UNFINISHED BUSINESS

Bill No: SB 34
Author: Umberg (D), et al.
Amended: 8/8/22
Vote: 21

PRIOR VOTES NOT RELEVANT

SENATE GOVERNMENTAL ORG. COMMITTEE: 10-0, 8/17/22
AYES: Dodd, Allen, Archuleta, Becker, Bradford, Glazer, Jones, Portantino, Rubio, Wilk
NO VOTE RECORDED: Nielsen, Borgeas, Hueso, Kamlager, Melendez

ASSEMBLY FLOOR: 74-0, 8/15/22 - See last page for vote

SUBJECT: Public contracts: authorized agent: limitations

SOURCE: Author

DIGEST: This bill clarifies that a contract that was entered into because of an act that would constitute a violation of a state or federal crime relating to bribery of a public official is voidable.

Assembly Amendments deleted the prior language in the bill and instead clarify that a contract that was entered into because of an act that would constitute a violation of a state or federal crime relating to bribery of a public official is voidable.

ANALYSIS:

Existing law:

1) Governs the bidding and awarding of public contracts by public entities and generally requires that public contracts be awarded through a competitive bid process.

2) Requires, generally, state agencies, for non-IT (information technology) goods and services contracts, to secure at least three competitive bids or proposals for each contract. Three competitive bids or proposals are not required in, among other cases, the following:

   a) In cases of emergency where a contract is necessary for the immediate preservation of the public health, welfare, or safety, or protection of state property.
   b) When the state agency awarding the contract has solicited all potential contractors but has received less than three bids or proposals.
   c) When the state agency and the Department of General Services (DGS) agree that an article of a specified brand or trade name is the only article that will properly meet the needs of the state agency.

3) Requires DGS to prescribe the conditions under which a contract may be awarded without competition, and the methods and criteria which shall be used in determining the reasonableness of contract costs when a contract is awarded without competition.

4) Prohibits, under Government Code Section 1090, members of the Legislature, state, county, district, judicial district, and city officers from having a financial interest in any contract made by them in their official capacity, or by any board of which they are members.

5) Provides, under Penal Code Section 68, that every executive or ministerial officer, employee, or appointee of the State of California, a county or city, or a political subdivision thereof, who asks, receives, or agrees to receive, any bribe is punishable by imprisonment in state prison, as specified, and can be fined, as specified. Penal Code Section 68 also provides that an individual must forfeit his or her office, employment, or appointment, and is forever qualified form holding any office, employment, or appointment in this state.

6) Provides, under Penal Code Section 86, that every member of either house of the Legislature, or any member of the legislative body or a city, county, school district, or other special district who asks, receives or agrees to receive any bribe is punishable by imprisonment in state prison, as specified, can be fined, as specified.

This bill:

1) Declares that a contract that was entered into because of an act that would constitute a violation of a state or federal crime relating to bribery of a public official, including, but not limited to, a violation of Section 68 or 86 of the Penal Code is voidable.

2) Provides that the provisions of this bill apply to contracts executed on or after January 1, 2023, including contracts negotiated prior to January 1, 2023.

Background

Purpose of the Bill. According to the author's office, "SB 34 comes as a response to recent political and legal malfeasance. In May of 2022, the mayor of Anaheim, Harry Sidhu, announced he would be stepping down from public office, having been accused by the FBI solicitation, bribery, and obstruction of justice. The majority of the accusations have been centered on the city's plan to sell public land to the Los Angeles Angels. Investigators have alleged that the mayor of Anaheim hoped to solicit $1 million on campaign contributions from the Angels in exchange for assistance in the deal."

The author's office further argues that, "current law governs bidding and awarding of public contracts by public entities. Existing law also makes it a crime for a public official to ask, receive, or agree to receive, any bribe, upon an understanding that their judgement, or action will be influenced. SB 34 declares a contract voidable if it was entered into while committing the above crime. It is my hope that SB 34 is one small step towards restoring the trust and faith of Anaheim residents in their public officials."

Penal Code Section 68. Penal Code Section 68 provides that every executive or ministerial officer, employee, or appointee of the State of California, a county or city, or a political subdivision thereof, who asks, receives, or agrees to receive, any bribe is punishable by imprisonment in state prison. For cases in which no bribe was actually received, current law provides that such a crime is punishable by imprisonment in state prison, for two, three, or four years, and by a restitution fine of at least $2,000 and no more than $10,000. In cases in which a bribe was actually received, penalties are increased to at least the actual amount of the bribe or $2,000, whichever is greater, or any large amount of not more than double the amount of the bribe or $10,000, whichever is greater. Penal Code Section 68 also provides that that an individual who violates this section shall forfeit his or her

office, employment, or appointment, and is forever disqualified from holding any office, employment, or appointment, in this state.

This bill declares a contract voidable that was entered into because of an act that would constitute a violation of a state or federal crime relating to bribery of a public official, including a violation of Penal Code Section 68.

Penal Code Section 86. Penal Code Section 86 provides that every member of either house of the Legislature, or any member of the legislative body of a city, county, school district, or other special district who asks, receives, or agrees to receive any bribe is punishable by imprisonment in state prison. In cases in which no bribe was actually received, for two, three, or four years, and by a restitution fine of at least $4,000 and no more than $20,000. In cases in which a bribe was actually received, penalties are increased to at least the actual amount of the bribe or $4,000, whichever is greater, or any large amount of not more than double the amount of the bribe or $20,000, whichever is greater.

This bill declares a contract voidable that was entered into because of an act that would constitute a violation of a state or federal crime relating to bribery of a public official, including a violation of Penal Code Section 68.

Related/Prior Legislation

AB 1666 (Garcia, Chapter 811, Statutes of 2014) doubled the restitution fines for a member of the Legislature or any member of a local government legislative body who asks for or receives a bribe in exchange for influence over his-her official action, as specified.

AB 1692 (Garcia, Chapter 884, Statutes of 2014) limited the use of campaign funds and legal defense funds to pay fines and penalties that are imposed for an improper personal use of campaign funds.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee. No state costs. DGS explains that any contract entered into because of a violation of Penal Code 68 or 86, relating to bribery of a state or local public official, likely violates Government Code Section 1090, which prohibits a state or local officer or employee from being financially interested in a contract. A bribe, kickback or other expectation of financial reward likely constitutes a prohibited financial interest. Existing case law

holds that a Section 1090 violation not just renders a contract voidable, but automatically void. Thus, DGS does not anticipate any fiscal effect from this bill.

SUPPORT: (Verified 8/16/22)

SUBJECT: Elementary education: kindergarten

SOURCE: Los Angeles Unified School District

DIGEST: This bill requires, beginning with the 2024-25 school year, a student to have completed one year of kindergarten before being admitted to the first grade of a public school. Therefore, this bill expands compulsory education to include kindergarten.

Assembly Amendments (a) delay the implementation date by two years, from the 2022-23 school year to the 2024-25 school year; (b) specifically apply this bill to

charter schools; and (c) clarify that transitional kindergarten does not count towards the requirement to complete a year of kindergarten.

ANALYSIS:

Existing law:

1) Requires every person between the ages of six and 18 years to attend school full-time (at least the minimum school day as required by statute and school districts). (Education Code § 48200)

2) Requires a student to be admitted to kindergarten if the student will have their fifth birthday on or before September 1. (EC § 48000)

3) Authorizes school districts to admit to kindergarten, on a case-by-case basis, a student who will have their fifth birthday during the school year, subject to the following conditions:

   a) The governing board of the school district determines that the admittance is in the best interest of the student.

   b) The parent is given information regarding the advantages and disadvantages and any other explanatory information about the effect of this early admittance. (EC § 48000)

4) Requires a student to be admitted to the first grade if the student will have their sixth birthday on or before September 1. (EC § 48010)

This bill:

1) Requires, beginning with the 2024-25 school year, a student to have completed one year of kindergarten before being admitted to the first grade of a public elementary school (including a charter school).

2) Clarifies that a student is to be admitted to the first grade if the student has their sixth birthday on or before September 1 *and* that the student has completed one year of kindergarten.

3) Clarifies that the exiting authority for a kindergarten student to be placed in first grade if judged ready for first grade work applies to a student who has not completed one school year of kindergarten.

4) Extends to charter school governing bodies the existing authority for a school district governing board to admit a student of a proper age to a class after the first month of a school term.

5) States legislative intent that a parent or legal guardian of a pupil eligible for kindergarten maintain the discretion to enroll the pupil in either public school kindergarten or private school kindergarten, which includes home schooling, before enrolling the pupil in the first grade of a public elementary school.

6) States legislative findings and declarations relative to the benefits of kindergarten.

Comments

Need for the bill. According to the author, "… since kindergarten is not mandatory, students that do not attend miss fundamental instruction putting them at a disadvantage in a classroom setting as they enter first grade. This current voluntary participation of kindergarten allows parents to delay their child's entrance into school until the first grade, which leaves students unprepared for the educational environment they will encounter in elementary school. According to the National Education Association, research has shown that kindergartners who miss 10% or more school days have lower academic performance when they reach the first grade. The impact is even greater and more detrimental for students who do not attend kindergarten at all and miss a whole academic school year. In addition, concerns are rising about the opportunity gap being heightened by school closures during the COVID-19 pandemic. "Moreover, school districts across the state are also experiencing drops in student enrollment. According to a Cal Matters article, the COVID-19 pandemic has led to a record one-year enrollment drop of 155,000 students in California's K-12 public schools, according to new state projections. At the Los Angeles Unified School District, kindergarten enrollment for the 2020-21 academic year has dropped by 14 percent (a decline of 6,000 students). This decline is even more prevalent in the school system's lowest-income neighborhoods, and is about three times as large as in recent years. "Statistics show that now more than ever, kindergarten attendance is necessary to ensure all students receive critical early instruction to help avoid falling behind. Requiring kindergarten attendance will ensure students are well prepared, set them on track to learn at grade-level pace, and help avoid students fall behind. Kindergarten attendance is also an important aspect in reducing chronic absenteeism and closing the achievement gap."

How many students currently attend kindergarten? Kindergarten is considered a grade level, is factored in the calculation of average daily attendance and is

included in the academic content standards, curricular frameworks and instructional materials. However, attendance in kindergarten is not mandatory and compulsory education laws begin at age six. The California Department of Education (CDE) estimates that, pre-COVID, approximately 95% of eligible students attended kindergarten (public and private kindergarten) and approximately 80% of eligible students attended kindergarten at a public school.

According to data collected through the California Longitudinal Pupil Achievement Data System and released by the California Department of Education in April 2021, enrollment in K-12 public schools has declined by approximately 160,500 students. This data shows a decline in enrollment in kindergarten of almost 61,000 students. It is unclear if these students were enrolled in private kindergarten or attended any educational program.

Will all five-year olds be required to attend kindergarten? No. This bill expands compulsory education laws to require attendance at kindergarten, but does not preclude five-year-olds from attending transitional kindergarten or preclude six-year-olds from attending kindergarten.

Where are five-year olds if not already in kindergarten? Children who are too young to be admitted to, or whose parents choose not to enroll their child in, kindergarten may currently be served by other types of early education or care programs, such as transitional kindergarten or general child care programs. Those programs differ from kindergarten in which curriculum is offered, staffing ratios, length of program, and other important elements that parents may consider when choosing early education for their children. Currently, attendance in kindergarten is not mandatory; this bill makes kindergarten attendance mandatory. The enrollment of additional students into kindergarten could affect other programs that may currently be serving these children (not an issue if the children are currently enrolled in transitional kindergarten).

Public or private school. This bill does not require students to attend kindergarten at a public school; parents would retain the option to enroll their five- or six-year old in kindergarten at a private school.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) Unknown Proposition 98 General Fund costs, beginning in the 2024-25 school year, for increased per student funding to attend kindergarten, potentially in

low-hundreds-of-millions of dollars annually. This assumes about 30,000 more children enroll in public kindergarten as a result of this bill.

2) In addition, local educational agencies may experience other increases in local costs as a result of this measure, such as increased facility costs to accommodate additional students.

SUBJECT: Civil actions: appearance by telephone

SOURCE: Author

DIGEST: This bill repeals provisions specifically related to telephonic appearances in civil proceedings, on the ground that they were made redundant by more recently adopted statutes that more broadly authorize remote appearances.

Assembly Amendments delete the contents of the bill previously passed by the Senate and amend in the current version of the bill.

ANALYSIS:

Existing law:

1) States that courts should, to the extent feasible, permit parties to appear by telephone at appropriate conferences, hearings, and proceedings in civil cases so as to improve court access and reduce litigation costs. (Code Civ. Proc., § 367.5(a).)

2) Provides that in all general cases, as defined in the California Rules of Court, a party that has provided notice may appear by telephone at the following conferences, hearings, or proceedings:

    a) A case management conference, provided that the party has complied with its meet-and-confer obligations and timely filed and served a case management statement.

    b) A trial setting conference.

    c) A hearing on law and motion, except motions in limine.

    d) A hearing on a discovery motion.

    e) A conference to review the status of an arbitration or mediation.

    f) A hearing to review the dismissal of an action.

    g) Any other hearing, conference, or proceeding if the court determines that a telephone appearance is appropriate. (Code Civ. Proc., § 367.5(b).)

3) Provides, notwithstanding 2) above, that a court may require a party to appear in person at a hearing, conference, or proceeding if the court determines on a hearing-by-hearing basis that a personal appearance would materially assist in the determination of the proceedings or in the effective management or resolution of the particular case. (Code Civ. Proc., § 367.5(c).)

4) Requires the Judicial Council to adopt rules of court related to telephonic appearances in civil cases. (Code Civ. Proc., § 367.5(d), (e).)

5) Requires the Judicial Council, on or before July 1, 2011, to establish statewide uniform fees to be paid by a party for appearing by telephone, which supersede any fees paid to vendors and courts under any previously existing agreements and procedures. (Code Civ. Proc., § 367.6(a).)

6) Provides that the uniform fees in 5) must include a fee for providing the telephone appearance service pursuant to a timely request, an additional fee if the request is made shortly before the hearing, and a fee for canceling a telephone appearance request. (Code Civ. Proc., § 367.6(a).)

7) Provides that if a party has received a fee waiver, neither a vendor nor a court may charge that party for any of the fees authorized in 5) or 6), except:

   a) The vendor or court providing the telephonic service has a lien, as provided, on any judgment that the party may receive, in the amount that the party would have paid for the telephonic appearance; and

   b) If a vendor or court later receives the waived fee or a portion thereof, the fee shall be distributed consistent with 12). (Code Civ. Proc., § 367.6(b).)

8) Provides that the telephonic appearance fees described in 5) and 6) are recoverable costs. (Code Civ. Proc., § 367.6(c).)

9) Sets forth a framework for remote appearances—which may include audio or audio-visual remote technology—in civil cases, including civil trials, which is set to sunset on July 1, 2023. (Code Civ. Proc., § 367.75.)

10) Requires the Judicial Council, by July 1, 2011, and periodically thereafter as appropriate, to enter into one or more master agreements with a vendor or vendors to provide for telephone appearances in civil cases. (Gov. Code, § 72010(a).)

11) Requires the master agreement in 9) to include specified terms, including the amount of fees to be paid by a party for a telephonic appearance and a statement that the vendor is required to indemnify and hold the court harmless from claims arising from a failure or interruption of services. (Gov. Code, § 72010(b).)

12) Provides that a court may provide telephonic appearance services to a party only through an agreement with a vendor pursuant to a master agreement under 9), a preexisting agreement, or directly from the court. (Gov. Code, § 72010(c).)

13) Requires a vendor or court that provides telephonic appearances, for each telephonic appearance fee, to transmit $20 to the State Treasury for deposit in the Trial Court Trust Fund; if the vendor or court receives only a portion of the fee in accordance with 7)(b) then the vendor or court need transmit only the proportionate share of the amount. (Gov. Code, § 72011(a).)

14) Requires the amount to be transmitted to the Trial Court Trust Fund in accordance with 12) to be transferred within 15 days. (Gov. Code, § 72011(b).)

15) Requires vendors to transmit revenues for telephonic appearances received during the 2009-2010 fiscal year, and requires Judicial Council to apportion these revenues and allocate them to eligible courts as specified. (Gov. Code, § 72011(c)-(e).)

This bill:

1) Repeals the Code of Civil Procedure sections that authorize the use of telephonic appearances in civil cases.

2) Repeals the Government Code sections providing for the collection and distribution of fees relating to telephonic appearances in civil cases.

Comments

According to the author, with the COVID-19 pandemic impact on courts that caused backlogs in both civil and criminal proceedings, the Judicial Council and courts began to explore new ways to conduct remote appearances. With last year's passage of SB 241, telephonic appearances were incorporated into the broader definitions of remote technology as authorized by Code of Civil Procedure Section 367.75. This inclusion reflects a growing acknowledgement that there is little practical distinction among the various methods to connect to a judicial hearing (e.g. by phone, digital audio and/or digital video). Unfortunately, this inclusion also left the statutes specifically authorizing telephonic appearances in question. SB 233 seeks to repeal these telephonic appearance statutes, thus providing courts with clarity over the use of telephonic appearances as part of the larger remote technology. SB 233 is necessary and ensures that all remote technologies are treated the same.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- Loss of revenue (Trial Court Trust Fund (TCTF)) of an unknown, but potentially significant amount from fees assessed to appear telephonically. Most of the loss in revenue is likely offset by significant budget funds for court modernization including the continued implementation of remote access pursuant to Code of Civil Procedure section 367.75. However, as explained below, JCC estimates TCTF backfill will cover the loss in revenue, but not the

legacy payments associated with telephonic appearances. JCC reports legacy costs of approximately $950,000. Judicial Council will receive $34.7 million General Fund in 2022-23, increasing to $40.3 million in 2025-26 and ongoing, for information technology initiatives to modernize the Judicial Branch and increase access to justice for the public.

SUPPORT: (Verified 8/24/22)

Courtcall, Inc.
Judicial Council of California

OPPOSITION: (Verified 8/24/22)

None received

ARGUMENTS IN SUPPORT: According to the Judicial Council of California, writing in support:

> The Judicial Council supports SB 233, which repeals the obsolete statutes relating to telephonic appearances. The enactment of [Code of Civil Procedure section] 367.75 on January 1, 2022, established a new framework governing remote appearances in California. Nevertheless, pre-existing statutes related to telephonic appearances remain in the codes, causing unnecessary overlap and confusion.
>
> [Code of Civil Procedure section] 367.5 originally authorized telephonic appearances, but only in certain kinds of civil proceedings. It is more limited than [section] 367.75, which encompasses all civil remote appearances, including telephonic appearances. With the enactment of [section] 367.75, [section] 367.5 is no longer necessary…
>
> Removing these code sections benefits court users, the state, and the courts by properly harmonizing statutory authority over remote appearances under [Code of Civil Procedure] section 367.75 and greatly reducing fees to users wanting to make their appearance telephonically. It also reduces state work and costs by eliminating the now-unnecessary requirement for a [master services agreement] for only a small subset of remote proceedings.

SUBJECT: Workers' compensation: firefighters and peace officers: post-traumatic stress

SOURCE: California Professional Firefighters
California Statewide Law Enforcement Association
Peace Officers Research Association of California

DIGEST: This bill expands an existing industrial injury rebuttable presumption for a diagnosis of a post-traumatic stress disorder (PTSD) to include specified employees at the State Department of State Hospitals, the State Department of

Developmental Services, the Military Department, and the Department of Veterans Affairs. This bill also extends this PTSD rebuttable presumption to public safety dispatchers, public safety telecommunicators, and emergency response communication employees. Lastly, this bill expands on the list of peace officers that can claim the PTSD presumption, as specified.

Assembly Amendments change the injuries covered by the bill to only those occurring on or after January 1, 2023.

ANALYSIS:

Existing law:

1) Establishes a workers' compensation system that provides benefits to an employee who suffers from an injury or illness that arises out of and in the course of employment, irrespective of fault. This system requires all employers to secure payment of benefits by either securing the consent of the Department of Industrial Relations to self-insure or by securing insurance against liability from an insurance company duly authorized by the state.

2) Creates a series of disputable presumptions of an occupational injury for peace and safety officers for the purposes of the workers' compensation system. These presumptions include:

   - Heart disease
   - Hernias
   - Pneumonia
   - Cancer
   - Meningitis
   - Tuberculosis
   - Bio-chemical illness

   The compensation awarded for these injuries must include full hospital, surgical, medical treatment, disability indemnity, and death benefits, as provided by workers compensation law. These presumptions tend to run for 5 to 10 years commencing on their last day of employment, depending on the injury and the peace officer classification involved. Peace officers whose principal duties are clerical, such as stenographers, telephone operators, and other office workers are excluded. (Labor Code §§3212 to 3213.2)

3) Provides, until January 1, 2025, a disputable presumption that a diagnosis of Post-Traumatic Stress Disorder (PTSD) for specified peace officers and firefighters is an occupational injury, running for up to 5 years. The benefit includes full hospital, surgical, medical treatment, disability indemnity, and death benefits, but only applies to peace officers who have served at least 6 months. (Labor Code §3212.15)

4) Provides that the presumptions listed above are disputable and may be controverted by evidence. However, unless controverted, the Workers' Compensation Appeals Board must find in accordance with the presumption. (Labor Code §§3212 to 3213.2)

This bill:

1) Extends the PTSD presumption described above to firefighters employed by the State Department of State Hospitals, the State Department of Developmental Services, the Military Department, and the Department of Veterans Affairs.

2) Extends the PTSD presumption to public safety dispatchers, public safety telecommunicators, and emergency response communication employees and expands on the list of peace officers that can claim the PTSD presumption, as specified.

3) Defines "public safety dispatcher," "public safety telecommunicator," or "emergency response communication employee" as an individual employed by a public safety agency whose primary responsibility is to receive, process, transmit, or dispatch emergency and nonemergency calls for law enforcement, fire, emergency medical and other public safety services by telephone, radio, or other communication device, and includes an individual who supervises other individuals who perform these functions.

Background

When the legislature is presented with proposals on industrial injury presumptions, advocates will frequently reference the fact that the presumption is rebuttable. This suggests that, if the employer community were to do the appropriate research, they could in fact rebut a specific presumption case, and therefore presumptions are only problematic for public employers who either lack a case or are unwilling to devote the resources to defend themselves.

However, this view does not reflect how the shifting of the burden of proof impacts public employers before the Workers' Compensation Appeals Board (WCAB). For example, in *Sanchez v. State of California, Department of Corrections and Rehabilitation,* 2015 Cal. Wrk. Comp. P.D. LEXIS 482, the injured worker was diagnosed with a left atrial enlargement (LAE) of the heart. WCAB found that:

> "As a physical abnormality of the heart, it is clear that LAE constitutes "heart trouble" which is presumed industrial pursuant to section 3212.2. *Because of that presumption, applicant does not have the burden to prove that it was industrially caused*. Instead, defendant has the burden to prove that it was not industrially caused. As pointed out by defendant, Dr. Markovitz simply could not say one way or the other within reasonable medical probability. In the absence of any other medical evidence, defendant did not meet its burden of proof on this issue, and applicant's LAE was found to be compensable." (Emphasis added.)

According to recent large population study, obesity is the main risk factor for LAE. (*The Aging Process of the Heart: Obesity Is the Main Risk Factor for Left Atrial Enlargement During Aging*, MONICA/KORA Investigators J Am Coll Cardiol, 2009 Nov, 54 (21)) Now, it is certainly possible that this worker was not obese or the worker's obesity was a direct result of his work. Yet, it is worth noting the position this places the employer in: *there is effectively no way that an employer could prove the non-existence of a non-industrial cause.* The employer cannot prove that a worker's obesity is not 100% caused by his or her employment or that a preexisting heart defect was unaffected by work. The result is a presumption that is not rebuttable.

Related/Prior Legislation

SB 542 (Stern, Chapter 390, Statutes of 2019) created the PTSD industrial injury presumption for firefighters and peace officers.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

"By adding four new departments and three new job classifications to the existing rebuttable presumption, this bill would likely increase workers compensation costs for those departments and for other departments and local agencies with employees in the newly added job classifications. For the four departments identified in this bill, costs would likely be at least several hundreds of thousands of dollars

(General Fund). This estimate could be significantly higher once information is available from all of the affected departments.

Although this bill is not keyed by Legislative Counsel as a local mandate, its provisions add new job categories to an existing local agency requirement. If the Commission on State Mandates determines this bill imposes new costs on local agencies, the state might need to reimburse those costs. Earlier this year the Department of Finance provided a preliminary estimate of $5 million to $10 million dollars in cost pressure for local reimbursements (General Fund).

The Department of Insurance anticipates annual implementation costs of $16,700 (Insurance Fund)."

ARGUMENTS IN SUPPORT: The California Statewide Law Enforcement Association (CSLEA), a co-sponsor of the bill, argues the following:

"Our officers are called to handle traumatic scenes on a regular basis throughout the course of their careers. This trauma and stress can sometimes lead to physical and emotional illness including failure of usual coping mechanisms, loss of interest in the job or normal life activities, personality changes, loss of ability to function, and physiological disruption in their personal life. Often, these issues are left unresolved because there is no place for an officer to go to seek help without fear of losing his or her job. By adding these mental health issues to the term "injury" under workers' compensation law, California will ensure its workers are being treated for these critical incident stresses related to their job duties."

The California Labor Federation writes in support:

"While it is well documented that firefighters and law enforcement personnel work in jobs with severely heightened levels of stress and regularly exposed to traumatic experiences, they are not the only members of the public safety workforce to do so. Other who work behind the scenes to take the 911 calls are also confronted with horrific events such as shootings, fires, deadly accidents and other serious traumatic experiences. These public safety dispatchers are tasked with calming frightened or injured individuals so that necessary information can be obtained, and these workers frequently remain on the line while emergency services are on the way. Dispatchers experience many of the same traumas as the firefighters and law enforcement officers that they assist, but they do not enjoy the same protections against those hazards.

SB 284 will extend the existing post-traumatic stress workers' compensation presumption to include sworn public safety dispatchers, as well as firefighters and law enforcement personnel employed by a number of additional agencies."

ARGUMENTS IN OPPOSITION: The American Property Casualty Insurance Association, California Coalition of Workers' Compensation, California State Association of Counties, among others, oppose this bill, arguing the following:

"Our members recognize that police officers and firefighters serve our state with distinction in some of the most difficult circumstances imaginable. Our members include some of the largest employers of public safety officers in the state, and we have a healthy respect and admiration for people who choose every day to serve their communities. Fundamentally, we do not believe the SB 284 is necessary to provide California employees with fair access to the workers' compensation system for psychiatric injuries…

[W]hen… SB 542 was adopted by the legislature there was no data or analysis objectively suggesting that California's employer-funded system of no-fault workers' compensation – a system required to be "liberally construed" by judges when a dispute arises – was closing off access to police officers or firefighters seeking care for PTSD. In fact, Assemblymember Tom Daly in his capacity as Chair of the Assembly Insurance Committee penned a letter (attached) to the Executive Director of the Commission on Health and Safety and Workers' Compensation (CHSWC) asking for extensive analysis be completed about this bill.

…We believe strongly that it is premature to consider any kind of further expansion to this legislation prior to the CHSWC analysis being provided to the legislature….SB 284 proposes to expand the PTSD presumption to cover public safety dispatchers, public safety telecommunications, and emergency response communication employees. We are unaware of any objective analysis that would suggest that these job classifications merit the elimination of all statutory claims review procedures that accompany a workers' compensation PTSD presumption."

SUBJECT: Advisory Commission on Special Education

SOURCE: Author

DIGEST: This bill increases the number of members on the Advisory Commission on Special Education (ACSE), from 17 to 19 members.

Assembly Amendments replace the proposed advisory council of pupils with exceptional needs with two additional members on the ACSE whom must be between the ages of 16 and 22, inclusive, with exceptional needs.

ANALYSIS:

Existing law:

1) Establishes the ACSE as an entity in state government that studies and provides assistance and advice to the State Board of Education (SBE), the Superintendent of Public Instruction (SPI), the Legislature, and the Governor in research, program development, and evaluation in special education.

2) Specifies that the ACSE consist of 17 members as follows:

   a) A Member of the Assembly appointed by the Speaker of the Assembly.

   b) A Member of the Senate appointed by the Senate Committee on Rules.

   c) Three public members appointed by the Speaker of the Assembly, two of whom shall be individuals with a disability or parents of pupils in either a public or private school who have received or are currently receiving special education services due to a disabling condition.

   d) Three public members appointed by the Senate Committee on Rules, two of whom shall be individuals with a disability or parents of pupils in either a public or private school who have received or are currently receiving special education services due to a disabling condition.

   e) Four public members appointed by the Governor, two of whom shall be parents of pupils in either a public or private school who have received or are currently receiving special education services due to a disabling condition.

   f) Five public members appointed by the State Board of Education, upon the recommendation of the Superintendent or the members of the State Board of Education, three of whom shall be parents of pupils in either a public or private school who have received or are currently receiving special education services due to a disabling condition, and one of whom shall be a representative of the charter school community.

3) Requires ACSE members to be selected to ensure the body is representative of the state population, composed of individuals involved in, or concerned with, the education of children with exceptional needs, and include a majority of

members with exceptional needs or parents of children with exceptional needs who are age's birth to 26 years, inclusive.

4) Requires the ACSE to comment publicly on any rules or regulations proposed by the state regarding the education of individuals with exceptional needs and advise the SPI in developing: (a) evaluations and reporting on data to the Secretary of Education in the United States Department of Education, (b) corrective action plans to address findings identified in federal monitoring reports under the Individuals with Disabilities Education Act, and (c) policies relating to the coordination of services for individuals with exceptional needs.

5) Requires the ACSE to report to the SBE, the SPI, the Legislature, and the Governor at least once per year on the following:

   a) Activities enumerated in state law that are necessary to be undertaken regarding special education for individuals with exceptional needs.

   b) The priorities and procedures utilized in the distribution of federal and state funds.

   c) The unmet educational needs of individuals with exceptional needs within the state.

   d) Recommendations relating to providing better education services to individuals with exceptional needs.

This bill:

1) Increases the number of members on the ACSE, from 17 to 19 members.

2) Requires the two additional members be pupils between the ages of 16 and 22, inclusive, with exceptional needs.

3) Requires the pupils to be appointed for one year, with the option to serve a second term of one year.

Comments

1) *Need for the bill.* According to the author, "Representation matters. The California Advisory Commission on Special Education (ACSE) provides

recommendations and advice to the State on new or continuing areas of research, program development and evaluation in California special education.

"However, the people most directly impacted by these policies, students with exceptional needs, have no direct input or representation on the ACSE. This is especially concerning given that approximately one-in-eight California public school students receive special education, yet those same students have no seat at the decision-making table.

"SB 291 will improve California special education by ensuring direct representation and a decision-making role on the California ACSE for current students with exceptional needs. It is also an exciting step that makes California the first state with student voting rights on the ACSE."

2) *Federal law requires the state to maintain a special education advisory panel.* The federal Individuals with Disabilities Education Act (IDEA) makes a free appropriate public education available to eligible children throughout the nation and ensures special education and related services to those who need them. Any state receiving funds authorized through IDEA must establish and maintain an advisory panel to provide policy guidance related to special education and related services for children with disabilities.

   California's ACSE is composed of 17 members who are responsible for providing recommendations and advice to the SBE, the SPI, the Legislature, and the Governor in new or continuing areas of research, program development and evaluation in California special education. The author of this bill notes that while members of the ACSE consist of important stakeholders such as parents of students with exceptional needs, there is no direct role for students themselves this process.

3) *Recent report from the Advisory Commission on Special Education.* In the late summer or early fall of each calendar year, the ACSE releases an Annual Report of the Commission's work over the previous fiscal year. This report provides information on the year's emphasized themes and highlights the items chosen for the agendas of each of the Commission's five yearly meetings.

   The Commission's most recent 2019-20 report highlights, among other things, the unforeseen levels of disruption caused by the novel coronavirus pandemic. In its overview, the report notes the following, which makes a strong case for including more student voice in improving the state's special education system:

"While creating untold challenges of its own, the pandemic has also served to highlight long-existing inequities and weaknesses in the social, educational, and political systems, both statewide and nationally. The commissioners hope that a renewed and acute awareness of these challenges will serve to strengthen the resolve of policymakers and educators everywhere—redoubling prevention and early intervention efforts and fortifying a continued commitment to creating a coherent and aligned educational system that addresses inequitable practices and improves outcomes for students both with and without disabilities."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, minor and absorbable General Fund costs to the California Department of Education (CDE) for the addition of two pupil members. Costs include travel and other operational expenses.

SUBJECT: Forestry: electrical transmission or distribution lines: clearances: notice and opportunity to be heard

SOURCE: Pacific Gas and Electric Company

DIGEST: This bill establishes a process for electrical corporations that own electrical transmission and distribution lines to cut, fell, or trim trees on property outside the utility easement where the electrical corporation does not have existing rights or express permission from the landowner.

Assembly Amendments delete the previous contents of this bill regarding fire tool boxes and replace the language with the current contents in this bill regarding vegetation clearances and landowner notifications. This analysis includes contributions from the Senate Committee on Natural Resources and Water.

ANALYSIS:

Existing law:

1) Requires each electrical corporation to construct, maintain, and operate its electrical lines and equipment in a matter that will minimize the risk of catastrophic wildfire. Requires each electrical corporation to annually prepare and submit a wildfire mitigation plan (WMP) to the Wildfire Safety Division (WSD) at the Office of Energy Safety Infrastructure (OEIS) for review and approval. (Public Utilities Code §8386)

2) Authorizes any person who owns, controls, operates, or maintains any electrical transmission or distribution line to traverse land as necessary, regardless of land ownership or express permission to traverse land from the landowner, after providing notice and an opportunity to be heard to the landowner, to prune trees to maintain clearances, as provided, and to abate, by pruning or removal, any hazardous, dead, rotten, diseased, or structurally defective live trees. Authorizes this abatement at the full discretion of the person that owns, controls, operates, or maintains the electrical transmission or distribution lines, with exceptions. (Public Resources Code §4295.5(a))

3) States that the authority to traverse land does not exempt a person who owns, controls, operates, or maintains an electrical transmission or distribution line from liability for damages for the removal of vegetation that is not covered by an easement granted to the person for the electrical transmission or distribution line. (Public Resources Code §4295.5(b))

4) Requires any person that owns, controls, operates, or maintains any electrical transmission or distribution line in a mountainous land, or in forest-covered land, brush-covered land, or grass-covered land to maintain specified clearances between electric utility infrastructure and vegetation. (Public Resources Code §§4292 and 4293)

This bill:

1) States the intent of the Legislature that nothing in this bill exempts a person who owns, controls, operates, or maintains an electrical transmission or distribution line from liability for personal injury or property damage proximately caused by that person's negligence or recklessness in felling, cutting, or trimming trees or vegetation; and that any trees that are felled, cut, trimmed or treated under this legislation must be at no cost to the landowner.

2) Authorizes, notwithstanding any other law or regulation related to trespass or damage liability, an electrical corporation to traverse lands in High Fire Threat Districts (HFTDs) and State Responsibility Areas (SRA), regardless of property ownership and without property owner permission, to cut, fell, or trim hazardous, dead, diseased, or structurally defective live trees in order to maintain clearance around electrical transmission and distribution lines.

3) Requires the electrical corporation's compliance with existing statutes regarding specified clearances in all directions between all vegetation and all conductors which are carrying electrical current, and, if applicable, Rule 35 of the California Public Utilities Commission's (CPUC's) General Order 95 (GO 95).

4) Requires, where the electrical corporation does not have existing rights or the express permission from the landowner, trees that are cut, felled, or trimmed to remain on the property unless the landowner makes a timely request to the electrical corporation to perform a treatment of the wood. Requires an electrical corporation to treat the wood in a manner that is cost-effective and reduces wildfire risk. Provides that the electrical corporation is not obligated to treat or remove the wood if the wood is not safely accessible by its vehicles and equipment or other regulations prohibit the treatment.

5) Requires, except where the landowner has requested the woody material to be kept intact, woody materials trimmed, cut, or felled be treated to achieve a maximum post-activity depth of nine inches.

6) Requires electrical corporations that conduct cutting, felling, or trimming, per the provisions of this bill, to be done in compliance with the California Forest Practice Rules (CFPR) and the California Coastal Act.

7) Requires an electrical corporation to provide notice to the landowner and an opportunity for the landowner to be heard before cutting, felling, or trimming trees. Requires the CPUC, on or before January 1, 2025, to develop, through a public process, standardized content and methods for delivery for a letter, door hanger, or other means of notification an electrical corporation can provide a property owner before pruning, cutting, trimming, or felling trees on property where the electrical corporation does not have existing rights or express permission.

8) Requires, until the CPUC's standardized content is approved, an electrical corporation to make a good faith effort to communicate the process for felling, cutting, or trimming trees to the property owner.

9) Sunsets the provisions of this bill on January 1, 2028.

Background

Wildfires caused by electric utility infrastructure. Electrical utility infrastructure equipment, including downed electric power lines, arcing, and conductor contact with trees and grass, can act as an ignition source. Risks for wildfires has increased with extended drought conditions, bark beetle infestation that has increased tree mortalities, extreme heat and high wind events, along with increased encroachment of development into forested and high-fire threat areas. According to a State Auditor's report titled *Electric System Safety* released in March 2022: since 2015, power lines have caused six of the State's 20 most destructive wildfires. The report also noted that CalFire found that fires caused by power lines hit by falling limbs or trees accounted for 74 percent of the acres burned in its jurisdiction from 2018 through 2020 that were caused by electrical power.

Vegetation clearance. Public Resources Codes §§4292 through 4295 provide specified clearances between utility infrastructure and vegetation, including those in SRAs. The clearances can vary depending on the voltage of the electric line (generally ranging between 4 feet and 10 feet). Additionally, CPUC rules specify vegetation clearance requirements by electric investor-owned utilities (IOUs), including CPUC GO 95, Rule 35. As the State Auditor's report notes:

> California is at a higher risk of wildfires and more frequent power shutoffs in part because of the nearly 40,000 miles of bare power lines in areas where there is a greater threat of wildfire. In 2020 the six utilities [state's electric IOUs] reported completing hardening projects—improvements to make electrical equipment more fire resistant or to reduce the risk of them igniting a fire—on only 1,540 miles of lines.

Vegetation clearance on land not owned by the electric utility. AB 2911 (Friedman, Chapter 641, Statutes of 2018) provided electric utilities the authority to traverse land the utility does not own in order to complete required vegetation clearance work. The bill added Public Resources Code §4295.5 which provides that the electric utility can traverse the land, after providing notice and an

opportunity for the landowner to be heard, in order to prune or remove hazardous trees within SRAs and HFTDs. The bill also included language to not exempt the electric utility from liability for removal of vegetation that is not covered in the utility distribution or transmission line easement.

Forest Practices Rules. The California Forest Practice Act was enacted in 1973 to ensure that logging is done in a manner that will preserve and protect fish, wildlife, forests and streams. The State Board of Forestry and Fire Protection enacts and enforces additional rules to protect these resources, such as the CFPR. The CFPR provides detailed instructions for woody material management, among many other things, for fuel treatment standards that specify wood material management, treatment and removal within specified distances of various structures and roads.

Communities upset with utility vegetation clearance efforts. After the 2020 CZU Lightning Complex fires in the Santa Cruz Mountains were contained, Pacific, Gas & Electric (PG&E) cut thousands of trees, including second growth redwoods, madrones, and cypress, in Boulder Creek, Ben Lomond and Bonny Doon to clear the forests of dead and damaged trees near powerlines. However, more trees were removed than may have been necessary. Though Santa Cruz is in the Coastal Zone, this was all done without a Coastal Development Permit because current law expressly exempts this activity from "any other law," which includes the Coastal Act. Had current law required compliance with CFPR and the Coastal Act, oversight and permitting would have been required, and much of the damage may have been avoided. PG&E faces millions of dollars in fines from the CalFire and the California Coastal Commission for over-cutting large trees.

In addition to the issues in Santa Cruz, many communities have expressed concerns about the efforts by PG&E to prune, trim, and fell trees. Some of these incidents have received news attention, including in Nevada City, El Dorado and Calaveras Counties, to name a few. Additionally, this committee has received comments from residents in various parts of the state who have shared details of the challenges and concerns with the tree trimming and cutting work in their communities. PG&E has also expressed concerns about its ability to conduct appropriate vegetation clearance, sharing "In 2020, there were 10,466 customer work refusals in PG&E's service area, in which property owners initially refused to allow PG&E to complete their vegetation management work."

Comments

SB 396. This bill replicates some of the language in AB 2911 (Friedman, 2018) with notable changes. This bill only applies to electric IOUs, and does not include

other electric utilities. This bill also expands the allowable activities beyond solely pruning or removing hazardous trees, and instead allow cutting, trimming, and felling trees with full discretion by the electric IOU. This bill also does not include the specific liability language included in AB 2911, Public Resources Code §4295.5(b). Instead, this bill includes intent language to not exempt electric utilities from liability caused by reckless or negligence in conducting the vegetation clearance. This bill also includes a section requiring the CPUC, by January 1, 2025, to develop standardized content for landowner notification regarding the electric IOUs intent to cut, trim, fell, or prune trees on the landowner's property.

Strategies to address wildfire risks. As noted above, the WMPs filed by electric IOUs incorporate all the strategies that an electric utility intends to take to reduce wildfire risks. Recognizing the tens of thousands of miles of electric lines that need to be addressed, electric utilities are likely to need a combination of actions, including covered conductor, judicious undergrounding of electric lines, sectioning circuits to limit customer exposure to proactive power outages, as well as, a continued need for vegetation management. Recognizing that bare electric lines present some of the greatest challenges, the need to address this risk is critical. However, given PG&E's announcement to underground 10,000 miles of distribution lines, the need for ongoing vegetation clearance should subside. Nonetheless, the numerous customer concerns and complaints regarding the utility's trimming and cutting of trees raises concerns by many opposed to this bill. They question whether electric IOUs' authority to cut and fell trees on property not owned by the utility should be expanded and their liability limited.

California Coastal Act and Forest Practice Act (FPA). This bill provides that all actions undertaken by an electrical corporation pursuant to the bill's new authority must comply with FPA rules and the Coastal Act. While staff understands this to be declaratory of existing law, this provision is important because some utilities, like PG&E, have questioned the applicability of these laws to their vegetation management activities. CalFire has pushed back on PG&E's claim, issuing 67 notices of violation to PG&E and/or its contractors since 2019, 56 of which have been issued since July 2021. Some stakeholders have raised concerns that this bill's language mandating compliance with the FPA still leaves the door open for PG&E to claim that it's actions are not subject to the FPA.

FPA laws vs rules. This bill only requires compliance with FPA rules; it does not explicitly require compliance with FPA laws. Given this bill's explicit call out of the Coastal Act, some may interpret this bill's leaving out FPA laws as intentional

and that this bill only requires compliance with the FPA rules. According to CalFire, not all FPA laws have associated rules.

Enforcement capacity. Ensuring electric corporations follow the Coastal Act and FPA, when these laws apply, requires sufficient enforcement capacity. Some are concerned that both the Coastal Commission and CalFire lack sufficient enforcement capacity to track and inspect the scale of work being undertaken by utilities to manage wildfire risk around their lines. These groups opposed to this bill believe such an investment may be unlikely given this bill's short life.

Expanded authority to fell trees. This bill would expand an electric utility's authority to maintain clearances around utility lines on land the utility does not own. Opponents argue this would give electrical corporations unfettered power to cut down healthy, mature trees, far outside the utility's right-of-way or easements. In some instances, felling a tree may be the best option to safely maintain clearance. However, there are many cases where pruning is sufficient and the tree can be retained. Opponents of this bill also raise concerns that this bill does not require consideration of other risks or hazards, including those for water quality, habitat, or erosion.

Costs to electric ratepayers and landowners. The challenge of who should pay for removal of hazardous trees can be complicated. In many cases, landowners can not afford to pay for the removal of hazardous trees, however, it may not be reasonable for electric ratepayers to shoulder these costs. Under current processes, an electric IOU must receive approval by the CPUC to recover costs from ratepayers for wildfire mitigation work, after a review by the CPUC to ensure the costs are just and reasonable. This bill appropriately does not change that process. While this bill includes intent language that any trees that are felled, cut, trimmed or treated under this legislation "must be at no cost to the landowner", the intent language, appropriately, does not prevent the CPUC from disallowing electric IOUs from recovering costs that are found to not to be just and reasonable. At the same time, the intent language assures landowners that these costs should not be borne by them.

Notice to landowners. This bill requires the CPUC, by January 1, 2025, to develop a standardized process to notify landowners when an electric IOU intends to traverse their property for vegetation clearance. Many of the entities opposed to this bill express concerns about the two year lag of when this bill would take effect and the date by when the CPUC would develop the standardized notification

requirements. Many of the groups opposed to this bill express concerns that a requirement for a "good faith effort" by the electric IOUs is not sufficient.

Related/Prior Legislation

SB 884 (McGuire, 2022) creates an expedited program by which a large electrical corporation may receive approval for a plan to underground utility distribution infrastructure. The bill is pending on the Assembly Floor.

AB 2911 (Friedman, Chapter 641, Statutes of 2018) proposed numerous provisions related to fire prevention and vegetation management, including providing explicit authority for electric utilities to traverse land as necessary, regardless of land ownership, after providing notice, in order to prune trees to maintain clearances. Explicitly does not exempt electric utilities from liability for damages for the removal of vegetation not within their easements.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- One-time costs of an unknown but significant amount, likely in the low to mid hundreds of thousands of dollars, to OEIS to develop, through a public process standardized content for use by electrical utilities and landowners, as required by the bill, and to make recommendations (special fund).

- State costs related to bill's provisions regarding firefighting tools should be minor an absorbable.

ARGUMENTS IN SUPPORT: According to the author:

> In the last decade, California has seen some of the most destructive and unmanageable wildfires in history. It is imperative that the State assist in streamlining fire mitigation strategies and safety for utility workers and firefighters alike. California utilities and the International Society of Arboriculture have identified thousands of hazard trees that have not been abated because they are located on private or public property where the utility cannot utilize an easement or permission from the landowner to remove them. Currently, utilities face liability for trespassing and treble damages (triple the property value loss) for abating hazard trees where they do not have the authority to do so. This situation between utilities and landowners puts many communities at risk even though the imminent threat of wildfire is widely acknowledged. Efforts to wildfire risk should not place utilities and their employees at odds with public safety. SB 396 is simple wildfire mitigation policy that will assist and ease the stress of some of the State's most vulnerable emergency service workers.

ARGUMENTS IN OPPOSITION: 350 Bay Area Action, Sierra Club California, and others, in a joint letter, express opposition to this bill due to

concerns that “the bill does not provide sufficient safeguards to protect landowners and the environment.” Specifically, they note the lack of explicit statutory language regarding liability from damages caused by the electric IOU, lack of adequate hearing process to allow landowners to be heard, deference to electric IOUs on how to remove or treat trees that are cut or felled, the need for explicit requirement to follow FPA, and lack of meaningful opportunity for landowners to save trees.

Indivisible CA State Strong shares many of the same concerns and provides testimony from individual residents and their experiences with PG&E vegetation clearances. They also express concerns about the reliance on vegetation management in lieu of more “thorough solutions to eliminate utility-caused wildfires” including the application of covered conductors as has been done by Southern California Edison.

SUBJECT: Fire protection: Special District Fire Response Fund: Office of Emergency Services

SOURCE: California Professional Firefighters

DIGEST: This bill requires the Office of Emergency Services (OES) to administer the Special District Fire Response Fund (SDFR Fund), as specified, and develop a standard grant application form, as specified.

Assembly Amendments provide that rather than requiring the State Board of Fire Services to convene a working group, OES is required to administer the SDFR Fund, develop a standard application form, establish an annual timeline, employ strategies to ensure underfunded special districts are aware of availability of funding, and establish reporting requirements, as specified.

ANALYSIS:

Existing law:

1) Establishes OES, within the office of the Governor, and tasks OES with, among other things, establishing the Wildfire Forecast and Threat Intelligence Integration Center, jointly with the Department of Forestry and Fire Protection (CalFIRE), to collect, assess, and analyze fire weather data, atmospheric conditions, and other threat indicators of wildfire danger, and to develop and share intelligence products related to fire weather and fire threat conditions, as specified.

2) Requires OES to establish and administer the FIrefighting RESources of California Organized for Potential Emergencies (FIRESCOPE Program) to maintain and enhance the efficiency and effectiveness of managing multiagency firefighting resources in responding to an incident.

3) Requires OES to carry out its responsibilities with respect to the FIRESCOPE Program in cooperation with CalFIRE and the Office of the State Fire Marshal (SFM), and with the advice of the Fire and Rescue Advisory Committee/FIRESCOPE Board of Directors.

4) Establishes the SDFR Fund as a subaccount within the California Fire Response Fund within the State Treasury, as specified.

This bill:

1) Requires OES to administer the SDFR Fund, as specified, and to coordinate with the board of directors of the FIRESCOPE Program to do all of the following:
   a) Develop a standard application form to be used by special districts that provide fire protection services to apply for grants from the SDFR Fund, as specified.
   b) Establish an annual timeline for special districts that provide fire protection services to apply for grants from the SDFR Fund.
   c) Employ strategies to ensure that underfunded special districts that provide fire protection services are aware of the availability of the SDFR Fund to expand and increase fire suppression staffing in qualified districts.
   d) Establish reporting requirements for special districts that are awarded grants from the SDFR Fund.

e) Develop metrics for consideration of grant applications consistent with existing law, as specified.

Background

Purpose of the Bill. According to the author's office, "at the November 2020 ballot box, voters overwhelmingly approved Proposition 19, which significantly changed Constitutional rules for property tax assessment transfers in order to correct unfair tax loopholes, provide housing relief for millions of seniors and working families, and create record homeownership opportunities for renters and new homeowners statewide as tens of thousands of homes will become available for the first time in decades. Most importantly, the measure generates desperately needed revenue for fire protection and emergency response in the state's most underfunded areas. SB 450 implements the fire prevention funding provisions of Proposition 19 by requiring OES to administer the fund and thereby increase our state's fire response and prevention capacity."

Proposition 19. In November of 2020, California voters approved Proposition 19, the "Home Protection for Seniors, Severely Disabled, Families, and Victims of Wildfire or Natural Disasters Act." Proposition 19 significantly changed Constitutional rules for property tax assessment transfers, granting eligible homeowners – persons over 55, persons with severe disabilities, and victims of natural disasters or hazardous waste contamination – the ability to transfer their tax assessments to a different home of the same or lesser market value. This essentially allows these homeowners to move without paying higher property taxes.

Proposition 19 also made changes to the "intergenerational transfer exclusion," dictating rules for the transfer of family homes between parents and children, and grandparents and grandchildren. The additional revenues generated from Proposition 19 are to be used to reimburse counties for revenue losses related to the measure's property tax changes, and to fund wildfire suppression efforts.

Proposition 19 created a new section of the California Constitution (Article XIII A, Section 2.2) to allocate any additional revenues or savings to the state resulting from the tax changes to the California Fire Response Fund and the County Revenue Protection Fund, and continuously appropriate moneys to those funds.

Specifically, this section requires the Director of Finance to calculate and certify the additional revenues and net savings to the state resulting from the measure

during the preceding fiscal year. Upon certification, the State Controller is required to transfer 75% of the amount to the California Fire Response Fund. Revenue in the California Fire Response Fund are subject to appropriation by the Legislature according to a specified methodology, which states funds must be used to expand fire suppression staffing in underfunded special districts that provide fire suppression staffing, and must not supplant existing state or local funds utilized for those purposes, and further:

- Allocates 20% to CalFIRE to fund fire suppression staffing.
- Sends 80% to the SDFR Fund for districts that provide fire protection services, as specified.

This bill, in directing OES to administer the SDFR Fund and to establish a grant application process, resolves some of the ambiguity in Proposition 19 in terms of how it would become operative for eligible fire districts.

FIRESCOPE. FIRESCOPE's mission is to provide recommendations and technical assistance to OES; to maintain the FIRESCOPE Decision Process and continue the operation, development, and maintenance of the FIRESCOPE Incident Command System and the Multi-Agency Coordination System; and maintain a system known as the FIRESCOPE Decision Process to continue statewide operation, development, and maintenance. The FIRESCOPE vision is to continue national leadership in the development of all-hazard incident management and multi-agency coordination systems, to enhance and encourage full participation by the California fire service in the statewide Fire and Rescue Mutual Aid System, and to provide a common voice for the California fire service relating to these issues.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, annual costs of approximately $1.3 million to OES for five additional staff positions to develop and administer the grant program in a manner that prioritizes underfunded districts, as specified in the California Constitution pursuant to Proposition 19 (2020).

SUPPORT: (Verified 8/22/22)

California Professional Firefighters (source)
California Fire Chiefs Association
California Special Districts Association
Fire Districts Association of California

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: In support of this bill, the California Professional Firefighters write that, "SB 450 will task CalOES with administering the Special District Fire Response Fund and outlines the requirements for establishing a grant application process, reporting mechanisms, and outreach to eligible districts to ensure that they are aware that the funding is available. As part of these requirements, SB 450 outlines that CalOES shall develop a standard application form for fire districts to apply for grants from the Fund that includes: [i]dentification of the fire districts' eligibility; [t]he number of additional fire suppression staff that will be supported by the grant; [t]he benefits to firefighter health and safety and community response in the fire district; [i]dentification of opportunities to leverage other funding sources should the grant be funded."

Further, the sponsor states that "revenues generated by Proposition 19 have the potential to radically improve the quality and nature of fire protection provided by underfunded fire districts throughout the state. As the threat of wildfire grows more dangerous each year, it is critical that California prioritizes the fire service, ensuring that there are enough paid, professional firefighters in every fire district to keep their communities safe."

SUBJECT: Pupil instruction: high school coursework and graduation requirements: exemptions and alternatives

SOURCE: Los Angeles County Office of Education
National Center for Youth Law
SchoolHouse Connection

DIGEST: This bill (1) expands and strengthens the rights for foster youth, homeless youth, former juvenile court school students, children of military families, and migratory children to be exempted from local graduation requirements if certain conditions are met; (2) requires local educational agencies (LEAs) to provide those students the option to remain in school for a fifth year to complete the statewide coursework requirements if certain conditions are met; and

(3) requires LEAs to annually report to the California Department of Education (CDE) the number of students that graduate with an exemption from the LEA's local graduation requirements.

Assembly Amendments:

1) Add findings and declarations.

2) Require an LEA that exempts a highly mobile student from local graduation requirements, as required by current law, to consult with, rather than inform, the student and their parent or guardian on various items, including how graduating with the state graduation requirements may affect the pupil's postsecondary or vocational future.

3) Require LEAs, until January 1, 2028, to consult with a highly mobile student and their parent or guardian of the option to remain in high school for a fifth year if the LEA determines the student is reasonably able to complete the LEA's local graduation requirements within that time. Also expand these provisions to students enrolled in adult education programs who are or were highly mobile students in high school, regardless of age.

4) Provide various changes to how LEAs accept coursework of a highly mobile student who transfers to a new LEA.

5) Require LEAs to annually report to CDE, and CDE shall then make public on its website on an annual basis, the number of students who graduated with an exemption from their LEA's local graduation requirements.

ANALYSIS:

Existing law:

1) Requires LEAs to exempt students in foster care, students who are homeless children or youth, former juvenile court school students, and students who are children of military families (hereafter "mobile students") who transfer between schools any time after the completion of the students' second year of high school from all coursework and other requirements that are in addition to state graduation requirements, unless an LEA makes a finding that a student is reasonably able to complete the LEA's graduation requirements in time to graduate from high school by the end of the student's fourth year of high school. (Education Code § 51225.1)

2) Requires an LEA, if the LEA determines that the mobile student is reasonably able to complete the LEA's graduation requirements within the student's fifth year of high school, to do all of the following as specified. (EC § 51225.1)

3) Requires, in order to determine whether a mobile student is in the third or fourth year of high school, either the number of credits the student has earned to the date of transfer or the length of the student's school enrollment to be used, whichever will qualify the student for the exemption. (EC § 51225.1)

4) Requires an LEA, within 30 calendar days of the date that a mobile student who may qualify for the transfers into a school, to notify the student, the person holding the right to make educational decisions for the student, and the student's social worker or probation officer, or LEA liaison for homeless children and youth, as applicable, of the availability of the exemption and whether the student qualifies for an exemption. (EC § 51225.1)

5) Requires, if an LEA fails to provide timely notice, the mobile student to be eligible for the exemption from local graduation requirements once notified, even if that notification occurs after the student no longer meets the definition of a student in foster care, a student who is a homeless child or youth, a former juvenile court school student, or a student who is a child of a military family, if the student otherwise qualifies for the exemption. (EC § 51225.1)

6) Prohibits a mobile student who is eligible for the exemption and would otherwise be entitled to remain in attendance at the school from being required to accept the exemption or from being denied enrollment in, or the ability to complete, courses for which he or she is otherwise eligible, including courses necessary to attend an institution of higher education, regardless of whether those courses are required for statewide graduation requirements. (EC § 51225.1)

7) Requires an LEA, if a mobile student is not exempted or has previously declined the exemption, to exempt the student at any time if an exemption is requested by the student and the student qualifies for the exemption. (EC § 51225.1)

8) Prohibits an LEA from revoking the exemption. (EC § 51225.1)

9) Requires a mobile student's exemption to continue to apply after the termination of the court's jurisdiction over the student, after the student is no longer a homeless child or youth, or after the student no longer meets the definition of "children of military families," as applicable, while he or she is

enrolled in school or if the student transfers to another school or LEA. (EC § 51225.1)

10) Prohibits an LEA from requiring or requesting a mobile student to transfer schools in order to qualify the student for an exemption. (EC § 51225.1)

This bill: (1) expands and strengthens the rights for foster youth, homeless youth, former juvenile court school students, children of military families, and migratory children to be exempted from local graduation requirements if certain conditions are met; (2) requires LEAs to provide those students the option to remain in school for a fifth year to complete the statewide coursework requirements if certain conditions are met; and (3) requires LEAs to annually report to CDE the number of students that graduate with an exemption from the LEA's local graduation requirements. Specifically, this bill:

1) Requires an LEA, if the LEA determines that a mobile student is reasonably able to complete the LEA's graduation requirements within the student's fifth year of high school, to inform a pupil in foster care or the pupil who is a homeless child or youth of the pupil's option to remain in the pupil's school of origin, pursuant to federal law.

2) Authorizes, for pupils with significant gaps in school attendance, the pupil's age as compared to the average age of pupils in the third or fourth year of high school to be used to determine whether a mobile student is in the third or fourth year of high school.

3) Requires a school district to exempt a mobile student who was at one point eligible for the exemption, but who was not properly notified of the availability of the exemption or who declined the exemption, if at any time the mobile student later requests the exemption, even if the student is no longer homeless or the court's jurisdiction over the pupil has terminated.

4) Requires a school district to provide a mobile student the option to remain in school for a fifth year to complete the statewide coursework requirements, if the mobile student, who transferred between schools any time after the completion of the student's second year of high school, is not reasonably able to complete the *school district's graduation requirements* within the student's fifth year of high school, but is reasonably able to complete the *statewide coursework requirements* within the student's fifth year of high school.

5) Requires a school district to reevaluate a mobile student's eligibility within the first 30 calendar days of the next academic year after they were determined to

be ineligible, in order to determine if the student continues to be reasonably able to complete the school district's graduation requirements in time to graduate from high school by the end of the pupil's fourth year of high school. If the student is not reasonably able to complete the school district's graduation requirements in time to graduate from high school by the end of the pupil's fourth year of high school, the school district must exempt the student from all coursework and other requirements adopted by the governing board of the school district that are in addition to the statewide coursework requirements and notification of the availability of the exemption.

6) Extends the exemptions provisions to mobile students who are enrolled in an adult education program, regardless of their age, and to students enrolled in an adult education program, who, while enrolled in high school, would have qualified as mobile students.

7) Specifies that for purposes of the exemptions provisions for a student who is an unaccompanied youth, as that term is defined in federal law, the "person holding the right to make educational decisions for the pupil" is the unaccompanied youth themselves.

8) Requires each LEA to report to the CDE annually the number of students that graduate with an exemption from the LEA's graduation requirements that are in addition to the statewide coursework requirements, and requires that data to be reported for students graduating in the fourth year and fifth year cohorts, and to be disaggregated by student category.

Comments

1) *Need for the bill.* According to the author's office, "This bill aims to strengthen Education Code 51225.1, which currently provides expanded opportunities to achieve a high school diploma for highly mobile students (students who experiencing homelessness, are in foster care, formerly in juvenile court school, are in military families, are migrant or in the newcomer program), that experience a school move after their second year in high school. Currently Ed. Code 51225.1 provides students with the option to opt into a 5th year of high school to complete LEA coursework requirements that are in addition to the statewide coursework requirements, or graduate with an exemption from LEA coursework requirements in their fourth year of high school."

2) *Statewide graduation requirements vs. local graduation requirements.* Since the 1986-87 school year, the Education Code has required students receiving a

diploma from a California high school to have completed all of the following one-year (unless otherwise specified) courses while in high school:

- Three courses in English.
- Two courses in mathematics, including one year of Algebra I.
- Two courses in science, including biological and physical sciences.
- Three courses in social studies, including United States history and geography; world history, culture, and geography; a one-semester course in American government and civics, and a one-semester course in economics.
- One course in visual or performing arts, foreign language, or commencing with the 2012-13 school year, career technical education.
- Two courses in physical education.

Existing law authorizes local school district governing boards to impose additional graduation requirements beyond the state-mandated graduation requirements, and many school districts and charter schools have added some additional local graduation requirements, such as four years of English or three years of math, or a health course, and some have even incorporated the robust University of California/California State University A-G admission requirements into their local graduation requirements.

3) *Effect of mobility on academic outcomes*. Numerous studies indicate that student mobility is associated with poor educational outcomes. One meta-analysis (Mehana, 2004) on the effects of school mobility on reading and math achievement in the elementary grades found the equivalent of a three- to four-month performance disadvantage in achievement. Another (Reynolds, 2009) found that frequent mobility was associated with significantly lower reading and math achievement by up to a third of a standard deviation, and that students who moved three or more times had rates of school dropout that was nearly one-third of a standard deviation higher than those who were school stable. One longitudinal study (Temple, 1999) found that half of the one year difference between mobile and non-mobile students could be attributed to mobility, and that it is "frequent, rather than occasional, mobility that significantly increases the risk of underachievement." Another longitudinal study (Herbers, 2014) found that students who experience more school changes between kindergarten and twelfth grade are less likely to complete high school on time, complete fewer years of school, and attain lower levels of

occupational prestige, even when controlling for poverty. Results of this study indicated more negative outcomes associated with moves later in the grade school career, particularly between fourth and eighth grade.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, this bill potentially has significant ongoing Proposition 98 General Fund cost pressures to LEAs serving highly mobile high school students to comply with the provisions of this bill, including consulting, rather than notifying, students of their rights, changing transcript processes, reporting data to CDE and other costs. The state has 1,315 high schools, according to CDE. If the Commission on State Mandates determines the bill's requirements to be a reimbursable state mandate, the state would need to reimburse these costs either directly to LEAs or through the K-12 Mandates Block Grant. Ongoing Proposition 98 General Fund costs to provide additional funding to LEAs to enroll highly mobile students in a fifth year of high school. Costs would depend on the number of students opting to complete a fifth year of high school. Per-student funding for a high school student in the 2021-22 school year was $10,057 annually, with additional funding for a foster youth, low-income or English learner students. Minor ongoing General Fund costs to CDE to make highly mobile student data publicly available.

ARGUMENTS IN SUPPORT: According to the Alliance for Children's Rights "SB 532 addresses school stability and academic achievement by expanding and strengthening the rights of highly mobile students by requiring LEAs to provide those students the option to remain in school for a fifth year to complete the statewide coursework requirements if certain conditions are met to positively impact postsecondary education and employment. In addition, SB 532 works to ensure students and their parent/educational rights holder are provided information about available alternatives to make an informed decision about their options, including how the options may affect the student's postsecondary plans. To reduce the achievement gap, current law requires schools to calculate partial credit so that highly mobile youth receive credit for the coursework completed when they must change schools to prevent undue disruptions and delays in achieving graduation. SB 532 supports a more holistic and collaborative approach on educational options between highly mobile students and schools through a more active consultation about graduation options to promote informed decision making, and expands and strengthens existing educational rights to positively impact postsecondary education and vocational opportunities."

SUBJECT: Department of General Services: nonprofit liaison

SOURCE: CalNonprofits

DIGEST: This bill requires the Department of General Services (DGS) to designate a person to serve as a nonprofit liaison, as specified.

Assembly Amendments remove the requirement that any state agency that significantly regulates or impacts nonprofit corporations to designate a person to serve as a nonprofit liaison, as specified, and instead require DGS to designate at least one person to serve as a nonprofit liaison, as specified.

ANALYSIS:

Existing law:

1) Establishes DGS to provide centralized services, including, but not limited to, planning, acquisition, construction, and maintenance of state buildings and property, purchasing, printing, architectural services, administrative hearings, and accounting services.

2) Requires a state agency that significantly regulates small business or that significantly impacts small business to designate at least one person to serve as a small business liaison. Requires the agency to utilize existing personnel and resources to perform the duties of small business liaison.

3) Prohibits the small business liaison from advocating for or against the adoption, amendment, or repeal of any regulation or intervene in any pending investigation or enforcement action.

This bill:

1) Requires DGS to designate at least one person to serve as a nonprofit liaison.

2) Requires DGS to advertise the existence of its nonprofit liaison by displaying the nonprofit liaison's name and contact information on its internet website.

3) Requires a nonprofit liaison to be responsible for all of the following:

   a) Responding to complaints from nonprofit corporations about DGS.
   b) Providing technical assistance to nonprofit corporations to help them comply with DGS's regulations.
   c) Reporting nonprofit corporation concerns and recommendations to the Director of DGS.
   d) Developing and sharing innovative procurement and contracting practices to increase opportunities for nonprofit corporations.

4) Prohibits the nonprofit liaison from advocating for or against the adoption, amendment, or repeal of a regulation, or intervene in a pending investigation or enforcement action.

5) Defines a "nonprofit corporation" to mean either a nonprofit mutual benefit corporation or a nonprofit public benefit corporation, as specified.

Background

Nonprofits in California. Nonprofit organizations rank as the fourth largest industry in California by employment, with nearly one million people employed in the sector throughout the state, contributing approximately 15% of California's gross state product. Additionally, nonprofits bring in approximately $40 billion in revenue to California from out-of-state sources. The author argues that strong government-nonprofit partnerships support a vibrant services supply chain, workforce, and economy – similar to small businesses in the state.

This bill requires DGS to designate at least one person as a nonprofit liaison, and to advertise the existence of this liaison online. This bill prohibits the nonprofit liaison from advocating for or against

Comments

Purpose of the bill. According to the author's office, "whether it is homelessness, natural disasters, or our current public health crisis, the nonprofit sector has touched the lives of every Californian. SB 543 will ensure that the nonprofit sector has the necessary state support to provide critical services to our communities."

Related/Prior Legislation

SB 784 (Glazer, 2022) authorizes a nonprofit entity that provides supportive services pursuant to a contract with the state, during a state of war emergency or a state of emergency, to adjust the method in which it provides those services so long as the purpose of the contract is served. (Pending on the Senate Inactive File)

AB 1548 (Gabriel, Chapter 734, Statutes of 2019) established the California State Nonprofit Security Grant Program to improve the physical security of nonprofit organizations that are at high risk of terrorist attack due to ideology, beliefs, or mission.

SB 1436 (Figueroa, Chapter 234, Statutes of 2006) re-established the position of the Small Business Liaison which was eliminated when all the code sections related to the California Trade, Commerce, and Technology Agency were eliminated in 2003.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, this bill has "General Fund costs in excess of $150,000 to DGS to add a staff position to serve as the liaison."

SUPPORT: (Verified 8/23/22)

CalNonprofits

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: In support of the bill, CalNonprofits states that, "[s]trong government-nonprofit partnerships support a vibrant services supply chain, workforce, and economy. The current pandemic, with increased need for contract flexibility and demands for nonprofit services, highlights the need for strong government-nonprofit partnerships. A designated nonprofit liaison will help build and maintain healthy government-nonprofit partnerships by addressing nonprofit concerns with the agency, assisting with nonprofit compliance with agency policies, developing innovative procurement and contract practices, and reporting nonprofit concerns to agency leadership. CalNonprofits strongly supports SB 543 because it will provide nonprofits with the state agency support they need to serve as the vital service providers, economic drivers, and employers they are."

SUBJECT: Child custody: child abuse and safety

SOURCE: Center for Judicial Excellence

DIGEST: This bill increases and expands ongoing domestic violence and child abuse educational requirements for judges, referees, commissioners, mediators, child custody recommending counselors, and evaluators involved in domestic violence and child custody proceedings; clarifies that, when making child custody and visitation orders, the health, safety, and welfare of the child and the safety of all family members is paramount; and provides examples of prohibited family reunification services, which cannot be ordered as a part of a child custody or

visitation proceeding, including reunification therapy, treatments, programs, workshops or camps that are predicated on cutting off a child from a parent with whom the child is bonded.

Assembly Amendments delete the contents of the bill previously passed by the Senate and amend in the current version of the bill.

ANALYSIS:

Existing law:

1) States that it is the public policy of this state to ensure that:

   a) The health, safety, and welfare of children is the court's primary concern in determining the best interests of children when making any orders regarding the physical or legal custody or visitation of children;

   b) Children have the right to be safe and free from abuse, and that the perpetration of child abuse or domestic violence in a household where a child resides is detrimental to the health, safety, and welfare of the child; and

   c) Children have frequent and continuing contact with both parents after the parents have separated or dissolved their marriage, or ended their relationship, and to encourage parents to share the rights and responsibilities of child rearing in order to effect this policy, except when the contact would not be in the best interests of the child, as provided. (Fam. Code, § 3020(a), (b).)

2) Requires that custody of a child be granted according to a set order of preference, based on the best interests of the child, but that the order of preference establishes neither a preference, nor a presumption, for or against joint legal custody, joint physical custody, or sole custody, but allows the court and the family the widest discretion to choose a parenting plan that is in the best interest of the child. (Fam. Code, § 3040.)

3) Requires, when the policies set forth above are in conflict, a court's order regarding physical or legal custody or visitation to be made in a manner that ensures the health, safety, and welfare of the child and the safety of all family members. (Fam. Code, § 3020(c).)

4) Provides that when determining the best interests of a child, a court may consider any relevant factors and must consider: the health, safety, and welfare of the child; any history of abuse by any party seeking custody, any family

members of any party seeking custody, or the intimate partner or cohabitant of any party seeking custody; the nature and amount of contact with the parents; and substance abuse by a parent. The court may not consider the sex, gender identity, gender expression, or sexual orientation of a parent, legal guardian, or relative in determining the best interests of the child. (Fam. Code, § 3011.)

5) Requires a court to grant reasonable visitation to a parent when it is shown that visitation is in the child's best interests. (Fam. Code, § 3100.)

6) Prohibits a court from ordering family reunification services as part of a child custody or visitation rights proceeding. (Fam. Code, § 3026.)

7) Creates a rebuttable presumption against custody of a child to a parent who, the court finds, has perpetrated domestic violence against the other party, the child, the child's sibling, or certain other individuals, as provided, within the previous five years. In considering whether to overcome the presumption against custody, a court must consider, among other things, whether giving that parent custody is in the child's best interests; whether the perpetrator has completed a batterer's treatment program, substance abuse program or parenting classes; and whether there have been subsequent acts of domestic violence. (Fam. Court, § 3044.)

8) Requires the Judicial Council to establish judicial training programs for judges, referees, commissioners, mediators, and others as deemed appropriate by the Judicial Council who perform duties in family law matters.

   a) The training program must include a family law session in any orientation session conducted for newly appointed or elected judges and an annual training session in family law.

   b) The training in 7)a) must include instruction in all aspects of family law, including effects of gender, gender identity, and sexual orientation on family law proceedings, the economic effects of dissolution on the involved parties, and the effects of allegations of child abuse or neglect made during family law proceedings. (Gov. Code, § 68553; Cal. Rules of Court, Rule 10.463.)

9) Requires the Judicial Council to establish judicial training programs for individuals who perform duties in domestic violence matters, including, but not limited to, judges, referees, commissioners, mediators, and others as deemed appropriate by the Judicial Council.

a) The training programs must include a domestic violence session in any orientation session conducted for newly appointed or elected judges and an annual training session in domestic violence.

b) The domestic violence training programs must include instruction in all aspects of domestic violence, including, but not be limited to, training on the detriment to children of residing with a person who perpetrates domestic violence and the fact that domestic violence can occur without a party seeking or obtaining a restraining order, without a substantiated child protective services finding, and without other documented evidence of abuse. (Gov. Code, § 68555; Cal. Rules of Court, Rule 10.464.)

This bill:

1) Makes findings and declarations relating to the prevalence of child abuse and domestic violence in the United States and the Legislature's intent to increase the priority given to the safety of a child in any state court divorce, separation, visitation, paternity, child support, civil protection order, or family custody court proceeding affecting the custody and care of children.

2) Further clarifies that, when there is a conflict between the policies of ensuring the best interests of a child and ensuring that children have contact with both parents following a separation, the court's order must ensure that the health, safety, and welfare of the child and the safety of all family members "are paramount."

3) Clarifies the existing prohibition on a court ordering family reunification services, to specify that reunification therapy, treatments, programs, workshops, and/or camps predicated on cutting off a child from a parent with whom the child is bonded or to whom the child is attached may not be ordered as part of a custody or visitation rights proceeding.

4) Requires all judges assigned to family law matters involving child custody proceedings, as well as judges, referees, commissioners, mediators, child custody recommending counselors, and evaluators involved in child custody proceedings, to participate in a program of continuing instruction in domestic violence, including child abuse.

5) Adds child-custody-recommending counselors and evaluators to the list of persons who perform duties in family law matters for whom the Judicial Council must establish a judicial training program.

6) Requires the training in 5) to be designed to improve the ability of judges, referees, commissioners, mediators, child-custody-recommending counselors, evaluators, and others who are deemed appropriate who perform duties in family law matters, to recognize and respond to child abuse, domestic violence, and trauma in all family victims, particularly children, and make appropriate custody decisions that prioritize child safety and well-being and are culturally responsive and appropriate for diverse communities.

7) Requires the training in 5) to include a minimum of 25 hours for the orientation session and a minimum of 20 training hours to be required every three years thereafter, and to include education, using all available resources, on all of the following:

   a) Child sexual abuse.

   b) Physical abuse.

   c) Emotional abuse.

   d) Coercive control.

   e) Implicit and explicit bias, including biases relating to parents with disabilities.

   f) Trauma.

   g) Long-term and short-term impacts of domestic violence and child abuse on children.

   h) Victim and perpetrator patterns and relationship dynamics within the cycle of violence.

8) Adds child custody recommending counselors and evaluators to the list of persons who perform duties in domestic violence matters for whom the Judicial Council must establish a judicial training program, expands the training program to require training on child abuse and the impact of domestic violence on children, and requires the program to be a minimum of 25 hours for orientation and a minimum of 20 hours every three years thereafter.

Comments

This bill makes several clarifications to the law that the author and sponsors believe will further strengthen California's child custody laws so as to prevent child abuse. Specifically, the bill clarifies that a court's order regarding physical or

legal custody or visitation shall be made in a manner that ensures the health, safety, and welfare of the child and the safety of all family members is paramount; expands on the existing prohibition on ordering reunification services in a child custody case; and significantly expands judicial training requirements and mandates training on specific topics for judges and others involved in domestic violence and child custody cases. The author and sponsor believe that these additional provisions could help California secure additional funding under the newly reauthorized Violence Against Women Act (VAWA).[1] According to the sponsor, however, the federal Department of Justice has not yet published regulations setting forth the criteria for applying for funding, so it is not clear whether passing this bill will allow California to draw down VAWA funding or how much funding would be awarded. Judicial Council, writing in opposition, has also raised the concern that the bill's judicial training requirements violate the constitutional separation of powers by unduly infringing on the Judiciary's authority.

ARGUMENTS IN SUPPORT: According to the Center for Judicial Excellence, the sponsor of this bill:

> Domestic violence and child abuse are complex issues, which can be difficult to spot. A recent study showed that California family court mediators are approximately twice as likely to ignore, minimize or refute evidence of child abuse than mediators in other states. (Stahly, 2022.) This is one of the reasons that our judges and other court personnel need to be better equipped to identify abuse and make more informed decisions about child placement.
>
> Congress and President Biden have recognized this crisis and are putting a significant financial incentive behind their effort to encourage states to modernize their custody laws and prioritize child safety. Currently, family courts too often allow rampant junk science and victim-blaming to force child abuse victims into ongoing visitation or custody with their parental abuser. VAWA has earmarked federal money for states that update and modernize their custody laws by prioritizing child safety. This funding will be available to eligible states from FY 2023 through 2027. If SB 616 is enacted this year, California will be the first state in the nation to adopt multiple portions of Kayden's Law that are required to draw down these funds…
>
> SB 616 does not specifically mandate a separate training, as these hours can be woven into the Judicial Council's existing training programs, including those detailed in Family Code Section 1816, or spread out over time. This legislation leaves it to the Judicial Council's discretion as to how they want to meet the bill's requirements.

ARGUMENTS IN OPPOSITION: According to the Judicial Council of California, writing in opposition:

> The judicial branch is fundamentally based on impartiality and neutrality. Bias in the courts erodes confidence in the court system. The highly specific training topics mandated by SB 616 gives rise to concerns regarding who the possible

training experts could be, and whether the training topics implicate an advocacy agenda intended to improperly influence judicial impartiality and neutrality rather than pedagogically sound education and training.

And finally, SB 616 creates internally inconsistent conflicts for judicial officers sitting in Family Law assignments. While the fundamental tenets of child custody determinations include consideration of the best interests, and ensuring the safety, of the child, SB 616 would prohibit a court from separating a child from a parent to whom a child is bonded or attached even if the court determines that the child is bonded or attached to the parent found to be the abuser.

SUBJECT: Los Angeles County: affordable housing

SOURCE: United Way of Greater Los Angeles

DIGEST: This bill establishes the Los Angeles County Affordable Housing Solutions Agency (LACAHSA), and authorizes LACAHSA to utilize specified

local financing tools to fund renter protections and the preservation and production of housing units affordable to households earning up to 80% of the area median income (AMI).

Assembly Amendments change the composition of the LACAHSA board membership, make changes to the small city funding set-aside, and allow future local housing trust funds to administer funding.

ANALYSIS:

Existing law:

1) Establishes the Bay Area Housing Finance Authority (BAHFA) to raise, administer, and allocate funding for affordable housing in the San Francisco Bay Area, and provide technical assistance at a regional level for tenant protection, affordable housing preservation, and new affordable housing production.

2) Sets forth the governing structure and powers of the BAHFA Board, allowable financing activities, and allowable expenditures of the revenues generated.

This bill:

1) Establishes LACAHSA as a public agency, as follows:

   a) The jurisdiction of the agency includes all of the County of Los Angeles, except that:

      i) LACAHSA will only have jurisdiction to act in a supplemental capacity when a municipality has, as of January 1, 2022, an existing program that provides similar supports and services;

      ii) No functions of existing programs may be transferred to or undertake by LACAHSA; and

      iii) LACAHSA may not perform or undertake any functions related to supports and services provided to people experiencing homelessness, unless such supports and services are explicitly authorized by this bill or are directly related to the provision of other supports and services authorized explicitly by this bill.

   b) Its purpose is to increase the supply of affordable housing in Los Angeles County by providing for significantly enhanced funding and technical

assistance at a regional level for renter protections, affordable housing preservation, and new affordable housing production of 100% affordable housing for households earning 80% of the appropriate area median income or below, with financing priority on the lowest levels of affordability;

c) It must complement and supplement existing efforts by cities, counties, districts, and other local, regional, and state entities, related to addressing the goals described in this title; and

d) It cannot have powers, duties, or responsibilities until April 1, 2023.

2) Establishes the governance and administrative structure for LACAHSA, including that it will have a governing board consisting of 21 voting members and one non-voting member, as specified.

3) Establishes a citizens' oversight committee for LACAHSA, as specified.

4) Establishes the duties and responsibilities of LACAHSA, including the following:

a) Develop an annual expenditure plan that sets forth the share of revenue and funding to be spent on each of the categories specified in (6)(c), indicate the household income levels served within each category, and an estimate of the number of affordable housing units to be built or preserved and the number of tenants to be protected. The expenditure plan must also include a description of any specific project or program proposed to receive funding, including the location, amount of funding, and anticipated outcomes project-specific data;

b) Engage in specified public participation processes;

c) Contract for annual audits of LACAHSA's general administration, accounts, and records, maintain accounting records, and report accounting transactions, as specified;

d) Review implementation of the initial voter-approved ballot measure five years after its approval, as specified;

e) Conduct a comprehensive review of all projects and programs implemented under the expenditure plan every five years, as led by the Office of the Inspector General;

f) Monitor expenditures in coordination with local jurisdictions, and at least every five years, conduct a review of revenues and adopt any necessary guidelines to ensure they are spent in a timely manner and consistent with the measure's requirements; and

g) Submit an annual report to the Legislature to ensure oversight and accountability of the agency.

5) Establishes LACAHSA's powers, including:

a) Authorization to place funding measures on the ballot for purposes of preserving and enhancing existing housing, funding renter protection programs and financing new construction of housing developments. Specifies the parameters regarding the placement of the funding measure on the ballot, include the timing of the election, reimbursement to the county for the costs of the election, and the publicly available materials;

b) Authorization to raise and allocate new revenue through all the following funding mechanisms:

i) A parcel tax, as specified;

ii) A gross receipts business license tax, as specified;

iii) A document transfer tax, as specified; and

iv) The issuance of bonds, including but not limited to, general obligation bonds, revenue bonds, mortgage revenue bonds, and private activity bonds, as specified.

c) Authorization to carry out specified financial, legal, and administrative powers necessary to carry out the intent and purpose of the measure, including:

i) Applying for and receiving grants from federal and state agencies.

ii) Incurring and issuing indebtedness and assess fees on the purchaser of any debt issuance and agency loan products for reinvestment of those fees and loan repayments in affordable housing production and preservation in accordance with applicable constitutional requirements;

iii) Incurring debt and issuing bonds and otherwise incur liabilities or obligations;

iv) Soliciting and accepting gifts, fees, grants, and other allocations from public and private entities;

v) Depositing or investing moneys of the agency in banks or financial institutions in the state;

vi) Suing and being sued, except as otherwise provided by law, in all actions and proceedings, in all courts and tribunals of competent jurisdiction;

vii) Engaging counsel and other professional services;

viii) Entering into and performing all necessary contracts;

ix) Entering into joint powers agreements pursuant to the Joint Exercise of Powers Act;

x) Hiring staff, defining their qualifications and duties, and providing a schedule of compensation for the performance of their duties;

xi) Land banking, assembling parcels, and leasing, purchasing, or otherwise acquiring land for housing development;

xii) Selling or disposing of land or assets consistent with the agency's purpose and eligible activities or where a parcel under the agency's control is deemed to be inappropriate for housing development;

xiii) Collecting data on housing production and monitoring progress on meeting regional and state housing goals;

xiv) Providing support and technical assistance to local governments in relation to producing and preserving affordable housing; and

xv) Allocating and deploying capital and generated fees or income in the form of grants, loans, equity, interest rate subsidies, and other financing tools to the cities and other public agencies within the Los Angeles County area, and private affordable housing developers to finance affordable housing development, preserve and enhance existing affordable housing, and fund tenant protection programs, pursuant to this title, in accordance with applicable constitutional requirements.

d) Prohibits LACAHSA from regulating or enforcing land use decisions and acquiring property by eminent domain.

6) Establishes parameters for expenditure of revenues generated, as follows:

   a) Requires LACAHSA to use revenues it generates for the construction of new affordable housing, affordable housing preservation, tenant protection programs, planning and technical assistance, and other purposes, as specified;

   b) Requires allocations to be approved by the LACAHSA board;

   c) Requires LACAHSA to distribute regional housing revenue in the form of a grant, loan, or other financing tool over five year periods as follows:

      i) A minimum of 40% of the annual programmatic budget must be spent on affordable housing creation, preservation, and ownership, as specified. Of the funding available for affordable housing production:

         (1) 30% must be allocated to LACAHSA;

         (2) 70% must be allocated based on very low income and low-income regional housing needs assessment goals to the four largest cities in Los Angeles County (Los Angeles, Long Beach, Santa Clarita, and Glendale), councils of government in Los Angeles County, and unincorporated Los Angeles County; and

         (3) At least 5% of LACAHSA's allocation must utilized for technical assistance grants to cities with less than 50,000 residents;

      ii) A minimum of 30% of the total annual programmatic budget must be spent on renter protection and support programs as specified. Provides that, of the funding available for renter protections:

         (1) 30% must be allocated to LACAHSA;

         (2) 70% must be allocated on a per low-income renter household basis to the four largest cities in Los Angeles County (Los Angeles, Long Beach, Santa Clarita, and Glendale), councils of government in Los Angeles County, and unincorporated Los Angeles County; and

         (3) At least 5% of LACAHSA's allocation must utilized for technical assistance grants to cities with less than 50,000 residents.

      iii) Fifteen percent of the total annual programmatic budget must be allocated as "annual priorities," and these funds may be used for any

eligible activity outlined in this bill as part of the annual expenditure plan;

iv) At least 5% of the total annual programmatic budget, excluding any bond indebtedness, must be used for technical assistance, research, and policy development, as specified;

v) Not more than 10% of the total annual programmatic budget may be used for administrative and operations expenses associated with LACAHSA; and

vi) No earlier than five years after approval of any funding measures, the board, subject to consultation with the citizens' oversight committee, may change any of the minimum requirements above if both allocated funding has been unspent in a given category across multiple years and the board adopts a finding that the region's needs in a given category differ from those requirements. The board is required to approve the finding by a two-thirds vote.

7) Establishes the following labor standards:

a) Any construction or rehabilitation project receiving funding or financing from the agency, a measure proposed by the agency, or a joint powers authority of which the agency is a member, constitutes a public work for which prevailing wages must be paid;

b) A project with 40 units or greater is eligible to receive funding or financing from the agency, a measure proposed by the agency, or a joint powers authority of which the agency is a member, only if all construction and rehabilitation is subject to the City of Los Angeles Department of Public Works Project Labor Agreement, as specified; and

c) If a specific countywide project labor agreement is negotiated with mutual agreement between the Los Angeles/Orange Counties Building and Construction Trades Council and the Southern California Association of Nonprofit Housing and approved by the agency, then a project with 40 units or greater is eligible to receive funding or financing from the agency, a measure proposed by the agency pursuant to subdivision, or a joint powers authority of which the agency is a member, only if the construction and rehabilitation complies with the specific countywide project labor agreement rather than the Department of Public Works Project Labor Agreement.

8) Requires the board of supervisors of Los Angeles County to hold a special election, as specified, if LACAHSA or a qualified voter initiative proposes a measure consistent with this bill that will generate revenues.

Background

In 2019, the Legislature passed and the Governor signed AB 1487 (Chiu), which created a new regional option to address the lack of affordable housing in the San Francisco Bay Area. Specifically, that bill provided the Association of Bay Area Governments (ABAG) and the Metropolitan Transportation Commission (MTC) – acting as the BAHFA – with new tools to raise billions of dollars to fund the production, preservation, and protection of affordable housing. It enabled the region to support local jurisdictions by providing additional funding to address infrastructure and other needs associated with new residents. That bill was formulated in partnership with the Bay Area's local elected leaders and other regional leaders to collectively ensure that the entire Bay Area is on track to provide affordable housing efficiently and effectively to all residents. That bill set forth the governing structure and powers of the board, allowable financing activities, and allowable uses of the revenues generated. Its purpose was to raise, administer, and allocate funding and provide technical assistance at a regional level for tenant protection, affordable housing preservation, and new affordable housing production. It also established MTC as the board of the authority, and ABAG as the executive board, making ABAG the lead agency.

Comments

Recreating the wheel? Many of the tools provided by this bill, including special taxes and bonds, are tools that Los Angeles County and its cities already have. However, not all of these programs serve the entire county. SB 679 creates another regional body on top of the work that cities, the County, and other local agencies are already doing.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Estimated initial costs of over $1 million annually, at a minimum, to provide staffing and resources to establish and support LACAHSA until it places a revenue generating proposal on the ballot that is passed by the voters and the agency becomes self-sufficient. These costs would increase as the agency hires more staff to support its functions. Since the bill does not specify a revenue

source or mechanism for startup costs, initial administrative costs would be borne by the General Fund. LACAHSA is modeled after the Bay Area Housing Finance Authority (BAHFA), but the statute establishing BAHFA required the authority to be governed by the Metropolitan Transportation Commission (MTC) governing board and staffed by MTC's existing staff.

- Local costs related to elections procedures on behalf of the LACAHSA are potentially reimbursable by the state, subject to a determination by the Commission on State Mandates.

OPPOSITION: (Verified 8/24/22)

San Gabriel Valley Regional Housing Trust

ARGUMENTS IN SUPPORT: According to the author, "Housing for low-income people across L.A. County is severely overcrowded, racially segregated, and often not linked to high quality resources like transit, jobs, schools or parks. The COVID-19 pandemic has made even clearer what we already knew to be true: our Black, Latino, and low-income communities are being forced to make untenable choices in where and how they live. 79% of Extremely Low-Income households in L.A. County are paying more than half of their income on housing costs compared to just 3% of moderate-income households. SB 679 creates the L.A. County Affordable Housing Solutions Agency: a single, unified approach to addressing housing instability in our county. This bill offers a comprehensive way forward for creating housing affordability across the county, focusing on households that make an average salary or below, in particular extremely and deeply low-income people. These are the people who are most impacted by the housing crisis. With a large-scale countywide affordable housing production strategy, combined with proven renter support programs—like an emergency rent relief funding source and establishing a robust countywide right to counsel— SB 679 represents a transformative opportunity to change the trajectory of L.A. County's future."

ARGUMENTS IN OPPOSITION: According to the San Gabriel Valley Regional Housing Trust (SGVRHT), writing on the May 17, 2021 version of the bill, SB 679 should provide funds directly to the SGVRHT, the amount of funds administered to cities and subregions should be increased, specific affordability

requirements should be replaced with programmatic goals, and the bill should include transparency measures.

SUBJECT: Workforce development: training-related job placement: reporting

SOURCE: Author

DIGEST: This bill requires the Employment Development Department to work with the California Workforce Development Board to measure and report specified information regarding aggregate labor market outcomes of individuals receiving training services through the workforce system. This bill requires, among other things, that the board and department create a plan to use existing data to match relevant employee occupational data, employee place of employment data, and employee hours worked data, to persons who enroll in job training services, and to outline various objectives. This bill requires the board and department, upon appropriation by the Legislature, to implement the plan, and within 2 years of the

appropriation, to summarize and provide an initial report of their findings to specified committees of the-Legislature.

Assembly Amendments 1) restructure some of the requirements in the bill; 2) struck an unnecessary reporting requirement provision that is already captured in the bill; 3) delay the reporting due dates in the bill to 2024; 4) require the board and EDD to develop the plan for meeting these requirements, but specified that they must implement the plan only upon appropriation by the Legislature; and 5) require the board and EDD, two years after the appropriation, to summarize and report their findings to the Legislature.

ANALYSIS:

Existing law:

1) Establishes the California Workforce Development Board (CWDB) as the body responsible for assisting the Governor in the development, oversight, and continuous improvement of the workforce system. (Unemployment Insurance Code §14010).

2) Requires that the state's workforce system operate in a manner that is data driven and evidence based when setting priorities, investing resources, and adopting practices. (Unemployment Insurance Code §14000(b)(3)).

3) Requires that workforce system be outcome oriented and accountable, by measuring results for program participants, including outcomes related to program completion, employment, and earnings. (Unemployment Insurance Code §14000(b)(5))

4) Requires the California Workforce Development Board to develop a workforce metrics dashboard that measures the state's human capital investments in workforce development to understand the impact of these investments on the labor market. The workforce metrics dashboard is required to do the following:

    a) Provide a status report on credential or degree attainment, training completion and participant earnings from workforce education and training programs.
    b) Provide demographic breakdowns, including, to the extent possible, race, ethnicity, age, gender, veteran status, wage and credential or degree outcomes, and information on outcomes in different industry sectors.

c) Measure the performance of the following workforce programs: community college career technical education, the Employment Training Panel, Title I and Title II of the federal Workforce Investment Act of 1998 (Public Law 105-220), Title I and Title II of the federal Workforce Innovation and Opportunity Act of 2014 (Public Law 113-128), Trade Adjustment Assistance, and state apprenticeship programs.
d) Measure participant earnings in California, and to the extent feasible, in other states. (Unemployment Insurance Code §14013(i)).

5) Authorizes the Employment Development Department (EDD) to share wage and employment data, under specified conditions, for a variety of purposes, including the evaluation of workforce programs specified in Unemployment Insurance Code section 1095. (Unemployment Insurance Code §1095).

6) Requires Local Workforce Development Boards, subject to specified conditions, to spend an amount equal to at least 30 percent of their adult and dislocated worker federal WIOA formula fund allocations on workforce training programs. (Unemployment Insurance Code §14211).

7) Requires EDD to report, as specified, each year, to the Governor, the Legislature, and the CWDB, the extent to which Local Workforce Development Boards are meeting state mandated training expenditure requirements. (Unemployment Insurance Code §14211).

8) Requires Local Workforce Development Boards to submit a corrective action plan to EDD when they are not meeting training expenditure requirements. (Unemployment Insurance Code §14211).

This bill:

1) Requires the CWDB and the EDD to work collaboratively to measure and report on "training-related job placement" outcomes for individuals receiving job training services provided through the workforce system, including all job training services funded by Title I of the Workforce Innovation and Opportunity Act and through grants administered by CWDB, regardless of the source of the funding.

2) Defines "Training-related job placement" to mean employment in an occupation or occupations directly related to the occupation or occupations for which the job training curricula is designed. (*Current reporting outcomes for*

job training program participants do not measure whether employment is in an occupation(s) related to the training program of study.)

3) For purposes of measuring training-related job placement outcomes and gathering data to report on those outcomes, requires the CWDB and EDD to work collaboratively to create a plan to use the existing unemployment insurance tax data collection infrastructure used to secure quarterly wage data from employers, to match relevant employee occupational data, employee place of employment data, and employee hours worked data, to persons who enroll in job training services.

4) Requires that the plan include timelines, budget, funding constraints, and an outline of any additional recommended or necessary statutory changes to collect relevant data. The plan shall also outline the means for all of the following:

   a) Requiring local workforce development boards and grantees of board-administered grants to collect and report industry and occupation-specific data for all persons who enroll in job training services, as specified.

   b) Developing and implementing a method to measure the second- and fourth-quarter prior earnings of a person, who is enrolled in a job training service, for purposes of measuring the person's increase in earnings following their participation in and exit from a program.

   c) Developing and implementing a means to measure wage and employment outcomes for a person following that person's participation in a job training service during the second, fourth, eighth, and twelfth quarters following participation in and exit from a program for purposes of measuring the person's increase in earnings over time.

   d) Calculating, by region, industry, occupation, and job training service provider, the wages, wage gains, employment rates, and training-related job placement rates at the second, fourth, eighth, and twelfth quarters following a person's participation in and exit from a program.

   e) Calculating by region, industry, occupation, and job training service provider, the rate of persons who participated in a job training service and who became employed at a wage at or above a living wage for the region. This calculation shall take into account the cost of living in the regional

labor market where the person works or lives. The employment rate calculation shall be calculated at the second, fourth, eighth, and twelfth quarters following a person's participation in and exit from a program.

f) Calculating program completion, credential attainment, and measureable skills gains rates by job training service provider, industry, occupation, and region.

g) Determining, by region (including the cost of living in the region where the person works or lives), industry, occupation, and job training service provider, whether participation in a job training service, completion of a job training service, credential attainment, and measurable skills gains have an empirically verifiable impact on assisting persons in achieving employment, training-related job placement, wages, and wage gain that places those persons at or above a living wage for the region.

h) Developing and implementing a means of working with the local workforce development boards to notify, prior to their enrollment in a job training service, a person seeking to enroll in those services of the board's and Employment Development Department's findings on the efficacy of those services, particularly with respect to the likelihood of training related job placement, the likelihood of job placement at or above a regional living wage, and the likelihood of wage gains at the second, fourth, eighth, and twelfth quarters following a person's participation in and exit from a program. Those findings shall be disaggregated by region, job training services provider, industry, and occupation.

i) Requires the CWDB and EDD to submit this plan to the Legislature no later than January 1, 2024.

5) Requires the CWDB and EDD, upon appropriation by the Legislature, to implement the reporting requirements plan and two years after the appropriations, requires them to summarize and provide to the Legislature an initial report on the status of the implementation plan and the initial findings.

6) Requires the CWDB and EDD to annually update and incorporate their findings on training program provider performance outcomes in an existing legislative report pertaining to local workforce development board training expenditures.

7) Specifies that if any of the reporting requirements cannot be implemented absent further statutory change, the remaining requirements continue in effect.

8) Provides definitions for the following terms: "job training services," "local workforce development board," "participation in a job training service," "program" and "training-related job placement."

Background

Wage and employment outcome measures for workforce programs are typically based on data collected through the UI "base wage" file. The provisions of this bill would necessarily require that the data collected through the "base wage" file be augmented to include occupational code data not currently collected in California.

Many other states collect additional data elements in the base wage file including demographic information, occupational codes, hours worked, and location of employment. Currently Alaska and Louisiana mandate the collection of occupational data for workers through the base wage file. In recent years public and private sector actors, including the U.S. Department of Labor and the U.S. Chamber of Commerce, have embarked on initiatives to find ways to collect more information about the labor market using the base wage file and other means.

[NOTE: Please see Senate Labor, Public Employment and Retirement Committee analysis for background information on domestic workers and the workplace.]

Comments

Need for the bill? According to the author, "Existing means of measuring workforce program outcomes are limited in that they do not measure whether program participants who receive training services are a) getting jobs in the occupations for which they trained, b) are on a path of career advancement as measured by income growth over time, and c) are being placed in jobs that provide a living wage in the regional labor markets in which they live or work. Moreover, individuals seeking training opportunities provided by workforce programs have limited access to the foregoing types of data. This bill provides the means to develop the systematic measurement of training program performance outcomes with respect to the following: a) the likelihood of employment in the occupations for which program participants train, b) the likelihood of employment in living wage jobs in the relevant regional labor market, c) the prospects for wage gain over time associated with these programs."

Related/Prior Legislation

SB 753 (Roth, Chapter 550, Statutes of 2021) gave statutory authority to the EDD to share wage and employment data with the CWDB to evaluate the efficacy of the workforce grant programs it administers.

AB 1336 (Mullins, Chapter 211, Statutes of 2017) tasked the CWDB with determining statistically rigorous approaches to measure the labor market impacts of workforce development programs participating in the workforce metrics dashboard report required under AB 2148 (Mullins, Chapter 385, Statutes of 2014).

AB 2148 (Mullin, Chapter 385, Statutes of 2014) required the CWDB to assist the Governor in the development of a workforce metrics dashboard to measure the labor market outcomes of specified workforce development programs, including federally funded Workforce Innovation and Opportunity Act Title I and Title II programs, Community College career education programs, the Employment Training Panel's incumbent worker training programs, and apprenticeship programs over seen by the Division of Apprenticeship Programs.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) Costs of approximately $450,000 annually to CWDB for three new staff positions to undertake this collaboration: one Research Data Specialist to research and design new required metrics, work with EDD on data collection methodology and analyze resulting data; one analyst to design and implement business rules surrounding data capture; and one analyst to oversee implementation of new polices. (General Fund (GF))

2) One-time costs of $11.9 million to EDD to begin collecting occupational data from employers. EDD notes collecting such data would be a significant change in the quarterly tax reporting process for employers, necessitating a change to forms and information technology systems, significant staff training and new outreach efforts to employers and payroll/tax reporting companies. EDD further anticipates ongoing annual costs of $2.8 million for additional staff positions to collect, verify and process new occupational data and share data across programs and systems. (GF)

Included in these one-time and ongoing costs are vendor and staffing costs to update the CalJOBS case management system utilized by federally-funded Workforce Innovation and Opportunity Act (WIOA) programs, including measures to verify the new data required by this bill does not impact federal reporting requirements. EDD notes existing federal WIOA or UI program funds cannot be used for this bill's purposes.

3) By imposing new requirements on LWDBs, this bill may impose a state-mandated local program with costs of an unknown amount to the state. To the extent the Commission on State Mandates determines the provisions of this bill create a new program or impose a higher level of service on a local agency, the local agency could claim reimbursement of those costs. SUBJECT: Alcoholic beverages: music venue licenses

SOURCE: National Independent Venue Association

DIGEST: This bill authorizes the Department of Alcoholic Beverage Control (ABC) to issue a music venue license that would allow the licensee to sell beer, wine, and distilled spirits for consumption on the premises in a music entertainment facility, as defined

Assembly Amendments (1) delete language in the bill that would have authorized specified alcohol licensees to sell alcoholic beverages for consumption within an entertainment zone, as defined, and (2) add chaptering out language.

ANALYSIS:

Existing law:

1) Establishes the Department of ABC and grants it exclusive authority to administer the provisions of the ABC Act in accordance with laws enacted by the Legislature. This involves licensing individuals and businesses associated with the manufacture, importation, and sale of alcoholic beverages and the collection of license fees for this purpose.

2) Provides, under the ABC Act, for the issuance of various alcoholic beverage licenses, including the imposition of fees, conditions, and restrictions in connection with the issuance of those licenses.

3) Defines an "on-sale" license as authorizing the sale of all types of alcoholic beverages: namely, beer, wine, and distilled spirits, for consumption on the premises (such as at a restaurant or bar). An "off-sale" license authorizes the sale of all types of alcoholic beverages for consumption off the premises in original, sealed containers.

This bill:

1) Authorizes the Department of ABC to issue a music venue license which would allow the licensee to sell beer, wine, and distilled spirits for consumption upon the premises only, as specified.

2) Provides that the music venue licensee may sell, serve, and permit consumption of alcoholic beverages only during the time period from two hours before a live performance until one hour after the live performance.

3) Defines a "music entertainment facility" to mean a publicly or privately owned live performance venue, concert hall, auditorium, or an enclosed arena where music or entertainment events are presented for a price of admission. The facility does not have to be used exclusively for music or entertainment events.

4) Provides that a venue is not a "music entertainment facility" unless it satisfies all of the following criteria:

    a) The facility has defined performances and audience spaces.

    b) The facility includes mixing equipment, a public address system, and a lighting rig.

c) The facility employs one or more individuals to serve a number of specified roles, including a sound manager, promoter, stage manager and a box office manager.

d) There is a paid ticket or cover charge to attend performances and artists are paid or do not play for free or solely for tips, except for fundraisers or similar charitable events.

e) Performances at the facility are marketed through listings in printed or electronic publications, on websites, by mass email, or on social media.

5) Provides that only licensees with a music venue license are authorized to sell alcoholic beverages upon the premises of the music entertainment facility.

6) Prohibits a music venue license from being transferred or sold for a purchase price in excess of the original fee paid for that license.

7) Provides that the issuance of a music venue license should not be subject to provisions of the ABC Act, which limit the number of alcoholic licenses in a specific county.

8) Allows a licensee to permit a person under 21 years of age into the music entertainment facility. This authority does not authorize the on-sale licensee to sell, furnish, or give any alcoholic beverages to a person under 21 years of age, or to engage in any other activity not otherwise authorized by the provisions of this bill.

9) Authorizes a person providing alcoholic beverage service at a music entertainment facility pursuant to another type of on-sale license to exchange that license for a music venue license, as specified.

Comments

Purpose of this bill. According to the author's office, "SB 793 will provide much needed relief for California's independent venues to ensure they are able to recover economically after the COVID-19 pandemic by creating a new license category for music entertainment venues. The pandemic has had a devastating impact on California's live entertainment venues, which were among the first businesses required to close in March 2020 and will likely be among the last to reopen. California state law does not offer a type of liquor license tailored to the unique needs of the state's live entertainment venues. As a result, venue operators face challenges in accessing liquor licenses and complying with their operating requirements."

Music Venue license. Under current law there is no license that is specific to a music venue, therefore current owners of such facilities would need to obtain one of a number of other licenses that are issued by the Department of ABC.

The author argues that none of these licenses are uniquely tailored to the particular needs of such venues.

For example, right now an individual seeking to operate a venue similar to what this bill sets up could seek an on-sale general, eating place license, or Type 47 license. A Type 47 license is usually obtained by restaurant owners. It allows the licensee to sever wine, beer, and distilled spirits as well as allow a person under the age of 21 to enter the facility, however licensee is required to maintain a bona-fide public eating place. In addition, in places like San Francisco, where these licenses are scarce, the licensee would likely need to purchase such a license on the open market for hundreds of thousands of dollars.

If an individual does not want to operate a bona-fide public eating place, but still wants to have the privilege of serving wine, beer, and distilled spirits, the individual could seek to obtain a bar license. However under that license individuals under the age of 21 would not be able to enter the venue regardless of whether alcohol was being served or not. This bill seeks to solve those issues by creating the music venue license, or Type 90 License, as an on-sale general license that would allow the licensee to sell beer, wine, and distilled spirits for consumption on the premises of the music entertainment facility.

Rather than require the venue to have a minimum seating capacity, this bill instead requires the venue to have a defined performance and audience space, mixing equipment, a public address system, and a lighting rig. The venue must also employ individuals in the following roles: a sound engineer, a booker, a promoter, a stage manager, and a box manager. While this bill does authorize the licensee to permit a person under 21 years of age into the music entertainment facility, this bill does make it clear that this does not authorize the licensee to sell, furnish, or give any alcoholic beverage to a person under 21 years of age.

Much like with any other license, the Department of ABC could establish a number of conditions on every licensee that applies for a music venue license to ensure that public health and safety is protected.

Related/Prior Legislation

SB 314 (Wiener, Chapter 656, Statutes of 2021) authorized the Department of ABC to, for 365 days from the date the Covid-19 state of emergency is lifted,

allow licensees to continue to exercise license privileges in an expanded licensed area authorized pursuant to a Covid-19 temporary catering permit, as provided. In addition, the bill allowed a licensed manufacturer to share a common licensed area with multiple licensed retailers, as specified. Further, the bill extended from 30 to 90 days by which a licensee must apply to the Department of ABC for specified event, which permits specified licensees to provide their own alcohol free of charge at an invitation only event. Finally, the bill increased the number of times, from 24 to 52 in a calendar year, that the Department of ABC can issue a caterer's permit for use at any one location.

SB 58 (Wiener, 2019) would have authorized the Department of ABC to create a pilot program to issue an additional hours license to an on-sale licensee in a qualified city that would allow the selling, giving, or purchasing of alcoholic beverages at the licensed premises between the hours of 2 a.m. and 3 a.m., upon completion of specified requirements. (Died on the Assembly Floor)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, costs of an unknown, but potentially significant amount, to ABC to issue and exchange new music venue licenses, likely offset by corresponding fee revenue. ABC cannot estimate how many new license applications ABC may receive or how many of the approximately 20,000 existing Type 47 and Type 48 licensees may request to exchange their current license for this new license type, although only those meeting the definition of a music entertainment facility are eligible. Any new enforcement costs are likely minor and absorbable, since most music entertainment facilities could likely obtain or already have an existing license type.

SUPPORT: (Verified 8/17/22)

National Independent Venue Association (source)
Board of Supervisors of the City and County of San Francisco
California Downtown Association
Diageo
Independent Hospitality Coalition

OPPOSITION: (Verified 8/17/22)

Alcohol Justice
Alcohol Policy Panel of San Diego County
California Alcohol Policy Alliance
Rethinking Alcohol and Other Drugs

ARGUMENTS IN SUPPORT: According to the National Independent Venue Association, "when the dust settles after the pandemic, many of our local businesses will be one step away from bankruptcy, and easing these restrictions will be critical to their success after the pandemic and beyond. It is California's duty to ensure that our small restaurants and bars can remain open to the public for years to come by creating new and flexible ways to own and operate a business within the hospitality industry. We cannot continue weighing down our small businesses with unnecessary and outdated regulations that do not help our businesses or serve the public. SB 793 will act as a lifeline for many small businesses as we move out of the strict stay-at-home orders in the future."

ARGUMENTS IN OPPOSITION: According to the California Alcohol Policy Alliance, "SB 793 will effectively force the ABC to reduce important regulations. It will significantly increase the availability of alcohol to an expanding and unknown number of locations, events, and public spaces, thus extensively threatening public health and safety."

SUBJECT: Driver's licenses: veteran designation

SOURCE: Author

DIGEST: This bill repeals the $5 fee a veteran is required to pay in order to have the word "VETERAN" printed on their driver's license or identification card as per existing law.

Assembly Amendments add contingent enactment language with SB 1193 to avoid chaptering out issues.

ANALYSIS:

Existing law:

1) Requires the Department of Motor Vehicles (DMV) to issue a driver's license to an applicant when the DMV determines that the applicant is lawfully entitled to a license.

2) Allows an in-person applicant for a driver's license or identification card to request the word "VETERAN" be printed on the face of the driver's license or identification card, subject to certain requirements, including verification of veteran status and payment of a $5 fee, which the department is authorized to increase by regulation up to $15.

3) Prohibits a fee from being charged for the request if made by a person who has been determined to have a current income level that meets the eligibility requirements for specified assistance programs, or a person who can verify their status as a homeless person, in accordance with specified provisions.

This bill repeals the $5 fee a veteran is required to pay to have their veteran status designated on their driver's license or identification card.

Comments

1) *Purpose.* According to the author, "SB 837 will take away the current fee the DMV charges to designate a veteran's status on their driver's license or identification card. California needs to make veteran's resources more accessible. There are still many veterans in the state who are not aware that they may be eligible for benefits. By making this designation more accessible and affordable, we can ensure that more veterans will become connected with their benefits. California has historically fallen short on our promises to improve veterans' access to programs. For example, California was the second-to-last state in the nation to allow for a veterans' designation on their driver's license. Removing this nominal charge will only make it easier for veterans to get this designation on their licenses and increase their awareness and accessibility to veterans' benefits."

2) *Connecting veterans to benefits.* Allowing veterans to obtain a driver's license or identification card with a veteran designation enables veterans to swiftly and efficiently identify themselves and access services and benefits they are entitled to, including housing, health, employment, and educational aid. Removing the $5 fee may further incentivize veterans to include the designation on their

driver's license or identification cards and permit them to access the benefits they are entitled to more easily and more often.

Likewise, a key goal behind the legislation is to induce veterans to come into their local county veteran's service office (CVSO), which is required to verify their veteran status before they go into the DMV to obtain the designation. The CVSO plays a critical role in connecting the veterans to all federal, state, and local benefits for which they are eligible.

3) *Loss of DMV Revenue.* According to the DMV, from implementation on November 11, 2015, to January 1, 2022, the DMV has issued 243,754 veteran designations. This means that 30,000-35,000 veterans apply for the designation per year. On average, the DMV collects $150,000-175,000 from the $5 veteran fee which goes into the Motor Vehicle Account (MVA). The MVA pays for the DMV and the California Highway Patrol and is poised to go into a deficit. The DMV has expressed that because the designation is a one-time fee and there is no fee upon renewal, the annual volume and associated revenue will decrease over time with or without the removal of the $5 fee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, the fiscal impact is unknown.

SUBJECT: Civil actions: parties and postponements

SOURCE: Author

DIGEST: This bill extends, to January 1, 2026, the sunset on the statutory authorization for specified remote appearances in specified civil court proceedings, extends the use of remote appearances to adoption finalization hearings, prohibits the use of remote appearances for testimony, hearings, and proceedings in juvenile justice cases and specified commitment proceedings; imposes reporting requirements on the superior courts and the Judicial Council of California to provide the Legislature with certain information relating to remote proceedings in civil cases; and removes the COVID-19-emergency-related sunset on the law

providing that, when a trial or arbitration is continued, the discovery deadlines are extended for the same length of time as the continuance.

Assembly Amendments authorize remote appearances in adoption finalization hearings and prohibit remote appearances for testimony, hearings, and proceedings in juvenile justice cases and specified commitment proceedings.

ANALYSIS:

Existing law:

1) Authorizes parties to civil cases, including self-represented parties and nonparties subject to discovery requests, to appear remotely at a proceeding, and for the court to conduct the proceeding remotely, when the party has provided notice to the court and all other parties of the intent to appear remotely, subject to the limitations in 4)-7). (Code Civ. Proc. § 367.75(a).)
   a) A court is prohibited from requiring a party to appear remotely. (Code Civ. Proc. § 367.75(f), (g).)
   b) A court permitting remote appearances must ensure that technology in the courtroom enables all parties, whether appearing remotely or in person, to fully participate in the conference, hearing, or proceeding. (Code Civ. Proc. § 367.75(f).)
   c) Separate procedures are set forth for remote appearances in juvenile dependency proceedings, at 9).

2) Authorizes a court to require an in-person appearance by a party or witness in a civil proceeding if any of the following conditions is present:
   a) The court does not have adequate technology to conduct the proceeding remotely.
   b) Although the court has adequate technology, the quality of the technology or the audibility at the proceeding prevents the effective management or resolution of the proceeding.
   c) The court determines, on the facts of the specific proceeding, that an in-person appearance would materially assist in the determination of the proceeding or in the effective management or resolution of the particular case. With respect to expert witnesses, however, an expert witness must be permitted to appear remotely absent good cause to compel in-person testimony.
   d) The quality of the technology or audibility of the proceeding inhibits the court reporter's ability to accurately prepare a transcript of the proceeding.
   e) The quality of the technology or audibility of the proceeding prevents an attorney from being able to provide effective representation to their client.

f) The quality of the technology or audibility of the proceeding inhibits a court interpreter's ability to provide language access to a court user or authorized individual. (Code Civ. Proc. § 367.75(b).)

3) Authorizes a court, on its own motion or by motion of any party, to conduct a trial or evidentiary hearing, in whole or in part, through the use of remote technology, subject to the limitations of 4) above, unless an opposing party shows why a remote appearance or testimony should not be allowed.
   a) Except where law expressly provides otherwise, if the court conducts a trial in whole or in part through remote means, the official reporter or official reporter pro tempore must be physically present in the courtroom.

   b) Upon request, a court interpreter must be present in the courtroom. (Code Civ. Proc. § 367.75(d).)

4) Requires a court, prior to conducting remote proceedings, to have a process for a party, witness, official reporter or reporter pro tempore, court interpreter, or other court personnel to alert the judicial officer of technology or audibility issues that arise during the proceeding, and to require that a remote appearance by a party or witness have the necessary privacy and security appropriate for the proceeding. (Code Civ. Proc. § 367.75(e)(1)-(2).)

5) Requires a court to inform all parties, and particularly self-represented parties, about the potential technological or audibility issues that may arise when using remote technology, and which may require a delay or halt to the proceeding; and to make information available to self-represented parties regarding the options for appearing in person and through remote technological means. (Code Civ. Proc. § 367.75(e)(3).)

6) Provides that, subject to the technological and qualitative limitations in 4), the statute does prohibit attorneys for represented parties from stipulating to the use of remote appearances.

7) Authorizes a juvenile dependency proceeding to be conducted in whole or in part as follows:
   a) Any person authorized to be present at the proceeding may request to appear remotely.
   b) Any party to the proceeding may request that the court compel the physical presence of a witness or party.
   c) A witness may appear remotely only with the consent of all parties and if the witness has access to the appropriate technology.

   d) A court may not require a party to appear through the use of remote technology.
   e) The confidentiality requirements that apply to an in-person juvenile dependency proceeding also apply in a juvenile dependency proceeding conducted through the use of remote technology. (Code Civ. Proc. § 367.75(h).)

8) Requires the Judicial Council to adopt rules for the policies and procedures set forth above, including for deadlines by which a party must notify the court and other parties of its intent to appear remotely, and standards for a judicial officer to apply in determining whether a remote appearance is appropriate. (Code Civ. Proc. § 367.75(k).)

9) Provides that the remote technology provisions in 3)-10) will sunset on July 1, 2023. (Code Civ. Proc. § 367.75(l).)

10) Provides that, for the duration of the COVID-19 state of emergency declared by the Governor and 180 days thereafter, unless otherwise agreed to by the parties, a continuance or postponement of a trial or arbitration date also extends any deadlines that had not already passed as of March 19, 2020, applicable to discovery, including the exchange of expert witness information, mandatory settlement conferences, and summary judgment motions in the same matter. The deadlines are extended for the same length of time as the continuance or postponement of the trial date.

This bill:

1) Adds to the existing remote civil proceedings statute provisions authorizing a court to conduct an adoption finalization hearing in whole or in part through remote technology without finding that it is impossible or impracticable for either prospective adoptive parent to appear in person.
   a) The court may not require a party to appear remotely under 1).
   b) The confidentiality and privacy requirements that apply to an in-person adoption finalization hearing also apply to a remote or partially remote adoption finalization hearing.

2) Adds to the existing remote civil proceedings statute a requirement that each superior court shall report to Judicial Council on or before October 1, 2023, and annually thereafter, and the Judicial Council shall report to the Legislature on or before December 31, 2023, and annually thereafter, to assess the impact of technology issues or problems affecting remote civil proceedings and all purchases and leases of technology or equipment to facilitate civil remote

conferences, hearings, or proceedings, specifying all of the following for each annual reporting period:
   a) The number of civil proceedings conducted with the use of remote technology.
   b) Any superior court in which technology issues or problems occurred.
   c) The superior courts in which remote technology was used.
   d) The types of civil trial court conferences, hearings, or proceedings in which remote technology was used.
   e) The cost of purchasing, leasing, or upgrading remote technology.
   f) The type of technology and equipment purchased or leased.

3) Extends the sunset on the remote technology provisions, including the provisions in 1)-2), to January 1, 2026.

4) Prohibits testimony, conferences, hearings, and proceedings, in whole or in part, from being conducted using remote technology in any of the following cases until January 1, 2024:
   a) A juvenile court proceeding occurring pursuant to Welfare and Institutions Code Sections 601 or 602.
   b) An extension of juvenile commitment pursuant to Welfare and Institutions Code Section 1800.
   c) A proceeding involving a range of commitment types arising under the Penal Code and the Welfare Institutions Code.
   d) A proceeding related to an intellectually disabled and dangerous commitment authorized pursuant to Article 2 of Chapter 2 of Part 2 of Division 6 of the Welfare and Institutions Code.

5) Removes the COVID-19-emergency-related sunset on the provision establishing that discovery dates are extended for the same time period as the continuance of a trial or arbitration.

Comments

To prevent civil cases from grinding to a complete halt during the COVID-19 pandemic, many courts pivoted to remote proceedings, which allowed them to process cases while still complying with state and local health and safety orders. This pivot was first authorized by the Judicial Council's Emergency Rule 3, adopted on April 6, 2020.[1] Then, in 2021, the Legislature enacted SB 241

[1] Cal. Rules of Court, Appendix I, Emergency Rule 3; California Courts Newsroom, *Judicial Council Adopts New Rules to Lower Jail Population, Suspend Evictions and Foreclosures* (Apr. 6, 2020), *available at* **https://newsroom.courts.ca.gov/news/judicial-council-adopts-new-rules-lower-jail-population-suspend-evictions-and-foreclosures** (last visited Aug. 25, 2022).

(Umberg, Chapter 214, Statutes of 2021), which authorized remote proceedings in civil and juvenile dependency proceedings, subject to certain technological and procedural requirements.[2] The bill is scheduled to sunset on July 1, 2023.

This bill extends the sunset on the existing remote provisions, until January 1, 2026, in response to feedback from many litigants and the Judicial Council about the overall usefulness of remote appearances. As amended by the Assembly Appropriations Committee, however, the bill also narrows the scope of the remote appearance provisions by prohibiting remote testimony, conferences, hearings, and proceedings in juvenile justice cases and certain juvenile and civil commitment proceedings. The Judicial Council of California, the California Judges Association, the Children's Initiative, The California Sheriffs' Association, and 60 California judges now oppose the bill unless the newly added prohibitions are removed, noting, in the words of Judicial Council, that the amendments will have "a devastating impact on our state's most vulnerable populations."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, the Judiciary Council of California (JCC) estimates costs of an unknown, but significant amount in excess of $150,000 (General Fund (GF)) to issue a report to the Legislature that includes information about: (1) the number of civil proceedings conducted with the use of remote technology, (2) any superior court in which technology issues or problems occurred, (3) the superior courts in which remote technology was used, (4) the types of civil trial court conferences, hearings, or proceedings in which remote technology was used, (5) the cost of purchasing, leasing, or upgrading remote technology, and (6) the type of technology and equipment purchased or leased. JCC notes it is already required to report its use of remote access in civil proceedings pursuant to Code of Civil Procedure Section 367.8 (AB 177 (Committee on Budget, Chapter 257, Statutes of 2021) but the reporting requirement in this bill requires JCC to collect data its case management system does not capture. As a result, JCC estimates significant costs to change its existing information technology to capture data like the use of remote proceedings at specific civil proceedings. JCC also notes it is already required to issue reports to the Legislature detailing its equipment purchases and how courts anticipate using the purchased equipment.

SUPPORT: (Verified 8/25/22)

California Defense Council
California Judges Association
Consumer Attorneys of California
Encore Capital Group

OPPOSITION: (Verified 8/25/22)

California Court Reporters Association
California Federation of Interpreters
California Judges Association
California Labor Federation
California State Sheriffs' Association
Judicial Council of California
The Children's Initiative
60 California judges

ARGUMENTS IN SUPPORT: According to the Consumer Attorneys of California and California Defense Counsel, writing in support:

> Without an amendment to remove the sunset [on the remote appearances statute], next July the courts will be shifted back to March of 2020, before the courts were able to pivot to remote hearings and hybrid trials. The benefits have been widespread. Housing advocates and legal aid can help more individuals in need of representation through remote access, individuals seeking justice for domestic violence and child abuse cases may not have to face their abuser in person, and others can fight for justice even while courtrooms are fully or partially closed.
>
> Without remote court access working parents and children will be forced to continue taking time off of work and school to spend a full day in court instead of a fraction of their time attending remotely. Elderly individuals will not be able to attend their court proceedings as in person requirements would force them to choose between safety or justice. Civil plaintiffs struggle without access to the recovery they need to pay for medical treatment, or otherwise recover their lost wages or damages, and defendants are unable to resolve claims against them.

ARGUMENTS IN OPPOSITION: According to 60 California judges, writing in opposition, "The use of remote technology in juvenile justice court, necessitated initially by the public health crisis caused by the COVI-19 pandemic, has

ultimately improved how the juvenile court serves youth and their families and their communities, and promoted better outcomes. As judicial officers serving in, having served in, and/or familiar with the important work of juvenile justice courts throughout the state, we strongly encourage you to continue the use of remote technology in juvenile justice court proceedings. Currently, youth and their parents as well as other participants may choose to appear remotely when appropriate. We are gravely concerned that SB 848, as amended, would severely limit access to justice for youth, their families, justice partners, and victims of crime in these important cases by prohibiting the utilization of remote technology in all juvenile justice conferences, hearings, and proceedings. We are also concerned that SB 848 creates a disparity of access to justice for juvenile justice cases whereas remote technology is permitted in all civil proceedings, including dependency cases, and criminal cases."

SUBJECT: Sea level rise: planning and adaptation

SOURCE: Author

DIGEST: This bill requires a local government in the coastal zone or within the jurisdiction of San Francisco Bay Conservation and Development Commission to implement sea level rise planning and adaptation, as specified, and prioritize funding for local government projects that meet the state's goal for approval of the required plans, among other things.

Assembly Amendments replace the bill language entirely while retaining the focus on addressing sea level rise.

ANALYSIS:

Existing law:

1) Establishes the California Coastal Act of 1976 (Coastal Act)(Public Resources Code (PRC) §§30000 *et seq*.) which:

   a) Establishes the California Coastal Commission (Coastal Commission) in the California Natural Resources Agency.

b) Requires each local government in the coastal zone to prepare a local coastal program (LCP) for that portion of the coastal zone within its jurisdiction, as provided. Requires the precise content of each LCP to be determined by the local government in full consultation with the Coastal Commission and full public participation. (Public Resources Code PRC §30500)

c) Provides for the planning and regulation of development within the coastal zone.

   i) A person planning to perform or undertake any development in the coastal zone is required to obtain a coastal development permit from the Coastal Commission or local government enforcing a LCP certified by the Coastal Commission.

   ii) The coastal zone means the coastal land and waters of California, and includes the lands that extend inland generally 1,000 yards from the mean high tide line, as specified, with various exceptions including the San Francisco Bay.

   iii) Development means, among other things, the placement or erection of any solid material or structure on land or in water.

2) Establishes the San Francisco Bay Conservation and Development Commission (BCDC): (Government Code §§66600 *et seq*.)

   a) BCDC, among other things, is required to address emerging issues and to implement comprehensive plans for the preservation and protection of San Francisco Bay and the Suisun Marsh. BCDC has adopted the San Francisco Bay Plan which is a comprehensive plan that addresses the development of the bay and shoreline.

   b) Since 2008, BCDC has been the state agency responsible for leading the San Francisco Bay area's preparedness for, and resilience to, rising sea levels, tides and storm surge due to climate change.

This bill requires a local government in the coastal zone or within the jurisdiction of BCDC to implement sea level rise planning and adaptation, as specified, and prioritizes funding for local government projects that meet the state's goal for approval of the required plans, among other things. Specifically, this bill:

1) Requires a local government lying, in whole or in part, within the coastal zone or within the jurisdiction of BCDC to implement sea level rise planning and adaptation through submission either of the following, as applicable:

a) A local coastal program to the Coastal Commission, subject to approval by the Coastal Commission.

b) A subregional San Francisco Bay shoreline resiliency plan to BCDC, subject to approval by BCDC.

2) Requires the sea level rise planning and adaptation to include, at a minimum, all of the following:

a) Use of the best available science.

b) A vulnerability assessment that includes efforts to ensure equity for at-risk communities.

c) A sea level rise adaptation plan.

d) Identification of lead planning and implementation agencies.

e) A timeline for updates, as needed, based on conditions and projections and as determined by the local government in agreement with the Coastal Commission or BCDC for the aforementioned sea level rise planning and adaptation elements.

3) Requires the mandated timeline for sea level rise planning and adaptation updates include, to the maximum extent practicable, applicable implementation approaches that build upon both of the following: the sea level rise adaptation plan, and an economic analyses of critical public infrastructure.

4) Establishes the state's goal to implement these requirements by January 1, 2028.

5) Requires all local governments to comply with these requirements by January 1, 2033.

6) Authorizes, upon an appropriation by the Legislature, the Coastal Commission and BCDC to award funding to a local government that has received approval for sea level rise planning and adaptation to implement projects contained in that local government's sea level rise adaptation plan.

7) Requires the Coastal Commission and BCDC to prioritize funding projects of local governments that received approval on or before January 1, 2028.

Background

The state's Fourth Climate Change Assessment, published in 2018/2019, found that climate change impacts in the coastal zone already are "unprecedented," and will include the direct impacts of sea level rise, changes in ocean conditions, increased flooding amounts and frequency (including from rising groundwater tables, but also high "king" tides), wetland loss, and other hazards. More recent work has further honed the risks from impacts in different parts of the state, but not changed the overall assessment. Sea level rise poses an immediate and real threat to coastal ecosystems, livelihoods and economies, public access to the coast, recreation, private property, public infrastructure, water supplies, and the well-being and safety of coastal communities, including vulnerable populations.

The sea level along the state's coastline is currently predicted to most likely rise by about 8 inches by 2050, and over 6 feet by 2150 relative to levels in 2020. According to the National Oceanic and Atmospheric Administration, 12.3 million people were employed in coastal California in 2015, earning about $883.5 billion, which corresponds to over $2 trillion in annual gross domestic product. Just over two-thirds of the state's residents live in coastal counties. Sea level rise puts this at risk.

Recent projections of the impacts of sea level rise on the state include:

- In a February 2022 news story, a US Geological Survey scientist stated that daily overland flooding in California from 1 foot of sea level rise could put about $15 billion of properties at risk and impact 38,000 people. In addition, the daily emergence of groundwater pushed up by sea level rise could impact an additional 350,000 people and $100 billion of properties.

- An increase of four feet or more in Bay levels would cause daily flooding for nearly 28,000 socially vulnerable residents in the San Francisco Bay Area.

- Within the Delta region, 3.5 feet of sea level rise and changing storm patterns puts more than $10 billion of agricultural, residential and commercial property, and an additional $11.6 billion of infrastructure at risk of exposure or damage.

- Up to two-thirds of Southern California beaches may become completely eroded by 2100. Sea level rise puts safe and affordable public coastal access and recreation at risk.

- According to the US Geological Survey, the cost of building levees, sea walls and other measures to withstand 6.5 feet of sea level rise and a 100-year storm in San Francisco Bay by itself could cost as much as $450 billion.

- Sea level rise could result in the loss of most of the state's salt marshes with a corresponding decrease in the populations of species that depend upon those for habitat. Coastal bluffs will also continue to erode.

Comments

The importance of planning. As noted in the background, the potential impacts of sea level rise on the state's coastline are anticipated to be extensive with significant damage, loss, and expense anticipated to public safety, infrastructure, and the environment, among other things. Setting goals and deadlines for sea level rise planning to be completed will help to prioritize adaptation efforts and promote resiliency. Local governments are provided an incentive to meet the state's goal of January 1, 2028 as they will be prioritized for certain funding opportunities offered by the Coastal Commission and BCDC.

Materials are hosted at the Adaptation Clearinghouse that may be helpful to planning. The Adaptation Clearinghouse hosts Cal-Adapt which includes data related to climate adaptation and resilience generated by the research and scientific community that can be used to explore local level impacts. Cal-Adapt's visualization tools help to illustrate how climate impacts – such as rising sea levels, or increasing temperatures – will impact different communities in the state in the future. Links to the "Our Coast, Our Future" project are also hosted at the Adaptation Clearinghouse. This project uses the US Geological Survey's Coastal Storm Modeling System (CoSMoS) to provide detailed predictions of coastal flooding related to sea level rise and storms. Interactive maps showing local impacts are available.

The sea will continue to rise. According to the National Oceanic and Atmospheric Administration in their 2022 report titled *Global and Regional Sea Level Rise Scenarios for the United States*:

> Finally, regardless of future emissions pathways, [Global Mean Sea Level] rise will continue past 2150. […] Even for a relatively low warming level of 1.5°C, the committed sea level over the next 2000 years still ranges between about 2 m and 3 m. For 2°C, the upper range increases to 6 m.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, enactment of this bill would result in ongoing, annual cost pressure between $4.5 million and $5.5 million (General Fund or special fund) for the Coastal Commission to hire between 20 and 25 new staff to implement the requirements of this bill; ongoing, annual cost pressure of approximately $3.5 million (General Fund or special fund) for BCDC to hire 18 new staff to implement the requirements of the bill; and, minor and absorbable costs to the Ocean Protection Council. By imposing additional requirements on local governments, this bill imposes a state-mandated local program, resulting in unknown but significant cost pressure for the state to reimburse local governments.

Implementation of this bill is contingent upon appropriation of funds by the Legislature.

SUPPORT: (Verified 8/22/22)

California Coastal Protection Network
Greenbelt Alliance
San Francisco Bay Conservation and Development Commission
Save the Bay
Solano County Board of Supervisors
Surfrider Foundation
Surfrider Foundation – San Mateo County Chapter

OPPOSITION: (Verified 8/22/22)

SF Bay Shoreline Contamination Cleanup Coalition

ARGUMENTS IN SUPPORT: According to the author, " SB 867 will equip local governments with the best available science to plan for and mitigate the effects of sea level rise within the coastal zone and ensure local coastal programs are updated to reflect these developments.

"Currently, local coastal programs are not required to address sea level rise, an often-overlooked aspect of climate change that has the potential to be one of the most damaging threats. A 2019 team of U.S. Geological Survey scientists found that even a small increase in sea level rise could be an overwhelming force when a storm hits.

"SB 867 will prepare communities for the future and strengthen existing coastal programs by providing local leaders with planning guidelines established by the

State Sea Level Rise Leadership team, consisting of 17 California state agencies who work collectively to achieve coastal resilience for the entire coast of California."

ARGUMENTS IN OPPOSITION: Writing in opposition, the SF Bay Shoreline Contamination Cleanup Coalition expresses concern that sea level rise due to climate change will contribute to the spread of toxic contamination around the San Francisco Bay shoreline. They ask for the author to "slow down this bill so environmental justice organizations and coalitions like ours, and the communities we represent, have sufficient time to respond with a full analysis of how this bill should be worded so it can properly protect our most vulnerable communities endangered by sea level rise […]" and ask for specific requirements in the bill for "scientific expert participation, stating which agencies will select these experts, what the selection criteria is, and that these agencies must include impacted frontline community residents and organizations on the selection committee." In addition they call for amendments to require BCDC to comply with its environmental justice policies..

SUBJECT: Electricity: transmission facility planning

SOURCE: Author

DIGEST: This bill requires 15-year projections of energy resource portfolios and energy demand to inform transmission planning to achieve the state's clean energy goals, and requires the California Independent System Operator (CAISO) to consider approval for specified transmission projects as part of the 2022-23 transmission planning process.

Assembly Amendments make clarifying and technical changes, including replacing references to "gas-fired" resources with "nonpreferred resources", and replacing "locally constrained areas" with "local capacity areas."

ANALYSIS:

Existing law:

1) Establishes that U.S. Federal Energy Regulatory Commission (FERC) has exclusive jurisdiction over the transmission of electric energy in interstate commerce. Provides the process and procedures for establishing transmission of electricity in interstate commerce by public utilities (including the rates, terms & conditions of interstate electric transmission by public utilities). (Federal Power Act §§§201, 205, 206 (16 USC 824, 824d, 824e))

2) Establishes the CAISO as a nonprofit public benefit corporation, and requires the CAISO to ensure the efficient use and reliable operation of the electrical transmission grid consistent with the achievement of planning and operating reserve criteria. (Public Utilities Code §345.5)

3) Establishes the California Public Utilities Commission (CPUC) with jurisdiction over all public utilities, including electrical and gas corporations. Grants the CPUC certain general powers over all public utilities, subject to control by the Legislature. (Article XII of the California Constitution)

4) Requires the California Energy Commission (CEC) to conduct assessments and forecasts of all aspects of energy industry supply, production, transportation, delivery and distribution, demand, and prices and to use these assessments and forecasts to develop and evaluate energy policies and programs that conserve resources, protect the environment, ensure energy reliability, enhance the state's economy, and protect public health and safety. (Public Resources Code 25301(a))

5) Requires the CPUC, as part of the Public Utilities Act, to identify a diverse and balanced portfolio of resources needed to ensure a reliable electricity supply that provides optimal integration of renewable energy in a cost-effective manner. (Public Utilities Code §§454.51 and 454.55)

This bill:

1) Requires, by no later than March 31, 2024, the CPUC, in consultation with the CEC, to provide transmission-focused guidance to the CAISO about resource portfolios of expected future renewable energy resources and zero-carbon

resources, to allow the CAISO to identify and approve transmission facilities needed to interconnect resources and reliably serve the needs of load centers. Specifically, requires, among other requirements, resource portfolios and electricity demand by region for at least 15 years into the future.

2) Requires the CPUC, on or before January 15, 2023, to request the CAISO to:

   a) Identify the highest priority transmission facilities that are needed to allow for increased transmission capacity into local capacity areas to deliver renewable energy resources or zero-carbon resources that are expected to be developed by 2035 into those areas; and
   b) Consider whether to approve the identified transmission projects as part of the CAISO's 2022–23 transmission planning process.

3) Expresses the policy of the state that the planning for new transmission facilities consider the goals of minimizing the risk of wildfire and increasing system-wide reliability and cost efficiency, among other goals.

Background

Transmission planning process. Each year, the CAISO conducts its transmission planning process to identify potential system limitations as well as opportunities for system reinforcements that improve reliability and efficiency. The transmission plan fulfills the CAISO's core responsibility to identify and plan the development of solutions, transmission or otherwise, to meet the future needs of the electricity grid. The CAISO Transmission Plan provides a comprehensive evaluation of the CAISO transmission grid to address grid reliability requirements, identify upgrades needed to successfully meet California's policy goals, and explore projects that can bring economic benefits to consumers. The plan relies heavily on key inputs from state agencies in translating legislative policy into actionable policy driven inputs. Transmission owners recover the costs of CAISO-approved projects through the Transmission Access Charge (TAC). The transmission owner submits an application to FERC to recover project costs. FERC approves just and reasonable costs and rate of return. CAISO charges transmission customers based on FERC-approved costs. These costs are collected from electric utility customers as part of the transmission and distribution portion of the electric utility bill.

Forecasting by CEC and supply-side inputs by CPUC. The CEC conducts energy demand forecast used to inform several planning processes, including the CAISO's transmission planning process. The demand forecast is often a ten-year outlook for

electricity and natural gas sales, consumption, and peak and hourly electricity demand. The most recent demand forecast, published in January, is a 15-year forecast. Additionally, the CPUC provides energy resource supply-side inputs, including an annual resource portfolio, to inform the transmission planning by the CAISO.

SB 100 (De León, Chapter 312, Statutes of 2018). SB 100 established the 100 Percent Clean Energy Act of 2017 which increases the Renewables Portfolio Standard (RPS) requirement from 50 percent by 2030 to 60 percent, and created the policy of planning to meet all of the state's retail electricity supply with a mix of RPS-eligible and zero-carbon resources by December 31, 2045, for a total of 100 percent clean energy. SB 100 also required California Air Resources Board (CARB), CEC, and CPUC to issue a joint report by January 1, 2021, and at least every four years, that describes technologies, forecasts, affordability, and system and local reliability. The report is required to include an evaluation of costs and benefits to customer rate impacts, as well as, barriers to achieving the SB 100 policy. The first Joint Agency report was issued January 2021 and found that the state may need upwards of three times the energy resource capacity to meet the SB 100 goals.

CAISO 20-year Transmission Outlook. The CAISO created a 20-Year Transmission Outlook for the electric grid, in collaboration with the CPUC and the CEC, with the goal of exploring the longer-term grid requirements and options for meeting the State's SB 100 clean energy objectives reliably and cost-effectively. The 20-year Outlook was released in September 2021 and the CAISO intends for the expanded planning horizon to provide valuable input for resource planning processes conducted by the CPUC and CEC, and to provide a longer-term context and framing of pertinent issues in the CAISO's ongoing annual 10-Year Transmission Plan.

Replacing 10-year outlook with 15-year outlook. The author and supporters note the desire to better plan and prepare for the transmission needs to achieve the SB 100 goals, given the long lead times needed to build new transmission. As noted by the CAISO 20-year Transmission Outlook, the need for new transmission is likely to be great. A 15-year outlook may prove to be more certain than a 20-year outlook, though less certain than a 10-year horizon. Nonetheless, the author is correct to note the need to better plan for long lead-time new transmission. The CPUC has noted in recent FERC filings, it would support a longer planning horizon. However, such a change may not happen quickly and would entail transforming many, yet to be fully identified, data collection and inputs to

accommodate this transformation. This bill provided for the transformation to happen as soon as possible, but no later than March 31, 2024.

Too soon? This bill requires the CPUC, CEC, and CAISO to take actions by January 15, 2023, roughly two weeks from the date this bill would be enacted. The author notes this date may seem ambitious, but since bill adoption would happen in September, the author believes this may be sufficient time before the January 15 dates.

Related/Prior Legislation

SB 1174 (Hertzberg, 2022) requires specified reporting related to the timeliness of interconnection projects and approval of electric transmission projects. The bill is pending before the full Assembly.

SB 100 (De León, Chapter 312, Statutes of 2018) established the 100 Percent Clean Energy Act of 2017 which increases the RPS requirement from 50 percent by 2030 to 60 percent, and created the policy of planning to meet all of the state's retail electricity supply with a mix of RPS-eligible and zero-carbon resources by December 31, 2045, for a total of 100 percent clean energy.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, the CPUC estimates it will need approximately $500,000 (special fund) annually ongoing for two regulatory analysts ($203,000 per year), one supervisory position ($260,000 per year) and various software licensing and related costs ($31,800). The CPUC also anticipates a cost, in the first four years following passage of this bill, of $400,000 per year in contracting costs to develop modeling enhancements to identify optimal energy resource portfolios and the amount and location of zero-carbon resources needed in specific areas with constrained transmission, and to develop reports, presentations and white papers.

Conversely, the CEC anticipates no new costs to implement this bill.

ARGUMENTS IN SUPPORT: According to the author,

> We cannot meet the goals of SB 100 -- reaching 100% renewable or zero carbon electricity by 2045 -- without building the transmission necessary to deliver that clean power to our cities. SB 887 will accelerate planning and approval of new transmission to help us get to 100% clean energy. The Joint Agencies SB 100 report estimated that we will need to triple the state's electric generation capacity by 2045. California's transmission grid is not prepared to deliver this vast increase in clean energy… And this problem is only going to get worse as the electrification of transportation and buildings increases demand

for electricity – unless we begin to build the transmission capacity that we will need to handle the clean energy grid of the future.

California is on a path to build tens of thousands of megawatts of new clean electricity generation, but without comparable efforts to expand our transmission capacity, this effort will fail to meet our climate goals. SB 887 will cause our state agencies to focus on the urgent need for transmission to ensure it is tackled in a timely and cost-effective manner and does not become a barrier to the state's clean energy transition."

SUBJECT: Cybersecurity preparedness: food and agriculture sector and water and wastewater systems sector

SOURCE: Author

DIGEST: This bill requires the California Office of Emergency Services (OES) to direct the California Cybersecurity Integration Center (Cal-CSIC) to prepare and submit a strategic, multiyear outreach plan to assist the food and agriculture sector and the water and wastewater sector in their efforts to improve cybersecurity, as specified.

Assembly Amendments delete the requirement that OES develop and adopt optional reporting guidelines applicable to companies and cooperatives in the food and agriculture industry and entities in the water and wastewater systems industry, as specified, and delete the cyberattack or cyber threat reporting requirement, as specified.

ANALYSIS:

Existing law:

1) Establishes OES, pursuant to the California Emergency Services Act (ESA), which is responsible for the state's emergency and disaster response services, as specified.

2) Requires OES to establish Cal-CSIC with the primary mission of reducing the likelihood and severity of cyber incidents that could damage California's economy, its critical infrastructure, or public and private sector computer networks in the state.

3) Requires Cal-CSIC to provide warnings of cyberattacks to government agencies and nongovernmental partners, coordinate information sharing among these entities, assess risks to critical infrastructure information networks, enable cross-sector coordination and sharing of best practices and security measures, and support certain cybersecurity assessments, audits, and accountability programs.

4) Requires Cal-CSIC to develop a statewide cybersecurity strategy to improve how cyber threats are identified, understood, and shared in order to reduce threats to California's governments, businesses, and consumers, and to strengthen cyber emergency preparedness and response and expand cybersecurity awareness and public education.

5) Specifies that any report required or requested by law to be submitted by a state or local agency to the Members of either house of the Legislature be submitted as a printed copy to the Secretary of the Senate, as an electronic copy to the Chief Clerk of the Assembly, and as an electronic or printed copy to the Legislative Counsel.

This bill:

1) Requires OES to direct Cal-CSIC to prepare a strategic, multiyear outreach plan that focuses on ways to assist the food and agriculture sector and the water and wastewater sector in their efforts to improve cybersecurity and that includes, but is not limited to, all of the following:

    a) A description of the need for greater cybersecurity outreach and assistance to the food and agriculture sector and the water and wastewater sector.
    b) The goal of the outreach plan.
    c) Methods for coordinating with other state and federal agencies, nonprofit organizations, and associations that provide cybersecurity services or resources for the food and agricultural sector and the water and wastewater sector.
    d) An estimate of the funding needed to execute the outreach plan.
    e) Potential funding sources for the funding needed by Cal-CSIC for the plan.
    f) A plan to evaluate the success of the outreach plan that includes quantifiable measures of success.

2) Requires OES to submit the outreach plan to the Legislature no later than January 1, 2024, as specified.

3) Requires OES to direct Cal-CSIC to evaluate options for providing entities in the food and agriculture sector or the water and wastewater sector with grants or alternative forms of funding to improve cybersecurity preparedness, as specified. Upon completion of the evaluation, OES shall submit a report to the Legislature no later than January 1, 2024, that includes, but is not limited to, all of the following:

    a) A summary of the evaluation performed by Cal-CSIC.
    b) The specific grants and forms of funding for improved cybersecurity preparedness, including, but not limited to, current overall funding level and potential funding sources.
    c) Potential voluntary actions that do not require funding and assist the food and agriculture sector and the water and wastewater sector in their efforts to improve cybersecurity preparedness.

4) Makes related legislative findings and declarations.

Background

Purpose of the bill. According to the author's office, "cybersecurity is an issue that continues to rise in prevalence. Without making a conscious effort to strengthen cyber defenses, entities in critical sectors put themselves and those they serve at risk of a cyberattack. This threat becomes greater when looking at two of California's most crucial sectors – its food and agriculture sector, and its water and wastewater sector. A verified cyberattack in one of these sectors has potential to be devastating. In addition to putting personal information at risk, it risks the safety and integrity of food and water that goes to millions of Californians every day. Cyberattacks also delay production, increasing food prices and hurting the consumer's wallet, as well."

California Cybersecurity Integration Center. Initially established by Executive Order B-34-15 in 2015, Cal-CSIC was codified in statute by AB 2813 (Irwin, Chapter 557, Statutes of 2018). Cal-CSIC coordinates the state's cybersecurity activities and information sharing with federal and other state government entities. Four partners comprise the core of Cal-CSIC: OES, the California Department of Technology (CDT), the California Highway Patrol (CHP), and the California Military Department (CMD). OES serves as the administrative entity for Cal-CSIC, employing the Cal-CSIC Commander and Deputy Commander; CDT assesses cybersecurity policy and protocols in the event of a cyberattack; CHP looks into cybercrimes affecting the state's assets; and CMD assess potential cyber threats and vulnerabilities across state entities.

Critical Infrastructure Sectors. The Federal Cybersecurity and Infrastructure Agency (CISA) is one of the federal leads on national cybersecurity issues, and coordinates resilience and security efforts across critical infrastructure sectors. CISA identifies 16 critical infrastructure sectors with vial assets, networks, and systems that, if debilitated or destroyed, would have serious effects on national security, the economy, and/or public health and safety. Among the 16 identified critical infrastructure sectors are water and wastewater systems, and food and agriculture.

Recent federal data show that cyberattacks are increasing in California. In 2020, an estimated 47,000 cyberattacks with payouts totaling $1.2 billion were reported in the state across all entities and sectors. Specifically, the author's office points to a January 2021 cyberattack by an unknown hacker in the San Francisco Bay Area. The hacker used the username and password for a former employee's account, which allowed for remote access to the network. The hacker deleted programs that

the water plant used to treat drinking water. The hack wasn't discovered until the following day. Just a few weeks later, a cyberattack in Florida resulted in increasing the level of lye in public drinking water to unsafe levels for nearly 15,000 people.

This bill requires Cal-CSIC to prepare a strategic, multiyear outreach plan that focuses on ways to assist the food and agriculture sector and the water and wastewater sector in their efforts to improve cybersecurity. This bill requires OES to submit the outreach plan to the Legislature by January 1, 2024. Further, this bill requires Cal-CSIC to evaluate options for providing entities in the food and agriculture sector or the water and wastewater sector with grants or alternative forms of funding to improve cybersecurity preparedness.

Related/Prior Legislation

AB 2135 (Irwin, 2022) requires state agencies, as defined, to adopt and implement information security and privacy policies, standards, and procedures based upon specified standards. (Pending on the Senate Floor)

AB 2355 (Salas, 2022) requires local educational agencies to report any cyberattack to Cal-CSIC, as specified. (Pending on the Senate Floor)

AB 2813 (Irwin, Chapter 768, Statutes of 2018) established in statute Cal-CSIC within OES, the primary mission of which is the same as the Cal-CSIC as created by the previous executive order.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, one-time costs of an unknown amount to OES to develop cybersecurity outreach plans for the specified industries. (General Fund)

California Water Association
California Water Service

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: In support of this bill, the California Water Association writes that, "[p]ortions of California's water and wastewater sector suffer from a significant lack of cybersecurity preparedness. This lack of defense opens these life-sustaining systems to cyberattacks, including phishing attempts and ransomware. These threats ultimately threaten the health and safety of Californians who rely on these sectors. Just last year, a hacker deleted several of the programs needed to operate a wastewater treatment plant here in California. While the threat was addressed before damage was done, lack of preparedness could result in a much different outcome."

SUBJECT: Flood protection: City of West Sacramento flood risk reduction project

SOURCE: West Sacramento Area Flood Control Agency

DIGEST: This bill authorizes state participation in the City of West Sacramento Flood Risk Reduction Project, sets boundaries for Reclamation District 900, and extend the deadline for the City of West Sacramento to achieve the urban level of flood protection from 2025 to 2030.

Assembly Amendments extend the deadline for the City of West Sacramento to achieve the urban level of flood protection from 2025 to 2030.

ANALYSIS:

Existing law:

1) Authorizes, under the State Water Resources Law of 1945 [Water Code (WC) §§12570 et seq], the state to participate in funding local flood control projects that are authorized by the Legislature and that meet all of the following criteria [WC §12582.7]:

    a) The project qualifies for federal financial assistance and is authorized by Congress. Projects may be authorized pursuant to an Army Corps of Engineers' Chief Engineer's report, but cannot receive state funding until authorized by Congress.
    b) The total annual benefit exceeds the annual cost of providing protection from flood damages.
    c) The project provides protection from flood damages in the most efficient manner practicable, and with due regard for environmental and recreational considerations, and local economic conditions.
    d) The project's nonfederal sponsor is in compliance with federal laws requiring the preparation, adoption, and implementation of a floodplain management plan.
    e) All local communities benefiting from the project have an ordinance consistent with the National Flood Insurance Program's model floodplain management ordinance.
    f) The project avoids, minimizes, or mitigates impacts to environmental and recreational values.
    g) Project planning documents include an evaluation of opportunities to include multipurpose objectives.
    h) The nonfederal sponsor accommodates other partners who wish to provide the costs of including multipurpose objectives that are compatible with the project's purpose and schedule.

2) Requires, before receiving payment or reimbursement from the state, the local agency to enter into an agreement with the Department Of Water Resources under which the local agency agrees to indemnify, hold, and save the state, and its officers, agents, and employees, harmless from any and all liabilities from damages associated with the maintenance and operation of the project. [WC §12643]

3) Provides, pursuant to the Water Infrastructure Improvements for the Nation (WIIN) Act as Public Law 114–322, a comprehensive appropriations and authorization bill, signed by President Obama on December 16, 2016. Section 1401(2) of the WIIN Act authorized:

A. **State**	**B.** **Name**	**C.** **Date of Report of Chief of Engi-neers**	**D.** **Estimated Costs**
8. CA	West Sacramento	Apr. 26, 2016	Federal: $788,861,000 Non-Federal: $424,772,000 Total: $1,213,633,000

4) Requires, with certain exceptions, urban and urbanizing areas protected by any levee that is part of the facilities of the State Plan of Flood Control to achieve the urban level of flood protection by 2025.

5) Creates, pursuant to Chapter 100 of the Statutes of 1911, Reclamation District 900 (RD 900) and establishes its boundaries. RD 900 is in Yolo County, largely within what is now the City of West Sacramento.

This bill:

1) Authorizes the state to participate in funding the West Sacramento Project for flood risk reduction along the Yolo Bypass, Sacramento Bypass, and Sacramento River adopted and authorized by the United States Congress in the Water Infrastructure Improvements for the Nation Act (Public Law 114-322).

2) Extends the deadline for the City of West Sacramento to achieve the urban level of flood protection from 2025 to 2030 and provides that the city may be liable for its fair and reasonable share of any property damage caused by a flood occurring between January 1, 2025, and December 31, 2030.

3) Adjusts the boundaries for RD 100 to include the territory of State Maintenance Area 4 (MA 4).

4) Makes a number of findings regarding the need for the bill the need for a special statute.

Comments

The West Sacramento Flood Project consists of improving approximately 41 miles of levees along the Sacramento River, Deep Water Ship Channel and Yolo Bypass. Completion of this project will result in 200 year level of flood protection for the 54,000 residents of West Sacramento.

This bill appears to meet all the requirements for authorizing state participation in funding the West Sacramento Project.

