandemic. People without permanent homes are now using their cars, vans, RVs, and campers as a form of 'affordable housing' instead of going to shelters or encampments. However, parking restrictions and a lack of infrastructure are challenges. A 2019 Guardian article noted that the City of San Francisco counted 1,794 people living out of their vehicles, a 45 percent increase from 2017. Moreover, Oakland counted 2,817, which was more than double the number counted in 2017, and Los Angeles counted 9,981 cars, vans, RVs and campers acting as shelters for about 16,525 people, which encompassed 28 percent of the county's entire unhoused population.[1]

   Some cities during the pandemic had stopped towing vehicles and citing cars for being parked in the same area for extended time periods. Nevertheless, in recent months, ticketing and towing vehicles has been on the rise again, causing some who are experiencing homelessness to incur fines and fees they cannot afford to pay back. Often vehicles are ticketed and fined because their registration has expired or they have unpaid parking tickets. When their vehicle is towed, essentially the individual's home, and potentially their only place to stay is taken away based on their inability to pay.

5) *Delayed Implementation*. The implementation date of the bill is delayed until January 1, 2027 due to DMV's preference that any new requirements be delayed until after their computer system upgrades are completed. Many other bills establishing new requirements on the DMV have a similar delayed implementation date.

6) *Opposition*. Opponents are concerned about the loss of revenue to the Motor Vehicle Account, which funds the DMV and the California Highway Patrol.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

[1] https://www.theguardian.com/us-news/2019/aug/05/california-housing-homeless-rv-cars-bay-area

According to the Senate Appropriations Committee:

- The Department of Motor Vehicles (DMV) indicates that one-time costs to implement this bill by 2027 are not quantifiable at this time because programming will be required on the department's modernized platform, which will not be complete until after the 2025-26 fiscal year. Staff estimates one-time costs in 2026-27, potentially in the low hundreds of thousands of dollars, to promulgate regulations, develop new certification forms, and conduct necessary programming on modernized IT systems to account for waiving vehicle registration fees for eligible homeless persons, including changes to allow verification of homeless status remotely through the Virtual Field Office, and to create the new fee waiver codes for tracking and audit purposes. (Motor Vehicle Account)

- Unknown, likely significant annual revenue losses (foregone revenues) beginning in 2026-27 as a result of the reduced collection of vehicle registration fees ($65 basic vehicle registration fees and $29 CHP fee). Actual revenue losses would depend upon the number of homeless persons who own a vehicle that would be subject to the bill's requirements, and are verified as eligible for the fee exemption. Absent reliable data on vehicle ownership among homeless persons who use the vehicle as their residence, these costs are unquantifiable and likely to change from year to year. For illustrative purposes, for every 10,000 persons eligible for a registration fee waiver in a given year, the bill would result in revenue losses of approximately $940,000. (Motor Vehicle Account)

- Ongoing annual DMV administrative costs, primarily for field office time to verify applicant eligibility for vehicle registration fee exemptions, are expected to be minor and absorbable, beginning in 2026-27. (Motor Vehicle Account)

SUBJECT: Crimes: race-blind charging

SOURCE: Yolo County District Attorney's Office

DIGEST: This bill requires the Department of Justice (DOJ), beginning on January 1, 2024, to develop and publish "Race-Blind Charging" guidelines, as specified, for all prosecuting agencies to follow in implementing a process to initially review a case for charging based on information from which all means of identifying the race of the suspect, victim, or witness have been removed or redacted.

ANALYSIS:

Existing law:

1) States that all felonies shall be prosecuted by indictment or information, as specified. (Pen. Code, § 737.)

2) States that all misdemeanors and infractions be prosecuted by written complaint under oath. (Pen. Code, § 740.)

3) Prohibits the state from seeking or obtaining a criminal conviction or sentence on the basis of race, ethnicity, or national origin. (Pen. Code, § 745.)

4) Provides that a defendant may establish such violation if any of the following occurred:

   a) The court, an attorney, a law enforcement officer, an expert witness, or a juror involved in the case exhibited bias or animus due to the defendant's race, ethnicity or national origin;

   b) The defendant was charged or convicted of a more serious offense than defendants of other races who committed the same or similar acts, and evidence exists that demonstrates that the prosecution has a pattern of charging or convicting more serious offenses against people who share the defendant's race or ethnicity; and,

   c) A more severe sentence was imposed on the defendant than was imposed on other similarly situated defendants of different races, ethnicities, or national origins. (Pen. Code, § 745.)

5) Authorizes the court, upon a defendant proving racial bias has occurred in a case, to remedy the situation:

   a) Declaring a mistrial, if requested by the defendant;

   b) Empaneling a new jury;

   c) Reducing one or more charges, dismissing an enhancement or special allegation;

   d) Vacating a conviction or sentence and ordering new proceedings; or,

   e) Modifying a sentence. (Pen. Code, § 745, subd. (e).)

This bill:

1) Requires, commencing January 1, 2024, DOJ to develop and publish guidelines for a process called "Race-Blind Charging" which must be adhered to by agencies prosecuting misdemeanors or felonies.

2) Requires any initial review of a case for charging, be based on documents from which all means of identifying the race of the suspect, victim, or witness has been redacted.

3) Requires prosecution agencies, following DOJ's guidelines, to independently develop and execute versions of this redaction and review process with the following general criteria:

a) Beginning January 1, 2025, cases received from law enforcement agencies and suspect criminal history documentation shall be redacted in order to be used for a race-blind initial charging evaluation, which shall precede the ordinary charging evaluation. This redaction may occur in a separate version of the documents and may be done mechanically, by hand performed by personnel not associated with the charging of the case, or by automation with the use of computer programming, so long as the method used reasonably ensures correct redaction. The redaction may be applied to the entire report or to only the "narrative" portion of the report so long as the portion submitted for initial review is sufficient to perform that review and the unredacted portions are not part of the initial charging evaluation;

b) The initial charging evaluation based on redacted information, including redacted reports, criminal histories, and narratives, shall determine whether the case should be charged or not be charged. Individual charges shall not be determined at this initial charging evaluation stage. Other evidence may be considered as part of this initial charging evaluation so long as the other evidence does not reveal redacted facts. The initial charging evaluation shall be performed by a prosecutor who does not have knowledge of the redacted facts for that case;

c) After completion of a race-blind initial charging evaluation, the case shall proceed to a second, complete review for charging using unredacted reports and all available evidence in which the most applicable individual charges and enhancements may be considered and charged in a criminal complaint, or the case may be submitted to a grand jury;

d) Each of the following circumstances shall be documented as part of the case record:

    i) The initial charging evaluation determined that the case not be charged and the second review determined that a charge shall be filed.

    ii) The initial charging evaluation determined that the case shall be charged and the second review determined that no charge be filed.

    iii) The explanation for the charging decision change shall be documented as part of the case record.

e) The explanation for the charging decision change shall be documented as part of the case record;

f) The documented change between the result of the initial charging evaluation and the second review, as well as the explanation for the change, may be released or disclosed, upon request, after sentencing in the case or dismissal of all charges comprising the case, subject to protections of privileged materials as specified or any other applicable law;

g) If a prosecution agency was unable to put a case through a race-blind initial charging evaluation, the reason for that inability shall be documented and retained by the agency. This documentation shall be made available by the agency upon request; and,

h) The county shall collect the data resulting from the race-blind initial charging evaluation process and make the data available for research purposes.

4) Authorizes each prosecution agency to remove or exclude certain classes of crimes or factual circumstances from a race-blind initial charging evaluation and states that this list of exclusions and the reasons for exclusion shall be available upon request to DOJ and members of the public.

5) Specifies that due to increased reliance on victim or witness credibility, the availability of additional defenses, the increased reliance on forensics for the charging decision, or the relevance of racial animus to the charging decision, each of the following crimes may be excluded from a race-blind initial charging evaluation process:

a) Homicides;

b) Hate crimes;

c) Charging arising from a physical confrontation where that confrontation is captured in video as evidence;

d) Domestic violence and sex crimes;

e) Gang crimes;

f) Cases alleging either sexual assault or physical abuse or neglect where the charging decision relies upon either a forensic interview ofa child or interviews of multiple victims or multiple defendants;

g) Cases involving financial crimes, including, but not limited to, violations of elder and dependent adult abuse and embezzlement and other crimes

sounding in fraud consisting of voluminous documentation where the redaction of such documentation is not practicable or is cost-prohibitive due to the volume of redactions;

h) Cases involving public integrity, including, but not limited to, conflict of interest crimes as specified;

i) Cases in which the prosecution agency itself investigated the alleged crime or participated in the precharging investigation of the crime by law enforcement, including, but not limited to, the review of search warrants or advising law enforcement in the course of the investigation; and,

j) Cases in which the prosecution agency initiated the charging and filing of the case by way of a grand jury indictment or where the charges arose from a grand jury investigation.

6) Contains the following legislative findings and declarations:

a) In recent years, the increasing availability of data regarding criminal justice has raised legitimate questions regarding racial disparities in how cases are investigated, charged, and prosecuted. In particular, studies suggest that unknowing or "unconscious" bias may infect many decisions within the criminal justice system, despite what may be the best intentions of the actors involved. (Baughman et al., *Blinding Prosecutors to Defendants' Race: A Policy Proposal to Reduce Unconscious Bias in the Criminal Justice System* (Dec. 2015) Behavioral Science & Policy, 70.)

b) One method to address bias is to "acknowledge its existence and create institutional procedures to prevent bias from influencing important decisions." (*id*. 71) In other contexts, such as science, employment, or academia, the "blinding" of evaluators assists in dispelling concerns of discrimination or bias in decision-making. (*id*. 71-72.)

c) In an effort to increase community confidence in the charging process, and to reduce the potential for unconscious bias, some district attorney offices employ a method whereby reports received from the police are stripped of all data from which the race of the suspect may be determined so that at least the initial charging assessment of the case is done "race blind." The Yolo County District Attorney in partnership with the Stanford Computational Policy Lab in 2021 created and implemented a race-blind charging system built into its case management system for most cases.

Comments

According to the author:

> The Department of Justice determined in 2016 that San Francisco disproportionately prosecutes African-Americans at a higher rate. The city of San Francisco published that between 2008 and 2014, African-Americans made up 6% of the city population, but consisted of 41% of those arrested, 43% of those in jail, and 38% of cases filed by prosecutors in San Francisco. It's evident that cities within California engage in racial bias regarding criminal cases.
>
> The impact that race and other physical characteristics has on the criminal justice process is a violation of the Equal Protection Clause in the Fourteenth Amendment. Additionally, the California Racial Justice Act of 2020 makes it illegal for actors in the criminal justice system to impose a sentence on the basis of race, ethnicity, or national origin. However, by implementing a race blind charging system that prohibits prosecutors from seeing indicators of race and ethnicity, this could eliminate racial bias earlier in the process.
>
> AB 2778 reduces the potential for racial bias and increases community confidence in the charging process by having the Department of Justice develop and issue "Race Blind Charging" guidelines. These guidelines would require prosecutors to implement a process where information related to the race of the suspect, victim or witness is redacted within police reports at the initial charging assessment of the case.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- *DOJ*: The DOJ reports costs of $559,000 in fiscal year (FY) 2022-23, 984,000 in FY 2023-24 and approximately $3 million annually thereafter to the DOJ in additional staff and infrastructure to develop and publish race-blind charging guidelines and implement a process to review cases for charging based on information, from which any means of identifying the race of the suspect, victim or witness have been removed or redacted (General Fund).

- *Local Reimbursements*: Unknown, potentially reimbursable costs, possibly in the millions of dollars annually additional staff and possible third party IT vendor contracts for county district attorney offices to independently develop and execute a process based on the process created by the DOJ to review and

redact certain information about a suspect, witness or victim information reports before charging anyone (Local Funds, General Fund). Costs may also include additional staff and IT infrastructure to collect data from a race-blind charging process and document why a DA office did not use a race-blind charging process in any case. General Fund costs will depend on whether this bill imposes a state-mandated local program as determined by the Commission on State Mandates.

San Diegans Against Crime
San Diego Deputy District Attorneys Association

ARGUMENTS IN SUPPORT: According to the Yolo County District Attorney's Office:

> In recent years, the increasing availability of data regarding criminal justice has raised legitimate questions regarding racial disparities in how cases are investigated, charged, and prosecuted. In particular, studies suggest that unknowing or "unconscious" bias may infect many decisions within the criminal justice system, despite what may be the best intentions of the actors involved. (Baughman et al. *Blinding Prosecutors to Defendants' Race: A Policy Proposal to Reduce Unconscious Bias in the Criminal Justice System* (Dec. 2015) Behavioral Science & Policy, 70.) One method to address bias is to "acknowledge its existence and create institutional procedures to prevent bias from influencing important decisions." (*id*. 71) In other contexts, such as science, employment, or academia, the "blinding" of evaluators assists in dispelling concerns of discrimination or bias in decision making. (*id*. 71-72)
>
> In 2021, our office partnered with the Stanford Computational Policy lab to develop a program to find and redact race data from police reports in order

that an initial charging determination could be performed "race blind." We became the first office in the state to incorporate this process into our case management system, which uses the same initial (redacted) and secondary (unredacted) processes to charge our cases, with a few exceptions, e.g., hate crimes. While the road to race blind charging had its challenges, we feel we have now "paved the way" and removed operational obstacles for other offices to do the same.

AB 2778 would help decrease the specter of racial bias in one of its most prominent places in the criminal justice system - the initial charging assessment. By stripping police reports of all race-related data of the suspect, victim, or witness, it reduces the potential for unconscious bias and increases community confidence in the charging process by having the initial charging assessment done "race-blind."

ARGUMENTS IN OPPOSITION: According to the San Diego Deputy District Attorneys Association:

The entire State of California should not be a guinea pig for this pilot-test. Doing so will be costly, as the Assembly Appropriations Committee expects that this bill will cost well over $3,000,000 annually. Moreover, it's not clear that there even exists a problem of unconscious bias influencing prosecutorial charging decisions in this state. When the San Francisco District Attorney's Office pilot-tested a race-blind charging program very similar to the one proposed in this bill, then compared issuing rates of cases against cases that did use race-blind charging, they found "no clear evidence for racial biases in prosecutorial charging decisions." (Alex Chohlas-Wood, et al., (2021) Blind Justice: Algorithmically Masking Race in Charging Decisions, pg. 9.)

Even if unconscious bias in prosecutorial charging decisions does exist, it is unlikely this bill will do anything to ameliorate the problem. For instance, this bill grants an exception to 10 different charging categories where race-blind charging would not be required. These exceptions are so numerous that they practically swallow the rule and greatly reduce any impact this bill would have on its stated purpose. But these exceptions are a necessary acknowledgement by the bill's authors of the many logistical issues created when redacting all information identifying a person's race. Spending well over $3,000,000 annually to ineffectively solve a problem that might not even exist is unsound fiscal policy.

SUBJECT: Dissolution of redevelopment agencies: enhanced infrastructure financing districts: City of Selma

SOURCE: City of Selma

DIGEST: This bill allows the City of Selma to form or participate in an enhanced infrastructure financing district (EIFD) if it meets specified conditions.

Senate Floor Amendments of 8/22/22 clarify that the City of Selma must pay specified outstanding payments in full before it can form or participate in an EIFD.

ANALYSIS:

Existing law:

1) Establishes successor agencies to manage the process of unwinding former redevelopment agencies' (RDAs) affairs, and oversight boards to approve successor agency decisions.

2) Allows the Department of Finance (DOF) to review and request reconsideration of an oversight board's decision.

3) Requires the successor agency to submit specified information on its outstanding assets and obligations, also known as a Recognized Obligation Payment Schedule (ROPS).

4) Allows DOF to issue a finding of completion to a successor agency acknowledging their progress towards paying off their obligations provided that its Final ROPS contains specified information.

5) States that successor agencies that did not receive their finding of completion by December 31, 2015, or did not enter into a written installment payment plan with DOF, were to never receive a finding of completion.

6) Creates EIFDs and allows them to finance public capital facilities or other specified projects of communitywide significance that provide significant benefits to the district or the surrounding community with an estimated useful life of 15 years or more.

7) Allows, in addition to construction costs, EIFDs to finance planning and design work, displacement of affordable housing residents, defending the district against protests over their formation, and the ongoing or capitalized costs to maintain the projects the district finances.

8) Provides that an EIFD is governed by a public financing authority (PFA) with three members of each participating taxing entity's legislative body and a minimum of two public members. Member agencies can also appoint an alternate member from their legislative body. If at least three taxing entities participate in the district, upon agreement of all taxing entities participating, the district's governing board can be reduced to one member and one alternate member of each legislative body and a minimum of two public members.

9) Limits a city or county that created an RDA, as defined, from initiating the creation of an EIFD, or participating in the governance or financing of an EIFD, until each of the following has occurred:

   a) The successor agency for the former RDA created by the city or county has received a finding of completion, as specified.

   b) The city or county certifies to DOF and to the PFA that no former RDA assets that are the subject of litigation involving the state, if the city or county, the successor agency, or the designated local authority are a named plaintiff, have been or will be used to benefit any efforts of an EIFD, unless the litigation and all possible appeals have been resolved in a court of law. The city or county shall provide this certification to DOF within 10 days of its legislative body's action to participate in or form an EIFD, as specified.

c) The State Controller's Office (SCO) has completed its review as required by existing law, and the successor agency and entity that created the RDA have complied with all the SCO's findings and orders stemming from the review.

This bill allows the City of Selma to initiate, participate in, government, or finance an EIFD, if the City of Selma, acting as the successor agency to the former Selma Redevelopment Agency, has:

1) Certified to DOF and the PFA that no former RDA assets are the subject of litigation involving the state, where the city or county, or its successor agency, are a named plaintiff, have been or will be used to benefit any efforts of an EIFD, unless the litigation and all possible appeals have been resolved in court. The city must provide this certification to DOF within 10 days of its legislative body's action to participate in, or initiate formation of an EIFD;

2) Complied with all SCO findings and orders stemming from its asset transfer review; and

3) Paid its outstanding July true-up payments in full.

Background

RDA dissolution. One of a successor agency's primary responsibilities is to make payments for the enforceable obligations RDAs entered into. These payments are supported by property tax revenues that would have gone to RDAs, but are instead deposited in a Redevelopment Property Tax Trust Fund (RPTTF). Enforceable obligations include bonds, bond-related payments, some loans, payments required by the federal government, obligations to the state or imposed by state law, payments to RDA employees, judgements or settlements, and other legally binding and enforceable agreements or contracts. Any remaining property tax revenues that exceed these enforceable obligations return to cities, counties, special districts, and school and community college districts to support core services. The amount that these taxing entities receive increases as the successor agency pays off these enforceable obligations. If a successor agency adds additional enforceable obligations, the slower this stream of property tax revenue returns to these taxing entities.

Recognizing that county auditor-controllers were not able to make scheduled payments to affected taxing entities due to the Supreme Court's ruling dissolving RDAs, AB 1484 (Committee on Budget, Chapter 26, Statutes of 2012) required auditor-controllers to make allocations in addition to the payments already scheduled to affected taxing entities, known as the "July true-up." AB 1484

provided certain steps to make these payments, and provided that, if an auditor-controller failed to send the payment demand to the successor agency by July 9, 2012, DOF or an affected taxing entity could file a writ of mandate to compel the auditor-controller to perform that duty, or be subject to specified penalties. If a successor agency failed to make the payment by July 12, 2012, DOF or any affected taxing entity can file for a writ of mandate to compel the successor agency to make the required payment or be subject to specified penalties, which can also be imposed on the city or county that created the RDA.

City of Selma. The City of Selma is located 16 miles southeast of the City of Fresno in Fresno County. Selma incorporated in 1893 and has a population of approximately 24,000 people. The city had an RDA that completed various economic development projects, including developing an industrial park and renovating the city's downtown. On July 9, 2012, the Fresno County auditor-controller sent the City of Selma's successor agency a letter demanding a July true-up payment of $434,938 by July 12, 2012. On August 27, 2012, DOF sent a letter to Selma saying that they reviewed the material it submitted but did not have the authority to reduce the amount the auditor-controller billed. They also stated they did not intend to pursue either the civil penalties or withhold sales and use tax allocations, but did advise the city that not paying the demand amount would result the city not receiving a finding of completion. Additionally, the SCO has not found that Selma has corrected the findings and orders stemming from its review. Since Selma did not meet these conditions, it cannot form or join an EIFD.

Comments

1) *Purpose of the bill.* According to the author, "Barring cities and counties who missed deadlines codified nearly a decade ago from ever forming an enhanced infrastructure financing district, even if they have since dispensed of assets as ordered and no longer have outstanding debts, has had an irreversible punitive impact on some of California's most disadvantaged communities. AB 2780 allows the City of Selma to establish an enhanced infrastructure financing district contingent upon re-engagement in good faith to address outstanding assets, debts, or bonds of redevelopment agencies created by the City. By allowing formation of EIFDs if specific conditions are met, this bill provides the City of Selma with additional tools to fund housing construction, social services centers, and climate resilience projects."

2) *Late bird gets the worm?* RDA dissolution law is explicit that successor agencies who did not receive their Finding of Completion by December 31, 2015, were never to receive one. In August 2012, DOF notified the City of

Selma that failing to remit its July true-up payment would preclude the city from receiving a finding of completion, which meant it would not have the benefits that came along with it. Despite the warning, the City of Selma never made the payment. Importantly, AB 2780 does not grant Selma a finding of completion, and all the benefits that go along with it. Instead, it allows the city to participate in an EIFD without a finding of completion, but only if it meets all the same conditions as the cities that did receive one. The Legislature may wish to consider whether the City of Selma should enjoy the benefit of forming an EIFD given it missed the statutory deadline to receive a finding, pursued litigation against the State, still has not made its July true-up payment (although it has indicated it is willing to do so), has not complied with SCO asset transfer review findings, and the precedent it would set for the remaining eight successor agencies without a finding of completion.

SUBJECT: Solid waste: thermoform plastic containers: postconsumer thermoform recycled plastic

SOURCE: rPlanet Earth

DIGEST: This bill requires that the total thermoforms sold by a producer in the state to, on average, contain specified minimum amounts of postconsumer recycled plastic per year, ranging from 20 to 30 percent.

Senate Floor Amendments of 8/25/22 align the medical exemption language with SB 54 (Allen, Chapter 75, Statutes of 2022), remove an alternative payment schedule for penalties, and clarify that the Department of Resources Recycling and Recovery (CalRecycle) can adjust penalties once a year based on inflation.

ANALYSIS:

Existing law:

1) Establishes, under the Integrated Waste Management Act of 1989 (IWMA), a state recycling goal of 75% of solid waste generated to be diverted from landfill disposal through source reduction, recycling, and composting. Requires each state agency and each large state facility to divert at least 50% of all solid waste through source reduction, recycling, and composting activities. (PRC §§ 41780.01, 42921, 42924.5)

2) Requires, under the California Beverage Container Recycling and Litter Reduction Act (Bottle Bill):
   a) That each new glass container manufactured in the state contain a minimum of 35% postfilled (recycled food container cullet) glass; (PRC §14549) and
   b) The total number of plastic beverage containers, between January 1, 2022, and December 31, 2024, subject to the CRV for sale in the state to, on average, contain no less than 10 percent postconsumer recycled plastic per year. Increases that amount to 25 percent between January 1, 2025, and December 31, 2029; and 50 percent on and after January 1, 2030. (PRC §14547)

3) Establishes the Rigid Plastic Packaging Container (RPPC) law, which requires that specified plastic containers that are made of plastic, capable of at least one closure, and hold a product sold in California to meet one of the following compliance options (PRC §42310):
   a) Contain a minimum of 25% postconsumer recycled content;
   b) Be source reduced by at least 10%, as specified;
   c) Be routinely reused or refilled at least five times;
   d) Achieve a 45% recycling rate; or,
   e) The product manufacturer consumes sufficient California-recycled content equivalent to achieving a 25% postconsumer recycled content rate.