Why extend the deadline? According to the USACE District Project Manager, the estimated end date for the project is December 31, 2030. To ensure this extension of the deadline does not unreasonably expose the state to liability in the event of a flood between 2025 and 2030, this bill provides that the city may be liable for its fair and reasonable share of any property damage caused by a flood occurring between January 1, 2025, and December 31, 2030.

Necessary? Several decades ago, the Legislature delegated the ongoing responsibility to control the boundaries of most local agencies, including reclamation districts, to LAFCOs. In November 2019, Yolo LAFCO exercised this authority to expand RD 900's boundaries to include MA 4. Despite this action, SB 901 includes language that sets RD 900's boundaries. If LAFCO already expanded RD 900's boundaries, why is this language necessary? According to sponsors of this bill, this language provides legal certainty to ensure the project moves forward with state and federal funding. On the other hand, it could be read to imply that legislative action is necessary to set a local agency's boundaries despite previous LAFCO action. To help alleviate this concern, SB 901 states that the boundaries it sets for RD 900 conform to Yolo LAFCO's action on November 14, 2019.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) One-time cost pressure of at least $90 million (General Fund, special fund, or bond funds) for the remaining state cost-share obligation due to authorization of state participation in the West Sacramento flood project.

2) By increasing RD 900's boundaries and jurisdiction to include MA 4, this bill may impose a state-mandated local program. To the extent the Commission on State Mandates determines the provisions of this bill create a new program or impose a higher level of service, RD 900 could claim reimbursement for its costs. However, RD 900 will assume both assessment and maintenance responsibilities for the property included in MA 4; therefore, this analysis assumes the bill does not create a reimbursable state mandate.

SUPPORT: (Verified 8/23/22)

West Sacramento Area Flood Control Agency (source)
Association of California Water Agencies

California Central Valley Flood Control Association
County of Yolo
Reclamation District 900
Regional Water Authority

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: According to the author, "The Sacramento Region is rated as the second-highest region at risk of major flooding in the nation. This bill makes a number of necessary policy changes to improve the coordination and effectiveness of flood control in the City of West Sacramento. SB 901 revises the state authorization for the Project to make the Project eligible for state funding. It also improves coordination of flood protection efforts by permitting RD 900 to incorporate the parcels served by Maintenance Area 4 into its territory. SB 901 is critical in ensuring the safety of West Sacramento residents and the surrounding homes, businesses, and other critical infrastructure."

SUBJECT: Deterring union membership: violations

SOURCE: AFSCME – California
California Labor Federation
California Teamsters Public Affairs Council
SEIU - California State Council

DIGEST: This bill requires (1) the Public Employment Relations Board (PERB) to impose civil penalties on public sector employers if it finds they deterred or discouraged workers from exercising collective bargaining rights, as specified, and (2) public sector employers to pay the union attorney's fees and costs if the union prevails in a legal action to enforce those rights.

Assembly Amendments require PERB to apply the following criteria when assessing a civil penalty against an employer pursuant to the bill's provisions: (1) the public employer's annual budget; (2) the severity of the violation; and (3) any prior history of violations by the public employer.

ANALYSIS:

Existing law:

1) Prohibits a public employer from deterring or discouraging public employees, and applicants to be public employees, from becoming or remaining members of an employee organization, or from authorizing representation by an employee organization, or from authorizing dues or fee deductions to an employee organization. (Government Code (GC) § 3550)

2) Delegates to PERB, jurisdiction over violations by public employers regarding deterring or discouraging public employees from exercising their collective bargaining rights. (GC § 3551)

3) Defines "employee organization", "public employee", and "public employer" by reference to existing statutory frameworks governing public employer-employee labor relations. (GC § 3552)

4) Requires a public employer that wishes to send a mass communication to public employees to first meet and confer with the employees' union, and if, after meeting and conferring, the employer still wishes to send the communication, requires the employer to send also a communication from the union. (GC § 3553)

This bill:

1) Authorizes a public employee union to bring a claim against a public employer for violating the prohibition against deterring or discouraging public employees, and applicants to be public employees, from exercising their collective bargaining rights.

2) Subjects the public employer to a civil penalty of up to $1,000 per each affected employee, not to exceed $100,000 in total.

3) Requires that the PERB transfer the civil penalty to the General Fund.

4) Requires PERB to award the union its attorney's fees and costs, as specified, unless PERB finds the claim was frivolous, unreasonable, or groundless when brought, or the employee organization continued to litigate after it clearly became so.

5) Prohibits PERB, when a party challenges PERB's dismissal of an unfair practice charge, from awarding attorney's fees and costs related to the challenges, as specified.

6) Requires the superior court to award PERB its attorney's fees and costs if PERB initiates action in superior court to enforce its orders or defend its decision against a public employer that seeks judicial review and PERB is the prevailing party.

Comments

Need for this bill? According to the author, "When an employee organization succeeds in petitioning PERB to grant an unfair labor practice charge, PERB can only issue a cease-and-desist order requiring the employer to post notice of the violation. By the time of notice, the damage is done. It is obvious that some public employers are undeterred from breaking the law and will continue to violate their employees' rights to organize unless the Legislature acts to provide meaningful consequences."

Related/Prior Legislation

SB 27 (Durazo, Chapter 330, Statutes of 2021) authorized public employee unions to file a special unfair labor practices charge before PERB against public employers that fail to comply with existing law requiring disclosure of employee information to public employee unions; required PERB to levy a civil penalty not to exceed $10,000 if the employer is in violation of the disclosure requirements; required PERB to award the prevailing parties' attorney's fees and costs, as specified; and provided PERB authority to recover its own attorney's fees and costs, as specified, if required to seek enforcement of or defend its decisions in superior court.

AB 3096 (Chiu 2020) was similar to this bill but narrower in scope to only apply to the University of California. AB 3096 died in the Senate Labor, Public Employment and Retirement Committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Ongoing General Fund costs to PERB of $129,000 to implement the provisions of the bill.

2) Penalty revenue of an unknown magnitude annually deposited into the General Fund.

3) Potential General Fund cost pressures of an unknown amount to public employers found to have violated existing law to pay civil penalties and attorney's fees and costs. Costs to public agencies would depend on the number of cases brought to the PERB and the number found to have violated existing law.

4) Potential General Fund cost pressures to the University of California (UC) and the California State University (CSU).

   According to UC and CSU, they would incur significant General Fund cost pressures to conduct ongoing staff trainings to ensure staff across various departments understand existing law related to deterring or discouraging union membership. In addition, the universities indicate they will incur significant costs to monitor department communications to ensure the communications do not violate existing law.

ARGUMENTS IN SUPPORT: According to the California Professional Firefighters, "Existing California law has clearly established that public employers are prohibited from taking actions that deter their employees from union membership, whether those employees are current or even prospective. However, despite the passage of this law clearly prohibiting these practices, various public employers have taken actions to deter their employees from seeking out union membership. These practices have included letters and other persuasive tactics from management to employees indicating that joining a union would reduce their ability to negotiate, or even issuing warnings about pay freezes based on the labor actions taken at other locations. These tactics are in clear violation of the law, and yet there are no enforcement mechanisms for organized labor or the state other than a cease-and-desist letter that comes long after the unlawful actions have already been taken."

ARGUMENTS IN OPPOSITION: According to the League of California Cities and a coalition of public employers:

"The monetary penalties under SB 931 could be as high as $100,000, in addition to attorney's fees. This is a substantial amount for any public entity and it is particularly egregious for small public employers. It is a stark departure from legislative action in the 2021-22 session. Recently established statute (Chapter 330, Statues of 2021), which has not taken effect, established for the first time PERB authority to level civil penalties. That penalty was capped at $10,000 and included considerations for the public agency's annual budget, the severity of the violation, and prior violations by the public agency in PERB's determination of the amount. We request the same maximum penalty and considerations for the circumstances be amended into SB 931."

Thus, the opposition requests amendments that would do the following:

- Authorize the equitable award of attorney fees for prevailing parties;
- Cap monetary penalties and adjust them for specified factors.
- Require the union to provide notice to the employer when filing the ULP claim with PERB so the employer has an opportunity to mitigate.

ASSEMBLY FLOOR: 77-0, 8/22/22 - See last page for vote

SUBJECT: Local educational agency instruction collaboration agreements: science, technology, engineering, and mathematics: dual language immersion programs

SOURCE: Author

DIGEST: This bill authorizes local educational agencies (LEAs) to enter into an agreement with one or more LEAs to offer the same or similar corresponding individual courses or coursework to a student from another LEA who has been impacted disruptions or cancellations in classes in science, technology, engineering, and mathematics (STEM) or dual language immersion programs, or teacher shortages in those classes or programs.

Assembly Amendments (1) specify the courses or coursework must be the same or similar corresponding coursework; and (2) make technical changes to reflect that

participating students remain enrolled in their school or origin while taking coursework from another LEA.

ANALYSIS:

Existing law:

1) Requires each person between the ages of 6 and 18 years to be subject to compulsory full-time education, and requires attendance at the public full-time day school and for the full length of the schoolday by the governing board of the school district in which the residency of either the parent or legal guardian is located. (Education Code (EC) § 48200)

2) Provides that a student complies with the residency requirements for school attendance in a school district if he or she is any of the following:

   a) A student placed within the boundaries of that school district in a regularly established licensed children's institution or a licensed foster home, or a family home.

   b) A student who is a foster child who remains in his or her school of origin.

   c) A student for whom inter-district attendance has been approved.

   d) A student whose residence is located within the boundaries of that school district and whose parent or legal guardian is relieved of responsibility, control, and authority through emancipation.

   e) A student who lives in the home of a caregiving adult that is located within the boundaries of that school district.

   f) A student residing in a state hospital located within the boundaries of that school district.

   g) A student whose parent or legal guardian resides outside of the boundaries of that school district but is employed and lives with the student at the place of his or her employment within the boundaries of the school district for a minimum of three days during the school week. (EC § 48204)

3) Authorizes the governing boards of two or more school districts to enter into an agreement, for a term not to exceed five school years, for the inter-district attendance of student who are residents of the school districts. (EC § 46600)

4) Authorizes the governing board of a school district to elect to operate the school district as a school district of choice and may accept transfers from school districts of residence, as specified. Existing law requires, if a school district elects to accept transfers pursuant to District of Choice provisions, this school district to determine and adopt, by resolution, the number of transfers it is willing to accept and must accept all students who apply to transfer until the school district is at maximum capacity. Existing law requires the school district of choice to ensure that students are selected through an unbiased process that prohibits an inquiry into or evaluation or consideration of whether or not a student should be enrolled based upon his or her academic or athletic performance, physical condition, proficiency in English, any of individual characteristics, and, except for purposes of determining priority for students eligible for free or reduced-price meals, family income. (EC § 48300)

This bill:

1) Authorizes the governing board or body of an LEA to enter into an agreement with one or more LEAs to offer the same or similar corresponding individual courses or coursework to a student from another LEA, subject to an agreement between the LEAs, who has been impacted by any of the following:

   a) Disruptions or cancellations in STEM classes.

   b) Disruptions or cancellations in dual language immersion programs.

   c) Teacher shortages in STEM classes or dual language immersion programs.

2) Requires LEAs, if they elect to accept students pursuant to this bill, to determine the number of students it is willing to offer the same or similar corresponding individual courses or coursework to under and must accept students who apply for the same or similar corresponding individual courses or coursework until the LEA is at maximum capacity.

3) Requires an LEA that accepts students to ensure that the students admitted are selected through an unbiased process that prohibits an inquiry into, or evaluation or consideration of, whether or not a student should be authorized to participate in the course or coursework based upon the student's academic or athletic performance, physical condition, proficiency in English, any individual characteristics, or family income.

4) Requires LEAs to conduct a public random drawing if the number of students seeking a classroom opportunity exceeds the number of seats available in a classroom of the receiving LEA.

5) Requires LEAs that enter into a collaborative agreement to publicly post information, as specified, to ensure that students and their families are aware of the opportunities to participate under the agreement.

6) Requires the average daily attendance attributable to a student to remain with the LEA that the student originated from for purposes of state apportionment. This bill requires the agreement between the LEAs to include an appropriate shared cost structure negotiated by the collaborating LEAs.

7) Requires the California Department of Education to evaluate the programs implemented pursuant to this bill, including an analysis of whether students benefited from the programs and any obstacles to creating the programs.

8) Sunsets the provisions of this bill on July 1, 2029.

9) Defines "local educational agency" as a school district, county office of education, or charter school.

10) States legislative findings and declarations relative to:

    a) The consideration of inter-district collaborations as an alternative to canceling classes or seeking emergency credentials for teachers who have not benefited from a complete academic education background or student teaching experiences.

    b) One viable alternative is collaborative agreements whereby a LEA with classroom space or excess capacity may offer to share facilities and opportunities with students from neighboring LEAs, whether in person or online.

Comments

Need for the bill. According to the author, "California has the most public school students in the nation and faced a critical shortage of teachers even before disruptions from the COVID-19 pandemic. In the 2017-18 school year, 80% of California school districts faced a shortage of teachers. Nine out of 10 school districts stated that the shortage was getting worse. A recent report on school districts around the state by the Learning Policy Institute found that the most pronounced shortages include math, science, and bilingual education. The deficit of certified teachers is more pronounced in rural regions and communities of color and has only been exacerbated by the current pandemic.

"School districts are being forced to cancel classes or seek emergency credentials for teachers who have not benefited from a complete academic education background or student teaching experiences. An alternative to class cancellations or emergency credentials is to allow inter-district collaborations."

Existing examples of students attending multiple schools. Students may be enrolled in only one school at a time. It is likely that some LEAs currently have agreements with neighboring LEAs to allow students to take some courses at a school in which they are not enrolled; however, there are no known statewide programs/initiatives that specifically authorize or prescribe criteria for such agreements between LEAs. While there may be examples of such local agreements, the most well-known situations involve high school students who also take community college courses (such as dual enrollment and Middle College High School). This bill authorizes LEAs to enter into specific agreements, but does not require local agreements to be limited to STEM or dual immersion courses or to follow the process prescribed by this bill.

Why just STEM and dual immersion? As noted by the author, a recent report by the Learning Policy Institute noted that teacher shortages are particularly acute in math, science, special education, and bilingual education. Teacher shortages persist in many subject areas, but have historically been more pronounced in the above-mentioned subject areas. (https://learningpolicyinstitute.org/sites/default/files/product-files/California_ COVID_Teacher_Workforce_REPORT.pdf)

Admission criteria. This bill requires LEAs, if they elect to accept students pursuant to this bill, to take certain steps in determining how many students to accept, selecting students through an unbiased process, and conduct a public random drawing if the number of students seeking an opportunity exceeds the number of seats available in a classroom. These provisions are consistent with existing law related to inter-district transfer and Districts of Choice.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) One-time General Fund costs of about $185,000 for the California Department of Education to develop a reporting system for participating LEAs and to evaluate the program.

2) Cost neutral as funding will be negotiated at the local level.

SUBJECT: CalFresh: income eligibility: basic allowance for housing

SOURCE: Author

DIGEST: This bill requires the California Department of Social Services (CDSS) to submit a waiver request to the United States Department of Agriculture (USDA) to exclude the Basic Allowance for Housing (BAH) for uniformed service members from countable income for purposes of CalFresh eligibility, as provided.

Assembly Amendments (1) remove the December 31, 2023 date for CDSS to submit a waiver request to USDA and instead require the CDSS to submit waiver requests on or before July 1, 2023, and annually thereafter, (2) change the code section of the bill, (3) remove the requirement that the waiver be implemented

within 12 months of being approved, (4) require CDSS to issue an all-county letter instructing counties on updated eligibility requirements and benefit calculations, as provided, and (5) add coauthors.

ANALYSIS:

Existing law:

1) Provides, pursuant to federal law, a BAH to which a uniformed service member, including a member with dependents, as specified, is entitled if they are also entitled to basic pay. (37 *United States Code (USC) 403)*

2) Establishes, under federal law, the Supplemental Nutrition Assistance Program (SNAP) to promote the general welfare and to safeguard the health and wellbeing of the nation's population by raising the levels of nutrition among low-income households. *(7 USC 2011 et seq.)*

3) Provides, under federal law, the income and eligibility standards for SNAP. *(Title 7 Code of Federal Regulations 273.9 et seq.)*

4) Establishes, in California statute, the CalFresh Program to administer the provision of federal SNAP benefits to families and individuals meeting specified criteria. *(WIC 18900 et seq.)*

5) Allows the California Department of Social Services (CDSS) to implement all waivers approved by the U.S. Secretary of Agriculture through all-county letters or similar instructions meeting specified criteria. *(WIC 18900.9)*

This bill:

1) Requires CDSS, on or before July 1, 2023, and annually after that, to submit a request for a federal waiver to exclude BAH provided to uniformed service members from countable income in the determination of eligibility and benefit level of CalFresh.

2) Requires CDSS, upon federal approval of the waiver, to consult with the County Welfare Directors Association of California, advocates for CalFresh recipients, and the Military Department, to issue an all-county letter instructing counties on updated eligibility requirements and benefit calculations.

3) Provides, if the Commission on State Mandates determines that the act contains costs mandated by the state that reimbursement to local agencies and school districts for those costs be made pursuant to the statutory provisions.

Background

CalFresh. CalFresh, California's version of federal SNAP benefits, provides monthly food benefits to qualified low-income individuals and families to assist with the purchase of the food they need to maintain adequate nutrition levels. CalFresh is the largest nutrition assistance program in California, with 2.6 million households and over 4.6 million people receiving benefits in December of 2021. The program is administered by CDSS at the state level and California's 58 counties are responsible for administering CalFresh at the local level. CalFresh benefits are federally funded and national income eligibility standards and benefit levels are established by the federal government.

California determines CalFresh eligibility by seeing if the applicant's gross monthly income is 200% of the federal poverty level (FPL) or less for their household size. That means for a household of three in California the maximum gross monthly income for CalFresh eligibility is $3,464. For a household of one in California the maximum gross monthly income for CalFresh eligibility is $2,024. Households with seniors or disabled members aren't subject to the gross income criteria, however, their net monthly income must be 100 percent of FPL or below.

The benefit amount a household may receive is dependent upon circumstances such as household size, countable income, and monthly household expenses. Benefits are made available to recipients on an electronic benefits transfer (EBT) card, which is an automated teller machine-like card that allows an individual to purchase food at point-of-sale devices in stores and farmers markets. As of October 1, 2021 the maximum monthly benefit amount for a one-person household in California is $250, while a family of three may receive up to $658. As a result of the Families First Coronavirus Response Act, all CalFresh recipients are currently receiving the maximum allowable benefit amount based on household size. This funding is tied to the federal public health emergency declaration. Prior to this pandemic related change, the average monthly benefit for a household of one was $134.

The SNAP maximum monthly benefit amounts are updated each June based on the cost of the Thrifty Food Plan and those updates go into effect on October 1. The Thrifty Food Plan is the cost of groceries needed to provide a healthy, budget-conscious diet for a family of four. In 2021, Congress directed the USDA to study the costs required to purchase a healthy diet. As a result, SNAP/CalFresh benefit amounts were permanently adjusted as of October 1, 2021, to provide 40 cents more per person, per meal to the maximum monthly benefit amounts, or a 22.7 percent average monthly increase to pre-pandemic benefits levels.

Basic Allowance for Housing. The basic pay of uniformed service members is determined by their grade (or rank), years of service, and number of dependents, and is adjusted for the local median rental rates across different geographic locations. Uniformed service members are also provided a number of allowances, including BAH, which is provided to service members with housing costs who are living in or permanently stationed in the United States. BAH was previously only provided to service members living off base, in non-government provided housing; however, it was extended to cover some situations of on-base housing. Under the 2022 National Defense Authorization Act (NDAA) effective January 1, military service members' BAH rates increased 5.1 percent. The 2022 BAH for service members with dependents ranges from $1317 per month in Twentynine Palms to over $6800 in San Francisco.

While the BAH is nontaxable, it is considered income for purposes of determining eligibility for certain assistance programs, including CalFresh under the 2008 Food and Nutrition Act. This disqualifies them from accessing the CalFresh program; however, families may qualify for the Special Supplemental Nutrition Program for Women, Infants and Children (WIC). WIC provides federal grants to states for supplemental food, health care referrals, and nutrition education for low-income pregnant, breastfeeding, and non-breastfeeding postpartum women, and to infants and children up to age five who are found to be at nutritional risk.

Hidden Food Insecurity in the Military. According to the USDA, nationally 22,000 SNAP households included active service members in 2019. Prior to the Covid-19 pandemic hunger among military members, veterans, and their families was an "unspoken issue", one that appears to especially affect junior enlisted members with children (Level E1-E4) and enlisted members of color. A 2020 Blue Star Families survey found that, "14% of enlisted, active-duty household respondents reported facing difficulties with putting food on their tables". Additionally, a 2019 survey by the Military Family Advisory Network found that "1 in 8 members of the military and veterans communities had recently experienced food insecurity".

Hunger among enlisted military and their families has been a topic of debate recently because no formal study on the scope of the problem has been completed. Representative Jim McGovern (D–MA) has appealed for a Pentagon study of the problem and a repeal of the USDA's BAH regulation, and Senator Tammy Duckworth (D–IL) has sponsored a bill that would establish a Basic Needs Allowance payment for military families in need.

Comments

According to the author, "the men and woman who are serving and defending our nation should never be a position where they are struggling to provide food for themselves and their families. It is unacceptable that thousands of military families are experiencing food insecurity. SB 950 will exclude a military family's basic housing allowance from consideration when calculating CalFresh income eligibility. By modifying income calculations, this measure will help our brave service members put food on the table."

Related/Prior Legislation

AB 1828 (Chen, 2022) was similar to this bill and would have excluded the BAH from being counted as income for determining CalFresh eligibility. AB 1828 was held in the Senate Assembly Appropriations Committee, however the bill's language was incorporated into SB 950.

AB 1883 (Weber, 2017) would have excluded the BAH for certain military households from being counted as income for determining eligibility for subsidized child care and change certain requirements related to the administration of alternative payment programs. AB 1883 was held in the Senate Appropriations Committee.

AB 276 (Hueso, 2013) would have excluded the BAH received by active military or honorably discharged veterans from being counted as income for the purpose of determining CalFresh and would have required CDSS request a waiver of the USDA to exclude BAH as income in determining CalFresh eligibility and benefit levels. AB 276 was held in the Assembly Human Services Committee at the request of the author.

AB 170 (Saldana, 2007) would have excluded the BAH received by active military personnel from being counted as income for determining eligibility for state preschool. AB 170 was held in the Assembly Appropriations Committee.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, if the federal waiver is granted, CDSS anticipates the following costs:

1) Ongoing administrative costs of approximately $5 million ($2.1 million General Fund (GF)) in the first year and $4.1 million ($1.8 million GF) annually ongoing, for counties to manage increased workload. CDSS anticipates a

caseload increase of 12,880 due to the exclusion of the BAH in the eligibility calculations for CalFresh.

2) One-time automation costs of approximately $500,000 ($250,000 GF) for programming changes to enable counties to exclude the BAH from the CalFresh eligibility calculations. Given the current migration to the single California Statewide Automated Welfare System (CalSAWS) automation system, implementation is unlikely until late 2024.

3) Minor and absorbable costs to update the CalFresh application to include a question about the BAH for active service members. CDSS indicates it would perform this update as part of its regular update process.

SUBJECT: California Retail Food Code

SOURCE: California Insurance Commissioner Ricardo Lara
Coalition for Humane Immigrant Rights
Community Power Collective
Inclusive Action for the City
Public Counsel
Western Center on Law and Poverty

DIGEST: This bill establishes a new type of retail food facility called a "compact mobile food operation" (CMFO) as a subcategory of mobile food facility that is nonmotorized and operates from a pushcart or stand; exempts CMFOs from

various provisions of the retail food code law, including certain sink requirements; prohibits criminal penalties from applying to CMFOs and instead limits enforcement to administrative penalties; and exempts sales from CMFOs from counting toward the limits for cottage food operators or microenterprise home kitchens.

Assembly Amendments delete and recast many of the provisions of this bill into a new chapter in the California Retail Food Code, limited the ability to use microenterprise home kitchens as commissaries to only two CMFOs, and only if approved by the local jurisdiction, increased the fine authority to up to three times the cost of a permit, and made other narrowing and clarifying changes.

ANALYSIS:

1) Establishes the California Retail Food Code (CalCode) to regulate retail food facilities. Health and sanitation standards are established at the state level through the CalCode, while enforcement is charged to local agencies, carried out by the 58 county environmental health departments, and four city environmental health departments (Berkeley, Long Beach, Pasadena, and Vernon). [HSC §113700, et seq.]

2) Defines a "potentially hazardous food," in part, as a food that requires time or temperature control to limit pathogenic micro-organism growth or toxin formation. Requires potentially hazardous food to be maintained at or above 135 degrees Fahrenheit, or at or below 41 degrees Fahrenheit. [HSC §113781]

3) Defines a "mobile food facility" as any vehicle used in conjunction with a commissary or other permanent food facility upon which food is sold or distributed at retail. Defines "commissary" as a food facility that services mobile food facilities, mobile support units, or vending machines where any of the following occur: food containers, or supplies are stored; food is prepared or prepackaged for sale or service at other locations; utensils are cleaned; or, liquid and solid wastes are disposed, or potable water is obtained. [HSC §113831, §113751]

4) Defines a "cottage food operation" (CFO), for purposes of the CalCode, as an enterprise that prepares or packages nonpotentially hazardous foods, and includes both "Class A" CFOs, which is restricted to direct sales of food products with up to $75,000 in gross annual sales, and "Class B" CFOs which may engage in both direct sales and indirect sales through third-party retail food facilities with up to $150,000 in sales. Requires the gross annual sales limits to be annually adjusted for inflation. [HSC §113758]

5) Defines a microenterprise home kitchen operation (MEHKO) as a food facility that is operated by a resident in a private home where food is stored, handled, and prepared for, and may be served to, consumers, and that meets certain requirements, including limiting food preparation to 30 meals per day, and 60 meals per week, and up to $50,000 in annual gross sales. [HSC §113825]

6) Provides the governing body of a city or county with full discretion to authorize, by ordinance or resolution, the permitting of MEHKOs, and requires a permit issued by a county that has authorized the permitting of MEHKOs to be valid in any city within the county regardless of whether the city has separately enacted an ordinance or resolution to authorize or prohibit the permitting of MEHKOs within that city. [HSC §114367]

7) Establishes a misdemeanor penalty for a violation of any provision of the CalCode, punishable by a fine of not less than $25 or more than $1,000, or by imprisonment in the county jail for up to six months, or by both fine and imprisonment. [HSC §114395]

This bill:

1) Creates a new type of retail food facility, for purposes of regulation by the Cal Code, called the "compact mobile food operation" as a subcategory of a mobile food facility, and defines a CMFO as a mobile food facility that operates from an individual or from a pushcart, stand, display, pedal-driven cart, wagon, showcase, rack, or other nonmotorized conveyance.

2) Limits enforcement of violations of the CalCode for CMFOs, notwithstanding the existing misdemeanor penalties for all food facilities, to be punishable only by an administrative fine, consistent with provisions of law establishing an administrative fine structure for sidewalk vendors in the Government Code, which is subject to mandatory reductions based on an individual's ability to pay. Specifies that operating a CMFO without a permit is punishable by a fine up to three times the cost of the permit. Prohibits CMFOs from being punishable as an infraction or misdemeanor, and prohibits CMFO operators from being subject to arrest except when independent grounds for that arrest exist under law.

3) Revises the definition of "limited food preparation" by doing the following:

    a) Including the dispensing and portioning for immediate service to a customer of food that has been temperature controlled until immediately prior to portioning or dispensing;

b) Including the slicing and chopping of nonpotentially hazardous food or produce that has been washed at an approved facility; and,
c) Permitting, by repealing prohibitions on these activities from being considered part of "limited food preparation," the reheating of potentially hazardous foods for hot holding.

4) Limits CMFOs to only conducting limited food preparation, as defined, and permits them to display or sell food outdoors, under specified conditions including overhead protection for all food display areas.

5) Permits a CFO or MEHKO to serve as a commissary or mobile support unit for up to two CMFOs if the CFO or MEHKO permit includes an endorsement from the local enforcement agency that the CFO or MEHKO is capable of supporting the preparation and storage of the food being sold from the CMFO and the storage and cleaning of the CMFO.

6) Permits transaction at a CMFO to constitute "direct sales" for purposes law governing CFOs, and exempts transactions at CMFOs operated by a CFO from counting toward the annual gross sales restrictions that apply to CFOs under existing law, if the governing body of the jurisdiction where the CMFO is permitted has authorized this action.

7) Permits food prepared in a MEHKO to be served from a CMFO operated by the MEHKO permitholder, and specifies the meal and gross annual sales limitations do not apply to sales of nonpotentially hazardous food or produce for up to two CMFOs operated by the MEHKO if the governing body of the jurisdiction where the MEHKO is permitted has authorized this action.

8) Permits the governing body of a local jurisdiction that permits MEHKOs to set meal and income limitations at a higher level than existing law for MEHKOs that operate in conjunction with CMFOs.

9) Permits permanent food facilities to be permitted to support the operations and storage of CMFOs.

10) Permits an enforcement agency to allow the use of a private home for the storage of up to two CMFOs if it determines that it would not pose a public health hazard.

11) Requires a CMFO that prepares raw meat, raw poultry, or raw fish to comply with warewashing and handwashing facility requirements outlined in existing law, but can satisfy the requirements by demonstrating access to a permitted

auxiliary conveyance containing the necessary handwashing and warewashing sinks.

12) Permits a CMFO that does not prepare raw meat, raw poultry, or raw fish to avoid having to provide a warewashing sink by maintaining an adequate supply of spare preparing and serving utensils to ensure that utensils are replaced every four hours or as needed, but is still required to provide an integral handwashing sink, as specified.

13) Permits an enforcement agency to waive the requirement that a mobile food facility be operated within 200 feet travel distance of an approved and readily available toilet and handwashing facility if the mobile food facility operates with multiple employees or operators and the facility may remain operable by a single employee so that employees or operators may alternate use of a restroom.

14) Permits an enforcement agency to preapprove a standard plan for a standardized or mass-produced facility intended to serve as a mobile food facility. Specifies that a person proposing to operate a mobile food facility for which plans have been preapproved is not required to submit plans for the individual unit, but is subject to a final inspection, at which time the enforcement agency can collect a fee. Specifies that the repair of this equipment or the replacement of equipment and fixtures with substantially similar equipment is not a remodel, and does not require the submission of plans to an enforcement agency.

15) Exempts CMFOs from a requirement that an owner or employee pass an approved food safety certification examination if they prepare, handle, or serve nonprepackaged potentially hazardous food, and specifies that CMFOs are deemed to comply with a requirement that the owner or person in charge demonstrate that they have an adequate knowledge of food safety principles as they relate to the specific food facility operation if the CMFO permitholder obtains a food handler card, as specified.

Comments

1) *Author's statement.* According to the author, sidewalk food vending is essential to California's economy, culture, and health. Sidewalk food vending allows low-income and immigrant workers, often excluded from other opportunities, to make a living and provide for their families, while building a successful business. Sidewalk food vendors provide healthy food in neighborhoods that lack access to healthy food retail, and they contribute

mightily to our local economies. In 2018, the Legislature enacted SB 946 (Lara, Chapter 459, Statutes of 2018), which established parameters for local regulations concerning vending location and manner of operations. After several years of local implementation of SB 946, it is apparent that outdated requirements found in the CalCode —including incompatible equipment and design standards, exorbitant costs, and punitive enforcement measures—are preventing the vast majority of all sidewalk food vendors from obtaining a local health permit to vend food. By reducing permit barriers, public health agencies will have a significantly greater ability to educate vendors and offer corrective measures to cart designs and operating procedures that will increase overall community health and safety. This bill promotes economic inclusion while improving public health by modernizing CalCode so that sidewalk food vendors can actually obtain a permit and join the regulated vending economy.

2) *Sidewalk vending decriminalization bill.* As noted in the author's statement, SB 946 was intended by the author and proponents to help sidewalk vendors support themselves and their families by prohibiting overly restrictive local ordinances that were making it difficult if not impossible to operate. Among other provisions, SB 946 prohibited a city or county from requiring sidewalk vendors to operate within specific parts of public right-of-way except where that restriction is directly related to objective health, safety, or welfare concerns. Local authorities cannot restrict the overall number of sidewalk vendors, nor restrict sidewalk vendors to operate only in a designated area, unless these restrictions are directly related to health, safety or welfare concerns. Significantly, SB 946 removed criminal penalties in place of administrative penalties, in part to prevent the federal government from using a criminal history in deportation proceedings. Specifically, it restricted penalties for violating the requirements of a local authority's compliant sidewalk vending program to an administrative penalty of $100 for a first violation, $200 for a second violation within one year of the first violation, and $300 for each additional violation within one year of the first violation. Administrative penalties for vending without a permit are $250, $500, and $1,000, respectively. A local authority is required to accept 20% of the fine in full satisfaction if the violator earns less than 125% of the federal poverty line. However, SB 946 did permit cities and counties to require compliance with any other licensing and permitting required by law, and specifically stated that nothing affects the applicability of the CalCode to a vendor who sells food. Therefore, a sidewalk vendor is still out of compliance, and subject to enforcement, if they are selling food without a permit as a food facility under the requirements of the CalCode.

3) *CFO law.* AB 1616 (Gatto, Chapter 415, Statutes of 2012) enacted the regulatory structure for CFOs. This law, for the first time, permitted the preparation of food in home kitchens for sale at the retail level, and initially set the cap at $50,000 in gross annual sales. However, cottage food is limited to non-potentially hazardous foods: foods that by definition do not require refrigeration or to be kept hot in order to prevent the growth of micro-organisms or toxins. These foods include items such as baked goods (without custard or meat fillings), candy, dried fruit, dried pasta, dried baking mixes, fruit pies, granola, herb blends, and jams or jellies, among others. The law set up two categories of CFOs: Class A operations, which are limited to direct sales to consumers, and Class B operations, which are also permitted to sell through third-party retailers such as restaurants or coffee shops. AB 1144 (Rivas, Chapter 178, Statutes of 2021) increased the sales cap from $50,000 for both license types to $75,000 for Class A and $150,000 for Class B, and required that these caps be adjusted annually for inflation.

4) *MEHKOs.* AB 626 (Garcia, Chapter 470, Statutes of 2018) established a regulatory structure for MEHKOs. The intent of the author was to establish a legal way for home cooks to benefit from their labor and skills and promote economic development in vulnerable communities where the sale of homemade food is popular. The general structure of AB 626 was to enact a permitting process that would be overseen by the same local health agencies that oversee fully-permitted restaurants, but to exempt these MEHKOs from requirements that would be difficult to meet in a home kitchen, such as sinks with multiple compartments and multiple drainboards, requirements related to the floor, wall and counter material, special plumbing requirements, limitations on who could be in the food preparation area, etc. AB 626 required jurisdictions to opt-in in order to authorize MEHKOs in any given area. There are 62 local environmental health agencies that enforce the CalCode in their respective jurisdictions (the 58 counties, plus the cities of Berkeley, Long Beach, Pasadena, and Vernon). According to the Cook Alliance, which was one of the sponsors of AB 626 and has been tracking its implementation, the following nine counties have authorized the permitting of MEHKOs: Riverside, Alameda, San Mateo, Santa Barbara, San Diego, Solano, Imperial, Lake, and Sierra.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, minor and absorbable costs to the Department of Public Health.

SUBJECT: Special education: eligibility: fetal alcohol spectrum disorder

SOURCE: Author

DIGEST: This bill requires the State Board of Education (SBE) to include "fetal alcohol spectrum disorder" in the regulatory definition of "other health impairment" for the purpose of special education eligibility.

Assembly Amendments add coauthors and clarify the name of the SBE in statute.

ANALYSIS:

Existing law:

1) Defines “individuals with exceptional needs” as persons who satisfy all the following:

    a) Identified by an individualized education program (IEP) team as a child with a disability, as that phrase is defined in federal law.

    b) Their impairment requires instruction and services which cannot be provided with modification of the regular school program in order to ensure that the individual is provided a free appropriate public education.

    c) Meet eligibility criteria set forth in regulations adopted by the State Board of Education.

State Regulations

2) Specifies that a child shall qualify as an individual with exceptional needs, pursuant to state law, if the results of the required assessment demonstrate that the degree of the child's impairment requires special education in one or more program options.

3) Specifies that the decision as to whether or not the assessment results demonstrate that the degree of the child's impairment requires special education shall be made by the IEP team, taking into account all the relevant material which is available on the child.

4) Defines “other health impairment” as having limited strength, vitality, or alertness, including a heightened alertness to environmental stimuli, that results in limited alertness with respect to the educational environment that:

    a) Is due to chronic or acute health problems such as asthma, attention deficit disorder or attention deficit hyperactivity disorder, diabetes, epilepsy, a heart condition, hemophilia, lead poisoning, leukemia, nephritis, rheumatic fever, sickle cell anemia, and Tourette syndrome; and

    b) Adversely affects a child's educational performance.

This bill requires the SBE to include “fetal alcohol spectrum disorder” in the regulatory definition of “other health impairment” for the purpose of special education eligibility.

Comments

1) *Need for the bill.* According to the author, "In California, most professionals are not trained in Fetal Alcohol Spectrum Disorder (FASD) or even aware of the disorder. As a result, the overwhelming number of affected children and adults in the state do not receive a diagnosis and, therefore, do not receive appropriate care. Without proper diagnosis and interventions, individuals with FASD face a life of challenges, including behavioral, cognitive, mental health, substance use, homelessness, and involvement with the criminal justice system, as youth and adults. Even having a typical IQ is not protective. Without early diagnosis and intervention, 80% of adults with FASD and typical range IQ will never live independently as adults.

   "Currently, FASD is not a recognized category for special education under the Individuals with Disabilities Education Act (IDEA). It is also not named as a disorder under the Other Health Impaired category by the California Department of Education. Hence, students with the most prevalent developmental disability in the US are being underserved in school districts across the state, with detrimental lifelong consequences."

2) *The basics about FASD.* FASD is a group of conditions that can occur in a person who was exposed to alcohol before birth. These effects can include physical problems and problems with behavior and learning. Often, a person with FASD has a mix of these problems.

   Different FASD diagnoses are based on particular symptoms and include:

   a) *Fetal Alcohol Syndrome (FAS):* FAS represents the most involved end of the FASD spectrum. People with FAS have central nervous system problems, minor facial features, and growth problems. People with FAS can have problems with learning, memory, attention span, communication, vision, or hearing. They might have a mix of these problems. People with FAS often have a hard time in school and trouble getting along with others.

   b) *Alcohol-Related Neurodevelopmental Disorder (ARND):* People with ARND might have intellectual disabilities and problems with behavior and learning. They might do poorly in school and have difficulties with math, memory, attention, judgment, and poor impulse control.

c) *Alcohol-Related Birth Defects (ARBD):* People with ARBD might have problems with the heart, kidneys, or bones or with hearing. They might have a mix of these.

d) *Neurobehavioral Disorder Associated with Prenatal Alcohol Exposure (ND-PAE):* A child or youth with ND-PAE will have problems in three areas: (1) thinking and memory, where the child may have trouble planning or may forget material he or she has already learned, (2) behavior problems, such as severe tantrums, mood issues, and difficulty shifting attention from one task to another, and (3) trouble with day-to-day living, which can include problems with bathing, dressing for the weather, and playing with other children. In addition, to be diagnosed with ND-PAE, the mother of the child must have consumed more than minimal levels of alcohol before the child's birth.

Diagnosing FASD can be difficult because there is no medical test, like a blood test, for these conditions. And other disorders, such as ADHD (attention-deficit/hyperactivity disorder) and Williams syndrome, have some symptoms like FAS. To diagnose FASD, doctors typically look for prenatal alcohol exposure, central nervous system problems, lower-than-average height and/or weight, and abnormal facial features. While there is no cure for FASD, research shows that early interventions—diagnosis before age 6, stable home environment, medications, and special education and other social services—can improve a child's development.

3) *The US Department of Education declined to add FASD to the Individuals with Disabilities Education Act.* In the most recent reauthorization of the federal IDEA, a public comment noted that many children with FAS do not receive special education and related services and recommended adding a disability category for children with FAS to solve this problem. In response, the department asserted that existing federal law and regulations are sufficient to include children with FAS because special education and related services are based on the identified needs of the child and not on the disability category in which the child is classified.

Another public comment requested that FAS be added to the list of acute or chronic health conditions in the definition of other health impairment. The department's response was that the list of acute or chronic health conditions in the definition of other health impairment is not exhaustive, but rather provides examples of problems that children have that could make them eligible for

special education and related services under the category of other health impairment. The department declined to include FAS (along with bipolar disorders, dysphagia, and other organic neurological disorders) in the definition of other health impairment because these conditions are commonly understood to be health impairments.

4) *Issue brief from the Center for FASD Justice and Equity.* As part of the FASD Educational Equity Project, the Center for FASD Justice and Equity released an issue brief titled "Fetal Alcohol Spectrum Disorders: The Impact on Public Education A Complicated And Pressing Public Health Issue With Major Implications For Schools". The summary of the brief states the following in support of the overall goal of this bill:

   "The failure to identify FASD as an eligibility category creates an environment of inconsistency. While the commentary from the previous IDEA reauthorization stressed that FAS was commonly known and understood to be a health impairment the reality is that schools are not grasping this disorder as a health impairment consistently. As a result, many families are frustrated and concerned about their child's ability to receive an appropriate education. They are also concerned that schools do not have an understanding of FASD and are over reliant on school discipline as a result. The fact is that regardless of any form of discipline applied to a child on the spectrum that punishment is not going to reverse the brain damage associated with FASD. Furthermore, as the respondents across our survey for families, professionals, and individuals on the spectrum indicated that school experience plays a role in the development of secondary disabilities. The national committee strongly believes by recognizing and appropriately addressing FASD in education we can disrupt the trend towards secondary disabilities and disrupt the school-to-prison pipeline for students on the FASD spectrum. FASD needs to be addressed in education. It is a matter of justice."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) No costs to the SBE to add "fetal alcohol spectrum disorder" in the regulatory definition of "other health impairment."

2) Potential Proposition 98 General Fund cost pressures to local educational agencies to the extent more students are identified for special education services

as a result of this bill. This bill would not affect the amount of state funding provided for special education because the current funding for special education is based on total student attendance, not the number of students receiving special education services.

If the Commission on State Mandates determines the bill's requirements to be a reimbursable state mandate, the state would need to reimburse these costs to local educational agencies or provide funding through the K-12 Mandate Block Grant.

SUBJECT: One Health Program: zoonotic diseases

SOURCE: Author

DIGEST: This bill requires the California Departments of Public Health, Food and Agriculture, and Fish and Wildlife to establish and administer a program related to reducing the spread of disease from animals to humans.

Assembly Amendments add the California Department of Fish and Wildlife to the program; require the three departments to periodically post joint reports on their respective internet websites and to submit the joint reports to the Legislative Analyst's Office (LAO); require, upon the three departments' initial development of the required framework, the LAO submit to the relevant policy and fiscal committees of the Legislature a single report containing an assessment of whether the framework is a reasonable approach to meeting the purpose of the One Health Program as described; and, recommend ways in which the Legislature could conduct regular oversight of the framework's implementation.

ANALYSIS:

Existing law:

1) Establishes the California Department of Public Health (CDPH), which has responsibilities related to infectious disease control and prevention, food safety, environmental health, laboratory services, patient safety, emergency preparedness, chronic disease prevention and health promotion, family health, health equity and vital records and statistics. [HSC §100100, et seq.]

2) Establishes the California Department of Food and Agriculture (CDFA) to promote and protect the agriculture industry in California, to seek to enhance, protect, and perpetuate the ability of the private sector to produce food and fiber in a way that benefits the general welfare and economy, and maintain the economic well-being of agriculturally dependent rural communities. [FAC 101, et seq.]

This bill:

1) Requires CDPH, CDFA, and the Department of Fish and Wildlife (CDFW) (collectively, the departments) to establish and administer the One Health Program for the purpose of developing a framework for interagency coordination in responding to zoonotic diseases and reducing hazards to human and nonhuman animal health, in accordance with the One Health principles set forth by the federal Centers for Disease Control and Prevention (CDC).

2) Requires the departments to develop the framework for the One Health Program in consultation with stakeholders, that may include, but are not limited to, the One Health Office of the CDC, the Medical Board of California, the Veterinary Medical Board, agricultural programs, institutes, or schools within the

University of California system or California State University system, and community-based organizations.

3) Requires the departments, in developing the framework, to establish goals, identify activities necessary to achieve those goals, and recommend legislation or other actions to advance One Health efforts.

4) Requires, upon the departments' initial development of the required framework, the LAO submit to the relevant policy and fiscal committees of the Legislature a single report containing both of the following:

   a) An assessment of whether the framework is a reasonable approach to meeting the purpose of the One Health Program as described; and,
   b) Recommendations for ways in which the Legislature could conduct regular oversight of the framework's implementation.

5) Requires this bill to be implemented subject to an appropriation by the Legislature.

Comments

According to the author, the CDC estimates that three out of four emerging infectious diseases in people come from animals. Currently, there are 1.6 million undiscovered viruses circulating in the animal population, at least half of which have the potential to spread to humans. Many scientists have warned there are still more deadly and virulent diseases that have the potential to be transmitted from animal to humans in the future. However, neither California, nor the United States, has invested enough in to the research of zoonosis and emerging infectious diseases. This bill addresses and furthers California's commitment to the One Health approach by requiring CDPH and CDFA to develop and administer a framework to carry out One Health program goals and principles. The One Health approach is a collaborative effort of multiple health science professions coming together to achieve optimal health for people, domestic animals, wildlife, plants and our environment.

One Health Office. CDC's One Health Office is the agency's lead for One Health activities domestically and globally. Established in 2009, it is the first formal office dedicated to One Health established in a US federal agency. The office is located within the National Center for Emerging and Zoonotic Infectious Diseases at CDC. The One Health Office works to promote the concept of One Health and increase awareness of CDC's role in One Health in the United States and around the

world. The office works closely with human, animal, and environmental health partners in the United States, in other countries, and with international organizations to build strong partnerships; develops tools and trainings to advance One Health; and leverages CDC's expertise to assist partners in strengthening One Health efforts.

Zoonotic diseases. According to the CDC, zoonotic diseases are caused by harmful germs like viruses, bacterial parasites, and fungi and can be spread to humans. Animals can sometimes appear healthy even when they are carrying germs that can make people sick, depending on the zoonotic disease. Zoonotic diseases are very common, both in the United States and around the world. Scientist's estimate that more than six out of every 10 known infectious diseases in people can be spread from animals, and three out of every four new or emerging infectious diseases in people come from animals. Because of this, CDC works to protect people from zoonotic diseases in the United States and around the world. People can get infected with germs that cause zoonotic disease through direct and indirect contact with infected animals or through mosquito, flea, and tick bites, or drinking or coming into contact with contaminated water.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Costs to CDPH of approximately $1.3 million (General Fund (GF)) annually.

2) CDFA estimates costs of $603,000 for fiscal year (FY) 2022-23, $449,000 for FY 2023-24, and $449,000 for FY 2024-25 and ongoing, for two scientific staff to implement the program, facilitate data sharing, and provide communication and coordination with partner agencies (GF).

3) CDFW would need $760,000 in fiscal year 2023-24 and $694,000 in FY 2024-25 and ongoing, for three scientific staff to implement coordinated disease surveillance and response, and take a leadership role in the One Health framework development and implementation, and for disease surveillance and testing to collect, necropsy, examine, and test samples on zoonotic diseases.

SUPPORT: (Verified 8/18/22)

American Society for the Prevention of Cruelty to Animals
Boehringer Ingelheim Pharmaceuticals
California Animal Welfare Association
California Veterinary Medical Association

Mosquito and Vector Control Association of California
San Diego Humane Society

OPPOSITION: (Verified 8/17/22)

Department of Finance

ARGUMENTS IN SUPPORT: The American Society for the Prevention of Cruelty to Animals (ASPCA) writes that currently the State of California lacks a clear framework to carry out the One Health principles and goals, which aim to prevent further outbreaks of zoonotic diseases in animals and people, improve food safety and security, and protect global health security overall. Further action is needed to ensure that California continues to raise awareness and advance the goals of One Health. This bill requires the framework development be completed in consultation with stakeholders. The ASPCA requests an amendment that the unique perspective and expertise in the nexus between animal welfare and public health, be included in that stakeholder group.

ARGUMENTS IN OPPOSITION: The Department of Finance is opposed to this bill because it results in ongoing General Fund costs not included in the Administration's spending plan.

SUBJECT: Child support enforcement: license suspensions

SOURCE: California Families Rise
Reentry Advocates
Root and Rebound
Western Center on Law and Poverty

DIGEST: This bill prohibits, effective January 1, 2025, the Department of Child Support Services (DCSS) from seeking the denial, withholding, or suspension of a

driver's license from low-income child support obligors; beginning January 1, 2027, the restriction will apply only to noncommercial driver's licenses.

Assembly Amendments eliminate the bill's extension of the deadline for when a support obligor would be considered "out of compliance" for purposes of determining when a driver's license should be suspended; increase the income ceiling on when a support obligor is not eligible for an action on their license, from 60 percent to 70 percent of the relevant county median income; add the January 1, 2025, effective date; and add a requirement that, commencing January 1, 2027, DCSS's provision on seeking the denial, withholding, or suspension of a license will apply only to noncommercial licenses.

ANALYSIS:

Existing federal law:

1) Provides block grants to states to fund state programs for low-income families with children. (42 U.S.C., ch. 7, subch. IV, §§ 601 et seq.)

2) Imposes on the states receiving grants certain requirements relating to the state's collection of child and family support, including the requirement that states have and utilize a procedure for withholding, suspending, or restricting the license(s), including the driver's license, of a person with overdue child or family support obligations. (42 U.S.C. §§ 654(20)(A), 666(16).)

    a) Federal law does not specify how long a parent's support obligation must be in arrears before the state must take action against the parent's license. (42 U.S.C. § 666(e).)

Existing state law:

1) Adopts the following relevant definitions for the suspension of a license of a person with an overdue child or family support obligation:

    a) "Compliance with a judgment or order for support" is defined as being no more than 30 days in arrears in making payments in full on a court-ordered child or family support obligation. (Fam. Code, § 17520(a)(4).)

    b) "License" includes membership in the State Bar of California; a certificate, credential, permit, registration, or any other authorization issued by a board that allows a person to engage in a business, occupation, or profession;

appointment and commission by the Secretary of State as a notary public; any driver's license issued by the DMV; any commercial fishing license issued by the Department of Fish and Wildlife and, to the extent required by federal law or regulations, any license used for recreational purposes; and all licenses, certificates, credentials, permits, registrations, or any other authorization issued by a board that allows a person to engage in a business, occupation, or profession. (Fam. Code, § 17520(a)(5).)

2) Establishes the following procedures for implementing the license suspension program:

   a) A local child support agency must maintain a list of the persons who are not in compliance with court-ordered child or family support payments (i.e., more than 30 days in arrears) and submit an updated version of the list to the Department of Child Support Services (DCSS) on a monthly basis. (Fam. Code, § 17520(b).)
   b) DCSS must consolidate the lists it receives from local child support agencies and, within 30 days of receipt, provide a copy of the consolidated list to each board responsible for issuing licenses subject to suspension. (Fam. Code, § 17520(c).)

   c) In cases involving licenses other than a non-commercial driver's license, if a licensing board determines that an applicant for licensure or renewal is on the most recent list but is otherwise eligible for licensure, the board may withhold issuance or renewal of the license. (Fam. Code, § 1750(e)(1).)

   d) For driver's licenses, other than a commercial license, the DMV shall notify the obligor of the overdue payments and issue a 150-day temporary license to give the obligor time to pay the overdue child or family support. The 150-day temporary license may be renewed for one additional 150-day period upon a showing of good cause. The DMV may issue a non-temporary license to the applicant only if the applicant pays the overdue child or family support. (Fam. Code, § 17520(e)(2).)

   e) DCSS may, when economically feasible, provide a list of the support obligors who are more than four months in arrears on child or family support payments to the covered licensing boards and request that these obligors have their licenses suspended. The board must provide a notice of the intent to suspend the license in 150 days if the obligor does not pay the overdue child or family support; this temporary license may not be renewed. (Fam. Code, § 17520(e)(3).)

f) When the obligor becomes in compliance with a support order, the local child support agency must issue a notice to the obligor and the relevant board(s) stating that the obligor is in compliance. Upon receipt, the board shall process the release and issue the requested license for the remainder of the licensing term. (Fam. Code, § 17520(l).)

3) Requires DHCD to set income thresholds for persons or families of low income, moderate income, and median income, based on the median income in the geographic area, for purpose of determining eligibility for certain public benefits, and to set forth the income levels in regulations. (Health & Saf. Code, § 50093.)

This bill:

1) Provides, beginning January 1, 2025, that DCSS shall not transmit to the DMV, for purposes of denying, withholding, or suspending a driver's license for failure to pay child support, the information of a support obligor found to be out of compliance with a judgment or order for support in a case being enforced under Title IV-D of the federal Social Security Act, if the annual household income of the support obligor is at or below 70 percent of the median income for the county in which the department or the local child support agency believes the support obligor resides, based on the most recent available data published by the Department of Housing and Community Development pursuant to Section 6932 of Title 25 of the California Code of Regulations or successor regulation thereto.

2) Provides, beginning January 1, 2027, the prohibition on transmitting information to the DMV will apply only to noncommercial driver's licenses.

3) Provides that 1) and 2) shall be implemented only to the extent permitted allowed under federal law.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Cost (General Fund (GF)) of an unknown, but potentially significant amount in excess of $150,000 to the DCSS in additional staff and resources to establish new statewide policies and procedures and make modifications within the Child Support Enforcement (CSE) system to implement the change proposed by this

bill. As this bill would take effect on January 1, 2023, DCSS estimates it is unlikely that the necessary updates to policies, training, and CSE-functionality could be completed in time and absorbed within existing resources.

Additional possible loss of child support revenue to the extent the threat of license suspension increases the likelihood of payment. However, DCSS estimates approximately 84% of people ordered to pay child support have either income below $40,000 per year, or no income reported at all. As a result, this bill will make the majority of people ordered to pay support ineligible for driver's license suspension. Therefore, loss of revenue may be minor given that most people ordered to pay support are unable to pay support currently under existing law.

Finally, this bill may result in some cost savings since fewer driver's license suspension for low-income people ordered to pay support may allow local child support agency (LCSA) staff to redirect resources towards addressing other delinquent payers who have a greater ability to pay their arrears balance.

2) Costs (Motor Vehicle Account) to the Department of Motor Vehicles (DMV) in the millions to tens of millions of dollars to modify its legacy systems to ensure only commercial driver's licenses are suspended for owing child support. DMV is currently implementing an enterprise modernization project and DMV has implemented a containment strategy that limits changes to the core legacy systems to avoid the risk of catastrophic failure and detrimental impacts to the continuity of operations. If this bill is enacted, DMV anticipates it will have to build a temporary solution outside the core legacy system resulting in significant costs.

Western Center on Law and Poverty (co-source)
California Association of Family Law Specialists
Starting Over, Inc.
Tipping Point Community

OPPOSITION: (Verified 8/24/22)

None received

ARGUMENTS IN SUPPORT: According to Western Center on Law and Poverty, one of the co-sponsors of the bill:

> California has a strong interest in making sure that non-custodial parents share in the cost of raising children. It is in the state's interest to promote policies that encourage employment of these parents and to refrain from enacting policies that act as a barrier to employment. The state's current policy of suspending the driver's licenses of all parents in arrears on child support is a significant barrier to parents meeting their child support obligations. Without a license, many people cannot keep their current job and find it difficult to pay their child support. In fact, suspending the driver's license may have the opposite effect by making it harder for non-custodial parents to help with their children's expenses.
>
> There are approximately 140,000 persons currently with a license suspension in California due to not being current with their child support payments. But suspension of the license is only the beginning of the outcomes caused by the policy. A New Jersey Study found that 42 percent of persons with a suspended license lost their job, that only 45 percent of those found another job and that 88 percent of all persons with a suspended license lost income. License suspensions lead to a spiral of poverty that can be extremely hard to escape… SB 1055 will significantly reduce the use of harsh driver's licenses suspensions on persons who do not have the ability to pay child support. The use of license suspension as an enforcement tool is an outdated approach that national motor vehicle departments are asking state legislatures to cease imposing.

SUBJECT: Violent posts

SOURCE: Author

DIGEST: This bill requires a social media platform, as defined, with 1,000,000 or more monthly users to clearly and conspicuously state whether it has a mechanism for reporting violent posts, as defined; and allows a person who is the target, or who believes they are the target, of a violent post to seek an injunction to have the violent post removed.

Assembly Amendments modify the definition of "social media platform" and related definitions to make the definitions consistent with other pending social media-related bills; remove incitements to imminent lawless action from the definition of "violent post,"; and provide that a person may not bring an action under this bill's provisions if the date and time the true threat was threatened to occur has already passed.

ANALYSIS:

Existing constitutional law:

1) Provides a right to free speech and expression. (U.S. Const., 1st amend; Cal. Const., art 1, § 2.)

2) Recognizes certain judicially created exceptions to the rights of freedom of speech and expression, including for true threats and incitement to imminent violence. (*E.g.*, *Virginia v. Black* (2003) 538 U.S. 343, 359.)

Existing federal law:

1) Provides that no provider or user of an interactive computer service shall be treated as the publisher or speaker of any information provided by another information content provider. (47 U.S.C. § 230(c)(1).)

2) Provides that no provider or user of an interactive computer service shall be held liable on account of:
   a) Any action voluntarily taken in good faith to restrict access to or availability of material that users consider to be obscene, lewd, lascivious, filthy, excessively violent, harassing, or otherwise objectionable, whether or not such material is constitutionally protected.
   b) Any action taken to enable or make available to content providers or others the technical means to restrict access to material described above. (47 U.S.C. § 230(c)(2).)

3) Provides that no cause of action may be brought and no liability may be imposed under any state or local law that is inconsistent with items 1) and 2). (47 U.S.C. § 230(e)(3).)

Existing state law:

1) Authorizes a court to issue a temporary restraining order on an ex parte basis, or a restraining order after a noticed hearing, against a person who has harassed another.

a) Conduct that may warrant a restraining order includes a credible threat of violence, defined as a knowing and willful statement or course of conduct that would place a reasonable person in fear for their safety or the safety of their immediate family, and that serves no legitimate purpose, and harassment, which includes a credible threat of violence that would cause a reasonable person to suffer substantial emotional distress. (Code Civ. Proc., § 527.6.)

2) Makes it a crime to willfully threaten to commit a crime that will result in the death or great bodily injury with the specific intent that the statement is to be taken as a threat, even if there is no intent to carry out the threat, when the threat on its face and under the circumstances is so unequivocal, unconditional, immediate, and specific that it conveys to the person threatened a gravity of purpose and an immediate prospect of execution of the threat and thereby causes that person reasonably to be in sustained fear for their own safety or for the safety of their family. (Pen. Code, § 422.)

This bill:

1) Establishes the Online Violence Prevention Act.

2) Defines the following terms:
   a) "Content" means statements or comments made by users and media that are created, posted, shared, or otherwise interacted with by users on an internet-based service or application; and excludes media put on a service or application exclusively for the purpose of cloud storage, transmitting files, or file collaboration.
   b) "Social media platform" means a public or semipublic internet-based service or application that has users in California and that meets both of the following criteria:
      i) A substantial function of the service or application is to connect users and allow users to interact with each other within the service or application.
         (1) A service or application that provides email or direct messaging services does not satisfy 2)(b)(i) on the basis of that function alone.
      ii) The service or application allows users to do all of the following:
         (1) Construct a public or semipublic profile for purposes of signing onto and using the service or application.
         (2) Populate a list of other users with whom an individual shares a connection within the system.

(3) View and navigate a list of connections made by other individuals within the system.
(4) Create or post content viewable by other users, including, but not limited to, on message boards, in chat rooms, or through a landing page or main feed that presents the user with content generated by other users.

iii) For purposes of 2)(b), "public or semipublic internet-based service or application" does not include a service or application used to facilitate communication with a business or enterprise among employees or affiliates of the business or enterprise, provided that access to the service or application is restricted to employees or affiliates of the business or enterprise using the service or application.

c) "User" is a person with an account on a social media platform.
d) "Violent post" is content on a social media platform that contains a true threat against a specific person that is not protected by the First Amendment to the United States Constitution.

3) Requires a social media platform to clearly and conspicuously state whether it has a mechanism for reporting violent posts that is available to users and nonusers of the platform. If the social media platform has such a reporting mechanism, the statement must contain a link to the mechanism.

4) Allows a person who is the target of a violent post, or a person who believes they are the target of a violent post, to seek a court order requiring the social media platform to remove the violent post and any related violent post the court determines shall be removed in the interests of justice.

5) Provides that, if the social media platform has a reporting mechanism as described in 3), a person must notify the social media platform of the violent post and request that it be removed before bringing an action described in 4).

6) Provides that, if a social media platform does not have a reporting mechanism as described in 3), the court may rule on the request at any time.

7) Provides that, if a social media platform has a reporting mechanism as described in 3), the court may not rule on the request until 48 hours has passed since the person notified the social media platform of the violent post and requested its removal. If the social media platform removes the post after the action is filed but before the end of the 48-hour window, the court may dismiss the action.

8) Provides that the person may bring the action in 4) at any time, assuming the platform has been notified if the platform has a reporting mechanism, except that a person may not bring an action, and the court may not issue an order in an action, if the violent post contained a true threat against a specific person and the date and time when the true threat was threatened to occur has already passed.

9) Provides that a court shall award court costs and reasonable attorney fees to a prevailing plaintiff in an action described in 4), and that a court may award reasonable attorney fees to a prevailing defendant if the court finds that the plaintiff's prosecution of the action was not in good faith.

10) Provides that the bill does not apply to a social media platform with fewer than 1,000,000 discrete monthly users.

Comments

This bill provides a remedy for individuals who are the target of threats of violence and incitements to imminent violence on social media platforms. The bill's remedy is limited to the targets of "violent posts," defined as true threats against a specific person, to ensure that only speech unprotected by the First Amendment is affected. The bill defines "social media platform" as an online platform that has a primary function of connecting users for social interactions, which should make clear that this bill applies to classic social media sites—Facebook, Twitter, YouTube, etc.—and not online platforms that incidentally involve user profiles and connections, such as e-commerce sites, news sites that allow comments, or media sites that do not allow users to upload their own content (e.g., HBO Max, Netflix, Spotify). This bill limits its application to social media platforms with 1,000,000 discrete monthly users or more, to ensure that nascent sites are not overly burdened.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

According to the Assembly Appropriations Committee, cost pressures (Trial Court Trust Fund (TCTF)) to the trial courts in the low-to–mid-hundreds of thousands of dollars to hear and adjudicate actions related to allegedly violent posts on social media. This bill creates a cause of action (that appears similar to an a injunction) that allows a party to seek relief against any social media company that has not removed what the user considers to be a violent post or does not maintain a sufficient reporting system for removing violent posts. This bill allows a plaintiff (or defendant in certain cases) deemed the prevailing party to receive reasonable costs and attorneys' fees. However, it does not expressly provide for damages and may not require a jury trial. It is unclear how many new claims will be filed

statewide, but if 10 cases are filed in state civil court annually requiring three to five days, or 24 to 40 hours of court time, at an average cost per hour of $1,000 in workload costs, the cost to the trial courts would be between $240,000 and $400,000 annually. Although courts are not funded on the basis of workload, increased pressure on the TCTF and staff workload may create a need for increased funding for courts from the General Fund to perform existing duties.

SUBJECT: California Farmworkers Drought Resilience Pilot Project

SOURCE: Author

DIGEST: This bill establishes the "California Farmworkers Drought Resilience Pilot Project" (Pilot Project) to provide supplemental pay in the forms of cash assistance for eligible households to help meet their basic needs.

Assembly Amendments result in the pilot program being administered by "eligible entities" who receive grants for this purpose from the California Department of Social Services (CDSS). These amendments further allow CDSS to establish an appropriate method, process, and structure for grant management, fiscal

accountability, payments to eligible households, and technical assistance and supports for entities receiving grants under this Pilot Project.

ANALYSIS:

Existing law:

1) Requires, subject to an appropriation for this purpose in the annual Budget Act, the California Department of Social Services (CDSS) to administer the California Guaranteed Income Pilot (GIP) Program to provide grants to eligible entities for the purpose of administering pilot programs and projects that provide a guaranteed income to participants. Further requires CDSS to prioritize funding for pilot programs and projects that serve California residents who age out of extended foster program at or after 21 years of age or who are pregnant individuals. *(WIC 18997(a))*

2) Requires CDSS, in consultation with relevant stakeholders, to determine the methodology for, and manner of, distributing grants awarded pursuant to GIP Program, and further requires CDSS ensure the funds are awarded in an equitable manner to eligible entities in both rural and urban counties and in proportion to the number of individuals anticipated to be served by an eligible entity's pilot program or project. *(WIC 18997(a))*

3) Requires, in order for an eligible entity to receive GIP Program grant funds, the entity to do both of the following:
   a) Present commitments of additional funding for pilot programs and projects to be funded with a grant received pursuant to this chapter from a nongovernmental source equal to or greater than 50 percent of the amount of funding to be provided to the pilot program or project from a GIP Program grant; and,
   b) Agree to assist CDSS in obtaining, or to pursue, to the extent necessary, all available exemptions or waivers to ensure that guaranteed income payments made under those pilots and projects are not considered income or resources for the recipient of the GIP or any member of their household in any means-tested federal, state, or local public benefit programs. *(WIC 18997(b))*

4) Requires, notwithstanding any other law, guaranteed income payments received by an individual from a GIP program or project to not be considered income or resources for purposes of determining the individual's, or any member of their household's, eligibility for benefits or assistance, or the amount or extent of benefits or assistance, under any state or local benefit

assistance program. Further requires CDSS to identify federal benefit and assistance programs that require an exemption or waiver in order for a guaranteed income payment to excluded as income or resources and seek such a waiver. If unable to obtain an exemption or waiver, CDSS still implement the GIP Program and may consider alternatives to prevent adverse consequences for the participants, in consultation with the Legislature and stakeholders. *(WIC 18997(c))*

5) Requires, subject to federal law and any waivers received for the implementation of this provision, the GIP Program payments to not be considered as income or resources for a period of 12 months from receipt for the purposes of determining eligibility to receive benefits, or the amount or extent of medical assistance, under the Medi-Cal program. *(WIC 18997(d))*

6) Requires CDSS to review and evaluate GIP Program funded pilot programs and projects to determine, at a minimum, the economic impact of the programs and projects and their impact on outcomes of individuals who receive guaranteed income payments, as provided. Further requires CDSS to consult with stakeholders and legislative staff on the details of, and data components to include in, the evaluation, among other things, and submit a report to the Legislature regarding this review and evaluation, as provided. *(WIC 18997(e))*

7) Requires CDSS to report to the Legislature, and post on its internet website, information about the GIP Program grants funded, including which entities received grants and the number of expected recipients, among other things. *(WIC 18997(e))*

8) Defines, for purposes of the GIP Program, "eligible entity" as either of the following:
   a) A city, county, or city and county;
   b) A nonprofit organization that is exempt from federal income taxation, as provided, and that provides a letter of support for its pilot or project from any county or city and county in which the organization will operate its pilot or project. *(WIC 18997(f))*

This bill:

1) Establishes the Pilot Project to provide supplemental pay in the form of cash assistance for eligible households to help meet their basic needs, with CDSS to administer the pilot project subject to an appropriation by the Legislature for this purpose.

2) Defines the following:
   a) "Eligible entity" means a public or private entity that provides services to the farmworker population;
   b) "Eligible household" means a household in which one member of the household is a farmworker;
   c) "Farmworker" has the same meaning as the term "agricultural employee," as defined in Section 1140.4 of the Labor Code; and,
   d) "Supplemental pay" means unconditional cash payments of equal amounts issued monthly to eligble households with the intention of securing the economic security of those households.

3) Requires CDSS implement the pilot project by awarding grants to eligible entities for the purpose of issuing supplemental pay to eligible households and further requires CDSS, in consultation with relevant stakeholders, to determine the methodology for, and manner of, distributing grants awarded and ensure grants are awarded in an equitable manner to eligible entities.

4) Requires, in order to receive pilot program funds, an eligible entity: present commitments of additional nongovernmental funding to supplement the grant to be received by the entity in an amount equal to or greater than 50 percent of the amount of funding to be provided to the entity from the grant pursuant to this chapter; and, agree to assist the department in obtaining, or to pursue to the extent necessary, all available exemptions or waivers to ensure that supplemental pay issues to eligible households is not considered income or resources of the household for purposes of eligibility for any means-tested federal benefit programs.

5) Requires supplemental pay received pursuant to the pilot program not be considered income or resources for purposes of determining the household's eligibility for benefits or assistance, or the amount or extent of benefits or assistance, as provided.

6) Allows CDSS to establish an appropriate method, process, and structure for grant management, fiscal accountability, payments to eligible households, and technical assistance and supports for entities receiving a grant under this chapter that ensures transparency and accountability in the use of state funds. Allows CDSS, as their discretion, to contract with one or more entities for purposes of administering the grants and meeting the requirements of this pilot program, as provided.

7) Allows CDSS to accept and expend funds from nongovernmental sources for the purposes of this pilot and further allows them to accept in-kind contributions, including, but not limited to, financial mentorship services.

8) Prohibits a householder from continuing to receive supplemental payments if the household no longer includes a farmworker, and further requirements that a newly ineligible household not be required to forfeit any supplemental pay already received.

9) Requires CDSS to work with at least one independent, research-based institution to identify existing, and establish additional, outcome measurements. Requires these measurements inform an evaluation report that shall be provided to the Legislature on or before December 31, 2026, as provided.

10) Sunsets these provisions on January 1, 2027.

Comments

According to the author, "in recent years, California's farmworkers have been impacted by unprecedented events, including intensifying and worsening drought. As the length and frequency of drought periods become more uncertain, some farmers have to make the tough decision to reduce planting, and in some cases, fallow portions of their land. With fewer crops to tend for shorter periods of time, farmworkers are expected to continue seeing a reduction in their hours and their ability to find work."

The author goes onto note, "California's farmworkers are a crucial part of the state's economy. They put food on the table for people throughout our entire country, and work tirelessly to do so. In 2021 alone, California's drought led to $1.2 billion in direct costs to the agriculture industry and the loss of over 8,500 jobs. SB 1066 addresses the impacts of drought on farmworkers by creating the California Supplemental Pay for Farmworkers Pilot Project, providing eligible farmworker households with financial assistance to meet basic needs. The pilot project monthly payments to households who meet specific eligibility criteria, allowing the funds to go to the farmworkers who need them most."

Farmworkers in California. California is the largest producer of agricultural goods in the United States, and is one of the largest agricultural producing regions in the world. As a result, farmworkers play a key role in the operation and delivery of the state's food system, but continue to face a number of economic disadvantages when compared to other Californians. The HCD reports that depending on the

source, the number of farmworkers residing in California ranges from 391,700 to 802,662. These estimates include both migratory and permanent farmworkers. A large portion of these individuals are also estimated to be undocumented.[1]

According to a 2018 report published by the HCD, on average, farmer incomes are less than half of the area median household income of other Californians. The report also indicates a number of trends that suggest a changing farmworker population in California. This includes a decrease in the number of single farmworkers, from 59 percent in 1990 to 25 percent in 2012, and fewer farmworkers migrating from farm to farm on an annual basis, from 43 percent in 1990 to 16 percent in 2012.[2] Since the HCD is focused on housing, their report concludes that these shifting demographics have a variety of implications for the types of housing needed for farmworkers, including greater need for affordable housing, greater need for permanent housing, and greater need for family-friendly housing. It seems safe to assume that these trends have implications for needs beyond housing, with implications for changing needs in regards to supportive services and safety net programs as well.

California Guaranteed Income Pilot (GIP) Program. Through the 2021-22 Budget *(AB 153, Committee on Budget, Chapter* 86, *Statutes of 2021)* the California GIP Program was established to provide grants to eligible entities for the purpose of administering pilot programs and projects that provide a guaranteed income to participants. The budget for the GIP Program is $35 million (General Fund) to be spent over five years. CDSS is the administering department and is responsible for prioritizing funding for pilot programs and projects that serve California residents who age out of the extended foster care program at or after 21 years of age or individuals who are pregnant. CDSS, in consultation with stakeholders, is also responsible for determining the methodology for, and manner of, distributing GIP program grants. CDSS and the entities receiving funding, are also required to seek waivers or exemptions as necessary to prevent guaranteed income payments from being calculated as income or resources for the purpose of determining a recipient, or member of their household's, eligibility for benefits or assistance, or the amount or extent of benefits or assistance, provided under any state or local benefit or assistance program, the Medi-Cal program, and federal benefit and assistance programs.

Entities eligible to receive GIP Program grants are: cities, counties, or a city and county; and, a nonprofit organization, as provided, that provides a letter of support

[1] https://www.hcd.ca.gov/policy-research/specific-policy-areas/farmworkers.shtml
[2] https://www.hcd.ca.gov/policy-research/plans-reports/docs/sha_final_combined.pdf

for its pilot or project from any county or city and county in which the organization will operate its pilot project. Additionally, in order to receive funding, the eligible entity must present commitments of additional funding for GIP program pilots and projects from a nongovernmental source equal to or greater than 50 percent of the amount of funding provided by a GIP grant. The eligible entity must also agree to assist CDSS in obtaining, or to pursue, all available exemptions or waivers to ensure that guaranteed income payments made under the funded pilots and projects are not considered income or resources for the recipient of the guaranteed income payments or any member of their household in any means-tested federal, state, or local public benefit programs.

The GIP program in part stems from SB 739 (Cortese, 2021) which would have created a UBI pilot project for foster youth who exited care at 21 years of age, administered by CDSS. SB 739 would have provided for monthly $1,000 UBI payments to former foster youth for three years and defined UBI as unconditional cash payments of equal amounts issued monthly to individual residents of California with the intention of ensuring the economic security of the recipients.

CDSS is currently working with stakeholders to develop a Request for Applications (RFA) process for GIP program funding. CDSS expects to select prospective applicants for funding through the RFA process this year. The RFA guidelines are expected to be posted later this spring.

Related/Prior Legislation:

AB 153 (Committee on Budget, Chapter 86, Statutes of 2021) created the GIP Program, among other things, to provide grant funding to eligible entities for guaranteed income pilots or projects, as provided.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- Subject to an appropriation by the Legislature for this purpose, CDSS estimates annual General Fund (GF) costs of $3 million to $5 million for three years, to administer the program, including initial implementation, contracting for an independent research-based program evaluation, and meeting other requirements.

- CDSS estimates GF cost pressures of an unknown amount, but likely in the hundreds of millions of dollars annually for the life of the pilot, to fund the grants. The number of participants is unknown and the bill does not specify the

monthly payment amount so exact costs are difficult to pinpoint. For illustration, if 50,000 farmworkers each received a $200 monthly payment for 36 months, the cost to fund those payments would be $360 million.

Earlier this year, the bill's author submitted a one-time $20 million GF budget request to fund the California Farmworkers Drought Resilience Pilot Project in this bill. The project was not funded.

SUBJECT: Vehicles: sound-activated enforcement devices

SOURCE: Author

DIGEST: This bill requires the California Highway Patrol (CHP) to evaluate the efficacy of sound-activated enforcement devices by evaluating devices from at least three different companies.

Assembly Amendments recast provisions of the bill from a six unnamed city pilot to evaluate the use of sound-activated devices to enforce vehicle noise limit laws, to an evaluation by the CHP of the efficacy of sound-activated enforcement devices, as specified.

ANALYSIS:

Existing law:

1) Requires every motor vehicle subject to registration to be equipped with an adequate muffler in constant operation and properly maintained to prevent any excessive or unusual noise and prohibits a muffler or exhaust system from being equipped with a cutout, bypass, or similar device.

2) Prohibits the modification of an exhaust system of a motor vehicle in a manner that will amplify or increase the noise emitted by the motor of the vehicle so that the vehicle exceeds existing noise limits when tested in accordance with specified standards.

3) Requires, under existing constitutional provisions, that a statute that limits the right of access to the meetings of public bodies or the writings of public officials and agencies be adopted with findings demonstrating the interest protected by the limitation and the need for protecting that interest.

4) Provides, under the California Public Records Act (CPRA), that public records are open to public inspection upon request, unless the records are otherwise exempt from public disclosure.

5) Defines "public records" for CPRA purposes to include any writing containing information relating to the conduct of the public's business that is prepared, owned, used, or retained by any state or local agency, regardless of physical form or characteristics; and defines a "writing" to include any handwriting, typewriting, printing, photostating, photographing, photocopying, transmitting by electronic mail or facsimile, and every other means of recording upon any tangible thing any form of communication or representation, including letters, words, pictures, sounds, or symbols, or combinations thereof, and any record thereby created, regardless of the manner in which the record has been stored.

This bill:

1) Defines "sound-activated enforcement device" or "device" to mean an electronic device that utilizes automated equipment that activates when the noise levels have exceeded the legal sound limit, as specified, and is designed to

obtain clear video of a vehicle and its license plate and requires a sound-activated enforcement device to do all of the following:

a) Record audio, precision accuracy noise levels, and high definition video in two directions.

b) Utilize an automated system that triggers when excessive vehicle noise over the limit is detected and save the data for review.

c) Automatically delete any evidence not related to a violation.

d) Permit the department to manually review evidence to ensure a violation has occurred.

e) Conform to the class 1 accuracy standards in the International Electrotechnical Commission's (IEC) standard IEC 61672:2013, or any other accuracy standard determined to be appropriate by the CHP.

2) Requires the CHP to evaluate the efficacy of sound-activated enforcement devices by evaluating devices from at least three different companies.

3) Requires the CHP, on or before January 1, 2025, to prepare and submit its findings and recommendations from the evaluation in a report to the Legislature, which shall include all of the following information:

a) How effective the devices are at determining that a vehicle was not equipped with an adequate muffler in constant operation and properly maintained in accordance with the requirements, as specified.

b) How often the device identified a potential violation that was not related to having an adequate muffler, and the types of sounds other than a loud muffler that triggered the device.

c) What percentage of time an officer was unable to determine the source of the sound that activated the device.

d) How often the device was required to be serviced.

e) What, if any, technology does the sound-activated enforcement system use to determine the direction or source of the sound that violated the sound limits, as specified.

f) Where the devices were located, and whether the location had any consequences to the effectiveness of the device.

g) The number of devices the department tested and from which companies were the devices that were tested.

h) Recommendations on all of the following:

i) Which, if any, device or devices would the department recommend be used for the purposes of enforcing muffler requirements, and the reasons for that determination. If the department determines that it does not recommend any of the devices tested, the report shall include the standards and parameters that shall be met by future technology.

ii) What, if any, restrictions should be placed on the use of sound-activated enforcement devices, including, but not limited to, the decibel level setting for triggering a potential violation for the purposes of enforcement.

iii) Where the devices should be optimally located in order to reduce the chances of a false violation.

iv) Descriptions and explanation of any necessary and associated training that an individual reviewing these violations would need to go through in order to operate the device, including recommendations for what is necessary for a robust human review process.

v) Any other recommendations the department believes would be necessary for authorizing the use of sound-activated enforcement devices.

i) A video demonstrating the device. Requires the video to be edited to remove any personally identifying information, including the blurring of persons recorded in the video, street addresses, and license plates.

4) Requires the CHP to delete all videos recorded on a highway by a device within five days of the video being recorded. However, requires the CHP to keep 15 videos from the devices of each company evaluated for the purposes of preparing the report and documenting the issues related to each device that helped the CHP make its recommendations. Requires the CHP to not keep any recording that picked up audio of a person speaking, if recorded on a highway.

5) Provides that information collected and maintained by the CHP using a sound-activated enforcement device that could be used to identify the identity or location of any individual shall be confidential and only be used for purposes of this bill, and shall not be disclosed to any other persons, including, but not limited to, any other state or federal government agency or official for any other

purpose, except as required by the reporting requirements in this bill, state or federal law, court order, or in response to a subpoena in an individual case or proceeding.

Background

Loud cars are a common source of noise pollution. California law requires most vehicles to be equipped with mufflers to ensure a sound level of 80 decibels (db) or less to protect hearing. When someone gets a ticket for having a bad muffler or a modified muffler, they are given the option to fix the muffler in lieu of paying the entire fine (motorcycles are not eligible to receive a fix-it ticket for loud mufflers). They can prove the muffler is fixed by taking their car to a Bureau of Automotive Repair's approved vendor to test a vehicle's db. When a vehicle is tested for the purposes of a fix-it ticket, the vehicle is tested to see if it is at 95 db in order to past the test. The higher db for the fix-it test reflects the test conditions for the vehicle (indoors vs. outdoor setting). Generally, 95 db is comparable to the noise emitted by a food processor; a shouted conversation; or the inside of a subway car.

According to the Center for Disease Control (CDC), about 40 million U.S. adults between 20-69 years of age have noise-induced hearing loss. "Over time, listening to loud sounds at high db levels can cause hearing loss—or other hearing problems like a ringing sound in your ear that won't go away. The louder a sound is, and the longer you are exposed to it, the more likely it will damage your hearing."

The CDC outlines that continual exposure to noise can cause stress, anxiety, depression, high blood pressure, heart disease, and many other health problems. CDC estimates that the costs of the first year of hearing loss treatment in older adults is projected to increase more than 500% from $8 billion in 2002 to an estimated $51 billion in 2030. CDC outlines that 85 db is the approximate point at which extended exposure can cause hearing damage.

In recent years, the Legislature has taken several steps to address the issue of loud mufflers. AB 1824 (Committee on Budget, Chapter 38, Statutes of 2018) removed the fix-it ticket authority for having a modified or inadequate muffler. After concerns were raised about the impacts of this provision from legal services groups, the Legislature modified this restriction with the passage of SB 112 (Committee on Budget, Chapter 364, Statutes of 2019) to only restrict fix-it tickets for modified mufflers for motorcycles.

SB 1079 seeks to introduce the new technology of sound automated detection devices to detect illegal vehicle exhaust noise to California.

How does the technology work? The sound automated detection devices described in this bill are known as noise cameras. These cameras are relatively new, as they were developed in 2020 and have only been in use since early 2021. Each camera is priced at around $25,000. These devices are cameras equipped with a microphone and an embedded sound meter. The camera allows the user to set a defined noise limit. When that pre-defined noise limit is exceeded, the camera begins to record the noise event. The noise level, the audio at the time of the event, and the video of the event are all recorded simultaneously. Functionally, these cameras perform similarly to red light cameras. However, according to the manufacturer of these cameras, ticketing is not automatic; it requires manual review. The system permits a reviewer to identify the offending vehicle and generate a report with a picture of the vehicle, the date, time, db level, and a vehicle's license plate. The report can then be used to issue a ticket.

The noise cameras do not have the technology to differentiate between sounds. The system is not automatic and, as noted, requires manual review to determine whether the noise event that triggered the camera was a violating vehicle or another source of noise such as a siren, horn, gunshot, brew bike, or a myriad of other possibilities. Similarly, if a vehicle is in a group of other vehicles, perhaps at an intersection, there may be an issue recognizing which vehicle violated the sound limit, even with a manual review. The cameras are currently being used in New York City; Knoxville, Tennessee; the Royal Borough of Kensington; and Chelsea in London. Philadelphia is considering using the cameras. Conversely, in Toronto, city councilors decided not to pursue the use of noise cameras because, among other issues, the "automated technology was not able to discern between sources of noise and could not identify individual offending vehicles to the degree that would meet the evidentiary test required for court purposes." This means that a manual review would be required.

Comments

1) *Purpose of the bill.* According to the author, "This bill will have CHP evaluate the use of automated noise cameras to detect illegal vehicle exhaust noise. Noise pollution in cities is getting demonstrably worse. Law enforcement officers are currently the only mechanism in which illegal exhaust noise can be ticketed and enforcement action taken. Nevertheless, the problem is that these violations can occur anywhere, at any time, in multiple places at once, and typically while moving at high speeds, making the reality of consistent enforcement much more difficult. When CHP completes its evaluation, California can look to implement these systems."

2) *Assembly amendments turn pilot into a CHP evaluation of the new technology.* SB 1079, as approved by the Senate, would have authorized six unnamed cities to conduct a pilot program to evaluate the use of sound-activated enforcement devices to capture vehicle noise levels that exceed the legal sound limit; and required information collected and maintained by a city using a sound-activated enforcement device to be confidential. Stakeholders and Assembly policy committees raised a number of concerns about the pilot program, including about the fact that it would have authorized issuance of citations (and fines), even though the technology used as the basis for issuance of citations is untested and unproven, at least on a large scale.

   Based upon those concerns, this bill was recently recast as one to require the CHP to conduct a study evaluating the efficacy of sound-activated enforcement devices that are designed to measure vehicle noise levels and report back to the Legislature about its findings. This bill also makes information collected for the study and maintained by the CHP largely confidential.

3) *CPRA.* The recent amendments to SB 1079 contain a specific exemption to the CPRA. As detailed in the Assembly Judiciary Committee analysis of this bill, the CPRA was enacted in 1968 (Chapter 1473, Statutes of 1968), and similar to the federal Freedom of Information Act, the CPRA requires that the documents and "writings" of a public agency be open and available for public inspection, unless they are exempt from disclosure. The CPRA is premised on the principle that 'access to information concerning the conduct of the people's business is a fundamental and necessary right of every person in this state." It defines a "public record" to mean "any writing containing information relating to the conduct of the public's business prepared, owned, used, or retained by any state or local agency regardless of physical form or characteristics."

   This bill seeks to enact a specific exemption to the CPRA, by providing that all "information collected and maintained by the department using a sound-activated enforcement device, that could be used to identify the identity or location of any individual" and allowing it to "only be used for purposes of this section." In addition, this bill prohibits the information from being "disclosed to any other persons, including, but not limited to, any other state or federal government agency or official for any other purpose, except as required by the reporting requirements in this section, state or federal law, court order, or in response to a subpoena in an individual case or proceeding."

4) *Removal of opposition.* The amendments taken in the Assembly addressed the privacy and transparency concerns of stakeholders. ACLU California and others have officially removed opposition.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- According to CHP, testing sound-activated devices, as required by this bill, may require a specialized unit comprised of one sergeant, three officers, and two audio/video specialists. CHP estimates the personnel cost of such a unit to be approximately $1,584.37 for every hour of testing. CHP calculates the annual personnel cost of a unit focused on the sound-activated enforcement device study to be approximately $3 million.

- In addition to personnel costs, CHP notes it might incur other significant administrative, material and ongoing equipment maintenance and calibration costs for the devices themselves, as well as costs for travel.

- CHP reports difficulty estimating costs for this bill and developed its cost estimate from its experience with testing work CHP conducted for DMV license plate testing efforts that were conducted by the CHP's Commercial Vehicle Section.

SUPPORT: (Verified 8/24/22)

Barbary Coast Neighborhood Association
City of San Diego
City of Santa Monica

OPPOSITION: (Verified 8/24/22)

None received

ARGUMENTS IN SUPPORT: According to the City of Santa Monica, "Noise pollution is an unwanted or disturbing sound that causes adverse reactions for humans and other living creatures. Loud noises in the street can disrupt walking or cycling, but also can cause hearing loss and pose dangers to physical and cognitive health. Exposure to loud sounds has been shown to raise levels of stress hormones, including cortisol, adrenaline, and noradrenaline. Chronically high levels of these hormones can impact heart disease, hypertension, stroke, immune responses, and cognitive functioning.

“The study called for in SB 1079 will provide the Legislature with key findings that we hope will demonstrate the efficacy of these devices and will then encourage the Legislature to adopt a pilot program as was originally called for in this bill so that cities such as Santa Monica may use this enforcement tool that will help crack down on these noisily modified vehicles and motorcycles that adversely impact our resident’s quality of life.”

SUBJECT: Disorderly conduct: peeping, recording, and distribution of intimate images

SOURCE: California District Attorneys Association

DIGEST: This bill defines the terms "distribute" and "identifiable" for purposes of the existing crime of unlawful distribution of a private image, also known as "revenge porn."

Assembly Amendments amend the definition of "distribute" to include exhibiting in public or giving possession.

ANALYSIS:

Existing law:

1) Makes it a misdemeanor for a person to intentionally distribute an image of the intimate body parts of another or of the person depicted engaged in a sex act under circumstances in which the persons agreed or understood that the image would remain private, and the person distributing the image knows or should know that the distribution of the image will cause serious emotional distress, and the person depicted suffers that distress. This crime is also commonly known as "revenge porn." (Pen. Code, § 647, subd. (j)(4)(A).)

2) Provides that distribution of the image as described below is not a violation of the law:

   a) The distribution is made in the course of reporting an unlawful activity;

   b) The distribution is made in compliance with a subpoena or other court order for use in a legal proceeding; or,

   c) The distribution is made in the course of a lawful public proceeding. (Pen. Code, § 647, subd. (j)(4)(D).)

3) Defines "intimate body part" to mean "any portion of the genitals, the anus and, in the case of a female, also includes any portion of the breasts below the top of the areola, that is either uncovered or clearly visible through clothing." (Pen. Code, § 647, subd. (j)(4)(C).)

4) States that a person intentionally distributes an image described above when that person personally distributes the image, or arranges, specifically requests, or intentionally causes another person to distribute that image. (Pen. Code, § 647, subd. (j)(4)(B).)

This bill:

1) Provides that it is also unlawful for a person who intentionally causes the image to be distributed.

2) Defines "intentionally causes an image to be distributed" to mean "when that person arranges, specifically requests, or intentionally causes another person to distribute the image."

3) Defines "distribute" to include exhibiting in public or giving possession.

4) Defines "identifiable" through cross-reference to the definition that currently exists in the Penal Code section, which provides that the term means "capable of identification, or capable of being recognized, meaning that someone, including the victim, could identify or recognize the victim. It does not require the victim's identity to actually be established."

5) Exempts the distribution of an image that is related to a matter of public concern or public interest, but clarifies that a distributed image is not a matter of public interest or public concern solely because it depicts a public figure.

Comments

According to the author, "Under existing law, the statute does not provide a specific definition of what it means to 'distribute' a pornographicimage. In fact, 'there is no indication that the term 'distribute[s]' was intended to have a technical legal meaning[] or to mean anything other than its commonly used and known definition . . . ' in the context of Penal Code section 647(j)(4). (*People v. Iniguez* (2016) 247 Cal. App. 4th Supp. 1, 10.) The *Iniguez* court referenced the Merriam-Webster Dictionary as an appropriate source to ascertain the common definition of ;distribute.' Today, Merriam-Webster defines *distribute* as 'to give out or deliver.' (Merriam-Webster Dict. Online <https://www.merriam-webster.com/dictionary/ distribute [as of September 1, 2021].) This definition would suggest that distribution requires a transfer of possession of the image from one person to another; merely displaying or otherwise showing a third-party an intimatephoto would not qualify."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Cost pressure (Trial Court Trust Fund) possibly in the low-to-mid-hundreds of thousands of dollars to the trial courts in increased workload. This bill expands an existing misdemeanor related to revenge porn. Generally, Penal Code section 647, subdivision (j) is punishable as a misdemeanor and subject to up one year in county jail. A defendant charged with a misdemeanor is entitled to no-cost legal representation and a jury trial. If 10 new crimes are filed annually statewide and proceed to trial resulting in three days of court time, at an estimated cost of approximately $8,000 for an eight-hour court day, the approximate workload cost to the courts is $240,000 annually. Although courts are not funded on the basis of workload, increased pressure on the Trial Court

Trust Fund and staff workload may create a need for increased funding for courts from the General Fund (GF) to perform existing duties.

- Non-reimbursable costs (local funds) of an unknown, but potentially significant amount, to the counties in increased incarceration costs. This bill expands an existing six-month misdemeanor with subsequent offenses being punishable by up to one year in county jail. This may result in more people being sentenced to county jail. The average annual cost to house a person in county jail is approximately $47,000. If this bill results in three more people being sentenced to county jail statewide for the crime of revenge porn, the total cost to the counties would be $141,000. Proposition 30 (2012) and Government Code section 17556, subdivision (g) prohibits reimbursement for a criminal penalty change or expansion.

OPPOSITION: (Verified 8/22/22)

ACLU California Action
California Attorneys for Criminal Justice

California Public Defenders Association
Pacific Juvenile Defender Center

ARGUMENTS IN SUPPORT: According to the Prosecutors Alliance of California, "Under existing law, the statute defining the crime of revenge porn does not provide a specific definition of what it means to "distribute" an image. Without a statutory definition of distribution as it applies to this crime, there is ambiguity as to whether distribution requires a transfer of an image from one person to another, or whether simply publicly displaying such an image is sufficient to meet the element of distribution."

ARGUMENTS IN OPPOSITION: According to the Pacific Juvenile Defender Center, who is opposed unless amended, "Without question, the kind of conduct SB 1081seeks to deter and punish is most often engaged in by youth. As the Legislature already knows, as outlined above, youth, including young adults under the age of 26, are impetuous, irrational and susceptible to peer pressure. SB 1081 will not deter youth from sending unsolicited sexual content. The Legislature should invest in state mandated programs in communities and schools, designed to *effectively* deter youth from distributing intimate images.

"Accordingly, PJDC respectfully urges your "NO" vote on SB 1081 . . . unless it is amended to exclude youth under age 26."

SUBJECT: Agricultural land: foreign ownership and interests: foreign governments

SOURCE: Author

DIGEST: This bill prohibits foreign governments and their state-controlled enterprises, as defined, from newly acquiring an interest in agricultural land in

California after January 1, 2023. This bill also requires the California Department of Food and Agriculture (CFDA) to compile an annual report on the extent of, and any recent changes in, foreign ownership over agricultural land, water rights, water desalination facilities, energy production, energy storage, and energy distribution in California, including any possible impacts on Californians' food security.

Assembly Amendments (1) clarify that the agricultural land ownership prohibition does not apply to federally recognized Indian tribes; (2) eliminate the list of the top 10 nations owning the most agricultural land in California from the required annual report; (3) require the annual report to include information about changes in the leasing by foreign governments of agricultural land, water rights, water desalination facilities, energy production, energy storage, and energy distribution; and (4) add an urgency clause.

ANALYSIS:

Existing law:

1) Establishes that noncitizens have the same property rights as citizens. (Cal. Const., art. I, § 20.)

2) Provides that any person, whether citizen or alien, may take, hold, and dispose of property, real or personal, within this State. (Civ. Code § 671.)

3) Establishes the U.S. Agricultural Foreign Investment Disclosure Act (Act). (7 U.S.C. §§ 3501 – 3508.)

4) Defines "foreign person," for purposes of the Act, to include foreign governments as well as specified foreign individuals and legal entities. (7 U.S.C. § 3508(3).)

5) Defines "agricultural land," for purposes of the Act, to include any land used for agricultural, forestry, or timber production purposes as prescribed by the U.S. Department of Agriculture (USDA) regulations. (7 U.S.C. 3508(1).)

6) Requires foreign persons, as part of the Act, to report information regarding current and future acquisitions of U.S. agricultural land, including the name of the owner, the total acreage, and the intended use of the land, among other specified things. (7 U.S.C. § 3501.)

7) Directs the USDA to transmit the reports generated pursuant to 6), above, to the corresponding state department of agriculture, or such other appropriate state

agency as the Secretary considers advisable, at six month intervals. (7 U.S.C. § 3505.)

8) Provides that any report submitted to the Secretary under 6), above, shall be available for public inspection at the USDA in the District of Columbia not later than 10 days after the date on which such report is received. (7 U.S.C. 3506.)

This bill:

1) Defines "agricultural land" to mean:

   a) Land currently used for, or, if currently idle, land last used within the past five years, for farming, ranching, or timber production, except land not exceeding ten acres in the aggregate, if the annual gross receipts from the sale of the farm, ranch, or timber products produced thereon do not exceed $1,000; or

   b) Land exceeding 10 acres in which 10 percent is stocked by trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated.

2) Defines "foreign government" to mean a government other than the government of the United States, its states, territories, or possessions.

3) Defines "state-controlled enterprises" to mean a business enterprises, however denominated, in which the government has a controlling interest.

4) Defines "controlling interest" to mean either of the following:

   a) Possession of 51 percent or more of the ownership interests in an entity.

   b) A percentage ownership interest in an entity of less than 51 percent, if the foreign government actually directs the business and affairs of the entity without the requirement or consent of any other party.

5) Defines "interest" in land to mean any estate, remainder, or reversion, as specified, or portion thereof, or an option pursuant to which one party has a right to cause legal or equitable title to agricultural land to be transferred.

6) Prohibits a foreign government or its state-controlled enterprises from newly purchasing, acquiring, or holding any interest in agricultural land in California beginning January 1, 2023, except where application of the prohibition would violate a treaty between the U.S. and another country. Does not apply to federally recognized Indian tribes.

7) Directs CDFA to compile an annual report addressing all of the following:

   a) Total amount of California agricultural land that is under foreign ownership or lease.

   b) Percentage change in foreign ownership or leasing of California agricultural land by year, over the past 10 years.

   c) Purpose for which foreign-owned or foreign-leased agricultural land is being used currently, including any significant recent changes or trends in the use of foreign-owned agricultural land.

   d) Extent of and recent changes in foreign ownership or leasing of water rights.

   e) Extent of and recent changes in foreign ownership or leasing of water desalination facilities.

   f) Extent of and any recent changes in foreign ownership or leasing of energy production, storage, or distribution facilities in California.

   g) CDFA's assessment of the impact of any recent changes in foreign ownership or leasing of agricultural land, water rights, or water desalination facilities on Californians' food security.

   h) Any legislative, regulatory, or administrative policy changes CDFA recommends in light of the information in the report.

8) Instructs CDFA to publish the inaugural report on its website by March 31, 2023, and on March 31 of each following year.

9) Directs CDFA to deliver copies of those recommendations to the Governor and the Assembly and Senate Committees on Agriculture if the report contains legislative or policy recommendations.

10) Contains an urgency clause.

Comments

The issue this bill is intended to address

According to the author:

> Foreign ownership of US agricultural land has steadily grown in prevalence over recent years. As our state continues its work towards more equitable food

> access, the need to address foreign ownership of agricultural land grows. Foreign owners of US agricultural land have less incentive to prioritize the needs of our own farmers, and at times this can hurt those who often rely most on the resources the land provides. The resulting consequences can lead to economic damage as money is taken away from local areas in favor of overseas investors and owners.

As evidence to back the concerns expressed above, the author points to a California Research Bureau (CRB) report requested by the author. The report finds that:

> Foreign-held land in California represents 2.7 percent of the state's total privately held agricultural land. This is close to the national average of 2.9 percent. The percentage of California agricultural land that is foreign held has increased steadily, yet is small compared with other states. Maine is the highest percentage of foreign-held agricultural land (19.5 percent), followed by Hawaii (9.2 percent) and Washington (7.1 percent).[1]

The extent of this steady increase in foreign ownership of agricultural land in California should not be overstated. The CRB report includes a table showing that the proportion of California agricultural land that is foreign-owned increased by less than one-third of a single percentage point *over the past decade*. That represents only a small fraction of the total agricultural land in California. Still, the trend is toward slightly greater foreign ownership over California's agricultural land. This bill is intended to stop that trend before it reaches a point where it could potentially undermine the state's food security, as well as to establish a mechanism for documenting the extent of existing foreign government ownership of California agricultural lands.

Constitutional considerations about state restrictions on foreign land ownership

Though it probably stands on solid constitutional footing, it should be noted that this bill brushes up against three constitutional doctrines: the foreign affairs doctrine, the dormant foreign commerce clause, and statutory preemption. (NOTE: The Senate Judiciary Committee analysis of this bill has details at Comment 3.)

Cautionary lesson from California's past

Both the U.S. and the California constitutions demand equal protection under the law. (U.S. Const., art. XIV, Sec. 1.; Cal. Const., art. 1, Sec. 7(a).) The California

---

[1] *Memorandum from California Research Bureau to Ibarra Re: Request for Information: Foreign Farmland Ownership in California* (Mar. 30, 2022). On file with the Senate Judiciary Committee.

Constitution is also definitive in its rule that, in California, "[n]oncitizens have the same property rights as citizens." (Cal. Const., art. 1, Sec. 20.)

To be crystal clear, this bill does not directly discriminate against anyone on the basis of race or national origin, nor does it deny noncitizens any property rights that are available to citizens. Its prohibitions on the future acquisition of agricultural land and its registration requirements are directed at foreign *governments* and their affiliated state-controlled enterprises only.

Nonetheless, California's shameful history in relation to restrictions on foreign ownership of agricultural land should serve as a cautionary lesson as this bill makes its way through the Legislature. The Alien Land Law Act, approved by wide margins in this Legislature in 1913, prohibited "aliens ineligible for citizenship" from owning agricultural land or possessing long-term leases over it. (SB 5, Haney and Webb, Chapter 113, Statutes of 1913.) In practice, the law was a thinly disguised tool for preventing Californians of Japanese origin from buying farmland, something that an increasing number of Japanese-Californians had been doing at the time in order to support their families and community.[2] Supporters of the Alien Land Act justified its racist and xenophobic effects, among other ways, on the proposition that non-citizens lacked affinity for the nation in the same way that citizens do and therefore could not be trusted to safeguard the food supply.[3]

Keeping this history in mind may help to ensure that this bill continues to focus on potentially legitimate concerns about the influence of foreign *government* investment in California's agricultural systems, and avoids slipping into xenophobic tropes that presume foreign nationals are deserving of suspicion merely because they are foreign.

Annual report element

As it happens, the federal government already gathers information about trends in foreign government's ownership of agricultural land and, by statute, is supposed to report California-specific data to California. The author has designed this bill to take advantage of the information-gathering conducted by this federal program. The bill directs CDFA to conduct yearly assessments of this data and issue a corresponding annual report. Key details that the report would contain include: the total amount of foreign-owned agricultural land, trends in foreign agricultural land ownership in California over time, and information regarding the uses to which

[3] *Id.* at p. 47. *See also*, *Sei Fujii v. State of California* (1952) 38 Cal.2d 718, 735-736.

that land is being put. Because the underpinnings for food security are not limited to property ownership, the report would also assess the extent and impact of foreign ownership over water rights, desalination plants, and energy facilities, as well.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee: Costs (General Fund) of a total of $815,000 in fiscal year (FY) 2022-23: $624,000 for three additional program analysts and $191,000 for a special assistant position) and $780,000 annually thereafter to CDFA to tabulate the appropriate data on foreign government ownership and leases of agriculture land, water rights, desalination facilities and energy production facilities in California, assess the impact of this foreign ownership and produce the annual report, coordinate with relevant state agencies, boards, the United States Department of Agriculture, and other stakeholders in an effort to collect the required information, and determine any recommended legislative, regulatory, or administrative policy changes.

SUPPORT: (Verified 8/22/22)

California Association of Realtors

OPPOSITION: (Verified 8/23/22)

Cahuilla Band of Indians
California Department of Food and Agriculture

ARGUMENTS IN SUPPORT: According to the author, "SB 1084 is a crucial first step towards addressing this ever-growing issue. SB 1084 aligns state law with the US Agricultural Foreign Investment Disclosure Act, ensuring our state agencies can operate with the same information that federal agencies receive. California has just over 40 million acres of privately held agricultural land, with 2.7 percent of that land being held by foreign owners. Granting our state agencies more insight into this allows us to prioritize the stewardship of these lands while continuing to direct resources and spending towards local economies."

According to the California Association of Realtors, "Despite the small percentage of land currently owned by foreign governments in California, the bill is valuable because of the knowledge it will provide to lawmakers regarding our scarce resources."

ARGUMENTS IN OPPOSITION: According to the California Department of Food and Agriculture, "CDFA's concerns stem from the information SB 1084 requires the department to collect. The referenced USDA report does not provide the level of specificity of information as mandated by SB 1084, and the USDA classification of a "foreign entity" is much broader than the definition provided in SB 1084. Foreign government ownership of agricultural resources is likely not tracked by any other state agency or board. Accordingly, my staff have no feasible way of collecting required information from existing sources and would be required to seek out the data in unknown other ways, resulting in an arduous, costly, and incredibly laborous undertaking. Moreover, the reporting requirements for water rights, water desalination facilities, and energy production facilities are beyond CDFA's purview and mission. At this time, CDFA does not see a need for the extraordinary additional reporting requirements […]."

SUBJECT: Juveniles: dependency: jurisdiction of the juvenile court

SOURCE: A New Way of Life Reentry Project

DIGEST: This bill prohibits a child from being found to be suffering, or at substantial risk of suffering, serious physical harm or illness for purposes of placing the child under the jurisdiction of the juvenile court on due solely to the family's homelessness, indigence, or other conditions of financial difficulty, as specified; and clarifies that it is the intent of the Legislature that families should not be subjected to juvenile court jurisdiction or separated from their families due to conditions of financial difficulty alone.

Assembly Amendments narrow the bill's list of financial conditions that cannot lead to juvenile court jurisdiction and add the statement of the intent of the Legislature that families should not be subject to juvenile court jurisdiction or separated simply because of conditions of financial difficulty.

ANALYSIS:

Existing law:

1) Establishes the juvenile court, which is intended to provide for the protection and safety of the public and minors falling under its jurisdiction. (Welf. & Inst. Code, §§ 202, 245.)

2) Provides that a child may become a dependent of the juvenile court and be removed from their parent or guardian on the basis of enumerated forms of abuse or neglect. (Welf. Inst. Code, § 300(a)-(j).)

3) Provides, as one such set of circumstances, that a child becomes a dependent of the juvenile court when the child has suffered, or there is a substantial risk that the child will suffer serious physical harm or illness as a result of:

    a) The failure or inability of the child's parent or guardian to adequately supervise or protect the child;

    b) The willful or negligent failure of the child's parent or guardian to adequately supervise or protect the child from the conduct of the custodian with whom the child has been left;

    c) The willful or negligent failure of the parent or guardian to provide the child with adequate food, clothing, shelter, or medical treatment; or

    d) The inability of the parent or guardian to provide regular care for the child due to the parent's or guardian's mental illness, developmental disability, or substance abuse. (Welf. & Inst. Code, § 300(b)(1) & (2).)

4) Provides, notwithstanding the factors in 3), that a child does not become a dependent of the juvenile court solely due to:

    a) The lack of emergency shelter for the family.

    b) The failure of the child's parent or alleged parent to seek court orders for custody of the child. (Welf. & Inst. Code, § 300(b)(1).)

This bill:

1) Adds an exception to when a child comes becomes a dependent of the juvenile court based on the circumstances in 3), providing that a child shall found to be a person who has suffered, or for whom there is a substantial risk that they will suffer, serious physical harm or illness solely as a result of the following:

   a) Homelessness.

   b) Indigence or other conditions of financial difficulty, including, but not limited to, poverty, the inability to provide or obtain clothing, home or property repair, or childcare.

2) States that the following is the intent of the Legislature:

   a) Families should not be subject to the jurisdiction of the juvenile court nor should children be separated from their parents based on conditions of financial difficulty, including, but not limited to, a lack of food, clothing, shelter or childcare.

   b) Reasonable services to prevent juvenile court intervention or children being separated from their parents include services to alleviate a potential risk to a child based on conditions of financial difficulty, including, but not limited to, referrals to community-based organizations.

   c) Consistent with existing law, no family should be subject to the jurisdiction of the juvenile court nor should children be separated from their parents based on conditions of financial difficulty unless there is willful or negligent action or failure to act and a nexus to harm such that the child has suffered or there is a substantial risk the child will suffer serious physical harm or illness.

ARGUMENTS IN SUPPORT: According to the National Association of Social Workers, California Chapter, writing in support:

> Currently, the definition of neglect is overly broad. It provides a social worker free reign to initiate the removal of a child from their parents for relatively minor circumstances relating to poverty. The definition in the WIC code should be refined so that conditions such as a partially empty refrigerator, damaged furniture, or temporary inability to afford childcare while working a low wage job will not alone result in the removal of a child from their parents. Poverty and a historical lack of access to resources, especially for racial minorities, should not be further adjudicated by our Court, separating families for unreasonable and arbitrary reasons.
>
> SB 1085 amends WIC Section 300 to address the overly broad definition of neglect and provide a more comprehensive outline. The statutes in place that created WIC Section 300, therefore outlining the definition of neglect, were chaptered in 1976. Since then there have been minor legislative changes to the language, however none have addressed the overarching definition of neglect. This bill will address this longstanding issue by both protecting vulnerable communities and allowing social workers to make more informed reporting of neglect.
>
> More specifically, SB 1085 will effectively specify an exception for parents impacted by poverty. This will raise the standards statewide for considerations of "neglect" by social workers that initiate petitions separating children from their parents. We should stop punishing parents for being poor and do everything we can to assist the families that find themselves subjected to the system. Especially those that are vulnerable to implicit bias and arbitrary standards of "neglect," particularly racial minorities disproportionately impacted by this issue.

SUBJECT: Family Urgent Response System

SOURCE: Children Now
County Welfare Directors Association of California

DIGEST: This bill expands the definition of "current or former foster youth" for purposes of accessing the Family Urgent Response System (FURS) to include

youth who have exited foster care for any reason, including, but not limited to, emancipation, a child or youth who is the subject of a voluntary placement agreement, a child or youth who is placed in foster care and is the subject of a petition filed pursuant to reports of abuse and neglect, and a child or youth placed in California pursuant to the Interstate Compact on the Placement of Children.

Assembly Amendments restructure and clarify the provisions of this bill in terms of their application to a child or youth who have exited foster care for any reason.

ANALYSIS:

Existing law:

1) Establishes a state and local system of child welfare services, including foster care, for children who have been adjudged by the court to be at risk of abuse and neglect or to have been abused or neglected, as specified. (WIC 202)

2) Provides that a child who has suffered, or is at substantial risk of suffering, abuse or neglect, as provided, by the child's parent or guardian is within the jurisdiction of the juvenile court, which may adjudge the child a dependent child. (WIC 300)

3) States that the purpose of foster care law is to provide maximum safety and protection for children who are currently being physically, sexually, emotionally abused, neglected, or exploited, and to ensure the safety, protection, and physical and emotional well-being of children who are at risk of harm. *(WIC 300.2)*

4) Defines "FURS" as meaning a coordinated statewide, regional, and county-level system designed to provide collaborative and timely state-level phone based response and county-level in-home, in-person mobile response during situations of instability, for purposes of preserving the relationship of the caregiver and the child or youth, as provided. (WIC 16526(d))

5) Defines "caregiver," for the purposes of FURS, as meaning a person responsible for meeting the daily care needs of a current or former foster child or youth, and who is entrusted to provide a loving and supportive environment for the child or youth to promote their healing from trauma. (WIC 16526(a))

6) Defines "current or former foster child or youth," for the purposes of FURS, as including a child or youth adjudicated a dependent or ward of the juvenile court and who is served by a county child welfare agency or probation

department, and a child or youth who has exited foster care to reunification, guardianship, or adoption, until they attain 21 years of age. (WIC 16526(b))

7) Defines "mobile response," for the purpose of FURS, as meaning the provision of in-person, flexible, responsive, and supportive services where the caregiver and child or youth are located to provide them with support and prevent the need for a 911 call or law enforcement contact. (WIC 16526(g))

8) Creates a 24-hour, seven days a week, statewide hotline, established by California Department of Social Services (CDSS), as the entry point for FURS to respond to calls from both caregivers and current or former foster children during moments of instability. (WIC 16527(a))

9) Provides, through the statewide hotline, both hotline workers who are trained in techniques for de-escalation and a conflict resolution telephone response specifically for children and referrals to a county-based mobile response system, for further support and in-person response. (WIC 16527(a)(1)-(2))

10) Requires FURS referrals to provide a warm handoff whereby a hotline worker establishes direct and live connection through a three-way call that includes the caregiver, child or youth, and county contact, while allowing the caregiver or child or youth to decline the three-way contact if they feel their situation has been resolved at the time of the call. If direct communication cannot be established, a referral directly to the community or county based services and a follow up call to ensure that a connection occurs, is required. (WIC 16527(a)(2))

11) Requires the statewide hotline to maintain contact information for all county-based mobile response systems, based on information provided by counties, for referrals to local services, as provided. (WIC 16527(b))

12) Requires CDSS to collect de-identified, aggregated data regarding individuals served through the hotline and county-based mobile response systems. Further requires CDSS to publish annually on their internet website, beginning January 1, 2022, FURS data, including the number of children or youth and caregivers served, among other things, as provided. (WIC 16527(c))

13) Requires CDSS, in consultation with stakeholders, to: develop methods and materials for informing all caregivers and current or former foster children or youth about the hotline; establish protocols for triage and response; establish

minimum education and training requirements for hotline workers; and, consider expanding the hotline to include communication through electronic means. (WIC 16527(e))

14) Requires the statewide hotline to be operational no sooner than January 1, 2021, and on the same date as the county mobile response system, as provided. (WIC 16527(f))

15) Requires county child welfare, probation, and behavior health agencies, in each county or region of counties, to establish a joint county-based mobile response system that includes a mobile response and stabilization team for the purpose of providing supportive services, as provided. (WIC 16529)

This bill adds youth who have exited foster care for any reason, including, but not limited to, emancipation, a child or youth who is the subject of a voluntary placement agreement, a child or youth who is placed in foster care and is the subject of a petition filed pursuant to reports of abuse and neglect, and a child or youth placed in California pursuant to the Interstate Compact on the Placement of Children to the meaning of "current or former foster child or youth" for the purposes of FURS.

Background

Child Welfare Services (CWS). The CWS system is an essential component of the state's safety net. Social workers in each county who receive reports of abuse or neglect, investigate and resolve those reports. When a case is substantiated, a family is either provided with services to ensure a child's well-being and avoid court involvement, or a child is removed from the family and placed into foster care. In 2021, the state's child welfare agencies received 400,313 reports of abuse or neglect. Of these, 61,438 reports contained allegations that were substantiated and 22,004 children were removed from their homes and placed into foster care via the CWS system. As of October 1, 2021, there were 58,072 children in California's CWS system.

Foster Care and Youth's Mental Health. Foster care can be uniquely traumatic for a child, over and above the trauma of losing one's parent(s). Most children in care for two years or more experience multiple placements, more than half of children in foster care experience caregiver violence or caregiver incarceration, and almost two-thirds have lived with someone with an alcohol or drug problem. Additionally, the use of long-term congregate group care for foster care has also been found to

be inherently detrimental to the healthy development of children, and may cause additional psychological harm to already-traumatized children.[1]

Despite these, and other, common sources of trauma for foster children, California has not consistently provided adequate mental health care for foster children. In 2002, current foster children and children at risk of being put into foster care in California filed a class action suit against CDSS and the California Department of Health Care Services (DHCS) for failing to provide medically necessary mental health care in adequate settings (the *Katie A.* suit).[2] CDSS and DHCS settled the suit, and the settlement included CDSS and DHCS agreeing to significantly overhaul access to mental health care services for children in foster care or at risk of being placed in foster care.[3] The *Katie A.* settlement included, among other things, the use of Child and Family Teams that would provide individualized care coordination and access to specific mental health services to foster children and youth.[4]

Around this same time, the Legislature enacted SB 1013 (Committee on Budget and Fiscal Review, Chapter 35, Statutes of 2012), which called for CDSS to establish a working group to develop recommended revisions to the current rate system, services, and programs serving children and families in the continuum of foster care settings. CDSS's resulting report, "California's Child Welfare Continuum of Care Reform," published in 2015, outlined a comprehensive approach to improving California's child welfare system by reforming the system of placements and services directed at youth in foster care.[5] Many of the recommended reforms, referred to as CCR, were then implemented in legislation, including eliminating the group home licensure category and replacing them with new Short Term Residential Therapeutic Programs.[6] In 2018, the Legislature enacted AB 2083 (Cooley, Chapter 815, Statutes of 2018), which required each county to develop and implement a trauma-informed "system of care" memorandum of understanding that would set forth the roles and responsibilities of agencies and other entities that serve children and youth in foster care who have experienced severe trauma, including, at a minimum, the establishment and operation of an interagency leadership team and an interagency placement

committee to help facilitate placements and appropriate services for foster youth and children.

The Family Urgent Response System. In 2019, the Legislature enacted FURS through SB 80 (Committee on Budget and Fiscal Review, Chapter 27, Statutes of 2019). Initially, this concept was introduced through AB 2043 (Arambula, 2018), which was vetoed by the Governor for presenting significant, ongoing general fund commitments. The passage of FURS required CDSS and the counties to establish a coordinated statewide, regional, and county-level response system for current and former foster children, youth, and non-minor dependents (NMDs) and their caregivers. The response system was designed to provide collaborative and timely state-level, 24/7 hotline-based response and county-level in-home, in-person mobile response during situations of crisis or instability for foster youth and their caregivers, with the ultimate goal of preserving the relationship between the caregiver and the child or youth.

FURS was designed to provide children or youth currently or formerly in foster care and their caregivers with immediate trauma informed support when issues, big and small, arise through the 24/7 statewide hotline. By calling into the hotline, youth or their caregivers are provided with immediate access to caring counselors trained in conflict resolution and de-escalation techniques. These counselors can help youth or their caregivers process the conflict in real time, often resolving the issue without need for further intervention. This provides caregivers and youth with a trauma-informed alternative to calling 911 or law enforcement, which was often previously their only option. If further intervention is needed, the hotline can connect the youth or caregiver to the County Mobile Response and Stabilization Teams. These teams are intended to provide in-home de-escalation, stabilization, conflict resolution and support services from a trauma informed lens. Both the hotline and the mobile response teams also provide the opportunity for youth and caregivers to be further connected with and referred to the existing array of local services for the provision of ongoing supports, if needed.

Ideally, these interventions prevent the need for placement changes or more restrictive interventions, such as the involvement of law enforcement, hospitalizations, or congregate care placement referrals. This provides the opportunity for youth to heal from trauma and maintain supportive, consistent, and loving relationships rather than face additional placement disruptions and potential for further traumatization. The statewide hotline has been available for youth and caregivers since March 1, 2021. As of July 1, 2021, mobile response teams were fully implemented across all counties.

As FURS has been implemented, eligibility questions have arisen. Stakeholders have shared that youth being denied usage of FURS due to questions over whether they qualify as a current or former foster youth. This bill seeks to correct this by further clarifying that youth under a voluntary program of supervision or voluntary placements agreements, youth who are subject to a filed dependency petition but not yet adjudicated dependents, and youth who have exited care for any reason are all eligible, along with their caregivers, to utilize FURS to help them resolve any conflict they might be facing.

Comments

According to the author, "California's foster children and youth are oftentimes the most vulnerable individuals in our communities. The Family Urgent Response System (FURS) provides current and former foster children and youth and their caregivers with the immediate trauma-informed support they need during times of instability through its 24/7 statewide hotline and county mobile response systems. Children and youth need to be supported during all moments of instability to reduce negative behavioral modifications and help them adjust to their situations."

The author goes on to state, "SB 1090 updates and expands the definition of foster youth to include a child or youth in the early or later stages of the system who are left out of the current definition. This is a clean-up bill that will strengthen current law and its goal."

Related/Prior Legislation

AB 1005 (Arambula, 2019) would have established a FURS hotline and county-based response system. AB 2043 died in the Assembly Human Services Committee.

AB 2043 (Arambula, 2018) would have established a FURS hotline and county-based response system. The bill was vetoed, as it was considered as part of the budget process.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, CDSS estimates ongoing General Fund costs of approximately $130,000 annually, to manage additional calls to the statewide hotline.

Additional costs to counties, of an unknown amount for increased tasks and administrative time required for a presumed increase in volume of mobile

responses provided by a county's FURS Mobile Response Team. Many counties operate their local FURS mobile response teams using staff from existing child welfare, behavioral health, and probation departments. These counties are likely to see a greater immediate cost than those counties that contract their FURS Mobile Response to a community-based program.

Although these county costs are state-mandated costs, they are not reimbursable, but instead must be funded by the state pursuant to Proposition 30. Proposition 30 (2012) requires legislation enacted after September 30, 2012, that has an overall effect of increasing the costs already borne by a local agency for programs or levels of service mandated by realignment (including child welfare services and foster care) to apply only to local agencies to the extent the state provides annual funding for the cost increase.

SUBJECT: Community care facilities: criminal background checks

SOURCE: Author

DIGEST: This bill removes the requirement that a request to transfer a current criminal record clearance from one licensed community care facility to another be made in writing to the Department of Social Services (CDSS). This bill instead requires the applicant or licensee to submit a request for such a transfer via a form provided by CDSS or submission via CDSS's secure online portal.

Assembly Amendments make technical and conforming changes and include chaptering out language to incorporate changes to Section 1522, Section 1568.09, Section 1569.17, Section 1596.871, and Section 1796.24 of the Health and Safety Code proposed by AB 1720 (Holden) to resolve conflicts.

ANALYSIS:

Existing law:

1) Establishes the California Community Care Facilities Act, which provides regulatory structure for coordinated and comprehensive statewide system of care for individuals with mental illnesses, individuals with disabilities, and children and adults who require care or services provided by licensed community care facilities. *(HSC 1500 et seq.)*

2) Requires an individual to obtain either a criminal record clearance or a criminal record exemption from CDSS before their initial presence in a community care facility or certified family home, as specified. *(HSC 1522 et seq.)*

3) Requires an individual to obtain either a criminal record clearance or a criminal record exemption from CDSS before their initial presence in residential care facilities for persons with chronic life-threatening illness, as specified. *(HSC 1568.09 et seq.)*

4) Requires an individual to obtain either a criminal record clearance or a criminal record exemption from CDSS before their initial presence in a Residential Care Facility for the Elderly (RCFE), as specified. *(HSC 1569.17 et seq.)*

5) Requires an individual to obtain either a criminal record clearance or a criminal record exemption from CDSS before their initial presence in a child day care facility, as specified. *(HSC 1596.871 et seq.)*

6) Permits CDSS to allow an individual to transfer a current criminal record clearance from one licensed facility to another if the clearance has been processed through and is being transferred to another facility licensed by a state licensing district office. Further requires the request to be submitted to CDSS in writing, include a copy of the person's driver's license, or other form of valid identification, and requires CDSS to verify whether the individual has a clearance that can be transferred. *(HSC 1522(h)(1), 1568.09(g)(1), 1569.17(g)(1)) and 1596.871(h)(1))*

This bill:

1) Removes the requirement that a request to transfer a current criminal record clearance from one licensed facility to another be made in writing to CDSS, include a copy of the person's driver's license or valid identification card, and include a self-addressed envelope for this purpose.

2) Requires a request to transfer a current criminal record clearance from one licensed facility to another be submitted to CDSS on a form provided by CDSS or submitted via CDSS's secure online portal.

3) Requires the licensee to verify the individual's identity.

Comments

According to the author, "care facilities, which faced understaffing prior to the pandemic, and remain woefully understaffed, face a complex process that needs to be modernized and streamlined in order to keep their staff working and able to provide much needed care. SB 1093 modernizes and simplifies the California Department of Social Services (CDSS) process for transferring background clearance for employees who provide child care, home care, and older adult care, by allowing for the use of an online portal."

Community Care Licensing Division (CCLD). CDSS's Community Care Licensing Division (CCLD) licenses and oversees community care facilities—including child care facilities, foster family homes, and care facilities for the elderly—throughout California. These facilities typically provide non-medical care and supervision for children and adults. As of June 2021, there are 67,622 licensed community care facilities in the state with total capacity to serve approximately 1.4 million Californians. All facilities licensed by CDSS must meet minimum licensing standards, as specified in California's Health and Safety Code and Title 22 regulations. CDSS conducts pre- and post-licensing inspections for new facilities and unannounced visits to licensed facilities under a statutorily required timeframe.

Criminal Background Checks. To protect the vulnerable populations served by CCLD-licensed facilities, state law requires all applicants, licensees, adult residents, volunteers under certain conditions, and employees of licensed facilities who have contact with clients to be subject to a background check. These background checks are conducted by the Department of Justice (DOJ) and used to determine whether individuals should be allowed to be present in a licensed facility.

If an individual has no history of arrests and convictions, a clearance notice is sent to CDSS. If an individual has a criminal history, a separate process will result in either a denial or exemption. DOJ sends a transcript to CDSS showing the arrests and convictions of the individual. If the crimes are eligible for exemption under current law, CDSS will send an exemption notification letter to the applicant or licensee and to the individual. Individuals awaiting an exemption may not be

present in a facility until an exemption is granted. If the criminal history shows arrests for crimes that may not be exempted, CDSS will deny the individual.

The law provides for the transfer of a criminal record clearance between state-licensed facilities as long as the criminal record clearance has been processed through a state licensing regional office, and is being transferred to another facility licensed by the regional office. These transfer requests must be submitted to CDSS in writing before the individual with the clearance may be in contact with any clients at the new facility.

This bill seeks to streamline the process for transferring criminal background clearances from one facility to another by removing the requirement that an applicant or licensee make such a transfer request in writing to CDSS, along with a copy of the individual's photo identification and a self-addressed envelope. Instead, this bill requires the applicant or licensee to verify the individual's identity and submit a request to transfer the individual's criminal background clearance by completing and retuning via the postal service a form provided by CDSS or by submitting the request via CDSS's secure online portal. Upon receiving the request, CDSS would then verify whether the individual has a clearance that can be transferred.

Related/Prior Legislation

AB 447 (Patterson, 2019) would have created a process by which licensees of certain facilities licensed by CCLD could transfer current criminal record clearances of individuals associated with a facility to multiple facilities of the same type operated by the same licensee. This bill was held in the Senate Appropriations Committee.

AB 1437 (Patterson, 2018) would have created a process by which licensees of certain facilities licensed by CCLD could transfer current criminal record clearances of individuals associated with a facility to multiple facilities of the same type operated by the same licensee. This bill was vetoed by the Governor.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee this bill would have negligible costs to CDSS.

SUBJECT: Energy: building decarbonization: notice and recordation of a decarbonization charge

SOURCE: Author

DIGEST: This bill establishes requirements for notifications that utilities must provide when adding a decarbonization charge as part of a program financing energy efficiency upgrades to an existing property.

Assembly Amendments clarify terms, extend deadlines for decarbonization charge notifications, and declare that recording a notice of decarbonization charge pursuant to the bill does not constitute a debt collection.

ANALYSIS:

Existing law:

1) Creates a charge on electricity and natural gas consumption to fund cost-effective energy efficiency and conservation activities. (Public Utilities Code §381 and §890)

2) Requires the California Public Utilities Code (CPUC) to identify all potentially achievable, cost-effective electricity and natural gas efficiency savings and establish energy efficiency targets and ratepayer-funded programs for investor-owned utilities (IOUs). Gas corporations must first meet its unmet resource needs through all available natural gas efficiency and demand reduction resources that are cost effective, reliable, and feasible. (Public Utilities Code §454.55 and §454.56.)

3) Requires the CPUC to authorize an IOU to provide incentives for the cost of energy efficiency programs based on all estimated energy savings, including energy savings from bringing existing buildings into compliance with mandatory energy efficiency codes for existing buildings issued by the California Energy Commission (CEC), and authorizes an IOU to recover the costs in rates. (Public Utilities Code §381.2)

4) Establishes the Building Initiative for Low-Emissions Development (BUILD) program by requiring the CPUC to provide incentives to eligible applicants for the deployment of near-zero-emission building technologies to significantly reduce the emissions of greenhouse gases (GHG) from those buildings below the minimum projected emissions that would be achieved through building codes. Existing law authorizes the CEC to serve as the BUILD program's third-party administrator. (Public Utilities Code §921)

5) Establishes the Technology and Equipment for Clean Heating (TECH) program by requiring the CPUC to direct gas corporations to provide incentives for the installation of low-emission space and water heating equipment in new and existing buildings. Existing law authorizes the CEC to serve as the TECH program's third-party administrator. (Public Utilities Code §922)

6) Requires the CEC to publish by January 1, 2017, a study on low-income Californians' barriers to energy efficiency and weatherization investments and make recommendations on how to address these barriers. (Public Resources Code §25327)

7) Requires the CEC to assess and report by January 1, 2021, on California's potential to reduce GHG emissions in the state's residential and commercial building stock by at least 40 percent below 1990 levels by January 1, 2030. Existing law requires this report to include specified assessments, including an assessment of potential ratepayer impacts and challenges associated with reducing GHG emissions from certain housing sectors. (Public Resources Code §25403)

This bill:

1) Defines an energy supplier as an entity that conducts retail electric sales in California, including, but not limited to, an electrical corporation, local publicly owned electric utility (POU), electric service provider, and community choice aggregator (CCA). An electrical cooperative is also considered an energy supplier for the purposes of this bill.

2) Defines a "decarbonization upgrade" as a change to a subscriber property that does any of the following:

   a) Reduces electric demand.
   b) Stores energy.
   c) Reduces the use of fossil fuels.
   d) Converts water, wind, or sunlight to usable electricity.

3) Defines a decarbonization charge as a charge added by an energy supplier to a bill for electrical service to pay for a decarbonization upgrade to the subscriber's property.

4) Requires the CPUC, a POU governing board, or an electrical cooperative governing board to ensure that energy suppliers comply with the following regarding decarbonization upgrades financed by the energy supplier through decarbonization charges:

   a) Sets a 30-day deadline for an energy supplier to provide a notice to the applicable county recorder for the property after a decarbonization upgrade

has been installed at the property. The county recorder must include a specified record of the notice under the name of the property owner. This bill deems the record of the decarbonization charge as a sufficient notice to subsequent subscribers at that address of an obligation to pay the decarbonization charge.

b) Requires an energy supplier to provide specified notices within 30 days of recovering outstanding costs for a decarbonization upgrade or when ceasing to collect a decarbonization charge.
c) Specifies that an agreement for a decarbonization upgrade must include a requirement that the owner of the property must disclose the decarbonization charge in lease and rental agreements. This requirement applies only to decarbonization upgrade agreements executed after January 1, 2023.

5) Requires the CEC to identify funding opportunities available for building decarbonization, apply for available federal funds, and submit a report to the Legislature on statutory changes needed for California to better compete for federal decarbonization funding by December 31, 2023.

Background

Bill highlights low-income communities' barriers to energy efficiency upgrades. Existing law established by SB 350 (De León, Chapter 547, Statutes of 2015) required the CEC to develop targets to double energy efficiency savings from electric and natural gas end uses and requires the CEC to conduct a study of low-income communities' barriers to energy efficiency investments. The SB 350 barriers report identified split incentives as a significant barrier to incentivizing energy efficiency and distributed energy resource (DER) upgrades in rental units. These split incentives occur in circumstances where the property owner doesn't experience ratepayer benefits associated with financing an upgrade, and the renter can't authorize upgrades or obtain the financial incentives from upgrade programs. In a subsequent staff report, the *Clean Energy in Low-Income Multifamily Buildings Action Plan*, the CEC notes that residents in multifamily buildings also face split incentive barriers to installing DERs. These upgrades can require large upfront costs for building-wide upgrades, and multifamily properties can have more complex ownership systems that pose challenges to linking investments to rates from customers' meters. According to the report, 33 percent of California households meet federal low-income criteria, and 47 percent of low-income Californians live in multifamily housing.

Bill reflects ongoing discussions at the CPUC about decarbonization financing. In 2019, the CPUC opened a proceeding (R. 19-01-011) to implement SB 1477 (Stern, Chapter 378, Statutes of 2018), which required the CPUC to establish and allocate funding for the BUILD and TECH programs to deploy low and zero-emission building decarbonization technologies. In addition to establishing rules for the BUILD and TECH programs, the CPUC also used this proceeding to explore additional policies for building decarbonization. During the CPUC's building decarbonization proceeding, the CPUC noted that barriers to financing energy efficiency upgrades remained. To address these concerns, the CPUC opened a new proceeding (R. 20-08-022). The initial scoping memo for this proceeding notes how the CPUC's existing building decarbonization proceeding highlighted the need to address concerns about affordable financing options:

> In the course of the proceeding, financing options have been discussed as a potential mechanism to encourage more building decarbonization. On the scale that will be necessary to meet the SB 350 and SB 100 goals, as well as the many other state environmental goals, mechanisms beyond incentives will almost certainly be necessary and there is a strong nexus between our building decarbonization work and the financing mechanisms we intend to explore in this proceeding.

In November 2021, the CPUC issued a new ruling identifying multiple forms of energy efficiency financing options the CPUC will consider, including tariffed on-bill financing and on-bill repayment. The CPUC directed utilities to provide proposals and feedback regarding these potential financing options as part of the ruling, and utilities are still developing these responses.

Decarbonization charges are a form of on-bill financing for efficiency upgrades. This bill defines a decarbonization charge as a charge assessed by an energy supplier on a bill for electrical service to pay for a decarbonization upgrade to the subscriber's property. Under this bill, tariffed on-bill (TOB) repayment would meet the definition of a decarbonization charge. TOB financing allows renters and property owners to fund energy efficiency improvements without out-of-pocket expenses or relying on incurring personal debt. A utility serves as the conduit for providing up-front funding for upgrades and generally collects repayment through a fixed charge associated with the property address. Repayment is generally collected through the customer's utility bill. TOB repayment can be an attractive option for lower income consumers to finance upgrades because the process can enable consumers with limited credit history to obtain upgrades without qualifying for a loan or providing significant up-front cash. However, on-bill financing

repayment obligations generally stay with an address, and no process currently exists to ensure that renters and homebuyers are aware of these obligations before buying or renting a property.

Bill does not require decarbonization charges; it establishes a framework for notifying consumers these charges. This bill requires the CPUC and utility governing boards to ensure that energy suppliers record decarbonization charges with local governments. This bill also requires the CPUC and these governing boards to ensure that decarbonization charge agreements to stipulate that rental and lease agreements must also include a notice about an existing decarbonization charge. While this bill specifies requirements for decarbonization charge notices, this bill does not require decarbonization charges or establish further enforcement requirements regarding decarbonization charges. The CPUC in the process of considering decarbonization charges as a form of energy efficiency upgrade financing. To the extent that this bill reduces ambiguity about the notification process for consumers that would pay decarbonization upgrades associated with a property, this bill could facilitate the implementation of these charges as a financing option.

Related/Prior Legislation

SB 31 (Cortese, 2020) would have required the CEC to fund the development and deployment of building decarbonization technology through the Electric Program Investment Charge (EPIC) program. The bill was held in the Senate Appropriations Committee.

SB 1477 (Stern, Chapter 378, Statutes of 2018) required the CPUC to establish and allocate funding for the BUILD and TECH programs to deploy low and zero-emission building decarbonization technologies.

AB 3232 (Friedman, Chapter, Statutes of 2018) required the CEC to develop a plan to ensure that all new residential and nonresidential buildings are zero-emission buildings. The bill also required the CEC to develop a strategy to reduce GHG emissions from existing buildings 40 percent below 1990 levels by 2030.

SB 350 (De León, Chapter 547, Statutes of 2015) increased California's Renewable Portfolio Standard procurement goals and required the CEC to develop targets to double energy efficiency savings from electric and natural gas end uses. The bill also required the CEC to study low-income communities' barriers to energy efficiency investments.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- At the time this analysis was prepared, the CEC had not provided the committee an estimate of its costs to implement the bill. Nonetheless, the duties this bill requires of CEC, are likely to be in the low hundreds of thousands of dollars (Energy Resources Programs Account, or other special fund).

- Both GO-Biz and the California Infrastructure and Economic Development Bank (IBank) recognize implementation of the bill may entail costs for them; however, the agencies describe the bill's requirements as too poorly defined to assign a dollar value to those costs.

ARGUMENTS IN SUPPORT: According to the author, "SB 1112 establishes transparency for renters and home buyers by requiring that a utility or community choice aggregator (CCA) who engages in TOB financing must notify their county recorder of a decarbonization upgrade made in a home and the charges the occupant of the home will incur as a result of the upgrade. Similarly, it requires that property owners notify potential tenants of decarbonization charges associated with upgrades to the building that they will be responsible for.

"By ensuring reasonable notification to subsequent customers, SB 1112 removes this potential barrier to TOB programs and should enable utilities to offer climate-beneficial and cost-saving TOB upgrades to their customers with confidence that they can recoup these investments over time."

SUBJECT: San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy: territory

SOURCE: San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy

DIGEST: This bill expands the territory of the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy (RMC) to include the Dominguez Channel watershed and Santa Catalina Island; requires RMC to update its parkway and open space plan to account for this new territory; and makes other minor, technical, and conforming changes.

Assembly Amendments remove the addition of the coastal watersheds of Manhattan Beach to the Palos Verdes Peninsula from the proposed expansion of the RMC's territory and make other conforming changes.

ANALYSIS:

Existing law:

1) Establishes RMC in the California Natural Resources Agency (CNRA) to provide for the preservation and protection of lands in the San Gabriel River and Lower Los Angeles River watersheds, and the San Gabriel Mountains.

2) Requires RMC to prepare a San Gabriel and Lower Los Angeles Parkway and Open Space Plan, which includes policies and priorities for the conservation of the San Gabriel River and its watershed, the Lower Los Angeles River, and the San Gabriel Mountains, and identifies underused existing public open spaces and recommendations for providing better public use and enjoyment.

3) Establishes the RMC's governing board, consisting of 15 voting members and nine ex officio members, as specified.

This bill:

1) Expands RMC's territory to include the Dominguez Channel watershed and Santa Catalina Island.

2) Directs RMC to update the San Gabriel and Lower Los Angeles Parkway and Open Space Plan to include the priorities for conservation and enhanced public use within the Dominguez Channel watershed and Santa Catalina Island.

3) Makes other minor, technical, and conforming changes.

Background

RMC's mission is, among other things, to preserve open space and habitat in order to provide for low-impact recreation and educational uses, wildlife habitat restoration and protection, and watershed improvements within its jurisdiction. RMC's territory includes the watersheds of the San Gabriel River and the Lower Los Angeles River, along with portions of the Santa Clara River and the lower Santa Ana River. RMC's jurisdiction covers approximately 1,490 square miles (mi^2) and is located mostly in eastern Los Angeles County, with portions of the San Gabriel River watershed located in western Orange County.

Comments

This bill should look familiar. AB 78 (O'Donnell, 2021) and AB 1694 (O'Donnell, 2019) were substantially similar bills to this one. Both Assembly bills were held on the suspense file in the Senate Appropriations Committee.

The additions. RMC's territory is approximately 1,490 mi^2. This bill adds 208 mi^2 to its jurisdiction, including 133 mi^2 of the Dominguez Channel watershed and 75 mi^2 of Santa Catalina Island. This includes adding the cities and communities of Avalon, Carson, Gardena, Hawthorn, Hermosa Beach, Lawndale, Palos Verdes Estates, San Pedro, Willowbrook, and Wilmington. It also would include adding portions of the cities and communities of El Segundo, Los Angeles, Inglewood, Redondo Beach, Rolling Hills, Rolling Hills Estates, and Torrance.

Dominguez Channel watershed. Located within the south bay region of Los Angeles County, approximately 81 percent of the watershed or 93 percent of the land is developed. Residential development covers nearly 40 percent of the watershed, and another 41 percent is made up by industrial, commercial and transportation uses. With a population of nearly one million, considerable demands are made on infrastructure and services within the watershed. RMC could provide additional resources to help mitigate and manage impacts to this watershed.

Santa Catalina Island. Located 29 miles south-southwest of Long Beach, the island is approximately 75 mi^2. The vast majority of the island is open undeveloped territory. The City of Avalon and the unincorporated village of Two Harbors serve as the main population centers. These two areas, along with the smaller settlements of Rancho Escondido and Middle Ranch, account for the majority of the island's residents and development.

The Wrigley family bought the island from the Banning family over 100 years ago. Around 50 years ago, the Wrigley family set up the Catalina Island Conservancy (CIC), a private nonprofit conservancy to protect the island from development with a focus on conservation, restoration, and recreation. CIC owns and manages approximately 88 percent of island. The Wrigley family still owns and maintains around 10 percent, the City of Avalon covers another one percent, approximately, and the remainder is owned by others, including the University of Southern California. Southern California Edison runs all gas, power, and water on the island, with various access easements, 20 water wells, and no oil or gas wells on the island.

A key question is why should the Legislature expand the territory of RMC to include Santa Catalina Island, which is protected by an existing conservancy, albeit

a private one? CIC argues that, as a small, private conservancy located off the mainland, it has struggled to secure funding from agencies in Sacramento and contends it might have more success partnering with RMC on critical projects on the island. Notably, the island has the longest publicly accessible stretch of undeveloped coastline left in Southern California.

Board representation. Although not every attempt is successful, it is not unusual for the territory of a conservancy to expand after its inception. For example, SB 419 (Kehoe, Chapter 646, Statutes of 2007) expanded the San Diego River Conservancy, and AB 1089 (E. Garcia, Chapter 228, Statutes of 2015) added the cities of Coachella and Indio to the Coachella Valley Mountains Conservancy. Both examples, however, also changed the structure of the respective governing boards. Last year, SB 208 (Dahle, Chapter 182, Statutes of 2021) expanded the Sierra Nevada Conservancy's territory and included a requirement to prepare recommendations to the Legislature to change the structure of the board. This bill makes no changes to RMC's governing board, which was last revised in 2015 by SB 355 (Lara, Chapter 677) to add new members.

Overlap with BHC. The expansions proposed in this bill overlap with expansions proposed by SB 1052 (Kamlager) for the Baldwin Hills Conservancy (BHC) in the Dominguez Watershed. Also, there is some overlap with the expansion proposed in SB 1052 with RMC's existing territory. This includes about 17 mi^2 of the Dominguez Channel watershed.

Conservancies typically do not overlap jurisdiction. It could be problematic to have two conservancies with overlapping jurisdictions. This could lead to confusion and projects that are at cross-purposes, especially because both conservancies have specified first-right of refusal for surplus lands suitable for park space.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- Unknown, likely significant cost pressure (General Fund, special fund, or bond funds) to fund activities and projects in the expanded RMC territory.

- RMC estimates it will cost no more than $20,000 to include the coastal watersheds of Manhattan Beach to the Palos Verdes Peninsula in its ongoing update to its Open Space Plan. The update to the plan is in its final stages and already includes the Dominguez Channel watershed and Santa Catalina Island. RMC notes this cost is absorbable within current funding sources available for support and operations.

SUPPORT: (Verified 8/23/22)

City of Avalon
City of Los Angeles
South Bay Cities Council of Governments
Watershed Conservation Authority

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: According to the author, "California's land conservancies serve a vital role in safeguarding and restoring the Golden State's unique natural environments. Established in 1999, the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy (RMC) protects wildlife habitats in Los Angeles and Orange counties while providing recreational and educational opportunities to surrounding communities. Nearly 5 million Californians live within the current boundaries of RMC and benefit from the Conservancy's ongoing efforts to protect and restore the natural areas within its jurisdiction.

"SB 1122 will enhance conservation and public recreation in more communities by expanding the RMC territory to include the Dominguez Channel Watershed, Santa Catalina Island, and coastal area watersheds of Los Angeles County's South Bay. This expansion will allow RMC to support projects and provide grants for conservation and climate adaption efforts for generations to come."

SUBJECT: Address confidentiality: public entity employees and contractors

SOURCE: Brennan Center for Justice at New York University School of Law
California Voter Foundation

DIGEST: This bill establishes an address confidentiality (or "Safe at Home") program for public entity employees and contractors, as provided. The bill prohibits the names of precinct board members from being listed when posting information, as specified, and requires county elections officials to make certain information appearing on the affidavit of registration confidential upon request of a qualified worker. The bill also includes harassment as a basis for application in the existing Safe at Home program for reproductive health care service providers and allows additionally documentation to be submitted in the application. The bill declares that it is to take effect immediately as an urgency statute.

Assembly Amendments expand the bill's provisions to include public entity employees and contractors who faces threats of violence or violence or harassment from the public because of their work for a public entity as eligible for the Safe at Home program, as provided.

ANALYSIS:

Existing law:

1) Establishes an address confidentiality (or "Safe at Home") program within the Office of the Secretary of State (SOS) in order to enable state and local agencies to both accept and respond to requests for public records without disclosing the changed name or address of a victim of domestic violence, sexual assault, or stalking. Existing law permits any such adult victim, or parent or guardian acting on behalf of a minor or incapacitated person, to apply through a community-based victims' assistance program to have an address designated by the SOS as their substitute mailing address. (Gov. Code § 6205 et seq.)

2) Allows reproductive health care providers, employees, volunteers, and patients to apply to the address confidentiality program through a community-based victims' assistance program, as specified. (Gov. Code § 6215 et seq.) The application is required to contain certain things, including a certified statement signed by a person authorized by the reproductive health care services facility stating that the facility or any of its providers, employees, volunteers, or patients is or was the target of threats or acts of violence or harassment within one year of the date of the application. (Gov. Code § 6215.2(a)(1)(B).)

3) Permits an individual to seek confidential voter status and have their residence address, telephone number, and email address declared confidential upon presentation of certification that the person is a participant in the Safe at Home program, as specified. (Elec. Code § 2166.5.)

4) Requires a county elections official, upon application of a public safety officer and if authorized by the county board of supervisors, to make confidential an officer's residence address, telephone number, and email address appearing on the affidavit of registration, as specified. (Elec. Code § 2166.7.)

5) Requires an election official to post a list of all polling places and precinct board members at specified times before an election. Requires these lists be posted at the elections official's office and on their official website. Requires an election official to include the political party affiliation for each listed precinct board member. (Elec. Code § 12105.5.)

6) Authorizes a court to issue a workplace violence restraining order, requested by an employer, to protect an employee from suffering unlawful violence or credible threats of violence at the workplace, after a noticed hearing. (Code of Civil Procedure (CCP) Section 527.8.)

7) Authorizes a court to issue a civil restraining order to prevent abuse, threats of abuse, stalking, sexual assault, or serious harassment by someone who is not an intimate partner, or a close family member of the protected party after a noticed hearing. (CCP Section 527.6.)

This bill:

1) Expands the Safe at Home program to public entity employees and contractors by permitting an adult person, who is domiciled in California, to have an address designated by the SOS to serve as the person's address, as specified and if certain conditions are met. Provides, among other requirements, that the basis for the application to the Safe at Home program is that the applicant is a public entity employee or contractor who faces threats of violence or violence or harassment from the public because of their work for the public entity and is fearful for their safety or the safety of their family because of their work for the public entity.
   a) Defines "harassment" as repeated, unreasonable, and unwelcome conduct directed at a targeted individual that would cause a reasonable person to fear for their own safety or for the safety of an immediate family member,

domestic partner, or a household member. Harassing conduct may include, but is not limited to, following, stalking, phone calls, or written correspondence.

b) Defines "public entity" as a federal, state, or local government agency.
c) Defines "work for a public entity" as work performed by an employee of a public entity, or work performed for a public entity by a person pursuant to a contract with the public entity.

2) Authorizes a public entity employee or contractor to submit, in addition to a certified statement signed by a person affiliated with the applicant's place of work or employment, a certified statement signed by the applicant stating that they have been the target of threats, harassment, or acts of violence within one year of the date of the application because of their occupation or specified restraining orders issued after a noticed hearing.

3) Permits an individual in the public entity employees and contractors Safe at Home program to seek confidential voter status and have their residence address, telephone number, and email address declared confidential upon presentation of certification that the person is a participant in the Safe at Home program, as specified.

4) Includes harassment of a facility or any of its providers, employees, volunteers, or patients, as a basis for a person's application in the Safe at Home program for a reproductive health care service provider, employee, or volunteer or their families because of their affiliation with a reproductive health care services facility, as provided. Includes a certified statement signed by the applicant stating that they have been the target of threats, harassment, or acts of violence within one year of the date of the application because of their occupation or specified restraining orders issued after a noticed hearing as additional documentation that can be submitted to qualify for the Safe at Home program.

5) Requires a county elections official, upon application of a qualified worker, to make confidential that qualified worker's residence address, telephone number, and email address appearing on the affidavit of registration, as provided.
   a) Defines "qualified worker" as a person who is employed by or contracts with the SOS or a local election office who performs election-related work and interacts with the public or is observed by the public doing election-related work, but does not include a person who is a precinct board member who does not otherwise perform election-related work, and a qualified

worker is not limited to those who exclusively perform direct election-related work for the SOS or local election offices.

b) Requires the SOS to submit to the Legislature no later than January 10 of each year a report that includes the total number of applications received for the program established, which includes the number of program participants within each county and describe any allegations of misuse relating to election purposes.

6) Prohibits the names of precinct board members from being listed when posting information about precinct board members, as specified.

7) Declares that it is to take effect immediately as an urgency statute in order to ensure the safety of Californians who work for public entities due to the risk of violence, threats, and harassment from the public.

Comments

With the passage of SB 489 (Alpert, Chapter 1005, Statutes of 1998), the California State Legislature established the Safe at Home program within the Office of the SOS to allow victims of domestic violence to apply for a substitute address to be used in public records in order to prevent their assailants, or potential assailants, from finding their work or home address. Through subsequent legislation, the program has been expanded to include victims of sexual assault, stalking, and reproductive health care service providers, employees, volunteers, and patients. (*See* SB 1318 (Alpert, Chapter 562, Statutes of 2000) and AB 797 (Shelley, Chapter 380, Statutes of 2002).)

Upon successful application, a program participant is certified to remain in the program for four years, subject to early termination or withdrawal, and must re-certify pursuant to the SOS's renewal process if the participant wishes to continue in the program beyond the four-year enrollment period. For victims not yet of the age of majority or incapacitated persons, a parent or guardian may apply to enroll the victim into the program. Program participants may seek confidential voter status and have their residence address, telephone number, and email address declared confidential upon presentation of certification to the county elections official that the person is a participant in the Safe at Home program.

According to the author and the sponsors, over the past two years those charged with administering California's elections have been increasingly subjected to threats, harassment, and intimidation. Election workers face the risk of "doxing"

and harassment as the result of their names, photographs, and addresses being posted online and on social media platforms, as has happened to numerous election officials already around the country. Since November 2020, more than 15 percent of California's election officials have left their jobs. They additionally note that journalists at Reuters have documented violent threats and harassment against election officials across the country, even identifying nine of the harassers whom have not been held accountable.

Other individuals working for public entities have been facing increased harassment as well, especially since the beginning of the COVID-19 pandemic. A survey found that nearly 12 percent of America's public health workforce has been threatened due to their job. The New York Times identified more than 500 top health officials who left their jobs in the past 19 months, in part because of abuse and threats. In the wake of these increased threats, the U.S. Justice Department created separate initiatives to address these increasing threats against election administrators and education workers. School board members and school administrators have also faced increased threats, harassment, and sometimes even violence. In October of 2021, U.S. Attorney General Garland directed the Federal Bureau of Investigation and U.S. Attorneys' Offices to meet with federal, state, tribal, territorial and local law enforcement leaders and discuss strategies for addressing a disturbing trend of threats and abuse toward public school officials.

This bill expands the Safe at Home program to include public entity employees and contractors who faces threats of violence or violence or harassment from the public because of their work for a public entity. The bill defines "public entity" as a federal, state, or local government agency and "work for a public entity" as work performed by an employee of a public entity, or work performed for a public entity by a person pursuant to a contract with the public entity.

All program participants would be subject to the existing enrollment process, orientation, counseling, termination process, and disenrollment process required under the Safe at Home program, except the bill allows an applicant to submit, in addition to a certified statement signed by a person affiliated with the applicant's place of work or employment (1) a certified statement signed by the applicant stating that they have been the target of threats, harassment, or acts of violence within one year of the date of the application because of their occupation or (2) a workplace violence restraining order described in Section 527.8 of the Code of Civil Procedure or a civil restraining order described in Section 527.6 of the Code of Civil Procedure after notice of a hearing.

Existing law authorizes a person who is a participant in a Safe at Home program for victims of domestic violence, sexual assault, stalking, or reproductive health care providers, employees, volunteers, and patients to be granted confidential voter status by the county elections official upon presentation of certification that the person is a participant in a Safe at Home program. (Elec. Code § 2166.5.) This bill grants this same right to participants in the public employee and contractor Safe at Home program.

The bill additionally provides that the basis for seeking participation in the Safe at Home program for reproductive health care providers, employees, volunteers, or patients can include harassment.