4) Requires, under SB 54 (Allen, 2022), the Plastic Pollution Prevention and Packaging Producer Responsibility Act, certain single-use packaging and plastic single-use food service ware and would require producers, through a producer responsibility organization, to source reduce plastic covered material, ensure covered material sold, offered for sale, distributed, or imported in or into the state after January 1, 2032, is recyclable or compostable, and ensure that plastic covered material offered for sale, distributed, or imported in or into the state meets specified recycling rates.

This bill:

1) Defines, for the purposes of this bill:
   a) "Producer" as an entity who manufactures a product that is packaged in thermoform plastic containers and who owns or is the exclusive licensee of the brand or trademark under which the product is used in a commercial enterprise, sold, offered for sale, or distributed in the state. "Producer" does not include a person who produces, harvests, and packages an agricultural commodity on the site where the agricultural commodity was grown or raised and purchases less than 100,000 pounds of thermoform plastic containers annually.
   b) "Postconsumer thermoform recycled plastic" as plastic produced from the recovery, separation, collection, and reprocessing of a thermoform container that would otherwise be disposed of or processed as waste after consumer use;
   c) "Thermoform plastic container" as a plastic container such as a clamshell, cup, pod, tub, box, or other similar rigid, non-bottle packaging, formed from sheets of extruded resin and used to package items such as fresh produce, baked goods, nuts, deli items, and nonbottled beverages. It does not include thermoform containers that are:
      i) A lid or seal that does not contain plastic;
      ii) Packaging used for medical products, devices, or prescription drugs, drugs used for animals, infant formula, medical food, or fortified nutritional supplements;
      iii) Intended for return to the manufacturer for reuse;
      iv) Bottles subject to the Bottle Bill;
      v) Compostable in a safe and timely manner;
      vi) Comprised of a resin type that less than one million pounds of which are sold in California annually; or
      vii) Comprised of expanded polystyrene (EPS) if less than 40,000 pounds of EPS are sold in California annually.

2) Allows a recycling center to collect thermoform plastic containers.

3) Requires a producer to report to CalRecycle before March 1 of each year, the amount in pounds and by resin type of virgin and postconsumer thermoform recycled plastic used to manufacture thermoform plastic containers they sold in the state in the previous year.

4) Requires, beginning January 1, 2025, the total thermoform plastic containers offered for sale, distributed, or imported into the state by a producer to contain at least 10 percent post-consumer thermoform recycled plastic per year.

5) Requires, beginning January 1, 2028, the total thermoform plastic containers offered for sale, distributed, or imported into the state by a producer in the state to either:
   a) Contain at least 20 percent postconsumer thermoform recycled plastic per year if the recycling rate for a resin type that constitutes thermoform plastic containers equals or exceeds 50 percent for the calendar year 2026; or
   b) Contain at least 25 percent postconsumer thermoform recycled plastic per year.

6) Requires, beginning July 1, 2030, the total thermoform plastic containers offered for sale, distributed, or imported into the state by a producer in the state to either:
   a) Contain at least 20 percent postconsumer thermoform recycled plastic per year if the recycling rate for a resin type that constitutes thermoform plastic containers equals or exceeds 75 percent for the calendar year 2029; or
   b) Contain at least 30 percent postconsumer thermoform recycled plastic per year.

7) Subjects any producer that does not meet these requirements to an annual administrative penalty, to be collected annually. This penalty shall be equal to 20 cents, or $1 if the resin is EPS, per pound of virgin recycled plastic used by the producer to produce the plastic containers sold in the state.

8) Authorizes CalRecycle to adjust the penalties to account for inflation no more than once a year. Exempts this increase from the Administrative Procedures Act.

9) Allows these administrative penalties to be paid in quarterly installments. CalRecycle may grant a one-time extension, of up to 12 months, due to unforeseen circumstances.

10) Authorizes CalRecycle to conduct audits and investigations and take enforcement action, after giving notice and hearing, against a producer for the purpose of ensuring compliance with these requirements.

11) Requires CalRecycle to consider granting a reduction of the administrative penalties for the purpose of meeting the minimum postconsumer thermoform

recycled plastic requirements in this bill. When considering a reduction of penalties, they must consider:
   a) Anomalous market conditions;
   b) Disruption in, or lack of supply of, recycled plastic due to an unforeseen circumstance or event, such as a natural disaster;
   c) Other factors that have prevented compliance; or
   d) If the recycling rate is 60 percent or higher, lack of available supply due to purchases from outside the packaging industry.

12) Requires, in order to obtain a reduction in administrative fees, a producer to submit to CalRecycle a corrective action plan that details why they have failed to meet the requirement and the steps they will take to comply within the next reporting year.

13) Requires producers, if they fail to meet the requirements of this bill, to submit to CalRecycle a letter of explanation of the reasons they failed to meet the requirements.

14) Authorizes CalRecycle to issue corrective action plans to out-of-compliance producers, which producers will have two years to comply with.

15) Requires administrative penalties be deposited into the Thermoform Recycling Enhancement Penalty Account, which is created by this bill, and permits those moneys to be expended, upon appropriation, for the purpose of supporting the recycling, collection, and processing infrastructure of thermoforms in the state.

16) Requires a producer, under penalty of prejury, to report to CalRecycle and for CalRecycle to report on its website:
   a) The amounts in pounds of all thermoform plastic containers sold in or imported into the state for the preceding calendar year;
   b) The number of containers returned and refilled; and
   c) The amount in pounds of each type of postconsumer resin used in those containers;

17) Requires the producer to register and pay a registration fee for the reasonable regulatory costs for implementing the reporting requirement.

18) Requires the producer to maintain records of all sales purchases, exports, and information regarding the source of any postconsumer resin for verification services.

19) Allows actions pursuant to this bill that increase the collection, processing and recycling of scrap plastic materials by a producer or to develop grading or

classifications by a nonprofit organization of producers to not violate the Cartwright or Unfair Practices Act unless they are made by agreement between two or more producers to affect the price of materials, the output or production of products, or restrict the customers to which products will be sold.

20) Exempts from these requirements thermoform plastic containers used to package dairy products if CalRecycle determines that:
    a) The use of postconsumer recycled resins violates the federal Food and Drug Administration (FDA) rules or regulations on food package safety or any CalREcycle regulations adopting guidance from the FDA; or
    b) The use of postconsumer recycled resin is not technologically feasible or the supply of recycled plastic suitable to meet the minimum recycled content requirements is insufficient.

Background

1) *Solid waste in California continues to pile up.* For three decades, CalRecycle has been tasked with reducing disposal of municipal solid waste and promoting recycling in California through the IWMA. Under IWMA, the state has established a statewide 75% reduction, recycling, and composting goal by 2020. According to CalRecycle's State of Disposal and Recycling Report for Calendar Year 2020, approximately 77.4 million tons of material was generated in 2020; with about 52% sent to landfills; 17% exported as recyclables; 12% composted, anaerobically digested or mulched; and 13% either recycled or source reduced. According to the report: "We are falling far short of our 75 percent recycling goal."

2) *Market challenges for recyclable materials lead to more waste.* The U.S. has not developed significant markets for recyclable content materials. Approximately 50% of plastic waste collected for recycling in the United States is exported; in 2016, 88% of that material was exported to countries that lack the infrastructure to properly manage it, leading to open disposal or open burning contributing to ocean plastic pollution and toxic air and GHG emissions. In California, approximately one third of recyclable material is exported.

3) *Thermoforms*. Thermoforms include a wide range of plastic packaging created by heating sheets of plastic and then formeing into a specific shape in a mold. Common thermoforms include plastic "clamshell" trays used for take-out food, plastic egg cartons, and bakery trays. Most thermoforms are made from polyethylene terephthalate (PET), but can be made from a wide range of plastic resins. In California, thermoforms have included relatively high quantities of

recycled content; however, the source of its PET has been PET bottles, not thermoforms. While providing an important market for recycled bottle plastic, recycling PET bottles into thermoforms means that the bottle is recycled once and then discarded (thermoforms usually end up in landfills). Under AB 793 (Ting, Chapter 115, Statutes of 2020), bottle manufacturers are required to include recycled content to ensure that bottles are recycled back into bottles.

In jurisdictions that accept thermoforms in curbside recycling, only thermoforms made out of PET are usually accepted. The majority of PET thermoforms collected are baled with other PET, primarily bottles, even though bottles and thermoforms generally cannot be recycled together. As a result, recyclers separate the bottles and the thermoforms are discarded.

Comments

1) *Purpose of Bill.* According to the author, "Since shipping recyclables overseas is no longer a viable option, California must develop its own markets for recycled content materials. Thermoform containers, or clamshells, have a low collection rate and are infrequently recycled. As the state is making strides towards increasing minimum recycled content in plastic bottles, thermoforms must do the same. This bill encourages efficient use of recyclable plastics and moves California towards a closed loop recycling system for PET bottles and PET thermoforms. AB 2784 sets a minimum recycled content standard for thermoform containers used in food and beverage applications in California."

2) *Creating a market for thermoform recycling*. Recycling requires markets for the postconsumer material in order to close the loop and create a new product from the same original material. Unlike the Bottle Bill, which requires the minimum postconsumer recycled content amount to increase over time regardless of recycling rates, this bill creates a tiered structure within each compliance period and links the minimum amount of postconsumer thermoform recycled plastic of a particular resin type to the recycling rate of that same resin type. If the recycling rate for a particular resin type is low, the minimum content requirements will be higher; and vice versa. Ramping up the minimum content requirements, according to the author, will drive up the recycling rate for that resin type while creating a market for recycling thermoforms.

3) *Why single out expanded polystyrene (EPS)?* This bill singles out EPS resins with lower threshold of pounds produced in the state necessary to trigger its requirements than any other resin. EPS is commonly known by the brand name Styrofoam. As most people have experienced, EPS is extremely lightweight

and so it only takes up a tiny percent of the total municipal solid waste stream by weight. However, EPS takes up a great deal of space and so it contributes a disproportionately large of the volume of the waste stream. As the triggers in this bill are based on pounds of resin sold in the state it makes sense to set a different threshold for the lightweight but voluminous EPS.

4) *How does this bill complement SB 54?* This year the Legislature passed SB 54, which creates an extended producer responsibility program for packaging and single-use plastic food service ware. SB 54's primary concern is on reducing the amount of material, including plastic, that ends up in California landfills and allows producers several mechanisms to achieve that goal. AB 2784 complements these goals by establishing a demand for postconsumer thermoform material, which should drive the expansion of recycling infrastructure that will help the producers meet the goals of SB 54.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- If enacted this bill would result in unknown, likely significant costs for CalRecycle to implement the provisions of this bill.

- Unknown, potentially significant penalty revenue (Thermoform Recycling Enhancement Penalty Account).

ARGUMENTS IN SUPPORT: According to Californian's Against Waste, "For more than a decade, California-made PET thermoform packaging has contained high levels of PCR content, substantially reducing California's dependency on overseas markets for PET plastic recycling. However, most of this PCR was derived from PET beverage containers, and as the beverage industry moves to increase their own recycled content commitment to comply with AB 793 (Ting, Irwin), the thermoform packaging industry and their produce customers will need to transition to their own 'closed loop' recycling system.

"To address this issue, AB 2784 builds on the AB 793 model and establishes a uniform timeframe and 'even playing field' requirements for the increased use of PCR in all types of thermoform food packaging (non-food thermoform plastic—RPPCs--have had a recycled content obligation in California for more than 25 years), as well as a fair and reasonable 'penalty' for packaging that can not safely demonstrate compliance.

"Together, these provisions will help California packaging manufacturers, produce distributors, recyclers and the recycling-public, to work together to increase 'closed loop' recycling of this growing source of plastic packaging, while phasing out that package and packaging applications that can not demonstrate compliance with California's circular economy objectives."

ARGUMENTS IN OPPOSITION: According to the Agricultural Council of California, "The framework of AB 2784, while well intended, fails to provide a clear path forward to closed-loop recycling and would derail significant progress already made by our industry towards recycling thermoform plastics.

"California fresh fruit and vegetable brands have a long history of using more California post-consumer recycled content in clamshells than any other food packaging in California's grocery stores. Significant investment has been made in research on alternatives to plastic packaging and how to transition from using rPET bottles to recycled PET clamshells as a source for recycled content…

"AB 2784 exempts all non-food thermoforms, putting the financial burden of recycling thermoforms entirely on the food system. Carve outs like this only exacerbate the current recycling issues impacting the State by creating greater consumer confusion as to what can and should be recycled."

SUBJECT: Sheriffs: service of process and notices

SOURCE: Domestic Abuse Center
The People Concern

DIGEST: This bill requires a marshal or sheriff to accept an electronically signed notice or other process issued by a superior court in a civil action, including service of orders and other court documents for the purpose of notice, for persons with a fee waiver on January 1, 2024, and for all persons beginning January 1, 2026.

Senate Floor Amendments of 8/25/22 create the delayed implementation framework for the acceptance of electronic service requests in response to feedback from sheriffs' offices; and require acceptance of electronic service requests from persons not required to pay a fee beginning January 1, 2024, and from all persons beginning January 1, 2026, so as to give sheriffs' and marshals' departments time to develop infrastructure to accept payment for service fees.

ANALYSIS:

Existing law:

1) Requires a sheriff to serve all process and notices in the manner prescribed by law. (Gov. Code, § 26608.)

   a) "Process" includes all writs, warrants, summons, and orders of courts of justice, or judicial orders. (Gov. Code, § 26660(a).)

   b) "Notice" includes all papers and orders required to be served in any proceedings before any court, board, or officer, or when required by law to be served independently of such proceeding. (Gov. Code, § 26660(b).)

2) Provides that all writs, notices, or other process issued by superior courts in civil actions or proceedings may be served by any duly qualified and acting marshal or sheriff of any county in the state, subject to the Code of Civil Procedure. (Gov. Code, § 26665.)

3) Authorizes a party or their attorney to direct a sheriff to process service of court documents and provides that a sheriff is not liable for negligence or misconduct if the sheriff receives the written instructions for service in writing, including a writing transmitted electronically. (Code Civ. Proc., § 262.)

4) Provides that a sheriff or other ministerial officer is justified in the execution of, and shall execute, all process and orders regular on their face and issued by competent authority, whatever may be the defect in the proceedings upon which they were issued. (Code Civ. Proc., § 262.1)

5) Establishes the Levying Officer Electronic Transactions Act, which authorizes, but does not require, a sheriff or other levying officer to process service of documents transmitted to them electronically. (Code Civ. Proc., pt. 1, tit. 4, ch. 2, §§ 263 et seq.)

6) Defines the following relevant terms:

   a) "Electronic record" means a document or record created, generated, sent, communicated, received, or stored by electronic means.

   b) "Instructions" and "levying officer instructions" means a written request to a levying officer to serve process, perform a levy, execute an arrest warrant, or perform some other act.

c) "Record" means information that is inscribed on a tangible medium, or that is stored in an electronic or other medium and is retrievable in perceivable form. (Code Civ. Proc., § 263.1.)

7) Requires an electronic record transmitted to a levying officer to be accompanied by all of the following information:

a) The name of the sender.

b) The electronic address of the sender.

c) The name of the levying officer.

d) The electronic address or fax number of the levying officer. (Code Civ. Proc., § 263.4(b).)

8) Requires the person transmitting the electronic record to the levying officer to:

a) Retain the paper version of the record or document; and

b) Deliver the paper version of the record or document to the levying officer within five days after a request to do so has been mailed to the sender by the levying officer. (Code Civ. Proc., § 263.4(c).)

This bill:

1) Provides that a Judicial Council form provided to request service pursuant to 8), and the information contained therein, are exempt from disclosure under the Public Records Act.[1]

2) Provides that, notwithstanding any other law, a marshal or sheriff, including their department or office, shall accept an electronic signature, and shall not require an original or wet signature, on a document requesting the marshal or sheriff to serve court documents or on a summons, order, or other notice to be served.

a) "Notice" for purposes of this provision means all papers and orders required to be served in any proceedings before any court, board, or officer, or when required by law to be served independently of such proceeding.

[1] Because this provision does not take effect until January 1, 2023, the statutory reference is to the Public Records Act following its recodification. (*See* AB 473 (Chau, Ch. 614, Stats. 2021).)

3) Prohibits a marshal or sheriff, including their department or office, from reviewing the substance of a summons, order, or other notice to be served except for the following:

   a) That the applicable transmission form or forms created under 7) are present and that the required sections, if any, are complete.

   b) That a case number appears on the summons, order, or other notice to be served; blank forms, such as responsive forms, are not required to include a case number.

   c) That an order to be served, including a restraining order, bears the signature of the judge, including, but not limited to, a stamp or other endorsement or representation of the signature of a judge, certification of a clerk, or court endorsement or seal, and the information on the order materially matches the information regarding the person to be served on the form or forms.

4) Requires, beginning January 1, 2024, a marshal or sheriff, including their department or office, to accept transmission of the form or forms described in 7) and the summons, order, or notice to be served by email, fax, or in-person delivery from a person who has a fee waiver or is otherwise exempt from paying fees for service.

   a) In-person delivery may be accomplished by any person on behalf of the litigant.

   b) The marshal or sheriff shall not charge or collect a fee for service described in 4).

5) Requires, beginning January 1, 2026, a marshal or sheriff, including their department or office, to accept transmission of the form or forms described in 7) and the summons, order, or notice to be served by email, fax, or in-person delivery from any person.

   a) In-person delivery may be accomplished by any person on behalf of the litigant.

   b) The marshal or sheriff shall not charge or collect a fee for service requested by a person with a fee waiver or who is otherwise exempt from paying fees for service.

   c) The marshal or sheriff may charge a fee for other persons, provided that the fee does not exceed the actual cost incurred in processing the transmission.

6) Provides that 4)-5) shall not be construed to impede a private process server's rights or obligations, including, but not limited to, the ability to serve a notice or other process requested by a client.

7) Requires Judicial Council, on or before January 1, 2024, to create a statewide form or forms to be used by litigants in civil actions or proceedings to request service of process or notice by a marshal or sheriff, including their department or office.

8) Requires a marshal or sheriff, including their department or office, to accept an electronic signature on, and prohibits them from requiring an original or wet signature on, the form or forms created pursuant to 7).

9) Requires the form created pursuant to 7) to do all of the following:

    d) Require the name, address, and description of the person to be served and the signature of the litigant requesting service or their attorney of record. The form may also require additional information pertinent for service.

    e) Indicate on the form which fields on the form, if any, are required.

    f) Allow the litigant's or their attorney of record's signature to be made electronically.

10) Provides that the Judicial Council form or forms and the information contained therein are not subject to disclosure and shall be kept confidential.

11) Provides that 2)-10) become operative on January 1, 2024.

Comments

In recent years, the Legislature and California courts have worked together to modernize court operations and incorporate the use of technology into the legal system. Many civil court documents can be filed electronically, proceedings can occur remotely, and documents can be transmitted between parties using electronic means. Systems that facilitate the service of process, however, have not kept pace with these changes. Under current law, levying officers, including sheriffs' departments may, but are not required to, serve notice or other documents transmitted to them electronically. This discretionary regime leaves many litigants—who do not have a car, or who might be required to serve their abuser—with no good means for accomplishing service. Proponents of this bill also note that, in some cases, sheriffs' offices have refused to serve documents on

substantive grounds, essentially replacing their judgment for that of the bench officer who issued the original document.

This bill is intended to bring service of process in line with other state laws recognizing the validity of electronic transmission and service by requiring marshals and sheriffs, and their departments and offices, to serve notices, including court documents and orders, transmitted to them electronically for persons with a fee waiver beginning January 1, 2024, and for all persons requesting service beginning January 1, 2026. The staggered implementation date is intended to give sheriffs' departments time to implement payment processing infrastructure. This bill also requires Judicial Council to create a form or forms that will be mandatory for individuals electronically transmitting a document to a marshal or sheriff for service.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Unknown, potentially reimbursable one-time and ongoing costs to local sheriff departments across the state for additional infrastructure and staff for to accept electronic documents for service (Local Funds, General Fund).

- Minor and absorbable costs to the Judicial Council to create a statewide form to request service of process by a sheriff or marshal.

OPPOSITION: (Verified 8/26/22)

Riverside County Sheriff's Department

ARGUMENTS IN SUPPORT: According to The People Concern, one of the sponsors of the bill:

> The vulnerable populations we serve are unable to hire private process services, and are forced to rely on the Sheriff's Department for the service of their restraining orders. But for decades, they have had requests for service rejected because they could not meet the Sheriff's Departments' arbitrary and capricious requirements. In many cases, especially where firearms may be involved, Sheriff's service is safer for the victim and their friends and family members. Additionally, until an order is served, a restrained party may not relinquish currently owned firearms and may not be identified as a prohibited person when attempting to purchase a firearm. Service, therefore, is a critical part of ensuring that restraining orders provide the court-ordered protection, as intended. Unfortunately, recent headlines highlight the tragic consequences if this doesn't happen.

> For survivors of intimate partner violence, the COVID-19 pandemic has been particularly difficult. Domestic violence shelters have been limited in the number of families that can be housed safely and victims have often been forced to be confined with their abuser. For survivors, the process to serve a [domestic violence restraining order] or [temporary restraining order] has been complicated by the unnecessary and unsafe requirement of some departments to require victims to deliver paper documents—in person—even during a pandemic. With courts expanding e-filing options, service of process needs to be equally flexible and safe. Timely service of orders appropriately signed by a judicial officer is necessary to protect vulnerable individuals and victims of domestic violence. AB 2791 will provide survivors with an important option to ensure safe, timely court access and prevent future harm to these victims.

ARGUMENTS IN OPPOSITION: According to the Riverside County Sheriff's Department, writing in opposition:

> As law enforcement officers who operate under the color of authority, it is common sense that we do not enforce or serve invalid court orders. This bill only permits law enforcement personnel to inspect documents for: 1) a valid case number, 2) the address of the person to be served, and 3) for the judge's signature and court seal. Limiting our ability to inspect the remaining content could lead to disastrous results…
>
> Without the opportunity for our office staff and deputies to review the substance of writs, notices, or other process of service issued by Superior Courts, our agency is unnecessarily exposed to civil and criminal liability. This could lead to exorbitant amounts of money spent on litigation defending our actions in court. More importantly, this could lead to dangerous confrontations between law enforcement and innocent parties.
>
> I cannot in good conscious [*sic*] direct my deputies and agency to serve orders blindly without first making a cursory inspection of those documents for accuracy, validity, and legal sufficiency.

Amended: 8/24/22 in Senate
Vote: 27 - Urgency

SENATE GOVERNANCE & FIN. COMMITTEE: 5-0, 6/22/22
AYES: Caballero, Nielsen, Durazo, Hertzberg, Wiener

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 74-0, 5/23/22 - See last page for vote

SUBJECT: Freight: development projects

SOURCE: Author

DIGEST: This bill prohibits a local agency, until January 1, 2024, from denying a permit for a short-term freight transportation use under specified circumstances, and provides that specified transportation uses on port properties are existing facilities for the purposes of the California Environmental Quality Act (CEQA).

Senate Floor Amendments of 8/24/22 add provisions related to CEQA.

ANALYSIS:

Existing law:

1) Allows cities and counties to "make and enforce within its limits, all local, police, sanitary and other ordinances and regulations not in conflict with general laws." It is from this fundamental power (commonly called the police power) that cities and counties derive their authority to regulate behavior to preserve the health, safety, and welfare of the public—including land use authority.