Existing law requires a county elections official, upon application of a public safety officer and if authorized by the county board of supervisors, to make confidential an officer's residential address, telephone number, and email address appearing on the affidavit of voter registration. (Elec. Code § 2166.7.) The application is required to contain certain things, including a statement, signed under penalty of perjury, that the person is a public safety officer and that a life-threatening circumstance exists to the officer or a member of the officer's family. (*Id*. at (b).) The confidentiality under this provision terminates no more than two years after commencement, as determined by a county elections official, and an applicant can reapply for confidential voter status. (*Id*. at (c).) This bill enacts substantially similar provisions for a qualified worker, except that the county election official is required to make the information confidential regardless if authorized by the county board of supervisors.

Existing law requires election officials to post a list of all current polling places in each precinct and a list of precinct board members appointed by the 15th day before the election and not less than one week before an election. (Elec. Code § 12105.5(a).) This bill, in order to protect the names of precinct board members instead requires a list of political party affiliation of precinct board members to be posted and specifically prohibits the names of precinct board members from being included on the list.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Costs (General Fund GF)) of approximately $700,000 in fiscal year 2022-23 and approximately $662,000 annually thereafter in additional staff and resources, including P.O. boxes, multiple language translations, and postage.

Costs also include database modifications to accommodate a new participant classification. The SOS reports this bill will add approximately 600 new participants in the SAH program. Additional, unknown costs to process fees for participation in the SAH program. Costs may be offset by the SAH application fees. Existing law requires annual fees assesses for SAH program applications must be used to offset SAH program costs and to reimburse the GF for any amounts expended form the GF for the SAH program.

- Possible reimbursable costs (GF) of an unknown, but potentially significant amount to county elections officials to remove the names of precinct board member in the lists of identified polling places.

ARGUMENTS IN SUPPORT: The author writes, "In recent years, an ever-increasing number of diligent and dedicated public servants have been subjected to threats, intimidation, and sometimes physical violence -- at polling places, in their offices, and even at the grocery store. In some instances, the threats follow them to their home. SB 1131 reduces the likelihood that public servants may be subject to doxing and targeting, by allowing California's public servants to enroll in the "Safe at Home" Program, administered by the Secretary of State, which provides protection to survivors of domestic violence and people who work at reproductive care facilities. This bill also includes an alternative option that allows election workers to withhold their private information from public records requests for those that don't wish to enroll in "Safe at Home", thereby expanding the personal protection and privacy they deserve. This legislation is vital in order to protect Californians."

The Brennan Center for Justice at New York University School of Law, one of the sponsors of the bill, writes, "SB 1131 would ensure that election workers can take advantage of either the Safe at Home program or address confidentiality programs in California. The Safe at Home program provides both address confidentiality and mail forwarding, while the address confidentiality program masks a participant's address in the voter registration file. SB 1131 would also remove the requirement

that those administering elections publicly post the names of pollworkers in advance of elections, while leaving in place the requirement to post pollworker party affiliations. This can boost public trust in elections without undermining pollworker security. […]"

SUBJECT: Prisons: visitation

SOURCE: Prison From the Inside Out

DIGEST: This bill requires the Department of Corrections and Rehabilitation (CDCR) to make emergency phone calls available to an incarcerated person and specified people outside of CDCR when the incarcerated person has been hospitalized for a serious medical reason or when the incarcerated person's family member has become critically ill or died; update certain visitor and medical documents annually or within 30 calendar days of an infectious disease outbreak;

notify specified people within 24 hours of an incarcerated person being hospitalized; and make emergency in-person visits and video calls available whenever an incarcerated person is hospitalized, as specified.

Assembly Amendments remove the requirement that an incarcerated person be allowed to update specified documents within 30 days of an infectious disease outbreak; limit the definition of serious or critical medical condition to mean the incarcerated person needs medical treatment for a terminal illness, needs to receive life-sustaining treatment, or has been admitted to a public or community hospital; limit emergency in-person contact visits or video calls to circumstances in which the incarcerated person has been hospitalized; and eliminate the prohibition on visitor approval when the incarcerated person in in imminent danger of dying and instead require that video visitation be offered without clearance if in-person visitation is unable to take place.

ANALYSIS:

Existing law:

1) Provides that the Secretary of CDCR may prescribe and amend rules and regulations for the administration of the prisons. (Pen. Code, § 5058.)

2) Requires any amendments to existing regulations and any future regulations adopted by CDCR which may impact the visitation of inmates do all of the following: recognize and consider the value of visiting as a means to improve the safety of prisons for both staff and inmates; recognize and consider the important role of inmate visitation in establishing and maintaining a meaningful connection with family and community; and recognize and consider the important role of inmate visitation in preparing an inmate for successful release and rehabilitation. (Pen. Code, § 6400.)

3) Requires CDCR to obtain from an incarcerated person, upon entry and annually, the name and last known address and phone number of any person or persons to be notified in the event of the person's death or serious illness or serious injury, as determined by the physician in attendance. Requires the persons be notified in the order of the incarcerated person's preference. Requires the incarcerated person be provided with the opportunity to modify or amend his or her notification list at any time. (Pen. Code, § 5022, subd. (a).)

4) Requires CDCR to use all reasonable means to contact the person or persons set forth in the notification list upon the death or serious illness or serious

injury, as determined by the physician in attendance, of the incarcerated person. (Pen. Code, § 5022, subd. (b).)

5) Allows any adult patient of a health care provider and any patient's personal representative to inspect patient records upon presenting to the health care provider a request for those records and upon payment of reasonable costs. (Health & Saf. Code, § 123110, subd. (a).)

This bill:

1) Prohibits the Secretary of CDCR from charging a fee for an incarcerated person to request, review, or use their medical records.

2) Requires that emergency phone calls are made available to persons outside of CDCR and to incarcerated people, as specified. Requires CDCR to provide persons outside the facility the means to initiate a phone call to an incarcerated person in either of the following circumstances:

   a) When the incarcerated person has been admitted to the hospital for a serious medical reason.

   b) When a family member, approved visitor, next of kin, or persons listed on the medical release of information form or medial power of attorney form has become critically ill or has died while the incarcerated person has been hospitalized.

3) Requires that at intake and at least once a year thereafter, and within 30 calendar days of an infectious disease outbreak in a department facility, every incarcerated person be asked whom they want covered by the following documents:

   a) Approved visitor list. Requires CDCR, if the incarcerated person would like to add a visitor, to provide a visitor application form for the incarcerated person to sign and send to the potential visitor, who may then complete and submit it to the visiting department of the facility.

   b) Medical release of information form.

   c) Medical power of attorney form.

   d) Next of Kin form authorizing control over body and possessions in case of death.

4) Requires that incarcerated individuals be assisted in completing the above paperwork.

5) Requires CDCR, within 24 hours of an incarcerated person being hospitalized for a serious medical reason, to inform persons covered by the current medical release of information form about the incarcerated person's health status and to facilitate phone calls between the incarcerated person and those persons if the incarcerated person consents.

6) Provides that a serious medical reason includes any of the following:

   a) A medical professional has determined that the incarcerated person needs medical treatment in a public or community hospital.

   b) A medical professional has determined that the incarcerated person needs medical treatment for a terminal disease.

   c) A medical professional has determined that the incarcerated person needs to receive life-sustaining medical treatment.

   d) The incarcerated person has suffered from a medical emergency and is receiving treatment at a prison hospital.

   e) The incarcerated person has died.

7) Requires within 24 hours of an incarcerated person being hospitalized and if the incarcerated person is able to provide knowing and voluntary consent, CDCR to ask the incarcerated person whether they want to add people to any of the above specified forms who have not previously been designated. Requires CDCR to promptly assist, as necessary, the incarcerated person in completing the paperwork. Requires CDCR to promptly inform the newly designated persons on the medical release form of the incarcerated person's condition and facilitate a phone call between the incarcerated person and the newly designated person.

8) Requires CDCR to maintain a phone line for outside people to call to inform the department that a family member or a person designated in any of the above listed forms has become critically ill or has died while the incarcerated person has been hospitalized. Requires CDCR to notify the incarcerated person of these calls upon their receipt.

9) Requires emergency in-person contact visits and video calls to be made available whenever an incarcerated person is hospitalized or moved to a

medical unit within the facility and the incarcerated person is in a critical or more serious medical condition. Requires video calls be made available if in-person contact visits are unavailable at the facility due to a public health emergency or are inconsistent with the patient's current medical treatment needs, as determined by their medical provider. Requires any visitor approval process to be conducted within 24 hours. No visitor approval process is required when the incarcerated person is in imminent danger of dying. Requires CDCR to allow up to four visitors at one time to visit the incarcerated person when the incarcerated person is in imminent danger of dying.

10) Provides that "hospital" includes an on-site facility set up to provide hospital-like services during a public health emergency.

11) Requires CDCR to have a grievance process in place by which the incarcerated person, or the person designated by the incarcerated person on the above specified forms, may file a formal grievance to review:

    a) CDCR's failure to provide the incarcerated person's health care information and records to the designated person;

    b) CDCR's failure to provide notice to the designated person as required;

    c) CDCR's decision to deny visitation as required; or

    d) CDCR's failure to provide adequate medical care and treatment.

12) Provides that CDCR's existing grievance process satisfies the requirements that CDCR have a grievance process as outlined above.

13) Provides that it is contingent upon the appropriation of funds by express reference in the annual Budget Act or another statute.

Background

Phone Calls

CDCR regulations generally require the state's prisons to provide phones for use by incarcerated individuals. (Cal. Code Regs, tit. 15, § 3282, subd. (b).) Incarcerated individuals may place collect phone calls to persons outside the facility at designated times and on designated phones, as set forth in local procedures. (*Id*.) Limitations may be placed on the frequency and length of such calls based on the person's privilege group and to ensure equal access. (*Id*.) Regulations further provide that if a staff member determines that an incoming call

concerns an emergency matter, the staff member is required to obtain the caller's name and phone number, to notify the incarcerated person promptly of the situation, and to permit the incarcerated person to place an emergency call. (Cal. Code Regs, tit. 15, § 3282, subd. (g).) "Emergency call" is defined as a phone call regarding the serious illness or injury, or the death of an incarcerated person's immediate family member. (Cal. Code Regs, tit. 15, § 3282, subd. (a).)

Visitation

CDCR regulations provide for the general policies and protocols related to visits. As required by state law, the department's regulations "are made in recognition and consideration of the value of inmate visitation as a means of increasing safety in prisons, maintaining family and community connections, and preparing inmates for successful release and rehabilitation." (Cal. Code Regs., tit. 15, § 3170, subd. (a).) The regulations additionally provide that "[i]t is the intent of these regulations to establish a visiting process in the institutions/facilities of the department that is conducted in as accommodating a manner as possible, subject to the need to maintain order, the safety of persons, the security of the institution/facility, and required prison activities and operations." (*Id*.) Before a person may be permitted to visit someone incarcerated in one of CDCR's institutions, the person must apply for approval using the department's questionnaire. (Cal. Code Regs., tit. 15, § 3172, subd. (b).) Regulations require that the visiting approval application process include an inquiry of personal, identifying, and the arrest history information of the prospective visitor sufficient to complete a criminal records clearance and a decision by the staff at the institution to approve or disapprove based upon the information provided. (Cal. Code Regs., tit. 15, § 3172, subd. (e).)

CDCR regulations provide the following non-exhaustive list of reasons for the disapproval of a prospective visitor:

- The prospective visitor has outstanding arrests or warrants, including a Department of Motor Vehicles Failure to Appear notice with no disposition from the court.

- The prospective visitor has one felony conviction within the last three years, two felony convictions within the last six years, or three or more felony convictions during the last 10 years.

- The prospective visitor has any one conviction of the following types of offenses: distributing a controlled substance into or out of a state prison, correctional facility, or jail; transporting contraband, including weapons, alcohol, escape and drug paraphernalia, and cell phones or other wireless

communication devices, in or out of a state prison, correctional facility, or jail; aiding or attempting to aid in an escape or attempted escape from a state prison, correctional facility, or jail; or the prospective visitor is a co-offender of the incarcerated individual.

- The prospective visitor is a former prison inmate who has not received the prior written approval of the institution head or designee.

- The prospective visitor is a supervised parolee, probationer, or on civil addict outpatient status and has not received written permission of his or her case supervisor and/or the prior approval of the institution head.

- The identity of the prospective visitor or any information on the visiting questionnaire, is omitted or falsified. (Cal. Code Regs., tit. 15, § 3172.1, subd. (b).)

Finally, the institution head is required to maintain visiting procedures for visiting at each institution or facility that are consistent with department regulations. (Cal. Code Regs., tit. 15, § 3171, subd. (a).)

In Custody Injuries and Deaths

Current law requires CDCR to obtain from an incarcerated person, upon entry and annually, the name and last known address and phone number of any person or persons to be notified in the event of the person's death or serious illness or serious injury, as determined by the physician in attendance. (Pen. Code, § 5022, subd. (a).) Existing law also requires the incarcerated person be provided with the opportunity to modify or amend his or her notification list at any time. (*Id*.) CDCR is required to use all reasonable means to contact the person or persons set forth in the notification list upon the death or serious illness or serious injury, as determined by the physician in attendance, of the incarcerated person. (Pen. Code, § 5022, subd. (b).)

Regulations require, upon the death of an incarcerated person, a CDCR staff member to review the person's central file and locate the current Notification in Case of Inmate Death, Serious Injury, or Serious Illness to identify the person's next of kin or person or persons to be notified. (Cal. Code Regs., tit. 15, § 3999.417, subd. (e).) This form must be completed annually or when the incarcerated person is transferred to a new prison. (*Id*.) Regulations require counseling staff to complete the Notification and to witness the incarcerated person's dated signature. (*Id*.) The Notification must include: the name of the incarcerated person, CDCR number, personal identification number, and current

institution; the name, relationship, telephone, and address of person to be notified; the name, relationship, telephone, and address of the contact person for a will; and whether the inmate is a foreign national. (*Id*.) Staff is required attempt to notify the person or persons listed on the Notification in Case of Inmate Death, Serious Injury, or Serious Illness as the person(s) to be notified of the death, in person, or, if personal contact is not practical, by phone. (Cal. Code Regs., tit. 15, § 3999.417, subd. (f).) Staff is required to send a notification to the next-of-kin, person or persons to be notified, and the legally appointed representative which must include the name and telephone number of a staff member who may be contacted for additional information, among other things.

Health Care Grievances

Regulations specify that the health care grievance process provides an administrative remedy to patients for review of complaints of applied health care policies, decisions, actions, conditions, or omissions that have a material adverse effect on their health or welfare. (Cal. Code Regs., tit. 15, § 3999.226, subd. (a).) Health care grievances are subject to an institutional level review and may receive a headquarters' level grievance appeal review, if requested by the grievant. (*Id*.)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, costs (General Fund) in the tens of millions of dollars to CDCR annually in additional staff and infrastructure to provide emergency phone calls, update visitor and medical documents, notify identified parties within 24 hours of an inmate being hospitalized, and arrange for emergency in-person visits in specified circumstances. Specifically, California Correctional Health Care Services (CHSS) estimates additional personnel will be required to meet the expected requests from the incarcerated population. CDCR also reports costs of an unknown, but potentially significant amount associated with contacting individuals as a result of an incarcerated person needing medical treatment in a public or community hospital CDCR noted that it sends hundreds of incarcerated people to public or community hospitals for treatment every week, meaning this bill would results in significant additional staff workload to make the necessary notifications. CDCR also estimates costs of an unknown, but potentially significant amount for the purchase of equipment to facilitate video calls at community or public hospitals. Depending on existing hospital infrastructure, it may be necessary to add video calling equipment to individual hospital rooms. CDCR also notices this bill may require additional security to comply with the visitation requirements at hospitals, and additional staffing to implement the grievance process for alleged violations of the bill's provisions.

SUBJECT: Public postsecondary education: exemption from payment of nonresident tuition

SOURCE: California Community Colleges Chancellor's Office

DIGEST: This bill expands eligibility for the exemption from paying nonresident tuition at a California public postsecondary institution established for long-term California residents, regardless of citizenship status, by removing the two-year cap on CCC credit courses that may count towards eligibility.

Assembly Amendments reinstate the three-year requirement for total attendance at a California school.

ANALYSIS:

Existing law:

1) Establishes a variety of residency requirements for students attending the California Community Colleges (CCC) or the California State University (CSU). The determination of such residency status is required in order to assess either resident or non-resident fees and tuition. The Regents of the University of California (UC) may, by resolution, make these provisions of law applicable to the UC (and historically have done so). (Education Code (EC) § 68000-68134)

2) Exempts, pursuant to AB 540 (Firebaugh, Chapter 814, Statutes of 2001), California nonresident students, regardless of citizenship status, from paying nonresident tuition at California public colleges and universities who meet all of the following requirements who have graduated from a California high school (or the equivalent) and either:

   a) Satisfaction of the requirements of either (i) or (ii):

      i) A total attendance of, or attainment of credits earned while in California equivalent to, three or more years of full-time attendance or attainment of credits at any of the following:

         (1) California high schools;

         (2) California high schools established by the State Board of Education;

         (3) California adult schools established by any of the following entities:

            (a) A county office of education.
            (b) A unified school district or high school district.
            (c) The Department of Corrections and Rehabilitation.

         (4) Campuses of the CCC.

         (5) A combination of those schools set forth in (1) to (4), inclusive.

      ii) Three or more years of full-time high school coursework in California, and a total of three or more years of attendance in California elementary schools, California secondary schools, or a combination of California elementary and secondary schools.

   b) Satisfaction of any of the following:

i) Graduation from a California high school or attainment of the equivalent.

ii) Attainment of an associate degree from a campus of the CCC.

iii) Fulfillment of the minimum transfer requirements established for UC or CSU for students transferring from a campus of the CCC. (EC § 68130.5.)

3) Provides that a student who meets nonresident tuition exemption requirements under EC Section 68130.5 or who meets equivalent requirements adopted by the UC is eligible to apply for any financial aid program administered by the state to the full extent permitted by federal law. (EC § 69508.5)

4) Provides that a student attending a CSU, CCC, or UC who is exempt from paying nonresident tuition under EC Section 68130.5 is eligible to receive a scholarship derived from non-state funds received, for the purpose of scholarships, by the segment at which he or she is a student. (EC § 66021.7)

This bill expands eligibility for the exemption from paying nonresident tuition at a California public postsecondary institution established for long-term California residents, regardless of citizenship status. Specifically it, removes the two-year cap on CCC credit courses that can count towards the three-year minimum requirement for total attendance at a California school in order to qualify for the exemption.

Comments

1) *Need for the bill.* According to the author, "Students attending a CCC can only count two years of full-time attendance in credit courses towards the 3-year threshold necessary to qualify. As a result, students are forced to enroll in noncredit courses for one year even if those programs are not aligned to their educational goals. This bill saves nonresident students money and makes higher education more accessible."

   The author further claims, "SB 1141 corrects unintended consequences that have left out some undocumented students from accessing AB 540 benefits. To increase the accessibility of higher education for undocumented students, SB 1141 changes the threshold to qualify for AB 540 from 3 years to 2. This saves AB 540 eligible students time and an average of $8,700 in tuition per academic year at a community college; $11,880 at a CSU; and $28,992 at a UC."

2) *Nonresident vs resident tuition.* Persons deemed as nonresidents of California for purposes of paying tuition at a California public institution at UC, CSU or CCC, are charged a significantly higher tuition rate than the amount charged for

resident tuition. In the current year, at CCCs, California residents pay $46 per unit while nonresidents pay $346 per unit. At CSU, undergraduate resident students pay $5,742 per year in mandatory systemwide tuition fees, while nonresident students pay $15,246. Within the UC system, undergraduate resident students pay $13,104 per year while nonresident students pay $44,130.

3) *Legislative history.* AB 540 provided a means of qualifying long-term California residents, upon graduation from a California high school and regardless of citizenship status, for lower resident fees at our public segments of higher education. It required students and their families to demonstrate their long-term presence by attending a California high school for three or more years, arguably as a means of ensuring that these students and their families invested sufficient time within the California school system and should accordingly receive benefits. In 2014, AB 2000 (Gomez, Chapter 675, Statutes of 2014) sought to extend eligibility to long term Californians in accelerated learning programs who graduate ahead of the attendance requirement but who attained high school credits equivalent to three or more years of full-time coursework in California from a California high school.

   Subsequent legislation, SB 68 (Lara, Chapter 496, Statutes of 2018) significantly expanded pathways for qualifying a student by either attendance or attainment of equivalent credits earned from an expanded list of California schools including community colleges. However, it restricted full-time attendance in CCC credit courses that can count toward the three-year threshold to two-years leaving one year of credit to be applied from a California school other than a community college. SB 68 also provided an alternative to the high school graduation requirement, with attainment of an associate degree or fulfillment of minimum transfer requirements from a CCC. SB 68 ultimately extended privileges to long-term Californians who were adult learners seeking access to higher education.

4) *Removes two-year cap for CCC attendance.* Current law exempts nonresident students from paying the higher tuition rate if they have attended a combination of adult school, community college, secondary or elementary school in California for a minimum of three years. However, within the three-year minimum only two-years of CCC credit courses can be applied towards meeting the attendance requirement. The sponsors of this bill argue that the cap forces CCC students take one-year of noncredit courses. A situation likely resulting from having no other California elementary, secondary, or adult school connection. This bill removes that cap.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Unknown, ongoing General Fund costs, potentially in the millions of dollars annually, to UC.

  The number of students who would be newly eligible for resident tuition as a result of this bill at UC is unknown. However, if 400 domestic nonresident students enrolled at a UC who under current law would be charged nonresident supplemental tuition, costs would be about $12 million each year. In addition, UC provides financial aid to low-income resident students through its UC Grant program. To the extent students newly eligible for resident tuition are low-income, the UC may provide financial aid to these students, potentially resulting in additional General Fund costs to the UC.

- Unknown, ongoing General Fund costs, potentially in the millions of dollar annually, to CSU.

  The number of students who would be newly eligible for resident tuition as a result of this bill at CSU is unknown. However, if 500 domestic nonresident enrolled at a CSU who under current law would be charged nonresident supplemental tuition, costs would be about $6 million each year.

- Unknown, ongoing Proposition 98 General Fund costs, potentially millions of dollars annually, to CCC.

  The number of students who would be newly eligible for resident tuition as a result of this bill at CCC is unknown. However, if 600 domestic nonresident students enrolled at a CCC who under current law would be charged nonresident supplemental tuition, costs would be about $4 million each year. In addition, CCC provides financial aid to low-income resident students through its California Promise Grant program. To the extent students newly eligible for resident tuition are low-income, the CCC would provide financial aid to these students, potentially resulting in additional Proposition 98 General Fund costs in the high hundreds of thousands annually.

  The state would need to reimburse these costs to CCC, if the Commission on State Mandates determines he bill's requirement to be a reimbursable state mandate.

- Unknown, ongoing General Fund costs to the California Student Aid Commission (CSAC), potentially in the hundreds of thousands to millions of dollars annually, to provide Cal Grant financial aid to students, to the extent students newly eligible for resident tuition are low-income and qualify for a Cal Grant financial aid entitlement award.

  The Cal Grant covers tuition costs for qualifying low-income resident students. Therefore, costs would depend not only on the number of students newly eligible for the award, but also tuition costs at the type of institution they attend.

SUBJECT: Acute Care Psychiatric Hospital Loan Fund

SOURCE: Author

DIGEST: This bill establishes the California Acute Care Psychiatric Hospital Loan Fund to provide zero-interest loans to qualifying county applicants for the purpose of constructing or renovating acute care psychiatric hospitals or psychiatric health facilities, or renovating or expanding general acute care hospitals in order to add or expand an inpatient psychiatric unit.

Assembly Amendments add psychiatric health facilities to the list of facilities eligible for the loan fund, require all moneys in the loan fund to be continuously

appropriated, and permit moneys in the loan fund not required for current needs to be invested in eligible securities.

ANALYSIS:

Existing law:

1) Licenses and regulates hospitals, including general acute care hospitals and an acute psychiatric hospitals (APHs), by the California Department of Public Health (CDPH). Permits general acute care hospitals, in addition to the basic services all hospitals are required to offer, to be approved by CDPH to offer special services, including, among other services, an emergency department, and psychiatric services. [HSC §1250 and §1255, et seq.]

2) Licenses psychiatric health facilities (PHFs) by the Department of Health Care Services (DHCS), which are defined as health facilities that provide 24-hour inpatient care for people with mental health disorders, whose physical health needs can be met in an affiliated hospital or in outpatient settings. [HSC §1250.2]

3) Establishes the Lanterman-Petris-Short (LPS) Act and declares the intent of the Legislature to end the inappropriate, indefinite, and involuntary commitment of persons with mental health disorders, developmental disabilities, and chronic alcoholism, as well as to safeguard a person's rights, provide prompt evaluation and treatment, and provide services in the least restrictive setting appropriate to the needs of each person. [WIC §5000, et seq.]

4) Authorizes, under Section 5150 of the Welfare and Institutions Code, a peace officer, member of the attending staff of a "designated facility," as defined, member of the attending staff of a designated facility, or other professional person designated by the county, upon probable cause, to take a person with a mental disorder who is a danger to self or others, or is gravely disabled, into custody (a "5150" hold) and place him or her in a designated facility. [WIC §5150]

5) Defines "designated facility" or "facility designated by the county for evaluation and treatment" as a facility that is licensed or certified as a mental health treatment facility or a hospital, as defined, and includes, but is not limited to, a licensed psychiatric hospital, a licensed psychiatric health facility, and a certified crisis stabilization unit. [WIC §5008]

6) Establishes the California Health Facilities Financing Authority (CHFFA) consisting of nine members, led by the State Treasurer who serves as the chair, and the executive director, who is appointed by the State Treasurer. States the intent of the Legislature to provide financing to health institutions that can demonstrate the financial feasibility of their projects, and that any savings experienced by the health institution be passed on to the consuming public through lower charges or containment of the rate of increase in hospital rates. [GOV §15430, et seq.]

This bill:

1) Establishes the California Acute Care Psychiatric Hospital (CACPH) Loan Fund to provide zero-interest loans to qualifying county applicants for the purpose of constructing or renovating APHs, as defined, constructing or renovating PHFs, as defined, or renovating or expanding general acute care hospitals in order to add or expand an inpatient psychiatric unit.

2) Requires all moneys in the CACPH Loan Fund to be continuously appropriated without regard to fiscal years to CHFFA, and requires all moneys accruing to CHFFA pursuant to this bill from any source to be deposited into the fund.

3) Permits the California State Treasurer to invest moneys in the CACPH Loan Fund that are not required for its current needs in eligible securities, as specified, and to transfer moneys in the fund to the Surplus Money Investment Fund, as specified.

4) Requires CHFFA to develop an application for county applicants to the CACPH Loan Fund, and requires the application to include requests for relevant information, such as project goals, costs, demonstrated need, timeline for the project, financial feasibility of the project, and other information deemed necessary for evaluation of creditworthiness and public benefit criteria established by CHFFA.

5) Requires the application developed in 4) above to be available by January 1, 2024, in accordance with CHFFA's existing regulations or any necessary amendments, which are required to be undertaken as emergency regulations, if necessary.

6) Permits applications to be submitted to the authority by county applicants pursuant to criteria to be developed by CHFFA, and requires initial preliminary

applications for projects to be considered to be submitted to the authority no later than April 1, 2024. Permits CHFFA to establish subsequent application periods, as necessary.

7) Requires CHFFA, in the event that it receives or anticipates receiving more applications than its allocation of moneys can support, to consider any of the following criteria in the selection of projects:
   a) The county's unmet need for acute care psychiatric hospital infrastructure, with priority given to applicants with greater unmet need;
   b) Whether a local match is available, and priority is given to projects with a local match based on the proposed number of acute psychiatric beds:
      i) For a project with 75 beds or greater, requires priority to be given to projects with a 20% match;
      ii) For a project with 50 beds, requires priority to be given to projects with a 30% match;
      iii) For a project with 25 beds, requires priority to be given to projects with a 40% match; and,
      iv) For a project with fewer than 25 beds, requires priority to be given to projects with a 50% match;
   c) Medically underserved regions in the state; and,
   d) When considered as a whole, applications approved pursuant to this bill are fairly representative of various geographical regions, including inland regions of the state.

8) Requires a loan recipient to maintain the facility and provide sufficient staff to operate the facility throughout the life of the loan.

9) Makes various legislative findings and declarations, including that psychiatric beds are an essential infrastructure for meeting the needs of individuals with serious mental health conditions, psychiatric bed capacity is severely strained in California, and that hundreds of Californians in need of psychiatric beds are held in hospital emergency rooms or county jails awaiting openings in inpatient care settings.

Comments

1) *Author's statement.* According to the author, California is home to over 1 million adults who are afflicted with serious mental disorders, such as schizophrenia and/or bipolar disorder, with over 477,000 people going untreated. Psychiatric beds are essential infrastructure for meeting the needs of

individuals with severe mental health conditions. The lack of APH beds has increased the strain on the complex and interconnected mental health delivery system for inpatient care. In the rapidly growing and ethnically diverse area of Inland Southern California, the shortage of beds is particularly severe, per OSHPD data. For example, Riverside County currently has 8.3 inpatient psychiatric beds per 100,000 people. SB 1143 would provide qualifying counties with an opportunity to access scarce infrastructure dollars to construct new acute APHs.

2) *Background on existing CHFFA programs.* CHFFA was created to be the state's vehicle for providing financial assistance to public and nonprofit health care providers primarily through loans funded by the issuance of tax-exempt bonds. To this end, CHFFA administers the Bond Financing Program and the Tax-Exempt Equipment Financing Program. CHFFA also provides direct loans to small and rural health facilities through the Healthcare Expansion Loan Program (HELP) II Financing Program. In September of 2021, the Governor signed into law the Nondesignated Public Hospital Bridge Loan Program to enable CHFFA to issue up to $40 million in working capital loans at zero interest rate to certain hospitals that are affected by financial delays associated with the transition to the Quality Incentive Program. These Nondesignated Public Hospital Bridge Loans are required to be paid back in two years, and are secured by Medi-Cal reimbursements. Additionally, CHFFA administers several grant programs, including the Children's Hospital Programs, the Community Services Infrastructure Grant Program, and the Investment in Mental Health Wellness Grant Program. Under the Mental Health Wellness grant program, Counties can apply for funding to develop a continuum of crisis services to children and youth up to 21 years of age in four categories: crisis residential treatment, crisis stabilization, mobile crisis support teams, and family respite care. There was an initial allocation of about $40 million for this Mental Health Wellness grant program, and there is still about $9 million available for mobile crisis support team programs.

   By borrowing through CHFFA’s tax-exempt bond financing program, health facilities can likely obtain lower interest rates than they would through conventional bonds. Generally, non-profit, licensed health facilities in California, including adult day health centers, community clinics, skilled nursing facilities, developmentally disabled centers, hospitals, and drug and alcohol rehabilitation centers are eligible for CHFFA financing. Proceeds from CHFFA financings may be used for project-related costs, including: construction; remodeling and renovation; land acquisition (as part of the

proposed project); acquisition of existing health facilities; purchase or lease of equipment; refinancing or refunding of prior debt; working capital for start-up facilities; costs of bond issuance; feasibility studies; and reimbursement of prior expenses. Under statute, savings from issuance of tax-exempt bonds for borrowers must be transferred to the public through lower or contained costs for delivery of health services. Since its first bond issuance in 1981, CHFFA's bond financing program has issued 639 bonds for a total of approximately $46 billion, with 275 health facilities availing themselves of this financing.

3) *APHs, psychiatric health facilities, and crisis stabilization units.* Generally speaking, inpatient beds for acute psychiatric patients are either provided in a distinct behavioral health unit of a general acute care hospital, in a freestanding APH, or in a PHF. All of these can be, and most are, "designated facilities" under provisions of the LPS Act that allow individuals to be involuntarily held and treated in a manner that safeguards their constitutional rights. There are 33 licensed APHs in California, and 29 PHFs. APHs are licensed by CDPH, and are required to provide medical, nursing, rehabilitative, pharmacy and dietary services, in addition to psychiatric services. PHFs are licensed by DHCS, and while not a hospital, are licensed to provide inpatient acute psychiatric care similar to a psychiatric hospital. However, the requirements for PHFs are not the same as those for APHs. For example, PHFs are not required to provide general medical services. While a PHF is required to have a physician be on-call at all times, a patient can only be admitted to a PHF if the individual's physical health care could otherwise be managed on an outpatient basis. An APH, on the other hand, is required to provide a medical service as part of their basic services, which must include a general medicine component. The general medicine component is required to provide all incidental medical services necessary for the care of patients, including general medicine and surgery. PHFs historically are county-run, or under contract by counties, to provide inpatient care to Medi-Cal beneficiaries through a county mental health plan.

4) *IMD exclusion, possible waiver, and continuum of care grant program.* Under the Medi-Cal program, federal rules do not allow for a federal match for adults under the age of 65 who are receiving care in a treatment facility with more than 16 beds. This is known as the Institute for Mental Disease (IMD) exclusion. Federal rules define an IMD as any "hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases." Because the rule requires the institution to "primarily" be established and maintained for the care of individuals with mental disease, that means that a general acute care hospital,

even if it has a large wing with more than 16 beds dedicated to in-patient psychiatric care, would not be considered an IMD as long as more than 50% of all admitted patients at the hospital were there for non-psychiatric reasons. The IMD exclusion is the reason that 29 out of the 33 PHFs licensed statewide, the majority of which are operated by counties, have 16 or fewer beds.

The federal Centers for Medicare and Medicaid Services (CMS) began approving waivers from the IMD payment exclusion for treatment of substance abuse disorders in 2016. In 2018, CMS created a similar waiver for those with serious mental illnesses or emotional disturbances. California is currently one of 34 states that operate under the waiver from the substance abuse treatment exclusion, which it sought as part of its 2020 CalAIM waiver request. An IMD waiver for mental illness would require that communities develop and demonstrate a robust continuum of care so that patients could be "stepped down" to community-based care as their condition improves. To prepare for an IMD waiver request, the 2021-22 Budget authorized DHCS to establish the Behavioral Health Continuum Infrastructure Program (BHCIP) and awarded $2.2 billion to local public and private entities to construct, acquire, and expand properties and invest in mobile crisis infrastructure related to behavioral health. DHCS is releasing these funds through six grant rounds targeting various gaps in the state's behavioral health facility infrastructure. It is unclear at this time when an IMD waiver for mental illness will be submitted, or approved, or what conditions will be associated with allowing Medi-Cal payment for IMDs with more than 16 beds.

5) *Support if amended.* The California Behavioral Health Directors Association (CBHDA) supports the intent of this bill, but requests amendments. Specifically, CBHDA requests that qualifying county applicants include community partners with the background and expertise in developing hospitals and health facilities, including demonstrating support from county behavioral health agencies and their contracted providers; requests that the prioritization criteria not favor large facilities due to the IMD exclusion; and, requests the loan fund support the development of co-located facilities that support clients moving from higher levels of psychiatric inpatient care to a co-located lower level of care.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) CHFFA indicates costs would depend on the total program allocation amount, the average size of a loan, and the number of applications CHFFA would receive in a year to process. CHFFA estimates costs of $1.2 million (General Fund) for three staff and consulting costs of approximately $150,000 to develop a new revolving loan fund program. Such a program would require development of regulations, policies, and forms, and a loan tracking system. Staff would also review loan applications and make recommendations to approve the loans.

2) Minor and absorbable costs to the Department of Health Care Access and Information.

OPPOSITION: (Verified 8/22/22)

Department of Finance

ARGUMENTS IN SUPPORT: This bill is supported by a number of organizations in the health care, local government, and business community. Riverside County states in support that it is actively planning for the replacement of their existing psychiatric facility with a modern, 100-bed facility. Riverside County states that this facility, which will be an expansion to the Riverside University Health System Medical Center, will include 4 adult inpatient units with 18 beds each, an adolescent inpatient unit of 12-16 beds, and a pediatric inpatient unit of 12 beds. Riverside County anticipates the total cost of this facility to be approximately $300 to $400 million. This bill provides a critically needed opportunity for the state to help facilitate an investment in infrastructure that serves to improve patient outcomes for the betterment of all of us. The Inland Empire Health Plan (IEHP) states that as the entity coordinating care for 1.5 million Medi-Cal beneficiaries in San Bernardino and Riverside Counties, they are acutely aware of the mental health challenges in the region. IEHP is encourage by other efforts the state is pursuing to increase access to mental health services, and this bill is important to that framework. The California Medical Association states in support that this bill has the potential to reduce patient overcrowding in emergency rooms, while creating additional space and beds for physicians practicing in a psychiatric setting.

ARGUMENTS IN OPPOSITION: The Department of Finance (DOF) opposes this bill, stating that creating of a new loan program should be considered in the context of competing budgetary priorities because the identified costs and

resources required to implement the bill create General Fund cost pressure. Additionally, DOF states that this bill does not include certain loan program protections for the state such as security for the loans via Medi-Cal reimbursements if applicable or a maximum loan repayment term, given it authorizes CHFFA to indefinite loan repayment extensions.

SUBJECT: Department of Motor Vehicles: electronic notifications and transactions

SOURCE: Author

DIGEST: This bill allows for Department of Motor Vehicles (DMV) customers to opt in to receiving select DMV notices electronically.

Assembly Amendments make technical changes and deal with chaptering-out conflicts with SB 837 (Umberg).

ANALYSIS:

Existing law:

1) Requires a state department, including the DMV, or a division, officer, employee, or agent, to give various notices or communications to persons, and requires that whenever that notice is required to be given, the notice is to be given either by personal delivery, by certified mail, or by mail.

2) Requires that whenever notice is required to be given by the DMV, the notice shall be given either by personal delivery to the person to be notified; by certified mail, return receipt requested; or by mailing the notice, postage prepaid, addressed to the person at their address as shown by the records of the DMV.

3) Specifies that the giving of notice by personal delivery is complete upon delivery of a copy of the notice to the person to be notified. The giving of notice by mail is complete upon the expiration of four days after deposit of the notice in the mail, except that in the case of a notice informing a person of an offense against them, the notice is complete 10 days after mailing.

4) Specifies that wherever a notice or other communication is required to be mailed by registered mail by or to a person or corporation, the mailing of that notice or other communication by certified mail, shall be deemed to be a sufficient compliance with the requirements of law.

5) Requires a person to have a valid license or temporary permit issued by the DMV to act as a vehicle salesperson, and requires the DMV to issue a license bearing a full-face photograph of the licensed vehicle salesperson, among other information, upon their application for the license.

This bill:

1) Permits certain DMV notices, currently required by law to be mailed, to be delivered electronically.

2) Specifies that the giving of notice by electronic notification is complete upon sending the electronic notification.

3) Specifies that wherever a notice or other communication is required, electronic notification shall be deemed to be a sufficient compliance with the requirements of law.

4) Authorizes, for a provision of the Vehicle Code or of Title 13 of the California Code of Regulations that requires the DMV to mail, notify, deliver via certified or first class mail, provide information in written form, or otherwise references the use of paper, a writing, or the mail to convey information to a person of any departmental actions related to a permit, license, identification card, endorsement, certificate, or vehicle registration, that requirement may be satisfied by electronic notification, including, but not limited to, email, if the all of the following are established by the DMV:

   a) The DMV identified the person prior to accepting their consent to receive the type of document or information that is electronically delivered.

   b) The person consented to the electronic receipt of the type of document or information delivered.

   c) The DMV permits a person to withdraw their consent to electronically receive the type of document or information.

   d) The DMV records do not indicate the person withdrew their consent to electronically receive this type of document or information as of the date the document or information was electronically sent.

5) Specifies that for a provision of this code that refers to an address for any kind of notice or mailing, and mailing is effected pursuant to this section, an email or electronic delivery address provided to the DMV by the recipient may be used.

6) Specifies that a person who provides an electronic delivery address to the DMV shall notify the DMV of any change to that address.

7) Specifies the consent to accept electronic notification may be made electronically.

8) Specifies the DMV may adopt regulations to implement this section.

9) Permits the DMV to require a photograph at the time of the license renewal.

10) Removes the requirement that a vehicles salesperson's license be renewed in person.

11) Removes the requirement that a veteran come into the DMV to apply for a veteran designation.

Comments

1) *Purpose*. According to the author, "In response to the ongoing COVID-19 pandemic, DMV has deployed new technologies and services to streamline workflow processes and improve the customer experience. SB 1193 continues the DMV's modernization progress by allowing customers the option to receive paperless notifications and apply for a veteran designation or renew a vehicle salesperson license online without an in-person visit. By allowing for electronic notices and reducing the number of required in-person transactions, this bill will reduce wait times at DMV locations while improving overall efficiency and the customer experience for veterans, vehicle salespersons, and people who prefer 'paperless' notifications."

2) *Going Paperless*. Currently, the DMV allows for customers to opt in to receive limited electronic notices. These notices include driver's license renewal notices, identification card renewal notices, vehicle/vessel renewal notices. This bill will expand the DMV's ability to include other notices, provided the customer consents to and opts into paperless notices. When a customer logs into their DMV account they navigate to the "paperless notices" tab under their account. They are given an "agreement for paperless notices" prompt that notifies the customer they are electronically consenting to receive selected DMV notices electronically. The prompt also provides that the customer can withdraw consent, change their preferences back to paper notices, or request paper notices at any time. To withdraw their consent and change their preferences back to paper notices, the customer logs into their DMV account and navigates to the "paperless notices" tab under their account again. The customer then clicks the "deselect all" option and then clicks update. The customer will then begin receiving notices in paper format.

3) *Veteran Designations*. Under current law, a veteran has the option to have their veteran status printed on their driver's license or identification card to help them quickly identify themselves and receive benefits they are entitled to. The veteran must pay a five dollar fee to the DMV. The veteran must reach out to their County Veteran Service Office (CVSO) to receive and complete their

Veteran Status Verification Form (VSD-001). This form is not available at the DMV but must be physically filed at the DMV before the DMV will update the veteran's driver's license or identification card. This bill removes the requirement that a veteran must come into the DMV to file their VSD-001. Notably, the veteran is still required to reach out to their CVSO to receive the VSD-001. This is important because the CVSO is responsible for connecting the veteran to many benefits they may not be privy to.

SB 837 (Umberg—pending on the Senate Floor) seeks to remove the $5 fee a veteran is required to pay for the designation. If SB 837 fails to become law, the $5 fee could also be paid electronically, meaning at no point in applying for the veteran designation will the veteran need to come in to the DMV office.

4) *Customer convenience.* DMV customers have expressed their discontent with DMV wait times. Similarly, many field offices were closed during the COVID-19 pandemic making it difficult for customers to receive services without the ability to do so online. To remedy the wait times and increase online servicing, the DMV is undergoing a modernization enhancement to provide customer notifications electronically to increase efficiency and decrease the need for DMV visits. This bill removes the in-person requirement for veterans applying for a veteran designation on their driver's license or identification card and for vehicle salespersons renewing their licenses. Coupled with the additional electronic notifications, this bill has the potential to reduce the number of required in-person DMV visits, which could reduce wait times, increase customer satisfaction, and alleviate DMV staff workload.

5) *Potential Savings*. As mentioned, this bill could create savings for DMV operators, depending upon customer behavior and opt-in rates. Savings may be realized over many fiscal years, and the potential for savings increase as the DMV evaluates and provides electronic notices for other types of required mailings across additional programs. According to the DMV, the potential annual savings for the driver's license suspension or revocations notices could reach $108,464 annually if only 30% of customers opted in, $65,736 if 20% opt in, and $32,868 if 10% opt-in.

6) *Receipt Confirmations*. Although electronic notices are more convenient and cost effective for the DMV there are many potential issues. If a customer gives electronic consent and subsequently receives a notice that goes directly to the customer's spam box, the notification is accidently deleted, or a customer suffers a medical or personal emergency and does not check their email for a

prolonged period of time, or is simply is unable to log into their email accounts, the customer may be unable to respond in a timely manner and may subsequently suffer DMV imposed penalties, including late fees. As SB 1193 is written, there are no protective provisions requiring confirmations of receipt of the electronic notifications. Instead, this bill declares that delivery is complete upon sending the electronic notification.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, DMV anticipates no costs as a result of this bill. This is because, according to the DMV, it "now offers customers the opportunity to opt in to electronic notices for driver license and vehicle registration renewals." DMV reports it implemented this option with "existing resources," though DMV did not provide an estimate of the personnel or dollar amounts entailed by these "existing resources" or the department initiatives to which these resources were pulled in order to allow DMV to enable electronic notification.

In addition, this committee notes DMV's ability to make the information technology changes needed to enable electronic notices with nothing more than the use of "existing resources." This administrative economy is in contrast to the costs, "in the multiple millions of dollars," DMV reports for just about any other change proposed by the Legislature that effects DMV's informational technology systems, costs DMV attributes to its ongoing effort to implement what DMV refers to as the "Enterprise Modernization Project – the Digital eXperience Platform (DXP)."

DMV further contends use of electronic notices, as allowed by this bill, will result in administrative savings, mainly from removing need to procure envelopes, stationary and postage.

SUBJECT: Business entities: Secretary of State: document filings

SOURCE: Secretary of State, Shirley N. Weber, Ph.D.

DIGEST: This bill makes various technical, non-substantive, and clarifying changes throughout the Corporations Code in preparation for the Secretary of State's (SOS) automated filing system, including, among others, standardizing terms, making practices uniform across all business entity types, and updating cross-references. This bill also makes some other substantive changes, such as

removing a prohibition on disclosing certain information to the public under the Commercial and Industrial Common Interest Development Act.

Assembly Amendments change references to "affecting articles of conversion" to "effecting articles of conversion" and add chaptering out amendments with AB 1780 (Chen, 2022).

ANALYSIS:

Existing law:

1) Prohibits businesses whose name does not comply with certain requirements from registering with the SOS until they adopt, for purposes of transacting business in this state, an alternate or assumed name. (Corp. Code. §§ 201, 2106, 15901.08, & 17701.08.)

2) Requires the location of a principal office, which is sometimes also referred to as principal business office, designated office, chief executive office, place of business, or principal executive office, to be included on various forms filed with the SOS. (Corp. Code §§ 202, 17702.02, 17708.02, & 17710.06.)

3) Requires certificates of good standing, certificates of existence, and certificates that a name change was made in accordance with laws of the state or place of incorporation, declaration of trust, organization, or where formed to be filed with the SOS, as provided. (Corp. Code §§ 2101, 2107, 15909.02, 15909.06, 17708.02, & 17708.05.)

4) Prohibits the name of a limited partnership and a limited liability company from containing certain words, such as bank, insurance, trust, or corporation. (Corp. Code §§ 15901.08(g) & 17701.08(e).) Additionally prohibits the name of a limited liability company from including the words "insurer" or "insurance company" or any other words suggesting that it is in the business of issuing policies of insurance and assuming insurance risk. (Corp. Code § 17701.08(e).)

5) Authorizes the SOS to cancel filings of articles of domestic corporations, nonprofit corporations, or cooperative corporations, applications and certificates of limited partnerships and foreign limited partnerships, the filing of the registration of a limited liability partnership and foreign limited liability partnership, the articles of organization of a limited liability company, and the application and certificate of registration of a foreign limited liability company upon written notification that the item presented for payment has not been honored for payment after an initial notice to the agent for service of process or to the person submitting the instrument. If the amount has not been paid, the

SOS is required to give a second written notice of cancellation. (Corp. Code § 110.5, 5008.5, 12214.5, 15902.01(f), 15909.05(c), 16953(d), 16959(d), 17702.01(f), & 17708.06(c).)

6) Requires a foreign corporation, foreign limited liability company, or foreign limited partnership, to provide certain information to the SOS when applying for a certificate to transact business in this state. (Corp. Code §§ 2105, 15909.02, & 17708.02.)

7) Requires, under the Commercial and Industrial Common Interest Development Act, each association, whether incorporated or unincorporated, to submit to the SOS specified information concerning the association and development that it manages. (Civ. Code § 6760.) Requires the SOS to make the name, address, and either the daytime telephone number or email address of the association's onsite office or managing agent available only for governmental purposes and only to Members of the Legislature and the Business, Consumer Services, and Housing Agency, upon written request. (Id. at subd. (f).)

This bill:

1) Streamlines terms used across business entities by:

   a) Changing references to assumed name to alternate name; and
   b) Changing references to principal business office, designated office, chief executive office, place of business, or principal executive office to principal office.

2) Requires certificates of good standing, certificates of existence, and certificates related to a name change to be issued within the past six months from submission of application in California, as provided.

3) Prohibits, additionally, the name of a limited partnership from containing the words "insurer" or "insurance company" or any words suggesting that it is in the business of issuing policies of insurance and assuming insurance risks.

4) Authorizes the SOS to cancel filings of articles of domestic corporations, nonprofit corporations, or cooperative corporations, applications and certificates of limited partnerships and foreign limited partnerships, the filing of the registration of a limited liability partnership and foreign limited liability partnership, the articles of organization of a limited liability company, and the application and certificate of registration of a foreign limited liability company within 90 days of written notification that the item presented for payment has not been honored for payment.

a) Clarifies that these provisions also apply to certificates effecting a conversion, as specified.
b) Additionally applies these provisions to partnerships, as specified.

5) Requires a foreign corporation to provide the SOS the name of the corporation, and if it does not comply with naming requirements for corporations an alternate name, and a statement the foreign corporation is authorized to exercise its powers and privileges in its state of incorporation or organization.

6) Deletes the requirement for a foreign limited partnership and foreign limited liability company to provide the SOS the date of organization in the state or other jurisdiction where they are organized.

7) Requires a foreign limited partnership to provide a statement that the foreign limited partnership is authorized to exercise its powers and privileges in the state or jurisdiction where it is organized.

8) Deletes the requirement that the SOS make the name, address, and either the daytime telephone number or email address of the association's onsite office or managing agent available only for governmental purposes and only to Members of the Legislature and the Business, Consumer Services, and Housing Agency, upon written request, under the Commercial and Industrial Common Interest Development Act.

9) Deletes the requirement under the Corporation Tax Law for the SOS to notify taxpayers that receipt of documents will be acknowledged and instead requires the SOS to provide the taxpayer a filing response in 21 days of receipt of the documents.

10) Updates various obsolete or incorrect cross-references, and makes various other nonsubstantive changes.

Background

The SOS launched the California Business Connect (CBC), its automated filing system, in the beginning of 2022. In preparation for the implementation of the CBC, the SOS sponsored several bills to make changes to the statutes governing how businesses register with, and provide documents to, the SOS. SB 1041 (Jackson, Chapter 834, Statutes of 2014) made various changes related to the implementation of the CBC, such as harmonizing statutes relating to the resignation of agents for service of process to provide consistency across different types of business entities, clarifying situations wherein a penalty for otherwise delinquent annual statements would not be applied, striking requirements for the

provision of additional copies of specified filings, and correcting various internal cross references. SB 1532 (Pavley, Chapter 494, Statutes of 2012) also enacted various changes in relation to the implementation of the CBC, including revising requirements with respect to the maintenance of forms filed with the SOS, and revising provisions relating to the assignment of filing dates and fees by the SOS.

This bill also makes numerous minor changes throughout the Corporations Code, many of which are technical in nature, but are geared at streamlining, clarifying, and updating existing law in order to enable the SOS to efficiently and effectively move to an automated system. For example, a business whose name does not comply with specified requirements cannot register with the SOS unless it adopts an alternate name or assumed name. This bill changes all references to assumed name to alternate name. Similarly, existing law requires a business to disclose the mailing address of its principal office, sometimes referred to as principal business office, designated office, chief executive office, place of business, or principal executive office. This bill streamlines the term across business entities to simply refer to principal office.

In addition, this bill seeks to address the variation of standards across business entity types, which requires the SOS to create different requirements in its forms and review procedures. This bill eliminates the differences in standards and eliminate the necessity for the SOS to adopt multiple procedures in their online forms. One such variation is that under existing law a foreign limited partnership and foreign limited liability company must provide the date of organization in the state or other jurisdiction where they are organized when registering with the SOS, but foreign corporations do not have this requirement. This bill deletes the requirement to provide the date of organization. Another variation is that a foreign limited liability company is required to provide the SOS a statement that it is authorized to exercise its powers and privileges in the jurisdiction of its organization, but foreign corporations and foreign limited partnerships are not. This bill requires foreign corporations and foreign limited partnerships to provide this statement.

This bill requires a foreign corporation to provide the SOS the name of the corporation, and if it does not comply with specified naming requirements, to provide an alternate name as other business entities are required to under existing law. This bill also prohibits the name of a limited partnership from including the words “insurer,” “insurance company,” or any words suggesting that it is in the business of issuing policies of insurance and assuming insurance risks as existing law does for limited liability companies. This bill also specifies that certificates of

good standing, certificates of existence, and certificates related to a name change be issued within the past six months from submission of application in California.

This bill also seeks to standardize the timeframe for giving notice before canceling specified filings of businesses upon written notification that an item presented for payment has not been honored. Under existing law, the time frame for giving this notice varies across business entities. For example, it is 70 days for nonprofit corporations and cooperative corporations but for others it is 90 days. This bill provides that the SOS is required to give notice within 90 days of written notification payment was not honored, and clarifies that the authority to cancel filings after the 90 day notice period applies to filings effecting a conversion as well. This bill additionally applies the authority to cancel a filing, including a filing effecting a conversion, to partnerships in the same manner as for other business entities.

The Commercial and Industrial Common Interest Development Act (Act) was enacted in SB 752 (Roth, Chapter 605, Statutes of 2013) and was modeled after the provisions in the Davis-Sterling Common Interest Development Act, which regulates residential property as opposed to commercial property. (Civ. Code § 4000 et. seq.) The Act requires an association to submit specified information to the SOS in order to assist with the identification of commercial or industrial common interest developments. (Civ. Code § 6760.) This information includes the name, address, and either the daytime telephone number or email address of the association's onsite office or managing agent. (*Id*. at (a)(5).) The statue specifies that the name, address, and either the daytime telephone number or email address of the association's onsite office or managing agent is only available for governmental purposes and only to Members of the Legislature and the Business, Consumer Services, and Housing Agency, but that all other information submitted to the SOS under that section is to be made available for public inspection pursuant to the California Public Records Act. (*Id*. at (f).)

This section was specifically modeled after Section 5405 of the Civil Code in the Davis-Sterling Common Interest Development Act, which also requires each association to submit specified information to the SOS. However, the information required is the name, address, and either the daytime telephone number or email address of the president of the association, other than the address, telephone number, or email address of the association's onsite office or managing agent. (Civ. Code § 5405(a)(5).) This information is extremely personal information of a private person and was therefore shielded from disclosure to the public by the limitation that the information is only available for governmental purposes and to specified governmental actors while all other information submitted under that

section was made subject to public inspection. (*Id*. at (f).) The information required to be submitted under the Act–the name, address, and daytime telephone number or email address of the association's onsite office or managing agent–is not personal information of a private person that warrants or needs shielding from public disclosure. The SOS believes that this limitation on disclosure was erroneously included when the Act was enacted and proposes deleting the entirety of subdivision (f) of Section 6760 of the Civil Code, thereby making the information submitted to the SOS under that section subject to the California Public Records Act in the same manner as any other public record.

In order to ensure that the deletion of subdivision (f) of Section 6760 of the Civil Code does not create an implication that the information in that section is not subject to the California Public Records Act in the same manner as any other public record, the author has agreed to add a clarifying amendment in an uncodified section of this bill to make it clear that the information is to be considered a public record.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, minor and absorbable costs to the SOS to update informational materials and internal processes. Providing statutory consistency regarding business filing procedures will help reduce labor intensive manual processes, such as filing reviews, rejections and re-submissions, thus resulting in cost savings over time.

SUPPORT: (Verified 8/18/22)

Secretary of State, Shirley N. Weber, Ph.D. (source)

OPPOSITION: (Verified 8/18/22)

ARGUMENTS IN SUPPORT: The author writes, "SB 1202 empowers the office of the Secretary of State to provide better customer service for Californians trying to start new businesses. The bill improves efficiency by clearing ambiguities and conflicts in the Corporations Code that will facilitate the transition from paper-based applications to a streamlined, digital experience. By taking into account modernized online filing functionalities, this bill simplifies filing processes with the Secretary of State and will result in a better experience for people starting a new business in California."

The sponsor of this bill, the Secretary of State, Shirley N. Weber, Ph.D., writes:

This bill is a key step toward making the business filing process more user friendly as part of the California Business Connect project within the Secretary of State (SOS). California Business Connect modernizes business filing processes by allowing customers to file documents and request records online 24 hours a day, 7 days a week.

SB 1202 makes focused and meaningful changes to support the goal of improved customer service and business filing efficiency. This bill ensures consistency and uniformity across entity types and removes confusing terminology from statute. Specifically, SB 1202 reduces confusing statutory language relating to definitions and terminology across entity types such as alternate names against assumed names, surrender against withdrawal pertaining to foreign corporations (formed outside California), and the multiple definitions of an entity's office address.

In addition, SB 1202 incorporates environmentally sound practices by allowing customers to use electronic documents, when applicable, in place of paper records. This measure also makes technical omnibus changes to standardize the processing and handling of SOS business customer transactions in line with recently enacted legislation. […]

SUBJECT: Net-zero emissions of greenhouse gases: state agency operations

SOURCE: Author

DIGEST: This bill declares the intent of the Legislature that state agencies aim to achieve zero net emissions of greenhouse gasses (GHGs) resulting from their operations no later than January 1, 2035; requires each state agency to develop and publish a plan that describes its current GHG inventory, its planned actions for achieving net zero emissions, and an estimate of the costs associated with the planned actions, as specified; and, requires the Climate Action Team (CAT), among other things, to review and provide feedback on those plans to assist state agencies in establishing interim GHG emissions reduction targets, as specified.

Assembly Amendments remove any new requirements on the Climate Action Team, extend various deadlines, and specify that, subject to an appropriation by the Legislature, the Department of General Services (DGS) shall provide information, training, coordination, best practices, and other technical assistance to state agencies, as specified.

ANALYSIS:

Existing law:

1) The California Global Warming Solutions Act of 2006 designates the State Air Resources Board (ARB) as the state agency charged with monitoring and regulating sources of emissions of GHGs.

2) Requires the ARB to approve a statewide GHG limit equivalent to the statewide GHG emissions level in 1990 to be achieved by 2020 and to ensure that statewide GHG emissions are reduced to at least 40 percent below the 1990 level by 2030.

This bill:

1) States that it is the intent of the Legislature that all state agencies aim to achieve net-zero emissions of GHGs resulting from their operations, including scope 1 and scope 2 emissions, no later than January 1, 2035, or as soon as feasible thereafter, as specified.

2) Requires DGS, in making progress toward that goal, and in consultation with the ARB, to the extent feasible, do all of the following:

    a) On or before July 1, 2024, and annually thereafter until the goal has been achieved, publish an inventory of GHG emissions of state agencies for the prior calendar year, as specified.

b) On or before January 1, 2026, develop and publish a plan that describes required actions and investments for achieving the goal and an estimate of the costs associated with required actions and investments, as specified.
c) Beginning June 30, 2028, and every two years thereafter until the goal has been achieved, develop and publish an update plan that includes a description of state agencies' progress, and any changes to the required actions and investments, as specified.
d) Ensure that the required actions and investments are incorporated into the sustainability roadmaps of all state agencies.
e) Subject to an appropriations by the Legislature, provide information, training, coordination, best practices, and other technical assistance to state agencies to help those state agencies implement the required actions and investments, as specified.

3) Requires state agencies to incorporate the required actions and investments identified above into their future budget proposals, subject to appropriation by the Legislature, in order the achieve the net-zero emissions goal, as specified.

4) Requires DGS, beginning December 31, 2027, and every two years thereafter, until the goal is achieved, to report to the Legislature on the progress toward achieving that goal, including on both of the following:

a) The overall GHG emissions from all state agencies and a summary of actions taken by state agencies since the submission of the last report.
b) Barriers that are hindering progress and suggested actions that the Legislature could take to reduce those barriers.

5) Defines "scope 1 emissions" to mean all direct emissions from sources that are owned or controlled by the state agency, including, but not limited to, emissions from onsite fossil fuel combustion and fleet fuel consumption.

6) Defines "scope 2 emissions" to mean all indirect emissions from sources that are owned or controlled by the state agency, including, but not limited to, emissions that results from the generation of electricity, heat, or steam purchased by the state agency from a utility provider.

7) Defines "state agency" to mean any state agency, board, department, or commission.

Background

Purpose of the bill. According to the author's office, "California has been leading the world in reducing our GHGs and has set a goal for the whole state to be net-zero by 2045. We are asking our companies and our citizens to figure out how to reduce their emissions dramatically in order to hit that target. I believe we in the state government need to lead by example. We need to show how to get to net-zero before we ask everyone else to do it."

Statewide Goal. Governor Brown signed Executive Order B-55-18 in September 2018 to establish a statewide goal to achieve carbon neutrality as soon as possible, and no later than 2045, and to achieve and maintain net negative emissions thereafter. This goal has not yet been codified in statute. This bill states that it is the intent of the Legislature that all state agencies "aim to achieve" net-zero emissions from their own operations by 2035, 10 years ahead of the 2045 statewide goal.

Scope Framework. Scope 1 emissions cover direct emissions that occur from sources owned or controlled by an organization, such as fuel combustion, company vehicles, and fugitive emissions. Scope 2 emissions cover indirect emissions associated with the purchase of electricity, steam, heating, or cooling consumed by the organization. Scope 3, which is not included in this bill, includes all other indirect emissions that occur in an organization's supply chain, such as purchased goods and services, business travel, and employee commutes.

State Agency Emissions. According to the 2020 Report Card, state agencies account for approximately 0.3% of California's emissions. The bulk of state agencies' emissions stem from the use of electricity and natural gas in state buildings, the emissions of which are attributed to electrical and gas providers, not state government. These emissions will decrease as providers move toward cleaner energy sources as a result of policies such as the Renewables Portfolio Standard and Cap-and-Trade Program. The other major source of emissions for state agencies is from the combustion of vehicle fuel, which the Low Carbon Fuel Standard and other complementary state policies are working to reduce. The most recent Report Card shows that from 2010-2019, state agencies reduced emissions by 56%, primarily due to the Department of Water Resources' divestiture of the Reid Gardner coal-fired power plant in mid-2013.

Office of Sustainability. DGS assists state agencies in meeting the state's climate goals and demonstrating leadership in state buildings. Through the Office of

Sustainability and the development of policies in the State Administrative Manual, DGS coordinates implementation of state sustainability initiatives. DGS's "2020-2021 Sustainability Road Map" notes key accomplishments, including a prohibition on state agency purchases of any sedan solely powered by an internal combustion engine, with exemptions for certain public safety vehicles, as well as a requirement for all new state buildings beginning design after October 2017 to be constructed to zero-net-energy (ZNE) standards. DGS expects 75% of its buildings will be ZNE by 2025. Other areas of focus include electrification in new construction, onsite renewable energy generation, community solar agreements, water use reduction, environmentally preferable purchasing, and more

Related/Prior Legislation

SB 905 (Skinner, 2022), among other things, establishes the Decarbonized Cement and Geologic Carbon Sequestration Demonstration Act, as specified. (Pending on the Assembly Floor)

SB 1010 (Skinner, 2022) increases the percentage of newly purchased zero-emission vehicles purchased by the state for the state vehicle fleet, as specified. (Pending on the Assembly Floor)

SB 1145 (Laird, 2022) requires ARB to create and maintain a GHG emission dashboard to provide the public information regarding how the state is progressing towards meeting its climate goals. (Ordered to Engrossing and Enrolling)

SB 1305 (Laird, Chapter 152, Statutes of 2022) required DGS to maximize the purchase and availability of alternative fuel vehicles in the state vehicle fleet, as specified.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- Unknown costs, likely in the hundreds of thousands to low millions of dollars, for DGS to publish the GHG inventory, develop action plans, update these plans, and report to the Legislature.

- Unknown but likely significant future cost pressures for state agencies to achieve the 2035 goal, subject to appropriation by the Legislature.

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: A coalition of supporters write that, "SB 1203 requires all of our state agencies to aim to achieve net-zero from their own operations by 2035, 10 years ahead of the 2045 goal set for the state under Governor Brown's Executive Order B-55-18. That means reducing emissions from state agencies' buildings and vehicles and from the electricity that they consume. Doing so will help demonstrate how net-zero can be achieved, create myriad public health and air quality benefits, drive early demand for the solutions that the whole economy will need eventually, and reduce the costs of those

solutions so that getting to net zero by 2045 will be less expensive for the state's residences and businesses."

SUBJECT: Electronic Waste Recycling Act of 2003: covered battery-embedded products

SOURCE: California Product Stewardship Council
Californians Against Waste
RethinkWaste

DIGEST: This bill expands the Electronic Waste Recycling Act (EWRA) to include battery-embedded products.

Assembly Amendments delete the Senate version of the bill and instead add the current language.

ANALYSIS:

Existing law:

1) Provides, pursuant to the Electronic Waste Recycling Act of 2003 (Act):

   a) Establishes processes for consumers to return, recycle, and ensure the safe and environmentally sound disposal of video display devices, such as

televisions and computer monitors that are hazardous wastes when discarded.

b) Requires fees collected on covered products to be deposited in the Electronic Waste Recovery and Recycling Account for specified purposes, including, but not limited to, paying covered electronic waste recycling fee refunds and making electronic waste recovery and recycling payments.

c) Imposes certain obligations on a manufacturer of a covered electronic device (CED), including, but not limited to, requiring a manufacturer to submit a report to the Department of Resource Recovery and Recycling (CalRecycle), as provided, and to make information available to consumers that describes where and how to return, recycle, and dispose of the CED. Defines "manufacturer" as either a person who manufacturers a CED sold in the state or a person who sells a CED in the state under that person's brand name.

2) Requires the Department of Toxic Substances Control (DTSC) to adopt regulations that prohibit an electronic device from being sold or offered for sale in California if the electronic device is prohibited from being sold or offered for sale in the European Union (EU) on and after its date of manufacture, to the extent that Directive 2002/95/EC, adopted by the European Parliament and the Council of European Union on January 27, 2003, as amended by the Commission of European Communities, prohibits that sale due to the presence of certain heavy metals.

3) Requires DTSC to adopt regulations to identify electronic devices that DTSC determines are presumed to be, when discarded, a hazardous waste. Requires a manufacturer of an electronic device that is identified in those regulations to send to any retailer that sells that electronic device a notice that identifies the electronic device and informs the retailer that the electronic device is subject to the covered electronic waste recycling fee.

4) Establishes the Cell Phone Recycling Act of 2004 prohibits the sale of a cell phone in this state to a consumer unless the retailer of that cell phone has in place a take-back system for the acceptance and collection of used cell phones for reuse, recycling, or proper disposal.

5) Establishes the Rechargeable Battery Recycling Act of 2006 to require every retailer, as defined, to have in place a system for the acceptance and collection of used rechargeable batteries for reuse, recycling, or proper disposal.

This bill:

1) Expands the definition of “covered electronic device” to include a “covered battery-embedded product,” thereby expanding the scope of the EWRA.

2) Defines "covered battery-embedded product" as a new or refurbished product containing a battery that is not intended to be easily removed from the product by the consumer with no more than commonly used household tools.

3) Provides that "covered battery-embedded product" does not include a medical device (as defined), a covered electronic device, an energy storage system, or an electronic nicotine delivery system.

4) Requires the Department of Resources, Recycling and Recovery (CalRecycle), on or before October 1, 2025, and annually thereafter, to establish a covered electronic waste recycling fee for covered battery-embedded products based on the reasonable regulatory costs of administering the covered electronic waste recycling program.

5) Authorizes, beginning on August 1, 2028, CalRecycle, in collaboration with DTSC, to establish more than one covered electronic waste recycling fee for covered battery-embedded products based on categories of those products.

6) Creates the Covered Electronic Waste Recycling Fee Subaccount and the Covered Battery-Embedded Waste Recycling Fee Subaccount as continuously appropriated funds in the Electronic Waste Recovery and Recycling Account.

7) Requires, on and after January 1, 2026, a consumer to pay a covered electronic waste recycling fee upon the purchase of a new or refurbished covered battery-embedded product.

8) Requires a retailer to collect the covered electronic waste recycling fee from the consumer and remit it to the California Department of Tax and Fee Administration (CDTFA).

9) Prohibits, on and after January 1, 2026, a person from selling or offering for sale in California a new or refurbished covered battery-embedded product unless the product is labeled with the name of the manufacturer or the manufacturer's brand label.

10) Requires a manufacturer of a covered battery-embedded product to provide a notice to any retailer that sells the covered battery-embedded product and CalRecycle. The notice shall identify the covered battery-embedded product by brand and model number and inform the retailer that the covered battery-embedded product is subject to the electronic waste recycling fee.

11) Requires, on or before July 1, 2027 and annually thereafter, a manufacturer of a covered battery embedded product to submit to CalRecycle a report including the number of covered electronic devices sold by the manufacturer during the previous year; the chemistry of the battery contained within the covered electronic devices sold by the manufacturer; a baseline showing the total estimated amount of recycled materials contained in covered electronic devices sold in that year; and, a list of retailers to which the manufacturer provided a notice required under the EWRA.

12) Requires that any information submitted to CalRecycle that is proprietary in nature or a trade secret be protected under state laws and regulations governing that information.

13) Requires a manufacturer of a covered electronic device to maintain and keep accessible for a minimum of 3 years all records required to be kept or submitted pursuant to the Act and, upon request, provide those records to CalRecycle. Requires all reports and records provided to CalRecycle pursuant to the Act be provided under penalty of perjury.

14) Requires the manufacturer to make information available to consumers that describes where and how to return, recycle, and dispose of covered battery-embedded products, through a toll-free phone number, internet website, information on the label or in the package of the product, or information accompanying the sale of the product.

Background

1) *Universal waste*. Universal wastes are hazardous wastes that are widely produced by households and many different types of businesses. Universal wastes include televisions, computers, other electronic devices, batteries, fluorescent lamps, mercury thermostats, and other mercury containing equipment, among others.

   California's Universal Waste Rule (California Code of Regulations, Title 22, Division 4.5, Chapter 11, Section 66261.9) allows individuals and businesses to

transport, handle, and recycle certain common hazardous wastes, termed universal wastes, in a manner that differs from the requirements for most hazardous wastes. The more relaxed requirements for managing universal wastes were adopted to ensure that they are managed safely and are not disposed of in the trash. To increase compliance, the universal waste requirements are also less complex and easier to comply with.

2) *Regulation of batteries*. The state's Hazardous Waste Control Law, prohibits the disposal of batteries in the trash or household recycling collection bins intended to receive other non-hazardous waste and/or recyclable materials. Many types of batteries, regardless of size, exhibit hazardous characteristics and are considered hazardous waste when they are discarded. These include single use alkaline and lithium batteries and rechargeable lithium metal, nickel cadmium, and nickel metal hydride batteries of various sizes (AAA, AA, C, D, button cell, 9-Volt) and small sealed lead-acid batteries.

   Many batteries are sold within products, such as lithium-ion batteries, which are widely used in portable electronics like laptops, smart phones, digital cameras, game consoles, and cordless power tools. These products would be considered "covered battery-embedded products" under SB 1215, if the battery is not designed to be removed from the product by the consumer.

3) *Electronic waste (E-Waste).* E-waste refers to any unwanted electronic device and is classified as universal waste. E-waste frequently contains hazardous materials, predominantly lead and mercury, and is produced by households, businesses, governments, and industries. Each year in California, hundreds of thousands of computers, monitors, copiers, fax machines, printers, televisions, and other electronic items become "obsolete" in the eyes of consumers. Rapid advances in technology and an expanding demand for new features accelerate the generation of ("E-waste"). The result is a growing challenge for businesses, residents, and local governments as they search for ways to reuse, recycle, or properly dispose of this equipment. To meet this challenge, California enacted the Electronic Waste Recycling Act of 2003 (SB 20 Sher, Chapter 526, Statutes of 2003), which established the covered electronic waste recycling program to offset the cost of compliantly handling certain unwanted electronic devices.

   In the 19 years since the passage of SB 20, approximately 2.2 billion pounds of covered video display devices have been recycled. However, to ensure the continued success of electronic device recycling in California, the law needs to be updated to include more devices and address other issues. Current law covers only a fraction of the types of electronic devices sold in California. Electronics

technology is rapidly evolving and electronics are becoming more intricate, specialized, and ubiquitous. Automation, sensors, and artificial intelligence are transforming all industries. The limited scope of devices addressed in SB 20 does not accommodate this flood of innovations.

CalRecycle's 2017 report, Future of Electronic Waste Management in California, notes under its key recommendations that California's current e-waste management program only covers a portion of the devices that can cause harm to public health and environmental safety. Without a change in the current program, millions of devices will continue to be illegally disposed of or improperly managed.

4) *This bill*. SB 1215 adds covered battery-embedded products to the EWRA and requires CalRecycle to establish a fee, paid by consumers on new or refurbished covered battery-embedded products, that covers the reasonable regulatory costs to properly manage and recycle the covered battery-embedded products and to administer the EWRA. This bill is a companion to AB 2440 (Irwin) that establishes an extended producer responsibility program for the collection and recycling of loose batteries, those batteries in products that are intended to be removed from a product by the consumer. The goal, between the two bills, is to improve the safe collection and recycling of batteries both in products and not in products.

Comments

1) *Purpose of Bill.* According to the author, "Because of the hazardous metals and corrosive materials that batteries contain, California classifies batteries as hazardous waste and bans them from solid waste landfills. When improperly discarded, lithium-ion (Li-ion) batteries in particular pose serious fire, health and safety hazards. In a world where batteries are increasingly powering everything, we still haven't solved for how to safely dispose of them. Currently, an estimated 75-92% of lithium-ion batteries are disposed of improperly.

"The influx of these batteries into our waste stream has resulted in an alarming number of fires in our material recovery facilities, waste collection trucks, and landfills – fires that pose serious toxic threats to the health and safety of workers, firefighters and the surrounding community. SB 1215 will replace the current, labyrinthine and unsafe process for battery disposal with a safe, convenient, and accessible system for consumers to safely dispose of depleted batteries. SB 1215 requires the producers of batteries and battery-embedded

products sold in California to develop, finance, and implement this program in collaboration with CalRecycle to recover and recycle their products."

Related/Prior Legislation

AB 2440 (Irwin, 2022) establishes the Responsible Battery Recycling Act of 2022 to create a stewardship program for the collection and recycling of covered batteries as defined. This bill is pending on the Senate Floor.

SB 289 (Newman, 2021) would have established the Battery and Battery-Embedded Product Recycling and Fire Risk Reduction Act of 2021 to require producers to establish a stewardship program for batteries and battery-embedded products. That bill was held in the Senate Appropriations Committee.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, enactment of this bill could cost CalRecycle approximately $2.5 million per year, which would be covered by the fee on covered battery-embedded products, to cover regulatory costs and to administer the program. Additionally, the bill could cost the Department of Toxic Substances Control approximately $500,000 in one-time costs and $217,000 annually for one position. The CDTFA estimates significant general fund costs to identify and register fee payers and process the fee payments.

ARGUMENTS IN SUPPORT: According to the Consumer Technology Association, the California Retailers Association, the Toy Association, and the Association of Home and Appliance Manufacturers, "SB 1215 builds on nearly two decades of success for the e-waste program and is an approach that California consumers will be familiar with. It is our belief that this familiarity with the existing e-waste program will only help consumers understand what to do with their covered battery-embedded products at the end of life. By adding battery-embedded products to the existing e-waste program, SB 1215 avoids the confusion of a new system that would overlap with current collection and recycling practices.

Additionally, it is consistent with many existing e-waste program collectors who already voluntarily manage many battery-embedded products, like smart phones."

SUBJECT: Criminal procedure: DNA samples

SOURCE: Office of San Francisco District Attorney

DIGEST: This bill prohibits entering samples from a victim or a person who voluntarily gave DNA for exclusion purposes into any DNA databank.

Assembly Amendments:

1) Clarify that the bill does not prohibit crime laboratories form collecting, retaining, and using for comparison purposes in multiple cases specified DNA profiles.

2) Clarify that the bill does not prohibit using specified profiles for quality assurance purposes.

3) Provide that the bill does not preclude a DNA testing laboratory from conducting a limited comparison of samples in order to evaluate DNA typing results for contamination.

4) Provide that it does not affect the inclusion of samples in specified state Data bases.

5) Include double-jointing language to deal with potential chaptering issues between this bill and SB 916 (Leyva).

ANALYSIS:

Existing law:

1) Creates the Sexual Assault Victims' DNA Bill of Rights. It regulates the timing of the testing of samples taken from a sexual assault victim including duties of crime labs and how the samples shall be upload to CODIS. (Penal Code Section 680)

2) Provides that all DNA and forensic identification profiles and other identification information retained by the Department of Justice pursuant to this chapter are exempt from any law requiring disclosure of information to the public and shall be confidential. (Penal Code Section 299.5)

This bill:

1) Adds to the Sexual Assault Victims' DNA Bill of Rights that DNA collected directly from a victim of sexual assault, and samples of DNA collected from intimate partners for the purposes of exclusion shall be protected as provided for in the section added by this bill.

2) Provides that the following apply to known reference samples of DNA from a victim or a witness to a crime or alleged crime, and to known reference samples of DNA from intimate partners or family members of a victim or witness voluntarily provided for the purpose of exclusion, as well as to any profiles developed from those samples:

   a) Law Enforcement agencies and their agents shall use these DNA samples or profiles for purposes directly related to the incident being investigated.

b) No law enforcement agency or agent thereof may compare any of these samples or profiles with DNA samples or profiles that do not relate to the incident being investigated.

c) No law enforcement agency or agent thereof may include any of these DNA profiles in any database that allows these samples to be compared to or matched with profiles derived from DNA evidence obtained from crime scenes.

d) No law enforcement agency or agent thereof may provide any other person or entity with access to any of these DNA samples or profiles, unless that person or entity agrees to abide by the restrictions on the use and disclosure of the sample or profile.

e) Every agent of a law enforcement agency shall return any remaining part of every DNA sample to that law enforcement agency promptly after it has performed the requested testing or analysis of that sample.

f) No agent of law enforcement agency may provide these DNA samples or profiles to any person or entity other than the law enforcement agency that provided them.

g) A person whose DNA profile has been voluntarily provided for purposes of exclusion shall have their searchable database profile expunged from all public and private databases if the person has not past or present offense or pending charge which qualifies that person for inclusion within the state's DNA and Forensic Identification Database and Databank Program.

3) Includes the following definitions:

a) The "incident being investigated" means the crime or alleged crime that caused a law enforcement agency or agent to analyze or request a DNA sample from a victim of a witness to that crime or alleged crime.

b) An "agent" of a law enforcement agency includes any person or entity that the agency provides with access to a DNA sample collected directly from the person of a victim of or a witness to a crime or alleged crime, or to any profile developed from those samples. This includes, but it is not limited to, public or private DNA testing facilities.

c) A "victim" or "witness" does not include any person who is a target of the investigation of the incident being investigated, if law enforcement agents

have probable cause to believe that person has committed a public offense relating to the incident under investigation.

d) A sample is "voluntarily provided for the purpose of exclusion" if law enforcement agents do not consider the individual to be a suspect and have requested a voluntary DNA sample in order to exclude the person's DNA profile from consideration in the current investigations.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, costs (General Fund (GF)) of $1.3 million in fiscal year (FY) 2022-23, approximately $2 million in FY 2023-24, and $1.7 million annually thereafter to the Department of Justice (DOJ) in additional staff and resources to process and return DNA samples. According to the DOJ, the Division of Law Enforcement and Bureau of Forensic Services (BFS) anticipates having to process and return approximately 53,333 DNA extracts to local law enforcement agencies. The estimate of 53,333 is based on 40,000 unique DNA cases in BFS's case management system, of which one-third includes two reference samples. In addition to the existing cases, BFS anticipates processing 5,733 DNA extracts annually. This is based on the average DNA cases per year of 4,300, and one-third having two reference samples. In addition to the existing cases, BFS anticipates processing 5,733 DNA extracts annually. This is based on the average DNA cases per year of 4,300, and one-third having two reference samples.

OPPOSITION: (Verified 8/23/22)

California Statewide Law Enforcement Association

ARGUMENTS IN SUPPORT: In support of this bill ACLU California Action states:

> DNA evidence has become a powerful tool in investigating and prosecuting crimes, particularly sexual assault. As part of the evidence collection process, a sexual assault survivor is asked to submit a DNA reference sample to identify and distinguish their DNA from the DNA of the individual who committed the sexual assault. Family members and intimate partners of the sexual assault survivor may also be asked to submit DNA reference samples for the same purpose. Federal law prohibits victims' DNA from inclusion in the national Combined DNA Index System (CODIS) and the National DNA Index System (NDIS), and state law similarly prohibits inclusion of these profiles in the state DNA database (Cal-DNA). But there is no corresponding state law that prohibits local law enforcement from creating their own DNA databases or regulating whose DNA profiles are placed in these local law enforcement databases.
>
> In February of this year, the San Francisco District Attorney's office discovered that the San Francisco Police Department had placed DNA profiles collected from sexual assault victims into their local DNA database and that police personnel were searching these profiles in order to identify possible suspects in unrelated criminal investigations. The sexual assault survivors – including children – who voluntarily provided their DNA samples as part of the investigation into the assault they experienced were not informed and did not consent to this use of their DNA profiles.
>
> This practice is morally wrong and violates the rights of sexual assault survivors as protected by the Fourth Amendment of the US Constitution and the right to privacy contained in the California Constitution. This practice will deter victims from reporting sexual assault and from cooperating with the very uncomfortable and invasive process of collecting physical evidence in these cases, hindering efforts to combat sexual violence.
>
> SB 1228 will help protect victims' genetic privacy by requiring that their DNA samples be used only for purposes directly related to the incident being investigated.

ARGUMENTS IN OPPOSITION: The California Statewide Law Enforcement Association opposes this bill stating:

> While we certainly understand the author's intention to protect individuals' privacy, we believe that limiting what DNA samples members of law enforcement are permitted to run through their databases would prove damaging to investigations. Many perpetrators of the most heinous crimes are discovered by running their DNA through cold case computers and DNA indexes. It is crucial that members of law enforcement have ample information at their disposal as they conduct investigations and protect the community.

SUBJECT: Insurance

SOURCE: California Department of Insurance

DIGEST: This bill is the Senate Insurance Committee's biannual omnibus bill, which includes several changes that are non-controversial, technical, or otherwise classified as code cleanup.

Assembly Amendments add bail bonds to the list of products that require the consumer be provided information on how to contact the California Department of Insurance's (CDI) consumer affairs unit, eliminate unnecessary language regarding the implementation of the Equal Insurance HIV Act, add a requirement for insurance licensees to include their license numbers on emails they send, add courses on insurance fraud and ethics to the training broker-agents must complete,

as specified, revise long term care death benefit notices, as specified, and make changes to an insurance company's obligation to report fraud to the CDI.

ANALYSIS:

Existing law:

1) Regulates, generally, classes of insurance, including disability income insurance. Existing law defines "disability income insurance" to mean insurance against loss of occupational earning capacity arising from injury, sickness, or disablement.

2) Requires an insurance pool to furnish a copy of the pool's annual audited financial statement and most recent actuarial review to specified committees of the Legislature within 180 days of the close of the pool's fiscal year.

3) Provides that mailing a specified notice is complete when the notice is deposited in a facility regularly maintained by the United States Postal Service, in a sealed envelope, with postage paid, and addressed to the person at the last address that person provided to the person mailing the notice. The period of notice and any right or duty to respond to that mailed notice is extended by five calendar days if the place of mailing or the recipient's address is within California, 10 calendar days if the place of mailing or the recipient's address is outside of California but within the United States, or 20 calendar days if the place of mailing or the recipient's address is outside of the United States. These time periods and procedures are applicable to various insurance-related notices.

This bill:

1) Corrects and clarifies code section references, makes grammatical corrections, deletes duplicative code sections, and corrects unintentional drafting errors in prior legislation.

2) Provides that when a bail bond is first executed or delivered, the insurer must provide a specified written disclosure to the customer, which contains CDI's contact information for consumer complaints, as well as the address and customer service telephone number of the insurer or of the agent or broker of record, as specified.

3) Clarifies that, on or after January 1, 2023, a life or disability income insurer may not decline an application or an enrollment request for life or disability income insurance coverage based solely on a positive HIV test, as specified.

4) Requires insurance licensees to print their license numbers on e-mails the licensees send, which involve an activity for which a license is required, as specified.

5) Requires, effective March 1, 2023, the 12-hour ethics course that is required in connection with the pre-licensing education of specified new license applicants and the three-hour ethics course that is required as a condition of license renewal to each include one hour of study on insurance fraud.

6) Removes ambiguity regarding the regulation of credit insurance agents.

7) Requires any agent or broker who, prior to placing an insurance application with an insurance company, reasonably suspects or knows that a suspected fraudulent insurance application is being made, to submit details about that application to CDI's fraud division within 60 days after concluding the application is fraudulent, via the fraud division's consumer fraud reporting portal, as specified.

8) Requires any agent or broker who, after placing an insurance application with an insurance company, reasonably suspects that fraud has been perpetrated, to report that information directly to the insurance company's special investigative unit, as specified.

9) Relieves agents and brokers, who furnish information about suspected or known fraudulent applications, or who assist in investigations of suspected insurance fraud that are conducted by governmental agencies, from civil liability when acting in good faith, as specified.

10) Requires insurance companies, which have determined that an act of insurance fraud may have or might be occurring following the completion of a special investigative unit investigation, to notify CDI's fraud division within 60 days after making their fraud determination, on a form prescribed by CDI.

11) Updates the requirements of existing law related to background checks of applicants for insurance licenses by expressly referencing the California Department of Justice and more clearly listing each type of license whose applicant requires a background check.

12) Authorizes alternative procedures related to the issuance of benefit statements for an accelerated death benefit for long-term care.

13) Adds the Insurance Commissioner to the list of entities to which specified insurance pools must submit annual audited financial statements.

Background.

Consumer disclosure for bail. Existing law requires several different types of insurers to provide consumers with a disclosure containing CDI's contact information for consumer complaints, as well as the contact information for the underlying insurer and agent or broker of record. Bail is one of the only types of insurance regulated by CDI that is not subject to these consumer disclosure requirements. This bill requires specified consumer disclosures be provided when a bail bond is first executed or delivered.

Anti-fraud provisions. Several provisions, taken together, are intended to help insurance agents and brokers identify, and help CDI crack down against, insurance fraud. These include the addition of pre-licensing and pre license-renewal education about insurance fraud; an express requirement that agents and brokers who reasonably suspect or know a fraudulent application is being made to report that fact to CDI's fraud division (if the application has not yet been submitted to an insurance company) or to an insurer's special investigative unit (if the application has been submitted to the insurance company); a clarification that such reports do not subject the agent or broker to civil liability, as long as the agent or broker is acting in good faith; and a clarification that an insurer should complete its special investigative unit investigation into suspected fraud before reporting that fraud to CDI.

Require license numbers on emails. Existing law requires insurers to include their license numbers on their business cards, written price quotations for insurance products, and print advertisements distributed exlusively in this state for insurance products. This bill updates the Insurance Code by extending the license number requirement to e-mails.

*Deletion of language referencing receipt of commissions***.** Insurance Code Section 1758.9 prohibits any person from selling or soliciting any form of credit insurance in this state, and receiving a commission for their efforts, unless that person is licensed as an insurance agent or broker, as specified. CDI is concerned that the language of existing law could be interpreted as allowing someone without a license to sell or solicit credit insurance, as long as they do not receive a commission for doing so. By striking the language that references receipt of a commission, CDI is seeking to remove the potential ambiguity and clarify that no person may sell or solicit any form of credit insurance without a license.

Alternative procedures for the issuance of certain long-term care benefit statements. Existing law requires benefit statements for an accelerated death benefit for long-term care to be issued before a policy loan can be approved and 30

days before the first payment of an accelerated death benefit for long-term care. CDI seeks to add alternative procedures to permit, in certain circumstances, the statements to be issued at the same time as the first payment of an accelerated death benefit for long-term care and at the time of payment of a policy loan.

Add CDI to the list of entities that receive audited financial statements from affordable housing pools. Existing law requires insurance pools formed by certain affordable housing entities to submit their annual financial statements to specified committees of the Legislature. CDI is seeking to add itself to the list of entities that receive these statements, to better inform it regarding the financial stability of these entities.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, this bill will result in, at most, minor and absorbable costs to the state.

ARGUMENTS IN SUPPORT: The California Department of Insurance writes, "This proposal would add the Insurance Commissioner to the list of existing entities to receive annual financial statements and audits from specified RRPGs [Risk Retention Pool Groups] so that CDI can be informed upfront of when these RRPGs are created to offer coverage to affordable housing entities who may be having trouble obtaining traditional insurance for their projects."

SUBJECT: Income taxes: gross income exclusions: wildfires

SOURCE: Author

DIGEST: This bill excludes settlement payments from Personal Income and Corporation Tax in connection with the 2017 Thomas and 2018 Woolsey fires from taxable income.

Assembly Amendments clarify taxpayers eligible to claim a gross income exclusion, that the gross income exclusion is available for taxable years beginning before January 1, 2027, and modify the due date for Franchise Tax Board's report.

ANALYSIS: Existing law states that gross income includes all income from whatever source derived. This includes wages, alimony, interest and dividends. To the extent that any settlement payment exceeds costs incurred or paid in connection with the event that caused the settlement, that income may be taxable. Various income deductions and exclusions are allowed in current law and must be specifically provided for in statute.

This bill:

1) Excludes from gross income from the Personal Income and Corporation tax any amount received in settlement by a qualified taxpayer from Southern California Edison in settlement claims related to the 2017 Thomas fire and the 2018 Woolsey fire from gross income.

2) Allows this exclusion for all taxable years that begin before January 1, 2027.

3) Defines a "qualified taxpayer" as a taxpayer that meets any of the following criteria:

   a) Owned real property or resided in either the Counties of Ventura, Santa Barbara, or Los Angeles, and received a settlement payment in connection with either the 2017 Thomas or the 2018 Woolsey fire, and paid and incurred expense related to those fires.

   b) Resided in either the Counties of Ventura, Santa Barbara, or Los Angeles, and received a settlement payment in connection with either the 2017 Thomas or the 2018 Woolsey fire, and paid and incurred expense related to those fires.

   c) Had a place of business in either the Counties of Ventura, Santa Barbara, or Los Angeles, and received a settlement payment in connection with either the 2017 Thomas or the 2018Woolsey fire, and paid and incurred expense related to those fires.

4) Requires the qualified taxpayer to provide, documentation of the settlement payment received to the Franchise Tax Board (FTB) upon request.

5) Makes legislative findings and declarations to comply with Section 41 of the Revenue and Taxation Code.

Background

Thomas and Woolsey fires. The Thomas fire, which occurred in December 2017, burned a total of 281,893 acres, destroyed 1,063 structures, and resulted in two fatalities. The California Public Utilities Commission (CPUC) estimated the total property damage to be approximately $2.2 billion.

The Woosley fire, started in November 2018, burned a total of 96,949 acres of land, destroyed 1,643 structures, and caused three fatalities. The CPUC estimated the total damage to property to be approximately $6 billion.

Although the company has not admitted guilt, Southern California Edison agreed to more than a half-billion dollars in penalties as punishment for its equipment potentially contributing to starting five fires in 2017 and 2018, including the Thomas and Woolsey fires. Insurance companies, homeowners and fire victims sued Southern California Edison and through mediation, a final settlement was reached on December 22, 2021, and Southern California Edison agreed to pay $2.2 billion to fire victims.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- General Fund revenue loss of approximately $11 million in fiscal year (FY) 2022-23, $7.6 million in FY 2023-24 and $4.4 million in FY 2024-25.

- Since this bill also provides a refund for overpayment of tax, payable from the continuously appropriated Tax Relief and Refund Account, this bill makes an appropriation.

- Costs of an unknown, but potentially minor and absorbable, amount to FTB to update existing informational materials and systems and provide the report.

SUPPORT: (Verified 8/22/22)

Consumer Attorneys of California
Howard Jarvis Taxpayers Association
Several individuals

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: According to the author, "Over the past 5 years the State has been devastated by a series of catastrophic wildfires, resulting in billions of dollars in damages, lives lost and the destruction of millions of acres of forests and woodlands. The worsening effect of climate change is resulting in the aridification of California, exacerbated by extreme weather events, and ongoing drought conditions making more areas of the State susceptible to wildfires. However, these conditions do not limit liability, or need for additional safety precautions from private parties with infrastructure that may spark a wildfire in these areas.

"In 2017 and 2018, large portions of Ventura and Santa Barbara Counties were devastated by both the Thomas Fire (2017) and the Woolsey Fire (2018). Both fires rank in the top 15 most destructive wildfires in California's history. Together, both fires burned almost 380,000 acres of land, destroyed almost 3000 structures, caused over $8 billion in damages, resulted in hundreds of thousands of people having to be evacuated and the death of 5 individuals. Investigations into the cause of both fires determined electric power-lines were responsible. Southern California Edison has been involved in litigation with the victims of both Fires, and has entered into settlement agreements with many of them.

"The financial relief provided to the victims of this widespread destruction has been a small solace in the wake of these disasters. However, under existing law, these settlements were subject to taxation which could amount to thousands of dollars out of the pockets of those hardest hit by this tragedy.

"SB 1246 would help ensure that settlement funds issued due to these wildfires are excluded from taxable income and would refund the taxes paid by individuals on these sums. This is a commonsense way to give fire victims access to the entirety of the relief they were granted. "

ASSEMBLY FLOOR: 67-0, 8/24/22 - See last page for vote

SUBJECT: Franchises

SOURCE: Author

DIGEST: This bill establishes new disclosure requirements for a franchisor to provide to California-based franchisees.

Assembly Amendments require franchisors to report specified information to California franchisees upon request and make it a violation of law for a franchisor to execute an agreement with a franchisee if certain information is not provided.

ANALYSIS:

Existing law:

1) Regulates various businesses to, among other things, preserve and regulate competition, prohibit unfair trade practices, and regulate advertising. (Business and Professions Code (BPC) § 16600 *et seq.*)

2) Establishes the California Franchise Relations Act (CFRA) which governs the renewal, termination, transfer, and all other conditions and provisions made pursuant to franchise agreements. (BPC § 20000 *et seq.*)

3) Defines a franchise as a contract or agreement, either expressed or implied, whether oral or written, between two or more persons by which:

   a) A franchisee is granted the right to offer, sell or distribute goods or services under the plan or system of the franchisor;

   b) Operation of the business is substantially associated with franchisor's trademark, advertising or other symbol; and,

   c) A franchise fee, as defined, is paid by the franchisee.
   (Business & Professions Code (BPC) § 20001 (a), (b) and (c))

4) Establishes the California Franchise Investment Law (CFIL) which governs financial disclosures and registration requirements with the Department of Business Oversight. (Corporations Code (CORP) § 31000 *et seq.*)

This bill:

1) Requires a franchisor and its affiliated companies, within 120 days of the end of the franchisor's fiscal accounting year, to report to its California franchisees, upon a franchisee's request, any money, goods, services, things of value, or entities with whom the franchisee does business on account of the franchise.

2) Requires the reported data to be detailed by each entity that provides the benefit.

3) Makes it a violation of the Franchise Investment Law for a franchisor to execute an agreement that requires the assignment or waiver of a franchisee's right to rebates, promotions, allowances, or other monetary incentives for the sale of a

product within the state unless the agreement states the potential or current gross value of that right.

4) Requires the franchisor, if the actual gross value of the assigned or waived right is unknown, to include a reasonable estimate of the value based on the average value for similarly situated franchises.

5) Provides that the violation of the Franchise Investment Law created under this bill does not constitute a crime.

Background

Franchise businesses represent a large and growing segment of the nation's businesses and remain a popular and potentially lucrative way for people to open their own business. Just like any other small business owner, franchisees invest a large amount of their own money in the business and continue to pay for upgrades and changes in response to the market. Also like independent business owners, they often work long days and nights handling operations, managing employees and overseeing expenses. Owning a franchise over an independent business comes with advantages like name brand recognition and the support of the corporation.

The California Franchise Investment Law (CFIL) was enacted in 1970 to regulate franchise investment opportunities in order to protect California investors from potentially fraudulent franchise investments. CFIL generally requires franchisors to disclose to prospective franchisees the information necessary to make an informed decision about franchise offers, and prohibits the sale of franchises that would lead to fraud or the likelihood that a franchisor's promises would not be fulfilled. CFIL contains explicit provisions for enforcement generally through damages (payment for economic losses) and rescission (cancellation of the contract). It also provides for injunctive relief (to require or prohibit a specific action), and reasonable costs and attorneys' fees in certain circumstances.

The California Franchise Relations Act (CFRA) (which excludes petroleum-related franchises, like gas stations) was enacted in 1980 to govern relationships between franchisors and franchisees after they have entered into contract with each other. CFRA is designed to prevent unfair practices in the transfer, renewal, or termination of a franchise. CFRA prohibits termination of a franchise agreement except for good cause and only after notice and an opportunity to fix the problem. It also lays out certain circumstances where immediate termination is permitted, for example: bankruptcy, abandonment, mutual agreement, material misrepresentation, illegal activity, noncompliance with the franchise agreement,

failure to pay franchise fees, and imminent danger to the public. CFRA prohibits nonrenewal of a franchise agreement without 180 days prior notice, and with certain additional protections for the franchisee. It also provides for the transfer of ownership to surviving spouses or heirs. CFRA does not contain explicit provisions to compensate a franchisee for the nonrenewal or termination of a franchise, except for the buyback of inventory when a franchise is improperly terminated or not renewed, although general contract remedies may still be available.

The franchise agreement contract is the central authority for the relationship between the franchisor and franchisee, which can be hundreds of pages long and contains a highly detailed description of the rights, responsibilities and remedies of the parties. The franchisee must sign the contract promising to comply with all of the requirements and the franchisor's service and marketing directives now and in the future. According to the International Franchise Association, a "franchise is the agreement or license between two legally independent parties which gives a person or group of people (the franchisee) the right to market a product or service using the trademark or trade name of another business (the franchisor)." It also gives the franchisee the right to market a product or service using the operating methods of the franchisor and the obligation to pay the franchisor fees for those rights. The franchisor has the obligation to provide those rights and support the franchisee according to their agreement. More specifically, franchisees serve to provide the look, name recognition, and brand of the business. The franchisee builds the brand locally and develops good will within the community. The franchisee's business success helps support the community with taxes and other contributions as well as improves the bottom line for franchisors.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, this bill will result in estimated ongoing General Fund costs to the Department of Financial Protection and Innovation of $250,000 to $500,000 annually for one to two attorney positions to oversee and ensure compliance with the new disclosure requirements.

SUPPORT: (Verified 8/24/22)

American Association of Franchisees & Dealers
Asian American Hotel Owners Association

OPPOSITION: (Verified 8/24/22)

None received

ARGUMENTS IN SUPPORT: Supporters state that this bill will specifically require franchise companies to annually report the rebates and other benefits vendors provide to the franchisors based on franchisee purchases. Supporters state that "These rebates, or kickbacks, have become greater over the years, and instead of enjoying the promised benefits of group purchasing power, franchisees are often required to purchase goods and services from limited suppliers at higher costs. Having these rebates reported annually will give transparency to what franchisees are really paying for, which squeezes our margins, contributes to lower pay for our employees, and ultimately costs the consumer."

SUBJECT: Housing

SOURCE: Author

DIGEST: This bill makes non-controversial changes to sections of law relating to housing.

Assembly Amendments add three new provisions concerning the local housing trust fund match program, the Serna farmworker housing grant program, and fix a cross reference.

ANALYSIS: This bill makes non-controversial and non-policy changes to sections of law relating to housing. Specifically, this bill includes the following provisions, with the proponent of each provision noted in brackets:

1) *Fix Requirements related to low/moderate income housing:*

   The 2021 Housing Omnibus bill amendment (AB 1584, Chapter 360, Statutes of 2021) included a proposal that sought to return families displaced by redevelopment back to San Francisco. The proposal, however, could be inadvertently interpreted to require that units rented to descendants must include descendants that do not qualify for the development. The proposed clarification would require any descendant applying for a unit to meet the eligibility requirements of the funding source. In order to avoid an inadvertent conflict with existing law governing the same subject matter, existing Health & Safety Code (HSC) section 33411.3 also should be amended with the same language. [Public Interest Law Project]

2) *Changing outdated reference of "limited housing cooperative":*

   The HSC 50076.5 definition of "limited equity housing cooperative" has two outdated references that need to be corrected. [HCD Services] (Section 3)

3) *Housing Crisis Act of 2019 cleanup: correction of the definition of affordable housing projects:*

   The Housing Crisis Act of 2019 granted affordable housing projects an additional year to commence construction before a preliminary application's vesting expires, but failed to use the common definition of affordable housing project that specifies 55 year affordability covenants for rental housing and 45 year covenants for owner-occupied housing. The proposed bill inserts the correct definition: at least 55 years for rental housing and 45 years for owner-occupied housing. [Senator Skinner]

4) *Fixing Cross Reference*

   Section 4041(b)(1) of the Civil Code only cross references Section 5300 when it should also include a cross reference to Section 5310, because this is the section that contains the requirements for communications from the Association and the member's rights to receive individual notice. [KCS Sacramento]

5) *Serna Farmworker Housing Grant Program*

Clarify that loan terms (deferred loans, interest, 0.42% payment for monitoring) are consistent with MHP (multifamily) or CalHome (Homeownership), as applicable. Clean-up to changes made by AB 434 to make Serna consistent with the AB 434 changes to Transit Oriented Development and Veterans Housing and Homelessness Prevention Program. [Senate Housing Committee]

6) *Changes to the statute for the local housing trust fund match program*

Existing statute requires that 30% of program funds be expended in assisting extremely low income households. The issue is that calculating the percentage of program funds expended by AMI is challenging for both grantees and for Department staff. We are requesting that the 30% expenditure requirement be for units in a project rather than AMI as it is much easier to both plan for and verify that a certain percentage of units are created in each AMI bracket. [Senate Housing Committee]

Background

According to the Legislative Analyst's Office, the cost of producing a bill in 2001-2002 was $17,890. By combining multiple matters into one bill, the Legislature can make minor changes to law in the most cost-effective manner.

Proposals included in this housing omnibus bill must abide by the Senate Housing Committee policy on omnibus bills. The proposals must be non-controversial and non-policy changes to various committee-related statutes. The proponent of an item submits proposed language and provides background materials to the Committee for the item to be described to legislative staff and stakeholders. Committee staff provides a summary of the items and the proposed statutory changes to all majority and minority consultants in both the Senate and Assembly, as well as all known or presumed interested parties. If an item encounters any opposition and the proponent cannot work out a solution with the opposition, the item is omitted from, or amended out of, the bill. Proposals in the bill must reflect a consensus and be without opposition from legislative members, agencies, and other stakeholders.

Comments

Purpose of the bill. The purpose of omnibus bills is to include technical and non-controversial changes to various committee-related statutes into one bill. This

allows the legislature to make multiple, minor changes to statutes in one bill in a cost-effective manner. If there is no consensus on a particular item, it cannot be included. There is no known opposition to any item in this bill.

Related/Prior Legislation

SB 1030 (Senate Committee on Housing, Chapter 165, Statues of 2020) made non-controversial changes to sections of law relating to housing.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- HCD anticipates minor and absorbable costs.
- State-mandated local costs, unknown but likely minor, to redevelopment agencies' housing successor agencies to determine if a descendant of a person displaced by a redevelopment project meets income eligibility and other requirements necessary to be given priority to rent or purchase low- or moderate-income housing units developed by the agency per current law. These costs are potentially reimbursable by the state, subject to a determination by the Commission on State Mandates.

ARGUMENTS IN SUPPORT: The Senate Housing Committee is authoring this bill as a means of combining multiple, non-controversial changes to statutes into one bill so that the Legislature can make minor amendments in a cost-effective manner.

ARGUMENTS IN OPPOSITION: The opponents are opposed to existing statutes and, therefore, oppose amending those existing statutes.

ASSEMBLY FLOOR: 76-0, 8/11/22

SUBJECT: Single-use products waste reduction: Dishwasher Grant Program for Waste Reduction in K–12 Schools

SOURCE: Glendale Environmental Coalition

DIGEST: This bill establishes the Dishwasher Grant Program for Waste Reduction in K–12 Schools, to be administered by the California Department of

Education (CDE), to provide grants to school districts and charter schools, for the purchase and installation of commercial dishwashers at schoolsites.

Assembly Amendments delete Community Colleges from the provisions of the bill.

ANALYSIS:

Existing law:

1) Establishes, under the Integrated Waste Management Act of 1989 (IWMA), a state recycling goal of 75% of solid waste generated to be diverted from landfill disposal through source reduction, recycling, and composting. Requires each state agency and each large state facility to divert at least 50% of all solid waste through source reduction, recycling, and composting activities. IWMA also requires a state agency and large stage facility, for each office building of the state agency or large state facility, to provide adequate receptacles, signage, education, and staffing, and arrange for recycling services, as specified. (PRC §§ 41780.01, 42921, 42924.5)

2) Requires CalRecycle to develop and implement a source reduction and recycling program for school districts that includes, among other things, the development of a model waste reduction and recycling program for school districts and schools. (PRC §42621)

3) Requires the California Energy Commission (CEC), in collaboration with each utility, to develop and administer the School Noncompliant Plumbing Fixture and Appliance Program to provide grants to state agencies and local educational agencies to replace noncompliant plumbing fixtures and appliances that fail to meet water efficiency standards with water-conserving plumbing fixtures and appliances. (Public Utilities Code §1631)

This bill:

1) Establishes the Dishwasher Grant Program for Waste Reduction in K–12 Schools, to be administered by the CDE, to provide incentive grants to public K–12 schools to enable them to transition to less costly and more environmentally healthy reusable food service ware.

2) Defines "Commercial dishwasher" to mean a nonresidential dishwasher that meets the Energy Star Product Specification criteria for Commercial Dishwashers, Version 2.0, or any revision to those criteria published by the United States Environmental Protection Agency that is adopted or established by the State Energy Resources Conservation and Development Commission.

3) Establishes program grants of up to $40,000 per kitchen of a school.

4) Requires grant recipients, as a condition of the receipt of grant funding, to agree to use grant funds on specified expenditures, including the purchase of a dishwasher and training for staff.

5) Authorizes the CDE to conduct an onsite inspection at any school for which a grant was awarded and requires the district to provide any documents and information requested by the CDE related to the grant. Requires the CDE to develop administrative procedures and guidelines for the program.

6) States that the adoption of procedures and program guidelines for the awarding of grants pursuant to the measure is not the adoption of a regulation and is exempt from the requirements of Chapter 3.5 of Part 1 of Division 3 of Title 2 of the Government Code.

7) Limits eligibility for grants to the following:

   a) A school district applying on behalf of one or more schools in its jurisdiction that maintains kindergarten, or any of grades 1 to 12, inclusive; and

   b) A charter school applying on behalf of one or more schools under its charter that maintains kindergarten or any of grades 1 to 12, inclusive.

8) Requires, in implementing this bill, the CDE to maintain specified information on its website and to inform eligible entities of the program.

9) Makes implementation contingent on an appropriation being made for its purposes by the Legislature in the annual Budget Act or another statute.

Background

1) *School Waste Reduction Programs*. Schools are vital hubs to their local communities and are uniquely positioned to teach students waste reduction behaviors. Students can learn waste reduction at schools and bring that messaging home to their families, caregivers, and all those with whom they come in contact.

   Schools and universities generate about 562,442 tons of waste each year in California. Almost half of school waste is comprised of organic materials like paper, cardboard, and uneaten cafeteria food. Much of the waste generated in the California education system is recyclable. Many school districts have been

successful in improving their economic and environmental performance through the implementation of waste reduction initiatives.

2) *California Solid Waste and Recycling Laws Affecting Schools and Local Education Agencies*. Many individuals monitor school waste, including school district administrators concerned about increases in solid waste disposal costs, recycling-conscious teachers and students, city/county recycling coordinators working with a local school district. In most cases, school recycling is a state requirement. Setting up or improving an existing school waste reduction program can reduce costs and litter, improve the environment, and combat climate change.

   CalRecycle offers resources to help schools and school districts meet recycling requirements. The following is a partial list of solid waste and recycling laws affecting schools and local education agencies:

   a) The Mandatory Commercial Recycling law (AB 341, Chesbro, Chapter 476, Statutes of 2011) went into effect in June 2012 and requires public entities that generate a certain threshold of solid waste per week to reuse, recycle, compost, or otherwise divert solid waste from disposal.

   b) Mandatory Organic Recycling (AB 1826, Chesbro, Chapter 727, Statutes of 2014) requires regulated entities to implement an organic waste recycling program to divert food waste, green waste, landscape and pruning waste, nonhazardous wood waste, and food-soiled paper waste that is mixed in with food waste.

   c) Short-Lived Climate Pollutants: Organic Waste Methane Emissions Reduction (SB 1383, Lara, 2016) requires schools and local education agencies to prevent, reduce the generation of, and recycle organic waste. Additionally, effective on January 1, 2024, schools and local education agencies with an on-site food facility will be required to recover edible food.

   Other related school recycling and sustainability laws require CalRecycle to provide assistance to school districts in establishing and implementing source reduction and recycling programs. Additionally, California Education Code encourages each school district to establish and maintain a paper recycling program in all classrooms, administrative offices, and other areas owned or leased by the school district.

3) *California Schools Healthy Air, Plumbing, and Efficiency (CalSHAPE) Program*. AB 841 (Ting, Chapter 372, Statutes of 2020) established the School

Energy Efficiency Stimulus Program (CalSHAPE), administered by the CEC. The CalSHAPE Program includes two, ratepayer-funded, grant programs for local educational agencies (LEAs), the CalSHAPE Ventilation Program and CalSHAPE Plumbing Program. The CalSHAPE Plumbing Program provides funding to LEAs to replace aging and water-inefficient plumbing fixtures and appliances with water-conserving plumbing fixtures and appliances. The noncompliant appliances eligible for replacement are commercial dishwashers, automatic commercial ice makers, and commercial clothes washers that do not meet ENERGY STAR® Product Specifications.

The CalSHAPE Plumbing Program guidelines were adopted by the CEC in June 2021 and the online system opened for user registration shortly after.

The CEC received 127 applications (including 31 commercial dishwasher requests) in the first round of funding for the Program, totaling $18,573,635 in grant funding, and issued 43 notices of proposed award. Per Program requirements for the first funding round, schools in underserved communities were given priority.

4) *Most Schools Ineligible for CalSHAPE Program Grants*. Although the CalSHAPE Program has received considerable interest from LEAs, the Plumbing Program has not received as many applications as the Ventilation Program. Specifically, only 34 percent of the Plumbing Program funding available in Funding Round One was requested in applications compared to 92 percent of the Ventilation Program funding. CEC staff conducted outreach to LEAs on the Plumbing Program to gather information on reasons that there appears to be less interest in the program.

   AB 841 has specific requirements that a plumbing fixture or appliance must meet to be considered noncompliant and be eligible for replacement in the CalSHAPE Plumbing Program. Of the feedback provided by applicants, one of the most common was that there is no longer a lot of plumbing fixtures and appliances that meet the requirements to be considered as noncompliant in schools. As such, there are not many fixtures and appliances that qualify for replacement with CalSHAPE Program grant funding.

Comments

Purpose of this bill. According to the author, "California is meant to be a leader in sustainability, yet we are facing a single-use waste crisis that is being exacerbated by our K-12 school cafeterias. A tremendous amount of waste is generated from single-use foodware such as trays, plates, and utensils. However, we currently have

no program dedicated to stemming these waste streams, which are harming our environment and posing substantial costs to our schools. Both plastic and compostable recycling have proven inadequate and ineffective, and the cost of managing waste is rising.

"Industrial dish machines present an upstream waste prevention measure by avoiding single-use items and allowing the transition to safe, reusable foodware. Current machines use very little water and complete a cycle in only a few minutes. However, the upfront cost creates a barrier to implementation. Schools operating on very limited budgets and with competing needs may remain with single-use serviceware simply due to the cost of upfront investment. SB 1255 will result in less waste and reduced hauling costs, alleviating these burdens on schools. Instead of contributing to the waste crisis facing California, providing funding for industrial dishwashers will help reduce waste while instilling the values of environmental stewardship in our students."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- Undefined Proposition 98 General Fund costs, contingent upon appropriation, for the grant program. The state has over 10,000 schools and 116 community colleges. If the program provided grants to 5% of schools and colleges in the amount of $40,000 each, costs would be $20 million.

- Ongoing General Fund costs of $440,000 for two staff at CDE to administer the program.

SUBJECT: Contracts for the acquisition of goods or services: extension or renewal: legislative oversight

SOURCE: Author

DIGEST: This bill requires a state agency, for contract awarded without competitive bidding for the acquisition of goods or services in the amount of $75 million or more, entered into on or after January 1, 2023, to submit information regarding the terms and conditions of a proposed extension or renewal of the contract to the Joint Legislative Budget Committee (JLBC).

Assembly Amendments change the deadline by which a state agency is required to submit information regarding the terms and conditions of a proposed extension from at least 30 days before the contract date to on or before the contract end date.

ANALYSIS:

Existing law:

1) Requires, generally, state agencies, for non-information technology (IT) goods and services contracts, to secure at least three competitive bids or proposals for each contract. Three competitive bids or proposals are not required in, among other cases, the following:

    a) In cases of emergency where a contract is necessary for the immediate preservation of the public health, welfare, or safety, or protection of state property.

    b) When the state agency awarding the contract has solicited all potential contractors but has received less than three bids or proposals.

    c) When the state agency and the Department of General Services (DGS) agree that an article of a specified brand or trade name is the only article that will properly meet the needs of the state agency.

2) Requires DGS to prescribe the conditions under which a contract may be awarded without competition, and the methods and criteria which shall be used in determining the reasonableness of contract costs when a contract is awarded without competition.

This bill requires a state agency, for contract awarded without competitive bidding for the acquisition of goods or services in the amount of $75 million or more, entered into on or after January 1, 2023, to submit information regarding the terms and conditions of a proposed extension or renewal of the contract to JLBC.

Comments

Purpose of the Bill. According to the author's office, "SB 1271 increases transparency and accountability of costly no-bid contracts entered in by state agencies to ensure that taxpayer dollars are being spend most effectively and efficiently."

No-Bid Contracts. Generally, state agencies for non-IT goods and services are required to secure at least three competitive bids or proposals for each contract.

However, current law provides for a number of exceptions to this requirement. For instance, the requirement is waived in cases of emergency where a contract is necessary for the immediate preservation of the public health, welfare, safety, or protection of state property. This exception exists to allow the state to quickly respond to an emergency and obtain the necessary goods or services as quickly as possible without having to wait for three bids to be secured.

Current law also exempts from these requirements instances where state agencies have gone through the bidding process and less than three bids or proposals have been secured. This exception obviously exists to ensure that the state is not prohibited from awarding a contract simply because there were not at least three bids or proposals secured.

Finally, while other exceptions exist, one of the more commonly used exceptions is the "sole-source" exception which essentially authorizes state agencies to not abide by the three-bid requirement in those cases where the state agency and DGS agree that the contract can only be fulfilled by one single entity.

Related/Prior Legislation

SB 1367 (Wilk, 2022) would have prohibited a state agency from awarding a contract for which the state has not secured at least three competitive bids or proposals to a company that has made a behested payment, at the behest of the Governor, in the preceding 12 months. (Failed Passage in the Senate Governmental Organization Committee)

SCA 7 (Wilk, 2022) would have subjected the approval of renewal of a no-bid contract by a state agency for the acquisition of goods or services pursuant to law governing public contracts, in the amount of $25 million or more, entered into on or after January 1, 2023, to the oversight of the Joint Legislative Budget Committee, as prescribed. (Never Heard in the Senate Governmental Organization Committee)

AB 2385 (Kiley, 2022) would have prohibited a contract entered into pursuant to the California Emergency Services Act from containing an automatic renewal clause except if, by the terms of the contract, the clause is operative only upon the Legislature's approval, by concurrent resolution or statute, of the renewal of the contract. (Never Heard in the Assembly Emergency Management Committee)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, likely minor and absorbable costs to state agencies to prepare contract renewal information to JLBC, since this bill does not detail the scope of information required.

California Clean Money Campaign
Howard Jarvis Taxpayers Association

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: According to the Howard Jarvis Taxpayers Association, "this bill would allow legislators to review the performance of the firms awarded the no-bid contracts prior to their renewal to determine whether taxpayer dollars are being spend most effectively and efficiently. While no-bid state contracts should never become the norm in California, when there are deemed necessary, the Legislature must have oversight tools to prevent waste, fraud and abuse of taxpayers dollars."

SUBJECT: Guardian ad litem appointment

SOURCE: California Lawyers Association, Executive Committee of the Trusts and Estates Section

DIGEST: This bill modifies the definition of a person who lacks legal capacity to make decisions, for purposes of when the court should appoint a guardian ad litem in a civil case; requires, when a party in a civil case already has a guardian or conservator of the estate, that an application to have a guardian ad litem appointed for that party satisfy specified requirements; and requires a proposed guardian ad litem to disclose any known or actual conflicts of interests in advance of the appointment.

Assembly Amendments add requirements for appointing a guardian ad litem for a party who already has a guardian or conservator; remove provisions relating to the

compensation of a guardian ad litem, the requirement that a guardian ad litem file annual reports with the court, and specifications relating to the scope of a guardian ad litem's authority; remove the definition of "a person who lacks legal capacity to make decisions in the action" from Probate Code section 1003; add provisions relating to the disclosure of conflicts of interest for a guardian ad litem under Probate Code section 1003; and remove provisions relating to when a guardian ad litem is appointed for a minor, in response to stakeholder concerns.

ANALYSIS:

Existing law:

1) Provides that when a minor, a person who lacks legal capacity to make decisions, or a person for whom a conservator has been appointed is a party in a civil action, that person shall appear through a guardian or conservator of the estate, or by a guardian ad litem appointed by the court in which the action or proceeding is pending, or by a judge thereof, in each case. (Code Civ. Proc., § 372(a)(1).)

2) Provides that a guardian ad litem may be appointed in any case when it is deemed by the court in which the action or proceeding is prosecuted, or by a judge thereof, expedient to appoint a guardian ad litem to represent the minor, person lacking legal capacity to make decisions, or person for whom a conservator has been appointed, notwithstanding that the person may have a guardian or conservator of the estate and may have appeared by the guardian or conservator of the estate. (Code Civ. Proc., § 372(a)(1).)

3) Provides that the guardian ad litem appearing for any minor, person who lacks legal capacity to make decisions, or person for whom a conservator has been appointed shall have power, with the approval of the court in which the action or proceeding is pending, to compromise the same, to agree to the order or judgment to be entered therein for or against the ward or conservatee, and to satisfy any judgment or order in favor of the ward or conservatee or release or discharge any claim of the ward or conservatee pursuant to that compromise. (Code Civ. Proc., § 372(a)(1).)

4) Does not define, for purposes of a guardian ad litem, "a person lacking legal consequence to make decisions," but includes in the term "a person for whom a conservator may be appointed." (Code Civ. Proc., § 372(a)(2).)

5) Provides specific exceptions to the requirement that a minor who appears through a guardian ad litem. (Code Civ. Proc., §§ 372(b), (c); 373.)

6) Provides that, in an action under the Probate Code, the court may, on its own motion or at the request of a personal representative, guardian, trustee, or other interested person, appoint a guardian ad litem at any stage of the proceeding to represent the interest of any of the following persons, if the court determines that the representation of that person's interest would otherwise be inadequate:

   a) A minor.

   b) An incapacitated person.

   c) An unborn person.

   d) An unascertained person.

   e) A person whose identity or address is unknown.

   f) A designated class of persons who are not ascertained or are not in being. (Prob. Code, § 1003(a).)

7) Provides that, if not precluded by a conflict of interest, a guardian ad litem may be appointed to represent several persons or interests under 6). (Prob. Code, § 1003(b).)

8) Provides that the reasonable expenses of a guardian ad litem appointed under 6), including compensation and attorney fees, shall be determined by the court and paid as the court orders, either out of the property of the estate involved, by the petitioner, or from such other source as the court orders. (Prob. Code, § 1003(c).)

This bill:

1) Provides that, if an application is made for the appointment of a guardian ad litem for a person in a civil case who is a minor, who lacks legal capacity to make decisions, or for whom a conservator has been appointed, and that person already has a guardian or conservator of the estate, the application may be granted only if all of the following occur:

   a) The applicant gives notice and a copy of the application to the guardian or conservator of the estate upon filing the application.

   b) The application discloses the existence of the guardian or conservator of the estate.

c) The application sets forth the reasons why the guardian or conservator of the estate is inadequate to represent the interests of the proposed ward in the action.

2) Defines "a purposes who lacks legal capacity to make decisions" for purposes of the appointment of a guardian ad litem in a civil case to include all of the following:

   a) A person who lacks capacity to understand the nature or consequences of the action or proceeding; or

   b) A person who lacks capacity to assist the person's attorney in the preparation of the case.

   c) A person for whom a conservator may be appointed pursuant to section 1801 of the Probate Code.

3) Deletes an obsolete requirement that the Judicial Court adopt certain forms by July 1, 1999.

4) Provides that, before a guardian ad litem is appointed in a civil case, the proposed guardian ad litem must disclose to the court and all parties any known potential or actual conflicts of interest arising from appointment in and any familial or affiliate relationship of the guardian ad litem to any of the parties.

5) Requires a guardian ad litem in a civil case, if they become aware that a potential conflict of interest has become an actual conflict of interest or that a new potential or actual conflict exists, to promptly disclose the conflict of interest to the court.

6) Modifies, for purposes of the appointment of a guardian ad litem pursuant to Probate Code section 1003, the list of persons for whom a guardian may be appointed by replacing "an incapacitated person" with "a person who lacks legal capacity to make decisions."

7) Provides that, before a guardian ad litem is appointed pursuant to Probate Code section 1003, the proposed guardian ad litem must disclose to the court and all parties to the action any known potential or actual conflicts of interest arising from appointment and any familial or affiliate relationship of the guardian ad litem to any of the parties.

8) Requires a guardian ad litem appointed pursuant to Probate Code section 1003, if they become aware that a potential conflict of interest has become an actual

conflict of interest or that a new potential or actual conflict exists, to promptly disclose the conflict of interest to the court.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

SUPPORT: (Verified 8/22/22)

California Lawyers Association, Executive Committee of the Trusts and Estates Section (source)

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: According to the sponsor of the bill, the Executive Committee of the Trusts and Estates Section of the California Lawyers Association:

> SB 1279 will strengthen and codify several aspects of guardian ad litem appointments that often occur informally or without clear guidance for litigants and their lawyers. This bill will also resolve ambiguities in the statutes as to when appointment of a guardian ad litem is appropriate. Through these clarifications, the court will better ensure that those provided a guardian ad litem are properly represented and protected in pending litigation.
>
> Although the purpose of a guardian ad litem is to ensure the rights of the ward (the person whose interests are being represented by the guardian ad litem) are protected in litigation, often guardians ad litem are appointed by the court without clear parameters around their powers or what their reporting responsibilities are to the court. In addition, although the Judicial Council form requires disclosure of conflicts of interest by the proposed guardian ad litem, that is not currently required by statute. These ambiguities have led to uneven practice across the state, confusion among litigants, and abuses by guardians ad litem.

SUBJECT: Hydrogen-fueling stations: administrative approval

SOURCE: California Hydrogen Coalition

DIGEST: This bill, until January 1, 2030, requires cities and counties to administratively review applications for hydrogen-fueling stations and allows for denials based only on health or safety impacts.

Assembly Amendments limit the application of the bill to commercial or industrial parcels, add a January 1, 2030 sunset, and make other technical and clarifying changes.

ANALYSIS:

Existing law:

1) Requires the California Energy Commission (CEC) to allocate $20 million annually, as specified, until there are at least 100 publicly available hydrogen-fueling stations in California (AB 8, Perea, 2013).

2) Requires the CEC and California Air Resources Board (CARB) to annually review and report on progress toward establishing a hydrogen-fueling network that provides the coverage and capacity to fuel vehicles requiring hydrogen fuel that are being placed into operation in the state (AB 8, Perea, 2013).

3) Allows, pursuant to the California Constitution, a city or county to "make and enforce within its limits, all local, police, sanitary and other ordinances and regulations not in conflict with general laws."

4) Requires the following, pursuant to AB 1236 (Chiu, Chapter 598, Statutes of 2015):

    a) With certain exceptions, cities and counties to administratively approve an application to install EV charging stations through the issuance of a building permit or similar nondiscretionary permit and limits review to whether the station meets all health and safety requirements of local, state, and federal law (AB 1236, Chiu, 2015).

    b) On or before September 30, 2016, every local agency with a population of 200,000 or more, and on or before September 30, 2017, every local agency with a population of less than 200,000, to adopt an ordinance that creates an expedited, streamlined permitting process for EV charging stations.

This bill:

1) Requires a city or county to administratively approve an application for a hydrogen-fueling station through the issuance of a building permit or similar nondiscretionary permit.

2) Requires the station to be locate on a parcel zoned for commercial or industrial use, or be on a site that was formerly developed as a gas station in order to be eligible for the administrative review.

3) Limits review of an application to the building official's review of whether it meets all health and safety requirements of local, state, and federal law.

4) Limits local permitting requirements to those standards and regulations necessary to ensure that the electric vehicle (EV) charging station or hydrogen-fueling station will not have a specific, adverse impact upon the public health or safety, as specified.

5) Allows a county or city to require an applicant to apply for a use permit if the building official makes a finding, based on substantial evidence, that the hydrogen-fueling station could have a specific, adverse impact upon the public health and safety.

6) Prohibits a local agency from denying an application for a use permit to install a hydrogen-fueling station unless it makes written findings based upon substantial evidence in the record that the proposed installation will have a specific, adverse impact upon the public health or safety, and there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact

7) Requires the findings in 4) to include the basis for the rejection of potential feasible alternatives of preventing the adverse impact.

8) Allows a decision of the building official under 3) or 4) to be appealed to the planning commission of the local agency.

9) Requires conditions imposed on an application to install a hydrogen-fueling station to be designed to mitigate the specific, adverse impact upon the public health and safety at the lowest cost possible

10) Prohibits conditioning approval of a hydrogen fueling station on approval by a homeowner's association.

11) Requires a hydrogen-fueling station to meet specified health and safety requirements and performance standards and requirements imposed by state and local permitting authorities.

12) Defines "hydrogen-fueling station" to be the equipment used to store and dispense hydrogen fuel to vehicles according to industry codes and standards that is open to the public.

13) Repeals the above provisions on January 1, 2030 and includes findings and declarations to support its purposes.

Background

As an alternative to gasoline-based vehicles, California has more fuel cell electric vehicles (FCEVs)—and the hydrogen-fueling stations necessary to fuel them—than any other state in the nation. In January 2018, Governor Brown signed Executive Order B-48-18, setting targets of 200 hydrogen fueling stations and 250,000 EV chargers to support 1.5 million zero-emission vehicles (ZEVs) on California roads by 2025, on the path to five million ZEVs by 2030 and 100 percent of in-state sales of new passenger cars and trucks as ZEVs by 2035. Although the vast majority of those vehicles are projected to be battery EVs supported by EV chargers, the state currently has approximately 8,000 FCEVs on the roads and 61 hydrogen-fueling stations, according to the California Energy Commission's (CEC's) Zero Emission Vehicle and Infrastructure Statistics dashboard.

GO-Biz Hydrogen Station Permitting Guidebook. In October 2015, the California Governor's Office of Business and Economic Development (GO-Biz) published the first edition of its "Hydrogen Station Permitting Guidebook," and updated it in September 2020. The GO-Biz Guidebook is intended to help local jurisdictions and hydrogen station developers navigate and streamline the station development process by serving as a centralized resource "to minimize the research required to permit a station from both the authorities having jurisdiction (AHJs) or reviewing entities (often a city or county) and station developer perspective, offering insight and tools from past experiences and general recommendations for streamlining the permitting process." The Guidebook notes:

> Experience has shown that gaining planning approval can be the most time-consuming portion of the permitting process, underscoring the importance of early engagement with the planning department. Typical timeframes for completing this phase range from one day to six months, although station developers have reported instances that were significantly longer (e.g., greater than a year). It is also important to kick off discussions with utility providers to understand the process and timeline for connecting to the grid. Depending on the station location, type, and project size, this piece can be very time consuming and has been the source of significant project delays.

Battery EV charger streamlining under AB 1236 (Chiu, 2015). Currently, the dominant type of ZEV is battery-powered EVs, which are refueled at EV charging stations. Responding to the patchwork of California's EV permitting structure and

the uncertainty it posed to installers, AB 1236 (Chiu, Chapter 598, Statutes of 2015) placed significant new requirements into law regarding applications to install EV charging stations. The California Hydrogen Coalition wants to create parity between permitting of EV charging stations and hydrogen-fueling stations.

Comments

1) *Purpose of the bill.* According to the author, "California is a world leader when it comes to zero-emission vehicle deployment. However, California has focused primarily on plug in electric vehicles. Hydrogen fuel cell vehicles are complimentary zero emission vehicles and California needs do more to support their adoption. This bill does that by requiring local governments to expand their existing administrative approval process for the permitting of zero emission vehicle infrastructure to include hydrogen-fueling infrastructure."

2) *Too soon?* When the Legislature approved AB 1236 in 2015, there were around 137,000 EVs on the road in California, with 12,000 charging stations to support them. As the Legislature is considering SB 1291, the number of FCEVs and hydrogen fueling stations are orders of magnitude smaller: as of January 2022, there were about 8,000 FCEVs on the road and 61 fueling stations. SB 1291 is not as aggressive as AB 1236 was—this bill does not require every jurisdiction to develop an ordinance and streamlined process specific to hydrogen-fueling. Nonetheless, SB 1291 places limitations on the ability of local governments to regulate hydrogen-fueling stations as they see fit before the vast majority jurisdictions in the state have seen a single application—of the 61 stations currently open, almost all are in four counties: Los Angeles (18), Orange (10), Santa Clara (7), and Alameda (6). CEC and CARB's 2021 AB 8 report goes on to note that "most of the planned development continues to focus on areas where stations have been under development in prior years." Does the demand for FCEVs and associated fueling stations exists to an extent that warrants state intervention in local permitting processes?

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

- Negligible state costs.
- Local costs resulting from this bill are not reimbursable by the state because local governments have general authority to charge and adjust planning and

permitting fees to cover their administrative expenses associated with new planning mandates.

SUBJECT: Local public employee organizations: health benefits: discrimination

SOURCE: American Federation of State, County and Municipal Employees
Union of American Physicians and Dentists

DIGEST: This bill prohibits the County of Los Angeles from discriminating against an employee who is a member of a recognized employee organization by, among other things, limiting the employee's health benefit plan enrollment options or eligibility to participate in health benefit plans to plans that provide fewer benefits than those offered to employees who are not represented by a recognized employee organization.

Assembly Amendments add a provision specifying that this prohibition does not constitute a change in, but is declaratory of, existing law.

ANALYSIS:

Existing law:

1) Provides that recognized employee organizations have the right to represent their members in their employment relations with public agencies and requires the governing board of a public agency, or such boards, commissions, administrative officers or other representatives to meet and confer in good faith regarding the terms and conditions of employment with representatives or such recognized employee organizations. (Government Code §3503 & §3505)

2) Specifies that the scope of representation shall include all matters relating to employment conditions and employer-employee relations, including, but not limited to, wages, hours, and other terms and conditions of employment, except, however, that the scope of representation shall not include consideration of the merits, necessity, or organization of any service or activity provided by law or executive order. (Government Code §3504)

3) Requires the governing body of a public agency, and boards and commissions designated by law, to give reasonable written notice, except as specified for cases of emergency, to each recognized employee organization affected by any ordinance, rule, resolution, or regulation directly relating to matters within the scope of representation and shall give the recognized employee organization the opportunity to meet with the governing body or the boards and commissions. (Government Code §3504.5(a)(b))

4) Specifies that the governing body of a public agency with a population in excess of 4,000,000, or the boards and commissions designated by the governing body of such a public agency *shall not discriminate against* employees by removing or disqualifying them from a health benefit plan, or otherwise restricting their ability to participate in a health benefit plan, on the

basis that the employees have selected or supported a recognized employee organization. (Government Code §3504.5(c))

5) Specifies that nothing in these provisions shall be construed to prohibit the governing body of a public agency or the board or commission of a public agency and a recognized employee organization *from agreeing to health benefit plan enrollment criteria or eligibility limitations*. (Government Code §3504.5(c))

This bill:

1) Prohibits the County of Los Angeles from discriminating against an employee who is a member of a recognized employee organization by doing any of the following:

   a) Limiting the employee's health benefit plan enrollment options or eligibility to participate in health benefit plans that provide fewer benefits than those offered to employees who are not represented by a recognized employee organization.

   b) Disqualifying the employee from participation in health benefit plans that provide better benefits than the plans offered to employees who are not represented by a recognized employee organization.

   c) Restricting the employee from participation in health benefit plans that are available to managerial employees or other employees who are not members of a recognized employee organization.

2) Specifies that adding these provisions to the Government Code does not constitute a change in, but is declaratory, of existing law.

3) Finds and declares that a special statute is necessary and that a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution because, existing law notwithstanding, the County of Los Angeles only provides its MegaFlex Flexible Benefits Plan to management and other nonunion employees.

Background

Union of American Physicians and Dentists v. Los Angeles County. Between the years of 1999 to 2001, the County of Los Angeles (LA County) and the Union of

American Physicians and Dentists (UAPD) were involved in labor negotiations setting forth wages, hours and other terms and conditions of employment for the physicians employed by the County that UAPD represented. During negotiations, LA County adhered to a firm policy enforcing a county ordinance providing that only unrepresented employees could participate in two superior health benefit programs ("Flex" and "MegaFlex"). When negotiations concluded without agreement on this issue, LA County unilaterally removed unionized physicians who were participating in the Flex and Megaflex programs. Effective January 1, 2002, all physicians represented by UAPD would be enrolled in the "Choices" health benefit plan and were no longer eligible to enroll in the County's "Flex" or "MegaFlex" benefit programs.

UAPD filed a lawsuit (Case No.BS081517) against LA County seeking to compel the County to re-enroll its members in the Flex and MegaFlex programs. Among other things, County counsel argued that it was the County policy since the creation of these plans to offer them only to unrepresented County employees and that represented employees receive benefits that are periodically negotiated with the employee unions.

In 2002, the UAPD sponsored AB 2006 (Cedillo, Chapter 1041, Statutes of 2002) in order to specifically prohibit the type of actions taken by LA County against UAPD members in this case. The bill prohibited local authorities from providing different health benefits to unionized employees than non-unionized employees unless the union agrees. These provisions were made retroactive to July 1, 2001, in order to capture the UAPD members who had been removed and denied access to the superior Flex and MegaFlex plans before the LA County policy change.

This litigation culminated in a published opinion by the California Court of Appeal on July 25, 2005, in favor of UAPD (*Union of American Physicians and Dentists v. Los Angeles County Employee Relations Commission (2005) 131 Cal.App.4th 386*). A subsequent Preemptory Writ of Mandamus (a final order of a court to any government body, official or lower court to perform an act the court finds is an official duty required by law) was issued by the Superior Court against LA County requiring the County to retroactively re-enroll physicians represented by UAPD into Flex and MegaFlex and to make them whole for having been enrolled in Choices.

In order to avoid further litigation, in June 2007, a settlement agreement between the two parties was reached providing affected physicians with compensation for claims and/or potential claims of damages because of the County's actions.

NOTE: Please see Senate Labor, Public Employment and Retirement Committee analysis on this bill for more information on existing benefit options and plans available for Los Angeles County employees.

Comments

Need for this bill? According to the author, "due to a loophole in existing law, the County is still offering inferior healthcare benefits to physicians represented by an employee organization. The County's website outlines four separate benefits plan available to employees – Options, Choice, Flex, and MegaFlex – and specifically states the latter two plans are only available for 'eligible non-represented employees.' The MegaFlex plan is clearly superior to the Options and Choice plans, and includes benefits such as a tax-free cafeteria benefit allowance, health insurance, optional life insurances, disability benefits, flexible spending accounts, retirement plans, and paid time off.

"SB 1313 prohibits Los Angeles County from: 1) discriminating against an employee who is a member of a recognized employee organization by limiting their health benefit plan enrollment or eligibility to participation plans that provide fewer benefits; 2) disqualifying them from participation in health benefit plans that provide increased benefits; or 3) restricting them for participation in health benefit plans that are available to managerial employees or other employees who are not members of a recognized employee organization."

Related/Prior Legislation

AB 2006 (Cedillo, Chapter 1041, Statutes of 2002) prohibited the governing body of a specified public agency from providing different health benefits to unionized employees than non-unionized employees unless the union agrees.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, potential General Fund costs to reimburse LA County for costs associated with this bill, to the extent the Commission on State Mandates determines that the provisions of this bill create a reimbursable state mandate. LA County indicates this bill would result in one-time administrative costs in the high hundreds of millions of dollars, as well as unknown ongoing administrative costs. In addition, LA County indicates that were it to offer a more expensive health benefit plan to unionized employees as a result of this bill, costs could be in the hundreds of millions of dollars. However, this bill does not require LA County to offer a more expensive health benefit plan to

unionized employees. Rather, it requires parity between unionized and nonunionized employee health benefit plans.

SUPPORT: (Verified 8/25/22)

American Federation of State, County and Municipal Employees (co-source)
Union of American Physicians and Dentists (co-source)

OPPOSITION: (Verified 8/25/22)

California State Association of Counties
Los Angeles County Board of Supervisors
Rural County Representatives of California
Urban Counties of California

ARGUMENTS IN SUPPORT: According to American Federation of State, County and Municipal Employees, one of the co-sponsors of this bill, "Employee organizations serve an important role in the fight for workers' rights and conditions, and no worker should be discriminated against for belonging to one. Amid an unprecedented public health crisis, Californians have been reminded of how integral physicians and doctors are to the public safety of the state. It is imperative that these medical professionals have access to adequate health benefits. Senate Bill 1313 eliminates the loophole in existing laws and mandates that represented employees in the County of Los Angeles are not juxtaposed with subpar health benefits due to their membership in any employee organizations."

ARGUMENTS IN OPPOSITION: The Los Angeles County Board of Supervisors is opposed to this bill and argues that, "The County does not have a policy (written or otherwise) that discriminates against a union receiving the MegaFlex benefit and there has been no explanation from the author nor sponsor as to why other benefit plans offered by the County are "inferior" to MegaFlex. SB 1313, as written, would essentially require the County to provide all represented employees access to the same medical plans at the same employee rates; the County estimates this requirement at an annual cost of $865 million, which does not include administrative costs."

Additionally, they argue that, "Aside from the policy precedent SB 1313 would set by codifying employee benefits that the Legislature has long determined should be done through collective bargaining, this bill is unconstitutional. The California Constitution is clear that governing bodies "…shall provide for the number, compensation, tenure, and appointment of employees. (Cal. Const., art. XI, §1(b).). While the word, "benefits" is not explicitly stated, a trial court concluded in

Damon v. County of Los Angeles (2008) 166 Cal.App.4th 1276 that the County "has exclusive authority, as a charter county, to provide for the compensation and conditions of employment of its employees…" It is widely understood that compensation implies total compensation, which includes, among other things, health benefits, retirement benefits, salary, access to programs provided by the employer and salary or hourly pay rates. SB 1313 abridges the Board of Supervisors' constitutional power, upends years of labor agreements negotiated in good faith, causes unnecessary labor unrest and carries major, ongoing costs to Los Angeles County."

ASSEMBLY FLOOR: 76-0, 8/24/22 - See last page for vote

SUBJECT: Aging multidisciplinary personnel teams

SOURCE: Orange County

DIGEST: This bill allows a county or Area Agency on Aging (AAA) to establish an aging multidisciplinary team (MDT) with the goal of facilitating the expedited identification, assessment, and linkage of older adults to services, and allows provider agencies and members of the MDT to share confidential information for the purposes of coordinating services. This bill requires a county or AAA that

establishes an aging MDT to adhere to a number of protocols surrounding the privacy, security, and confidentiality of the information and records shared.

Assembly Amendments specify that a representative from the Office of the State Long-Term Care Ombudsman may be included in the aging MDT.

ANALYSIS: Existing federal law establishes the Older Americans Act (OAA), which promotes the well-being of Americans 60 years old and above through services and programs designed to meet the specific needs of older citizens. *(42 United States Code 3001, et seq.)*

Existing state law:

1) Recognizes AAAs to be the local units on aging in California that are supported from an array of funding sources, including the OAA, state and local governmental assistance, the private sector, and individual contributions for services, and requires AAAs to function as the community link at the local level for development of home- and community-based services provided under CDA's programs. *(WIC 9400 et seq.)*

2) Allows for MDTs for the purpose of the prevention, identification, management, or treatment of an abused child and their parents. Further allows a county to establish a child abuse MDT to allow provider agencies to share confidential information in order for provider agencies to investigate reports of suspected child abuse or neglect, as specified, or for the purpose of child welfare agencies making a detention determination. *(WIC 18964; WIC 18961.7(c))*

3) Allows for MDTs for the purpose of the prevention, identification, management, or treatment of abuse of elderly or dependent adults. *(WIC 15610.55)*

4) Allows for a homeless adult and family MDT in the Counties of Los Angeles, Orange, Riverside, San Bernardino, San Diego, Santa Clara, and Ventura to serve individuals at risk of homelessness for the purpose of facilitating the expedited prevention of homelessness for those individuals. *(WIC 18999.81)*

5) Allows area agencies on aging and other county agencies that provide services to older adults through an established MDT, including the county departments of public social services, health, mental health, alcohol and drug abuse, and the public guardian, to provide information regarding older adult clients only to other county agencies with staff designated as members of an MDT that are, or may be, providing services to the same individuals for purposes of identifying

and coordinating the treatment of individuals served by more than one agency. (*WIC 9401)*

This bill:

1) Permits a county or AAA to establish an aging MDT with the goal of facilitating the expedited identification, assessment, and linkage of older adult services and to allow provider agencies and members of the personnel team to share confidential information for the purpose of coordinating services.

2) Defines "aging multidisciplinary personnel team" to mean any team of two or more persons who are trained in and qualified to provide a broad range of services related to older adults. The team may include, but is not limited to: mental health and substance use disorder personnel and practitioners or other trained counseling personnel; police officers, probation officers, or other law enforcement agents; legal counsel for the older adult; medical personnel with sufficient training to provide health services; social service workers with experience or training in the eligibility for and provision of services to older adults; case managers or case coordinators responsible for referral, linkage, or coordination of care and services provided to older adults; veterans services providers and counselors; domestic violence victim service organizations, as defined; a member of an existing MDT, as defined; aging services provider agencies and designated personnel, including AAAs; and a representative of the Office of the State Long-Term Care Ombudsman.

3) Defines "aging service provider agency" as any governmental or other agency that has, as one of its purposes, the identification, assessment, and linkage of services to older adults. Further, provides that the aging services provider agencies that may share information include, but are not limited to: social services; health services; mental health services, substance use disorder services; probation; law enforcement; legal counsel for the adult; veterans services and counseling; domestic violence victim service organizations, as defined; a member of an established MDT, as defined; caregivers; housing; and long-term care ombudsperson.

4) Defines "older adult" to mean a person 60 years of age or older.

5) Allows members of an MDT engaged in the identification, assessment, and linkage of services to older adults to disclose and exchange information with one another that may be designated as confidential under state law if the member of the team reasonably believes it is generally relevant to the identification or provision of services, as provided. States that any discussion

relative to the disclosure or exchange of the information during a team meeting is confidential and, notwithstanding any other law, testimony concerning that discussion is not admissible in any criminal, civil, or juvenile court proceeding.

6) Requires information sharing by the aging MDT to be governed by protocols developed by each county or AAA that establishes an MDT.

   a) Requires protocols to include the items of information or data that will be shared; the participating agencies; and a description of how the information will be used by the aging MDT only for the intended purposes of facilitating the expedited identification, assessment, and linkage of older adult services; among other requirements. Additionally requires protocols to include various requirements around the confidentiality, integrity, security, and privacy of the information shared.

   b) Requires protocols to include a requirement that the county or AAA obtain the affirmative consent of an individual or their representative before the individual's information may be shared.

   c) Further requires protocols to include a requirement that the county or AAA notify an individual that their information may be shared for the purposes of the identification of or the provision of services once affirmative consent is obtained. Requires this notice to inform the individual that opting out of sharing this information does not affect their eligibility for services.

7) States that in order to protect and individual's privacy and maintain the ability of members of an aging MDT to communicate candidly to provide the best services to benefit the health and safety of older adults, it is necessary to limit the public's right of access within the meaning of Section 3 of Article I of the California Constitution.

Background

Multidisciplinary Personnel Teams. Since the passage of AB 1049 (Bader, Chapter 353, Statutes of 1987), MDTs have been authorized in California to allow for a coordinated interagency response to elder and child abuse cases. MDTs are formed and operated at the county level and afford their members with the ability to share confidential information among team members for the purposes of preventing, identifying, or treating child or elder abuse. MDTs are seen as an effective tool for conducting a timely and objective investigation, with the added benefit of facilitating coordination and team decision-making among the different agencies and entities participating on the team.

In 2017, AB 210 (Santiago, Chapter 544, Statutes 2017) enabled counties to create MDTs for homeless adults and families to facilitate the expedited identification, assessment, and linkage of homeless individuals to housing and supportive services within that county and to allow provider agencies to share confidential information for the purpose of coordinating housing and supportive services. In 2019, AB 728 (Santiago, Chapter 337, Statutes of 2019), created a five-year pilot program in the counties of Los Angeles, Riverside, San Bernardino, San Diego, Santa Clara, and Ventura that allows those counties to expand the scope of a homeless adult and family MDT to include individuals who are at risk of homelessness. It also required the MDT member who first establishes contact with an individual at risk of homelessness to notify the individual that their confidential information may be shared for the purpose of coordinating housing and supportive services, and to attempt to obtain the individual's consent for that information sharing.

Comments

Purpose of this bill. According to the author, "the current system does not allow for the coordination of services among agencies who provide services to older adults," as older adults often interact with multiple county departments and community service providers with various points of entry. "Older adults are required to repeat their stories to each new provider, and providers are reliant on them to share information regarding services received," limiting the ability for counties to build a collaborative approach to these services. The author further states, "The County of Orange is currently developing a Master Plan for Aging that will coordinate services for older adults and allow them to thrive in our county. Resource partners need the authority to work together so older adults are seamlessly connected to critical programs and services."

The provisions of this bill are substantially similar to the provisions of AB 210 (Santiago, Chapter 544, Statutes 2017), which expanded MDTs to link homeless individuals to services, but instead apply the MDT model for the purposes of facilitating the linkage of older adults to aging services within the county or AAA's service area. Under this bill, any adult age 60 or over who seeks services from their local county or AAA could be subject to having their confidential information shared across a wide array of agencies, if they consent to this information sharing and the MDT member believes it is relevant to the provision of services.

Related/Prior Legislation

AB 728 (Santiago, Chapter 337, Statutes of 2019) created a five-year pilot program in the Counties of Los Angeles, Orange, Riverside, San Bernardino, San Diego,

Santa Clara, and Ventura that allows those counties to expand the scope of a homeless adult and family MDT to include serving individuals who are at risk of homeless, and set parameters for the application of those MDTs to individuals who are at risk of homelessness.

AB 210 (Santiago, Chapter 544, Statutes of 2017) allowed counties to develop homeless adult and family MDTs in order to facilitate identification and assessment of homeless individuals, and link homeless individuals to housing and supportive services, and to allow service providers to share confidential information to ensure continuity of care.

AB 2229 (Brownley, Chapter 464, Statutes of 2010) established time-limited authority for counties to create two-person MDTs engaged in the investigation of suspected child abuse or neglect.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

- Potential General Fund (GF) cost pressures to state services programs of an unknown but potentially significant amount, to the extent there are increased caseloads resulting from the efforts of the MDTs authorized by this bill.

- Potential costs to the courts of an unknown, but likely minor amount (Trial Court Trust Fund and GF) to the extent the courts experience an increase in the number of cases involving inappropriate disclosure of information as a result of this bill.

- Minor and absorbable administrative costs to the California Department of Aging.

- Participating counties will incur costs to create and administer a multidisciplinary team. However, this is an optional activity for counties and, therefore, county costs are not reimbursable by the state.

SUBJECT: Elections: disclosure of contributors

SOURCE: California Clean Money Campaign

DIGEST: This bill changes the text and formatting of required disclosures on petitions and electronic media and video campaign advertisements, as specified. This bill also requires disclosures on electronic media advertisements about top contributors funding the advertisement, as specified.

Assembly Amendments make clarifying, technical, and conforming changes.

ANALYSIS:

Existing law:

1) Creates the Fair Political Practices Commission (FPPC), and makes it responsible for the impartial, effective administration and implementation of the Political Reform Act of 1974 (PRA).

2) Defines "advertisement," for the purposes of the PRA, as any general or public communication that is authorized and paid for by a committee, as defined, for the purpose of supporting or opposing at least one candidate for elective office or at least one ballot measure, except as specified.

3) Requires advertisements that support or oppose candidates or ballot measures to include disclosure statements in specified circumstances. Requires that these disclosures comply with certain formatting, display, legibility, and audibility requirements.

4) Requires an advertisement supporting or opposing a candidate that is paid for by an independent expenditure to include a statement that it was not authorized by a candidate or a committee controlled by a candidate.

5) Defines “top contributors,” for the purposes of the PRA, as the persons from whom the committee paying for an advertisement has received its three highest cumulative contributions of $50,000 or more.

6) Requires any advertisement supporting or opposing a candidate or ballot measure paid for by a committee, other than a political party committee or a candidate’s controlled committee, to include the words “committee major funding from” followed by the names of the committee’s top contributors, as defined above and unless certain conditions are met.

7) Prescribes requirements regarding the form, content, and presentation of the top contributors disclosures on advertisements, which vary based on the medium of the advertisement, as specified.

8) Prescribes requirements regarding the form, content, and presentation of an initiative, referendum, and recall petition.

9) Provides that a petition must be designed so that each signer can personally affix their signature, printed name, residence address, and incorporated city or unincorporated community.

10) Requires, for a state or local initiative, referendum, or recall petition for which the circulation is paid for by a committee, as specified, that an "Official Top Funders" disclosure be made, either in a box with a black border on the petition or on a separate sheet as specified, that identifies the name of the committee, any qualifying "top contributors," as that term is defined in the PRA, and the month and year during which the Official Top Funders disclosure is valid. Provides that the printed month and year of validity may start at most seven days after the date the top contributors were last confirmed.

11) Permits the committee, in its discretion, to include a list of up to three endorsers, as defined, with the Official Top Funders disclosure, either on the petition or on the separate sheet, as specified.

12) Requires that the Official Top Funders disclosure include, either on the petition or the separate sheet, a link to an internet web page with updated information on the committee's top funders, as specified.

13) Requires a state or local initiative petition contain the following notices, in 11-point type, after the heading "NOTICE TO THE PUBLIC:" and before that portion of the petition for voters' signatures:

    a) For petitions that do not include the Official Top Funders disclosure on the petition: "YOU HAVE THE RIGHT TO SEE AN "OFFICIAL TOP FUNDERS" SHEET." Provides that this text shall be in a boldface font.

    b) "THIS PETITION MAY BE CIRCULATED BY A PAID SIGNATURE GATHERER OR A VOLUNTEER. YOU HAVE THE RIGHT TO ASK."

    c) For state initiative petitions only: "THE PROPONENTS OF THIS PROPOSED INITIATIVE MEASURE HAVE THE RIGHT TO WITHDRAW THIS PETITION AT ANY TIME BEFORE THE MEASURE QUALIFIES FOR THE BALLOT."

14) Requires petition circulators to certify under the penalty of perjury that they showed each petition signer a valid Official Top Funders sheet if the petition does not include a disclosure statement containing the same information.

15) Provides that signatures collected on a petition are not invalid solely because the Official Top Funders disclosure was absent or inaccurate.

This bill:

1) Makes changes to the required disclosures printed on state or local initiative petitions and expands these disclosure requirements to state or local referenda and recall petitions, as specified. Specifically, requires, in order and after "NOTICE TO THE PUBLIC:":

   a) The following sentence, for petitions that include the Official Top Funders disclosure on a petition in boldface type: "SIGN ONLY IF IT IS THE SAME MONTH SHOWN IN THE OFFICIAL TOP FUNDERS OR YOU SAW AN 'OFFICIAL TOP FUNDERS' SHEET FOR THIS MONTH."

   b) The following sentence be in non-boldface type: "THIS PETITION MAY BE CIRCULATED BY A PAID SIGNATURE GATHERER OR A VOLUNTEER. YOU HAVE THE RIGHT TO ASK."

   c) The following sentence for a state initiative petition be in non-boldface type: "THE PROPONENTS OF THIS PROPOSED INITIATIVE MEASURE HAVE THE RIGHT TO WITHDRAW THIS PETITION AT ANY TIME BEFORE THE MEASURE QUALIFIES FOR THE BALLOT."

2) Requires, for petitions that *do not include* the Official Top Funders disclosure on a petition, the following text on a separate horizontal line below the signer's printed name and above the signer's signature: "DO NOT SIGN UNLESS you have seen Official Top Funders sheet and its month is still valid." Requires the "DO NOT SIGN UNLESS" text to be in all capitals and in boldface. Requires the other text to be capitalized as shown above and not be in boldface, as specified.

3) Requires, unless otherwise specified, that the text of an Official Top Funders sheet not be in boldface type.

4) Specifies that the circulating title and summary prepared by the Attorney General that is currently required to appear on each page of an initiative petition must precede the text of the measure, as specified.

5) Makes a number of clarifications and formatting changes to the disclosures required on specific types of campaign advertisements, including electronic media advertisements, as specified.

6) Makes technical and conforming changes.

7) Makes findings and declarations.

Background

The Disclose Act and Other Previous Legislation. In 2017, the Legislature approved and the Governor signed AB 249 (Mullin, Chapter 546, Statutes of 2017), which significantly changed the content and format of disclosure statements required on specified campaign advertisements, including video and electronic media advertisements, in a manner that generally required such disclosures to be more prominent. AB 249 also established new requirements for determining when contributions are considered to be earmarked, and imposed new disclosure requirements for earmarked contributions to ensure that committees are able to determine which contributors must be listed on campaign advertisements. AB 249 is commonly known as the "Disclose Act."

Petition Notices and Signature Lines. Existing law requires that certain notices be printed in all capital letters on state and local initiative petitions, after the heading "NOTICE TO THE PUBLIC" and above where voters sign the petition. For petitions that do not include the Official Top Funders disclosure on the petition: "YOU HAVE THE RIGHT TO SEE AN 'OFFICIAL TOP FUNDERS' SHEET" and provides that this text shall be in a boldface font. The petition is also required to contain the sentence, "THIS PETITION MAY BE CIRCULATED BY A PAID SIGNATURE GATHERER OR A VOLUNTEER. YOU HAVE THE RIGHT TO ASK." Finally, for state initiative petitions the following sentence is also required: "THE PROPONENTS OF THIS PROPOSED INITIATIVE MEASURE HAVE THE RIGHT TO WITHDRAW THIS PETITION AT ANY TIME BEFORE THE MEASURE QUALIFIES FOR THE BALLOT."

SB 1360 adds state and local referenda and recall petitions to the state and local initiative petition requirements and makes wording as well as formatting changes.

For petitions that *do not include* the Official Top Funders disclosure on a petition, the following text appears on a separate horizontal line below the signer's printed name and above the signer's signature: "DO NOT SIGN UNLESS you have seen Official Top Funders sheet and its month is still valid." This statement would appear near every signature line.

Video Advertisements. Under existing law, video advertisements, including video advertisements distributed over the internet, must disclose the name of the committee paying for the ad and the committee's top contributors on a solid black

background that takes up the bottom one-third of the screen. The disclosure must be displayed for at least five seconds of a broadcast of 30 seconds or less or for at least 10 seconds of a broadcast that lasts longer than 30 seconds. The smallest letter in the disclosure must take up at least 4% of the height of the video screen and must be in a contrasting color. However, the name of the top contributor may have its type condensed if it would exceed the length of the screen.

Electronic Media Advertisements. Under existing law, an electronic media advertisement that is a graphic or an image, as specified, must include the text "Who funded this ad?," "Paid for by," or "Ad Paid for by" in a contrasting color and a font size that is easily readable by the average viewer. This text must be hyperlinked to an internet website which contains the committee's top contributors disclosure and other required disclosures. However, if this text would take up more than one-third of the advertisement's image, the text may be omitted, but the advertisement must still include a hyperlink to the required disclosures. Unlike most other types of advertisements, electronic media advertisements are not currently required to display the committee's top contributors.

If adding the top contributor would take up a specified amount of the graphic or image, the disclosure could be reduced to the text, "Who funded this ad?" with a hyperlink to a website with the required disclosures. If that text would take up more than a specified amount of the advertisement, then only the hyperlink would be required.

Comments

According to the author, previous elections have highlighted tactics used by some campaign committees to avoid the transparency required by current California law on ads about ballot measures and independent expenditures and on initiative, referendum, and recall petitions. People shouldn't have to pause their TVs or computers, squint, or run to the kitchen for their glasses to determine who is funding political ads. Transparency in our political process is more important than ever and voters deserve to be treated respectfully.

On many television ads, long committee names are used that look like huge chunks of text that are hard to distinguish from the top funders of the committee during the five seconds the disclosure is displayed on the ad. Additionally, some campaigns take advantage of the fact that online image ads are the only major format of political advertising that isn't currently required to disclose any top funders on the ad to deluge voters with ads that hide who paid for them. Therefore, SB 1360 updates the formatting requirements of disclosure text on television, video, and online graphic advertisements to address these problems and to make it easier to

read who's paying for them. It also ensures that voters who are being approached to sign initiative, referendum, and recall petitions know they must be shown the top funders paying for their circulation, which many paid signature gatherers have not been showing voters despite requirements in current law.

Related/Prior Legislation

SB 752 (Allen, 2021) would have lowered the contribution thresholds at which a contributor to a political committee may be required to be identified on political ads paid for by that committee, or on petitions that the committee pays to circulate, as specified. The bill also would have changed the text and formatting of required disclosures on petitions and electronic media and video campaign advertisements, as specified. SB 752 was held in Assembly Appropriations on the Suspense File.

SB 47 (Allen, Chapter 563, Statutes of 2019) required that a top funders disclosure be made on an initiative, referendum, or recall petition, or on a separate sheet, as specified.

AB 2188 (Mullin, Chapter 754, Statutes of 2018) required online platforms that sell political ads to make specified information about those political ads available to the public and made various changes to the required format for disclosures on electronic media ads.

AB 249 (Mullin, Chapter 546, Statutes of 2017) enacted the "Disclose Act" and significantly changed the content and format of disclosure statements required on specified campaign advertisements. AB 249 also established new requirements for determining when contributions are considered to be earmarked, as specified.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

The Fair Political Practices Commission (FPPC) indicates it would incur first-year costs of $170,000, and $163,000 annually thereafter, to implement the provisions of the bill (General Fund). The bill would not have any costs to the Secretary of State (SOS).

SUBJECT: University of California: vendors

SOURCE: AFSCME Local 3299

DIGEST: This bill requires vendors to provide their employees with the total compensation rate specified by the vendor's contract, as well as make other specified payroll information available to employees upon request. This bill requires that vendors, as defined, provide specified payroll information to University of California (UC) and any organization that is the exclusive representative of UC employees which perform similar services. This bill also prohibits vendors, as defined, from contracting with the UC if they are supplying employees for services at a lower compensation rate than is specified by UC policy on wages and benefits.

Assembly Amendments make the following changes:

1) Clarify that "vendor", as defined by the bill, does not include a contractor in the construction industry that has entered into a valid collective bargaining agreement.

    a) For the purposes of SB 1364, "Contractor in the Construction Industry" is defined to mean an employer that provides work associated with construction, including any work involving alteration, demolition, building, excavation, renovation, remodeling, maintenance, improvement, repair work, and any other work as described by Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and other similar or related occupations or trades.

2) Clarify that the provisions of SB 1364 are severable and if any provision or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application.

ANALYSIS:

Existing law:

1) Establishes the UC as a public trust under the administration of the corporation known as "The Regents of the University of California" and grants the Regents all the powers necessary or convenient for the effective administration of this public trust.

    a) Provides that the Regents are comprised of seven ex officio members, as specified, 18 appointive members appointed by the Governor and approved by the Senate, a majority of the membership concurring, and permits a student representative if appointed by the Regents.

b) Establishes that the UC Regents are subject only to such legislative control as may be necessary to insure the security of its funds, to ensure compliance with the terms of the endowments of the university, and such competitive bidding procedures as may be made applicable to the university by statute for the letting of construction contracts, sales of real property, and purchasing of materials, goods, and services. (CA Constitution, Article XIV, Sec. 9)

2) Provides that a person or entity shall not enter into a contract or agreement for labor or services with a construction, farm labor, garment, janitorial, security guard, or warehouse contractor, where the person or entity knows or should know that the contract or agreement does not include funds sufficient to allow the contractor to comply with all applicable local, state, and federal laws or regulations governing the labor or services to be provided. (Labor Code §2810)

3) Requires that, at the time of hiring, an employer must provide to each employee a written notice, containing the specified information about overtime, pay rates, minimum wage and certain information about the employer. (Labor Code §2810.5)

4) Requires all employers to provide their employees with an accurate, itemized statement showing gross wages earned, total hours worked by the employee, all deductions, net wages earned, the period for which the employee is paid, all applicable hourly rates in effect during the pay period and the corresponding number of hours worked, the name of the employee and only the last four digits of his or her social security number or an employee identification number other than a social security number and the name and address of the legal entity that is the employer. (Labor Code §226)

5) Specifies penalties for failure to pay at least minimum wage and procedures around filing a claim against an employer for alleged failure to comply with minimum wage law. (Labor Code §1197.1)

This bill:

1) Prohibits any vendor from accepting payment of more than $1000 from the UC for a contract for services if the vendor is performing services or supplying the UC with employees who are paid less than the total compensation rate specified in the vendor's contract with the UC or required by UC policy.

2) Requires a vendor that supplies the University with employees to perform services to provide those employees with written notice of the total

compensation rate specified in the vendor's contract, and the employee's hourly rate of pay, as specified. These notices must be provided at the time each employee is assigned to perform services and thereafter, each January, and within seven days of a change to the employee's hourly rate.

3) Requires that in January and July of each year, a vendor must provide basic payroll to the UC and *any organization with exclusive representation* of university employees, as specified. The vendor must also provide all employees who agree to perform services for the UC with written notice of this requirement, including the following:

> Basic payroll information pertaining to all employees who accept an assignment or continue performing services for the University of California will be shared with the University of California and the organizations that represent University of California employees. The information that will be shared includes your full name, work location, mobile telephone number, email address, and home address. The purpose of sharing this information is to ensure that the University of California and the organizations that represent University of California employees can contact you if they discover you have been paid less than required by contract or university policy and so that the University of California can provide you with a timely offer of employment as soon as you become eligible.

A vendor must also make basic payroll information available to an employee for inspection upon request, as specified.

4) Establishes that the following may constitute evidence of a vendor's intent to deceive or defraud the UC or its employees:

   a) Violation of the requirement to provide employees with a written notice containing employment information, specified in Labor Code Section 2810.5.

   b) Failure to submit to an audit or to supply an independent audit of its payroll records upon request.

   c) Violation of requirements under 2) and 3) above.

5) Allows any employee or university employee to provide a vendor with written notice of a violation of the above sections of this bill and provide the vendor with the opportunity to correct and cure the violation. If the vendor fails to provide documentation that it has or will make whole to all of the allegedly

aggrieved employees within 30 days, the employee who filed the written complaint may file suit.

a) Allows an employee or university employee to bring a civil action for violation of the above sections of this bill against a vendor in the superior court of any county in which the university operates.

b) Requires that if a claimant prevails in an action under this section, the court must order all of the following:

   i) For any vendor that pays an employee less than the compensation rate fixed by contract, as specified, $100 per employee per pay period for an initial violation and $250 per employee per pay period for any subsequent violations.

   ii) For any vendor that knowingly and intentionally violated 2) or 3) above, a civil penalty of $50 dollars per employee per pay period for an initial violation or $100 per employee per pay period for any subsequent violations, with a cap of $4000 per employee.

   iii) For a violation of 2) or 3) above must pay a civil penalty of up to 10% of the amount paid by the university to the vendor the same year or years. Any penalty of this kind must be deposited into the General Fund.

   iv) The disqualification of the vendor, for a minimum of five years for submitting any bid to the university or executing, renewing, or extending any contact with or otherwise receiving payment from the University.

   v) The payment of attorney's fees and costs.

6) Provides that the remedies under this bill are in addition to any other remedies provided by law. The civil penalties under this bill are in addition to any other penalties provided by law, except that an employee cannot also receive civil penalties provided for in Section 226 or 1197.1.

7) Defines the following terms:

   a) "Basic payroll information" means, for each vendor-supplied employee who performed services for the university at any time during the preceding six-month period, the following information:

      i) Employee's full name, job title, mobile telephone number, email, and home address.

ii) Work location.

iii) Employee's hours of work for each pay period during the six-month period.

iv) The employee's hours of work performing services for the university for each pay period during the six-month period.

b) "Subcontractor" means any person, employer, supplier of labor, staffing agency, temporary services employer, or other entity that performs services for the university or supplies employees to perform services, pursuant to a contract with a vendor.

c) "Total compensation rate" means the employee's hourly rate of pay plus the hourly value of employer-provided benefits.

d) "University" means the University of California.

e) "Vendor" means contractor and includes any person, employer, supplier of labor, staffing agency, temporary services employer, labor broker, management services provider or other entity that contracts with the university to perform services or to supply the university with its own employees or those of a subcontractor to perform services. Also means any person acting either individually or as an officer, agent, or employee of a vendor.

Background

Central to SB 1364 is a discussion of the UC Regents Policy 5402: Policy Generally Prohibiting Contracting for Services. This policy was seen as an update to the UC Fair Wage/Fair Work Plan, which guaranteed employees that work at least 20 hours a week would be paid $15 per hour. Regents Policy 5402, approved on November 14, 2019, announced "a general prohibition on contracting out for services and functions that can be performed by University staff". The policy allowed for limited outside contracting, as a last resort, with the following stipulations:

1) Prioritization of the use of existing staff.

2) Compliance with minimum certain workforce standards.

3) Equal Pay for Equal Work, the promise that contracted worker would receive *equal pay and benefits to equivalent UC employees.*

Two months before the UC Board of Regents approved Policy 5402, ACA 14 narrowly failed passage on the Senate Floor. ACA 14 would have added the UC Equal Employment Opportunity Standards Act to Article IX, requiring the Regents of UC to ensure that all contract workers who are paid to perform support services are afforded the same equal employment opportunity standards as university employees performing similar services. The Constitutional Amendment was developed partially in response to a 2016 Joint Legislative Audit Committee Report entitled *"The University of California Office of the President: It Has Not Adequately Ensured Compliance With Its Employee Displacement and Services Contract Policies".* The report makes a recommendation that:

> The Office of the President should revise contracting policies to address situations in which university locations are contemplating entering into services contracts instead of hiring university employees to perform an activity. In these situations, the Office of the President should require university locations to perform an analysis that is similar to the one it requires when current university employees are displaced.

SB 1364 and UC Contracts

SB 1364 is an effort to enforce compliance with the Equal Pay for Equal Work component of Regents Policy 5402. As noted above, this bill requires vendors who contract with UC to supply a written notice to their employees about relevant contractual compensation rates and supply basic payroll information to the UC and any labor organization that represents equivalent UC employees. Any employee or university employee may bring a civil action against a vendor for a violation of the Equal Pay for Equal Work policy. This bill also establishes penalties attached to a violation of these requirements and disqualifies any vendor found to be in violation from contracting with UC for a minimum of five years.

Supporters argue that SB 1364 follows existing policy recommendations from JLAC to update rules governing UC contracting and ensure compliance. These new reporting requirements and penalties could be necessary. However, as noted in UC's Annual Report to AFSCME on University Contracts:

> COVID-19 presented the University with significant challenges in meeting our mission areas of teaching, research, patient care, and community service. Our health and medical centers were faced with a once in a lifetime pandemic that required the skills of our highly trained and valued workforce, adaptability, new ways of working, including new policies and procedures, and the ability to ramp up and ramp down as the conditions of the pandemic changed from month to month.

UC should, of course, be adhering to their own written policies concerning wages and benefits. Given the pandemonium caused by COVID-19, combined with UC's administration of health care facilities, some compliance lags are perhaps understandable. It may require more than two years before UC's contracting practices reflect the 5402 policy changes, given the additional hurdle of a virulent pandemic. The reporting requirements under SB 1364 also present potential privacy concerns for workers of vendors outside of the UC, though this group of workers should decrease as full compliance with 5402 is realized.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Ongoing costs of at least tens of millions of dollars annually to UC to cover vendors' cost of compliance and exposure to litigation and penalties as a result of this bill, likely offset to a minor extent by potential penalty revenue.

   UC is generally prohibited from contracting for services, but contracted services are allowed to meet exigent circumstances, with vendors required to pay their employees wage and benefit parity alongside UC employees. However, UC notes its existing policies only cover specified services and contracts valued over $100,000, whereas this bill applies to all types of contracts valued over $1,000. Thus, UC expects vendors willing to continue contracting would negotiate a premium to cover the cost of compliance and exposure to litigation and penalties. Additionally, contracts with vendors not currently subject to UC's existing policies would need to be renegotiated for wage and benefit parity. Lastly, to the extent vendors are no longer willing to service UC, especially at UC's medical centers, UC anticipates significant costs to insource temporary or specialty services. (General Fund (GF))

2) GF or Trial Court Trust Fund (TCTF) cost pressures of an unknown, but potentially significant, amount to the courts in additional workload, by creating a new cause of action and penalties for violation of this bill's provisions. The estimated workload cost of one hour of court time is $1,000. If additional 10 cases are filed statewide resulting in 20 hours of court time for each case, costs would be approximately $200,000. Although courts are not funded on the basis of workload, increased pressure on the TCTF and staff workload may create a need for increased funding for courts from the GF to perform existing duties.

ARGUMENTS IN SUPPORT: The California Employment Lawyers Association writes in support:

> Currently, the University of California has in place a policy that requires companies that enter into service contracts with the University of California (UC) to pay those contract employees wages and benefits equal to what UC pays its own service workers – Equal Pay for Equal Work.

SB 1364 will help ensure compliance with the Equal Pay for Equal Work policy by requiring vendors to supply a written notice to their employees about the relevant compensation rates and to also supply basic payroll information to the UC. Any employee or university employee may bring a civil action against a vendor for a violation of the Equal Pay for Equal Work policy. A vendor would have an opportunity to correct and cure any violation under the bill. A failure to cure will give company employees the right to recover wages owed.

ARGUMENTS IN OPPOSITION: The University of California writes in opposition:

The bill is unnecessary because UC already requires WBP under Regents Policy 5402Article 5ii and iii of our collective bargaining agreement (CBA) with AFSCME 3299. UC's policy drives economic mobility, and the union can enforce these policies through their CBA while UC verifies vendor compliance through annual audits.

Additionally, SB 1364 will hurt small businesses and impede UC's ability to meet the needs of our hospitals and campuses. The bill places significant financial and legal risks, and unrealistic administrative requirements, on vendors who contract with UC; the bill includes mandatory court-ordered penalties, even for minor or technical violations.

UC's vendors note that these risks are insurmountable, making SB 1364 a *de facto* ban on contracting. Occasional contracts for covered services are essential for UC to responsibly meet the needs of patients, students, and campuses. This bill drives away vendors needed to cover daily operations, from cleaning rooms and food service to nurses and medical technicians. As a result, health care delivery and patient outcomes may suffer.

SUBJECT: Vehicles: consumer notices

SOURCE: Author

DIGEST: This bill requires certain disclosures by manufacturers and dealers of new vehicles regarding the capabilities of semiautonomous driver assistance features and prohibits the misleading marketing of such features.

Assembly Amendments clarify definitions and require manufacturers to provide dealers with information to satisfy the consumer disclosure requirements in this bill.

ANALYSIS:

Existing law:

1) Requires that vehicles operating on public roads be registered with the Department of Motor Vehicles (DMV).

2) Prohibits vehicle manufacturers and dealers from false or misleading advertising (Vehicle Code §11713).

3) As provided for in DMV regulations, prohibits the false or misleading advertising of a technology as autonomous (13 CCR 228.28).

This bill:

1) Prohibits a manufacturer or dealer from featuring or describing any partial driving automation feature in written marketing materials from using language that implies or would otherwise lead a reasonable person to believe that the feature allows the vehicle to function as an autonomous vehicle (AV) when it lacks that functionality.

2) Defines "partial driving automation feature" as a system equipped with a level 2 partial driving automation in the Society of Automotive Engineers (SAE) Standard (J3016) (April 2021).

3) Requires manufacturers to provide dealers with the information required for dealers to comply with the requirement to provide purchasers with information on the functions and limitations of the partial driving automation feature.

4) Provides that the requirement to provide information on the partial driving automation vehicle shall not alter any existing duty of care or limit the civil liability of a manufacturer or dealer, including, but not limited to, claims for negligence or product defect.

Comments

1) *Author's statement.* "Senate Bill (SB) 1398 increases consumer safety by requiring dealers and manufacturers that sell new passenger vehicles equipped with a semiautonomous driving assistance feature or provides any software

update or vehicle upgrade that adds a semiautonomous driver assistance feature to give a clear description of the functions and limitations of those features. Further, SB 1398 prohibits a manufacturer or dealer from deceptively naming, referring to, or marketing these features."

2) *A Longer Ride than Expected.* The bold predictions made in the middle of the last decade for rapid deployment of autonomous vehicles has given way to the reality that autonomy is hard. While a few companies seem on the verge of launching self-driving autonomous vehicles in limited circumstances, a fully self-driving car is not available today. Yet the road to autonomy has resulted in remarkable progress in developing useful driver assistance features that perform some of the driving tasks. Cruise control, which adjusts to the speed of the vehicle ahead, is widespread; autonomous steering is available on some models, as is self-parking. But at this point, all of these features requires the presence and attention of a human driver for the vehicle to be operated safely. Unfortunately, a quick YouTube search shows that some drivers misuse these advanced features (e.g. vehicles traveling at freeway speed while the "driver" is asleep, or even sitting in the back seat), putting much greater faith in the technology than is warranted and endangering the public.

3) *No Self-Inflicted Wounds.* In addition to cutting-edge technical expertise, the development of autonomous vehicles also requires government approval at the federal and state level. Such approvals have come very deliberately– and California has been more deliberate than most – as the public's fears of autonomous vehicles must be addressed. The industry has, for the most part, also been conservative in deploying the technology as they recognize that crashes of autonomous vehicles will delay government approval and jeopardize public acceptance. By requiring clear disclosures and prohibiting misleading marketing, this bill supports the progress of the autonomous vehicle industry. While it will not stop the irresponsible behavior of drivers who intentionally misuse the technology, it is intended to thwart its unintentional misuse.

4) *Enforcement.* Under current law, the DMV is responsible for ensuring that automotive advertising isn't false or misleading. Its regulations specifically recognize that advertising a vehicle as autonomous when it is not is misleading. On July 28, 2022, after many months of investigation, the DMV filed a complaint against Tesla asserting that it had misleadingly advertised its vehicles as autonomous. DMV requests that Tesla's manufacturing license be suspended and that restitution be awarded to those who have suffered financial loss or damage. Also, the National Highway and Transportation Safety

Administration, the safety arm of the federal Department of Transportation, has an ongoing investigation into the performance of Tesla's advanced driver assistance features.

5) *Supporters*. Supporters point to recent surveys of car owners which show that many owners misunderstand the limitations of their driver assistance features. They believe that more consumer education is needed.

6) *Opposition*. Opponents are concerned that the bill offers a vague solution to an undefined problem without examining the sufficiency of the DMV's broad authority over advertising statements.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, cost pressure (Trial Court Trust Fund (TCTF)) in the upper hundreds of thousands of dollars to low hundreds of thousands of dollars in increased court workload, including possible trial costs given the bill expands an existing misdemeanor for misrepresenting facts related to an automobile transaction. Vehicle Code Section 11713 generally prohibits making untrue or misleading statements or advertisements related to vehicle sales or repairs. Based on case law interpretations of Vehicle Code Section 11713, violations may be subject to a six month misdemeanor. A defendant charged with a misdemeanor is entitled to a no cost legal representation and a jury trial. If 3 new misdemeanors are filed annually statewide and proceed to trial resulting in the use of two days of court time, at an estimated cost of approximately $8,000 for an eight-hour court day, the workload cost to the trial courts is $48,000 annually. Although courts are not funded on the basis of workload, increased pressure on the TCTF and staff workload may create a need for increased funding for courts from the General Fund to perform existing duties.

SUBJECT: California Employee Ownership Act

SOURCE: Ownership America
Project Equity
Worker-Owned Recovery California Coalition

DIGEST: This bill establishes the California Employee Ownership Hub (Hub) and a Hub Manager within the Office of Small Business Advocate (OSBA) at the Governor's Office of Business and Economic Development (GO-Biz) aimed at increasing awareness and understanding of employee ownership of businesses,

assisting business owners and employees in navigating available resources, and streamlining and reducing barriers to employee ownership.

Assembly Amendments make various conforming changes, including replacing the prior California Employee Ownership Program established by this bill and instead naming it the Hub, and striking various grant programs.

ANALYSIS:

Existing law:

1) Establishes GO-Biz within the Governor's Office for the purpose of serving as the lead state agency for economic strategy and marketing of California on issues relating to business development, private sector investment, and economic growth. (Government Code (GOV) §§ 12096-12098.5)

2) Establishes OSBA within GO-Biz and outlines the duties and functions of the Director of OSBA including representing the views and interests of small businesses before other state agencies whose policies and activities may affect small businesses. (GOV §§ 12098-12098.9)

This bill:

1) Requires, upon appropriation by the Legislature, OSBA to establish the Hub, administered by a Hub Manager, tasked with various responsibilities including: working with all California state agencies whose regulations and programs affect employee-owned companies, and businesses with the potential to become employee-owned, to enhance opportunities and reduce barriers; partnering with organizations to educate business owners and employees about the benefits of employee ownership and employee ownership transition succession models; sharing materials regarding employee ownership benefits and employee ownership transition succession models; providing a referral service to help forge connections to ownership resources and services to assist in employee ownership transitions and the growth of employee-owned businesses; working with the California Infrastructure and Economic Development Bank, the California Pollution Control Financing Authority, and related entities to develop recommendations and enhance the ability of broad-based employee ownership vehicles to access California capital programs; and reporting to the Legislature on activities undertaken and recommendations for improvement, according to specified information.

2) Defines various terms for purposes of the Hub and the Hub's work.

3) Makes findings and declarations about the age of current California's small business owners interested in retiring and the impact on employees that can have if businesses are not able to be taken over by family; highlighting the benefit of employees becoming business owners; outlining the importance of Employee Stock Ownership Plans (ESOPs) being structured to provide employees with a fair valuation of their ownership stake with an independent trustee as a best practice for the transaction; noting the role the state can play in raising awareness of all forms of broad-based employee ownership, increasing access to capital for employee-owned enterprises, encouraging best practices, and ensuring that workers who are most burdened by income and wealth inequality and the racial wealth gap gain access to wealth, quality jobs, and workplace voice through employee ownership.

Background

Currently, GO-Biz administers the following programs and units:

- "Made In California" program for the purpose of encouraging consumer product awareness and to foster the purchases of products manufactured in California.

- The California Inclusive Innovation Hub Program (iHub2) to incubate and/or accelerate technology and science-based firms, with a focus on underserved regions and communities.

- The California Competes Tax Credit Program under which "businesses who want to come to California or stay and grow in California" can receive an income tax credit.

- The California Business Investment Services Unit, which provides no-fee, tailored site selection services to employers and others who may be considering California for relocation or expansion.

- The California Business Portal, which provides information to California businesses about common questions, permitting, financial options, and more.

- The California Community Reinvestment Grants Program, which was included in Proposition 64, authorized GO-Biz to award grants to local health departments and certain nonprofit organizations to support communities disproportionately affected by the War on Drugs.

- Office of the Small Business Advocate which provides information and assistance to small businesses.

- The Zero Emission Vehicles (ZEV) Infrastructure Unit which works to accelerate the deployment of ZEV infrastructure.

- The International Affairs and Business Development Unit, which serves as California's primary point of contact for expanding international trade and investment relations. This unit focuses on foreign direct investment (services for foreign investors, foreign investment technical assistance, and the EB-5 Investor Visa Program), international trade promotion (STEP program, trade missions, export assistance, and the California-China Trade Office), and international agreements.

Since its inception, GO-Biz has served thousands of businesses, 95 percent of which are small businesses. The most frequent types of assistance include help with permit streamlining, starting a business, relocation and expansion of businesses, and regulatory challenges. In addition to economic development programs, GO-Biz is responsible for specialized assistance to small businesses through the OSBA. OSBA directly serves the small business community through hosting summits, forums, and interagency meetings; maintaining resources for technical assistance, financing, and state procurement; holding webinars, and other outreach methods. OSBA coordinates several small business grant programs, including the California Dream Fund, a one-time $35 million grant program to seed entrepreneurship and small business creation via microgrants in the State of California. During the COVID-19 pandemic, OSBA has coordinated California Microbusiness ($2,500) and Small Business ($5,000 - $25,000) COVID-19 Relief Grants. These grants have been used to help support California's nonprofit and cultural and arts programs recover from the impacts of the pandemic. OSBA also coordinates several small business loan programs, including the California Rebuilding Fund, the Loan Guarantee Program, Disaster Relief Loan Guarantee Program, and the California Capital Access Program.

Employee Stock Ownership Plans (ESOPs). An employee-owned company is one where employees own part or all shares in a business. While the forms of employee ownership may be different (such as stock grants, worker cooperatives, and stock options), the goal is the same: to promote employee ownership in a business.

ESOPs are the most common form of employee ownership in the United States; they are more or less retirement plans within Employee-Owned Companies because they provide income to employees through the sale of their stock when they retire. In order for an ESOP to work, the company must first establish a trust

where it can make annual share contributions to qualifying employees. The company can then use the ESOP trust fund to purchase stock from the selling shareholder or leaving owner. The company can also use the ESOP trust to borrow money for funding a share, sale, or transfer. An owner who wants to transfer ownership will sell their shares to the ESOP trust fund; these shares go to qualified employees and are held safely in the trust. To earn these benefits, a qualified employee must become vested in the program by working in the company for a certain number of years. Qualified employees can only receive benefits when they have become partially or 100% vested.

In this way, ESOPs are a business succession plan for founders and owners because it is a way of transferring company stock to employees without requiring sale of the business to a third party. Not only that, but by ensuring a business succession plan, business owners ensure long-lasting jobs in communities, rather than layoffs when companies close or sell to another company. Additional benefits of ESOPs are: helping to motivate and retain employees to work in and for the company because of employee ownership in company stock; and encouraging employees to support everyone's success, given that when the company does well financially, everyone does well financially. However, setting up an ESOP can be expensive, with some estimates between $60,000 and hundreds of thousands of dollars, even back in 2015. (https://www.aegisfiduciary.com/how-much-does-setting-up-an-esop-cost/)

Other States and Cities. Other state and cities have embraced the use of ESOPs in their small business communities. Colorado, Massachusetts, Iowa, and other states all have offices or hubs to facilitate (at the very least) the passage of information regarding ESOPs to business owners. For instance, according to its website, the Colorado Employee Ownership Office "establishes a network of technical support and service providers for businesses considering employee ownership structures. The office brings together partners including employee-owned businesses, attorneys, lawmakers, financial and accounting professionals, rural leaders, and other employee ownership organizations."

As the author notes, local governments in California have also supported employee ownership, including Berkeley, Fremont, Long Beach, Los Angeles City and County, San Francisco, and Santa Clara - most with the support of Project Equity, a co-sponsor of this bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, implementation of the bill would have "ongoing General Fund costs, likely in the low hundreds of thousands of dollars annually, to create an office at GO-Biz."

ARGUMENTS IN SUPPORT: Generally, supporters write that employee ownership, in the forms of worker cooperatives (co-ops) and ESOPs are proven to benefit businesses, workers, and local economies. Supporters state that "Worker-owned firms see stronger overall business performance and resilience during economic downturns. Workers at these firms see greater wealth-building opportunities and increased job security compared to their counterparts at traditional businesses. Both evidence and experience suggest that employee ownership is a particularly powerful wealth-building opportunity for workers and communities of color; providing additional pathways for workers of color to become employee owners is an essential component of any strategy to address the racial wealth gap."

SUBJECT: Financial Institutions Law: annual report: overdraft

SOURCE: Author

DIGEST: This bill requires banks and credit unions subject to the examination authority of the Commissioner of Financial Protection and Innovation (commissioner) to report annually the revenue earned from overdraft fees, as specified, and requires the commissioner to publish that information in a publicly available report.

Assembly Amendments are clarifying and technical in nature.

ANALYSIS:

Existing law:

1) Includes the following, among others, in the definition of "licensee" under the Financial Institutions Law (Financial Code Section 185):

   a) A bank authorized by the commissioner to conduct business, as specified.

   b) A credit union authorized by the commissioner to conduct business, as specified.

2) Requires that a licensee under the Financial Institutions Law make and file with the commissioner a report in any form as the commissioner may prescribe and verified in any manner the commissioner prescribes, showing its financial condition and any other information as the commissioner may require. (Financial Code Section 453)

3) Provides for the examination of banks by the commissioner, as specified. (Article 1 of Chapter 5 of Division 1 of the Financial Code, commencing with Section 500 et seq.)

4) Authorizes the commissioner to examine a bank organized under the laws of this state, a bank organized under the laws of another state that maintains an office in this state, and a bank organized under the laws of another country that maintains an office in this state. (Financial Code Section 500)

5) Provides for the examination of credit unions by the commissioner, as specified. (Article 2 of Chapter 3 of Division 5 of the Financial Code, commencing with Section 14250 et seq.; Article 7 of Chapter 11 of Division 5 of the Financial Code, commencing with Section 16150 et seq.; and Article 7 of Chapter 12 of Division 5 of the Financial Code, commencing with Section 16700 et seq.)

This bill:

1) Defines "overdraft" as the processing of a debit transaction that exceeds a customer's account balance.

2) Requires a bank or credit union subject to the examination authority of the commissioner to report annually to the commissioner on the amount of revenue earned from fees paid by its customers related to overdraft and the percentage of overdraft revenue as a proportion of the net income of the bank or credit union.

3) Requires the commissioner of the Department of Financial Protection and Innovation (DFPI) to publish in a report the data required by 2) and makes the report available on DFPI's internet website.

Comments

1) *Purpose of this bill.* According to the author:

> Overdraft fees are disproportionately borne by consumers who are least able to afford these oppressive charges: workers with volatile incomes, parents of young children, and Millennials and Gen Z adults. These fees are also highly concentrated with less than 9% of consumer accounts paying 10 or more overdrafts per year, accounting for nearly 80% of all overdraft revenue generated by financial institutions.
>
> California policymakers and the public deserve more transparency about the overdraft practices at financial institutions under the state's oversight. This bill will provide better information about overdraft practices that will inform future policy efforts to reduce the burden of high fees on vulnerable consumers.

2) *Overdraft Fee*

Consumers incur an overdraft fee when they initiate a debit transaction (e.g., use a check or debit card to make a payment) that exceeds their account balance, assuming that the account provided by their depository institution offers overdraft clearing.[1] If the account does not offer overdraft clearing or if the depository institution decides to reject the payment, the consumer will often be charged a non-sufficient fund (NSF) fee. Overdraft and NSF fees charged by large banks are often around $35 per transaction.[2] Given that many overdrafted accounts are brought to positive within one week, overdraft is an expensive form of short-term credit.[3]

Overdraft and NSF fees have been a large source of fee revenue for banks since changes in federal law limiting debit card swipe fees were implemented in

---

[1] Overdraft clearing means the bank approves the payment even though the account balance would be negative upon settling the transaction.
[2] Several large banks have recently announced plans to reduce the size of these fees and how these fees are assessed, as discussed in a subsequent section of this analysis.
[3] Research from the Consumer Financial Protection Bureau finds that more than half of overdrafted accounts become positive within three days and 76 percent within one week. See: https://files.consumerfinance.gov/f/201407_cfpb_report_data-point_overdrafts.pdf

2011.[4] The federal government estimates that the overall market revenue from overdraft and NSF fees was $15.47 billion in 2019.[5] These fees make up approximately two-thirds of fee revenue earned on transaction accounts, followed by monthly maintenance fees and ATM fees accounting for the remaining one-third of such revenues. Many consumers enjoy "free" checking accounts because financial institutions recover their costs and generate profits from providing transaction accounts due to the lucrative revenue that flows from overdraft-related fees.

3) *Who Pays Overdraft Fees?*

Most overdraft fees are paid by a small proportion of accountholders. The Consumer Financial Protection Bureau (CFPB) estimates that eight percent of customers incur nearly 75% of all overdraft fees industrywide, and these "frequent overdrafters"[6] paid an average of $380 in overdraft fees annually. Rather than fees that are spread out across a broad swath of accountholders, overdraft fee revenues are heavily concentrated among a small group of high-frequency users.

According to research conducted by Morning Consult, consumers who overdraft are disproportionately millennials, parents and those experiencing income volatility.[7] Nearly half of overdrafters – 47 percent – are parents with children under the age of 18, though this group comprises only 27 percent of the adult population. Younger generations are also more likely to overdraft than older ones, likely due to higher income volatility and a lack of a wealth cushion to smooth out drops in income. By race and ethnicity, Black and Latino consumers are overrepresented in the overdraft population compared to other groups, likely driven by several factors, including the racial wealth gap, the younger age distribution of Black and Latino populations, and differences in income volatility across race and ethnicity.

From an income perspective, the volatility of one's income (i.e., how much income varies from month to month) is a far stronger predictor of whether someone will overdraft than their absolute level of income (i.e., how much income one earns in a year). Consumers earning less than $50,000 per year are only slightly more represented among the population that overdrafts, but

---

[4] The federal government exempted financial institutions with assets of less than $10 billion from the cap on swipe fees, meaning that small banks and credit unions that issue debit cards can earn higher transaction-related fees when their customers use debit cards to pay for goods and services than larger banks and credit unions.
[5] https://files.consumerfinance.gov/f/documents/cfpb_overdraft-call_report_2021-12.pdf
[6] Defined as a person that incurs more than ten overdraft fees in a year.
[7] https://morningconsult.com/2022/01/11/overdrafted-underbanked-and-looking-for-new-providers/

consumers who report that their income this month was either lower than or higher than the previous month, rather than steady, are far more likely to overdraft their accounts. The relatively proportional representation of low- to moderate-income earners in the overdraft population is partially explained by the fact that this segment of consumers is more likely than people making over $50,000 to be unbanked and, therefore, unable to overdraft in the first place, but it appears that income volatility presents greater challenges to managing account balances than income level alone.

4) *Overdraft Fees Contribute to Some People Being Unbanked*

Many people who do not currently have a bank account (often referred to as "unbanked") have previously owned an account. According to the Federal Deposit Insurance Corporation (FDIC), half of unbanked households reported having previously owned a bank account in a 2019 survey.[8] This means that there are approximately 3.5 million households nationwide where people once had a bank account, but no longer do. Of these unbanked households that were previously banked, 68% reported being uninterested in ever owning a bank account again.

How do overdraft fees affect a person's desire and ability to have a bank account? One explanation is that overdraft fees negatively affect a person's perception of the value of a bank account. The size of fees and frequency that banks and credit unions assess fees can affect a person's perception of the fairness and transparency of the banking system. The CFPB conducted in-depth interviews with a sample of consumers who experienced overdraft fees.[9] The following quotes from interviewees reflect their attitudes about overdraft and the risk of having a bank account:

- "$35 is a lot of money for a person that doesn't have any."
- "If you are overdrafting, the risk is that you are going to end up with your whole entire deposit being eaten up by overdraft fees."
- "I got tired of my checks being gone before I can spend them."

In addition to affecting attitudes about owning a bank account, overdrafts can effectively disqualify a person from having a bank account at all. If a consumer fails to get their account back to a positive balance, their financial institution can close the account. Many banks and credit unions report account closures to

[8] https://www.fdic.gov/analysis/household-survey/2019report.pdf
[9] https://files.consumerfinance.gov/f/documents/cfpb_consumer-voices-on-overdraft-programs_report_112017.pdf

specialty credit bureaus, like Early Warning Services, that create screening reports on consumers that can be used to deny access to opening accounts. If a consumer has a history of account closures, she may have difficulty finding a financial institution that will provide her an account.

5) *Banks Beginning to Re-Think Overdraft and NSF Fee Policies*

A growing number of large banks have recently announced their plans to reduce the frequency of charging overdraft fees, and some have also committed to significantly reducing the fee that is charged for each overdraft or NSF fee.[10] New leadership at the Consumer Financial Protection Bureau and the Office of the Comptroller of the Currency (the federal regulatory agency that supervises national banks) have publicly commented on their dissatisfaction with the ways banks have assessed overdraft charges and have indicated that their respective regulatory agencies will take action.[11] Likely due to regulatory pressure as well as competitive pressure from fintech companies, several banks have taken significant steps to reform their overdraft policies, for example:

- Bank of America announced that it would cut its overdraft fee from $35 to $10, eliminate NSF fees, and prevent customers from overdrawing their accounts at ATMs and incurring related fees.

- Citi, Ally Financial, and Capital One announced that they would eliminate overdraft and NSF fees altogether, though notably, these banks earn proportionately less overdraft revenue than Bank of America, JP Morgan Chase, and Wells Fargo.

- JP Morgan and Wells Fargo, each of whom earned more than $1 billion in overdraft revenue in 2021, have announced more modest changes to overdraft policies, such as extending grace periods by 24 hours.

6) *What about Smaller Banks and Credit Unions?*

Many small banks and credit unions also charge overdraft and NSF fees, and some smaller institutions are so reliant on these fees that 50% or more of their profits are attributable to overdraft revenue. The Brookings Institute published a report last year that called attention to several of these "overdraft giants," and the report also notes that the public (and possibly even regulators) do not know how many small depository institutions are heavily reliant on revenue from overdraft fees. The report states:

---

[10] https://www.cnet.com/personal-finance/banking/these-8-banks-have-eliminated-or-reduced-overdraft-fees/
[11] https://www.natlawreview.com/article/renewed-regulatory-focus-overdraft-practices

> The smallest banks (those with assets totaling less than $1 billion) and most credit unions are not required to report their overdraft fee revenue at all. Researchers and consumer advocates have no idea how reliant they are on overdrafts. Unless bank regulators are asking these questions, the regulators may not know themselves. Regulators need to collect and publicize overdraft data for all banks and credit unions regardless of size.[12]

This bill addresses the oversight gap noted in the Brookings Institute report and will provide legislators, the DFPI, and the public with better information about the overdraft practices of banks and credit unions that are subject to the DFPI's examination authority. The information provided by this reporting requirement may be helpful in considering polices that the state could implement to reduce the burden of overdraft fees on vulnerable consumers.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, cost for this bill are minor and absorbable to DFPI.

SUPPORT: (Verified 8/25/22)

California Low-Income Consumer Coalition
Californians for Economic Justice
Center for Responsible Lending
Consumer Federation of California

OPPOSITION: (Verified 8/25/22)

None received

ARGUMENTS IN SUPPORT: A coalition of consumer protection organizations writes in support:

> Overdraft Fees, and non-sufficient funds (NSF) fees, tend to disproportionately burden those individuals who can least afford them, people with little or no money left in their accounts. These individuals may just be scrapping by on unstable gig workers incomes, they may have multiple mouths to feed at home, or may have lost their jobs completely as a result of the pandemic. While these fees may seem relatively small for some individuals, around $35 per transaction, they can become a real burden for those with no other funds. This is especially harmful given the fact that the same individuals often incur

[12] https://www.brookings.edu/opinions/a-few-small-banks-have-become-overdraft-giants/

multiple of these charges a year. $35 per transaction can quickly balloon to $350 dollars after ten charges on one's card, an unsustainable amount for these already struggling consumers…

SB 1415 will ensure that state leaders and the public are fully aware of the prevalence and size of these fees at [small banks and credit unions]. … State regulators can then use this information to help inform future policies in this area, helping ensure that consumers are not unjustly burdened by these fees for the sake of increased profits.

SUBJECT: State Board of Chiropractic Examiners

SOURCE: Author

DIGEST: This bill extends the date for policy committee review of the State Board of Chiropractic Examiners (BCE) by four years, until January 1, 2027, renews the requirement that the BCE report on its fee structure, adjusts various fees, updates the information required to be collected for the registry of licensees created by the BCE, and removes exemptions for licensees to disclose probationary status to patients, as specified.

Assembly Amendments ensure BCE is fiscally solvent by adjusting the fee structure and providing necessary revenue.

ANALYSIS:

Existing law:

1) Establishes the Chiropractic Act, enacted by an initiative measure, which establishes the BCE within the Department of Consumer Affairs (DCA) for the licensing and regulation of chiropractors. (Business and Professions Code (BPC) § 1000)

2) Requires the BCE to be reviewed as if it "were scheduled to be repealed on January 1, 2023." (BPC § 1000 (c))

3) Requires the BCE to compile, publish, and sell "a complete directory of all persons within the state who hold unforfeited and unrevoked certificates to practice chiropractic, and whose certificate in any manner authorizes the treatment of human beings for diseases, injuries, deformities, or any other physical or mental conditions." This directory must contain the following information concerning each licensee:

   a) Name, address, education, and certification information, as specified
   b) The annual report of the board for the prior year.
   c) Information relating to other laws of this state and the United States which the board determines to be of interest to persons licensed to practice chiropractic.
   d) Copies of opinions of the Attorney General relating to the practice of chiropractic.
   e) A copy of the provisions of this chapter and a copy of the act cited in BPC § 1000.

   Each licensee must notify the BCE immediately of each and every change of residence. (BPC § 1001)

4) Sets the amount of regulatory fees necessary to carry out the responsibilities required by the Chiropractic Initiative Act and this chapter are fixed in a specified schedule. (BPC § 1006.5)

5) Requires a chiropractic licensee, while on probation pursuant to a probationary order made on and after July 1, 2019, to provide to a patient or the patient's guardian or health care surrogate before the patient's first visit following the probationary order a separate disclosure that includes "the licensee's probation

status, the length of the probation, the probation end date, all practice restrictions placed on the licensee by the board, the board's telephone number, and an explanation of how the patient can find further information on the licensee's probation on the licensee's profile page on the board's online license information Internet Web site." A licensee is exempt from providing this disclosure if any of the following applies:

a) The patient is unconscious or otherwise unable to comprehend the disclosure and sign the copy of the disclosure pursuant to subdivision (b) and a guardian or health care surrogate is unavailable to comprehend the disclosure and sign the copy.
b) The visit occurs in an emergency room or an urgent care facility or the visit is unscheduled, including consultations in inpatient facilities.
c) The licensee who will be treating the patient during the visit is not known to the patient until immediately prior to the start of the visit.
d) The licensee does not have a direct treatment relationship with the patient. (BPC § 1007)

This bill:

1) Requires the BCE to be subject to policy committee review by January 1, 2027.

2) Requires the BCE directory of licensees to include the telephone numbers and emails of licensees, and requires a licensee to report immediately any change in residence or contact information, as specified.

3) Lowers and increases various BCE licensing and disciplinary fees, and allows the BCE to set lower fees in regulation.

4) Requires the BCE to provide an update on the status of the Board's license fee structure and whether the board needs to consider plans for restructuring its license fees by January 1, 2027.

5) Removes certain exemptions for licensees to disclose probationary status to patients. Specifically, licensees on probation pursuant to a probationary order from the Board will no longer be exempt from providing disclosures to patients regarding the licensee's probationary status in the following conditions:

a) The visit occurs in an urgent care facility or the visit is unscheduled, including consultations in inpatient facilities.

b) The licensee who will be treating the patient during the visit is not known to the patient until immediately prior to the start of the visit.

Background

Oversight Hearings and Sunset Review of Licensing Boards and Programs. In early 2022, the Senate Business, Professions and Economic Development Committee and the Assembly Committee on Business and Professions (Committees) began their comprehensive sunset review oversight of 10 regulatory entities including the BCE. The Committees conducted three oversight hearings in March of this year. This bill and the accompanying sunset bills are intended to implement legislative changes as recommended by staff of the Committees and which are reflected in the Background Papers prepared by Committee staff for each agency and program reviewed this year. The BCE was last reviewed as part of the sunset review program in 2017, and received a four-year extension at that time. Due to the constraints of the COVID-19 pandemic on legislative business, the legislature extended the BCE's sunset date, by one year, in order to allow for a comprehensive review.

Background of the State Board of Chiropractic Examiners (BCE). The BCE (or "the Board") was created on December 21, 1922, through an initiative measure approved by the electors of California on November 7, 1922. BCE regulates the chiropractic profession in California, with its primary mission being that of consumer safety. BCE provides licensure for chiropractic professionals and businesses, and establishes continuing education requirements for licensees. In addition, the BCE proposes regulations, policies, and standards to ensure compliance with chiropractic laws and regulations. The Board protects Californians from both licensed and unlicensed individuals who engage in the fraudulent, negligent, or incompetent practice of chiropractic. BCE oversees approximately 12,500 licensees from 18 chiropractic schools and colleges located throughout the United States and one in Canada. The BCE was last reviewed in 2017.

Review of the BCE. The following are some of the issues pertaining to the BCE that were raised during the sunset review process along with background information concerning these particular issues.

a) *Issue 14: Legislative Oversight Review Extension for the BCE. Background.* The BCE is currently set to be reviewed as if it were scheduled to be repealed on January 1, 2023. The Committees conducted an oversight hearing of the BCE in March of 2022.

Recommendation and Proposed Statutory Change. The Committees recommended extension of the BCE oversight review date. Accordingly, this bill will require the BCE to be subject to policy committee review by January 1, 2027.

b) *Issue 4: Licensing and Regulatory Fee Restructuring.*

Background. The BCE budget is funded exclusively by the profession through licensing and other regulatory fees. The BCE's current budget is currently imbalanced, as operating costs are exceeding annual revenue and according to the BCE"s budget projections is at risk of insolvency in FY 2023/24. The BCE contracted with Matrix Consulting Group to complete a fee audit study in 2021 and found that the BCE is under-recovering costs by approximately $1.4 million. The BCE reports that it is working with the DCA's Budget Office to develop a final proposed fee schedule that will equitably distribute BCE's operational costs between applicants, licensees, and Continuing Education providers based on their utilization of BCE's services and provide long-term stability for BCE's fund. The BCE states that it will review and vote on the final fee proposal during its May 20th, 2022 meeting.

Recommendation and Proposed Statutory Change. The Committees requested an update from the BCE on proposed increases to licensing and regulatory fees. The Committees requested the BCE to work with the DCA to assess proposed changes to licensing and regulatory fee restructuring.

c) *Issue 11: Probationary Status Disclosures.*

Background. BPC § 1007 requires licensees placed on probation on or after July 1, 2019, to provide a separate disclosure regarding the licensee's probation status and to obtain a signed copy of that disclosure from the patient, or the patient's guardian or health care surrogate, except under the following conditions:

- The patient is unconscious or otherwise unable to comprehend the disclosure and sign the copy of the disclosure and a guardian or health care surrogate is unavailable to comprehend the disclosure and sign the copy.
- The visit occurs in an emergency room or an urgent care facility or the visit is unscheduled, including consultations in inpatient facilities.
- The licensee who will be treating the patient during the visit is not known to the patient until immediately prior to the start of the visit.

- The licensee does not have a direct treatment relationship with the patient.

BCE's Enforcement Unit conducts intake interview sessions with each licensee placed on probation to ensure they understand and will comply with the terms and conditions of their probation. Since this notification requirement became effective, BCE staff report consistent questions from probationers related to the exemptions for "unscheduled visits" and when "the licensee is not known to the patient until immediately prior to the start of the visit," presumably in an attempt to find an avenue to circumvent this important patient notification requirement. These two scenarios – unplanned visits and an unknown licensee providing treatment – illustrate situations where it is important that patients be informed of the licensee's probationary status by the licensee, as the patients may not have had the opportunity to independently research the licensee's background using BCE's license search system prior to the visit.

Removing these two exemptions from BPC § 1007, subdivision (c), will further protect the health, welfare, and safety of California chiropractic patients by ensuring they are properly notified of a licensee's probationary status and can make informed decisions prior to receiving chiropractic care.

Recommendation and Proposed Statutory Change. The Background Paper recommended removal of the specified exemptions from BPC § 1007, subdivision (c), regarding disclosures of probationary status to patients for unscheduled visits and when the licensee is not known to the patient until immediately prior to the start of the visit. The Committees requested the BCE to discuss any additional measures to improve transparency to patients regarding licensees' probationary status.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, "The fees added in this bill will provide the Board a $500,000 increase in annual revenue and the ability to generate up to $1.9 million in additional revenue by raising the license renewal fee by regulation. The proposed fees will align the Board's current services with actual cost, provide enough money to pay back the loan to the Bureau of Automotive and Repair and build a reserve."

SUPPORT: (Verified 8/22/22)

Board of Chiropractic Examiners

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: The Board of Chiropractic Examiners writes in support and notes that "As a special fund entity, the Board's annual budget is funded exclusively by the chiropractic profession through licensing and regulatory fees. The Board's current fee levels were based on 2017 cost assumptions and did not account for future growth, repayment of an outstanding interagency loan, or the unanticipated and substantial rate increase for legal services provided by the Attorney General's Office for the Board's disciplinary cases. As a result, the Board's increasing operating and enforcement costs continue to outpace the annual revenue received through its fees and without an increase in revenue, the Board's fund is projected to become insolvent by fiscal year 2023-24.

In 2021, the Board contracted with a consulting firm to conduct a fee analysis and develop recommended fee levels based on the Board's actual workload and expenditures, while also accounting for future growth and other factors not considered in 2017. The conclusion of this study was the Board is under-recovering its costs by approximately $1.4 million per year.

The inclusion of an updated fee schedule in this bill realigns the Board's fees with the actual costs associated with providing specific services, equitably distributes the Board's operational costs between applicants, licensees, and continuing education providers based on their utilization of the Board's services, and provides long-term stability for the Board's fund.

This bill also strengthens consumer protection by ensuring chiropractic patients in California are properly notified of a licensee's probationary status and can make informed decisions prior to receiving care.

Under current law, licensees placed on probation by the Board on or after July 1, 2019, must notify their patients of their probationary status and obtain a signed copy of that disclosure before the patient's first visit. However, this requirement does not apply to "unscheduled visits" or circumstances where "the licensee is not known to the patient until immediately prior to the start of the visit."

The Board finds this troubling, as these two scenarios – unplanned visits and/or an unknown licensee providing treatment – illustrate situations where it is imperative that patients be informed of the licensee's probationary status directly by the licensee, as they may not have had the opportunity to utilize the Board's license search system to independently research the licensee's background on their own

prior to the visit. This bill would remove these two problematic exemptions and significantly enhance this important patient notification requirement."

ASSEMBLY FLOOR: 76-0, 8/22/22 - See last page for vote

SUBJECT: Respiratory therapy

SOURCE: Author

DIGEST: This bill extends until January 1, 2027, the provisions establishing the Respiratory Care Board (Board), revises mandatory reporting requirements, and permits licensed vocational nurses (LVNs) to perform specified respiratory care services.

Assembly Amendments make conforming changes related to LNVs providing specified services including specifying those that do not require a respiratory assessment and only require manual, technical skills, or data collection.

ANALYSIS:

1) Establishes the Respiratory Care Board of California (Board) to administer and enforce the Respiratory Care Practice Act (Act) until January 1, 2023. (Business and Professions Code (BPC) §§ 3700 and 3710)

2) Defines "respiratory care" as a health care profession performed under the supervision of a medical director in the therapy, management, rehabilitation, diagnostic evaluation, and care of patients with deficiencies and abnormalities which affect the pulmonary system and associated aspects of cardiopulmonary and other systems functions. (BPC § 3702)

3) Specifies activities that are not prohibited by the Respiratory Care Act including:

    a) The performance of respiratory care that is an integral part of the program of study by students enrolled in approved respiratory therapy training programs;

    b) Self-care by the patient or the gratuitous care by a friend or member of the family who does not represent or hold himself or herself out to be a respiratory care practitioner;

    c) The respiratory care practitioner from performing advances in the art and techniques of respiratory care learned through formal or specialized training;

    d) The performance of respiratory care in an emergency situation by paramedical personnel who have been formally trained in these modalities and are duly licensed;

    e) Respiratory care services in case of an emergency; "emergency" includes an epidemic or public disaster;

    f) Persons from engaging in cardiopulmonary research;

    g) Formally trained licensees and staff of child day care facilities from administering to a child inhaled medication; and

    f) The performance by a person employed by a home medical device retail facility or by a home health agency licensed by the State Department of

Health Services of specific, limited, and basic respiratory care or respiratory care related services that have been authorized by the Board. (BPC § 3765)

4) Requires any employer of a Respiratory Care Practitioner (RCP) to report to the Board the suspension or termination for cause. (BPC § 3758 (a))

This bill:

1) Extends the sunset date of the Board until January 1, 2027.

2) Adds leave and resignation to the list of mandated reporting requirements for a RCP employer. Defines "leave, resignation, suspension, or termination for cause" any administrative leave, employee leave, resignation, suspension, or termination from employment for any of the following reasons:

   a) Suspected or actual use of controlled substances or alcohol to such an extent that it impairs the ability to safely practice respiratory care.

   b) Suspected or actual unlawful sale of controlled substances or other prescription items.

   c) Suspected or actual patient neglect, physical harm to a patient, or sexual contact with a patient.

   d) Suspected or actual falsification of medical records.

   e) Suspected or actual gross incompetence or negligence.

   f) Suspected or actual theft from patients, other employees, or the employer.

3) Requires an owner, director, partner, or manager of a registry or agency that places one or more RCPs to report to the Board if either of the following apply:

   a) The owner, director, partner, or manager is aware that a RCP is no longer employed at the facility they were placed at by the registry or agency for any behavior outlined in 2); or

   b) The owner, director, partner, or manager is asked to place the RCP on a "do not call" list or other status indicating the facility does not want that practitioner placed at their facility for any behavior outlined in 2).

4) Allows LVNs who have received training satisfactory to their employer, and when directed by a physician and surgeon, to perform basic respiratory tasks and services that do not require a respiratory assessment and only require manual, technical skills, or data collection.

5) Allows LVNs employed by a home health agency to perform respiratory tasks and services identified by the Board, if the LVN complies with the following:

   a) Before January 1, 2025, the licensed vocational nurse has completed patient-specific training satisfactory to their employer

   b) On or after January 1, 2025, the licensed vocational nurse has completed patient-specific training by the employer in accordance with guidelines that shall be promulgated by the board no later than January 1, 2025, in collaboration with the Board of Vocational Nursing and Psychiatric Technicians of the State of California.

Background

In early 2022, the Senate Business, Professions and Economic Development Committee and the Assembly Committee on Business and Professions (Committees) began their comprehensive sunset review oversight of 10 regulatory entities including the Board. The Committees conducted three oversight hearings in March of this year. This bill and the accompanying sunset bills are intended to implement legislative changes as recommended by staff of the Committees and which are reflected in the Background Papers prepared by Committee staff for each agency and program reviewed this year.

RCPs were established in 1982 and were originally licensed by Respiratory Care Examining Committee and has since become the Board. The Board is within the DCA. The Board is tasked with oversight of all RCPs including initial licensure, renewal, and discipline for violations of the Respiratory Care Practice Act.

RCPs work bedside with patients and under the director of a medical director and specialize in providing evaluation of, and treatment to, patients with breathing difficulties as a result of heart, lung, and other disorders, as well as providing diagnostic, educational, and rehabilitation services. RCPs are utilized in virtually all health care settings. RCPs provide services to patients ranging from premature infants to older adults. RCPs provide treatments for patients who have breathing difficulties and care for those who are dependent upon life support and cannot breathe on their own. RCPs treat patients with acute and chronic diseases including

chronic obstructive pulmonary disease (COPD), trauma victims, and surgery patients. Common RCP patients include individuals suffering from:

- Asthma
- Bronchitis.
- Heart attack.
- Cystic fibrosis.
- Emphysema.
- Stroke.
- Lung cancer.
- Premature infants and infants with birth defects.
- High-risk influenza/COVID-19.

The following are some of the issues pertaining to the Board along with background information concerning the particular issue. Recommendations were made by Committee staff regarding the particular issue areas that needed to be addressed.

Issue 6: Mandatory Reporting Requirements. RCPs are not reported by facilities in instances where they were advised to resign instead of face termination. Facilities rightfully claim they do not have to report RCPs who were employed by registries. Instead, facilities using registry employees notify the registry that they do not want the employee assigned to their facility ever again. And while in most instances the registry is made aware of the reason the facility refuses assignments by certain RCPs, the registry (nor the facility) is obligated to inform the Board, even in those cases of serious violations as outlined in BPC Section 3758. As a result of this gap within mandatory reporting, RCPs are able to continue to work without discipline. This bill updates required reporting requirements for a RCP by including leave and resignation to the list of mandated reporting requirements for a RCP employer.

Issue 5: Ventilator Care. Dating back to May 1, 1996, LVNs and RCPs have struggled to determine the appropriate scope of practice for administering respiratory services such as managing patients. The Board contends LVNs should not be administering any ventilator services. The BVNPT issued guidance to licensees permitting LVNs to adjust ventilator settings and the Board has maintained this guidance to LVNs is a misinterpretation of the regulations. BVNPT has cited CCR 2518.5 for the basis of allowing LVNs to manage ventilator patients. CCR 2518.5 specifies LVNs can use and practice basic assessment, participate in planning, execute interventions in accordance with the care plan or treatment plan, and contribute to evaluation of individualized

interventions related to the care plan or treatment plan. An LVN may also administer medications. In a legal opinion from the Attorney General's office, a Deputy Attorney General wrote,

"*'Basic assessment or data collection' does not anticipate the independent assessment of breath sounds and is therefore outside [the] scope of practice of an LVN. Clearly respiratory care therapist[s] can interpret breath sounds in the scope of their practice under Business and Professions Code section 3702...." "While a respiratory care therapist and a physician can assess a patient's respiratory status and alter the ventilator setting, in my opinion, an LVN who does so acts outside their scope of practice"*

The Board has made numerous requests throughout the last 25 years to rescind the policy, but BVNPT has not revoked any policy regarding respiratory services and continues to take the position that LVNs should be able to adjust ventilators. Currently, LVNs are required to take 1,530 hours for including theory, clinical, and pharmacology. LVNs' required theory courses do not include respiratory care. RCPs must complete a respiratory care program approved by the Board. The respiratory care Board has the expertise to determine an acceptable program to ensure patient safety.

The two boards began to work collaboratively in 2019 and issued a joint statement clarifying RCP and LVN roles relating to patient care on mechanical ventilators. After feedback from various types of facilities and organizations, there was expressed desire to further clarify its respective regulations regarding patient care. The boards hosted a stakeholder meeting to further discuss the joint statement and concerns grew about expanding places LVNs can conduct ventilator services to home based settings as well. The July 2019 published agreement state that both boards agreed BPC 3702.7 provides that the education of health care professional about respiratory care, including clinical instruction and the operation or application of respiratory care equipment and application is within the respiratory care scope of practice and would require licensure as an RCP. The statement further laid out permissible functions an LVN cannot perform. The joint statement allowed clarity for licensees and providers. However, according to the Board, BVNPT backed out of the agreement and began exploring CE to train LVNs to perform ventilator services in more settings. Without the agreement, LVNs are not permitted to perform any respiratory services. The Board has asked the Legislature to step in and clarify what services a LVN may or may perform. As COVID-19 showed, quality respiratory services are vital for patients and access is imperative. As such, permitting LVNs to perform basic respiratory services while maintaining

appropriate training for LVNs is appropriate. As outlined above, the Board is most equipped to ensure training is appropriate while BVNPT maintains collaboration given their expertise in nursing duties and functions.

Issue 9: Impacts of the COVID-19 Pandemic. In March 2020, Governor Newsom issued an emergency proclamation allowing Departments to waive statutory requirements to help ease worker shortages and aid COVID-19 recovery efforts. Early on during the state of emergency, the Board identified statutory fixes that could help in this current state of emergency and future state of emergency. Current law is vague and states that the Act does not respiratory care services in the case of emergency. This language is vague and could be expanded and clarified to be more nimble for future emergencies.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee, this bill will result in costs of approximately $4.8 million annually and ongoing.

SUPPORT: (Verified 8/22/22)

California Society for Respiratory Care
Respiratory Care Board of California

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: The California Society for Respiratory Care writes in support of this bill: "Respiratory Care Practitioners (RCPs), also known as Respiratory Therapists, work with vulnerable patient populations, from infants to the elderly. RCPs have specialized training in cardiology and pulmonology. They work with patients in intensive care units, operating rooms, laboratories, outpatient clinics, sleep clinics, and home-health environments - even in helicopters transporting critically ill patients – managing the patient's airway. Most recently, RCPs work on the front lines battling COVID 19 for patients struggling to breathe."

SUBJECT: Physical Therapy Board of California

SOURCE: Author

DIGEST: This bill extends the sunset date of the Physical Therapy Board of California (PTBC) by four years from January 1, 2023, to January 1, 2027.

Assembly Amendments authorize a physician and surgeon or podiatrist to conduct either an in-person or telehealth patient examination and evaluation of the patient's condition in connection with their approval of the physical therapist's plan of care.

ANALYSIS:

Existing law:

1) Establishes the Physical Therapy Law, which provides for the licensing and regulation of physical therapy professionals by the PTBC, under the jurisdiction of the Department of Consumer Affairs (DCA) and sunsets the PTBC on January 1, 2023. (Business and Professions Code (BPC § 2600 et seq.)

2) Authorizes the PTBC to employ an Executive Officer (EO) and may also employ investigators, legal counsel, physical therapist consultants, and other assistance as it may deem necessary and sunsets that authority on January 1, 2023. (BPC § 2607.5)

3) States that protection of the public is the highest priority for the PTBC in exercising its licensing, regulatory, and disciplinary functions, as specified. (BPC § 2602.1)

This bill:

1) Extends the sunset date of the PTBC until January 1, 2027.

2) Authorizes a physician and surgeon or podiatrist to conduct either an in-person or telehealth patient examination and evaluation of the patient's condition in connection with their approval of the physical therapist's plan of care.

Background

Oversight Hearings and Sunset Review of Licensing Boards and Programs. In early 2022, the Senate Business, Professions and Economic Development Committee and the Assembly Committee on Business and Professions (Committees) began their comprehensive sunset review oversight of 10 regulatory entities including the Board. The Committees conducted three oversight hearings in March of this year. This bill and the accompanying sunset bills are intended to implement legislative changes as recommended by staff of the Committees and which are reflected in the Background Papers prepared by Committee staff for each agency and program reviewed this year.

PTBC. The purpose of the PTBC is to protect consumers from incompetent, unprofessional, and fraudulent practice through regulation of practitioners. The PTBC also establishes and clarifies state-specific process and practice standards through administrative rulemaking. The laws governing the practice of licensed PTs and PTAs and the administration of the PTBC are specified in statute in the

BPC Section 2600 et seq. and in California Code of Regulations (CCR) 16 Section 13.2. Currently, the Physical Therapy Act (Act) provides the duties of the PTBC defines the physical therapy scope of practice, and specifies the licensing requirements, fees, and penalties for violations of the Act, including unlicensed practice. The Act makes it unlawful to practice, offer to practice, physical therapy for compensation, or claim to be a physical therapist unless licensed by the PTBC. As of Fiscal Year (FY) 2020/2021, the PTBC regulates approximately 27,990 PTs and 7,833 PTAs.

Generally, PTs provide services to individuals and diverse populations, across the lifespan, to develop, maintain and restore movement to maximize functional ability. This includes circumstances where movement and function are impacted by aging, injury, diseases, disorders, conditions or environmental factors. PTs practice independently of other health care providers and also within interdisciplinary rehabilitation/habilitation programs, aiming to prevent movement disorders or maintain/restore optimal function and quality of life.

Review of PTBC. The following are some of the issues pertaining to the Board along with background information concerning the particular issue. Recommendations were made by Committee staff regarding the particular issue areas that needed to be addressed.

a) Issue 9: Impacts of the COVID-19 Pandemic

Background: An executive order in 2020 in response to the COVID-19 pandemic gave DCA the authority to waive any statutory or regulatory professional licensing relating to healing arts during the duration of the COVID-19 pandemic – including rules relating to examination, education, experience, and training. One of these waivers temporarily waived the requirement for a licensed physician and surgeon or podiatrist, as applicable, to conduct an in-person patient examination and evaluation, subject to the condition that the examination and evaluation must be performed via appropriate electronic means. This waiver terminated December 31, 2021.

Recommendation and Proposed Statutory Change. The Background Paper suggested that the PTBC should update the Committees on the impact to licensees and patients stemming from the pandemic. It also suggested the Board should discuss the impact of waivers on patient safety and note any statutory changes that are warranted as a result of the pandemic. As a result, the bill authorizes a physician and surgeon or podiatrist to conduct either an in-person or telehealth patient examination and evaluation of the

patient's condition in connection with their approval of the physical therapist's plan of care.

b) *Issue 11: Continuation of the PTBC*

Background: The welfare of consumers is best protected when there is a well-regulated physical therapy profession. Despite some of the issues impacting the PTBC, including but not limited to budget, staffing levels, COVID-19 clean-up, and enforcement timeline issues, the PTBC should be continued.

Recommendation and Proposed Statutory Change. The Background Paper suggested that physical therapists, physical therapist assistants, and unlicensed physical therapy aides should continue to be regulated by PTBC and PTBC should be reviewed again on a future date to be determined. As a result, this bill extends various sunset dates by four years.

Comments

Interested parties. The Animal Physical Therapy Coalition (APTC) writes that they support this bill if it is amended: "The issue of animal physical therapy (APT) by a PT with advanced training has been discussed and debated for nearly 15 years… APTC asks SB 1438 be amended to…authorize a California Licensed Physical Therapist with advanced certification in Animal Physical Therapy to provide animal physical rehabilitation under the degree of supervision to be determined by the veterinarian who has established a veterinarian-client-patient relationship, on a veterinary premises or an Animal Physical Rehabilitation premises, or a range setting."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee, the fiscal impact will be $7.3 million per year, ongoing, to support the continued operation of the PTBC's licensing and enforcement activities.

SUPPORT: (Verified 8/22/22)

California Physical Therapy Association
Physical Therapy Board of California

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: The California Physical Therapy Association says that PTBC does an excellent and efficient job regulating the profession and providing appropriate consumer protection in the state consistent with the defined statutory scheme and resources collected through licensing fees.

SUBJECT: Vehicular manslaughter: speeding and reckless driving

SOURCE: Author

DIGEST: This bill states that certain behavior can constitute gross negligence for wobbler vehicular manslaughter.

Assembly Amendments clarify that the definition of gross negligence shall be based on the totality of the circumstances.

ANALYSIS:

Existing law:

1) Provides that a person who drives a vehicle upon a highway at a speed greater than 100 miles per hour is guilty of infraction punishable, as follows:

   a) Upon a first conviction by a fine not to exceed $500, plus penalty assessments and the court may suspend the driver's license for up to 30 days.
   b) Upon a second conviction within three years of a prior offense, a fine not to exceed $750, plus penalty assessments, and the driver's license shall be suspended for six months.
   c) Upon a third conviction within five years, a fine of $1,000, plus penalty assessments, and the person's driver's license shall be suspended for one year.(VC §§ 22348 and 13355)

2) Provides that a person who drives a vehicle upon a highway in willful or wanton disregard for the safety of persons or property is guilty of reckless driving and a person who drives a vehicle in an offstreet parking facility, as defined in subdivision (c) of Section 12500, in willful or wanton disregard for the safety of persons or property is guilty of reckless driving. A person convicted of the offense of reckless driving shall be punished by a misdemeanor for not less than five days nor more than 90 days and/or by a fine of not less than $145 nor more than $1,000 plus penalty assessments. (VC §23103)

3) Provides engaging in a motor vehicle speed contest (VC 23109(a)), and provides for punishment of between 24 hours and 90 days imprisonment and/or a fine of between $355 and $1,000 and 40 hours of community service. A driver's license suspension of from 90 days to six months may also be ordered. (VC 23109(e)). The vehicle may be immediately impounded by a peace officer for up to 30 days (VC 23109.2(a)).

4) Prohibits engaging in a motor vehicle exhibition of speed (VC 23109(c)), and provides for punishment by imprisonment of up to 90 days and/or a fine of up to $500 (VC 23109(i)). The vehicle may be immediately impounded by a peace officer for up to 30 days (VC 23109.2(a)).

5) Defines murder as the unlawful killing of a human being, or a fetus, with malice aforethought. (Pen. Code § 187 (a).)

6) Defines malice for this purpose as either express or implied and defines those terms. (Pen. Code § 188.)

   a) It is express when there is manifested a deliberate intention unlawfully to take away the life of a fellow creature.
   b) It is implied, when no considerable provocation appears, or when the circumstances attending the killing show an abandoned and malignant heart.

7) Provides that when it is shown that the killing resulted from an act with express or implied malice, no other mental state need be shown to establish the mental state of malice aforethought. Neither an awareness of the obligation to act within the general body of laws regulating society nor acting despite such awareness is included within the definition of malice. (Pen. Code, § 188.)

8) Provides that manslaughter is the unlawful killing of a human being without malice and is divided into three kinds: voluntary, involuntary and vehicular. (Pen. Code § 192)

9) Provides that vehicular manslaughter is:

   a) Driving a vehicle in the commission of an unlawful act, not amounting to a felony and with gross negligee, or driving a vehicle in the commission of a lawful act which might produce death, in an unlawful manner, and with gross negligence. This is punishable by a wobbler with up to one year in county jail or state prison for two, four, or six years.
   b) Driving a vehicle in the commission of an unlawful act, not amounting to a felony, but with gross negligence; or driving a vehicle in the commission of a lawful act which might produce death, in an unlawful manner, but without gross negligence. This is punishable by imprisonment in the county jail by not more than one year.
   c) Driving a vehicle in connection with faking a vehicle accident or a vehicle accident was knowingly caused for financial gain and proximately resulted in the death of any person. This is punishable by imprisonment in the state prison for four, six or 10 years.
   d) This section shall not be construed as making any homicide in the driving of a vehicle punishable that is not the proximate result of the commission of an unlawful act, not amounting to a felony, or of the commission of a lawful act which might produce death in an unlawful manner. (Pen. Code §§ 192(c) and 193(c))

This bill provides that for the purposes of vehicular manslaughter, "gross negligence" may include but is not limited to any of the following:

1) Participating in a sideshow.
2) An exhibition of speed.
3) Speeding over 100 miles per hour.

Background

In the existing manslaughter section, it expressly states that "gross negligence" does not preclude a charge of murder upon facts exhibiting wantonness and a conscious disregard for life to support a finding of implied malice.

This bill further states that for purposes of this section "gross negligence" may include but is not limited to a number of vehicular violations. The finding of gross negligence could result in a conviction for wobbler vehicular manslaughter.

The included violations are:

1) "Participating in a sideshow."

2) An exhibition of speed.

Being convicted of speeding over 100 miles per hour. Is this always gross negligence?

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

> Costs (General Fund (GF)) possibly in the low millions of dollars in increased incarceration costs to the California Department of Corrections and Rehabilitation (CDCR). Vehicular manslaughter with gross negligence is an alternate felony-misdemeanor punishable either by imprisonment in county jail for not more than one year or by imprisonment in state prison for two, four, or six years. Vehicular manslaughter without gross negligence is a misdemeanor punishable by imprisonment in county jail for not more than one year. By expanding the definition of "gross negligence" to include sideshows, speed racing, and speeding over 100 miles an hour, this bill may result in more people being sentenced to state prison that might otherwise have only been sentenced to county jail. For example, speeding over 100 miles an hour resulting in death is not necessarily gross negligence. The average

annual cost to house an inmate in CDCR is approximately $104,000. If this bill results in five people being sentenced to a middle prison term of four years for actions that may have only resulted in a county jail sentence prior to the enactment of this bill, the cost to CDCR would be approximately $2 million.

SUPPORT: (Verified 8/23/22)

California Association of Highway Patrolmen
California Narcotic Officers' Association

Streets are For Everyone

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: The Conor Lynch Foundation supports this bill stating:

> We support SB 1472 which would curb dangerous driving activity and by raising match the penalties for the exhibition of speed, or participating in reckless driving activities including sideshows and street races.
>
> A "motor vehicle speed contest" includes engaging in a motor vehicle race against another vehicle, a clock, or other timing devices. However, many illegal street races stem from "motor vehicle exhibition of speed," which includes burning out tires, revving engines, circling, and other activity intended for an audience or "sideshow" that ultimately leads to a speed contest.
>
> According to the National Highway Traffic Safety Association (NHTSA), most fatal crashes are directly linked to this type of risky driving. While "motor vehicle exhibition of speed" is prohibited, violations do not result in the same penalties as those engaging in a speed contest. AB 3 matches

the penalties for the two dangerous activities and will allow intervention before a fatal or devastating crash occurs.

On October 1st, 2020, the California Highway Patrol launched the Communities Against Racing and Side Shows campaign. This campaign will focus on statewide public awareness campaigns on speed-related crashes and focused enforcement. As illegal street racing becomes a more prevalent problem statewide, the NHTSA has reported that this dangerous activity is often associated with other risky behavior including driving under the influence of drugs or alcohol and driving without a seatbelt.

SUBJECT: Commission on Teacher Credentialing: survey: teacher resignations

SOURCE: Author

DIGEST: This bill requires the Commission on Teacher Credentialing (CTC) and the California Department of Education (CDE) to develop, and local educational agencies (LEAs) to annually administer and report on, a survey of teachers exiting the profession.

Assembly Amendments include CDE in the development of the survey, encourage, rather than require, LEAs to administer the survey and report their results, and specify that the reporting requirement for the CTC and CDE is contingent on an appropriation for that purpose in the annual Budget Act.

ANALYSIS:

Existing law:

1) Establishes the minimum requirements for the preliminary multiple or single subject teaching credential and specialist teaching credential in special education for first time applicants for that credential who are not credentialed in another state, including all of the following:

    a) Completion of a baccalaureate or higher degree, except in professional education, from a regionally accredited college or university.

    b) Satisfaction of basic skills requirements, including passing the California Basic Educational Skills Test (CBEST), the California Subject Examinations for Teachers (CSET), appropriate subject matter examinations, completion of subject-matter course work from the CTC, or CTC-approved professional development.

    c) Completion of a course in the provisions and principles of the U.S. Constitution or pass an examination given by a regionally-accredited college or university.

    d) Completion of a CTC-approved teacher preparation program.

    e) A formal recommendation for the credential by the program sponsor.

2) Requires individuals who complete a professional teacher preparation program and receive a five-year preliminary credential to earn a clear credential by completing one of the following options:

    a) Complete a Commission-approved Teacher Induction Program and submit their application for the clear credential through the Induction program sponsor.

    b) Certification by the National Board of Professional Teaching Standards.

This bill:

1) Requires the CTC and CDE to develop a survey, with input from education stakeholders by July 1, 2023, for purposes of collecting data from teachers of LEAs resigning their positions or electing not to accept a teaching assignment for the upcoming school year, including data on whether or not they are exiting the profession.

2) Encourages LEAs, beginning with the 2023-24 school year, to administer the survey within 15 days of a teacher of the LEA resigning their position or electing not to accept a teaching assignment for the upcoming school year.

3) Encourages LEAs to report the results of the surveys to the CTC annually.

4) Requires the CTC to work with CDE to prepare an annual report that compiles the LEA data, submit the report to the CDE and the Legislature, and post the report on its internet website.

5) Specifies that the reporting requirement for the CTC and CDE is contingent on an appropriation for that purpose in the annual Budget Act or other statute.

Comments

1) *Need for the bill.* According to the author, "Prior to the onset of the pandemic, California has been experiencing a severe teacher shortage with significantly low numbers of educators entering the profession, and high numbers of educators leaving the profession.

   "California's supply of new, credentialed teachers plummeted by nearly 70 percent in the decade from 2001–02 to 2011–12 as the state's education budgets shrank. Today, the State Teachers' Retirement System also confirms the shortage of teachers by reporting a surge of an increase of more than 25 percent of retirements within the first half of 2020 than the previous year. The retirements, combined with a severe shortage in substitutes, led to an unprecedented shortage in teachers. Some schools have been closing as a result of these teaching positions not being filled. Schools are currently grappling with higher than normal teacher vacancies, leaving remaining teachers overworked.

   "Furthermore, on top of teacher vacancies, schools are experiencing food supply shortages, and are having trouble finding enough bus drivers, janitors, and other support staff. The administration and data collection on why teachers are leaving the profession will only help further prepare the needs of future students and educators."

2) *Learning Policy Institute (LPI) report.* The LPI's 2016 report, "Addressing California's Emerging Teacher Shortage: An Analysis of Sources and Solutions" included the following summary: "After many years of teacher layoffs in California, school districts around the state are hiring again. With the influx of new K-12 funding, districts are looking to lower student-teacher ratios and reinstate classes and programs that were reduced or eliminated during the Great Recession. However, mounting evidence indicates that teacher supply

has not kept pace with the increased demand." The report included the following findings:

a) Enrollment in educator preparation programs has dropped by more than 70 percent over the last decade.

b) In 2014-15, provisional and short-term permits nearly tripled from the number issued two years earlier, growing from about 850 to more than 2,400.

c) The number of teachers hired on substandard permits and credentials nearly doubled in the last two years, to more than 7,700 comprising a third of all the new credentials issued in 2014-15.

d) Estimated teacher hires for the 2015-16 school year increased by 25 percent from the previous year while enrollment in the University of California and the California State University teacher education programs increased by only about 3.8 percent.

The Learning Policy Institute (LPI) report offered several policy recommendations for consideration, including the creation of more innovative pipelines into teaching.

3) *Legislative Analyst Office (LAO) assessment.* As part of the Proposition 98 Education Analysis for the 2016-17 Governor's Budget released in February 2016, the LAO included a section on teacher workforce trends in which it examined evidence for teacher shortages in specific areas, identified and assessed past policy responses to these shortages, and raised issues for the Legislature to consider going forward in terms of new policy responses. In the report, the LAO indicated that the statewide teacher market will help alleviate existing shortages over time and that the shortages may decrease without direct state action. However, the LAO noted there are perennial staffing difficulties in specific areas, such as special education, math, and science, for which they encouraged the Legislature to address with narrowly tailored policies rather than with broad statewide policies.

4) *The California School Staff Survey.* The California School Climate, Health, and Learning Surveys (Cal-SCHLS) system is the most comprehensive effort in the nation to regularly assess students, staff, and parents at the local level to provide key data on school climate and safety, learning supports and barriers, and stakeholder engagement, as well as youth development, health, and well-being. The Cal-SCHLS system is a collection of three surveys—the California School

Staff Survey (CSSS), the California Healthy Kids Survey (CHKS), and the California School Parent Survey (CSPS).

The CSSS was developed for CDE by WestEd in 2004, to fulfill the requirement in the No Child Left Behind Act of 2001, Title IV, that schools conduct an anonymous teacher survey related to student drug use and violence. Recognizing the opportunity this requirement presented, CDE expanded the content to collect other data to guide school improvement efforts and to meet LCAP state priorities. Schools can also add questions of their own choosing to meet other local data needs. Because the results are anonymous and confidential, the survey provides staff with an opportunity to honestly communicate their perceptions about the school.

Schools are provided with detailed survey planning and administration instructions. CDE guidelines call for the CSSS to be administered online at the same time as the CHKS, among all staff in grades 5 and above. Staff participation is totally voluntary, anonymous, and confidential.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Assembly Appropriations Committee:

1) Ongoing special fund costs to CTC of about $160,000 annually, and additional one-time special fund costs of $160,000 in the first year to comply with this measure.

2) Ongoing General Fund costs to CDE of about $150,000 annually, and additional one-time General Fund costs of $50,000 in the first two years to comply with this measure.

SUBJECT: Local Government Omnibus Act of 2022

SOURCE: Author

DIGEST: This bill makes several minor changes to state laws governing local governments' powers and duties.

Assembly Amendments make additional minor changes.

ANALYSIS: This bill, the "Local Government Omnibus Act of 2022," makes the following changes to the state laws affecting local agencies' powers and duties:

1) *County recorder survey maps*. County recorders accept and officially record legal documents, notices, or papers, including survey maps for various purposes. State law requires that a record of survey filed with a county recorder must be securely fastened into a suitable book provided for that purpose. The County Recorders Association of California notes that this requirement does not conform to modern best practices for storing recorded maps. SB 1489 removes the requirement for recorded maps to be stored in physical books and allows a county recorder to store recorded maps in any manner that assures the maps will be kept safe, reproducible, and together. [See SEC. 2, 6, 7, 17, 18, 19, 20, 23, 24, and 25 of the bill.]

2) *Mono County Public Administrator*. State law establishes various county offices, including the public administrator, who is responsible for administering the estate of a county resident who dies. Public administrators are elected positions, but the Board of Supervisors in 16 counties are authorized under law to appoint a public administrator. In addition, boards in 12 counties can have a joint public guardian and public administrator. Finally, 10 counties may separate the public guardian and district attorney offices. Mono County notes that the elected office of public administrator has been consolidated by ordinance with the elected office of district attorney since before 1947, and thus those duties could not be, and were not, transferred away from the district attorney, despite the role and duties of the public administrator being civil in nature. SB 1489 allows Mono County to consolidate the public administrator and the public guardian as an appointed official and to separate the district attorney and public administrator. [See SEC. 3 and 23.]

3) *County Auditor qualifications.* State law creates and specifies the duties of 23 county officers, including a county auditor. The auditor is the chief county fiscal officer and, among other duties, prepares the county budget, examines the books of the county treasurer and various departments, and authorizes expenditures by warrants. In 1995, the Legislature updated the qualifications to be a county auditor to reflect the changes in education programs and desire of county auditors to professionalize their office. The State Association of County Auditors notes that one of the potential ways of qualifying to be a county auditor references a section of law that was repealed by its own terms on January 1, 2010. This bill clarifies the cross reference such that it refers to the section as it read on December 31, 2009. [See SEC. 4.]

4) *Reading of ordinances*. Current law establishes certain procedural requirements for city ordinances to become law. Most ordinances must be introduced for five days before being passed and must be passed at a regular meeting or an adjourned regular meeting; urgency ordinances don't have to abide by these rules. All ordinances must be read in full either at the time of introduction or passage, unless the City Council waives further reading after the title is read. Regardless, the titles of city ordinances must always be read. The City of Chino Hills notes that this requirement to read the title of an ordinance is obsolete and inefficient at a time when the title of the ordinance is listed in the agenda, in full compliance with the state's open meetings laws, and the full text of the ordinance is typically made available online or in print prior to the introduction or passage of the ordinance. The City also notes that the 2020 Local Government Omnibus Bill (SB 1473, Committee on Governance and Finance, Chapter 371) repealed a similar requirement for county ordinance titles to be read, so long as the title was included on the published agenda and a copy of the full ordinance is made available to the public online and in print at the meeting before introduction or passage. SB 1489 extends identical authority to city councils to waive reading of titles under the same conditions. [See SEC. 5.]

5) *Forward settlement of investments*. County treasurers must abide by the statutory requirements to invest excess funds in this order of priority: (a) safety, (b) liquidity, and (c) yield. In order to limit risk, the Government Code places limitations on the term or remaining maturity of authorized investments. However, counties do not take possession of purchased investments until settlement date. When local agencies purchase securities, the date they make the purchase and the date the purchase is settled (and goes onto the agency's books) aren't always the same. Additionally, the Government Code does not specify how the term or remaining maturity is calculated. The California Association of County Treasurers and Tax Collectors notes that in some cases, the procedures around finalizing these investments can take up to 30 or 45 days to "settle" after the initial trade or investment date. For new five-year securities, the settlement date can take up to two months, extending the term of the investment beyond five years, which the Government Code doesn't allow without Board of Supervisors approval. Due to the industry standardized settlement procedures involved in investing, counties are precluded from investing in certain investments with codified maximum term limits because of the extra days it takes for these transactions to settle. SB 1489 adjusts the terminology in the statute to reflect the true "start" of the investment term by allowing for forward settlement. In addition, the bill adds a limitation on forward settlement of 45 days. [See SEC. 8 and 9.]

6) *Submission of quarterly treasury reports*. State law provides that treasurer or chief fiscal officer may render a quarterly report to the chief executive officer, the internal auditor, and the city council or board of supervisors. If remitted, it must be submitted within 30 days following the end of a quarter. The California Association of County Treasurers and Tax Collectors notes that some treasurer-tax collectors continue to have challenges meeting the 30 day deadline and that accounting and investment systems can take up to 10 business days to post quarter-end entries and the board is sometimes dark at the end of the month. The association further notes that given the two-week lead time required to get a report on the board calendar, staff must often request exemptions from county procedures to meet code mandates. SB 1489 increases the time allowed to file a quarterly report by 15 days, from 30 to 45, following the end of the quarter. [See SEC. 10.]

7) *Williamson Act contract rescission for solar-use easements*. The California Land Conservation Act of 1965, also known as the Williamson Act (WA), allows a landowner to voluntarily enter into an agricultural land preservation contract with a city or county for a minimum of 10 years. In exchange for restricting the use of their land, property owners pay lower taxes as a result of their land's lower assessed value. In 2011, the Legislature allowed a property owner and a city or county to mutually agree to rescind the WA contract on marginally productive or physically impaired land to enter a solar-use easement contract, upon payment of a rescission fee, which was remitted to the state's General Fund (SB 618, Wolk, Chapter 596). In 2014, the Legislature revised the fee structure such that fees were increased but split evenly between the state and the county until January 1, 2020 (AB 2241, Eggman, Chapter 582). The Rural County Representatives of California notes that the sunset on AB 2241 inadvertently sunset the entire solar-use easement program, instead of just the changes to the fee structure enacted by AB 2241. The proposed amendments reinstate the repealed provisions of the solar-use easement as they existed prior to the enactment of AB 2241. [See SEC. 11.]

8) *IBank reporting requirements*. The California Infrastructure and Economic Development Bank (IBank) was created in 1994 and operates pursuant to the Bergeson-Peace Infrastructure and Economic Development Bank Act (Government Code Sections 63000 et seq). IBank is located within the Governor's Office of Business and Economic Development (GO-Biz) and is governed by a five-member Board of Directors. IBank has broad authority to issue tax-exempt and taxable revenue bonds, provide financing to public and private agencies, provide credit enhancements, acquire or lease facilities, and leverage state and federal funds. Currently, state law requires IBank to deliver

annual reports for its Climate Catalyst Program, the IBank itself, and its Small Business Finance Center on October 1, November 1, and January 1, respectively. The IBank notes that each reporting date was added as part of successive legislative efforts related to each distinct program, and that the synchronization of the reporting dates (or lack thereof) was never considered. The IBank further notes that production of three separate reports is administratively inefficient and burdensome, and may be confusing to the other agencies and the public who are seeking information about IBank's activities. SB 1489 modifies the due dates of these three reports such that all are due on January 1 annually and allows the IBank to consolidate those reports into a single report. [See SEC. 12, 13, and 14.]

9) *SB 478 (Wiener, 2021) cleanup*. Current law prohibits local agencies from denying a housing development project located on an existing legal parcel solely on the basis that the lot area of the proposed lot does not meet the local agency's requirements for minimum lot size, so long as the project is between 3-10 units and meets other specified requirements (SB 478, Wiener, Chapter 363, Statutes of 2021). Senate Governance and Finance Committee (Committee) staff note the term "proposed lot" is unclear because projects using this provision of SB 478 must be located on an existing, legally-created parcel. SB 1489 clarifies that SB 478's protection against denial based on minimum lot sizes only applies to projects proposed to be developed on existing parcels. [See SEC. 15.]

10) *Housing Crisis Act of 2019 cleanup*. Current law, known as the Housing Crisis Act of 2019 allows, but does not require, housing project developers to submit a preliminary application in order to lock in the ordinances and other rules that apply to the project at the time the preliminary application is deemed complete in certain affected cities and counties (SB 330, Skinner, Chapter 654, Statutes of 2019). Originally, the Housing Crisis Act sunset on January 1, 2025. However, SB 8 (Skinner, Chapter 161, Statutes of 2021) extended the sunset date to January 1, 2030, such that housing project developers that submit complete preliminary applications prior to that date may continue to benefit from the bill's provisions until January 1, 2034. Senator Skinner's staff notes that, in doing so, SB 8 inadvertently limited the application of tenant protections in the Housing Crisis Act to *only* those projects where a housing developer chose to submit a preliminary application. Accordingly, a project proponent could avoid the tenant protections in the law by choosing not to apply for a preliminary application. SB 1489 clarifies that the tenant protections in the Housing Crisis Act apply to all housing projects in affected

cities and counties regardless of whether a preliminary application is submitted. [See SEC. 16.]

11) *Securities for design professionals*. Current law allows contractors on public works projects to substitute other securities (e.g. a retention bond, letter of credit, etc.) when the underlying contract includes a retention provision. There is no one definition of "contractor" found in the Public Contract Code; unless otherwise specified, its use generally does not include consultants who are not contractors, although some provisions of the Public Contract Code do include consultants. The American Council of Engineering Companies, California, notes that recently, some agencies have disallowed design professionals from substituting alternative securities in lieu of withheld retention payments. This is because those agencies now read the term "contractor" to exclude consultants. SB 1489 includes consultants in the list of those who may substitute a security as an alternative to retention. [See SEC. 21.]

12) *Report on Assessed Value to Caltrans Division of Aeronautics.* Revenue and Taxation Code Section 5366 requires assessors to provide the California Department of Transportation (Caltrans), Division of Aeronautics with a statement containing a list of names, addresses of owners, make, model, aircraft registration number, and assessed value of all aircraft where were using airports in the county as a base. That information is required by July 1st every year. Revenue and Taxation Code Section 407 requires assessors to transmit a statistical statement to the Board of Equalization by the second Monday in July. This report is generally referred to as the 801/802 report. The law requires the roll to be transmitted to the Auditor by July 1st every year. Even so, additional time is allowed for transmission of required statistical reports because there are many tasks required in the aftermath of roll close that take time. The California Assessors' Association notes that Caltrans' Division of Aeronautics expects delivery of the aircraft list by July 1 every year, whether or not the assessor has been granted an extension to produce the assessment roll. The proposed amendments align the timing of the delivery of the statement to Caltrans with the timing for the 407 report. [See SEC. 22.]

Background

Each year, local officials discover problems with state statutes affecting counties, cities, special districts, and redevelopment agencies, as well as the laws on land use planning and development. These minor problems do not warrant separate (and expensive) bills. According to the Legislative Analyst, the cost of producing a bill in 2001-02 was $17,890.

Legislators respond by combining several of these minor topics into an annual "omnibus bill." In 2021, for example, the Committee's omnibus bill was SB 813, which contained three proposals to change state law, avoiding approximately $54,000 in legislative costs. Although this practice may violate a strict interpretation of the single-subject and germaneness rules as presented in *Californians for an Open Primary v. McPherson* 43 Cal.Rptr.3d 315 (2006), it is an expeditious and relatively inexpensive way to respond to multiple requests.

Comments

Purpose of the bill. SB 1489 compiles, into a single bill, noncontroversial statutory changes to 12 parts of state laws that affect local agencies and land use. Moving a bill through the legislative process costs the state around $18,000. By avoiding eight other bills, the Senate Governance and Finance Committee's measure avoids approximately $214,000 in legislative costs. Although the practice may violate a strict interpretation of the single-subject and germaneness rules, the Committee insists on a very public review of each item. More than 100 public officials, trade groups, lobbyists, and legislative staffers see each proposal before it goes into the Committee's bill. Should any item in SB 1489 attract opposition, the Committee will delete it. In this transparent process, there is no hidden agenda. If it's not consensus, it's not omnibus.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Assembly Appropriations Committee:

1) Minor and absorbable costs to various state agencies.

2) Costs to local agencies to implement the changes in this bill are likely minor and are not reimbursable by the state because cities and counties have general authority to impose and adjust fees and charges to cover their costs.

SUBJECT: Property taxation: revenue allocations: tax-defaulted property sales

SOURCE: California Association of County Treasurer-Tax Collectors
State Board of Equalization

DIGEST: This bill makes five changes to improve tax administration.

Assembly Amendments (1) instead of striking the ten dollar cap on the fee tax collectors can collect to prepare delinquent tax records, increase the cap from ten dollars to $55, (2) limit the tax collectors authority to offer noncommercial residential property in a tax sale to the next highest bidder at their bid price if the highest bidder does not consummate the sale only when the next public auction for that parcel of property occurs more than one year after the date of that first auction, and (3) sunset the authority for tax collectors to offer noncommercial residential property to the next highest bidder in a tax sale on January 1, 2029.

ANALYSIS:

Existing law:

1) Enacts the Taxpayer Transparency and Fairness Act of 2017, which created the California Department of Tax and Fee Administration (CDTFA), and shifted all of the Board of Equalization's (BOE's) statutory tax administration functions, including administration of the Sales and Use Tax, to the newly formed Department (AB 102, Committee on Budget, Chapter 16, Statutes of 2017)

2) Contains numerous references to BOE that should instead refer to CDTFA.

3) Provides that when a taxpayer is delinquent on the second installment of property taxes, the tax collector may collect a cost of up to $10 to prepare delinquency records and notice the taxpayer.

4) States that if the property owner does not pay the property taxes due in the current fiscal year before June 30th, the property becomes tax-defaulted.

5) Provides that the tax collector can seek approval from the board of supervisors to sell the property in a tax sale when a residential property has been in default for five years, or three years for a commercial property.

6) Sets forth a specific timeline for tax collectors to notify property owners of properties of tax default and pending tax sale.

7) Directs the tax collector to conduct all sales in public, and to sell the property to the highest bidder.

8) Allows governmental entities and nonprofit organizations to purchase tax defaulted property by paying only the delinquent taxes.

9) Requires the tax collector to send a notice of tax sale to the clerk or secretary of the board of each government entity that has the right to levy taxes or assessments on the property, as well as forward a copy to any nonprofit organization who has requested a copy of the notice.

10) States that after a tax sale, proceeds from the sale first pay for the costs of newspaper publishing, and recording fees. Funds are then distributed to taxing agencies with valid claims, and to the tax collector to pay for notices and contacting taxpayers. After that, proceeds satisfy liens held by parties in interest. Any amounts left over, known as "excess proceeds," are then divided

between each taxing entity according to their appropriate share of the property tax, after the county deducts specified costs.

11) Provides that any party of interest can file a claim for excess proceeds at any time prior to one year passing after the tax collector records the deed transferring the property to the purchaser. The county board of supervisors then decides to distribute excess proceeds, which parties of interest can then file an action or proceeding to review within ninety days.

12) Allows, additionally, a board of supervisors to delegate the decision to distribute excess proceeds to the tax collector by resolution; however, the section of law authorizing the delegation does not have a specific deadline for parties of interest to file an action or proceeding to review the decision.

This bill:

1) Strikes the reference to BOE and instead inserts CDTFA in a section of law that directs auditors to make adjustments based on estimates of sales and use tax revenue.

2) Increases the cap that on the fee tax collectors can collect to prepare delinquent tax records from $10 to $55, but no more than the actual cost.

3) Changes two sections of property tax law to add that tax collectors may offer a property in a tax sale to the next highest bidder at their bid price if the highest bidder does not consummate the sale within the time period specified by the tax collector.

4) Provides that tax collectors may only offer noncommercial residential property in a tax sale to the next highest bidder at their bid price when the next public auction for that parcel of property occurs more than one year after the date of that first auction.

5) Sunsets the authority for tax collectors to offer noncommercial residential property to the next highest bidder on January 1, 2029.

6) Allows the tax collector send the notice of tax sale to other government entities and nonprofit organizations electronically.

7) Clarifies that the 90-day deadline for parties of interest to file an action or proceeding to review the distribution of excess proceeds from a tax sale that applies to the board of supervisors also applies when the board of supervisors delegates the decision to the tax collector, and makes a conforming change.

Comments

According to the Senate Governance and Finance Committee, "Each year, County Treasurers and Tax Collectors detect problems and defects in state law that hinder their ability to discharge their duties under the law. SB 1494 compiles five such statutory changes to property tax collection and administration law suggested by the California Association of County Treasurer-Tax Collectors to assist them discharge their duties effectively. Additionally, BOE identified an outdated reference in property tax allocation law. SB 1456 combines five statutory changes into one single bill to improve tax administration. Moving five individual proposals as separate bills, even if technical and noncontroversial, through the legislative process would be much less efficient than consolidating them into one measure. The Committee distributed these proposals to affected parties to review each proposal before inclusion in the bill. Should anyone object to an item in the bill, the Committee will remove it."

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

SUPPORT: (Verified 8/19/22)

California Association of County Treasurer-Tax Collectors (co-source)
State Board of Equalization (co-source)

OPPOSITION: (Verified 8/19/22)

None received

ARGUMENTS IN SUPPORT: According to the California Association of County Treasurer-Tax Collectors, "SB 1494 firstly will amend Rev.& Tax. Code section 3693(a) and 3692 (d), related to Chapter 7 sales that require property sales to be subject to public auction to the highest bidder. Tax collectors have noticed an increase in bidders neglecting to finalize payment voiding the sale, and are proposing an amendment allowing the sale to be offered to the next highest bidder for non-residential properties. As amended, it extends this same ability to offer properties to the next highest bidder if the residential property has been offered at auction previously without the sale being completed by the winning bidder. It also resets a cap established in 1983 of $10.00 to prepare delinquent tax records and give notice of delinquency. The amended bill resets the cap at $55, which is higher than what the average cost inflation would have otherwise grown to be, but some counties have conducted time studies and one county in California established that staff time costs are $55 per property. However, as the language states "up to $55"

to allow counties to do their own cost studies and update the cost to reflect true costs under Government Code Section 54985. The measure also clarifies statute regarding how excess proceed claims from sales of tax-defaulted properties by

the tax collector must be distributed. Unfortunately, the code is vague regarding administrative rules and procedures and is also currently unclear as to the inception of the 90-day commencement period for dispute proceedings of claimants who wish to dispute the approval or denial of a claim. The subsequent Rev.& Tax. Code 4675.1 allows the Board of Supervisors of any county to delegate the tax collector to perform on its behalf and this bill will align with these two codes better. SB 1494 will add language to the statute to establish the date at which the 90-day commencement period begins to dispute an approved or denied claim. Lastly, SB 1494 will add language to Rev.& Tax. Code Section 3700 to enhance communications with taxing agencies and nonprofit organizations regarding properties eligible for Chapter 8 sales. The code currently requires that before the publication of the intended tax sale, the tax collector is required to "mail" or "deliver" a copy of the notice of intended sale to these organizations. But printing and mailing notices is an additional, unreimbursed expense; SB 1494 adds language to authorize this information to be transmitted electronically, improving efficiency, and reaching recipients more effectively. Further, electronic documents can easily be scanned for specific key words or other details by the recipient organizations, which will also make the communication more useful to non-profits, for example, that may have an interest in a particular property that is subject to sale.

SUBJECT: Financial institutions: Department of Financial Protection and Innovation: money transmissions

SOURCE: Author

DIGEST: This bill makes assorted technical and clarifying changes to reflect the newly renamed Department of Financial Protection and Innovation (DFPI) and to clarify the scope of the Money Transmission Act (MTA).

Assembly Amendments are clarifying and technical in nature including language that addresses chaptering out issues.

ANALYSIS:

Existing law:

1) Contains references to "Department of Business Oversight" and "Commissioner of Business Oversight" throughout various codes.

2) Establishes in state government a Department of Financial Protection and Innovation, charged with executing laws related to financial services. (Financial Code Section 300)

3) Provides MTA, administered DFPI, which requires licensure of persons engaged in the business of money transmission, as specified, unless the person is exempt. (Financial Code Section 2000 et seq.)

4) Defines money transmission as any of the following: selling or issuing payment instruments, selling or issuing stored value, or receiving money for transmission. (Financial Code Section 2003(q))

This bill:

1) Replaces outdated references to "Department of Business Oversight" and "Commissioner of Business Oversight" with references to "Department of Financial Protection and Innovation" and "Commissioner of Financial Protection and Innovation," respectively.

2) Specifies that the activities considered "money transmission" pursuant to MTA must be in relation to a person located in California.

Comments

1) *Purpose.* The purpose of this bill is to correct outdated references to the Department of Business Oversight (DBO) with the department's new name, Department of Financial Protection and Innovation, which was changed by AB 1864 (Limón, Chapter 157, Statutes of 2020). This bill also clarifies how the definition of money transmission in the Money Transmission Act is applied.

2) *Name change:* In 2020 the Legislature passed and Governor Newsom signed AB 1864, which complemented an enacted budget bill to expand the authority and resources of the state financial regulator. In addition to providing broader authority, the bill changed the name of the regulator from DBO to DFPI. This bill corrects references throughout state law that refer to the previous name of the department and the commissioner of the department.

Money transmission definition. The MTA requires persons engaged in money transmission to obtain a license from DFPI. The MTA defines money transmission as any of the following acts:

- Selling or issuing payment instruments.
- Selling or issuing stored value.
- Receiving money for transmission.

The MTA does not, however, specify whether licensure is required for engaging in these acts with a person located in a place other than California. DFPI has interpreted the law to apply only when such a person is located in this state, and this bill codifies that interpretation, clarifying the applicability of the MTA.

SUBJECT: Prostate Cancer Awareness Month

SOURCE: California Prostate Cancer Coalition

DIGEST: This resolution proclaims the month of September 2022 as Prostate Cancer Awareness Month.

Assembly Amendments add coauthors, make changes to the statistical information, add legislative findings, and make technical changes.

ANALYSIS: This resolution makes the following legislative findings:

1) Prostate cancer is the most frequently diagnosed cancer in men aside from skin cancer. It is estimated that one in eight men will develop prostate cancer in their lifetime.

2) Risk factors for prostate cancer include increasing age, African ancestry, a family history of the disease, and certain inherited genetic conditions.

3) Advanced prostate cancer commonly spreads to the bones, which can cause pain in the hips, spine, ribs, or other areas in the body.

4) The five-year survival rate approaches 100 percent when prostate cancer is diagnosed and treated early, but drops to 31 percent when it spreads to other parts of the body.

5) Treatment options for prostate cancer vary depending on age, the stage and grade of cancer, and other existing medical conditions.

6) The American Cancer Society recommends that men should have a conversation with their health care provider and should have an opportunity to make an informed decision about whether to be tested for prostate cancer based on personal values and preferences.

7) For men who desire screening, prostate-specific antigen testing may begin at 55 years of age for average-risk men, and for men at higher than average risk, including Black men, men with a family history, men with a genetic predisposition, and veterans, testing should begin at 40 years of age.

This resolution:

1) Proclaims the month of September 2022 to be Prostate Cancer Awareness Month in California.

2) Urges all levels of government to provide an educational campaign to increase awareness about the importance for men to make an informed decision with their health care provider about early detection and testing for prostate cancer.

3) Joins communities across our nation to increase awareness about the importance of removing barriers to increase early detection and testing for prostate cancer so men can have the opportunity to make informed decisions with their health care provider about early treatment options.

SUBJECT: The Mario Obledo Building

SOURCE: Chicano Latino Caucus, California Democratic Party

DIGEST: This resolution designates the East End Complex-Block 171, located at 1501 Capitol Avenue in Sacramento, as the Mario Obledo Building.

Assembly Amendments remove the requirement that the Department of General Services (DGS) erect appropriate plaques and markers and instead request DGS to determine the cost of erecting appropriate plaques and markers and, upon receiving donations from nonstate sources, to cover that costs to erect such signage.

ANALYSIS:

Existing law:

1) Establishes DGS under the Government Operations Agency (GovOps) and provides that DGS serve as the business manager for the State of California.

2) Establishes GovOps and makes GovOps responsible for administering state operations including procurement, information technology, and human resources.

This resolution:

1) Designates the East End Complex-Block 171, located at 1501 Capitol Avenue in Sacramento, as the Mario Obledo Building.

2) Request that DGS to determine the cost of erecting appropriate plaques and markers showing this special designation and, upon receiving donations from nonstate sources, to cover that cost to erect signage.

Background

Purpose of This Resolution. According to the author's office, "from an impoverished background in San Antonio, Mario G. Obledo became the founder and leader of major Hispanic-American Organizations, such as the Mexican American Legal Defense And Education Fund (MALDEF), a top state official, and a vocal critic of unfair, and often racist, treatment of Latinos. Mario G. Obledo is an American success story, and his contributions to society should be commemorated and serve as an inspiration to California residents and our youth. SCR 70 would honor Mr. Obledo and designate the East End Complex-Block 171, located at 1501 Capitol Avenue in Sacramento, as the Mario Obledo Building."

Mario G. Obledo. Born on April 9, 1932, Mario Guerra Obledo was born in San Antonio, Texas to Jesus Perez Obledo and Concepcion Obledo. One of thirteen children, Obledo had a very tough childhood that included the death of his father when Mario was only five years old.

His mother emphasized the value of education and made sure that Mario focused on education to keep him off the streets. After graduating high school in 1949, he attended the University of Texas at Austin to pursue a pharmaceutical degree.

After a stint in the U.S. Navy, he returned to Austin and graduated in 1957 with a degree in pharmacy. During his time at Austin, he established a chapter of the League of United Latin American Citizens on campus. Soon after graduating, he enrolled in law school at St. Mary's university in San Antonio and graduated with a law degree in 1960.

In 1967, Obledo co-founded MALDEF and became its first general counsel. After MALDEF, Obledo taught at Harvard Law School until 1974 when California Governor Jerry Brown asked him for his assistance in recruiting potential cabinet officers. Governor Brown then offered Obledo the position of health and welfare secretary. That appointment, made Obledo the highest ranking Mexican American official in California. He served in that position until 1982, when he resigned to make an unsuccessful run for the Democratic nomination for governor.

Remembered as the "godfather" of the Latino civil rights movement for his numerous efforts in standing up for social justice and the advancement of the community, Obledo was also a co-founder of the Hispanic National Bar Association and the National Coalition of Hispanic Organizations.

In the late 1990s, Obledo became much more of a public activist as he protested against anti-immigrant advertising. In 1998, President Bill Clinton presented Obledo with the Presidential Medal of Freedom and described him as having "created powerful chorus for justice and equality" and cited his efforts to fight for Latino children to swim in public pools in Texas. In 2010, he received an honorary doctor of law degree from California State University, Sacramento.

Obledo died on August 18, 2010, following a heart attack in Sacramento, California at the age of 78. Following his death, Janet Murguia, president of the National Council of La Raza described Obledo as "one of those giants that we all stand on the shoulders of."

East End Complex-Block 171. The East End Complex-Block 171, located at 1501 Capitol Avenue in Sacramento, is a state-owned office building. It is currently occupied by the Department of Health Services and the California Department of Public Health. The building was constructed in 2002 and has six stories and 433,360 square feet.

Related/Prior Legislation

SCR 31 (Bradford, Resolution Chapter 1, Statutes of 2020) named the public street, circle, and plaza at 914 and 915 Capitol Mall in the City of Sacramento as the "Willie L. Brown, Jr. Circle and Plaza."

ARGUMENTS IN SUPPORT: According to the California League of United Latin American Citizens, "Dr. Mario G. Obledo served as a dedicated leader in Civil Rights affairs for more than 50 years, becoming the founder and leader of major Hispanic-American organizations, a top state official, and a vocal critic of unfair, and often racist treatment of Latinos. SCR 70 would honor Mario G. Obledo, a great Latino civil rights leader, and his contributions to the state of California."

According to the Mario G. Obledo National Coalition of Hispanic Organizations, "Mario Obledo is an American success story, and his life should serve as an inspiration to our youth. Unfortunately, younger generations of Californians are unaware of his contributions in fighting discrimination and assuring full enjoyment of civil rights by all. Naming the California Health Buildings after Mario Obledo

will help assure that his many contributions to society will not go unnoticed and that he receives the recognition he so richly deserves."

SUBJECT: The Stan Statham Memorial Highway

SOURCE: Author

DIGEST: This resolution memorializes Stan Statham for his service.

Assembly Amendments clarify that this resolution honors Stan Statham.

ANALYSIS: This resolution acknowledges and commemorates the life and service of Stan Statham.

Background

In 2020, Raymond "Stan" Stanley Statham tragically passed away. Upon graduating from high school in 1956, Mr. Statham enlisted in the 131st Technical Intelligence Attachment in West Berlin, Germany. Notably, he served as an American spy during the Cold War. Upon his return to the states, he worked as a radio personality at several radio stations in Northern California. Later he served as the New Director and Anchorman for KHSL-TV in Chico. In 1976, he was elected to the California State Assembly and served for 18 years.

Stan Statham is survived by his wife, wife, Roleeda Statham; daughter, Jennifer Hejsek; son, Devin Statham; stepdaughters, Jessica and Janis Epperson; stepsons Eric and Steven Epperson; and his grandchildren and great-grandchildren.

Comments

Introduced: 8/1/22
Vote: 21

SUBJECT: Breastfeeding Awareness Month of 2022

SOURCE: Author

DIGEST: This resolution proclaims August 2022 as Breastfeeding Awareness Month of 2022 in California; recognizes the unique benefits that breastfeeding provides, as specified; and affirms that Californians should work to ensure that barriers to initiation and continuation of breastfeeding are removed.

ANALYSIS: This resolution makes the following legislative findings:

1) Breastfeeding is an issue of great importance to women, infants, their families, and their physicians and is, therefore, of interest to the Legislature. It is the first food system that, as babies, many humans are introduced to and sustained by.

2) The American Academy of Pediatrics, the American College of Obstetricians and Gynecologists, the American Academy of Family Physicians, the Academy of Breastfeeding Medicine, and the World Health Organization recommend that babies be exclusively breastfed for the first six month of age and continue to be breastfed for the following six months, along with nutritious complementary foods.

3) In January 2011, the United States Surgeon General announced a "Call to Action to Support Breastfeeding" that identifies barriers to optimal breastfeeding in health care practices, employment, communities, research, public health infrastructure, and social networks, while also recommending methods in which families, communities, employers, and health care professionals could help to eliminate those barriers to improve breastfeeding rates and increase support for breastfeeding.

4) Research shows that human milk and breastfeeding provide advantages to general health, growth, and development while significantly decreasing the risk of a large number of acute and chronic diseases, including, among others, sudden infant death syndrome, asthma, allergies, diabetes, viral and bacterial infections, childhood obesity, childhood leukemia, necrotizing enterocolitis, and infant mortality.

5) The nutrients exclusive to human milk are vital to the growth, development, and maintenance of the human brain and cannot be manufactured.

6) Breastfeeding has positive economic impacts on families by decreasing the need to pay for medical care for a sick infant and by eliminating the need to purchase infant formula. The health benefits to breastfed children and their mothers result in lower health care costs for employers, less employee time off to care for sick children, and higher productivity and employee loyalty.

7) Employers, employees, and society benefit by supporting a mother's decision to breastfeed and by helping to reduce the obstacles to initiating and continuing breastfeeding.

This resolution:

1) Proclaims the month of August 2022 as Breastfeeding Awareness Month of 2022 in California.

2) Recognizes the unique health, economic, and societal benefits that breastfeeding provides to babies, mothers, families, and the community as a whole and affirms that Californians should work to ensure that barriers to initiation and continuation of breastfeeding are removed.

3) Encourages Californians to work together to explore ways to improve women's access to breastfeeding support services in medical, social, and employment settings, to facilitate increased awareness and education about breastfeeding, to explore and encourage the use of breastfeeding supports, and to improve the availability of effective breastfeeding resources and community support services.

SUBJECT: Runaway and Homeless Youth Prevention Month

SOURCE: California Coalition for Youth

DIGEST: This resolution designates November 2022 as Runaway and Homeless Youth Prevention Month in California and recognizes the need for individuals, schools, communities, businesses, local governments, and the state to take action on behalf of runaway and homeless youth in California.

ANALYSIS: This resolution makes the following legislative findings:

1) Runaway and homeless youth are young people between 12 and 24 years of age, inclusive, who have the least access to essential opportunities and supports.

2) The prevalence of runaways and homelessness among youth is staggering, with studies suggesting that nationally between 1,600,000 and 2,800,000 youth up to 24 years of age experience homelessness every year.

3) The percentage of unaccompanied homeless youth who are unsheltered in California stands at 78.9 percent, which is the highest in the country. California also has 34 percent of the homeless youth population in the country, the largest number of homeless youth of any state.

4) Runaway and homeless youth flee conflict, abuse, neglect, or increasingly, poverty in their homes. They have become disconnected from educational systems and the workforce and do not have the skills and financial resources to live on their own. The factors impacting youth homelessness are complex and differ from those impacting other homeless populations.

5) Providing safe, stable, and permanent housing for runaway and homeless youth is a family, community, state, and national priority, and homeless youth are

considered one of the unique populations in the homeless community by the United States Interagency Council on Homelessness.

6) The future well-being of our state depends on the value we place on our youth and, in particular, on our actions to provide the most vulnerable young people in the state with opportunities to acquire the knowledge, skills, and abilities they need to find and maintain stable housing and to develop into healthy and productive adults.

7) The number of effective programs providing services and support to runaway and homeless youth in California is a fraction of what is needed to fully address the needs of these young people; only 22 out of California's 58 counties have programs for runaway and homeless youth.

8) The California Coalition for Youth has operated the California Youth Crisis Line (1-800-843-5200) 24 hours a day, seven days a week, for over 30 years as the state's only emergency response system for youth in crisis, which began offering chat-to-text counseling services in 2016.

9) The California Coalition for Youth, along with other community-based organizations, providers, and advocates, is sponsoring California's 11th annual Runaway and Homeless Youth Prevention Month to increase awareness and action on behalf of youth at risk or currently living on the street. Awareness of the tragedy of youth experiencing homelessness and its causes must be heightened to ensure greater support for effective programs aimed at preventing homelessness and helping youth remain off the streets.

This resolution recognizes the need for individuals, schools, communities, businesses, local governments, and the state to take action on behalf of runaway and homeless youth in California; and designates the month of November 2022 as Runaway and Homeless Youth Prevention Month in California.

Related/Prior Legislation

The following are the most recent measures relating to Runaway and Homeless Youth Prevention Month:

- SCR 57 (Hurtado, Resolution Chapter 145, Statutes of 2021).
- SCR 75 (Hurtado, Resolution Chapter 160, Statutes of 2019).

SUBJECT: Social Security benefits: COVID-19

SOURCE: Author

DIGEST: This resolution urges the United States Congress to amend the United States Social Security Administration's index of earnings to ensure that a decline in aggregate wages due to COVID-19 does not result in decreased benefits.

Assembly Amendments add co-authors and remove a reference specifying a methodology to adjust Social Security's benefit by either basing the national average wage off first quarter earnings for Social Security benefits for those who turn 60 in 2020 or 2021 or using the 2019 national average wage for Social Security benefits for those who turn 60 in 2020 or 2021.

ANALYSIS:

Existing federal law:

1) Establishes the Social Security Administration (SSA) with the duty of administering the old-age, survivors, and disability insurance programs (OASDI). Funded primarily through payroll taxes, the old-age program has contributed to declines in poverty among the elderly. (42 U.S. Code, Chapter VII - Social Security §901)

2) Requires the SSA when computing a person's benefits, to use the national average wage indexing series to index that person's earning in order to ensure that a worker's future benefits reflect the general rise in the cost of the standard of living (inflation). Each year, the SSA publishes the national average wages for the year. (20 CFR §404.210-404.211)

This resolution:

1) Makes, among others, the following declarations:

   a) Sixty-three million people collect Social Security benefits, amounting to one in every six United States residents, lifting more than 15,000,000 elderly individuals out of poverty.

   b) Social Security is especially beneficial for minority demographics such as African Americans, Latinos, and women who all face higher rates of poverty and earn less than their White, male, working counterparts.

   c) The global COVID-19 pandemic has unearthed a technical glitch in the United States Social Security system.

   d) If left unaddressed, this glitch may result in more than 8,000,000 workers, those who turn 60 years of age in 2020 or 2021, receiving substantially lower Social Security benefits than workers with identical earnings who turned 60 years of age in the years immediately prior to the COVID-19 pandemic.

   e) Social Security's earned benefits are based on each worker's earning history adjusted to reflect the growth in aggregate economy wide wages.

   f) Social Security benefits are calculated individually and adjusted through the average wage index, which amounts to the total wages paid in the United

States in a year, divided by the number of W-2 tax forms issued in that same year.

g) Due to the COVID-19 pandemic, tens of millions of Americans have filed for unemployment during the COVID-19 pandemic.

h) Due to high levels of unemployment, aggregate wage levels are expected to continue to decline substantially this year, which may result in lower adjusted benefits by as much as roughly 9 percent, or $2,511 annually, for those workers who turn 60 years of age in 2020 or 2021.

i) A median income worker who turns 60 years of age in 2020 or 2021, retires at the normal retirement age of 67 years of age, and collects Social Security benefits for 18 years may lose $45,859 over the course of their retirement.

j) A decline in overall wages due to a pandemic should not produce lower benefits for a select group of retirees.

2) Resolves by the Senate and the Assembly of the State of California, jointly, that the Legislature urges the United States Congress to:

a) Amend the United States Social Security Administration's index of earnings to ensure that a decline in aggregate wages due to COVID-19 does not result in decreased benefits.

3) Requires the Secretary of the Senate to transmit copies of this resolution to the President and Vice President of the United States, the Commissioner of the Social Security Agency, the Speaker of the House of Representatives, the Minority Leader of the House of Representatives, the Majority Leader of the United States Senate, the Minority Leader of the United States Senate, and to each Senator and Representative from California in the Congress of the United States.

Background

Wage Indexing. Social Security replaces a percentage of pre-retirement income based on the individual's lifetime career earnings. Higher lifetime earnings results in higher benefits. The portion of pre-retirement wages that the Social Security replaces is based on the average of a person's highest 35 years of Social Security covered wage-indexed earnings. According to the SSA, when computing a person's benefits, they use the national average wage indexing series to index that person's earnings. Such indexation ensures that a worker's future benefits reflect the general rise in the standard of living that occurred during the individual's

working lifetime and ensures the amounts are more reflective to today's dollars. For example, a person born in 1959 who earned $20,000 in 1991 would have those earnings indexed to an amount close to $50,000 when calculating their Social Security retirement benefit rate.

Existing law requires wage indexing to depend on the year in which a person is first eligible to receive benefits. The age of retirement eligibility is 62. SSA indexes an individual's earnings to the average wage level *two years prior* to the year of first eligibility. Therefore, for a person retiring at age 62 in 2021, the person's earnings would be indexed to the average wage index for 2019 (54,099.99). Earnings in a year before 2019 would be multiplied by the ratio of 54,099.99 to the average wage index for that year; earnings in 2019 or later would be taken at face value.

COVID-19 and its Economic Impact. The COVID-19 pandemic changed the way we live and has had devastating consequences. According to the National Bureau of Economic Research, the beginning of the economic downturn caused by COVID-19 began in February 2020, marking the end of the longest period of expansion in U.S. History. This expansion followed the Great Recession which spanned from December 2007 to June 2009, a downturn widely considered to be the worst since the Great Depression. The unemployment rate rose quickly in March 2020 as a result of quarantine orders throughout the state. By April 2020, the unemployment rate had surpassed previous peaks observed during the Great Recession. At its peak, the unemployment rate in California reached 16% in April 2020. According to the Employment Development Department, 22.5 million unemployment insurance claims have been filed since March 2020. EDD has paid more than $147 billion in unemployment insurance benefits.

Comments

Need for this resolution? According to the author, "Social Security Benefits are in part calculated by running a worker's wages through the Average Wage Index (AWI) which is used to ensure that a person's historical annual earnings are more reflective of current day dollars. If the AWIs for 2020 and 2021 are lower than the projected levels due to depressed economic output throughout the economy, then future retirees born in 1960 and 1961 (those turning 60 during the past two years), could experience a substantial decline in actual social security benefits compared to their expected benefits, due solely to the economic impact of the pandemic.

This resolution urges the United States Congress to amend the United States Social Security Administration's index of earnings to ensure that a decline in aggregate wages due to COVID-19 does not result in decreased benefits.

Related/Prior Legislation

SR 89 (Wilk, 2020) was almost identical to this resolution and would have (1) urged the US Congress to amend Social Security's index of earnings to ensure that a decline in aggregate wages due to COVID-19 did not result in decreased benefits; and (2) urged Congress to either base the national average wage off first quarter earnings for benefits for those turning 60 in 2020 or use the 2019 national average wage for Social Security benefits for those turning 60 in 2020. The Senate Rules Committee did not refer SR 89 and it died in Senate Rules Committee.

Introduced: 6/27/22
Vote: Majority

SUBJECT: Probation Services Week

SOURCE: Author

DIGEST: This resolution proclaims July 17, 2022, to July 23, 2022, inclusive, as Probation Services Week to highlight the immense contributions probation departments and their officers provide to our communities and state.

ANALYSIS: This resolution makes the following legislative findings:

1) Probation is an alternative to incarceration, and California's probation mission is to deliver a seamless approach to providing effective supervision and rehabilitation services to justice-involved individuals.

2) Probation professionals play a unique and essential role in our justice system and communities. Probation is focused on helping justice-involved individuals transition out of the system permanently through transformative and evidence-based rehabilitation.

3) Probation officers are trained experts who are prepared to manage trauma and other needs of justice-involved individuals and safely connect them to the resources they need.

4) Probation connects services and needs to enhance community safety and the restoration of justice-involved individuals. Probation departments are a connector in the justice system: bridging the gap and maximizing the resources available within the courts, local governments, law enforcement, social services, behavioral health, schools, crime survivor organizations, nonprofit organizations, and the community to reduce recidivism by carefully balancing direct human services and research-based deterrents and interventions.

5) By delivering sustainable community safety, probation departments have a profound impact on the health and safety of our communities by working to reduce recidivism through evidence-based programming and supervision. Probation's success ensures that our state's communities are safer for all Californians to live and prosper.

This resolution proclaims July 17, 2022, to July 23, 2022, inclusive, as Probation Services Week to highlight the immense contributions probation departments and their officers provide to our communities and state.

Related/Prior Legislation

SR 50 (Caballero, 2021) proclaimed July 18, 2021, to July 24, 2021, inclusive, as Probation Services Week. The resolution was adopted by the Senate.

SUBJECT: Preschool data: data collection

SOURCE: California School Employees Association
Early Edge
Kidango

DIGEST: This bill requires the California Department of Education (CDE) to collect specified student-level data relative to enrollment in California state preschool programs operated by local educational agencies (LEAs) to provide longitudinal data.

ANALYSIS: Existing law establishes the California Longitudinal Pupil Achievement Data System (CALPADS) to accomplish all of the following goals:

1) To provide school districts and CDE access to data necessary to comply with federal reporting requirements delineated in the federal No Child Left Behind Act of 2001.

2) To provide a better means of evaluating educational progress and investments over time.

3) To provide local educational agencies with the data needed to improve student achievement, including college and career readiness.

4) To provide an efficient, flexible, and secure means of maintaining longitudinal statewide student level data between and among the state's educational segments and operational tools, including, but not limited to, all of the following:

   a) Student level data from all elementary and secondary schools, including, but not limited to, juvenile court schools, alternative schools, continuation schools, special education schools, and adult educational programs offering a high school diploma or equivalency.

   b) Student level data collected in both detention and non-detention settings.

   c) Student level data to postsecondary educational institutions and the Student Aid Commission.

   d) To facilitate the ability of the state to publicly report data, as specified in the federal America COMPETES Act and as required by the federal American Recovery and Reinvestment Act of 2009.

   e) To ensure that any data access provided to researchers, as required pursuant to the federal Race to the Top regulations and guidelines is provided, only to the extent that the data access is in compliance with the federal Family Educational Rights and Privacy Act of 1974. (Education Code 60900)

This bill requires CDE to collect the following data by July 1, 2024:

1) Pupil data for each pupil enrolled in a California state preschool program operated by an LEA, including all applicable data elements that are collected for pupils in transitional kindergarten, which, in combination with the data collected through CALPADS, will provide longitudinal pupil data for pupils enrolled in state preschool programs operated by LEAs through grade 12.

2) The same data for educators in California state preschool programs operated by a LEA that is collected for educators in the K–12 classroom setting, to the extent that data is collected.

Comments

Need for this bill. According to the author, "Last year, California made universal preschool a reality by expanding access to Universal Transitional Kindergarten for

all four-year-olds, giving families an additional high-quality pre-K option and creating tens of thousands of new early education jobs. AB 22 will ensure that California collects the necessary student and workforce data to ensure the state optimizes its limited resources in ways that best serve California families."

CALPADS. CALPADS has been operational since 2009, and enables the migration of numerous methods of aggregate data collection to CALPADS, creating a central, cohesive system that maintains quality student-level data, as well as providing a vehicle that tracks individual student enrollment history and achievement data which thus provides reliable longitudinal information.

CALPADS is the foundation of California's K–12 education data system, comprising student demographic, program participation, grade level, enrollment, course enrollment and completion, discipline, and statewide assessment data. The student-level, longitudinal data in CALPADS enables the facilitation of program evaluation, the assessment of student achievement over time, the calculation of more accurate dropout and graduation rates, the efficient creation of reports to meet state and federal reporting requirements, and the ability to create ad hoc reports and responses to relevant questions. CALPADS provides LEAs with access to longitudinal data and reports on their own students, and it gives LEAs immediate access to information on new students, enabling the LEAs to place students appropriately and to determine whether any assessments are necessary. [CALPADS Background/History - California Longitudinal Pupil Achievement Data System (CALPADS) (CA Dept of Education)]

Data about all state preschool programs? State preschool programs may be provided by an LEA or a non-LEA entity (e.g. private center-based preschool). This bill requires the collection of student level and teacher data relative to state preschools that are operated by an LEA, as there is an existing system to collect and report this data. However, no such system exists for state preschools operated by non-LEAs. The legislature may wish to consider working with CDE to find a way to gather this data from all state preschool program contractors, and with the Department of Social Services to obtain the same data related to children served in other early learning and care settings. Ideally, it would be helpful to have this data from all types of early learning and care providers as to how the expansion of transitional kindergarten has affected enrollment in other types of early learning and care programs that serve four-year-old children, as well as the effect on the early learning workforce.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the CDE estimates General Fund costs of approximately $3.3 million in the first year and $2.9 million in the second year to collect the state preschool program data. This estimate assumes that the data would be collected outside of CALPADS and that a standalone system would be utilized.

SUBJECT: Telehealth

SOURCE: California Association of Public Hospitals and Health Systems
California Medical Association
CommunityHealth+ Advocates
Essential Access Health
Planned Parenthood Affiliates of California

DIGEST: This bill permits the Department of Health Care Services (DHCS) to allow under specified circumstances new patients to be established with health care providers in the Medi-Cal program using audio-only synchronous and other modalities, and permits exceptions from requirements to ensure beneficiary choice of modalities.

Senate Floor Amendments of 8/24/22 make non-substantive changes and address chaptering-out conflicts with SB 966 (Limon), which requires DHCS to seek any necessary federal approvals and issue appropriate guidance to allow a federally qualified health center (FQHC) or rural health clinic (RHC) to bill for specified behavioral health providers, as specified.

Senate Floor Amendments of 8/22/22 delete the expanded definition of synchronous interaction for purposes of telehealth, telehealth payment parity expansion in Medi-Cal managed care, evaluation requirements for DHCS; allow DHCS to authorize exceptions to the prohibition on establishing new patients via audio-only interactions and other modalities; and allow DHCS to authorize some exceptions to the beneficiary choice requirements.

ANALYSIS:

Existing law:

1) Establishes the DHCS to administer the Medi-Cal program. [WIC §14000, et seq.]

2) Requires an FQHC or an RHC "visit" to mean a face-to-face encounter between an FQHC or RHC patient and specified providers. Prohibits an FQHC or RHC from establishing a new patient relationship using audio-only synchronous interaction. Allows DHCS to develop exceptions. Does not preclude an FQHC or RHC from establishing a new patient through asynchronous store and forward modality if certain conditions are met such as the patient is physically present at an originating site that is a licensed or intermittent site of the FQHC or RHC, at the time the service is performed. [WIC §14132.100]

3) Does not require in-person, face-to-face contact between a health care provider and a patient under the Medi-Cal program for covered health care services and provider types designated by DHCS, when provided by video synchronous interactions, asynchronous store and forward, audio-only synchronous interaction, remote patient monitoring, or other permissible virtual communication modalities when services and setting meet the applicable standard of care and meet the requirements of the service code being billed, subject to specified requirements. [WIC §14132.725]

4) Requires at some point designated by DHCS, no sooner than January 1, 2024, a Medi-Cal provider furnishing applicable health care services via audio-only synchronous interaction to also offer those same services via video synchronous interaction to preserve beneficiary choice. Permits DHCS to provide specific exemptions. Additionally, on a date designated by DHCS, a provider furnishing services thorough video synchronous interaction or audio-only synchronous interaction to offer those services via in-person, face-to-face contraction, or arrange for a referral to in-person care.[WIC §14132.725]

5) Permits a health care provider to establish a new patient relationship with a Medi-Cal beneficiary via video synchronous interaction, but prohibits this using asynchronous store and forward, telephonic (audio-only) synchronous interaction, remote patient monitoring or other virtual communication, except as permitted for FQHCs and RHCs. [WIC §14132.725]

6) Defines "sensitive services" to mean all health care services related to mental or behavioral health, sexual and reproductive health, sexually transmitted infections, substance use disorder, gender affirming care, and intimate partner violence, and includes other specified services, as described, obtained by a patient at or above the minimum age specified for consenting to the service specified in the section. [CIV 56.05]

This bill:

1) Permits DCHS to provide for an exception to the prohibition on FQHCs and RHCs establishing a new patient relationship using audio-only synchronous interaction, including, but not limited to, the situations as described below, and requires that they are established in consultation with affected stakeholders and published in departmental guidance:
   a) When the visit is related to sensitive services, and when established in accordance DHCS requirements and consistent with federal and state law, regulations and guidance; and,
   b) When the patient requests audio-only modality or attests they do not have access to video, and when established in accordance with department requirements and consistent with federal and state laws, regulations and guidance.

2) Allows in making exceptions to beneficiary choice requirements, DHCS to also take into consideration the availability of broadband access based on speed standards set by the Federal Communication Commission pursuant to federal law, as specified, or other applicable federal law or regulation.

3) Permits a health care provider to establish a new patient relationship with a Medi-Cal beneficiary via asynchronous store and forward, audio-only synchronous interaction, remote patient monitoring, or other virtual communication modalities, to the same extent as FQHCs and RHCs but also allows for the exemptions described in 1) above for remote patient monitoring or other virtual communication modalities (for providers who are not FQHCs and RHCs).

4) Requires applicable health care services provided through asynchronous store and forward, video synchronous store interaction, audio-only synchronous interaction, remote patient monitoring, or other permissible virtual communication to comply with privacy and security requirements contained in federal Health Insurance Portability and Accountability Act of 1996, and regulations, the Medicaid State Plan Amendment and any other applicable state and federal statutes and regulations.

Comments

According to the author, the COVID-19 pandemic has made abundantly clear what we have known for decades – our most vulnerable and marginalized communities continue to struggle for affordable and reliable access to healthcare. This bill will extend the telehealth flexibilities that were put in place during the COVID-19 pandemic, which have been vital to ensuring that health centers can continue providing services.

Budget Act of 2022-23. As part of the budget, DHCS requested trailer bill language to make statutory changes to align with its DHCS Telehealth Recommendations Post- the COVID Public Health Emergency (PHE).

SB 184 (Committee on Budget, Chapter 47, Statutes of 2022) is the omnibus health budget trailer bill which addresses policy beyond the PHE with respect to Medi-Cal and telehealth including:

a) Provides that face-to-face contact is not required when covered Medi-Cal services are provided by video synchronous interaction, audio-only synchronous interaction, remote patient monitoring, or other permissible virtual communication modalities, meeting certain criteria.
b) Requires a provider furnishing services through video synchronous interaction or audio-only synchronous interaction to also offer those services through in-person, face-to-face contact or arrange for a referral to in-person care.
c) Authorizes a provider to establish a new patient relationship with a Medi-Cal beneficiary through video synchronous interaction, and prohibits a provider from doing so through other telehealth modalities.
d) Adopts various requirements on DHCS, or a Medi-Cal provider, relating to the use of telehealth modalities, including requirements concerning fee schedules and minimum reimbursement limits, services in border communities, as defined, consent standards, privacy and security compliance, informational notices, and a research and evaluation plan.
e) Expands the definition of patient "visit," for FQHCs and RHCs, to include an encounter between an FQHC or RHC patient and any of specified health care

professionals using video synchronous interaction, audio-only synchronous interaction, or asynchronous store and forward modality when the applicable standard of care and other conditions are met.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown ongoing costs, potentially millions of dollars (General Fund and federal funds). Establishing new patients that would not have taken place in the absence of telehealth modalities proposed under this bill would increase health utilization costs.

OPPOSITION: (Verified 8/22/22)

ATA Action
California Chamber of Commerce
Teladoc Health

ARGUMENTS IN SUPPORT: The California Association of Public Hospitals and Health Systems (CAPH), writes that CAPH and the co-sponsors of this bill have been working with the Administration since last year to provide input on its permanent Medi-Cal telehealth proposal, which is being advanced via the state budget process this year. CAPH is pleased with the Administration's collaboration and partnership on this effort and the overall changes that have been made over the last year. The recent amendments to this bill reflect the Administration's trailer bill language with the additional changes cosponsors are seeking to it, including a few areas that we are still working to resolve with the Administration. Altamed writes telehealth has huge potential to expand access to high-quality virtual care for all Californians and this bill will bolster access to care. It will ensure that patients facing physical barriers such as transportation and lacking alternative means to access care can do so in a safe and medically appropriate manner. Essential Access Health, a cosponsor of this bill writes, telehealth has become a crucial pathway for patients to access care during the pandemic and will remain so beyond the PHE period. Access to telehealth decreases barriers, increases access to care for patients, and reduces no-show rates significantly. Telephonic care in particular has become a reliable modality of care. Recent surveys conducted by the California HealthCare Foundation found that most patients would like the option of a telephone or video visit and would likely choose a phone or video visit over an in-person visit whenever possible. Essential Access Health conducted a survey of Title X provider network last fall and respondents reported that on average, nearly 60% of their remote sexual and reproductive health visits were conducted by telephone. Another cosponsor, Planned Parenthood Affiliates of California, writes centers now provide about 25% of their visits through telehealth – which includes both video and audio-only visits. The majority of Planned Parenthood's telehealth visits are for birth control, sexually transmitted infections screening and treatment, pregnancy counselling, gender affirming care, PrEP and PEP follow-ups, and UTI screenings. All visits, regardless of modality, meet the time, medical decision-making, and documentation requirements of billing codes to be reimbursed.

ARGUMENTS IN OPPOSITION: Teledoc Health believes provisions of this bill would create a dual standard that would make compliance impossible for providers furnishing services only through video synchronous or audio-only interactions. The consequences of this provision could mean that patients in California will have fewer options from which to choose when seeking virtual care. ATA Action writes that state policymakers should set rational guidelines that are fair to the provider of such services while reflecting the cost saving the effective use of telehealth technologies offers to the health care system. ATA Action suggest adopting language which grants provider the flexibility to accept reimbursement amounts less than the amount those providers would charge for the same service in

person. ATA Action has several concerns particularly with language establishing a patient-provider relationship via telehealth, patient consent, patient choice in telehealth modality, and certain referral provisions.

ASSEMBLY FLOOR: 78-0, 6/1/21

SUBJECT: Preschool and child care and development services: family fees

SOURCE: Association of American University Women
California Child Care Resource and Referral Network
Child Care Law Center
Child Care Resource Center
Parent Voices

DIGEST: This bill prohibits, subject to an appropriation, (1) family fees for state preschool and child care services from exceeding one percent of a family's monthly income; and (2) family fees from being charged to a family with an adjusted monthly family income below 75 percent of the state median family income.

Senate Floor Amendments of 8/25/22 specify that state preschool program providers and providers of subsidized child care are not to absorb any reduction in

pay for the space or voucher on account of any waiver of or reduction in family fees; and prohibit the number of contracted spaces or vouchers from being reduced on account of any reduction in the collection of family fees.

Senate Floor Amendments of 8/22/22 (1) delete the requirement that state preschool and subsidized child care providers be reimbursed for the full contract regardless of any reduction in family fees; and, (2) clarify that the provisions of this bill are to become effective on July 1, 2023 (upon an appropriation).

ANALYSIS:

Existing law:

1) Requires the Department of Social Services (DSS), in consultation with the California Department of Education (CDE), to establish a fee schedule for families using preschool and child care and development services. Existing law requires the family fee schedule to retain a single flat monthly fee per family and to differentiate between fees for part-time care and full-time care. (Welfare and Institutions Code § 10290)

2) Requires, families to be assessed a single flat monthly fee for all state-subsidized services, using the most recently approved family fee schedule, including California state preschool program services administered by CDE, based on income, certified family need for full-time or part-time care services, and enrollment, and prohibits family fees from being based on actual attendance. (WIC § 10290)

3) Requires DSS to design the new family fee schedule based on the most recent census data available on state median family income in the past 12 months, adjusted for family size. (WIC § 10290)

4) Prohibits the revised fees shall not exceed 10 percent of the family's monthly income, and requires DSS to first submit the adjusted fee schedule to the Department of Finance for approval. (WIC § 10290)

5) Prohibits family fees from being collected for the 2021–22 and 2022–23 fiscal years, and requires, during the 2022–23 fiscal year, contractors to reimburse subsidized childcare providers for the full amount of the certificate or voucher without deducting family fees. (WIC § 10290)

6) Requires the Superintendent of Public Instruction (SPI) to use the fee schedule developed in conjunction with DSS for families using full-day state preschool services. (Education Code § 8252)

7) Requires that families be assessed a single flat monthly fee for all state subsidized early childhood services received, including California state preschool program services and services received through childcare and development programs administered by DSS. (EC § 8252)

8) Prohibits family fees from being collected for the 2022–23 fiscal year, and requires contractors to reimburse providers operating within a family childcare home education network for the full amount of the certificate or voucher without deducting family fees. (EC § 8252)

This bill prohibits, subject to an appropriation, (1) family fees for state preschool and child care services from exceeding one percent of a family's monthly income; and, (2) family fees from being charged to a family with an adjusted monthly family income below 75 percent of the state median family income. Specifically, this bill:

1) Provides, subject to an appropriation expressly for this purpose, an exception to family fees from being set at no higher than 10 percent of the family's monthly income, to prohibit family fees from:

   a) Exceeding one percent of the family's monthly income.

   b) Being charged to a family with an adjusted monthly family income below 75 percent of the state median income.

2) Specifies that state preschool program providers and providers of subsidized child care are not to absorb any reduction in pay for the space or voucher on account of any waiver of or reduction in family fees.

3) Prohibits the number of California state preschool program and childcare contracted spaces, and the number of childcare contracted spaces and vouchers, from being reduced on account of any reduction in the collection of family fees.

4) Deletes obsolete references to family fees for the 2021-22 fiscal year.

Comments

Need for the bill. According to the author, "California is one of the most expensive states for parents who need child care services. In Los Angeles County and statewide, the average two-parent working family spends around 20% of their annual income on child care. There is broad consensus among child care experts and economists that spending more than 7% of annual income on child care places economic stress on working families.

"While there are a number of State and Federally funded programs that help families pay for child care, families who need care must still pay family fees which can make subsidized care unaffordable. With limited disposable income, working families struggle to pay high fees and are forced to make difficult decisions about basic needs such as food, shelter, clothing, and keeping up with fee payments. A recent study found that, in Sacramento County, at least 10% of families paying fees are on payment plans for back fees they have been unable to afford.

"These families are at significant risk of losing their subsidized child care which can, in turn, jeopardize their employment or education. This places them at greater risk of reliance on the state's other welfare programs and prevents families from rising out of poverty. As families earn raises and their income rises, so do their family fees, which then erases any economic gains they have made. The current fee structure penalizes families for their hard work.

"Childcare is facing a statewide crisis due to the impacts of the pandemic that has magnified pre-existing disparities and created intense financial insecurity for childcare workers, childcare centers and parents. In light of the public health crisis and economic recession, parents need affordable child care now more than ever in order to continue providing for their families."

Family fee schedule. As noted in the Assembly committee analyses, the federal Child Care and Development Fund requires states to establish a sliding fee scale for families that receive childcare services supported by federal funds. The fee: (1) helps families afford childcare and enables choice of a range of childcare options; (2) is based on income and the size of the family and may be based on other factors as appropriate, but shall not be based on the cost of care or amount of subsidy payment; (3) provides for affordable family fees that are not a barrier to families receiving assistance; and (4) at the state's discretion, allows for family fees to be waived for families whose incomes are at or below the poverty level for a family of the same size, that have children who receive or need to receive protective services, or that meet other criteria established by the state.

Existing law requires DSS, in consultation with CDE, to establish a family fee schedule that is based on specified factors, and requires a new family fee schedule be developed annually. Family fees have been waived since July 2020 and are statutorily waived through the 2022-23 fiscal year. The family fee schedule that was to go into effect July 1, 2020, include the following examples (not a comprehensive list): (1) A family of four with a monthly income of approximately $3,500 would have been assessed a $70 monthly family fee for part-time care, or a $140 monthly family fee for full-time care; (2) A family of four with a monthly

income of approximately $6,000 would have been assessed a $236 monthly family fee for part-time care, or a $471 monthly family fee for full-time care. The DSS will need to develop a new family fee schedule before the waiver of all family fees expires on July 1, 2023.

Extends temporary waivers of family fees for lowest-income and further caps fees for families who must pay. On April 4, 2020, the Governor signed Executive Order N-45-20, enacted in SB 820 (Committee on Budget and Fiscal Review, Chapter 110, Statutes of 2020) to facilitate child care for children of essential critical infrastructure workers by waiving certain programmatic and administrative requirements in response to the COVID-19 pandemic. Amongst the provisions was a waiver of family fees for all subsidized children in July and August 2020.

Additionally, SB 820 included a waiver of family fees, from September 1, 2020, to June 30, 2021, for families when all children in the family enrolled in subsidized early learning and care programs remain at home - either for distance learning services when the facility is closed, when all currently enrolled children are not able to receive in-person services due to a public health order, or for families sheltering-in-place due to COVID-19.

AB 210 (Committee on Budget, Chapter 62, Statutes of 2002), a budget trailer bill, extends the waiver of family fees through the 2022–23 fiscal year.

This bill essentially continues the fee waiver into perpetuity, if funded, for families with an adjusted monthly family income below 75 percent of the state median income. It is unknown how many additional families would not be required to pay fees. This bill additionally lowers the cap on family fees (for families above the 75 percent threshold) from up to 10 percent, to up to one percent, of a family's monthly income.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, this bill's provisions would be subject to an appropriation. The DSS estimates ongoing General Fund costs of approximately $134.2 million to restrict family fees from exceeding one percent of the family's monthly income and prohibit families with an adjusted monthly family income below 75 percent of the state median family income from being assessed a family fee. This estimate assumes that the monthly family fees assessed under this bill's criteria based on October 2021 enrollment would be $69,000 per month, with annual family fees at $1.75 million based on full enrollment of funded slots across the programs. The full year cost to waive family fees would be $135.97 million.

SUBJECT: School safety: crisis intervention and targeted violence prevention program

SOURCE: Author

DIGEST: This bill requires the governing board of a school district, on or before August 1, 2023, to adopt policies for the establishment of a crisis intervention and targeted violence prevention program that assists in the identification and assessment of individuals who may be experiencing a crisis or whose behavior may indicate a threat to the health and safety of themselves, pupils, school staff, or other community members, and that provides referrals to appropriate services.

ANALYSIS:

Existing law:

1) Requires each school district or county offices of education (COE) to be responsible for the overall development of all comprehensive school safety plans for its schools operating kindergarten or any of grades 1 through 12. (Education Code § 32281)

2) Specifies that the schoolsite council or a school safety planning committee is responsible for developing the comprehensive school safety plan. (EC § 32281)

3) Requires that the comprehensive school safety plans include an assessment of the current status of school crime committed on school campuses and at school-related functions and identification of appropriate strategies and programs to provide or maintain a high level of school safety and address the school's procedures for complying with existing laws related to school safety, including child abuse reporting procedures; disaster procedures; an earthquake emergency procedure system; policies regarding pupils who commit specified acts that would lead to suspension or expulsion; procedures to notify teachers of dangerous pupils; a discrimination and harassment policy; the provisions of any schoolwide dress code; procedures for safe ingress and egress of pupils, parents, and school employees to and from school; a safe and orderly environment conducive to learning; and rules and procedures on school discipline. (EC § 32282)

4) Requires the comprehensive school safety plan to be evaluated at least once a year. (EC § 32282)

5) Encourages that, as school safety plans are reviewed, plans be updated to include clear guidelines for the roles and responsibilities of mental health professionals, community intervention professionals, school counselors, school resource officers, and police officers on school campuses, if the school district employs these professionals. (EC § 32282.1)

6) Requires the comprehensive school safety plan to be submitted annually to the school district or COE for approval and requires a school district or COE to notify the California Department of Education (CDE) by October 15 of every year of any school that is not in compliance. (EC § 32288)

7) Requires the Superintendent of Public Instruction (SPI), for apportionment purposes, to credit to a local educational agency (LEA) a material loss of average daily attendance (ADA) due to the following reasons, provided the loss has been established to the satisfaction of the SPI by affidavits of the members of the governing board or body of the LEA:

    a) Fire;
    b) Flood;
    c) Impassable roads;
    d) Epidemic;

e) Earthquake;
f) The imminence of a major safety hazard as determined by the local law enforcement agency; or
g) A strike involving transportation services to pupils provided by a non-school entity. (EC § 46392)

8) Requires the governing board of a school district to give diligent care to the health and physical development of pupils, and authorizes the district to employ properly certified persons for the work. (EC § 49400)

This bill requires the governing board of a school district, on or before August 1, 2023, to adopt policies for the establishment of a crisis intervention and targeted violence prevention program that assists in the identification and assessment of individuals who may be experiencing a crisis or whose behavior may indicate a threat to the health and safety of themselves, pupils, school staff, or other community members, and that provides referrals to appropriate services. Specifically, this bill:

1) Requires the school safety plan to include, but not be limited to both assessing the current status of school crime committed on school campuses and at school-related functions and identifying appropriate strategies and programs that will provide or maintain a high level of school safety and address the school's procedures for complying with existing laws related to school safety, which shall include the development as specified.

2) Requires each schoolsite council or school safety planning committee, in developing and updating a comprehensive school safety plan, shall, where practical, consult, cooperate, and coordinate with other schoolsite councils or school safety planning committees.

3) Specifies that the comprehensive school safety plan may be evaluated and amended, as needed, by the school safety planning committee, but shall be evaluated at least once a year, to ensure that the comprehensive school safety plan is properly implemented. An updated file of all safety-related plans and materials shall be readily available for inspection by the public.

4) Requires the comprehensive school safety plan, as written and updated by the schoolsite council or school safety planning committee, shall be submitted for approval as specified.

5) Requires the CDE to maintain and conspicuously post on its internet website a compliance checklist for developing a comprehensive school safety plan, and to update the checklist when necessary.

6) Establishes the School Threat Assessment and Resource Act that requires a LEA to adopt policies, on or before August 1, 2023, consistent with the National Threat Assessment Center, for the establishment of a crisis intervention and targeted violence prevention program, and referral process, that will identify and assess pupils whose health and safety of themselves, pupils, school staff, or other community members may be at risk, that are not imminent, with the goal to establish a safe school climate built on a culture of safety, respect, trust, and emotional support.

7) Requires each LEA to establish at least one multidisciplinary threat assessment and resource team (Team), new or consisting of a LEAs existing Team, at the county, district, regional, local district, or schoolsite levels, that includes, but is not limited to, school and school district personnel, behavioral health professionals, and at least one law enforcement representative, as specified, and sets other minimums such as designating a liaison to consultant with the Team and providing wraparound services with community partners to the extent those services are available.

8) Clarifies that a school district may decide to not include a law enforcement representative on their multidisciplinary threat assessment and resource team if the district consults with a representative from law enforcement in the writing and development of the policies adopted as specified.

9) Requires the team to coordinate with the appropriate special education administrator or instructor if the team has identified a pupil with an individualized education program (IEP).

10) Requires the policies adopted by the team to include, among other things, identifying how the team will identify threats and distinguish the types of threatening behavior that may represent a physical threat to the school community, identifying members within the school community to whom threatening behaviors should be reported, what methods should be used to make those reports, and the steps to be taken after a report is received, and establishing procedures that include practices for maintaining documentation, identifying sources of information, reviewing records, and conducting interviews consistent with existing law, including individual privacy and medical rights.