2) Requires, under the California Environmental Quality Act (CEQA), lead agencies with the principal responsibility for carrying out or approving a

proposed project to prepare a negative declaration, mitigated negative declaration, or an environmental impact report (EIR) unless the project is exempt from CEQA.

3) Establishes statutory exemptions from CEQA, as well as delegates authority to the Natural Resources Agency to establish categorical exemptions—categories of projects that are generally are considered not to have potential impacts on the environment—including a categorical exemption for existing facilities.

This bill:

1) Prohibits a local agency from denying a permit for a short-term freight transportation use, as defined, that is submitted by a developer on a parcel if the proposed use is in conformity with all applicable plans, programs, and ordinances, among other things, that apply to the land, solely because the developer has a pending development application, or is concurrently submitting a development application, for a freight transportation project on that land.

2) Restricts the application of its provisions to land zoned for industrial or agricultural uses, subject to specified conditions, as of the date of the application submission.

3) Provides that:

   a) No actions, ministerial or discretionary, are authorized, required, or directed by the bill to a local agency other than those permitting requirements imposed by other applicable law.

   b) This bill does not supersede any other local, state, and federal laws applicable to short-term freight transportation uses except as specifically provided.

4) Provides that when the governing body of a California port or its designee adopts real estate agreements, tariffs, ordinances, or other applicable entitlements to allow for a short-term port freight transportation use or freight transportation infrastructure, the use shall be considered an existing facility for purposes of CEQA.

5) States the Legislature's intent to clarify that a project may be eligible for an exemption established pursuant to Section 21084 of the Public Resources Code, including, but not limited to, specified exemptions.

6) Defines its terms.

7) Repeals its provisions on January 1, 2024.

Background

Supply chain challenges. According to a recent publication by the Legislative Analyst's Office, "In order for businesses to produce and deliver goods and services to the consumer, goods must be transported from one place to another. Businesses often use ports, freight rail, and commercial trucks to move goods across international and state lines. For example, about 40 percent of U.S. imports and 25 percent of U.S. exports pass through the Ports of Los Angeles and Long Beach, which are both situated on San Pedro Bay…. In recent months, ports have experienced higher than normal levels of congestion. This is in part due to greater consumer demand for goods, which has resulted in a record volume of cargo at many ports. For example, in 2021, the San Pedro Bay ports processed 14.3 percent more cargo than in 2018. As a result, there is a growing backlog of ships waiting to offload and pick up goods at ports… Across all goods and services purchased by U.S. consumers, prices have risen by 7 percent over the past year, a considerably faster rate than recent history. Rising consumer prices primarily arise from a surge in the amount of goods consumers want to buy met with businesses struggling to produce and deliver those goods. One result of this dynamic is a dramatic increase in ocean freight costs, which businesses may pass on to consumers through higher prices. Port congestion appears to be a key driver of rising freight costs. Port congestion also may reduce the availability of some goods to retailers, which could increase the prices of some consumer goods."

The author wants to streamline the development of certain freight transportation uses.

Comments

Purpose of this bill. According to the author, "Assembly Bill 2798 is an immediate solution to remove congestion at the ports and improve California's freight transportation infrastructure. The supply chain crisis caused an unforeseeable disruption of our economy, and this bill will establish short-term permit and planning streamlining which will expand California's capacity to get our supply chain back on track."

SUBJECT: Childcare and developmental services: preschool: expulsion and suspension: mental health services: reimbursement rates

SOURCE: Black Men for Educational Excellence
Kidango

DIGEST: This bill expands the existing prohibition on expelling children from state preschool programs to also prohibit the suspension of children enrolled in state preschool programs, and extends the prohibition on suspension and expulsion of children to include those enrolled in child care programs, with exception.

Senate Floor amendments of 8/25/22 (1) expand the prior experience needed to provide early childhood mental health consultation to also include those with experience in the field of social work or other related fields, as determined by CDE; (2) require CDE and DSS each to issue guidance by December 31, 2023, in consultation with the other department, through management bulletins or similar letters of instruction until regulations are filed; (3) clarify that "family childcare provider" is licensed and provides subsidized care; (4) delay several dates by

which CDE and DSS are to take specified actions from *before* July 1, 2023, to *beginning* July 1, 2023; (5) delay the date by which CDE and DSS are to collect information from contracting agencies, and makes such collection of information contingent on an appropriation; (6) require the collection of data and reporting by CDE and DSS to be undertaken within the framework of each department's existing data systems, to the greatest extent possible; and, (7) delete provisions related to the Joint Labor Management Committee making recommendations.

ANALYSIS:

Existing law:

1) Defines "early childhood mental health consultation service" to mean a service benefiting a child who is served in a California state preschool program, an infant or toddler who is 0 to 36 months of age and is served in a general childcare and development program, or a child who is 0 to 5 years of age and is served in a family childcare home education network setting funded by a general childcare and development program that includes, but is not limited to:

    a) Support to respond effectively to all children, with a focus on young children with disabilities, challenging behaviors, and other special needs.

    b) Assistance through individual site consultations, provision of resources, formulation of training plans, referrals, and other methods that address the unique needs of programs and providers.

    c) Aid to providers in developing the skills and tools needed to be successful as they support the development and early learning of all children, including observing environments, facilitating the development of action plans, and supporting site implementation of those plans.

    d) The development of strategies for addressing prevalent child mental health concerns, including internalizing problems, such as appearing withdrawn, and externalizing problems, such as exhibiting challenging behaviors.

    e) If a child exhibits persistent and serious challenging behaviors, support with the pursuit and documentation of reasonable steps to maintain the child's safe participation in the program. (WIC § 10281, EC § 8243)

2) Provides that the early childhood mental health consultation service is to be supervised and provided by a licensed marriage and family therapist, a licensed

clinical social worker, a licensed professional clinical counselor, a licensed psychologist, a licensed child and adolescent psychiatrist, or others, as specified. (WIC § 10281(b)(2), EC § 8243(b)(2))

3) Prohibits, in federal regulations, a Head Start program from expelling or disenrolling a child from Head Start based on the child's behavior and requires a program to prohibit or severely limit the use of suspension due to a child's behavior, as specified. (Code of Federal Regulations, Title 45 § 1302.17)

4) Prohibits a state preschool program contracting agency from expelling or disenrolling a child because of the child's behavior, *except* as described in # 7 below. (EC § 8222)

5) Authorizes a state preschool contracting agency to disenroll a child *only if* the contracting agency has expeditiously pursued and documented reasonable steps to maintain the child's safe participation in the program and determines, in consultation with the parents or legal guardians of the child, the child's teacher, and, if applicable, the local agency responsible for implementing the federal Individuals with Disabilities Education Act, that the child's continued enrollment would present a continued serious safety threat to the child or other enrolled children. (EC § 8222)

6) Requires a state preschool contracting agency, if it disenrolls a child, to refer the parents or legal guardians to other potentially appropriate placements, the local childcare resource and referral agency, or any other referral service available in the local community. A contracting agency has up to 180 days to complete the referral and process in # 7. (EC § 8222)

This bill:

Expulsion

1) Extends to general child care programs serving children birth through age five years the existing provisions that prohibit a state preschool program from doing either of the following, except as provided in # 5:

    a) Expel or disenroll a child because of a child's behavior.

b) Persuade or encourage a child's parents or legal guardians to voluntarily disenroll from the program due to a child's behavior.

2) Expands existing requirements and steps a program must take if a child exhibits persistent and serious behaviors, to include engaging an early childhood mental health consultant, if available.

3) Expands information that is to be provided to parents or guardians of a child who exhibits persistent and serious behaviors to include a description of the behaviors and the program's plan for maintaining the child's safe participation in the program.

4) Extends to general child care programs existing requirements that apply to state preschools related to (a) contacting agencies responsible for the individualized family service plan (IFSP) or individualized education program (IEP), if applicable, to seek consultation on serving the child; and, (b) completing a comprehensive screening to identify the needs of the child, including, but not limited to, screening the child's social and emotional development, referring the child's parents or legal guardians to community resources, and implementing behavior supports within the program.

5) Extends to general child care programs to authority to disenroll a child if the program has done both of the following within a 180 day timeframe:

a) Expeditiously pursued and documented reasonable steps to maintain the child's safe participation in the program and determines, in consultation with the parents or legal guardians of the child, the child's teacher, and, if applicable, the local agency responsible for implementing the federal Individuals with Disabilities Education Act, that the child's continued enrollment would present a serious safety threat to the child or other enrolled children; and,

b) Refer the parents or legal guardians to other potentially appropriate placements, the local childcare resource and referral agency, or other referral services available in the local community, and, to the greatest extent possible, support direct transition to a more appropriate placement.

Suspension

6) Prohibits a state preschool program and a general child care program from doing either of the following, except as provided in # 7, # 8, and # 9:

    a) Suspend a child due to a child's behavior.

    b) Encourage or persuade a child's parents or legal guardians to prematurely pick up a child due to a child's behavior before the program day ends.

7) Authorizes suspension to be used only as a last resort in extraordinary circumstances when there is a serious safety threat that cannot be reduced or eliminated without removal. Requires a program, to the greatest extent possible, to endeavor to ensure the full participation of enrolled children in all program activities.

8) Requires a program, before it determines that suspension is necessary, to collaborate with the child's parents or legal guardians and use appropriate community resources, as needed, to determine no other reasonable option is appropriate, and provide written notice to the child's parents or legal guardians.

9) Requires a program, if suspension is deemed necessary, to help the child return to full participation in all program activities as quickly as possible while ensuring child safety by doing all of the following:

    a) Continuing to engage with the parents or legal guardians and continuing to use appropriate community resources.

    b) Developing a written plan to document the action and supports needed.

    c) Providing referrals to appropriate community services.

    d) Contact the agency responsible for the IFSP or IEP, as appropriate, with written parental consent, to seek consultation on serving the child.

Mental health consultation service

10) Modifies the definition of "early childhood mental health consultation service" to clarify who is to receive support (families, providers, caregivers) and to

include the creation of trauma-informed, proactive inclusive environments.

11) Expands early childhood mental health consultation to include (a) face-to-face interactions or video-based platforms and other modes of communication that are compliant with the federal Health Insurance Portability and Accountability Act, such as the telephone; and, (b) group or individual consultations of any of the specified actions.

12) Modifies the frequency at which early childhood mental health consultation services may occur in order for reimbursement, from a "consistent frequency to ensure a mental health consultant is available to partner with staff and families in a timely manner", to the service being provided continuously throughout the program year.

13) Expands the existing list of licensed mental health professionals who are to provide early childhood mental health consultation to include a credentialed school psychologist and a credentialed school counselor.

Comments

Need for the bill. According to the author, "Across California, children are expelled and suspended from preschool at alarming rates and in situations where more support for the child, teacher, and program could have prevented unnecessary exclusionary discipline and instead, kept the child in school and on track to stronger outcomes in school and life. Furthermore, these suspensions and expulsions are disproportionately impacting African American/Black and Hispanic/Latino children and students of color, especially boys of color, children with disabilities, and dual-language learners. It is counterproductive for our state to allow early learning and care settings to exclude children at a time when they are most in need of support, care, and guidance."

Masterplan for Early Learning and Care. In December 2020, the California Health and Human Services Agency released the Master Plan for Early Learning and Care to create a roadmap and recommendations for expanding and improving California's early learning and care system over the next five to ten years. Within the Master Plan are recommendations to address equity in early learning and care programs. Among the solutions were the suggestion that, "Providers should also agree to a no-exclusionary-practice clause (banning suspensions and expulsions) as a condition of state or federal funding, as these practices disproportionately affect children of color and children with disabilities." Additionally, the Master Plan suggested that the state, "should collect suspension, expulsion, and discipline data,

disaggregated by gender, age, race, ethnicity, home language, and disability, to focus on support for providers, including technical assistance, anti-bias training, and early childhood mental health consultation." This bill essentially implements these recommendations.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

1) The CDE estimates one-time General Fund in the hundreds of thousands of dollars each year for various administrative activities as a result of this measure. These activities include providing staff training and technical assistance to state preschool program providers, ensuring data collection and publication, and development of guidance for the state preschool program on implementing the new requirements by July 1, 2023. {Policy staff notes the most recent amendments delay implementation until beginning after July 1, 2023, and provide the collection and reporting of data is contingent upon an appropriation.}

2) The DSS estimates General Fund costs that could range from $5 million to $14 million for workload activities associated with the childcare programs. DSS indicates there could be additional costs of between $1 million and $10 million for implementing statewide collection, processing, and publishing of the required data from contracting agencies.

3) The bill's expansion of the mental health consultant definitions could result in increased access to mental health consultation services for contractors and allow them to utilize the provider reimbursement rate adjustment factors for these additional expenses.

4) The bill's requirement that state preschool program providers take specified steps to address students' behaviors prior to expelling or disenrolling them could potentially create additional, unknown local costs for providers.

SUBJECT: Disqualification from voting

SOURCE: American Civil Liberties Union California Action
League of Women Voters of California

DIGEST: This bill requires the Secretary of State (SOS) to post data showing the number of conservatorship voting rights disqualifications and restorations by county, and to provide training to court and county staff related to conservatorship voting rights to ensure compliance with existing law. This bill also requires a county elections official, before canceling a voter's registration, to notify the voter and provide the voter with an opportunity to correct an erroneous cancellation, as specified. Provides that this bill shall become operative on January 1, 2024.

ANALYSIS:

Existing federal law:

1) Requires each state, pursuant to the National Voter Registration Act (NVRA), to conduct a general program that makes a reasonable effort to remove the names of ineligible voters from the official lists of eligible voters by reason of death of the registrant, or a change in the residence of the registrant, as specified.

2) Prohibits, pursuant to NVRA and the Help America Vote Act, the removal of a voter from the list of eligible voters in elections for federal office on the grounds that the registrant has changed residence unless, either: a) the registrant confirms their change in residence in writing, as specified, or b) the registrant has failed to respond to a specified notice and has not voted or appeared to vote in an election between the time that the notice is sent and the date of the second federal general election after the notice is sent.

Existing state law:

1) Permits a person who is a United States citizen, a resident of California, not imprisoned for the conviction of a felony, not found mentally incompetent to vote by a court, and at least 18 years of age at the time of the next election, to register to vote and to vote.

2) Provides that the Legislature shall prohibit improper practices that affect elections and shall provide for the disqualification of electors while mentally incompetent or imprisoned for the conviction of a felony.

3) Requires each county elections official to conduct a pre-election residency confirmation of each registered voter prior to each primary election pursuant to one of several specified procedures.

4) Provides that actions shall be taken with respect to information that the county elections official receives from the USPS or its licensees as a result of the pre-election residency confirmation process, as specified.

5) Provides that any voter whose registration is inactive and who offers to vote or who notifies the elections official of a continued residency shall be removed from the inactive list and placed on the active voter list.

6) Requires the county elections official to cancel a voter's registration in the number of cases, as specified cases: a) a signed, written of the person registered; b) the person lacks mental competency as established pursuant to existing law; c) proof that the person is presently imprisoned for conviction of a felony; d) a certified copy of a judgment directing the cancellation to be made; e) upon the death of the person registered; f) upon notification as part of a pre-election residency confirmation procedure that the person has moved, but only after a specified notification is sent to the voter, and the voter subsequently fails to vote or update their voter registration during the period between the time that notification is mailed and two federal general elections after the date of that mailing; g) upon official notification that the voter is registered to vote in another state; or, h) upon proof that the person is otherwise ineligible to vote.

7) Permits the SOS to cancel a voter's registration in the following cases: a) when the mental incompetency of the person registered is legally established pursuant to existing law; b) upon proof that the person is presently imprisoned for the conviction of a felony; c) upon the death of the person registered.

8) Provides that a person is presumed competent to vote regardless of their conservatorship status.

9) Requires a person to be deemed mentally incompetent, and therefore disqualified from voting, if a court or jury, as specified, finds by clear and convincing evidence that the person cannot communicate, with or without reasonable accommodations, a desire to participate in the voting process.

10) Prohibits a person from being disqualified from voting on the basis that the person did any of the following: a) signed the affidavit of voter registration with a mark or cross pursuant to existing law; b) signed the affidavit of voter registration by means of a signature stamp; c) completed the affidavit of voter registration with the assistance of another person; or, d) completed the affidavit of voter registration with reasonable accommodations.

11) Requires a court investigator, as part of the process for establishing or reviewing a conservatorship of a person, to review the person's capability of communicating, with or without reasonable accommodations, a desire to participate in the voting process, as specified. Requires a court investigator, if the conservatee's capability of communicating a desire to participate in the voting process has changed, to inform the court and requires the court to hold a

hearing regarding the capability, as specified.

12) Requires a court to forward the order to the county elections official and the SOS if it is found by clear and convincing evidence that the person cannot communicate, with or without reasonable accommodations, a desire to participate in the voting process, or that the person can communicate, with or without reasonable accommodations, a desire to participate in the voting process.

This bill:

1) Requires a county elections official, between 15 and 30 days before canceling a person's registration on the grounds that the person is mentally incompetent, imprisoned for a conviction for a felony, death, has changed residence, or is proven otherwise ineligible to vote, to send a forwardable notice by first class mail, including a postage-paid and preaddressed return form, to the person, as specified.

2) Provides that a county elections official may send additional written notices to a voter, and may also notify the voter in person, by telephone, email or other means of planned registration cancellation.

3) Requires the clerk of the superior court of each county, by the first day of each month, and more frequently if the clerk so chooses, to notify the SOS pursuant to the provisions of this bill of both of the following: a) all findings made by the court regarding any person's competency to vote, since the clerk's last report; b) the total number of proceedings in which an individual was deemed disqualified from voting, that occurred in that court since the clerk's last report.

4) Requires the Judicial Council, in consultation with the SOS, to adopt rules of court to implement the provisions of this bill, and the Judicial Council forms that are used by courts to provide the notices to the SOS previously described. Requires the forms to contain clearly identified spaces for specified information, including personal identifying information.

5) Requires the SOS to inform the clerk of the court when it receives a notice from the court that is missing any personal identifying information as specified.

6) Requires the SOS, upon receipt of all of the required personal identifying information, to do both of the following: a) identify any registration record in the statewide voter database that contains personal identifying information that matches each of the unique identifiers in the information supplied to it, and b) within three days of receiving the information from the court, for any matched records, to provide the personal identifiable information, the corresponding unique identifier or identifiers contained in the statewide voter database, and a statement regarding whether the legal effect of the court's order is to disqualify or restore the right to vote, to the appropriate county elections official.

7) Requires the county elections official, upon receiving information from the SOS to either begin cancellation notification procedures or notify the person that their voting rights are restored, as specified.

8) Provides that a county or county elections official is not liable for taking or failing to take action when the county or county elections official has received erroneous information from the SOS.

9) Provides if a person who is ineligible to vote receives a notice pursuant to this bill that the person's right to vote has been restored, and subsequently becomes registered or preregistered to vote, and votes or attempts to vote in an election held after the effective date of the person's registration or preregistration, that person shall be presumed to have acted with official authorization and shall not be guilty of fraudulently voting or attempting to vote pursuant to existing law, unless that person willfully votes or attempts to vote knowing that the person is not eligible to vote.

10) Requires the SOS, each month, to post on its website a report showing the number of voting rights disqualifications and voting rights restorations that were ordered within each county and the number of court proceedings in each county in which a person was deemed mentally incompetent, and therefore disqualified from voting.

11) Requires the SOS, in consultation with the Judicial Council, to prepare and deliver a training that contains information about the responsibilities of superior courts and county elections officials and information about the legal standards for voting rights disqualification, the duties of court investigators, and the reporting requirements for courts related to voting rights disqualification and restoration.

12) Makes additional conforming changes.

13) Provides that this bill shall become operative on January 1, 2024.

Background

Brennan Center Report. A 2008 Brennan Center for Justice report titled "Voter Purges" examined state practices for updating voter registration lists and the removal of voters from those lists, referred to in the report as "purging" the voter rolls. Their analysis is based on a review and examination of state statutes, regulatory materials, and news reports in twelve states. The report makes various policy recommendations and details best practices to reduce the occurrence of erroneous purges and protect eligible voters from erroneous purges.

One of the best practices recommended in the report is that a voter should be individually notified and given the opportunity to correct any errors or omissions, or demonstrate eligibility, before the voter's registration is canceled.

The report additionally suggests that states should develop and publish rules and procedures for curing a voter's erroneous inclusion in an impending purge. For registrants who have been purged from the voter registration list, the report recommends that states should explicitly set out a means by which they may be restored easily to the voter registration list, without regard to the voter registration deadline.

Comments

1) According to the author, this voting rights bill would address two procedural concerns: 1) conservatorship voting rights clean-up and 2) notice of registration cancellation.

   Although California has made some improvements to protections for the rights of people with disabilities in recent years, voters with disabilities are still underrepresented in our democracy. And while there has recently been an increase in public awareness about the urgency of protecting the rights of people with disabilities who are placed under conservatorship, more must be done to ensure that eligible voters under conservatorship are not wrongly excluded from the ballot box.

   Errors in existing reporting systems and overly aggressive voter purges lead to the disenfranchisement of eligible voters. Studies show that these erroneous cancellations disproportionately impact voters who are Black, Brown,

Indigenous, or other people of color, low-income, and young people. AB 2841 would implement best practices for preventing the disenfranchisement of eligible voters by requiring county elections officials to notify affected voters before cancelling their registration and to give those voters an opportunity to stop erroneous cancellations before they happen.

Related/Prior Legislation

SB 589 (Block, Chapter 736, Statutes of 2015) authorized an individual with a disability who is otherwise qualified to vote to complete an affidavit of registration with reasonable accommodations as needed and presumes that a person is mentally competent to vote, regardless of their conservatorship status, if the court finds that the person can communicate a desire to participate in the voting process.

AB 1311 (Bradford, Chapter 591, Statutes of 2014) prohibited a person, including a conservatee, from being disqualified from voting on the basis that the person signs the affidavit of voter registration with a mark or a cross, signs the affidavit of voter registration with a signature stamp, or completes the affidavit of voter registration with the assistance of another person.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- SOS indicates that it would incur General Fund costs of $1.3 million to implement its provisions of the bill. Cost drivers include (1) additional staff and IT infrastructure to accommodate filings and data development, (2) a third-party vendor contract for secure electronic file transfers, and (3) updates to the VoteCal system as well as ongoing local user support related to changes to the county VoteCal system.

- By requiring county elections officials to provide notice of the intent to cancel a person's registration between 15 and 30 days before the cancellation, as specified, and provide an opportunity for a voter to dispute or correct any incorrect cancellation, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on local agencies, local agencies could claim reimbursement of those costs (General Fund). The magnitude of the costs is unknown, but likely in the hundreds of thousands of dollars per election cycle.

SUBJECT: The Promote Ownership by Workers for Economic Recovery Act

SOURCE: SEIU California

DIGEST: This bill enacts the Promote Ownership by Workers for Economic Recovery Act establishing a panel to conduct a study regarding the creation of an Association of Cooperative Labor Contractors for the purpose of facilitating the growth of democratically run high-road cooperative labor contractors. The bill requires the study to consider specified issues and to be complete and publicly available by June 30, 2024.

Senate Floor Amendments of 8/17/22 delay the date of completion and public availability of the study from December 31, 2023 to June 30, 2024.