11) Encourages LEAs, in adopting policies, to include, among other things, investigative themes to guide the assessment process such as motive, communications, stressors, and planning, as recommended by the National Threat Assessment Center.

12) Authorizes the governing board of an LEA to establish a committee, or use an existing committee, to oversee the Team or Teams, with members that may, but are not limited to, having expertise in human resources, civil rights, school administration, behavioral or mental health, law enforcement, and parents and guardians. The oversight committee may require periodic reports from multidisciplinary threat assessment and resource teams that summarize and evaluate the activities of the teams consistent with existing laws, including those protecting individual privacy and medical rights.

13) Encourages an LEA that has a memorandum of understanding (MOU) with a local law enforcement agency to incorporate the applicable requirements of this section into that MOU.

14) Declares the Legislature encourages all plans, to the extent that resources are available, to include policies and procedures aimed at the prevention of bullying as comprehensive school safety plans are reviewed and updated.

15) Requires CDE to make materials pertaining to multidisciplinary threat assessment and resource teams available on its internet website and is encouraged to use and is encouraged to use existing resources that are consistent with the recommendations by the National Threat Assessment Center.

16) Clarifies that nothing in this section shall limit the ability of local educational agencies to bypass the multidisciplinary threat assessment and resource team and contact law enforcement when there is an imminent threat to the safety of pupils, school staff, or community members and does not alter the requirements or authority of law enforcement as specified in Education Code.

17) Specifies that after law enforcement conducts an investigation, as specified in Education Code, and determines that there is no threat or perceived threat that is imminent, may refer the identified pupil to the LEA's multidisciplinary threat assessment and resources team.

18) Clarifies a school district and any of its employees acting within the scope of their employment are immune from civil liability for any damages allegedly caused by, arising out of, or relating to compliance with the requirements of

this bill, but shall not apply to an act by the school district, its employee, or any other person acting in gross negligence, a crime, and a violation of any provision within this bill.

19) Finds and declares that a safe school environment is crucial to the healthy academic and social development of pupils and when implemented correctly, the use of behavioral threat assessment teams do not result in disparities among Black, Hispanic, and White pupils in terms of out-of-school suspensions, school transfers, or legal actions.

20) Declares that it is the intent of the Legislature to create and promote a safe school climate built on a culture of safety, respect, trust, and emotional support, including by encouraging communication, intervening in conflicts and bullying, and empowering pupils to share their concerns.

21) States that it is the intent of the Legislature hat schools develop comprehensive school safety plans using existing resources, including the materials and services of the partnership, pursuant to this chapter. It is also the intent of the Legislature that schools use the handbook developed and distributed by the School/Law Enforcement Partnership Program entitled "Safe Schools: A Planning Guide for Action" in conjunction with developing their plan for school safety.

Comments

1) *Need for the bill.* According to the author "There have been 36 shootings on California school campuses since 2000. Because research has shown that school shooters often share their school shooting ideations and/or suffer from mental health issues, early identification and marshaling of resources may avert a potential shooting and provide treatment to the student. A safe school environment is crucial to the healthy academic and social development of students. Perceived and actual safety also impact a range of outcomes, from staff retention to parent satisfaction. Most importantly, student perceptions of safety affect their academic achievement and engagement in learning. AB 99 is a proactive and comprehensive approach toward early detection and intervention for students who may harm themselves or others. Because there are so many threats made by students on school campuses, most of a passing and harmless nature, it is important to quickly identify threats that are substantive and pose a continuing risk to the school community. Using a multi-tiered system of support (MTSS), teams consisting of specially trained teachers, administrators, mental health professionals, special needs educators,

and law enforcement, will be able to rapidly identify, respond, and support students headed toward crisis."

2) *Traumatic events.* According to a 2018 study by the Pew Research Center, the majority of U.S. teens fear a shooting could happen at their school, and most parents share their concerns. Firearms are a leading cause of morbidity and mortality in the United States and accounted for more than 36,000 deaths and nearly 85,000 injuries in 2015. In 2020, California saw a troubling rise of more than 500 homicides, the largest jump in state history since record-keeping began in 1960. Gun homicides drive the rise. California saw 1,658 homicides in 2019; the number climbed to 2,161 in 2020—an increase of 503 homicides (or 30.3%). Of the 503 additional homicides, 460, or 91%, were gun related deaths. While the 2020 homicide rate is far lower than past peaks, the past year deviates from historically low rates of the last decade. Over the past few years, gun violence has risen to the forefront of public consciousness. The consequences of gun violence are more pervasive and affect entire communities, families, and children. With more than 25% of children witnessing an act of violence in their homes, schools, or community over the past year, and more than 5% witnessing a shooting. A 2004 report by the United States Secret Service and United States Department of Education found that over two-thirds of school shooters acquired the gun (or guns) used in their attacks from their own home or that of a relative (68 percent).

3) *Threat Assessment Teams in School.* According to the U.S Department of Education (USDE) "A threat assessment team is a group of officials that convene to identify, evaluate, and address threats or potential threats to school security. Threat assessment teams review incidents of threatening behavior by students (current and former), parents, school employees, or other individuals. Some schools may need assistance in determining whether a health or safety emergency exists in order to know whether a disclosure may be made under FERPA's health or safety emergency provision. Accordingly, members of a threat assessment team might include officials who can assist in making such decisions, such as school principals, counselors, school law enforcement unit officials, as well as outside medical and mental health professionals and local law enforcement officers."

   To aid in these efforts, the U.S. Secret Service National Threat Assessment Center (NTAC), in 2019 studied 41 incidents of targeted school violence that occurred at K-12 schools in the United States from 2008 to 2017 and published a report to help schools across the country establish threat assessment teams. This report builds on 20 years of NTAC research and guidance in the field of

threat assessment by offering an in-depth analysis of the motives, behaviors, and situational factors of the attackers, as well as the tactics, resolutions, and other operationally-relevant details of the attacks. The analysis suggests that many of these tragedies could have been prevented, and supports the importance of schools establishing comprehensive targeted violence prevention programs as recommended by the Secret Service *in Enhancing School Safety Using a Threat Assessment Model: An Operational Guide for Preventing Targeted School Violence*.
(https://www.secretservice.gov/sites/default/files/reports/2020-10/USSS_NTAC_Enhancing_School_Safety_Guide.pdf)

Threat assessment teams can discern serious from non-serious threats and help identify the appropriate response to each situation, which may not include law enforcement. CDE also provides information on its website to help schools develop school safety plans (https://www.cde.ca.gov/ls/ss/vp/cssp.asp)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, this bill would expand the existing comprehensive school safety plans mandate resulting in additional Proposition 98 General Fund costs that could be significant, potentially in the millions to tens of millions of dollars each year. This estimate assumes a cost of at least $10,000 - $20,000 for each school district in the state. However, a precise estimate will depend on how a school district implements this bill's requirements. Alternatively, this bill could lead to pressure for the state to increase the K-12 Mandates Block grant. (Proposition 98 General Fund)

ARGUMENTS IN SUPPORT: According to the Peace Officers Research Association of California "This bill would require the governing board of a school district to adopt policies on or before August 1, 2023, for the establishment of a crisis intervention and targeted violence prevention program that assists in the identification and assessment of individuals who may be experiencing a crisis or whose behavior may indicate a threat to the health and safety of themselves, pupils, school staff, or other community members and that provides referrals to appropriate services. AB 99 would also require those policies to include, among other things, provisions that identify the types of threatening behavior that may represent a physical threat to the school community and provisions requiring each school district to establish at least one multidisciplinary threat assessment and resource team, as provided."

ARGUMENTS IN OPPOSITION: According to ACLU California Action "Although school threat assessment sounds appealing, threat assessments do not serve their intended purpose of protecting students and preventing violence in school, including mass shootings. A major study of thousands of cases found that there was no report of a shooting that was attempted and averted by threat assessments. The study determined that it cannot be concluded that the threat assessment process prevented threats from being carried out. Furthermore, the report concluded that many threats were not serious and might not have been carried out even in the absence of a threat assessment. Threat assessments instead embed more police into schools, pushing youth of color and students with disabilities out of schools and into the school to prison pipeline. Numerous studies have found that students receiving special education were 3.9 times more likely, and Black students were 1.3 times more likely, to be referred for threat assessment. Students with disabilities are more likely to check certain common risk assessment factors and are more likely to be subsequently suspended after threat assessment referral than other students. Threat assessments can often lead to labeling and stigmatization, exclusionary discipline, referral to law enforcement for low-level or disability related behavior, arrest, immigration consequences, and violations of student privacy. Furthermore, AB 99 requires that threat assessment teams include behavioral health professionals. Given that a third of California's schools have no such staff, however, these team would lack the perspective of a school-based mental health professional who understands the unique needs and background of the particular school and student body. Rather than invest in processes that subject students to law enforcement involvement, we urge you to take steps to ensure there is adequate funding for community-based and school-based counselors, social

workers, psychologists and other evidence-based approaches like MTSS, restorative justice, and PBIS."

SUBJECT: Pupil attendance at community colleges: College and Career Access Pathways partnerships: county offices of education

SOURCE: Author

DIGEST: This bill allows county offices of education (COEs) and adult education programs to enter into College and Career Access Pathways (CCAP) partnerships with community college districts and removes the sunset date and special admit cap for the CCAP program.

Senate Floor Amendments of 8/22/22 include double-jointing language to avoid chaptering issues.

ANALYSIS:

Existing law:

1) Authorizes a student to undertake courses at a California Community College (CCC) if the governing board of a school district, upon recommendation of the principal of the student's high school and with parental consent, determines a student would benefit from advanced or vocational work. The student may

attend the CCC during any session or term as a special part-time or full-time student and take one or more courses of instruction offered at the CCC. Provides methods for parents to petition for students to attend community college courses and methods for appeals in case of a denial. Includes criteria for allocating attendance and funding for high school students who attend courses at the community college.

2) Stipulates that summer courses may be offered if a student has met specified conditions and if the principal has not recommended summer session attendance to more than 5% of the student's grade population in the previous year. All physical education courses must adhere to the 5% threshold and the following courses are exempt until January 1, 2027:

   a) Courses which are part of a College and Career Access pathway and meet specified criteria; or

   b) Courses which are lower division, college-level courses that are either a college-level course that are part of the Intersegmental General Education Transfer Curriculum or applies towards the general education requirements of the CSU; or,

   c) Courses which are a college-level occupational course, as defined.

3) Authorizes, until January 1, 2027, the governing board of a CCC district to enter into a CCAP partnership with the governing board of a school district or the governing body of a charter school for the purpose of offering or expanding dual enrollment opportunities for pupils who may not already be college bound or who are underrepresented in higher education, with the goal of developing seamless pathways from high school to community college for career technical education or preparation for transfer, improving high school graduation rates, or helping high school pupils achieve college and career readiness.

4) Requires that the CCAP partnership agreement be approved by the respective governing boards of the CCC district and the school district or governing body of the charter school. The governing boards or body shall:

   a) Consult with and consider the input of the appropriate local workforce development board in order to determine to what extent the career technical education pathways are aligned with regional and statewide employment needs; and,

b) Present, take comments from the public on, and approve or disapprove of the CCAP partnership agreement at an open public meeting of the governing board of the district or governing body of the charter school.

5) Requires the CCC Chancellor's Office to report to the Department of Finance (DOF) and Legislature annually on the amount of full-time equivalent students (FTES) claimed by each CCC district for high school pupils enrolled in non-credit, non-degree applicable, and degree applicable courses; and provides that, for purposes of receiving state apportionments, CCC districts may only include high school students within the CCC district's report on FTES if the students are enrolled in courses that are open to the general public, as specified. Additionally, current law requires the governing board of a CCC district to assign a low enrollment priority to special part-time or full-time students in order to ensure that these students do not displace regularly admitted community college students.

6) Requires the Chancellor of the CCC, on or before January 1, 2021, to prepare a summary report that includes an evaluation of the CCAP partnerships, an assessment of the growth of special admits system wide and by campus, and recommendations for improving the CCAP partnerships, as specified. Requires the report to be transmitted to the Legislature, the DOF, and the Superintendent of Public Instruction (SPI). Requires Chancellor of the CCC to annually collect specified data from the CCC and school districts participating in a CCAP partnership. Requires the data to include:

   a) The total number of high school pupils by school site enrolled in each CCAP partnership, disaggregated by gender and ethnicity;

   b) The total number of CCC courses taken by CCAP partnership participants disaggregated by category, type, and school site;

   c) The total number and percentage of courses successfully completed by CCAP partnership participants disaggregated by course category, type, and school site;

   d) The total number of FTEs generated by the CCAP partnership community college district participants; and,

   e) The total number of full-time equivalent students served online by the CCAP partnership college district participants.

This bill:

1) Removes the CCAP sunset date of January 1, 2027.

2) Authorizes the governing board of a CCC district to enter into a CCAP partnership with the governing board of a COE for the purpose of offering or expanding dual enrollment opportunities for pupils who may not already be college bound or who are underrepresented in higher education, with the goal of developing seamless pathways from high school to community college for career technical education or preparation for transfer, improving high school graduation rates, or helping high school pupils achieve college and career readiness.

3) Defines "high school" to include a community school, continuation high school, juvenile court school, or adult education program offering courses for high school diplomas or high school equivalency certificates.

4) Requires the governing board of a COE when entering into a CCAP partnership to do the following:

   a) Consult with, and consider the input of the appropriate local workforce development board to determine the extent to which the pathways are aligned with regional and statewide employment needs; and,

   b) Present, take comments from the public on, and approve or disapprove the CCAP partnership agreement at an open public meeting of the COE governing board.

5) Requires the CCAP partnership agreement to identify a point of contact for the participating CCC and the participating COE.

6) States that a CCC district may enter into an agreement with a COE outside its service area as long as there exists an established agreement permitting the CCAP partnership between the local CCC and the CCC district seeking the CCAP partnership.

7) Requires that both the CCC district and the COE comply with local collective bargaining agreements and all state and federal reporting requirements regarding the qualifications of teachers and faculty who teach a CCAP partnership course.

8) Requires that the CCAP partnership agreement include whether the CCC district or COE will be the employer of record for purposes of assignment monitoring and reporting to the COE, and which will assume reporting responsibility pursuant to federal teacher quality mandates.

9) Requires that any remedial course taught by CCC faculty on a high school campus be offered to high school pupils who do not meet grade 10 or 11 level standards as determined by the COE. These courses will be the result of a collaborative effort between high school and CCC faculty to deliver innovative remediation courses for the purpose of ensuring the student is prepared for college-level work upon graduation.

10) Prohibits the duplication of state funding for instructional activity provided to a student participating in a CCAP agreement.

11) Requires that a high school student, identified as a special part-time or full-time student at the CCC, who attends a CCAP agreement course is credited or reimbursed as specified, if the participating COE has not received funding for the same instructional activity.

12) Requires the Chancellor of the CCC to annually collect data from the CCCs and COEs participating in a CCAP partnership. Requires the data to include:

    a) The total number of high school pupils by school site enrolled in each CCAP partnership, disaggregated by gender and ethnicity;

    b) The total number of CCC courses taken by CCAP partnership participants disaggregated by category, type, and school site;

    c) The total number and percentage of courses successfully completed by CCAP partnership participants disaggregated by course category, type, and school site;

    d) The total number of full-time equivalent students generated by the CCAP partnership community college district participants; and,

    e) The total number of full-time equivalent students served online by the CCAP partnership college district participants.

13) Removes the 10 percent cap of full time equivalent students claimed as special admits.

Comments

1) *Need for this bill.* According to the author's office, "Research has demonstrated that dual enrollment students are more likely to enter college, persist to completion, and graduate. The positive effects of dual enrollment on college degree attainment are more pronounced for low-income students than their more affluent peers. AB 102 ensures that dual enrollment continues to be available to California students, including youth involved in the juvenile justice system, as an approach to close the persistent achievement and equity gap. AB 102 shows a commitment to expanding and improving CCAP. This program yields public savings by reducing the time it takes to earn a college degree and improving the efficiency and effectiveness of higher education."

2) *Concurrent enrollment.* Concurrent enrollment provides pupils the opportunity to enroll in college courses and earn college credit while still enrolled in high school. Generally, a pupil is allowed to concurrently enroll in a community college as a "special-admit" while still attending high school, if the pupil's school district determines that the pupil would benefit from "advanced scholastic or vocational work." Special-admit students have typically been advanced pupils wanting to take more challenging coursework or pupils who come from high schools where Advanced Placement or honors courses are not widely available. Additionally, programs such as middle college high schools and early college high schools use concurrent enrollment to offer instructional programs for at-risk pupils that focus on college preparatory curricula. These programs are developed through partnerships between a school district and a community college.

3) *College Access and Career Pathways program.* The CCAP program allows for partnerships between school and community college districts such that high school students dual-enroll in up to 15 community college units per term; students may enroll in no more than four courses per term. The goals of CCAP are to develop seamless pathways from high school to community college for career technical or general education transfer, improve high school graduation rates, or help high school students achieve college and career readiness. Courses must be part of an academic program defined in a CCAP agreement and meet criteria for both a high school diploma and an Associate of Arts or other credentials.

Unlike other concurrent enrollment options, CCAP offers dual enrollment as a pathway, rather than a series of disconnected individual courses, and provides greater flexibility in the delivery of courses at the high school campus.

4) *CCAP Legislative Report.* In April, the CCC Chancellor's Office released its legislative report on the CCAP program. Dual enrollment is growing overall and in terms of student participation; however, the number of community colleges participating in CCAP remains limited. The Chancellor's Office estimates that 37.5% of students participating in dual enrollment as all special admits were in CCAP partnerships.

   The report includes several recommendations, including eliminating the sunset date for CCAP partnerships, as this bill proposes. The Chancellor's Office believes that eliminating the sunset date will allow CCAP partnerships to continue and mature, as well as remove any worry that new partnerships will have to start from scratch in a few years.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, this bill could result in additional, unknown Proposition 98 General Fund costs in apportionment funds for community colleges to admit additional high school students as part of CCAP partnerships. A precise amount would depend on the number of additional students that participate in these partnerships and take community college courses as a result of the bill, which is difficult to determine. For example, if 50 additional FTES statewide participated at the current funding rate of $5,457 per student, the costs would be $272,850. However, there could be longer-term cost savings to the extent that student enrollment in CCAP partnerships results in fewer students requiring remedial coursework when they enroll in public postsecondary institutions after high school.

The Chancellor's Office indicates the potential need for additional resources depending on how many COEs choose to participate in CCAP and whether there is a significant increase in CCAP agreements.

DIGEST: This bill makes the California Racial Justice Act of 2020 (CRJA), which prohibits the state from seeking or obtaining a conviction or sentence on the basis of race, ethnicity, or national origin, apply retroactively and makes other changes.

Senate Floor Amendments of 8/24/22 (1) delete definition of "juror" and the provision in the bill relating to prospective jurors; (2) amend the provision in the

bill that requires the state to prove that the violation was harmless beyond a reasonable doubt in specified cases to instead require the state to prove beyond a reasonable doubt that the violation did not contribute to the judgment; and (3) add double-jointing language with SB 467 (Wiener) to avoid chaptering issues.

ANALYSIS:

Existing law:

1) Establishes the CRJA which prohibits the state from seeking or obtaining a criminal conviction or seeking, obtaining or imposing a sentence on the basis of race, ethnicity, or national origin. (Pen. Code, § 745.)

2) Provides that a violation of the CRJA is established if the defendant proves, by a preponderance of the evidence, any of the following:
   a) The judge, an attorney in the case, a law enforcement officer involved in the case, an expert witness, or juror exhibited bias or animus towards the defendant because of the defendant's race, ethnicity, or national origin;
   b) During the defendant's trial, in court and during the proceedings, the judge, an attorney in the case, a law enforcement officer involved in the case, an expert witness, or juror, used racially discriminatory language about the defendant's race, ethnicity, or national origin, or otherwise exhibited bias or animus towards the defendant because of the defendant's race, ethnicity, or national origin, whether or not purposeful, except as specified;
   c) The defendant was charged or convicted of a more serious offense than defendants of other races, ethnicities, or national origins who commit similar offenses and are similarly situated, and the evidence establishes that the prosecution more frequently sought or obtained convictions for more serious offenses against people who share the defendant's race, ethnicity, or national origin in the county where the convictions were sought or obtained;
   d) A longer or more severe sentence was imposed on the defendant than was imposed on other similarly situated individuals convicted of the same offense, and longer or more severe sentences were more frequently imposed for that offense on people that share the defendant's race, ethnicity, or national origin than on defendants of other races, ethnicities, or national origins in the county where the sentence was imposed; or,
   e) A longer or more severe sentence was imposed on the defendant than was imposed on other similarly situated individuals convicted of the same offense, and longer or more severe sentences were more frequently imposed for the same offense on defendants in cases with victims of one race, ethnicity, or national origin than in cases with victims of other races,

ethnicities, or national origins, in the county where the sentence was imposed. (Pen. Code, § 745, subd. (a).)

3) States that a defendant may file a motion in the trial court, of if judgement has been imposed, may file a petition for writ of habeas corpus or a motion to vacate the conviction or sentence in a court of competent jurisdiction alleging a violation of the CRJA. (Pen. Code, § 745, subd. (b).)

4) States that if a motion is filed in the trial court and the defendant makes a prima facie showing of a violation of the CRJA, the trial court shall hold a hearing. (Pen. Code, § 745, subd. (c).)

5) Provides that at the hearing, evidence may be presented by either party, including but not limited to, statistical evidence aggregate data, expert testimony, and the sworn testimony of witnesses. The court may also appoint an independent expert. (Pen. Code, § 745, subd. (c)(1).)

6) States that the defendant shall have the burden of proving a violation of the CRJA by a preponderance of the evidence and at the conclusion of the hearing, the court shall make findings on the record. (Pen. Code, § 745, subd. (c)(2) & (3).)

7) Authorizes a defendant to file a motion requesting disclosure to the defense of all evidence relevant to a potential violation of the CRJA in the possession or control of the state. A motion under this section shall describe the type of records or information the defendant seeks and upon a showing of good cause, the court shall order the records to be released. Upon a showing of good cause, and if the records are not privileged, the court may permit the prosecution to redact information prior to disclosure. (Pen. Code, § 745, subd. (d).)

8) States that notwithstanding any other law, except for an initiative approved by the voters, if the court finds, by a preponderance of the evidence, a violation of the CRJA, the court shall impose a remedy specific to the violation found from the following list: (a) declare a mistrial, if requested by the defendant; (b) discharge the jury panel and empanel a new jury; and (c) dismiss enhancements, special circumstances, special allegations, or reduce one or more charges if the court determines that it would be in the interest of justice. (Pen. Code, § 745, subd. (e).)

9) States that when a judgment has been entered, if the court finds that a conviction was sought or obtained in violation of the CRJA, the court shall vacate the conviction and sentence, find that it is legally invalid, and order new

proceedings consistent with the CRJA's provisions. (Pen. Code, § 745, subd. (e)(2)(A).

10) States that when a judgement has been entered, if the court finds that only the sentence was sought, obtained or imposed in violation of the CRJA, the court shall vacate the sentence, find that it is legally invalid and impose a new sentencing, but shall not impose a sentence greater than that previously imposed. (Pen. Code, § 745, subd. (e)(2)(B).)

11) Prohibits the imposition of the death penalty on a defendant when the court finds that there has been a violation of the CRJA. (Pen. Code, § 745, subd. (e)(3).)

12) Clarifies that the remedies available under the CRJA do not foreclose any other remedies available under the United States Constitution, the California Constitution, or any other law. (Pen. Code, § 745, subd. (e)(4).)

13) States that the CRJA applies to adjudications and dispositions in the juvenile delinquency system and that its provisions do not prevent the prosecution of hate crimes. (Pen. Code, § 745, subd. (f) & (g).)

14) Provides the following definitions for purposes of the CRJA:
    a) "More frequently sought or obtained" or "more frequently imposed" means that statistical evidence or aggregate date demonstrate a significant difference in seeking or obtaining convictions or in imposing sentences comparing individuals who have committed similar offenses and are similarly situated, and the prosecution cannot establish race-neutral reasons for the disparity.
    b) "Prima facie showing" means that the defendant produces facts that, if true, establish that there is a substantial likelihood that a violation of the CRJA has occurred. "Substantial likelihood" requires more than a mere possibility, but less than a standard of more likely than not.
    c) "Racially discriminatory language" means language that, to an objective observer, explicitly or implicitly appeals to racial bias, including, but not limited to, racially charged or racially coded language, language that compares the defendant to an animal, or language that references the defendant's physical appearance, culture, ethnicity, or national origin. Evidence that particular words or images are used exclusively or disproportionately in cases where the defendant is of a specific race, ethnicity, or national origin is relevant to determining whether language is discriminatory.

d) "State" includes the Attorney General, a district attorney, or a city prosecutor. (Pen. Code, § 745, subd. (h).)

15) States that when a defendant shares a race, ethnicity, or national origin with more than one group, the defendant may aggregate data among groups to demonstrate a violation of the CRJA. (Pen. Code, § 745, subd. (i).)

16) States that the CRJA applies prospectively in cases in which judgement has not been entered prior to January 1, 2021. (Pen. Code, § 745, subd. (j).)

This bill:

1) Provides that the CRJA shall also apply retroactively as follows:
   a) Commencing January 1, 2023, to all cases in which, at the time of the filing the petition raising a claim of a violation of the CRJA, the petitioner is sentenced to death or to cases in which a motion to vacate a judgment is filed because of actual or potential immigration consequences related to the conviction or sentence, regardless of when the judgment or disposition became final;
   b) Commencing January 1, 2024, to all cases in which, at the time of the filing of the petition raising a claim of a violation of the CRJA, the petitioner is currently serving a sentence in the state prison or in a county jail on a realigned felony, or committed to DJJ for a juvenile disposition, regardless of when the judgment or disposition became final;
   c) Commencing January 1, 2025, to all cases raising a claim of a violation of the CRJA in which judgment became final for a felony conviction or juvenile disposition that resulted in commitment to DJJ on or after January 1, 2015; and,
   d) Commencing January 1, 2026, to all cases raising a claim of a violation of the CRJA in which judgment was for a felony conviction or juvenile disposition that resulted in commitment to DJJ, regardless of when the judgment or disposition became final.

2) States that for petitions that are filed in cases for which judgment was entered before January 1, 2021, and only in those cases, if the petition is based on exhibited bias or animus or the use of discriminatory language, as provided, the petitioner shall be entitled to relief as specified, unless the state proves beyond a reasonable doubt that the violation did not contribute to the judgment.

3) States that if the motion is based in whole or in part on conduct or statements by the judge, the judge shall disqualify themselves from any further proceedings.

4) Provides that a motion made at trial shall be made as soon as practicable upon the defendant learning of the alleged violation. A motion that is not timely may be deemed waived, in the discretion of the court.

5) States that for purposes of the motion and hearing, out-of-court statements that the court finds trustworthy and reliable, statistical evidence, and aggregated data are admissible for the limited purpose of determining whether a violation of the CRJA has occurred.

6) Clarifies that the defendant need not prove intentional discrimination.

7) Clarifies that if a defendant files a motion requesting disclosure to the defense of relevant evidence, the court may subject disclosure to a protective order in order to protect a privacy right or privilege and if a statutory privilege or constitutional privacy right cannot be adequately protected by redaction or protective order, the court shall not order release of the records.

8) Provides that if the court finds that the only violation of the CRJA that occurred is based on a defendant being charged or convicted of a more serious offense than defendants of other races, ethnicities, or national origins, the court may modify the judgment to a lesser included or lesser related offense. On resentencing, the court shall not impose a new sentence greater than that previously imposed.

9) Clarifies that the CRJA also applies to dispositions in the juvenile delinquency system and adjudications to transfer a juvenile case to adult court.

10) Amends the definition of "more frequently sought or obtained" or "more frequently imposed" to mean that the totality of the evidence demonstrates a significant difference in seeking or obtaining convictions or in imposing sentences comparing individuals who have engaged in similar conduct and are similarly situated, and the prosecution cannot establish race-neutral reasons for the disparity.

11) Provides that evidence of the above may include statistical evidence, aggregated data, or nonstatistical evidence. Statistical significance is a factor the court may consider, but is not necessary to establish a significant difference. In evaluating the totality of the evidence, the court shall consider whether systemic and institutional racial bias, racial profiling, and historical

patterns of racially biased policing and prosecution may have contributed to, or caused differences observed in, the data or impacted the availability of data overall.

12) States that race-neutral reasons shall be relevant factors to charges, convictions, and sentences that are not influenced by implicit, systemic, or institutional bias based on race, ethnicity, or national origin.

13) Defines "relevant factors" as applied to sentencing to mean the factors in the California Rules of Court that pertain to sentencing decisions and any additional factors required to or permitted to be considered in sentencing under the state law and under the state and federal constitutions.

14) Defines "similarly situated" to mean that factors that are relevant in charging and sentencing are similar and do not require that all individuals in the comparison group are identical. A defendant's conviction history may be relevant to the severity of the charges, convictions, or sentences. If it is a relevant factor and the defense produces evidence that the conviction history may have been impacted by racial profiling or historical patterns of racially biased policing, the court shall consider the evidence.

15) Provides that a defendant may appear remotely, and the court may conduct the hearing through the use of remote technology, unless counsel indicates that the defendant's presence in court is needed.

16) Makes conforming changes to existing law on habeas corpus relief based on a violation of the CRJA.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- *Courts:* Judicial Council estimates increased workload costs between the following ranges resulting from this bill: $1.4 million to $2 million in the first year, $1.1 million to $1.7 million in the second year, and $900,000 to $1.4 million for the third and fourth years each. While the superior courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to increase the amount appropriated to backfill for trial court operations. The 2022-23 budget includes an ongoing annual allocation of $151.5 million and a one-time allocation of $10.3 million backfill from the General Fund in order to address declining revenue to the Trial Court Trust Fund.

- *Department of Justice (DOJ):* The DOJ reports estimated costs of $509,000 in 2022-23 (3.0 PY), $2.1 million in 2023-24 (8.0 PY), $2 million in 2024-25 (8.0 PY), $1.3 million in 2025-26 and 2026-27 (5.0 PY) (General Fund). Actual costs would depend on the number of petitions that would be filed and appealed.
- *Transporting habeas petitioners:* Unknown, potentially-significant workload costs in the thousands of dollars to the Department of Corrections and Rehabilitation (CDCR) to supervise and transport individuals in state custody to attend hearings related to this measure. Actual costs would depend on the number of incarcerated persons who file a petition and make a prima facie showing that they are entitled to relief and for whom remote/video appearances at the proceedings are not exercised. (General Fund)
- *Incarceration savings:* Unknown potentially savings annually in reduced state incarceration costs for individuals whom the courts resentence to a shorter term of imprisonment and/or release from state facilities resulting from the successful prosecution of a writ of habeas corpus. The estimated per capita cost to detain a person in a state prison for 2022-23 is $111,446 annually, with an annual marginal rate per person of over $13,000. Actual savings would depend on the number of individuals who are resentenced and who avoid incarceration in state prison because of this measure. Aside from marginal cost savings per individual, however, CDCR would experience an institutional cost savings only if the number of persons incarcerated decreased to a level that would effectuate the closing of a prison yard or wing (General Fund).

OPPOSITION: (Verified 8/24/22)

California District Attorneys Association

California State Sheriffs' Association
California Police Chiefs Association
Crime Victims United

ARGUMENTS IN SUPPORT: According to Smart Justice California, "With the Racial Justice Act, California took a profound step forward in addressing institutionalized and implicit racial bias in our criminal courts by empowering defendants to object to charges, convictions, or punishment if they can show that anyone involved in the case – a judge, attorney, officer, expert witness or juror – demonstrated bias during the process, or if they can show statistical evidence of demographic inequities in charges, convictions, or sentences for the same crime. However, this legislation was prospective; it excluded those who had been harmed prior to January 1, 2021 by the racial bias and discrimination that has long permeated our criminal legal system.

"If prohibiting racism in our courts and providing a person a means to remedy racial bias in their case is the right thing to do, it is the right thing to do for everyone. Those with prior, racially biased convictions and sentences deserve equal justice under the law and have waited. Providing a mechanism for retroactive relief will allow the state to realize significant court and correctional savings."

ARGUMENTS IN OPPOSITION: According to the California District Attorneys Association, "AB 256 would dramatically expand the scope of AB 2542 without seeing how any of these issues created by AB 2542 have been resolved.

". . . [T]he current law imposes heavy costs on local counties without any reimbursement. Setting aside the costs of appeals, delays and interruptions of trials, and the costs of evidentiary hearings that necessarily will involve untold witnesses and expert testimony on both sides, the costs of having to review thousands of files is astronomical. To illustrate: Let's say a defendant brings a simple motion challenging a prosecution on grounds defendant is allegedly charged with a "more serious" offense (i.e., assault with a deadly weapon or great bodily injury) than similarly situated defendants from different groups based on "similar" conduct. The number of files relevant to such a motion in Santa Clara County would be close to 1,500 files - each would have to be identified, located, reviewed, and redacted (to comply with state constitutional requirements and protect privileges) just to provide relevant discovery. Even if each file could be identified, located, reviewed, and redacted in an hour's total time, that would require a prosecutor working approximately 8 months (at a cost of over $100,000) to handle a single discovery request. And that assumes that the only files used for comparison are from a single year. AB 256 would, based on a relatively low

threshold showing, require pulling, reviewing, and redacting files potentially going back 100 years since the bill sets out no time frames or limits on the relevant comparison groups.

"These cost concerns prompted this Legislature to limit the scope of AB 2542 so that it did not apply retroactively. AB 256 overturns this critical limitation. Since every defendant belongs to at least two or more racial, ethnic, or national origin groups, practically every single conviction that has ever occurred in California can now be re-opened and potentially reversed. The defendant can mandate lengthy and costly evidentiary hearings involving the testimony of attorneys, law enforcement officers, jurors, experts, or other members of the criminal justice system without even having to show that a claimed violation of section 745 is more likely than not. Indeed, such hearings can be mandated based simply on defendant showing more than mere possibility that a violation has occurred.

"And the difficulties in trying to defend against the allegation and the ramifications of dismissal are compounded because relevant statistics are more likely to be absent, relevant witnesses (i.e., judges, attorneys, prosecutors, officers, etc.,) may be dead or unavailable. Retrying the cases after years or decades will often be impossible."

SUBJECT: Food facilities and employment

SOURCE: Fight for $15
SEIU California

DIGEST: This bill enacts the Fast Food Accountability and Standards Recovery Act to, among other things, establish the Fast Food Council within the Department of Industrial Relations, with a sunset date of January 1, 2029, for the purpose of establishing sectorwide minimum standards on wages, working hours, and other working conditions related to the health, safety, and welfare of, and supplying the necessary cost of proper living to, fast food restaurant workers.

Senate Floor Amendments of 8/25/22 1) revise the composition, duties and authority of the Fast Food Council; 2) strike the franchisor and franchisee joint and

several liability provisions of the bill; 3) limit the Fast Food Council's authority to set standards, as specified; 4) set a $22 cap on the wages the Council can promulgate, adjusted annually for CPI based on the state's minimum wage law, as specified; 5) increase the applicability to large fast food establishments of 100 or more; 6) add a January 1, 2029 sunset date on these provisions; and 7) specify annual wage adjustments for fast food restaurant employees after January 1, 2029 if the council is no longer operative.

ANALYSIS:

Existing law:

1) Provides that the California Occupational Safety and Health Act assures safe and healthful working conditions for all California workers by authorizing the enforcement of effective standards, assisting and encouraging employers to maintain safe and healthful working conditions, and by providing for research, information, education, training, and enforcement in the field of occupational safety and health. (Labor Code §6300)

2) Establishes the Division of Occupational Safety and Health (known as Cal/OSHA) within the Department of Industrial Relations (DIR) to, among other things, protect and improve the health and safety of workers by proposing, administering, and enforcing occupational safety and health standards, providing outreach, education, and assistance, and issuing permits, licenses and registrations. (Labor Code §140 et seq.; §6300 et seq.)

3) Establishes, also within DIR, the Division of Labor Standards and Enforcement (DLSE) under the direction of the Labor Commissioner (LC) and authorizes them, as specified, to investigate employee complaints and enforce labor laws. (Labor Code §79 et seq.)

4) Authorizes citations to be issued to employers when Cal/OSHA has evidence that an employee was exposed to a hazard in violation of any requirement enforceable by the division, including the exposing, creating and controlling employer. (Labor Code §6400)

This bill:

1) Defines "Fast food chain" to mean a set of restaurants consisting of 100 or more establishments nationally that share a common brand, or that are characterized by standardized options for decor, marketing, packaging, products, and services.

2) Defines "Fast food restaurant" to mean any establishment in the state that is part of a fast food chain and that, in its regular business operations, primarily provides food or beverages in the following manner:

   a) For immediate consumption either on or off the premises.
   b) To customers who order or select items and pay before eating.
   c) With items prepared in advance, including items that may be prepared in bulk and kept hot, or with items prepared or heated quickly.
   d) With limited or no table service, but table service does not include orders placed by a customer on an electronic device.

3) Defines fast food restaurant "franchisee" as a person to whom a fast food restaurant franchise is granted, and defines fast food restaurant "franchisor" as a person who grants or has granted a fast food restaurant franchise.

4) Defines "working conditions" to include, but are not limited to, wages, conditions affecting fast food restaurant employees' health and safety, security in the workplace, the right to take time off work for protected purposes, and the right to be free from discrimination and harassment in the workplace.

5) Exempts from the definition of fast food restaurant, specified bakeries and restaurants located and operating within a grocery establishment.

Establishment of the Fast Food Council

6) Prohibits the Council from promulgating, petitioning for, issuing, amending, or repealing, any standards, rules, or regulations until after the Director of Industrial Relations *receives a petition approving the creation of the council signed by at least 10,000 California fast food restaurant employees*. The bill specifies who is an eligible fast food restaurant employee for purposes of the petition, what information must be included and includes a presumption that the signatures on the petition are genuine.

7) Requires the Director of Industrial Relations, within 45 days of receipt of the petition, to verify whether the petition meets the requirements and if so, requires the Council to convene its first meeting within 90 days.

8) Provides that the Council shall be comprised of the following 10 members:

   a) One representative from the Department of Industrial Relations.
   b) Two representatives of fast food restaurant franchisors.
   c) Two representatives of fast food restaurant franchisees.

d) Two representatives of fast food restaurant employees.
e) Two representatives of advocates for fast food restaurant employees.
f) One representative from the Governor's Office of Business and Economic Development.

9) Specifies that the Governor shall appoint the state agency, fast food restaurant employees, fast food restaurant franchisees and fast food restaurant franchisor representatives and grants the Assembly and the Senate the right to each appoint one representative of an advocate for fast food restaurant employees. The appointment shall be at will of each appointing power and serve for a term of four years, shall receive $100 for each day of attendance at meetings of the Council and other official business of the council in addition to their actual necessary traveling expenses, as specified.

10) Requires the Governor to designate the chairperson of the council from the membership and the chairperson shall be responsible for convening the council.

11) Authorizes the Council to employ necessary assistants, officers, experts and other employees as it deems necessary, subject to appropriation, as specified.

Purpose and Authority of the Fast Food Council

12) Enacts the Fast Food Accountability and Standards (FAST) Recovery Act that establishes the Fast Food Council (Council), within DIR, to establish sectorwide minimum fast food restaurant employment standards on wages, working conditions and training that are necessary or appropriate to protect and ensure the welfare, well-being and security of fast food restaurant workers.

13) Prohibits the Council from promulgating regulations that do the following:

a) Create new paid time off benefits, such as paid sick leave or paid vacation, except that paid time off benefits do not include paid rest periods.

b) Address predictable scheduling, except that predictable scheduling does not include reporting time pay. Authorizes the Council to create a report containing a recommendation to the Legislature to enact laws regarding predictable scheduling.

14) Authorizes the Council to issue, amend, or repeal any rules and regulations as necessary to carry out its duties and specifies that where there is a conflict

between the standards, rules, or regulations issued by the council and those issued by another state agency, the Council's proposals shall prevail.

15) Authorizes the Council to provide direction to, and coordinate with, the Governor, executive agencies, and local agencies regarding the health, safety, and employment of fast food restaurant workers.

16) Requires that all standards, rules, and regulations adopted, amended, or repealed by the Council comply with the rule-making requirements of the Administrative Procedures Act.

17) Requires the Council to submit, to the appropriate committees on labor of each house of the Legislature, a report that contains a copy of that standard, repeal, or amendment and a statement of the council's reasons for adoption by January 15. *The standard, repeal, or amendment shall not take effect before October 15 of that same year, and specifies that nothing herein restrains the Legislature from enacting legislation that prevents a standard, repeal or amendment from taking effect.* However, specifies that these provisions do not apply to emergency standards.

18) Provides that any minimum wage established by the Council, from January 1, 2023 to December 31, 2023, inclusive, shall not be greater than twenty-two dollars ($22) per hour. Also provides that on January 1, 2024, and annually thereafter, the highest hourly minimum wage that may be established by the council shall increase by no more than the lesser of one of the following, rounded to the nearest ten cents:

    a) 3.5 percent.
    b) Adjusted to the U.S. Consumer Price Index, as specified.

19) Specifies that standards promulgated by the council shall be subject to any suspension of increases in the statewide minimum wage made pursuant to subdivision (d) of Section 1182.12.

20) Specifies that standards promulgated by the council shall not alter or amend the requirements in the California Retail Food Code (Part 7 (commencing with Section 113700) of Division 104 of the Health and Safety Code).

21) Authorizes the Legislature to request information from the Council to facilitate a review of the Council's performance and standards, as specified.

22) Provides that nothing in the bill shall be construed to give the Council the authority to create or amend statutes.

23) Provides that to the extent that any minimum standards are found by the Council to be reasonably necessary to protect restaurant worker health and safety and fall within the jurisdiction of the Occupational Safety and Health Standards Board, the Council is not authorized to promulgate standards, but rather shall petition the board with the proposed changes and requires the board to consider and respond to the petition, as specified.

24) Requires the Council to conduct a full review of the minimum fast food restaurant health, safety and employment standards every three years and requires it to hold meetings or hearings no less than every six months, as specified, providing the opportunity for the public to be heard on issues of fast food sector employment.

25) Authorizes a county or city with a population greater than 200,000 to establish a Local Fast Food Council, as specified, to periodically hold meetings that are open to the public allowing fast food restaurant employees the opportunity to be heard on issues of local fast food restaurant health, safety and employment conditions. Specifies that the Local Fast Food Council shall operate independently from the state Council.

26) Specifies that all meetings of a Local Fast Food Council shall be subject to the Ralph M. Brown Act.

27) Requires the Labor Commissioner, the Division of Occupational Safety and Health and the Civil Rights Department to ensure compliance with standards promulgated by the Council, as specified and per existing law. Also specifies that in any successful civil action to enforce, the court may grant injunctive relief in order to obtain compliance and shall award costs and reasonable attorney's fees.

28) Specifies that the standards set by the council shall not supersede a standard covered by a valid collective bargaining agreement that meets specified criteria including one that provides a regular hourly rate of pay not less than 30 percent more than the state minimum wage for those employees.

29) Specifies that nothing in the bill shall be construed to require local health departments to enforce standards issued by the council.

30) Authorizes the Council to issue any other rules, regulations, and guidance necessary for the enforcement of these provisions.

31) Includes a January 1, 2029 sunset date on the Fast Food Council provisions and species that on this date, the council shall cease operations.

Anti-Retaliation Protections

32) Prohibits a fast food restaurant operator from discharging or in any manner discriminating or retaliating against any employee for any of the following:

    a) Making a workplace safety or health complaint or disclosing information to the media, the Legislature, a watchdog or community based organization, or a governmental agency, as specified, on violations or noncompliance.
    b) Testifying or participating in a proceeding relating to employee or public health or safety, or any state or local Fast Food Council proceeding.
    c) Refusing to perform work the employee had reasonable cause to believe would violate employment, public health and safety laws or would pose a substantial risk to the health or safety of the employee(s) or the public.

33) Grants a cause of action to any worker discharged, discriminated or retaliated against for exercising their rights and creates a rebuttable presumption of unlawful discrimination or retaliation for any adverse action taken against the worker within 90 days of fast food restaurant operators having knowledge of the worker exercising their rights.

34) Specifies that on January 1, 2029, and annually thereafter, if the council is no longer operative, the minimum wage for fast food restaurant employees in effect on the immediately preceding December 31 shall be increased by the lesser of one of the following rounded to the nearest ten cents ($0.10):

    a) 3.5 percent.
    b) Adjusted to the U.S. Consumer Price Index, as specified.

Findings and Declarations

35) Finds and declares, among other things, that existing enforcement and regulatory mechanisms have proved inadequate in ensuring fast food restaurant worker health, safety, and welfare necessitating sector wide standards identified by an expert body of subject matter experts.

36) Declares that nothing in this act is intended to usurp or encroach on the Legislature's ability to establish standards governing the health, safety, welfare, and employment of workers, including fast food restaurant workers.

37) Declares the intent of the Legislature to ensure that legislators have sufficient time to review and, as appropriate, take legislative action with respect to fast food standards established by the Council before those can take effect.

Background

Workplace Health and Safety of Fast Food Workers: California employers have a legal obligation to provide and maintain a safe and healthful workplace for their employees as well as abide by minimum wage and labor standards required under the Labor Code. In spite of these protections, wage theft and labor law violations continue to be a problem many workers face. According to a DIR Labor Enforcement Task Force April 16, 2021[1] report to the Legislature, over the last couple of years, nine out of ten businesses inspected were found to be out of compliance by at least one LETF partner agency. In addition, LETF assessed over $8.3 million in wages due to workers.

[NOTE: Please see the Senate Labor, Public Employment and Retirement Committee analysis on this bill for more background information on the franchisor and franchisee business model and impacts of the joint liability proposed by this bill.]

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Staff estimates that this bill would result in special funds costs in the millions of dollars, likely reaching the tens of millions of dollars, on an annual basis across multiple units within the DIR.
- Additionally, this bill could result in cost pressures to the courts. Specifically, the bill would authorize a cause of action for any employee of a fast food restaurant who is discharged, discriminated or retaliated against for exercising rights established by the bill. Although courts are not funded on the basis of workload, increased pressure on the courts and staff may create a need for increased funding for courts to perform existing duties.

ARGUMENTS IN SUPPORT: According to the bill's sponsors, SEIU California and the Fight for $15 and a union, "Recent reports have exposed high rates of wage theft, violence, retaliation for organizing and health and safety violations at California fast food locations. The COVID-19 pandemic exacerbated many of these pre-existing problems. Over the last two years alone, fast food workers have gone on strike more than 2,300 times to call attention to these issues. At the same time, fast food franchisees – the small business owners who operate the vast majority of fast food locations in the state - struggle under a franchise system where global corporations set most of the terms and receive most of the profits while leaving franchisees solely liable for labor law compliance. Even well-meaning franchisees often find themselves squeezed to the point of cutting corners and skirting laws at the expense of worker pay and safety."

"AB 257 is landmark legislation that corrects this power imbalance by guaranteeing California fast food workers and fast food franchisees a seat at the

table to improve workplace standards and the ability to hold corporate franchisors accountable for providing safe and equitable working conditions."

ARGUMENTS IN OPPOSITION: According to a coalition in opposition of this bill, including the California Restaurant Association, International Franchise Association, and the California Chamber of Commerce, "While the purported purpose of the legislation of providing safe working standards is laudable and something we all support, its method for doing so equates to a dismantling of the franchise business model in California. Franchisee employees are the backbone of the business model and their rights, working conditions and overall protections are of the utmost importance to all involved. During a time when all small business owners, franchised and non-franchised, are doing everything possible to keep the lights on and the doors open during the COVID-19 pandemic, this legislation is ill-timed and would do more to hurt businesses and their employees then help them."

Other employers also argue that, "AB 257 singles out the restaurant industry for the creation of a sectoral council that will raise the cost to operate a counter service restaurant in California. The state maintains the strongest labor laws and highest minimum wage in the country, all of which the restaurant industry must follow. The counter service restaurant industry does not flout existing law and does not have disproportional violations compared to other industries that necessitate the creation of a sectoral council."

SUBJECT: California Environmental Quality Act: exemption: prescribed fire, thinning, and fuel reduction projects

SOURCE: Author

DIGEST: This bill extends the sunset from January 1, 2023, to January 1, 2026, for the exemption from the California Environmental Quality Act for prescribed fire, thinning, or fuel reduction projects undertaken on federal lands to reduce the risk of high-severity wildfire that have been reviewed under the National Environmental Policy Act, as specified.

ANALYSIS:

Existing federal law:

1) Establishes the National Environmental Policy Act (NEPA), which requires federal agencies to consider the significant environmental impacts of proposed actions, as specified. *42 U.S. Code §§4321 et seq.*

2) Establishes the Good Neighbor Authority, which authorizes the federal government to enter into good neighbor agreements with state, tribal, and county governments to carry out forest, rangeland, and watershed restoration services, including to reduce hazardous fuels and improve fish and wildlife habitat, among others. *16 U.S. Code §2113a.*

Existing state law:

1) Establishes the California Department of Forestry and Fire Protection (CalFire) in the California Natural Resources Agency (CNRA). CalFire is responsible for, among other things, fire protection and prevention.

2) Establishes the California Environmental Quality Act (CEQA), which requires a lead agency, as defined, to prepare an environmental impact report for a project, as defined, that may have a significant effect on the environment. *Public Resources Code (PRC) §§21000 et seq.*

3) Exempts, pursuant to SB 901 (Dodd, Chapter 626, Statutes of 2018), from CEQA[1] prescribed fire, thinning, or fuel reduction projects undertaken on federal lands to reduce the risk of high-severity wildfire that have been reviewed under NEPA if either of the following is satisfied:

   a) The primary role of a state or local agency is providing funding or staffing for those projects.

   b) A state or local agency is undertaking those projects pursuant to the federal Good Neighbor Authority or a stewardship agreement with the federal government, as specified.

4) Provides that authority for the federal lands CEQA exemption shall remain operative only if the CNRA Secretary certifies on or before January 1 of each year that NEPA or other federal laws that affect the management of federal forest lands in California have not been substantially amended on or after August 31, 2018.

5) Requires CalFire to annually report to the relevant policy committees of the Legislature the number of times the federal lands CEQA exemption was used.

6) Sunsets the federal lands CEQA exemption on January 1, 2023.

[1] Referred to in this analysis as the "federal lands CEQA exemption."

This bill:

1) Extends the sunset from January 1, 2023, to January 1, 2026, for the exemption from CEQA for prescribed fire, thinning, or fuel reduction projects undertaken on federal lands to reduce the risk of high-severity wildfire that have been reviewed under NEPA if both of the following apply:

   a) Significant impacts identified in the environmental impact statement for the project are avoided or mitigated.

   b) Either the primary role of a state or local agency is providing funding or staffing for those projects OR a state or local agency is undertaking those projects pursuant to the federal Good Neighbor Authority or a stewardship agreement with the federal government, as specified.

2) Requires the lead agency to file a notice of exemption with the Office of Planning and Research and with the relevant county clerk, as specified.

3) Requires:

   a) If the lead agency is not CalFire, the lead agency to file a notice with CalFire that includes specified information, including the location and type of project, acres to be treated, and anticipated long-term impacts, among others.

   b) If the lead agency is CalFire, CalFire must maintain the information specified in (a) for its projects.

4) Requires CalFire, on or before January 1, 2025, to submit a report to the Legislature with the information specified in 3)a) and b), above.

5) Provides that this bill does not require reimbursement for reasons specified.

Background

In 2018, the Legislature passed SB 901 (Dodd, Chapter 626), which was the product of a conference committee to address wildfire issues. SB 901 sought to establish a comprehensive framework to address and prevent catastrophic wildfires, including prevention and planning by the state's electric utilities, management of the state's forests, chaparral, and other lands to prevent and defend against wildfires, and standards to stabilize electric utilities in the event of extensive liability resulting from claims under inverse condemnation. SB 901 created the federal lands CEQA exemption, with a January 1, 2023 sunset date.

Comments

How has the exemption been used thus far? Existing law only requires CalFire to report the number of times this CEQA exemption was used. It does not require any other agencies to report their use of the exemption. According to CalFire, it only reports its use of the exemption. According to the most recent report, issued by CalFire on October 28, 2021:

> For the 2019 calendar year, this streamlining option was utilized 49 times by CAL FIRE and expedited fuels reduction, pest management, prescribed fire, fuel break, and thinning and reforestation projects across the State. Twenty-nine counties benefited from projects that were exempted from CEQA, with 18 located in the northern region of the State, and 11 located in the southern region.
>
> For the 2020 calendar year, the exemption was utilized 19 times by CAL FIRE, which represents a 61% decrease from the implementation year. This decrease is very likely attributable to the response to the COVID-19 epidemic. Five national parks, spanning 17 counties, benefited from the utilization of this exemption, with 14 counties located in the northern region and three in the southern region. This data point should not be extrapolated into a trend as it only reflects a very narrow subset of fuel management projects conducted by the State, namely State-funded projects that intersect with federal land.

	Year 1 - 2019	Year 2 - 2020	Year 3 - 2021	Year 4 - 2022
Exemption Use	49	19	0	0

> It should be noted, as stated above, that these totals are only for CAL FIRE projects. Since other public entities are able to utilize the exemption and are not required to file a Notice of Exemption, CAL FIRE cannot accurately report on usage by other public entities.

The Sierra Nevada Conservancy (SNC) has also kept track of its use of the exemption and reported the following in May 2022:

In 2021, the Sierra Nevada Conservancy (SNC) used the SB 901 CEQA exemption to expedite investment of its Fiscal Year 20-21 early action funds. 12 of the 15 projects that the SNC funded with early action dollars used this exemption. These projects accounted for 90% of all the SNC's early action funds, or approximately $17 million dollars.

Because of the SB 901 CEQA exemption, the SNC was able to get funding for fuels reduction projects on the ground only three months after Governor Newsom signed the early action wildfire package. Without exemption, CEQA review for those projects would likely have taken at least four to six months and cost as much as $35,000 per project. With that delay, many projects might still be awaiting approval and would likely have missed the 2021 field season altogether.

"From 2020 to 2021, the SNC has used the SB 901 CEQA exemption to quickly invest $41.6 million across 32 projects, which will reduce the risk of severe wildfire across approximately 37,000 acres of forestland. At its June 2022 Board Meeting, SNC expects to use the exemption to invest an additional $13.8 million in 9 projects treating almost 7,000 acres. This will bring the grand total of SNC investments relying on the SB 901 CEQA exemption to $55.4 million dollars, 41 projects, and 44,000 acres.

A trailer bill complication. The Newsom Administration released trailer bill language on May 19, 2022, that would impact the same exemption. As it relates to this exemption, that language would:

- Make the exemption permanent.

- Expand the list of projects eligible for the CEQA exemption to include reforestation, habitat restoration, and associated ancillary activities.

- Expand the eligible lands for which this CEQA exemption would apply to any lands, not just federal lands, where NEPA has been completed for an eligible, proposed project. This would include projects on state, local, tribal, or private lands for which the federal government provides funding.

- Eliminate the requirement that CalFire report the use of the exemption to the Legislature and instead require lead agencies to file notices of exemption with the Governor's Office of Planning and Research and the relevant county clerk, as specified.

- Eliminate the requirement that the CNRA Secretary annually certify that NEPA and other relevant federal forest management laws have not been substantially changed in the last year and instead authorize the Secretary to report those changes to the Legislature.

- Create an additional CEQA exemption for tribal programs that are subject to the Tribal Natural Resources Council or tribal cultural burn and tribal wildfire funding.

Recent efforts to partner with the federal government. Improving forest and wildlands stewardship in California is complicated by the fact that the state itself only owns about 3% of the approximately 33 million acres of these lands in the state. The federal government owns 57% (the U.S. Forest Service manages over 20 million acres in 18 National Forests, and the National Park Service and the U.S. Bureau of Land Management manage an additional almost three million acres between them). Private landowners own the remaining 40%.

In recognition of this, the Newsom Administration signed a Memorandum of Understanding (MOU) with the U.S. Forest Service in 2020, to improve forest health. Further, in 2021, the Wildfire and Forest Resilience Task Force released *California's Wildfire and Forest Resilience Action Plan* to accelerate efforts to restore the health and resilience of the state's forests, grasslands and natural places. One goal of this plan seeks to increase treatment on federal lands through expanded use of the federal government's Good Neighbor Authority and shared stewardship agreements.

This bill seeks to make it easier to partner with the federal government to treat federal lands to reduce the risk of high-severity wildfire.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Unknown but potentially significant costs over the next three years (General Fund, special fund) for CalFire, the Sierra Nevada Conservancy, and other state departments seeking to utilize the CEQA exemption in this bill to avoid or mitigate any significant project impacts identified pursuant to NEPA.

- Unknown costs (General Fund) for CalFire to prepare and submit the required report to the Legislature.

ARGUMENTS IN SUPPORT: According to the author, "California's wildfires continue to wreak havoc on communities throughout the state. AB 267 will allow California to continue streamlining wildfire prevention projects in federally managed forests. It is essential that the state continue carrying out prescribed fire, thinning, and fuel reduction projects that are on federal lands and have already been thoroughly reviewed under NEPA."

SUBJECT: Veteran services: notice

SOURCE: Author

DIGEST: This bill requires specified governmental agencies to include, at their next scheduled update, additional questions on their intake and application forms to determine whether a person is affiliated with the Armed Forces of the United States.

Senate Floor Amendments of 8/25/22 (1) remove the Department of Motor Vehicles (DMV) and the Department of Fish and Wildlife from the required list of agencies who will need to update the specified forms in the bill, (2) allow state agencies to transmit specified information to the California Department of Veteran Affairs (CalVet) via paper or electronically, instead of just electronically, (3) require agencies to transmit information to CalVet annually, and (4) require after

updating their intake or application forms, each agency to transmit to CalVet the information received pursuant to this bill.

ANALYSIS:

Existing law:

1) Requires every state agency that requests on any written form or written publication, or through its Internet Web site, where a person is a veteran, to request that information only in the following format: "Have you ever served in the United States military?"

2) Establishes a number of state agencies, including the Department of Aging, State Department of Developmental services, Housing Finance Agency, California State University, Department of Community Services and Development, Department of Fish and Wildlife, Department of Motor Vehicles, Department of Rehabilitation, Employment Development Department, and the State Department of Health Care Services.

This bill:

1) Requires the California Community Colleges, Board of Governors of the California Community Colleges, Department of Aging, State Department of Developmental Services, Housing Finance Agency, California State University, Department of Community Services and Development, Department of Rehabilitation, and the State Department of Health Care Services, and requests that the University of California, at the next scheduled update of intake or application forms, include in those forms the following:

    a) An option for a person to indicate whether they are affiliated with the Armed Forces of the United States by asking both of the following in a manner that substantially conforms to the following format:

        i) "Have you ever served in the United States military?"
        ii) "Are you the spouse, legal partner, parent, or child of a person who is serving in or who has served in the United States military?"

    b) An option for a person who identifies as being military affiliated to give their consent to be contacted regarding eligibility to receive state or federal veterans benefits by including a specified statement.

c) A statement of potential eligibility to receive state and federal services, with contact information from the Department of Veterans Affairs (CalVet).

2) Requires each state agency to transmit to CalVet specified contact information if provided regarding each person who has identified that they, or their spouse, legal partner, parent, or child, served in the Armed Forces of the United States since the last data transfer and has consented to be contacted about military, veterans, family member, or survivor benefits.

3) Provides that after updating their intake or application forms each agency shall transmit to CalVet the information received at least annually.

4) Provides that information obtained by CalVet pursuant to this bill shall be used only to assist individuals in accessing benefits and shall not be disseminated except as needed for that purpose.

5) Provides that the Regents of the University California shall comply with the provisions of this bill only if the University of California Regents adopt a resolution consenting to the provisions of this bill.

6) Provides that this section does not apply to intake or application forms that are provided to a person after any intake or application forms that have included information required by the provisions of this bill.

7) Provides that for intake or application forms that are developed centrally, but require federal approval, agencies shall request federal approval for changes made pursuant to this bill.

Comments

Purpose of the bill. According to the author's office, "ensuring that our veteran population is provided with the information and resources they need to find the benefits that best suit them should be a priority in California. Closing the disconnect between service providers and service members is just one step we can take to ensure our veterans are treated with the respect they deserve."

Current law. Existing law does not require a state agency to inquire as to whether a person is a veteran, but requires every state agency that requests the information on a written form, or on its internet website, to only ask, "Have you ever served in

the United States military?" Prior to 2014, although there was no specific language required in statute, agencies generally asked, "Are you a veteran?" At the time, some veterans believed they were not veterans because they had never served in combat or because they were women.

This bill requires a specified list of 12 state agencies likely to provide services to or come in contact with veterans to include questions on their applications and intake forms, in a new prescribed format, as to whether a person and the person's immediate family members served in the U.S. military and, if yes, whether the person will grant consent to the agency to send relevant information to CalVet. The bill does not require an applicant to answer the questions, preserving the right of a veteran to not disclose their status.

Veterans in California. According to CalVet, California is home to 1.8 million veterans, representing eight percent of the total U.S. veteran population. CalVet anticipates that the state will receive an additional 30,000 discharged members of the armed services each year for the next several years, more than any other state. Historically, the largest demand for benefits and services for veterans occurs immediately after discharge and again as the veteran population ages and requires greater access to medical facilities and long-term care services. With the substantial number of veterans under the age of 30 leaving the military after deployments to the wars in Iraq and Afghanistan, coupled with a considerably large population of Vietnam veterans who are now approaching a period in the their lives where they will need greater access to medical and long-term care, California will surely be faced with a sustained spike in earned services and benefits.

Related/Prior Legislation

AB 1911 (Maienschein, 2020) would have required each state agency to electronically transmit to CalVet specified information regarding each applicant who has identified that they or a family member has served in the United States Armed Forces and has consented to be contacted about military, veterans, family member, or survivor benefits. (Never heard in the Assembly Veterans Affairs Committee)

AB 258 (Chavez, Chapter 227, Statutes of 2013) required every state agency that requests on any written form or written publication, or through its Internet Web site, whether a person is a veteran, to request that information is a specified manner.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee,

1) CalVet anticipates minor and absorbable costs to intake additional information from the specified state agencies.

2) The Department of Health Care Services (DHCS) notes:

   a) One-time cost of $143,000 in Fiscal Year (FY) 2022-23 (Total Funds; $71,500 General Fund),
   b) Ongoing costs of $134,000 (Total Funds; $67,000 General Fund).
   c) Unknown, potentially significant costs to implement an electronic transmission capability in DHCS's current information technology systems—the California Healthcare Eligibility, Enrollment, and Retention System and the Statewide Automated Welfare System.
   d) Minor costs to update applications and forms.

3) DMV notes, one-time cost in the millions of dollars to automate over 50 forms to gather and electronically submit veteran data to CalVet (Motor Vehicle Account).

4) The California Department of Aging (CDA) notes:

   a) Minor and absorbable costs to collect additional data from participants, as current CDA data collection software and database contracts specify that local providers update systems without additional cost upon new state or federal data collection mandates.
   b) Potential unknown costs to electronically transmit data to CalVet, dependent on the required format of the data, frequency of submission, and associated staff time.

5) The Department of Fish and Wildlife notes costs of $1.61 million in the first year and $645,000 ongoing to update applications, update regulations, collect and digitize paper applications, and create a centralized data transfer system to transfer data to CalVet.

6) In addition, additional unknown, potentially significant state reimbursable mandated costs for community college districts to revise application forms and transmit data to CalVet. Actual costs would depend upon a determination by the

Commission on State Mandates, and the number and amount of individual claims that are deemed reimbursable.

7) The California Housing Finance Agency does not anticipate a fiscal impact.

8) Finally, potential unknown costs to other agencies listed in the bill to update forms, make changes to automated data collection and application information technology systems, and transmit information to CalVet.

ARGUMENTS IN SUPPORT: According to supporters of the bill, "while the support network for military veterans is robust, many veterans remain unaware of the resources that the state and the federal government offers. For various reasons, a service member or veteran may not readily self-identify, either for fear of stigma or simply because they were unaware of the benefits. Service providers in various state agencies can have a profound impact on these veterans and their care by connecting them to existing resources and care through asking the simple question: 'have you or a family member ever served in the military?'"

SUBJECT: Childcare services: enrollment priority

SOURCE: Author

DIGEST: This bill adds children with a primary home language other than English to priority enrollment in state preschool and federal or state subsidized general child care programs.

Senate Floor Amendments of 8/22/22 (1) specify that the procedures the Superintendent of Public Instruction is to develop must enable programs to identify dual language learners before enrollment; and (2) make technical changes.

Senate Floor Amendments of 8/18/22 add double-jointing language to avoid chaptering issues with SB 1047 (Limón).

ANALYSIS:

Existing law:

1) Establishes the following priorities for enrollment in *part-day* state preschool programs:

   a) First priority is for three- or four-year-old neglected or abused children who are recipients of child protective services.

   b) Second priority, until June 30, 2024, is for eligible four-year-old children who are not enrolled in a state-funded transitional kindergarten program. Beginning July 1, 2024, to the extent that there are additional three- and four-year-old children with exceptional needs interested in enrolling beyond those already enrolled in the 10 percent of funded enrollment set aside, the second priority for services shall be given to all three- and four-year-old children with exceptional needs from families with incomes below the income eligibility threshold.

      i) Within this category, eligible children with the lowest income according to the income ranking on the most recent schedule of income ceiling eligibility table, as published by the Superintendent of Public Instruction (SPI) at the time of enrollment, shall be enrolled first.

      ii) If two or more families have the same income ranking according to the most recent schedule of income ceiling eligibility table, a child with exceptional needs shall be enrolled first.

      iii) If there are no families with a child with exceptional needs, the child that has been on the waiting list for the longest time shall be admitted first.

   c) Third priority is for eligible three-year-old children.

      i) Within this category, eligible children with the lowest income shall be enrolled first.

      ii) If two or more families have the same income ranking according to the most recent schedule of income ceiling eligibility table, a child with exceptional needs shall be enrolled first.

      iii) If there are no families with a child with exceptional needs, the child that has been on the waiting list for the longest time shall be admitted first.

d) Forth priority, after all otherwise eligible children have been enrolled, is for children from families whose income is no more than 15 percent above the eligibility income threshold. Within this priority category, priority shall be given to four-year-old children before three-year-old children.

e) The fifth priority after all otherwise eligible children have been enrolled, is for a child with exceptional needs whose family's income is above the income eligibility threshold. Within this priority category, priority shall be given to four-year-old children before three-year-old children.

f) Authorizes after all otherwise eligible children have been enrolled in the first through fifth priority categories, a California preschool program site operating within the attendance boundaries of a qualified free and reduced priced meals school to enroll any four-year-old children whose families reside within the attendance boundary of the qualified elementary school. These children shall, to the extent possible, be enrolled by lowest to highest income according to the most recent schedule of income ceiling eligibility table. (Education Code § 8210)

2) Establishes the following priorities for enrollment in *full-day* state preschool programs:

a) First priority is for three- or four-year-old neglected or abused children who are recipients of child protective services.

b) Second priority is for eligible four-year-old children who are not enrolled in a state-funded transitional kindergarten program.

i) Within this category, eligible children with the lowest income shall be enrolled first.

ii) If two or more families have the same income ranking according to the most recent schedule of income ceiling eligibility table, a child with exceptional needs shall be enrolled first.

iii) If there are no families with a child with exceptional needs, the child that has been on the waiting list for the longest time shall be admitted first.

c) Third priority is for eligible three-year-old children.

i) Within this category, eligible children with the lowest income shall be enrolled first.

ii) If two or more families have the same income ranking according to the most recent schedule of income ceiling eligibility table, a child with exceptional needs shall be enrolled first.

iii) If there are no families with a child with exceptional needs, the child that has been on the waiting list for the longest time shall be admitted first.

d) Authorizes, after all otherwise eligible children have been enrolled in the first through fourth priority categories, the contractor to enroll the children in the following order:

i) The contractor may enroll three- and four-year-old children from families that meet eligibility criteria. Within this priority, contractors shall enroll families in income ranking order, lowest to highest, and within income ranking order, enroll four-year-old children before three-year-old children.

ii) For California state preschool program sites operating within the attendance boundaries of a qualified free and reduced priced meals school, the contractor may enroll any four-year-old children whose families reside within the attendance boundary of the qualified school without establishing eligibility or a need for services. These families shall, to the extent possible, be enrolled in income ranking order, lowest to highest. (EC § 8211)

3) Establishes priority for federal and state subsidized child development services as follows:

a) First priority is for neglected or abused children who are recipients of child protective services, or children who are at risk of being neglected or abused, upon written referral from a legal, medical, or social services agency.

b) Second priority is to be given equally to eligible families, regardless of the number of parents in the home, who are income eligible.

i) Within this priority, families with the lowest gross monthly income in relation to family size shall be admitted first.

ii) If two or more families are in the same priority in relation to income, the family that has a child with exceptional needs shall be admitted first.

iii) If there is no family of the same priority with a child with exceptional needs, the same priority family that has been on the waiting list for the longest time shall be admitted first. (WIC § 10271)

This bill adds children with a primary home language other than English to priority enrollment in state preschool and federal or state subsidized general child care programs. Specifically, this bill:

Part- and full-day state preschool programs

1) Adds children from a family in which the primary home language is other than English within priority enrollment, after the existing priority for children who are abused or neglected, low-income four-year olds, and children with exceptional needs (and before children who have been on the waiting list).

Child care and development programs

2) Adds children from a family in which the primary home language is other than English within priority enrollment, after the existing priority for children who are abused or neglected, low-income children, and children with exceptional needs (and before children who have been on the waiting list).

Other

3) Specifies that the existing requirement for the SPI to develop procedures for state preschool programs to distribute and collect a completed family language instrument is to identify dual language learners *before* enrollment.

4) States legislative findings and declarations relative to prioritizing access to state preschool and childcare and developmental services for children who reside in homes in which the primary language is a language other than English.

5) Includes double-jointing language to avoid chaptering issues with SB 1047 (Limón).

Comments

Need for the bill. According to the author, "Over half of California's children under the age of six speak a language other than or in addition to English at home. These children, who are commonly referred to as dual-language learners (DLLs), will be designated as English learners' (ELs) if they enter kindergarten or later grades without being fully proficient in English.

"Due to the COVID-19 pandemic related school shutdowns, DLLs and ELs have suffered academically, more so than every other category of student, with the exception of homeless youth. The LA Unified School district reported that the percentage of ELs failing their classes had increased 10%. Sacramento Unified School District reported that of the students that stopped reporting to classes, over 44% were ELs.

"Fortunately, students who transition out of the EL designation by achieving English proficiency are significantly more likely to succeed in the classroom than ELs in general. A Public Policy Institute of California report found that throughout grades 2-11, former ELs who became proficient in English scored significantly higher on statewide tests than ELs did in general, and even higher than native English speakers did in some grade levels. A recent University of Chicago study confirms that ELs who achieved English proficiency by eighth grade actually performed as well and in some cases better on tests than their native English-speaking peers do. The sooner ELs learn English, the more likely they are to perform well in school."

Academic outcomes. Several national and California-based studies have found that English-learners lag behind their native English-speaking peers academically, and those that do not achieve English-proficiency early fare the worst academically. According to these reports, DLLs who begin gaining proficiency in English before kindergarten are better prepared for entering K-12 education. https://www.ppic.org/publication/californias-english-learner-students/#:~:text=Introduction,as%20EL%20is%20greater%20still; https://www2.ed.gov/datastory/el-outcomes/index.html#introText

What do we know about young children who are dual language learners? The California Department of Education (CDE) collects and publishes K-12 student demographic information that includes the identification of students who are English learners. Recently enacted legislation, AB 1363 (L. Rivas, Chapter 498, Statutes of 2021), requires the SPI to develop procedures for providers to identify and report data on DLLs enrolled in the state preschool program.

The Health Policy Brief "Families with Young Children in California: Findings from the California Health Interview Survey, 2011-2014, by Geography and Home Language" (May 2017) issued by the University of California at Los Angeles' Center for Health Policy Research, uses data from the California Health Interview Survey for the years 2011-2014, to present findings on families with children ages birth to five years. Findings include that about 40 percent of households spoke English and another language, and 20.3 percent did not speak English in the home.

Children in these two groups are considered dual language learners, accounting for almost 60 percent of the children in California age birth to five years. https://healthpolicy.ucla.edu/publications/Documents/PDF/2017/Child_PB_FINAL_5-31-17.pdf

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the CDE estimates General Fund costs of $188,000 in the first year and $186,000 (GF) in the second year for 1.0 position to write regulations and provide guidance to the field. The workload activities include responding to questions from the field, developing and conducting ongoing trainings and providing technical assistance. These costs also include related travel expenses. The CDE indicates that the cost for updating the Child Development Management Information System will be minimal.

The CDE also indicates that there is no data available to indicate how the new priority would impact the overall levels of reimbursement because these children are already eligible for services. Additionally, this bill's new subcategory of income eligibility would not increase the number of children that will be eligible to receive services because these children are already income eligible.

SUBJECT: Reduction of human remains and the disposition of reduced human remains

SOURCE: Author

DIGEST: This bill establishes a new regulatory process for a Licensed Reductions Facility (LRF) under the jurisdiction of the Cemetery and Funeral Bureau (Bureau) for the disposition of human remains, requires training for LRF employees, defines "reduced human remains", imposes the same requirements for reduced human remains as cremated and hydrolyzed remains, and requires the Bureau and the Department of Public Health (DPH) to implement specified regulations by January 1, 2027.

Senate Floor Amendments of 8/25/22 delay implementation of this bill until January 1, 2027.

ANALYSIS:

Existing law:

1) Establishes the Bureau within the Department of Consumer of Affairs (DCA) for the licensure and regulation of cemetery brokers, cemetery salespersons, cemetery managers, cemeteries, crematories, crematory managers, cremated remains disposers, and licensed hydrolysis facilities. (Business and Professions Code (BPC) § 7600 *et. seq).*

2) Authorizes the Bureau to inspect the premises in which the business of a funeral establishment, cemetery, or crematory is conducted, where embalming is practiced or, where human remains are stored. (BPC § 7607)

This bill:

1) Authorizes a corporation, partnership, or natural person to operate, establish, or maintain an LRF with a valid license issued by the Bureau.

2) Requires an application for an LRF to be made on a form approved by the Bureau, as specified, and requires any change in ownership of an LRF to be reported to the Bureau, and a transfer in a single transaction or related transactions of more than 50% of the equitable interest in an LRF constitutes a change of ownership. Requires when a change in ownership in an LRF occurs, the existing reduction facility license lapses and the new owner must obtain a new license from the Bureau, as specified.

3) Requires the DPH to adopt, amend as necessary, the rules and regulations prescribing the standards for LRFs to preserve the public health and safety and to ensure the destruction of pathogenic micro-organisms, and permits an LRF to apply to the DPH for approval of a reduction chamber.

4) Requires an LRF to ensure or conduct annual maintenance of all reduction chambers in use by the facility, and prohibits the Bureau from renewing an LRF without proof of annual maintenance, as specified. Prohibits an LRF from conducting the reduction of human remains unless specified conditions are met.

5) Makes it a misdemeanor for a person, firm, or corporation to reduce human remains, or to dispose of reduced human remains, without a valid unexpired reduction facility license, as specified.

6) Subjects an LRF to discipline from the Bureau.

7) Makes various definitions related to an LRF and reducing human remains.

8) Prohibits certain actions related to reducing human remains. Requires an LRF to maintain on its premises or other business location within the state records of the maintenance performed on the reduction chamber. Requires an LRF to maintain an identification system allowing identification of each decedent beginning from the time the reduction facility accepts delivery of human remains until the point at which it releases the reduced human remains to a third party, and after the reduction an identifying disk, tab, or other permanent label, is to be placed with the reduced human remains container or containers before the reduced human remains are released from the LRF.

9) Requires an LRF, or its authorized representatives to provide instruction to all facility personnel involved in the reduction process, which must lead to a demonstrated knowledge on the part of an employee regarding identification procedures used during reduction, operation of the reduction chamber and related equipment, and all laws relevant to the handling of a body and reduced human remains. The instruction must be outlined in a written plan maintained by the licensee for inspection and comment by the Bureau. Prohibits an employee from operating a reduction chamber or related equipment until the employee has demonstrated to the certified manager of the LRF or authorized representative that the employee understands the procedures required to ensure that health and safety conditions are maintained and that reduced human remains are not comingled, as specified.

10) Imposes the same requirements for reduced human remains as cremated human remains or hydrolyzed remains, for registered cremated remains disposers, funeral directors, and funeral establishments as specified.

11) Imposes similar penalty violations for removal or reduced remains, as specified, and imposes the same requirements for the integration of reduced remains into the soil as the scattering of cremated or hydrolyzed remains, as specified. Incorporates the reduction of human remains into the requirements

for the certificate of death, as specified

12) Adds reduced human remains to the requirements for a permit for disposition of remains, as specified, and requires a cremated remains disposer to document and retain all permits and private authorizations required for all reduced remains that were integrated into soil outside of a cemetery.

13) Delays the implementation of this bill until January 1, 2027, and makes other technical and clarifying changes.

Background

Regulatory Function of the Bureau. The Bureau regulates more than 13,000 licensees in 13 different licensing categories. The Bureau has the oversight responsibility for both fiduciary and operational activities of its licensing population and has the statutory authority to enforce the licensing and practice acts in the BPC along with jurisdiction over specified provisions of the HSC dealing specifically with human remains, cemetery, and crematory provisions. This bill aims to model the licensure and regulation of reduction facilities based on the newly authorized provisions established for hydrolysis facilities.

Reduction of Human Remains. The reduction of human remains is different from a "green burial" as the human remains are reduced in a reduction chamber and not placed directly into the ground. The reduction of human remains is also known as natural organic reduction. This bill would allow the *soil*, or the *reduced remains* to be returned to the environment. As currently drafted, only a licensed cremated remains disposer would be authorized to disperse those reduced human remains consistent with what is required for cremated remains and hydrolyzed remains. Additionally, this bill requires a reduction facility licensee to have a contractual relationship with a licensed cemetery authority for disposition of reduced remains that are not called for or accepted.

Types of Burial and Regulatory Efforts. AB 967 (Gloria, Chapter 846, Statutes of 2017) now requires the Bureau to license and regulate hydrolysis facilities and managers beginning July 1, 2020. Licensed hydrolysis facilities are required to use a hydrolysis chamber approved by DPH to hydrolyze human remains as an alternative method of disposition of human remains. Consistent with the requirements for a hydrolysis facility as provided in AB 967, and the approval of hydrolysis facility equipment, this bill authorizes the DPH to approve the reduction chamber prior to its use, and the provisions of this bill authorize DPH to adopt and

amend the rules prescribing the standards for reduction chambers to preserve public health. As currently drafted, this bill authorizes a reduction chamber manufacturer to apply to the DPH for approval.

Licensure and regulation of reduction facilities. This bill creates a licensure program for reduction facilities, which is similar to the licensure process for crematory licenses and hydrolysis facility licenses. The provisions of this bill layout the requirements necessary to apply for such a reduction facility license, including submitting a written application to the Bureau, payment of the applicable fees, demonstration of compliance with all applicable laws, and obtain any relevant local permits, along with a DPH-approved reduction chamber.

Fee and revenue structure. This bill authorizes the Bureau to set a licensing fee, at an amount that would not exceed the reasonable cost of administering the bill's provisions. This bill also requires the Bureau to assess a similar regulatory charge, not to exceed $8.50, for each reduction made by a licensed reduction facility.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, DPH estimates total General Fund costs of $1,095,000 over the first three years of the program and $193,000 ongoing. The Bureau anticipates costs of approximately $6,000 for staff time associated with reviewing and processing applications and ongoing annual revenue increases of approximately $4,500 for initial application and license renewal fees, which may offset its administrative costs to some extent. The Office of Information Services within the DCA estimates a total one-time IT impact of $140,000 to create a new platform, which may be absorbed through the re/direction of existing maintenance resources.

OPPOSITION: (Verified 8/25/22)

California Catholic Conference

ARGUMENTS IN SUPPORT: Supporters note that this bill expands end of life burial options and provides an environmental friendly and sustainable alternative.

ARGUMENTS IN OPPOSITION: The California Catholic Conference writes in opposition and notes, "The NOR process also remains unproven for human remains. Proponents rely on one study, which has not been peer-reviewed, to contend that all toxic elements of the body (e.g., dental implants) and pathogens are properly eliminated before spreading the remains."

SUBJECT: Medi-Cal: county organized health system: Orange County Health Authority

SOURCE: Author

DIGEST: This bill removes the sunset on existing law regarding the Orange County Health Authority (CalOptima) board. This bill requires CalOptima board members to ensure the provision of cost-effective behavioral health care services and requires the members to address the needs of Medi-Cal members who are affected by homelessness and housing instability, and fully commit to implementation of the California Advancing and Innovating Medi-Cal (CalAIM) Act principles. This bill requires CalOptima board members with a financial interest in a board decision to recuse themselves as specified. This bill limits specified members from future board terms, representation of other individuals and entities before the board, or employment at CalOptima or entity receiving CalOptima Medi-Cal funds, except for the position they held when appointed to the CalOptima board. This bill contains an urgency clause that will make this bill effective upon enactment.

*Senate Floor Amendment*s of 8/22/22 provide an exception for routine administrative reimbursement expenses to the prohibition of board members receiving compensation from the Orange County Health Authority for one year after leaving office.

ANALYSIS:

Existing law:

1) Establishes the Medi-Cal program, administered by the Department of Health Care Services (DHCS), under which health care services are provided to qualified, low-income persons. [WIC § 14000, et seq.]

2) Authorizes a county board of supervisors, by ordinance, to establish a commission to negotiate an exclusive contract with DHCS to provide, or arrange for the provision of, health care services under the Medi-Cal program. This system of services provided by or through a county under these provisions is known as a county organized health system (COHS). Requires the enabling ordinance to, among other things, specify the membership of the county commission, the qualifications for individual members, the manner of appointment, and how long they will serve. [WIC §14087.54]

3) Requires governance of CalOptima (the Orange County COHS) to be vested in a governing body (board) consisting of ten members, of whom nine are voting members and one is a nonvoting member. Requires the nonvoting member to be the Director of the Orange County Health Care Agency. Requires the nine voting members to be nominated by the Orange County Health Care Agency and to be appointed by a majority vote of the Orange County Board of Supervisors and specifies the membership categories of board members. [WIC §14087.59]

4) Requires each member of the CalOptima board to reside in, or be employed in, Orange County and to be generally representative of the diverse backgrounds, interests, and demography of persons residing in Orange County and have a commitment to a health care system that improves access to high-quality health care for persons served by the commission, delivers high-quality care, and is financially viable. Requires each member to possess the requisite skills and knowledge necessary to design and operate a quality publicly assisted health care delivery system. [WIC §14087.59]

5) Requires members of the CalOptima board to serve four-year terms, except for those members who are members of the Orange County Board of Supervisors,

who serve a one-year term. Requires a non-Orange County supervisor member of the CalOptima board to serve no more than two consecutive terms. [WIC §14087.59]

6) Permits a member of the CalOptima board to be removed by a vote of at least two-thirds of the Orange County Board of Supervisors. Permits the CalOptima board, subject to a two-thirds vote of the full membership, to increase the number of public members, or the number of members who are current CalOptima members or family members, subject to an affirmative vote by a majority of the Orange County Board of Supervisors. [WIC §14087.59]

7) Requires each member of the CalOptima board to have the responsibility and duty to follow the requirements of applicable federal and state laws and regulations, to serve the public interest of the members of CalOptima, and to ensure the operational well-being and fiscal solvency of CalOptima. Requires members of the CalOptima board to further strive to improve health care quality, promote prevention and wellness, ensure the provision of cost-effective health and mental health care services, and reduce health disparities. [WIC §14087.59]

8) Requires CalOptima to work to earn the public's trust through its commitment to accountability, responsiveness, transparency, reliability, and cooperation. [WIC §14087.59]

9) Sunsets on January 1, 2023. [WIC §14087.59]

This bill:

1) Deletes the January 1, 2023 sunset on the law that requires governance of CalOptima to be vested in a board consisting of nine voting members and one nonvoting member and specifies the membership categories of the CalOptima board, specifies the duties of board members, and their terms.

2) Requires the Orange County Board of Supervisors to consult with stakeholders in Orange County, including, but not limited to, providers who serve CalOptima members, consumers, and advocates for purposes of identifying qualified individuals to be considered as members of the governing body,

3) Prohibits a member of the CalOptima board who is a member of the Orange County Board of Supervisors from being appointed to serve a four-year term under any of the other categories within 12 months of the expiration of their one-year term.

4) Requires members of the CalOptima board to strive to reduce health disparities, address the needs of Medi-Cal members who are affected by homelessness and housing instability, improve quality outcomes, and manage the risk and needs of Medi-Cal beneficiaries through whole-person care approaches and addressing social determinants of health.

5) Specifies that existing Government Code and Medi-Cal law regarding conflict of interest apply to the CalOptima board. Requires CalOptima board members who have a financial interest in a decision before the board, upon identifying the conflict of interest and immediately prior to the consideration of the matter to do the following:

   a) Publicly identify the financial interest that gives rise to the conflict or potential conflict of interest in sufficient detail that it can be understood by the public, except residential street addresses are not required to be disclosed;

   b) Recuse themselves from discussing and voting on the matter, but permits the member to speak on the issue during the time the general public speaks on the issue; and,

   c) Leave the room until after the discussion, vote, and any other disposition of the matter is concluded unless the matter is on the portion of the agenda reserved for uncontested matters.

6) Prohibits a CalOptima board member from acting as an agent or otherwise representing for compensation, any other person, by making any formal or informal appearance before, or by making any oral or written communication to, the commission, or any committee, subcommittee, or present member of the commission, or any officer or employee of the commission, if the appearance or communication is made to influence administrative action or proceeding involving the issuance, amendment, awarding, or revocation of a permit, license, grant, contract, or the sale or purchase of goods or property, for a period of one year after leaving office.

7) Prohibits a CalOptima board member from serving as an employee, agent, or attorney, or otherwise representing for compensation CalOptima or any other entity who received an expenditure of Medi-Cal funds from CalOptima during the prior five years for a period of one year after leaving office. Provides an exception for the role the board member held when appointed to the board. Also provides an exception for routine administrative expenses for reimbursement

for travel, continuing education costs, routine office expenses, and other ongoing routine administrative expenses.

8) Exempts CalOptima board members in the following specified membership categories from the prohibitions in 5) and 6): the representative of a community clinic, the practicing licensed medical provider, and the practicing licensed physician.

9) Makes a legislative finding that a special statute is necessary because of the unique circumstances applicable to the County of Orange with respect to the operation and governance of CalOptima.

Comments

1) *Author's statement.* According to the author, CalOptima, created in 1993, is the single largest health insurer in Orange County, providing coverage for one in four residents. CalOptima manages programs that are funded by the state and federal government, but operates independently, under the leadership of a Board of Directors made up of members, providers, business leaders and local government representatives. For over a decade, there have been a number of concerns raised publically related to CalOptima. Some of the most notable include high turnover of senior executives, conflict of interest of board members, allegations of misconduct and inappropriate actions, mistrust from member and partner organizations providing services to CalOptima patients, delays in care for CalOptima's homeless patients, and lack of budgetary transparency. SB 4 (Mendoza, Chapter 479, Statutes of 2017) passed overwhelmingly, to prevent any Orange County Supervisor from amending the local COHS ordinance to eliminate provider representation from the CalOptima board. However, the statute is set to sunset. This bill will not only extend SB 4 permanently, but enacts key guardrails to protect against the further politicizing of CalOptima. Transparency, for the community, partner organizations, and more importantly, for the patients they have been established to serve is vital and needed.

2) *CalOptima*. CalOptima is the COHS in Orange County. There are six COHS in California operating in 22 counties, and serving approximately 2.5 million Medi-Cal beneficiaries. Almost all Medi-Cal-eligible beneficiaries in COHS counties, including those enrolled in both Medi-Cal and Medicare (referred to as "dual-eligibles") and individuals with a share of cost, are mandatorily enrolled into the COHS plan. CalOptima was created in 1993 by a county ordinance and began operations in 1995. As of January 2022, it has 879,635 members with an operating budget of $3.7 billion. CalOptima is Orange

County's largest health insurer, providing coverage through four major programs:

a) Medi-Cal;

b) OneCare, which is Special Needs Plan (a Medicare Advantage Special Needs Plan) for low-income seniors and people with disabilities who qualify for both Medicare and Medi-Cal;

c) PACE (Program of All-Inclusive Care for the Elderly) for older adults, providing comprehensive health services through the CalOptima PACE center; and,

d) OneCare Connect Cal MediConnect Plan (Medicare-Medicaid Plan) for people who qualify for both Medicare and Medi-Cal, combining Medicare and Medi-Cal benefits, adding supplemental benefits for vision, transportation and dental services, and providing comprehensive care coordination.

According to a February 2022 article by the Orange County Register, CalOptima has had substantial turnover in key positions over the past two years while salary levels for newly created or replacement positions have jumped significantly. The Voice of OC has also published stories on troubling hiring practices suggesting nepotism and failing to follow tradition in appointing board members with local experience to the hospital seat against the recommendations of the local hospital association.

Related/Prior Legislation

SB 4 (Mendoza, Chapter 479, Statutes of 2017) required governance of CalOptima to be vested in a governing body consisting of nine voting members and one nonvoting member. Specified the membership categories of the CalOptima board, specified the duties of board members, and their terms. Sunset these provisions January 1, 2023.

SB 1308 (Nguyen, 2016) would have prohibited a COHS from utilizing any funds intended for administrative and operational expenses for staff retreats, promotional giveaways, excessive executive compensation, or promotion of federal or state legislative or regulatory modifications. Also restricted how COHS may feature elected officials or candidates in media campaigns. *SB 1308 was not heard in the Senate Health Committee.*

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: A group of health care providers writes that this bill ensures the long-term stability of CalOptima. Orange County has no county hospital and provides no direct primary or specialty care services. As a result, CalOptima was founded as a public-private partnership nearly thirty years ago to better organize the de facto private safety net serving Orange County's poorer residents. First, this bill makes permanent the existing statute that sets forth the composition of the Board of Directors of CalOptima that was established under previous legislation that codified the County ordinance. The existing statute sunsets and the extension under this bill secures the continued balance and expertise of those individuals selected to serve on CalOptima's board. In addition, the statute sets forth the duties and responsibilities of the CalOptima board to serve the public interest of the CalOptima members and to ensure its operational independence and fiscal solvency. This bill also modernizes and ensures that existing conflict of interest and disclosure requirements that apply to local governments also apply to the CalOptima board. These safeguards ensure that all individuals on the CalOptima board involved in allocating billions of dollars in state and federal funds adhere to existing conflict of interest and related provisions of state law, while also requiring that they adhere to "cooling off" periods prior to being employed by CalOptima or by entities that have received funding from CalOptima. These safeguards are similar to those already imposed on elected and appointed state officials. This bill injects a strong and necessary set of good

government principles and modernize the statute to reflect the long-term commitment of the Medi-Cal program to transform and strengthen Medi-Cal.

SUBJECT: Referral source for residential care facilities for the elderly: duties

SOURCE: A Place for Mom
Caring.com
Act Eight, LLC

DIGEST: This bill recasts provisions of existing law that apply to a placement agency for residential care facilities for the elderly (RCFEs) to instead apply to a newly defined "referral source." Among other things, this bill requires referral sources to provide the senior or their representative with specified disclosures, perform background checks, and carry liability insurance. This bill also provides for criminal and civil penalties.

Senate Floor Amendments of 8/25/22 clarify that case management services provided through Medi-Cal do not qualify as compensated referral; specify a compensated referral source's responsibilities related to referring a person to a licensed residential care facility for the elderly (RCFE); remove requirements that

a compensated referral source respond to a specified oral or written request and instead require a compensated referral source to respond to an oral request on a specified recorded line or an electronic or written request; remove the requirement that a compensated referral source obtain affirmative consent for disclosing a person's personal information for purposes other than those necessary to make an authorized referral, as specified; and make other technical changes.

ANALYSIS:

Existing law:

1) Establishes the California RCFE Act, which requires facilities that provide personal care and supervision, protective supervision or health related services for persons 60 years of age or older who voluntarily choose to reside in that facility to be licensed by the California Department of Social Services (CDSS). *(HSC 1569 et seq*.)

2) Defines a "residential care facility for the elderly" as a housing arrangement chosen voluntarily by persons 60 years of age or older, or their authorized representative, where varying levels and intensities of care and supervision, protective supervision, or personal care are provided, based upon the resident's varying needs, as determined in order to be admitted and to remain in the facility. *(HSC 1569.2(o))*

3) Defines a "placement agency" as any county welfare department; county social service department; county mental health department; county public guardian; general acute care hospital discharge planner or coordinator; state-funded program or private agency providing placement or referral services; conservator, as specified; and, regional center for persons with developmental disabilities which is engaged in finding homes or other places for the placement of elderly persons for temporary or permanent care. *(HSC 1569.47(a))*

4) Prohibits a placement agency, or their employee, from placing individuals in licensed RCFEs when the individual, because of his or her health condition, cannot be cared for within the limits of the license or requires inpatient care in a health facility, as well as prohibits a placement agency or their employee from placing individuals in unlicensed RCFEs, as provided. Further provides that a violation of these provision is a misdemeanor. *(HSC 1569.47(b)-(c))*

5) Requires any employee of a placement agency who knows, or reasonably suspects, that a facility which is not exempt from licensing is operating without

a license to report the name and address of the facility to CDSS. Further provides that failure to report as required by this provision is a misdemeanor. *(HSC 1569.47(d))*

6) Requires CDSS to investigate any report filed, and if the CDSS has probable cause to believe that the facility which is the subject of the report is operating without a license, requires the department to investigate the facility within 10 days after receipt of the report. *(HSC 1569.47(e))*

7) Requires a placement agency to notify the appropriate licensing agency of any known or suspected incidents which would jeopardize the health or safety of residents in a RCFE. Defines reportable incidents to include, but not be limited to incidents of physical abuse; any violation of personal rights; any situation in which a facility is unclean, unsafe, unsanitary, or in poor condition; any situation in which a facility has insufficient personnel or incompetent personnel on duty; and/or, any situation in which residents experience mental or verbal abuse. *(HSC 1569.47(f))*

This bill:

1) Deletes existing law pertaining to placement agencies and replaces with the below provisions.

2) Defines "compensated referral" to mean a referral by a private, for-profit or nonprofit agency that is engaged in the business of referring persons to RCFEs in exchange for any consideration or thing of value, including a fee, commission, gift, or any reciprocal benefit.

3) Defines "referral" to mean identifying and connecting a senior or that senior's representative to an RCFE to facilitate the further evaluation, in consultation with the facility, of whether that facility is a suitable senior housing option for that senior.

4) Provides that a referral source does not include a licensee of an RCFE, or any professional services staff member of an RCFE, who on behalf of that facility makes a referral, even if they have received a discount or other remuneration from the facility.

5) Prohibits a referral source from referring a person to a facility providing care and supervision or protective supervision if the referral source knows or should have known the facility is not licensed as a RCFE or is not exempt from licensing, as provided. Further provides that a violation of this provision is a misdemeanor.

6) Prohibits a referral source from referring an individual to an RCFE if the referral source knows or should have known the individual, because of their health condition, cannot be cared for within the limits of the facility's license or requires inpatient care in a health facility. Provides that violation of this prohibition is a misdemeanor.

7) Prohibits a referral source from referring a person to an RCFE in which the referral source, and an affiliated group, as specified, or immediate family member of the referral source, has an ownership or management interest or a common employee in an executive management position, unless the referral source obtains a written waiver from the senior or that senior's representative before making the referral. Provides that violation of this prohibition is a misdemeanor.

8) Requires a referral source who knows, or should have known, that a facility that is not exempt from licensing is operating without a license shall report the name and address of the facility to CDSS. Provides that failure to make this report is a misdemeanor.

9) Requires CDSS to investigate any report of an unlicensed facility. Further requires that, if CDSS has probable cause to believe that the facility that is the subject of the report is operating without a license, CDSS must investigate the facility within 10 days after receipt of the report.

10) Requires a referral source to notify the appropriate licensing agency of any known or suspected incidents that would jeopardize the health or safety of residents in an RCFE. Provides that violation of this notification is a misdemeanor. Defines reportable incidents to include, but not be limited to incidents of physical abuse; any violation of personal rights; any situation in which a facility is unclean, unsafe, unsanitary, or in poor condition; any situation in which a facility has insufficient personnel or incompetent personnel on duty; and any situation in which residents experience mental or verbal abuse.

11) Requires that a referral source, before sending a compensated referral to an RCFE located in California, provide the senior or their representative with specified disclosures, including a statement regarding whether and under what circumstances the referral source will be paid a fee by an RCFE to which the senior is referred; a statement that the senior or representative may request in writing that the referral source cease contact with the senior or the senior's representative; among other disclosures.

12) Requires the information and disclosures listed in 11) above be provided to the senior or their representative in a clear manner designed to give actual notice of its contents and may be provided, together or separately, in hardcopy form, on a web page, or verbally, as specified.

13) Requires the referral source to maintain records of the required disclosures for a period of three years and shall provide a copy of the disclosures provided to the senior, representative, or the RCFE, upon written request.

14) Requires a compensated referral source to comply with all of the following:

    a) Use a nationally accredited service provider to perform background checks on referral sources who have direct contact with seniors or their representatives.

    b) Maintain liability insurance coverage in an amount of at least $1 million per occurrence and $2 million in total annual aggregate for negligent acts or omissions by the referral source or any of its employees.

    c) Accept remuneration only from RCFEs with which the referral source has a written contract.

    d) Maintain and prominently display a privacy policy on every internet website it operates or, if the referral source does not maintain an internet website, then it shall provide the senior or the senior's representative with a written copy of the privacy policy.

    e) Refrain from holding any power of attorney for a resident or potential resident or from holding that person's property in any capacity.

    f) Cease making referrals on behalf of the senior or the senior's representative within 10 days after receipt of an oral, electronic, or written request, as specified. Limits oral requests to a recorded line designated by the referral source for that purpose, and electronic requests to email or the completion of an online form provided on the referral source's internet website for that purpose.

    g) Cease contacting a senior or senior's representative within 10 days after receipt of an oral, electronic, or written request, as specified. Limits oral requests to a recorded line designated by the referral source for that purpose, and electronic requests to email or the completion of an online form provided on the referral source's internet website for that purpose.

15) Provides that a referral source that violates mandated disclosures is subject to a civil penalty of between $250 and $1,000 for each violation, and that Health and Safety Code Section 1569.40, which makes violations a misdemeanor, shall not apply. Permits a district attorney or city attorney to institute a proceeding in superior court to recover the civil penalties and to restrain and enjoin a violation of the disclosure mandates.

Comments

According to the author, "during COVID-19, referral agencies have been a crucial part of placement decisions as visitation is either not an option or infrequent to limit the exposure of residents and staff. This legislation, if passed, would allow for more transparency and access of information for consumers seeking placement at a residential care facility. AB 499 seeks to protect all interested parties [residents, client families, referral agencies, and residential care facilities] by codifying a number of regulations during a referral source's interaction with a client and increased regulations on referral sources. Currently, the law loosely regulates 'placement agencies' focusing solely on the interaction between them and a residential care facility for the elderly."

Residential Care Facilities for the Elderly. Long-term care facilities provide inpatient care to individuals over extended periods of time. In general, long-term care facilities are appropriate for persons who are elderly, chronically ill, or in need of extensive rehabilitative services. There are three generally recognized classifications of long-term care facilities: skilled nursing facilities, intermediate care facilities, and RCFEs, which are the subject of this bill.

RCFEs, also known as assisted living facilities, are residential facilities that provide 24-hour nonmedical care and supervision for persons in need of personal services, supervision, or assistance essential for sustaining the activities of daily living or for the protection of the individual who is 60 years of age or older. RCFEs provide housing, housekeeping, supervision, and personal care assistance with activities of daily living to individuals who need that level of care. These are nonmedical facilities that are designed for individuals who are unable to live by themselves, but who do not need 24-hour nursing care. These facilities range in size from small facilities operating out of single family homes serving a handful of residents to larger buildings that can house over a 100 residents.

Unregulated Referral Agencies. When a person can no longer live independently due to age or disability, locating appropriate housing and support can be an overwhelming endeavor. It is especially challenging if the person doing the searching is not familiar with the various types of assisted living services and

settings. Under such circumstances, businesses, often referred to "referral agencies," offer the service of identifying and referring seniors, or their representatives, to potentially suitable living arrangements, or "placements". Referral agencies are also known as "placement agencies" and "referral sources" and they range from small local businesses to large, internet-based agencies that provide referral services across the country. By law, the referrals must be made to an appropriately licensed facility that can provide necessary care for the senior within the limits of the RCFE license.

Private referral agencies typically provide free referrals but receive compensation from RCFEs. Business models vary, but it is common that clients do not pay a fee for a referral. Clients also do not usually enter into a contract with the agency. Instead, referral agencies typically have financial arrangements with RCFEs and receive a fee, often, reportedly, the amount of one month's rent in the facility, if an individual moves into an RCFE because of an agency's referral.

This bill represents the fifth attempt since 2015 to regulate compensated referral agencies. Broadly, these bills can be grouped into two separate efforts. First, three bills, SB 648 (Mendoza, 2015), SB 648 (Mendoza, 2017), and AB 2744 (Reyes, 2018), attempted to establish comprehensive regulatory schemes for these entities. AB 2744 was opposed by A Place for Mom and all three bills were opposed by Caring.com, the two largest referral agencies.

The second group of bills, which includes this bill and AB 2926 (Calderon, 2020), are sponsored by two referral agencies. The sponsors argue they have struck a more appropriate balance by establishing disclosure requirements without imposing costs to the state or unduly burdening the industry, as they allege prior consumer protection efforts did.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- *Department of Justice (DOJ)*. No significant impact for staff overtime to process this increase in arrest prints. DOJ notes, while the impact of AB 499 would not pose a significant impact to the DOJ, as numerous bills this session may result in no significant impact to the DOJ, should an aggregate of these bills chapter, the DOJ would submit a workload BCP for additional resources to process the increase to the DOJ workload.

- *Court costs*. Staff estimates unknown, potentially significant workload cost pressures to the courts to adjudicate alleged violations of this bill. While the

superior courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to fund additional staff and resources.

SUPPORT: (Verified 8/25/22)

A Place for Mom (co-source)
Caring.com (co-source)
Act Eight, LLC (co-source)
California Council of Community Behavioral Health Agencies

OPPOSITION: (Verified 8/25/22)

California Advocates for Nursing Home Reform
California Long-Term Care Ombudsman Association
Justice in Aging

ARGUMENTS IN SUPPORT: A Place for Mom, a co-sponsor of this bill, writes: "AB 499 is the result of six years of legislative discussions contemplating how to provide consumer benefit-oriented notice to families without costs to the state or undue burden the industry, while positively changing the playing field within the industry. After six months of negotiations with the Consumer Advocates for RCFE Reform (CARR) and other stakeholders, the amended version strikes a good balance between consumer notice and protections. For the first time in California, this bill would create statutory requirements for disclosures to families, limit conflict of interests, and provide background checks and insurance coverage minimums."

A Place for Mom also notes that this bill "limits any back channel remuneration to a referral agency, requires that referral agencies maintain and display a privacy policy on their internet websites, and prevents conflict of interest situations in referrals. AB 499 would enact basic consumer disclosures and protections that will assist California families dealing with the difficult problem of finding the right senior living facility for their loved one, often at a time of stress and crisis for the family without impeding the work of companies like A Place for Mom and Caring.com that are dedicated to helping these families through this process."

ARGUMENTS IN OPPOSITION: Justice In Aging writes: "AB 499 would weaken important consumer protections under California Health & Safety Code… Currently, California Health and Safety Code, Section 1569.47 prohibits agencies from referring individuals to a facility that is unlicensed or whose license does not cover the needs of the individual, and imposes strict liability on improper referrals.

AB 499 significantly weakens this prohibition, holding agencies liable only if the referring agency knew or should have known that the facility is unlicensed or insufficient… shift[ing] the burden of determining a facility's license status to consumers. AB 499 purportedly requires referral agencies to make various disclosures, including any financial or ownership interest in or compensation arrangements with referred facilities. However, referral agencies are allowed to choose whether to do so in writing, by directing to a website, or through verbal consent on a recorded line. Request for a written copy of the disclosure by a consumer, on the other hand, must be made in writing, putting unreasonable burden on consumers. Providing disclosures on a recorded line protects only the referral agency and leaves consumers vulnerable to coercive business practices.

"California should strictly regulate financially motivated referral agencies to ensure that at-risk individuals in need of residential placement are provided with appropriate referrals to facilities licensed in accordance with California law. AB 499 fails to provide sufficient protections, and leaves consumers vulnerable to coercive and misleading business practices."

SUBJECT: Wards: probation

SOURCE: Alliance for Boys and Men of Color
Communities United for Restorative Youth Justice
National Center for Youth Law
W. Haywood Burns Institute
Young Women's Freedom Center
Youth Justice Coalition

DIGEST: This bill (1) limits the period of time in which a court may place a ward of the court on probation to six months, except that a court may extend probation in six month increments upon proof by a preponderance of the evidence that it is in the best interest of the ward; (2) requires that the conditions of probation be individually tailored, developmentally appropriate, and reasonable; and (3) requires that the burden imposed by the probation conditions must be proportional to the legitimate interests served by the conditions.

Senate Floor Amendments of 8/4/22 make conforming changes to avoid chaptering issues with AB 200 (Committee on Budget, Chapter 58, Statutes of 2022).

Senate Floor Amendments of 6/28/22 simplify language that allows the ward or prosecuting attorney to present relevant evidence to the court and remove the

requirements that the court state the basis for not accepting evidence as well as set forth the reasons in an order if requested by either party or when the proceedings are not being recorded electronically or reported by a court reporter.

Senate Floor Amendments of 8/18/21 allow the court to decide how it will accept evidence in each case; require the court, if it chooses not to allow any evidence, to state on the record the reason for doing so; specify that if a youth has a Welfare and Institutions Code Section 607.2 hearing, the youth will remain a ward of the court until that hearing, but that probation will be terminated at the appropriate time; and include other technical and conforming changes.

ANALYSIS:

Existing law:

1) Provides that a minor between 12 and 17 years of age, inclusive, who violates any federal, state, or local law or ordinance, and a minor under 12 years of age who is alleged to have committed murder or a specified serious sex offense, is within the jurisdiction of the juvenile court, which may adjudge the minor to be a ward of the court. (Welf. & Inst. Code, § 602.)

2) Provides, effective July 1, 2021, that the juvenile court may retain jurisdiction over a ward until the person attains 21 years of age, except that if the wardship is based on the commission of a specified serious offense, the juvenile court may retain jurisdiction until age 23, unless the ward would have faced an aggregate sentence of seven years or more in criminal court, in which case the juvenile court may retain jurisdiction until age 25. (Welf. & Inst. Code, § 607, subds. (a)-(c), as effective July 1, 2021.)

3) Authorizes the juvenile court to place a ward of the court on supervised probation. Authorizes the court to make any reasonable orders for the care, supervision, custody, conduct, maintenance, and support of the ward. (Welf. & Inst. Code, § 727, subd. (a).)

4) Provides that if a minor is found to be a ward of the juvenile court due to the commission of a battery on school property, the court as a condition of probation is required to order the minor to make restitution to the victim. (Welf. & Inst. Code, § 729.)

5) Provides that when a ward is placed under the supervision of the probation officer or committed to the care, custody, and control of the officer, the juvenile court may make any and all reasonable orders for the conduct of the ward, and impose and require any and all reasonable conditions that it may

determine fitting and proper to the end that justice may be done and the reformation and rehabilitation of the ward enhanced. (Welf. & Inst. Code, § 730, subd (b), as repealed on July 1, 2021, & § 730, subd. (b), as operative on July 1, 2021.)

6) Authorizes the court to order the ward go to work and earn money for the support of the ward's dependents or to effect reparation and in either case that the ward keep an account of the ward's earnings and report the same to the probation officer and apply these earnings as directed by the court. (Welf. & Inst. Code, § 730, subd. (b), as repealed on July 1, 2021, & § 730, subd. (b), as operative on July 1, 2021.)

7) Authorizes, effective July 1, 2021, the court to order the ward to make restitution, pay a fine up to $250 for deposit in the county treasury if the court finds the minor has the financial ability to pay, or to participate in an uncompensated work program. (Welf. & Inst. Code, § 730, subd. (a)(1)(A), as operative on July 1, 2021.)

8) Requires the court, upon a minor being found a ward of the court, to order the minor to pay a restitution fine and restitution to the victim or victims, if any. (Welf. & Inst. Code, § 730.6, subd. (a)(2).)

9) Authorizes the board of supervisors of any county to impose a fee to cover the actual administrative cost of collecting the restitution fine, not to exceed 10 percent of the amount ordered to be paid, to be added to the restitution fine and included in the order of the court, the proceeds of which are required to be deposited in the general fund of the county. (Welf. & Inst. Code, § 730.6, subd. (q).)

This bill:

1) Prohibits a minor adjudged to be a ward of the court who is subject to an order of probation, with or without supervision of the probation officer, from remaining on probation for a period that exceeds six months, except as specified.

2) Provides that a court may extend the probation period for a period not to exceed six months after a noticed hearing and upon proof by a preponderance of the evidence that it is in the ward's best interest.

3) Requires the probation agency to submit a report to the court detailing the basis for any request to extend probation at the hearing.

4) Requires that the ward's attorney be given the opportunity to examine witnesses and present evidence at the probation review hearing.

5) Requires the court state the reasons for the findings orally on the record in cases in which the court finds by a preponderance of the evidence a basis for extending probation beyond the six-month period. Requires the court to set forth the reasons in an order entered upon the minutes if requested by either party or when the proceedings are not being recorded electronically or reported by a court reporter.

6) Requires, if the court extends probation, that the court schedule and hold a noticed hearing for the ward not less frequently than every six months for the remainder of the wardship period.

7) Requires the court, prior to terminating jurisdiction over a ward subject to an order for foster care placement, to comply with existing provisions of law related to terminating jurisdiction over those youth. Prohibits the requirement to comply with those provisions of law from being a basis for continuing an order of probation or the terms and conditions of such an order.

8) Provides that its provisions do not preclude termination of a ward's probation before the end of a six-month period.

9) Provides that it does not apply to any ward who is transferred from a secure youth treatment facility to a less restrictive program, as specified, and who is subject to any remaining baseline or modified baseline term until the ward is discharged pursuant to a probation discharge hearing, as described.

10) Requires that the conditions of probation ordered when a ward is placed on supervised or unsupervised probation meet all of the following requirements:

    a) The conditions are individually tailored, developmentally appropriate, and reasonable.

    b) The burden imposed by the conditions must be proportional to the legitimate interests served by the conditions.

    c) The conditions are determined by the court to be fitting and proper to the end that justice may be done and the reformation and rehabilitation of the ward enhanced.

11) Amends existing law that authorizes the court to order the ward to make restitution, to pay a fine up to $250 for deposit in the county treasury if the

court finds that the minor has the financial ability to pay the fine, or to participate in uncompensated work programs, and instead limits the court's authority to only order restitution.

12) Amends several provisions of law requiring the juvenile court to impose specific conditions of probation on a ward of the court and instead makes all of those conditions of probation discretionary.

13) Includes several legislative findings and declarations.

Background

Probation Generally

The juvenile court is authorized to place a minor declared to be a ward of the court on probation. Juvenile probation can theoretically continue as long as the juvenile court has jurisdiction over the ward. There is no statutorily required periodic review. (Welf. & Inst. Code, §§ 602, 607, 727, 730, subd. (b).)

Concerns about the use of juvenile probation were outlined in a recent report published by two of the bill's co-sponsors, the National Center for Youth Law and Haywood Burns Institute:

> Probation is the most common court ordered outcome imposed on youth in juvenile court in California. Too often, youth are placed on probation for an unspecified amount of time, while under the microscope of overly burdensome and confusing probation conditions. Conditions are rarely individualized—or realistic—and are ultimately impediments to healthy youth development and rehabilitation. Furthermore, available data show that probation is more frequently imposed on youth of color, and for longer periods of time. Together, these practices trap many young people in the legal system for their entire adolescence, lead to further use of detention, and cause far more harm than good. (National Center for Youth Law and W. Haywood Burns Institute, *Ending Endless Probation* (Mar. 2021), p. 2, citing The Annie E. Casey Foundation, *Transforming Juvenile Probation: A Vision for Getting it Right* (2018).)

The California Department of Justice reported that in 2019, almost 20,000 youth in California were placed on wardship probation. (Office of the Attorney General, California Department of Justice, *Juvenile Justice in California* (2019), p. 40, available at <https://data-openjustice.doj.ca.gov/sites/default/files/2020-06/Juvenile%20Justice%20In%20CA%202019.pdf .) The report included the percentage of each type of juvenile court disposition (e.g., wardship, informal

probation, dismissed, etc.) within each racial or ethnic category, and indicated that 51.2% of White youths were placed on wardship probation, 63.4% Hispanic youths were placed on wardship probation, 63.4% Black youths were placed on wardship probation, and 48.6% of youth identified as "Other" were placed on wardship probation. (*Id*. at p. 41.)

Probation Conditions

A juvenile court may impose on a minor on probation "any and all reasonable conditions that it may determine fitting and proper to the end that justice may be done and the reformation and rehabilitation of the ward enhanced." (Welf. & Inst. Code, § 730, subd. (b).) "A juvenile court enjoys broad discretion to fashion conditions of probation for the purpose of rehabilitation and may even impose a condition of probation that would be unconstitutional or otherwise improper so long as it is tailored to specifically meet the needs of the juvenile." (*In re Josh W.* (1997) 55 Cal.App.4th 1, 5; *In re Sheena K.* (2007) 40 Cal.4th 875, 889.)

In *People v. Lent* (1975) 15 Cal.3d 481, the California Supreme Court articulated the following test to determine whether a probation condition constitutes an abuse of discretion: "A condition of probation will not be held invalid unless it '(1) has no relationship to the crime of which the offender was convicted, (2) relates to conduct which is not in itself criminal, and (3) requires or forbids conduct which is not reasonably related to future criminality.'" (*Id*. at p. 486.) "This test is conjunctive—all three prongs must be satisfied before a reviewing court will invalidate a probation term." (*People v. Olguin* (2008) 45 Cal.4th 375, 379.) "As such, even if a condition of probation has no relationship to the crime of which a defendant was convicted and involves conduct that is not itself criminal, the condition is valid as long as the condition is reasonably related to preventing future criminality." (*Id*. at pp. 379-380.) The *Lent* test applies to juvenile probation conditions. (*In re P.O.* (2016) 246 Cal.App.4th 288, 294; *In re D.G.* (2010) 187 Cal.App.4th 47, 52.) In *In re Ricardo P.* (2019) 7 Cal.5th 1113, the California Supreme Court noted that "*Lent*'s requirement that a probation condition must be 'reasonably related to future criminality' contemplates a degree of proportionality between the burden imposed by a probation condition and the legitimate interests served by the condition." (*Id*. at p. 1122.)

The proponents of this bill argue that youth are "burdened with excessive and arbitrary probation conditions which, research has shown, harms their development and prospects for rehabilitation." (*Ending Endless Probation*, *supra*, at p. 5.) This bill requires conditions of probation for a ward to be individually tailored, developmentally appropriate, and reasonable. This bill additionally requires that

the burden imposed by those conditions is proportional to the legitimate interests served by the conditions.

SUBJECT: State highways: relinquishment: infrastructural barriers

SOURCE: Author

DIGEST: This bill authorizes the California Transportation Commission to relinquish a portion of a state highway that contains an infrastructural barrier, as defined, to a city or county under specified conditions.

ANALYSIS: Existing law establishes a process whereby the California Transportation Commission (CTC) may relinquish to any county or city any portion of any state highway within that county or city. Specified public notice is required and the highway must be in a state of good repair. (SHC §73)

This bill authorizes the CTC to relinquish a portion of a state highway that contains an infrastructural barrier, as defined, to a city or county if the Department of Transportation (Caltrans) and the applicable city or county enter into an agreement subject to the following conditions:

- The portion of the state highway is located within the territorial limits of the city or county entering into the agreement.
- The CTC determines the relinquishment is in the best interest of the state.
- The CTC holds a public hearing on the proposed relinquishment.
- The purposes of the relinquishment are for restorative economic and social justice.
- The infrastructural barrier shall be removed or retrofit in a manner that enhances community connectivity.
- Any land made available to the removal or retrofit of the infrastructural barrier shall be redeveloped with a focus on implementing improvements that will benefit the populations impacted by or previously displaced by the infrastructural barrier.
- A part of the relinquished portion of the highway shall be used for transportation purposes to ensure the continuity of traffic flow.
- The relinquishment is consistent with federal law and regulations.
- The city or county determines that the construction of the infrastructural barrier had a significant impact on a disadvantaged community.

Comments

1) *Purpose*. The author is concerned about the detrimental impacts of the highway system and that the state should provide a relinquishment solution to repair the damaged communities.

2) *Freeway Impacts.* There's been increasing recognition that freeways can be harmful to the adjacent neighborhoods and that the construction of freeways has broken apart communities. This is one of several reasons that it is rare to build new highways. Moreover, there are efforts underway to undo some of the damage. In 2021 the federal Infrastructure Investment and Jobs Act established a $1 billion grant program known as the Reconnecting Communities Pilot Grant Program to restore community connectivity through the removal, retrofit, mitigation or replacement of eligible transportation infrastructure that creates barriers in communities. A similar program has been proposed by the Newsom Administration, known as the Highways to Boulevards program.

3) *Staying Within the Lines*. Property that was acquired using federal funds must continue to be used for that purpose even if relinquished to a city or county. This bill contemplates using relinquished property for affordable housing, green space and transit-oriented development. Some of these purposes may conflict with the restrictions on the use of the federal funds. If so, the federal government will seek reimbursement which would be a surprise bill for the city or county. Similarly, the California Constitution limits the use of gas taxes, and some of the purposes authorized with this bill may conflict with those limitations. This bill provides that any relinquishment shall not be subject to federal reimbursement and may not conflict with the California Constitution.

4) *Opposition*. No opposition for the current version of this bill. Opposition letters refer to prior version of the bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Unknown, potentially significant future costs related to the relinquishment of highway segments, to the extent the agreements between Caltrans and local agencies include one-time payments or new costs related to the removal or retrofit of the infrastructural barrier. These costs may be partially or fully offset in future years due to avoided maintenance costs on a relinquished segment. Actual costs or savings would depend upon the details of each agreement and the characteristics of a particular infrastructural barrier. (State Highway Account)

- CTC indicates that costs and resource needs are unknown and would depend upon how many new relinquishment proposals are considered each year as a result of this bill. Costs could be minor and absorbable, to the extent that the number of relinquishments do not significantly increase, but this bill may impact staff workload and impose new costs on the CTC if it results in additional proposals at each CTC meeting. (State Highway Account)

SUBJECT: Domestic violence: victim's rights

SOURCE: WEAVE

DIGEST: This bill requires the county probation department to notify a victim of domestic violence, abuse, or stalking, of the perpetrator's current or proposed community of residence, if the victim has requested such notification.

ANALYSIS:

Existing law:

1) Requires the California Department of Corrections and Rehabilitation (CDCR), county sheriff, or director of the local department of corrections to give notice to a victim of stalking or felony domestic violence prior to the release of the person convicted of stalking or felony domestic violence. (Pen. Code § 646.92.)

2) Requires CDCR or the Board of Parole Hearings (BPH), whenever a person convicted of a violent felony is going to be released from state prison, to notify the local law enforcement agencies that have jurisdiction over the community in which the person was convicted and the community in which the person is scheduled to be released. (Pen. Code § 3058.6.)

3) Provides that whenever the sheriff or the chief of police is notified of the pending release of a convicted violent felon, that sheriff or chief of police may notify any person designated as an appropriate recipient of that notice. (Pen. Code § 3058.7, subd. (a).)

4) Requires CDCR or BPH to notify a victim or witness who has requested notification that a person convicted of a violent felony is scheduled to be released. Requires notice of the community in which the person is scheduled to reside also be given if it is in the county of residence of a witness, victim, or family member of a victim who has requested notification, or within 100 miles of the actual residence of a witness, victim, or family member of a victim who has requested notification. (Pen. Code § 3058.8, subd. (a).)

5) Requires, with respect to the conviction of a defendant involving a violent felony, the district attorney, probation officer, or victim-witness coordinator to notify the victim as to the victim's right to be sent notice of the defendant's release from custody. (Pen Code § 679.03, subd. (a)(1).)

This bill:

1) Requires the county probation department to notify a victim of domestic violence or abuse, as defined, or a victim of stalking, as defined, of the perpetrator's current community of residence or proposed community of residence upon release, when the perpetrator, after conviction, is placed on or being released on probation and under the supervision of the county probation department.

2) Requires the above notification to take place only if the victim has requested notification and has provided the probation department with a current address at which they may be notified.

3) Requires the district attorney to advise every victim of domestic violence or abuse, or stalking, of their right to request and receive notification.

Background

Penal Code Section 3058.8 requires CDCR or BPH to notify a victim or witness who has requested notification that a person convicted of a violent felony is scheduled to be released onto parole. Section 3058.8 further requires notice of the community in which the person is scheduled to reside if it is in the county of residence of a witness, victim, or family member of a victim who has requested notification, or within 100 miles of the actual residence of a witness, victim, or family member of a victim who has requested notification. Existing law also

requires CDCR or BPH to provide updated information to the witness, victim, or next of kin if there is a change in the community where the person is to reside.

This bill applies to individuals on probation, and requires the county probation department to notify a victim of domestic violence or stalking, of the perpetrator's current community of residence when the perpetrator is placed on probation after being convicted. If the perpetrator was in custody and is going to be placed on probation, the county probation department is required to notify the victim of the perpetrator's proposed community of residence. This bill specifies that notification take place only if the victim has requested notification and has provided the probation department with a current address at which they may be notified. Finally, this bill requires the district attorney to advise every victim of domestic violence or abuse, or stalking, of their right to request and receive notification.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, potentially ongoing reimbursable costs across all 58 counties for additional staff and infrastructure for county probation departments to notify victims of domestic violence, stalking or abuse of a perpetrator' address when the perpetrator is placed on probation. (Locals Funds, General Fund). Actual costs will depend on the number of victims that request information. Impact to the General Fund will depend on whether the duties imposed by this bill constitute a reimbursable state mandate, as determined by the Commission on State Mandates.

SUBJECT: Disability retirement: COVID-19: presumption

SOURCE: SEIU California

DIGEST: This bill extends the sunset date on the public pension disability retirement COVID-19 presumption established last year by AB 845 (Rodriguez, Chapter 122, Statutes of 2021), from January 1, 2023, to January 1, 2024.

Senate Floor Amendments of 6/28/22 change the bill's sunset date from January 1, 2025, to January 1, 2024.

ANALYSIS:

Existing law:

1) Provides a non-service connected (i.e., non-industrial) disability retirement for members of the California Public Employees' Retirement System (CalPERS) who meet service requirements and are incapacitated for the performance of duty, as specified. (Government Code § 21150 et seq.)

2) Authorizes a service-connected (i.e., industrial) disability retirement benefit for specified CalPERS members (usually safety members but also certain miscellaneous members) greater than the non-service disability benefit that also carries certain potential federal tax advantages. (GC §21151 et seq.)

3) Allows 37 Act county retirement systems to offer a non-service connected disability retirement to their members who are permanently incapacitated for the performance of their duties but not because of injury or disease arising out of their employment. (GC § 31725.8 et seq.)

4) Authorizes 37 Act county retirement systems to provide a service-connected disability retirement to their members who are permanently incapacitated for the performance of duty resulting from employment and upon meeting service requirements. (GC § 31720 et seq.)

5) Provides members of the California State Teachers' Retirement System (CalSTRS) who meet service requirements one of two forms of non-industrial disability retirement depending on when they became members. (Education Code §24001 et seq.; ED §24100 et seq.)

6) Requires members (or employers on behalf of the member) generally to apply for a disability retirement and show that their injury, whether industrial or not, prevents them from performing their job duties. (see e.g., ED § 24102 et seq.)

7) Creates various rebuttable presumptions whereby the pension system must presume that the member's specified condition or injury arose out of and in the course of employment. Such a presumption is significant in those systems that offer an industrial disability retirement benefit because it may qualify the member for the industrial retirement benefit (which may eliminate service requirements, provide a higher monthly pension benefit, and result in federal tax exemption treatment). However, the pension system can rebut the presumption with evidence that the injury did not arise from an employment-related event. (see e.g., GC § 31720.5 et seq.)

8) Requires a public retirement system to presume that the disability of a member who retires for disability on the basis, in whole or in part, of a COVID-19-related illness arose out of, or in the course of, the member's employment. (GC § 7523.1)

9) Allows evidence to the contrary to rebut the presumption described above but unless controverted, the presumption shall bind the applicable retirement system governing board. (GC § 7523.1)

10) Defines "COVID-19" to mean "the 2019 novel coronavirus disease". (GC § 7523)

11) Defines "Member" for purposes of the COVID-19 disability retirement presumption to mean a member of a public retirement system who meets either of the following:

    a) The member's job classification is either described in Labor Code (LC) Section 3212.87 (a) or is the functional equivalent of a job classification described in that subdivision.[1]

    b) The member's job classification is neither described in LC Section 3212.87(a) nor is the functional equivalent of a job classification described in LC Section 3212.87(a), but the member tests positive during an outbreak at the member's specific place of employment pursuant to definitions set forth in LC Section 3212.88 (m).[2] (GC § 7523)

12) Restricts the definition of "member" for purposes of the COVID-19 disability retirement presumption only to a member of a public retirement system subject to the Public Employees' Pension Reform Act of 2013 (PEPRA). (GC § 7523)

13) Provides that the COVID-19 rebuttable presumption provisions shall remain in effect only until January 1, 2023, and as of that date is repealed. (GC § 7523.2)

This bill extends the sunset date of the COVID-19 disability retirement presumption that was authorized by AB 845 (Rodriguez, Chapter 122, Statutes of 2021), from January 1, 2023, to January 1, 2024.

Background

AB 845 (Rodriguez, 2021) Disability Retirement COVID-19 Presumption

AB 845 established a COVID-19 rebuttable presumption until January 1, 2023, for public employee disability retirement. The bill was modeled after SB 1159 (Hill, Chapter 85, Statutes of 2020), which created a rebuttable presumption, until 2023, that illness or death related to COVID-19 is an occupational injury and therefore, such an injury qualifies the employee for workers' compensation benefits. AB 551

[1] LC § 3212.87 lists a wide array of positions frequently described as "first responders" that qualify for Workers' Compensation benefits from injury caused, as specified, by COVID-19, including many employees that are not eligible for industrial disability retirement benefits from a California public retirement system, although some may qualify for non-industrial disability retirement benefits.

[2] LC § 3212.88 establishes the specified COVID-19 Workers Compensation presumption for general employees who are not "first responders". LC § 3212.88(m) defines the terms "COVID-19", "test" or "testing", "specific place of employment", and "outbreak", as specified.

extends AB 845's sunset date so the COVID-19 presumption for public employee disability retirement will be effective until January 1, 2024.

Distinction between Disability Retirement Benefits and Workers Compensation

Workers compensation benefits arise out of *employment-related* injuries and provide qualified employees with medical, temporary compensation, permanent compensation, supplemental job displacement, and death benefits. Because receipt of workers compensation benefits hinges on the condition or injury arising from employment, a presumption that the condition or injury is job-related is very significant.

Although public pension systems generally have some form of *non-industrial* disability retirement benefit, not all public pension systems have *industrial disability* retirement benefits (i.e., for employment-related injury). For those that do, not all members are eligible for the industrial retirement benefits. Generally, industrial disability benefits are restricted to firefighters, peace officers, and other safety members although some related miscellaneous members are also statutorily eligible. For those members who *are* eligible, the presumption makes their application and eventual approval process easier. For those who are only eligible for *non-industrial* disability, a presumption that their condition or injury is employment-related is relatively irrelevant.

Disability benefits offered by public pension funds are generally not dependent on the injury being job-related. A member will receive a disability retirement benefit if the member meets specified service requirements (i.e., time in membership) and the injury prevents the member from performing the duties of the member's position. Thus, a presumption that the injury is employment-related is not determinative for receiving the disability benefit. *Some* members may be eligible for a better benefit or may not have to meet the service requirements if the injury is employment-related (i.e., an industrial disability). Statute specifies which member classifications are eligible for this industrial disability retirement benefit.

For members who are eligible, this bill's COVID-19 presumption would be beneficial because they would not have to prove their injury was job-related (unless the employer offered evidence that the injury was not COVID-19 related). For other members who are not eligible for industrial disability retirement benefits, the presumption cannot make them eligible.

ARGUMENTS IN SUPPORT: According to the author, "The symptoms of COVID-19 itself has negatively impacted the long-term health of those who contract it. Front line workers infected on the job and who need to retire due to COVID-19 and COVID-19-related illnesses should be protected. AB 551 is needed because we are still seeing COVID-19 infections in the workplace, as front line workers should continue to be protected."

According to the sponsor, SEIU California, "We are just discovering the lingering disabling effects of "Long Haul" COVID-19 patients and AB 551 Rodriguez is necessary to protect workers should these effects prove so disabling the worker may not be able to return to work. Workers and their dependents who contract COVID in the workplace will be protected from having to fight for benefits they paid for and are entitled to under long standing pension law. It is only fair that we treat them accordingly when they fall ill from a workplace COVID injury."

SUBJECT: School meals: Child Nutrition Act of 2022

SOURCE: Factory Farming Awareness Coalition
Friends of the Earth
Social Compassion in Legislation

DIGEST: This bill requires the California Department of Education (CDE) to develop guidance for local educational agencies (LEAs) participating in the federal School Breakfast Program that maintain any of grades K-6 on how to serve eligible non-schoolaged children breakfast or a morning snack at an LEA schoolsite.

Senate Floor Amendments of 8/24/22 (1) require CDE to consult with the Department of Social Services when developing guidance; and, (2) delete the requirement that CDE evaluate the guidance and its impact on school breakfast programs.

ANALYSIS:

Existing law:

1) Requires all of the following, beginning with the 2022–23 school year:

a) A school district, charter schools, and county superintendent of schools maintaining any of grades K-12 to provide two school meals free of charge during each schoolday to any student who requests a meal, without consideration of the student's eligibility for a federally funded free or reduced-price meal. Meals must be nutritiously adequate meals that qualify for federal reimbursement.
b) An LEA that has a reimbursable school breakfast program to not charge any student, and to provide a breakfast free of charge to any student who requests one, without consideration of the student's eligibility for a federally funded free or reduced-price meal. The meals provided free of charge pursuant to this paragraph shall be nutritiously adequate, and shall count toward the total of two school meals required to be provided each schoolday. (Education Code (EC) § 49501.5)

2) Prohibits an LEA from denying a meal to any free or reduced-price eligible students, and requires that these students receive the same meal as all other students. (EC § 49550 and § 49557)

This bill:

1) Requires CDE to develop guidance, in consultation with the Department of Social Services (DSS), for LEAs participating in the federal School Breakfast Program that maintain any of grades K-6 on how to serve eligible non-schoolaged children breakfast or a morning snack at an LEA schoolsite.

2) Requires the guidance to highlight opportunities to maximize federal reimbursement through the federal School Breakfast Program and the federal Child and Adult Care Food Program.

3) Requires that a guardian of an eligible non-schoolaged child be present at the LEA schoolsite in order for the non-schoolaged child to receive breakfast or a morning snack at the schoolsite.

4) Requires the CDE to develop the guidance, in consultation with DSS, in a manner that does not jeopardize federal funding for school meal programs and that maximizes federal meal reimbursement.

5) Requires CDE to post the guidance on its website by July 1, 2023, and provides that CDE is not required to mail the guidance to LEA.

6) Provides that provisions related to this guidance does not require an LEA to take any action.

7) Defines:

   a) "Eligible non-schoolaged child" to mean a child who is not enrolled in school and who is a sibling, half sibling, or stepsibling of, or a foster child residing with, a student who meets the federal eligibility criteria for a free or reduced-price breakfast at an LEA participating in the federal School Breakfast Program that maintains any of grades K-6.
   b) "Guardian" to mean a parent, stepparent, grandparent, or other adult family member or caretaker who is caring for an eligible non-schoolaged child.
   c) "Local educational agency" to mean a school district, county office of education, or charter school.

8) States findings and declarations relative to the benefits to children who eat breakfast.

Comments

Need for this bill. According to the author, "Hunger among children is known to have significant short and long-term repercussions. In the short term, a child experiencing hunger is less likely to be able to focus in school, avert school disciplinary action, or participate in extra-curricular activities. In the long-term, childhood hunger increases the likelihood that the child will experience developmental delays, cognitive deficiencies, and adult auto-immune diseases that are both costly and painful.

"There is no federal prohibition to serving younger siblings of school-age children a morning snack through the Child and Adult Care Food Program at the same time and location as school-aged children receive their federally reimbursed school breakfast program. Ultimately, school districts need the appropriate resources and guidelines to ensure that siblings of enrolled students who qualify for the free or reduced lunch program will continue to receive the food security that they are already receiving due to the federal waiver signed in 2020.

"This bill will require the CDE to issue instructions to school districts participating in the Child and Adult Care Food Program on how to serve eligible nonschoolaged children breakfast or a morning snack at a school site."

Feeding siblings. This bill requires the CDE to issue guidance about how a school district, COE, or charter school could voluntarily serve younger siblings a federally reimbursable meal at a school site that their older sibling attends. Currently, schools may operate the School Breakfast Program, as well as the Child and Adult Care Food Program (CACFP), which allows but does not require younger, non-

schoolage children to be served. Schools may serve younger, non-schoolage children through the CACFP at the same time and location as serving schoolage children through the School Breakfast Program. Until July 1, 2022, schools were authorized, through federal waivers, to serve meals to anyone under the age of 18; the federal waivers that allowed this expired on June 30, 2022.

SUBJECT: Social media companies: terms of service

SOURCE: Anti-Defamation League

DIGEST: This bill requires social media companies, as defined, to post their terms of service and to submit reports to the Attorney General on their terms of service and content moderation policies and outcomes.

Senate Floor Amendments of 8/24/22 narrow the enforcement mechanism.

ANALYSIS:

Existing law:

1) Provides, through the California Constitution, for the right of every person to freely speak, write, and publish their sentiments on all subjects, being responsible for the abuse of this right. Existing law further provides that a law may not restrain or abridge liberty of speech or press. (Cal. Const., art. I, § 2(a).)

2) Provides, in federal law, that a provider or user of an interactive computer service shall not be treated as the publisher or speaker of any information provided by another information content provider. (47 U.S.C. § 230(c)(2).)

3) Limits the liability of a provider or user of an interactive computer service in connection with restricting access to certain materials. (47 U.S.C. § 230(c)(2).)

4) Establishes the Unfair Competition Law (UCL). (Bus. & Prof. Code § 17200 et seq.) Prohibits false or deceptive advertising to consumers about the nature of any property, product, or service, including false or misleading statements made in print, over the internet, or any other advertising method. (Bus. & Prof. Code § 17500.)

5) Requires certain businesses to disclose the existence and details of specified policies. (Bus. & Prof. Code § 22575; Civ. Code §§ 1714.43, 1798.90.53; Educ. Code § 66406.7(f).)

This bill:

1) Requires a social media company to post terms of service for each social media platform owned or operated by the company in a manner reasonably designed to inform all users of the social media platform of the existence and contents of the terms of service.

2) Requires the terms of service to be available in all Medi-Cal threshold languages, as defined, in which the social media platform offers product features, including, but not limited to, menus and prompts.

3) Requires social media companies to submit a terms of service report, on a semiannual basis to the Attorney General, who must make it available to the public in a searchable repository on its website.

4) Subject companies in violation to penalties of up to $15,000 per violation per day to be sought by specified public prosecutors.

Comments

In 2005, five percent of adults in the United States used social media. In just six years, that number jumped to half of all Americans. Today, over 70 percent of

adults use at least one social media platform. Facebook alone is used by 69 percent of adults, and 70 percent of those adults say they use the platform on a daily basis.

Given the reach of social media platforms and the role they play in many people's lives, concerns have arisen over what content permeates these sites, entering the lives of the billions of users, and the effects that has on them and society as a whole. In particular, the sharpest calls for action focus on the rampant spread of misinformation, hate speech, and sexually explicit content. Social media companies' content moderation of a decade ago involved handfuls of individuals and user policies were minimal. These programs and policies have dramatically evolved over the years but the proliferation of objectionable content and "fake news" has led to calls for swifter and more aggressive action in response. However, there has also been backlash against perceived censorship in response to filtering of content and alleged "shadow banning."

One area the author specifically focuses in on as motivation for the bill is the rise of hate speech online and the real world consequences. The author points to a recent study of over 500 million Twitter posts from 100 cities in the United States that found that "more targeted, discriminatory tweets posted in a city related to a higher number of hate crimes."[1] This bill seeks to increase transparency around what terms of service social media companies are setting out and how it ensures those terms are abided by. The goal is to learn more about the methods of content moderation and how successful they are.

According to the author:

> The line between providing an open forum for productive discourse and permitting the proliferation of hate speech and misinformation is a fine one, and depends largely on the structure and practices of the platform. However, these platforms rarely provide detailed insight into such practices, and into the relative effectiveness of different approaches. This, along with constraints imposed by existing federal law, has historically made policy-making in this space remarkably difficult. This bill seeks to provide critical transparency to both inform the public as to the policies and practices governing the content they post and engage with on social media, and to allow for comparative assessment of content moderation approaches to better equip both

[1] Press Release, *Hate speech on Twitter predicts frequency of real-life hate crimes* (June 24, 2019) NYU Tanden School of Engineering, **https://engineering.nyu.edu/news/hate-speech-twitter-predicts-frequency-real-life-hate-crimes**.

social media companies and policymakers to address these growing concerns.

This bill starts with a baseline requirement to have social media platforms post their terms of service. These policies must include information about how users can ask questions, how they can flag content or users in violation, and a list of potential actions that the company might take in response. To ensure meaningful access, the terms of service must be posted in a manner reasonably designed to inform all users of their existence and contents and available in all Medi-Cal threshold languages in which the social media platform offers product features. The bill next requires a detailed report to be compiled by these companies and submitted to the Attorney General on a semiannual basis. The bill also requires the report to contain a "detailed description of content moderation practices" used by the platform. The bill leaves enforcement to the Attorney General or specified city attorneys.

This bill is sponsored by the Anti-Defamation League. It is supported by a variety of groups, including Common Sense and the Islamic Networks Group. It is opposed by various technology and business associations, including the California Chamber of Commerce and TechNet.

For a more thorough analysis of the bill, including a discussion of the relevant legal obstacles posed by the First Amendment and Section 230 of the Communications Decency Act, please see the Senate Judiciary Committee analysis of the bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DOJ: The Department of Justice (DOJ) reports costs of $414,000 in 2022-23 and $711,000 annually thereafter in order to enforce the provisions of AB 587 and for IT resources to allow for submissions of terms of service (General Fund).

- Judicial Branch: Unknown cost pressures due to increased court workload (Special Fund – Trial Court Trust Fund, General Fund).

ARGUMENTS IN SUPPORT: A coalition of groups, including ADL, Equality California, NAACP, and Esperanza Immigrant Rights Project, emphasizes the need for the bill:

"Despite the widespread nature of these concerns, efforts by social media companies to self-police such content have been widely criticized as opaque, arbitrary, biased, and inadequate. While some platforms share limited information about their efforts, the current lack of transparency has exacerbated concerns about the intent, enforcement, and impact of corporate policies, and deprived policymakers and the general public of critical data and metrics regarding the scope and scale of online hate and disinformation. Additional transparency is needed to allow consumers to make informed choices about the impact of these products (including the impact on their children) and so that researchers, civil society leaders, and policymakers can determine the best means to address this growing threat to our democracy.

AB 587 would address this troubling lack of transparency by requiring social media platforms to publicly disclose their policies and report key data and

metrics around the enforcement of their policies. This disclosure would be accomplished through quarterly public filings with the Attorney General."

ARGUMENTS IN OPPOSITION: A coalition, including TechNet, writes:

"AB 587 requires companies to publicly disclose more than just content moderation policies, which are already available to the public. The bill requires companies to report to the Attorney General sensitive information about how we implement policies, detect activity, train employees, and use technology to detect content in need of moderation. The language makes it explicit that the bill is seeking "detailed" information about content moderation practices, capabilities, and data regarding content moderation."

SUBJECT: Recycling: materials

SOURCE: Author

DIGEST: This bill makes numerous changes to the State Agency Buy Recycled Campaign (SABRC), as specified; substantially revises product categories; requires the Department of Resources Recycling and Recovery (CalRecycle) to update the list of products and minimum recycled content percentages, as specified; requires the Department of General Services (DGS) to maintain procedures for complying with SABRC, as specified; and, requires state agencies to purchase recycled products instead of nonrecycled products when certain conditions apply, as specified.

Senate Floor Amendments of 8/25/22 specify conditions for applying a 10% bid preference for nonrecycled products, make various changes to product definitions, and require DGS to maintain procedures for complying and continue to make products that meet minimum requirements available through contracts, as specified.

ANALYSIS:

Existing law:

1) Requires, under the SABRC, state agencies to ensure specific percentages of reportable purchases from prescribed product categories to be recycled products, as specified.

2) Requires each state agency, if fitness and quality are equal, to purchase recycled products instead of nonrecycled products whenever recycled products are available at the same or a lesser total cost than nonrecycled products, as specified.

This bill:

1) Requires DGS to maintain procedures for complying with the SABRC, including procedures for meeting the minimum recycled content requirements in state contracting as established by CalRecycle, and for compliance with CalRecycle's reporting requirements, as specified.

2) Specifies that the reportable recycled product categories purchased as part of service agreements are: printing and writing papers, soil amendments and soil toppings, erosion control products, paint, and carpet, as specified.

3) Requires a state agency to purchase recycled products instead of nonrecycled products if fitness and quality are equal, whenever recycled products are available at no more than 10% greater total cost than nonrecycled products, and specified circumstances exist.

4) Mandates CalReycle, with the concurrence of DGS and in consultation with impacted agencies, to update the list of identified products and update the minimum recycled content percentages, as determined to be appropriate, commencing January 1, 2026, and every three years thereafter.

5) Specifies that in updating the identified product lists, CalRecycle shall take into consideration the federal standards, as specified.

6) Requires CalRecycle and DGS to incorporate the updated list of products and minimum recycled content requirements into the State Contracting Manual, the Financial Information System for California (FI$Cal), and the financial system of any department not utilizing FI$Cal, as specified.

7) Requires CalRecycle to maintain an internet website with current SABRC products and minimum recycled content requirements, as specified.

8) Provides that in determining whether the minimum recycled content percentages should be updated, CalRecycle shall consider, at a minimum, specified factors.

9) Authorizes CalRecycle, with the concurrence of DGS, to set a higher minimum recycled content standard for white 20 pound printing and writing paper and white 20 pound printing and writing paper and white wove envelopes, either during the triennial review or at any other time after January 1, 2024.

10) Creates, effective January 1, 2023, and applicable until updated by CalRecycle and DGS, several new product categories with minimum content and recyclability requirements, as specified.

11) Requires state agency procurement and contracting officers, or their designees, to participate in annual mandatory training conducted by CalRecycle on the benefits of SABRC purchases.

12) Requires state agencies to report annually to CalRecycle its progress in meeting the recycled product purchasing requirements and, if necessary, an explanation of circumstances beyond the state agency's control that prevented the state agency from meeting the recycled product purchasing requirements for specified product categories using the SABRC report format provided by CalREcycle.

13) Provides that if a recycled product has special performance requirements necessary for the protection of public safety, the state agency may purchase that product made with virgin material, as specified.

14) Requires CalRecycle, upon request by a state agency, to offer advice and recommendations regarding products and situations in which a take-back requirement is appropriate.

15) Requires DGS and the Prison Industry Authority to prioritize the use of recycled content products in order to facilitate the easy procurement of SABRC-compliant products.

16) Requires DGS to make products that meet the SABRC postconsumer minimum percentage requirements available through statewide contracts, and provide information to state agencies regarding contracted products that meet these requirements.

17) Provides that the University of California is not subject to the SABRC procurement requirements; however requires the University of California to report if products purchased under SABRC meet the associated minimum recycled content requirements.

18) Specifies that recycled asphalt pavement shall contain a minimum of 25% reclaimed asphalt pavement by weight, as permitted by specifications and standards developed by the Department of Transportation (Caltrans) for recycled paving materials, as specified.

Comments

Purpose of the Bill. According to the author's office, "as the single largest purchaser of goods and contracts in California, the state can create stronger economic incentives for businesses to use more recycled material in their products. AB 661 will ensure that State of California contracts and purchases contain the same amounts of recycled materials as private businesses are currently required to have. With global temperature and ocean pollution rising at an alarming rate, urgent, effective action towards a truly Circular Economy is needed."

Commission on Recycling Markets and Curbside Recycling. AB 1583 (Eggman, Chapter 690, Statutes of 2019) required, by July 1, 2020, CalRecycle to convene a statewide Commission on Recycling Markets and Curbside Recycling (Commission) consisting of representatives of public agencies, private solid waste enterprises, and environmental organizations with expertise in recycling. AB 1583 required the Commission, by January 1, 2021, to issue policy recommendations to achieve specified recycled market development goals, the state's 75% recycling policy goal, and the state's organic waste recycling policy goals, and to identify products that are recyclable or compostable and regularly collected in curbside recycling programs.

The Commission issued its preliminary policy recommendations in December 2020. AB 2287 (Eggman, Chapter 281, Statutes of 2020) extended the Commission's deadline for its final recommendations until July 1, 2021, in order for public review and comment to be considered before the Commission produced its final recommendations. Both the Final Report and Preliminary Report are

published online at CalRecycle's website, as well as an updated December 20, 2021 Recommendations Report.

State Agency Buy Recycled Campaign. The SABRC is a joint effort between CalRecycle and DGS to implement state laws requiring state agencies and the Legislature to purchase recycled-content products (RCPs) and track those purchases. It complements the intent of the Integrated Waste Management Act which is indented to reduce the amount of waste going to California's landfills. An annual report detailing state agencies' annual RCP purchase is due to CalRecycle by October 31 of each year.

Under SABRC, if fitness and quality are equal, each state agency must purchase recycled products instead of nonrecycled products whenever recycled products are available at the same or lesser total cost than nonrecycled products. Each state agency must report annually to CalRecycle its progress in meeting the recycled product purchasing requirements. If DGS determines a requirement has not been met, DGS must, in consultation with CalRecycle, review purchasing policies and recommend immediate revisions to ensure the recycled product purchasing requirements are met. This bill, if fitness and quality are equal, requires state agencies to purchase recycled products instead of nonrecycled products whenever fitness and quality of the products are equal and recycled products are available at no more than 10% greater total cost than nonrecycled products, as specified. The bill includes protections to ensure the new 10% bid preference does not conflict with existing state bid preference programs.

Supporters argue that SABRC does not cover all products with recycling or greenhouse gas (GHG) implications, the minimum RCP percentages are outdated in some categories, and some categories include mixed materials that cause difficulties in reporting. This bill makes various revisions to SABRC requirements to further leverage procurement decisions made by state agencies regarding RCP products, in support of the state's broader waste reduction and climate change goals and to help bolster recycling commodity markets. Additionally, this bill mandates CalReycle, with the concurrence of DGS and in consultation with impacted agencies, to update the list of identified products and update the minimum RCPs, as determined to be appropriate, commencing January 1, 2026, and every three years thereafter.

Related/Prior Legislation

AB 1369 (Bennet, 2021), among other things, adds certain building materials to the list of eligible materials under the Buy Clean California Act, as specified. (Pending in the Senate Appropriations Committee)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, DGS anticipates:

- A one-time cost of up to $100,000 for the development and implementation of new policies related to SABRC.
- A one-time cost of up to $50,000 for the development of the annual training for state agency procurement and contracting officers from all state agencies.
- Ongoing costs, in the hundreds of thousands of dollars, for one additional staff (at the AGPA level) to aid state agencies in performing a more extensive analysis to determine if the quality and fitness of two products are equal. DGS notes that because a preference will be given to a recycled product over a nonrecycled product regardless of cost, a state agency will need the bidder to independently verify the recycled content of their goods; otherwise, the contract award could be subject to a protest.
- Unknown likely significant fiscal impact across all state agencies. DGS notes that expanding SABRC to service contracts will result in additional workload for state agencies, which will need to collect recycled content information from contractors and report it through FI$Cal. The impact of this workload will vary by department depending on the number of contracts entered into that will result in the state receiving a product subject to SABRC from the service provider.
- Unknown, increased fiscal impact from agencies paying more for goods and services that fall within the SABRC categories. More stringent recycled content standards will likely narrow the pool of eligible suppliers of goods. Additionally, the new burdens created for contractors providing a service to the state may result in some businesses opting not to bid on state contracts. Consequently, businesses that choose to bid on state contracts may face less competitive pressure to offer their goods and services at the lowest possible price. DGS notes that with state contracts for goods and services exceeding $10 billion annually, even the slightest increase in costs could have a major impact on the state.

The Department of Justice (DOJ) anticipates General Fund costs of approximately $2.9 million in Fiscal Year (FY) 2022-23, $5.6 million in FY 2023-24, $5.5 million in FY 2024-25, and $5.4 million ongoing. Costs include workload related to identifying DOJ contracts and processes that need to be changed, develop and implement updated processes, update required DOJ forms, provide continuous research of products and vendors that will be able to meet DOJ's needs, and review and ensure procurements align with mandated requirements. Other costs include increased procurement expenses from buying recycled paper products (an annual

increase of approximately $15,000) and recycled IT products (an annual increase of approximately $4.3 million).

CalRecycle anticipates costs to adjust the recycled content standards administratively on a triennial basis and other related workload to be absorbable within existing resources.

OPPOSITION: (Verified 8/25/22)

American Chemistry Council
American Forest & Paper Association
California Manufacturers & Technology Association

ARGUMENTS IN SUPPORT: Supporters of the bill write that, "AB 661 makes much needed improvements to SABRC, including removing the requirement to purchase only when available at the same or lesser total cost than non-recycled products, requiring annual training, revising product categories and minimum content percentages and recyclability requirements update every three years, and clarifying that SABRC includes service contracts where the contractor is

purchasing reportable recycled products in the performance of the service contract."

ARGUMENTS IN OPPOSITION: In opposition to the bill, the California Manufacturers & Technology Association (CMTA) writes in opposition to this bill that, "AB 661 directly conflicts with standards established by the United States Environmental Protection Agency for certain product categories. It is not feasible for manufacturers to design products to meet multiple recycled content requirements established by states and other jurisdictions. It is also our understanding that federal procurement and recycled content requirements are currently under review, and AB 661 may be premature. AB 661 should clarify its intention to align with current and future federal standards."

SUBJECT: Planning and zoning: density bonuses: shared housing buildings

SOURCE: CityLab UCLA

DIGEST: This bill grants a density bonus for shared housing developments, as specified.

Senate Floor Amendments of 8/24/22 resolve chaptering conflicts with AB 2334 (Wicks).

Senate Floor Amendments of 8/22/22 make technical and clarifying changes.

ANALYSIS:

Existing law:

1) Requires each city and county to submit an annual progress report (APR), annually by April 1, to the legislative body, the Office of Planning and

Research, and the Department of Housing and Community Development that includes data points and updates on housing plans and approvals.

2) Requires each city and county to adopt an ordinance that specifies how it will implement state Density Bonus Law (DBL). Requires cities and counties to grant a density bonus when an applicant for a housing development of five or more units seeks and agrees to construct a project that will contain at least one of the following:

   a) 10% of the total units of a housing development for lower income households;

   b) 5% of the total units of a housing development for very low-income households;

   c) A senior citizen housing development or mobile home park;

   d) 10% of the units in a CID for moderate-income households;

   e) 10% of the total units for transitional foster youth, disabled veterans, or homeless persons; or

   f) 20% of the total units for lower-income students in a student housing development.

   g) 100% of the units of a housing development for lower-income households, except that 20% of units may be for moderate-income households.