ANALYSIS:

Existing law:

1) Establishes the Nonprofit Corporation Law that recognizes the following:

   a) Public benefit corporations;
   b) Mutual benefit corporations; and
   c) Religious corporations.
   (Corporations Code §5000-10841)

2) Establishes the Nonprofit Mutual Benefit Corporation Law and provides that a corporation may be formed as a nonprofit mutual benefit corporation for any lawful purpose, provided that it is not formed exclusively for charitable purposes, religious, or public purposes, as specified. (Corporations Code §7110-8910)

3) Defines "worker cooperative" or "employment cooperative" as a corporation, formed under the Cooperative Corporations part of the Corporations code, which includes a class of worker-members who are natural persons whose patronage consists of labor contributed to or other work performed for the corporation. Election to be organized as a worker cooperative or an employment cooperative does not create a presumption that workers are employees of the corporation for any purposes. At least 51 percent of the workers shall be worker-members or candidates. (Corporations Code §12253.5)

4) Establishes the Labor and Workforce Development Agency (LWDA) to serve California workers and businesses by improving access to employment and training programs, enforcing California labor laws to protect workers and create an even playing field for employers, and administering benefits that include workers' compensation, unemployment insurance, and disability insurance and paid family leave. (Corporations Code §15550-15562)

5) Establishes, through Executive Order, the Future of Work Commission tasked with studying, among other matters, "the potential jobs of the future and opportunities to shape those jobs for the improvement of life for all of California," "policies and practices that will help California's businesses, workers, and communities thrive economically, while responding to rapid changes in technology and workplace structures and practices," "policies and practices that will close the employment and wage gap for Californians," "strategies for engaging employers in the creation of good, high-wage jobs of

the future," and "workforce development, training, education, and apprenticeship programs for the jobs of the future." (EO No-17-19)

This bill:

1) Finds and declares that:

    a) Worker cooperatives have been shown to convey wealth building and other significant benefits to workers, including autonomy from larger economic forces, more resiliency during economic downturns, lower workforce turnover, greater voice in health, safety, and other workplace issues, and more equitable pay.
    b) California-focused federated worker cooperative system may advance these objectives by encouraging the expansion of democratically run high-road cooperative businesses that promote equitable economic development, reduce inequality, and increase access to living-wage jobs.
    c) The Legislature wishes to study how a federated worker cooperative system could advance the goals of the Future of Work Commission, particularly as they apply to historically underresourced communities.

2) Creates the Promote Ownership by Workers for Economic Recovery Act (Act) establishing a panel to conduct a study regarding the creation of an Association of Cooperative Labor Contractors for the purpose of facilitating the growth of democratically run high-road cooperative labor contractors.

3) Requires staff from the Labor and Workforce Development Agency, or a subsidiary department thereof selected by the Secretary of Labor and Workforce Development, to assist the panel in its tasks.

4) Specifies that the panel shall consist of the all of the following members:

    a) The secretary or the director of a subsidiary department, as specified.
    b) The Director of the Governor's Office of Business and Economic Development.
    c) An appointee of the Speaker of the Assembly.
    d) An appointee of the President pro Tempore of the Senate.
    e) A representative from the Future of Work Commission, as specified.

5) Authorizes the panel, in preparing the study, to retain outside experts on high-road jobs, worker cooperatives, business formation, and other pertinent topics.

6) Requires the study to consider, at a minimum, how to do all of the following:

   a) Advance the goals of the Future of Work Commission.
   b) Incentivize the growth of the association and its members.
   c) Promote tenets of democratic worker control, including, but not limited to, uniform hiring and ownership eligibility criteria, worker-owners working most hours worked, most voting ownership interest being held by worker-owners, most voting power being held by worker-owners, and worker-owners exercising their vote on a one-person, one-vote basis.
   d) Ensure that the association's members offer high-road jobs, which include, but are not limited to, jobs with the right to organize and participate in labor organizations and jobs with minimum labor standards, as specified, a compensation ratio between the highest and lowest paid employees, minimum health expenditures, minimum retirement expenditures, and protections for individuals formerly in the criminal justice system.

7) Requires the panel, in preparing the study, to engage in a stakeholder process by which it consults with, at a minimum, organized labor, worker cooperatives, and business groups that can assess the opportunities and challenges associated with expanding workplace democracy in the major sectors of the economy throughout the state.

8) Requires the panel to complete the study and make it publicly available on the internet no later than June 30, 2024.

Background

Future of Work Commission: On August 14, 2019, Governor Newsom signed Executive Order No-17-19 establishing the Future of Work Commission. In March 2021, the Commission issued its report, "A New Social Compact for Work and Workers," recommending that, among other actions, California help (1) ensure the creation of sufficient numbers of jobs for everyone who wants to work, including by extending financial and technical assistance to mission-oriented businesses, (2) eliminate working poverty, including by creating supports for workers to organize in unions and worker associations as well as supporting "high-road" employment, (3) create a 21st-century worker benefits model and safety net, including by developing a portable benefits platform and encouraging apprenticeship and other skill-building programs, (4) raise the standard and share of quality jobs, including by creating a California Job Quality Incubator to support the increase of high-quality jobs, and (5) futureproof California with jobs and skills to prepare for

technology, climate, and other shocks, including by providing incentives to the private sector to invest in worker training.

Worker Co-Ops: A worker cooperative is a business that is owned and controlled by its workers, who constitute the members of the cooperative. The two central characteristics of worker cooperatives are:

- workers own the business and they participate in its financial success on the basis of their labor contribution to the cooperative
- workers have representation on and vote for the board of directors, adhering to the principle of one worker, one vote

According to the Assembly Committee on Banking and Finance policy analysis of this bill:

> A cooperative corporation (or co-op) conducts its business primarily for the mutual benefit of its members as patrons of the corporation. The earnings, savings, or benefits of the co-op are legally required to be used for the general welfare of the members. Whereas a traditional corporation generates earnings for its owners or shareholders, a co-op is required to proportionately and equitably distribute earnings to some or all of its members or its patrons, based upon their patronage of the corporation.
>
> Consumer co-ops and worker co-ops are two general classes of cooperative corporations. A consumer co-op is organized for the benefit of its members who purchase goods or services from the co-op. *A worker co-op is organized for the benefit of its members who provide their labor in the production of the good or service sold by the co-op.*
>
> Both consumer and worker co-ops are required to distribute their earnings, savings, and benefits to their members. For worker co-ops, these distributions are typically based on the amount of hours worked or wages earned and often take the form of a share in year-end profits.

[NOTE: Please see Senate Labor, Public Employment and Retirement Committee analysis on this bill for more background information on the challenges faced in creating worker co-ops and examples of such models.]

Comments

Need for this bill? According to the author, "Forming worker co-ops can be difficult due to complicated state and federal laws, tax laws, and access to capital. A typical worker owned co-op needs to have access to capital, and often requires multiple financial sources such as loans from banks, CDFIs, investors, members, or even community members. Additionally, there is no uniform cooperative code in the United States, and definitions and incorporation guidelines vary from state to state. The lack of understanding around co-ops has created material challenges for these entities. For example, worker co-ops in California have reported facing administrative struggles in obtaining loans, insurance, and other areas where an individual is asked to sign and unduly take on the liability that is in actuality spread across the worker-owners."

Related/Prior Legislation

SB 1407 (Becker, 2022) establishes the CA Employee Ownership Program within the Office of Small Business Advocate to assist small businesses in transitioning to employee ownership. Establishes an Employee Ownership Outreach and Technical Assistance Grant Program for funding education and outreach programs that increase awareness and technical assistance for employee ownership transitions. Establishes an Employee Ownership Feasibility Assessment Grant Program (EOFA Grant) to assist in the development of financial assessments to determine viable employee-ownership transition scenarios.

AB 1319 (Gonzalez, 2021) – This bill (AB 2849) began as a reintroduction of AB 1319, which did not move out of Assembly Appropriations committee.

SB 779 (Becker, Chapter 223, Statutes of 2021) amended the list of "earn and learn" programs by specifying that an "earn and learn" program includes transitional jobs, as described in the federal Workforce Innovation and Opportunity Act (WIOA), and subsidized employment, as provided by an employment social enterprise, or a worker cooperative, particularly for individuals with barriers to employment.

AB 816 (Bonta, Chapter 192, Statutes of 2015) renamed the Cooperative Corporation Law and authorized a cooperative corporation to elect to designate itself as worker cooperative in its articles of incorporation, and require that 51% of the workers shall be worker-members or candidates.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Labor and Workforce Development Agency (LWDA) would likely incur a one-time cost in the hundreds of thousands of dollars to complete the study (General Fund).

ARGUMENTS IN SUPPORT: According to the sponsors of this bill, SEIU California, "Worker co-ops operate across the world and across industries, both as for-profit and nonprofit enterprises. In contrast to the conditions many workers are facing today, worker co-ops offer a worker-centered model that offers both a sustainable, long-term arrangement for workers, and accelerates their economic recovery. While the worker co-op model has been successful globally and in smaller operations in the United States, co-ops have not yet scaled up, largely due to a lack of access to capital and to expertise in navigating the complex tax and corporation laws associated with forming a co-op."

SUBJECT: Safe and Affordable Drinking Water Fund: tribes

SOURCE: Author

DIGEST: This bill requires the State Water Resources Control Board (State Water Board) when administering funds under the Safe and Affordable Drinking Water Fund (Fund) to California Native American tribes to draft any waiver of tribal sovereign immunity as narrowly as possible, include its designated tribal liaison or their designee (s) in all discussions with eligible recipients, and annually identify barriers to tribes accessing funding if they cannot consistently approve funding applications to tribal applicants in a timely manner.

Senate Floor Amendments of 8/25/22 give the ability for the Water Board's tribal liaison to appoint a designee to aid in their duties under this bill and alter the requirement for the State Water Board to identify barriers to tribal access of funds to only apply if they cannot consistently approve funding applications to tribal applicants in a timely manner.

ANALYSIS:

Existing law:

1) Establishes the California Safe Drinking Water Act (SDWA) and requires the State Water Resources Control Board (State Water Board) to maintain a drinking water program. (Health & Safety Code (HSC) § 116270, et seq.)

2) Requires the State Water Board to submit to the Legislature a comprehensive Safe Drinking Water Plan for California every five years. (HSC § 116355)

3) Creates the Safe and Affordable Drinking Water Fund (Fund) in the State Treasury to help water systems provide an adequate and affordable supply of safe drinking water in both the near and long terms. (HSC § 116766) Moneys in this fund can be used to fund:

    a) Operation and maintenance costs for delivering safe drinking water;
    b) Consolidating water systems or extending drinking water services to other public water systems, domestic wells, and smalls state water systems;
    c) Providing replacement water as a short-term solution to protect health and safety;
    d) Services for helping water systems become self-sufficient;
    e) The development, implementation, and sustainability of long-term drinking water solutions; and
    f) Board costs associated with implementing and administering these programs.

4) Specifies that public agencies, nonprofit organizations, public utilities, mutual water companies, federally recognized California Native American Tribes, nonfederally recognized Native American tribes identified by the Native American Heritage Commission, administrators, groundwater sustainability agencies, community water systems, and technical assistance providers are the entities eligible for receiving moneys from this fund.

5) Establishes as the policy of the state that every human being has the right to safe, clean, affordable, and accessible water adequate for human consumption, cooking, and sanitary purposes. (Water Code § 106.3)

This bill:

1) Defines "tribal liaison" as an individual employed by the State Water Board as a tribal liaison, or if they are unavailable, a tribal coordinator, the Board's chair, the Board's executive director, or the Board's chief counsel active in that capacity as a designee or the designees of the tribal liaison.

2) Requires that any waiver of tribal sovereign immunity that is required by the State Water Board to access SAFFER funding shall be narrowly drafted and negotiated with the involvement of the Board's tribal liaison or their designee(s).

3) Requires the State Water Board to include its designated tribal liaison or their designee(s) in all discussions with eligible recipients, unless those recipients give permission for the liaison or designee(s) to be absent.

4) Requires the State Water Board to consider the extent that funds are distributed to provide assistance to tribes and make diligent efforts to ensure the distribution of SAFER funds to federally recognized California Native American tribes and nonfederally recognized Native American tribes on the contact list maintained by the Native American Heritage Commission.

5) Requires the State Water Board to annually update and post on its website the number of inquiries for funding receive from tribes, the number of applications for funding received from tribes, and the total amount of funding granted to tribes each year.

6) Requires the State Water Board, if they are unable to consistently approve funding applications from eligible tribes in a timely matter, to identify barriers to tribes receiving funding and propose possible solutions in the fund expenditure plan.

Background

1) *Human right to water.* In 2012, California became the first state to enact a Human Right to Water law, AB 685 (Eng, Chapter 524, Statutes of 2012). This bill states that it is the policy of the state that every human being has the right to safe, clean, affordable, and accessible water adequate for human consumption, cooking, and sanitary purposes. The human right to water extends to all Californians, including disadvantaged individuals and groups and communities in rural and urban areas. Additionally, AB 685 requires all relevant state agencies, including the State Water Board, to consider this human right to water policy when revising, adopting, or establishing policies,

regulations and grant criteria when those polices, regulations and criteria are pertinent to the uses of water. Although most of the state's residents receive drinking water that meets federal and state drinking water standards, many drinking water systems in the state consistently fail to provide safe drinking water to their customers. Lack of safe drinking water is a problem that disproportionately affects residents of California's disadvantaged communities.

2) *The Safe and Affordable Funding for Equity and Resilience (SAFER) program*. SB 200 (Monning, Chapter 120, Statutes of 2019) created SAFER and the Safe and Affordable Drinking Water Fund (Fund). The SAFER program supports permanent and sustainable drinking water solutions that ensure all Californians have access to safe, affordable, and reliable drinking water. The Fund was established to address funding gaps and provide solutions to water systems, especially those serving disadvantaged communities, to address both their short- and long-term drinking water needs. SB 200 requires the annual transfer of 5 percent of the Greenhouse Gas Reduction Fund (GGRF) (up to $130 million) into the Fund until June 30, 2030. Money transferred into the Fund is continuously appropriated and must be expended consistent with the Expenditure Plan (Plan), which is adopted annually by the State Water Board. The Plan is based on a drinking water needs assessment and will document past and planned expenditures and prioritize projects for funding. Potential options for funding include consolidation with larger water systems, operations and maintenance costs, building local technical and managerial capacity, providing interim replacement water, and administrators to run the small systems.

3) *State Water Board's Racial Equity Resolution and Racial Equity Action plan*. The State Water Board adopted its Racial Equity Resolution (#2021-0050) by a unanimous five to zero vote on November 16, 2021. The Racial Equity Resolution cites the California Environmental Protection Agency's 2021 Pollution and Prejudice StoryMap and CalEnviroScreen data that demonstrate that historically redlined neighborhoods are "generally associated with worse environmental conditions and greater population vulnerability to the effects of pollution today" and that Black, Indigenous, and people of color are overrepresented in the neighborhoods that are the most environmentally degraded. They specifically discussed how California Native American Tribes continue to face barriers to accessing, controlling, and protecting water rights and disrupted traditional food sources. They also note these injustices are exacerbated by climate change and complex water resource and watershed management processes.

In the resolution, the State Water Board committed to making racial equity, diversity, inclusion and environmental justice central to its work, including improving communication, working relationships, and co management practices with all California Native American Tribes.

4) *Tribal access to clean water*. According to data from the U.S. Environmental Protection Agency (EPA), there are 88 tribal water systems in California that serve more than 160,000 people. In the State Water Board's most recent Drinking Water Needs Assessment, the EPA estimated 13 of these tribal water systems are currently in violation of state or federal drinking water standards, and 22 are at risk of violating standards in the future. Tribal drinking water systems often have a small customer base, making it difficult to support maintenance costs.

5) *Tribal Access to SAFER Funding Support*. According to the State Water Board's policy for developing the Expenditure Plan for the Fund, Native American Tribes will be prioritized in outreach, program design and funding elements of the SAFER Program. The water system needs of California Native American Tribes will be evaluated for funding based on the same criteria as other eligible recipients. All State Water Board funding agreements contain compliance obligations, such as monitoring, reporting, inspection, and accounting. In order to fund a project with a federally recognized Native American Tribe, the State Water Board may require a limited waiver of sovereign immunity strictly to ensure compliance with the terms of the financial assistance agreement.

Comments

1) *Purpose of Bill.* According to the author, "Ensuring tribes have equitable access to the SAFER Program would help California meet its promise of providing every person in the state the right to safe, clean, affordable, and accessible water."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- The State Water Board estimates ongoing annual costs of at least $225,000 (Safe and Affordable Drinking Water Fund) to support coordination and communication with tribes on matters relating to the Fund.

SUBJECT: Online content: cyberbullying

SOURCE: Author

DIGEST: This bill requires a social media platform, as defined, to disclose its cyberbullying reporting procedures in its terms of service and to have a mechanism for reporting cyberbullying that is available to individuals whether or not they have an account on the platform.

Senate Floor Amendments of 8/24/22 eliminate "student" from the title, clarify that the bill's gross revenue floor of $100 million applies to the business entity that owns the social media platform, and exclude social medial platforms whose primary function is to allow users to play video games.

ANALYSIS:

Existing federal law:

1) Provides a right to free speech and expression. (U.S. Const., 1st amend; Cal. Const., art 1, § 2.)

2) Provides that no provider or user of an interactive computer service shall be treated as the publisher or speaker of any information provided by another information content provider. (47 U.S.C. § 230(c)(1).)

3) Provides that no provider or user of an interactive computer service shall be held liable on account of:

   a) Any action voluntarily taken in good faith to restrict access to or availability of material that users consider to be obscene, lewd, lascivious, filthy, excessively violent, harassing, or otherwise objectionable, whether or not such material is constitutionally protected.

   b) Any action taken to enable or make available to content providers or others the technical means to restrict access to material described above. (47 U.S.C. § 230(c)(2).)

4) Defines "interactive computer service," for purposes of 2) and 3), as any information service, system, or access software provider that provides or enables computer access by multiple users to a computer server, including specifically a service or system that provides access to the Internet and such systems operated or services offered by libraries or educational institutions. (47 U.S.C. § 230(f)(2).)

Existing state law:

1) Provides for the right of every person to freely speak, write, and publish their sentiments on all subjects, being responsible for the abuse of this right. Existing law further provides that a law may not restrain or abridge liberty of speech or press. (Cal. Const., art. I, § 2(a).)

2) Provides that a student may be suspended or expelled from an elementary or secondary school for an act of bullying, which is any severe or pervasive physical or verbal act or conduct, including communications made in writing or by means of an electronic act, and including acts of sexual harassment, hate violence, and threats or harassment, as defined, directed toward one or more pupils that has or can be reasonably predicted to have the effect of one or more of the following:

   a) Placing a reasonable pupil or pupils in fear of harm to that pupil's or those pupils' person or property.

   b) Causing a reasonable pupil to experience a substantially detrimental effect on the pupil's physical or mental health.

c) Causing a reasonable pupil to experience substantial interference with the pupil's academic performance.

d) Causing a reasonable pupil to experience substantial interference with the pupil's ability to participate in or benefit from the services, activities, or privileges provided by a school. (Ed. Code, § 48900(r)(1).)

3) Defines an "electronic act," for purposes of 2), as the creation or transmission originated on or off the schoolsite, by means of an electronic device, including, but not limited to, a telephone, wireless telephone, or other wireless communication device, computer, or pager, of a communication, including, but not limited to, any of the following:

a) A message, text, sound, video, or image.

b) A post on a social network internet website, including posting or creating to a burn page, as defined or creating a credible impersonation of another actual pupil or a false profile for another pupil for the purpose of causing one or more of the effects in 2).

c) An act of sexual cyberbullying, as defined, which includes the dissemination or solicitation of a photograph or visual recording by a pupil to another pupil that includes the depiction of a nude, semi-nude, or sexually explicit photograph or video recording of a minor. (Ed. Code, § 48900(r)(2).)

4) Provides that a pupil cannot be suspended or expelled for an act of bullying or cyberbullying set forth in 2) unless the act is related to a school activity or school attendance occurring within a school under the jurisdiction of the superintendent of the school district or principal or occurring within any other school district, which includes being on school grounds, going to or coming from school, during the lunch period whether on or off campus, and during, or while going to or coming form, a school-sponsored activity. (Ed. Code, § 48900(s).)

This bill:

1) Establishes the Cyberbullying Protection Act.

2) Defines relevant terms as follows:

a) "Content" means statements or comments made by users and media that are created, posted, shared, or otherwise interacted with by users on an internet-based service or application. "Content" does not include media put on a

service or application exclusively for the purpose of cloud storage, transmitting files, or file collaboraton.

b) "Cyberbullying" means any severe or pervasive conduct made by an electronic act or acts, as defined in Education Code section 48900(r)(2), committed by a pupil or group of pupils directed toward one or more pupils that has or can reasonably be predicted to have the effect of one or more of (1) placing a reasonable pupil or pupils in fear of harm of their person or property, (2) causing a reasonable pupil to experience a substantially detrimental effect on the pupil's physical or mental health, (3) causing a reasonable pupil to experience substantial interference with the pupil's academic performance, or (4) causing a reasonable pupil to experience substantial interference with the pupil's ability to participate in or benefit from the services, activities, or privileges provided by a school.

c) "Social media platform" means a public or semipublic internet-based service or application that has users in California and that meets all of the following criteria:

   i) A substantial function of the service or application is to connect users in order to allow users to interact socially with each other within the service or application. A service or application that provides email or direct messaging services shall not be considered to meet this criterion on the basis of that function alone.

   ii) The service or application allows users to do all of the following:

      (1) Construct a public or semipublic profile for purposes of signing into and using the service or application.

      (2) Populate a list of other users with whom an individual shares a social connection within the system.

      (3) Create or post content viewable by other users, including, but not limited to, on message boards, in chat rooms, or through a landing page or main feed that presents the user with content generated by other users.

d) "Public or semipublic internet-based service or application" excludes a service or application used to facilitate communication within a business or enterprise among employees or affiliates of the business or enterprise, provided that access to the service or application is restricted to employees or affiliates of the business or enterprise using the service or application.

e) "Terms of service" means a public-facing policy or set of policies adopted by a social media platform that specified, at least, the user behavior and activities that are permitted on the social media platform and the user behavior and activities that result in the removal, demonetization, deprioritization, or banning of a user or an item of content.

3) Requires a social media platform to disclose all cyberbullying reporting procedures in its terms of service.

4) Requires a social media platform to establish a mechanism within its internet-based service that allows any individual, whether or not that individual has a profile on the internet-based service, to report cyberbullying or any content that violates the existing terms of service. The reporting mechanism shall allow, but not require, an individual to upload a screenshot of the content that contains cyberbullying or violates the terms of service.

5) Provides that a social media platform that fails to do 3) or 4) shall be liable for a civil penalty of up to $7,500 for each intentional violation per day that the violation was incurred, which may be recovered in a civil action brought in the name of the people of the State of California by the Attorney General. The Attorney General may also seek injunctive relief.

6) Provides that 3)-5) do not create a private right of action or limit any existing private right of action.

7) Provides that 5) and 6) do not become operative until September 1, 2023.

8) Provides that 1)-7) do not apply to:

a) A social media platform that is controlled by a business entity that generated fewer than $100 million in gross revenue in the preceding calendar year.

b) A social media platform whose primary function is to allow users to play video games.

Comments

This bill requires a social media platform, as defined, to implement a reporting mechanism for the reporting of cyberbullying and other conduct that violates the platform's terms of service. The reporting mechanism required by this bill must include two features: it must be useable by individuals who do not have an account on the platform, and it must permit, but not require, the report to include a screenshot of the problematic post. These measures are designed to make the

mechanism as useful as possible for, e.g., a parent who might not have an account on a particular platform but who wishes to protect their child. The bill also requires the social media platform to disclose in its terms of service the procedures for using the reporting mechanism.

State law regulating social media activity generally implicates two discrete constitutional issues: preemption by federal law governing when an "interactive computer service" may be held liable for third-party content (47 U.S.C. § 230, or Section 230) and the First Amendment to the United States Constitution.[1] This bill does not clearly run afoul of either. First, Section 230 is not clearly implicated because it does not make a social media platform liable for the content posted by its users—it merely requires a social media platform to provide a mechanism for reporting instances of cyberbullying and explain its cyberbullying policy. Second, with respect to the First Amendment, this bill does not restrict any speech, and its required disclosures are likely permissible in light of the state's substantial interest in protecting its children and others from cyberbullying.[2]

The most recent amendments, which exempt social media platforms with the primary function of allowing users to play video games, reflects the intent to exclude the narrow category of social media platforms that actually facilitate the playing of games socially, i.e., through the platform provided by the console. This exemption should not be interpreted to exclude platforms that often feature video game play, such as Twitch or Discord.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- *DOJ:* The Department of Justice (DOJ) reports costs of $342,000 in Fiscal Year (FY) 2023-24 and $390,000 annually thereafter (General Fund). This bill would also generate revenue of an unknown amount, resulting from penalty assessments of up to $7,500 for each intentional violation of this bill's provisions.

- *Judicial Branch:* Unknown cost pressures due to increased court workload (Special Fund – Trial Court Trust Fund, General Fund).

Santa Clara County Office of Education

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: According to the Santa Clara County Office of Education, writing in support:

> In order to mitigate the impact of bullying, school administrators need to be able to report incidents to social media companies and request that content be removed or users be sanctioned. However, most social media platforms currently do not allow those without a profile to file complaints or report inappropriate or bullying content directed at another person. These policies have made it very difficult for school administrators to respond or stop cyberbullying.
>
> AB 2879 would require social media operators to establish a mechanism that would allow school administrators to report cases of reported cyberbullying against students without a user account. It is imperative that school administrators have the tools they need as social media becomes increasingly prevalent in the daily lives of students. Left unaddressed, even for a short time frame, cyberbullying can have significant effects on a young person's mental health.

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 50-19, 5/26/22 - See last page for vote

SUBJECT: Water: permits and licenses: temporary changes: water or water rights transfers

SOURCE: Author

DIGEST: This bill revises the State Water Resources Control Board's (water board) process for consideration and approval of a petition to temporarily change a water right to effectuate a short-term water transfer (i.e., for a period of one year or less).

Senate Floor Amendments of 8/22/22 make technical and grammatical changes that improve the readability of two paragraphs in the bill.

ANALYSIS: Existing law establishes the water board as the administrator the state's water rights program, under which the board grants permits and licenses to appropriate water. (Water Code (WC) §§1200 et seq.) These provisions of the WC:

1) Authorize a permittee or licensee to temporarily change the point of diversion, place of use, or purpose of use due to a transfer or exchange of water or water rights if the transfer would:

a) Only involve the amount of water that would have been consumptively used or stored by the permittee or licensee in the absence of the proposed temporary change;

b) Not injure any legal user of the water and; would

c) Not unreasonably affect fish, wildlife, or other instream beneficial uses. (WC §1725)

2) Prescribe the process for a permittee or licensee to petition the water board for a temporary change due to a transfer or exchange of water rights, and imposes on the board related notice, decision, and hearing requirements. (WC §1726)

a) Under that process, a petitioner is required, among other things, to:

i) Provide a copy of the petition to the Department of Fish and Wildlife (DFW), the board of supervisors of the county or counties in which the petitioner currently stores or uses the water subject to the petition, and the board of supervisors of the county or counties to which the water is proposed to be transferred. (WC §1726(c))

ii) Publish notice of a petition in a newspaper. (WC §1726(d))

b) Under that process the water board, with certain exceptions, is require to render a decision not more than 35 days after the date the investigation began or the date the notice was published. (WC §1726(g))

i) If the water board or the petitioner determines that an additional extension of time for a decision is necessary for the board to make the required findings, or that a hearing is necessary for the board to make those findings, the board may extend the time for a decision with the consent of the petitioner.

ii) If the petitioner agrees to a hearing, the water board shall identify the issues for which additional evidence is required and shall fix a time and place for the hearing.

3) Authorize a person entitled to the use of water to petition the water board for a change to a water right for purposes of preserving or enhancing wetlands habitat, fish and wildlife resources, or recreation and authorizes the board to approve the petition only if certain requirements are met. (WC §1707) Further authorizes that petition to be submitted in accordance with specified

requirements, including those regulating temporary changes due to a transfer or exchange of water rights.

This bill:

1) Revises and recasts the provisions regulating temporary changes due to a transfer or exchange of water rights, including,

   a) Eliminating the requirement that a petitioner publish notice of a petition in a newspaper.

   b) Specifying that those provisions apply to a person who proposes a temporary change for purposes of preserving or enhancing wetlands habitat, fish and wildlife resources, or recreation.

   c) Making other technical and conforming changes.

2) Establishes a new process for petitions for which notice is submitted to the water board no later than January 31 for a temporary change due to a transfer or exchange of water rights initiated in the same year, and would impose on the board related notice, decision, and hearing requirements.

   a) Under this new process, the water board would be required, among other things, to post on its internet website and disseminate by email LISTSERV by February 15 of each year a list of all timely and complete notices for which notice is filed.

   b) By March 1 of each year, an interested person would be able to request notice of a submitted petition for temporary change, and the concerns related to effects on other legal users, fish, wildlife, instream beneficial uses, or groundwater conditions the person may raise in comments on the petition.

   c) After submittal of a complete petition, the water board would be required to provide notice of the petition by sending a copy to all persons who submitted complete requests under subdivision (d), posting the petition on its internet website, and disseminating the petition by email LISTSERV. Any interested party may file a written comment on the petition not later than 30 days after submittal of a complete petition.

   d) The water board would be required to issue a decision within 35 days after submittal of a complete petition for which notice is provided under these provisions, with certain exceptions.

Comments

Notice by Publication. While most water agencies appreciate the elimination of newspaper notice, the California News Publishers Association does not. That said, newspapers, especially paper newspapers, are much rarer than they used to be. Since the notice is going on the water board's website, that's a much more reliable source of information than a notice in the paper. This is especially true in a location where there are may still be multiple papers, so an interested person would have to scour all the papers on a daily basis for water notices instead of just checking online.

Not Clear Many Will Use the New Process. This new process will require water rights holders to notify the water board by January 31 that they have water they are willing to transfer. Things can change a lot between January 31 and the end of the traditional rain and snow season. As evidenced by this year, what at first looks like is going to be a wet year can quickly change. Nonetheless, there is probably no harm in setting up this new process.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/23/22)

Sustainable Conservation

OPPOSITION: (Verified 8/23/22)

California News Publishers Association

ARGUMENTS IN SUPPORT: According to the author, "As California's climate becomes more extreme, water transfers are effective means to provide drought resiliency throughout the state. Efficient review and approval by the State Water Board are needed to ensure that water transfers can be successfully executed. Unfortunately, current requirements for processing temporary transfer petitions cause delays both for the petitioner and Water Board. AB 2895 will allow California to adapt to evolving drought conditions more effectively by modernizing and streamlining the water transfer petition process. This bill also improves communication between impacted agencies and increases accessibility of transfer petition information by the public."

ARGUMENTS IN OPPOSITION: The California News Publishers Association writes, "AB 2895 sets a dangerous precedent by dismissing a public notice statutory scheme in effect since 1943 and today spans more than 1,700 sections of code. The term 'newspaper of general circulation' is a term of art that applies only

to printed publications that have been legally deemed to distribute substantially to subscribers in the area.

“Newspapers of general circulation remain the most effective means to convey public notices because they are legally deemed to reach a “substantial” number of readers in the area. To pass a bill with language that indicates there could be a newspaper of general circulation online would open the door to changes in this entire statutory scheme informing the public of important information since 1943.”

SUBJECT: Nonvehicular air pollution: civil penalties

SOURCE: Author

DIGEST: This bill increases the maximum civil penalties for air pollution violations, including tripling the lowest penalty caps for strict liability, and makes certain specifications on which moneys are affected and how they must be spent.

Senate Floor Amendments of 8/25/22 narrow the provisions of the bill which apply to uses for the penalties collected by air districts pursuant to only certain regions and thresholds.

ANALYSIS:

Existing law:

1) Requires air districts to adopt and enforce rules and regulations to achieve and maintain state and federal ambient air quality standards in all areas affected by non-vehicular emission sources under their jurisdiction. (Health and Safety Code (HSC) § 40000 et seq.)

2) Generally prohibits a person, except as specified, from discharging air contaminants or other material that cause injury, detriment, nuisance, or annoyance or endanger the comfort, repose, health or safety to any considerable number of persons, or to the public, or that cause, or have a tendency to cause, injury or damage to a business or property. (HSC § 41700)

3) Authorizes the governing board or the hearing board of an air district, after notice and a hearing, to issue an order for abatement whenever it finds that any person is constructing or operating any article, machine, equipment, or other contrivance without a required permit, or is in violation of any order, rule, or regulation prohibiting or limiting the discharge of air contaminants into the air. (HSC § 42300 et seq.)

4) Deems any person who violates air pollution laws, rules, regulations, permits, or orders of the Air Resources Board (ARB) or of a district, including a district hearing board, as specified to be guilty of a misdemeanor and subject to specified fines, imprisonment in the county jail for not more than six months, or both. (HSC § 42400 et seq.)

5) Prescribes maximum civil penalty amounts for violations as follows (HSC § 42400 et seq.):

    a) Strict liability: $5,000, $10,000 or $15,000 per day, depending on specified circumstances. Penalties in excess of $5,000 permit an affirmative defense that the violation was caused was not intentional or negligent. The $15,000 level applies when a violation causes actual injury to a considerable numbers of persons or the public.
    b) Negligent: $25,000 per day, or $100,000 if the violation causes great bodily injury or death.
    c) Knowing: $40,000 per day, or $250,000 if the violation causes great bodily injury or death.

d) Willful and intentional: $75,000 per day.
e) Willful, intentional, or reckless: $125,000 per day for a person, or $500,000 for a corporation, if the violation results in an unreasonable risk great bodily injury or death. $250,000 for a person, or $1,000,000 for a corporation, if the violation causes great bodily injury or death.
f) Intentional falsification of a required document: $35,000.

6) Requires the maximum penalties in effect January 1, 2018 to increase annually based on the California Consumer Price Index. (HSC § 42411)

7) Specifies that the recovery of certain civil penalties precludes prosecution for the same offense. (HSC § 42400.7)

8) Requires that, in determining the amount of penalty assessed, that the extent of harm, nature and persistence of violation, length of time, frequency of past violations, the record of maintenance, the unproven nature of the control equipment, actions taken by the defendant to mitigate the violation and the financial burden to the defendant be taken into consideration. (HSC § 42400.8)

9) Establishes the Air Pollution Control Fund within the General Fund to act as a depository for penalties and fees collected on vehicular and nonvehicular air pollution control sources, and to be available ARB to carry out its duties and functions. (Chapter 1063, Statutes of 1976)

This bill:

1) Increases specified strict liability civil penalties for the violation of the state's air pollution laws or any rule, regulation, permit, or order of a local air district, including a district hearing board, or of the Air Resources Board (ARB) from $5,000 to $15,000.

2) Increases specified strict liability civil penalties for the violation of the state's air pollution laws or any rule, regulation, permit, or order of a local air district, including a district hearing board, or of ARB from $15,000 to $45,000 if the unlawful emission causes actual injury to the health and safety of a considerable number of persons or the public.

3) Increases the civil penalties imposed on a person or entity that negligently emits an air contaminant in violation of the state's air pollution laws or a rule, regulation, permit, or order of the state board or of a district, including a

district hearing board, pertaining to emission regulations or limitations from $25,000 to $35,000.

4) Provides that any moneys collected from a penalty assessed pursuant to this bill above the costs of prosecution, district administration, investigation, attorney fees, and other reasonable district costs are to be used to mitigate air pollution in the community or communities affected by the violation. Further specifies that these penalty provisions only apply to:
   a) Penalties assessed by the Bay Area Air Quality Management District, the Sacramento Metropolitan Air Quality Management District, the San Diego County Air Pollution Control District, the San Joaquin Valley Unified Air Pollution Control District, or the South Coast Air Quality Management District;
   b) The amount of the penalty exceeds $10,000; and
   c) The penalty is assessed for a violation of law that occurred in a disadvantaged community, as defined.

5) Provides that the penalties assessed pursuant to this bill are to be annually changed based on the California Consumer Price Index as compiled and reported by the Department of Industrial Relations.

Background

1) *Penalties for violating air pollution standards*. California's non-vehicular air pollution statutes provide for civil penalties for violations of air pollution standards. Penalties are assessed based on the number of days of violation and the intent of the violator. In the absence of evidence to indicate negligence or worse (i.e., knowledge and failure to correct or willful and intentional behavior), civil penalties are assessed at penalty ceilings for the strict liability classification, where the violation is found to occur but districts need not establish knowledge, negligence, intent or injury. No minimum penalty is required, leaving the amount prosecuted at the discretion of the air district. Offenses are most often prosecuted under the strict liability standard, which is generally capped at $10,000 per day. However, when districts seek more than $5,000 per day, an affirmative defense that the act was not intentional or negligent is allowed.

   In 2017, AB 617 (C. Garcia), Chapter 136, Statutes of 2017, increased the basic strict liability penalty cap from $1,000 per day to $5,000 per day (accounting for 42 years of inflation since the limits were established in 1975).

AB 617 also added an inflation adjustment for all civil penalties, with the amounts in effect in 2018 as the baseline.

Comments

1) *Purpose of Bill.* According to the author, "While some Californians wake up to the smell of fresh air or the ocean breeze, my constituents wake up to the harsh odors of flesh and carcass. For decades, many of my constituents and Southeast Los Angeles communities have had to deal with smells from rendering plants that are strong, rancid, and nauseating. These communities have voiced concerns of these harmful and bothersome odors from local rendering facilities and the SCAQMD has increased their efforts to address these issues from noncompliant rendering plants. Unfortunately, the current maximum civil penalties against facilities that violate air quality standards is only $10,000 per day per violation, which is an inadequate deterrent. While significant to a small, family-run company, that sum has very little deterrent value to the prototypical large, well-funded corporate violator. Large facilities simply chalk it up as the cost of doing business and do not make meaningful changes. To ensure we do not further harm environmental justice communities and that improve enforcement of air pollution and air quality laws, AB 2910 will increase the maximum penalty amount for all facilities under SCAQMD's jurisdiction who violate air pollution rules."

2) *Where does the money go?* As introduced, AB 2910 required any moneys collected pursuant to the increased penalty to be expended in support of air quality programs. Amendments taken in the Assembly further focused that provision to require civil penalties collected (above the costs of prosecution, district administration, investigation, attorney fees, and other reasonable district costs) to be expended to mitigate the effects of air pollution in the communities affected by the violation.

   Regarding penalty funds more generally, HSC § 42405 prescribes where penalty funds are deposited:
   a) When the Attorney General brings an action on behalf of a district, the penalty collected is split 50/50 between the district and the General Fund.
   b) When the Attorney General brings an action on behalf of ARB, the entire penalty collected goes to the General Fund.
   c) When the action is brought by the district itself, or by a district attorney, the entire penalty collected goes to the district.

For AB 2910, it should be noted that the violations for which penalties are collected need not necessarily be from a single point source. For example, if a specific product were found to be noncompliant with an air district rule, the manufacturer could be assessed a penalty. However, the question of which specific communities were affected by that violation (and thus required to have mitigation actions taken on their behalf) could be much more difficult than if the violator were, say, a single refinery.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, "Unknown but likely minor costs for the California Air Resources Board to absorb workload from or provide funding to the air districts in order to backfill any reductions in penalty revenue for district operations."

SUPPORT: (Verified 8/25/22)

Bay Area Air Quality Management District
South Coast Air Quality Management District

OPPOSITION: (Verified 8/25/22)

California Air Pollution Control Officers Association
California Council for Environmental & Economic Balance

ARGUMENTS IN SUPPORT: According to the South Coast Air Quality Management District, "Strict liability is the most frequently used level of civil penalties in enforcement efforts; however, those penalty amounts are so low, they constitute essentially a "cost of doing business" for violators. While potentially significant to a small, family-run company, the current civil penalties for air quality violations have very little deterrent value to the prototypical large, well-funded corporate violator.

"For example, there are several rendering plants in Los Angeles County that have created terrible smells which impact surrounding communities. One such facility, Baker Commodities in the City of Vernon, has received numerous Notices of Violation. Despite being subject to repeated enforcement action, South Coast AQMD's investigation of a large odor event in January 2022 led to Baker Commodities again being found in violation of the agency's Rule 415 for failure to process or enclose raw material within four hours of receiving it. The current statutory penalty system must be strengthened to deter these kinds of repeated air quality violations.

"Similar noncompliance has been found at other types of facilities, including oil and gas drilling operations; construction sites/stockpiles and transfer stations; landfills (active and closed); waste treatment plants; industrial operations (making solvents, distilling alcohol, etc.); natural gas storage facilities; and power plants. Many of these facilities are located in or near our most vulnerable communities."

ARGUMENTS IN OPPOSITION: According to the California Council for Environmental and Economic Balance, "AB 2910 proposes penalties on violations that have already been increased, and indexed for inflation, in the companion bill to the legislation that extended the Cap-and-Trade Program during a prior legislative session. Maximum penalties assessed by the state board or a district pursuant to AB 617 (Chapter 136, Statutes of 2017) as of January 1, 2018, shall be increased annually based on the California Consumer Price Index as compiled and reported by the Department of Industrial Relations.

CCEEB members recognize the valuable role that incentive-based compliance programs play in meeting air quality objectives and protecting public health. However, CCEEB does not support the unsubstantiated assertion that increased penalties will improve compliance and reduce accidental releases. We are concerned that increasing penalties could unduly punish facilities for implementing critical process safety measures. We are also concerned that the new penalty ceiling amounts strongly encourage districts to disregard cooperative, incentive-based compliance programs in favor of more dollar-based and revenue-generating penalties."

SUBJECT: Consumer warranties

SOURCE: Author

DIGEST: This bill prohibits a manufacturer, distributor, or retail seller from making an express warranty with respect to a consumer good that commences earlier than the date of delivery of the good.

Senate Floor Amendments of 8/18/22 narrow the application of the bill.

ANALYSIS:

Existing law:

1) Establishes the Song-Beverly Consumer Warranty Act (Act), which sets forth standards for warranties that govern consumer goods and outlines remedies available to purchasers. (Civ. Code § 1790 et seq.)

2) Requires every sale of consumer goods that are sold at retail in this state to be accompanied by the manufacturer's and the retail seller's implied warranty that the goods are merchantable. (Civ. Code § 1792.)

3) Provides that where a retailer or distributor has reason to know at the time of the retail sale that the goods are required for a particular purpose, and that the

buyer is relying on the manufacturer's, retailer's, or distributor's skill or judgment to select or furnish suitable goods, the sale shall be accompanied by the relevant entity's implied warranty that the goods are fit for that purpose. (Civ. Code §§ 1792.1, 1792.2.)

4) Provides that such implied warranties cannot be disclaimed or waived, except as specifically provided. (Civ. Code §§ 1792.3, 1792.4.)

5) Provides that, except as specified, nothing in the Act affects the right of the manufacturer, distributor, or retailer to make express warranties with respect to consumer goods. However, a manufacturer, distributor, or retailer, in transacting a sale in which express warranties are given, may not limit, modify, or disclaim the implied warranties guaranteed by this chapter to the sale of consumer goods. (Civ. Code § 1793.)

6) Requires every manufacturer, distributor, or retailer making express warranties with respect to consumer goods to fully set forth those warranties in simple and readily understood language, which shall clearly identify the party making the express warranties, and which shall conform to applicable federal standards. (Civ. Code § 1793.1.)

7) Defines "express warranty" to mean a written statement arising out of a sale to the consumer of a consumer good pursuant to which the manufacturer, distributor, or retailer undertakes to preserve or maintain the utility or performance of the consumer good or provide compensation if there is a failure in utility or performance. In the event of any sample or model, an express warranty is that the whole of the goods conforms to such sample or model. (Civ. Code § 1791.2.)

8) Provides, pursuant to federal law, that any warrantor warranting to a consumer by means of a written warranty a consumer product actually costing the consumer more than $15.00 shall clearly and conspicuously disclose, among other things, the point in time or event on which the warranty term commences, if different from the purchase date, and the time period or other measurement of warranty duration. (16 C.F.R. Sec. 701.3(a)(4).)

This bill prohibits a manufacturer, distributor, or retail seller from making an express warranty with respect to a consumer good that commences earlier than the date of delivery of the good. It does not limit an express warranty made before July 1, 2023.

Background

The Song-Beverly Consumer Warranty Act provides consumer warranty protection to buyers of consumer goods, including motor vehicles, home appliances, and home electronic products. The Act requires certain implied warranties to accompany the retail sale of consumer goods. This includes implied warranties of merchantability and of fitness for particular purposes, as specified.

Express warranties are written statements arising out of a sale to the consumer of a consumer good pursuant to which the manufacturer, distributor, or retailer undertakes to preserve or maintain the utility or performance of the consumer good or provide compensation if there is a failure in utility or performance. Concerns have arisen that the increase in e-commerce and more recently the severe supply chain delays have undercut the utility of these warranties for consumers.

This bill prohibits any express warranties regarding consumer goods made by a manufacturer, distributor, or retail seller from starting earlier than the date of delivery of the good.

This bill is author sponsored. It is supported by a variety of consumer advocacy groups, including the Consumer Federation of California and the California Public Interest Research Group. There is no known opposition.

Comments

Consumer good warranties

The Song-Beverly Consumer Warranty Act sets forth standards for warranties that govern consumer goods and outlines remedies available to purchasers. Retail sales of consumer goods are accompanied by the manufacturer's and the retail seller's implied warranty that the goods are merchantable. In specified circumstances, an implied warranty that the good is fit for a particular purpose also attaches. Such implied warranties can generally not be waived or otherwise modified except in limited, specified circumstances.

Express warranties are additional warranties that can be expressed by a manufacturer, distributor, or retailer in connection with the sale of consumer goods. They commit the entity to preserving or maintaining the utility or performance of the relevant good, or compensation if such warranty fails. Unlike implied warranties, they must be written statements as to their scope and application, pursuant to the Act.

At the federal level, the Magnuson-Moss Warranty Act requires entities providing express warranties to fully and conspicuously disclose in simple and readily understood language the terms and conditions of such a warranty. (15 U.S.C. § 2301 et seq.) The Federal Trade Commission (FTC) is empowered to promulgate regulations to carry out the act. However, the FTC is expressly prohibited from prescribing the duration of written warranties given or to require that a consumer product or any of its components be warranted at all.

FTC regulations require a series of disclosures in connection with express warranties on consumer products costing more than $15. This includes clear language indicating the point in time or event on which the warranty term commences, if different from the purchase date, and the time period or other measurement of the warranty duration. (16 C.F.R. § 701.3.)

Concerns have arisen that initiating such warranties at the point of purchase undermines their utility for consumers when the consumer does not receive the good at that point. The author and supporters highlight two conditions that make it increasingly likely that there are lag times between purchase and receipt, thereby affecting the value of these warranties. The first is the dramatic rise in e-commerce.

According to the United States Department of Commerce, e-commerce constituted 19.1 percent of all retail sales in 2021, increasing 50.5 percent since 2019, with Amazon accounting for more than 40 percent of all e-commerce in the country.[1] Inherently, when a consumer buys a consumer good online there is some delay before they receive that good. If a relevant one-year consumer warranty begins when the "buy" button is clicked and the good does not arrive for several months, the warranty is of fractional value. A Los Angeles Times article documented consumer frustrations with this lost time, quoting one regarding a warranty on his Whirlpool dryer: "What if you're remodeling your house and don't receive an appliance for six months? […] Have you lost half your warranty?"[2]

The second condition is the recent, widespread disruption of the global supply chain:

> Covid-19 has left one very destructive economic issue in its wake: disruption to global supply chains.