3) Requires a city or county to allow an increase in density on a sliding scale from 20% to 50%, depending on the percentage of units affordable to low- and very low-income households, over the otherwise maximum allowable residential density under the applicable zoning ordinance and land use element of the general plan. Requires the increase in density on a sliding scale for moderate-income for-sale developments from 5% to 50% over the otherwise allowable residential density.

4) Provides that upon the request of a developer, a city or county shall not require a vehicular parking ratio, inclusive of disabled and guest parking, that meets the following ratios:

   a) Zero to one bedroom — one onsite parking space.

   b) Two to three bedrooms — one and one-half onsite parking spaces.

c) Four and more bedrooms — two and one-half parking spaces.

5) Provides, notwithstanding 4) above, that a city or county shall not impose a parking ratio higher than 0.5 spaces per unit, nor any parking standards, for a project that is:

   a) Located within one-half mile of a major transit stop and the residents have unobstructed access to the transit stop; or

   b) A for-rent housing development for individuals who are 62 years or older and the residents have either access to paratransit service or unobstructed access, within one-half mile, to fixed bus route service that operates at least eight times per day.

6) Provides, notwithstanding 4) and 5) above, that a city or county shall not impose any minimum parking requirement on a housing development that consists solely of rental units for lower income families and the is either a special needs or a supportive housing development.

7) Provides that the applicant shall receive the following number of incentives or concessions:

   a) One incentive or concession for projects that include at least 10% of the total units for moderate-income households, 10% of the total units for lower-income households, or at least 5% for very low-income households.

   b) Two incentives or concessions for projects that include at least 20% of the total units for moderate-income households, 17% of the total units for lower income households, or least 10% for very low income households.

   c) Three incentives or concessions for projects that include at least 30% of the total units for moderate-income households 24% of the total units for lower-income households, or at least 15% for very low-income households.

   d) Four incentives or concessions for projects where 100% of the units of a housing development for lower-income households, except that 20% of units may be for moderate-income households, as well as a height increase up to 33 feet if the project is located within one-half mile of a transit stop.

This bill:

1) Defines “unit” as one cohousing unit and its prorate share of associated common area facilities.

2) Defines "shared housing building" as a residential or mixed-use structure with five or more shared units and one or more common kitchens and dining areas designed for permanent residence of more than 30 days be its tenants. The kitchens and dining areas within the shared housing building shall be able to accommodate housing.

3) Defines "shared housing unit" as one or more habitable rooms, not contained within another dwelling unit, that includes a bathroom, sink, refrigerator, and microwave, is used for permanent residence, that meets the "minimum room area" definition of the California Residential Code, and complies with the definition of "guestroom" pursuant to the California Residential Code.

4) Requires cities and counties to grant a density bonus when an applicant for a housing development of five or more units seeks and agrees to construct a shared housing building that will contain either the following:

   a) 10% of the units of a shared housing building for lower income households.

   b) 5% of the units of a shared housing building for very low-income households.

5) Provides that, when an applicant proposes to construct a housing development that conforms to the requirements of 4) above, the local government shall not require any minimum unit size requirements or minimum bedroom requirements.

6) Provides that a shared housing building may include other dwelling units that are not shared housing units, provided that those units do not occupy more than 25% of the floor area of the shared housing building. A shared housing building may include 100% shared housing units.

7) Provides that a shared housing building may include incidental commercial uses, provided that those commercial uses are otherwise allowable and are located only on the ground floor or the level of the shared housing building closest to the street or sidewalk of the shared housing building.

8) Resolves chaptering conflicts with AB 2334 (Wicks).

Background

Given California's high land and construction costs for housing, it is extremely difficult for the private market to provide housing units that are affordable to low- and even moderate-income households. Public subsidy is often required to fill the

financial gap on affordable units. DBL allows public entities to reduce or even eliminate subsidies for a particular project by allowing a developer to include more total units in a project than would otherwise be allowed by the local zoning ordinance, in exchange for affordable units. Allowing more total units permits the developer to spread the cost of the affordable units more broadly over the market-rate units. The idea of DBL is to cover at least some of the financing gap of affordable housing with regulatory incentives, rather than additional subsidy.

Under existing law, if a developer proposes to construct a housing development with a specified percentage of affordable units, the city or county must provide all of the following benefits: a density bonus; incentives or concessions (hereafter referred to as incentives); waiver of any development standards that prevent the developer from utilizing the density bonus or incentives; and reduced parking standards.

To qualify for benefits under DBL, a proposed housing development must contain a minimum percentage of affordable housing. If one of these options is met, a developer is entitled to a base increase in density for the project as a whole (referred to as a density bonus) and one regulatory incentive. Under DBL, a developer is entitled to a sliding scale of density bonuses, up to a maximum of 50% of the maximum zoning density and up to four incentives, as specified, depending on the percentage of affordable housing included in the project. At the low end, a developer receives 20% additional density for 5% very low-income units and 20% density for 10% low-income units. The maximum additional density permitted is 50%, in exchange for 15% very low-income units and 24% low-income units. The developer also negotiates additional incentives, reduced parking, and design standard waivers, with the local government. This helps developers reduce costs while enabling a local government to determine what changes make the most sense for that site and community.

Comments

1) *Student housing density bonuses*. In 2018, the Legislature created a density bonus incentive program for student housing developments (ie dorm-style housing) in order to facilitate their construction. That bill, SB 1227 (Skinner, Chapter 937, Statutes of 2018) allowed a developer to seek and receive a 35% increase in density if they agree to restrict 20% of the units in the development to low-income students, with a priority for homeless students. To qualify to live in lower income units students would be required to provide proof that their household income qualifies them for a Cal Grant. The developer is also entitled to one concession and incentive.

This bill incentivizes the development of shared housing development, which contemplate any unit size that includes a bathroom, sink, refrigerator, and microwave, with a common area. These projects are entitled to unlimited so long as 10% low income or 5% very low-income units.

2) *So are these legal?* The California Building Code defines "efficiency dwelling unit" as a unit with not less than 220 square feet and an additional 100 square feet for each additional occupant in excess of two occupants. These unit types must also have a separate bathroom and specified kitchen appliances. While there is no specific mandate, these standards are intended to apply to detached units. To that end, depending on the project, it is not clear that the projects incentivized by this bill will meet existing building standards.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

SUPPORT: (Verified 8/22/22)

CityLab UCLA (source)
Abundant Housing LA
American Planning Association, California Chapter
California Apartment Association
City of Santa Monica
East Bay for Everyone
People Assisting the Homeless

OPPOSITION: (Verified 8/22/22)

City of Lafayette

ARGUMENTS IN SUPPORT: According to the author, "Despite its potential, California's other major cities and major developers have been slow to embrace co-housing buildings. Stringent density requirements limit the number of units developers can build on an already costly parcel of land. Parking requirements add additional construction costs that can make co-housing financially infeasible, especially for projects that aim to house more than 100 units. AB 682 aims to ease the roadblocks that have long stifled the construction of these affordable housing units. By expanding the state's density bonus law to incentivize co-housing apartments, AB 682 will provide more affordable units without the need for public subsidies. As the state grapples with the housing shortage, AB 682 will help diversify the housing stock, offering both affordable housing and the option for communal living."

ARGUMENTS IN OPPOSITION: The City of Lafayette is opposed because the units contemplated by this bill may be considered "group quarters" and thus, ineligible to be counted towards a local governments regional housing needs allocation targets.

SUBJECT: Bees

SOURCE: California State Beekeepers Association

DIGEST: This bill updates portions of the Apiary Protection Act, primarily by changing the makeup of the Apiary Advisory Board, revising definitions, and updating provisions.

Senate Floor Amendments of 8/24/22 increase the number of board members from five to seven and authorize the secretary of the California Department of Food and Agriculture, in consultation with the Apiary Board, to identify a representative from the California Agricultural Commissioners and Sealers Association and a member of the industry that represents pollinated crops to serve as subject matter experts at board meetings.

ANALYSIS:

Existing law:

1) Creates the Apiary Board within the California Department of Food and Agriculture (CDFA). The board is required to consist of five members that are appointed by the secretary of CDFA and are registered beekeepers that reside

in California. Existing law also allows the secretary of CDFA (secretary) to appoint an additional public member.

2) Defines, for purposes of the Apiary Protection Act, "pest" to mean American foulbrood or any other infectious disease, parasite, pest, or hereditary disease that affects bees that the secretary declares by regulation detrimental to the welfare of the bee industry.

3) Requires an owner or a person in charge or possession of an apiary to, among other things, register the number of colonies in each apiary and the location of each apiary; and abate an infestation of an apiary upon finding an infestation to be present or receiving notice of an infestation.

4) Authorizes any person to transport any contaminated hive, together with its contents, or any contaminated comb, including any frame associated with it, to a suitable place for burning or to a licensed wax salvage plant, as specified.

5) Specifies no person shall move or transport any bees, comb, appliances, or colonies within the state that are diseased.

6) Authorizes an inspector, in a summary manner, to destroy where required, any and all diseased colonies, bees, combs, or hives that are unlawfully moved within the state wherever they may be found.

7) Requires a beekeeper to report to the agricultural commissioner of the county in which the beekeeper's apiary is located, on a form approved by the secretary, each location of apiaries for which notification of pesticide usage is sought.

8) Requires each request, except as specified, to be mailed within 72 hours before locating an apiary, where feasible, but in no event later than 72 hours after locating an apiary.

9) Provides that no person shall import or transport into the state any comb, bees on comb, queen bees, package bees, bee semen, or any used hive or used appliance, unless each separate load, lot, or shipment is accompanied by a valid certificate, and filed in a form and in the manner as set forth by the secretary, and unless the certificate is delivered to the agricultural commissioner of the county of destination or to the secretary, if there is no agricultural commissioner in the county, within 72 hours after the arrival of the load, lot, or shipment.

10) Requires the colony strength of a bee colony to be certified after inspection on the basis of the number of active frames of bees or the square inches of brood per colony, or both, using a sampling system approved by the secretary.

11) Requires the inspector, to the greatest extent possible, to endeavor to give the beekeeper advance notice of the scheduled date of the inspection.

12) Prescribes various abatement methods for diseased colonies.

13) Authorizes the secretary, in cooperation with the Regents of the University of California, to approve programs statewide to train, on a voluntary basis, beekeepers in the maintenance of colonies free of Africanized honey bees.

This bill:

1) Increases the number of board members from five to seven.

2) Requires the secretary to appoint six board members who are registered beekeepers who live in California and are representative of the industry functions of queen breeding, pollination, and honey production.

3) Authorizes the secretary, in consultation with the Apiary Board, to identify a representative from the California Agricultural Commissioners and Sealers Association and a member of the industry that represents pollinated crops to serve as subject matter experts at meetings.

4) Defines “pest” to include American foulbrood or any other infectious disease, parasite, pest, or hereditary disease that affects bees that the secretary declares by regulation, in consultation with the association representing the beekeeping industry and the Apiary Board to be a pest that is detrimental to the welfare of the bee industry.

5) Defines “infected,” “infested,” “contaminated,” or “diseased” to include a viable stage of the life cycle of a “pest,” as defined in Section 29009 Food and Agricultural Code, that can be demonstrated to exist on or within the colony population or on hives, comb, or any appliances associated with beekeeping operations.

6) Defines “inspector” to mean any person who has received a certificate issued by the department with curriculum approved by the secretary and who is authorized to enforce this bill.

7) Defines "broker" to mean a person or entity that receives a monetary profit from the management of beehives, hive equipment, or honey bees that they do not own but have control of through a private or public agreement between one or more parties.

8) Authorizes any person under the supervision of a local county agricultural commissioner, except when prohibited by other provisions of this bill, to transport any contaminated hive, together with its contents, or any contaminated comb, including any frame associated with it, to a suitable place for disposal or to a licensed wax salvage plant, as specified (Pursuant to Food and Agricultural Code, Section 29208).

9) Authorizes any person under the supervision of the local county agricultural commissioner to transport contaminated comb, including any frame associated with it, to a suitable place for burning or disposal or to a wax salvage plant, as specified (Pursuant to Food and Agriculture, Section 29208).

10) Authorizes an inspector to destroy any and all colonies, bees, combs, or hives that contain pests that are unlawfully moved within the state to wherever they may be found.

11) Authorizes electronic submission of beekeeper reports to the agricultural commissioner of the county in which the beekeeper's apiary is located for which notification of pesticide usage is sought.

12) Authorizes operations to abate diseased colonies to be performed by any authorized hazardous waste facility.

13) Authorizes the secretary or the county agricultural commissioner to impose an administrative civil penalty on a person who violates specified provisions of law relating to honey production.

14) Authorizes the secretary, in consultation with the board, to approve programs statewide to train, on a voluntary basis, beekeepers, inspectors, or county agricultural commissioners in contemporary and geographically relevant colony management, including, but not limited to, the maintenance of colonies free from Africanized honey bees.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, CDFA indicates that it would incur costs of $171,000 in 2021-22, and $132,000 annually thereafter, to implement the provisions of this bill (General Fund). This bill does not currently

grant the department authority to adjust assessments and fees to cover these increased costs.

SUPPORT: (Verified 8/25/22)

California State Beekeepers Association (source)

OPPOSITION: (Verified 8/25/22)

None received

ARGUMENTS IN SUPPORT: According to the author, "This bill updates and changes a portion of the Apiary Protection Act (APA), primarily changing the makeup of the California Department of Food and Agriculture's (CDFA) Apiary Advisory board, revising definitions, and updating provisions to reflect current technology and industry best practices."

The California State Beekeepers Association, sponsor of this bill, writes in support stating the bill is necessary to update portions of the Apiary Protection Act to bring "critically necessary clarity and consistency to the entire code section."

SUBJECT: Community mental health services: mental health boards

SOURCE: Author

DIGEST: This bill requires at least one member of a mental health board to be a veteran or veteran advocate, as specified.

ANALYSIS:

Existing law:

1) Establishes the Bronzan-McCorquodale Act (BMA) to organize and finance community mental health (MH) services for those with MH disorders in every county through locally administered and controlled community MH programs. [WIC §5600, et seq.]

2) Specifies that community MH services should be organized to provide an array of treatment options in the following areas, to the extent resources are available: precrisis and crisis services; comprehensive evaluation and assessment; individual service plans; medication education and management; case management; 24-hour treatment services; rehabilitation and support services;

vocational rehabilitation; residential services; services for the homeless; and group services. [WIC §5600.4]

3) Requires each community MH service to have a MH board (MHB) consisting of 10 to 15 members, depending on the preference of the county, appointed by the governing board, with added requirements for counties depending on the size of its population and the size of its board of supervisors. Requires 50% of the MHB membership to be consumers, or the parents, spouses, siblings, or adult children of consumers, who are receiving or have received mental health services, and at least 20% of the total membership to be consumers, and at least 20% to be families of consumers. Encourages counties to appoint individuals to a MHB with specified knowledge and experience, such as those who engage with individuals living with mental illness in the course of daily operations. [WIC §5604]

4) Requires a local MHB to do the following:
   a) Review and evaluate the community's public MH needs, services, facilities, and special problems;
   b) Review any county agreements, as specified;
   c) Advise the governing body and local MH director as to any aspect of the local MH program;
   d) Review and approve procedures used to ensure citizen and professional involvement in all stages of the planning process, a specified;
   e) Submit an annual report to the governing body on the needs and performance of the county's MH system;
   f) Review and make recommendations on applicants for the appointment of a local director of MH services, and be included in the selection process prior to the vote of the governing body;
   g) Review and comment on the county's performance outcome data and communicate its findings to the California Behavioral Health Planning Council;
   h) Perform any other duties transferred by the governing body; and,
   i) Assess the impact of the realignment of services from the state to the county on services delivered to clients and on the local community.

5) Establishes the Mental Health Services Act (MHSA), enacted by voters in 2004 as Proposition 63, to provide funds to counties to expand services, develop innovative programs, and integrate service plans for mentally ill children, adults, and seniors through a 1% income tax on personal income above $1 million. [WIC §5890, et seq.]

6) Requires each county MH program (CMHP) to prepare and submit a three-year program and expenditure plan for MHSA funds, with annual updates, adopted by the county board of supervisors, to the Mental Health Services Oversight and Accountability Commission and the Department of Health Care Services (DHCS) within 30 days after adoption. [WIC §5847]

7) Requires a MHB to conduct a public hearing on the draft MHSA three-year plan and annual updates at the close of the 30-day comment period, as specified. Requires each adopted three-year plan and update to include any substantive written recommendations for revision, and a summary and analysis of the recommended revisions. Requires the MHB to review the adopted plan or update, and to make recommendations to the county MH department for revisions. [WIC §5848]

8) Requires specified MHSA allocations to counties to include funding for annual planning costs, including funds for county MH programs to pay for various costs of consumers, family members, and other stakeholders to participate in the planning process and for the planning and implementation required for private provider contracts to be significantly expanded to provide additional services. [WIC §5604.3, 5892]

This bill:

1) Requires at least one member of an MHB to be a veteran or veteran advocate in counties with a population of 100,000 or more. Requires counties with a population of fewer than 100,000 to give a strong preference to appointing at least one member of an MHB who is a veteran or veteran advocate.

2) Requires a county to notify its county veterans service officer about vacancies on the MHB, if a county has a veterans service officer.

Background

AB 1288 (Bronzan, Chapter 89, Statutes of 1991), known as the BMA, significantly changed community MH services, with more of the focus and responsibility passing to the counties, including the requirements for MHBs. The MHBs remain the primary vehicle for residents to have oversight of the administration and provision of the services funded by their tax dollars. The composition of MHBs are required to represent the populations and stakeholders interested in MH services. The creation of the MHBs was intended to provide community input into the development and adoption of community MH service

plans and to act as a checks and balances to plans that are developed by the local MH/behavioral health (BH) departments and approved by the county boards of supervisors. For decades the MHBs existed throughout the state, yet according to reports from members of MHBs, they were relegated to the background, input was ignored, and some work being done by the MHBs was being censored. AB 1352 (Waldron, Chapter 460, Statutes of 2019) made various updates to law, including authorizing MHBs to make their recommendations directly to the governing body rather than to the local MH/BH agencies. It further required the local MH/BH agency, as applicable, to provide an annual report of written explanations to the local governing body and DHCS for any substantive recommendations made by the local MHB that are not included in the CMHP's final MHSA three-year plan or update, thus ensuring the MHB's input into the MHSA plan are fully vetted and considered prior to final adoption.

Veterans and mental health. According to the federal Substance Abuse and Mental Health Services Administration's (SAMHSA) website, there are an estimated 23.4 million veterans in the United States, and about 2.2 million military service members and 3.1 million immediate family members. A 2017 Legislative Analyst's Office report estimates about 1.8 million veterans live in California, more than in any other state. The demanding environments of military life and experiences of combat, during which many veterans experience psychological distress, can be further complicated by substance use and related disorders. Many service members face such critical issues as trauma, suicide, homelessness, and/or involvement with the criminal justice system. SAMHSA states that although active duty troops and their families are eligible for care from the U.S. Department of Defense, a significant number choose not to access those services due to fear of discrimination or the harm receiving treatment for behavioral health issues may have on their military career or that of their spouse.

Comments

Author's statement. According to the author, the COVID-19 pandemic has had an undeniable impact on the lives of all Californians. A recent study by the Centers for Disease Control and Prevention and a survey conducted by the U.S. Census Bureau have shown a 31% increase from the previous year in people who have reported symptoms or feelings of anxiety and depression. Now is the time to ensure that people who need help are able to get the resources and assistance they need. This bill requires counties to appoint a veteran or veteran advocate to a local public MHB. The addition of a veteran or veteran advocate to public MHBs will help ensure that veterans are informed of and have access to available local mental health resources.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

SUPPORT: (Verified 8/8/22)

American Legion-Department of California
California Association of County Veterans Service Officers
California State Association of Psychiatrists
California State Commanders Veterans Council
Depression and Bipolar Support Alliance
Military Officers Association of America-California Council of Chapters

OPPOSITION: (Verified 8/8/22)

California State Association of Local Behavioral Health Boards and Commissions

ARGUMENTS IN SUPPORT: The California State Association of Psychiatrists (CSAP) states that a recent survey revealed data showing a widening disparity in veterans receiving mental health care resources or services. As reported, approximately 85% of veterans reported some form of a substance use disorder, 53% reported having general mental illness or condition, and 26% reported having a severe mental illness and were receiving no treatments or care. Between 2008 and 2019, there was a notable spike in severe mental illness reported in veterans between the ages of 26-49. CSAP states that this bill will help ensure that our veterans are part of the conversation on mental health and wellness.

ARGUMENTS IN OPPOSITION: The Governing Board of the California Association of Local Behavioral Health Boards and Commissions (CALBHB/C) states that members of MHBs are volunteers who are appointed by local governing bodies (usually boards of supervisors), and MHBs already have specific membership requirements in regard to number of members and required percentages of individuals with lived experience, their family members, and the requirement for one board of supervisor member. CALBHB/C is opposed to this bill unless it is amended to instead include veterans or a veteran advocate in the section of current law that encourages counties to appoint specified individuals to MHBs.

SUBJECT: Foster youth: suspension and expulsion

SOURCE: Black Minds Matter Coalition
Children's Advocacy Institute
Children's Law Center
Legal Advocates for Children and Youth

DIGEST: This bill requires a Local Education Agency (LEA) to send a notification to the foster child's attorney, county social worker, and educational rights, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code when an involuntary transfer to a continuation school, suspension, or expulsion proceeding occurs.

Senate Floor Amendments of 8/25/22 make technical changes.

ANALYSIS:

Existing law:

Education of Pupils in Foster Care and Pupils Who Are Homeless

1) Requires each local educational agency to designate a staff person as the educational liaison for foster children (Education Code § 48853.5 (c))

2) Requires an educational liaison shall notify a foster child's attorney and appropriate representative of the county child welfare agency of pending expulsion proceedings if the decision to recommend expulsion is a discretionary act; pending proceedings to extend a suspension until an expulsion decision is rendered if the decision to recommend expulsion is a discretionary act; and if the foster child is an individual with exceptional needs, pending manifestation determinations if the local educational agency has proposed a change in placement due to an act for which the decision to recommend expulsion is at the discretion of the principal or the district superintendent of schools. (EC § 48853.5 (d))

3) Requires an LEA to, prior to making a recommendation to move a foster child from their school of origin, to provide the foster child and the person holding the right to make educational decisions for the foster child with a written explanation stating the basis for the recommendation and how it serves the foster child's best interests. (EC § 48843.5)

Suspension or Expulsion

4) Requires a school employee to notify the pupil's parent or guardian when a pupil is assigned to a supervised suspension classroom, and if the assignment is for longer than one class period, the employee must notify the parent or guardian in writing. (EC § 48911.1)

5) Specifies a pupil shall not be suspended from school or recommended for expulsion unless the superintendent of the school district or the principal of the school in which the pupil is enrolled determines that the pupil has committed specified acts in subdivision (a) – (r). (EC § 48900)

6) Requires the principal or superintendent of schools to recommend the expulsion of a pupil for any of the following acts committed at school or at a school activity off school grounds unless it is determined that the expulsion

should not be recommended under the circumstances or that an alternative means enumerated in subdivision (a) – (r). (EC § 48915)

7) Authorizes the principal of a school or the district superintendent to suspend a pupil from a school for any of the reasons identified above for no more than five consecutive days, and requires that suspension be preceded by an informal conference where the pupil must be informed of the reasons for the disciplinary action, including other means of correction that were attempted before the suspension, and the evidence against them, and must be given the opportunity to present their own version and evidence in their defense. Also requires a school employee to make a reasonable effort to contact the pupil's parent or guardian in person or by telephone, and if the pupil is suspended from school, requires that the parent or guardian be notified in writing. (EC § 48911)

8) Requires that a suspension only be imposed when other means of correction fail to bring about proper conduct. Specifies that other means of correction enumerated in subdivision (a) – (h). may include, but are not limited to, the following: (EC § 48900.5)

This bill requires an LEA to send a notification to the foster child's attorney, county social worker, and educational rights, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code when an involuntary transfer to a continuation school, suspension, or expulsion proceeding occurs. Specifically, this bill:

1) Requires a school district to provide written notice to a foster child's attorney, county social worker, and educational rights, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code of a decision to transfer the foster child to a continuation school, stating the facts and reasons for the decision, informing them of the opportunity to request a meeting with the district prior to a student being transferred, and indicating whether the decision is subject to periodic review and the periodic review procedure.

2) Requires that the foster child's attorney, county social worker, and educational rights holder, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code be informed of the specific facts and reasons for the proposed transfer, and have the opportunity to inspect all documents

relied upon, question any evidence and witnesses presented, and present evidence on the pupil's behalf.

3) Requires that an involuntary transfer to a continuation school not extend beyond the end of the semester following the acts leading to the involuntary transfer occurred unless the school district adopts a procedure for yearly review of the involuntary transfer at the request of the foster child's attorney or county social worker.

4) Repeals existing law regarding notices requirements of the State Department of Education and LEAs regarding notices and staff designations and specifies that a foster child's educational rights holder, attorney, and county social worker and a Indian child's tribal social worker and, if applicable, county social worker shall have the same rights a parent or guardian of a child has to receive a suspension notice, expulsion notice, manifestation determination notice, involuntary transfer notice, and other documents and related information.

5) Requires that a foster child's attorney, county social worker, and educational rights holder, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code be notified of the pupil's right to a conference if a foster child is suspended without the opportunity for an informal conference, as specified.

6) Requires that a school employee make a reasonable effort to contact a foster child's attorney, county social worker, and educational rights, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code in person, by email, or by telephone at the time of the suspension of the foster child, and if the foster child is suspended from school, requires the school to notify the foster child's attorney and county social worker in writing.

7) Requires the foster child's attorney, county social worker, and educational rights, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code to respond without delay to a request from school officials to attend a conference regarding the foster child's behavior.

8) Prohibits penalties on the pupil if the foster child's attorney, county social worker, and educational rights, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code fail to attend a conference with school officials, and specifies that reinstatement of the suspended pupil

not be contingent upon attendance of the attorney or social worker at the conference.

9) Requires that a foster child's attorney, county social worker, and educational rights, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code be notified by a school employee in person, by email, or by telephone if a foster child is assigned to a supervised suspension classroom and that if the suspension is for longer than one class period, the notification must be in writing.

10) Requires an LEA to invite the foster child's attorney, county social worker, and educational rights, or tribal social worker, if that child is an Indian child as specified in Welfare and Institutions Code participate in the individualized education program team meeting that makes a manifestation determination, as specified if an LEA is proposing a change of placement for a foster child with exceptional needs.

11) Requires, rather than authorizes, a school district to provide notice of an expulsion hearing to a foster child's attorney and a representative of the county child welfare agency at least 10 days before an expulsion hearing, and instead requires such notification to the attorney and county social worker at least 10 days before the hearing.

12) Makes other various technical changes

Comments

1) *Need for the bill*. According to the author "Students in foster care receive lower grades, are less likely to graduate high school or attend college, have higher rates of chronic absenteeism, and are suspended more often than their non-foster peers. In California, students in foster care are suspended at four times the statewide average rate. In Sacramento County, one in every five students in foster care was suspended at least once in the 2018-19 academic year. When broken down by student demographic, this disparity is even starker: the suspension for Black foster students is more than six times the statewide average. Research shows a strong connection between high suspension rates, poor academic achievement, and high school dropout rates. The disproportionate suspension of students in foster care fuels a cycle of negative outcomes for these vulnerable students. Foster youth faced additional challenges during the COVID-19 pandemic including lack of access to technology and support needed for distance learning. Studies predict that the

pandemic will widen the significant achievement gap between foster kids and their peers even further. AB 740 protects the educational rights of students in foster care by requiring their state-appointed attorney to be notified of disciplinary proceedings in order to ensure the student has a qualified person advocating on their behalf."

2) *California Department of Education.* In recent years, there have been other statutory provisions designed to limit the use of suspensions and promote alternatives to suspension. These provisions aim to address the root causes of the student's behavior and to improve academic outcomes:

   a) *Minimize Suspension for Attendance Issues:* It is the intent of the Legislature that alternatives to suspension or expulsion be imposed against a pupil who is truant, tardy, or otherwise absent from school activities.

   b) *Instead of Suspension, Support:* A superintendent of the school district or principal is encouraged to provide alternatives to suspension or expulsion, using a research-based framework with strategies that improve behavioral and academic outcomes, that are age-appropriate and designed to address and correct the pupil's misbehavior.

      The state has also established a Multi-Tiered System of Supports, which includes restorative justice practices, trauma-informed practices, social and emotional learning, and schoolwide positive behavior interventions and support, that may be used to help students gain critical social and emotional skills, receive support to help transform trauma-related responses, understand the impact of their actions, and develop meaningful methods for repairing harm to the school community.

   c) *Suspension as a Last Resort:* Suspension shall be imposed only when other means of correction fail to bring about proper conduct and then continues to provide an extensive list of suggested positive, non-exclusionary alternative practices. Other means of correction may include additional academic supports, to ensure, for example, that instruction is academically appropriate, culturally relevant, and engaging for students at different academic levels and with diverse backgrounds.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, this bill could potentially result in reimbursable state mandated costs in the tens of thousands of dollars each

year for LEAs to track the involuntary transfers, suspensions, and expulsions, provide the notifications, and comply with the bill's other requirements. To the extent this requirement takes each LEA one to two hours to complete these activities each year at a rate of $50 per hour, statewide costs would be $50,000 to $100,000. This amount could be higher or lower depending on the exact number of these occurrences and length of time to complete the bill's requirements. To the extent the Commission on State Mandates determines this to be a reimbursable state mandate, this could create a pressure to increase the K-12 mandates block grant to account for this mandate. SUBJECT: Elections: county officers

SOURCE: Organize Sacramento

DIGEST: This bill requires counties to hold elections for district attorney and sheriff with the presidential primary, except as specified. This bill also authorizes a county board of supervisors to adopt an ordinance to hold elections for other county officers with the presidential primary. This bill further provides that a district attorney or sheriff elected in 2022 shall serve a six-year term with the next election for that office to occur at the 2028 presidential primary.

Senate Floor Amendments of 8/24/22 delete the county assessor from the presidential primary requirement and also delete the two-year term county option for district attorney and sheriff, resulting in a six-year term for those elected in 2022. The amendments also make other clarifying, technical, and conforming changes.

Senate Floor Amendments of 9/3/21 require county assessors be elected in presidential election years; permit a county, by ordinance, to provide for a two-year term instead of a six-year term for a district attorney, sheriff, or assessor elected in 2022; and make other clarifying, technical, and conforming changes.

ANALYSIS:

Existing law:

1) Requires the Legislature, pursuant to the California Constitution, to provide for county powers, an elected county sheriff, an elected district attorney, an elected assessor, and an elected governing body in each county.

2) Permits a county, for its own government, to adopt a charter by majority vote of its electors voting on the question. Requires a county charter to provide for an elected sheriff, an elected district attorney, an elected assessor, other officers, their election or appointment, compensation, terms, and removal, among other provisions.

3) Provides that specified general laws adopted by the Legislature to govern the powers and officers of counties are superseded by a legally adopted county charter as to matters for which the California Constitution permits a county to make provision in its charter, except as specified.

4) Provides that the county officers to be elected by the people are the treasurer, county clerk, auditor, sheriff, tax collector, district attorney, recorder, assessor, public administrator, and coroner, and permits any county office, other than sheriff, district attorney, assessor, and supervisor, to become an appointive office with voter approval, as specified.

5) Requires, pursuant to the California Constitution, that all county offices be nonpartisan. Generally provides, pursuant to the Elections Code, that any candidate for a nonpartisan office who at a primary election receives votes on a majority of all the ballots cast for candidates for that office is elected to that office and that the office shall not appear on the ballot at the ensuing general election, as specified.

6) Provides that the general rules in the Elections Code for electing candidates for a nonpartisan office, described above in 5), do not apply to counties whose charters provide a system for nominating candidates for those offices, among other exceptions.

7) Requires all elective county officers to be elected at the general election at which the Governor is elected, except as specified.

8) Provides that an election to select county officers shall be held with the statewide primary at which candidates for Governor are nominated, except as specified. Provides that if a county officer is not elected by majority vote, this election shall be deemed a primary election and a county general election shall be held with the following statewide general election, as specified.

9) Provides, pursuant to the California Constitution, that a Superintendent of Schools for each county may be elected at each gubernatorial election, or may be appointed by the county board of education, as specified.

10) Establishes a procedure for the elections of county supervisors to be staggered by dividing the supervisors into two classes, which results in some county supervisors being elected in gubernatorial election years and other supervisors being elected in presidential election years.

This bill:

1) Repeals the requirement that all elective county officers be elected at the statewide primary and general election at which the Governor is elected, as specified.

2) Requires an election to select a district attorney and sheriff be held with the presidential primary, as specified.

3) Provides that a district attorney and sheriff elected in 2022 serves a six-year term and the next election for that office occurs at the 2028 presidential primary.

4) Provides that an election to select county officers other than district attorney and sheriff be held with the statewide primary at which candidates for Governor are nominated, except if a county board of supervisors adopts an ordinance as authorized in 5) below.

5) Authorizes a county board of supervisors to adopt an ordinance to hold an election to select any county officer other than a county superintendent of schools with the presidential primary, except as specified.

6) Provides that, notwithstanding any other law, the requirement that the district attorney and sheriff be elected in presidential election years applies to both general law and charter counties, except those charter counties that, on or

before January 1, 2021, expressly specified in their charter when an election for district attorney or sheriff would occur.

7) Provides that if a county officer is not elected at the statewide primary, the election shall be deemed a primary election and a county general election for the office shall be held with the following statewide general election, as specified.

8) Makes technical and conforming changes.

9) Includes a severability clause.

Background

Elections for County Office. The California Constitution requires that each county have a board of supervisors and at least three countywide elected offices: sheriff, district attorney, and assessor. Other countywide offices may be elected or appointed. Almost all countywide elected officers in California are elected in gubernatorial election years, except in two charter counties (Los Angeles County and the City and County of San Francisco), which have adopted charters specifying different election dates as to some countywide offices. By contrast, county supervisors are always elected in *both* gubernatorial and presidential election years because of a requirement that these elections be staggered by two years. Existing law also generally provides that if no candidate for a county office receives a majority of the vote in a primary election, the two candidates receiving the most votes will advance to a runoff election held with the statewide general election.

This bill does not change the requirement under existing law that county elections include a runoff held with the statewide general election if no candidate receives a majority of the vote in the primary.

Charter Counties. The California Constitution allows cities and counties to adopt charters, which gives those jurisdictions greater autonomy over local affairs. For counties, the Constitution specifies that a county's charter shall provide for "an elected sheriff, an elected district attorney, an elected assessor, other officers, their election or appointment, compensation, terms and removal," among other provisions. According to information from the California State Association of Counties, 14 (Alameda, Butte, El Dorado, Fresno, Los Angeles, Orange, Placer, Sacramento, San Bernardino, San Diego, San Francisco, San Mateo, Santa Clara, and Tehama) of California's 58 counties are charter counties. The remaining 44 counties are commonly referred to as "general law" counties, because they are subject to the general laws passed by the Legislature.

The requirement in this bill that the district attorney and sheriff be elected in presidential years applies both to general law and charter counties, *except* "those charter counties that, on or before January 1, 2021, expressly specified in their charter when an election for district attorney or sheriff would occur." In most of California's 14 charter counties, the charter provides for elective county officers to be nominated and elected in accordance with general law, so this exception would not apply. However, according to an analysis by the Assembly Committee on Elections, at least four counties have adopted charters that expressly require that the district attorney, sheriff, and assessor (San Bernardino, San Francisco, and Santa Clara) or just the sheriff and assessor (Los Angeles) be elected on a date other than the presidential primary; those counties would not be required to change the election dates of those officers under this bill.

Presidential Election vs. Gubernatorial Election Turnout. Generally, voter participation in presidential elections in California exceeds voter participation in gubernatorial elections. Over the last eight election cycles, from 2006 through 2020, voter turnout as a percentage of eligible voters has averaged 23.6% in gubernatorial primary elections compared to 33.7% in presidential primary elections, a 10% increase on average. The average percentage increase in turnout is even more significant in general elections. During the same time period, voter turnout in gubernatorial general elections has averaged 41.1% of eligible voters compared to 61.1% of eligible voters in presidential general elections, or a 20% increase. However, the vast majority of elections for county officers are decided with a majority winner at the statewide primary election, without requiring a subsequent runoff election held with the statewide general election.

There is also some evidence that presidential elections are more representative of California's diverse electorate than gubernatorial elections. In 2020 and 2021, the Center for Inclusive Democracy (CID) at the University of Southern California published two reports looking at the share of the overall electorate that was Latino or Asian American in statewide elections. Over eight elections, from 2006 through 2020, Latino voters' share of the electorate increased from an average of 13.4% in gubernatorial primaries to 16.8% presidential primaries, an increase of 3.4%. During the same time period, Asian American voters' share of the electorate went from 6.8% to 7.1% of the electorate, an increase of 0.3%. For general elections, the CID data showed Latino voters' share of the electorate increasing from an average of 17.1% in gubernatorial general elections to 21.2% in presidential general elections, a 4.1% increase. Asian American voters also saw their share of the electorate increase from 7.2% to 8.4%, a 1.2% increase on average.

However, these percentages show *overall* turnout changes between gubernatorial and presidential elections, which may differ from the turnout for *county offices* held at the same election, because many voters will vote in higher-profile contests like Governor or President but leave other contests on their ballot blank.

Comments

1) According to the author, local government, specifically, county officers and their policies have an immediate and direct effect on our daily lives. However, voter turnout for local elections fluctuates significantly depending on what year elections are held. For example, in Sacramento County voter turnout was 14-16% higher in presidential election years compared to gubernatorial election years. AB 759 will promote political equality and enhanced civic engagement with county elections by aligning the election of county district attorneys and sheriffs with the presidential election.

2) *Applicability to charter counties?* This bill prohibits counties from holding district attorney or sheriff elections in non-presidential election years unless that different election date was adopted as a charter amendment on or before January 1, 2021. However, given the autonomy granted by the California Constitution to charter counties over elected county officers, it is unclear whether this prohibition can be applied to charter counties. It may be argued that the prohibition conflicts with a charter county's authority to provide for the terms of elected county officers. On the other hand, the autonomy granted to charter counties over the election of county officers is considerably narrower than that granted to charter cities under the California Constitution. The fact that the Constitution grants "plenary authority" for a city charter to provide for "the times at which" municipal officers are elected, but does not do so for county charters, may support the argument that the Legislature can require that charter counties elect county officers on certain election dates.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, by changing the date for the election of district attorney and sheriff, thereby imposing additional duties on local elections officials, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on local agencies, local agencies could claim reimbursement of those costs (General Fund). The magnitude is unknown, but potentially in the millions of dollars annually. This bill would not result in new costs to the Secretary of State (SOS).

ARGUMENTS IN SUPPORT: In a letter supporting AB 759, the League of Women Voters of California stated, in part:

> Democracy is strongest when our representatives are chosen at elections with the highest rates and broadest diversity of voter turnout. Overall, presidential elections attract significantly more voters than midterm elections. Furthermore, midterm electorates include fewer people from underrepresented populations – including youth, Black, Latino, and Asian American people

than do presidential electorates. In recent years, California has made great strides in removing impediments to voter participation and expanding the franchise. Ensuring that a larger and more inclusive pool of voters can vote for candidates who reflect their values is critical to making democracy work.

ARGUMENTS IN OPPOSITION: In a letter opposing AB 759, the California Assessors' Association stated, in part:

> As currently amended, county assessors are stricken from the requirement of having our election held with the presidential primary; however, this bill still leaves our office, and other county offices, up for inclusion into this requirement...Several assessors across California are also county election officers, not only moving assessor elections to presidential years, but election official elections as well. This will create a burden that may impact election efficacy in those counties….AB 759 negatively impacts assessors' independence as elected constitutional office, and it is for these reasons that CAA respectfully requests that AB 759 be amended to remove the Board of Supervisors from having the ability to select a county officer to hold their election with the presidential primary through ordinance.

SUBJECT: Contribution requirements: recurring contributions

SOURCE: Fair Political Practices Commission

DIGEST: This bill (1) prohibits a candidate or committee from soliciting or accepting a recurring campaign contribution without receiving the contributor's affirmative consent; (2) specifies that passive action by the contributor, such as failing to uncheck a pre-checked box authorizing a recurring contribution, does not meet the requirement of affirmative consent; and (3) requires that a campaign provide a contributor with a receipt including information on their recurring contribution and how to cancel it.

Senate Floor Amendments of 8/16/22 add a coauthor, remove a coauthor, and provide additional details on the process and procedures relating to the solicitation of a recurring contribution, the penalties for a violation of soliciting a recurring contribution without affirmative consent, and create a cure process to resolve issues relating to recurring contributions.

ANALYSIS:

Existing law:

1) Establishes the Fair Political Practices Commission (FPPC), and makes it responsible for the impartial, effective administration and implementation of the Political Reform Act (PRA).

2) Establishes limits on a contribution from a person, other than a political party committee, to a candidate for elective state office, as specified. Establishes default limits on campaign contributions from a person to a candidate for county or city office, as specified. Permits a county or city to establish its own contribution limits, which prevail over these default limits.

3) Requires, pursuant to FPPC regulations, written solicitations by candidates for elective state office, and for certain elective city or county offices, to identify the relevant campaign committee by name and the specific office for which the contributions are solicited.

This bill:

1) Requires a solicitation by a candidate or committee, directly or through an agent or intermediary, for a recurring contribution be in a form that requires affirmative consent from the person making the recurring contribution.

2) Prohibits a candidate or committee from accepting a recurring contribution from a person unless the candidate or committee receives the affirmative consent of the person to make a recurring contribution at the time of the initial contribution.

3) Specifies that passive action by the contributor, such as failing to uncheck a pre-checked box authorizing a recurring contribution, does not meet the requirement of affirmative consent.

4) Provides that a violation pursuant to this bill occurs each time a candidate or committee solicits a recurring contribution in a form that does not require affirmative consent or accepts an initial recurring contribution in response to a solicitation that was in a form that did not require affirmative consent from the contributor.

5) Provides that a candidate or committee that accepts recurring contributions subsequent to an initial recurring contribution in response to a solicitation that was in a form that did not require affirmative consent from the contributor is liable for a fine not to exceed three times the aggregate amount of the subsequent recurring contributions received if all of the following are true:

a) The candidate or committee knew or should have known that the solicitation required affirmative consent.

b) The candidate or committee knew or should have known that the contributor did not give affirmative consent for making the recurring contributions.

c) The recurring contributions, in the aggregate, exceed $1,000.

6) Requires a candidate or committee that accepts a recurring contribution to do all of the following:

a) Provide a receipt to the contributor that clearly and conspicuously discloses all terms of the recurring contribution within three days after the initial contribution is received and within three days after each recurring contribution is received.

b) Provide all necessary information to cancel the recurring contribution in each communication with the contributor that concerns the contribution.

c) Immediately cancel a recurring contribution upon request of the contributor.

7) Requires a recurring contribution accepted in response to a solicitation that did not require affirmative consent be returned to the contributor within 14 days of the earlier of receipt of a request from the contributor to return the contribution or the date on which the candidate or committee becomes aware that the solicitation of the recurring contribution was in violation, as specified. Requires a contribution accepted after a contributor requested to cancel a recurring contribution shall be returned to the contributor within 14 days of the request to cancel the recurring contribution.

8) Provides that the provisions of this bill do not apply to a sponsored committee soliciting or accepting contributions from the sponsor's members, affiliates, employees, or shareholders.

9) Defines, for purposes of this bill, "recurring contribution" to mean a contribution from a person to a candidate or committee that is automatically charged to the person's bank account, credit card, or other payment account on a repeated basis, such as weekly or monthly, without approval or any other affirmative consent by the person after their initial contribution to the candidate or committee.

Background

Recurring Campaign Contributions. In the past year, several news publications have reported on political campaigns, including campaigns involving candidates for federal office and California state office, using pre-checked boxes in online solicitations to automatically enroll contributors into making recurring contributions. Contributors who did not want to make recurring contributions had to affirmatively opt-out of doing so by unchecking the pre-checked box. These articles include quotes from contributors who allege that they were misled into giving recurring contributions when they did not intend to do so.

In particular, an April 2021 *New York Times* article found that, in the 2020 presidential election campaign, one major party candidate's campaign's use of pre-checked boxes to authorize additional contributions in campaign solicitations led to a significant increase in contributor refund requests, suggesting many contributors had not intended to give an additional or recurring contribution. In some cases, these additional contributions resulted in contributors giving over the applicable contribution limits. The *Times* analysis showed that, after the introduction of pre-checked boxes and other formatting changes which had the effect of making the disclosure of the recurring payment associated with the pre-checked box less prominent, the overall contribution refund rate for the candidate's campaign and that of other political organizations supporting his candidacy grew to over 12% of all funds raised online by the end of 2020, compared with a rate of under 2% at the start of the year, before the pre-checked boxes were introduced.

Shortly after the *New York Times* article was published, in May of 2021, the Federal Elections Committee (FEC) met to discuss possible statutory changes to the Federal Election Campaign Act to recommend to Congress, which included possible action to regulate recurring campaign contributions in federal elections. According to a May 2021 memorandum prepared for the meeting by FEC Commissioner Ellen Weintraub:

> [FEC] staff are regularly contacted by individuals who have discovered recurring contributions to political committees have been charged to their credit card accounts or deducted from their checking accounts. In many cases, the contributors do not recall authorizing recurring contributions. Often, these contributors have attempted unsuccessfully to cancel the recurring transactions with the political committee prior to contacting FEC staff.
>
> Some fundraising devices use 'pre-checked boxes' to treat a one-time contribution as a recurring contribution. In this way, some committees are

> considering the contributor to have authorized the recurring contributions without obtaining the contributors' affirmative consent. The Commission's experience strongly suggests that many contributors are unaware of the 'pre-checked' boxes and are surprised by the already completed transactions appearing on account statements.

The FEC unanimously approved a recommendation that Congress pass a law prohibiting the use of pre-checked boxes for recurring campaign contributions and requiring that campaigns provide contributors with information on the terms of their recurring donation and how to cancel future contributions. Shortly thereafter, United States (US) Senator Amy Klobuchar and US Representative Michael Levin introduced S. 1786 and H. R. 3832, respectively, which would enact the statutory changes to FECA recommended by the FEC. Both bills are pending before Congress.

Automatic Recurring Payments in Business. Automatic recurring payments are a common billing practice for many types of businesses, especially those offering subscription-based services to consumers, like gym memberships, video streaming services, or cell phone plans. Automatic payments can provide a more convenient billing experience for consumers and more predictable revenue and timely bill payments for businesses. However, according to the Federal Trade Commission, so-called "negative option marketing" practices, "where the seller interprets a customer's failure to take an affirmative action, either to reject an offer or cancel an agreement, as assent to be charged for goods or services," can also "pose serious financial risks to consumers if appropriate disclosures are not made and consumers are billed for goods or services without their consent." Over the past decade, several companies have entered into class action settlements with subscribers over allegedly deceptive automatic renewal practices.

In response to such complaints, in 2009, the Legislature passed and Governor Schwarzenegger signed SB 340 (Yee, Chapter 350, Statutes of 2009), which imposed new restrictions on automatic purchase renewals that are similar to this bill. SB 340 requires that a business making an automatic renewal offer present the terms of the offer in a clear and conspicuous manner, receive the consumer's affirmative consent to the automatic renewal offer terms, provide an acknowledgment to the consumer that includes the automatic renewal terms and information regarding how to cancel the policy, and provide an easy-to-use method for cancelling payments, among other provisions. SB 313 (Hertzberg, Chapter 356, Statutes of 2017) added to these provisions by requiring additional disclosure for automatic renewal offers that include a free introductory gift and by requiring

that there be an online cancellation option where an automatic renewal offer is accepted online, among other changes.

Restrictions on Campaign Solicitations. Existing law includes some restrictions on how candidates or campaign committees solicit campaign funds. These restrictions are mostly intended to minimize the possibility of contributors being misled as to the identity of the solicitor, or the relationship between the solicitor and other candidates and campaign committees. The Elections Code includes restrictions on campaign committees' (and other entities') ability to solicit funds using a committee name that includes the name of another campaign committee, candidate, or political party, without the authorization of that committee, candidate, or party, as specified. Also pursuant to the Elections Code, a person who is raising funds to benefit a candidate or campaign committee for the purported and exclusive use of that candidate or committee, but who never received that candidate or committee's authorization, must include a notice in any fundraising communication clearly and conspicuously disclosing that fact. Since these restrictions are not codified in the PRA, the FPPC is not authorized to enforce them.

The PRA and FPPC regulations also include some restrictions on solicitations, which the FPPC can enforce. Notably, under FPPC regulations, a written solicitation by a candidate must include the candidate's committee name and the office being sought. The PRA also includes numerous restrictions on *accepting* contributions depending on the source or amount of the contribution, which are intended to prevent corruption or the appearance of corruption. For example, candidates for state office may not accept campaign contributions over specified limits from any one contributor, and are also prohibited from accepting contributions from registered lobbyists in certain circumstances. Ballot measure committees are also prohibited from soliciting or accepting contributions from foreign governments or principals.

Comments

1) According to the author, last year, the *New York Times* reported that Donald Trump's 2020 campaign made extensive use of prechecked boxes to authorize recurring donations on its online fundraising platforms. As the campaign ran low on money, its tactics became increasingly deceptive, and it took steps to obscure disclosures that donors were authorizing recurring contributions by failing to de-select those prechecked boxes. In all, the *New York Times* reported that the Trump operation was forced to refund hundreds of thousands of campaign contributions totaling more than $122 million.

Fortunately, it appears that campaigns in California have been much less likely to engage in the aggressively deceptive fundraising tactics employed by the Trump campaign. Additionally, some California candidates who previously used pre-checked recurring contribution boxes on their online fundraising platforms stopped doing so in response to criticism of that practice.

AB 775 prohibits a candidate or political committee, as specified, from accepting recurring contributions from a person unless the contributor provides affirmative consent to make a recurring contribution at the time of the initial contribution. AB 775 further makes it clear that passive action by the contributor—such as failing to uncheck a pre-checked box—does not constitute affirmative consent. This bill will ensure that Californians are not misled into making repeated and unintended donations.

Related/Prior Legislation

SB 340 (Yee, Chapter 350, Statutes of 2009) required any business making an "automatic renewal" or "continuous service" offer to clearly and conspicuously disclose terms of the offer and obtain the consumer's affirmative consent to the offer, among other provisions.

SB 1215 (Rains and Richardson, Chapter 872, Statutes of 1979) prohibited a person, as defined, who solicits funds to support or oppose a candidate or committee, to include the name of that candidate or committee in that person's name without authorization, as specified. SB 1215 also required a person who solicits funds on behalf of a committee for its purported and exclusive use, without that candidate or committee's authorization, to provide a notice in any fundraising communication, as specified.

AB 1033 (Lyon, Chapter 576, Statutes of 1941) prohibited solicitations from a person, as defined, whose name includes the name of a political party, as specified.

SUBJECT: State property: transfer: University of California

SOURCE: Author

DIGEST: This bill authorizes the Department of General Services (DGS) to transfer, without charge, a parcel of property in Sacramento, California, if that parcel is reported as excess, to the Regents of the University of California (UC Regents) to be used by the University of California Davis (UC Davis) for prescribed purposes, including using the majority of the property to provide affordable student housing.

Senate Floor Amendments of 8/24/22 provide that the property can be used for providing below local market rental rate housing for students, staff, and faculty. The bill currently provides that a use of the property can be for affordable housing.

Senate Floor Amendments of 8/16/22 (1) require colleges, universities, and nonprofit entities for projects described in this bill to ensure a skilled and trained workforce be is used to complete the projects, (2) require those entities to send out a notice of solicitation to specified labor organizations, (3) require contractors and

subcontractors to pay prevailing wages to employees, and (4) establish a process to prequalify prime contractors and subcontractors.

Senate Floor Amendments of 9/3/21 (1) delete the requirement that the majority of the property be used to provide affordable housing and instead require that the majority of the property be used to provide affordable housing, which may include affordable student housing, (2) delete the "skilled and trained workforce" language in the bill, and (3) require UC Davis to reimburse DGS for all actual costs incurred as a result of the transfer.

ANALYSIS:

Existing law:

1) Authorizes DGS, subject to legislative approval, to sell, lease, exchange, or transfer various specified properties for current market value, or upon such other terms and conditions that DGS determines are in the best interest of the state.

2) Establishes criteria for state agencies to use in determining and reporting excess lands. A state agency must report land as excess that is:

   a) Not currently utilized, or is underutilized, for any existing or ongoing programs;

   b) Land for which the agency cannot identify a specific utilization relative to future needs; and,

   c) Land not identified by the state agency within its master plan for facility development.

3) Requires DGS to dispose of surplus state real property in a specified manner, and prescribes the priority of disposition of the property before DGS may offer it for sale to private entities or individuals.

4) Authorizes DGS to sell surplus real property to a local agency or to a nonprofit affordable housing sponsor for affordable housing projects at a sales price less than fair market value if DGS determines that such a discount will enable housing for persons and families of low or moderate income.

5) Requires, under the California Constitution, that the proceeds from the sale of surplus state property be used to pay the principal and interest on bonds issued pursuant to the Economic Recovery Bond Act, until the principal and interest

on those bonds are paid in full, the final payment of which was made in the 2015-16 fiscal year, after which these proceeds are required to be deposited into the Special Fund for Economic Uncertainties.

6) Exempts the sale of surplus property sold "as is" from designated provisions of the California Environmental Act (CEQA). However, the buyer or transferee of a parcel is subject to CEQA as well as any local governmental entitlement or land use approval requirements.

7) Requires, under the California Public Records Act, state and local agencies to make its records available for public inspection, unless an exemption from disclosure applies.

This bill:

1) Authorizes DGS to transfer, without charge, a parcel of property in Sacramento, California, to the UC Regents to be used by UC Davis for the following purposes:

   a) Below local market rental housing for students, staff, and faculty.

   b) Childcare space.

   c) Academic and research programs.

   d) Ancillary student services.

2) Requires the majority of the developed square footage of the property to be used to provide below local market rental rate housing for students, staff, and faculty, and may take into account the costs of utilities, food service, operations, maintenance, and other services.

3) Requires UC Davis to reimburse DGS for all actual costs incurred as a result of the transfer, as specified.

4) Provides that if the UC Regents have not begun a formal planning process within a year of the transfer, or if the UC Regents indicate that they will not use the property for its intended purpose, the property shall revert to DGS.

5) Provides that if the property reverts to DGS, the property shall be reviewed to determine if the land is in excess according to current law.

6) Requires for this specific participating colleges and universities and participating nonprofit entities to do all of the following:

a) At least seven days before issuing a bid solicitation for the project, send a notice of the solicitation that describes the project to specified labor organizations, as specified.

b) Ensure that all contracts and subcontractors performing work on the project will be required to pay prevailing wages, as specified.

c) For projects totaling $25 million or more, seek bids containing an enforceable commitment that all contractors and subcontractors performing work on the project will use a skilled and trained workforce, as specified.

d) Establish a process to prequalify prime contractors and subcontractors, as specified, and the meet specified requirements.

e) Provide a monthly compliance report, as specified

f) Notify the Department of Industrial Relations within five calendar days of the contract award.

Comments

Purpose of the bill. According to the author's office, "the college affordability crisis isn't just about high tuition costs – housing accounts for almost half the total cost of attending college at the UC. Nearly one in every three college students in California faces housing insecurity. In order for students to succeed, their basic needs must be met. This bill takes concrete steps to address this need at the UC Davis Sacramento campus by providing affordable student housing to support enrollment growth."

Existing law already authorizes DGS to transfer excess lands between state agencies. However, because the University of California is not included in the state definition of Government Code that DGS's transfer of jurisdiction authority relies upon this bill is needed to allow for the transfer of this property to the UC Regents.

The property. The Department of Justice (DOJ) building is located at 4949 Broadway, in Sacramento and was constructed in 1982. It is two stories with approximately 355,000 square feet on approximately 23.85 acres. It is uniquely positioned adjacent the UC Davis Medical Center. This property has the potential to create affordable housing however, there are many steps and decisions that would still need to occur. First and foremost, DGS would first need to identify the property as excess.

It is uncertain whether the DOJ will vacate the property entirely and whether DGS will find another state agency to use the property. As this bill is written, if the land is reported as excess, the land could be transferred to the UC Regents to be developed for affordable housing near the UC Davis Medical Center. If within a year the UC Regents have not begun a formal planning process within a year of the transfer, or if the UC Regents indicate that they will not use the property for its intended purpose, the property would revert back to DGS.

Disposal of state property. Existing law requires state agencies to annually report to DGS excess lands that are not currently utilized, or are underutilized, for any existing or ongoing programs by that state agency. Once the land is declared excess by a state agency, DGS is responsible for notifying other state agencies that might have use for that property. If no state agency has a need for that property, existing law sets up a very specific process for disposal of that property.

DGS is currently responsible for the disposition of state-owned property that has been declared surplus to future state needs. The Legislature must declare the property to be surplus and must authorize the Director of DGS to sell, exchange, lease, or transfer the surplus property according to specified procedures set forth in law.

Generally, current law requires surplus property to be transferred or sold at market value, or upon such other terms and conditions that DGS determines are in the best interest of the state. Current law gives right of first refusal on any surplus property to a local agency and then to a nonprofit affordable housing sponsor, prior to being offered for sale to private entities or individuals in the open market. In addition, DGS is authorized to sell surplus property to a local agency or to a nonprofit affordable housing sponsor at a sales price less than fair market value if DGS determines that such a discount will enable housing for individuals or families of low or moderate income.

Related/Prior Legislation

SB 828 (Committee on Governmental Organization, Chapter 189, Statutes of 2021) authorized the DGS to dispose of four specified state properties, as specified.

AB 518 (Calderon, Chapter 43, Statutes of 2020) authorized DGS, until January 1, 2025, to sell the Southern Youth Correctional Reception Center and Clinic to the City of Norwalk at fair market value upon terms and conditions DGS determines are in the best interest of the state.

SB 501 (Hurtado, 2019) would have required DGS to transfer ownership of the Reedley Armory to the City of Reedley for the purpose of providing services that improve the quality of life for veterans and their families, as specified. (Never heard in the Assembly Veteran Affairs Committee)

SB 20 (Dodd, Chapter 240, Statutes of 2019) extended the sunset date, which expired on January 1, 2015, to January 1, 2026, for the state to sell the area known as the Skyline Wilderness Park in the County of Napa.

SB 281 (Wiener, 2019), among other things, would have required DGS to enter into negotiations with the newly created Cow Palace Authority for the purchase of the Cow Palace. (Never heard in the Assembly Local Government Committee)

AB 653 (Bloom, Chapter 263, Statutes of 2019) authorized DGS, with the approval of the Adjutant General, to lease, for a term of 25 years, approximately 1.3 acres of the real property of the real property located at 1300 Federal Avenue, Los Angeles, California, known as the West Los Angeles National Guard Armory to the County of Los Angeles.

AB 1198 (Petrie-Norris, Chapter 824, Statutes of 2019) required DGS, if any land within the grounds of the Fairview Developmental Center is reported as excess and DGS determines that the land is needed by more than one state agency, to conduct a public hearing, as specified.

SB 922 (Nguyen, 2018) would have authorized the DGS, until January 1, 2029, to dispose of surplus state property located within two miles of a campus of the UC, California State University, or California Community Colleges by first offering the property to a local agency or a nonprofit organization for the development of affordable student housing. (Failed passage in the Senate Governmental Organization Committee)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, to the extent that DGS determines that the property located at 4949 Broadway is reported as excess, and there are costs related to early termination of power purchase agreements for the property, fees could total up to $7.95 million if terminated in 2022. The DGS notes that some termination costs could be avoided if the UC Davis takes over the power to purchase agreement.

In addition, the DGS estimates staff costs of approximately $35,000 to execute the transfer of the property, which would be borne by the UC. Additional costs related

to environmental site investigations and legal and consultant expenses as well as associated staff time are unknown at this time.

SUPPORT: (Verified 8/23/22)

City of Sacramento

OPPOSITION: (Verified 8/23/22)

Construction Employers' Association
Western Electrical Contractors Association

ARGUMENTS IN SUPPORT: According to the City of Sacramento, "AB 777 paves the way for the identified property to be used for affordable student and employee housing as an integral part of the UC Davis Sacramento campus – including the 1.4 million sq. ft. Aggie Square project. Located on the UC Davis Sacramento Campus, along the Stockton Boulevard corridor, Aggie Square will be an innovation hub for the Sacramento region, driving commercialization of university research, growing local companies, bringing new employment opportunities to Sacramento, and adding vitality to the Stockton Boulevard corridor. The project offers tremendous opportunity to connect UC Davis students with expanded academic and research offerings occurring at Aggie Square."

ARGUMENTS IN OPPOSITION: According to the Western Electrical Contractors Association (WECA), "until August 16, AB 777 simply permitted the transfer of a small parcel of State land to the UC Regents for affordable student housing. WECA opposes legislation like AB 777 that introduces new contracting requirements in the final days of the session, which does not afford the construction industry or, for that matter, the higher education community an opportunity to consider the amendments and the appropriate policy committees to analyze the impacts of these changes."

SUBJECT: Institutional purchasers: purchase of California-grown agricultural food products

SOURCE: Growing Coachella Valley

DIGEST: This bill requires a California state-owned or state-run institution that purchases agricultural food products to implement necessary practices to achieve a goal of ensuring that at least 60% of the agricultural food products that it purchases in a calendar year are grown or produced in the state by December 31, 2025, as specified.

Senate Floor Amendments of 8/24/22 delete the requirement for state agencies to report specified information to the Department of General Services if they fail to achieve the goals established by this bill. In addition, the amendments change the definition of "agricultural food product" to instead mean "any fresh or processed food product including, but not limited to, fruits, nuts, vegetables, herbs,

mushrooms, dairy, shell eggs, honey, pollen, grains, livestock meats, rabbit meats, and fish, including shellfish"

ANALYSIS:

Existing law:

1) Requires all California state owned or state-run institutions, except public universities and colleges and school districts, to purchase an agricultural product grown in California when the bid or price of the California-grown agricultural product does not exceed by more than five percent the lowest bid or price for an agricultural product produced outside the state and the quality of the California-grown agricultural product is comparable.

2) Requires state institutions, when they solicit or intend to accept a bid or price for agricultural products grown outside of the state, to accept the bid or price from a vendor that packs or processes these agricultural products in the state before accepting a bid or price from a vendor that packs or processes these agricultural products outside of the state when specified conditions are met, including that the bid or price of the agricultural product grown outside of the state and packed or processed in the state does not exceed by more than five percent the lowest bid or price.

3) Requires a school district that solicits bids for the purchase of an agricultural products to accept a bid or price for the agricultural product when it is grown in California before accepting a bid or price for an agricultural product that is grown outside of the state when the bid or price of the California-grown agricultural product does not exceed the lowest bid or price for an agricultural product produced outside of the state and the quality of the California-grown agricultural product is comparable.

4) Provides that these provisions only apply to a contract to purchase agricultural product for a value that is less than the value of the threshold for supplies and services for which California has obligated itself under the Agreement on Government Procurement of the World Trade Organization (WTO).

5) Requires that when price, fitness, or quality is equal, the state shall purchase supplies grown, manufactured, or produced in-state instead of out-of-state. However, this section has been inoperative since the 1970s in response to a court ruling.

6) Grants, through the Small Business Procurement and Contract Act, a five perfect bid preference for small businesses and microbusiness in the award of a

contract for goods, services, or information technology to the state and in the construction of state facilities.

This bill:

1) Requires a California state-owned or state-run institution that purchases agricultural food products to implement necessary practices to achieve a goal of ensuring that at least 60% of the agricultural food products that it purchases in a calendar year are grown or produced in the state by December 31, 2025. The bill provides that this provision does not apply to segments of the public postsecondary education or local educational agencies.

2) Changes current provisions related to school districts purchasing agricultural products to apply to the purchase of a domestic agricultural food product that is grown outside of the state, instead of an agricultural product that is grown outside of the state, and would expand the application of this requirement from school districts to local educational agencies.

3) Eliminates current provisions in law related to preferences for in-state vendors.

4) Provides that the bill's provisions neither limit nor expand California's obligations under the Agreement on Government Procurement of the World Trade Organization.

Background

Purpose of the Bill. According to the author's office, "California laws require growers to follow some of the strictest environmental regulations in the country. Therefore, we should be giving our farmers the benefits of the doubt that our state's agricultural products are the best in the nation by committing to a Buy California program."

Current Five Percent Bid Preference. In 2017, the Legislature passed and the Governor signed AB 822 (Caballero, Chapter 785, Statutes of 2017) which required all California state-run institutions, except public universities, colleges, and school districts, to purchase agricultural products grown in California when the bid or price does not exceed, by more than five percent the lowest bid or price for an agricultural product produced outside of the state and the quality of the produce is comparable.

AB 822 also included a five percent bid preference for agricultural products that were grown outside of the state if that vendor packed and processed those products

in the State of California as long as the product was comparable to the product that was packed or processed outside of the state.

AB 822, exempted public universities, colleges, and school districts from the five percent provision in the bill, however the bill did require these institutions to purchase agricultural products as long as the bid or price did not exceed the bid or price of the agricultural product grown outside of the state and that the quality was again comparable.

AB 822 included language that made it clear that the provisions of the bill were only applicable to a contract to purchase agricultural products for a value that is less than the value of the threshold for supplies and services for which California has obligated itself under the Agreement on Government Procurement of the WTO.

Dormant Commerce Clause. Article I, Section 8 of the Constitution, known as the Commerce Clause provides congress with the power to "regulate commerce with foreign nations, and among the several states, and with the Indian Tribes." From this authorization of Congressional power, Courts have inferred a restriction on State power known as the "dormant Commerce Clause." This doctrine prohibits a State from discriminating against or unduly burdening interstate commerce. According to the Supreme Court, this prohibition on interfering with interstate commerce was rooted in the Framer's concern that economic Balkanization had the potential to doom the new union between the States.

Under the dormant Commerce Clause, courts have typically struck down any state law that expressly mandates differential treatment of in-state and out-of-state competing interests in a way that benefits the economic interest of one state compared to all others. Such laws are considered facially discriminatory, and courts subject them to strict scrutiny.

While the current California five bid preference for agricultural products has not been challenge in court, likely because of its modest limitation, the Supreme Court has struck down similar bid preferences in other states. For example, the Court struck down an Oklahoma law that required 10% of electric utilities' coal purchase to be from in-state suppliers. Similarly the court, struck down an Ohio law that offered a tax credit to fuel sellers for selling ethanol produced in Ohio.

It is unclear if establishing a specific goal for state agencies to meet would violate the Dormant Commerce Clause.

Agreement on Government Procurement of the WTO. The Agreement on Government Procurement of the WTO (GPA Agreement), which California is a party to, is a binding international treaty regulating the conduct of international trade in government procurement markets. It aims to ensure fair, transparent and non-discriminatory conditions of competition for purchases of goods, services, and construction services by the public entities covered by the agreement. It also serves broader purposes of promoting good governance, the efficient management of public resources, and the attainment of best value of money in national procurement series.

However, the rules are not automatically applied to all procurement activities. Coverage schedules play a critical role in determining whether a procurement activity is governed by the Agreement or not. Only those procurement goods, services, construction services of a value exceeding specified threshold values are covered by the Agreement. For example, the current goods threshold is $498,000. This means that any good procurement over $498,000 falls under the rules of the GPA Agreement.

This bill provides that the bill's provisions neither limit nor expand California's obligations under the Agreement on Government Procurement of the World Trade Organization.

Related/Prior Legislation

SB 1308 (Caballero, 2022) requires, as of January 1, 2024, local educational agencies (LEAs) that solicit bids for the purchase of an agricultural product to accept a bid or price for that agricultural product when it is grown in California before accepting a bid or price for a product that is grown outside of California unless the bid or price of the California-grown agricultural product exceeds the lowest bid or price of the domestic agricultural product produced outside the state by 25%. Additionally, prohibits the California Community Colleges, California State University, and all LEAs, and encourages the University of California, to refrain from purchasing agricultural food products grown, packed, or processed nondomestically unless the price of the nondomestic product is more than 25% lower than the bid or price of the domestic product and the quality of the product is comparable to the product grown in California. (Never Heard in the Assembly Education Committee)

AB 822 (Caballero, Chapter 785, Statutes of 2017) required all California state-owned or state-run institutions, except public universities and colleges and school districts, to purchase agricultural products grown in California when the bid or price of the California-grown agricultural product does not exceed, by more than

five percent, the lowest bid or price for an agricultural product produced outside the state and the quality of the produce is comparable.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, unknown potentially significant fiscal impact to Department of General Services to review state-owned or run institutions' agricultural food products purchasing contracts and submit reports on each institution's progress toward achieving the specified goal of ensuring at least 60 percent of the agricultural food products purchased each calendar year are grown or produced in California (General Fund).

Unknown, ongoing fiscal impact, likely in the millions of dollars, in agricultural food products contracting costs across all impacted state-owned or run institutions, to the extent that the California-grown food products required to be purchased are more expensive than comparable out-of-state products.

Unknown likely significant Prop 98 General Fund fiscal impact for an increase in school districts and public postsecondary institutions agricultural food product contracting costs. A precise amount is unknown because the size of the contracts for school districts and postsecondary institutions could vary significantly throughout the state.

ARGUMENTS IN SUPPORT: According to the Greater Coachella Valley Chamber of Commerce, "California spends nearly $300 million annually on food purchasing and California's schools are estimated to spend between $500 between $500 and$700 million annually on direct food purchases. That is nearly $1 billion that the state could be directing towards supporting California farmers and their employees by purchasing California grown food. As you are aware, over the last decade plus our local growers have come under intense pressure from regional and international markets. Fueled by inequities in the labor markets and taking advantage of more relaxed regulatory environments, out-of-market growers have increasingly made it difficult for California's growers to be competitive in the global marketplace. AB 778 represents an opportunity to the State of California to reward our growers that are conducting business equitably, and in a manner prescribed by the State, by purchasing produced from our own local markets."

SUBJECT: Electrically conductive balloons

SOURCE: San Diego Gas & Electric

DIGEST: This bill requires a person who sells or manufactures foil balloons to ensure that those foil balloons pass a standard test developed by the Institute of Electrical and Electronics Engineers (IEEE) to ensure that the balloon does not cause a fault at high-voltage electric distribution levels. This bill requires foil balloons to become compliant with the provisions of this bill according to a phase-in period, as specified, and prohibits the sale or manufacturing of noncompliant foil balloons after completion of this phase-in period.

Senate Floor Amendments of 8/22/22 further specify the information required to be on the label of foil balloons, adjust the timeline of the phase-in period for compliance with the provisions of this bill, allow this timeline to be tolled under specified conditions, and clarify the penalties that can be issued for violations of these provisions.

ANALYSIS:

Existing law:

1) Requires a person who manufactures a balloon in California that is constructed of electrically conductive material to permanently mark each balloon with a printed statement that warns the consumer about the dangerous risk of fire if the balloon comes in contact with an electrical power line and to mark each balloon with the identity of the manufacturer. (Business & Professions Code (BPC) § 22942(a))

2) Requires a person who sells or distributes a balloon constructed of electrically conductive material that is filled with a gas lighter than air to affix an object of sufficient weight to each balloon or its appurtenance to counter the lift capability of the balloon and to not attach the balloon to an electrically conductive string, tether, or streamer, to a balloon constructed of electrically conductive material, or to any other electrically conductive object. (BPC § 22942(b))

3) States that these requirements do not apply to manned hot air balloons, or to balloons used in governmental or scientific research projects. (BPC § 22942(c))

4) Prohibits any person or group from releasing balloons made of electrically conductive material and filled with a gas lighter than air, outdoors as part of a public or civic event, promotional activity, or product advertisement. Makes a violation punishable by an infraction with a fine of not more than $100, unless the person has twice been convicted and specifies that a third or subsequent conviction is a misdemeanor. States that this prohibition does not apply to manned hot air balloons, or to balloons used in governmental or scientific research projects. (Penal Code §§§ 653.1(a) (b) (c))

This bill:

1) Adds to existing law to require a business that manufactures a foil balloon in California that is constructed of electrically conductive material to comply with all of the following:

    a) Permanently mark each foil balloon with a printed statement that warns the consumer of at least one of the following:

        i) The dangers of releasing balloons which may contact overhead power lines.

ii) The consumer's responsibilities when disposing of foil balloons, if the foil balloon is manufactured to meet the provisions of this bill.

b) Permanently mark each foil balloon with the identity of the manufacturer.
c) Permanently mark each foil balloon that it complies with existing law and the provisions of this bill. Markings prescribed under the final standard by the IEEE shall be considered a suitable mark.

2) Requires that a person who sells, offers for sale, or manufactures for sale any foil balloon in California to ensure that those foil balloons pass a standard test, as determined by an accredited testing facility capable of high-voltage testing.

3) Specifies that this standard test shall be the IEEE 2845 standard when the standard is approved by IEEE. The standard test shall be approved when IEEE does all of the following:

a) Publishes an interim standard.
b) Completes its trial of the interim standard.
c) Publishes the final approved standard, following materially substantive adjustments, if any, to the interim standard.

4) Specifies that this requirement for foil balloons to meet the IEEE standard is subject to the following phase-in period:

a) At least 25 percent of the person's foil balloons shall comply with this section no later than one year from the commencement date.
b) At least 55 percent of the person's foil balloons shall comply with this section no later than two years from the commencement date.
c) At least 80 percent of the person's foil balloons shall comply no later than three years from the commencement date.
d) 100 percent of the person's foil balloons shall comply no later that four years from the commencement date.

5) Prohibits a person from selling, offering for sale, or manufacturing for sale any foil balloon unless the balloon complies with these provisions following the completion of the phase-in period, as specified.

6) Allows for all of the following dates and time periods to be tolled, for 24 months or until the issue is resolved, whichever occurs first, when a serious development, manufacturing, production, or supply chain issue, or force majeure occurs:

a) The commencement date.

b) The phase-in period.
c) The prohibition against selling, offering for sale, and manufacturing for sale of noncompliant foil balloons.

7) Specifies that a serious development, manufacturing, production, or supply chain issue, or force majeure shall be deemed to have occurred if both of the following are satisfied:

a) The issue is outside of the control of the business that develops, manufactures, produces, or sells foil balloons.
b) The issue makes it infeasible to develop, manufacture, produce, or sell foil balloons that otherwise would be subject to the provisions of this bill.

8) Defines the following terms:

a) "Commencement date" means the date on which the IEEE approves the final standard for testing foil balloons at a level of electric distribution voltages without causing an electrical fault and all of the requirements this bill are met, or January 1, 2027, whichever is later.
b) "Foil balloon" means a balloon that is constructed of electrically conductive material.
c) "Infeasible" means incapable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, legal, social and technological factors.
d) "Phase-in period" means the gradual phase in of the restrictions on the sale, offer for sale, and manufacture for sale, in this state, of a foil balloon following the commencement date.
e) "Person" means any individual, association, organization, partnership, business trust, limited liability company, corporation, or other entity.

9) States that a person who violates or attempts to violate the provisions of this bill may be enjoined in any court of competent jurisdiction.

10) Specifies that a person who has violated the provisions of this bill is liable for a civil penalty in the amount of $50 for each foil balloon that was sold, offered for sale, manufactured for sale, or distributed in violation of the provisions of this bill. This civil penalty shall not exceed $2,500 per day for a totality of violations of the provisions of this bill and existing law, in addition to any other penalty established by law. This civil penalty may be assessed and recovered in a civil action brought in any court of competent jurisdiction.

11) Specifies that in assessing the amount of a civil penalty for a violation of this chapter, the court shall consider all of the following:

    a) The nature and extent of the violation.
    b) The number and severity of the violations.
    c) The economic effect of the penalty on the person who violated these provisions.
    d) The person's annual revenue in both balloon sales and total sales.
    e) Whether the person who violated these provisions took good faith measures to comply and when these measures were taken.
    f) The deterrent effect that the imposition of the penalty would have on both the person who these provisions and the regulated community as a whole.
    g) The willfulness of the persons responsible for the violation.

12) Allows for violations of the provisions of this bill to be brought by the Attorney General in the name of the people of the state, by a district attorney, by a city attorney, or by a city prosecutor in a city or city and county having a full-time city prosecutor.

13) Specifies that civil penalties collected pursuant to these provisions shall be paid to the office of the city attorney, city prosecutor, district attorney, or Attorney General, whichever office brought the action.

Background

Mylar balloons, power outages, and fires. Mylar balloons are made with Mylar nylon, a non-biodegradable material, and are typically coated with a metallic finish that conducts electricity. If Mylar balloons are not sufficiently weighted and are released into the air, they have the potential to contact power lines, which can result in power outages and fires. Mylar balloons are commonly released for celebrations, such as birthdays or memorials, and sometimes in mass releases for larger events.

According to the author, "In 2020, Pacific Gas & Electric (PG&E) reported 453 balloon-caused outages affecting over 250,000 customers, a 30% increase from 2019. Every year since 2017, Southern California Edison reported over 1,000 balloon-caused outages, including incidents that resulted in dangerous downed power lines. In 2020, Southern California Edison reported that balloon related outages were responsible for 420,000 hours of interrupted service and affected 1.5 million customers. SDG&E reported that foil balloons cause around 100 power outages each year and an average of 3.6 fires every year from 2015 to 2019. Cal

Fire documented two fires caused by metallic balloons in 2013 and 2015, which burned over 11,000 acres and cost millions of dollars to suppress."

Bans on Mylar balloons. Due to the power outage and fire risk caused by Mylar balloons coming in contact with power lines, other states and jurisdictions have considered bans of Mylar balloons. In 2019, the Massachusetts legislature introduced a bill that would ban all balloons, including metallic foil balloons. In California, the cities of Glendale, Hermosa Beach, Malibu, and others enacted bans or restrictions on the sale of metallic foil balloons. In Glendale, the sale of metallic balloons that are not filled with lighter-than-gas air and thus will not float and of balloons anchored to a pole or other structure is still allowed. A violation is punishable by either a fine of up to $1,000, or up to 180 days of jail time or both. In Hermosa Beach, the sale and the use or distribution of metallic balloons on public property was banned. Malibu banned all balloons, both foil and latex balloons, due to environmental concerns.

Development of non-conductive foil balloons. SDG&E has collaborated with balloon manufacturers and other stakeholders to develop a foil balloon that resists conducting electricity. This non-conductive balloon was tested by placing the prototypes in contact with 12 kilovolt (kV), 21kV, and 33kV power lines under typical grid-like conditions. These tests demonstrate the potential for safer alternatives to traditional metallic foil balloons. This bill seeks to strike a balance between allowing consumers to purchase celebratory foil balloons filled with lighter-than-air gas and the need for foil balloons to be made of safer, minimally conductive materials.

Institute of Electrical and Electronics Engineers' balloon standards. IEEE is a professional association for electronic engineering and electrical engineering and a leading developer of international standards that underpin telecommunications, information technology, and power-generation products and services. According to the Author, the IEEE is "creating a draft trial-use standard to test whether foil balloons are safe for overhead electrical power lines in California and across North America. IEEE engages stakeholders and experts to create industry standards that impact ubiquitous products such as home Wi-Fi networks. The energy industry widely recognizes IEEE. For example, the U.S. Energy Policy Act of 2005 used an IEEE standard (IEEE 1547) as the national standard for the interconnection of distributed generation resources. Stakeholders including California utilities, professional engineers, industry experts, and California Public Utilities Commission (CPUC) staff provide input on these standards. IEEE's draft trial use standard could help identify balloon designs, like SDG&E's, which can withstand overhead power lines without causing a power outage or fire."

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

City of Long Beach
Coalition of California Utility Employees
Edison International and Affiliates, Including Southern California Edison
Pacific Gas and Electric Company
Sempra Energy Utilities
Southern California Public Power Authority

OPPOSITION: (Verified 8/17/22)

None received

ARGUMENTS IN SUPPORT: San Diego Gas & Electric, is the sponsor of this bill and notes, "…a respected industry organization – the Institute of Electrical and Electronics Engineers (IEEE) – is developing a trial use test and performance standard for balloons to measure conductivity of celebratory foil balloons when interacting with overhead electrical lines. This industry standard may be used to measure celebratory foil balloons and determine if the balloons are harmful or benign to the electric grid. AB 847 would require the Office of Energy Infrastructure Safety to adopt regulations using the IEEE performance standard for celebratory foil balloons manufactured and/or sold in the state and would specifically prohibit the sale of celebratory foil balloons that do not pass the standard and as such, could spark a fire or cause outages. Celebratory foil balloons that pass the standard could be manufactured or sold in the state. The successful test results of the non-conductive foil balloons provide a path forward to preserve the festive and celebratory nature that metallic celebratory foil balloons bring while also making California a safer place to live."

Supporters of this bill note that this bill will improve safety conditions for utility workers working on high voltage power lines, improve public safety by decreasing wildfire and power outage risk, and reduce infrastructure damage caused by mylar balloon-related power line ignitions.

SUBJECT: Health care practitioners: electronic prescriptions

SOURCE: Author

DIGEST: This bill prohibits a pharmacy, pharmacist, or other practitioner authorized to dispense or furnish a prescription from refusing to dispense or furnish an electronic prescription (e-prescription) solely because the prescription was not submitted via, or is not compatible with, their proprietary software. Permits a pharmacy, pharmacist, or other authorized practitioner to decline to dispense or furnish an e-prescription submitted via software that fails to meet any one of specified criteria, as specified.

Senate Floor Amendments of 8/22/22 strike the urgency clause stating that the bill needs to take effect immediately to protect public health by ensuring exemptions consistent with federal law are in place in California law.

ANALYSIS:

Existing law:

1) Establishes various practice acts in the Business and Professions Code (BPC) governed by various boards within the Department of Consumer Affairs which provide for the licensing and regulation of health care professionals including: physicians and surgeons (under the Medical Practice Act), dentists (under the Dental Practice Act), veterinarians (under the Veterinary Medicine Practice Act); registered nurses, nurse practitioners and certified nurse-midwives (under the Nursing Practice Act); physician assistants (under the Physician Assistant Practice Act); osteopathic physicians and surgeons (under the Osteopathic Medical Practice Act); naturopathic doctors (under the Naturopathic Doctors Act); optometrists (under the Optometry Practice Act); doctors of podiatric medicine (under the Podiatric Act) and; pharmacies, pharmacists and wholesalers of dangerous drugs or devices (under the Pharmacy Law). (BPC § 500 *et seq*.)

2) Defines "prescription" as an oral, written, or electronic transmission order that is both given individually for the person or persons for whom ordered that includes specified information and is issued by an authorized health care practitioner.
(BPC § 4040)

3) Defines "electronic transmission prescription" (e-prescription) as both image and data prescriptions and any prescription order for which a facsimile of the order is received by a pharmacy from a licensed prescriber and any prescription order, other than an electronic image transmission prescription, that is electronically transmitted from a licensed prescriber to a pharmacy. (BPC § 4040)

4) Requires health care practitioners authorized to issue prescriptions to have the capability to issue electronic data transmission prescriptions and requires a pharmacy, pharmacist, or other practitioner authorized to dispense or furnish a prescription to have the capability to receive those electronic transmissions. (BPC § 688)

5) Requires those health care practitioners to issue a prescription as an electronic data transmission prescription, except under certain conditions, including that the electronic prescription is unavailable due to a temporary technological or electrical failure. (BPC § 688)

This bill prohibits a pharmacy, pharmacist, or other practitioner authorized to dispense or furnish a prescription from refusing to dispense or furnish an electronic prescription (e-prescription) solely because the prescription was not submitted via, or is not compatible with, their proprietary software. Permits a pharmacy, pharmacist, or other authorized practitioner to decline to dispense or furnish an e-prescription submitted via software that fails to meet any one of specified criteria, as specified. Makes additional and specified exceptions, as specified.

Background

Prescriptions and E-Prescribing. California implemented mandatory electronic transmission of prescriptions in California in 2018 through AB 2789 (Wood, Chapter 438, Statutes of 2018), which required health care practitioners authorized to have the capability to issue e-prescriptions by January 1, 2020 and required that all prescriptions for controlled substances be transmitted electronically beginning January 1, 2021. This implementation date was delayed one year to January 1, 2022 due to the COVID-19 pandemic.

In 2010, the Drug Enforcement Administration (DEA) revised regulations to provide health care practitioners with the option of issuing e-prescriptions for controlled substances. The regulations also permit pharmacies to receive, dispense, and archive e-prescriptions. Under the DEA rules, prescribing practitioners are still able to write, and manually sign, prescriptions for schedule II, III, IV, and V controlled substances and pharmacies are still able to dispense controlled substances based on those written prescriptions. Oral prescriptions remain valid for schedule III, IV, and V controlled substances. E-prescriptions for controlled substances are only permissible if the electronic prescription and the pharmacy application meet specified DEA requirements, including:

- *Identity proofing of individual prescribing practitioners.* Individual practitioners apply to certain federally approved credential service providers (CSPs) or certification authorities (CAs) to obtain their two-factor authentication credential or digital certificate. The CSP or CA will be required to conduct identity proofing that meets National Institute of Standards and Technology Special Publication 800-63-1 Assurance Level 3. Both in person and remote identity proofing will be acceptable. DEA expects application providers will work with CSPs or CAs to direct practitioners to one or more sources of two-factor authentication credentials that will be interoperable with their applications. Prescribing practitioners may wish to contact their

application provider to determine which CSP or CA the provider recommends the practitioner use. The specifics of each application will determine what kind of two-factor credential will be needed.

- *Two-factor authentication credentials.* According to DEA, two-factor authentication protects the practitioner from misuse of his/her credential by insiders as well as protecting him/her from external threats because the practitioner can retain control of a biometric or hard token. Under the rule, DEA allows the use of two of the following – something you know (a knowledge factor), something you have (a hard token stored separately from the computer being accessed), and something you are (biometric information). A hard token is a cryptographic key stored on a hardware device (e.g., a PDA, cell phone, smart card, USB drive, one-time password device) rather than on a general purpose computer. A hard token is a tangible, physical object possessed by an individual practitioner. The practitioner must retain sole possession of the hard token, where applicable, and must not share the password or other knowledge factor with any other person. The practitioner must not allow any other person to use the token or enter the knowledge factor or other identification means to sign prescriptions for controlled substances. Failure by the practitioner to secure the hard token or knowledge factor may provide a basis for revocation or suspension of the practitioner's DEA registration. Any biometric that meets the criteria DEA has specified may be used as the biometric factor in a two-factor authentication credential used to indicate that prescriptions are ready to be signed and sign controlled substance prescriptions. DEA notes that the use of biometrics as one factor in the two-factor authentication protocol is strictly voluntary, as is all electronic prescribing of controlled substances.

- *Access controls*. Any application that meets DEA's requirements will require access controls to ensure that only individuals legally authorized to sign controlled substance prescriptions are allowed to do so. Setting access controls requires two people. One person must determine which individuals are authorized to sign controlled substance prescriptions and enter those names or assign those names to a role that is allowed to sign controlled substance prescriptions. A DEA registrant must then use his/her two-factor credential to execute the access control list. The access control list will need to be updated when registrants join or leave a practice.

The DEA regulations specify that e-prescriptions for controlled substances may be subject to state laws and regulations but note that if state requirements are more

stringent than DEA's regulations, the state requirements would supersede any less stringent DEA provision.

Related Federal Law and Urgency. In 2018 at the federal level, Congress passed the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) Act. This law created a Medicare requirement for electronic prescribing of controlled substances. This Medicare requirement only applies to Schedule II-V drugs, which is narrower than California statute, and it includes a list of exceptions similar to those in AB 2789. Like AB 2789, the SUPPORT Act's implementation was delayed one year due to the COVID-19 pandemic. Additionally, it should be noted that this bill brings alignment between state law and the federal 2022 Physician Fee Schedule, where the compliance date for this schedule was delayed until January 1, 2023 as a result of the COVID-19 pandemic.

For AB 2789's effective and immediate implementation and compliance, the bill also contains changes requested by the Board of Pharmacy around receipt of electronic data transmission.

Comments

Currently, SureScripts, described above and a proprietary electronically-transmitted prescription software entity that is privately owned by the National Association of Chain Drug Stores (NACDS), National Community Pharmacists Association (NCPA), CVS Health and Express Scripts, is the major player in the prescription software market. SureScripts is a major player in the market. According to the the Office of the National Coordinator for Health Information Technology within the US Department of Health and Human Services, 70% of US physicians used SureScripts's e-prescription network even as far back as 2014 and it is estimated now that the majority, around 90+% of the pharmacy market, uses SureScripts.

Since then, new competitors have been making their way into the e-prescribing software market. At least one new company would require pharmacies to acquire new technology to accept its e-prescriptions. The California Retailers Association and the National Association of Chain Drugs Stores request amendments to "clarify that pharmacies are not required to accept electronic prescriptions from any and all e-prescribing vendors," though they note appreciation for the "language [that] was added to AB 852 to clarify that pharmacies may decline electronic

prescriptions that do not meet industry standards, federal and state laws and privacy requirements…."

However, California law has already required a pharmacy, pharmacist, or other practitioner to have the capability to receive an electronic data transmission prescription on behalf of a patient since 2018 from AB 2789.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, this bill will result in unknown workload and fiscal impact for the California State Board of Pharmacy to provide education on and incorporate pharmacy law changes into Board-provided continuing education courses. Other workload to the Board would include updating its website and newsletter on any relevant information, as well as to develop the online registration process. Appropriations staff notes that there may also be an indeterminate fiscal impact on enforcement workload to the Board, which will likely vary and depend on the volume of complaints and complexity of any resulting investigations. The Office of Information Services within the Department of Consumer Affairs estimates costs of $16,000 to add online lookup functionality, which may be absorbed through the redirection of existing maintenance resources.

SUPPORT: (Verified 8/19/22)

California Dental Association
California Medical Association
California Podiatric Medical Association
Medical Board of California
University of California

OPPOSITION: (Verified 8/19/22)

California Retailers Association
National Association of Chain Drug Stores

ARGUMENTS IN SUPPORT: Generally, supporters write that the bill will give physicians more flexibility in complying with California's electronic prescribing mandate and exempt low-volume prescribers, prescribers in areas of natural disasters, and prescribers who are granted a waiver based on extraordinary circumstances. These new exceptions also track with the Medicare program. Supporters note this adjustment was made federally to ease the challenges COVID-19 has put on our healthcare system and providers alike and to ensure compliance.

ARGUMENTS IN OPPOSITION: The California Retailers Association and the National Association of Chain Drug Stores are opposed to this bill and note that when AB 2789 was implemented, "it became clear that there were certain issues that needed additional clarification so that processes for e-prescribing would be workable within the parameters of California law (e.g., the transfer of controlled substance prescriptions). Unfortunately, the bill was amended on April 18, 2022, to include new provisions that would effectively require pharmacies to accept electronically transmitted prescriptions that may not be compatible with their existing proprietary software. Such a requirement would force pharmacies to contract with all e-prescribing platforms, even if those platforms are not compatible with a pharmacy's systems. Of particular concern, if enacted with the problematic April 18 amendment language, AB 852 would require pharmacies to accept electronic prescriptions without advance notice and minus the lead time necessary to build out system capabilities both internally and with external system vendors to accommodate this. The process for readying a pharmacy system to accept electronic prescriptions from new vendors is involved and includes activities such as negotiating and implementing a contract with vendors, verifying that all involved parties are operating in compliance with all federal and state requirements related to e-prescribing (including for controlled substance prescriptions) and making pharmacy systems changes to achieve interoperability (which may further involve work with additional vendor(s)). As currently drafted, AB 852 would give pharmacies inadequate time to comply, as the requirements of the legislation would take effect immediately upon enactment."

SUBJECT: Employers: Labor Commissioner: required disclosures

SOURCE: California Rural Legal Assistance Foundation

DIGEST: This bill (1) requires agricultural employers, on March 15, 2023, and thereafter, to provide farmworkers brought to California from abroad under the federal H-2A program with a notice summarizing their workplace rights under state law; (2) directs the Labor Commissioner to prepare the notice and make it available online for employer use; (3) specifies the topics to be included in the notice; and (4) grants the Labor Commissioner discretion to include other explanatory information deemed material and necessary.

Senate Floor Amendments of 8/24/22 delay the required distribution of the new notice to March 15, 2023, and thereafter; specify that the Labor Commissioner is responsible for preparing the notice and making it available to employers; clarify that the notice must be provided to workers when they begin work for a new employer after being transferred by an H-2A or other employer; strike the

requirement that the notice include substantially the same language directed in the bill and instead specifies that it must include information that the Labor Commissioner deems material and necessary with respect to the topic headings; and strikes provisions in the bill related to travel time compensation.

Senate Floor Amendments of 8/25/21 make changes to the travel time compensation provisions, which (1) clarify when travel time compensation begins; (2) define "regular rate of pay"; and (3) remove the statement that the travel time compensation provisions are "declaratory of existing law."

ANALYSIS:

Existing law:

1) Empowers the Labor Commissioner's office, within the Department of Industrial Relations, with ensuring a just day's pay in every workplace in the State and promote economic justice through robust enforcement of labor laws. (Labor Code (LC) §79-107)

2) Establishes the federal H-2A Program for Temporary Agricultural Workers allowing U.S. employers or agents who meet specific regulatory requirements to bring foreign nationals to the United States to fill temporary agricultural jobs. Among other things, existing federal law specifies that as a condition for approval of such a petition, the Secretary of Labor must certify that:

    a) There are not sufficient workers who are able, willing, and qualified to perform the labor or services involved in the petition, and
    b) The employment of the foreign agricultural worker will not adversely affect the wages and working conditions of workers in the U.S. similarly employed. (Title 8 U.S. Code Section §1188)

3) Requires that employers, at the time of hire, provide to each employee a written notice, in the language the employer normally uses to communicate employment-related information to the employee, containing, among other things, the following information:

    a) The rate(s) of pay and basis thereof, whether paid by the hour, shift, day, week, salary, piece, commission, or otherwise, including any overtime rate.
    b) Allowances, if any, including meal or lodging allowances.
    c) The name and physical address of the employer's main office or principal place of business, mailing address, if different, and the telephone number.
    d) The name, address, and telephone number of the employer's workers' compensation insurance carrier. (LC §2810.5)

4) Specifies that an employer shall notify his or her employees in writing of any changes to the information set forth in the notice (per above) within seven calendar days, as specified, and requires the Labor Commissioner to prepare, and make available to employers, a template with the information specified above. (LC §2810.5)

5) Specifies that a tenant who is an agricultural employee residing in employee housing has all rights applicable to a person residing in employee housing, including, among others, the following: (a) the right to file a verified complaint with the Department of Fair Employment and Housing alleging a violation of housing discrimination, or to assert any other right, under the Fair Employment and Housing Act; and (b) any protections for tenants or lessees under the Civil Code or the Labor Code, except as otherwise provided in Section 17031.6. (Health and Safety Code §17008.5)

This bill:

1) Requires the workplace rights notice under LC Section 2810.5, which applies to employers in *all industries*, to also include notifying employees of federal or state emergency or disaster declarations applicable to the county or counties where the employee is employed that may affect their health and safety.

2) Enacts "The California Legal Rights Disclosure Act for H-2A Farmworkers" requiring, on March 15, 2023 and thereafter, employers of H-2A employees to provide, on the first day of work with the original petitioner or transferred employer, as specified, a written notice in Spanish (and English if requested) that includes information on employee rights pursuant to federal and state law.

3) Requires the Labor Commissioner to prepare the notice and include information on specified topic headings that cover various laws including, among others, the following and grants the Commissioner discretion in including information they deemed material and necessary with respect to these topic headings:

    a) Mandatory Wage Rates for the Entire Contract Period.
    b) Overtime Wage Rates.
    c) Required Pay Periods.
    d) Required Rest and Meal Periods.
    e) An Employee's Time Spent While Being Transported by an H-2A Employer From the Employee's Housing to the Employer's Worksite Must Be Compensated if the Employee is Required to Use Employer-Provided Transportation.
    f) Rights of Employees Who Live in Employer Housing.

g) An Employer Shall Note Retaliate Against an Employee for Complaining About Working Conditions or for Organizing Collectively.
h) Itemized Wage Statements for Hourly/Piece-Rate Employees.
i) H-2A Employees Must be Trained to Identify, Prevent, and Report Sexual Harassment to their Employer and to State and Federal Agencies.
j) Toilets and Handwashing Facilities Must Be Accessible, and Drinking Water Must Be Provided at All Worksites.
k) Employer Must Provide Shade and Other Protections from Hot Working Conditions.
l) Employer Must Provide Pesticide Exposure Protections.
m) Employer Must Provide Workplace Safety Training and Have Procedures for Identifying and Correcting Hazards.
n) Transportation of Nine or More Farm Workers in One Vehicle Must be Provided in Inspected, Certified, and Insured "Farm Labor Vehicles".
o) No Employer Charges are Permitted for Necessary Tools or Equipment.
p) Workers' Compensation Benefits, Including Disability Pay and Medical Care Must be Provided for Work-Related Injuries or Illnesses.
q) Employees Must be Trained and Provided Necessary Lighting, Special High-Visibility Clothing, and other Equipment to Ensure Safe Working Conditions for Outdoor Agricultural Work Between Dusk and Dawn (consistent with Cal/OSHA standards that went into effect July 1, 2020).
r) Weeding or Thinning With Short-Handled Hoes is Prohibited When the Hoe is Used in a Stooping, Kneeling, or Squatting Position. Hand Weeding or Thinning is Not Permitted Except in Very Limited Circumstances.

4) Requires the Labor Commissioner to prepare the notice for H-2A employer use, in Spanish and English, and make it available to employers including by posting it online beginning March 1, 2023. This information shall be combined with the notice template required under current law (LC 2810.5).

5) Requires employers to also notify H-2A employees of any federal or state emergency or disaster declaration and recommendations applicable to the county/counties where they are employed that may affect their health and safety, as specified. Prohibits an H-2A employer from retaliating against an H-2A employee for raising questions about the declarations' requirements or recommendations.

6) Requires the Labor Commissioner to revise the template, as necessary, to:

a) Provide, update, or expand useful agency contact information.

b) Correct inconsistencies with current laws or regulations, including, adding, deleting, or changing information because of new developments in case law pertinent to any provision referenced in the template.
c) Add any other information relating to any or all of the topic headings in the template, or revise the headings, if Labor Commissioner deems the additions or revisions material and necessary.
d) Add or delete information because of the enactment or repealing of laws or regulations.

7) Makes several findings and declarations pertaining to H-2A workers and their potential limited knowledge of legal rights and remedies under California law and that neither federal nor state law requires employers to notify them of the existence of either federal or state emergency or disaster declarations.

Background

The federal H-2A program allows U.S. employers or U.S. agents who meet specific regulatory requirements to bring foreign nationals to the United States to fill temporary agricultural jobs. H-2A employers must provide housing at no cost to H-2A workers and to workers in corresponding employment who are not reasonably able to return to their residence within the same day. Employer-provided or secured housing must meet all applicable safety standards. Regarding transportation, employers are required to provide daily transportation between the workers' living quarters and the employer's worksite at no cost to covered workers living in employer-provided housing. Employer-provided transportation must meet all applicable safety standards, be properly insured, and be operated by licensed drivers.

(NOTE: Please see policy committee analysis for more background information on compensation for travel time to and from work.)

Comments

Need for this bill? According to the author, "These H-2A workers are recruited from Mexico and brought to California to work in the agricultural industry. Housing is provided by the employer but the workers have no vehicles or access to public transportation to help them get to the employer's worksites, so they generally must rely on transportation arranged by the employer. Many of these workers also are unaware of their basic state work place protections, such as overtime, meal and rest period breaks, and are some of the most historically exploited workers in the agricultural industry. According to EDD, in recent

correspondence to CRLAF, there were approximately 107 California employers in 2019 that imported more than 23,000 H-2A farm workers."

Related/Prior Legislation

AB 364 (Rodriguez, 2021) extends licensing requirements to foreign labor contractors who recruit or solicit foreign agricultural workers.

SB 1102 (Monning, 2020**)**, was similar to this bill, however, with the most recent amendments, this bill (AB 857) is a scaled back version that instead of being prescriptive on the exact language that needs to be included in the written notice, grants the Labor Commissioner discretion in describing worker rights. SB 1102 was vetoed by Governor Newsom.

Western Growers Association

ARGUMENTS IN SUPPORT: According to this bill's sponsor, California Rural Legal Assistance Foundation, "The fundamental purpose of AB 857 is to provide these vulnerable farm workers with a timely, accurate notice of current laws that lets them readily determine whether their employer is complying with applicable California protections." They note that, "The agreed upon subject headings for the H-2A workers' rights notice, with the accompanying explanatory information drafted by the Labor Commissioner, will provide all H-2A farm workers with a short, comprehensive written summary of California's key labor, housing, health and safety and other laws that exceed federal H-2A protections, and which are not otherwise disclosed to them in writing on their first day of work in Spanish."

ARGUMENTS IN OPPOSITION: A coalition of agricultural employers write, "California's ongoing increases to the minimum wage, overtime rules, nitrate/irrigated land program mandates, loss of crop protection tools, and regulatory restrictions on water supply threaten the survival of our family farms. The COVID-19 pandemic has further compounded the challenges that we face as an industry and has caused economic devastation for far too many. At a time when the industry is struggling most, AB 857 proposes unnecessary and costly changes in law."

SUBJECT: Employment: health information technology: clinical practice guidelines: worker rights

SOURCE: California Nurses Association

DIGEST: This bill (1) prohibits a general acute care hospital (GACH) from limiting a worker providing direct patient care from exercising independent clinical judgement, as specified; (2) authorizes a worker who provides direct patient care at a GACH to override health information technology and clinical practice guidelines, as specified; and (3) prohibits a GACH from retaliating against a worker providing direct patient care for overriding health information technology and clinical practice guidelines.

Senate Floor Amendments of 8/22/22:

- Specify that the bill applies to a general acute hospital *employer*.
- Limit the Labor Commissioner's jurisdiction over retaliation complaints or other discrimination to those against an employee who *requests or discusses* overriding health care information technology and clarify that the Labor Commissioner has no jurisdiction to adjudicate claims related to retaliation or discrimination against an employee *taking action* to override health care technology.
- Prohibit the Private Attorneys General Act from applying to violations of the bill's provisions unless otherwise agreed to by the employer and a labor organization in a collective bargaining agreement.

ANALYSIS:

Existing law:

1) Establishes within the Department of Industrial Relations the Office of the Labor Commissioner (LC) to enforce wage and hour law, prevent worker retaliation, and oversee the registration of certain businesses. (Labor Code § 82 et seq.)

2) Establishes the Department of Public Health (DPH) to license and regulate health facilities. (Health & Safety Code § 131000 et seq.)

3) Establishes the Department of Consumer Affairs to provide a safe and fair marketplace through oversight, enforcement, and licensure of professions including vocational and registered nursing by the Board of Registered Nursing (BRN) and of physicians by the Medical Board of California (MBC). (Business & Professions Code § 100 et seq.)

4) Prohibits a health facility from discriminating or retaliating, in any manner, against a patient, employee, member of the medical staff, or other health care worker of the health facility because that person has done either of the following:

    a) Presented a grievance, complaint, or report to the facility, to an entity or agency responsible for accrediting or evaluating the facility, or the medical staff of the facility, or to any other governmental entity; or,

b) Has initiated, participated, or cooperated in an investigation or administrative proceeding related to the quality of care, services, or conditions at the facility that is carried out by an entity or agency responsible for accrediting or evaluating the facility or its medical staff, or governmental entity. (Health & Safety Code § 1278.5)

5) Makes a violation of 4) above subject to a civil penalty of not more than $25,000. (Health & Safety Code § 1278.5 (b) (3))

6) Defines the practice of nursing as those functions, including basic health care, that help people cope with difficulties in daily living that are associated with their actual or potential health or illness problems or the treatment thereof, and that require a substantial amount of scientific knowledge or technical skill, including all of the following:

a) Direct and indirect patient care services that ensure the safety, comfort, personal hygiene, and protection of patients; and, the performance of disease prevention and restorative measures;

b) Direct and indirect patient care services, including, but not limited to, the administration of medications and therapeutic agents, necessary to implement a treatment, disease prevention, or rehabilitative regimen ordered by and within the scope of licensure of a physician, dentist, podiatrist, or clinical psychologist;

c) The performance of skin tests, immunization techniques, and the withdrawal of human blood from veins and arteries; and,

d) Observation of signs and symptoms of illness, reactions to treatment, general behavior, or general physical condition, and (i) determination of whether the signs, symptoms, reactions, behavior, or general appearance exhibit abnormal characteristics, and (ii) implementation, based on observed abnormalities, of appropriate reporting, or referral, or standardized procedures, or changes in treatment regimen in accordance with standardized procedures, or the initiation of emergency procedures. (Business and Professions Code § 2725)

7) Defines “standardized procedures,” for the purpose of 6) above, as meaning either of the following:

a) Policies and protocols developed by a health facility through collaboration among administrators and health professionals including physicians and nurses; and,

b) Policies and protocols developed through collaboration among administrators and health professionals, including physicians and nurses, by an organized health care system. (Business and Professions Code § 2725 (c))

8) Requires the policies and protocols to be subject to any guidelines for standardized procedures that the MBC and the BRN may jointly promulgate. (Business and Professions Code § 2725 (c))

9) Prohibits a person from discharging, discriminating against, retaliating, or taking adverse action against an employee because the employee engaged in conduct protected pursuant to applicable labor statutes, as specified. Protected acts include filing a complaint relating to the employee's rights under the LC's jurisdiction or initiating any action pursuant to a civil claim under the Private Attorneys General Act (PAGA). (Labor Code § 98.6)

10) Authorizes a person who believes they were discharged or otherwise discriminated against in violation of any law under the LC's jurisdiction to file a complaint, as specified, which shall than be investigated pursuant to the LC's established procedures. (Labor Code § 98.7)

11) Provides, under PAGA, that a person may seek recovery of a civil penalty assessed and collected by the Labor and Workforce Development Agency et al., through a private civil action brought by an aggrieved employee on behalf of the employee and other current or former employees pursuant to specified procedures. (Labor Code § 2699 et seq.)

This bill:

1) Prohibits the use of technology from limiting a worker who is providing direct patient care from exercising independent clinical judgment in assessment, evaluation, planning and implementation of care, or from acting as a patient advocate.

2) Authorizes each worker who provides direct patient care at a GACH to override health information technology and clinical practice guidelines if it is in the best interest of the patient to do so in their professional judgment and in accordance with their scope of practice, which includes receiving the approval of the patient's physician, or doctor of podiatric medicine.

3) Prohibits a GACH from retaliating or otherwise discriminating against a worker providing direct patient care who requests to override, or who discusses with other employees or supervisors about overriding, health IT and clinical

practice guidelines. Grants a worker who is subject to retaliation or discrimination the right to file a complaint with the LC against a GACH who retaliates or discriminates against the employee.

4) Limits the LC's jurisdiction with regard to the complaint to retaliation or other discrimination against a worker for requesting to override, or discussing overriding, health information technology, and prohibits the LC from adjudicating claims alleging that a worker suffered retaliation or other discrimination related to taking action to override such technology.

5) Requires each GACH to notify all workers who provide direct patient care (and their representatives, if subject to a collective bargaining agreement) prior to implementing new information technology that materially affects the job of the workers or their patients.

6) Requires each GACH to ensure that its workers that provide direct patient care receive appropriate education or training on how to utilize the new technology and to understand its limitations.

7) Requires GACHs to take into consideration the worker's patient care assignment when determining the appropriate method for training on new technology.

8) Requires GACHs to provide opportunities for workers providing direct patient care in the affected clinical areas to provide input in the implementation processes for new technology impacting patient care delivery.

9) Allows a GACH's professional practice committee representatives to recommend measures to improve the delivery of safe, therapeutic, equitable, and effective care in conjunction with the use of new technology. This bill also them to participate, when feasible, in the implementation processes whenever new technology affecting the delivery of medical or nursing care is under consideration.

10) Requires GACHs to protect patient's private medical information in accordance with the federal and state medical privacy laws when sharing technology in the design, building, and validation process for new technology, as specified.

11) Defines "technology" as scientific hardware or software including algorithms derived from the use of health care-related data, used to achieve a medical or nursing care objective at a GACH.

12) States legislative intent that new technology will continue to permit the exercise of professional clinical judgment in providing patient care and patient advocacy by workers providing direct patient care; that clinical technology is intended to complement, not diminish, skills, judgment, and decision making; and, that professional judgment, not algorithms, will determine the care needed by patient populations or individuals.

13) Prohibits anyone from construing this bill to limit a medical staff's right to establish, in medical staff bylaws, rules, or regulations, clinical criteria and standards to oversee and manage quality assurance, utilization review, and other medical staff activities pursuant to existing law.

14) States that this bill is not intended to prevent hospitals from directing staff to follow nationally recognized quality improvement guidelines or standards of care, including, but not limited to, those used or endorsed by the National Committee for Quality Assurance, the National Quality Forum, the Physician Consortium for Performance Improvement, the Agency for Healthcare Research and Quality, or other organizations recognized or used by the federal Centers for Medicare or Medicaid Services or a department or agency of the State of California or any other commonly accepted standard or guideline for improving consumer health and patient outcomes, unless it is in the patient's best interest to depart from these guidelines.

15) Clarifies that this bill does not allow the override of any physician orders.

16) Prohibits the Private Attorneys General Act from applying to violations of this bill's provisions unless otherwise agreed to by an employer and a labor organization in a collective bargaining agreement.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Department of Industrial Relations indicates that it would incur first-year costs of $3.4 million, and $3.2 annually thereafter, to implement the provisions of this bill.

SUPPORT: (Verified 8/23/22)

California Nurses Association (source)
California Department of Insurance
California Labor Federation, AFL-CIO
Consumer Attorneys of California
United Food and Commercial Workers, Western States Council
United Nurses Associations of California/union of Health Care Professionals

OPPOSITION: (Verified 8/24/22)

Cedars Sinai
Department of Finance
Tenet Healthcare Corporation

ARGUMENTS IN SUPPORT: According to the California Nurses Association:

> This bill will protect professional clinical judgment when providing patient care in hospitals, which is of the utmost importance to nurses.
>
> Technology should be used to complement, not diminish, skills, judgment, and decision-making of healthcare providers. It should not limit independent professional clinical judgment or a healthcare workers ability to act as a patient advocate. Yet our patients are forced to interact with a deeply flawed medical technological system, that among many issues…has been shown to exhibit significant racial bias.
>
> Specifically, AB 858 will allow a healthcare worker providing direct patient care to override health information technology and clinical practice guidelines if, in their professional judgement, and in accordance with their scope of practice, which includes the approval of the patient's physician, if it is in the best interest of the patient to do so.

ARGUMENTS IN OPPOSITION: According to Cedars Sinai:

> AB 858 places hospitals in an almost impossible bind when addressing poor treatment outcomes. If a licensed professional implements a treatment plan that is not based on the best available medical evidence, not only will a hospital be exposed to liability from the medical treatment complications, but the hospital will be forced to choose either the additional liability that comes from not taking appropriate action to correct such dangerous treatment practices or the additional liability of disciplining the professional for their unsafe practices, thereby violating the provisions of AB 858.

SUBJECT: Zoning: bedroom addition

SOURCE: California Rental Housing Association

DIGEST: This bill makes changes to existing law governing accessory dwelling units (ADUs) to allow for additional residential square footage on existing residential properties.

Senate Floor Amendments of 8/22/22 eliminate the increase in ADU height limit allowance.

ANALYSIS:

Existing law:

1) Requires a local agency to ministerially approve, within 60 days, in an area zoned for residential or mixed-use, an application for a building permit to create an ADU and a Junior Accessory Dwelling Unit (JADU) as follows:

a) The ADU or JADU that is within a proposed or existing structure, or the same footprint as the existing structure, provided the space has exterior access from the proposed or existing structure and the side and rear setbacks are sufficient for fire and safety.

b) One detached ADU that is within a proposed or existing structure or the same footprint as the existing structure, along with one JADU, that may be subject to a size limit of 800 square feet, a height limit of 16 feet, and side and rear yard setbacks of four feet.

2) Requires a local agency to ministerially approve, within 60 days, on a lot with a multifamily dwelling:

a) Multiple ADUs within the existing structures that are not used as livable space, if each unit complies with state building standards for dwellings.

b) Two detached ADUs that are subject to a height limit of 16 feet and rear and side yard setbacks of four feet.

This bill prohibits a city or county from adopting or enforcing an ordinance requiring a public hearing for reconfiguring existing space to increase the bedroom count within an existing dwelling unit, as specified.

Background

According to HCD, "ADUs are an innovative, affordable, effective option for adding much needed housing in California." ADUs, also known as accessory apartments, accessory dwellings, mother-in-law units, or granny flats, are additional living spaces on single-family or multifamily lots that have a separate kitchen, bathroom, and exterior access independent of the primary residence. These spaces can either be attached to, or detached from, the primary residence. Local ADU ordinances must meet specified parameters outlined in existing state law.

Local governments may also adopt ordinances for JADUs, which are no more than 500 square feet and are bedrooms in a single-family home that have an entrance into the unit from the main home and an entrance to the outside from the JADU. The JADU must have cooking facilities, including a sink and stove, but is not required to have a bathroom.

Comments

1) *Housing crisis*. California's housing crisis is a half century in the making. Decades of underproduction underscored by exclusionary policies have left housing supply far behind need and costs soaring. California currently has 13 of the 14 least affordable metropolitan areas for homeownership in the nation; it also has the second highest rate of renter households paying more than 30% of their income for housing at 52%. According to the 2022 Statewide Housing Plan, published by HCD, California must plan for more than 2.5 million homes over the next eight-year cycle, and no less than one million of those homes must meet the needs of lower-income households. This represents more than double the housing planned for in the last eight-year cycle. The lack of housing supply is the primary factor underlying California's housing crisis.

   During the 1990's, California averaged only 110,000 new housing units per year. During the early 2000's, production increased significantly, reaching a peak of 212,000 units in 2004 before plummeting to historic lows during the recession. Unfortunately, the downward trend continues; the fact is that California has under-produced housing every single year since 1989.

   As a result, millions of Californians, who are disproportionately lower income and people of color, must make hard decisions about paying for housing at the expense of food, health care, child care, and transportation—one in three households in the state doesn't earn enough money to meet their basic needs.

2) *Encouraging ADU construction.* According to a UC Berkeley study, *Yes in My Backyard: Mobilizing the Market for Secondary Units*, second units are a means to accommodate future growth and encourage infill development in developed neighborhoods. Despite state law requirements for each city in the state to have a ministerial process for approving second units, local regulations often impede development. In response, several bills, including SB 1069 (Wieckowski, 2016), SB 13 (Wieckowski, 2019) and AB 68 (Ting, 2019), have relaxed multiple requirements for the construction and permitting of ADUs and JADUs.

   According to a 2020 UCLA Working Paper, "state ADU and JADU legislation has created the market-feasible potential for nearly 1.5 million new units."

   Since 2013, the number of permitted ADUs increased from 799 to 12,813 in 2020, for a total of almost 44,000 ADUs permitted statewide. With localities across the state facing large regional housing needs allocations for the sixth

housing element cycle, ADUs and JADUs represent a key tool in the housing production toolbox.

1) *Maximizing space.* Another way to facilitate more housing is to maximize the utilization of existing space within residential units. This approach has gained heightened importance during the COVID-19 pandemic, due to both health concerns and the need for social distancing, as well as the increased time spent at home.

   This bill facilitates the improved utilization of existing space by prohibiting public hearings in the instance where the space within existing units is reconfigured to add bedrooms. This prohibition would not affect other requirements – such as bedroom-based impact fees and parking requirements, nor with the requirement to comply with building standards. However, it would remove bureaucratic and time hurdles from making changes within an existing unit.

ARGUMENTS IN SUPPORT: According to the author, "We are facing a housing crisis in California with both a lack of affordable housing and a pandemic of homelessness, especially for low- and moderate-income communities and communities of color. ADU's enable the creation of easy-to-build housing on land that is already utilized for housing, thus bringing down the cost of creating new housing – an opportunity to build for the "missing middle". It is critical that we ensure that ADU creation is streamlined and that more bedrooms can be created in the state without being held up by the public hearing process. Reallocating underutilized space for legal bedrooms, will increase density thus bringing down the average price per occupant in a dwelling. Furthermore, by repurposing habitable space in a manner that is more efficient will reduce the cost of creating more housing."

ARGUMENTS IN OPPOSITION: Written opposition received came from a few cities, local organizations, and community associations concerned about local control and opposing the increased height limit for ADUs. A letter from the City of Beverly Hills stated, "AB 916 goes too far to inhibit the City's ability to review projects that add bedrooms to existing residential dwellings."

SUBJECT: Government-to-Government Consultation Act: state-tribal consultation: training

SOURCE: Morongo Band of Mission Indians

DIGEST: This bill encourages the state and its agencies to consult on a government-to-government basis with federally recognized and, as specified, with nonfederally recognized tribes, in order to allow tribal officials the opportunity to provide meaningful input in the development of policies, processes, programs, and projects that have tribal implications. Additionally, this bill requires designated state officials to complete specified training that includes training elements educating on tribal sovereignty, jurisdiction, and form.

Senate Floor Amendments of 8/22/22 remove the requirement that the Department of Human Resources (CalHR) shall consult with tribal legal services organizations having 10 or more years experience in matters relating to California tribes in developing the training established in the bill. Instead, the bill requires CalHR to consult with tribal governments.

ANALYSIS:

Existing law:

1) Encourages and authorizes all state agencies to cooperate with federally recognized California tribes on matters of economic development and improvement of the tribes, including providing information on programs available to assist Indian tribes, providing technical assistance on the preparation of grants and applications for public and private funds, and conducting meetings and workshops.

2) Establishes the Office of the Tribal Advisor and makes the Tribal Advisor responsible for overseeing and implementing effective government-to-government consultation between the Governor's Administration and California Tribes on policies that affect California tribal communities.

3) Provides, under Executive Order N-15-19, for the Tribal Advisor and the Administration to engage in government-to-government consultation with California Native American tribes regarding policies that may affect tribal communities.

This bill:

1) Encourages the state and its agencies to consult on a government-to-government basis with federally recognized tribes, and with nonfederally recognized tribes and tribal organizations, as appropriate, in order to allow tribal officials the opportunity to provide meaningful input in the development of policies, processes, programs, and projects that have tribal implications.

2) Encourages, the state and its agencies, at the request of a federally recognized tribe and with nonfederally recognized tribes and tribal organizations, as appropriate, to consult, within 60 days of the request, on a government-to-government basis in order to allow tribal officials the opportunity to provide meaningful input in the development of policies, processes, programs, and projects that have tribal implications.

3) Provides that each agency director is encouraged to consider the need for tribal consultation before approving an agency action.

4) Provides that within the executive branch the following officials shall have authority to represent the state in tribal government-to-government consultation:

a) The Governor.
b) The Attorney General.
c) Each constitutional officer and statewide elected official.
d) The director of each state agency and department.
e) The chair and the executive officer of each state commission and task force.
f) The chief counsel of any state agency.

5) Authorizes any of the above officials to formally designate another agency official to conduct preliminary tribal consultations, and each designated official shall have the authority to act on behalf of the state during a government-to-government consultation.

6) Requires, on or before June 1, 2024, CalHR, in consultation with state entities experienced in tribal issues and with tribal, to develop a training regarding required elements of training on government-to-government consultations for the officials described above.

7) Requires the training to include details on government-to-government consultation, including, but not limited to, all of the following elements:

a) Timing and notice.
b) Form, including, but not limited to, in-person meetings, video conferences, teleconferences, and written correspondence.
c) Principles.
d) Resolution.
e) Tribal Sovereignty.
f) Sacred sites.
g) Changes or updates to state law that affect California tribes and that would require government-to-government consultation.

8) Requires all of the officials listed in this bill to complete the training on government-to-government consultation by January 1, 2025, or, for officials appointed after that date, within six months of their appointment or confirmation of appointment, whichever is later. Each official shall retake the training annually.

9) Defines "tribal implications" to mean agency actions that impact one or more federally recognized tribes or nonfederally recognized tribes or tribal organizations, the government-to-government relationship between the state and federally recognized tribes, or the distribution of power and responsibilities between the state and federally recognized tribes.

Comments

Purpose of the Bill. According to the author's office, "on June 18, 2019, Governor Newsom reaffirmed the State's commitment, requiring the Governor's Tribal Advisor and the Administration to engage in government-to-government consultation with California Native American Tribes. This consultation has been vitally important to the state and the tribes in California in providing necessary information during crises and developing policies reflective of the needs of tribes and their members. AB 923 will require heads of state agencies to be properly trained in government-to-government consultation with tribal governments and consider consultation with tribes in their policymaking."

State Action and Executive Orders. On September 19, 2011, Governor Brown issued Executive Order B-10-11, which established the Office of the Governor's Tribal advisor to oversee and implement effective government-to-government consultation between the Administration and Tribes on polices that affect California tribal communities. The Office of the Tribal Advisor was formally placed in statute by AB 880 (Gray, Chapter 801, Statutes of 2018).

On June 18, 2019, Governor Newsom issued Executive Order N-15-19, which acknowledges and apologizes on behalf of the state for the historical "violence, exploitation, dispossession and the attempted destruction of tribal communities" which dislocated California Native Americans from their ancestral land and sacred practices and established the California Truth and Healing Council. In addition, Executive Order N-15-19 reaffirms and incorporates by reference the principles of government-to-government engagements.

On September 25, 2020, Governor Newsom released a *Statement of Administration Policy on Native American Ancestral Lands* to encourage State entities to seek opportunities to support California tribes' co-management of and access to natural lands that are within a California tribe's ancestral land and under the ownership or control of the State of California, and to work cooperatively with California tribes that are interested in acquiring natural lands in excess of State needs.

Related/Prior Legislation

AB 880 (Gray, Chapter 801, Statutes of 2018) established, among other things, the Office of the Tribal Advisor.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown, potentially significant General Fund costs to CalHR to develop a training regarding required

elements on government-to-government consultations and deliver that training to each specified official. Actual costs for CalHR to develop and deliver the training will depend on, among other things, the curriculum and number of participants that would be required to take the training.

The Department of Justice estimates General Fund costs of $386,000 in Fiscal Year 2022-23 and $657,000 ongoing for additional staff workload related to providing advice to outside agencies on tribal issues, the diversity of tribal interest, and other legal assistance.

ARGUMENTS IN SUPPORT: According to the San Manuel Band of Mission Indians, "tribes are still often left out of conversations held by departments and agencies on policies that affect Indian tribes and their citizens. Furthermore, tribes often have difficulty accessing vital information as situations or crises develop, which has presented difficult challenges through the COVID-19 pandemic, as well as during various wildfire incidents over the past several seasons. These consultations will improve policymaking and policy outcomes for all citizens of our state and for this reason we strongly support AB 923."

SUBJECT: Immigration enforcement

SOURCE: Asian Americans Advancing Justice – Asian Law Caucus

DIGEST: This bill eliminates the existing ability under the Values Act for law enforcement agencies to cooperate with federal immigration authorities by giving them notification of release for inmates or facilitating inmate transfers and to prohibit all state and local agencies from assisting, in any manner, the detention, deportation, interrogation, of an individual by immigration enforcement.

Senate Floor Amendments of 8/23/22:

1) Provide that when a person is found suitable for release, the Board of Parole Hearings (BPH) shall consider the following before determining whether to notify Immigration and Customs Enforcement (ICE) about the person's release:

   a) Family and community ties in the US, including disfavoring notifying ICE if the person has family members in the US or relationships with community based organizations.

b) Number of years living in the US if they have had residence in the US for at least five years.
c) Disfavoring notifying ICE if there is evidence of the individual's rehabilitation and success for reentry.

2) Provide that a state or local agency shall not respond to an ICE request if the person was identified as a member of a vulnerable population, as defined.

3) Repeal the provisions requiring CDCR to identify persons as undocumented persons within 90 days of assuming custody.

ANALYSIS:

Existing federal law:

1) Provides that any authorized immigration officer may at any time issue Immigration Detainer-Notice of Action, to any other federal, state, or local law enforcement agency. A detainer serves to advise another law enforcement agency that the Department of Homeland Security (DHS) seeks custody of an alien presently in the custody of that agency, for the purpose of arresting and removing the alien. The detainer is a request that such agency advise the DHS, prior to release of the alien, in order for the DHS to arrange to assume custody, in situations when gaining immediate physical custody is either impracticable or impossible. (8 CFR Section 287.7(a).)

2) States that upon a determination by the DHS to issue a detainer for an alien not otherwise detained by a criminal justice agency, such agency shall maintain custody of the alien for a period not to exceed 48 hours, excluding Saturdays, Sundays, and holidays in order to permit assumption of custody by the DHS. (8 CFR Section 287.7(d).)

3) Authorizes the Secretary of Homeland Security under the 287(g) program to enter into agreements that delegate immigration powers to local police. The negotiated agreements between ICE and the local police are documented in memorandum of agreements (MOAs). (8 U.S.C. Section 1357(g).)

4) States that notwithstanding any other provision of Federal, State, or local law, a Federal, State, or local government entity or official may not prohibit, or in any way restrict, any government entity or official from sending to, or receiving from, the Immigration and Naturalization Service information regarding the

citizenship or immigration status, lawful or unlawful, of any individual. (8 U.S.C. 1373 (a).)

5) States that notwithstanding any other provision of Federal, State, or local law, no State or local government entity may be prohibited, or in any way restricted, from sending to or receiving from the Immigration and Naturalization Service information regarding the immigration status, lawful or unlawful, of an alien in the United States. (8 U.S.C. 1644.)

Existing state law:

1) Defines "immigration hold" as "an immigration detainer issued by an authorized immigration officer, pursuant to specified regulations, that requests that the law enforcement official to maintain custody of the individual for a period not to exceed 48 hours, excluding Saturdays, Sundays, and holidays, and to advise the authorized immigration officer prior to the release of that individual." (Government Code § 7282 (c).)

2) Defines "Notification request" as an Immigration and Customs Enforcement request that a local law enforcement agency inform ICE of the release date and time in advance of the public of an individual in its custody and includes, but is not limited to, DHS Form I-247N. (Government Code § 7283 (f).)

3) Defines "Transfer request" as an Immigration and Customs Enforcement request that a local law enforcement agency facilitate the transfer of an individual in its custody to ICE, and includes, but is not limited to, DHS Form I-247X. (Government Code § 7283 (f).)

4) Prohibits law enforcement agencies (including school police and security departments) from using resources to investigate, interrogate, detain, detect, or arrest people for immigration enforcement purposes. These provisions are commonly known as the Values Act. Restrictions include:

   a) Inquiring into an individual's immigration status;
   b) Detaining a person based on a hold request from ICE;
   c) Providing information regarding a person’s release date or responding to requests for notification by providing release dates or other information unless that information is available to the public;

d) Providing personal information, as specified, including, but not limited to, name, social security number, home or work addresses, unless that information is "available to the public;"
e) Arresting a person based on a civil immigration warrant;
f) Participating in border patrol activities, including warrantless searches;
g) Performing the functions of an immigration agent whether through agreements known as 287(g) agreements, or any program that deputizes police as immigration agents;
h) Using ICE agents as interpreters;
i) Transfer an individual to immigration authorities unless authorized by a judicial warrant or judicial probable cause determination, or except as otherwise specified;
j) Providing office space exclusively for immigration authorities in a city or county law enforcement facility; and,
k) Entering into a contract, after June 15, 2017, with the federal government to house or detain adult or minor non-citizens in a locked detention facility for purposes of immigration custody. (Government Code § 7284.6(a).)

5) Describes the circumstances under which a law enforcement agency has discretion to respond to transfer and notification requests from immigration authorities. These provisions are known as the TRUST Act. Law enforcement agencies cannot honor transfer and notification requests unless one of the following apply:

a) The individual has been convicted of a serious or violent felony, as specified;
b) The individual has been convicted of any felony which is punishable by imprisonment in state prison;
c) The individual has been convicted within the last five years of a misdemeanor for a crime that is punishable either as a felony or misdemeanor (a wobbler);
d) The individual has been convicted within the past 15 years for any one of a list of specified felonies;
e) The individual is a current registrant on the California Sex and Arson Registry;
f) The individual has been convicted of a federal crime that meets the definition of an aggravated felony as specified in the federal Immigration and Nationality Act; or,
g) The individual is identified by ICE as the subject of an outstanding federal felony arrest warrant for any federal crime; or,

h) The individual is arrested on a charge involving a serious or violent felony, as specified, or a felony that is punishable by imprisonment in state prison, and a magistrate makes a finding of probable cause as to that charge. (Government Code § 7282.5.)

6) Provides that law enforcement agencies are able to participate in joint taskforces with the federal government only if the primary purpose of the joint task force is not immigration enforcement. Participating agencies must annually report to the California Department of Justice (DOJ) if there were immigration arrests as a result of task force operations. (Government Code, § 7284.6 (b) & (c).)

7) Allows law enforcement agencies to respond to a request from immigration authorities for information about a person's criminal history. (Government Code § 7284.6 (b)(2).)

8) Allows law enforcement agencies to make inquiries into information necessary to certify an individual who has been identified as a potential crime or trafficking victim for a T or U Visa. (Government Code § 7284.6 (b)(4).)

9) Allows law enforcement agencies to give immigration authorities access to interview an individual in agency custody if such access complies with the TRUTH Act. (Government Code, § 7284.6 (b)(5).)

This bill:

1) Specifies that a state or local agency shall not arrest or assist with the arrest, confinement, detention, transfer, interrogation, or deportation of an individual for an immigration enforcement purpose in any manner including, but not limited to, by notifying another agency or subcontractor thereof regarding the release date and time of an individual, releasing or transferring an individual into the custody of another agency or subcontractor thereof, or disclosing personal information, as specified, about an individual, including, but not limited to, an individual's date of birth, work address, home address, or parole or probation check in date and time to another agency or subcontractor thereof.

2) States that the prohibition described above shall apply notwithstanding any contrary provisions in the California Values Act, as specified, which allowed law enforcement to cooperate with immigration authorities in limited circumstances.

3) Specifies that this bill does not prohibit compliance with a criminal judicial warrant.

4) Prohibits a state or local agency or court from using immigration status as a factor to deny or to recommend denial of probation or participation in any diversion, rehabilitation, mental health program, or placement in a credit-earning program or class, or to determine custodial classification level, to deny mandatory supervision, or to lengthen the portion of supervision served in custody.

5) Defines the following terms for purposes of this bill:

   a) "Immigration enforcement" includes "any and all efforts to investigate, enforce, or assist in the investigation or enforcement of any federal civil immigration law, and also includes any and all efforts to investigate, enforce, or assist in the investigation or enforcement of any federal criminal immigration law that penalizes a person's presence in, entry, or reentry to, or employment in, the United States."
   b) "State or local agency" includes, but is not limited to, "local and state law enforcement agencies, parole or probation agencies, the Department of Juvenile Justice, and the Department of Corrections and Rehabilitation."
   c) "Transfer" includes "custodial transfers, informal transfers in which a person's arrest is facilitated through the physical hand-off of that person in a nonpublic area of the state or local agency, or any coordination between the state or local agency and the receiving agency about an individual's release to effectuate an arrest for immigration enforcement purposes upon or following their release from the state or local agency's custody."

6) States that in addition to any other sanctions, penalties, or remedies provided by law, a person may bring an action for equitable or declaratory relief in a court of competent jurisdiction against a state or local agency or state or local official that violates the provisions of this bill.

7) Specifies that a state or local agency or official that violates the provisions of this bill is also liable for actual and general damages and reasonable attorney's fees.

8) Repeals statutory provisions directing California Department of Corrections and Rehabilitation to implement and maintain procedures to identify inmates

serving terms in state prison who are undocumented aliens subject to deportation.

9) Repeals statutory provisions directing CDCR and California Youth Authority to implement and maintain procedures to identify, within 90 days of assuming custody, inmates who are undocumented felons subject to deportation and refer them to the United States Immigration and Naturalization Service.

10) Repeals statutory provisions directing CDCR to cooperate with the United States Immigration and Naturalization Service by providing the use of prison facilities, transportation, and general support, as needed, for the purposes of conducting and expediting deportation hearings and subsequent placement of deportation holds on undocumented aliens who are incarcerated in state prison.

11) Repeals the statutory directive to include place of birth (state or country)-in state or local criminal offender record information systems.

12) Makes uncodified Legislative findings and declarations.

Background

According to the author:

> Existing law does not prohibit the California Department of Corrections and Rehabilitation or local law enforcement in many cases to transfer individuals to the custody of Immigration and Customs Enforcement after they have completed their sentence or have otherwise been deemed eligible for release if they lack lawful status in the United States or if immigration authorities have deemed that their legal status can be revoked as a result of their criminal history. This effectively serves as an additional punishment on top of the one that was handed down in the criminal justice system, and the immigration enforcement system can result in indefinite detention where individuals have no right to habeas corpus or legal representation. When an individual is transferred to the custody of immigration authorities, their record of rehabilitation, their stable reentry plans, and their network of community support are disregarded. Federal immigration detention centers have been documented to have a record of abuse and neglect of detainees, and these detention centers are beyond the oversight and accountability of the state of California.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- *Department of Corrections and Rehabilitation (CDCR):* The department reports ongoing annual costs of $22 million to supervise up to 2,553 individuals on parole who, under existing law, would have been transferred into federal custody upon release and deported. Additionally, CDCR anticipates one-time costs of $150,000 to update information technology systems, regulations, policies and procedures, and training related to the changes proposed by this measure. Costs to the department would be offset by an unknown amount from ongoing savings from reduced workload, as CDCR no longer would be required to contact immigration authorities about release date notices and changes, set up interviews with incarcerated persons, verify the status of immigration detainer holds, or arrange pick up for individuals upon release. (General Fund)

- *Counties:* Unknown, potentially-major costs in the millions of dollars annually for increased post-release community supervision (PRCS) caseloads to county probation departments to supervise individuals after a prison term for a non-serious, non-violent, or non-sexual offense who, under existing law, would have been transferred into federal custody upon release and deported. (General Fund*)

- *Courts:* Unknown, potentially-significant workload cost pressures to the courts to adjudicate alleged violations of this measure. While the superior courts are not funded on a workload basis, an increase in workload could result in delayed court services and would put pressure on the General Fund to increase the amount appropriated to backfill for trial court operations. For illustrative purposes, the Budget Act of 2021 allocates $118.3 million from the General Fund for insufficient revenue for trial court operations. (General Fund**)

- *Department of Justice:* Minor one-time costs to modify the Automated Criminal History System to make an individual's place of birth an optional field when creating new record. (General Fund)

  *Proposition 30 (2012) exempts the state from mandate reimbursements to local jurisdictions for realigned responsibilities for "Public Safety

Services," including the managing of local jails and the provision of services for and supervision of youth and adults who have committed crimes. The constitutional amendment, however, provides that legislation enacted after September 30, 2012, that has an overall effect of increasing the costs already borne by a local agency for public safety services transferred by the 2011 Realignment Legislation apply to local agencies only to the extent that the state provides annual funding for the costs increase. If the local costs resulting from this measure are determined to be included within the realigned responsibilities specified in Proposition 30, the local agency would not be obligated to provide the level of service required by this bill above the level for which funding is provided by the state. The provisions of this bill may lead to the additional appropriation of funds to obtain local compliance, resulting in cost pressure to the General Fund. **Trial Court Trust Fund

SUBJECT: Vehicle identification and registration: alternative devices

SOURCE: Reviver

DIGEST: This bill requires the Department of Motor Vehicles (DMV) to establish a program authorizing an entity to issue devices as alternatives to the conventional license plates, stickers, tabs and registration cards, subject to approval of the California Highway Patrol (CHP).

Senate Floor Amendments of 8/2/22 provide that vehicle location technology in passenger vehicles being used solely for personal use shall be capable of being manually disabled by a driver while in the vehicle.

Senate Floor Amendments of 9/3/21 strengthen the privacy provisions by including a requirement that all vehicle operators are aware of the GPS capability of the

device. They also revise provisions dealing with enforcement of the tracking of employees using these devices by clarifying that employees can file complaints about unlawful tracking with the Labor Commissioner. Penalties are $250 per employee per violation for an initial violation and $1,000 per employee for subsequent violations.

ANALYSIS:

Existing law:

1) Requires DMV to issue two reflectorized license plates for vehicles and specifies that:

   a) Each plate must display the word "California," the vehicle's registration number, and the year for which the vehicle's registration is valid; and,

   b) For license plates other than motorcycles, the license must be rectangular in shape, 12 inches in length, and six inches in width.

2) Prohibits DMV from contracting with any non-governmental entity for purposes of manufacturing license plates.

3) Authorizes DMV to issue one or more stickers, tabs, or other suitable devices in lieu of a license plate as specified.

4) Authorizes DMV to conduct a pilot program to evaluate alternatives to vehicle license plates, registration stickers, and registration cards until no later than January 1, 2020, and requires DMV to report on the results of the pilot program to the Legislature no later than July 1, 2020.

5) Requires the CHP to approve any DMV-selected alternative to license plates or registration stickers and cards.

This bill:

1) Requires the DMV to establish a program to authorize the use of alternatives to conventional license plates, stickers and registration cards with the following requirements:

   a) The alternative device is subject to approval by the DMV and the CHP.

   b) The alternative device shall be available in a form that does not include vehicle location technology, and it may be available in a form that includes

vehicle location at a higher price. The vehicle location capability shall be capable of being disabled by the user, and in passenger vehicles used solely for personal use, the location capability shall be capable of being manually disabled by the driver while in the vehicle. If the vehicle location technology is active there shall be a visible indication.

c) Data exchanged between the DMV and the device is limited to only that data needed to display evidence of registration. The DMV shall not receive information regarding the location of the device.

d) Use of the alternative device is optional and offered on an opt-in basis.

2) Requires the DMV to adopt regulations to implement the program. Those regulations shall include, but not be limited to, the following:

a) Standards for safe use.

b) Requirements for product oversight and customer support.

c) Requirements for product size, design, display and functionality.

d) Data sharing, privacy, and security protocols.

e) Reporting requirements.

f) Reasonable fees to cover the cost of program implementation.

g) Requirements to ensure that registered owners of the device are aware of the GPS capability and can deactivate the function.

h) Requirements to ensure that nonregistered vehicle operators are aware of the GPS capability.

3) Requires an entity seeking approval to issue an alternative device to submit a business plan to the DMV for approval which includes, but is not limited to, the following:

a) An administrative oversight plan.

b) A product support plan.

c) Security, privacy and cybersecurity evaluations and measures to protect against unauthorized access to information.

d) Procedures to comply with applicable privacy and security requirements, including the California Consumer Privacy Act of 2018.

4) Provides that an alternative device intended to substitute for a license plate shall be visible in the same way that conventional license plates are visible, as specified, and display only information and images approved by the department or deemed necessary by the department. If the alternative device malfunctions it may be deemed a correctable violation. The alternative device provider shall establish a process for frequent notification if the device becomes defective.

5) Prohibits the provider of the alternative device from sharing or selling the information obtained to provide the device, or any other information obtained by virtue of contracting with the DMV to provide the device, including, but not limited to, information collected by the device itself.

6) Prohibits an employer from using the alternative device to monitor employees except during work hours, and only if necessary for the performance of the employee's duties. Employees who believe they have been subject to a violation of this provision may file a complaint with the Labor Commissioner. The employer shall provide the employee with a notice stating that monitoring will occur along with other specified information about how the character of data collected and how the data will be used and stored. An employer who violates these provisions shall be subject to a civil penalty of $250 per employee per violation for the initial occurrence and $1000 per employee per violation for subsequent occurrences.

Comments

1) *Author's Statement.* AB 984 will give the Department of Motor Vehicles the authority to move forward with new vehicle registration technologies. After testing several products during the pilot program, the Department issued the required report in August 2019 to the Legislature, which recommended the DMV be able to move forward with the various products and devices. Some of these products will serve to reduce internal DMV workloads and allow vehicle registration renewal to become a completely remote transaction.

2) *Successful New Product Pilot*. In 2013, legislation was signed authorizing DMV to establish a pilot program to evaluate the use of alternatives to license plates, registration stickers, and registration cards. DMV has developed specifications and completed procurements for each of the three authorized alternatives. The procurement process ran longer than was anticipated and field testing for some of the technologies by the contracted vendors did not begin until as late as November 2015. As noted by the author, in its evaluation of the pilot program the DMV reported that "In general, there were no significant law enforcement, DMV, or customer concerns with any of the three pilot products. DMV recommends all three products be fully authorized in statute for permanent use." [1]

3) *Going Digital*. Two of the three new products are digital: a digital license plate and a digital vehicle registration. (The third new product is a lower-tech adhesive license plate that wraps around the bumper.) The digital nature of these two new products allows for over-the-air updating and renewal. However, this raises additional concerns about cybersecurity and hacking. The DMV pilot program report notes that the digital license plate is protected by encryption and is password protected. A feature of the digital license plate is that the lower area of the plate which lists the DMV's website on standard plates can have alternative messaging, such as a greeting (e.g. Have a Nice Day). One can imagine the opportunity for creativity and mischief, though this is mitigated by the requirement that the digital plate can only display information and images approved by the DMV.

4) *Why Go Digital?* A digital license plate will cost more than a traditional plate, $499 for a non-GPS enabled model. That it is digital may be reason enough for some individuals to switch. A digital plate will also make vehicle registration renewal easier as it can be done completely electronically without requiring the annual application of stickers. When coupled with GPS capability the digital plate can be used for location and security services. In any event, the marketing and financial risk (and reward) of these devices is on the shoulders of the 3rd party vendors.

5) *Your Choice*. The digital products offered as a result of this bill are optional. Individuals will only receive these digital products if they make an affirmative choice to do so. A digital license plate must be offered without GPS capability

[1] "REPORT ON ALTERNATIVE REGISTRATION PRODUCTS PILOT PROGRAM", August 2019.

and may be offered with such capability provided that capability may be disabled by the user.

Privacy Concerns. This bill contains privacy protections including limitations on the type of information that can be provided to the DMV, and on when and how the alternative device can be used to monitor employees. Employee monitoring is subject to comprehensive notification to the employee and violations are civil penalties subject to enforcement by the Labor Commissioner. Recent amendments prohibit the alternative devices from having vehicle location technology when used on private vehicles. This has caused much of the opposition, including the ACLU, the California Partnership to End Domestic Violence, and the Consumer Federation of California, to remove their opposition.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- DMV estimates costs of $511,000 in 2022-23 and $945,000 annually thereafter for 7.0 PY of staff to establish a new unit charged with approval and oversight of alternative registration products, and to make technology changes to manage vendors and make record information available to law enforcement. Staff notes that DMV would incur upfront implementation costs prior to establishing and collecting fees from participating vendors and customers to partially or fully offset costs in the future. (Motor Vehicle Account)

- CHP estimates it would incur minor and absorbable costs to update departmental policies and procedures and conduct testing of digital license plates. (Motor Vehicle Account)

- Staff estimates likely minor costs for the Labor Commissioner and the Attorney General for enforcement of provisions that prohibit an employer from using an alternative device to monitor employees. (General Fund)

SUBJECT: Cannabis: retailers: delivery: vehicles

SOURCE: Author

DIGEST: This bill requires the Department of Cannabis Control (DCC) to include regulations that would allow for an increase to $10,000 in the value of cannabis goods to be carried during delivery of those cannabis goods to customers by employees of a licensed retailer, as specified. This bill also requires a licensed retailer to provide their delivery employee certain hardware, tools, and supplies, access to healthcare benefits, and either a vehicle that meets certain requirements or reimbursement for certain costs for the use of the employee's vehicle, as specified. It requires a licensed retailer to maintain an automobile insurance policy to cover third-party liability of deliveries, as specified.

ANALYSIS:

Existing law:

1) Establishes the Medicinal and Adult Use Cannabis Regulation and Safety Act (MAUCRSA) to regulate the cultivation, distribution, transport, storage, manufacturing, processing, and sale of both medicinal cannabis and adult-use cannabis. (Business and Professions Code (BPC) § 26000)

2) Establishes the Department of Cannabis Control (Department) to regulate cannabis with the sole authority to create, issue, deny, renew, discipline, suspend, or revoke licenses for microbusinesses, transportation, storage unrelated to manufacturing activities, distribution, testing, and sale of cannabis and cannabis products within the state. Requires the Department to administer the portions of MAUCRSA related to and associated with the cultivation of cannabis and with the manufacturing of cannabis products. Delegates to the Department authority to create, issue, deny, and suspend or revoke cultivation or manufacturing licenses for violations of MAUCRSA. (BPC §§ 26010, 26012)

3) Requires the Department to establish a track and trace program for reporting the movement of cannabis and cannabis products throughout the distribution chain that utilizes a unique identifier and is capable of providing specified information. (BPC § 26068)

4) Requires the track and trace program to include an electronic seed to sale software tracking system with data points for the different stages of commercial activity, including, but not limited to, cultivation, harvest, processing, manufacturing, distribution, inventory, and sale. (BPC § 26068)

5) Requires the Department to establish minimum security and transportation safety requirements for the delivery of cannabis and cannabis products. (BPC § 26070)

6) Requires a licensed retailer's delivery employee that is carrying cannabis goods for delivery is only allowed to travel in an enclosed motor vehicle. (Title 4, California Code of Regulations (CCR) § 15417)

7) Requires a licensed retailer's delivery employee is prohibited from carrying cannabis goods in the delivery vehicle with a value in excess of $5,000 at any time and the value of cannabis goods carried in the delivery vehicle for which a

delivery order was not received and processed by the licensed retailer prior to the delivery employee departing from the licensed premises may not exceed $3,000. (Title 4, CCR § 15418)

This bill:

1) Requires DCC to include regulations that would allow for an increase to $10,000 in the value of cannabis goods to be carried during delivery of those cannabis goods to customers by employees of a licensed retailer, as specified.

2) Requires a licensed retailer to provide their delivery employee certain hardware, tools, and supplies, access to healthcare benefits, and either a vehicle that meets certain requirements or reimbursement for certain costs for the use of the employee's vehicle, as specified.

3) Requires a licensed retailer to maintain an automobile insurance policy to cover third-party liability of deliveries, as specified.

4) Makes various findings and declarations.

Background

AB 141 (Committee on Budget, Chapter 70, Statutes of 2021) established the Department of Cannabis Control under MAUCRSA. In that same bill, DCC was required to establish a track and trace program to report the movement of cannabis and cannabis products throughout the distribution chain that utilizes a unique identifier and is capable of providing information that captures certain specified information, including but not limited to: the licensee from whom the product originated and the licensee who received the product; the transaction date; and the unique identifier for the cannabis or cannabis product.

As part of Proposition 64, California voters decided that cannabis deliveries may only be made by a licensed retailer or microbusiness, or a licensed nonprofit, as defined. Proposition 64 also made clear the following: 1) employees of a retailer, microbusiness, or nonprofit delivering cannabis or cannabis products must carry a copy of the licensee's current license and a government-issued identification with a photo of the employee, such as a driver's license, where the employee must present the license and identification upon request to certain state personnel, as specified; 2) the licensee must maintain a copy of that delivery request during delivery to be made available upon request from state personnel, as specified, where

documentation complies with state and federal law on protecting confidential medical information; 3) a customer requesting delivery must also maintain physical or electronic copy of the delivery request and make it available upon request by the DCC and law enforcement officers; and 4) a local jurisdiction may not prevent delivery of cannabis or cannabis products on public roads by a licensee acting in compliance with this division and local law, as specified. This language was also reflected in AB 141 in 2021.

Currently, existing regulation also provides that delivery employees of licensed cannabis retailers are prohibited from carrying more than $5,000 in cannabis goods in a vehicle at any time. Existing regulation also states that delivery employees of licensed cannabis retailers are prohibited from carrying more than $3,000 in cannabis goods in a vehicle at any time if the order was not received and processed by the licensed retailer before the delivery employee departed from the licensed retailer's business site. In 2020, the Cannabis Advisory Committee recommended that the $5,000 threshold for cannabis goods sold via delivery should be increased.

This bill adds a new provision to this section, which would require that DCC regulations regarding minimum security and transportation safety requirements include regulations that allow for up to $10,000 worth of cannabis goods to be delivered at any given time, rather than $5,000 or $3,000 as established by regulation described above. It also specifies the different types of cannabis goods carried during delivery, including cannabis goods for which a delivery order that either was or was not received and processed by the licensed retailer prior to the delivery employee departing from the licensed premise, or a combination of the two – allowing for cannabis delivery drivers to deliver cannabis orders not placed when they originally left the licensed retail site.

This bill also specifies the value of the cannabis goods shall be determined using the current retail price of all cannabis goods carried by or within the delivery vehicle of the licensed retailer's delivery employee.

Furthermore, this bill states that a licensed retailer shall provide their delivery employee all required hardware, tools, and supplies, including items like a GPS, a secured case to hold cannabis products during delivery, a method to unlock the case to the interior of the vehicle, and a dashboard camera if required by local law. It also requires the licensed retailer to reimburse a delivery employee for all legally-required costs incurred for business purposes with that vehicle. If the retailer provides their own vehicle for delivery, the vehicle must: 1) be less than 10 model years old; 2) be in good working condition and have an up-to-date

registration with the Department of Motor Vehicles to operate the vehicle with a clean title; 3) have no outstanding vehicle recalls, no major cracks or obstructions in its windshields, and has working headlights, taillights, and other required safety features; 4) provide access to healthcare benefits for all full-time employees by providing a subsidy to allow employees to purchase health insurance through Covered California, access to group health insurance policies, or other methods; and 5) maintain a hired and non-owned automobile insurance policy with a minimum limit of one million dollars ($1,000,000) per incident to cover third-party liability of deliveries of cannabis goods on the licensee's behalf by an employee who use their own vehicle for the deliveries. Finally, this bill defines "cannabis goods" to mean cannabis, cannabis products, or both, "Covered California" to mean the California Health Benefit Exchange, as defined, and "licensed retailer" means a licensee that has been issued a retail license pursuant to this division, including a retailer, microbusiness, or nonprofit.

Comments

When evaluating legislative policy change that would override existing DCC regulations, it is important to ask which entity is in the best position to decide what would be best for the industry as a whole, and which entity could more fluidly make changes if changes become necessary in the future. This bill as written provides very specific requirements which may not be easily changed should the industry need it in the future. With respect to the delivery aspect of this bill, these questions become apparent.

At the heart of this bill lies the idea that an increased amount of legal cannabis product will lead to more legal cannabis sales. Data submitted by Eaze as described above prove promising. However, that data was largely influenced by the shutdowns of the COVID-19 pandemic. With lockdowns going away, ease of access to the illicit market may increase, and the reality that the illegal market is generally cheaper than the legal market for consumers remains. Additionally, other questions of public safety emerge: will increasing the amount of cannabis in a delivery vehicle increase the likelihood of cannabis delivery trucks being targeted? While this is not to say that delivery may not help to address the illicit market problem, it is to say that this is one of many steps that likely need to be taken to address the concerns posed by the illicit market and should be considered in the broader cannabis context.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, DCC estimates costs of $3,673,251 in the first year and $3,026,451 ongoing to create an additional technical vehicle inspection process for each licensee-provided delivery vehicle.

ARGUMENTS IN SUPPORT: Generally, supporters write that California will never succeed in eliminating the black market unless it stops placing unnecessary burdens on legal operators.

ARGUMENTS IN OPPOSITION: Generally, opposition writes that this bill would not only create scenarios that conflict with local authority, but that may create public safety concerns.

Opponents also state that low-income communities will see a large number of mobile dispensaries and that cannabis companies will put profits before community interests. They are concerned that the bill does not prohibit a delivery vehicle to roam parks and other places where youth are present and state that the bill creates significant public safety concerns for communities of color.

SUBJECT: Medi-Cal: specialty mental health services: foster children

SOURCE: County Behavioral Health Directors Association of California

DIGEST: This bill requires a foster child's county of original jurisdiction to retain responsibility to arrange and provide specialty mental health services when the foster child is placed out of the county in a short-term residential therapeutic program, community treatment facility, or group home, or is admitted to a children's crisis residential program unless under certain specified circumstances. establishes contracting options and notification requirements for county mental health plans and specialty mental health services providers; and requires the Department of Health Care Services and the California Department of Social Services to collect and make available certain data related to the presumptive transfer of foster children. Defines "foster child" to include youth up to age 21.