---

[2] David Lazarus, *Warranties usually start on purchase date, not delivery date* (February 9, 2015) Los Angeles Times, https://www.latimes.com/business/la-fi-lazarus-20150210-column.html.

> The rapid spread of the virus in 2020 prompted shutdowns of industries around the world and, while most of us were in lockdown, there was lower consumer demand and reduced industrial activity.
>
> As lockdowns have lifted, demand has rocketed. And supply chains that were disrupted during the global health crisis are still facing huge challenges and are struggling to bounce back.
>
> This has led to chaos for the manufacturers and distributors of goods who cannot produce or supply as much as they did pre-pandemic for a variety of reasons, including worker shortages and a lack of key components and raw materials.[3]

If warehouses and retailers are less likely to have desired products in stock at the time of purchase, the delay between purchase and delivery are likely to only get longer and longer, further undermining consumer warranties.

Enhancing express warranties for consumers

While FTC regulations set the default starting point for express warranties at the purchase of the consumer good, California law, namely the Song-Beverly Act, does not generally dictate when such warranties take effect. There are exceptions for certain wheelchairs, assistance devices, and hearing aids. These warranties are required to take effect upon receipt or delivery to the consumer. (Civ. Code §§ 1793.02. 1793.025.)

This bill prohibits a manufacturer, distributor, or retail seller from making an express warranty with respect to a consumer good that commences earlier than the date of delivery of the good. This applies prospectively and provides a buffer period for industry. It explicitly provides that it does not limit an express warranty made before July 1, 2023.

According to the author:

> Unfortunately, when a warranty effective date starts at the time of purchase, the consumer may not receive the full benefit or duration of the warranty if delivery of the product takes days, weeks, or even months to arrive. This was a problem prior to the pandemic and current supply chain issues, but has only grown more apparent. For example, if an express warranty is good for one year, but the consumer does not receive the product for six months, then the

consumer has essentially lost half of the warranty. AB 2912 would require express warranties to start no earlier than the date of delivery of the product rather than the date of purchase. It is important to point out that that there is precedent for having warranties begin on the delivery date. Carpet installers, for example, typically operate this way and a European warranty begins when a product is received, not purchased. Additionally, according to state law, the duration of warranties for wheelchairs and hearing aids already start from the date of delivery. AB 2912 is a common sense consumer protection bill that builds upon existing law.

SUBJECT: Alcoholic beverages

SOURCE: Author

DIGEST: This bill requires the Alcoholic Beverage Control Appeals Board (Board) to enter its order within 60 days after an appeal is submitted for decision.

Senate Floor Amendments of 8/25/22 clarify when the Board must enter its order.

ANALYSIS:

Existing law:

1) Establishes the Department of Alcoholic Beverage Control (ABC) and grants it exclusive authority to administer the provisions of the Alcoholic Beverage Control Act (Act) in accordance with laws enacted by the Legislature. This involves licensing individuals and businesses associated with the manufacture, importation, and sale of alcoholic beverages and the collection of license fees for this purpose.

2) Provides, under the ABC Act, for the issuance of various alcoholic beverage licenses, including the imposition of fees, conditions, and restrictions in connection with the issuance of those licenses.

3) Permits a manufacturer, winegrower, rectifier, distiller, distilled spirits wholesaler, or any agent of those licensees to conduct market research.

4) Prohibits a retail premises from participating in more than one research project, as specified, during a calendar year and authorizes a research project to involve multiple onsite surveys.

5) Establishes the Board to review the Department ABC's decisions ordering penalty assessments and issuing, denying, transferring, suspending, or revoking a license, as specified.

6) Prescribes a process pursuant to which an alcoholic beverage licensee may appeal a final determination of the Department of ABC imposing a penalty assessment or affecting a license to the Board. In this regard, the Board is required to enter its order within 60 days after the filing of an appeal.

This bill:

1) Requires the Board to enter its order within 60 days after an appeal is submitted for decision.

2) Makes clarifying and technical changes to the Department of ABC to licensees who conduct market research, including specifying that surveys, as stated, are to gather feedback.

Background

Purpose of this bill. According to the author's office, "this bill makes a minor, non-controversial changes to statute relating to ABC licensees who conduct market research. The bill fixes an oversight in current law by stating that when a retail premise is used by an ABC licensee, the research project may involve multiple onsite surveys that can be sued to gather feedback."

Additionally, the author's office states that, "this bill attempts to address a growing concern by the alcohol industry, law enforcement, and citizens relating to the period upon which an appeal is rendered by the Board. ABC's enforcement

activities have increased in response to legislative mandates to curtail underage drinking, which has led to more rulings and, in turn, the number of appeals to the Board has increased. The author is concerned with the length of time it is taking to process the appeals. In many cases, it has been reported that an extended period of time passes before the Board renders a final order. The author notes while the case is being reviewed the "bad actors" continue to operate which troubles law enforcement and residents within the community. The goal of this measure is to expedite the process for all involved parties."

ABC Appeals Board. The Board was created by the California Constitution effective January 1, 1955. The Board consists of three members appointed by the Governor. The Board provides quasi-judicial administrative review of decisions of ABC. The questions that may be considered by the Board are limited by the California Constitution and by statute.

The Board determines appeals solely on the record of the Department of ABC and any briefs filed by the parties. No additional evidence may be received by the Board. However, the parties to appeals may present oral argument during the Board's monthly hearings. The Board issues written decisions with orders affirming, reversing, and/or remanding the Department of ABC decisions. Judicial review of the Board's order may be obtained by filing a petition for writ of review with the California Supreme Court or the Court of Appeal.

The timely issuance of orders by the Board is a critical part of the state's regulation of the alcoholic beverage industry and enforcement of the Act. When an appeal is filed, any action by the Department of ABC on its decision is stayed until the appeal is concluded by a final order of the Board. During the appeal period, a license that is subject to the appeal may not be suspended or revoked; in the case of an application for a license, the Department of ABC may not issue or transfer the license while the process is in effect.

Filing Process. Licensees must notify the Board that they are appealing a decision of the Department of ABC by filing a document with the Board. The appeal document must be filed at the Board office within 40 days from the date of the Department of ABC's decision. However, if the Department of ABC's decision states it is to be "effective immediately," a licensee must file an appeal within 10 days after the date of the decision.

Related/Prior Legislation

AB 1589 (Assembly Governmental Organization Committee, Chapter 306, Statutes of 2021) authorized the electronic filing of appeals to the Board and electronic delivery of final orders by the Board. Additionally, the bill clarified that a licensed retailer is not obligated to buy or sell alcoholic beverage products of a distilled spirits wholesaler when selling marketing date to that wholesaler.

AB 1429 (Assembly Governmental Organization Committee, Chapter 567, Statutes of 2001) authorized, among other things, various licensed entities to conduct market research and, in connection with that research, to purchase from licensed on-sale retailers' data, regarding the purchases and sales of alcoholic beverage products, at the customary rates that those retailers sell similar data for nonalcoholic beverages products.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, indeterminate, potentially significant fiscal impact to the ABC Appeals Board to the extent that the Board may need additional resources to comply with the new deadline to issue an order after the filing of an appeal. Potential costs would include, among other things, workload related to processing appeals on a specific timeframe and conducting more frequent Board meetings.

As the ABC Appeals Board is independent from the Department of ABC, the Department does not anticipate a direct fiscal impact from the bill. The Department of ABC notes that if licensing and enforcement matters are delayed due to the lengthier appeals deadline, the bill may result in a larger case file for matters in which the Department may need to participate in appeals before the Court of Appeals or the California Supreme Court.

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 68-0, 5/25/22 - See last page for vote

SUBJECT: California Cannabis Tax Fund: spending reports

SOURCE: Author

DIGEST: This bill requires the Department of Health Care Services (DHCS) to provide the Legislature specified spending reports of funds from the Youth Education, Prevention, Early Intervention and Treatment Account (YEPEITA).

Senate Floor Amendments of 8/25/22 move the provisions in this bill to a different paragraph to avoid a conflict with AB 195 (Assembly Budget Comittee, Chapter 56, Statutes of 2022), the cannabis trailer bill.

ANALYSIS: Existing law creates the YEPEITA, pursuant to the 2016 ballot initiative, the Control, Regulate, and Tax Adult Use of Marijuana Act (AUMA), or Proposition 64, to be administered by DHCS for programs for youth that are designed to educate about and to prevent substance use disorders (SUDs), and to prevent harm from substance abuse. [RTC §34019]

This bill:

1) Requires DHCS, on or before July 10, 2023, to provide the Legislature a spending report of funds from the YEPEITA for the 2021-22 and 2022-23 fiscal years.

2) Requires DHCS, on or before July 10, 2024, and annually thereafter, to provide to the Legislature a spending report of funds from the YEPEITA for the prior fiscal year.

Comments

1) *Author's statement.* According to the author, as the cannabis industry continues to grow and revenues collected from the excise taxes on cannabis continue to increase, this bill will carve out a larger role for the Legislature in the oversight of cannabis tax revenue expenditures.

2) *AUMA.* In November 2016, voters passed AUMA, which, among other things, allocates 60% of taxes on marijuana, by July 15 of each fiscal year beginning in 2018-19, to the YEPEITA to be administered by DHCS for programs for youth that are designed to educate about and to prevent substance use disorders and to prevent harm from substance abuse. AUMA requires DHCS to enter into interagency agreements with the California Department of Public Health and California Department of Education to implement and administer programs that emphasize accurate education, effective prevention, early intervention, school retention, and timely treatment services for youth and their families and caregivers. Programs are permitted to include components such as:

    a) Prevention and early intervention services to recognize and reduce risk factors related to substance use and the early signs of problematic use and of substance use disorders;
    b) Grants to schools to develop and support student assistance programs to prevent and reduce substance use, improve school retention and performance, support students who are at risk of dropping out of school, and promote alternatives to suspension and expulsion;
    c) Grants to programs for outreach, education, and treatment for homeless youth and out-of-school youth with substance use disorders;
    d) Access and linkage to care provided by county behavioral health programs for youth and their families and caregivers who have SUDs or are at risk of developing an SUD; and,

e) Youth-focused SUD programs that are culturally and gender competent, trauma-informed, evidence-based, and provide a continuum of care, as specified.

AUMA contains a provision that prohibits the Legislature, prior to July 1, 2028, from changing the allocation to DHCS from the YEPEITA from its stated purposes.

SENATE APPROPRIATIONS COMMITTEE: Senate Rule 28.8

ASSEMBLY FLOOR: 72-0, 5/19/22 (Consent) - See last page for vote

SUBJECT: Transportation

SOURCE: Author

DIGEST: This bill is the annual transportation omnibus bill to make noncontroversial and minor changes to provisions of law related to transportation.

Senate Floor Amendments of 8/22/22 add language to prevent chaptering out with provisions of AB 2496 (Petrie-Norris).

ANALYSIS: Existing law includes numerous provisions related to transportation.

This bill:

1) Updates federal program references for the Active Transportation Program.

2) Updates the reference of required motorcycle range and street instruction to be under the guidance of the California Motorcyclist Safety Program.

3) Makes numerous changes for federal conformity regarding the operation of commercial vehicles and enforcement by the California Highway Patrol.

4) Clarifies process for when a license issued by the Department of Motor Vehicles (DMV) is automatically cancelled if the licensee's seller's permit is suspended, revoked, or canceled by the California Department of Tax and Fee Administration (CDTFA).

5) Updates a subsection reference for valid permitting to operate a motor vehicle.

6) Deletes obsolete references to "household goods carriers" and the Public Utilities Commission and replaces them with "household movers," and Department of Consumer Affairs and updates appropriate cross references.

7) Updates the testing standard of vehicular exhaust systems in accordance with the most current Society of Automotive Engineers (SAE) International standard.

8) Deletes obsolete reference in the Vehicle Code regarding the New Motor Vehicle Board (Board).

9) Contains language to prevent chaptering out with provisions of AB 2496 (Petrie-Norris).

Comments

1) *Purpose*. The Assembly Transportation Committee is authoring this year's transportation omnibus bill as a cost-effective way of making a number of minor, non-controversial changes to statute at one time. There is no known opposition to any of the items in the bill. If issues arise that cannot be resolved, the provision of concern will be deleted from the bill.

2) *Updates*. AB 2956 includes the following provisions, with the proponent of each provision noted in brackets:

   - Federal program references for the Active Transportation Program are out of date. The Transportation Alternatives Program (TAP) and Recreational Trails Program have been eliminated as individual programs and consolidated into the Surface Transportation Block Program under Section 133(h) of Title 23 of the U.S. Code. The entire TAP program (referred to in code as the "STP set-aside") is under Section 133(h) and the recreational trails portion of the program is under Section 133(h)(5). *This section updates the state highway code to reference Section 133(h) of Title 23 of the U.S. Code.* [Metropolitan Transportation Commission]

- The California Motorcyclists Safety Program, administrated by the California Highway Patrol, is the only official range and street teaching motorcycle driving instruction certified by the State. *This section updates the required motorcycle range and street instruction and to be under the guidance of the Motorcycle Safety Foundation California Motorcyclists Safety Program.* [ABATE of California, Motorcyclists Rights & Safety Organization]

- Numerous sections of the California Vehicle Code (CVC) contain outdated references to federal code. *To maintain consistency with federal mandates, this section:*
    a) Amends Section 2400 of the CVC, which applies to size and weight certification.

    b) Amends Section 2800 of the CVC, which relates to vehicle inspection requirements.

    c) Amends Section 2813 of the CVC, which applies to vehicle inspection requirements (adding driver's license (DL) and hours-of-service compliance).

    d) Amends Section 12505(g) of the CVC, which is applicable to foreign commercial driver licenses.

    e) Amends Section 26710 of the CVC, which applies to windshield requirements.

    f) Amends Section 27903(c) of the CVC, which applies to explosives transportation permits and regulatory exemptions.

    g) Amends Section 34501(b) of the CVC, related to explosives transportation permits and regulatory exemptions.

    h) Amends state statute applicable to vehicle equipment condition by adding new Section 34501.19 of the CVC.

    i) Amends Section 34505.6 of the CVC, which applies to household goods carriers; and,

    j) Amends Section 16028(b) of the CVC to mandate that a peace officer request and verify evidence of financial responsibility from the driver of a vehicle, and remove the nonessential mandate that a peace officer

write the vehicle insurance policy number on a notice to appear. [California Highway Patrol]

- Current statute requires the DMV to cancel a dealer license when a dealer voluntarily surrenders their seller's permit to CDFTA for cancellation. *This section closes a loophole that enables dealers to continue to sell vehicles as licensed dealers without remitting sales and use tax to CDTFA.* [California Department of Tax and Fee Administration]

- AB 1343 (Spitzer, Chapter 768, Statutes of 2003) inadvertently exempts adults with an instruction permit from the requirement to drive under the supervision of an accompanying licensed driver. *This section amends subdivision (d) to include paragraph (5) of subdivision (a). This will restore adult drivers to subdivision (d).* The language is in print as AB 1898 (Fong) of 2022. [Republican Caucus]

- CVC Sections 2810.1, 16020, 16560, 34505.6, 34507.5, 34601, 34603, 34622, 34264 contain outdated cross-references for the exemption related to household movers and the permit required, and outdated reference to "goods carrier" rather than "mover." *This section reflects the proper cross-reference, and updates the term "mover" rather than "goods carrier."* [California Moving and Storage Association]

- California measures a motor vehicle's exhaust using a Society of Automotive Engineers' (SAE) methodology. SAE periodically updates the standard to reflect the latest best practices and to account for changing vehicle technology. As a result, the CVC must be updated to reflect these changes. *This section updates the California Vehicle Code to allow the Bureau of Automotive Repair to use the latest SAE testing standard when measuring a motor vehicle's exhaust noise.* [Specialty Equipment Market Association]

- AB 179 (Reyes, Chapter 796, Statutes of 2019), in part, repealed Article 3 of Chapter 6 of the Vehicle Code (§§3052-3058), which granted the Board the authority to hear appeals of decisions made by the Director of the DMV. Vehicle Code §3008 currently makes reference to the conduct of the Board in regard to hearing those appeals and must be deleted. In addition, Vehicle Code §3065.3 and 3065.4 were added to the Board's jurisdiction and therefore §3069.1 needs to be amended to incorporate these protests. Subdivisions (b) and (c) of Section 3008 must be removed to correct

obsolete references. *The new protests added to the Board's jurisdiction in §§3065.3 and 3065.4 need to be incorporated into §3069.1 for consistency purposes.*

SUBJECT: Judiciary omnibus

SOURCE: Author

DIGEST: This bill makes various noncontroversial changes to existing law, including clarifying existing law, updating obsolete references, and removing a sunset on providing electronic notices of lien sales by self-storage facilities.

Senate Floor Amendments of 8/24/22 fix a typographical error in Code of Civil Procedure Section 1821(a)(1)(E) to change "manage the conservatee's own financial resources" to "manage their own financial resources," and add chaptering out amendments with AB 1663 (Maienschein, 2022) and SB 523 (Leyva, 2022).

Senate Floor Amendments of 8/9/22 change erroneous reference to "support witness" to "support person" in the amendments to Family Code Section 6308 to conform to defined term in statute and makes other nonsubstantive changes to address chaptering out issues related to SB 189 (Committee on Budget and Fiscal Review, Chapter 48, Statutes of 2022) becoming effective.

ANALYSIS:

Existing law and this bill:

1) Existing law provides that certain provisions authorizing and governing electronic communications between self-storage facility owners and self-storage unit occupants, such as sending preliminary lien notices, notices of lien sale, and blank declarations in opposition to lien sales, sunset on January 1, 2023. (Bus. & Prof. Code § 21701, 21703, 21705, and 21712.)

   This bill deletes that sunset thereby indefinitely extending these provisions.

2) Existing law requires specified disclosures to be made in connection with sales and other transfers of single-family residential real property. (Civ. Code § 1102-1102.19.)

   This bill clarifies that the disclosures to be made are those that are statutorily required on the date the parties enter into a contract, and that if an amendment to the disclosure statutes becomes effective after the date the contract is entered into, that amendment does not affect the disclosures required to be made during the transaction, unless the applicable statute provides otherwise.

3) Existing law establishes the Unclaimed Property Law (UPL), provides that it is the intent of the Legislature that property owners be reunited with their property, and prohibits property received by the state under the UPL from permanently escheating to the state. (Code Civ. Proc. §§ 1500 et. seq.; § 1501.5(a) & (c).) Existing law provides requirements for escheatment, reporting, and delivery to the State Controller of unclaimed securities under the UPL, and requires the Controller to sell unclaimed securities between 18 to 20 months from the date they were due to be reported to the Controller by the holder. (Code Civ. Proc. § 1516 & 1563.)

   This bill clarifies that under the UPL, holders of securities with a per share value of one cent or less do not need to report these securities to the Controller unless the aggregate value of the securities held exceeds $1,000, and provides that the deadline by which the Controller is required to sell unclaimed securities is 18 to 20 months from the date on which the securities were

actually reported to the Controller, not the date on which the report was due to be filed.

4) Existing law authorizes joint applicants to the superior court for recognition of a tribal court order that establishes a right to child support, spousal support payments, or marital property rights to be eligible for a $100 filing fee. (Code Civ. Proc. § 1733.1.)

   This bill clarifies that a single applicant is eligible for that $100 filing fee in addition to joint applicants.

5) Existing law authorizes a local child support agency to issue a notice directing that child support payments be made to the agency itself, another county office, or the State Disbursement Unit, and requires this notice to be served on both the parent obligated to pay support and the parent entitled to receive it. (Fam. Code § 4204.)

   This bill requires local child support agencies to provide notice to both parents and to the court when they are no longer providing child support-related services. This bill also deletes two references to the "person having custody" of a child in provisions that deal with court-ordered child support and replaces one of the references with "support obligor or obligee," to clarify that the statute's application is tied to child support obligations, and not to which parent has custody.

6) Existing law establishes procedures for the electronic filing of petitions for domestic violence restraining orders and gun violence restraining orders. (Fam. Code §§ 6307 & 6308; Pen. Code §§ 18122 & 18123, respectively.

   This bill makes the following changes to those procedures:

   a) Conforms the timing for processing electronically-filed petitions to existing statutory timeframes for processing petitions filed in person;

   b) Replaces the provision of telephone-based information with information through the self-help center and on the court website;

   c) Provides for electronic provision of the notice of court date, copies of the request to serve on the opposing party, and the temporary restraining order, unless the petitioner notes, at the time of electronic filing, that the documents will be picked up from the court; and

d) Permits a "support person," as defined, to appear remotely at the hearing on a petition for a domestic violence restraining order.

7) Existing law provides that records are only presumptively sealed in cases involving assisted reproduction for actions filed beginning January 1, 2023 under the Uniform Parentage Act. (Fam. Code §§ 7643 & 7643.5.)

   This bill clarifies that actions filed on or after January 1, 2023, are only presumptively sealed in cases involving assisted reproduction.

8) Existing law authorizes the Department of Fair Employment and Housing (DFEH) to provide assistance to communities and persons therein in resolving disputes, disagreements, or difficulties relating to discriminatory practices based on protected categories under the Fair Employment and Housing Act, but only when, in the Department's judgment, peaceful relations among the citizens of the community are threatened. (Gov. Code § 12931.)

   This bill clarifies that DFEH can assist in resolving disputes, disagreements, or difficulties when peaceful relations among persons of the community are threatened.

9) Existing law provides that citizens are eligible to serve, without pay, on advisory agencies and conciliation councils that work with the Fair Employment and Housing Council. (Gov. Code § 12935.)

   This bill clarifies that persons are eligible to serve, without pay, on advisory agencies and conciliation councils that work with the Fair Employment and Housing Council.

10) Existing law provides DFEH a period of either one year or two years, depending on whether the complainant is an individual or a group or class, to investigate a complaint alleging unlawful employment practices. (Gov. Code § 12965.)

    This bill tolls (stops) the period in which DFEH must complete its investigation of a complaint alleging unlawful employment practices during any mandatory or voluntary dispute resolution proceeding.

11) Existing law requires the California Commission on Disability Access to make an annual report to the Legislature, by January 31 of each year, regarding accessibility violations alleged in demand letters and court complaints for the preceding calendar year. (Gov. Code § 14985.8.)

This bill changes the date the report is due to March 31 of each year.

12) Existing law specifies procedures for the appointment of counsel for conservatees, proposed conservatees, and persons alleged to lack legal capacity who neither have, nor plan to retain, legal counsel. (Prob. Code §§ 1471, 1821, 1823, 1826, 1828, 1894, 1895, 2250.6, 2253, & 2356.5.)

    This bill clarifies terminology in these provisions in order to facilitate courts' implementation of these provisions.

13) Existing law specifies the duties of trustees if no person holding the power to revoke a trust is competent and the trust instrument does not otherwise address this situation. (Prob. Code § 15800.)

    This bill clarifies terminology used in this provision.

14) Existing law requires the Judicial Council to adopt rules of court meant to allow for telephonic or other remote appearance options by tribes in child welfare proceedings involving an Indian child, if the federal Indian Child Welfare Act of 1978 applies, by July 1, 2021. (Welf. &Inst. Code § 224.2.)