Senate Floor Amendments of 8/25/22 modify provisions related to data collection, strike provisions related to mental health assessments conducted outside of the

county of original jurisdiction, strike provisions related to third-party service providers, strike provisions related to standardized forms as these efforts are now underway underway due to the CalAIM initiative which was finalized after this bill was introduced, and add a definition of "foster child" to include youth up to age 21.

ANALYSIS:

Existing law:

1) Establishes a state and local system of child welfare services, including foster care, for children who have been adjudged by the court to be at risk or have been abused or neglected, as specified. [WIC §202]

2) Establishes the Medi-Cal program, administered by Department of Health Care Services (DHCS), under which qualified low-income individuals receive health care services. [WIC §14001.1]

3) Defines Early Periodic and Screening Diagnostic, and Treatment Services (EPSDT) as screening services, vision services, dental services, hearing services, and other necessary health care, diagnostic services, treatment and other measures to correct or ameliorate defects and physical and mental illnesses and conditions discovered by the screening services, including SMHS, for eligible individuals who are under the age of 21. [42 USC §1396d(r)]

4) Requires DHCS to implement mental health managed care through contracts with mental health plans (MHPs). Requires DHCS to contract with a county or counties acting jointly for the delivery of specialty mental health services (SMHS) to each county's eligible Medi-Cal beneficiary population. Authorizes MHP contracts to be awarded exclusively and on a geographic basis. [WIC §14712]

5) States legislative intent to ensure that foster children who are placed outside of their county of original jurisdiction are able to access specialty mental health services (SMHS) in a timely manner, consistent with their individual strengths and needs and the requirements of the federal EPSDT services. [WIC §14717.1]

6) Defines "presumptive transfer" as the requirement that, absent any exceptions as established by current law, responsibility for providing or arranging for

SMHS promptly transfer from the county of original jurisdiction to the county in which the foster child resides, under certain conditions, as specified. [WIC §14717.1]

7) Permits presumptive transfer to be waived, as specified, under any of the following exceptions:

   a) The transfer would disrupt continuity of care or delay access to services for the foster youth;
   b) The transfer would interfere with family reunification efforts;
   c) The youth's placement in a county other than the county of original jurisdiction is expected to last less than six months; or,
   d) The youth's residence is within 30 minutes of travel time to the established SMHS provider in the county of original jurisdiction.

8) Requires the California Health and Human Services Agency (CHHSA) to coordinate with DHCS and Department of Social Services (DSS) to issue policy guidance concerning the conditions for and exceptions to presumptive transfer, in consultation with DSS and with the input of stakeholders, as specified. [WIC §14717.1]

9) Permits, on a case-by-case basis, and when consistent with the medical rights of children in foster care, presumptive transfer to be waived and requires the responsibility for the provision of SMHS to remain with the county of jurisdiction if certain exceptions exist, as specified. [WIC §14717.1]

10) Permits a short-term residential therapeutic program (STRTP) to accept for placement youth who have been assessed as meeting the medical necessity criteria for Medi-Cal SMHS, and the youth have been assessed as seriously emotionally disturbed or if the youth have been assessed as requiring the level of services provided by the STRTP in order to meet their behavioral or therapeutic needs, as specified. [WIC §11462.01]

11) Defines a STRTP as a residential facility operated by a public agency or private organization and licensed by DSS that provides an integrated program of specialized and intensive care and supervision, services and supports, treatment, and short-term 24-hour care and supervision to youth. Requires the care and supervision provided by an STRTP to be nonmedical, except as otherwise permitted, as specified. [HSC §1502]

12) Defines "child and family team" as a group of individuals who are convened by the placing agency and who are engaged through a variety of team-based processes to identify the strengths and needs of the child or youth and their family, and to help achieve positive outcomes for safety, permanency, and well-being. [WIC §16501]

This bill:

1) Defines "foster child" or "foster children" as a Medi-Cal eligibility child or children younger than 21 years of age who have been placed into foster care by a county child welfare agency or a county probation department.

2) Requires a placing agency to provide notification to the MHP that will be responsible for arranging and providing SMHS for the foster child before placing a foster child out of county. Permits the placing agency to complete notifications via email. Allows the placing agency to notify the appropriate mental health plan no later than three business days after making the out-of-county placement if notification before placement is not possible.

3) Requires a foster child's county of original jurisdiction to retain responsibility to arrange and provide SMHS if the foster child is placed out of the county of original jurisdiction in a community treatment facility, group home, or STRTP, or is admitted to a children's crisis residential program except in the following circumstances:

    a) The case plan for the foster child specifies that the child will transition to a less restrictive placement in the same county as the facility in which the child has been placed; or,
    b) The placing agency determines, as informed by the child and family team, as defined, that the child will be negatively impacted if responsibility for providing or arranging for SMHS is not transferred to the same county in which the child has been placed. Requires the placing agency to document the basis for making this determination in the child's case record and allows the placing agency to include the MHP in the receiving county in a child and family team meeting.

4) Requires the process existing in law for presumptive transfer to be used if the circumstances in 3) exist.

5) Allows a group home, STRTP, community treatment facility, or children's crisis residential program to notify the MHP that will be responsible for

arranging and providing SMHS for the foster child that the foster child has been admitted to a children's crisis residential program or placed in a group home, STRTP,short-term residential therapeutic program, or community treatment facility upon accepting placement or admission of a foster child.

6) Requires the placing agency to document which MHP is responsible for providing or arranging for SMHS.

7) Allows the MHP in the county of original jurisdiction and the SMHS provider to choose one of the following options to ensure timely payment for SMHS provided to the foster child when the responsibility for SMHS is not transferred to the other county:

   a) Utilize an existing contract between the MHP in the county of original jurisdiction and the SMHS provider for payment of services within a mutually agreed upon timeframe.
   b) Establish a contract for payment of SMHS for a foster child or multiple foster children for payment of services within a mutually agreed upon timeframe.

8) Requires payment, if neither option in 7) is available, for the SMHS to be made by the MHP in the county of original jurisdiction or through an agreement between the MHP in the county of residence and the MHP in the county of original jurisdiction. Requires the MHPs to enter in to such agreement within 30 days of notice, by either the placing agency or the placement provider, of the out-of-county placement.

9) Requires DHCS and DSS to collect data on the receipt of SMHS by foster children who are placed outside of their county of original jurisdiction. Requires the data to be included in the DHCS's Medi-Cal SMHS performance dashboard, in compliance with all applicable state and federal privacy and confidentiality laws, and contain all of the following statewide information:

   a) The number of foster children placed out of county.
   b) The number of foster children placed out of county who receive SMHS.
   c) For foster children placed out of county who receive SMHS, the number of foster children for whom the county of original jurisdiction is responsible for providing or arranging for those services, and the number of foster children for whom the county of residence is responsible for that provision or arrangement.

10) Requires DHCS and DSS to adopt regulations implementing this bill by July 1, 2027. Requires DHCS to obtain any necessary federal approvals and make such request by July 1, 2024. Conditions implementation on federal approval and financial participation.

11) Makes other conforming changes.

Comments

Author's statement. According to the author, foster youth have a higher risk of developing mental health issues and they need to be guaranteed that they can receive their mental health care in a timely manner. This bill will help do that by clarifying that presumptive transfer cannot be applied to foster youth that are transferred out-of-county temporarily into an STRTP, unless care would be improved with a transfer or the youth is expected to reside in the new county permanently. This bill will also support timely payment by providing payment contract options between providers and counties. Providing counties and providers with these options helps guarantee timely care by guaranteeing timely payment. The goal is to make temporary out-of-county transfers as seamless as possible for foster youth and make sure they have access to the mental health care that they need.

NOTE: Please see the Senate Health Committee analysis for full background discussion on this bill.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- $2.2 million one-time costs to CDSS and DHCS.
- Under $1 million annual ongoing costs to CDSS and DHCS.
- Under $500,000 annual ongoing local mandate.

OPPOSITION: (Verified 8/25/22)

Department of Finance

ARGUMENTS IN SUPPORT: This bill is sponsored by the County Behavioral Health Directors Association of California (CBHDA). CBHDA writes that foster youth placed in residential treatment settings across county lines often faced unnecessary delays in receiving appropriate mental health services due to changes in Medi-Cal payment responsibility. They state that this bill would strengthen, clarify, and update the presumptive transfer law to ensure a youth-centered, case-by-case decision is made regarding responsibility for the provision of or arrangement for specialty mental health services for foster youth placed out of county for a short term or time-limited placement. They also state that this bill will ensure that facilities serving these children, specifically STRTPs and community treatment facility, are paid in a timely fashion. They note that this bill includes several methods of payment to providers with timelines when a youth is not presumptively transferred, and the original county retains responsibility for these individuals.

ARGUMENTS IN OPPOSITION: The Department of Finance is opposed to this bill because it results in General Fund costs not included in the current fiscal plan, including Proposition 30 costs to provide funding to counties. Also, by requiring counties to use a standardized form, this bills remove local control over the design and implementation of realigned programs. This provision has been removed.

SUBJECT: Telephone medical advice services

SOURCE: Author

DIGEST: This bill clarifies that a telephone medical advice service is required to ensure that all health care professionals providing telephone medical advice services from an out-of-state location are operating consistent with the laws governing their licenses, in addition to their respective scopes of practice, and clarifies that a telephone medical advice service is required to comply with directions and requests for information made by the respective in-state healing arts licensing boards.

Senate Floor Amendments of 8/16/22 strike a requirement for a telephone medical advice services to provide notification to the Department of Consumer Affairs (DCA) of specified information and make technical changes.

ANALYSIS:

Existing law:

1) Establishes the Department of Consumer Affairs (DCA) within the Business, Consumer Services, and Housing Agency to house licensing boards, bureaus,

committees and a commission for purposes of licensure and regulation. (BPC § 100-144.5)

2) Regulates telephone medical advice services through the licensing boards responsible for the practice of the licenses providing the advice. (BPC § 4999-4999.7)

3) Defines "telephone medical advice" as a telephonic communication between a patient and a health care professional in which the health care professional's primary function is to provide to the patient a telephonic response to the patient's questions regarding the patient's or a family member's medical care or treatment, including assessment, evaluation, or advice provided to patients or their family members. (BPC § 4999.7(b))

4) Defines "telephone medical advice service" as any business entity that employs, or contracts or subcontracts, directly or indirectly, with, the full-time equivalent of five or more persons functioning as health care professionals, whose primary function is to provide telephone medical advice, that provides telephone medical advice services to a patient at a California address. The definition does not include a medical group that operates in multiple locations in California if no more than five full-time equivalent persons at any one location perform telephone medical advice services and those persons limit the telephone medical advice services to patients being treated at that location. (BPC § 4999)

5) Defines "health care professional" as an employee or independent contractor who provides medical advice services and is appropriately licensed, certified, or registered as a dentist, dental hygienist, dental hygienist in alternative practice, or dental hygienist in extended functions, as a physician and surgeon, as a registered, as a psychologist, as a naturopathic doctor, as an optometrist, as a marriage and family therapist, as a licensed clinical social worker, as a licensed professional clinical counselor, or as a chiropractor, and who is operating consistent with the laws governing the licensee's respective scopes of practice in the state in which the licensee provides telephone medical advice services. (BPC § 4999.7)

This bill:

1) Clarifies that a telephone medical advice service is required to ensure that all health care professionals who provide telephone medical advice services from an out-of-state location are operating consistent with the laws governing their respective licenses, in addition to their scopes of practices.

2) Clarifies that a telephone medical advice service is required to comply with all directions and requests for information made by the respective healing arts licensing boards.

3) Strikes the requirement under current law for a telephone medical advice services to provide notification to DCA within 30 days of any change of name, physical location, mailing address, or telephone number of any business, owner, partner, corporate officer, or agent for service of process in California, together with copies of all resolutions or other written communications that substantiate these changes.

Background

Telephone Medical Advice Services. The Telephone Medical Advice Services Bureau (TMAS) was created in 1999 (AB 285, Corbett, Chapter 535, Statutes of 1999) in response to a situation in which a Senator's constituent was unable to contact her physician over the phone, received inadequate service at a clinic, and then died after surgery at a hospital. Under that regulatory structure, any business that provided telephone medical advice services to a patient in California, who employs or contracts with five or more health care professionals, was required to register with the Bureau.

Through the sunset review oversight of DCA in 2015-2016, it was noted that consumers were already protected from unlicensed providers by the other DCA regulatory health boards because telehealth statutes had evolved to authorize and regulate the provision of healthcare remotely via the telephone and other technologies. TMAS was eliminated as of January 1, 2017.

At the time, TMAS was under the direct control of the DCA. When TMAS sunset, there was no DCA unit or division to assume the duties overseeing telephone medical advice companies, so the enforcement duties were transferred to individual boards through their existing authority over the practice of the relevant licensed practitioners.

The law, though, still requires companies to comply with DCA direction and requests for information. The DCA of course only has limited authority over licensing boards and their licensees, as boards make licensing and enforcement decisions. The law may not be as clear as to the authority of boards over telephone medical advice service businesses. This bill would clarify that the enforcement of the regulation of telephone medical advice services is within the jurisdiction of boards by requiring them to comply with directions and requests from the boards, not just the DCA.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

SUPPORT: (Verified 8/16/22)

California Association of Orthodontists
Medical Board of California

OPPOSITION: (Verified 8/16/22)

None received

ARGUMENTS IN SUPPORT: The California Association of Orthodontists writes in support and notes, "This bill would address the problem by clarifying that the telephone medical advice companies must also comply with directions and requests for information from not just the DCA, but also any licensing board that has jurisdiction over the type of advice being provided. Further, by virtue of hiring the professionals, the companies themselves may be providing services under state law. As a result, the oversight of these companies should be clarified to also include the licensing boards. It would also clarify that a person who resides out of state and provides telephone medical advice in California must comply with the specific licensing requirements (e.g. not delinquent), not just the scope of practice requirements of their own state's license."

The Medical Board of California writes in support and notes, "[This bill] would specify that a telephone medical advice service is required to ensure that all health care professionals who provide telephone medical advice services from an out-of-state location are operating consistent with the laws governing their respective licenses. The bill would also specify that a telephone medical advice service is required to comply with all directions and requests for information made by the respective healing arts licensing boards. By clarifying that these organizations must comply with directions and requests from the Board with regard to the practice of medicine, AB 1102 furthers the Board's mission of consumer protection."

SUBJECT: Firearms and ammunition: excise tax

SOURCE: Author

DIGEST: This bill enacts the Gun Violence Prevention, Healing, and Recovery Act, which imposes an excise tax on firearms and ammunition sold in the state on firearms dealers and ammunition vendors, and allocates proceeds for specified purposes.

Senate Floor Amendments of 8/25/22 exempt from the measure's tax sales of long guns and rifles, as well as ammunition used by long rifles, upon presentation of a hunting license by the purchaser to the seller.

ANALYSIS:

Existing law:

1) Imposes several excise taxes, including on cigarettes and tobacco products, alcoholic beverages, motor vehicle and diesel fuel, and cannabis, among others.

2) Enacts the Fee Collections Procedures Law, the state's general purpose statute that guides California Department of Tax and Fee Administration (CDTFA) administration of special taxes and fees.

3) Imposes several fees upon the purchase of a new firearm in the state, which is currently $37.19 per firearm: the Dealer Record of Sale fee (DROS) is $31.19, and covers the costs of the required background check prior to purchase and the transfer registry.

4) Requires firearms dealers to charge each firearm purchaser a fee not to exceed $1, except that the fee may be increased at a rate not to exceed any increase in the California Consumer Price Index, but no more than is necessary to fund specified governmental notification and reporting functions.

5) Authorizes the California Department of Justice (DOJ) to require each dealer to charge each firearm purchaser or transferee a transfer fee not to exceed one dollar ($1) for each firearm transaction, and allows that fee to be adjusted upward at a rate not to exceed the increase in the California Consumer Price Index.

6) Requires firearms dealers to charge each person who obtains a firearm a fee not to exceed five dollars ($5) for each transaction, and allows that fee to be adjusted upward at a rate not to exceed the increase in the California Consumer Price Index.

7) Requires the DOJ to recover its costs under specified provisions related to the sale of ammunition by charging the ammunition transaction or purchase applicant a fee not to exceed the fee charged for its DROS process.

8) Authorizes a certified instructor of the firearm safety test to charge a fee of twenty-five dollars ($25), fifteen dollars ($15) of which is to be paid to DOJ to cover its costs in carrying out and enforcing firearms laws.

9) Requires other various fees to be paid to DOJ at the time of a firearm or ammunition purchase.

This bill:

1) Enacts the Gun Violence Prevention, Healing, and Recovery Act, which imposes an excise tax upon licensed firearms dealers, ammunition vendors, and firearm precursor part vendors, at the rate of 10 percent of the sales price of a handgun, and 11 percent of the sales price of a long gun, rifle, firearm precursor part, and ammunition sold in this state.

2) Provides that the tax is due and payable quarterly on or before the last day of the month next succeeding each quarterly period of three months, and requires taxpayers to file returns electronically quarterly with CDTFA.

3) Requires CDTFA to administer and collect the tax according to the Fee Collections Procedures Law, and further authorizes CDTFA to adopt and enforce rules and regulations relating to its provisions.

4) Exempts from the tax the gross receipts from the retail sale of:

   a) Any firearm, ammunition, or firearm precursor part to a peace officer or any law enforcement agency employing that peace officer, for use in the normal course of employment.

   b) Any long gun or rifle, with a barrel not less than 16 inches in length, or any ammunition to be used in a long gun or rifle, to a person who presents to the seller a valid, unexpired hunting license issued to that person by the Department of Fish and Wildlife.

5) Establishes the State Treasury the Gun Violence Prevention, Healing, and Recovery Fund, and directs proceeds of the tax to the Fund.

6) Directs CDTFA to deposit proceeds of the tax into the Fund after deducting net refunds and costs of administration, and allocates tax proceeds as follows:
   a) Directs one-half of tax proceeds to the Gun Violence Prevention, Healing, and Recovery Fund, including one-half of the interest or dividends for appropriation by the Legislature to fund gun violence prevention programs, gun violence prevention education, and gun violence prevention research.
   b) Continuously appropriates the other half of tax proceeds to the Board of State and Community Corrections for the California Violence Intervention and Prevention (CalVIP) Grant Program, for the sole purpose of funding CalVIP grants, as well as administration and evaluations of the CalVIP program.

7) Commences the tax on July 1, 2023, and requires the Director of the Department of Finance to loan $2 million to CDTFA to implement the tax; the loan must be repaid before tax proceeds are appropriated to the Fund.

8) States that its provisions shall not be construed to preclude or preempt a local ordinance that imposes any additional requirements, fee, or surtax on the sale of firearms, ammunition, or firearm precursor parts, and that its tax is imposed in addition to any other tax or fee imposed by the state, or a city, county, or city and county.

9) Contains an urgency and severability clause.

10) Defines several terms.

11) Includes legislative findings and declarations supporting its purposes.

Background

Congress enacted the Revenue Act of 1918 during World War I to help fund wartime spending, which included the first excise tax on firearms, shells, and cartridges. Congress then enacted the Federal Aid in Wildlife Restoration Act in 1937, which reallocated previously enacted taxes on firearms and ammunition, and extended them to archery equipment. Commonly known as Pittman-Robertson, the U.S. Fish and Wildlife Service (FWS), within the Department of the Interior, distributes tax proceeds from these taxes to fund efforts in states and territories for wildlife restoration, conservation, and hunter education and safety programs. The Act imposes taxes on the manufacturer, distributor, or importer of the good subject to the tax at the following rates:

- 10 percent for pistols and revolvers;
- 11 percent for other firearms and ammunition; and
- 11 percent for bows and archery equipment.

Between 1939 and 2019, FWS disbursed $18.8 billion for wildlife restoration and hunter education and safety activities for Pittman-Robertson programs.

While California does not impose an excise tax on firearms and ammunition, California imposes several fees upon the purchase of a new firearm in the state, which is currently $37.19 per firearm: the Dealer Record of Sale fee is $31.19, and covers the costs of the required background check prior to purchase and the transfer registry. There is also a $1.00 Firearms Safety Act Fee, and a $5.00 Safety and Enforcement Fee.

Related/Prior Legislation

AB 1227 was amended on May 5, 2022, to remove its existing contents, relating to building energy efficiency standards, and include provisions related to an excise tax on firearms. The author introduced substantially similar measures last year (AB 1223) and in 2019 (AB 18), both of which failed to advance out of the Assembly.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- CDTFA estimates that this bill would result in additional excise tax revenues of $110 million in 2023-24. If firearms dealers and ammunition vendors choose to pass the excise tax to on to their customers, the bill would additionally result in a state and local sales and use tax revenue gain of up to $9.4 million, $4.3 million of which would flow to the General Fund.
- CDTFA indicates that it would incur administrative costs of $2.4 million in 2022-23, $841,000 in 2023-24, $793,000 in 2024-25, and $1.5 million annually thereafter, to implement the provisions of the bill. Specifically, the department would incur new costs to (1) identify and notify taxpayers, (2) create a new tax return, (3) program computer systems, (4) revise publications and audit/compliance manuals, (5) develop special notices and tax guides, (6) create regulations, and (7) respond to inquiries from the public.

ARGUMENTS IN SUPPORT: According to the author, "Gun dealers are the leading source of firearms trafficked to illegal markets, often through straw purchases, as well as negligent losses. Gun violence not only imposes an immeasurable toll on human and mental health within impacted communities; it also produces its own economic burdens for state and local resources such as law enforcement, court expenses, and medical resources, and indirectly impacts home values and profitability for local businesses. AB 1227 initiates a long-term investment in reducing the various harms caused by guns across California by imposing a modest excise tax on the sale of guns and ammunition, and establishes the Gun Violence Prevention, Healing, and Recovery Fund. This bill exempts this tax from the sale of long guns, rifles, or any ammunition to be used in a long gun

or rifle when a customer presents a valid license to hunt in California. AB 1227 will provide consistent funding for gun violence prevention programs across California, especially the state Violence Intervention and Prevention Grant Program (CalVIP), which is the most cost-efficient community-based violence intervention programs in the state."

ARGUMENTS IN OPPOSITION: According to the California Rifle and Pistol Association, Inc. "AB 1227 seeks to impose an excise tax in the amount of 10% of the sales price of a handgun and 11% of the sales price of a long gun, firearm precursor part, and ammunition to fund your 'Gun Violence Prevention, Healing, and Recovery Fund.' At that time the author stated the annual cost estimates from gun violence in the United States reach $229 billion. These costs are caused by criminals, not the individuals AB 1227 seeks to tax. We stand with law enforcement throughout California and put the safety of our communities and schools first. However, we oppose taxing millions of law-abiding citizens for the actions of criminals who compose a fraction of a percent of the population who are not law-abiding. Firearms and ammunition sales already bring millions of dollars of sales tax into California's state budget each year. Many communities throughout California already collect over 10% in sales tax alone. Additionally, an average of $40 million are made available for conservation and education efforts in California each year from an 11% federal excise tax imposed on the sale of sporting arms and ammunition. Furthermore, the proposed tax, which clearly impedes constitutionally-protected activity, raises serious legal questions as to whether funds raised in this manner can be spent on this kind of policy. Case law makes it clear states may not impose a charge for the enjoyment of a right granted by the federal Constitution and a person cannot be compelled to purchase, through a fee or tax, the privilege freely granted by the Constitution. This type of tax scheme has been repeatedly struck down in multiple jurisdictions. A marriage license tax being used to fund shelters for victims of domestic violence was recently struck down on similar grounds. In that case, the court pointed that a statute cannot violate the Constitution no matter how desirable or beneficial the legislation may be. Under the law, a state may only impose taxes in connection with the exercise of a constitutional right when those fees are designed to recoup the costs incurred in administering a regulatory regime to which the taxpayer is subjected. This tax neither recoups the costs of legitimate firearm regulation nor does it fund efforts to benefit firearms consumers generally. It is therefore our view that these additional taxes are unjustified and unlawful."

SUBJECT: Reproductive rights

SOURCE: Attorney General Rob Bonta

DIGEST: This bill prohibits law enforcement from knowingly arresting a person for performing or aiding in the performance of a lawful abortion or for obtaining an abortion and prohibits specified entities from providing information to another state or political subdivision thereof regarding an abortion that is lawful under California law, except as provided.

Senate Floor Amendments of 8/25/22:

1) Clarify that a California corporation served with a warrant issued by another state to produce specified records shall be entitled to rely on the representations made in an attestation accompanying the warrant that the evidence sought is not related to an investigation into, or enforcement of, a prohibited violation, as defined.

2) Add cross-references for the definition "prohibited violation" to affected statutes.

Senate Floor Amendments of 8/22/22 add provisions to the bill that prohibit a California corporation that provides electronic communications services from providing information or assistance to another state in the investigation or enforcement of any violation that implicates the fundamental right of privacy with respect to personal reproductive decisions, as specified.

ANALYSIS:

Existing law:

1) Establishes the Reproductive Privacy Act which provides that the Legislature finds and declares that every individual possesses a fundamental right of privacy with respect to personal reproductive decisions and, therefore, it is the public policy of the State of California that:

    a) Every individual has the fundamental right to choose or refuse birth control;

    b) Every individual has the fundamental right to choose to bear a child or to choose to obtain an abortion, with specified limited exceptions; and,

    c) The state shall not deny or interfere with a person's fundamental right to choose to bear a child or to choose to obtain an abortion, except as specifically permitted (Health & Saf. Code § 123460 et. seq., § 123462.)

2) Provides that the state may not deny or interfere with a person's right to choose or obtain an abortion prior to viability of the fetus or when the abortion is necessary to protect the life or health of the person. (Health & Safe. Code § 123462(c); 123466.)

3) Prohibits, under the State Confidentiality of Medical Information Act, providers of health care, health care service plans, or contractors, as defined,

from sharing medical information without the patient's written authorization, subject to certain exceptions. (Civ. Code § 56 et seq.)

4) Requires the Attorney General to carry out certain functions relating to anti-reproductive-rights crimes in consultation with the Governor, the Commission on Peace Officer Standards and Training (POST), and other subject matter experts. (Pen. Code, § 13777, subd. (b).)

5) Requires the Attorney General to direct local law enforcement agencies to report annually to the Department of Justice specified information related to anti-reproductive-rights crimes. (Pen. Code, § 13777, subd. (a)(2).)

6) Defines "anti-reproductive-rights crime" to mean a crime committed partly or wholly because the victim is a reproductive health services client, provider, or assistant, or a crime that is partly or wholly intended to intimidate the victim, any other person or entity, or any class of persons or entities from becoming or remaining a reproductive health services client, provider, or assistant. (Pen. Code, § 13776, subd. (a).)

7) Requires POST to develop an interactive training course on anti-reproductive-rights crimes and make the telecourse available to all California law enforcement agencies though an online portal or platform. (Pen. Code, §13778, subd. (a).)

8) Requires every law enforcement agency in this state to develop, adopt, and implement written policies and standards for officers' responses to anti-reproductive-rights calls by January 1, 2023. (Pen. Code, § 13778.1.)

9) Requires superior court judges in each county to prepare, adopt, and annually revise a uniform countywide schedule of bail for all bailable offenses, as specified. (Pen. Code, § 1269b, subd. (c))

10) Requires a bail schedule to contain a list of the offenses and amounts of bail applicable for each, as well as a general clause for designated amounts of bail for all offenses not specifically listed in the schedule (Pen. Code, § 1269b, subd. (f).)

11) Requires a magistrate, upon the filing of a verified complaint, to issue a warrant directed to any peace officer commanding the officer to apprehend an individual in this state who was convicted, or has violated the terms of bail, probation, or parole, or who is charged with a crime, in another state and who is believed to be in this state. A certified copy of the sworn charge or

complaint and affidavit upon which the warrant is issued shall be attached to the warrant. (Pen. Code, § 1551.)

12) Defines a "search warrant" as a written order in the name of the people, signed by a magistrate and directed to a peace officer, commanding him or her to search for a person or persons, a thing or things, or personal property, and in the case of a thing or things or personal property, bring the same before the magistrate. (Pen. Code, § 1523.)

13) Provides that a search warrant cannot be issued but upon probable cause, supported by affidavit, naming or describing the person to be searched or searched for, and particularly describing the property, thing, or things and the place to be searched. (Pen. Code, § 1525.)

14) Requires a magistrate to issue a search warrant if he or she is satisfied of the existence of the grounds of the application or that there is probable cause to believe their existence. (Pen. Code, § 1528, subd. (a).)

15) Requires, pursuant to the California Electronic Communications Privacy Act (CalECPA), state and local law enforcement agencies to obtain a search warrant or wiretap order before they can access any electronic communication information" which includes emails, digital documents, text messages, location information, and any digital information stored in the cloud. (Pen. Code, § 1546 et seq.)

This bill:

1) Prohibits a local or state law enforcement agency or officer from knowingly arresting or knowingly participating in the arrest of any person for performing, supporting, or aiding in the performance of an abortion in this state, or obtaining an abortion in this state, if the abortion is lawful under the laws of this state.

2) States that a state or local public agency, or any employee thereof acting in their official capacity, shall not cooperate with or provide information to any individual or agency or department from another state, or, to the extent permitted by federal law, to a federal law enforcement agency regarding an abortion that is lawful under the laws of this state and that is performed in this state.

3) Declares that a law of another state that authorizes the imposition of civil or criminal penalties related to an individual performing, supporting, or aiding in the performance of an abortion in this state, or an individual obtaining an

abortion in this state, if the abortion is lawful under the laws of this state, is against the public policy of this state.

4) States that no state court, judicial officer, or court employee or clerk, or authorized attorney shall issue a subpoena pursuant to any state law in connection with a proceeding in another state regarding an individual performing, supporting, or aiding in the performance of an abortion in this state, or an individual obtaining an abortion in this state, if the abortion is lawful under the laws of this state.

5) Provides that the investigation of any criminal activity in this state that may involve the performance of an abortion is not prohibited, provided that information relating to any medical procedure performed on a specific individual is not shared with an agency or individual from another state for the purpose of enforcing another state's abortion law.

6) Requires the countywide bail schedule to set zero dollars bail for an individual who has been arrested in connection with a proceeding in another state regarding an individual performing, supporting, or aiding in the performance of an abortion in this state, or an individual obtaining an abortion in this state, if the abortion is lawful under the laws of this state.

7) Requires, within 24 hours of filing a verified complaint regarding an offense of violation committed in another state, the filing agency to transmit electronically to the Attorney General a complete copy of the verified complaint, the out-of-state indictment, information, complaint, or judgment, out-of-state warrant, and the affidavit upon which the out-of-state warrant was issued.

8) Prohibits the issuance of a warrant for any item or items that pertain to an investigation into a prohibited violation, as defined.

9) Defines "prohibited violation" to mean any violation of law that creates liability for or arising out of providing, facilitating, or obtaining an abortion that is lawful under California law, or intending or attempting such acts.

10) Provides that a California corporation that provides electronic communications services or remote computing services to the general public, when served with a warrant issued by another state shall produce the records as if that warrant had been issued by a California court unless corporation knows or should know that the warrant relates to an investigation into or enforcement of a prohibited violation, as defined.

11) Specifies that the California corporation shall not comply with the out-of-state warrant unless the warrant includes, or is accompanied by, an attestation that the evidence sought is not related to an investigation into or enforcement of a prohibited violation, as defined.

12) States that a California corporation served with a warrant issued by another state to produce specified records shall be entitled to rely on the representations made in an attestation accompanying the warrant that the evidence sought is not related to an investigation into, or enforcement of, a prohibited violation, as defined.

13) Prohibits a California corporation or a corporation whose principal executive offices are located in California that provides electronic communication services from providing in California information or assistance in accordance with the terms of a warrant, court order, subpoena, wiretap order, pen register trap and trace order, or other legal process issued by another state or a political subdivision thereof that relates to an investigation or enforcement of a prohibited violation, as defined.

14) Authorizes the Attorney General to commence a civil action to compel any California corporation or whose principal executive offices are located in California that provides electronic communication services to comply with these provisions.

15) States that a California corporation or corporation whose principal executive offices are located in California are not subject to any cause of action for providing information or assistance with the terms of a warrant, court order, subpoena, wiretap order, pen register trap and trace order, or other legal process issued by another state or a political subdivision thereof except where the corporation knew or should have known that the legal process relates to an investigation or enforcement of a prohibited violation, as defined.

16) States that notwithstanding any other provision of law, no magistrate shall enter an ex parte order authorizing interception of wire or electronic communications or the installation of a pen register or trap and trace device for the purpose of investigating or recovering evidence of a prohibited violation, as defined.

17) Contains an urgency clause so that the bill will take immediate effect.

18) Provides the facts constituting the necessity are as follows: the impending United States Supreme Court decision overturning *Roe v. Wade* makes it

necessary to protect California's health care providers and those seeking reproductive health care in California at the earliest time possible.

19) Contains a severability clause.

Comments

According to the author:

> Our abortion providers are in peril. With *Roe* at risk of being overturned, our physicians are gearing up to treat an influx of patients coming from states that have banned their right to choose. These extreme measures to eliminate all access to abortion care may criminally implicate anyone who receives, provides, or even assists with an abortion here in California. If California does not act, judgements under these laws could lead to arrest and months of legal limbo for providers in our state. This is unacceptable. California law enforcement has no obligation to cooperate with these abhorrent out of state actions. AB 1242 protects our providers from the risk of arrest, as well as protecting in-state patients from any California information-sharing that would serve the brutal attacks to abortion rights.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- Department of Justice (DOJ): DOJ reports costs of $49,000 in Fiscal Year (FY) 2022-23, $53,000 in 2023-24 and 2024-25, and $5,000 in 2025-26 (General Fund). Additional costs may be incurred in order for the DOJ to receive and review verified complaints of person who have been charged with a crime from another state.

- Law Enforcement Policies and Training: Unknown, potentially significant costs for all 608 state and local agencies employing peace officers to update policies regarding cooperation with out-of-state entities and provide the training necessary to comply with the requirements of AB 1242 (Local Funds, General Fund). Costs to the General Fund will depend predominantly on whether the duties imposed by this bill constitute a reimbursable state mandate, as determined by the Commission on State Mandates.

- POST: Likely minor and absorbable costs to POST to update existing training modules

OPPOSITION: (Verified 8/25/22)

Right to Life League

ARGUMENTS IN SUPPORT: According to Advancing New Standards in Reproductive Health:

> As more states pass restrictive abortion policies and bans, California is likely to be the destination for increasing numbers of pregnant people seeking abortion care that they cannot obtain in their own state. As a Reproductive Freedom state, we have a responsibility here in California to be part of the solution, and that is a responsibility that my fellow physician abortion providers and I take very seriously. We cannot sit by idly as we see people's rights taken away in other states—putting their health at risk—when we have the skills and tools to help them.
>
> Patients may travel here to California to obtain abortion care here; they may travel here to receive medications to start the abortion, which will be completed in their home state; or they may seek out telehealth services to obtain a medication abortion from a California provider. All of these services are safe, effective, and consistent with medical standards of care. They are legal for California patients, and should be available to out-of-state residents, as well—especially those facing barriers to care in their home state.
>
> If a patient in a state with severe restrictions seeks out my help to obtain safe abortion care, I would feel compelled to help them. Yet despite my good intentions, I could face a number of legal risks by providing the care I've outlined to a patient from a state that has banned abortion, including possible extradition to that state to face criminal penalties.

I should not have to fear arrest, extradition, and prosecution simply because I provided abortion care that is otherwise legal and safe here in California.

ARGUMENTS IN OPPOSITION: According to Right to Life League:

On its face, the bill's subsections (b) and (c) blatantly and impermissibly violate the U.S. Constitution. These subsections forbid state peace officers from complying with valid court orders issued in foreign states such as subpoenas and from sharing information properly requested by a foreign jurisdiction.

The language of subsection (b) is overbroad and vague, failing to define what "shall not cooperate with or provide information to" means. The phrase in subsection (c), "information relating to any medical procedure", is similarly undefined, vague, and overbroad, encompassing any manner of data or requested materials enumerated in a lawful request.

Together these sections clearly and blatantly violate the Full Faith and Credit Clause by instructing peace officers not to comply, thwarting enforcement of foreign laws against abusers and human traffickers who may hide in California, and denying justice to victims. Together they act to create a confusing morass inhibiting police officers' duties to comply with other state officials' legal requests.

The U.S. Constitution is the supreme law of our land. Thanks to the recent U.S. Supreme Court decision in Dobbs, states now decide how to regulate abortion. Dobbs did not concern the application of the Full Faith and Credit Clause in Article 4. California may proclaim itself an "Abortion Sanctuary"; however, California may not thwart the laws of other states to suit its radical pro-abortion agenda.

THIRD READING

Bill No: AB 1249
Author: Gallagher (R), et al.
Amended: 8/24/22 in Senate
Vote: 27 - Urgency

SENATE GOVERNANCE & FIN. COMMITTEE: 5-0, 6/1/22
AYES: Caballero, Nielsen, Durazo, Hertzberg, Wiener

SENATE APPROPRIATIONS COMMITTEE: 7-0, 8/11/22
AYES: Portantino, Bates, Bradford, Jones, Laird, McGuire, Wieckowski

ASSEMBLY FLOOR: 74-0, 1/31/22 - See last page for vote

SUBJECT: Income taxes: gross income exclusions: wildfires

SOURCE: Author

DIGEST: This bill excludes settlement payments made in connection with the fires associated with the Pacific Gas and Electric (PG&E) trust fund from taxable income.

Senate Floor Amendments of 8/24/22 move the contents of the bill to a new code section to avoid conflicts with current law.

Senate Floor Amendments of 8/16/22 move the contents of the bill to a new section to avoid potential conflicts with Assembly Bill 2142 (Gabriel).

ANALYSIS:

Existing law:

1) Allows various income tax credits, deductions, exemptions, and exclusions.

2) Provides that gross income includes all income from any source, including compensation for services, business income, gains from property, interest, dividends, rents, and royalties, unless specifically excluded.

3) Excludes certain types of income from gross income, such as amounts received as a gift or inheritance, certain compensation for injuries and sickness, qualified scholarships, educational assistance programs, foster care payments, and interest received on certain state or federal obligations.

4) Allows for the exclusion from gross income of amounts received in a settlement, other than punitive damages, which result from personal physical injuries or physical sickness.

5) Excludes payments received as a reimbursement of costs, such as those paid to rebuild a destroyed home.

This bill:

1) Excludes from gross income for state tax purposes any amount received in settlement claims including payments made from the PG&E trust to fire victims by a qualified taxpayer from PG&E related to the 2015 Butte, 2017 North Bay, and 2018 Camp Fires. This income is excluded for both Personal Income and Corporation taxpayers and is operative for all taxable years until the 2028 taxable year.

2) Defines a "qualified taxpayer" as a taxpayer that owned real property or resided in either the counties of Amador, Calaveras, Napa, Sonoma, Lake, Butte, Mendocino or Solano and received qualified amounts in connection with either the 2015 Butte Fire, the 2017 North Bay Fire, or the 2018 Camp Fire, and paid or incurred expense related to those fires.

3) Defines "qualified amount" to mean the amount received in settlement by a qualified taxpayer from the fire victims' trust.

4) Requires the qualified taxpayer to provide documentation of the settlement payment received to the Franchise Tax Board (FTB) upon request.

5) Requires FTB to deliver to the Legislature a written report that includes the number of qualified taxpayers who received a settlement payment from the fire victims' trust and the aggregate amount of those payments.

Background

California Fires. Over the last decade, California has experienced increased, intense, and record-breaking wildfires throughout the state. These fires have resulted in devastating loss of life and billions of dollars in damage to property and infrastructure. Fires attributed to power lines and electrical equipment comprise

nine of the 20 most destructive fires in California history. According to Cal Fire, in 2021 alone there were over 8,000 incidents and over 2.5 million acres of scorched land. In 2020, wildfires destroyed 4.5 million acres.

*Camp Fire***.** In November 2018, multiple victims of the Camp Fire sued PG&E. In January 2019, PG&E declared bankruptcy resulting from investigative findings that the company's equipment sparked a number of wildfires, including the Camp Fire. On June 20, 2020, the United States Bankruptcy Court for the Northern District of California approved PG&E's bankruptcy plan, which established a trust. This trust was established as part of the PG&E bankruptcy to pay fire victims and authorized $13.5 billion in compensation to victims of the 2015 Butte Fire, the 2017 North Bay Fires, and the 2018 Camp Fire.

Related/Prior Legislation

SB 1246 (Stern, 2022) provides similar treatment as AB 1249 by excluding from gross income for state tax purposes any amount received in settlement by a qualified taxpayer from Southern California Edison in settlement claims related to the 2017 Thomas Fire and the 2018 Woolsey Fire from gross income. This income is excluded for both Personal Income Tax and Corporation taxpayers and is operative for all taxable years until the 2027 taxable year. The bill is currently pending on the Assembly Floor.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- FTB estimates that this bill would result in General Fund revenue losses of $55 million in 2021-22, $90 million in 2022-23, $48 million in 2023-24, and $32 million in 2024-25.
- FTB’s costs to implement this bill would be minor and absorbable.

Consumer Attorneys of California
Howard Jarvis Taxpayers Association
Legal Aid of Sonoma
Paradise Ridge Chamber of Commerce
Rural County Representatives of California
Two individuals

OPPOSITION: (Verified 8/25/22)

None received

ARGUMENTS IN SUPPORT: According to the author, "AB 1249 would clarify California's tax code to exclude certain wildfire victims from paying state taxes on compensation for damages received out of PG&E's "Fire Victim Trust." This would help ensure fire victims receive just compensation for the economic and non-economic damages caused by those wildfires. Exempting gross income from state tax for claims paid out of the Fire Victim Trust would be a tremendous help to wildfire victims. With PG&E's stock projected to sell for lower than victims were promised, leaving the trust short billions of dollars, exempting settlements from state taxes would provide much needed and timely relief for these victims."

SUBJECT: Information privacy: other connected device with a voice recognition feature

SOURCE: Author

DIGEST: This bill implements consumer protections in connection with the use of voice recognition features on smart speaker devices and associated transcripts or recordings.

Senate Floor Amendments of 8/25/22 apply the bill's provisions to smart speaker devices only, maintaining existing law as to connected televisions.

ANALYSIS:

Existing law:

1) Prohibits a person or entity from providing the operation of a voice recognition feature within this state without prominently informing, during the initial setup or installation of a connected television, either the user or the person

designated by the user to perform the initial setup or installation of a connected television. (Bus. & Prof. Code § 22948.20(a).)

2) Provides that any actual recordings of spoken word collected through the operation of a voice recognition feature by the manufacturer of a connected television, or a third-party contractor, for the purpose of improving the voice recognition feature, including, but not limited to, the operation of an accessible user interface for people with disabilities, shall not be sold or used for any advertising purpose. (Bus. & Prof. Code § 22948.20(b), (c).)

3) Prohibits a person or entity from compelling a manufacturer or other entity providing the operation of a voice recognition feature to build specific features for the purpose of allowing an investigative or law enforcement officer to monitor communications through that feature. (Bus. & Prof. Code § 22948.20(d).)

4) Provides, pursuant to the California Constitution, that all people are by nature free and independent and have inalienable rights. Among these are enjoying and defending life and liberty, acquiring, possessing, and protecting property, and pursuing and obtaining safety, happiness, and privacy. (Cal. Const, art. I, § 1.)

5) Establishes the California Consumer Privacy Act of 2018 (CCPA), which grants consumers certain rights with regard to their personal information, including enhanced notice, access, and disclosure; the right to deletion; the right to restrict the sale of information; and protection from discrimination for exercising these rights. It places attendant obligations on businesses to respect those rights. (Civ. Code § 1798.100 et seq.)

6) Establishes the California Privacy Rights Act (CPRA), which amends the CCPA and creates the Privacy Protection Agency (PPA), which is charged with implementing these privacy laws, promulgating regulations, and carrying out enforcement actions. (Civ. Code § 798.100 et seq.; Proposition 24 (2020).)

This bill:

1) Defines “smart speaker device” as a speaker and voice command device offered for sale in this state with an integrated virtual assistant connected to a cloud computing storage service that uses hands-free verbal activation. Excludes from the definition a cellular telephone, tablet, laptop computer with

mobile data access, a pager, or a motor vehicle, as defined, or any speaker or device associated with, or connected to, a vehicle.

2) Prohibits a manufacturer of a smart speaker device from providing the operation of a voice recognition feature within this state without prominently informing, during the initial setup or installation of a smart speaker device, either the user or the person designated by the user to perform the initial setup or installation of the smart speaker device, that it contains such a feature and what actions or commands activate the feature.

3) Provides that a recording or transcription collected or retained through the operation of a voice recognition feature by the manufacturer of a smart speaker device, if the recording or transcription qualifies as personal information or is not deidentified, shall not be:

    a) shared with, or sold to, a third party without the user's affirmative consent, except as provided; or
    b) retained electronically, unless the user provides affirmative consent to that retention.

4) Permits a manufacturer to share information with a third party or retain it without affirmative consent to the extent sharing or retaining that information is necessary to execute a function or provide a service specifically requested by the user, provided the manufacturer does not use that information for any purpose other than to facilitate the execution of that function or provision of that service.

5) Requires a manufacturer to provide a user with the option to revoke consent for the sharing or sale of data at any time in a manner reasonably accessible to the user. If a user has declined to provide that affirmative consent, the person or entity seeking consent shall not request that affirmative consent for a period of at least one month after the user has declined to provide that affirmative consent, or when the user attempts to access a function that requires affirmative consent.

6) Requires a person or entity that retains voice recordings that qualify as personal information, or are not deidentified, to provide an interface for users to review and delete those recordings. Users must also be given the ability to delete those recordings automatically.

7) Provides that where a person or entity determines that the voice recognition feature was incorrectly activated ("false wake"), the person or entity shall not use the associated audio recording for any purpose, except to improve the functioning of the voice recognition feature. The person or entity may retain up to the initial 15-second portion of the audio recording for such purposes.

8) Defines "retained" to mean saving or storing, or both saving and storing, voice recorded data longer than the minimum time necessary to complete a requested command by the user. "Personal information," "deidentified," "sell," "share," and "third party" have the same meanings as laid out in the CCPA.

9) Defines "affirmative consent" to mean that a manufacturer of a smart speaker device has done all of the following:

    a) clearly and conspicuously disclosed to the user, separate from the device terms of use, all of the following to the extent applicable:

        i) the device may be used to process and retain user recordings;
        ii) those recordings may be analyzed or shared with third parties;
        iii) the device may be used to process and retain transcriptions of spoken words; and
        iv) those transcriptions may be analyzed or shared with third parties; and,

    b) clearly and conspicuously disclosed to the user, separate from the device terms of use, the extent to which the device can operate in the absence of consent for each practice described in the above disclosure; and,
    c) received consent, as defined in the CCPA, for each practice described in the above disclosure.

10) Subjects violations of these provisions involving smart speaker devices to the same enforcement scheme as applied to violations involving connected televisions.

11) Delays implementation until January 1, 2024.

Background

Existing law prohibits persons or entities from providing the operation of a voice recognition feature associated with connected televisions within this state without prominently informing the user. Recordings or transcriptions collected through the operation of such features for the purpose of improving the voice recognition feature cannot be sold or used for any advertising purpose.

This bill applies these provisions to smart speaker devices and strengthens protections on what can be done with the recordings, and additionally the transcriptions, including limitations on the sharing and retention of the information, as specified. Consumers are required to be properly notified of the features and what activates those features. Companies must receive affirmative consent before sharing or selling transcriptions or recordings, except as provided. Where a speaker retains voice recordings, the user must be provided the opportunity to review and delete those recordings.

This is an author-sponsored bill that is supported by the Children's Advocacy Institute, Oakland Privacy, and Common Sense. It is opposed by various technology and business associations, including the California Chamber of Commerce and TechNet.

Comments

According to the author:

> Existing law (Sections 22948.20, 22948.21, and 22948.23 of the Business and Professions Code) establishes prohibitions for the use of voice recognition features for connected televisions. Today, smart speakers are also equipped with voice recognition features, yet are not included in this section of the B&P code to ensure the same safeguards are in place. This bill would make this section of code more broad, changing the title to include "and Devices," and include smart speaker devices in the provisions.
>
> New safeguards are needed to ensure that consumers can enjoy the benefits of these technologies while mitigating the privacy risks that they pose. Privacy is not a partisan issue and there is a balance that can and needs to be reached—allowing companies to use data to improve their products while ensuring that users' data is not shared or otherwise compromised. There are simply not enough safeguards in place to prevent personal data from being shared. Though Amazon has made some changes, such as allowing someone

to say "Alexa, delete everything I've ever said," the burden is still placed on the consumer to ensure their data is removed. Even then, there is not much transparency surrounding how long data is saved, with what third-party applications it is shared before being deleted, et cetera.

Expanding the law to cover new voice recognition technology and products. This bill attempts to put up privacy guardrails around these smart speaker devices and their voice recognition features. It requires a person or entity seeking to provide the operation of a voice recognition feature to first prominently inform the user that the device contains such a feature, as well as what actions or commands will activate the feature to record or transcribe audio. These disclosures are a common sense transparency measure to ensure that consumers know that the smart speaker device they have is equipped with such a feature and its basic operation.

This bill also provides limitations on what can be done with recordings or transcriptions collected or retained through a voice recognition feature. If the recording or transcription is personal information, and is not deidentified, as those terms are defined in the CCPA, users must first provide affirmative consent before it can be retained electronically, or shared with or sold to any third party. However, there are exceptions to the consent requirement.

This bill also deals with so-called "false wakes," where a smart speaker device activates inadvertently and not in response to designated "wake words," such as "Hey, Siri." As users likely do not anticipate that such recordings will be kept and used for other purposes, the bill prohibits the use of audio recordings associated with these improper wakes for any purpose, with one exception. Amazon and others have indicated that they use these inadvertent recordings to improve the functioning of the voice recognition features. The bill permits the recordings to be used for these purposes even without user consent.

This bill makes clear that manufacturers are not liable for functionality provided by applications that the user chooses to use in the cloud or that are downloaded and installed by a user, unless the manufacturer collects, controls, or has access to any personal information collected or elicited by the applications.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, "Unknown, cost pressures due to increased court workload to adjudicate actions that are filed by the Attorney General or local district attorneys as a result of this measure (Special Fund – Trial Court Trust Fund, General Fund)."

ARGUMENTS IN SUPPORT: Common Sense states:

"As privacy and consumer advocates, we write to express our SUPPORT of AB 1262. As you well know consumers are especially concerned about invasive connected devices that sit in cars, kitchens, family rooms, and bedrooms. Indeed, a recent survey on smart speakers and voice assistants conducted by Common Sense Media found that more than nine in ten parents of young kids say that it is important to them that they can control the information collected about their family. Families want control, but one third of those surveyed said that while they would like to limit the information collected by such devices, they did not know how.

"We appreciate that this bill gives consumers more control over the information collected about them in intimate spaces such as their homes."

ARGUMENTS IN OPPOSITION: A coalition including the California Chamber of Commerce writes:

"AB 1262 reverses CPRA by requiring consumers to "opt-in" before the device can be used. Consumers who purchase smart speakers know that these speakers have one core function, and consumers buy these products to use that one function. Thus, if a customer does not opt-in to the retention of their data when using their

smart speaker device, the device will not work. Accordingly, creating this extra step for consumers who buy these devices is not only unnecessary, but frustrating for users. Retention of data is necessary to make calls, play music, shop online, and use applications to perform functions around the house, such as turning on lights or opening doors. The confusion and frustration this will cause customers is unnecessary because consumers know what these devices do at the time of purchase."

SUBJECT: Physicians and surgeons: payments: disclosure: notice

SOURCE: Center for Public Interest Law

DIGEST: This bill requires physicians and surgeons licensed by the Medical Board of California (MBC) and Osteopathic Medical Board of California (OMBC) to notify patients in writing every two years about the Open Payments database and requires them to post notice about the Open Payments database in each practice area.

Senate Floor Amendments of 8/25/22 delete the requirement that notification be provided every two years so that the measure specifies notification must be provided at the initial visit; clarify that the notification can be written or electronic; and delay the requirement for notice of the Open Payments database to be posted on physician websites, if they have websites, to take effect until January 1, 2024.

ANALYSIS:

Existing law:

1) Requires every board within the Department of Consumer Affairs to adopt regulations to require its licensees to provide notice to their clients or customers that the practitioner is licensed by this state. (BPC § 138)

2) Requires the MBC to adopt regulations to require its licentiates and registrants to provide notice to their clients or patients that the practitioner is licensed or registered in California by the board, that the practitioner's license can be checked, and that complaints against the practitioner can be made through the board's Internet Web site or by contacting the board. (BPC § 2026)

3) Requires the MBC, the OMBC, the Podiatric Medical Board of California, and the Physician Assistant Board to disclose to an inquiring member of the public information regarding any enforcement actions taken against a licensee, including probationary status and limitations on practice. (BPC § 803.1)

4) Enacts the Patient's Right to Know Act of 2018 to require certain healing arts licensees, including physicians and surgeons, who are on probation for certain offenses to provide their patients with information about their probation status prior to the patient's first visit. (BPC § 2228.1)

5) Requires drug manufacturers, under federal law, to obtain approval of new drugs from the federal Food and Drug Administration (FDA).

6) Requires, under the federal Physician Payments Sunshine Act (Sunshine Act), manufacturers of specified drugs, devices, biologicals, or medical supplies to disclose to the federal Centers for Medicare and Medicaid Services (CMS) payments or other transfers of value made to physicians or teaching hospitals.

7) Establishes the Sherman Law, administered by the Department of Public Health (DPH), which, among other things, regulates the packaging, labeling, and advertising of drugs and medical devices in California. (Health and Safety Code (HSC) § 109875 *et. seq.)*

8) Prohibits, in the Sherman Law, the sale, delivery, or giving away of any new drug or new device unless it is either: (HSC § 111550-111610)

    a) A new drug, and a new drug application has been approved for it by the FDA, pursuant to federal law, or it is a new device for which a premarket

approval application has been approved, and that approval has not been withdrawn, terminated, or suspended under the FDA; or

b) A new drug or new device for which DPH has approved a new drug or device application, and has not withdrawn, terminated, or suspended that approval.

c) Requires DPH to adopt regulations to establish the application form and set the fee for licensure and renewal of a drug or device license.

9) Requires drug companies to adopt a Comprehensive Compliance Program (CCP), as specified, and include limits on gifts or incentives provided to medical or health professionals. Requires drug companies to establish explicitly in its CCP a specific annual dollar limit on gifts, promotional materials, or items. (HSC § 119402)

This bill:

1) Requires a MBC and OMBC licensed physician and surgeon, other than an individual working in a hospital emergency room, to provide each patient at the initial office visit, a written or electronic notice of the federal Open Payments database (created to allow the public to search for data provided pursuant to Section 1320a-7h of Title 42 of the United States Code and that is maintained by the federal Centers for Medicare and Medicaid Services (CMS)). Requires the written to include a signature from the patient or a patient representative and the date of signature. Requires the physician to include a record of the notice in the electronic patient records or written patient records if electronic patient records are not maintained and requires them to give the patient or patient representative a copy of the signed and dated notice. Specifies that the notice contain the following text:

"The Open Payments database is a federal tool used to search payments made by drug and device companies to physicians and teaching hospitals. It can be found at https://openpaymentsdata.cms.gov."

2) Requires a physician and surgeon, other than an individual working in a hospital emergency room, or health care employer if the physician and surgeon is employed by an employer that provides health care services, to post, in each location where the individual practices, in an area likely to be seen by all persons entering the office, and on the website used for the individual's practice

(beginning January 1, 2024), a notice that includes a link to the Open Payments database website and the following:

> "For informational purposes only, a link to the federal Centers for Medicare and Medicaid Services (CMS) Open Payments web page is provided here. The federal Physician Payments Sunshine Act requires that detailed information about payment and other payments of value worth over ten dollars ($10) from manufacturers of drugs, medical devices, and biologics to physicians and teaching hospitals be made available to the public."

3) Makes a violation of these provisions unprofessional conduct.

Background

Open Payments Database. The Sunshine Act is a federal law that was passed in 2010 as part of the Patient Protection and Affordable Care Act and requires manufacturers of drugs, devices, biologicals, or medical supplies covered under Medicare, Medicaid, or the Children's Health Insurance Program to report annually to the federal Health and Human Services Secretary certain payments or other transfers of value to physicians and teaching hospitals. The Act also requires applicable manufacturers and applicable group purchasing organizations (GPOs) to report certain information regarding the ownership or investment interests held by physicians or the immediate family members of physicians in such entities. Manufacturers and GPOs are subject to civil monetary penalties for failing to comply with the reporting requirements. Annual data on all payments and transfers of value made to physicians must be provided, and physicians have 45 days to review the data and dispute errors before public release. The Secretary is required to publish the reported data on a public website, and information must be downloadable, easily searchable, and aggregated. States are generally preempted from enacting laws that require disclosure of the same type of information by manufacturers, but the Act explicitly permits states to require the reporting of additional data by drug companies. The passage of the Sunshine Act was intended to increase transparency around the financial relationships between physicians, teaching hospitals and manufacturers of drugs, medical devices and biologics.

CMS fulfills the law's mandate via the Open Payments Program. In June 2016, CMS published the 2015 Open Payments data of financial transactions between drug and medical device makers and health care providers. The data includes information about 11.9 million financial transactions attributed to over 600,000 physicians and more than 1,100 teaching hospitals nationwide, totaling $7.52 billion.

California's Comprehensive Compliance Program. SB 1765 (Sher, Chapter 927, Statutes of 2004) established the law that requires pharmaceutical companies to adopt and update a CCP for interactions with health care professionals and to establish explicitly in their CCPs an annual dollar limit on gifts, promotional materials or other items or activities, with certain exceptions, in accordance with the PhRMA Code and with specified federal guidance.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, this bill will result in indeterminate, but likely absorbable costs to MBC and OMBC to address a potential increase in enforcement workload related to a small increase in complaints, and estimated total costs of $4,000 for the Office of Information Services to create new enforcement codes.

ARGUMENTS IN SUPPORT: Supporters write that "Financial relationships between physicians and medical product manufacturers are common, and include, but are not limited to, free meals, consulting, speaker fees, direct research funding and payments for promoting and using devices and drugs. These relationships can have many positive outcomes and--particularly in the context of consulting and research funding--are often a key component in the development of new drugs and devices. However, they can also create conflicts of interest and in some cases can blur the line between promotional activities and the conduct of medical research, training, and practice. A 2019 analysis by Pro Publica found that on average, doctors who received payments prescribed 58% more of that drug than doctors who did not. The intent of this legislation to create a stronger patient-doctor relationship through greater transparency, and to empower patients to make informed choices about their health care, and improve patient safely."

ARGUMENTS IN OPPOSITION: Opponents state that this bill diverts crucial patient time to administrative tasks that do not improve patient care…and would require significant resources and be exceedingly time consuming for physician practices, diverting crucial patient time to administrative tasks. Physicians already have limited time with patients. The time should be spent discussing the patient's health, treatment plans, medications, and any health questions the patient may have. Opponents state "existing federal law includes the Physician Payment Sunshine Act, requiring all drug and device companies to publicly report payments made to physicians and teaching hospitals. This information is available for public review on the Open Payments Database website. This federal law provides full transparency. We believe this process is the best way to allow patients to understand a physician's relationship with a pharmaceutical or device company. We are concerned that requiring physicians to biannually provide a written disclosure to patients and then maintain a copy in their medical record will result in additional costs and burdens to physician practices to change their medical record systems. We support helping patients understand the existence of this information and the Open Payments Database but believe AB 1278 will result in additional burdens to physician practices that outweigh any benefit in providing the disclosure."

SUBJECT: Price discrimination: gender

SOURCE: Author

DIGEST: This bill prohibits businesses within California from charging different prices for any two consumer products that are substantially similar, as defined, if the price differential is based on the gender of the individuals for whom the goods are marketed or intended.

Senate Floor Amendments of 8/24/22 (1) specify that, in the event a court finds a violation, the court may impose a penalty on the business of up to $10,000 for the first violation, and up to $1,000 for each subsequent violation (where each instance of discriminatory pricing constitutes a separate violation) with a cap of $100,000 total, except that further penalties may be imposed if the business continues to engage in discriminatory pricing as to the good for which it already received the maximum penalty or is found to have engaged in discriminatory pricing as to a different good; and (2) make other technical revisions for clarity and drafting consistency.

ANALYSIS:

Existing law:

1) Entitles all Californians to the full and equal accommodations, advantages, facilities, privileges, or services in all business establishments, thus prohibiting discrimination on any arbitrary basis, including but not limited to sex, race, color, religion, ancestry, national origin, disability, medical condition, genetic information, marital status, sexual orientation, citizenship, primary language, or immigration status. (The Unruh Civil Rights Act, Civ. Code § 51.)

2) Prohibits business establishments from charging different prices for services of similar or like kind based on the consumer's gender. (Gender Tax Repeal Act, Civ. Code § 51.6(b).)

3) Allows price differences based specifically upon the amount of time, difficulty, or cost of providing the services. (Civ. Code § 51.6(c).)

4) Provides that, aside from a specified civil penalty for price list and signage violations, the remedies for a violation of the Gender Tax Repeal Act are the remedies that are generally available for an Unruh Civil Rights Act violation. (Civ. Code § 51.6(d).)

5) Provides that any person who denies, aids or incites a denial, or makes any discrimination or distinction contrary to the Unruh Civil Rights Act or to the Gender Tax Repeal Act, is liable for each and every offense for the actual damages and any amount that may be determined by a jury, or a court sitting without a jury, up to a maximum of three times the amount of actual damage, but in no case less than $4,000, and any attorney's fees that may be determined by the court. (Civ. Code § 52(a).)

This bill:

1) Prohibits any person, firm, partnership, company, corporation, or business from charging a different price for any two personal, family, or household goods that are substantially similar if those goods are priced differently based on the gender of the individuals for whom the goods are marketed and intended.

2) Provides, for purposes of (1), above, that goods are "substantially similar" if they exhibit all of the following characteristics:

a) no substantial differences in the materials used in production;
b) the intended use is similar;
c) the functional design and features are similar; and
d) they are the same brand or both brands are owned by the same individual or entity.

3) Specifies that difference in coloring among any of the goods shall not be construed as a substantial difference.

4) Specifies that nothing in this bill would prohibit differences in the price of goods based on any of the following:

a) the amount of time it took to manufacture those goods;
b) the difficulty in manufacturing those goods;
c) the cost incurred in manufacturing those goods;
d) the labor used in manufacturing those goods;
e) the materials used in manufacturing those goods; or
f) any other gender-neutral reason for charging a different price for the goods.

5) Authorizes the Attorney General, on at least five days' notice to the defendant, to seek an injunction to restrain a violation of (1), above, when the Attorney General has reason to believe such a violation has taken place.

6) Authorizes a court to impose a civil penalty of up to $10,000 for a first violation and up to $1,000 for each subsequent violation, up to a maximum of $100,000.

7) Specifies that each instance of charging different prices for substantially similar goods constitutes a violation.

8) Clarifies that, even after the maximum penalty has been reached, further penalties may be imposed against a business if it continues to violate (1), above, as to the same good, or if it violates (1), above, as to another good.

9) Specifies that the bill does not operated to limit liability under the Unruh Civil Rights Act.

Comments

What is gender-based pricing discrimination or the "pink tax?" Many legitimate factors influence price: materials, labor, research and development costs,

marketing, distribution, and, of course, the classic economic laws of supply and demand. When a business charges different prices based on the customer's gender alone, however, those price disparities constitute discrimination. This form of discrimination is often referred to as a "gender tax" because, although it is not actually a surcharge imposed and collected by the government, gender-based pricing discrimination acts like a tax by imposing extra costs on consumers. Unlike an ordinary tax, however, revenue from gender-based pricing discrimination does not accrue to the community chest, but instead expands the profit margins of private companies. Since gender-based price discrimination disproportionately impacts women and because a common example of this phenomenon involves turning a product pink and then charging more for it on that basis alone, gender-based price discrimination is also often known as "the pink tax."[1]

Evidence of the existence of the pink tax. Evidence from many sources – government, academic, and media – suggests that the pink tax is no trifle. This evidence is detailed in the Senate Judiciary Committee analysis of the bill. Taken together, these studies and reports strongly suggest that, far from abating, the pink tax has persisted across the decades and remains a common phenomenon today. Combined with other forms of financial discrimination – such as the pay gap – the pink tax helps to form a set of insidious and systematic barriers against equal economic opportunity for women, barriers that are even higher for women of color.

Modest remedies available through public enforcement only. In opposing prior legislative efforts to address the pink tax, business associations have argued that robust remedies could stifle product innovation or invite abuse, particularly if enforcement is entrusted to individual consumers, rather than being restricted to public agencies. On the other hand, weak enforcement or meager remedies are unlikely to deter the pink tax. After all, the pink tax generates additional revenue for businesses, so there is an incentive to continue charging it.

As it was introduced, this bill borrowed much of its enforcement regime from a New York State statute that came into effect in 2020. (26 N.Y. GBS § 391-U.) That enforcement regime involves a civil penalty of just $250 for a first violation and $500 for a subsequent violation. Such minimal penalties raise the risk that businesses might be tempted to view the potential fines as little more than a minor cost of doing business.

---

[1] The phrase "pink tax" is also sometimes employed in reference to actual, government-imposed taxes on products that women need or purchase far more often than cisgender men. Charging sales tax on tampons is a quintessential example of this form of "pink tax." Though both forms of the pink tax have discriminatory effects on the lives of women, the bill before this Committee focuses on the gender-based pricing discrimination by businesses, rather than gender-based tax discrimination by governments.

Amendments taken by the author mean that the bills penalty structure now departs from the New York State statute. Those amendments significantly increase the potential civil penalties under the bill to $10,000 for a first violation, and $1,000 for each subsequent violation. For purposes of this calculation, each instance of charging a different price for two goods that are substantially similar constitutes a single violation. Thus, discriminatory pricing between two bicycles would yield up to a $10,000 penalty while penalties for a rack of 6 bicycles would be limited to $15,000 ($10,000 for the first bicycle and $1,000 each for the remaining five). However, the bill specifies that the total penalties are capped at $100,000. New penalties can still be assessed, even after the $100,000 cap has been reached, but only if the business continues to violate the prohibition on discriminatory pricing as to the good for which it received the maximum penalty, or as to another good. Otherwise, businesses who had already hit the maximum penalty would have no further deterrent from engaging in further violations.

Since the imposition of these penalties remains exclusively in the hands of the Attorney General, these increases should boost the bill's deterrent effect without causing significant concern among businesses.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee,

- *DOJ:* The Department of Justice (DOJ) reports costs of $221,000 in Fiscal Year (FY) 2022-23, and $388,000 in 2023-24 and annually thereafter for 1.0 permanent Deputy Attorney General position, and 1.0 legal secretary in order to engage in the review of complaints and prosecution of violations of the new law (General Fund). Staff notes that these costs could be offset to some extent by the assessment of civil penalties provided for in the bill.

- *Judicial Branch:* Unknown, potentially significant cost pressures due to increased court workload to adjudicate violations of this measure (Special Fund – Trial Court Trust Fund, General Fund).

ARGUMENTS IN SUPPORT: According to the author:

> Women are charged more and paid less. Gendered pricing or the "Pink Tax" is systemic devaluation of women's economic wellbeing. These higher prices, especially for necessities, augments existing gender inequalities in pay and wealth. By banning the pricing of goods differently based on the gender, AB 1287 will hold companies accountable and eliminate the "Pink Tax" in California once and for all."

The California Teachers Association writes:

> Higher prices for products marketed to women also reinforce gender difference and gender inequity; it incentivizes heavily gendered marketing from early ages. These messages reinforce gender-based stereotypes that are harmful for all children and engrain bias early on. Across our county, about 77 percent of public-school teachers today are female. AB 1287 eliminates one more barrier to gender equality.

SUBJECT: Income tax credits: low-income housing: California Debt Limit Allocation Committee rulemaking

SOURCE: California Housing Partnership Corporation

DIGEST: This bill allows the Tax Credit Allocation Committee (TCAC), in any calendar year in which the California Debt Limit Allocation Committee (CDLAC) has declared a competition for the award of tax-exempt bond authority for qualified residential rental projects, to reallocate some or all of the $500 million that is made available from 4% tax credit projects to 9% tax credit projects.

Senate Floor Amendments of 8/22/22 clarify how a taxpayer calculates the tax credit amount prior to receiving a specific tax form; and add chaptering amendments for AB 1654 (Rivas).

ANALYSIS:

Existing law:

1) Provides that a low-income housing development that is a new building and is receiving 9% federal Low-Income Housing Tax Credits (LIHTCs) is eligible to receive state LIHTC over four years of 30% of the eligible basis of the building.

2) Provides that a low-income housing development that is a new building that is receiving federal LIHTC and is "at risk of conversion" to market rate is eligible to receive state LIHTC over four years of 13% of the eligible basis of the building.

3) Provides, for 2020 and 2021 calendar years, that up to $500 million may be allocated to 4% tax credit projects pursuant to an authorization in the annual budget or related legislation.

4) Authorizes CDLAC to adopt, amend, or repeal rules and regulations as emergency regulations win accordance with the rulemaking provisions of the Administrative Procedures Act (APA).

5) Requires projects funded by TCAC to begin construction within 180 days of the award. Authorizes the TCAC executive director to extend the 180 days in the event the Governor has declared a state of emergency.

6) Authorizes a taxpayer who receives a tax credit to sell the credit to one or more unrelated parties, as specified.

This bill:

1) Provides up to $500 million to TCAC for the 2020 calendar year, and up to $500 million in the 2021 calendar year and every year thereafter, subject to appropriation in the annual Budget Act.

2) Provides that of the $500 million made available, TCAC may allocate up to $200 million for housing financed by the California Housing Finance Agency (CalHFA) under its Mixed-Income Program (MIP).

3) Provides that for any calendar year in which CDLAC has declared a competition for the award of tax-exempt bond authority for qualified residential rental projects, TCAC may allocate some or all of the credits, except for any credits allocated for housing financed by CalHFA under its MIP, for 9% projects. TCAC shall allocate the remainder of these credits for new buildings

that are federally subsidized and that can begin construction within 180 days from the date of the award.

4) Provides that for any calendar year in which CDLAC has not declared a competition for the award of tax-exempt bond authority for qualified residential rental projects, credits shall be allocated for new buildings that are federally subsidized and that can begin construction within 180 days from the date of the award except for any credits allocated for housing financed by CalHFA under its MIP.

5) Provides that in the event of a state of emergency proclaimed by the Governor, the executive director of TCAC may extend the 180-day construction start deadlines.

6) Authorizes the committee, until January 1, 2028, to adopt, amend, or repeal rules and regulations without complying with the Administrative Procedures Act, except as follows:
   a) The committee shall provide a notice, as specified, that shall be provided to the public at least 21 days before the close of the public comment period, and the committee shall schedule at least one public hearing, as specified, before the public comment period closes.
   b) The committee shall maintain a rulemaking file, as specified, and the final regulation shall be accompanied by a final statement of reasons, as specified.
   c) The committee may also adopt, amend, or repeal emergency rules and regulations.

7) Provides that on January 1, 2028, the committee may adopt, amend, or repeal rules and regulations pursuant to this chapter as emergency regulations in accordance with the APA, as specified.

8) Requires projects funded by TCAC to begin construction within a reasonable time, as determined by TCAC.

9) Requires a taxpayer who purchases a tax credit to be eligible to claim that credit in the taxable year the building is placed in service, as specified.

Background

The federal LIHTC program. The LIHTC is an indirect federal subsidy developed in 1986 to incentivize the private development of affordable rental housing for low-income households. The federal LIHTC program enables low-income housing sponsors and developers to raise project equity through the allocation of tax benefits to investors. TCAC administers the program and awards credits to

qualified developers who can then sell those credits to private investors who use the credits to reduce their federal tax liability. The developer in turn invests the capital into the affordable housing project.

Two types of federal tax credits are available: the 9% and 4% credits. These terms refer to the approximate percentage of a project's "eligible basis" a taxpayer may deduct from their annual federal tax liability in each year for 10 years. "Eligible basis" means the cost of development excluding land, transaction costs, and costs incurred for work outside the property boundary. For projects that are not financed with a federal subsidy, the applicable rate is 9%. For projects that are federally subsidized (including projects financed more than 50% with tax-exempt bonds), the applicable rate is 4%. Although the credits are known as the "9% and 4% credits," the actual tax rates fluctuate every month, based on the determination made by the Internal Revenue Service on a monthly basis. Generally, the 9% tax credit amounts to 70% of a taxpayer's eligible basis and the 4% tax credit amounts to 30% of a taxpayer's eligible basis, spread over a 10-year period.

Each year, the federal government allocates funding to the states for LIHTCs on the basis of a per-resident formula. In California, TCAC is the entity that reviews proposals submitted by developers and selects projects based on a variety of prescribed criteria. Only rental housing buildings, which are either undergoing rehabilitation or newly constructed, are eligible for the LIHTC programs. In addition, the qualified low-income housing projects must comply with both rent and income restrictions.

Each state receives an annual ceiling of 9% federal tax credits and they are oversubscribed by a 3:1 ratio. Unlike 9% LIHTC, federal 4% tax credits are not capped; however, they must be used in conjunction with tax-exempt private activity mortgage revenue bonds, which are capped and are administered by the CDLAC. In 2020, the state ceiling for private activity bonds was set at $4.1 billion. The value of the 4% tax credits is less than half of the 9% tax credits and, as a result, 4% federal credits are generally used in conjunction with another funding source, like state housing bonds or local funding sources.

The state LIHTC program. In 1987, the Legislature authorized a state LIHTC program to augment the federal tax credit program. State tax credits can only be awarded to projects that have also received, or are concurrently receiving, an allocation of the federal LIHTCs. The amount of state LIHTC that may be annually allocated by the TCAC is limited to $70 million, adjusted for inflation. In 2020, the total credit amount available for allocation was about $100 million plus any unused or returned credit allocations from previous years. Current state tax

law generally conforms to federal law with respect to the LIHTC, except that it is limited to projects located in California.

While the state LIHTC program is patterned after the federal LIHTC program, there are several differences. First, investors may claim the state LIHTC over four years rather than the 10-year federal allocation period. Second, the rates used to determine the total amount of the state tax credit (representing all four years of allocation) are 30% of the eligible basis of a project that is not federally subsidized and 13% of the eligible basis of a project that is federally subsidized, in contrast to 70% and 30% (representing all 10 years of allocation on a present-value basis), respectively, for purposes of the federal LIHTCs. Furthermore, state tax credits are not available for acquisition costs, except for previously subsidized projects that qualify as "at-risk" of being converted to market rate.

Combining federal 9% credits (which amounts to roughly 70%) with state credits (which amounts to 30%) generally equals 100% of a project's eligible basis. Combining federal 4% credits (which amounts to roughly 30%) with state credits (which amounts to 13%), only results in 43% of a project's eligible basis.

Comments

1) *Author's statement*. Per the author, "AB 1288 will increase the impact of the state's additional investment in Low-Income Housing Tax Credits by deploying these credits more effectively. The current pairing of these state credits with 4% federal credits no longer makes sense at a time when there is a massive backlog of developments seeking 4% federal credits. The line just becomes longer. By granting the Tax Credit Allocation Committee the authority to move these credits to the unconstrained 9% federal tax credit program, California can increase the overall production of new affordable homes."

2) *Effect of Bond Caps.* The 9% credit is first allocated to each state according to its population. In 2021, states were projected to receive LIHTC allocation authority equal to $2.8125 per person, with a minimum small population state allocation of $3,245,625.13. These allocation limits, however, do not apply to 4% credits. The 4% credit is unlimited so long as the project is at least 50% financed with tax-exempt bonds. Therefore, the limiting factor for the 4% credit comes from the overall bond volume cap. As of 2020, California's bond volume cap was $4.1 billion.

3) *$500 million to increase affordable housing production*. On July 31, 2019, AB 101 (Budget Committee, Chapter 159), was signed into law, providing an additional $500 million in state LIHTCs. When the additional $500 million was

first made available, the federal tax-exempt bond ceiling of approximately $4 billion had not yet been reached. In 2014, for example, developers only used $80.5 million in annual federal 4% tax credits, significantly less than prior years. This is because, unlike in prior years, there was little supplemental funding from housing bonds or local funding sources to fill the remaining financing gap. The loss of redevelopment funding and state housing bond funds, which were used in combination with 4% federal credits to achieve higher affordability, had made the 4% federal credits less effective.

The additional $500 million was coupled with tax-exempt bonds and the 4% credit, in part, to encourage developers to fully utilize any remaining federal tax-exempt bonds that were being left on the table. After the $500 million was made available, due to significant state and local housing construction funding, 4% credit applications increased significantly and the bonds became oversubscribed. As a result, CDLAC instituted a competitive process for awarding tax-exempt bonds. The Legislature approved another one time $500 million allocation in the 2021-22 Budget, and the Governor's 2022-23 January budget proposes a third one-time $500 million infusion in the program.

4) *Benefits of $500 million diminish once bond cap is reached*. As noted earlier, the limitation on the 4% credit comes from the bond volume cap, not the credit. Once the cap is met, the number of additional projects (and to a certain degree units) that can be approved under the 4% credit substantially tapers off. Therefore, continuing to provide $500 million in state credits to 4% credit projects under these conditions will not lead to an increase in the number of total units being built. To truly increase the number of projects approved under the 4% credit, modifications would have to be made to the tax-exempt bond requirements, and California does not have the authority to make those changes.

   Projects under the 9% credit, on the other hand, are not limited by the availability of bonds. Projects under the 9% credit are only limited by the availability of credits. All things being equal, if the state provides more LIHTCs under the 9% credit, more units will be built. Therefore, transferring some or all of the $500 million LIHTCs from the 4% credit to the 9% credit when the bond cap has been met, as this bill allows, may actually lead to more housing units being built for the same amount of money.

5) *More transparency*. Current law authorizes CDLAC to adopt regulations pursuant to the APA. With the increased competition for bonds, the committee has embarked on several changes to its regulations in recent years. This bill proposes to remove the requirement for these regulation changes to go through

the APA process, thus reducing the overall length of time to make regulatory changes. However, to strike a balance and ensure more transparency and opportunity for stakeholder engagement, this bill specified timelines for notice, hearings, and comments to any future regulation changes, which shall remain operative until January 1, 2028, at which time the prior process shall revert.

6) *Construction dates*. TCAC projects that receive a bond award are required to commence construction within 180 days of receipt of their award. The intent to award projects that are "shovel ready." In the advent of COVID-19 and changing market conditions – much of which is outside of the control of the applicants – many projects have been unable to achieve this requirement. This bill proposes to authorize TCAC to require projects to commence construction, instead, within a reasonable time, as determined by TCAC.

7) *Certificated credits*. TCAC awards credits to qualified developers. Generally, developers do not have sufficient tax liability to use the credits themselves so they sell those credits to private investors who use the credits to reduce their federal or state tax liability. The developer in turn invests the capital into the affordable housing project.

   In 2016, the Legislature created an alternative investment structure, which sought to increase the value of the state credit, called "certificated credits." Under this model, developers can sell the credits to an investor without requiring the investor to be part of the ownership entity for the project, typically a limited liability partnership, which have increased the value of the credit. In recent years, around half of the projects receiving state credits chose to "certificate" their credits.

   In order to claim the "certificated credits," the Franchise Tax Board requires specified tax forms to be completed by the investor. According to the sponsor, however, it can take time for CDLAC to provide the appropriate forms to the investor, sometimes years. This bill allows investors who buy the credits to begin claiming them in the year that the development is occupied, increasing the price investors will pay for the credits. According to the sponsor, this will reduce the amount of credits each development needs. This provision is consistent with rules governing federal tax credits.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- CTCAC indicates that it would incur annual costs of $342,000 for 2.0 PY of staff to handle an increased volume of credit applications and workload. Staff notes that CTCAC's state operations are funded by fees charged to applicants. (Tax Credit Allocation Fee Account)
- Unknown General Fund cost pressures, to the extent the flexibility provided in this bill increases demand for the additional LIHTC funding provided in the annual Budget Act each year. Staff notes that the LIHTC program is oversubscribed.

SUBJECT: Crimes: theft: animals

SOURCE: Author

DIGEST: This bill amends existing statutes related to the theft of a dog and instead applies them to the theft of a companion animal, as defined.

Senate Floor Amendments of 8/25/22 strike the prior version of this bill and instead amend existing statutes related to the theft of a dog and instead apply them to the theft of a companion animal, as defined.

ANALYSIS:

Existing law:

1) States that every person who steals, takes, carries, leads, or drives away the personal property of another, or who fraudulently appropriates property which

has been entrusted to them, or who knowingly and designedly, by any false or fraudulent representation or pretense, defrauds any other person of money, labor or real or personal property, is guilty of theft. (Pen. Code §484, subd. (a).)

2) Divides theft into two degrees, petty theft and grand theft. (Pen. Code §486.)

3) Defines grand theft as when the money, labor, or real or personal property taken is of a value exceeding $950 dollars, except as specified; other cases of theft are petty theft. (Pen. Code §§487-488.)

4) Punishes grand theft as an alternate felony-misdemeanor ("wobbler"). (Pen. Code §487.)

5) Punishes petty theft as a misdemeanor. (Pen. Code §490.)

6) Provides that in determining the value of the property obtained, for the purposes of theft, the reasonable and fair market value shall be the test, and in determining the value of services received the contract price shall be the test. If there is no contract price, the reasonable and going wage for the service rendered shall govern. (Pen. Code §484, subd. (a).)

7) States that every person who feloniously steals, takes, or carries away a dog of another which is of a value not exceeding $950 is guilty of petty theft. (Pen. Code §487f.)

8) States that every person who feloniously steals, takes, or carries away a dog of another which is of a value exceeding $950 is guilty of grand theft. (Pen. Code §487e.)

9) States that dogs are personal property, and their value is to be ascertained in the same manner as the value of other property. (Pen. Code §491.)

10) Defines a "feral cat" as "a cat without owner identification of any kind whose usual and consistent temperament is extreme fear and resistance to contact with people. A feral cat is totally unsocialized to people." (Food & Ag. Code §31752.5.)

This bill:

1) Amends existing provisions related to the theft of a dog and instead applies them to the theft of a companion animal, as defined.

2) Defines "companion animal" to mean "an animal including, but not limited to, a dog or a cat, that a person keeps and provides care for as a household pet or otherwise for the purpose of companionship, emotional support, service, or protection."

3) Provides that a "companion animal" excludes feral cats, as defined in Food and Agriculture Code Section 31752.5.

Comments

According to the author:

> Theft is defined as stealing, taking, carrying, leading, or driving away the personal property of another, or fraudulently appropriating property which has been entrusted to the individual, or who knowingly and designedly, by any false or fraudulent representation or pretense, defrauding any other person of money, labor or real or personal property. (Pen. Code §484.) When the same act involves taking money, labor, real or personal property where the value of the time taken exceeds $950, the crime is punishable as grand theft which may be charged as an alternate felony-misdemeanor. (Pen. Code §487.) All other theft which does not exceed $950 in value is petty theft. (Pen. Code §488.)
>
> Existing statutes also specify various different items where the value of the items taken exceeds $950 is grand theft (see Pen. Code §§487h, 487j and 487k: cargo, copper materials, agricultural equipment) or where the value does not exceed $950 yet the act is statutorily deemed grand theft (see Pen. Code §§487, subd. (d), 487a, 487d: theft of a firearm, automobile, livestock or gold dust) and where a lower value will still count as grand theft (see Pen. Code §487, subd. (b) domestic fowls, avocados, olives, citrus or deciduous fruits, other fruits, vegetables, nuts, artichokes, or other farm crops, or fish, shellfish, mollusks, crustaceans, kelp, algae, or other aqua cultural products are taken from a commercial or research operation.) Existing law contains specific statutes on dog stealing and states that when the value of the dog does not exceed $950, the act is petty theft and if the value of the dog exceeds $950, the act is grand theft. (Pen. Code §§487e and 487f.) Existing law also declares that dogs are personal property and their value is to be ascertained in the same manner as the value of other property. (Pen. Code §491.)

. . . .

According to the author, this change is needed because currently the existing statute only declares dogs to be personal property. However, the lack of this declaration for other companion animals does not preclude the applicability of the general theft and grand theft statutes. It has acknowledged both by general society and by the courts that pets are the property of their owners. (*Kimes v. Grosser* (2011) 195 Cal. App. 4th 1556, 1559, *citing Dreyer v. Cyrian* (1931) 112 Cal. App. 279, 284 and *Ross v. Loeser* (1919) 41 Cal. App. 782, 784.)

SUBJECT: County of Riverside Citizens Redistricting Commission

SOURCE: Author

DIGEST: This bill establishes the County of Riverside Citizens Redistricting Commission (CRCRC) to be tasked with adjusting the boundary lines of the supervisorial districts of Riverside County, as specified.

ANALYSIS:

Existing law:

1) Requires the board of supervisors of each county, following each federal decennial census, to adopt boundaries for all of the supervisorial districts of the

county so that the supervisorial districts are substantially equal in population as required by the United States Constitution. Requires population equality to be based on the total population of residents of the county as determined by the most recent federal decennial census for which specified redistricting data are available, as specified.

2) Requires the board of supervisors to adopt supervisorial district boundaries using a specified criteria and process.

3) Authorizes a county, general law city, school district, community college district, or special district to establish an independent redistricting commission, an advisory redistricting commission, or a hybrid redistricting commission by resolution, ordinance, or charter amendment, subject to certain conditions and as specified.

4) Establishes a procedure for a government of a county to adopt a charter by a majority vote of its electors voting on the question. Generally provides greater autonomy over county affairs to counties that have adopted charters. Provides that counties that have adopted charters are subject to statutes that relate to apportioning population of governing body districts.

5) Establishes a Citizens Redistricting Commission in Los Angeles County and an Independent Redistricting Commission in San Diego County, and charges the commissions with adjusting districts of supervisorial districts after each decennial federal census, as specified.

This bill:

1) Provides for the creation of the CRCRC, and tasks the CRCRC with adjusting the boundary lines of Riverside County's supervisorial districts in the year following the year in which the decennial federal census is taken. Requires the CRCRC to be created no later than December 31, 2030, and in each year ending in the number zero thereafter.

2) Requires the CRCRC to consist of 14 members who meet specified requirements. Requires at least one CRCRC member to reside in each of the five existing county supervisorial districts. Requires the political party preferences of the CRCRC members to be as proportional as possible to the total number of voters who are registered with each political party in Riverside County, or who decline to state or do not indicate a party preference, as

determined by registration at the most recent statewide election, as specified.

3) Establishes a process for interested individuals to submit an application to become a CRCRC member, as specified. Creates a process for the county elections official to narrow the application pool, as specified.

4) Requires, at a regularly scheduled meeting of the board of supervisors, the Auditor-Controller of Riverside County to conduct a random drawing to select one commissioner from each of the five subpools established by the county elections official, and to then conduct a random drawing from all of the remaining applicants to select three additional commissioners.

5) Requires the eight selected commissioners to review the remaining names in the subpools of applicants and to appoint six additional applicants to the CRCRC, as specified.

6) Provides the term of office of each member of the CRCRC expires upon the appointment of the first member of the succeeding commission.

7) Requires the board of supervisors to provide for reasonable funding and staffing for the CRCRC. Requires each CRCRC member to be a designated employee for purposes of the conflict of interest code adopted by Riverside County, as specified.

8) Provides that nine members of the CRCRC constitute a quorum and that nine or more affirmative votes are required for any official action.

9) Prohibits the CRCRC from retaining a consultant who would not be qualified as a CRCRC applicant due to any of the disqualifying criteria, as specified.

10) Requires the CRCRC to establish single-member supervisorial districts for the board of supervisors pursuant to a mapping process using a specified criteria and requirements. Requires the CRCRC to adopt a redistricting plan adjusting the boundaries of the supervisorial districts and to file the plan with the county elections official by the map adoption deadline set forth in existing law for county supervisorial maps, as specified. Requires the CRCRC to issue, with the final map, a report that explains the basis on which the CRCRC made its decisions in achieving compliance with the specified criteria and requirements provided by this bill.

11) Requires the CRCRC, prior to drawing a draft map, to conduct at least seven public hearings, to take place over a period of no fewer than 30 days, with at least one public hearing held in each supervisorial district, as specified.

12) Requires the CRCRC, after drawing the draft maps, to post the map for public comment on Riverside County's website and conduct at least two public hearings to take place over a period of no fewer than 30 days.

13) Requires the CRCRC to establish and make available to the public a calendar of all public hearings, requires the hearings to be scheduled at various times and days of the week to accommodate a variety of work schedules to reach as large an audience as possible, and requires the CRCRC to arrange for the live translation of a hearing if requested, as specified. Requires the CRCRC to post the agenda for the public hearings at least seven days before the hearings. Requires the agenda for a meeting conducted after the CRCRC has drawn a draft map to include a copy of that map.

14) Requires the CRCRC to take steps to encourage county residents to participate in the redistricting public review process, as specified.

15) Requires the board of supervisors to take steps necessary to ensure that a complete and accurate computerized database is available for redistricting, and that procedures provide the public with access to redistricting data and software equivalent to what is available to the CRCRC members, as specified.

16) Requires all records of the CRCRC relating to redistricting, and all data considered by the CRCRC in drawing a draft map or the final map, to be public records.

17) Provides for various prohibitions for CRCRC members beginning from the date of appointment to the CRCRC, as specified.

18) Makes findings and declarations that a special law is necessary because of the unique circumstances facing Riverside County.

Background

Riverside County Redistricting. Riverside County, at roughly 2.4 million residents, is the 10th most populous county in the nation and the fourth most populous county in California. Its redistricting process, like most California counties,

remains in the hands of the county's board of supervisors. While the county's planning commission acts as an advisory redistricting commission for the county, the board retains authority over approving district maps.

According to multiple news reports, the county's most recent redistricting effort was fraught with controversies. A committee of senior county officials initially drew four maps that immediately faced backlash, primarily from community members and legislators representing the county who alleged the maps were "drawn with a clear intent to protect certain incumbent supervisors and dilute the influence of Latino voters." Latinos make up 49.7% of Riverside County's residents and the county's Hispanic or Latino population grew at a faster rate than the overall population over the past decade, up 20.8% from the 2010 U.S. Census. However, the county board of supervisors' first-ever Latino member, appointed in 2017, remains its only Latino supervisor.

The American Civil Liberties Union and the Mexican American Legal Defense and Education Fund (MALDEF) also took issue with the maps, claiming they violated the law and failed to include citizen voting age population data. A number of other concerns were raised throughout the process, including: representation for other groups such as African American voters and the Morongo Band of Mission Indians; a desire to keep certain cities or other geographic areas intact; an apparent lack of transparency; and, a seemingly rushed process. County officials argued that delays in obtaining census data created a much tighter timeline for drawing new districts than in prior redistricting efforts, a conundrum for all redistricting efforts statewide.

Multiple organizations and individuals advocated for maps with at least two Latino-majority supervisorial districts. In addition, a report released by the UCLA Voting Rights Project found the county could be at risk of legal action if the board failed to create two such districts. After reviewing multiple maps, some of which were proposed by community groups, the board narrowed their options to three maps – one of which included two Latino-majority supervisorial districts and two of which did not. The board ultimately selected a map that contains only one Latino-majority district, refueling concerns that the county could be at risk of legal challenge. A similar scenario played out in Kern County, which ultimately reached a court agreement with MALDEF in 2018 to redraw its 2011 maps to create a second Latino-majority district.

Comments

According to the author, AB 1307 would help provide fairer boundaries for Riverside County's supervisorial districts by creating an independent citizens redistricting commission for the County. This bill advances the ongoing movement away from allowing California's elected officials to draw their own district boundaries, and instead entrust impartial, independent citizens redistricting commissions to do so.

The need for this bill has also been illustrated by the comportment of the Riverside County Board of Supervisors in redrawing their own districts after the 2020 Census. The map adopted by a majority of the Board of Supervisors in December 2021 appears to violate state and federal law. This failure of a majority of the Board of Supervisors to protect the voting rights of the Latinx community illustrates why an independent citizens redistricting commission is needed to draw fair maps for Riverside County.

Related/Prior Legislation

AB 2030 (Arambula, 2022) creates a Citizens Redistricting Commission in Fresno County, as specified.

AB 2494 (Salas, 2022) creates a Citizens Redistricting Commission in Kern County, as specified.

SB 158 (Allen, Chapter 107, Statutes of 2020) clarified that voters who are registered with no party preference are eligible to serve on the Los Angeles County Citizens Redistricting Commission.

SB 139 (Allen, 2019) would have required a county with a population of 400,000 or more to establish an independent redistricting commission to adopt the county supervisorial districts after each federal decennial census. SB 139 was vetoed by the Governor with the following message:

> This bill requires a county with more than 400,000 residents to establish an independent redistricting commission tasked with adopting the county's supervisorial districts following each federal decennial census.
>
> While I agree these commissions can be an important tool in preventing gerrymandering, local jurisdictions are already authorized to establish

independent, advisory or hybrid redistricting commissions. Moreover, this measure constitutes a clear mandate for which the state may be required to reimburse counties pursuant to the California Constitution and should therefore be considered in the annual budget process.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- This bill would not have a fiscal impact to the SOS.

- By requiring Riverside County to create and operate a redistricting commission as specified, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on Riverside County, the County could claim reimbursement of those costs (General Fund). The magnitude of these costs is unknown, but minimally in the hundreds of thousands on a decennial basis.

- The 2022-23 enacted budget (SB 154, Skinner) includes, upon enactment of this bill, $1 million to CRCRC for the redistricting to take place in 2030.

SUBJECT: California Global Warming Solutions Act of 2006: aviation greenhouse gas emissions reduction plan

SOURCE: Sustainable Aviation Fuel Coalition

DIGEST: This bill requires the California Air Resources Board (ARB) to, on or before July 1, 2024, develop a plan to reduce aviation greenhouse gas (GHG) emissions in consultation with specified agencies and stakeholders. It stipulates ARB shall include sustainable aviation fuel (SAF) and other technologies (as feasible), directs ARB to evaluate and increase the incentives that exist for the production of SAF, and includes numerous other elements in the plan, which is to be implemented by December 31, 2025.

Senate Floor Amendments of 8/25/22 change the target of the bill from a 1.5 billion gallon SAF goal to instead be for 20% "sustainable fuel" to align with the Governor's stated goals, make implementation of the plan contingent upon an appropriation, and make other conforming changes.

ANALYSIS:

Existing law:

1) Establishes the Air Resources Board (ARB) as the air pollution control agency in California and requires ARB, among other things, to control emissions from a wide array of mobile sources and coordinate, encourage, and review the efforts of all levels of government as they affect air quality. (Health and Safety Code (HSC) §39500 et seq.)

2) Requires ARB to ensure that statewide GHG emissions are reduced to at least 40% below the 1990 level by December 31, 2030 (i.e., SB 32); and allows ARB, until December 31, 2030, to adopt regulations that utilize market-based compliance mechanisms (i.e., the cap-and-trade program) to reduce GHG emissions. (HSC §§ 38566, 38562)

3) Establishes the Greenhouse Gas Reduction Fund (GGRF) in the State Treasury, requires all moneys, except for fines and penalties, collected pursuant to a market-based mechanism be deposited in the fund. (Government Code §16428.8)

This bill:

1) Requires ARB to, on or before July 1, 2024, develop a plan (Plan) to reduce aviation GHG emissions and help the state reach its goal of net-zero GHG emissions by 2045, including a sustainable fuels target for the aviation sector of at least 20 percent by 2030.

2) Requires ARB to, contingent upon an appropriated by the Legislature, on or before July 1, 2024, implement the Plan.

3) Stipulates that, in preparing the Plan, ARB shall:
   a) Include strategies to reduce GHG emissions through the increased production and use of sustainable fuels, including but not limited to SAF and, to the extent feasible, other alternatives such as electric- and hydrogen-powered propulsion;
   b) Consult with the Natural Resources Agency, Department of Forestry and Fire Prevention, California Environmental Protection Agency, State Energy Resources Conservation and Development Commission, and the Governor's Office of Business and Economic Development;

c) Consult with state commercial airports, airlines, aircraft manufacturers, SAF producers, and infrastructure providers;
d) Evaluate, model, and create incentives to increase SAF production and import in the state;
e) Identify and prioritize incentives for SAF that achieve the most cost effective GHG emission reductions;
f) Closely examine the shortfall that exists in the state GHG emissions policy framework with respect to incentives for SAF and the decarbonization of the aviation sector, and seek to address that shortfall through new incentives;
g) Maximize reductions in wildfire risk by prioritizing and expediting review of SAF from certain feedstocks under the Low Carbon Fuel Standard (LCFS), and specifies considerations;
h) Evaluate the incentive amounts that would be required to encourage aircraft to voluntarily use cleaner fuels;
i) Evaluate the direct benefits and cobenefits of SAF, as specified; and
j) Identify the following:
    i) Barriers and possible solutions to achieving the aviation GHG emission reduction goals stated above;
    ii) Milestones towards achieving those goals;
    iii) Actions that can be taken by the state to ensure that the state's policy incentives for SAF are comparable to those provided to renewable diesel and other on-road fuels to ensure that SAF production capacity is sufficiently expanded; and
    iv) Tools for increasing the state's SAF supply and demand.

Background

1) *California's aviation emissions*. Aircraft jet engines emit a mixture of CO2, water vapor, oxides of nitrogen (NOx), particulate matter (PM), carbon monoxide, and other pollutants. Of these, 90% of the emissions from a flight occur at altitudes above 3,000', with only 10% being released during taxiing, takeoff, and landing. According to the U.S. Energy Information Administration, California's total 2020 jet fuel consumption was 59,442,000 barrels, or roughly 2.5 billion gallons.

   According to ARB's GHG emission inventory, intrastate (that is, the origin and destination are both within California) flights account for roughly 1.1% of statewide covered GHG emissions. Given the small contribution to overall state GHG emissions, aviation was not mentioned in the 2017 scoping plan update.

2) *Sustainable aviation fuel (SAF)*. SAF is a "drop in" replacement for conventional jet fuels; it is blended with conventional jet fuel and handled with the same conventional jet fuel infrastructure. It can be produced from renewable, carbon-rich materials such as biomass, municipal solid waste (MSW), oils, fats, sugars, or alcohols. Given the technology is still relatively immature and being developed, SAF is currently much more expensive than conventional jet fuel (roughly five times more), a fact that remains even after factoring in state and federal policy credits. However, on a life cycle basis it has roughly 80% lower associated emissions than conventional fuel. The majority of California's current and expected SAF supply comes from four facilities: World Energy in Paramount, CA (using mainly cooking oil as a feedstock), Neste in Singapore, Fulcrum Energy in Nevada (using mostly MSW and select organic waste), and Red Rock Energy in Oregon (using woody biomass).

   According to a 2019 SAF feasibility study conducted for San Francisco International Airport (SFO) World Energy (stated to be the only commercial-scale SAF producer at the time) produced 10 million gallons of SAF annually (though it is unlikely this was all used in flights). For comparison, according to the federal Energy Information Administration, California (the country's largest consumer of jet fuel) consumed 106,201 thousand barrels of jet fuel in 2019, or 4.46 billion gallons. In other words, California made, at most, roughly 0.2% as much SAF as it consumed in jet fuel.

3) *Low Carbon Fuel Standard*. ARB adopted the LCFS regulation in 2009 and began implementing it in 2010. The primary purpose of LCFS is to reduce GHG emissions by reducing the carbon intensity (CI) of fuels used in California and to diversify the fuel mix to enable long-term decarbonization of the transportation sector.

   Sustainable aviation fuel has an approved pathway under LCFS, despite the fact that aviation fuels do not generate deficits under the LCFS like gasoline and diesel do. In 2020, the SAF LCFS pathway generated 0.2% of all LCFS credits for that year.

4) *Other technologies.* While SAF is the most mature technology for decarbonizing aviation, it is neither carbon-free nor the only option. Battery-electric planes struggle with the power-to-weight ratio of batteries, though a number of startups and researchers are developing the technology. Hydrogen, when compressed and stored as a liquid, can be much more energy dense than batteries, while both technologies are zero-emission in the aircraft. Many

barriers remain today, but hydrogen-powered aircraft could play a major role in a fully-decarbonized aviation industry in the future.

One other option to reduce the use of fossil fuels in aviation is synthetic fuel. Synthetic jet fuel is made directly from hydrogen and carbon—potentially even carbon captured from the atmosphere. This synthetic fuel is considerably too expensive to be viable today, but research is underway.

5) *Aviation in the 2022 scoping plan update*. In the latest public draft of the 2022 scoping plan update, released May 10, 2022, the proposed scenario does model aviation. Specifically, it predicts 10% of aviation fuel demand being met by electricity or hydrogen in 2045, and states that, "SAF meets most of the rest of the aviation fuel demand that has not already transitioned to hydrogen or batteries."

   Delving into the sectoral modeling in Appendix H of the scoping plan update, it appears that conclusion derives from an assumption that the state will transition to 100% SAF by 2040, and all of the state's available fat, oil, and grease feedstocks will be used first for SAF, with the remainder going to renewable diesel. This assumption does not appear to be further explained or justified, and achieving it would represent a massive, unprecedented increase in SAF production. For comparison, by 2040 in the European Union's aggressive proposal for increasing SAF, airplane fuel will need to be a blend with 32% SAF in 2040. The draft scoping plan SAF assumptions have not, to staff's knowledge, been publically discussed or contemplated by this committee.

Comments

1) *Purpose of Bill.* According to the author, "Global greenhouse gas emissions (GHG) are already driving catastrophic climate change. In 2015, commercial aviation in California accounted for an estimated 36 million metric tons of carbon dioxide. Sustainable Aviation Fuel is a cleaner alternative to traditional jet fuel and is the most significant pathway for commercial aviation to reduce emissions. While California leads in sustainable aviation fuel deployment in the US, using approximately 99% of the nation's sustainable aviation fuel supply in 2020, this supply represents less than 0.0025% of the state's jet fuel use. To prevent and combat the most harmful impacts of climate change, we must leverage all possible options to minimize GHG emissions.

   "The use and further production of sustainable aviation fuel can reduce lifecycle carbon by 80% compared to traditional petroleum-based jet fuel. AB

1322 will require the Air Resources Board to develop and implement a plan to identify incentive-based best practices that promote the use of SAF to help meet the state's goal of net-zero greenhouse gas emissions by 2045. AB 1322 takes bold, necessary steps to ensure that our aviation industry can join the fight against the devastating impacts of climate change and help California achieve our ambitious GHG reduction goals on time."

2) *Scrapping for scraps.* Typically, the most cost-effective, sustainable feedstock to use for SAF (or other biofuel) production is some sort of waste. At the volume of biofuel required to completely replace existing fossil fuels (be they diesel with biodiesel, natural gas with renewable natural gas, or jet fuel with SAF), there will simply not be enough waste to go around. Moreover, as demand for biofuels and supply of waste feedstocks reach the point that it becomes more economical to use purpose-grown crops (such as palm for palm oil), the issue of land-use changes becomes hugely important.

   Thus, charting the path for future biofuel use in California is not a question of backing any and all promising candidates, but rather one of allocating a limited resource for the greatest public benefit. Specifically, the question at hand with SAF and this bill seems to be: what use of biofuel feedstocks best advances the state's goals?

   To be clear, this is not to say that California should not produce SAF, nor that the state can only invest in one biofuel technology. But in deliberating on this bill specifically—and on the future of waste-derived biofuels in general—the Legislature should bear in mind the complex interplay of fuels and feedstocks, and prioritize support accordingly.

FISCAL EFFECT: Appropriation: No Fiscal Com.:Yes Local:No

According to the Senate Appropriations Committee:

- Unknown one-time costs, likely in the millions of dollars (Cost of Implementation Account), for ARB to develop the plan and implement it through the Low Carbon Fuel Standard and other mechanisms.

- Unknown but potentially significant cost pressure (various funds) to provide additional funding for any programs, incentives, or mechanisms identified in the plan to reduce aviation GHGs.

OPPOSITION: (Verified 8/26/22)

Biofuelwatch

ARGUMENTS IN SUPPORT: According to World Energy, "Passage of AB 1322 would represent the first time the Legislature has issued policy on incentivizing the reduction of GHG emissions and other climate forcing impacts from the aviation sector…

"AB 1322 also presents California with the opportunity to solidify its position as the global leader in SAF production and use. While some SAF is currently produced at our Paramount plant, new SAF production facilities have recently been developed and commercialized in the adjacent states of Oregon and Nevada. This is a missed opportunity for California. However, if proper incentives are deployed, as are expected to result from AB 1322, the nascent SAF industry in California will gain its footing and evolve into a healthy green industry creating new high-quality jobs for local communities.

"Finally, AB 1322 can enable our state to "build back better" from both the compounding impacts of COVID and wildfires while boosting aviation's progress towards cleaner flight."

ARGUMENTS IN OPPOSITION: According to Biofuelwatch, the bill has the following issues, among other: "Inequitable and Unjust: … This bill does nothing to address the inequities associated with the climate damage from aviation. What is more, the climate benefit claims of the bill are dubious, as there is substantial evidence that 'sustainable aviation fuel' can result in even more greenhouse gas emissions than just burning fossil fuel.

"A History of Failed Projects and Wasted Public Money: The promotion of making liquid aviation fuels from woody biomass, one of the signature bioenergy concepts promoted in this bill, has a long sordid history of broken promises and failed projects. As a prime example, one of the listed supporters of AB 1322, Red Rock Biofuels, has received hundreds of millions of dollars of public money to build a plant in Lakeview, Oregon, to make liquid aviation biofuels from woody biomass. However, that plant has never been finished, the company is traversing irregular financial circumstances, and the company has failed completely to fulfill claims it has made to agencies like the California Air Resources Board that the company

would already be bringing millions of gallons of fuel to market."

SUBJECT: Clinical laboratory technology and pharmacists

SOURCE: California Society of Health-System Pharmacists

DIGEST: This bill (1) authorizes a pharmacist to perform all clinical laboratory tests that are classified as waived under the federal Clinical Laboratory Improvement Amendments of 1988 (CLIA) that can lawfully be used within the pharmacist's practice and updates settings in which a pharmacists can perform waived tests; (2) authorizes a pharmacist to order and interpret tests for the purpose of promoting patient health, rather than just for monitoring and managing the efficacy of drug therapies as current law specifies; (3) authorizes the pharmacist-in-charge (PIC) of a pharmacy to be the laboratory director of a laboratory certified to perform all CLIA-waived tests; and (4) prohibits a licensed pharmacist from performing venipuncture unless the pharmacist is either a certified phlebotomist or oversees certified phlebotomists, as specified.

ANALYSIS:

Existing federal law:

1) Establishes CLIA under federal law, which regulates clinical laboratories that perform tests on human specimens and sets standards for facility administration, personnel qualifications and quality control. These standards apply to all settings, including commercial, hospital or physician office laboratories. (Code of Federal Regulations (CFR) Title 42 § 493)

2) Defines CLIA waived tests as simple laboratory examinations and procedures that are approved by the Food and Drug Administration (FDA) for home use, employ methodologies that are simple and accurate as to render the likelihood of erroneous results negligible or pose no reasonable risk of harm to the patient if the test is performed incorrectly. (CFR Title 42 § 493)

Existing state law:

1) Regulates and licenses the practice of pharmacy under the Pharmacy Law and establishes the California State Board of Pharmacy to administer and enforce the Pharmacy Law. (Business and Professions Code (BPC) §§ 4000-4427.8)

2) Authorizes the following, among other things, as part of the scope of practice of a licensed pharmacist:

   a) Performing procedures or functions as part of the care provided by a health care facility, a licensed home health agency, a licensed clinic in which there is a physician oversight, a provider who contracts with a licensed health care service plan with regard to the care or services provided to the enrollees of that health care service plan, or a physician. (BPC § 4052(a)(5))

   b) Providing consultation, training, and education to patients about drug therapy, disease management, and disease prevention. (BPC § 4052(a)(8))

   c) Ordering and interpreting tests for the purpose of monitoring and managing the efficacy and toxicity of drug therapies, to be done in coordination with the patient's primary care provider or diagnosing prescriber, including promptly transmitting written notification to the patient's diagnosing prescriber or entering the appropriate information in a patient record system shared with the prescriber, when available and as permitted by that prescriber. (BPC § 4052(a)(12))

3) Authorizes a pharmacist to perform the following procedures or functions in a licensed health care facility in accordance with policies, procedures, or protocols developed by health professionals, including physicians, pharmacists, and registered nurses, with the concurrence of the facility administrator:

   a) Ordering or performing routine drug therapy-related patient assessment procedures including temperature, pulse, and respiration. (BPC § 4052.1(a)(1))

   b) Ordering drug therapy-related laboratory tests. (BPC § 4052.1(a)(2))

   c) Administering drugs and biologicals by injection pursuant to a prescriber's order. (BPC § 4052.1(a)(3))

   d) Initiating or adjusting the drug regimen of a patient pursuant to an order or authorization made by the patient's prescriber and in accordance with the policies, procedures, or protocols of the licensed health care facility. (BPC § 4052.1(a)(4))

   e) Receiving appropriate training as required by the policies and procedures of the licensed health care facility. (BPC § 4052.1(b))

4) Authorizes a pharmacist to perform the following procedures or functions as part of the care provided by a health care facility, a licensed home health agency, licensed correctional clinic, a licensed clinic in which there is physician oversight, a provider who contracts with a licensed health care service plan with regard to the care or services provided to the enrollees of that health care service plan, or a physician, in accordance with the policies, procedures, or protocols of that facility, home health agency, licensed correctional clinic, licensed clinic, health care service plan, or physician:

   a) Ordering or performing routine drug therapy-related patient assessment procedures including temperature, pulse, and respiration. (BPC § 4052.2(a)(1))

   b) Ordering drug therapy-related laboratory tests. (BPC § 4052.2(a)(2))

   c) Administering drugs and biologicals by injection pursuant to a prescriber's order. (BPC § 4052.2(a)(1))

5) Provides for the regulation, registration, and licensure of clinical laboratory technology, including laboratory facilities and clinical laboratory personnel, by the California Department of Public Health (CDPH). (BPC § 1200-1327)

6) Defines "CLIA" as the federal Clinical Laboratory Improvement Amendments of 1988 (United States Code, title 42, § 263a; Public Law 100-578) and the regulations adopted by the federal Health Care Financing Administration (HFCA) that are effective on January 1, 1994, or later when adopted by the CDPH after being deemed equivalent to or more stringent than California laws or regulations, as specified. (BPC § 1202.5(a); BPC § 1208(b))

7) Defines "clinical laboratory test or examination" as the detection, identification, measurement, evaluation, correlation, monitoring, and reporting of any particular analyte, entity, or substance within a biological specimen for the purpose of obtaining scientific data which may be used as an aid to ascertain the presence, progress, and source of a disease or physiological condition in a human being, or used as an aid in the prevention, prognosis, monitoring, or treatment of a physiological or pathological condition in a human being, or for the performance of nondiagnostic tests for assessing the health of an individual. (BPC § 1206(a)(5))

8) Defines "clinical laboratory" as any place used or any establishment or institution organized or operated for the performance of clinical laboratory tests or examinations or the practical application of the clinical laboratory sciences. (BPC § 1206(a)(8))

9) Requires every clinical laboratory to operate under the overall operation and administration of a laboratory director. (BPC § 1206.5(a), 1206.5(b), 1206.5(c))

10) Establishes the definition, duties, and qualifications of a "laboratory director" for purposes of clinical laboratories and testing. (BPC § 1209)

11) Defines "laboratory director" as any person who is any of the following:

    a) A duly licensed physician and surgeon. (BPC § 1209(a)(1))

    b) Only for purposes of a clinical laboratory test or examination classified as waived:

        i) A licensed clinical laboratory scientist. (BPC § 1209(a)(2)(A))

        ii) A licensed limited clinical laboratory scientist. (BPC § 1209(a)(2)(B))\

        iii) A licensed naturopathic doctor. (BPC § 1209(a)(2)(C))

iv) A licensed optometrist serving as the director of a laboratory that only performs clinical laboratory test classified as waived under CLIA that include the ordering of smears, cultures, sensitivities, complete blood count, mycobacterial culture, acid fast stain, urinalysis, tear fluid analysis, and X-rays necessary for the diagnosis of conditions or diseases of the eye or adnexa. (BPC § 1209(a)(2)(D))

c) Otherwise licensed to direct a clinical laboratory under the chapter on clinical laboratory technology. (BPC § 1209(a)(3))

d) The pharmacist-in-charge of a pharmacy that applies for a registration with the CDPH as a community pharmacy that only performs blood glucose, hemoglobin A1c, or cholesterol tests that are classified as waived under CLIA and are approved by the federal Food and Drug Administration for sale to the public without a prescription in the form of an over-the-counter test kit. (BPC §§ 1206.6, 1265(k))

12) Prohibits the performance of a clinical laboratory test or examination classified as waived under CLIA unless the clinical laboratory test or examination is performed under the overall operation and administration of the laboratory director, including, but not limited to, documentation by the laboratory director of the adequacy of the qualifications and competency of the personnel, and the test is performed by specified persons, including a pharmacist if ordering drug therapy-related laboratory tests or if performing skin puncture in the course of performing routine patient assessment procedures as specified under the Pharmacy Law. (BPC § 1206.5)

13) Excludes from the waived testing requirements a pharmacist at a community pharmacy who, upon customer request, performs only blood glucose, hemoglobin A1c, or cholesterol tests that are classified as waived under CLIA and are approved by the federal Food and Drug Administration for sale to the public without a prescription in the form of an over-the-counter test kit, provided that the pharmacy has a federal certificate of waiver, the laboratory director is the pharmacist-in-charge, the pharmacy registers with the CDPH, and the pharmacist performs tests in the course of performing routine patient assessment procedures that a patient could, with or without a prescription, perform on their own or clinical laboratory tests that are classified as waived under CLIA. (BPC § 1206.6)

This bill:

1) Authorizes a pharmacist to perform all clinical laboratory tests that are classified as waived under CLIA that can lawfully be used within the pharmacist's practice and updates settings in which a pharmacists can perform waived tests.

2) Authorizes a pharmacist to order and interpret tests for the purpose of promoting patient health, rather than just for monitoring and managing the efficacy of drug therapies as current law specifies.

3) Authorizes the pharmacist-in-charge (PIC) of a pharmacy to be the laboratory director of a laboratory certified to perform all CLIA-waived tests.

4) Prohibits a licensed pharmacist from performing venipuncture unless the pharmacist is either a certified phlebotomist or oversees certified phlebotomists, as specified.

Background

While CLIA establishes minimum federal standards, it allows states to enact more stringent state law requirements. At the federal level and in California, anyone may perform a waived test in a licensed laboratory or as part of a nondiagnostic health assessment program under the overall direction of a laboratory director, unless otherwise limited. In applying for a CLIA certificate of waiver, the laboratory director must list the types of analytes to be tested, the tests performed, and the test manufacturer.

Current law provides for the licensure, registration, and regulation of clinical laboratories and various clinical laboratory personnel by the State Department of Public Health. Current law also requires a CLIA-waived test to be performed under the overall operation and administration of a laboratory director, which is defined to include physicians and surgeons, or anyone licensed to direct a clinical laboratory, as specified. For the purposes of waived tests or examinations, the following professionals also can be laboratory directors: clinical laboratory scientist, limited clinical laboratory scientist, naturopathic doctor, or optometrist serving as the director of a laboratory that only performs certain tests defined in the Optometry Practice Act.

Depending on their setting, pharmacists’ scope of practice can diminish or expand. For example, pharmacists in any setting may administer the following tests and medications in any setting: toxicology, drug-therapy, and disease management and

protection; over the counter tests for blood glucose and hemoglobin levels; hormonal contraceptives; prescription medications that do not require a prescription for travel purposes; nicotine replacement products; HIV preexposure prophylaxis and postexposure prophylaxis; routine and the COVID-19 vaccination; skin puncture if the test is CLIA-waived and a person could perform the test at home themselves; certain dialysis drugs; and opioid antigen injections.

However, other tests, medications, and procedures require pharmacists to practice: in a health care facility; in a licensed home health agency; in a licensed correctional clinic; in a licensed clinic in which there is physician oversight; with a provider who contracts with a licensed health care service plan with regard to the care or services provided to the enrollees of that health care service plan; or with a physician, in accordance with the policies, procedures, or protocols of that facility, agency, clinic, service plan, or physician. Settings generally offer varying degrees of supervision by medical professionals depending on the setting. In these settings, pharmacists may: complete drug-therapy patient assessments (such as taking temperature, pulse, and respiration); order drug-therapy related laboratory tests; administer drugs and biologics by injection; initiate and adjust drug regime by patient provider.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, the Board of Pharmacy anticipates minor and absorbable costs associated with the expanded ability for pharmacists to perform CLIA-waived tests.

SUPPORT: (Verified 8/17/22)

California Society of Health-System Pharmacists (source)
California Association of Long Term Care Medicine
California Council for The Advancement of Pharmacy
California Retailers Association
Invitae
National Association of Chain Drug Stores
USC School of Pharmacy

OPPOSITION: (Verified 8/17/22)

American College of Cardiology, California Chapter
American College of Obstetricians and Gynecologists District IX
California Association for Medical Laboratory Technology
California Board of Pharmacy

California Medical Association
California Rheumatology Alliance
California Society of Pathologists
California Society of Plastic Surgeons

ARGUMENTS IN SUPPORT: Generally, supporters argue that pharmacies can serve as an additional point of contact for access to care within the healthcare delivery system for the public, especially given that the healthcare delivery system has been overtaxed by the pandemic and a rapidly aging population.

ARGUMENTS IN OPPOSITION: Generally, opposition argues that this bill, that grants broad authority order, administer, and interpret any CLIA-waived or FDA approved tests, with few exceptions, could put patient safety at risk.

The Board of Pharmacy notes that "last year several measures were enacted that updated Pharmacy Law, including important provisions to expand authority for pharmacists to perform patient care services beyond those offered in Assembly Bill 1328. Regrettably should AB 1328 be enacted; those important provisions will be eliminated negatively impacting patient care. The Board respectfully requests that AB 1328 be amended to incorporate the changes to Pharmacy Law enacted January 1, 2022, to preserve the changes sponsored by the Board which were subsequently approved by the Legislature and signed by the Governor, including for example authority for pharmacists to provide medication assistant treatment under a protocol and expansion of collaborative practice agreements provisions."

SUBJECT: Youth athletics: chronic traumatic encephalopathy

SOURCE: Author

DIGEST: This bill requires the California Surgeon General to convene a Commission on Chronic Traumatic Encephalopathy (CTE) and Youth Football to investigate issues related to the risks of brain injury associated with participation in youth football, and issue recommendations on the minimum age for tackle football and best practices for minimizing the risk of concussion and CTE.

Senate Floor Amendments of 8/22/22 extend the deadline for publishing such recommendations by one year to July 1, 2025, extend the repeal date to January 1, 2026, and allow the Commission to request information on youth sports injuries from youth tackle football leagues.

ANALYSIS:

Existing law:

1) Requires a youth sports organization that conducts a tackle football program to comply with the following requirements:

a) Prohibit a tackle football team from conducting more than two full-contact practices per week during the preseason and regular season;

b) Prohibit a tackle football team from holding a full-contact practice during the off-season; and,

c) Limit the full-contact portion of a practice to 30 minutes in any single day. [HSC §124241]

2) Requires a school district, charter school, or private school to comply with the following requirements if it offers a football program:

a) Prohibit a high school or middle school football team from conducting more than two full-contact practices per week during the preseason and regular season;

b) Prohibit a high school or middle school football team from holding a full-contact practice during the off-season; and

c) Limit the full-contact portion of a practice to 90 minutes in any single day. [EDC §35179.5]

3) Requires a youth sports organization, as defined, to comply with certain requirements related to athletes suspected of sustaining a concussion or head injury, including removal from the athletic activity and a prohibition on returning until he or she is evaluated by a licensed health care provider. Requires youth sports organizations to give a concussion and head injury information sheet to each athlete. [HSC §124235]

4) Requires a school district, charter school, or private school that offers an athletic program to comply with concussion and head injury requirements similar to those applying to youth sports organizations described in 3) above. [EDC §49475]

5) Requires each youth tackle football coach to annually receive a tackling and blocking certification from a nationally recognized program that emphasizes techniques designed to minimize the risk during contact by removing the involvement of youth tackle football participant's head from all tackling and blocking techniques. [HSC §124241]

6) Requires a youth sports organization to offer concussion and head injury education, or related educational materials, to each coach and administrator of the youth sports organization, and requires each coach and administrator to

successfully complete this education at least once, either online or in person, before supervising an athlete. [HSC §124235]

7) Requires each football helmet to be reconditioned and recertified every other year, unless stated otherwise by the manufacturer. Restricts the entities who can perform the reconditioning and recertification to only those entities licensed by the National Operating Committee on Standards for Athletic Equipment. Requires every reconditioned and recertified helmet to display a clearly recognizable mark or notice in the helmet indicating the month and year of the last certification. Requires safety equipment to be inspected before every full-contact practice or game to ensure that all youth tackle football participants are properly equipped. [HSC §124241]

8) Requires a minimum of one state-licensed EMT, paramedic, or higher-level licensed medical professional to be present during all preseason, regular season, and postseason games. Requires the EMT, paramedic, or higher-level licensed medical professional to have the authority to evaluate and remove any participant from the game who exhibits an injury, including, but not necessarily limited to, symptoms of a concussion or other head injury. [HSC §124241]

9) Requires at least one independent non-rostered individual, appointed by the youth sports organization, to be present at all practice locations. Requires the individual to hold current and active certification in first aid, CPR, AED, and concussion protocols. Requires the individual to have the authority to evaluate and remove any youth tackle football participant from practice who exhibits an injury, including, but not limited to, symptoms of concussion or other head injury. [HSC §124241]

10) Requires every youth tackle football participant removed from a game or practice to comply with provisions of law requiring a parent or guardian to be notified, and that require written clearance from a licensed health care provider to return to athletic activity. Requires the injury to be reported to the youth tackle football league. [HSC §124241]

11) Requires each youth tackle football participant to complete a minimum of ten hours of noncontact practice at the beginning of each season for the purpose of conditioning, acclimating to safety equipment, and progressing to the introduction of full-contact practice. Prohibits youth tackle participants from wearing any pads, and to only wear helmets if required to do so by the coaches, during this noncontact practice. [HSC §124241]

12) Requires a youth sports organization to annually provide a declaration to its youth tackle football league stating that it is in compliance with the California Youth Football Act provisions described above, and to either post the declaration on its website or provide the declaration to all youth tackle football participants within its youth sports organization. [HSC §124241]

13) Requires a youth tackle football league to establish youth tackle football participant divisions that are organized by relative age or weight or by both age and weight. [HSC §124241]

14) Requires a youth tackle football league to retain information, from which the names of individual are not identified, for the tracking of youth sports injuries. Requires this information to include the type of injury, the medical treatment received by the youth tackle football participant, and return to play protocols followed by the participant pursuant to this bill. [HSC §124241]

This bill:

1) Requires the California Surgeon General to convene a Commission on CTE and Youth Football to investigate issues related to the risks of brain injury associated with participation in youth football, and to provide recommendations to the Governor and Legislature on strategies to reduce this risk, including the minimum appropriate age for participation in youth tackle football.

2) Requires the Commission to be led by the California Surgeon General and consist of members selected by the Surgeon General, including, but not be limited to, members with expertise in public health, neuroscience, neurology, or other relevant fields.

3) Requires the Commission to review, investigate, and analyze issues relating to the risk of brain injury associated with participation in youth football, including:

    a) The risk of concussion, CTE, or other brain injury from participation in youth tackle football;

    b) The short and long-term health consequences of concussion, CTE, or other brain injury in youth; and,

    c) How the risks and health consequences described above vary with the age of the youth tackle football participant.

4) Allows the Commission to request youth sports injury information that youth tackle football leagues are required to retain by existing state law. Permits youth tackle football leagues to share this information voluntarily.

5) Requires the California Surgeon General to publish a report on their website with the findings of the Commission on or before July 1, 2024, including:

   a) The appropriate minimum age for participation in youth tackle football; and,

   b) Best practices for minimizing the risk of concussion, CTE, or other brain injury in youth football, including youth tackle football.

6) Sunsets on January 1, 2026.

7) Makes legislative findings that CTE is a degenerative brain disease that has been suspected to be linked to participation in contact sports such as boxing and football.

Comments

1) *Author's statement.* According to the author, there is endless documentation on the complications, like CTE, that can result from head injuries. This is particularly alarming for children whose brains are still developing. This bill aims to reduce youth exposure to brain injury by tasking the California Surgeon General to study ways in which youth football can be practiced safely and establish a minimum age to play tackle football. Children's brains are especially vulnerable and we must address this important public health issue.

2) *Research on CTE and youth football.* CTE is a neurodegenerative disease associated with exposure to contact and collision sports (CCS), including football, boxing, soccer, rugby, and ice hockey. Like most neurodegenerative diseases, CTE only can be definitively diagnosed by postmortem neuropathologic examination, thus it is difficult to do definitive studies on the relationship between head injuries and sports given limited sample sizes. In short, researchers must be able to examine the brain of a deceased athlete and know the sports history or injury history of that individual. Also, because only brains of the deceased can be adequately analyzed, it is hard to determine the impact of recent changes to make the sport safer.

   Of the studies that do exist, there is cause for concern. One study published in the Annals of Neurology in October 2019 found that there was a strong dose–response relationship for the number of years of football played with CTE

neuropathology, doubling odds of disease every 2.6 years and doubling odds of severe disease among those with CTE every 5.3 years.

However, a recent narrative review of studies published in September 2021 in Frontiers in Neurology found that although the literature on whether younger age of first exposure to tackle football is associated with later in life cognitive, neurobehavioral, or mental health problems in former National Football League (NFL) players is mixed, the largest study of retired NFL players suggested there was not a significant association between earlier age of first exposure to organized tackle football and worse subjectively experienced cognitive functioning, depression, or anxiety. Furthermore, no published studies of current athletes show a significant association between playing tackle football (or other CCS) before the age of 12 and cognitive, neurobehavioral, or mental health problems. All studies were judged to be at high overall risk of bias, indicating that more methodologically rigorous research is needed to understand whether there is an association between age of first exposure to CCS and later in life brain health. The accumulated research to date suggests that earlier age of first exposure to CCS is not associated with worse cognitive functioning or mental health in current high school athletes, current collegiate athletes, or middle-aged men who played high school football.

3) *AAP statement.* In November of 2015, the American Academy of Pediatrics (AAP) published a policy statement, Tackling in Youth Football. According to the AAP, there are approximately 250,000 youth football players age five to 15 years in Pop Warner leagues alone, and that the injuries sustained during football, especially to the head and neck, have been a topic of intense interest. According to AAP, the most commonly injured body parts in football at all ages are the knee, ankle, hand, and back. The head and neck sustain a relatively small proportion of overall injuries, ranging from 5% to 13%. Tackling is the most common player activity at the time of injury and severe injury. AAP points at that delaying the age at which tackling is introduced to the game would likely decrease the risk of injuries for the age levels at which tackling would be prohibited. Once tackling is introduced, however, AAP states that athletes who have no previous experience with tackling would be exposed to collisions for the first time at an age at which speeds are faster, collision forces are greater, and injury risk is higher. AAP states that removing tackling from football altogether would likely lead to a decrease in the incidence of overall injuries, but it recognizes removing tackling from football would also lead to a fundamental change in the way the game is played.

A more recent study published by AAP in November 2019 found that while football had the highest overall incidence of concussions of the sports reviewed, nine other sports had a higher incidence of recurrent concussions, including baseball, wrestling, cheerleading, girls and boys lacrosse, basketball and soccer. The study noted that rates of football practice-related concussions and recurrent concussions across all sports have decreased.

4) *California Surgeon General.* The position of California Surgeon General was created by Governor Newsom by executive order shortly after he took office in 2019 and codified by SB 78 (Committee on Budget and Fiscal Review, Chapter 38, Statutes of 2019). The law states the office is responsible for the following:

   a) Raising public awareness on and coordinating policies governing scientific screening and treatment for toxic stress and adverse childhood events (ACEs);

   b) Advising the Governor, the Secretary of the California Health and Human Services Agency, and policymakers on a comprehensive approach to address health issues and challenges, including toxic stress and ACEs, as effectively and early as possible; and,

   c) Marshalling the insights and energy of medical professionals, scientists, and other academic experts, public health experts, public servants and everyday Californians to solve our most pressing health challenges, including toxic stress and ACEs.

   The position's responsibilities include advising the Governor, serving as a leading spokesperson on matters of public health, and driving solutions to pressing public health challenges. California's first Surgeon General published a report on ACEs, toxic stress and health in 2020. The office currently has an Acting Surgeon General who is continuing these priorities. Although the Legislature has not yet tasked the Surgeon General with making policy recommendations on a particular health matter, the Surgeon General's previous report on ACEs and toxic stress involved a review of the medical literature on the topic and policy recommendations.

Related/Prior Legislation

AB 1 (Cooper, Chapter 158, Statutes of 2019) established a comprehensive safety scheme for youth tackle football and required a youth tackle football league to establish youth tackle football participant divisions that are organized by relative

age or weight or by both age and weight, and retain information for the tracking of youth sports injuries.

AB 2108 (McCarty, 2018) would have banned children under 12 years of age from playing tackle football. *AB 2108 was not heard in the Assembly Arts, Entertainment, Sports, Tourism, and Internet Media Committee.*

AB 2007 (McCarty, Chapter 516, Statutes of 2016) established requirements for youth sports organizations to remove an athlete who is suspected of sustaining a concussion or other head injury until he or she is evaluated and cleared by a licensed health care provider.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, the Office of the Surgeon General estimates the one-time fiscal impact of this bill would be potentially in the high hundreds of thousands or low millions of dollars (General Fund).

Concussion Legacy Foundation
Evan R. Hansen Foundation
I Got You Foundation
Life's Big Win
MAC Parkman Foundation
One Last Goal
Patrick Risha CTE Awareness Foundation

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: The Concussion Legacy Foundation writes in support that according to the largest study on confirmed CTE cases in football players, of the link between football and developing CTE may be as strong as the link between smoking and lung cancer. The organization cites the same Annals of Neurology study cited above, stating each year of playing tackle football increased the odds of developing CTE by 30%. A player's odds to develop CTE doubled every 2.6 years. That means a high school player who starts at age five might have ten times the risk of developing CTE than one who starts at age 14. Football should follow the lead of other major team sports, which have all stopped exposing children to the repetitive head impacts which can cause CTE. Despite there only being fewer than 50 CTE cases diagnosed in soccer and ice hockey worldwide,

heading is now banned in soccer in the U.S. until age 11 (and age 12 in the UK), and checking is banned in ice hockey until age 13. Football has a perfectly acceptable youth version that teaches children how to play and get exercise – flag football – yet about a million children each year still play tackle.

Even though hundreds of football players have now been diagnosed with CTE, including over 80% of all players examined, proponents of youth tackle football have cited flawed studies to claim flag football is as dangerous as tackle football. In response, the U.S. Centers for Disease Control and Prevention funded a study using helmet and head sensors to compare the brain safety of tackle versus flag, and in 2021 they published that the average tackle player suffers 378 head impacts per season, while flag players are exposed to only 8 impacts per season.

SUBJECT: Public social services: hearings

SOURCE: Western Center on Law & Poverty

DIGEST: This bill permits the director of the Department of Health Care Services or the Department of Social Services, after reviewing the proposed hearing decision of an administrative law judge, to decide the matter themselves only after reviewing the transcript or recording of a hearing, or conduct another hearing that allows parties to present additional evidence once a hearing has been conducted and an ALJ has written a proposed decision. If the director writes an alternated decision, this bill requires the alternated decision to contain a statement of the facts and evidence, including references to the applicable sections of law and regulations, and the analysis that supports the director's decision.

Senate Floor Amendments of 8/22/22 remove provisions related to a new IMR process for Medi-Cal beneficiaries and instead keep just the revisions to the current state fair hearing process.

ANALYSIS:

Existing law:

1) Allows an individual to request a state fair hearing if the individual is dissatisfied with public social services they have received, dissatisfied with any action of the county relating to their application, or refused the opportunity to submit an application and is dissatisfied. Requires state fair hearings be conducted by an administrative law judge (ALJ). [WIC §10952]

2) Allows DHCS to contract with DSS for the provision of state hearings for programs administered by DHCS. [WIC § 10950]

3) Allows the department director to adopt the proposed decision of an administrative law judge, decide the matter them self, or conduct another hearing once one has been conducted and an ALJ has written a proposed decision. [WIC §10959]

This bill allows the department Director to adopt the proposed decision of an administrative law judge, decide the matter themselves after reviewing the transcript or recording of a hearing, or conduct another hearing that allows parties to present additional evidence once a hearing has been conducted and an ALJ has written a proposed decision. If the Director writes an alternated decision, requires the alternated decision to contain a statement of the facts and evidence, including references to the applicable sections of law and regulations, and the analysis that supports the Director's decision.

Comments

Author's statement. According to the author, this bill will improve the public benefits appeals process by standardizing the process that state departments must follow when alternating judges' decisions in fair hearings. Currently, the Department of Health Care Services and the Department of Social Services directors may overturn a judge's decision during a state fair hearing. While directors are already required to review evidence and provide reasoned decisions,

there are no consistent procedures they must follow when alternating a judge's decision.

This bill will require department directors, when alternating decisions to review hearing files, provide detailed reasoning to support their alternations, and reopen the record if they take additional evidence ensuring that people on public benefits, like CalWORKs, CalFresh, and Medi-Cal, get the objective, impartial review that they were seeking.

State fair hearings. Public social services applicants and beneficiaries have the right to a fair hearing when an adverse action is taken against them such as a Medi-Cal denial or termination, or a denial or reduction in services or benefits. DHCS has delegated the provision of hearings to the Department of Social Services' State Hearings Division, who also conducts other state benefits hearings such as Covered California and CalWORKs hearings. Fair hearings are conducted by an ALJ and function like a mini court process. The beneficiary has the right to be represented at the hearing if they are able to find representation, but they must attend the hearing. Otherwise, the beneficiary is responsible for submitting a hearing brief and supplemental evidence.

This bill makes technical procedural changes to the fair hearing process. It codifies standards the DHCS or DSS director must adhere to if not adopting the ALJs proposed decision. If the director intends to alternate the decision, the director must either review the hearing transcript or recording, or conduct a new hearing so that both parties may present new evidence.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, DHCS states this bill would create significant but indeterminate costs. The fiscal impact includes:

- One-time cost of $300,000 for a system change to modify the current state hearing notification process. It is not clear if this system change is needed for the current amendments.

- DHCS staffing resources for total costs of $3,369,000 the first year, $2,358,000 the following year, and $1,608,000 every year thereafter (50 percent federal funds and 50 percent General Fund). These staffing costs would likely be dramatically reduced with the current amendments.

OPPOSITION: (Verified 8/22/22)

None received

ARGUMENTS IN SUPPORT: This bill's sponsor, Western Center on Law & Poverty, writes that under current law, DHCS and DSS may overturn a judge's decision made during a hearing. Although directors are already required to review evidence and provide reasoned decisions, there are no consistent procedures that directors must follow when alternating a judge's decision. This bill would require directors, when alternating decisions, to review hearing files, provide detailed reasoning to support their alternations, and reopen the record if they take additional evidence. Fair hearings are a considerable expenditure of time and resources for all involved. To change the outcome without an in-depth review of what was considered at the hearing undermines the process and denies beneficiaries the objective, impartial review they were seeking. Although alternated fair hearing decisions are rare, this bill is necessary to ensure any reversal of a judge's decision follows standard procedures and is based on thorough examination.

SUBJECT: Buy Clean California Act: eligible materials: product-specific global warming potential emissions

SOURCE: Author

DIGEST: This bill adds specified building materials to the Buy Clean California Act (BCCA), and requires the Department of General Services (DGS) to regularly review the maximum acceptable global warming potential (GWP) for each category of eligible materials, as specified.

ANALYSIS:

Existing law:

1) Requires, pursuant to the BCCA, DGS to establish and publish a maximum acceptable GWP for each category of eligible materials, as specified.

2) Requires DGS, by January 1, 2025, and every three years thereafter, to review the maximum acceptable GWP for each category of eligible materials and authorizes DGS to adjust that number downward for any eligible material to reflect industry improvements under specified circumstances.

3) Defines "eligible materials" to mean carbon steel rebar, flat glass, mineral wool board insulation, and structural steel.

This bill:

1) Expands the definition of "eligible materials" to include gypsum board, insulation, carpet and carpet tiles, and ceiling tiles – and removes "mineral wool board insulation."

2) Clarifies the requirement for DGS, in consultation with ARB, to establish and publish a maximum global warming potential for pre-existing eligible materials, and requires DGS, by January 1, 2024, and in consultation with ARB, to establish and publish maximum GWP for newly added eligible materials, as specified.

3) Extends the requirement by two years, from January 1, 2025, to January 1, 2027, and every three years thereafter, for DGS to review the maximum acceptable GWP for each category of eligible materials and make adjustments, as specified.

4) Authorizes DGS to establish and publish in the State Contracting Manual (SCM), or make available online, a maximum acceptable GWP for any major structural, high-impact architectural, civil, or high-impact materials, in addition to the eligible materials described above, as specified.

Background

Purpose of the Bill. According to the author's office, "climate change is the most serious threat that we face and the window to act is closing. As we saw during

COP 26, we must act now before we face irreparable harm. That means lowering our direct emissions, but also working towards reducing our total emissions, including embodied carbon. California has a unique opportunity to set a standard for cleaner buildings. AB 1369 strengthens our existing Buy Clean program by adding new materials that must be evaluated and requiring DGS to establish a maximum allowable threshold for the GWP of those materials. Further, by requiring DGS to publish those GWP thresholds, AB 1369 allows the state to make more informed decisions when funding projects, and spurs industry to reduce the climate impact."

State Contracting Manual. The SCM is compiled by DGS and is intended to act as a resource to persons and companies involved in California's state contracting process. The SCM provides policies, procedures, and guidelines to promote sound business decisions and practices in securing services for the State. The SCM does not eliminate or override statutory requirements, or requirements implemented by way of superseding Executive Orders and Management Memos. The SCM is available on DGS's internet Web site.

Buy Clean California Act. The BCCA, AB 262 (Bonta, Chapter 816, Statutes of 2017), requires DGS, in consultation with ARB, to establish and publish the maximum acceptable GWP limit for four eligible materials targeting carbon emissions associated with the production of: structural steel (hot-rolled sections, hollow structural sections, and plate); concrete reinforcing steel, flat glass, and mineral wool board insulation. When used in public works projects, these eligible materials must have a GWP that does not exceed the limit set by DGS and available made available online on January 1 of this year. Beginning July 1, 2022, awarding authorities must determine GWP limit compliance of eligible materials using Environmental Products Declarations (EPDs). Methodology to establish the GWP limits can also be found online on DGS's reports website.

An EPD is a comprehensive, internationally accepted report that documents the ways in which a product, throughout its lifecycle, affects the environment. It describes the lifecycle story of a product in a single, written report, focusing on information about a product's environmental impact, such as global warming, ozone depletion, water pollution, ozone creation, and greenhouse gas (GHG) emissions. Having an EPD for a particular material does not imply that the material is environmentally superior to alternatives, but is simply a transparent description and record of the life-cycle environmental impact of that particular product.

Global Warming Potentials. Greenhouse gases warm the Earth by absorbing and slowing the rate at which energy escapes to space. Different GHGs can have different effects on the warming of the Earth. GWP is a measure of how much heat a GHG traps in the Earth's atmosphere. It was developed to allow comparisons of the global warming impacts of different gases. The larger the GWP, the more that the given gas warms the Earth compared to carbon dioxide (CO2).

This bill adds gypsum board, insulation (replacing mineral wool board insulation), carpet and carpet tiles, and ceiling tiles to the existing list of eligible materials that must be evaluated for their GWP. Additionally, this bill requires DGS to regularly review the maximum acceptable GWP for eligible materials and authorizes DGS to adjust that number downward to reflect industry improvements, as specified. Finally, this bill authorizes DGS to establish and publish in the SCM a maximum acceptable GWP for any major structural, high-impact architectural, civil, or high-impact materials in addition to the existing eligible materials.

Related/Prior Legislation

SB 1004 (Cortese, 2022) requires state agencies to grant a five percent bid preference to contractors that are party to an apprenticeship agreement with an approved apprenticeship program for a public works contract worth $250,000 or more, as specified. (Never heard in Senate Governmental Organization)

SB 1422 (Hertzberg, 2022) authorizes DGS to use existing leveraged procurement tools for contracts for purchase and installation of carpet, resilient flooring, synthetic turf, or lighting fixtures, and allows state and local agencies to contract for these projects without further competitive bidding if they meet specified labor standards and other conditions, as specified. (Pending in the Assembly Appropriations Committee)

AB 262 (Bonta, Chapter 816, Statutes of 2017), the BCCA, required DGS to establish standards used in the bid process related to GHG emissions when certain eligible materials are used in state public works projects.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- DGS estimates total ongoing costs of $866,000 for three additional staff for workload associated with compiling data, establishing GWP limits, preparing

legislative reports, assisting departments in implementing the limits, and recalculating the limits every three years (General Fund).

- Unknown increase in the cost of construction projects in the state. DGS notes this bill will result in some material manufacturers from being excluded from future state public works projects for exceeding the industry average emissions level, which will likely result in higher prices for construction materials, especially in the current supply chain environment which has seen costs for construction materials far exceed typical inflationary amounts.

- The ARB anticipates any fiscal impact to consult with the DGS to be minor and absorbable.

American Chemistry Council
EPS Industry Alliance
Extruded Polystyrene Foam Association
Insulation Contractors Association of America
National Insulation Association
North American Insulation Manufacturers Association
Polyisocyanurate Insulation Manufacturers Association
Spray Polyurethane Foam Alliance
Structural Insulated Panel Association

ARGUMENTS IN SUPPORT: In support of the bill, the Sierra Club California writes, "California should be spending its public infrastructure dollars in a manner that is consistent with our state's values and climate goals. In 2018, the Buy Clean California Act became law. This first of its kind law required DGS to establish a maximum GWP for a limited list of common construction materials. AB 1369 further expands the Buy Clean California act in two important ways—adding a small set of interiors products where there is high potential of carbon reductions and authorizes DGS to add eligible materials as data becomes available in more product/materials categories."

ARGUMENTS IN OPPOSITION: In opposition to the bill, the American Chemical Council writes that, "[d]espite its relatively small percentage in overall building embodied carbon impact, insulation does however have a significant contribution to operational energy and GHG savings. The role of increased energy efficiency in meeting climate change goals and reducing GHGs is well documented. Due to the significant savings attributed to insulation products and only a minor contribution to a building's embodied carbon profile, we respectfully request that insulation materials, including mineral wool board insulation be excluded from the eligible materials list. A focus that exclusively looks only at embodied carbon could lead to improper product selection, limit the availability of certain insulation materials for use in state projects, and negatively impact the operational carbon use of the building. Insulation materials provide important benefits beyond thermal protection including air sealing, vapor management, moisture performance, structural performance and durability, which are beneficial to a building's overall performance."

SUBJECT: Clean Transportation Program: project funding preferences

SOURCE: CALSTART

DIGEST: This bill expands the types of projects for which the California Energy Commission (CEC) must prioritize funding from the Clean Transportation Program (CTP) to include projects that provide specified air quality benefits.

Senate Floor Amendments of 8/25/22 limit this bill to provisions that require the CEC to prioritize CTP funding for projects in nonattainment areas and projects that advance the state's mobile emissions reduction strategy.

ANALYSIS:

Existing law:

1) Establishes the CTP, administered by the CEC, to provide funding to certain entities to develop and deploy innovative technologies that transform California's fuel and vehicle types to help attain the state's climate change policies. (Health and Safety Code §44272)

2) Designates the California Air Resources Board (CARB) as the state agency charged with monitoring and regulating statewide greenhouse gas (GHG) emissions, and requires CARB to ensure that GHG emissions are reduced to at least 40 percent below the 1990 level by December 31, 2030. (Health and Safety Code §38500 et seq.)

3) Sets, through the Federal Clean Air Act and its implementing regulations, National Ambient Air Quality Standards (NAAQS) for six criteria pollutants, designates air basins that do not achieve NAAQS as nonattainment areas, allows only California to set vehicular emissions standards stricter than the federal government, and allows other states to adopt either the federal or California vehicular emissions standards. (42 U.S.C. §7401 et seq.)

This bill expands the types of projects that the CEC must prioritize when awarding CTP funding to include the following:

1) Eligible projects in areas designated as "nonattainment" areas pursuant to the federal Clean Air Act.

2) Projects that advance the CARB mobile source emissions strategy.

Background

Mobile source emissions. Mobile sources and the fossil fuels that power them continue to contribute a majority of emissions of diesel particulate matter as well as smog- and particulate-forming pollutants such as oxides of nitrogen (NO_x), and the largest portion of GHG emissions in California (over 40 percent of the state's GHG emissions). Many parts of the state, including the South Coast Air Basin and San Joaquin Valley, have air quality that fails to meet the federal NAAQS for ozone (commonly understood as smog), and particulate matter (commonly understood as soot). Additionally, some communities bear a higher burden of toxic air pollution due to the emissions from mobile sources in their community,

especially from vehicles operating on diesel fuel, including many communities alongside heavy-duty truck congested roads, freeways, highways, sea ports, rail yards, and warehouses.

Mobile Source Strategy. On April 23, 2021, CARB released an updated draft Mobile Source Strategy that demonstrates how California can determine the pathways forward for the various mobile sectors that are necessary in order to achieve California's numerous air quality and climate goals and targets over the next 30 years. The 2020 Strategy intends to maximize the criteria pollutant reductions by going to zero-emission where feasible. Specifically, the 2020 Strategy calls for the deployment of approximately 1.4 million medium- and heavy-duty zero-emission vehicles (ZEVs) in California by 2045.

Clean Transportation Program (CTP). The CTP was established in 2007 by AB 118 (Nuñez, Chapter 750, Statutes of 2007) to provide funding to specified entities to develop and deploy technologies and alternative and renewable fuels in the marketplace, without adopting any one preferred fuel or technology, in order to help attain the state's climate change policies (and specifically to support the development of low-carbon fuels). Funding was reauthorized in 2013 by AB 8 (Perea, Chapter 401, Statutes of 2013) at then-existing levels until January 1, 2024. Over the 13 years of the program, the CTP has provided nearly a billion dollars to projects covering a broad spectrum of alternative fuels and technologies. Using funds collected from vehicle ($2) and vessel registration ($5/10), vehicle identification plates ($2.50), and smog abatement fees ($4), the program:

- Expedites development of conveniently located fueling and charging infrastructure for low- and ZEVs.
- Accelerates advancement and adoption of alternative fuel and advanced technology vehicles, including low- and zero-emission medium- and heavy-duty vehicles.
- Expands in-state production of alternative, low-carbon renewable fuel.
- Supports manufacturing and workforce training to help meet the needs of the state's growing clean transportation and fuels market.

Bill expands the list of projects prioritized for CTP funding. Existing law specifies the types of projects eligible for funding from the CTP. Within that list of eligible projects, existing law also specifies the types of projects for which the CEC must prioritize CTP funding. Existing law specifies 12 different criteria the CEC must consider when scoring a project for prioritization. These criteria include, but are not limited to a project's ability accelerate the development and use of alternative fuels, a project's capacity to support state climate goals, and a project's ability to

provide in-state economic and workforce benefits such as the transition of workers in the fossil fuel industry to clean transportation jobs. This bill expands the criteria the CEC must use to score eligible CTP projects for funding prioritization. Under this bill, the CEC must also prioritize projects that advance the state's mobile source emissions strategy developed by CARB and prioritize projects in locations designated as nonattainment areas pursuant to the federal Clean Air Act.

Related/Prior Legislation

SB 726 (Gonzalez, 2021) revises the CEC CTP in many ways mirroring the changes proposed by this bill, and requires the development of a sustainable transportation strategy by the CEC and the CARB. The bill is on the Assembly Inactive File.

SB 44 (Skinner, Chapter 279, Statutes of 2019) required CARB to update the 2016 Mobile Source Strategy by January 1, 2021, and every five years thereafter. Specifically, SB 44 required CARB to include a comprehensive strategy for the deployment of medium and heavy-duty vehicles for the purpose of meeting air quality standards and reducing GHG emissions.

AB 1697 (Bonilla, Chapter 446, Statutes of 2016) expanded the types of workforce development programs eligible for CTP funding and expanded the types of projects the CEC must prioritize for CTP funding to include projects that help transition workers from the fossil fuel industry to the clean transportation sector.

AB 8 (Perea, Chapter 401, Statutes of 2013) extended until January 1, 2024, extra fees on vehicle registrations, boat registrations, and tire sales in order to fund the

AB 118 (Núñez, Chapter 750, Statutes of 2007) enacted the California Alternative and Renewable Fuel, Vehicle Technology, Clean Air, and Carbon Reduction Act of 2007. Establishes the Enhanced Fleet Modernization Program and the Air Quality Improvement Program.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- CEC indicates that any costs associated with the bill will be minor and absorbable. Appropriations Committee staff notes, however, that this bill represents a significant restructuring of the CTP, including revisions to the types of projects eligible for funding, the amounts of funding that are dedicated to specified purposes, and the methods and requirements for prioritizing

expenditures and administering the program. Staff estimates that, at a minimum, the CEC would need to dedicate staff resources in the current fiscal year to undergo an accelerated rulemaking process to revise program regulations within six months of enactment to account for changes to the CTP prior to the 2022-2025 investment cycle. Staff estimates these one-time costs could be in the range of $50,000 to $150,000. (Alternative and Renewable Fuel and Vehicle Technology Fund -- ARFVT Fund)

- Ongoing cost pressures, potentially in the millions until 2024 (or longer if the program is extended), primarily related to requirements that the CEC annually increase program investments dedicated to the deployment of light-duty EV charging infrastructure and projects that advance the deployment of medium- and heavy-duty vehicles. This requirement would divert an increasing amount of funds each year from other eligible CTP expenditures and constrain the CEC's ability to respond to technological and market trends or to fund categories that may have a higher overall benefit. (ARFVT Fund)

California Hydrogen Coalition

ARGUMENTS IN SUPPORT: According to the author, "The pollutants emitted from the transportation sector leave communities like mine with dirty air and public health hazards. Cleaning up the transportation sector is critical to demonstrating that environmental justice and economic development not only can co-exist but are complimentary to each other."

ARGUMENTS IN OPPOSITION: In opposition to this bill, the California Hydrogen Coalition, contends, "Currently, the CTP requires 20 percent of annual program dollars ($200M total) be directed toward hydrogen fueling. Except for eligibility under the Low Carbon Fuel Standard, the CTP is the only program supporting the development of hydrogen fueling infrastructure in the state. Conversely, the build-out of charging infrastructure receives support from a number of sources including well-above 20 percent of the CTP, investor and publicly-owned utilities, the Low Carbon Fuel Standard as well as the NRG and Volkswagen settlements which when combined, total well above $2.4 billion.

"For these reasons, we oppose AB 1389 unless amended to dedicate 50 percent of program dollars toward supporting the development of hydrogen fueling infrastructure for the light and heavy-duty markets as well as transit districts."

SUBJECT: The California Climate Crisis Act

SOURCE: Author

DIGEST: This bill declares that it is the policy of the state to achieve net zero greenhouse gas (GHG) emissions and reduce anthropogenic GHG emissions by at least 90% below the 1990 level no later than 2045.

Senate Floor Amendments of 9/3/21 clarify that the criteria that prevents the double counting of emissions reductions associated with utilizing CO_2 that is captured or removed from the atmosphere, applies to tracking progress towards the state's climate targets.

ANALYSIS:

Existing law:

1) Establishes the Air Resources Board (ARB) as the state agency responsible for monitoring and regulating sources emitting greenhouse gases.

2) Requires ARB to approve a statewide GHG emissions limit equivalent to the statewide GHG emissions level in 1990 to be achieved by 2020 (AB 32, 2006) and to ensure that statewide GHG emissions are reduced to at least 40% below the 1990 level by 2030 (SB 32, 2015).

3) Requires ARB to prepare and approve a scoping plan for achieving the maximum technologically feasible and cost-effective reductions in GHG emissions and to update the scoping plan at least once every 5 years.