    This bill authorizes courts, in child welfare proceedings involving an Indian child in which the federal Indian Child Welfare Act of 1978 applies, the flexibility to provide for remote appearance by tribes via any method of appearance that is both consistent with court capacity and contractual obligations, and takes into account the capacity of the tribe, so long as the method chosen is sufficient to allow a tribe to fully exercise its rights.

15) Existing law provides that when a local child support agency accepts and disburses payments as provided relating to a child who is the subject of a court-issued support order, the local child support agency or Department of Child Support Services must issue a notice that the payments will be directed to the local child support agency on the child support obligor and oblige, and may serve the notice on the court in which the support order was issued. (Fam. Code, § 17404.4.)

    This bill requires that notice to be served on the court in which the support order was issued.

Comments

According to the author, provisions in this bill were proposed to the Assembly Judiciary Committee by the Attorney General, California Association of Realtors,

California Bankers Association, California Commission on Disability Access, California Self Storage Association, California Tribal Families Coalition, County Recorders Association of California, Department of Fair Employment and Housing, Judicial Council of California, and the State Controller's Office.

Extends provisions allowing electronic notices of liens for self-storage facilities indefinitely

Self-storage facilities in California are governed by the California Self-Storage Facility Act (the Act). (Bus. & Prof. Code, §§ 21700-21716.) The Act imposes a lien on any property that an occupant stores in a self-storage unit, in favor of the owner, and sets forth the procedures by which the owner can proceed with the attachment of the lien and a lien of sale if the occupant does not pay the agreed-upon rent. (Bus. & Prof. Code, §§ 21702-21707, & 21710.) Until 2018, the only way an owner could send the preliminary notice of lien, the notice of lien sale, and blank declarations in opposition to lien sales was via certified mail, postage prepaid, or by regular mail if the owner obtained a certificate of mailing indicating the date the notice was mailed, to the occupant's last known address (and to an alternative address, if the occupant provided one). In 2017, the Legislature passed AB 1108 (Daly, Chapter 227, Statutes of 2017), which adopted, on a trial basis, alternative procedures by which an owner could send the preliminary lien notices, notices of lien sale, and blank declarations in opposition to lien sales, such as via email. Statutory provisions were put into place that were meant to ensure that facility owners could demonstrate that occupants had actually received and read these emails. A sunset date of January 1, 2023, was put into place in order to verify whether any consumer harm resulted from email notice. The Assembly Judiciary Committee analysis states that neither of its committee staff nor the staff of the Assembly Privacy Committee have received reports of consumer harm from these electronic notices.[1] This bill removes the sunset date on these electronic notice provisions, thereby extending them indefinitely.

Clarifies the effect of real estate disclosure statutes on transactions that are in progress

The Civil Code provides for various disclosures that must be made in connection with any sale of a single-family residential real property. (Civ. Code § 1102 et. seq.) This bill provides that if an amendment to a disclosure statute becomes effective after the date the parties enter into a contract, that amendment does not affect the disclosures required to be made during the transaction—unless the

[1] Asm. Comm. on Judiciary, analysis of Asm. Bill No. 2960 (2021-2022 Reg. Sess.) as amended Apr. 7, 2022, at p. 5.

applicable statute specifies otherwise. This latter provision allows the Legislature to designate in statute that particularly-important disclosures are required to be updated mid-transaction and gives the parties to the contract clear guidance on what disclosures are required to be made.

Updates to UPL

This bill makes two changes to the UPL. First, it clarifies that the deadline for the Controller to sell unclaimed securities begins on the date the required report is received by the Controller, not on the date it was due as is required under existing law. This change ensures the owner of the securities are allotted the same sufficient time to reunite with their property before the securities are sold, regardless of when the holder of the securities files the required report (i.e. in time or late).

Second, this bill clarifies that securities with a per share value of one cent or less are not required to be reported the Controller unless the aggregate value of the security held exceeds $1,000. Securities that do not meet this criteria will continue to be maintained by the holder in the name of the owner, and, if the securities gain value, the holder will be required to report and deliver the securities during the next reporting cycle.

Requires local child support agencies to provide notice to parents and to the court when terminating services

This bill requires local child support agencies to provide notice to both parents and the court when no longer providing services with the goal streamlining court scheduling, assisting parents in understanding the child support process, and establishing a consistent procedure among local child support agencies.

Electronic filing of domestic violence restraining orders and gun violence restraining order petitions

SB 538 (Rubio, Chapter 686, Statutes of 2021) established procedures meant to allow parties to file petitions electronically for domestic violence restraining orders and gun violence restraining orders. According to the Judicial Council, the bill language did not conform to existing court processes and has created some difficulties for the courts in implementing its provisions.

Updating a tolling provision in the Fair Employment and Housing Act

This bill clarifies that DFEH may toll (pause) the statute of limitations under Section 12965 of the Government Code for bringing a civil action for unlawful employment practices during a mandatory or voluntary dispute resolution

proceeding. The tolling begins on the date DFEH refers the case to its dispute resolution division and ends on the date the dispute resolution division closes its mediation record and returns the case to the division that referred it.

This bill makes various other nonsubstantive and technical changes to update cross-references and terminology and various changes to clarify existing law.

ARGUMENTS IN SUPPORT: The author writes:

> AB 2960 is the Civil Law omnibus bill, generally introduced by Assembly Judiciary Committee annually or biennially. This year's measure includes a host of topics that are generally non-controversial or technical and have been merged into one vehicle to assist the Legislature in efficiently managing minor Judiciary-related matters this session.

In support of this bill, the California Association of Realtors writes:

> Among other provisions, AB 2960 clarifies what disclosures are required by law in a real estate transaction when a real estate contract is entered into at one point during the year and closes escrow at another point after a new disclosure law has gone into effect. There has been confusion in the past about this issue that has caused buyers to attempt to back out of transactions. It is in the best interest of both consumers and the real estate industry to bring clarity to the law.

SUBJECT: Agricultural land conservation: California Farmland Conservancy Program Act

SOURCE: American Farmland Trust

DIGEST: This bill revises and recasts provisions of the California Farmland Conservation Program Act (CFCP) under the California Department of Conservation (DOC) to, among other things, authorize the CFCP to offer financial aid for projects and activities on agricultural lands that support conservation and sustainable land management, revise requirements on the department before disbursing funding under the program, and authorize any interest earned on moneys from federal grants, and gifts and donations to the CFCP be deposited into the California Farmland Conservancy Program Fund (Fund).

Senate Floor Amendments of 8/22/22 expressly authorize any interest earned on continuously appropriated moneys to the CFCP also be deposited into the Fund.

ANALYSIS:

Existing law:

1) Establishes CFCP, administered by DOC *(Public Resources Code Section 10200).*

2) Creates the Fund within the DOC and requires moneys in the fund to be used to purchase agricultural conservation easements, fee title acquisition grants, and land improvement and planning grants *(Public Resources Code Section 10230).*

This bill:

1) Authorizes the interest earned on continuously appropriated moneys to the CFCP be deposited into the Fund.

2) Authorizes the program to offer financial assistance, including grants or contracts for projects and activities on agricultural lands that support agricultural conservation and sustainable land management., including, but not limited to:

    a) Acquisition of agricultural conservation easements or fee title to protect the land's agricultural use or capacity.
    b) Improvements to land protected by a conservation easement, deed restriction, or similar long-term agreement as determined by the director.
    c) Plans to protect and conserve agricultural lands and plans to protect, conserve, restore, or enhance resources or values located on or adjacent to agricultural lands or that were historically present on agricultural lands.
    d) Technical assistance to develop projects, prepare applications, and implement projects.
    e) Capacity building.
    f) Technology transfers.
    g) Administrative costs incurred by the department to administer the program.
    h) Any other purposes approved by the Legislature in a funding appropriation for the program.

3) Allows funding to be used in accordance with the expenditures and distributions authorized, required, or otherwise provided in the program for grants for the acquisition of agricultural conservation easements for fee title.

4) Expands the authorization of the department to pay direct costs associated with the acquisition of an easement or fee title.

5) Allows the department to pay direct costs associated with the acquisition for costs incurred during the grant term.

6) Defines the following:

   a) "Agricultural Conservation Easement" or "conservation easement" or "easement" to mean an interest in land, less than fee simple that represents the right to prevent the development or improvement of the land, as specified in Section 815.1 of the Civil Code, for any primary purpose other than agricultural production.
   b) "Applicant" to mean an entity listed in Section 815.3 of the Civil Code that applies for a grant authorized pursuant to this division (Division 10.2).
   c) "Agricultural land" to mean prime farmland, farmland of statewide importance, unique farmland, farmland of local importance, and grazing land as defined in the Guidelines for the Farmland Mapping and Monitoring Program, pursuant to Section 65570 of the Government Code.
   d) "Restriction" to have the same meaning as defined in Section 784 of the Civil Code, which states "restriction", means a limitation on, or provision affecting, the use of real property in a deed, declaration, or other instrument, whether in the form of a covenant, equitable servitude, condition subsequent, negative easement, or other form of restriction."
   e) "Nonprofit organization" to mean an organization described in subdivision (a) of Section 815.3 of the Civil Code.
   f) "Secretary" to mean the secretary of the Natural Resources Agency.
   g) "Resource conservation district" to mean a resource conservation district established pursuant to Division 9 (commencing with Section 9001) of the Public Resource Code.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

1) This bill could result in cost pressures of an unknown, but potentially significant amount, by simplifying the CFCP application process and increasing expenditure flexibility. Consequently, the CFCP could become oversubscribed. CFCP funding sources have included the General Fund (GF), special funds and various propositions.

2) Additionally, to the extent that the bill results in greater demand for CFCP grants, it could lead to annual property tax revenue reductions of an unknown, but potentially significant amount. Lower local property tax revenues lead to increased General Fund Proposition 98 spending by up to roughly 50 percent

(the exact amount depends on the specific amount of the annual Proposition 98 guarantee, which in turns depends upon a variety of economic, demographic and budgetary factors). Conservation easements do not remove land from local property tax rolls, but they can reduce the land's market value, thereby lowering property tax revenue.

3) DOC would incur minor and absorbable costs to revise CFCP administration.

SUPPORT: (Verified 8/23/22)

American Farmland Trust (source)

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: According to the author, "AB 2964 will modernize the California Farmland Conservancy program (CFCP) by improving efficiencies, cost-effectiveness, and streamlining. This bill will also remove barriers such as complicated application processes and requirements that often prevent access for farmers and ranchers."

SUBJECT: Alcoholic beverage control: fees

SOURCE: Author

DIGEST: This bill extends the sunset date on an existing provision in law that permits certain alcoholic manufacturers to hold free invitation-only promotional events in connection with the sale or distribution of a distilled spirit or wine. Additionally, the bill makes various technical and conforming changes to the alcoholic Beverage Control Act (ABC). Finally, this bill extends the current tied-house exception, until January 1, 2026, which authorizes a beer manufacturer to give, free of charge, up to five cases of retail advertising glassware to an on-sale retail licensee, per licensed location, each calendar year, and authorizes an on-sale retail licensee to accept, free of charge, up to 10 cases of retail advertising glassware, per licensed location, from licensed beer manufacturers each calendar year, subject to specified conditions.

Senate Floor Amendments of 8/24/22 add chaptering out language with SB 793 (Wiener).

ANALYSIS:

Existing law:

1) Establishes the Department of ABC and makes the department responsible for regulating the application, issuance, and suspension of alcoholic beverage licenses.

2) Prescribes a schedule of fees for different license types and distinguishes between new licenses and duplicate licenses.

3) Separates the alcoholic beverage industry into three component parts, or tiers, of the manufacturer (including breweries, wineries, and distilleries), wholesalers, and retailers. This is referred to as the "tied-house" law or "three-tier) system.

4) Provides, if an alcoholic beverage license application includes multiple new permanent licenses to be issued at the same premises, the application fee is to be required for only one of the applied-for licenses, and an application fee may not be charged for the remainder of the licenses. Current law requires that the application fee to be paid shall be the highest of the applicable fees.

5) Prescribes the amounts of fees required in connection with applications to transfer specified alcoholic beverage licenses.

6) Provides, if the application for a transfer includes multiple licenses issued at the same premises, an application fee is required for only one of the licenses being transferred, in which case the application fee is the highest of the applicable fees.

7) Requires a corporation, limited partnership, or limited liability company holding an alcoholic beverage license, or holding 10% or more of the ownership of a license, to provide specified reports to ABC and a fee for submission of the report.

8) Prohibits an alcoholic beverage licensee from giving any premium, gift, or free goods in connection with the sale or distribution of any alcoholic beverage, except as authorized by rules adopted by ABC.

9) Provides, until January 1, 2023, authorizes a manufacturer of distilled spirits, distilled spirits manufacturer's agent, out-of-state distilled spirits shipper's certificate holder, winegrower, rectifier, or distiller to provide, free of charge, entertainment, food, and distilled spirits, wine, or nonalcoholic beverages to

consumers at an invitation-only event in connection with the sale or distribution of wine or distilled spirits, subject to specified conditions.

10) Authorizes, until January 1, 2023, a beer manufacturer to give, free of charge, up to five cases of retail advertising glassware to an on-sale retail license, per license location, each calendar year, and authorizes an on-sale retail licensee to accept, free of charge, up to 10 cases of retail advertising glassware, per licensed location, from licensed beer manufacturers each calendar year, subject to specified conditions.

This bill:

1) Extends the sunset date, from January 1, 2023, to January 1, 2028, on an existing provision in law that permits distilled spirits manufacturers, winegrowers, or an authorized agent, to provide, free of charge, entertainment, food, and distilled spirits, wine, or nonalcoholic beverages to consumers at an invitation-only event, held on specified premises, in connection with the sale or distribution of wine or distilled spirits, as provided.

2) Prescribes the application fee for a special use, Type 99, license.

3) Requires that when an application for a new permanent license is combined with a specified application for a license transfer at the same premises, only the transfer application fee or the new permanent license application fee be paid, whichever is highest.

4) Requires that when an application for a transfer of a license is combined with an application for a new permanent license at the same premises, only the transfer application fee or the new permanent license application fee be paid, whichever is highest.

5) Provides that the annual fee payable for each new permanent license issued pursuant to certain provisions.

6) Prohibits requiring payment of the above-described report fee for duplicate licenses issued to branch office locations, as specified, or for club licenses or veterans' club licenses issued to nonprofit or fraternal organization, as specified.

7) Extends a current tied-house exception, until January 1, 2026, which authorizes a beer manufacturer to give, free of charge, up to five cases of retail advertising glassware to an on-sale retail licensee, per licensed location, each calendar year, and authorizes an on-sale retail licensee to accept, free of charge, up to 10

cases of retail advertising glassware, per licensed location, from licensed beer manufacturers each calendar year, subject to specified conditions.

Comments

Purpose of the Bill. According to the author's office, "this bill represents the annual Assembly Governmental Organization Committee omnibus alcohol committee bill that makes various technical and non-controversial changes to the Act."

Additionally, the author's office, "extending the sunset for five years on California's hosted entertainment law will allow wine and spirits suppliers to continue to present their brands before a variety of audiences. AB 2971 recognizes the value of this important marketing tool that benefits both consumers and suppliers while ensuring proper oversight of these invitation-only events by the ABC. It should be noted that no other changes to current law (invitation-only promotional events) are being allowed under this bill."

Supporters of this bill note that these events are beneficial to manufacturers when they launch a new brand or conduct a product extension campaign. To the best of their knowledge, the ABC has not experienced any significant enforcement issues regarding the events authorized by this bill.

Additionally, AB 2971 resolves several errors, inequities, and duplicative fees related to the application and annual renewal fee provisions for licenses issued by ABC resulting from comprehensive fee changes enacted in 2019. This bill also recognizes the license type number established by ABC for unique special licenses codified by the Legislature. Lastly, this bill makes various technical changes within the Act, including erroneous code section references.

Current Exception. Existing law generally prohibits an alcoholic beverage licensee, including a producer, from giving any gift or free goods in connection with the sale or distribution of any alcoholic beverage. However, several exceptions to these restrictions have been enacted. One such exception is related to hosted events where alcohol producers can promote a new brand or varietal. Specifically, AB 609 (Santiago, Chapter 295, Statutes of 2017), AB 1116 (Hall, Chapter 461, Statutes of 2013), and AB 2293 (de León, Chapter 638, Statutes of 2008). These three bills allowed specific alcohol producers to entertain consumers at private parties and events by invitation-only where potential buyers can sample their alcohol product. This bill will extend the sunset of this exception from January 1, 2022 to January 1, 2028.

Tied-house laws. As noted, Tied-house laws separate the alcoholic beverage industry into a three-tier license system (manufacturer, wholesaler, and retailers) and generally prohibit alcoholic beverage licensees from giving any gift in connection with the sale or distribution of an alcoholic beverage.

The original policy rationale for this body of law was to (1) promote the state's interest in an orderly market; (2) prohibit the vertical integration and dominance by a single producer in the market place; (3) prohibit commercial bribery and to protect the public from predatory marketing practices; and, (4) discourage and/or prevent the intemperate use of alcoholic beverages. Exceptions to these restrictions have been enacted throughout the years in those specific instances where the Legislature determined that the public's interests are protected.

With respect to beer, existing law provides that premiums, gifts, or free goods, including advertising specialties that have no significant utilitarian value other than advertising, shall be deemed to have greater than inconsequential value if they cost more than $0.25 per unit, or cost more than $15 in the aggregate for all those items given by a single supplier to a single retail premises per calendar year. The Department of ABC Rule 106(e)(2) provides the following examples of the kinds of consumer giveaway items with "inconsequential" value: ash trays, bottle or can openers, litter or shopping bags, matches, recipe cards, pamphlets, pencils, post cards, hats, posters, bottle or can stoppers, etc.

In addition, AB 1133 (Low, Chapter 623, Statutes of 2019) authorized, until January 1, 2023, a beer manufacturer to give, free of charge, up to five cases of retail advertising glassware to an on-sale retail licensee, per licensed location, each calendar year, and authorizes an on-sale retail licensee to accept, free of charge, up to 10 cases of retail advertising glassware, per licensed location, from licensed beer manufacturers each calendar year, subject to specified conditions.

This bill extends this tied-house exception to January 1, 2026.

Related/Prior Legislation

AB 1133 (Low, Chapter 623, Statutes of 2019) authorized, until January 1, 2023, a beer manufacturer to give, free of charge, up to five cases of retail advertising glassware to an on-sale retail licensee, per licensed location, each calendar year, and authorizes an on-sale retail licensee to accept, free of charge, up to 10 cases of retail advertising glassware, per licensed location, from licensed beer manufacturers each calendar year, subject to specified conditions.

AB 2573 (Low, 2018) would have allowed a beer manufacturer to give up to five cases of glassware to an on-sale retail licensee, as specified. (Vetoed by Governor Brown)

AB 609 (Santiago, Chapter 295, Statutes of 2017) extended the sunset, from January 1, 2018 to January 1, 2023, on an existing provision in law that permits certain alcohol manufacturers to hold free invitation-only promotional in connection with the sale or distribution of a distilled spirit or wine.

AB 711 (Low, Chapter 226, Statutes of 2017) allowed a beer manufacturer to provide consumers free or discounted rides through taxicabs, transportation network companies, or any other ride service for the purpose of furthering public safety. Additionally, the bill allowed the person authorized to conduct a hosted event to provide attendees at the event with a free ride home.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Department of ABC's activities are funded by regulatory and license fees and generally the department does not receive support from the General Fund. New legislative mandates, although modest in scope, may in totality create new cost pressures and impact the department's operating costs and future budget requests.

SUPPORT: (Verified 8/23/22)

Diageo

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: According to Diageo, "[the bill] contains a provision that extends the sunset date, until January 1, 2028, for a promotional program the Legislature previously authorized to permit invitation-only events during which distilled spirits manufacturers and winegrowers may showcase their products to consumers. This promotional opportunity has been very beneficial to manufacturers when conducting brand launches or product extension campaigns. To the best of our knowledge, ABC has not experienced any significant enforcement issues regarding the events authorized by this section."

SUBJECT: California Business Investment Services Program

SOURCE: Author

DIGEST: This bill requires, that in undertaking program activities related to the California Business Investment Services Program ("the Program", or CalBIS), housed within the Governor's Office of Business and Economic Development (GO-Biz), the Program director will encourage activities that support the upward mobility of existing small businesses and residents. This bill also requires that GO-Biz will work with partners to mitigate the impacts of gentrification that may lead to the displacement of residents and small businesses. This bill requires GO-Biz to track activities and necessary and as specified.

Senate Floor Amendments of 8/25/22 clarify: (1) the bill is encouraging activities that support the upward mobility of existing small businesses and residents; (2) GO-Biz, rather than the Program director, is to work with partners and stakeholders to moderate the impacts of gentrification that may lead to the displacement of residents and small businesses; (3) GO-Biz is to track activities, as necessary and as specified.

ANALYSIS:

Existing law:

1) Establishes GO-Biz within the Governor's Office for the purpose of serving as the lead state entity for economic strategy and marketing of California on issues relating to business development, private sector investment and economic growth. (Government Code (GC) § 12096 et. seq)

2) Creates the Program within GO-Biz. (GC § 12096.5(a))

3) States the purpose of the Program is to serve employers, corporate executives, business owners, and site location consultants who are considering California for business investment and expansion. (GC § 12096.5(c))

4) Requires in implementing the Program, the director shall establish and implement a process for convening teams on key business development situations, including, but not limited to, attracting new businesses, relocation of large manufacturers, or the closure of a large business employer. (GC § 12096.5(d))

5) Requires in implementing the Program, the director shall work cooperatively with local, regional, federal, and other state public and private marketing institutions and trade organizations in attracting, retaining, and helping businesses grow and be successful in California. (GC § 12096.5(e))

This bill:

1) Requires that in undertaking program activities related to the Program, housed within GO-Biz, the Program director will encourage activities that support the upward mobility of existing small businesses and residents.

2) Requires that GO-Biz will work with partners to mitigate the impacts of gentrification that may lead to the displacement of residents and small businesses.

3) Requires GO-Biz to track activities and necessary and as specified.

Background

GO-Biz. In February 2010, the Little Hoover Commission undertook a review of the state's economic and workforce development programs. In its final report, *Making up for Lost Ground: Creating a Governor's Office of Economic Development*, it analyzed the status and effectiveness of current programs since the 2003 demise of the Technology, Trade and Commerce Agency and recommended the creation of a new governmental entity to fill the void left by the dismantled agency.

The report called for a single entity that would promote greater economic development, foster job creation, serve as a policy advisor and deliver specific services (i.e., permitting, tax, regulatory, and other information) directly to the California business community. In April 2010, Governor Schwarzenegger issued Executive Order S-05-10 as a means to operationalize the report recommendations including the creation of the Governor's Office of Economic Development (GOED).

In October 2011, the Governor signed AB 29 (John A. Pérez, Chapter 475, Statutes of 2011), which effectively codified GOED and changed its name to GO-Biz. Since its inception, the office has served thousands of businesses, 95 percent of which are small businesses. The most frequent types of assistance include help with permit streamlining, starting a business, relocation and expansion of businesses, and regulatory challenges.

In March 2012, Governor Brown initiated a reorganization process to realign the state's administrative structure. Key changes include dismantling of the Business, Transportation and Housing Agency and the shifting of a number of key programs to GO-Biz including the Small Business Loan Guarantee Program, the California Travel and Tourism Commission, the California Film Commission, the Film California First Program, and the Infrastructure and Economic Development Bank (IBank). Currently, GO-Biz administers the following programs and units:

- "Made In California" program for the purpose of encouraging consumer product awareness and to foster the purchases of products manufactured in California.

- The California Inclusive Innovation Hub Program (iHub2) to incubate and/or accelerate technology and science-based firms, with a focus on underserved regions and communities.