4) Requires ARB when adopting regulations, to the extent feasible and in furtherance of achieving the statewide GHG emissions goal, to do the following:

    a) Ensure that activities undertaken to comply with the regulations do not disproportionately impact low-income communities.
    b) Ensure that activities pursuant to the regulations do not interfere with efforts to achieve and maintain federal and state ambient air quality standards and to reduce toxic air contaminant emissions.
    c) Consider overall societal benefits, including reductions in other air pollutants, diversification of energy sources, and other benefits to the economy, environment, and public health.
    d) Consider cost-effectiveness of these regulations.

This bill:

1) Declares it is the policy of the state to:

    a) Achieve net zero GHG emissions as soon as possible, but no later than 2045, and to achieve and maintain net negative GHG emissions thereafter.
    b) Ensure that by 2045, statewide anthropogenic GHG emissions are reduced by at least 90% below 1990 levels, which includes emissions prevented by carbon capture and storage (CCS).

2) Requires ARB, as the primary agency responsible for achieving the 2045 net zero GHG emission goal, to fulfill a number of specified duties. Such requirements of ARB include, but are not limited to:

a) Updating the scoping plan to identify and recommend measures to achieve net zero GHG emissions and reduce statewide anthropogenic GHG emissions by at least 90% below 1990 levels by 2045;
b) Coordinating with relevant state agencies to identify policies and strategies to achieving GHG emission reduction goals;
c) Reporting to the Legislature:

    i) Annually on progress towards five-year interim GHG emission reduction goals, as identified by ARB, and
    ii) By December 31, 2035 on the feasibility and tradeoffs of achieving 90% GHG emission reductions by 2045 relative to other scenarios;

d) Establish criteria for nature-based climate solutions;
e) Establish criteria for CCS and CO_2 removal technologies, and, among other stipulations, ensuring those criteria:

    i) Consider the benefits, risks, and uncertainties associated with these technologies;
    ii) Avoid any adverse impact on air quality and public health;
    iii) Omit crediting of captured CO_2 for fossil fuel extraction;
    iv) Require any emission reductions and carbon removal to be permanent, quantifiable, and done with contingencies for release or reversal; and
    v) Include robust monitoring, accounting, and annual reporting to ARB.

3) Requires the Legislative Analyst's Office to conduct independent analyses of ARB's progress towards these goals every two years and prepare a report detailing its review and any recommendations, to be made publicly available.

4) Requires state agencies, in working towards net zero GHG emissions, to:

    a) Engage the support, participation, and partnership of researchers, businesses, investors, and communities, as appropriate;
    b) Seek to support the health and economic resiliency of communities, particularly low-income and disadvantaged communities; and,
    c) Support climate adaptation and biodiversity.

Background

1) *The climate crisis in California.* California is particularly susceptible to the harmful effects of climate change, including an increase in extreme heat

events, drought, wildfire, sea level rise, and more. According to the Fourth California Climate Change Assessment, by 2100, the average annual maximum daily temperature is projected to increase by 5.6-8.8 °F, water supply from snowpack is projected to decline by two-thirds, the average area burned in wildfires could increase by 77%, and 31-67% of Southern California beaches may completely erode without large-scale human intervention, all under business as usual and moderate GHG reduction pathways.

California is already experiencing the effects of climate change now. For example, eight out of the past ten years have had significantly below-average precipitation. As of September 2020, the state has experienced a degree of wildfire activity that California's Fourth Climate Change Assessment initially forecasted to not occur until 2050. California's 2018 wildfires alone, less than half the size of the 2020 conflagrations, cost $148.5 billion in damages. Climate impacts are and will continue to result in devastating capital losses, loss of natural resources, health costs, as well as negatively influence mental health, food security, and displacement.

2) *Climate change and equity.* The effects of climate change to date have been felt the world over, but the most dire consequences have often struck those least able to defend themselves. Should reaching net zero GHG emissions be delayed and rapid warming allowed to continue, experts predict unprecedented numbers of deaths, ecosystem destruction, and human migration. In a 2019 report on climate change and poverty, the United Nations Human Rights Council states, "Addressing climate change will require a fundamental shift in the global economy, decoupling improvements in economic well-being from fossil fuel emissions… An over-reliance on the private sector could lead to a climate apartheid scenario in which the wealthy pay to escape overheating, hunger, and conflict, while the rest of the world is left to suffer." When equity is taken into account for GHG emissions reductions, "the combined emissions of the richest one per cent of the global population account for more than twice the poorest 50 per cent. The elite will need to reduce their footprint by a factor of at least 30 to stay in line with the Paris Agreement targets," according the United Nations Environment Programme (UNEP) 2020 Emissions Gap Report.

3) *Net zero GHG emissions*. Achieving net zero GHG emissions – a state where GHG emissions either reach zero or are entirely offset by equivalent atmospheric GHG removal – by mid-century is essential in all scenarios that would keep Earth's average temperature within 1.5 °C of its historical average. According to the UNEP 2020 Emissions Gap Report, which provides an annual

update on global progress on climate change, the consensus is that, globally, we are not on track to meet that goal. However, the report does state that, "the growing number of countries committing to net-zero emissions goals by mid-century is the most significant climate policy development of 2020. To remain feasible and credible, these commitments must be urgently translated into strong near-term policies and action."

4) *State climate goals.* Three US states (Massachusetts, Nevada, and Virginia) have net-zero GHG targets and at least 11 states have GHG emissions reduction targets signed into law, several with targets more ambitious than California's current target of 40% GHG emissions reduction by 2030. In California, Governor Brown's Executive Order (EO) B-55-18 established the goal of carbon neutrality by 2045, however this target is not codified in statute.

5) *Pathways to net zero*. In October 2020, ARB commissioned a report by Energy and Environmental Economics (E3) titled *Achieving Carbon Neutrality in California*, which laid out three scenarios for reaching net zero GHG emissions in California by 2045. The scenarios include (1) the High Carbon Dioxide Removal (CDR) scenario; (2) the Zero Carbon Energy scenario; and, (3) the Balanced scenario. All scenarios call for at least 80% GHG emission reduction. Regarding least-regret options, the report states "Achieving carbon neutrality by 2045 requires ambitious near-term actions around deployment of energy efficiency, transportation and building electrification, zero-carbon electricity, and reductions in non-energy, non-combustion greenhouse gas emissions. These least-regrets strategies are common across all deep decarbonization strategies." In other words, focusing on cutting GHG emissions is less risky than relying on CDR to offset emissions because, even if technology adoption or implementation is hampered, we are at least moving in the right direction.

6) *Carbon Capture and Storage.* CCS is a process of separating CO_2 from a point source, such as the flue of a gas-fired power plant or a cement plant, and putting it into long-term storage, usually by injecting CO_2 into a geological reservoir. CCS is generally considered by experts to be a CO_2 reduction strategy since it is only reducing CO_2 from anthropogenic sources that would have otherwise entered the atmosphere, rather than removing what was already there. According to a report called *California's Energy Future – The View to 2050* by the California Council on Science and Technology (CCST) updated in 2015, any use of fossil fuels for electricity generation would need to be paired with CCS to meet the current 2050 GHG emissions target (80% reduction). CCS is adoptable in California due to the existing geological storage from the

state's history of fossil fuel extraction. However, no CCS projects exist today in California, and it is unlikely that CCS could be scaled up at the pace needed due to the current regulatory framework for screening and authorizing projects. CCS remains controversial because it could prolong the life of fossil fuels and delay the transition to more sustainable fuels.

7) *GHG removal*. An essential part of carbon neutrality in any scenario is atmospheric GHG removal (also called negative emissions), to account for GHG emissions which cannot be mitigated. For GHG removal options in California, Lawrence Livermore National Lab (LLNL) produced a report in 2020 called *Getting to Neutral*, where they determined that California could remove on the order of 125 million tons of CO_2-equivalents per year from the atmosphere by 2045 to achieve carbon neutrality and achieve the current goal of 80% GHG emissions reduction by 2050. The report concludes that "California can achieve this level of negative emissions at modest cost, using resources and jobs within the State, and with technology that is already demonstrated or mature." The GHG removal methods that are outlined in the report are converting waste biomass to fuels and store CO_2, direct air capture (DAC) and CO_2 storage, and capture and storage of carbon through nature-based solutions on NWL.

   CO_2 removal technologies are generally understood to include converting and storing CO_2 from biomass, with or without creating energy. If biomass carbon that returns to the atmosphere when it decays, burns, or when it is used to produce energy is instead captured and stored, then the result is net negative GHG emissions. According to the *Getting to Neutral* report, these solutions hold the greatest potential for negative emissions across the state. These technologies are sometimes controversial due to potential impacts to ecosystems, food security, increased criteria pollutants, and land use.

   Direct air capture (DAC) is a technology where specially designed machines are used to remove CO_2 from the ambient air (rather than a point source) and permanently store it underground or turn it into valuable products. It has nearly unlimited technical capacity, provided its energy needs can be met from renewable sources. However, this is the most expensive negative emissions option and it can also have extensive land-use requirements.

   Nature-based solutions depend on careful management of NWL to enhance biological removal of CO_2 from the atmosphere, reduce emissions of GHGs, and preserve existing carbon stores in NWL. Some sources show that

California's NWL are a net GHG source, losing more carbon than they are sequestering, with wildfire being the largest cause of carbon loss. A number of entities in California's executive branch are developing policy and implementing programs to mitigate disturbances on NWL and make them into a healthy carbon sink in the future.

Comments

1) *Purpose of Bill.* According to the author, "Climate change is the defining crisis of our time and it is happening even more quickly than we originally thought. No corner of this state is immune from the devastating consequences of climate change. The rising temperatures are fueling environmental degradation, sea level rise, weather extremes such as drought, food and water insecurity, economic disruption, ocean acidification, and catastrophic wildfires. According to experts, to avert the most catastrophic impacts of climate change, we must limit atmospheric warming to 1.5 degrees Celsius, which necessitates California reaching net zero emissions by mid-century. This bill would require the state to achieve net zero emissions as soon as possible, but no later than 2045 and net negative greenhouse gas emissions thereafter. This bill additionally sets up a framework that recognizes the need to maximize emissions reductions and the need to deploy carbon negative strategies as well as nature-based solutions to help the state achieve this goal."

2) *Codifies carbon neutrality, and more*. By requiring the state to achieve net zero GHG emissions by 2045, this bill codifies the carbon neutrality goal included in EO B-55-18. It also expands upon it by requiring at least 90% reduction of anthropogenic GHG emissions compared to 1990 levels by the same year. The current statutory goal, set by SB 32 (Pavley, Chapter 249, Statutes of 2016), is a 40% decrease in GHG emissions by 2030. That means GHG emissions would need to be reduced at approximately the same pace of around 4% per year to achieve the 90% reduction by 2045. The remaining 10% of emissions would need to be balanced by CO_2 removal from the atmosphere to achieve net zero.

   It should be noted that additional negative emissions could account for more than 10%, meaning the state would be achieving net negative GHG emissions. It is the state's goal to have net zero or net negative emissions onward into the future, which will be necessary to prevent further warming. The longer it takes for GHG emissions to be reduced worldwide, the more sharply they will need to be cut in the future to avoid the worst effects of climate change. While California only plays one small part in global GHG reduction efforts globally, not doing so will come at a monumental cost. To allow temperatures to rise

past 1.5° or 2 °C this century is to accept unavoidable disruption to agriculture, trade, immigration, and public health. The less action California and other governments take to address the threat, the more impacts we will all suffer. To hold temperature rise to less than 1.5° or 2 °C this century will require enormous, heroic decarbonization efforts on the part of every wealthy city, state, province, and country.

3) *What is the best way to get to net zero?* Although there is widespread consensus on the need for eventual net zero GHG emissions to avoid the most devastating impacts of climate change, there is often disagreement about how to get there. Solutions span the range from market-based, compliance-based, technology-based, and more. Usually, the answer so far has been some combination of all-of-the-above.

   AB 1395 specifies that, to reach net zero GHG emissions, 90% of anthropogenic GHG emissions should be reduced by 2045. This is roughly in line with the E3 Zero Carbon Energy scenario, which would require an economy-wide shift to deep direct GHG emissions reductions and away from fossil fuel use. When setting a landmark climate goal such as this, the Legislature must consider what they want the future of California in 2045 to look like. Is it a future still dependent on fossil fuels—and the pollutants and environmental injustices that come with it—but with enough carbon removal from trees and DAC to achieve net zero? Or is it a radically different California, where, as the UN Human Rights Council said, we make a fundamental shift from decoupling improvements in economic well-being from fossil fuel emissions, doing so in such a way that provides necessary support, protects workers, and creates decent work. Whatever path is decided upon will either require setting the course now, or accepting the path of least resistance.

   The questions before the Legislature are, "How prescriptive should we be in determining the state's pathway to net-zero GHG emissions?" And, "Is it enough to get to net zero, or should we also prioritize things like environmental justice, health, jobs, or other factors in our climate goals?" One of the biggest questions is, "What sacrifices are we prepared to make to avoid the most catastrophic outcomes of climate change, and who makes them?"

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee,

- Unknown ongoing costs, likely in the millions of dollars annually (Cost of Implementation Account [COIA]), for the California Air Resources Board (ARB) to ensure that updates to the scoping plan identify and recommend measures to achieve the policy goals that would be established by this bill, identify strategies that support various solutions, and establish criteria, among other things.
- Unknown one-time costs, likely in the range of $250,000 to $500,000 (General Fund or special fund), for the California Natural Resources Agency (CNRA) to work with ARB to establish criteria for the use of nature-based climate solutions for the purposes of achieving the policy goals that would be established by this bill.
- Unknown but likely significant one-time costs, possibly in the low millions of dollars, for various state departments to revisit existing regulations, reopen proceedings, and make changes to current programs in order to conform to the policy goals that would be established by this bill.
- To the extent that this bill mitigates any state costs due to climate change, unknown but potentially significant state savings.

ARGUMENTS IN SUPPORT: In a letter of support, a coalition of 38 environmental organizations argues, "There is no doubt that ambitious action is needed to address climate change and its impacts. The latest IPCC report underscores that absent immediate and aggressive efforts to reduce climate pollution and build resilience to the impacts of climate change, the climate challenges that we already face will continue to worsen, further threatening the health and wellbeing of communities and the environment."

ARGUMENTS IN OPPOSITION: In a letter of opposition, a coalition of 37 organizations representing businesses and industries argues, "This is an extraordinarily aggressive goal that would require large-scale transformation of California's entire economy. This policy is the equivalent of eliminating California's industrial, residential, commercial, transportation, electrical, and manufacturing sectors – effectively shutting down the entire state economy. AB 1395 also threatens the role technology can play in reducing emissions and achieving carbon neutrality."

SUBJECT: Common interest developments

SOURCE: Author

DIGEST: This bill makes several changes to the Davis Sterling Act related to Common Interest Developments (CIDs).

Senate Floor Amendments of 8/22/22 delete one section of the bill which would have required evidence to be shown to the accused member when an HOA seeks to impose a monetary penalty against a member.

ANALYSIS:

Existing law:

1) Establishes the Davis-Stirling Common Interest Development Act, which provides rules and regulations governing the operation of residential CIDs and

the rights and responsibilities of homeowners and homeowners' association (HOA) members.

2) Allows members or residents of CIDs to do the following:

   a) Assemble peacefully during reasonable hours and in a reasonable manner for purposes relating to common interest development living, association elections, legislation, election to public office, or the initiative, referendum, or recall process.

   b) Use the common area for an assembly or meeting.

   c) Canvas and petition members

   d) Distribute or circulate information about common interest development living, association elections, legislation, election to public office, or the initiative, referendum, recall process, or other issues of concern to members and residents.

3) Allows an owner of separate interest in a CID to rent or lease any of the separate interests, accessory dwelling units, or junior accessory dwelling units to a renter, lessee, or tenant.

4) Establishes that a CID shall be managed by a HOA that may be incorporated or unincorporated. A HOA shall hold an election for a seat on the board of directors

This bill:

1) Allows members or residents of a CID to use social media or other online resources to discuss development living, association elections, legislation, election to public office, or the initiative, referendum, or recall process or any other issues of concern to members and residents.

   a) Does not require an association to provide social media or other online resources to members.

   b) Does not require an association to allow members to post content on the association's website.

2) Permits an owner of a separate interest in a CID to rent or lease a portion of the homeowner occupied separate interest to a renter, lessee, or a tenant for more than 30 days.

3) Prohibits HOAs from pursuing enforcement actions during declared emergencies if the nature of the emergency makes in unsafe or impossible for the homeowner to either prevent or fix the violation.

Background

CIDs. CIDs are a type of housing with separate ownership of housing units that also share common areas and amenities. There are a variety of different types of CIDs including condominium complexes, planned unit developments, and resident-owned mobilehome parks. In recent years, CIDs have represented a growing share of California's housing stock. In 2019 there were an estimated 54,065 CIDs in the state which contain five million housing units, or about 35% of the state's total housing stock.

CIDs are regulated under the Davis-Stirling Act (Civil Code Section 4000 et seq.) as well as the governing documents of the CID, including the bylaws, declaration, and operating rules. CIDs can also have Covenants, Conditions, and Restrictions (CC&Rs) which are filed with the county recorder at the time they are established. Owners in a CID are contractually obligated to abide by the CC&Rs and the governing documents of a CID, which specify rules, such as how an owner can modify their home. Additionally, CIDs include HOAs which are run by an elected board of directors and HOAs must follow specific voting procedures when considering board votes. This bill proposes to make a number of changes to laws on HOAs.

Comments

1) *Social Media Discussion.* Since HOAs operate under democratic self-governance principles, homeowners who are unhappy with the current state of affairs in their community would face a number of challenges mobilizing to elect new directors or seeking other avenues of policy change if their HOA can restrict all critical discussion. Residents and owners can assemble peacefully and distribute information freely under current law. This bill includes online information sharing under these provisions.

2) *More Housing.* Current law allows for owners to rent out a separate interest, accessory dwelling unit, or junior accessory dwelling unit. This bill adds that owners can rent out space in their homeowner occupied residence. It clarifies that it must be for 30 or more days, which would exclude short-term rentals. In effect, this would authorize rentals in HOAs that do not allow renting in their governance.

3) *Emergencies.* In light of the ongoing COVID-19 pandemic, last year the Legislature passed and the Governor signed into law SB 391 (Min, Chapter 276, Statutes of 2021), which allowed HOA board meetings to use teleconference procedures during a declared emergency if gathering in person is unsafe or impossible due to a declared emergency. This bill prohibits associations from enforcing provisions that would make it unsafe or impossible for the homeowner to prevent or fix during a declared emergency. In this way, only enforcement on certain provisions are prohibited allowing for the association to continue its governance for most of its bylaws and rules.

Related/Prior Legislation

SB 391 (Min, Chapter 276, Statutes of 2021) allowed HOA board meetings to use teleconference procedures during a declared emergency

AB 3182 (Ting, Chapter 198, Statutes of 2020) allowed the owner of separate interest in a CID to rent or lease out any separate interest, accessory dwelling unit, or junior accessory dwelling unit

SB 407 (Wieckowski, Chapter 236, Statutes of 2017) allowed residents or members of a CID to peacefully assemble, distribute information, canvas, among other activities

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

SUPPORT: (Verified 8/22/22)

Center for California Homeowner Association Law

OPPOSITION: (Verified 8/22/22)

California Alliance for Retired Americans
California Associations Institute - California Legislative Action Committee

ARGUMENTS IN SUPPORT: According to the author, "For most people, the purchase of a home will be the biggest investment in their lifetime. It is not in the public interest or the interest of the state's housing policies to discourage homeownership and make it more difficult to maintain that homeownership. CIDs are a cost-effective way for many to achieve the American Dream and enter the housing market. As such, that investment deserves to have a homeowner association that is ethical, working toward the best interest of the property owners and not going out of their way to harass, fine, or limit the enjoyment of the homeowners' property. As cities and counties struggle to meet state housing goals,

CID's are becoming more and more prevalent. We must assure these homeowner community leaders know their legal responsibilities in order to mitigate future issues. If not, we will not just see disharmony in these communities but increases in lawsuits, harassment, public safety calls, and a host of other unforeseen issues that will increase costs to homeowners and to the public."

ARGUMENTS IN OPPOSITION: According to the opposition, this bill gives too much power to a homeowners association to limit free speech. The opposition additionally states that signing a code of conduct that is vague deters people from becoming board members. The author's office deleted this portion of the bill.

SUBJECT: Elections: ballot label

SOURCE: California Clean Money Campaign

DIGEST: This bill requires the ballot label for a statewide measure and for a local measure, at the option of each county and if certain conditions are met, to include a listing of the supporters or opponents of the measure taken from the supporters and opponents of the ballot arguments printed in the voter information guide, as specified.

Senate Floor Amendments of 8/24/22 change the length of time specific organizations need to be in existence from two years to four years prior to being listed on the ballot in support or in opposition to a ballot measure, and make technical changes.

ANALYSIS:

Existing law:

1) Defines a ballot label to mean the portion of the ballot containing the names of the candidates or a statement of a measure. Requires the ballot label for

statewide measures to contain no more than 75 words and to be the condensed version of the ballot title and summary including the fiscal impact summary prepared pursuant to existing law.

2) Requires the Attorney General (AG) to prepare a ballot title and summary and ballot label for each statewide measure submitted to the voters, as specified.

3) Permits any voter or group of voters to prepare and file with the Secretary of State (SOS) an argument for or against any statewide measure for which arguments have not been prepared or filed by the official proponent, or the measure's author in the case of a legislative ballot measure, as specified.

4) Requires the SOS, if more than one argument for, or more than one argument against, a statewide measure is filed within the time prescribed, to select one of the arguments for printing in the state voter information guide and provides a process in selecting the argument, as specified. Provides that no more than three signatures shall appear with an argument printed in the state voter information guide, as specified.

5) Requires that a ballot for a measure proposed by a local governing body or submitted to the voters, as specified, include the words "Shall the measure (stating the nature thereof) be adopted?" Requires that the statement of the measure printed on the ballot be a true and impartial synopsis of the purpose of the proposed measure, and be in language that is neither argumentative nor likely to create prejudice for or against the measure.

6) Provides similar procedures and requirements to state law for submitting arguments for or against county, city, and school district ballot measures for inclusion in the local voter information guide as specified.

7) Requires the SOS to establish a ballot design advisory committee (BDAC) to assist the SOS in promulgating regulations that prescribe ballot design and format, as specified.

This bill:

1) Requires the ballot label for statewide ballot measures to include a listing of the names of the signers or of entities included in the text of the ballot arguments printed in the state voter information guide in support of and in opposition to the measure, as specified. Requires the SOS, for each statewide measure and

within one week after receiving the lists of supporters and opponents of a statewide measure, to provide the county elections officials the ballot label, consisting of the condensed ballot title and summary prepared by the AG followed by the list of supporters and opponents, as specified.

2) Permits the ballot label or similar description of a county, city, district, or school measure on a county ballot to include a listing of the names of the signers of the ballot arguments printed in the voter information guide in support of and in opposition to the measure. Permits a county board of supervisors, at least 30 days before the deadline for submitting arguments for or against county measures, to elect not to list supporters and opponents for county, city, district, and school measures on the county ballot and future county ballots. Prohibits a county from including a list of supporters or opponents for any county, city, district, or school measure if the county does not include a list of supporters or opponents for all measures for which the county receives a list that meets the requirements of this bill.

3) Requires the ballot label for a statewide ballot measure, and the ballot label for a local ballot measure if the county chooses, to include "Supporters" and "Opponents" after the condensed ballot title and summary and not exceed 125 characters in length, as specified.

4) Prohibits a supporter or opponent from being listed as a supporter or opponent on a ballot label for a statewide ballot measure, or on the ballot label for a local ballot measure if the county chooses, unless it meets certain requirements and is a nonprofit organization, a business, an association (for local measures only), a current or former elected official, or an individual, as specified.

5) Prohibits a supporter or opponent from being listed as a supporter or opponent on the ballot label if the supporter or opponent is a political party or is representing a political party.

6) Provides that if no list of supporters or opponents is provided or there are none that meet the requirements of this bill, then "Supporters" or "Opponents" shall be followed by "None submitted."

7) Provides for various formatting options to shorten the ballot length to accommodate the supporters and opponents being listed on the ballot, as specified.

8) Requires the proponents and opponents of the measure to provide the list of supporters or opponents, as appropriate, to the SOS for a statewide ballot measure or to the local elections official for a local ballot measure when submitting ballot arguments related to the ballot measure, as specified.

9) Requires the proponents and opponents for ballot measures, in order to enable the relevant elections official to determine whether supporters or opponents are eligible to be included as part of the ballot label pursuant to this bill, to submit specified documentation.

10) Makes findings and declarations.

11) Makes technical and conforming changes.

Background

State and County Voter Information Guides & Ballot Argument Signers. Each ballot argument or rebuttal printed in the state or local voter information guide may have up to three signers for a statewide measure and five signers for a local measure. For a statewide measure, any voter or group of voters may submit an argument. Each person submitting the argument, including the representative of an organization, must also provide an address and telephone number to the SOS. For a local measure, a member of the governing board of the local jurisdiction, an individual voter who is eligible to vote on the measure, or a bona fide association of citizens is able to file an argument. For both statewide and local measures, ballot argument signers are required to sign a form stating that the argument is true and correct to the best of their knowledge and belief. In addition, if an organization or association submits an argument, that entity is required to provide the SOS or local elections official with documentation, which may include articles of incorporation, by-laws, organization letterhead, or similar documentation, in order to enable the SOS or local elections official to determine whether it qualifies as a bona fide association of citizens.

Previous Legislative Efforts. There have been previous legislative efforts over the past few years trying to provide additional information about supporters and opponents of ballot measures on the ballot. First, SB 636 (Stern, 2019) would have required the ballot label for a statewide ballot measure to include a listing of the signers of the ballot arguments printed in the state voter information guide that support and oppose the measure. This bill passed the Senate and was considered by the Assembly Committee on Elections and Redistricting, but was held in that committee without recommendation.

During this legislative session, SB 90 and AB 1416 both sought to add supporters and opponents to the ballot label for a statewide measure from the signers of the ballot arguments printed in the voter information guide. These bills were amended over time, but the overall concept of placing supporters and opponents of a ballot measure on the ballot remained consistent.

Ballot Design Advisory Committee. In 2019, the Legislature passed and Governor Newsom signed AB 623 (Berman, Chapter 863, Statutes of 2019). AB 623, among other provisions, required the SOS to establish a BDAC to assist the SOS in promulgating regulations that prescribe ballot design and format. The BDAC's inaugural meeting took place on July 8, 2021.

Letter to the Ballot Design Advisory Committee and Response. In April 2021, as both bills were pending in their house of origin, the Chair of the Senate Committee on Elections and Constitutional Amendments and the Chair of the Assembly Committee on Elections (at the time, Assemblymember Marc Berman) sent a letter to the SOS requesting the BDAC's views on the desirability of the design changes proposed by SB 90 and AB 1416, including an evaluation of how these bills would affect the readability and usability of ballots. If the committee determines that these bills would affect readability and usability, the Chairs further requested the BDAC's recommendations on how to display the bills' specified content in a manner that is most consistent with good ballot design principles. The Chairs encouraged the BDAC to seek input from recognized experts in voter behavior to help inform the committee's opinion on how best to include this information on the ballot as a part of its consideration of the issues presented by SB 90 and AB 1416.

Following the letter and the establishment of the BDAC, SB 90 and AB 1416 were considered on July 8, 2021. The BDAC members raised a number of questions and comments about both measures, such as potential lawsuits, the length of future ballots, and making the ballot more complicated for voters. Following the July meeting, this issue returned in BDAC's meeting on December 9, 2021 where a discussion about issues related to spacing on the ballot, when supporters/opponents lists are delivered to an elections official, ballot measures for multi-county districts, multilingual ballots, and ballot readability concerns. The BDAC did not make formal recommendations nor did they take an official position on the two bills. The SOS has not indicated a position on these bills.

Comments

1) According to the author, in California, voters are responsible for weighing in on statewide policy through ballot measures. In recent elections, ballot measure campaigns have used significant funds to inundate media outlets with advertisements intended to sway, and at times, mislead voters. Although voters can look to the voter information guide to decipher the facts on ballot measures, this document can be long and confusing for voters to navigate.

   AB 1416 is a common sense solution that will bring transparency to ballot measure campaigns and provide voters with the critical information they need to cast an informed vote. This bill will require ballot measure labels to include a short list of those who support and oppose each measure, and require that each list be limited to no more than 15 words. Similar to the way in which voters look to party affiliation or occupancy when voting for a candidate, AB 1416 will provide them with clear information right on their ballot.

2) *Longer Ballots.* Under current law, the ballot label is capped at 75 words. This bill requires the names of persons and organizations supporting and opposing a state ballot measure to be added onto the ballot and could significantly increase the length of the ballot, especially if a county chose to include this information on the ballot for local ballot measures. Additionally, many county elections officials are required to translate ballot materials into multiple languages under state and federal law. To comply with these requirements, some counties include English and other languages on a single ballot, while other counties print separate ballots in languages other than English.

3) *Local Ballot Inconsistencies.* The requirements of this bill are only mandated for statewide measures, and may be adopted in some counties but not others. Voters in counties that have the supporters and opponents listed on their ballots may not have supporters and opponents listed in multi-county districts. This may lead to confusion for voters in some counties who will not see the support and opposition listed for all ballots measures on their ballot.

4) *Politicizing the Ballot.* Historically, other than the listing of a party preference for specific offices, the ballot has remained largely neutral, in terms of the ballot being politicized. The ballot itself is sometimes considered "sacred." After all the debate, endorsements, and advertisements, the ballot is where the voter makes the final decision to approve, reject, or skip a ballot measure and that decision is made on one of the most neutral ways possible (i.e. a ballot with

brief information about the measure, an option for "Yes," and an option for "No").

5) *Potential for Chicanery.* Additionally, even though there are protections for the types of organizations that could be listed, this could be gamed as newly established entities become more established over time. The short-term effects may have long-term ramifications and could actually create more confusion among voters if the names of organizations, or even individuals, are similar.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The SOS indicates that it would incur annual costs of $25,000 to implement its provisions of the bill, for (1) staff time to review submitted documentation and provide counties with lists of supporters and opponents in short timeframes, and (2) review and recertify on demand systems and inspect and recertify ballot-printing facilities (General Fund).

- By imposing additional duties on county elections officials, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on local agencies, local agencies could claim reimbursement of those costs (General Fund). The magnitude of the costs is unknown, but likely in the millions of dollars per election.

SUBJECT: California Advanced Services Fund: Broadband Adoption Account

SOURCE: Author

DIGEST: This bill clarifies that nonprofit religious organizations are eligible for grants from the broadband adoption account within the California Advanced Services Fund (CASF).

Senate Floor Amendments of 8/24/22 incorporate provisions of AB 2749 (Quirk-Silva, 2022) to prevent chaptering conflicts.

Senate Floor Amendments of 6/9/22 delete the prior contents of this bill and instead add nonprofit religious organizations to the list of entities eligible for CASF adoption grants.

ANALYSIS:

Existing law:

1) Establishes the CASF, which is administered by the California Public Utilities Commission (CPUC) to fund broadband infrastructure deployment in unserved areas through December 31, 2032. (Public Utilities Code §281(a-b)).

2) Defines an unserved area eligible for CASF grants as any community lacking broadband at speeds of 25/3 Mbps downstream and upstream and requires CASF-funded infrastructure to provide broadband service at speeds of at least 100/20 Mbps downstream and upstream. (Public Utilities Code §281(b))

3) Establishes various accounts within the CASF, including the broadband adoption account, which provides grants to organizations and government agencies to support broadband adoption and digital literacy. (Public Utilities Code §281(c))

4) Specifies that the following organizations are eligible for grants from the Broadband Adoption Account: local governments, senior centers, schools, public libraries, nonprofit organizations, certain and community-based organizations with public and after school digital inclusion programs. (Public Utilities Code §281(j))

This bill:

1) Adds nonprofit religious organizations to the list of groups eligible for grant funding from the CASF broadband adoption account.

2) Incorporates various provisions contained in AB 2749 (Quirk-Silva, 2022), regarding CASF streamlining, to prevent chaptering conflicts between this bill and AB 2749.

Background

CASF and the Adoption Account. The CASF is financed through and end user surcharge on in-state telecommunications services, and it provides grants for broadband infrastructure deployment and broadband adoption projects. While the majority of CASF funding is allocated to broadband infrastructure deployment, the CASF includes a broadband adoption account to provide grants for digital literacy programs and access to broadband-equipped resources such as computer labs.

Nonprofit religious organizations may already receive CASF adoption grants. This bill adds religious organizations to the list of entities eligible for grants from the broadband adoption account; however, existing law already authorizes CASF grants to nonprofit organizations, which may include religious organizations that offer publicly available broadband adoption programs. The CPUC has already awarded adoption grants to entities that meet certain definitions of a nonprofit religious organization. The CPUC awarded a $25,843 CASF adoption grant to the Sikh Gurdwara of San Jose to support digital literacy training and provide computing devices to 70 eligible participants. A 'gurdwara' is defined as a Sikh place of worship, and the San Jose location has been provided a tax exemption by Santa Clara County as a religious organization. The project is scheduled to complete in January 2023.

Related/Prior Legislation

AB 2749 (Quirk-Silva, 2022) would establish streamlining requirements for the CASF Federal Funding Account (FFA). The bill would require the CPUC to complete reviews of FFA applicants within six months. The bill would deem any completed application approved if the CPUC has not taken action on the application by its review deadline. The bill is currently pending on the Senate Floor.

AB 1349 (Mathis, 2021) as heard by the Senate Energy, Utilities and Communications Committee, contained provisions substantially similar to this bill. The bill would have added nonprofit religious organizations to the list of entities eligible for CASF adoption grants. The bill contained chaptering conflicts with SB 4 (Gonzalez, Chapter 671, Statutes of 2021) and AB 14 (Aguiar-Curry, Chapter 658, Statutes of 2021). The bill is currently on the Assembly Inactive File.

SB 4 (Gonzalez, Chapter 671, Statutes of 2021) and AB 14 (Aguiar-Curry, Chapter 658, Statutes of 2021) extended and revised the CASF, including increasing the minimum speed of CASF-funded infrastructure to 100/20 mbps, expanding the definition of an unserved area, updating the program's funding mechanism, and eliminating the right of first refusal.

SB 156 (Committee on Budget and Fiscal Review, Chapter 112, Statutes of 2021) made various changes necessary to implement the Budget Act of 2021. The bill allocated $3.25 billion for the creation of a state-owned middle mile broadband network overseen by the California Department of Technology. The bill also made conforming changes to the CASF, including establishing the Federal Funding

Account within CASF and allocating $2 billion of federal funds to the account for the purpose of funding projects that deploy last-mile broadband infrastructure.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

SUPPORT: (Verified 8/23/22)

Sierra Business Council
The Rural Caucus of the California Democratic Party

OPPOSITION: (Verified 8/23/22)

None received

ARGUMENTS IN SUPPORT: According to the author, "For many small communities, especially within rural areas, the building of a religious organization is not simply a place of worship, but a building that is central to the wellbeing and functioning of the community. These buildings are commonly used for numerous non-religious activities and events, including after-school clubs and programs, a place where elderly groups meet, and as the venue for organizations that provide emotional support and addiction recovery services. In allowing religious organization to be eligible for funds within the Broadband Adoption Account, AB 1426 will increase broadband access and digital inclusion for the most vulnerable and remote regions of California."

SUBJECT: Planning and zoning: regional housing need allocation: climate change impacts

SOURCE: Author

DIGEST: This bill allows regional council of governments (COGs) to consider climate change impacts as a factor to develop methodology of housing need for each city and county within the region.

Senate Floor Amendments of 8/24/22 clarify that COGs shall consider, rather than require, any regional housing needs allocation factor, not just climate change impacts, and add a section that permits no reimbursement requirement.

ANALYSIS:

Existing law:

1) Requires every city and county to prepare and adopt a general plan, including a housing element, to guide the future growth of a community. The housing

element must identify and analyze existing and projected housing needs, identify adequate sites with appropriate zoning to meet the housing needs of all income segments of the community, and ensure that regulatory systems provide opportunities for, and do not unduly constrain, housing development.

2) Provides that each community's fair share of housing be determined through the regional housing needs allocation (RHNA) process, which is composed of three main stages:

   a) The Department of Finance and Department of Housing and Community Development (HCD) develop regional housing needs estimates;

   b) COGs allocate housing within each region based on these estimates (where a COG does not exist, HCD makes the determinations); and

   c) Cities and counties incorporate their allocations into their housing elements.

3) Requires COGs, or HCD as applicable, to adopt a methodology for RHNA allocation and plan to further the following five statutory objectives, as specified:

   a) Increasing the housing supply and mix of housing types, tenure, and affordability,

   b) Promoting infill development and socioeconomic equity, protecting environmental and agricultural resources, and encouraging efficient development patterns,

   c) Promoting an improved intraregional relationship between jobs and housing,

   d) Balancing disproportionate household income distributions,

   e) Affirmatively furthering fair housing.

4) Requires COGs to survey its member jurisdictions to gather information on the factors that must be considered for inclusion in the methodology.

5) Requires COGs, or HCD as applicable, to include the following factors, to the extent sufficient data is available from local governments, to develop its RHNA plan, with written explanation of how each factor was incorporated into the RHNA plan methodology and how the methodology furthers the statutory objectives, as specified:

   a) Existing and projected jobs and housing relationship.

b) Opportunities and constraints to development of additional housing.

c) Distribution of household growth and opportunities to maximize public transportation.

d) Loss of units in assisted housing developments.

e) Percentage of existing households at each income level.

f) Rate of overcrowding.

g) Housing needs of farmworkers.

h) Housing needs generated by universities.

i) Housing needs of individuals and families experiencing homelessness.

j) Loss of units during a state of emergency.

k) Greenhouse gas emissions targets.

l) Any other factors adopted by COG that further objectives.

6) Identifies several criteria that cannot be used as the basis for a determination of a jurisdiction's share of the regional housing need, including:

a) Any ordinance, policy, voter-approved measure or standard that directly or indirectly limits the number of residential building permits issued.

b) Prior underproduction of housing from the previous RHNA cycle.

c) Stable population numbers from the previous RHNA cycle.

This bill:

1) Authorizes, beginning in 2025, that the methodology used by a COG, or HCD as applicable, for allocating regional housing needs, to additionally consider among these factors emergency evacuation route capacity, wildfire risk, sea level rise, and other climate change impacts.

2) States this bill is not to be used to constrain, limit, or prohibit regional residential development, and for any identification or consideration of climate change impacts, there must also be an identification of the climate change impact of not building enough housing.

3) Provides that no reimbursement is required by this bill because a local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this bill, as specified.

Background

Every city and county in California is required to develop a general plan that outlines the community's vision of future development through a series of policy statements and goals. A community's general plan lays the foundation for all future land use decisions, as these decisions must be consistent with the plan. General plans are comprised of several elements that address various land use topics. State law mandates seven elements: land use, circulation (e.g., traffic), housing, conservation, open-space, noise, and safety.

Each community's general plan must include a housing element, which outlines a long-term plan for meeting the community's existing and projected housing needs. The housing element demonstrates how the community plans to accommodate its "fair share" of its region's housing needs. Following a staggered schedule, cities and counties located within the territory of a metropolitan planning organization (MPO) must revise their housing elements every eight years, and cities and counties in rural non-MPO regions must revise their housing elements every five years. These five- and eight-year periods are known as the housing element planning period.

Before each revision, each community is assigned its fair share of the region's housing need for four separate income categories (very low-, low-, moderate-, and above-moderate income households) through a two-step process known as RHNA. In the first step, HCD determines the aggregate housing need for the region during the planning period the housing element will cover. In the second step, the COG for the region allocates the regional housing need to each city and county within the region.

Comments

1) *Climate change impacts in California.* California's climate is generally expected to become hotter, drier, and more variable over the coming decades, increasing the risk of catastrophic wildfires, droughts, floods, extreme weather, biodiversity loss, and sea level rise. These changes will impact California's residents, water supply, ecosystems, and economy. California's Fourth Climate Assessment estimates the economic cost to California for these losses by 2050 will be over $100 billion annually. The scale and type of impacts will vary

across regions. People who are already vulnerable, including lower-income and other marginalized communities, have lower capacity to prepare for and cope with extreme weather and climate-related events and are expected to experience greater impacts.

This bill authorizes COGs or HCD to consider the impacts of climate change in developing the methodology for allocating regional housing need within a region. Regions could consider emergency evacuation route capacity, wildfire risk, sea level rise, or any other climate change-related factor.

The requirements in this bill would not become operative until 2025. As such, it would first apply to the seventh eight-year cycle of RHNA and housing elements, which is the earliest this bill could be applicable, given that the regional distribution methodology for the 6th cycle was developed for most jurisdictions in 2019 and 2020. However, its delayed implementation may effect this bill's efficacy.

It is important to note that currently, COGs are able to consider any other factors it adopted that further the statutory objectives and there is nothing preventing a COG from considering climate change impacts as a factor to develop its RHNA methodology.

2) *Piecemeal RHNA reform?* It is likely that the requirements for the next RHNA cycle will be considered in a more holistic way in the coming years. Such a review would provide a more timely opportunity than proposed amendments in this bill to discuss the issue of climate change as it relates to the entire RHNA and housing element process. Adding one factor at a time without reexamining the entirety of the methodology may not be useful or accurate. The unfortunate reality is that most jurisdictions are impacted by various climate change effects, which rarely stay within its jurisdiction's boundaries. There are better factors and geographic analyses to determine where new housing should be developed, which does not need to undermine mitigation of climate change impacts. For example, the Association of Bay Area Governments (ABAG), while not required, did consider the impacts of climate change during the development of its 6th cycle RHNA methodology. Almost all of ABAG's member jurisdictions have a moderate to high climate change impact risk, therefore ABAG ultimately decided to focus on existing factors, such as access to high opportunity areas and proximity to jobs by automobiles and public transit.

3) *Unintended consequences?* While it is essential that the impact of climate change informs and improves how we plan for more housing, the general plan process already must account and plan for climate change. Creating an

additional factor in an already complex methodology of housing need may bring some unintended consequences, such as creating or promoting "no growth" planning policies that restrict opportunities for development.

Some anti-housing and anti-growth advocates make bad faith "climate arguments" against new housing, claiming that new housing in urbanized areas makes climate change worse, when the opposite is true. It is important not to empower anti-housing advocates to rely on climate change to kill new housing.

Intent language in the bill specifically states that these additional factors are not to be used to constrain, limit, or prohibit regional residential development, and for any identification or consideration of climate change impacts, there must also be an identification of the climate change impact of not building enough housing.

Related/Prior Legislation

SB 182 (Jackson, 2020) would have, among other provisions, required RHNA methodologies to further the objective of promoting resilient communities, and specifically reduce development pressure within areas with very high risk of wildfires. *The bill was vetoed by the Governor*.

AB 139 (Quirk-Silva, Chapter 335, Statutes of 2019) made several changes to housing element law regarding emergency shelters; including requiring a COG, or HCD where appropriate, to the extent sufficient data is available from local governments, to include the housing needs of individuals and families experiencing homelessness in developing the methodology that allocates regional housing needs.

AB 2238 (Aguiar-Curry, Chapter 990, Statutes of 2018) enacted a number of changes to laws affecting local agencies to account for threats posed by fires; including requiring a COG, or HCD where appropriate to include units lost during a Governor-declared emergency to the list of data considered to develop the methodology that allocates regional housing need.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- Staff estimates potential ongoing HCD costs of up to $61,000 annually, beginning in 2024-25, to evaluate additional data on emergency evacuation route capacity, wildfire risk, sea level rise, and other impacts caused by climate change when developing a final regional housing plan for cities and counties without a COG, to the extent the parties agree to consider those impacts. HCD

would also provide guidance to COGs for the preparation of local agency surveys and consultations with local jurisdictions to collect relevant data and information on the impacts of climate change on the development of housing. (General Fund)

OPPOSITION: (Verified 8/22/22)

City of Beverly Hills

ARGUMENTS IN SUPPORT: According to the author, "Climate disasters and the impacts of climate change on our state have made more and more places risky to live. In 2020, California experienced another devastating and record-breaking wildfire season; 4,257,863 acres burned, 33 lives were lost and 10,488 structures damaged or destroyed. In addition to fires, severe drought and periods of record-breaking heat, science has shown that climate change will result in a gradual and permanent rise in global sea levels. The U.S. Geological Survey estimates that by 2100, about 6 feet of sea level rise and recurring annual storms could impact over 480,000 California residents. Unfortunately, as our state faces a climate crisis, it also faces a housing crisis and local governments must factor the impacts of climate disasters into their housing planning. AB 1445 requires a council of governments, a delegate subregion or the Department of Housing and Community Development to, starting in January 1, 2025, additionally consider among other required factors, emergency evacuation route capacity, wildfire risk, sea level rise and other impacts of climate change. This bill will ensure local governments are taking into account the impending impacts of climate change and disasters on risk to residents when planning for housing in their communities."

ARGUMENTS IN OPPOSITION: The City of Beverly Hills is in opposition, stating that, "The state should not add new requirements to the RHNA planning

process without taking concrete steps to improve the current process and allow for greater collaboration between jurisdictions."

SUBJECT: Student safety: sexual assault and domestic violence procedures and protocols: sexual assault and domestic violence counselors

SOURCE: Author

DIGEST: This bill requires sexual assault and domestic violence counselors at public colleges and universities to be independent from the Title IX office, prohibits sexual assault and domestic violence counselors from releasing the identity of the victim without first obtaining specific permission, and authorizes the California State University (CSU) chancellor to collaborate with specified entities when reviewing executive orders related to discrimination, harassment, and retaliation.

Senate Floor Amendments of 8/16/22 include double-jointing language to avoid chaptering issues with AB 1936 (Ramos).

ANALYSIS:

Existing federal law:

1) Provides that, in part, "no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any educational program of activity receiving Federal financial assistance." Enforcement of compliance is initiated upon the filing of a complaint alleging a violation of Title IX.

2) Requires each school district and county office of education, or a local public or private agency that receives funding from the state or federal government, to designate a person to serve as the Title IX compliance coordinator to enforce compliance at the local level, including coordinating any complaints of non-compliance. (Title IX of the Education Amendments of 1972 to the 1964 Civil Rights Act)

Existing state law:

1) Requires each educational institution in California (K-12 and postsecondary education) to have a written policy on sexual harassment, and requires schools to display the policy in a prominent location in the main administrative building or other area of the campus or schoolsite, be provided as part of any orientation program for new students, provided to each faculty member, administrative staff and support staff, and appear in any publication of the school that sets forth the rules, regulations, procedures and standards of conduct. (Education Code § 231.5 and § 66281.5)

2) Requires, as a condition of receiving state financial assistance, the appropriate governing board or body of each campus of the University of California (UC), CSU, California Community Colleges (CCC), private postsecondary educational institutions, and independent institutions of higher education to implement, and at all times comply with, specified requirements including disseminating a notice of nondiscrimination, designating an employee to coordinate compliance, and adopting rules and procedures within the policies required by state and federal law. (EC § 66281.8)

3) Requires the governing board of each community college district, the Trustees of the CSU, the Regents of the UC, and the governing boards of independent postsecondary institutions to adopt policies concerning campus sexual violence, domestic violence, dating violence, and stalking that includes an affirmative consent standard, detailed and victim-centered policies and protocols, and the

standard used in determining whether the elements of the complaint against the accused have been demonstrated is the preponderance of the evidence. (EC § 67386)

4) Requires the governing board of each community college district, the Trustees of the CSU, the Board of Directors of the Hastings College of the Law, and the Regents of the UC shall each adopt, and implement at each of their respective campuses or other facilities, a written procedure or protocols to ensure, to the fullest extent possible, that students, faculty, and staff who are victims of sexual assault receive treatment and information. If appropriate on-campus treatment facilities are unavailable, the written procedure or protocols may provide for referrals to local community treatment centers. (EC § 67385)

5) Requires schools to post information on their Web sites relative to the designated Title IX coordinator, rights of students and responsibilities of schools, and a description of how to file a complaint. (EC § 221.61)

6) Provides that the victim of a sexual assault has a privilege to refuse to disclose, and to prevent another from disclosing, a confidential communication between the victim and a sexual assault counselor if the privilege is claimed by any of the following: a) The holder of the privilege; b) A person who is authorized to claim the privilege by the holder of the privilege; or c) The person who was the sexual assault counselor at the time of the confidential communication, but that person may not claim the privilege if there is no holder of the privilege in existence or if he or she is otherwise instructed by a person authorized to permit disclosure. (Evidence Code § 1035.8.)

7) Defines "sexual assault counselor," for purposes of the sexual assault counselor-victim privilege, to include, among others, a person who is engaged in sexual assault counseling on the campus of a public or private institution of higher education. (Evidence Code § 1035.2)

This bill requires sexual assault and domestic violence counselors at public colleges and universities to be independent from the Title IX office, prohibits sexual assault and domestic violence counselors from releasing the identity of the victim without first obtaining specific permission, and authorizes the California State University (CSU) chancellor to collaborate with specified entities when reviewing executive orders related to discrimination, harassment, and retaliation. Specifically, this bill:

Information about options for victims

1) Expands the options to be included in existing procedures ensuring that each victim of sexual assault or domestic violence to also include counselors and support services for victims, and alternative dispute resolution or other accountability processes.

Sexual assault and domestic violence counselors

2) Requires a sexual assault and domestic violence counselor to be independent from the Title IX office, and at a minimum, meet existing qualifications pursuant to the Evidence Code.

3) Prohibits services provided by sexual assault and domestic violence counselors from being contingent upon a victim's decision to report to the Title IX office or law enforcement.

4) Requires a sexual assault or domestic violence counselor to obtain specific permission from the victim before disclosing the identity of the victim, or any information that could reasonably be expected to reveal the identity of the victim, to the university or any other authority, including law enforcement, unless otherwise required to do so by applicable state or federal law.

Executive order review

5) Authorizes the Chancellor of the CSU, when reviewing and updating any executive orders relating to discrimination, harassment, and retaliation, to do so in collaboration with any of the following:

    a) The Systemwide Title IX Office.

    b) The Executive Vice Chancellor of Academic and Student Affairs, the Associate Vice Chancellor for Student Affairs and Enrollment Management, the Vice Presidents for Student Affairs, and other Executive Vice Chancellors and Vice Chancellors.

    c) The Office of General Counsel.

    d) The Vice Chancellor of Human Resources and other human resources and academic personnel officers.

    e) Campus Title IX coordinators.

    f) Presidents and provosts of the various campuses of the university.

g) Sexual assault counselors, confidential sexual assault victims advocates, and domestic violence counselors.

h) Representatives of the student bodies at each campus of the university.

i) The Vice Chancellor of Administration and Finance.

6) Requires the Chancellor of the CSU to submit the text of all executive orders to which this bill applies in an annual report to the respective chairs of the Assembly Committee on Higher Education and the Senate Committee on Education.

General

7) Defines "specific permission" to mean all of the following, and provides that unlimited or general permission for disclosure is not specific permission:

a) The permission is limited to disclosure to particular people, for a particular circumstance, or for a particular purpose for which the permission was given.

b) The permission is limited to the counselor to whom it was given.

c) The permission may be withdrawn.

Comments

Need for the bill. According to the author, "Sexual assault counselors are in a unique position to observe, assess, and participate in the response to campus sexual assault. On-campus counselors assist student survivors by providing both emotional support and information regarding on-campus and community-based resources. This can include counseling or crisis intervention, as well as assistance navigating the reporting process if a survivor wishes to file a report. Counselors may also accompany survivors to appointments, meetings, or hearings. Historically, sexual assault counselors have been exempt from having to report instances of sexual misconduct to the university or law enforcement, providing a confidential resource for survivors seeking help.

"To fully support survivors in a trauma-centered manner, it is vital that sexual assault counselors focus on the needs of the survivor. The role of a sexual assault counselor is to explain all options and also supports any decision the survivor makes, which may include action against the university. In these situations, the sexual assault counselor may fear losing their employment or other forms of

retribution due to their support of student survivors. Campus-based sexual assault counselors and advocates should have clear protections in place in order to have an ability to act independent from the University, in the best interest of the survivor without threat or fear of retaliation from the University."

Title IX. Title IX prohibits the exclusion of any person, on the basis of sex, from participation in, be denied the benefits of, or be subjected to discrimination under any educational program of activity receiving federal financial assistance. Title IX applies to schools, local and state educational agencies, and other institutions that receive federal financial assistance from the federal Department of Education.

An institution that receives federal financial assistance must operate its education program or activity in a nondiscriminatory manner free of discrimination based on sex, including sexual orientation and gender identity. Some key issue areas in which recipients have Title IX obligations are: recruitment, admissions, and counseling; financial assistance; athletics; sex-based harassment, which encompasses sexual assault and other forms of sexual violence; treatment of pregnant and parenting students; treatment of LGBTQI+ students; discipline; single-sex education; and employment.

Title IX offices conduct investigations of violations of Title IX, including sexual assault. This bill requires sexual assault counselors to be independent from the Title IX office. However, this bill does not preclude sexual assault counselors from being employed by the postsecondary educational institution.

Related/Prior Legislation

AB 1968 (Seyarto, 2022) requires the CSU and requests the UC to develop content and presentation standards and a model internet website template regarding the steps a student who is a victim of sexual assault may take immediately following the assault. AB 1968 requires the standards and model website template to be developed in collaboration with sexual assault survivor advocates and others who work with sexual assault victims. AB 1968 is pending on the Senate Floor.

AB 2683 (Gabriel, 2022) requires the CCC and CSU, and requests UC and any independent institution of higher education or private postsecondary education institution that receives state financial assistance, to provide annual sexual harassment and sexual violence prevention training to students. AB 2683 requires all students attending the CCC, CSU, and any independent institution of higher education or private postsecondary education institution that receives state financial assistance to attend an annual sexual violence and harassment training

beginning September 1, 2024. AB 2683 is on the Senate Appropriations Committee suspense file.

SUBJECT: Collective bargaining: Legislature

SOURCE: California Labor Federation, AFL-CIO

DIGEST: This bill establishes the Legislature Employer-Employee Relations Act (LEERA) to provide collective bargaining rights to Legislative employees, as specified.

Senate Floor Amendments of 8/23/22 (1) require the Legislature to freely provide to union representatives nonconfidential information necessary and relevant to the union's scope of representation; (2) state that the bill does not require the Legislature to provide confidential information which it defines as information contained in records exempt from public disclosure under federal or state law; and (3) excludes from "confidential information" the name, job title, office, workplace

location, work telephone number and email address, and home or personal telephone number and email address, if on file with the Legislature, for employees in the union's bargaining unit.

Senate Floor Amendments of 8/22/22 define "confidential" legislative employees and exclude them from the bill's collective bargaining provisions.

ANALYSIS:

Existing law:

1) Governs collective bargaining in the private sector under the federal National Labor Relations Act (NLRA) but leaves to the states the regulation of collective bargaining in their respective public sectors. While the NLRA and the decisions of its National Labor Relations Board (NLRB) often provide persuasive precedent in interpreting state collective bargaining law, public employees generally have no collective bargaining rights absent specific statutory authority establishing those rights (29 United State Code § 151 et seq.).

2) Provides several statutory frameworks under California law to provide public employees collective bargaining rights, govern public employer-employee relations, and limit labor strife and economic disruption in the public sector through a reasonable method of resolving disputes regarding wages, hours and other terms and conditions of employment between public employers and recognized public employee organizations or their exclusive representatives. These include the Dills Act, which provides collective bargaining for state employees of the executive branch and establishes a process for determining wages, hours, and terms and conditions of employment for represented employees. The Act excludes managers and confidential employees from bargaining rights. (Government Code § 3512 et seq.)

3) Requires the Governor and the recognized state employee organizations to meet and confer in good faith regarding wages, hours, and other terms and conditions of employment and, if they reach an agreement, to jointly prepare a written memorandum of understanding (MOU), which the Governor shall present, when appropriate, to the Legislature for determination. (GC § 3517 et seq.)

4) Establishes a civil service that includes every officer and employee of the State except as otherwise provided in the Constitution and requires that the State make permanent appointment and promotion in the civil service under a

general system based on merit ascertained by competitive examination. (Cal. Const., art. VII, § 1.)

5) Defines the powers of state government as legislative, executive, and judicial and prohibits persons charged with the exercise of one power from exercising either of the others except as permitted by the Constitution. (Cal. Const., art. III, § 3.)

6) Establishes the California Legislature which consists of the Senate and Assembly and in which the people, through the state constitution, have vested the state's legislative power. (Cal. Const., art. IV, § 1.)

7) Exempts officers and employees appointed or employed by the Legislature, either house, or legislative committees from the state civil service. (Cal. Const., art. VII, § 4, subd. (a))

8) Limits for the Legislature, state-financed incumbent staff and support services, among other things, in order to counter the unfair incumbent advantages that discourage qualified candidates from seeking public office and create a class of career politicians, instead of the citizen representatives envisioned by the Founding Fathers. (Cal. Const., art. IV, § 1.5.)

9) Prohibits the total aggregate expenditures of the Legislature for the compensation of members and employees of, and the operating expenses and equipment for, the Legislature from exceeding an amount equal in 1991 to $950,000 per member for that fiscal year or 80 percent of the amount of money expended for those purposes in the preceding fiscal year and for each fiscal year thereafter, an amount equal to that expended for those purposes in the preceding fiscal year, adjusted and compounded by an amount equal to the percentage increase in the appropriations limit for the State established pursuant to Article XIII B of the Constitution. (Cal. Const., art. IV, § 7.5.)

10) Establishes the Judicial Council Employer-Employee Relations Act (JCEERA) which provides collective bargaining rights to Judicial Council employees, as specified. (GC § 3524.50 et seq.)

11) Requires the Administrative Director of the Courts, or his or her designated representatives, acting with the authorization of the Chairperson of the Judicial Council, to meet and confer in good faith regarding wages, hours, and other terms and conditions of employment with representatives of recognized employee organizations, and to consider fully such presentations as are made

by the employee organization on behalf of its members prior to arriving at a determination of policy or course of action. (GC § 3524.63 et seq.)

12) Requires the Administrative Director of the Courts and the recognized employee organization, if they reach an agreement, to jointly prepare a written memorandum of the agreement, which the Administrative Director of the Courts shall present, when appropriate, to the Legislature for appropriation of funding and amendment of any related statutes. (GC § 3524.63 et seq.)

13) Establishes the Public Employee Relations Board (PERB), a quasi-judicial administrative agency, to administer the collective bargaining statutes covering public employees including school, college, state, local agency, and trial court employees. PERB consists of five members appointed by the Governor by and with the advice and consent of the Senate. Existing law tasks PERB with administering several public employee labor relations statutes that provide collective bargaining to California public employees, including the Dills Act and JCEERA, and adjudicating unfair labor practice claims under the respective acts. (GC § 3541 et seq.)

This bill:

1) Authorizes collective bargaining for legislative employees by enacting the Legislature Employer-Employee Relations Act (LEERA).

2) Replaces the conjunctive conjunction "and" with the disjunctive conjunction "or" and replaces references to "the Speaker of the Assembly and the President pro Tempore of the Senate" with "the Assembly Committee on Rules or the Senate Rules Committee" in the definition of "Legislature". Recognizes each chamber's Rules Committees as the separate employer of its respective chamber's employees and clarifies somewhat that LEERA should apply to each house as a separate employer toward their respective employees.

3) Prohibits the Public Employment Relations Board (PERB) from including within a bargaining unit, employees from both the Assembly and Senate. Clarifies that the two chambers are separate employers and that LEERA should apply to them separately.

4) Eliminates the provision that requires side letters be referred to the Joint Legislative Budget Committee for consideration. Supports the possibility that LEERA will apply to each house as separate employers under LEERA's collective bargaining framework.

5) Clarifies which legislative employees are excluded from LEERA by excluding the category "*Department or office leader"* from the definition of "employee" and defining the category to mean "any supervisory employee having authority, in the interest of the employer, to hire, transfer, suspend, lay off, recall, promote, discharge, assign, reward, or discipline other employees, or responsibility to direct them, or effectively to recommend this action, if, in connection with the foregoing, the exercise of any authority is not of a merely routine or clerical nature, but requires the use of independent judgment."

6) Excludes confidential legislative employees from collective bargaining and defines "Confidential employee" to mean any employee who is required to develop or present management positions with respect to employer-employee relations or whose duties normally require access to confidential information contributing significantly to the development of management positions.

7) Requires the Legislature to freely provide to union representatives nonconfidential information necessary and relevant to the union's scope of representation; specifies that the bill does not require the Legislature to provide confidential information defines as information contained in records exempt from public disclosure under federal or state law; but excludes from "confidential information" the name, job title, office, workplace location, work telephone number and email address, and home or personal telephone number and email address, if on file with the Legislature, for employees in the union's bargaining unit. Provides union representatives access to employee information, including personal contact information, as specified.

8) Requires the respective houses to pass resolutions to ratify MOUs, adopt side letters, or impose Last Best Final Offers instead of doing so through statutes requiring the Governor's approval. Eliminates, to avoid some potential separation of powers issues, one source of executive branch interference in the Legislature's internal affairs.

9) Specifies that the bill becomes operative on July 1, 2024, thereby allowing time for the respective Rules Committee representatives and employee representatives to begin meeting and conferring, and for PERB to begin preparing for possible union organizing elections, and for developing appropriate bargaining units.

10) Eliminates references to "bona fide associations" in the provision regarding employee organizations for which the Legislature would be required to adopt rules to register and recognize as employee organizations. Bona fide

associations are organizations of employees that do not have as one of their purposes representing employees in employer-employee relations.

Comments

Need for this bill? According to the author:

> The Legislature is the only branch of California's government whose employees cannot reap the benefits and protections that come with the right to collectively bargain. This imbalance of power leaves legislative employees little to no opportunity to address their concerns in a meaningful way or shape their workplace conditions.
>
> AB 1577 will establish the Legislature Employer-Employee Relations Act and grant legislative employees the right to collectively bargain for the terms and conditions of their employment. This will allow employees the right to form or join a union to negotiate with employers over workplace conditions such as wages, benefits, health and safety issues, and job training.

Continuing Issues/Concerns

Although recent amendments address several issues, some remain, including the following:

- Continued separation of powers problems arising from PERB's status as an executive branch agency composed of members appointed by the Governor. An appellate panel from PERB's final orders appointed by the Legislature or a binding arbitration mechanism might resolve this issue.

- No "excluded position blanket" similar to that provided to the Chief Justice in the judicial branch to ensure the employer has sufficient staff to develop its bargaining positions.

- The potential chilling effect from the bill's misdemeanor fine provision that exposes licensed employees to regulatory discipline and potential license revocation whose job otherwise requires they provide unfiltered counsel to the Legislature and its members.

- No statutory limitation on the length of MOU terms nor requirement that MOU terms align with Legislative terms. Long MOU terms could impose conditions on future Legislatures that may invoke unconstitutional restrictions on their power.

- Continued conflict of interest issues related to the possibility of unions representing legislative employees while advocating for legislative initiatives. A non-lobbying provision or an independent, non-affiliated union requirement may address this issue.

- No statutory prohibition or regulation on strike actions. The Legislature may wish to consider either a ban or requirement that strike actions only occur during a defined window period to avoid significant disruption of the legislative calendar and the ability particularly of members with short terms to accomplish their legislative objectives for their constituents.

- Requirements that the Legislature provide employees' personal, non-work contact information (presumably intended to facilitate union-employee communication) may be viewed by some employees as an intrusion on their privacy. Although language provides that the Legislature only must turn over the information if it is on file with the Legislature, the Legislature has required staff to involuntarily provide personal contact information as part of its working conditions, and therefore, presumably has that information on file.

(NOTE: Please see the Senate Labor, Public Employment and Retirement Committee policy analysis for a more detailed list of issues and concerns.)

Related/Prior Legislation

AB 314 (Gonzalez, 2021) was substantively identical to this bill. The Assembly held AB 314 at the Desk.

AB 969 (Gonzalez, 2019) was substantively identical to this bill. The Assembly Public and Retirement Committee held AB 969 in committee.

AB 2048 (Gonzalez, 2018) was substantially similar to this bill except that bill included specific provisions related to fair share fees (i.e., fees non-union members would have to pay for the benefits that they received resulting from the union's bargaining efforts). U.S. Supreme Court case law has since prohibited mandatory fair share fees.

AB 83 (Santiago, 2017, Chapter 835, Statutes of 2017) established the Judicial Council Employer-Employee Relations Act, which provides collective bargaining rights to specified Judicial branch employees.

AB 874 (Santiago, 2016) would have applied the Ralph C. Dills Act to certain specified employees of the Judicial Council, thereby providing collective bargaining rights to these employees. The Governor vetoed the bill.

AB 2355 (Floyd, 2000) would have included nonsupervisory Legislative employees within the definition of "state employees" in the Ralph C. Dills Act, which authorizes collective bargaining for state employees.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The Public Employment Relations Board (PERB) estimates that it would incur first-year costs of $124,000, and $95,000 annually thereafter, to implement the provisions of the bill (General Fund).

- This bill would result in annual costs to the Legislature to establish and maintain labor and employee relations functions (General Fund). Additionally, to the extent that the bill results in salary or benefits increases resulting from collective bargaining, it could lead to increased ongoing employment costs. However, under the Constitution, the Legislature's annual spending is capped; consequently, the costs resulting from this bill could not be accommodated through budgetary increases relative to current law, and thus would likely displace existing workload and spending. (See Staff Comments).

- This bill could result in minor additional penalty revenue to the state.

OPPOSITION: (Verified 8/24/22)

Govern for California

ARGUMENTS IN SUPPORT: According to the California Labor Federation, AFL-CIO:

> The Legislature stands as the only branch of California government whose employees cannot reap the benefits and protections that come with the right to collective bargaining. Legislative employees are also exempt from civil service rules, can be hired and fired at will, and lack many of the workplace protection laws that cover employees in private and other public employment settings. This imbalance of power leaves legislative employees little or no opportunity to shape their workplace conditions or address their concerns in a meaningful way.
>
> In recent years, there has been a wave of campaign, political, and legislative employees across the country successfully unionizing and entering into collective bargaining agreements. The 2020 campaign cycle included many unionized campaigns, with several Democratic Presidential campaigns voluntarily recognizing and ratifying collective bargaining agreements with their staff, including the campaign of President Joseph R. Biden. Last year, employees of the Oregon State Legislature became the first in the nation to

successfully form a statewide legislative staff union. Earlier this year, the Washington State Legislature also followed suit and passed legislation granting their staff the right to unionize. Most notably last month, the House of Representatives passed a resolution granting political and apolitical staffers, including legislative aides, district and committee staff, the legal protections to form a union.

In any workplace, an imbalance of power leaves workers with little to no recourse to make their voice heard. In recent years, various events, including the #MeToo Movement and the COVID-19 pandemic, have shed a spotlight on legislative employees' fear of retribution for voicing workplace concerns and their lack of tangible workplace protections in statute due to their at-will status. AB 1577 will grant employees of the Legislature agency over the decision to form and join a union, without fear of retaliation, and have a collective voice over their working conditions and protections in the workplace.

ARGUMENTS IN OPPOSITION: According to Govern for California:

AB 1577, while well-intentioned, is replete with potential conflicts of interest that could easily frustrate the Legislature's critical work. As legislative employees play an indispensable role assisting elected officials to serve their constituents, how could they maintain this service if a union representing them could take contrary positions to bills proposed by Assembly members or Senators? Politically, these unions could also work to defeat legislators and significantly affect the employment of the very people charged with serving these elected officials.

"Rather than allowing legislative employees to unionize. We recommend that the Legislature thoroughly evaluate the basic protections granted to private sectors employees and work to extend those protections to employees of the legislative branch. This would also send the salutary message that the California Legislature is willing to subject itself to the same requirements it imposes on the private sector.

SUBJECT: Employment protections: mass layoff, relocation, or termination of employees: call centers

SOURCE: Communications Workers of America, District 9

DIGEST: This bill requires call center employers, as defined, to include "This is a notice of call center relocation" in notices given to employees 60 days before a planned relocation of a call center in California.

Senate Floor Amendments of 8/25/22 make the following changes:

1) Require an employer notice of relocation of a call center under Labor Code Section 1401 to contain "This notice is for the relocation of a call center."

2) Require the Employment Development Department to compile and publish a list of call center employers that have given notice described above.

3) Define, for the provisions of Article 2 of the bill, "relocation of a call center" includes when the employer intends to move its call center, or one or more facilities or operating units within a call center comprising at least 30 percent of the call center's or operating unit's total volume compared to the average for the previous 12 months.

4) Require that employers who appear on the list described above be ineligible for state grants or loans for five years, as specified. Allow a relevant state agency, as defined, to waive this ineligibility if good cause exists.

5) Require that the above updated notice requirements under Labor Code Section 1410 be enforced by the same code sections which apply penalties to Labor Code Section 1401, including but not limited to Labor Code Sections 1402, 1403, 1404,1406, and 1407. However, an employer found in violation of Labor Code Section 1410 is not necessarily guilty of a violation of Labor Code Section 1401.

6) Allow the Labor Commissioner to enforce notice requirements for employers regarding layoffs (LC §1401) or updated notice requirements discussed above.

ANALYSIS: Existing federal law establishes the Worker Adjustment and Retraining Notification (WARN) Act, which prohibits an employer from ordering a plant closing or mass layoffs until the end of a 60-day period after the employer serves written notice to (1) each representative of the affected employees or to each affected employee; and (2) the state or entity designated by the state to carry out rapid response activities and the chief elected official of the unit of local government within which such closing or layoff is to occur. (Title 29 §2101 United States Code)

Existing state law:

1) Defines the following terms:

   a) "Covered establishment" means any industrial or commercial facility or part thereof that employs, or has employed within the preceding 12 months, 75 or more persons.

   b) "Employer" means any person who directly or indirectly owns and operates a covered establishment. A parent corporation is an employer as to any

covered establishment directly owned and operated by its corporate subsidiary.

c) "Layoff" means a separation from a position for lack of funds or lack of work.

d) "Mass layoff" means a layoff during any 30-day period of 50 or more employees at a covered establishment.

e) "Relocation" means the removal of all or substantially all of the industrial or commercial operations in a covered establishment to a different location 100 miles or more away.

f) "Termination" means the cessation or substantial cessation of industrial or commercial operations in a covered establishment.

g) "Employee" means a person employed by an employer for at least 6 months of the 12 months preceding the date on which notice is required. (Labor Code §1400)

2) Establishes the California State WARN Act, which prohibits an employer from ordering a mass layoff, relocation, or termination at a covered establishment unless, 60 days before the order takes effect, the employer gives written notice of the order to the following:

a) The employees of the covered establishment affected by the order.

b) The Employment Development Department (EDD), the local workforce investment board, and the chief elected official of each city and county government within which the termination, relocation, or mass layoff occurs.

c) Further orders an employer required to give notice of any mass layoff, relocation, or termination under this act to include in its notice the elements required by the federal WARN Act. (Labor Code §1401)

3) Specifies employer is not required to provide notice if a mass layoff, relocation, or termination is necessitated by a physical calamity or act of war. (Labor Code §1401)

4) States that an employer who fails to give notice as required is liable to each employee who was entitled to the notice and lost their employment for:

a) Back pay at the average regular rate of compensation received by the employee during the last three years of his or her employment, or the employee's final rate of compensation, whichever is higher.

b) The value of the cost of any benefits to which the employee would have been entitled had his or her employment not been lost, including the cost of any medical expenses incurred by the employee that would have been covered under an employee benefit plan.

c) Liability for this penalty is calculated for the period of the employer's violation, up to a maximum of 60 days, or one-half the number of days that the employee was employed by the employer, whichever period is smaller. (Labor Code §1402)

5) Provides that the amount of an employer's liability described in the above section is reduced by the following:

a) Any wages, except vacation moneys accrued prior to the period of the employer's violation, paid by the employer to the employee during the period of the employer's violation.

b) Any voluntary and unconditional payments made by the employer to the employee that were not required to satisfy any legal obligation.

c) Any payments by the employer to a third party or trustee, such as premiums for health benefits or payments to a defined contribution pension plan, on behalf of and attributable to the employee for the period of the violation. (Labor Code §1402)

6) Provides that an employer is not required to comply with the WARN notice requirements if EDD determines that all of the following conditions exist:

a) As of the time that notice would have been required, the employer was actively seeking capital or business.

b) The capital or business sought, if obtained, would have enabled the employer to avoid or postpone the relocation or termination.

c) The employer reasonably and in good faith believed that giving the WARN notice would have precluded the employer from obtaining the needed capital or business.

d) The employer provided the department with both a written record consisting of all documents relevant to the determination of whether the employer was actively seeking capital or business, as specified by the department and an affidavit verifying the contents of the documents contained in the record.

e) This section does not apply to a notice of a mass layoff, as defined. (Labor Code §1402.5)

7) Imposes a penalty of $500 on an employer for each day of an employer's noncompliance if that employer fails to give notice as required to EDD, the local workforce investment board, and the chief elected official of each city and county government. The employer is not subject to this civil penalty if the employer pays to all applicable employees the amounts for which the employer is liable within three weeks from the date the employer orders the mass layoff, relocation, or termination. (Labor Code §1403)

8) Allows a person, including a local government or an employee representative, seeking to establish liability against an employer to bring a civil action on behalf of the person, other persons similarly situated, or both, in any court of competent jurisdiction. The court may award reasonable attorney's fees as part of costs to any plaintiff who prevails in such a civil action. (Labor Code §1404)

9) Authorizes the Labor Commissioner to examine the books and records of an employer for the purposes of any WARN Act investigation or proceeding. (Labor Code §1406)

10) States that the WARN Act does not apply to employees who are employed in seasonal employment where the employees were hired with the understanding that their employment was seasonal and temporary. (Labor Code §1400)

This bill:

1) Defines the following terms:

a) "Call Center" means a facility or other operation where workers, as their primary function, receive telephone calls or other electronic communication for the purpose of providing customer service or other related functions.

b) "Call Center Employer" means an employer of a covered establishment, as defined, who operates a call center.

c) *For the purposes of Article 2 of AB 1601:* "Relocation of a Call Center" includes when the employer intends to move its call center, or one or more facilities or operating units within a call center comprising at least 30 percent of the call center's or operating unit's total volume when measured against the average call volume for the previous 12 months, or substantially similar operations to a foreign country.

2) Requires an employer notice of relocation of a call center under Labor Code Section 1401 to contain "This notice is for the relocation of a call center".

3) Requires EDD to compile and publish a list of call center employers that have given notice described above.

4) Requires that violations of the above updated notice requirements be enforced through the provisions and remedies that apply to Labor Code Section 1401. However, an employer that violates Section 1410 is not necessarily guilty of a violation of Section 1401 for the same set of facts.

5) Prohibits an employer who appears on the list of employers who have given relocation notice from being awarded any direct or indirect state grants, or state-guaranteed loans, for a period of five years, beginning on the date the list is published. Further prohibits such an employer from claiming a tax credit for five taxable years, beginning on the date the list was published. A relevant state agency may waive this ineligibility with good cause.

   a) A state agency may waive the ineligibility of an employer after receiving a written request from the employer and consulting with the commissioner.

6) Clarifies that this bill should not be construed to permit withholding or denial of payments, compensation, or benefits under any other state law to workers employed by employers who relocate, including unemployment compensation, disability payments, or worker retraining funds.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee:

- The Department of Industrial Relations would likely incur costs, minimally in the hundreds of thousands of dollars annually, to administer the provisions of this bill. (Labor Enforcement and Compliance Fund). Additionally, this bill could result in minor penalty revenue.

- Costs to EDD have yet to be identified.

- To the extent that employers intending to move call centers overseas become ineligible under this bill for state grants, guaranteed loans and tax credits, the state could realize potential cost savings. However, the related enforcement would impact several state agencies, the aggregate cost of which is unknown.

ARGUMENTS IN SUPPORT: The Communication Workers of America, District 9, the sponsor of this bill, writes in support:

> Over the past decade, it has become common practice for profitable corporations to reap the benefits of State subsidies, while at the same time exporting call center jobs overseas. Since 2011, AT&T alone has shut down five call centers in California. These offshoring practices often have devastating impacts on communities as their once good-paying jobs are taken away. Adding insult to injury, these communities' tax dollars are helping to subsidize the very companies that abandoned them. AB 1601 would curtail these destructive corporate practices by denying State grants, State-guaranteed loans, or tax credits for 5 years to any company that relocates 30 percent or more of their call center work to another country.
>
> Call center customer service jobs provide workers with more income stability and job security than they may seem. They are pathways to long-term careers and have kept some workers employed for more than 30 years in that industry. Removing these jobs from California will not only have a negative impact on the state's unemployment rate, but it will also create devastating impacts on communities statewide.

ARGUMENTS IN OPPOSITION: The California Chamber of Commerce writes in opposition:

> AB 1601 will deter companies from creating jobs in California because it improperly penalizes any companies who move California call center operations to a different country. Governor Newsom vetoed this same bill in 2019 for this exact reason. AB 1601 also appears to exceed the boundaries of California's jurisdiction by regulating activities in other countries and, therefore, is likely unlawful.
>
> Assuming the intent of AB 1601 is to discourage call centers from relocating outside of the state, we do not believe that such punitive measures is the proper method. Rather, legislation should be directed at encouraging businesses to stay in this state by alleviating some of the burdens that are forcing them to leave California.

SUBJECT: County officers: consolidation of offices

SOURCE: ACLU California Action
California Faculty Association
California Medical Association
Justice for Angelo Quinto! Justice for All! Coalition
Secure Justice
The Miles Hall Foundation
Union of American Physicians and Dentists

DIGEST: This bill removes counties' ability to consolidate the offices of the sheriff and coroner, and specifies that if the offices of sheriff and coroner were consolidated before January 1, 2023, the board of supervisors must separate those offices.

ANALYSIS:

Existing law:

1) Establishes the number, appointment, and election procedures for county officials, including the board of supervisors.

2) Requires, under the California Constitution, all counties to elect a sheriff, district attorney, assessor, and board of supervisors.

3) Establishes in statute additional offices, including the sheriff and coroner.

4) Allows counties to adopt charters to specify their own governance structure, including electing additional supervisors and appointing or electing additional officers.

5) Tasks the coroner with determining the circumstances, cause, and manner of certain deaths, such as deaths that are violent, sudden, or unusual, or potentially stem from criminal activity.

6) Allows the board of supervisors to enact an ordinance to consolidate the sheriff and coroner into a single elected office or abolish the office of coroner and instead appoint a medical examiner to carry out the coroner's duties.

7) Requires a medical examiner to be a licensed physician and surgeon specializing in pathology, and requires any forensic autopsy to determine the cause of death to be done by a medical professional.

8) Prohibits, where an individual dies as a result of law enforcement activity, law enforcement involved in the death from entering the autopsy suite or having any involvement in the examination.

This bill:

1) Eliminates the authority of a county board of supervisors to consolidate the duties of the sheriff with the duties of the coroner.

2) Specifies that if the offices of sheriff and coroner were consolidated before January 1, 2023, the board of supervisors must separate those offices.

3) Provides that for counties with consolidated sheriff-coroners as of January 1, 2023, the separation becomes effective upon the conclusion of the term of the person elected or appointed, on or before January 1, 2023.

Background

Counties fall into two types: "general law" and "charter." General law counties are organized according to the generally applicable laws for county governance established by the Legislature that set the number, appointment, and election procedures for county officials, including the board of supervisors. Charter counties have greater leeway to determine their own governance structure, including to elect additional supervisors and appoint or elect additional officers. A new charter, or the amendment of an existing charter, may be proposed by the Board of Supervisors, a charter commission, or an initiative petition. There are 14 charter counties: Alameda, Butte, El Dorado, Fresno, Los Angeles, Orange, Placer, Sacramento, San Bernardino, San Diego, San Francisco, San Mateo, Santa Clara, and Tehama. Most large counties are charter counties: eight of the ten largest counties by population have adopted charters.

Of California's 58 counties, 48 have consolidated their sheriff and coroner offices. Seven counties have independent medical examiners (Alameda, Los Angeles, San Diego, San Francisco, San Joaquin, Santa Clara, and Ventura). Three counties have separate sheriff and coroner offices (Inyo, Sacramento, and San Mateo).

Comments

1) *Purpose of this bill*. According to the author, "California is one of only three states that still allows counties to combine the offices of coroner and sheriff. Current state law does not require a sheriff to have any medical background or certification to assume the duties of a coroner and as a result has caused a discrepancy in whether a medical diagnosis is valid when there is an officer-related death. Thus, this bill is heavily supported by the medical community and will put California at the forefront and in line with the rest of the states that have already advanced this policy. AB 1608 stems from two bills, AB 1196 (Gipson) and AB 490 (Gipson), which Governor Newsom signed in light of the tragic deaths of George Floyd and Angelo Quinto. As a follow-up to these efforts, AB 1608 will serve as a building block to create complete transparency in determining the cause of death of an individual. Specifically, this bill would separate the duties of the coroner from the duties of the sheriff, strengthening the need for a more transparent and just medical examination process. AB 1608 will provide families with peace of mind that these investigations and processes are done righteously and fairly. This legislation sets a clear pathway in creating a system that prioritizes objectivity, transparency, and accountability – and most importantly justice."

2) *Home rule.* State law allows counties to consolidate various offices, including the sheriff and coroner. However, counties can also decide not to consolidate these positions, or adopt an ordinance to abolish the coroner position and provide instead for the office of an independent medical examiner. Also, with majority voter approval, a county can adopt, amend, or repeal a charter that grants it home rule authority over specified matters, including county office consolidations or creating new offices that state law does not authorize general law counties to create. State law gives counties various options to respond to community concerns regarding the independence of the sheriff and coroner positions. Instead of keeping these decisions at the local level, AB 1608 decides that no county should have a consolidated sheriff-coroner position, except for those with charters that provide for such a consolidation. Should decisions regarding sheriff and coroner offices remain at the local level?

3) *Sure, but will it work?* Separating the duties of the sheriff and coroner into separate offices could create a degree of separation between the sheriff and the coroner who would make decisions about how someone dies at the hands of law enforcement. However, state law does not establish specific eligibility requirements for coroners. While some counties may decide to eliminate their coroner position to create an independent medical examiner's office like the County of San Joaquin, they would have to find resources to hire an experienced physician. Other counties may end up electing a coroner, who could also be a law enforcement official, limiting that degree of separation with the sheriff's office. Could potential conflicts of interest be more directly addressed in other ways that with less of an impact on these counties' governance? For example, would requiring sheriff-coroners to refer out these investigations for independent medical examinations be a better way to address potential conflicts of interest?

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, "Unknown reimbursable local mandate costs, likely in excess of $10 million for one-time local costs to separate sheriff and coroner offices in 48 counties and establish an independent coroner or medical examiner's office, as well as ongoing significant costs to operate those offices separately. Actual state costs would be subject to a determination by the Commission on State Mandates regarding what local expenditures are deemed reimbursable, to the extent a successful reimbursement claim is filed by an affected county. (General Fund)"

SUBJECT: Elections: elections officials

SOURCE: Author

DIGEST: This bill requires a county elections official to post on the official's internet website, the public list of all polling places where multilingual poll workers will be present and the language or languages other than English in which they will provide assistance. This bill also requires county elections officials to use the internet in their efforts to recruit multilingual poll workers.

ANALYSIS:

Existing federal law:

1) Requires a state or a political subdivision of a state to provide voting materials in the language of a minority group when that group within the jurisdiction has an illiteracy rate that is higher than the national illiteracy rate, and the number of the United States (US) citizens of voting age in that single language group within the jurisdiction meets either specified total number or percentage.

2) Requires a state or political subdivision of a state to provide voting materials in the language of a minority group if all specified criteria apply.

3) Defines language minorities or language minority groups, for the purposes of the above provisions, to mean persons who are American Indian, Asian American, Alaskan Natives, or of Spanish heritage.

Existing state law:

1) Declares the intent of the Legislature that non-English-speaking citizens, like all other citizens, be encouraged to vote. Therefore, appropriate efforts should be made to minimize obstacles to non-English-speaking citizens voting without assistance.

2) Requires elections officials to make reasonable efforts to recruit poll workers who are fluent in a language if three percent or more of the voting age residents in any precinct are fluent in that language and lack sufficient skill in English to vote without assistance.

3) Requires an elections official, at least 14 days before an election, to prepare and make available to the public a list of the precincts to which officials who are fluent in a non-English language and in English were appointed, and the language or languages other than English in which they will provide assistance.

4) Requires a member of the precinct board at each polling place to identify the languages spoken by them, other than English, by wearing a name tag, button, sticker, lanyard, or other mechanism, as determined by the county elections official. Requires the text indicating the language skills of the member of the precinct board to be in the non-English language or languages spoken by that member.

5) Requires county elections officials, within 150 days following each statewide general election, to report to the Secretary of State (SOS) the number of individuals recruited to serve as members of precinct boards, including the number of individuals recruited who are fluent in each language required to be represented under state and federal laws. Requires the SOS to issue uniform standard reporting guidelines and post all county reports received under their internet website within 180 days following each statewide general election.

6) Authorizes an elections official to appoint a pupil, who is a lawful permanent resident of the US, to serve as a precinct board member, as specified.

7) Requires the SOS to establish a Language Accessibility Advisory Committee (LAAC) to advise and assist the SOS with implementation of federal and state laws relating to access to the electoral process by low English proficiency voters, as specified.

This bill:

1) Requires the county elections official to make the list required by existing state law publically available on the county elections official's Internet website.

2) Requires county elections officials to use the Internet in their efforts to recruit multilingual poll workers.

Background

Federal Voting Rights Act of 1965. The 15th Amendment to the US Constitution provides, in part, "[t]he right of citizens of the United States to vote shall not be denied or abridged by the United States or by any state on account of race, color, or previous condition of servitude." Additionally, the 15th Amendment authorizes Congress to enact legislation to enforce its provisions.

Congress determined that the existing federal anti-discrimination laws were not sufficient to overcome the resistance by state officials to enforce the 15th Amendment. As a result, Congress passed and President Johnson signed the Voting Rights Act of 1965 (VRA). The VRA provides, among other provisions, that "[n]o voting qualification or prerequisite to voting, or standard, practice, or procedure shall be imposed or applied by any State or political subdivision to deny or abridge that right of any citizen of the United States to vote on account of race or color."

In 1975, Congress adopted the language minority provisions of Sections 4(f)(4) and 203 of the VRA. Congress extended these provisions in 1982, 1992, and 2006. Sections 4(f)(4) and 203 of the VRA require certain jurisdictions with significant populations of voting age citizens who belong to a language minority community to provide voting materials in a language other than English. These determinations are based on data from the most recent Census.

Specifically, Sections 203 and 4(f)(4) require that when a covered state or political subdivision "[p]rovides registration or voting notices, forms, instructions, assistance, or other materials or information relating to the electoral process, including ballots, it shall provide them in the language of the applicable minority group as well as in the English language."

In 2013, the US Supreme Court in *Shelby County v. Holder* invalidated the coverage formula that is used to determine the jurisdictions that are subject to the language requirements in Section 4(f)(4) of the VRA, and the VRA has not been amended since that time to create a new coverage formula. Accordingly, while Section 4(f)(4) remains a part of the VRA, no jurisdictions currently are required to provide language assistance under its provisions. The California jurisdictions that likely would have been required to provide language assistance pursuant to Section 4(f)(4) under the existing coverage formula, however, are required to provide language assistance under Section 203 or under state law to at least some precincts within those jurisdictions.

New Census Data. On December 8, 2021, the US Census Bureau released its most recent determination of minority language requirements under Section 203 of the VRA. These determinations, updated every 5 years, affect federal requirements for providing voting materials and other assistance during elections for certain language minority groups within California and across the US. Pursuant to Section 203, California is required to provide bilingual voting assistance to Spanish speakers. Additionally, pursuant to Section 203, 28 of California's 58 counties are individually required to provide bilingual voting assistance to Spanish speakers, and nine counties (Alameda, Contra Costa, Los Angeles, Orange, Sacramento, San Diego, San Francisco, San Mateo, and Santa Clara) are required to provide voting materials in at least one language other than English and Spanish.

Precinct Minority Language Determinations. Existing state law requires the SOS, in each gubernatorial election year, to determine the precincts where three percent or more of the voting age residents are members of a single language minority and lack sufficient skills in English to vote without assistance.

According to a December 31, 2021 memo from the SOS's office, the SOS contracted with the California Statewide Database (SWDB) at University of California Berkeley to determine which precincts have reached the three percent threshold. The SWDB relied upon a special tabulation provided by the Census Data Review Board to determine which precincts met the three percent threshold for single language minorities. According to the memo, due to stricter Census

Privacy Disclosure Rules, counties saw a major reduction in languages that meet the three percent threshold. The memo encouraged counties to work with their community groups to determine if a need exists for any of the previously covered languages and that to consider the need of their communities before eliminating languages that were previously covered.

On March 1, 2022, the SOS's office subsequently sent out another memo reinstating prior precinct minority language determinations, in addition to the new determinations included in the December 31, 2021 memo. According to the memo, the SOS found sufficient reason to believe that it was necessary to reinstate minority language assistance determinations that were made in 2017 and 2020 in order to ensure that communities have access to language assistance services.

Multilingual Poll Workers and Previous Legislation. In 2003, the Legislature approved and the Governor signed SB 610 (Escutia, Chapter 530, Statutes of 2003), which required the SOS to appoint a task force "to study and recommend uniform guidelines for the training" of election poll workers. The Poll Worker Training Task Force consisted of the chief elections officers of the two largest counties, the two smallest counties, and two other county elections officers selected by the SOS; and included eight other members with elections expertise, including members of community-based organizations and citizens familiar with different ethnic, cultural, and disabled populations.

The standards were revised this year to reflect lessons learned and changes in state law that have taken effect since the original standards were published in 2006. Specifically, the guidelines recommend county elections officials to have a diverse poll worker workforce and to broaden and/or continue their poll worker recruitment efforts to ensure a representative group diverse in age, ethnicity, disabilities, and language fluency.

SOS Report. Additionally, in 2017 the Legislature passed and the Governor signed AB 918 (Bonta, Chapter 845, Statutes of 2017), also known as the California Voting for All Act, which updated the language service requirements for county elections officials and established a new reporting process directing the SOS to collect data related to the recruitment of bilingual poll workers from county officials, among other provisions. Specifically, AB 918 requires county elections officials to report to the SOS the number of individuals recruited to serve as poll workers, including the number of election officials recruited who are fluent in each language required to be represented in accordance with state and federal law. The bill also requires the SOS to issue uniform standard reporting guidelines and to

post all county reports received on their website within 180 days following each statewide general election.

Accordingly, the SOS conducted a survey of county elections officials regarding their recruitment of bilingual poll workers for the November 6, 2018 general election. According to the SOS's Bilingual Poll Worker Recruitment Report issued in May of 2019, 54 of California's 58 counties provided support for 30 different languages through their bilingual poll worker programs. The most widely served language in the state was Spanish and 54 counties reported working to recruit poll workers that were able to assist voters in Spanish. The report states that the next most widely served languages were Filipino (30 counties serving either Tagalog and/or Ilocano), Chinese (19 counties), and Vietnamese and Korean (16 counties for each).

According to the report, the 54 counties that worked to recruit bilingual poll workers responded in the survey that they had commitments from a reported 28,254 bilingual poll workers and of that approximately 22,823 poll workers reported for their service on Election Day which resulted in nearly 81% of recruits completing their service across all languages.

Counties were also asked to provide information regarding some of the different methods they used to recruit bilingual poll workers. Under current law, county elections officials are permitted to recruit students and non-voters to serve as poll workers in order to recruit additional bilingual poll workers. Accordingly, the report states that counties reported that 984 legal permanent residents were recruited to provide bilingual support at polling places across the state and that 5,531 student poll workers were recruited to act as bilingual poll workers. Additionally, at least 11,486 poll workers were recruited through other county efforts or programs. Some of these programs include recruitment of county workers from other departments, targeting college campuses, and paying extra help workers to serve as bilingual support.

Finally, the report states that under advisement from the LAAC, the SOS survey included the opportunity for counties to provide details regarding any technological solutions that were deployed to provide language support. The report states that at least 18 county officials reported using telephonic translations technology to provide additional language support. Most of these technological solutions involve 3-party telephone calls, though some of the cutting-edge translations technologies take advantage of applications like FaceTime to allow video enabled translations calls.

Comments

1) According to the author, AB 1631 will help improve the accessibility of the ballot to California voters who speak a language other than English by requiring that this list of precincts be posted online at each county registrar's website. Requiring this information to be posted online will also help bring our elections laws up to date with our modern, internet-driven world. This bill is but one part of a much larger effort to improve the accessibility of our elections systems for voters who do not speak English. I look forward to continuing to work on this larger project of reforms in the coming years.

Related/Prior Legislation

SB 1131 (Newman, 2022) requires a county elections official, upon application of an election worker, to make confidential that worker's residence address, telephone number, and email address appearing on the affidavit of registration, and prohibits the names of precinct board members from being listed when posting information about precinct board members at polling places, as specified.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: Yes

According to the Senate Appropriations Committee, by requiring county elections officials to post specified information to their internet sites, this bill creates a state-mandated local program. To the extent the Commission on State Mandates determines that the provisions of this bill create a new program or impose a higher level of service on local agencies, local agencies could claim reimbursement of those costs (General Fund). The magnitude is unknown, but likely in the hundreds of thousands of dollars.

SUBJECT: Low-income housing: insurance tax: income tax: credits: farmworker housing

SOURCE: California Coalition for Rural Housing
California Rural Legal Assistance Foundation

DIGEST: This bill increases the set-aside of the low income housing tax credits (LIHTC), authorized in the state budget each year, for farmworker housing projects and requires the Department of Housing and Community Development (HCD) to create a comprehensive strategy to address farmworker housing needs in the state.

Senate Floor Amendments of 8/24/22 grant HCD an additional six months to commission the statewide farmworker housing strategy, make technical clarifying changes, and resolve chaptering conflicts with AB 1288 (Quirk Silva).

ANALYSIS:

Existing law:

1) Provides that a low-income housing development that is a new building and is receiving 9% federal Low-Income Housing Tax Credits (LIHTCs) is eligible to receive state LIHTC over four years of 30% of the eligible basis of the building.

2) Provides that a low-income housing development that is a new building that is receiving federal LIHTC and is "at risk of conversion" to market rate is eligible to receive state LIHTC over four years of 13% of the eligible basis of the building.

3) Provides, for 2020 and 2021 calendar years, that up to $500 million may be allocated to 4% tax credit projects pursuant to an authorization in the annual budget or related legislation.

4) Sets-aside $500,000 per calendar year for projects to provide farmworker housing, as defined.

This bill:

1) Requires, beginning in 2024 through 2034, that $25 million or 5% of the amount available in the state budget each year for the LIHTC, whichever is less, be set aside for projects that provide farmworker housing.

2) Requires that any farmworker LIHTC following the conclusion of a funding round shall roll over to consecutive funding rounds.

3) Provides that beginning in 2035 and every year thereafter, the amount of LIHTC set aside for farmworker housing will be determined by the Legislature upon consideration of a comprehensive strategy developed by HCD.

4) Requires HCD, on or before December 1, 2023, to commission a statewide study of farmworker housing conditions, needs, and solutions to inform a comprehensive strategy for meeting the housing needs of the state's farmworkers.

5) Requires the study to include an analysis and recommendations on the following factors related to the supply of housing affordable and accessible to farmworkers and their families:

    a) A demographic survey and analysis of farmworker households in California, including a survey of a representative sample of farmworkers to assess the

needs, barriers, and proposed solutions to the farmworker housing crisis from the perspective of impacted farmworkers;

b) An analysis of the unmet need for housing for farmworkers, including migrant households;

c) An analysis of existing housing conditions for farmworkers, including, but not limited to, permanent and temporary rental housing in the private market, owner-occupied housing, deed-restricted affordable rental housing, employer-provided housing, generational wealth opportunities, and state-owned migrant housing;

d) An analysis of statewide and regional trends in housing demand among farmworkers, including the demand for specified housing types;

e) An analysis of best practices to increase input from farmworkers and employers on the housing needs in their specific communities;

f) Governmental and nongovernmental barriers to the production of housing to meet the needs of farmworkers, including, but not limited to, the availability of financing, local land use controls, and the availability of suitable land;

g) Any additional analysis, research, or surveys relevant to analyzing the need for housing for farmworkers; and

h) Recommendations to address gaps in the supply of housing for farmworkers.

6) Allows the author of the study to subcontract with other qualified entities as necessary to obtain data described to complete the report.

7) Requires HCD, no later than January 1, 2026, to develop a comprehensive strategy to substantially improve policy, funding, and implementation of farmworker housing production in California to adequately address the size and scope of the problems identified in the study, to inform the next update to the California Statewide Housing Plan.

8) Requires HCD evaluate whether an update of this strategy is necessary and may in its discretion update and revise the strategy in regular intervals as determined by HCD. No later than January 1, 2027, HCD shall submit the strategy to the Legislature.

9) Resolves chaptering conflicts with AB 1288 (Quirk Silva).

Background

Federal LIHTC program. The LIHTC is an indirect federal subsidy developed in 1986 to incentivize the private development of affordable rental housing for low-income households. The federal LIHTC program enables low-income housing sponsors and developers to raise project equity through the allocation of tax benefits to investors. The California Tax Credit Allocation Committee (TCAC) administers the program and awards credits to qualified developers who can then sell those credits to private investors who use the credits to reduce their federal tax liability. The developer in turn invests the capital into the affordable housing project.

Two types of federal tax credits are available: the 9% and 4% credits. These terms refer to the approximate percentage of a project's "eligible basis" a taxpayer may deduct from their annual federal tax liability in each year for 10 years. "Eligible basis" means the cost of development excluding land, transaction costs, and costs incurred for work outside the property boundary. For projects that are not financed with a federal subsidy, the applicable rate is 9%. For projects that are federally subsidized (including projects financed more than 50% with tax-exempt bonds), the applicable rate is 4%. Although the credits are known as the "9% and 4% credits," the actual tax rates fluctuate every month, based on the determination made by the Internal Revenue Service on a monthly basis. Generally, the 9% tax credit amounts to 70% of a taxpayer's eligible basis and the 4% tax credit amounts to 30% of a taxpayer's eligible basis, spread over a 10-year period.

Each year, the federal government allocates funding to the states for LIHTCs on the basis of a per-resident formula. In California, TCAC is the entity that reviews proposals submitted by developers and selects projects based on a variety of prescribed criteria. Only rental housing buildings, which are either undergoing rehabilitation or newly constructed, are eligible for the LIHTC programs. In addition, the qualified low-income housing projects must comply with both rent and income restrictions.

Each state receives an annual ceiling of 9% federal tax credits and they are oversubscribed by a 3:1 ratio. Unlike 9% LIHTC, federal 4% tax credits are not capped; however, they must be used in conjunction with tax-exempt private activity mortgage revenue bonds, which are capped and are administered by the CDLAC. In 2020, the state ceiling for private activity bonds was set at $4.1 billion. The value of the 4% tax credits is less than half of the 9% tax credits and, as a result, 4% federal credits are generally used in conjunction with another funding source, like state housing bonds or local funding sources.

State LIHTC program. In 1987, the Legislature authorized a state LIHTC program to augment the federal tax credit program. State tax credits can only be awarded to projects that have also received, or are concurrently receiving, an allocation of the federal LIHTCs. The amount of state LIHTC that may be annually allocated by the TCAC is limited to $70 million, adjusted for inflation. In 2020, the total credit amount available for allocation was about $100 million plus any unused or returned credit allocations from previous years. Current state tax law generally conforms to federal law with respect to the LIHTC, except that it is limited to projects located in California.

Combining federal 9% credits (which amounts to roughly 70%) with state credits (which amounts to 30%) generally equals 100% of a project's eligible basis. Combining federal 4% credits (which amounts to roughly 30%) with state credits (which amounts to 13%), only results in 43% of a project's eligible basis.

Farmworker tax credit set-aside. The LIHTC program provides up to $500,000 for farmworker housing projects. While the overall program has become competitive in recent years, historically, the number of farmworker housing projects accessing the LIHTC program is low. In 2017, AB 571 (E. Garcia, Chapter 372) made several changes to the farmworker housing tax credit to make the projects more competitive. Changes included allowing projects to offer 50% of the units to non-farmworker households if they meet the income requirements. In addition, AB 571 increased the amount of credits that farmworker tax credit projects could receive by allowing farmworker housing projects to qualify for a 30% boost in federal credits.

Comments

1) *Author's statement.* According to the author, "AB 1654 will require the California Department of Housing and Community Development (HCD) to commission a statewide study on the lack of affordable and accessible farmworker housing. HCD will contract with trusted messengers (such as local non-profits) in farmworker communities to conduct this study. HCD will then use that analysis of the barriers, unmet needs, existing housing conditions, and trends in agricultural employment statewide and regionally to improve policy and potentially increase funding for farmworker housing production. Using the study and its recommendations, HCD will develop a comprehensive strategy to address the lack of farmworker housing and the existing barriers that prevent farmworkers from obtaining housing for themselves and their families. Meanwhile, AB 1654 will also create a minimum, annual set-aside of dedicated tax credits—$25 million or 5% of all affordable housing tax credits, whichever

is less, for ten years—for farmworker housing. Most state programs that include a set-aside for housing in rural areas already allow 10% or more for those programs. AB 1654 will simply establish a floor for farmworker housing funds. After ten years, the Legislature may adjust this amount as necessary, per the recommendations of the farmworker housing study. Together, these important measures will put California on a path to addressing our farmworker housing shortage and ensuring decent living conditions for all farmworkers."

2) *Study and Comprehensive Strategy.* HCD recently published the Statewide Housing Plan laying out a 10-year plan detailing reasons to respond to the housing affordability crisis, what we have done so far, what needs to be done going forward, and how to track progress. The plan does not include specific strategies to address the challenges facing farmworkers and their families. This bill requires HCD to commission a study to determine what barriers exist for increasing the supply of farmworker housing on or before December 1, 2023. HCD would use that study to develop a comprehensive strategy, by January 1, 2026, to substantially improve policy, funding, and implementation of farmworker housing production in California. This bill requires HCD to use that strategy to inform the next update of the Statewide Housing Plan, and conduct an updated strategy at its discretion.

3) *Senate Appropriations Amendments.* Author's amendments taken in Senate Appropriations Committee provide that any farmworker housing tax credits left over from one funding round may roll over to consecutive funding rounds, and make other technical changes.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- HCD estimates one-time contract costs of approximately $400,000 to conduct a specified statewide study of farmworker conditions, needs, and solutions, and assist in the development of a comprehensive strategy. HCD would incur an additional $250,000 in contract every five years thereafter to update the study and strategy. (General Fund)

- HCD estimates ongoing costs of approximately $194,000 annually for 1.0 PY of staff to hire and oversee the consultant contract, develop the report, incorporate strategies into the Statewide Housing Plan, ensure recommendations are implemented across various programs, and update the study, strategy, and report every five years. (General Fund)

- Unknown annual cost pressures to provide additional General Fund augmentations to the LIHTC program, to the extent this bill results in a significant increase in LIHTC allocations for farmworker housing projects that would otherwise be used for other affordable housing projects. As noted below, recent budget actions have provided an additional $500 million each year to augment the program, which remains oversubscribed. Staff notes, however, that this bill provides that amounts that are not allocated for farmworker projects within three years would revert to the larger pot of credits for general allocations.

- TCAC indicates that costs to increase the set aside for farmworker housing projects would be minor and absorbable.

SUBJECT: State holidays: Juneteenth

SOURCE: California Federation of Teachers
California Hawaii State Conference NAACP
California School Employees Association

DIGEST: This bill adds June 19, known as "Juneteenth," to the list of state holidays and authorizes state employees to elect to take time off with pay in recognition of Juneteenth, as specified.

Senate Floor Amendments of 8/22/22 add chaptering-out language with AB 1801 (Nazarian) and AB 2596 (Low).

ANALYSIS:

Existing law:

1) Recognizes various state holidays including:
   a) January 1st (New Year);
   b) Third Monday in January (Dr. Martin Luther King, Jr. Day);
   c) February 12th (Lincoln Day);
   d) Third Monday in February (Washington Day);
   e) March 31st (Cesar Chavez Day);
   f) Last Monday in May (Memorial Day);
   g) July 4th;
   h) September 9 (Admission day);
   i) Fourth Friday in September (Native American Day);
   j) Second Monday in October (Columbus Day);
   k) November 11th (Veterans Day);
   l) December 25th;
   m) Good Friday from 12 noon until 3 p.m.

2) Requires the Governor to proclaim the third Saturday in June of each year to be known as "Juneteenth National Freedom Day: A Day of Observance," and urge all Californians to honor and reflect on the significant roles African Americans have played in U.S. history.

3) Specifies that if the above holidays are in conflict with the provisions of a memorandum of understanding, the memorandum of understanding shall be controlling without further legislative action.

4) Specifies that the above holidays, except for "Cesar Chavez Day" and "Dr. Martin Luther King, Jr. Day," shall not apply to a city, county, or district unless made applicable by charter, or by ordinance or resolution of the governing body.

5) Authorizes a state employee, as defined, to elect to receive eight hours of holiday credit for the fourth Friday in September, known as "Native American Day," in lieu of receiving eight hours of personal holiday credit, as specified.

6) Authorizes an employee in State Bargaining Unit 5, to elect to use eight hours of vacation, annual leave, or compensating time off consistent with departmental operational needs and collective bargaining agreements for the fourth Friday in September, known as "Native American Day.:"

7) Designates holidays on which community colleges and public schools are required to close, including days appointed by the President.

This bill:

1) Adds June 19, known as "Juneteenth, to the list of state holidays.

2) Authorizes a state employee, as defined, to elect to receive eight hours of holiday credit for June 19, known as "Juneteenth," in lieu of receiving eight hours of personal holiday credit, as defined.

3) Authorizes an employee in State Bargaining Unit 5 to elect to use eight hours of vacation, annual leave, or compensating time off consistent with departmental operational needs and collective bargaining agreements for June 19, known as "Juneteenth."

4) Specifies that holidays created by federal legislation signed by the President are considered days appointed as holidays, as specified.

5) Makes corresponding, conforming, and technical changes to existing law.

Comments

Purpose of the Bill. According to the author's office, "this is a significant milestone for African Americans, to have a date recognized by our state that is celebrated by all Californians. AB 1655 is an inclusive act marking a key point in our nation's history – one we should never forget or ignore, and one that correctly balances the American scale of freedom from 3/5ths to a whole."

History of Juneteenth. On June 19, 1865, about two months after the Confederate general Robert E. Lee surrendered at Appomattox Court House, Virginia, Gordon Granger, a Union General, arrived in Galveston, Texas, to inform enslaved Blacks of their freedom and that the Civil War had ended. General Granger's announcement put into effect the Emancipation Proclamation, which had been issued more than two and a half years earlier on January 1, 1863, by President Abraham Lincoln.

The holiday received its name by combining June and 19. Throughout history, Juneteenth has been known by many names: Jubilee Day, Emancipation Day, Freedom Day, and Black Independence Day. Juneteenth symbolizes freedom, celebrates the abolishment of slavery, and reminds all Americans of the significant contributions of African Americans within society. The day is often celebrated by praying and bringing families together.

On January 1, 1980, Juneteenth became an official state holiday in Texas due to the efforts of former Texas House of Representatives member Al Edwards. Since then, Rep. Edwards has actively sought to spread the observance of Juneteenth across the country. As of January 2022, eight additional states (Illinois, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Virginia and Washington) have adopted Juneteenth as a paid state holiday. On June 19, 2021, President Joe Biden signed legislation establishing June 19 as Juneteenth National Independence Day and a United States federal holiday.

Existing state law requires the Governor to proclaim the third Saturday in June of each year to be known as "Juneteenth National Freedom Day: A Day of Observance," and urge all Californians to honor and reflect on the significant roles African Americans have played in U.S. history.

Unpaid/Paid holidays. California law does not require a private employer to provide its employees with paid holidays, that it closes its business on any holiday, or that employees be given the day off for any particular holiday. If an employer closes its business on holidays and gives its employees time off from work with pay, that occurred pursuant to a policy or practice adopted by the employer, pursuant to the terms of a collective bargaining agreement, or pursuant to the terms of an employment agreement between the employer and employee, as there is nothing in law that requires such a practice.

At the local level, cities have the liberty to specify by charter, ordinance or resolution what paid holidays the city will provide to its city employees. Similarly, most state workers are bound by the memorandum of understanding that they have negotiated with the Governor.

For all other state employees, they are entitled to the following holidays: January 1, the third Monday in January, the third Monday in February, March 31, the last Monday in May, July 4, the first Monday in September, November 11, Thanksgiving Day, the day after Thanksgiving, December 25, a personal holiday after six months of work, and every day appointed by the Governor for a public fast, thanksgiving, or holiday.

This bill adds “Juneteenth” to the list of state holidays and authorizes state employees to elect to take time off with pay in recognition of Juneteenth, as specified.

Related/Prior Legislation

AB 1741 (Low, Chapter 41, Statutes of 2022) required the Governor to annually proclaim November 20 as "Transgender Day of Remembrance."

AB 1801 (Nazarian, 2022) adds April 24, known as "Genocide Remembrance Day," to the list of state holidays and authorize community colleges and public schools to close on April 24, known as "Genocide Remembrance Day," as specified. Additionally, the bill authorizes state employees to elect to take time off with pay in recognition of "Genocide Remembrance Day," as specified. (Pending on the Senate Floor)

AB 1872 (Low, 2022) makes the day of statewide general elections even-numbered years a state holiday, and eliminates Washington day as a holiday in those years. (Held in the Assembly Appropriations Suspense File)

AB 2596 (Low, 2022) repeals provisions requiring the Governor to annually proclaim the Lunar New year, and instead recognized the Lunar Year as a state holiday and authorizes state employees, with specified exceptions, to elect to receive eight hours of holiday credit for the Lunar New Year in lieu of receiving eight hours of personal holiday credit, as specified. (Pending on the Senate Floor)

SB 383 (Stone, 2017) would have required state employees be given time off with pay for the day after Thanksgiving, or for Yom Kippur, whichever the day is chosen by the employee and recognizes Yom Kippur as a state holiday. (Failed Passage in the Senate Governmental Organization Committee)

AB 674 (Low, 2017) would have made the first Tuesday after the first Monday in November of each year in which a statewide or national election is held as a state holiday. (Held in the Assembly Appropriations Suspense File)

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, unknown potentially significant General Fund cost pressures, likely in the millions of dollars, to create another negotiable paid holiday for eligible state workers.

Unknown, potentially significant reimbursable mandate costs to the extent school districts need to adjust their calendars and summer work hours, resulting in local bargaining implications for their classified employees. This assumes school districts would need to adjust their school calendars and ensure minimum days of instruction. Staff notes that most school years conclude before June 19, however some schools go beyond June 19 for their regular school year. To address learning

loss and other significant needs, these schools have increased summer programs. The associated costs are unknown.

Unknown fiscal impact to the courts. The Judicial Council notes that by adding a new state holiday, the bill also creates a new judicial holiday, which adds a day that the courts will be closed. This may exacerbate court backlogs, however the associated costs are indeterminate.

OPPOSITION: (Verified 8/11/22)

National Juneteenth Observance Foundation - California

ARGUMENTS IN SUPPORT: According to the Cal State Student Association, "on June 19, 1865, commonly referred to as Juneteenth, word of freedom reached the last enslaved black people in Galveston Bay, Texas, the last confederate state with slavery in place. After two long years, Major General Gordon Granger of the Union Army delivery news of the Emancipation Proclamation issued by President Abraham Lincoln in 1863. This day would make the end of enslavement for over three million black Americans. AB 1655 will cement a vital moment in this nation's history and serve as an equally vital lesson, that the pursuit of justice must be tempered with full knowledge of prior injustices. Without that knowledge, efforts towards progress are doomed to fail."

ARGUMENTS IN OPPOSSITION: According to the National Juneteenth Observance Foundation - California, "AB 1655 as currently amended to reflect an

'optional' holiday bill clearly is not in alignment with the 'official' Federal Holiday. An 'optional' California Juneteenth Holiday may cause more harm than good."

SUBJECT: Cannabis: industrial hemp

SOURCE: Author

DIGEST: This bill states that the Medicinal and Adult-Use Cannabis Regulation and Safety Act (MAUCRSA) does not prohibit a cannabis licensee from manufacturing, distributing, or selling industrial hemp products, as defined in state law and including cannabinoids, extracts, or derivatives of industrial hemp, if the product complies with all applicable state laws and regulations.

ANALYSIS:

Existing federal law:

1) Enacts the 2018 Farm Bill, which removed hemp from the Controlled Substances Act (CSA), which is under the purview of the Drug Enforcement Agency, and put it under the purview of the United States Department of Agriculture (USDA) as an agricultural commodity. The Farm Bill lists hemp as a "covered commodity" under crop insurance and allows the states to regulate the industry. (7 United States Code § 1621 et seq.)

2) Establishes the USDA Final Rule for the Domestic Hemp Production Program to provide regulations for hemp production in the United States. This program provides requirements for maintaining records about the land where hemp is

produced, testing the levels of total delta-9 tetrahydrocannabinol (THC), disposing of non-compliant plants with levels of THC over 0.3%, licensing hemp producers, and ensuring compliance under the new program. (7 Code of Federal Regulations Part 990)

Existing state law:

1) Enacts MAUCRSA to provide for a comprehensive system to control and regulate the cultivation, distribution, transport, storage, manufacturing, processing, and sale of both medicinal and adult-use cannabis and cannabis products. (Business and Professions Code (BPC) §§ 26000 et seq.)

2) Defines "cannabis" as all parts of the plant Cannabis sativa Linnaeus, Cannabis indica, or Cannabis ruderalis, plant seeds, resin extracted from any part of the plant, and any product derived from the plant, seeds, or resin. "Cannabis" does not include mature stalks of the plant, fiber produced from the mature stalks, oil or cake made from the seeds of the plant, or products (except resin) derived from mature stalks of the plant, fiber, oil or cake, or the sterilized seed of the plant. "Cannabis" does not mean "industrial hemp" as defined in the Health and Safety Code § 11018.5. (BPC § 26001 (e)

3) Prohibits the sale of cannabis products that are alcoholic beverages, including an infusion of cannabis or cannabinoids derived from industrial hemp into an alcoholic beverage. (BPC § 26070.2)

4) Defines "industrial hemp" as a crop that is limited to types of the plant Cannabis sativa L. having no more than three-tenths of 1 percent THC contained in the dried flowering tops, whether growing or not; the seeds of the plant; the resin extracted from any part of the plant; and every compound, manufacture, salt, derivative, mixture, or preparation of the plant, its seeds or resin produced therefrom. (Health and Safety Code (HSC) § 11018.5(a))

5) Specifies that industrial hemp shall not be subject to the requirements of MAUCRSA. (HSC § 11018.5(b))

6) Establishes provisions for industrial hemp products under the Sherman Food, Drug, and Cosmetic Law administered by the California Department of Public Health (CDPH), under which manufacturers of products containing industrial hemp or hemp products are required to obtain the appropriate registration or licensure for the type of industrial hemp product manufactured and comply with established manufacturing practices. (HSC §§ 111920 et seq.)

7) Provides the California Department of Food and Agriculture (CDFA) with responsibility for administering and enforcing laws governing the growing, cultivating, and distributing of industrial hemp. (Food and Agricultural Code §§ (FAC) 81000 et seq.)

8) Establishes an Industrial Hemp Advisory Board under the CDFA to make recommendations to the Secretary of Food and Agriculture on all matters pertaining to industrial hemp seed law and regulations, enforcement, related annual budgets, and the setting of an appropriate assessment rate necessary for the administration of the law. (FAC § 81001)

9) Allows only approved cultivars to grow industrial hemp, unless when industrial hemp is grown by a registered established agricultural research institution or by a registered hemp breeder developing a new cultivar. (FAC § 81002)

10) Imposes limitations and prohibitions on the growth of industrial hemp, including the restriction that industrial hemp shall not be cultivated on a premises licensed by the Department of Cannabis Control (DCC) to cultivate or process cannabis. Requires each crop of industrial hemp to be tested by a laboratory to determine the THC levels of a random sampling of its dried flowering tops, with exceptions for industrial hemp cultivated by a registered established agricultural research institution or registered hemp breeder, as specified. (FAC § 81006)

This bill states findings and declarations that it is the intent of the Legislature to enhance the viability of cannabis licensees in the legal cannabis marketplace to relieve challenges presented by the illicit market. States that MAUCRSA does not prohibit a cannabis licensee from manufacturing, distributing, or selling industrial hemp products, as defined in the Health and Safety Code § 11018.5, or cannabinoids, extracts, or derivatives from industrial hemp, if the product complies with all applicable state laws and regulations, including those outlined in the Food and Agricultural Code (commencing with § 81000) and the Health and Safety Code (commencing with § 111920).

Background

State Regulation of Cannabis. In 1996, California first legalized cannabis for medical consumption via Proposition 215, also known as the Compassionate Use Act (the Act). Proposition 215 protected qualified patients and primary caregivers from prosecution related to the possession and cultivation of cannabis for medicinal purposes. In 2003, the Legislature authorized the formation of medical

marijuana cooperatives—nonprofit organizations that cultivate and distribute marijuana for medical uses to their members through dispensaries.

In 2015, the Legislature passed the Medical Cannabis Regulation and Safety Act (MCRSA). For the first time, MCRSA established a comprehensive, statewide licensing and regulatory framework for the cultivation, manufacture, transportation, testing, distribution, and sale of medicinal cannabis. Shortly following the passage of MCRSA in November 2016, California voters passed Proposition 64, the "Control, Regulate and Tax Adult Use of Marijuana Act" (Proposition 64), which legalized adult-use cannabis. Less than a year later in June 2017, the California State Legislature passed a budget trailer bill, SB 94 (Senate Budget and Fiscal Review Committee, Chapter 27, Statutes of 2017), that integrated MCRSA with Proposition 64 to create MAUCRSA, the current regulatory structure for both medicinal and adult-use cannabis. Beginning in 2018, Proposition 64 permitted adults 21 years of age or older can legally grow, possess, and use cannabis for nonmedical purposes, with certain restrictions.

Industrial Hemp in the United States and California. Industrial hemp is produced from the *Cannabis sativa* (*C. sativa*) plant, which is primarily grown for its fiber and oilseed. Industrial hemp has been a fixture of human agriculture for thousands of years and was introduced to North America in the 16th century. Hemp production reached its peak in the United States in the mid-1800s, but decreased as other fiber crops such as cotton increased in popularity. The Marihuana Tax Act of 1938 ended the legal production of hemp in the United States, and hemp was added to Schedule I of the CSA.

In California, SB 566 (Leno, Chapter 398, Statutes of 2013) established the Industrial Hemp Farming Act, which established a regulatory framework for the cultivation and processing of industrial hemp that would go into effect upon legalization by the federal government. SB 566 required growers of industrial hemp for commercial purposes to register with the county agricultural commissioner of the county in which the grower intends to engage in industrial hemp cultivation among various provisions. Several years later, the 2018 Farm Bill removed industrial hemp from the Controlled Substances Act and put it under the purview of the USDA as an agricultural commodity. The Farm Bill lists hemp as a “covered commodity” under crop insurance and allows the states to regulate the industry. Since then, industrial hemp production in the United States has seen a resurgence in the last few years.

By federal and California law, industrial hemp is defined as *C. sativa* plants which have low levels of the THC (under 0.3%), the primary psychoactive component of

medicinal and recreational cannabis, which commonly contains levels ranging from 15-40% THC. *C. sativa* plants grown for commercial purposes found to have THC levels over this limit are required to be destroyed.

CBD and CBD products. In addition to the cultivation of *C. sativa* for industrial hemp fiber and oilseed, *C. sativa* also contains the cannabinoid cannabidiol (CBD). CBD does not produce a feeling of euphoria like THC, and according to the World Health Organization, "In humans, CBD exhibits no effects indicative of any abuse or dependence potential." Upon the legalization of industrial hemp in 2018, CBD products made from hemp became widely available throughout much of the United States. It is important to note that CBD obtained from cannabis plants intended for medicinal or adult-use, and not from industrial hemp, is still federally illegal. In California, CBD obtained from cannabis plants intended for medicinal or adult-use is still regulated through MAUCRSA.

CBD has been demonstrated to alleviate epileptic seizures in patients, and the drug Epidiolex is the first CBD-containing medicine to be approved by the United States Food and Drug Administration for the treatment of epilepsy syndromes. In addition to the role of CBD as an anticonvulsant, studies suggest CBD may reduce anxiety, alleviate insomnia, inhibit inflammatory and neuropathic pain, and assist patients in recovery for substance use disorders. However, more studies are required to verify these findings. Despite these potential therapeutic uses of CBD, there has historically been limited regulation of the rapidly growing CBD market, which has led to concerns regarding the purity and potency of CBD products available to consumers.

In California, AB 45 (Aguiar-Curry, Chapter 576, Statutes of 2021) established a regulatory framework for food, beverage, and cosmetic products containing industrial hemp or cannabinoids (such as CBD), extracts, or derivatives of industrial hemp under the Sherman Food, Drug, and Cosmetic Law. This bill was enacted to clarify and expand the framework under which industrial hemp and CBD derived from industrial hemp can be included in dietary supplements, food, beverages, cosmetics, or pet food. This bill required manufacturers of dietary supplements and food that includes industrial hemp products to register with CDPH and demonstrate that their products meet all state and federal guidelines, including consumer safety standards. In addition, this bill prohibited manufacturers, distributors, or sellers of industrial hemp products from advertising unsubstantiated health-related statements regarding industrial hemp and CBD.

Legal Separation of Industrial Hemp and Cannabis. Supply chains and regulations for industrial hemp and cannabis are kept principally separate in California. DCC

presently mandates that licensed cannabis retailers are prohibited from selling any non-cannabis goods besides cannabis accessories and branded merchandise (§ 15407 of the DCC's regulations), and industrial hemp falls under the category of a "non-cannabis good". In addition, California law stipulates that industrial hemp may not be cultivated on premises licensed by DCC to cultivate or process cannabis. Finally, CBD and CBD products derived from cannabis are regulated quite differently from the same CBD products containing hemp-derived CBD, despite being essentially the same. This bill, in its current form, seeks to clarify that the provisions outlined in the MAUCRSA do not prohibit a cannabis licensee from manufacturing, distributing, or selling industrial hemp products, but does not remove any of the aforementioned separations between industrial hemp and cannabis supply lines and retail.

AB 45 required DCC to prepare a report for the Governor and the Legislature outlining the steps necessary to allow for the incorporation of hemp cannabinoids into the cannabis supply chain by July 1, 2022. The author states they may amend AB 1656 following the receipt of this report in order to take legislative action to enact the upcoming DCC recommendations to integrate hemp-derived cannabinoids, such as CBD, in the cannabis supply chain.

FISCAL EFFECT: Appropriation: No Fiscal Com.: No Local: No

Cronos USA Client Services LLC
Good Farmers Great Neighbors
The Parent Company
U.S. Hemp Roundtable

OPPOSITION: (Verified 6/7/22)

None received

ARGUMENTS IN SUPPORT: The California Cannabis Industry Association (CCIA) writes, "…CCIA supports the incorporation of hemp cannabinoids into manufactured cannabis products, the ability of cannabis licensees to also manufacture hemp products within their facilities, and the opportunity to sell hemp products within licensed dispensaries. The licensed cannabis industry and the framework set forth in the MAUCRSA is already well suited to accommodate

hemp products and would benefit from the opportunity to expand product offerings."

Good Farmers Great Neighbors writes, "The State of California represents the largest CBD market in the United States. Despite passage of AB 45 last year, there are still questions about what is legal and who can produce CBD products in the new marketplace. AB 1656 represents a refinement of last year's legislation, AB 45, to further outline a defined and stable regulatory environment for licensed CBD products in the state."

California Hemp Council, Cronos USA Client Services LLC, The Parent Company, and U.S. Hemp Roundtable write that they hope the DCC report will provide reasonable proposals to integrate hemp-derived cannabinoids into the cannabis supply chain, and that AB 1656 will serve as a vehicle to effectuate the intent of this report.

DIGEST: This bill implements several reforms of the conservatorship system for adults unable to care for their own affairs and codifies requirements for supported decisionmaking as a less restrictive alternative to a conservatorship.

Senate Floor Amendments of 8/22/22 make a number of modifications to the bill's existing changes to the Probate Code conservatorship system and the establishment of a supported decisionmaking framework in response to concerns from the

Director of Developmental Services and the California Health and Human Services Agency. The amendments also make changes to avoid chaptering-out conflicts with AB 2960 (Committee on Judiciary, 2022).

ANALYSIS:

Existing law:

1) Authorizes a court to appoint a conservator of the person or estate of an adult, or both, provided that the adult is unable to provide specified personal needs or substantially unable to manage their own resources or resist fraud or undue influence and the conservatorship is the least restrictive alternative necessary for the protection of the conservatee. A conservatorship continues until the death of the conservatee or an order of the court terminating the conservatorship. (Prob. Code, §§ 1800.3, 1801, 1860.)

2) Requires the court, in the selection of a conservator, to be guided by what appears to be the best interests of the proposed conservatee, and sets forth an order of preference for persons to be appointed based on their relationship to the proposed conservatee. (Prob. Code, § 1812.)

3) Allows the Director of Developmental Services (DDS) be appointed as a guardian or conservator of a developmentally disabled person who is eligible for regional center services or is a patient in any state hospital; while the procedures for the establishment of a conservatorship under the Probate Code generally apply to such an appointment, the order of preferences for the person to be appointed does not. When DDS is appointed as a conservator, the services rendered must be performed through the regional centers or other agencies or individuals designated by the regional centers. (Health & Saf. Code, div. 1, pt. 1, ch. 2, art. 7.5, §§ 416 et seq.)

4) Sets forth the procedures for establishing a conservatorship and appointing a conservator, including the requirements of a petition requesting appointment of a conservator and an investigation by an investigator of the probate court. (Prob. Code, §§ 1821, 1826.)

5) Requires a court to provide all private conservators with written information concerning a conservator's rights, duties, limitations, and responsibilities in materials developed by the Judicial Council. (Prob. Code, § 1835.)

6) Requires a court to periodically review a conservatorship at six-month intervals (subject to appropriation) or, without an appropriation, after the first year and biannually thereafter. (Prob. Code, §§ 1850, 1863.)

7) Authorizes the creation of a limited conservatorship, as an alternative to a full conservatorship when the person's needs do not require a full conservatorship, that allows the conservatee to retain all legal and civil rights except those granted by the court to the limited conservator. A limited conservatorship continues until the death of the limited conservatee, an order of the court terminating the conservatorship, or where the order appointing the limited conservator contained a set termination date. (Prob. Code, §§ 1801(d), 1860.5.)

8) Requires a conservator to accommodate the desires of the conservatee, except to the extent that doing so would violate the conservator's fiduciary duties to the conservatee or impose an unreasonable expense on the conservatorship estate. (Prob. Code, § 2113.)

This bill:

1) Modifies the procedures and requirements for when DDS is appointed as a guardian or conservator for a minor or adult developmentally disabled person, including by requiring DDS to work with regional centers to implement less restrictive alternatives to conservatorships; requiring, by January 1, 2024, DDS to develop guidelines to mitigate conflicts that may arise when a regional center is serving as DDS's designee and is also responsible for service coordination activities for the conservatee; permitting DDS to submit specified preexisting reports in connection with a conservatorship petition if specified conditions are met; and prohibiting, for any conservatorship petition filed on or after January 1, 2023, a regional center from serving as a conservator, though the regional center may act as DDS's designee.

2) Requires Judicial Council, as part of its duty to train court-employed staff and attorneys appointed to represent conservatees and wards and proposed conservatees and wards, to include training on specified less restrictive alternatives to conservatorship, with assistance from stakeholders including the State Council on Developmental Disabilities, DDS, and the California Department of Aging.

3) Requires a court, in determining whether a conservatorship is the least restrictive alternative available and whether to grant or deny a petition for conservatorship, to consider the person's abilities and capacities with current and possible supports, as specified.

4) Provides that if a court becomes aware that a proposed conservatee has a developmental disability, and the proposed conservator is not seeking authority to act under provisions for a person with a major neurocognitive disorder, as

defined, the court must deem the proceeding to be seeking a limited conservatorship.

5) Requires a petition requesting the appointment of a conservator to set forth the less restrictive alternatives to conservatorship that were considered and why those alternatives would not be suitable, and any alternatives tried and details about why they did not meet the proposed conservatee's needs.

6) Expands the courts' duty to provide written information to conservators to apply to private conservators, and requires the written information include additional information relating to conservator's obligations.

7) Requires a court to provide all conservatees, within 30 days of the establishment of the conservatorship and annually thereafter, with specified information written in plain language describing the conservatee's rights within the conservatorship and any rights expressly withheld by the court.

8) Requires the Judicial Council, upon appropriation by the Legislature, to establish a conservatorship alternatives program within each self-help center in every state Superior Court to assist persons inquiring about conservatorships.

9) Requires a court investigator, as part of the annual conservatorship investigation, when possible, to discuss with the conservatee less restrictive alternatives to conservatorship and to report to the court whether the conservatee or conservator wishes to modify or terminate the conservatorship. If the investigator's report indicates that the conservator or conservatee wishes to modify or terminate the conservatorship, the court must consider a prompt modification or termination.

10) Requires a court, when finding by clear and convincing evidence that a conservatee continues to meet the criteria for limited conservatorship so as to avoid terminating the conservatorship, to make its findings on the record.

11) Provides that, if a petition for termination of a conservatorship or limited conservatorship is uncontested and states facts showing that both the conservator and conservatee wish to terminate the conservatorship or limited conservatorship, and the conservatorship is no longer the least restrictive alternative for the conservatee's protection, the court may terminate the conservatorship or limited conservatorship without an evidentiary hearing.

12) Requires the court, upon receipt of a communication from a conservatee that the conservatee wishes to terminate their conservatorship, appoint counsel for the conservatee and set a hearing for the termination of the conservatorship

when either (a) there has not been a hearing for the termination of the conservatorship within the 12 months preceding the communication; or (b) the court believes there is good cause to set a hearing.

13) Requires a conservator, to the greatest extent possible, to support the conservatee to maximize their autonomy, support the conservatee in making decisions, and, on a regular basis, inform the conservatee of decisions made on their behalf. In determining the desires of the conservatee, to consider stated or previously expressed preferences.

14) Adds Division 11 to the Welfare and Institutions Code, establishing supported decisionmaking (SDM) for adults with disabilities, and specifies that the division does not apply to supporters trained pursuant to the CARE Court program (SB 1338, Umberg, 2022).

15) Makes findings and declarations relating to the importance of maintaining the greatest degree of autonomy possible for adults with disabilities and the effectiveness of supported decisionmaking for adults with disabilities.

16) Defines relevant terms, including "adult with a disability," "life decision," "supported decisionmaking," "supported decisionmaking agreement," and "supporter."

17) Provides that a supporter is bound by all existing obligations and prohibitions otherwise applicable by law that protect people with disabilities and the elderly from fraud, abuse, neglect, coercion, or mistreatment, and that the division does not limit a supporter's civil or criminal liability for prohibited conduct against the person with a disability, as specified.

18) Prohibits a person from serving as a supporter in specified circumstances, including when they have been the subject of a prior allegation under the Elder Abuse and Dependent Adult Civil Protection Act or have been found liable for abuse, neglect, mistreatment, coercion, or fraud.

19) Sets forth a supporter's obligations and the restrictions on a supporter, including prohibiting a supporter from participating a life decision in which the supporter has a conflict of interest.

20) Permits an adult with a disability to enter into a written SDM agreement with one or more chosen supporters; the support may include helping the adult with a disability obtain and understand information related to a life decision, communicating the decision to others, and assisting the individual to ensure their preferences and decisions are honored.

21) Provides, as declarative of existing law and notwithstanding any other provision in the new Division, that an adult with a disability may request, and is entitled to have present, one or more other adults, including supporters, in any meeting or communication. A third party may not refuse the presence of another adult unless they reasonably believe the other adult is engaging in fraud, coercion, or abuse that the third party is required to report pursuant to the Elder Abuse and Dependent Adult Civil Protection Act.

22) Requires a written SDM agreement to be written in plain language, include specified information and be signed by the supporter and supported person in the presence of two disinterested witnesses or a notary public. The written agreement must be reviewed by all supporters and the adult with a disability every two years and updated as needed.

23) Provides that a SDM agreement is effective until it is terminated by any of the parties, the terms of the agreement, the death of the adult with a disability, or all of the supporters are no longer eligible to serve, and that any party may choose to terminate their participation at any time.

24) Requires, when the California Health and Human Services Agency develops training materials on SDM, the Agency to consider the needs of underserved individuals, existing SDM materials and practices developed nationwide, and consult with stakeholders.

FISCAL EFFECT: Appropriation: No Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee, ongoing cost pressures, likely in the tens of millions of dollars to fund SDM-TAP and the conservatorship alternatives program (General Fund).[1]

OPPOSITION: (Verified 8/22/22)

Autism Society San Francisco Bay Area
National Council on Severe Autism
The Arc and United Cerebral Palsy California Collaboration

ARGUMENTS IN SUPPORT: According to Disability Voices United, a co-sponsor of the bill:

> AB 1663 will reform and improve California's probate conservatorship system in four important ways to help maintain choice and control over their lives. First, the bill would help reduce probate conservatorships by recognizing less restrictive alternatives, such as Supported Decision-Making, which provides people with disabilities and older adults a way to understand, make, and communicate their own decisions with the help of their chosen supporters. Second, the bill would make probate conservatorships a last resort. Third, the bill makes it easier to end conservatorships. Finally, AB 1663 would ensure that conservatees have a level of choice in decisions made regarding their lives.

ARGUMENTS IN OPPOSITION: According to Autism Society San Francisco Bay Area, writing in opposition:

> The sum of $10 million should be spent on bolstering our underfunded, heavily burdened conservatorship system—not on the development of a supposedly new alternative, one that is *already* authorized under law. Supported decisionmaking is already available to any person who feel a need for help in making decisions: a new bureaucracy to "formalize" it does not advance the most pressing needs of adults with [autism and intellectual and developmental disabilities (I/DD)]. While Supported Decisionmaking is popular among ideological advocates, there is no clamor for it, at all, in our autism and I/DD communities. AB 1663 does nothing to address the very real problems we face in the conservatorship system:
>
> - The need for better training and support for conservators
> - The need for a simple, timely, low-cost path for appointment of successor conservators
> - The need for increased levels of court supervision, particularly after parents pass away
> - The systematic underfunding of the heavily overburdened conservatorship system

SUBJECT: State Teachers' Retirement System: administration

SOURCE: California County Superintendents Educational Services Association
California Retired Teachers Association
California Teachers Association

DIGEST: This bill alters the manner in which the California State Teachers' Retirement System (CalSTRS) can audit public school employers, employees, and retirees related to the reporting of creditable service and compensation and limit CalSTRS' ability to collect pension overpayments arising from errors in reporting disallowed compensation.

Senate Floor Amendments of 8/25/22:

1) Allocate costs, beginning July 1, 2024, of CalSTRS pension overpayments resulting from reporting errors based on who caused the error, as specified, including providing that CalSTRS shall recover costs deemed its errors, with

interest as specified, from the state through a continuous General Fund appropriation to recover 85% of the pension overpayments and directly from all school employers for the other 15%.

2) Limit the amount by which CalSTRS can reduce a retired teacher's (or their beneficiary's) monthly allowance by no more than 15 percent if the retiree or an individual on their behalf, as specified, caused the error due to inaccurate information or not submitting information.

3) Delete existing law authorizing CalSTRS to recover overpayments from reported information CalSTRS determines was designed to enhance a pension.

4) Delete existing law that requires the school employer to pay to CalSTRS the differential from the total overpayment and the retired teacher's recalculated pension, as specified.

5) Clarify that a CalSTRS advisory letter's shield from liability for employers and members applies only to an error made by an employer on reliance of the letter or on behalf of a CalSTRS member to whom the advisory letter expressly relates. If the error meets those conditions, the resulting overpayment shall be deemed a CalSTRS error and shall be recovered, with interest as specified, under the 85% State GF / 15% All School Employer ratio described above.

6) Provide that when a public agency or member waives their right to an administrative hearing regarding a CalSTRS audit, as specified, the audit becomes CalSTRS' final determination *as to that public agency or that CalSTRS member.*

7) Clarify that with respect to the bill's requirements that CalSTRS notify affected members' unions of its audit activities and the audit results and provide the union an opportunity to respond, as specified, the bill does not confer additional due process rights to the union.

ANALYSIS:

Existing law:

1) Establishes the E. Richard Barnes Act that, together with certain other areas within the Education Code administered by CalSTRS, is known as the Teachers' Retirement Law (TRL). (Education Code § 22000)

2) Establishes that the purpose of CalSTRS is to provide a financially sound plan for the retirement, with adequate retirement allowances, of teachers in the

public schools of this state, teachers in schools supported by this state, and other persons employed in connection with the schools. (ED § 22001)

3) Establishes, pursuant to the constitution, that the retirement board of a public pension or retirement system has plenary authority and fiduciary responsibility for administration of the system, and among other provisions, consistent with the fiduciary responsibilities vested in it, must have the sole and exclusive power to provide for actuarial services in order to assure the competency of the assets of the public pension or retirement system. (Ca. Const., Art XVI, § 17)

4) Provides for a three-year limitation of action relating to adjustments of errors and omissions by or against CalSTRS after which CalSTRS must discharge all obligations to, or on behalf of, the member and others, as specified. (ED § 22008)
   a) If CalSTRS makes an error that results in an incorrect payment to such individuals, CalSTRS' right of recovery expires three years from the date of the incorrect payment.
   b) If CalSTRS makes an incorrect payment due to the lack of, or inaccurate, information, as specified, the three-year period of limitation on recovery commences with the discovery of the incorrect payment.
   c) If CalSTRS makes an incorrect payment based on the member's fraud or intentional misrepresentation, the three-year limitation does not commence until CalSTRS discovers the incorrect payment.

5) Authorizes CalSTRS to reduce the retiree's monthly allowance payable under the Defined Benefit (DB) Program, Defined Benefit Supplement (DBS) Program, and Cash Balance (CB) Benefit Programs, as specified, if the overpayment was due to CalSTRS' error, the county school superintendent's error, or district's error, or if the error was due to inaccurate or nonsubmission of information by the recipient of the benefit allowance. (ED § 24617)

6) Provides for violations and penalties of one-year imprisonment in a county jail, or a fine up to $5,000, or both, including restitution, with respect to actions that defraud or attempt to defraud CalSTRS with respect to any benefit it administers. (ED § 22010)

7) Establishes that CalSTRS must deduct any overpayment made to, or on behalf of, any member, former member or beneficiary from any subsequent benefit that may be payable under either the DB, DBS, or CB Benefit programs and may concurrently proceed with any legal claim for restitution. (ED § 24616)

8) Provides that if an employer reports erroneous information to CalSTRS, the system must calculate the actuarial present value (APV) of the expected payments from the member, the former member, or beneficiary pursuant to existing law, and require the employer to pay the difference between the total amount of the overpayment and the calculation of the APV of the expected payments. (ED § 24617)

9) Authorizes CalSTRS to recover overpayments by reducing a benefit recipient's monthly allowance under the DB, DBS, or CB programs by an amount no greater than five percent if the overpayment was due to CalSTRS' error or that of the county superintendent or the district, and by no more than 15 percent if the error was due to the benefit recipient's submission of inaccurate information or nonsubmission of information. (ED § 24617)

10) Establishes procedures concerning payment and compliance with federal law in making distributions whereby CalSTRS must make plan distributions in accordance with Section 401(a)(9) of the Internal Revenue Code and related regulations.

11) Defines, generally, "creditable compensation" to mean compensation reportable to CalSTRS for an employee's performance of "creditable service." Sick leave, vacation, or an employer-approved leave are included in the statutory definition of this term.[1] "Creditable service" generally means the work activities that count toward years of service for purposes of CalSTRS retirement. (ED § 22119.5, 22119.6, and 26113)

12) Requires CalSTRS staff to report annually to the CalSTRS board the amount of underpayment made to recipients under the DB, DBS, and CB programs; the amount to be recovered because of overpayments; and the number of overpayments under these programs. (ED § 24619)

13) Provides, pursuant to the state constitution that all people have inalienable rights, including the right to pursue and obtain privacy. (Ca. Const., Art. I, § 1)

14) Provides that, mindful of the right of individuals to privacy, the Legislature finds and declares that access to information concerning the conduct of the people's business is a fundamental and necessary right of every person in this state. (Government Code § 6250)

---

[1] Sections 22119.2 (for CalSTRS' 2% at 60 members) and 22119.3 (for CalSTRS' 2% at 62 members) of the Education Code, respectively. Also see Chap. 2, Div. 3, of Title 5 Cal. Code of Regs, and Sections 27400 and 27401 regarding creditable compensation, and Sections 27500 and 27501 regarding noncreditable compensation, id.

This bill:

1) Defines "Employee Representative" to mean "an exclusive representative as defined in subdivision (e) of Section 3540.1 of the Government Code. [2]

2) Requires CalSTRS, before auditing the records of a public agency, to provide written notice of the intended audit to the public agency and the appropriate exclusive representative of members that the audit may affect.

3) Requires the audit notice to apprise the public agency and the exclusive representative of the purpose and scope of the intended audit.

4) Requires the public agency to provide CalSTRS with the name and contact information for all applicable exclusive representatives for purposes of carrying out these provisions.

5) Requires an audited public agency to cooperate in good faith with CalSTRS and provide all information requested in a timely manner. The public agency, at the time it provides information to CalSTRS, shall also provide all the information to the appropriate exclusive representative of the members affected by the audit.

6) Authorizes an audited public agency and the exclusive representative to provide additional information relevant to the audit, and requires CalSTRS to consider this information in preparing its audit findings. Clarifies that this does not confer additional rights, including due process right, upon the exclusive representative other than the notification and response rights provided by the bill

7) Requires CalSTRS, prior to issuing its final audit report, to provide to the audited public agency and to the exclusive representative its preliminary audit findings, the statutes being addressed by the audit, and a list of every member then known and affected by the audit.

8) Allows the recipients to provide, within not less than 60 days as specified by CalSTRS, their written responses to the preliminary audit findings and requires CalSTRS to consider their responses in preparing its final audit report.

---

[2] GC § 3540.1 (e) defines "Exclusive Representative" to mean the employee organization recognized or certified as the exclusive negotiating representative of public school employees, as "public school employee" is defined in subdivision (j), in an appropriate unit of a public school employer.

9) Requires the public agency to provide CalSTRS and the exclusive representative, within not less than 60 days as specified by CalSTRS, a list of the names of any members affected by the audit, as specified.

10) Requires CalSTRS to provide the final audit report to the public agency audited and to the exclusive representative and to provide the audited public agency with an explanation of its appeal rights. Clarifies that this does not confer additional rights, including due process right, upon the exclusive representative other than the notification and response rights provided by the bill

11) Requires CalSTRS to provide the final audit report, with an explanation of appeal rights, to each member affected by the audit following the public agency's notification of the members.

12) Requires CalSTRS to provide a copy of the final audit report and an explanation of appeal rights to a member or former member whom it later discovers the audit affected or to their beneficiaries if the member or former member is deceased.

13) Authorizes the audited public agency to request an administrative hearing if it disagrees with the final audit report.

14) Requires the public agency to make the request in writing and mail or email it within 90 days of the reports transmission to the public agency to the address CalSTRS identifies in the final audit report.

15) Provides that the public agency waives the right to an administrative hearing if it fails to request the hearing in the allotted time and the final audit report findings become CalSTRS's final determination *as to that public agency*.

16) Provides that an affected member may request an administrative hearing if the member disagrees with the final audit report. The member shall make the request in writing and mail or email it to the designated address CalSTRS identifies in the final audit report within 90 days of the report transmission to the member.

17) Provides that the member waive the right to an administrative hearing if the member fails to request the hearing in the allotted time and the final audit report findings become CalSTRS's final determination *as to the member*.

18) Requires CalSTRS to make all final employer audit reports available on its internet website and requires CalSTRS to exclude personal information regarding members to the extent necessary to protect their privacy.

19) Requires CalSTRS, at least annually, to provide resources that interpret and clarify the applicability of creditable compensation and creditable service laws and regulations.

20) Prohibits new or different interpretations, as specified, from taking effect until after CalSTRS issues notice to employers and exclusive representatives and prohibits the interpretations from applying retroactively to compensation reported prior to that notice, unless state or federal law or an executive order of the Governor expressly requires a retroactive interpretation.

21) Prohibits new or different interpretations applying before the next July 1 unless changes to state or federal law, an executive order of the Governor, a CalSTRS advisory letter, or programs require application of revision of the creditability of compensation on an earlier basis.

22) Provides that, for audit purposes or any other CalSTRS actions, employers are responsible for the rules in effect at the time they report compensation except when expressly superseded by state or federal law or an executive order of the Governor.

23) Deems any compensation the public agency reported in accordance with the resources provided by CalSTRS, as specified, to be CalSTRS' error and requires CalSTRS to recover the costs, with interest as specified, of the resulting pension overpayment as follows: 85% from the state through a continuous General Fund appropriation and 15% directly from all school employers.

24) Authorizes an employer or an exclusive representative to submit to CalSTRS a request for an advisory letter and defines the following terms for purposes of requiring CalSTRS to respond to the request:
    a) "Advisory letter" means a written determination issued to an employer or an exclusive representative in response to the employer's or exclusive representative's submission relating to compensation that is included, or is proposed to be included, in a publicly available written contractual agreement in order for the system to provide formal written guidance for the proper reporting of such compensation consistent with the laws governing creditable compensation and the administrative regulations of the system.

b) "Material facts" means facts that would have changed the determination made in an advisory letter.

25) Requires a submission to CalSTRS for an Advisory letter to be in writing on a form provided by CalSTRS and to include the compensation language, a description of the facts related to the compensation language and the basis of the requesting party's inquiry, including, but not limited to, specific questions about the reporting of the compensation, and any other supporting documents or requirements CalSTRS deems necessary to complete its review.

26) Permits CalSTRS to deny a submission if it involves an issue that is in litigation with CalSTRS and the employer or a member to whom the advisory letter would expressly relate.

27) Permits the employer or exclusive representative to withdraw a submission any time before CalSTRS provides an advisory letter.

28) Requires CalSTRS to provide an advisory letter regarding the submission to the employer or exclusive representative within 30 days of the receipt of all information requested, unless an extended period of time is necessary for good cause.

29) Clarifies that state or federal law, a Governor's executive order, or CalSTRS rule, as provided, may supersede an advisory letter.

30) Deems any resulting overpayment from compensation reported in error by the employer or on behalf of a member to whom an advisory letter applies that was in accordance with CalSTRS's advisory letter, as CalSTRS' error and requires CalSTRS to recover the costs, with interest as specified, of the resulting pension overpayment as follows: 85% from the state through a continuous General Fund appropriation and 15% directly from all school employers.

31) Allows only the employer or the member to whom an advisory letter expressly relates to use and rely upon, or offer as evidence of a CalSTRS error, the advisory letter in an action brought by CalSTRS.

32) Conditions the use and reliance upon, or the offering in evidence of, an advisory letter on CalSTRS' determination that one disclosed all material facts related to the compensation in the employer or union's submission and that the employer reported compensation in reliance on the advisory letter.

33) Makes this bill's advisory letter provisions operative on July 1, 2023.

34) Authorizes a county superintendent of schools that reports directly to CalSTRS to draw requisitions against the county school service fund and the funds of the county's respective employing agencies in amounts equal to the total the employing agency is required to pay for the purpose of remitting contributions, assessments, or any other payment CalSTRS requires.

35) Permits the county superintendent of schools to draw requisitions against the county school service fund and the funds of the county's respective employing agencies, as applicable, in amounts necessary for recovering payments made pursuant to the process established by the bill for recovering overpayments when the employer committed error in reporting disallowed compensation.

36) Amends a statute that gives CalSTRS' authority to collect overpayments, as specified, by deducting the amount from a member's benefits, to reference the bill's newly established procedure to collect payments from employers if the employer's error caused the reporting of disallowed compensation.

37) Requires, except as limited by existing statute of limitation laws that limit the time CalSTRS has to recover overpayments (i.e., generally three years), all amounts that CalSTRS has overpaid to a member due to inaccurate information, untimely submission, nonsubmission of information, or on the basis of fraud or intentional misrepresentation by, or on behalf of, a recipient of a benefit, annuity, or refund to be recovered, as applicable, from the member, participant, former member, former participant, or beneficiary except amounts overpaid as follows:
    a) All amounts overpaid due to the employer's inaccurate information, untimely submission, or nonsubmission of information, as specified. CalSTRS shall recover such amounts from the employer.
    b) Amounts overpaid due to a county superintendent's inaccurate information, untimely submission, or nonsubmission of information, as specified. CalSTRS shall recover such amounts from the county superintendent who in turn, may recover from the employer if the employer was the cause of such reporting or approved the reporting by the superintendent, as specified.
    c) Amounts overpaid due to errors deemed by the bill to be CalSTRS' error. The bill requires CalSTRS to recover the costs, with interest as specified, of the resulting pension overpayment as follows: 85% from the state through a continuous General Fund appropriation and 15% directly from all school employers.

38) Requires an employer to remit to CalSTRS specified required amounts within 30 days of the date of the invoice. If the system does not receive payment

within 30 days, the amount owed to the system shall be recalculated to include regular interest from the initial due date.

39) Requires the State Controller, upon CalSTRS's order as specified, to reduce subsequent payments from the State School Fund to the county for deposit in the county school service fund by the amount owed or, upon the request of a county superintendent of schools to the county auditor, the Controller shall reduce payments to a school district for deposit in the district general fund by the amount owed, and pay CalSTRS if the owed amount is not received within 30 days.

40) Exempts from this bill's overpayment recovery procedures specified recovery of overpayments associated with disability payment interactions and limitations, other public benefit payments, and post-retirement earnings limitations.

41) Deletes existing law that requires a school employer who reported an error to CalSTRS resulting in a pension overpayment to pay the difference between the actuarial adjusted pension and the pension overpayment, as specified.

42) Requires CalSTRS to correct the plan benefit to recover a benefit overpayment but prohibits CalSTRS from reducing the retiree's monthly benefit allowance by more than 15% if the error that caused the overpayment amount was due to inaccurate information or nonsubmission of information by, or on behalf of, a recipient of the allowance (but not including such an error by CalSTRS, the county superintendent, or a school employer).

43) Prohibits one from interpreting the bill's overpayment recovery procedure, as specified, from limiting CalSTRS authority to correct benefits except as explicitly provided by the provisions that establish the procedure.

Related/Prior Legislation

AB 2493 (Chen, 2022) requires County Employee Retirement Law (CERL) Systems to bear the costs of insulating peace officer and firefighter retirees retroactively from required pension allowance adjustments due to the California Supreme Court's *Alameda* decision arising out of disallowed compensation. The bill is currently on the Senate Floor.

AB 826 (Irwin, 2021) amends the CERL definition of "compensation" and "compensation earnable" for legacy members of the Ventura County Employee Retirement Association (VCERA) to include an employee's flexible benefit allowance, subject to specified criteria, and ensure that such compensation not be

deemed disallowed compensation prohibited by PEPRA and the *Alameda* decision. The bill is currently on the Senate Floor on the Senate Inactive File.

SB 278 (Leyva, Chapter 331, Statutes of 2021) required CalPERS public employers to reimburse CalPERS for overpayments made to retirees whose pension allowances were eventually adjusted downward to reflect the disallowed compensation initially included in their pension calculation.

SB 266 (Leyva, 2019) would have required that, in the event of a CalPERS retiree having their pension reduced due to the inclusion of compensation by the relevant public employer that cannot be counted towards a final pension calculation, the public employer would have to cover the reduced benefit to the retiree, as specified. The Assembly held the bill at the Desk after being withdrawn from Engrossing and Enrolling.

SB 1124 (Leyva, 2018) also dealt with disallowed compensation for CalPERS members, retirees, beneficiaries, and survivors. The Governor vetoed the bill.

FISCAL EFFECT: Appropriation: Yes Fiscal Com.: Yes Local: No

According to the Senate Appropriations Committee:

- CalSTRS anticipates that $1.5 million to $3 million in overpayments that are recoverable under current law would not be so under the provisions of the bill. For perspective, the pension system recaptured $74 million in overpayments in 2020-21 (Teachers' Retirement Fund).

- CalSTRS indicates that it would incur annual staffing costs of $4.8 million to implement the provisions of the bill, and notes that required administrative system changes would create unknown, but likely significant costs, and delays for its new pension administration system (Teachers' Retirement Fund).