- The California Competes Tax Credit Program under which "businesses who want to come to California or stay and grow in California" can receive an income tax credit.

- The California Business Investment Services Unit, which provides no-fee, tailored site selection services to employers and others who may be considering California for relocation or expansion.

- The California Business Portal, which provides information to California businesses about common questions, permitting, financial options, and more.

- The California Community Reinvestment Grants Program, which was included in Proposition 64, authorized GO-Biz to award grants to local health departments and certain nonprofit organizations to support communities disproportionately affected by the War on Drugs.

- Office of the Small Business Advocate which provides information and assistance to small businesses.

- The Zero Emission Vehicles (ZEV) Infrastructure Unit which works to accelerate the deployment of ZEV infrastructure.

- The International Affairs and Business Development Unit, which serves as California's primary point of contact for expanding international trade and investment relations. This unit focuses on foreign direct investment (services for foreign investors, foreign investment technical assistance, and the EB-5 Investor Visa Program), international trade promotion (STEP program, trade missions, export assistance, and the California-China Trade Office), and international agreements.

The CalBIS Program. As stated in statute, the Program's purpose is to "serve employers, corporate executives, business owners, and site location consultants who are considering California for business investment and expansion." The Program serves as a point of contact for firms interested in relocating or expanding in California. The unit is mostly designed to assist businesses in locating suitable site locations and business incentives. CalBIS provides confidential site selection services for businesses looking to relocate or expand in a new site in California. According to GO-Biz, some factors a company uses to determine how it will make a site selection include: utility cost and availability; land cost; available acreage; zoning; overall site readiness; rail service; water/sewer capacity and cost; and a ready and applicably trained workforce. CalBIS can also prepare a customized list of federal, state, and local business incentives and related information. A business

can obtain information on available tax credits, financial assistance and loan programs, local workforce skills, transportation and infrastructure, and economic and demographic data. CalBIS staff are available to meet with businesses throughout the state.

SUBJECT: Small Business Procurement and Contract Act: federal Infrastructure Investment and Jobs Act funding

SOURCE: Author

DIGEST: This bill establishes a 25% small business participation goal for contracts financed, in whole or in part, with specified funding from the Federal Infrastructure Investment and Jobs Act (IIJA), and includes reporting requirements, as specified.

Senate Floor Amendments of 8/23/22 clarify that the designee of a state agency may make a determination that the requirements of this bill do not apply, as specified. Additionally, the amendments specify that the Director of the Department of Transportation (Caltrans) or their designee may make a determination that a class or category of contracts is exempt from the requirements of the bill, as specified.

ANALYSIS:

Existing law:

1) Designates the Department of General Services (DGS) as the administrator of the state Small Business Procurement and Contract Act (Act), which includes certifying and implementing targeted preference programs for certified small businesses, microbusinesses, and disabled veteran businesses enterprises, as specified.

2) Requires DGS, and the heads of other state agencies that enter into contracts for the acquisition of goods, services, information technology (IT), and the construction of state facilities to establish goals for the participation of small businesses in these contracts, to provide for a small business preference in the award of these contracts, to give special consideration and special assistance to small businesses, and, whenever possible, to make awards to small businesses, as specified.

3) Requires each state agency that significantly regulates small businesses or that significantly impacts small businesses to designate at least one person who shall serve as a small business liaison, as specified.

4) Defines "small business" to mean an independently owned and operated business that is not dominant in its field of operation, the principal office of which is located in California, the officers of which are domiciled in California, and which, together with affiliates, has 100 or fewer employees, and average annual gross receipts of $15,000,000 or less over the previous three years, or is a manufacturer with 100 or fewer employees.

5) Defines "state agency" to include the following: Business, Consumer Services, and Housing; Transportation; California Environmental Protection; California Health and Human Services; Labor and Workforce Development; Natural Resources; Government Operations; and Corrections and Rehabilitation; and, every state office, department, division, bureau, board, or commission in which the head of the agency is appointed by the Governor.

This bill:

1) Requires each state agency awarding new contracts over $500,000 that are financed in whole or in part, with the proceeds of the IIJA, in order to encourage the participation of small businesses in the construction, alternation,

demolition, repair, or improvement, of the state's infrastructure, to do all of the following:

a) Establish a 25% small business participation goal in all contracts that it finances, in whole or in part, with these federal funds.
b) Beginning April 1, 2023, notify the agency's small business liaison of any anticipated contracting opportunities that will be paid, in whole or in part, with funding from the IIJA in the succeeding 12 months.
c) The agency small business liaison shall provide information to California small businesses regarding training and technical assistance that is available to assist them in identifying, understanding, and bidding on contracts for projects funded through the agency with IIJA funding, as specified.

2) Exempts a state agency from the above requirements for IIJA funds if the head of the state agency or their designee makes one of the following determinations:

a) Federal requirements preclude small business procurement participation as required by this bill.
b) The bid issued by the state agency is required to include a disadvantaged business enterprise procurement participation requirement.
c) In the case of competitively awarded funding from the federal government, if compliance with the requirements of this section would make the state's application for a competitive program less competitive than other eligible applicants.

3) Provides that the following subtitles, titles, and divisions of the IIJA shall be subject to the 25% goal and related activities:

a) Division A, the Surface Transportation Reauthorization Act of 2021.
b) Division B, the Surface Transportation Investment Act of 2021.
c) Division E, the Drinking Water and Wastewater Infrastructure Act of 2021.
d) Division F, Broadband.
e) Title IX of Division G, the Build America, Buy America Act.

4) Authorizes the Director of Caltrans or their designee to make a determination that a class or category of contracts is exempt from the requirements of the bill. Nothing in this bill shall be construed to require the head of Caltrans or their designee to make a determination for each individual contract.

5) Requires a state agency that has awarded any contract financed with the proceeds of the IIJA to annually report to DGS statistics comparing the small

business and microbusiness participation dollars for contracts funded by these federal dollars to the total contract dollars for contracts funded by these federal dollars, as specified.

6) Requires any state agency that did not meet its participation goal to include in its report a plan of action to meet its participation goal during the current fiscal year. These reporting requirements do not supersede any other reporting requirements required of these funds. In each instance that such a determination is made, the state agency shall report to DGS in a manner to be determined by the department.

Comments

Purpose of the Bill. According to the author's office, "the federal IIJA includes $1.2 trillion in new infrastructure funds. This represents a $550 billion increase in federal government spending above baseline funding levels. For California, this represents $14 billion in additional formula funding to California over the five-year funding period, as compared to existing formula funding levels. The proposed budget for 2022-23 anticipates $50 billion in federal funding, which will be used for a range of purposes, including to accelerate the transition to zero-emission vehicles, modernize the state's transportation system, spur clean energy innovation, advance the state's housing goals, reduce wildfire risk to communities, and support drought resilience and response. By including small businesses as prime and subcontractors, this important federal funding has a much greater impact of the California economy, including more local jobs and higher regional multipliers."

California Infrastructure Bond Acts of 2006. In response to the passage of a number of infrastructure bonds by California voters in 2006, the Legislature passed and the Governor signed, AB 761 (Coto, Chapter 611, Statutes of 2007), which required each state agency awarding contracts financed with funds from these bonds to establish a 25% small business participation goal. Collectively, the bonds are known as the Infrastructure Bonds Act of 2006 (I-Bond Acts), and they include:

- Proposition 1B, transportation bonds ($19.9 billion).
- Proposition 1C, housing bonds ($2.9 billion).
- Proposition 1D, education ($10.4 billion).
- Proposition 1E, flood control bonds ($4.1 billion).
- Proposition 84, bonds for resources ($5.4 billion).

The number of departments utilizing I-Bond funding has steadily decreased over the last several years. According to the DGS 2019-20 Consolidated Report, the only department with any significant utilization of I-Bond funds exceeded the small business participation goal. During the 2019-20 fiscal year (FY), $3,366,352 I-Bond Funds were expended, and of that total, 90.75% of the funds went to small businesses. Four departments reported use of the I-Bond funds for FY 2018-19. The last time more than 10 departments used the I-Bond funds was in FY 2013-14.

The Federal IIJA. The IIJA includes $1.2 trillion in new infrastructure funds, which represents a $550 billion increase in federal government spending above baseline funding levels. Among other things, the IIJA includes:

- $621 billion on roads, bridges, public transit, rail, ports, waterways, airports, and electric vehicles to improve air quality, reduce congestion, and limit greenhouse gas emissions.
- $400 billion to bolster caregiving for aging and disabled Americans.
- $300 billion toward boosting manufacturing, specifically semiconductor, medical, and clean manufacturing.
- $111 billion to rebuild water infrastructure and replace all of the nation's lead pipes and service lines.
- $100 billion in order to give every American access to affordable, reliable, and high-speed broadband.

One estimate is that this new federal funding represents $14 billion in additional formula funding to California over the five-year funding period, as compared to existing formula funding levels.

To assist state and local governments, Tribal Governments, and other partners access the new funds, the federal government has created a Building a Better American guidebook with details on each program funded through the IIJA.

Related/Prior Legislation

AB 2019 (Petrie-Norris, 2022) codifies a 25% small business goal for state procurement and proposes actions to enhance the ability and commitment of state agencies to include SBs, disadvantaged business enterprises, and disabled veteran business enterprises in state contracting, as specified. (Pending on the Senate Floor)

SB 605 (Galgiani, Chapter 673, Statutes of 2017), among other things, revised the definition of "small business" for the purposes of public works contracts and engineering contracts for public works contracts, to mean a business with 200 or fewer employees and average annual gross receipts of $36 million or less.

AB 761 (Coto, Chapter 611, Statutes of 2007), among other things, required state agencies to establish a 25% small business participation goal for construction of the state's infrastructure financed with specified bond proceeds, and required each state agency to report on certain statistics regarding small business and microbusiness participation, as specified.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Office of the Small Business and the Disabled Veterans Business Enterprise (DVBE) program under DGS anticipates the need for one additional staff, likely to be in the low hundreds of thousands of dollars, to meet increased workload demand resulting from developing a mechanism and procedure for departments to report to DGS infrastructure-funded transactions and small business (SB) goal exemptions; support in developing and testing the update in the Department of Financial Information System for California (FI$Cal) functionality; update training materials and conduct the training for FI$Cal and non-FI$Cal departments; support policy development; monitor SB participation progress; work with SB advocates on capturing and reporting information; and review improvement plans.

Additional indeterminate costs to DGS include workload associated with reporting and outreach to other state programs that award contracts using the specified infrastructure funds.

SUBJECT: Slavery

SOURCE: Young Women's Freedom Center

DIGEST: This constitutional amendment removes language in the state Constitution that allows involuntary servitude as punishment to a crime.

Senate Floor Amendments of 6/27/22 add "involuntary servitude" as a form of slavery and provide that the prohibition on slavery is not intended to have any effect on voluntary work programs in correctional settings.

Senate Floor Amendments of 6/23/22 clarify the definition of slavery.

ANALYSIS:

Existing constitutional law:

1) Prohibits slavery. (Cal. Const., Art. I, § 6.)

2) Prohibits involuntary servitude except to punish crime. (Cal. Const., Art. I, § 6.)

Existing law:

1) Specifies that it is felony to hold any person in involuntary servitude, or assumes rights of ownership over any person, or who sells any person to another, or receives money or anything of value, in consideration of placing any person in the custody, or under the power or control of another. (Pen. Code § 181.)

2) Requires that whenever by any statute a price is required to be fixed for any services to be performed in connection with the work program of the California Department of Corrections and Rehabilitation (CDCR), the compensation paid to prisoners be included as an item of cost in fixing the final statutory price. (Pen. Code § 2700.)

3) Provides that one of the purposes of the California Prison Industry Authority (CalPIA) is to operate a work program for prisoners which will ultimately be self-supporting by generating sufficient funds from the sale of products and services to pay all the expenses of the program, and one which will provide goods and services which are or will be used by CDCR, thereby reducing the cost of its operation. (Pen. Code § 2801, subd. (c).)

This constitutional amendment removes language in the state Constitution that allows involuntary servitude as punishment to a crime.

Background

The Thirteenth Amendment of the U.S. Constitution was ratified in 1865 and prohibited slavery and involuntary servitude. However, an exception was allowed if involuntary servitude was imposed as punishment for a crime. Article I, Section

6, of the California Constitution contains the same prohibitions on slavery and involuntary servitude and the same exception for involuntary servitude as punishment for crime.

The U.S. Supreme Court has consistently recognized that the Thirteenth Amendment does not prevent enforced labor as punishment for crime, and does not prevent state or federal governmental entities from compelling the performance of civic duties such as jury service (*Hurtado v. United States* (1973) 410 U.S. 578, 589) and military service (*Selective Draft Law Cases* (1918) 245 U.S. 366, 390). The California Supreme Court has interpreted the prohibition on slavery and involuntary servitude contained in Article I, section 6 of the California Constitution to be coextensive with the protection afforded by the Thirteenth Amendment. (*Moss v. Superior Court* (1998), 17 Cal. 4th 396, 418.)

Prison Labor

Generally. Federal courts have held that the U.S. Constitution does not prohibit incarcerated individuals from being required to work and does not provide incarcerated individuals a right to wages for work done in custody. In *Serra v. Lappin*, 600 F.3d 1191 (9th Cir. 2010), current and former federal inmates alleged that the low wages they were paid for work performed in prison violated their due process rights and various sources of international law. The Ninth Circuit Court of Appeals held that the U.S. Constitution does not provide prisoners any substantive entitlement to compensation for their labor. (*Id.* at p. 1196 (citing *Piatt v. MacDougall*, 773 F.2d 1032, 1035 (9th Cir. 1985) (holding that the state does not deprive an inmate of a constitutionally protected liberty interest by forcing him to work without pay).) The court noted that, "Although the Constitution includes, in the Thirteenth Amendment, a general prohibition against involuntary servitude, it expressly excepts from that general prohibition forced labor 'as a punishment for crime whereof the party shall have been duly convicted.' " (*Id*.)

CDCR. Penal Code Section 2700 provides that CDCR "require of every able-bodied prisoner imprisoned in any state prison as many hours of faithful labor in each day and every day during his or her term of imprisonment as shall be prescribed by the rules and regulations [of the department]." (*See also* Cal. Code Regs., tit. 15, § 3040, subd. (a).) Upon arrival at a prison reception center, incarcerated individuals go through a classification process. During the classification process, incarcerated individuals are placed on waiting lists for jobs and rehabilitative programs. Incarcerated individuals cannot refuse a job assignment and may be disciplined for refusing or failing to show up to work. Refusal to work can also lead to reduced privileges, including limitations on visits,

phone calls, canteen purchases, and yard, entertainment and recreation access. (https://www.cdcr.ca.gov/ombuds/ombuds/entering-a-prison-faqs/) Notably, incarcerated individuals may be assigned to a job in lieu of enrollment and participation in rehabilitative programs without the individual's consent. (Cal. Code Regs., tit. 15, § 3040, subd. (g).)

Prison Wages

Generally. According to a memo prepared by the Senate Office of Research, approximately 58,000 incarcerated individuals are assigned to jobs in the state's prisons. Each employed incarcerated person works an average of 6.5 hours/day and 32 hours/week in a variety of jobs, including food service, clerical work, maintenance and custodial work, and construction, among others. Existing law specifies that pay rates at each prison for paid assignments should reflect the level of skill and productivity required, and will be set with the assistance of the Institutional Inmate Pay Committee. (Cal. Code Regs., Tit. 15, § 3041.2, subd. (a)(1)(2).) Current pay rates for most jobs are as follows:

Skill Level	Hourly (Min/Max)	Monthly (Min/Max)
Level 1 (Lead Person)	$0.32-$0.37	$48-$56
Level 2 (Special Skill)	$0.19-$0.32	$29-$48
Level 3 (Technician)	$0.15-$0.24	$23-$36
Level 4 (Semi-Skilled)	$0.11-$0.18	$17-$27
Level 5 (Laborer)	$0.08-$0.13	$12-$20

Fire Camps. Incarcerated individuals housed at one of the state's conservation/fire camps are subject to a different pay scale with a pay rate of $1.45 to $3.90 per day based on skill level and position. When working as emergency firefighters during a wildfire, that pay is increased to $1 per hour.

CalPIA. Individuals working for CalPIA are also subject to a different pay scale. CalPIA is a self-supporting state entity that was established to operate industrial, agricultural, and service enterprises employing incarcerated individuals in CDCR facilities to provide products and services needed by the state or other public entity or public use. Penal Code Section 2801 provides that CalPIA is required to create and maintain working conditions within the enterprises as much like those which prevail in private industry as possible, to assure incarcerated individuals employed by CalPIA have the opportunity to work productively, to earn funds, and to acquire or improve effective work habits and occupational skills. CalPIA manages over 100 manufacturing, service, and consumable operations, including optical labs,

carpentry and custodial services, production of license plates, among others. Approximately 7,000 incarcerated individuals work for CalPIA's operations.

Penal Code Section 2811 prohibits CalPIA compensation from exceeding half of the minimum wage. CalPIA currently has a five-level pay scale with the lowest paid scale ranging from $0.35-$0.45 per hour and the highest scale ranging from $0.80 to $1 per hour.

Joint Venture Program. The Joint Venture Program was established via Proposition 139 in 1990 which allowed state prison and county jail officials to contract with public entities, businesses, and others to provide the labor of incarcerated workers. Wages are required to be comparable to the wages of non-incarcerated individuals doing similar work. These wages are subject to the following deductions which cannot in the aggregate exceed 80 percent of gross wages: federal, state, and local taxes, reasonable charges for room and board, court or victim restitution, and allocations for family support. (Pen. Code § 2717.8.)

The following distributions are made from an incarcerated individual's net wages:

- 20% is sent to CDCR as a reimbursement for room and board.
- 20% is used to pay restitution fines or paid directly to local crime victims' programs.
- 20% is sent directly to the incarcerated individual's family for support or used to pay court ordered wage garnishments (i.e., child support).
- 20% is deposited in a mandatory savings account which is available to the person upon their release.
- 20% is placed in the person's trust account at the institution for personal use (https://jointventureprogram.calpia.ca.gov/workers-wages/).

According to a memo prepared by the Senate Office of Research, 23 incarcerated individuals are currently employed through this program with wages ranging from $14 to $15.42 per hour.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- *CDCR/CalPIA:* Unknown, potentially significant costs to CDCR and CalPIA to increase wages for inmate labor (General Fund). Actual costs will depend on how involuntary servitude is legally defined. If CDCR and CalPIA are required to pay minimum wages for all prison jobs then actual costs could be in the billions annually.

- *Department of Justice (DOJ):* The DOJ reports costs of $560,000 in Fiscal Year (FY) 2022-23, and $772,000 in FY 2023-24 and annually thereafter (Special Fund – Legal Services Revolving Fund).

- *Courts:* Unknown, potentially significant cost pressures due to increased court workload resulting from an increase in court filings as a result of this constitutional amendment (Trial Court Trust Fund, General Fund).

- *Ballot Costs:* One-time Secretary of State costs in the range of $546,000 to $728,000 for printing and mailing costs to place the measure on the ballot for the next statewide general election (General Fund).

SUBJECT: Select Committee to Investigate the January 6th Attack on the United States Capitol

SOURCE: Author

DIGEST: This resolution urges the United States House Select Committee to Investigate the January 6th Attack on the United States Capitol to uncover the facts, circumstances, and causes relating to the attack, and honors the individuals who died or were injured as a result of the attack.

ANALYSIS:

Existing law:

1) States that each state shall appoint electors pursuant to a process prescribed by the state's legislature to elect the President and Vice President of the United States. (U.S. Const., Art. II, Sec. 1)

2) States that electors shall sign and certify a list of the persons voted for and the number of votes for each, and transmit the list to the President of the Senate, who shall, in the presence of the U.S. Senate and House of Representatives, open the certificates and count the votes. (U.S. Const., Art II, Sec. 1; 12th Amend.)

3) States that the United States Congress may determine the time of choosing the electors, and the day on which they shall give their votes, which shall be the same throughout the country. (U.S. Const., Art II, Sec. 1)

4) Requires that the electors of each state forward, in a timely manner via registered mail, their lists and certificates to the President of the Senate. (3 U.S.C. §11)

5) Requires that Congress be in session on the sixth day of January succeeding every meeting of the electors, and that the Senate and the House of Representatives shall meet in the Hall of the House of Representatives at 1pm that day. (3 U.S.C. §15)

6) Requires that each house appoint two "tellers," who shall open and present, in alphabetical order by state, the certificates of the electors to the assembled members of the House and Senate. (3 U.S.C. §15)

7) Provides that upon the reading of the votes of each state, a tally of the results of each state shall be presented to the President of the Senate, who shall thereupon announce the state of the vote, which announcement shall be deemed a sufficient declaration of the persons elected President and Vice President of the United States. (3 U.S.C. §15)

8) Provides that subsequent to the announcement of results by the President of the Senate, the President of the Senate shall call for objections, which must be made in writing, and signed by at least one Senator and one member of the House of Representatives. (3 U.S.C. §15)

9) Provides that when all objections have been received and read, those objections shall be submitted to each house of the legislature for their independent decisions. (3 U.S.C. §15)

10) Requires that no electoral vote or votes from any state which were regularly given by lawfully certified electors may be rejected, but that the House and Senate may concurrently may reject the vote or votes when they agree that such vote or votes have not been given by lawfully certified electors. (3 U.S.C. §15)

11) Provides that when the two houses separate to decide upon an objection, each Senator and Representative may speak to such objection for five minutes, and not more than once, but after such debate has lasted two hours, it is the duty of the presiding officer of each house to put the main questions without further debate. (3 U.S.C. §17)

This resolution:

1) Finds that President Donald J. Trump's actions incited a violent insurrection that attempted to prevent the peaceful transfer of power at the United States Congress on January 6, 2021.

2) Finds that the insurrection was a horrific assault on our democracy as established by the Constitution of the United States.

3) Finds that the insurrection resulted in multiple deaths, physical harm to over 140 members of law enforcement, and terror and trauma among staff, institutional employees, press, and Members of the United States Congress.

4) Finds that the United States Congress has established a bipartisan Select Committee to Investigate the January 6th Attack on the United States Capitol.

5) Resolves that the Legislature urge the Select Committee to Investigate the January 6th Attack on the United States Capitol to uncover the facts, circumstances, and causes relating to the domestic terrorist attack on the United States Capitol on January 6, 2021.

6) Resolves that the Legislature condemns the insurrection and assault on our democracy on January 6, 2021.

7) Resolves that the Legislature recognizes the courage, bravery, and sacrifice of those who were injured and killed trying to protect the United States Capitol and honors those individuals on the first anniversary of the insurrection.

8) Resolves that the Legislature rejects all forms of political violence.

9) Resolves that the members of the Legislature reaffirm their duty to support and defend the Constitution of the United States.

Comments

The author states:

> We would be remiss not to condemn the violent, treasonous insurrection at the United States Capitol that occurred a year ago. This was the beginning of a sustained attack on democracy. Since the riot, countless state legislatures have fought to roll back voting rights, elected leaders have refused to acknowledge the legitimacy of our fair and free elections while others continue promoting conspiracy theories and misinformation that weakens our faith in government. In the State of California we need to be a model of democracy where political

violence, voter suppression and lies misinformation is not tolerated. AJR 22 serves as a reminder for how fragile our democracy is and it must be protected. I introduced this resolution because I believe people of all political ideologies need to be on the record recognizing our democratic electoral process as a sacred institution and unequivocally opposing efforts to harm our democracy. This resolution is to honor the law enforcement officers who heroically protected the Capitol that day. We recognize the courage, bravery, and sacrifice of those who were injured and killed trying to protect the United States Capitol and honors those individuals on the first anniversary of the insurrection.
